INTRODUCTION

This volume contains two of the eight social and cultural tables included in the C series tables of the census. They are C-VII (Religion) and C-VIII Part A (Scheduled castes) and Part B (Scheduled tribes). All C series tables except C-V, C-VII and C-VIII are prepared on the basis of a ten per cent (rural) and 20 per cent (urban) sample. Tables C-V, C-VII and C-VIII are prepared on a full count and table C-I (Part A & B) on a 20 per cent sample.

It has been the general practice to present the C series—social and cultural tables—separately in one volume. According to the 1971 plan of census tabulation, eight C series tables are to be prepared. Except table C-I relating to the composition of households, they deal with social and cultural characteristics of the population, age and marital status, literacy and educational levels, mother-tongue, bi-lingualism, religion and special characteristics of scheduled castes and scheduled tribes. These C series tables except table C-I are compiled from the answers to various questions included in the individual slip. Table C-I is compiled from data collected in the household schedule. The questions which have figured in the preparation of these tables are given below:—

Table	Subject	Prepared on	Question	Source
C-I	Composition of household	Sample		Household schedule.
C-II	Age and marital status.	Sample	5	Marital status
C-III	Age, sex and education.	Sample	3&4	Age educational levels.
C-IV	Single-year age return.	Sample	4	Age
C-V	Mother-tongue	Full count	14	Mother-tongue
C-VI	Bilingualism	Sample	15	Other languages.
C-VII	Religion	Full count	10	Religion
C-VIII	SC/ST	Full count	11	SC/ST

(In respect of tables C-II to C-VIII, column 4 mentions the number of the concerned question in the individual slip and column 5 its content).

Tables C-VII and C-VIII included in this volume were prepared by manual processing on a full count basis. Table C-V (Mother-tongue), C-VI (biligualism) and other 'C' series tables will appear in volume Part II-C(ii) which is being published separately. The instructions to enumerators for collecting data included in tables C-VII and C-VIII (published in this volume) are produced below:—

Question 10 : *Religion.*—In answering this question use the following abbreviations :

H: Hinduism, I : Islam, C : Christianity, S : Sikhism; B: Buddhism; J : Jainism.—For others record the actual religion as returned fully.

If a person says that he has no religion it may be recorded accordingly. Do not mistake religion for caste which will not be recorded here.

Question 11 : *Scheduled caste or Scheduled tribe.*—You have been furnished with a list of scheduled castes and scheduled tribes notified for your state. Ascertain if the person enumerated belongs to a scheduled caste or scheduled tribe and, if he does, then record the name of the scheduled caste or scheduled tribe which should find place in the list furnished to you. The answer should be recorded against the correct rectangle provided for the purpose against this question For a person who is not a member of any scheduled caste or scheduled tribe, write 'X' in both the rectangles.

If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by synonym or generic name of a caste or a tribe, it should be entered only if it finds a place in the list furnished to you Do not write the names of scheduled castes in general terms as 'Harijan' or 'Achhut'. You should ascertain the name of the caste when it is returned and write it in the rectangle provided for recording the name. Similarly, do not write the names of scheduled tribes in general terms as 'Adivasi'. You should ascertain the name of the tribe when it is returned and write it in the rectangle with broken lines provided for recording the same. If a person is negligent and insists on calling himself merely 'Harijan' or 'Achhut' or 'Adivasi' as the case may be, tell him that this description is not adequate for census purpose and persuade him to give out the actual name of the caste or tribe. You should make all efforts to ascertain the correct name of the scheduled caste or scheduled tribe as found in the notified list. If the person merely claims to be a scheduled caste or scheduled tribe but says that he does not belong to any of the notified communities applicable to the area, he will not be entered as a scheduled caste or scheduled tribe.

Scheduled castes can belong only to the Hindu or Sikh religion. If a person belongs to a scheduled caste, there will be either 'H' or 'S' in the answer to question 10. Scheduled tribes may belong to any religion.

RELIGION

The data presented in table C-VII includes six major religious groups among which Hindus numerically predominate. As in India as a whole and most of the other states, Hindus in Maharashtra form the largest community with a population of more than 41 million (81 94 per cent) out of 50 million total population of the state. The second largest religious group is that of Muslims (8 40 per cent). The Buddhists come third (6.47 per cent); this includes the erstwhile Hindu scheduled castes declaring themselves as Nav Buddhists after the conversion of a very large number of their community to Buddhism. The Distribution of 1971 population by major religions and then proportions to total for 1961 and 1971 are shown in the next column.

Religion	1971	Proportion to total population	
	Population	1971	1961
All religions	50,412,235	100.00	100.00
Hindus.	41,307,287	81·94	82.24
Muslims	4,233,023	8.40	7.67
Buddhists	3,264,223	6.47	7.05
Christians	717,174	1.42	1.42
Jains	703,664	1.40	1.23
Sikhs	101,762	0.20	0.15
Others (including religion not stated).	85,102	0.17	0.24

The proportions of Hindus and Buddhists show a slight reduction from those of 1961 though in actual numbers they have increased during the decade 1961-71. The proportion of Christians has remained the same while those of Muslims, Jains and Sikhs show improvement.

HINDUS

Hindus form the highest percentage in all the districts of Maharashtra with Dhulia (91 25) which has the highest percentage of tribal population at one end to Greater Bombay (68 85) at the other end of the scale. Their percentage goes below 80 only in eight out of the 26 districts. These are Greater Bombay (68.85), Aurangabad (74 84), Parbhani (76 12), Nanded (77.86), Buldana (75.87), Akola (70 15), Amravati (74.84) and Nagpur (77 40). Their percentages in the 18 remaining districts is as follows:—

District	Hindus as percentage of total pop.
Bombay division	
Thana	86.22
Kolaba	88.25
Ratnagiri	87.08
Nasik	84.45
Dhulia	91.25
Jalgaon	83 99
Poona division	
Ahmednagar	88 01
Poona	85.99
Satara	89.85
Sangli	85.81
Sholapur	87 65
Kolhapur	88.54
Aurangabad division	
Bhir	86.96
Osmanabad	84.78
Nagpur division	
Yeotmal	83.47
Wardha	80.85
Bhandara	84.75
Chandrapur	86 64

The districts of Bombay and Poona divisions have larger proportions of Hindus because of their lower proportions of Buddhists, while the districts of Aurangabad division and the northern districts of Nagpur division have comparatively lower proportions of Hindus because of their larger proportions of Muslims and Buddhists respectively.

Out of 232 tahsils, 88 tahsils have more than 90 per cent of Hindus in their population. In 20 tahsils, the proportion is above 95 per cent. Four of these are from Thana—Talasari, Mokhada, Jawhar and Vada; two from Kolaba—Alibag and Pen; one from Ratnagiri—Kudal, three from Nasik—Peint, Surgana, Kalvan; three from Dhulia—Sakri, Nawapur and Akrani; one from Poona—Ambegaon four from Kolhapur—Panhala; Radhanagari, Chandgad and Bhudargad; one from Amravati—Melghat; and one from Chandrapur—Sironcha. All these tahsils except those of Kolaba, Ratnagiri, Poona and Kolhapur have appreciable tribal population.

The lowest proportion of Hindus is found in Nanded tahsil (62 11 per cent). In all the tahsils of Aurangabad, Parbhani and Nanded which are parts of the erstwhile state of Hyderabad and Buldana and Akola, parts of former Berar province, the proportion of Hindus is less than 90 percent of the total population of the tahsils.

Religious centres like Pandharpur, Jejuri, Trimbak and settlements of displaced persons like Ulhasnagar and Gandhinagar or mining centres like Redi and Sasti are the towns which have 90% of their population as Hindus. Malegaon town of Nasik, a weaving centre, has the lowest proportion of Hindus (27 46 per cent). It contains 67 53 per cent Muslim population Dombivali of Thana has the highest proportion of Hindus (96.09 per cent).

The distribution of towns by proportion of their Hindu population is given below:—

Proportion range	No. of towns
Less than 50 per cent	16
50—60 per cent	24
60—70 per cent	57
70—80 per cent	103
80—90 per cent	72

Growth rate of Hindu population

Hindus in the state increased from 32.5 million in 1961 to 41 3 million in 1971, showing a decadal growth rate of 26 98 per cent, which is less than that of the general population (27 45) and other religious groups like Muslims (39 50), Christians (27 93) and Jains (44 88). It was much less (13 58) during 1951-61 than that decade's state average of 23 60 owing to conversion of scheduled castes from among Hindus to Buddhism. The combined growth rate of Hindu and Buddhist population during 1951-61, and 1961-71 was 23 31 and 26 19 respectively which is fairly close to the state average rate of 23 60 and 27·45, respectively. The districtwise decadal variation in Hindus is from 8 45 in Ratnagiri to 43·27 in Greater Bombay followed by Thana (35 65) and Chandrapur (33.93).

MUSLIMS

Muslims, the second largest community forming 8 40 per cent of the total population of Maharashtra, are not concentrated in any of the districts. Aurangabad division contains 22 45 per cent and Nagpur division, 18 70 per cent of the State's Muslim population. The districtwise percentage of Muslims varies from 1 86 in Bhandara to 14 74 in Aurangabad. Greater Bombay, Jalgaon, Aurangabad, Parbhani, Nanded, Osmanabad, Buldana Akola and Amravati have larger percentages of Muslims ranging from 10 to 15. The districts where the percentage is in the lowest range of less than 5 00 are Satara (3 62), Wardha (3 69), Bhandara (1 86) and Chandrapur (2·16).

In some of the tahsils and towns, the Muslims are found concentrated owing to historical reasons or type of industry. Bhiwandi (24 84) of Thana, Malegaon (31 47) of Nasik, Aurangabad (23.49) and Nanded (21 65) tahsils contain more than 20 per cent Muslim population. This is because of urban textile centres like Bhiwandi and Malegaon which employ sizeable numbers of Muslims in the powerloom and handloom industry. Aurangabad and Nanded are parts of the erstwhile Hyderabad state. The distribution of 232 tahsils by ranges of proportion of Muslim population is as below :—

Range	No. of tahsils
Less than 5 per cent	106
5—10 per cent	65
10—15 per cent	44
15—20 per cent	13
20 per cent and above	4
	232

Out of 289 towns, only four contain more than 50 per cent of their population as Muslims. These are Malegaon (67 53), Bhiwandi (55 03), Balapur (61 62) and Jintur (50 27). Eleven towns rank in the next range of 40—50, 27 in the range of 30—40, 57 in the range of 20—30 , 83 in 10—20 and 107 towns in the range of ten and below.

Growth rate of Muslim population

From 2·44 million in 1951, the Muslim population increased to 3 03 million in 1961 and 4 23 million in 1971. The growth rates, 24 54 and 39 50 respectively, for Muslims are higher than those for Hindus and for the general population for both the decades. In Greater Bombay and Thana, the Muslim population rose by 56 64 and 70 95 per cent respectively in 1971. Other districts with more than a 40 per cent increase are Nasik (49 78), Poona (45 98), Kolhapur (43 33) and Chandrapur (47 53). The Muslim growth rate has always been slightly higher than the state average. In 1951-61, it was 24 54 per cent.

BUDDHISTS

Buddhists are mostly found in Nagpur division which contains 46·19 per cent of their total population in the state. Bombay division ranks next with 23 17 per cent followed by Aurangabad division (17·78) and Poona division (12·86). The districtwise variation is from 0·79 in Kolhapur to 16·15 in Akola. The percentagesin the districts of Bombay and Poona divisions vary from 1·74 in Dhulia to 5·55 in Ratnagiri and from 0 79 in Kolhapur to 4·79 in Satara respectively. In Nagpur division, the percentage varies from 9.21 in Yeotmal to 16 15 in Akola. In Aurangabad division, the highest percentage is found in Parbhani (11 49) and the lowest in Bhir (2·70).

There is only one tahsil, Balapur of Akola district, which contains a Buddhist population above 20 per cent. Out of the 12 tahsils in the second range of 15—20 per cent, ten are in Nagpur division and two in Aurangabad division. Of the 28 tahsils falling in the third range of 10—15 per cent nine are in Aurangabad division and 18 in Nagpur division and only one tahsil (Mandangad) in Bombay division. The movement of conversion of scheduled castes to Buddhism started in Nagpur and its influence was felt in the border tahsils of Parbhani and Nanded districts of Aurangabad division.

Five out of 289 towns contain more than 20 percent Buddhists. These are Manmad non-municipal (31 49), Kamptee (23 52), Kanhan (Pipri) (22 61), Pulgaon (23 83) and Purna (23·08). Some other towns with sizeable proportions are either headquarter towns, important railway centres or developing industrial centres.

Growth rate of Buddhist population

In 1951 there were only 2,487 Buddhists in the state. Their number rose to 2,789,501 in 1961 owing to large-scale conversion of members of scheduled castes to Buddhism which began in 1956. During the decade 1961-71, their growth rate (17.02) per cent was less than that of the state's (27·45 per cent) and also of the other major religions. The districtwise decadal variation is from a fall of 35.69 per cent in Sholapur to a rise of 67 59 per cent in Nanded.

CHRISTIANS

Christians form 1 42 per cent of the States population. Their highest percentage is found in Greater Bombay (6 29), followed by Thana (3.88), Ahmednagar (2 47), Poona (1 90) and Aurangabad (1·23). Other districts have proportions of less than one per cent. Of the total Christian population of the state, 90 per cent is found in Bombay and Poona divisions. Within these two divisions, the districts of Greater Bombay (52 33), Thana (12 34), Ahmednagar (7 81) and Poona (8 41), together account for more than 80 per cent of the entire Christian population. The distribution of 232 tahsils by ranges of proportion of Christian population is as below :—

Range	No. of tahsils
No Christian population	2
Less than 1 per cent	191
1—2 50 per cent	25
2.50—5 per cent	10
5 per cent—10 per cent	3
10 per cent & above	1
	232

Two tahsils, Mhasla in Kolaba and Mangalvedha in Sholapur, have no Christian population. Bassein tahsil with Bassein town, once a Portuguese stronghold, has the largest percentage (24 94) in the state, second only to that of Hindus. Thana (5 56), Shrirampur (5 39) and Nevasa (6·49) are the tahsils which have more than 5 per cent of their population as Christians. The next range 2·50 to 5 per cent having 10 tahsils, contains nine from Bombay and Poona divisions and one (Jalna) from Aurangabad division.

The highest percentages of Christians among towns are found in small towns of Thana District like Sandor (69 74) and Manikpur (45·36). They are followed by cantonment and military areas like Poona cantonment (15·25), Kirkee cantonment (10.25), Khadakvasla (10 71) and hill stations like Chikalda (19 98) which is the headquarters of the Korku Mission. Christian populations are thus generally larger in towns which were formerly important European settlements and which have established churches, schools, hospitals or other missionary centres.

Growth rate of Christian population

The Christians have increased from 4·33 lakhs in 1951 to 5 61 lakhs in 1961 and 7·17 lakhs in 1971. Though their growth rate during both the decades—29·39 per cent and 27 93 per cent—is higher than that for the general population there has been a slight decline in the rate during the last decade compared to that of 1951-61.

JAINS

Jains form only 1 40 per cent of the total population of the state. Kolhapur has the largest percentage (4·55) followed by Greater Bombay (4 10), Sangli (3·86), Poona (1 46), Ahmednagar (1·25) and Akola (1 01). In the remaining districts, Jains are less than one per cent. The Bombay and Poona divisions together account for about 83 per cent of the total Jain population of the state.

The tahsils with larger proportions of Jains are ound in Kolhapur and Sangli districts. Three tahsils have 10 per cent and above of Jain population. Those are Miraj from Sangli (10·03) Hatkanangale (10·52) and Shirol (19 48) from Kolhapur. There are no tahsils in the range of 5—10 per cent. Five tahsils fall in the range of 2·50 to 5 per cent. They are Nagar (2 76), Tasgaon (3 01), Walwa (3·21), Poona City tahsil (2 57) and Karvir (3·14). There are 49 tahsils in the range of 1—2·50 per cent while 175 have less than one per cent Jain population. These 175 tahsils include 34 out of 39 tahsils from Nagpur division.

Among the 289 towns, only five have more than 10 per cent of their population as Jains. These are Jaysingpur (21 12), Kurundvad (10·70), Sirur (15·40), Lasalgaon (10 68) and Ashta (16·35). Jains have not been returned in five towns—Sandor, Nandgaon (non-municipal), Mowad, Badlapur and Mohpa; 258 towns have less than 5 per cent and 21 fall in the range of 5 to 10 per cent.

Growth rate of Jain population

The Jain population rose from 3.38 lakhs in 1951 to 4·86 lakhs in 1961 and 7·04 lakhs in 1971. The growth rate in 1951-61 was 43 86; in 1961-71 it was 44 88.

SIKHS

Sikhs are the smallest among the six major religious communities of Maharashtra. They form hardly 0·20 per cent of the total population. In none of the districts does their percentage exceed 0·72 which is found in Greater Bombay. Greater Bombay has a concentration of 42·12 per cent of the total Sikh population of the state. Other notable districts are Poona (12 96), Nagpur (6·40) and Nanded (5·37).

Among tahsils only Nanded (1 48) shows more than one per cent of Sikhs to its total population. It has an important Sikh Shrine. In seven tahsils the percentages vary from 0.50 to 1. These are Ulhasnagar (0 83), Nasik (0·74), Nagar (0·70), Poona city tahsil (0·85), Haveli (0 64), Indapur (0 61) and Bhokar (0·55). In 185 tahsils, the percentage is less than 0 50. No Sikhs are found in 39 tahsils.

This community is mostly concentrated either in military areas or cantonments. Ahmednagar cantonment has the highest proportion (6·14 per cent).Others having more than 2 per cent are Kirkee cantonment (5·79), Deolali cantonment (2·67), Kalamb (4·22), Ballarpur (3·19), Lohagaon (4 38), Aurangabad(2·60), Kamptee Cantonment (3 45), Khadkvasla (5·67) and Nanded (2·40).

Growth rate of Sikh population

The decadal growth rate of Sikhs during 1951-61 was 39 06 which was higher than the state average (23·60) and next only to that of Buddhists and Jains. It further increased to 76·62 per cent in 1961-71 which was the highest for any religious community in the state. Greater Bombay which has more than 42 per cent of the total Sikh population in the state has shown a decadal increase by 68.48 per cent and Poona by 50·05 per cent.

The Table on page 5 shows the 1961-71 decadal growth rate of the six major religions in Maharashtra and its 26 districts.

The map on the facing page shows districtwise distribution of population by major religions.

SCHEDULED CASTES AND SCHEDULED TRIBES

The data for scheduled castes and scheduled tribes presented in Table C-VIII relate to the total of scheduled castes and scheduled tribes as well as for their break-up by individual castes and tribes. There is no general or standard definition of either a scheduled caste or a scheduled tribe. Under the Constitution of India, scheduled castes means such castes, races or tribes or part or group within such castes, races or tribes as are declared to be scheduled castes by the President of India by public notification under article 341 (1) of the Constitution. Similarly, scheduled tribes means such tribes or tribal communities or part or group within such tribes or tribal communities as are declared by the President to be scheduled tribes under article 342 (1) of the Constitution. The Government of India has not specified backward classes other than the scheduled castes and scheduled tribes and has left this matter to the discretion of the respective state governments, but it has advised them to adopt economic tests rather than caste criteria for this purposes.

According to the 1971 census, the population in Maharashtra of the scheduled castes is 3,025,761 and of scheduled tribes 2,954,249. Including 3,264,223 Buddhists in Maharashtra, the population of these three important groups comes to 9,244,233 or 18.34 per cent of the state's total population.

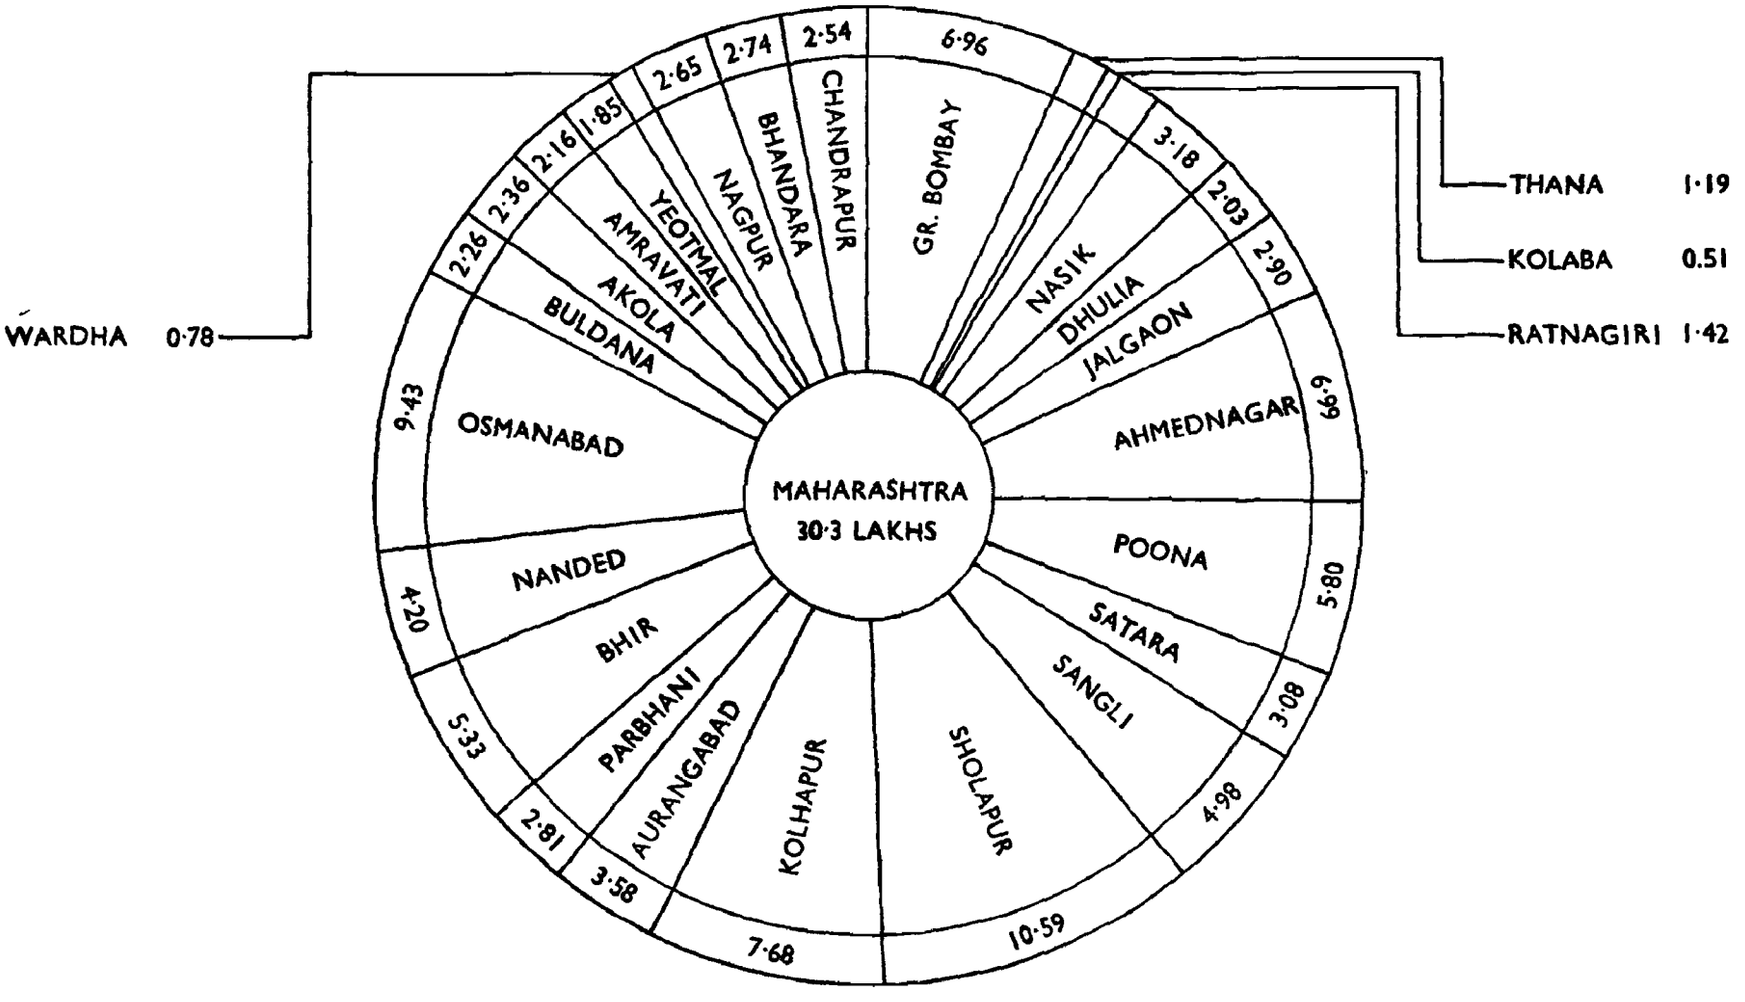

The scheduled castes and scheduled tribes shown in table C-VIII do not include backward castes or tribes, denotified tribes, nomadic tribes, etc. for whom certain privileges and concessions may have been allowed by the state government. A list of scheduled castes and scheduled tribes in Maharashtra state with area restrictions contained in the Presidential order is given at the end of the introductory note on Scheduled castes and tribes respectively. In cases where a caste or a tribe is declared as a scheduled caste or scheduled tribe for a specified area, that caste or tribe has been counted only for that specified area and not for any other area of the district or elsewhere.

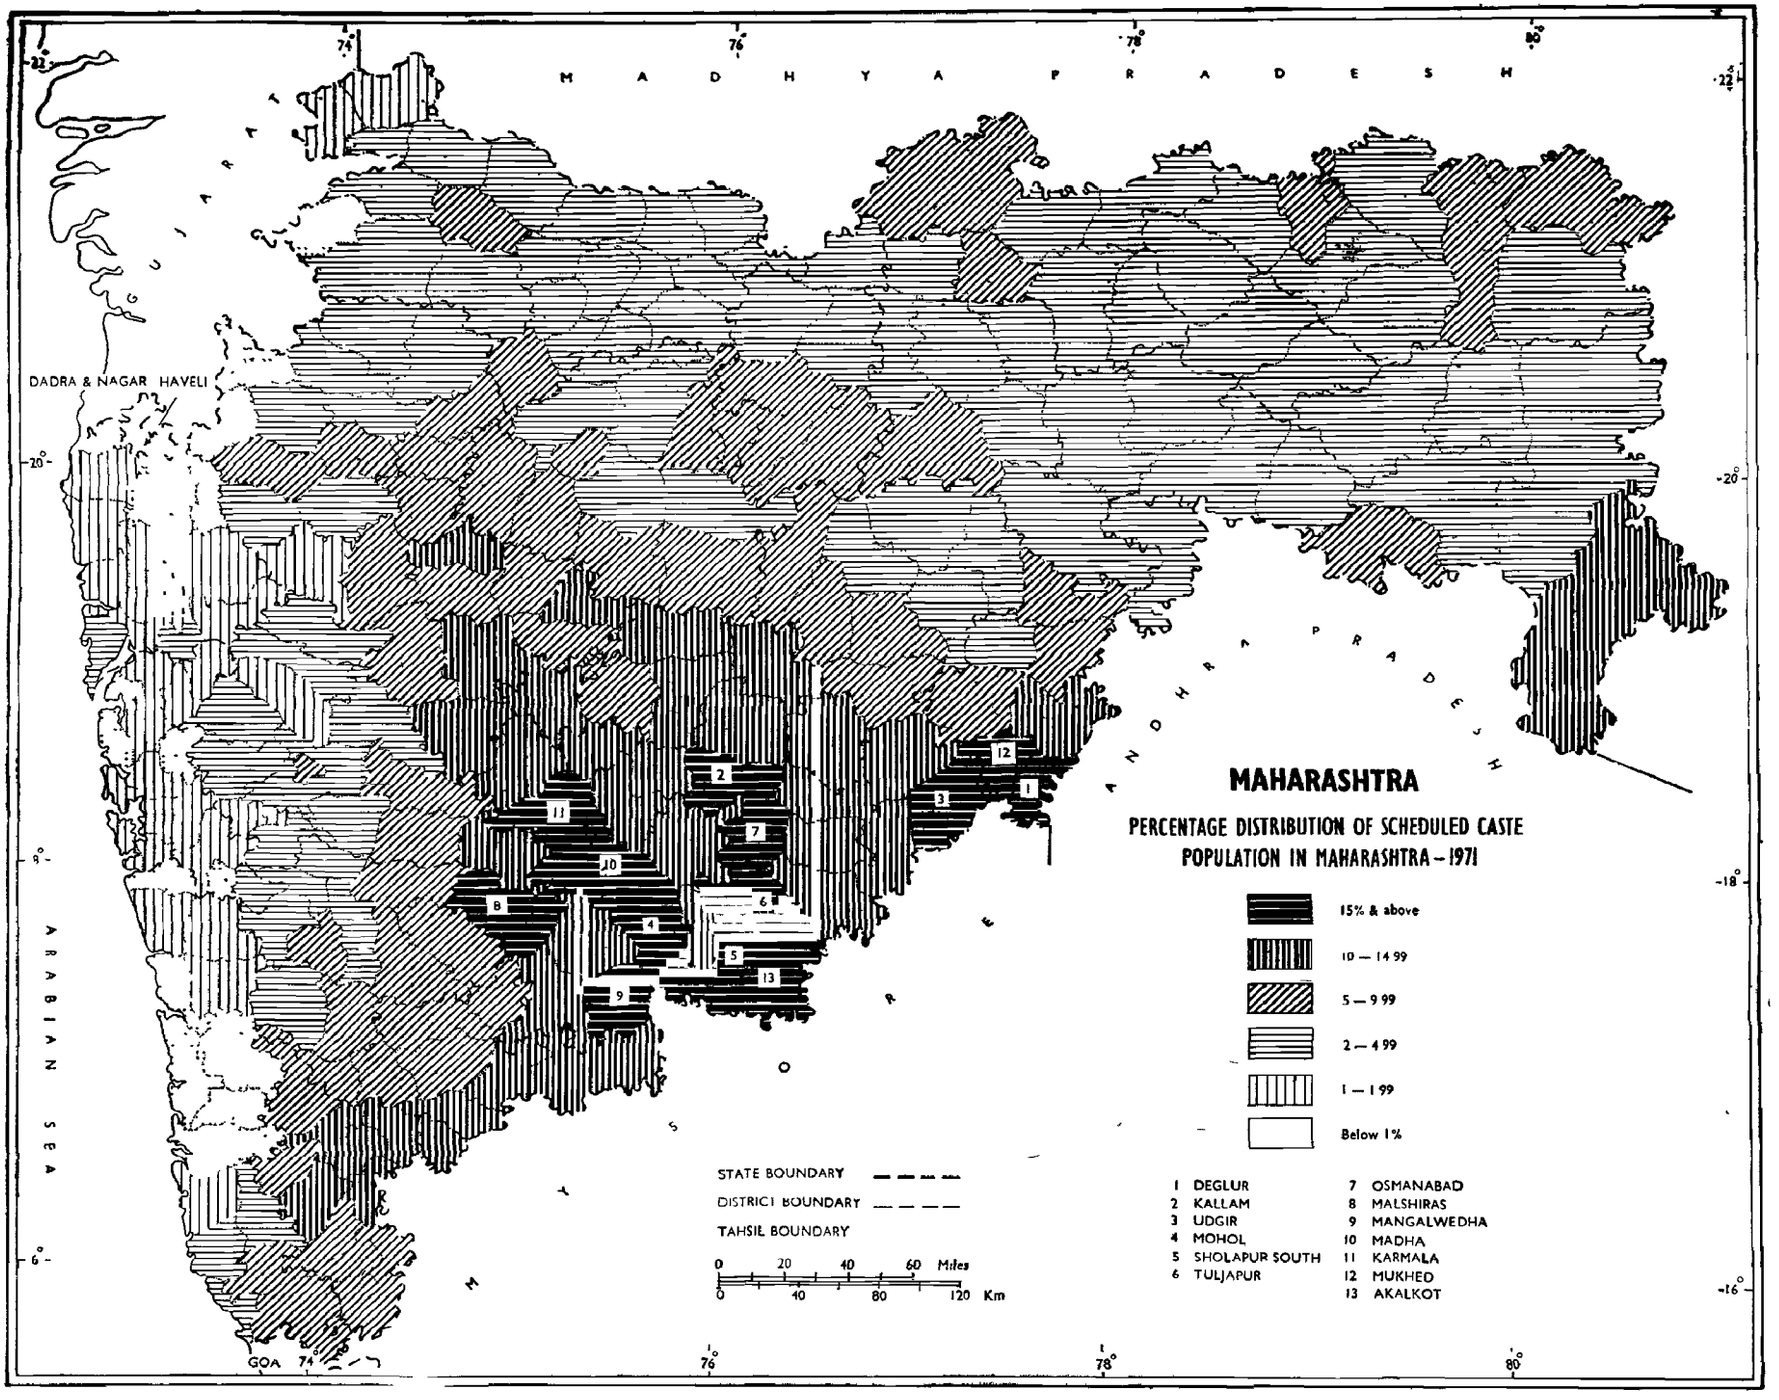

SCHEDULED CASTES

There were 2,226,914 persons belonging to scheduled castes in 1961. In 1971, their population has increased by 35.87 per cent as against 27.45 per cent for the total population of Maharashtra. The proportion of scheduled castes to total population has increased from 5·63 per cent in 1961 to 6 00 per cent in 1971. While scheduled castes are found all over the state, they are found in larger numbers in Poona and Aurangabad divisions which together contain nearly two-thirds of their population in Maharashtra. The respective percentages for the four divisions are Poona (39.12), Aurangabad (25.35), Bombay (18·19) and Nagpur (17.34) of the total scheduled caste population. The districtwise distribution of the scheduled castes population in Maharashtra is shown below :—

The highest percentage of the scheduled caste population of entire Maharashtra is found in Sholapur district (10·59) followed by Osmanabad (9·43), Kolhapur (7.68), Ahmednagar (6·99), Greater Bombay (6.96), Poona (5·80) and Bhir (5·33). In the remaining districts their percentage is less than five, the lowest percentage being found in Kolaba district (0·51).

Osmanabad district records the highest percentage of scheduled caste population (15·04) to the total district population. Other districts which have more than 10 per cent of scheduled caste population to their total district populations are Sholapur (14·21), Bhir (12·53), Kolhapur (11·35). The lowest percentage of scheduled caste population to the total district population is found in Kolaba (1·22).

Out of 232 tahsils in Maharashtra, 48 tahsils have scheduled caste populations which form more than 10 per cent of their respective populations. The highest percentage is seen in Deglur tahsil in Nanded (19.70). The tahsils which have more than 15 per cent of scheduled caste population are Akalkot (15·06), Sholapur South (16.20), Mohol (16·77) Mangalvedha (15 86), Malshiras (15·92), Karmala (15 57), Madha (15·72)—all in Sholapur district; Deglur (19.70) and Mukhed (15·11) in Nanded district; Osmanabad (15 98) Kallam (18 40), Udgir (17.30), and Tuljapur (16·12) in Osmanabad district. Among 289 towns in Maharashtra the proportion of scheduled caste population to total population is highest (48 74) in the mining town of Sasti in Chandrapur district.

Out of 57 scheduled castes returned in Maharashtra in 1971, only nine have populations of more than 10,000 each. The most predominant among scheduled castes is Mahar which constitutes more than one-third (35·40) of the total scheduled caste population in the state. Mang and Chambhar rank second and third in population size. These three castes alone have a population of more than a lakh each and they together account for 87·34 per cent of the entire scheduled caste population in the state. Twelve scheduled castes fall in the group 10,000—1,000. The rest have returned populations of less than 1,000 each. The population and the percentage to total S. C. population in respect of each scheduled caste will more than 1,000 population are given below:—

Sex Ratio

The 1971 sex ratio (number of females per 1,000 males) of 947 for scheduled castes in Maharashtra is higher than that of the general population of the state (930). The scheduled caste sex ratio for 1971 has shown a decrease of 15 points compared to that for 1961. Considering the major scheduled castes, preponderance of females (1,053 per 1,000 males) is noticed in only one caste—Madiga, which has a total population of only 5,569. The lowest sex ratio (849) is found in Bhangi, which also recorded the lowest sex ratio (853) in 1961. Although seven out of the 14 major castes have shown improvement in sex ratio over the figures of 1961, the overall decrease in scheduled caste sex ratio is mostly due to the fact that in the case of all the three numerically important scheduled castes (Mahar, Mang and Chambhar), the sex ratios have declined. Sex ratios for major scheduled castes for 1961 and 1971. are as follows :—

	Name of scheduled caste	Sex ratio 1971	Sex ratio 1961
1	Mahar	949	962

Growth of Population

Among the major scheduled castes the most noticeable rise in population is in respect of Madiga and Dom which have more than doubled their respective populations during the last decade. There has been a decline only in the case of Mahyavanshi. Other scheduled castes which have registered percentage increases higher than the state average (35 87) for the scheduled castes are Mahar, Bhangi, Holar, Khatik, and Meghval. The 1971 and 1961 population of each major scheduled caste and the decadal variation is shown below :—

Rural-Urban distribution

About three-fourths of the total scheduled caste population stays in rural areas of the state. This is, however, not true in the case of all scheduled castes. The bulk of the population of the first three major scheduled castes resides in rural areas. Since the nature of occupations some time decides the stay, we find certain scheduled castes like Bhangi and Dom are highly urbanised The percentage of their population staying in urban areas is over 90. Almost all Meghavals are found staying in urban areas. Other castes which have more persons staying in urban than in rural areas are Dhor (54 80) and Mahyavanshi (82·24). The percentage distribution of scheduled castes by rural and urban residence is as follows:—

Name of Scheduled caste	Rural	Urban
All Scheduled Castes	**75 32**	**24 68**
Mahar	84 36	15 64
Mang	81 81	18·19

Literacy

Out of the 3,025,761 scheduled caste population, 764,578 returned as literates. The percentage of literacy for scheduled castes is thus 25 27 as against 34·18 per cent for the general population. The literacy percentages for persons, males and females of the general population and of the scheduled castes for Maharashtra and its four administrative divisions is shown below :—

	General population			Scheduled castes		
	Persons	M	F	Persons	M	F
MAHARASHTRA	39 18	51·04	26 43	25 27	37 02	12 85

Nagpur Div	37 45	49 44	24 84	29 32	41·66	16 40

The 1971 literacy rates for the major scheduled castes are as follows :—

	Persons	*Males*	*Females*
All Scheduled Castes	**25 27**	**37 02**	**12 85**
1 Mahar	26 48	39 11	13 17

3 Chambhar	31 69	44 22	18 53
4 Bhangi	34 04	46·22	19·71
5 Dhor	37 71	50 90	23 93
6 Holar	16·11	26 69	4 96
7 Madgi	13 00	20·31	5 45
8 Khatik	38 16	50 73	25 44
9 Meghval	50·11	62 27	37 33
10 Mahyavanshi	54·37	65 55	42 05
11 Basor	30·99	45 06	16 73
12 Dom	39·44	53 52	24 66
13 Holeya	5 24	9 66	0·76
14 Madiga	9·79	17·63	2.35

Among the major scheduled castes, the highest literacy rate (54 37) is noticed in the Mahyavanshi community which has a population of 9,100 only. The male and female literacy rates (65 55 and 42 05) for this community are also the highest. Meghaval with a total population of 16,738 ranks second in literacy with half of its population literate. The other castes which have higher percentage literacy than that for the total scheduled castes population are Mahar, Chambhar, Bhangi, Dhor, Khatik, Basor and Dom. The Mang which has the second largest population among scheduled castes has a literacy rate of only 16 91 per cent. Its female literacy rate is only 6 56 per cent. Even for Mahar, the predominant caste, the rates are appreciably low compared to other castes like Bhangi. The low percentage for Mahars may however be due to conversion of the educated and literate among Mahars to Buddhism.

Economic activity

Out of a total population of 3,025,761 scheduled castes 1,170,023 (38·67 per cent) are reported to be economically active or workers as against 36·48 per cent for the general population Half of the scheduled castes' male population (50 69) and one-fourth of their females are economically active. Among the scheduled caste workers, two-thirds (67·72) are engaged in the agricultural sector with 13 05 per cent reporting as cultivators and 54·67 per cent as agricultural labourers. Other important sectors which engage scheduled caste workers are manufacturing (14·98)—comprising household industries (8 01) and manufacturing industries other than household industries (6 97)—and other services (9·82). Among scheduled caste female workers, 81 22 per cent are occupied in the agricultural sector with agricultural labour predominating (72 17). Household industry employs 6 69 per cent and other services 6 90 per cent. As regards scheduled caste male workers also, their highest participation is in the agricultural sector (61 17) followed by other services (11 24), manufacturing other than household industries (9 30) and household industries (8·65). The distribution of scheduled castes workers by broad categories of economic activities is shown below:—

Regional lists, sub-castes and synonyms

The following points may be noted in respect of the President's list of Scheduled Castes :—

(*i*) There are three separate regional lists for the three areas coming from the erstwhile states of Bombay, Madhya Pradesh and Hyderabad now included in Maharashtra, together making a total of 77 castes.

(*ii*) The list applicable to the old Bombay area contains 24 Scheduled Castes which are so declared for all the areas of those 13 districts.

(*iii*) The list applicable to the five districts of Aurangabad division contains 32 Scheduled Castes which are so declared for the entire area of those districts.

(*iv*) The Scheduled Castes at (*iii*) are also declared as Scheduled Castes for Rajura tahsil which has been notified as a separate district in the President's Order but is administered as a tahsil in Chandrapur district.

(*v*) The list applicable to the Nagpur division districts contains 16 Scheduled Castes which are so declared for the entire area of those eight districts. In addition, five Scheduled Castes are declared as such for limited areas specified against each of them.

(*vi*) Forty out of the 77 Castes are shown in the three lists with single names. The remainng 37 have been shown with one or more names of sub-castes, generic names or synonyms.

(*vii*) The three regional lists have six names common to two or all of the three lists. Mahar and Mang are examples of names common to all the three lists. But even these common names are shown in the three lists with different synonyms or sub-castes, Mahar, for example, makes different groups in all the three lists. For Bhangi and Mehtar the old Bombay list uses the expression "Bhangi, Mehtar, etc." the old Madhya Pradesh list "Mehtar or Bhangi" and the Hyderabad list simply "Mehtar".

(*viii*) Castes shown independently in a region are included as sub-caste of other castes in another region. Mochi, for example, is an independent Scheduled Caste in Aurangabad division but it is shown as a sub-caste under Bhambi and Chamar in Bombay and Nagpur division lists respectively.

Scheduled castes not reported in the 1971 census

The following seven Scheduled Castes were not returned by any one in the respective specified areas in the 1971 census :—

(1) Anamuk
(2) Arwa Mala
(3) Bahna
(4) Chadar
(5) Halleer
(6) Mala Hannai
(7) Samagara

Anamuk, Mala Hannai, and Samagara are from the regional list applicable to the districts of Aurangabad division, and to Rajura tahsil in Chandrapur district. Chadar is from the regional list pertaining to the Nagpur division and is applicable to Bhandara

district only. Halleer is from the regional list applicable to the districts of Bombay and Poona divisions, and Bahna is from the regional list applicable to the districts of Nagpur division (except Rajura tahsil in Chandrapur district).

Scheduled castes and area restrictions

Out of the 77 Scheduled Castes included in the declared list, seven have not been found in the notified areas. Bhangi, Chalvadi, Chamar, Dhor, Mahar and Mang had been included in two or all the three regional lists, though in different groups with different sub-castes or synonyms. Their combination reduced the number of Scheduled Castes by ten. Combination of Mang-Garudi with Mang and Mochi with Chambhar reduced it further by three, leaving the list with 57 Scheduled Castes.

Because of the area restrictions notified for all the Scheduled Castes, only four, viz., Bhangi, Chambhar, Mahar and Mang, appearing in all the three regional lists can be recognised as such in all areas of Maharashtra. Area restriction is, therefore, a basic limitation to be always remembered while using the figures for population or other characteristics of the remaining 53 Scheduled Castes. When the tables present Scheduled Caste figures for the State, division or a district it is always implied that the presentation is only for the restricted area notified against each Scheduled Caste.

The restricted areas notified for each of those 57 Scheduled Castes are shown below. The Scheduled Castes are arranged in alphabetical order. For economy of space the restricted areas are shown with symbols as follows :—

Common castes combined but sub-groups also shown separately

(1) Bhangi (3) Chambhar (5) Mahar

As for the Scheduled Caste 'Chalvadi' (Serial No.2 above), it has not actually been returned in the districts of Aurangabad Division or in Rajura tahsil of Chandrapur district, although notified for that area. The figures in respect of this Caste for Maharashtra thus pertain entirely to the districts of Bombay and Poona Division and hence the symbol (a) has been inserted against the name of this caste in all Tables presenting castewise data. Since the figures for this caste are 'nil' in Aurangabad Division, it has not been shown in the tables pertaining to Aurangabad division, and its districts and in the tables pertaining to Chandrapur district which includes Rajura tahsil.

Scheduled castes groups shown by the first names

In the case of the following Scheduled Castes, the first name appearing in the President's Order has alone been used in all the tables as the generic name to include the names of Scheduled Castes, sub castes and synonyms, etc., included against that caste in the President's Order. Chambhar appearing as the first name against that caste group in the President's Order for Aurangabad division list is used to represent that caste instead of Bhambi or Chamar appearing in the President's Order for the lists applicable to Bombay, Poona and Nagpur divisions, respectively.

SCHEDULED TRIBES

The 1971 population of scheduled tribes in Maharashtra was 2,954,249 which was 5 9 per cent of the total population of the state.

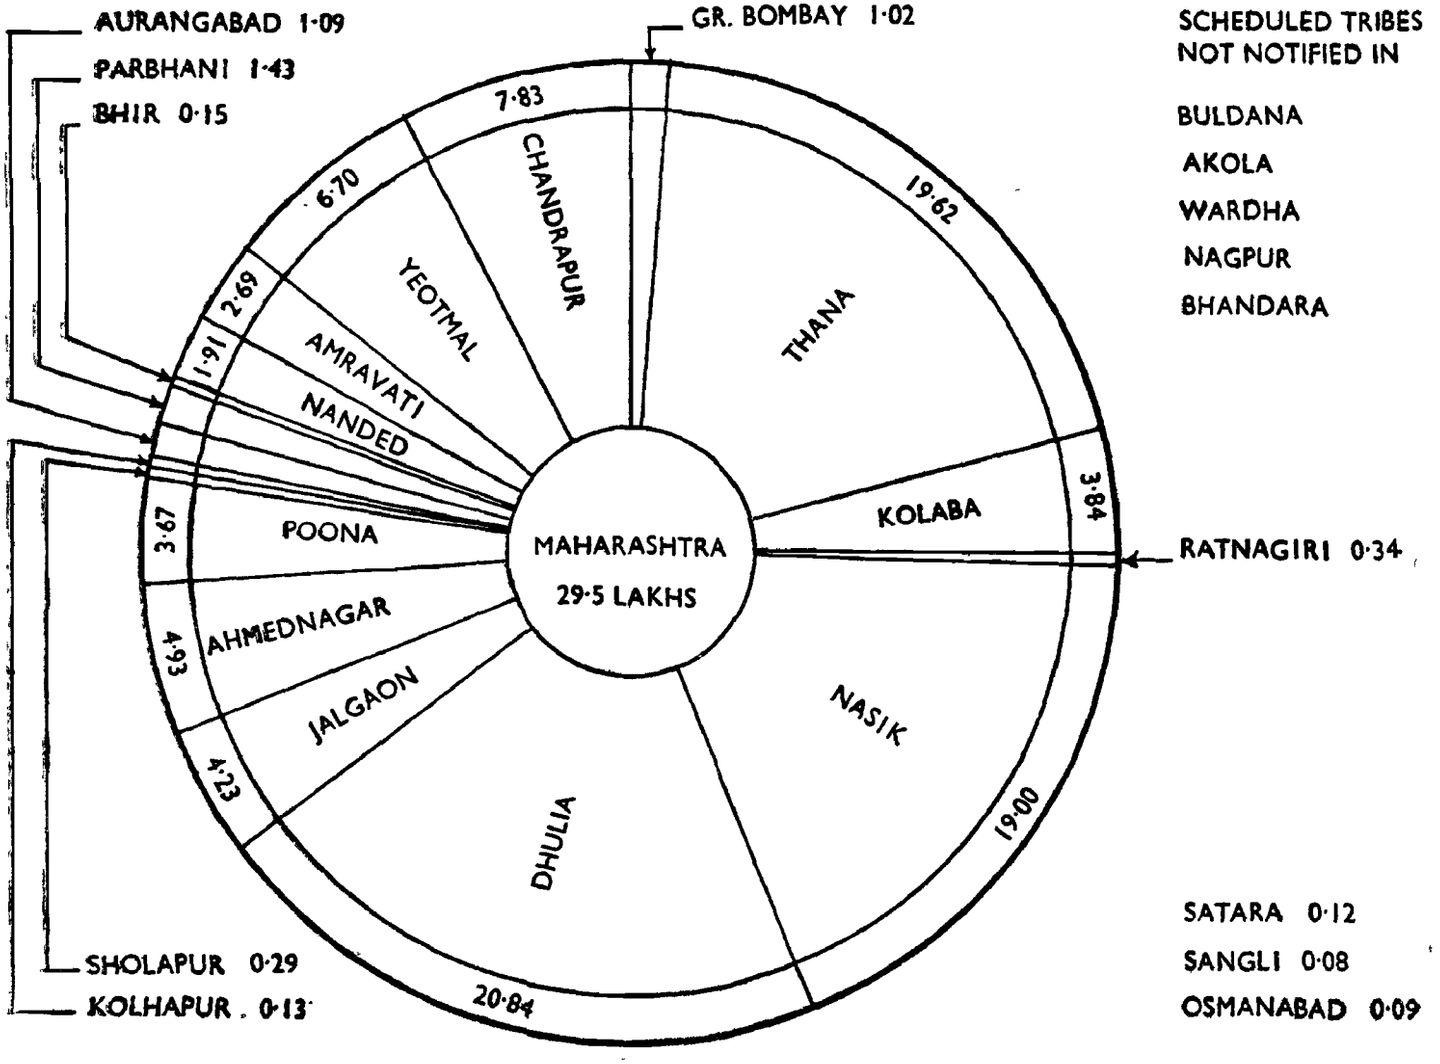

Scheduled tribes are found in 21 out of the 26 districts in Maharashtra. No scheduled tribes are notified in the Buldana, Akola, Wardha, Nagpur and Bhandara districts from Nagpur division. In the three remaining districts of Nagpur division—Amravati, Yeotmal and Chandrapur—there are scheduled tribes only in seven tahsils—Melghat in Amravati; Wani, Kelapur and Yeotmal in Yeotmal; and Rajura, Gadhchiroli and Sironcha in Chandrapur. Thus out of the 39 tahsils in Nagpur division, scheduled tribes are reported from only seven tahsils. Even then this division accounts for 17·22 per cent of the total scheduled tribe population of Maharashtra which is higher than that of Poona (9 22) and Aurangabad (4·67) divisions. Bombay division claims the largest concentration of scheduled tribe population (68 89).

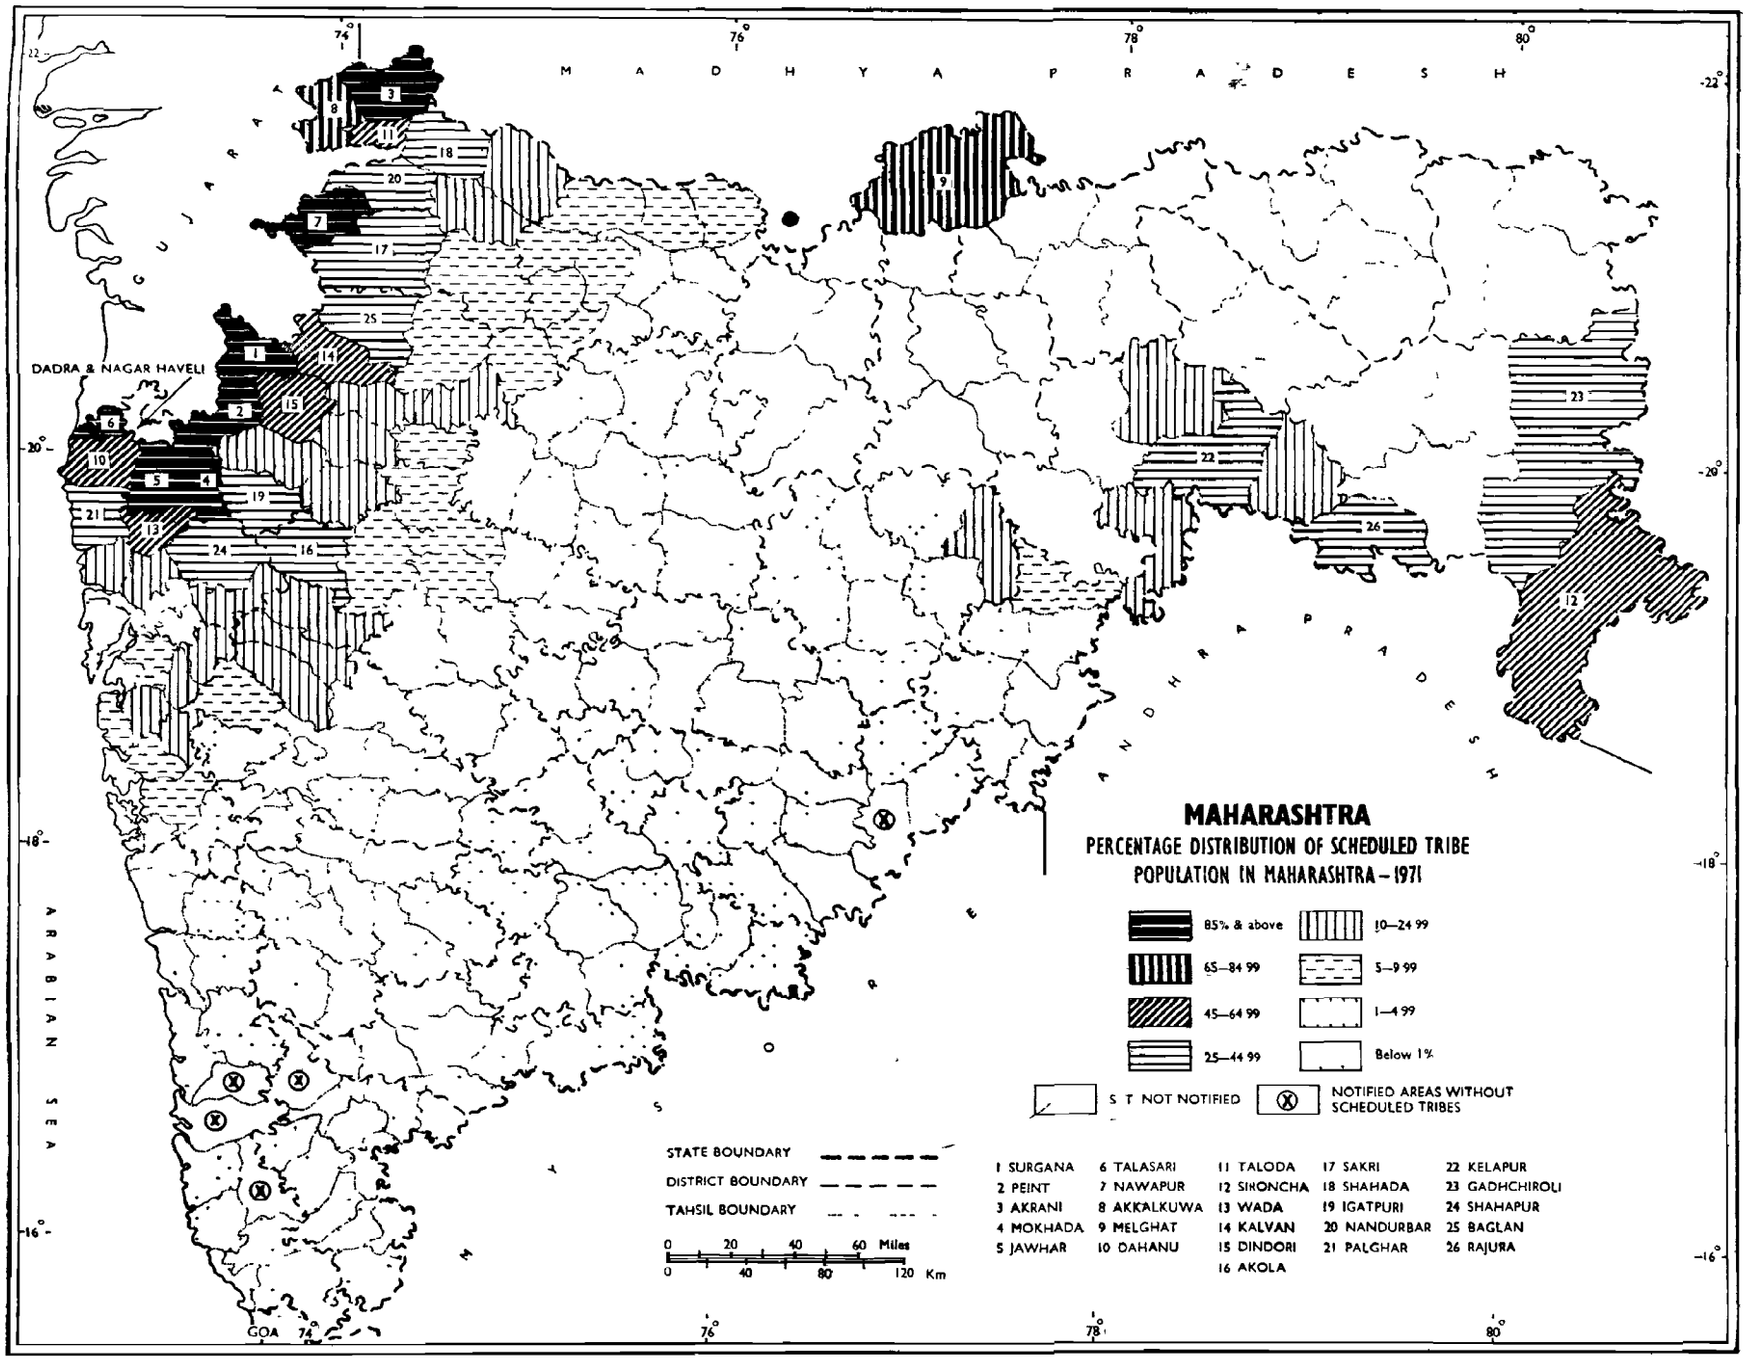

The districtwise distribution of Scheduled tribes population in Maharashtra is shown below :—

These three districts, all from Bombay division, contain about three-fifth of the total scheduled tribe population of Maharashtra Chandrapur, Yeotmal, Kolaba, Ahmednagar, Jalgaon Amravati, Nanded, Poona and Parbhani districts have sizable proportions of scheduled tribes.

Unlike scheduled castes who are distributed all over Maharashtra, the scheduled tribes have large concentrations in certain areas, 61 63 per cent of the total scheduled tribe population living in 26 tahsils out of the 232 tahsils in Maharashtra. Surgana tahsil in Nasik district has the largest concentration with 95·77 per cent of its population belonging to scheduled tribes. The following 26 tahsils have more than one-fourth of their population belonging to the scheduled tribes :—

Three more tahsils—Nasik, Yeotmal and Wani—have more than 50,000 tribal population each, but their proportions to total tehsil populations are less than 25 per cent.

There are 44 scheduled tribes reported in Maharashtra in the 1971 census. Of these, Bhils (6 8 akhs) are the most numerous and constitute 22 98 percent of the total scheduled tribe population of the state. Other numerically important tribes having more than one lakh population are Koli-Mahadev (3 4 lakhs), Gond (3 3 lakhs), Varli (2 9 lakhs), Kokna (2 6 lakhs), Thakur (1 8 lakhs), Kathodi (1 5 lakhs) and Gamit (1 3 lakhs). These eight together constitute about 80 per cent of the total scheduled tribe population of Maharashtra. The other 12 scheduled tribes which have populations ranging from 5,000 to 100,000 are Koli-Malhar, Andh, Korku, Kolam, Dhanka, Pardhan, Koli-Dhor, Pardhi, Dubla, Dhodia, Naikda and Halba. The rest of the tribes returned in the 1971 census have less then 5,000 members each The population of each of the 20 most numerous scheduled tribes, its proportion to the total scheduled tribe population and its sex ratio are given below :—

	Scheduled tribe	Population	Proportion to total Scheduled Tribe population	Sex ratio
1	Bhil	678,750	22 98	976

Four other tribes had each more than 1,000 members. Their numbers and their percentage of the total scheduled tribe population were as follows :—

Kharia 3,827 (0 13), *Nihal* 3,604 (0 12), Kawar 2,877 (0 10), and Vitolia 1,031 (0 03).

Apart from 66,192 members of the scheduled tribe population who did not specify the name of their tribe, there were returns from 20 scheduled tribes, each of which numbered less than 1,000. Together these 20 scheduled tribes accounted for 2,418 persons.

Rural-Urban Distribution

Of the 1971 scheduled tribe population, 95 66 per cent was found in rural areas and only 4 34 per cent in urban areas. The corresponding percentages for the general population were 68 83 and 31 17. Only in Nasik does the percentage of scheduled tribes staying in urban areas to total scheduled tribe population of the district exceed five.

Only 31 out of 289 towns in Maharashtra have more than five per cent of their population belonging to scheduled tribes. These are mostly small towns. Towns having more than 10 per cent of their population belonging to scheduled tribes are Sandor (11·51), Palghar (15·44), Dahanu (15 38), Malyan (19 38), Jawhar (28 07), Vada (23 49) in Thana district; Neral (15 36) in Kolaba district; Trimbak (25 19), Vani (25·61), Ravalgaon (11·43), Nandgaon (non-municipal) (10·58), Pimpalgaon Basvant (22 74) in Nasik district; Nawapur (28·78) and Taloda (26 53) in Dhulia district and Chikalda (12 83) in Amravati district.

Among major tribes, sizable proportions of Dubla (45 40), Dhodia (45 56) and Koli Dhor (26 77) reside in urban areas. Pardhi (15 99) and Naikda (8 08) have significant proportions of their populations in urban areas. The rest of the scheduled tribes are essentially rural.

Sex ratio

Maharashtra's scheduled tribe population of 2,954,249 comprises 1,497,481 males and 1,456,768 females. This gives a sex ratio (number of females per 1,000 males) of 973 for scheduled tribes compared to 930 for the general population. Compared with the general population and the scheduled caste population there are on the whole more females among the scheduled tribes. Sex ratios for 1961 and 1971 for total, rural and urban areas for scheduled tribe and general, population are given below :—

	1971 Sex ratio			1961 Sex ratio		
	Total	Rural	Urban	Total	Rural	Urban
Scheduled Tribes	973	977	895	978	981	911
General population	930	985	820	936	995	801

The proportion of females among the general population in rural areas is more than that for the scheduled tribes. This appears to be due to large numbers of non-tribal males migrating from rural to urban areas within the state in search of jobs. As regards urban areas, the scheduled tribes are found mostly in small towns which are not so deficient of females as are in cities and big towns. The sex ratio for both scheduled tribes and the general population has gone down during the last decade. It has, however, improved for the general population in urban areas. Considering each major tribe we find that in Kawar, Gamit, Koli-Malhar and Kolam there is a preponderance of females. The lowest sex ratio (844) is found among Halba. The sex ratio for Dhanka is also low (891). In respect of all other major tribes, the sex ratio falls in the range 900-1000.

Decadal growth

The scheduled tribe population of 2 4 million in 1961 rose to 2 95 million in 1971, showing a decadal growth of 23 24 per cent as against 27 45 per cent for the general population. Of the nine districts which contain more than 100,000 scheduled tribe population each, five have shown a higher growth in the scheduled tribe population than the state average of 23 24 per cent. These are Nasik (23 69), Jalgaon (26 66), Ahmednagar (32 74), Yeotmal (27 23) and Chandrapur (26 15). The remaining four districts with a growth rate lower than the state average are Thana (15 78), Kolaba (19 03), Dhulia (19 96) and Poona (20 57).

Among the major scheduled tribes, the highest growth is noticed in the case of Koli Dhor (181 53). Their population of 15,461 in 1961 increased to 43,528 in 1971. In the case of Pardhan, the growth rate is 57 92. The other tribes which show growth of 25 per cent and more during the last decade are Gamit (25 91), Andh (26 36), Kolam (28 03) and Halba (32 69). There has been a decrease in the population of Dubla (8 48), Dhodia (17 45), Naikda (20 60)

Literacy

Only 346,829 of the scheduled tribe population (11·74 per cent) are literates. The literacy rate for the general population and the scheduled caste population are 39 18 per cent and 25 27 per cent respectively. Literacy rates for 1961 and 1971 for total, rural and urban areas for scheduled tribe and general population are given below :—

	1971			1961		
	Total	Rural	Urban	Total	Rural	Urban
Scheduled Tribes	11·74	11 11	25·61	7·21	6·87	15·92
General population	39·18	30 63	58·07	29·82	21·46	51·07

As over 95 per cent of the entire scheduled tribe population is found in the rural areas, their literacy rates for rural areas are about the same as for the total. In urban areas which contain a very small scheduled tribe population (4 3 per cent) about one-fourth of them are literates. The literacy rates for scheduled tribe population are vrey low compared to those of the general population and of the scheduled caste population. Improvement during the last decade also has been slow in the case of scheduled tribes compared with the changes noticed in the case of the general population and the scheduled castes. Whereas half of the males among the general population are literates, less than one-fifth (19·06 per cent) of the males among scheduled tribes are literate. The position among tribal females is more dismal. The female literacy rates for the general population and the scheduled caste population are 26·43 and 12 85 respectively. Even the latter is higher than the literacy rate of 11·74 or the total scheduled tribe population.

Among the tribes having more than 1,000 population each, Halbas (29·80 per cent) are most literate. Other tribes having more than one-fourth of their population as literates are Kharia (29 37) and Koli Dhor (25·18). Among Bhils which is the most predominant tribe, only 9·51 of them are literates. The highest male literacy is found in Halba (43 30). Those having more than one-fourth of their male population literates are Dhanka (28·45), Dhodia (32 96), Kawar (28 86), Kharia (39.83), Koli-Dhor (36.79), Koli Mahadev (28 04), Pardhan (31 94), Pardhi (26 37). As regards female literacy, only among Dhodia, Halba, Kharia Koli-Dhor, is the rate higher than 10 per cent.

The literacy percentages for each major scheduled tribes are given below:-

	Tribe	Persons	Males	Females
1	Bhil	9 51	15 83	3·03

Economic activity

The economic participation rate (46 16) for the scheduled tribes in Maharashtra is higher than that for the scheduled castes (38·67) and for the general population (36·48). There are 1,363,793 workers among scheduled tribes in the state. The agricultural sector engages 42 95 per cent of the total scheduled tribe population and 93 05 per cent of their workers. Out of the total scheduled tribe male population 58 24 per cent are economically active and the percentage of workers among their females is nearly one-third (33·75). Among the scheduled tribe workers, 41·15 per cent are cultivators and 51·90 per cent are agricultural labourers. The percentages of males working as cultivators and agricultural labourers are about the same (46 31) and (45 01) respectively. Female scheduled tribe workers are however mostly engaged as agricultural labourers. Their percentage in this category (64 13) is about twice that of those engaged as cultivators (31 98). Participation of scheduled tribe workers in other sectors is negligible livestock, forestry etc., account for 1·84 per cent of their workers, manufacturing and other services claim 1 58 per cent and 1 82 per cent, respectively. The distribution of workers among scheduled tribes by sex and broad economic categories is as given below :—

Regional lists, sub-tribes and synonyms

The following points may be noted in respect of the President's list of Scheduled Tribes :—

(*i*) There are three separate regional lists for the three areas coming from the erstwhile States of Bombay, Madhya Pradesh and Hyderabad now included in Maharashtra, together making a total of 61 Tribes.

(*ii*) The list applicable to the old Bombay area contains 19 Scheduled Tribes, which are so declared for all the areas of those 13 districts. In addition, three Scheduled Tribes are declared as such for limited areas specified against each of them.

(*iii*) The list applicable to the five districts of Aurangabad division contains 7 Scheduled Tribes, which are so declared for the entire area of those districts.

(*iv*) The Scheduled Tribes at (*iii*) are also declared as Scheduled Tribes for Rajura tahsil, which has been notified as a separate district in the President's Order, but is administered as a tahsil in Chandrapur district.

(*v*) The list applicable to the Nagpur division districts contains 32 Scheduled Tribes which are so declared only for six specified tahsils (talukas) out of those eight districts. No Scheduled Tribe is declared for the remaining 32 tahsils of those districts.

(*vi*) 29 out of the 61 Scheduled Tribes are shown in the three lists with single names. The remaining 32 have been shown with one or more names of sub-tribes, generic names or synonyms. Some of those names of sub-tribes and generic names or synonyms have been shown with the word 'and' or 'or' added. Some others are without any such conjunction.

(*vii*) Some of the names of sub-tribes are shown with the word "including" prefixed. "Including" can be considered as restrictive, as also indicating the possibility of inclusion of names hitherto left out. No name outside of the President's Order has, however, been included under this cover.

(*viii*) The three regional lists have six names which are common either to two or all the three lists. Bhil and Gond are common to all the three lists. Most of the common names are shown in the three lists with different synonyms or sub-tribes. Gond, for example, makes different groups in the three lists.

(*ix*) A tribe shown independently in a region is included as a sub-tribe of another tribe in another region. Thoti, for example, is an independent Scheduled Tribe in Aurangabad division, but it is shown as a sub-tribe under Gond for Nagpur division and that too with a slightly different spelling. In a few cases, some names appear in the list for the same region both as independent tribe and as sub-tribes under other tribes. For example, "Nihal" is shown in the Nagpur division list both as an independent tribe and also as a sub-tribe under Korkus.

(*x*) In some other cases, a sub-tribe is shown as such under two different tribes. In the old Bombay area list, Tadvi is shown as a sub-tribe under both Bhil and Dhanka, Valvi as a sub-tribe under both Dhanka and Gamit, and Vasava and Vasave as sub-tribes both under Bhil and Gamit.

(*xi*) Names of some important sub-tribes have not been specifically mentioned. The name of Padvi, for example, an important name under Bhil in certain regions, does not find separate mention in the Presidents Order.

(*xii*) It may be argued whether Valvi, for example, should be included under Dhanka or Gamit. In Maharashtra, Valvi is associated with Bhil.

Scheduled tribes not reported in the 1971 census

The following Scheduled Tribes were not returned by any one in the respective specified areas in the 1971 Census :—

1. Bhaina
2. Birhul or Birhor
3. Gadaba or Gadba
4. Khairwar
5. Kondh or Khond or Kandh
6. Korwa including Kodaku
7. Majhwar
8. Munda
9. Saonta or Saunta

All these names are from the regional list applicable to the districts of Nagpur division. No one belonging to those tribes was reported in the six specifically notified talukas (tahsils) during the enumeration period.

Scheduled Tribes and Area restrictions

Out of the 61 Scheduled Tribes included in the declared list, 9 have not been found in the notified areas. Andh, Bhil, Gond, Kolam, Pardhan and Pardhi had been included in two or all the three regional lists though with different sub-tribes or synonyms. Their combination reduces the number of Scheduled Tribes by eight leaving the list with 44 Scheduled Tribes.

Because of the area restrictions notified for all Scheduled Tribes of the districts of Nagpur division, none of those 44 Scheduled Tribes is recognised as such in all areas of Maharashtra. Area restriction is, therefore, a basic limitation to be always remembered while using the figures for population or other characteristics of Scheduled Tribes. When the tables present Scheduled Tribe figures for the state, division or a district, it is always implied that the presentation is only for the restricted areas notified against each Scheduled Tribe.

The restricted areas notified for each of those 44 Scheduled Tribes are shown below. The Scheduled Tribes are arranged in alphabetical order. For economy of space the restricted areas are shown with symbols as follows :—

(1) Bhil, (2) Gond, (3) Kolam, (4) Pardhan, and (5) Pardhi.

This has been considered necessary because of (i) area restrictions in respect of each; and (ii) different names of sub-tribes or synonyms included in their generic names for different areas in the President's Order. RELIGION

Table C-VII—Religion

FLYLEAF

This table like its corresponding table C-VII of 1961, presents the distribution of the population by religion. The union table gives the data for Maharashtra, its four divisions and 26 districts separately for total, rural and urban areas. This is followed by the state table which provides similar data for districts, *tahsils and cities and towns in each district.*

Statistics on religion presented in this table and its appendix are compiled from the answer to Question 10 "Religion" of the census individual slip. Instructions to the enumerators for recording the answer to this question are given below :—

"In answering this question (Q. 10) the following abbreviations should be used :—

H:Hinduism; I:Islam; C: Christianity; S: Sikhism; B: Buddhism; J: Jainism. For "Others" record the actual religion as returned fully. If a person says that he has no religion it may be recorded accordingly. Do not mistake religion for caste which will not be recorded here".

During the tabulation some slips were found where there was no entry against Q.10. Such cases were treated as "religion not stated" or "unspecified". In some cases where the respondents had returned names of the sects within the fold of the main religions, the enumerators had recorded them fully, instead of recording the abbreviations of the main religion concerned either because of their inability to relate sects to the main religion or owing to the instructions to record faithfully the answers given by the respondents. During tabulation such slips were sorted out separately for the sects recorded in the slips and were included in the main religions concerned. This time therefore a separate annexure to table C-VII has been prepared to show the details of religions (sects) clubbed under another religion shown in main table C-VII. The following are the religions (sects) returned in Maharashtra which have been clubbed under the main religions shown in census table C-VII on religion.

Buddhists : Bauddha Matangi New Buddhists, Thai.

Christians : Anglo Indians, Catholics, Orthodox, Protestants, Christian missionaries.

Jains : Digambar, Maheshwari, Oswal, Snatak Swetambar.

Muslims : Aga khan, Arab, Bohra, Fakir, Khoja, Memon Kachchhi, Pathan, Shia.

The main table C-VII presents data for the numerically important religions—Buddhists, Christians, Hindus, Jains, Muslims, and Sikhs arranged alphabetically. The figures for the remaining religions and persuasions are shown together in columns, 18 and 19 of table C-VII. There is an appendix to this table which shows the break up of 'other religions and persuasions' for which the figures are clubbed and recorded in the table C-VII. The important religions included under 'other religions and persuasions' are Jew (5,134) and Zoroastrian (72,266).

C–VIII—PART A

Classification by Literacy and Industrial Category of Workers and Non-workers according to Main Activity among Scheduled Castes

C–VIII—PART B

Classification by Literacy and Industrial Category of Workers and Non-workers according to Main Activity among Scheduled Tribes

Table C-VIII Part—A & B — Classification by Literacy and Industrial Category of Workers and Non-workers according to main activity among Scheduled Castes and Scheduled Tribes

FLYLEAF

This table like its corresponding Table C-VIII of 1961 is prepared in two parts Part A deals with scheduled castes and Part B with scheduled tribes There is also an appendix to each of these parts. The table gives the total population of scheduled castes and scheduled tribes and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers among the scheduled castes and scheduled tribes

Union table C-VIII shows figures separately for total, rural and urban areas of Maharashtra, its four divisions and 26 districts This is followed by the State table C-VIII which presents similar data for the state, districts, tahsils and cities and towns.

The scheduled castes and scheduled tribes population is shown classified either as illiterates or literates and educated persons without showing detailed educational standards for the latter group as used in Table C-III appearing in Part II-C(ii) report. 'Literacy' is defined as an ability both to read and write with understanding in any language A person who could merely read but could not write was not treated as a literate. Ability merely to sign one's name was not considered to be adequate to qualify a person as a literate. It was not necessary that a person who was literate should have received any formal education or should have passed any minimum educational standard. An illiterate was defined as one who could neither read or write or could merely read but could not write in any language. All children of the age 4 years or less were treated as illiterate even if some of them were found going to a school and might have picked up reading and writing a few odd words.

Columns (10) to (33) of the Table show the distribution of the working population into nine broad industrial categories. Category V (manufacturing, processing, servicing and repairs) is sub-divided into household industry and other than household industry.

The main economic activity returned by a person was the basis on which he was classified either as a worker or non-worker. A worker is defined as a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

Where the main activity of a person qualifies him to be treated as a worker, he has been classified according to the type of work. This categorisation is shown in the following nine broad economic categories.—

I Cultivators,

II Agricultural labourers,

III Livestock, forestry, fishing, hunting, plantations, orchards and allied activities,

IV Mining and quarrying,

V (a) Household industry,
(b) Manufacturing other than household industry,

VI Construction,

VII Trade and commerce,

VIII Transport, storage and communications,

IX Other services.

Category I—This category includes both owner cultivators and tenant cultivators. Along with workers personally working on land are also included persons who are engaged in supervision or direction of cultivation All persons working in cultivation of land wherein they have either ownership or tenancy rights are included in this category. Cultivation involves ploughing, sowing and harvesting and production of cereals, pulses, fibre crops and other crops like sugarcane, ground-nut but excludes fruit and vegetable growing, working on plantation crops.

Category II comprises persons working on another's land for wages in cash or kind without holding any right upon the land are classified as agricultural labourers and included in this category.

Category III includes workers in livestock, forestry fishing, hunting, plantations, orchards and allied activities.

Category IV relates to workers in mining and quarrying.

Category V comprises two groups. A 'houshold industry' is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home/or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. The main criteria for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the residential house A household industry is related to production, processing, servicing, repairing or making and selling of goods It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in another person's household industry as paid employees are also treated as workers in household industry.

Workers in manufacturing industry other than household industry include those engaged in all types of production, processing, servicing or repairing of goods

Category VI includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, water-ways, reservoirs, etc.

Category VII includes workers engaged in any capacity in wholesale or retail trading activity and commercial transaction relating to imports and exports, real estate and property, stocks and shares, insurance, money-lending, banking, etc.

Category VIII includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraphs, telephones, wireless signalling, information and broadcasting are also included in this category.

Category IX includes public utility services like electricity or gas or water-supply, sanitary services; central, state Government or municipal employees; professional services; trade or labour associations, recreational services, etc.

Under category X come non-workers defined as those who are not mainly engaged in any economically productive work. They comprise seven broad groups: (i) those basically engaged in unpaid household duties and doing no other work, (ii) all students and children attending school, (iii) retired persons not employed again in some full-time work and rentiers, (iv) all dependents such as infants and children not attending school, persons permanently disabled from work owing to illness, old age, etc., (v) beggars, vagrants, independent women without indication of source of income, those of unspecified sources of subsistence, (vi) inmates of penal, mental or charitable institutions, convicts in jails, and (vii) all non-workers who may not come under any of the above six categories but are seeking work.

Appendix to table C-VIII-Part A shows scheduled castes classified by literates and illiterates while appendix to table C-VIII Part-B shows scheduled tribes classified by literates and illiterates Data available separately for each individual scheduled caste and tribe show the total population of each scheduled caste and scheduled tribe with its sex break-up and classification according to literates and illiterates among them. The figures are presented separately for total, rural and urban areas of Maharashtra, its twenty-six districts, tahsils and also for cities and towns.
