PREFACE

The present volume is a combination of two parts *i.e.* Part II-C(i)—Social and Cultural Tables (Religion and Scheduled Castes) and Part V-A—Special Tables on Scheduled Castes. There are no scheduled tribes for Haryana. The concepts and definitions of questions involved have been briefly explained in the introductory portion of each part. A brief analysis and comparison of 1961 and 1971 Census data will also be found in these notes. A few maps depicting percentage of scheduled caste population to total population and percentage growth of each religion during the decade 1961-71 have also been given in this volume. It is hoped that combination of these two parts, besides being economical will be more useful to the data users.

This compilation is an outcome of hard labour put in by a dedicated team of workers consisting of Sorters, Compiler Checkers, Supervisors, Statistical Assistants, Tabulation Officers and the Deputy Director (Shri N. K. Tandon, H.C.S) most of whom have left this Organisation after completion of initial tabulation. All of them deserve tributes for hard work put-in by them. In finalisation of these Tables Sarvshri P. N. Modgil, A. L. Kakkar and Jaswant Lal, Statistical Assistants, Shri J. N. Suri, Tabulation Officer and Shri Janak Raj Vashistha, Investigator were of great help who deserve thanks for pains and hard work put-in by them. Credit of preparing maps and cover design goes to Shri Shiv Rai Puri, Cartographer and Shri N. P. Gupta, Artist. I am also thankful to Shri G. D. Singla, Tabulation Officer and Shri S. K. Agarwal, Assistant Director of Census Operations, for preparing the first draft of the fly-leaves and introductory notes. Shri Dipak Raj Khanna, Stenographer and Shri R. D. Verma, Proof Reader, deserve thanks for hard labour put-in by them for typing and Proof reading of this report respectively.

I am grateful to Shri K. K. Chakravorty, Assistant Registrar General, India, for the valuable guidance given by him in preparing this volume. I am also thankful to Shri S. C. Srivastava, Assistant Central Tabulation Officer, and his staff for completing scrutiny of the draft report in shortest possible time.

I am extremely grateful to Shri R. B. Chari, Registrar General, India, for encouragement and guidance given by him from time to time.

But for the co-operation and energetic efforts of Shri A. K. Ghatak, Manager and Shri K. L. Gupta, Assistant Manager (Technical) and staff of Government of India Press, Faridabad, this report would not have been brought out so early. I am extremely grateful to all of them.

ARDAMAN SINGH
Deputy Director of Census
Operations, Haryana

Chandigarh,
Dated the 7th July, 1976.

INTRODUCTORY NOTE

Part II-C is devoted to the Social and Cultural tables classified as C-series tables. These tables deal with family composition, age structure, marital status, educational levels, mother tongues, bilingualism, religion and scheduled castes/scheduled tribes. All the tables in this series except C-V (Mother tongue), C-VII (Religion) and C-VIII (Scheduled castes/tribes) have been prepared on sample basis. Tables C-V, C-VII and C-VIII have been prepared on full count. Table C-I is based on population record and is based on two phase sampling. In first phase 20 per cent of the blocks were selected and from the sampled blocks a sample of 20 per cent households was drawn in IInd phase by random sampling. Tables C-II, C-III, C-IV and C-VI are based on 10% sample of rural slips and 20% sample of urban slips.

2. Part II-C is, however, being published in two parts : Part II-C(i); and Part II-C(ii). This book, Part-II-C(i), contains only tables C-VII and C-VIII. All the remaining tables will be included in Part II-C (ii).

3. Table C-VII furnishes data on religion and is supplemented by an Annexure and an Appendix. Annexure to Table C-VII gives details of sects/beliefs/religions clubbed with another religion, and Appendix to Table C-VII gives details of combined entries in cols. 18 and 19 under "Other religions and persuasions" of Table C-VII.

4. Table C-VIII has two parts—Part-A and Part-B—the former gives us classification by literacy and industrial category of workers and non-workers according to main activity among scheduled castes, and the later similar information for scheduled tribes. Each part is supplemented with an appendix which gives data for each scheduled caste/scheduled tribe. There being no tribe scheduled in this State, Table C-VIII Part-B has not been presented in this volume.

5. Details of tables included in Part II-C(ii) are given below for the benefit of readers :—

C-I Part-A . . .	Members of households by relationship to head of household classified by age groups.
C-I Part-B(i) . . .	Households where the Head is a male by relationship of members with the Head.
C-I Part-B (ii) . . .	Households where the Head is a female by relationship of members with the Head.
C-II	Age and marital status.
C-III Part-A . . .	Age, sex and education in all areas.
C-III Part-B . . .	Age, sex and education in urban areas.
C-IV	Single year age returns.

In addition to the above tables, the Part II-C(ii) volume will also contain tables on mother tongue and bilingualism.

6. We have already discussed in detail the concepts, definitions, various terms and instructions issued to enumerators in Series-6-Haryana-Part-II-A— General Population Tables. However, for the sake of readers who might not have gone through that volume we may discuss briefly in this volume concepts and instructions pertaining to relevant questions only. During 1971 Census one slip called individual slip was filled in for every individual. In this slip after location particulars, name, relationship to head, sex, age, marital status, particulars of birth place and last residence, duration of residence, religion, scheduled caste/scheduled tribe, literacy, educational level, mother tongue, other languages spoken, particulars of main activity and secondary activity were recorded for each individual. Besides, for currently married women only the data relating to Age at marriage and any child born during last one year was also recorded. Questions 10 and 11 of the Individual slip canvassed at the 1971 Census enumeration relate to the religion and scheduled caste/tribe, respectively. The instructions issued to the Census enumerators for recording the answers to these questions are reproduced below :—

Question 10—Religion :

7. In answering this question use the following abbreviations :—

H—Hinduism.

I—Islam.

C—Christianity.

S—Sikhism.

B—Buddhism.

J—Jainism.

7·1 For others record the actual religion as returned fully. If a person says that he has no religion it may be recorded accordingly. Do not mistake religion for caste which will not be recorded here.

Question 11—Scheduled Caste or Scheduled Tribe :

8. You have been furnished with a list of scheduled castes and scheduled tribes notified for your State. Ascertain if the person enumerated belongs to a scheduled caste or scheduled tribe and if he does, then record the name of the scheduled caste or scheduled tribe which should find place in the list furnished to you. The answer should be recorded against the correct rectangle provided for the purpose against the question. For a person who is not a member of any scheduled caste or scheduled tribe write 'X' in both the rectangles.

2—91DirCo(Haryana) Chd/76

8·1 If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by synonym or generic name of a caste or a tribe it should be entered only if it finds a place in the list furnished to you. Do not write the names of scheduled castes in general terms as 'Harijan' or 'Achhut'. You should ascertain the name of the caste when it is returned and write it in the rectangle provided for recording the name. Similarly, do not write the names of scheduled tribes in general term as 'Adivasi'. You should ascertain the name of the tribe when it is returned and write it in the rectangle with broken lines provided for recording the same. If a person is negligent and insists on calling himself, merely 'Harijan' or 'Achhut' or 'Adivasi' as the case may be, tell him that this description is not adequate for Census purposes and persuade him to give out the actual name of the caste or tribe. You should make all efforts to ascertain the correct name of the scheduled caste or scheduled tribe as found in the notified list. If the person merely claims to be a scheduled caste or scheduled tribe but says that he does not belong to any of the notified communities applicable to the area, he will not be entered as a scheduled caste or scheduled tribe.

8·2 Scheduled castes can belong only to the Hindus or Sikhs religions. If a person belongs to scheduled caste, there will be either 'H' or 'S' in the answer to question 10. Scheduled tribes may belong to any religion.

8·3 The terms 'Scheduled castes' and 'Scheduled tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

8·4 "Scheduled castes" means such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

8·5 "Scheduled tribes" means such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

8·6 Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of Scheduled castes and Scheduled tribes for each State and Union Territory. Accordingly, the scheduled castes and scheduled tribes are listed under a Presidential Order for each State and local area. In the Scheduled castes and Scheduled tribes Lists (Modification) Order, 1956, amended uptodate, as many as 37 castes are listed as scheduled castes in the State of Haryana. Of these 33 scheduled castes are listed for the whole State, three for districts other than Mahendragarh and Jind and one for Mahendragarh and Jind districts only. *There is, however, no scheduled tribe, listed as such for the whole or any part of Haryana State.*

8·7 The scheduled castes list adopted for Haryana State was based on Scheduled castes/Scheduled tribes Lists, Modification Order 1956 and subsequent corrigenda and Notifications issued after 1956 and is given below :—

1. *Throughout the State :*

1. Ad Dharmi.
2. Bangali.
3. Barar, Burar or Berar.
4. Batwal.
5. Bauria or Bawaria.
6. Bazigar.
7. Balmiki, Chura or Bhangi.
8. Bhanjra.
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi.
10. Chanal.
11. Dagi.
12. Dhanak.
13. Dumna, Mahasha or Doom.
14. Gagra.
15. Gandhila or Gandil Gondola.
16. Kabirpanthi or Julaha.
17. Khatik.
18. Kori or Koli.
19. Marija or Marecha.
20. Mazhabi.
21. Megh.
22. Nat.
23. Od.
24. Pasi.
25. Perna.
26. Pherera.
27. Sanhai.
28. Sanhal.
29. Sansi, Bhedkut or Manesh.
30. Sapela.
31. Sarera.
32. Sikligar.
33. Sirkiband.

2. *Throughout the State except in Mahendragarh and Jind districts*:

1. Darain.
2. Dhogri, Dhangri or Siggi.
3. Sansoi.

3. *In Mahendragarh and Jind districts* :

1. Deha, Dhaya or Dhea.

8·8 A person belonging to any one of the castes mentioned above, subject to area restrictions, was

treated as a member of scheduled castes if he/she professes any of the two religions, namely Hinduism or Sikhism.

9. The other terms used in Table C-VIII relate to literacy and workers which are explained below :—

Literate and Educated Persons:

9·1 For the purpose of Census, only a person who can both read and write with understanding in any language has been considered 'literate'. Evidently, a person who can merely read but cannot write has not been treated as literate. It is not necessary, however, that a person who is literate should have received any formal education, or should have passed any minimum educational standard. Children below the age of 5 years even if they could both read and write have not been considered literate because they are not deemed to have developed the required 'understanding'.

Workers:

9·2 Before defining the term 'worker' it is necessary to explain the concept of main activity adopted for the 1971 Census for the first time. By main activity is meant, as to how a person engages himself, mostly. From the point of view of main activity, therefore, the population got divided into two broad categories *viz.*, 'workers' and 'non-workers'. Only those persons, who participated in any economically productive work as their main activity, have been treated as 'workers'. On the other hand, a person who for most of his time was engaged in any economically non-productive work has been treated as 'non-worker'.

9·3 A *worker*, therefore, is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work as well.

9·4 The worker have been further classified into the following nine industrial categories :—

I. Cultivators;

II. Agricultural Labourers;

III. Workers in Livesotck, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities;

IV. Workers in Mining and Quarrying;

V. Workers in Manufacturing, Processing, Servicing and Repairs. This category has been split into two sub-categories (a) At Household Industry (b) Other than Household Industry;

VI. Workers in Construction;

VII. Workers in Trade and Commerce;

VIII. Workers in Transport, Storage and Communications; and

IX. Workers in Other Services.

For detailed definition of workers and the industrial categories, the reader may refer to Part II-A volume of Series 6 (Haryana) of 1971 Census Publications.

Distribution of Population by Religion

10. From Table C-VII and Statement-I, we observe that Hindus constitute a bulk of population in the State. They represent 89·23 per cent of the total population, 88·84 per cent of the rural population and 91·09 per cent of the urban population. Considering districts we find that Mahendragarh district has returned the highest percentage of the Hindu population *i.e.* 99·01 followed by Rohtak which has returned 98·49 per cent. The lowest percentage of Hindus has been recorded in Gurgaon (81·24%). Percentage of Hindus in all the districts is more than 80 per cent.

10·1 Sikhs are the next prominent community in the State who form 6·29 per cent of the total population. Like Hindus their percentage in urban areas is higher than in rural areas (6·49% and 6·24% respectively). Ambala district has returned the highest percentage of Sikh population in the State (12·57%) followed by Karnal which has returned 11·72 per cent. Rohtak, Gurgaon and Mahendragarh districts have returned even less than one per cent Sikh population.

10·2 Muslims occupy third position in the State as compared to other communities. Their percentage in the State is 4·04. They are mostly concentrated in the rural areas, their percentage in the urban areas being less than one per cent. Gurgaon is the only district in which they form about 1/6th of the total population. In all other districts their percentage is even less than 5. Their percentage in the rural areas of Gurgaon is 20·97. A perusal of Table C-VII shows that they are mostly concentrated in tahsils of Ferozepur Jhirka and Nuh.

10·3 Jains, Christians and Buddhists form 0·31 per cent, 0·10 per cent and 0·01 per cent only respectively of the total population in this State. Jind district has returned the highest proportion of Jain population as compared with other districts of the State (0·66%) and Mahendragarh has returned the lowest proportion (0·11%). Percentage of Christians in Mahendragarh is negligible while in Ambala it is the highest amongst all the districts of the State (0·28%). Buddhists though returned from all districts of the State are found in negligible proportion in Rohtak, Karnal, Mahendragarh and Jind districts. They are not more than 1 per 10,000 population in any district of the State except in Hisar district where their percentage is 0·02. Strangely enough their percentage to total population in rural areas of Hisar is higher than urban areas while in all other districts their proportion is higher in urban areas.

STATEMENT I

Proportion of Population following Six Major Religions of the State

State/District	TRU	Percentage to total population					
		Hindus	Sikhs	Muslims	Jains	Christians	Buddhists

	U	93·84	3·68	0·34	2·09	0·05	0·00

N means negligible.
0·00 means nil.

Growth of various religions during the last decade

11. From Statement-II we observe that Hindus have recorded 32·71 per cent growth rate during the decade 1961-71 which is slightly higher than the general growth rate of population in the State (32·23 %). Examining district-wise data we observe that Hindus have recorded the highest percentage decadal growth rate of 44·63 per cent in Jind followed by 37·32 in Hisar, 37·08 in Gurgaon while the lowest growth rate has been recorded in Rohtak district (25·58%). Gurgaon, Hisar, Mahendragarh, Rohtak and Karnal districts have recorded lower growth rate amongst Hindus as compared to general growth rate of respective districts.

11·1 Sikhs have recorded 22·04 per cent growth rate which is much lower than the general growth rate of the State. Ambala and Jind districts have recorded a negative growth rate of Sikhs—3·32 per cent and —40·74 per cent respectively. Growth rate of Sikh population in Karnal, Rohtak and Mahendragarh districts is also lower than the general growth rate of population. In Hisar and Gurgaon districts Sikh population has recorded higher growth rate than the general growth rate of population. Growth rate of Sikhs recorded in Gurgaon district is even more than double the general growth rate of population.

11.2 Muslims have recorded highest growth rate during the decade in the State as compared with all other religions *i.e.* 39·69 per cent. Comparing districts we find that their growth rate in all districts except in Jind district where they have recorded a negative growth rate (—31·27) is much higher when compared with general growth rate of population. Growth rate of Muslims population in Karnal, Rohtak, Mahendragarh and Hisar is exceptionally high. Mahendragarh leads with 136·20 per cent which is nearly 5 times of the general growth rate followed by Hisar which has recorded 96·07 per cent which is 2½ times of the general growth rate. Karnal follows next with 94·39 per cent growth rate which is followed by Rohtak with 50·40 per cent growth rate. These abnormal growth rates seem to be due to in-migration of muslim population to Haryana State from other parts of India during the decade.

11·3 Jains have recorded a growth of 20·62 per cent which is lower than the general growth rate of 32·23 per cent. Rohtak district alone has recorded a higher growth rate than the general growth rate. All other districts have recorded a lower growth rate.

11·4 Christians have recorded a growth rate of 32·85 per cent which is higher than the growth rate of Hindu population. Gurgaon and Hisar districts have recorded abnormally high growth rate of Christian population (146·44% and 69·47% respectively), while Ambala and Mahendragarh districts have recorded a negative growth rate of —0·84 per cent and —41·38 per cent respectively. Growth rate

recorded in Karnal, Rohtak and Jind are lower than the general growth rates in the districts.

11·5 Buddhists have recorded growth rate of 14·81 per cent which is much lower than the general growth rate of population. They have recorded a negative growth rate (—84·69%) in Rohtak district and fairly high growth rate in all other districts. Against nil population in Karnal, Mahendragarh and Jind districts in 1961 Census some Buddhist population has been reported in 1971 Census in these districts. Growth rate of Buddhists in Ambala, Gurgaon and Hisar districts is very high as compared with general growth rate due to their being in small number.

STATEMENT II

Growth Rate of each Major Religious Community : 1961-71

State/District	Percentage decadal growth rate : 1961-71						
	Total	Hindus	Sikhs	Muslims	Jains	Christians	Buddhists

(—) indicates decline in population.
(OC) indicates that there was no population in 1961.

Distribution of Scheduled caste population

12. From Table C-VIII Part-A and Statement III we observe that scheduled castes are found in fairly large numbers in all the districts of the State. They have also improved upon their percentage to the total population in the State as well as in all districts during the last decade except in Mahendragarh district where there is a negligible improvement in their percentage during this period. Their percentage to the total population is higher than the State average of 18·89 per cent in Ambala, Hisar and Jind districts. Ambala leads among all the districts with 22·39 per cent followed by Hisar with 21·74 per cent and Jind with 19·10 per cent. Amongst districts having less than the State average, Karnal leads with 18·84 per cent followed by Rohtak with 17·43 per cent, Gurgaon with 16·17 per cent and Mahendragarh trails last of all with 14·96 per cent.

Growth of Scheduled caste population during the decade 1961-71

13. Scheduled caste population in the State has increased from 1,364,136 to 1,895, 933 recording a growth rate of 38·98 per cent. Comparing their growth rate during the decade with general population growth rate we find that they have recorded fairly high growth rates in the State as well as in all the districts except Mahendragarh district where their growth rate is almost at par with the general population growth rate. Growth rate recorded by scheduled caste population is fairly high as compared with general population in Hisar, Jind, Karnal and Ambala districts.

STATEMENT III*

State/District	Scheduled caste population in		Percentage of scheduled caste population to total population in		Percentage growth rate of scheduled caste population during 1961-71
	1961	1971	1961	1971	
1	2	3	4	5	6
Haryana	**1,364,136**	**1,895,933**	**17·97**	**18·89**	**+38·98**
Ambala	185,214	245,970	20·91	22·39	+32·80
Karnal	266,517	373,319	17·88	18·84	+40·07
Rohtak	243,958	311,221	17·18	17·43	+27·57
Gurgaon	196,181	276,162	15·81	16·17	+40·77
Mahendragarh	81,272	103,449	14·95	14·96	+27·29
Hisar	305,700	463,665	19·79	21·74	+51·67
Jind	85,294	122,147	18·35	19·10	+43·21

*Scheduled caste population, percentage of scheduled caste population to total population in 1961 and 1971 and their decadal variation.

14. A reference to Appendix to Table C-VIII Part-A shows that out of 37 castes scheduled in the State only 4 castes have more than 50,000 population. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi have the highest proportion of scheduled caste population *viz.*, 52·98 per cent. Balmiki, Chura or Bhangi follows next with 19·78 per cent, Dhanak has 10·91 per cent and Mazhabi 2·93 per cent only. All other castes including unspecified castes form 13·40 per cent of the total scheduled castes population.

15. In the beginning of this volume two maps have been given. The first one illustrates the pattern of distribution of the religious communities and the second depicts growth rates of six numerically prominent communities during the decade 1961-71.

TABLE C-VII

RELIGION

TABLE C-VII

RELIGION

This table gives us distribution of total, rural and urban population by religion and is based on full count. This table gives us information upto tahsil level for total and rural areas and upto town level for urban areas. It corresponds to Table C-VII of the 1961-Census and Table D-II of the 1951-Census.

2. The table gives data for 'males' and 'females' separately for each of the six numerically important religions of India *viz.*, Buddhism, Christianity, Hinduism, Islam, Jainism, and Sikhism. Figures of other religions which are numerically less important have been grouped together and shown in columns 18 and 19 *i.e.* 'Other religions and persuasions'. Details of such religions are given in the Appendix to this table. In Haryana State, however, there are only five persons under this category and all of them are Zoroastrians.

3. Columns 20 and 21 are self-explanatory and give the number of males and females, respectively, who did not report their religions at the 1971-Census. The number of such persons is 1,902 (1,063 males and 839 females) *i.e.* 0·02 per cent of the total population approximately.

4. It may be mentioned here that some persons returned their religions by sect names instead of the main religion to which the sects belong. All such sects were recorded as reported without any mention about the religion to which they belong, at the time of enumeration. After the sorting of individual slips the population returning such sects was clubbed with the respective religion to which these sects belong. Separate figures for such sects are given in the Annexure accompaning this table. The total number of such persons in Haryana State was 3,513 only and they accounted for 0·03 per cent of the total population.

ANNEXURE TO TABLE C-VII

5. This annexure gives details of sects returned against question 10 instead of Religion which have been combined with their appropriate religion.

APPENDIX TO TABLE C-VII

6. The main table gives details of six numerically important religions of India while all other religions and pursuits have been clubbed together and presented as 'Other Religions and Persuasions'. This appendix gives details of all such religions and pursuasions. In Haryana State Zoroastrians alone were returned besides six main religions, whose details are given in this appendix.

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

TABLE C-VIII

Scheduled Castes and Scheduled Tribes

Part-A:—Classification by literacy and industrial category of workers and non-workers according to main activity among Scheduled Castes.

Part-B :—Classification by literacy and industrial category of workers and non-workers according to main activity among Scheduled Tribes.

This table, according to the pattern adopted for all States and Union Territories, has two parts : Part-A for Scheduled Castes; and Part-B for Scheduled Tribes. Since there are no tribes scheduled in Haryana State according to the Presidential Order, only Part-A of this table appears in the Report. This table gives us distribution of Scheduled Castes population for total, rural and urban areas on full count. Scheduled Castes population has been distributed by literacy, workers and non-workers and workers have been further distributed in broad industrial categories. This is a general table for Scheduled Castes and gives us data down to tahsil level. The definition of Scheduled Castes and the names of Scheduled Castes listed for Haryana State have been given in the Introductory Note of this Report. This table corresponds to Table C-VIII of 1961-Census.

2. The population of Scheduled Castes in Haryana State, appearing in Table C-VIII, is 1,895,933 (males 1,013,476 and females 882,457). However, a mistake was detected in the Scheduled Caste population of village Sanghi (Code No. 83) of tahsil and district Rohtak after finalisation of this table and the publication of Part II-A volume and District Census Handbook of Rohtak district. Actual Scheduled Caste population of village Sanghi according to 1971-Census is 804 (males 425 and females 379) as against 2,081 (males 1,099 and females 982) printed in the District Census Handbook of Rohtak. Thus the total Scheduled Castes population of Haryana State, Rohtak district and Rohtak tahsil for total and rural areas may be read as follows :—

		Persons	Males	Females
Haryana State	Total	1,894,656	1,012,802	881,854
	Rural	1,697,349	905,160	792,189
Rohtak District	Total	309,944	164,307	145,637
	Rural	278,574	147,296	131,278
Rohtak Tahsil	Total	84,469	45,020	39,449
	Rural	70,892	37,581	33,311

Appendix to Table C-VIII Part A

3. The appendix to Table C-VIII Part A gives the population of each Scheduled Caste for the total, rural and urban areas of the State and its classification by sex and literacy. The term 'literacy' as well as the industrial categories of workers adopted for 1971-Census have been explained in the Introductory Note.

Classification by Literacy and Industrial Category of Workers

PART V-A

INTRODUCTORY NOTE

Census questionnaires included a question on caste/tribe etc, in variant forms right from the beginning *i. e.* 1872. However, the period of Indian Census History can be divided into two parts (i) before independence (1872—1941) and (ii) after independence (1951—71). Prior to independence caste or tribe or sect was recorded for each individual but after independence it was limited to scheduled castes and tribes only. Various forms of questions included in the questionnaire from decade to decade are reproduced below:—

Year	*Question*
1. 1872	Caste or class
2. 1881	Caste, if Hindu, sect if of other religion
3. 1891	Caste or race—Main caste
4. 1901	Caste of Hindus & Jains, tribe or race of others
5. 1911	Caste of Hindus and Jains, tribe or race of those of other religions
6. 1921	Caste, tribe or race
7. 1931	Race, tribe or caste
8. 1941	Race, tribe or caste
9. 1951	Part (C) Special groups
10. 1961	S. C./S.T.
11. 1971	S. C. or S. T.

In the Indian Censuses prior to 1931 information was collected and published for each individual caste and tribe separately. In the 1931-Census tabulation of figures for individual caste was limited to Exterior castes, primitive tribes and all other castes except those whose members fell short of 0·4 per cent and whose separate data were not required by local Governments. In the 1941-Census there was no tabulation for individual castes or tribes but 'Group Totals' were tabulated for scheduled castes excluding Ad Dharmis, Ad Dharmis, Tribes and Anglo Indian Christians. The departure in 1951 was in pursuit of the policy of the Government of India to discourage community distinction based on caste and creed.

2. It was at the 1961-Census that special tabulation was done, for the first time, to present economic, social, demographic and educational data pertaining to each scheduled caste and scheduled tribe separately. This was done with a view to make available the basic data required for the implementation of welfare schemes for the improvement of the conditions of these communities as provided in Article 46 of the Constitution which reads as follows:—

> "The State shall promote with special care the educational and economic interests of the weaker sections of the people, and in particular, of the scheduled castes and scheduled tribes, and shall protect them from social injustice and all forms of exploitation."

With a view to produce comparable data on the pattern of 1961-Census, it was decided to generate some of the Special Tables for scheduled castes and scheduled tribes at the 1971-Census also. All these Special Tables which relate exclusively to the scheduled castes and scheduled tribes are furnished in Part V-A.

3. Since there are no scheduled tribes in Haryana State, this Part for Haryana contains information for scheduled castes only. The following six tables have been prepared at the 1971-Census dealing with their economic activity, age and marital status and education:—

1. Table SC-I Part A	Industrial classification of persons at work and non-workers by sex for scheduled castes (Rural)
2. Table SC-I Part B	Industrial classification of persons at work and non-workers by sex for scheduled castes (Urban)
3. Table SC-II	Age and Marital Status for scheduled castes
. Table SC-III-Part-A	Education in Urban areas only for scheduled castes
5. Table SC-III Part B	Education in Rural areas only for scheduled castes.
6. Table SC-IV	Persons not at work classified by sex, type of activity and educational levels for scheduled castes

The first five tables have been prepared for each scheduled caste separately while the sixth table gives data for the total scheduled castes population. All these tables have been prepared on full count and give data for the State and each district separately.

4. A special table prepared at the 1961-Census pertaining to Religion for scheduled castes has, however, been dropped at the 1971-Census.

5. Question 11 of the Individual slip relating to the scheduled castes and scheduled tribes along with the instructions to Enumerators, the definition of scheduled castes/scheduled tribes, list of scheduled castes adopted for Haryana State based on the Scheduled castes/Scheduled tribes Lists Modification Order, 1956 as amended vide the Punjab Reorganisation Act, 1966 and subsequent corrigenda and Notifications and the definitions of Literacy and workers have already been discussed in the Introductory Note for Part II-C(i) which is also included in this volume. Concepts of activities of non-workers are produced below:—

H: Household Duties

6. This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other

work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc. and also attends to household duties, obviously her main activity will be the economic activity in which she is mstly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16 (a)(i).

ST : Student

7. This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : Retired person or a Rentier

8. A person who has retired from service and is doing no other work *i. e.*, not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade,etc. or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box for a person coming under this category.

D : Dependent

9. This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B : Beggars etc.

10. This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I : Inmates of Institutions

11. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled ot do some work such as carpentary, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O : Other Non-workers

12. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

13. Inspite of the specific instructions to the enumerators that the names of scheduled castes should not be written in general terms as 'Harijan', or 'Achhut', there were some such returns where 'Harijan', 'S.C'. or 'Not Known' was written in the individual slips. All such returns have been grouped as 'unspecified' and retained as scheduled castes for sorting. The reasons for such returns could, however, be;

(*i*) some of the Enumerators might not have followed the instructions fully and therefore recorded whatever was reported by the respondents ; or

(*ii*) the respondent might have insisted to record him as 'Harijan' or 'S.C.' without telling the name of the caste to which he belonged and the enumerator might have recorded accordingly to avoid controversy.

14. In addition to question 11, data appearing in the Special Tables for Scheduled Castes have been obtained by a cross-tabulation of the following questions of the Individual slip canvassed at the 1971-Census:—

Q. 3—Sex ○

Q. 4—Age————

Q. 5—Marital status————

Q.12—Literacy (L or O) △

Q.13—Educational level————

Q.16—Main Actitvity

(*a*) Broad (*i*) { Worker (C, AL, HHI, OW) ⌓
category (*ii*) { Non-worker (H, ST, R, D, B, I, O) ⌔

(*d*) Nature of Industry, Trade, Profession or Service————

The instructions to Enumerators for filling up these questions have been discussed in Series 6-Haryana-Part II-A-General Population Tables.

15. It was from the answers to Q.16 (a) that the population was first divided into workers and non-workers. Then with the help of answers to Q.16(a) (i) and Q.16 (d) the working population was classified into the following nine broad industrial categories of workers:—

I. Cultivators;

II. Agricultural labourers;

III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities;

IV. Mining and Quarrying;

V. Manufacturing, Processing, Servicing and Repairs—

(a) At Household Industry;

(b) Other than Household Industry;

VI. Construction;

VII. Trade and Commerce;

VIII. Transport, Storage and Communications; and

IX. Other Services.

Tables SC-I Part-A and SC-I Part-B are based on this classification. Table SC-II giving age and marital status for scheduled castes has been prepared with reference to Qs. 4 and 5, while Tables SC-III Part-A and SC-III Part-B have been produced with the help of answers to Qs. 12 and 13.

16. The classification of non-workers into seven categories as appearing in Table SC-IV, has been done on the basis of entries in Q. 16 (a) (ii) wherein types of activities of non-workers, concepts of which have been discussed in earlier paras, were adopted.

Growth of Scheduled Caste Population

17. Scheduled caste population has grown from 1,364,136 in 1961 to 1,895,933 in 1971 recording a decadal growth of 38·98% which is much higher than growth rate of 32·23% recorded by general population of the State during the decade. Examining percentage increases recorded by each individual caste given in Statement-I given below we observe that Bhanjra, Megh, Nat, Pasi and Sapela have recorded abnormal growth rate of more than 100% while Bauria or Bawaria, Bazigar, Dhanak, Dumna, Mahasha or Doom, Khatik, Kori or Koli, Od and Sansi, Bhedkut or Manesh have recorded percentage increase of less than 100% but more than average percentage in scheduled caste population in the State during the decade. Balmiki, Chura or Bhangi, Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi, Mazhabi and Sikligar have though recorded an increase during the decade yet it is lower than the State percentage increase in total scheduled castes population. Ad Dharmi, Kabirpanthi or Julaha and Sirkiband have recorded a decrease in their population. The abnormal increases or decreases in some castes may be mainly due to immigration from or emigration to neighbouring States respectively:—

STATEMENT I

Population of scheduled castes in Haryana State according to 1961 and 1971-Censuses and percentage Increase by castes

Name of Scheduled Caste	Population in		Percentage increase (+) or decrease (—) during 1961-71
	1961	1971	
1	2	3	4
1. Ad Dharmi	1,425	868	—39·09
2. Balmiki, Chura or Bhangi	279,468	374,960	+34·17
3. Bauria or Bawaria	14,641	23,851	+62·91

Distribution of Scheduled Caste Population

18. We have already discussed distribution of scheduled caste population in general in introductory note in Part II-C(i) included in this volume. Here we may examine distribution of prominent scheduled castes in rural and the urban areas of the State and districts.

19. Table SC-II shows that there are 11 scheduled castes only in Haryana State with a population of 10,000 or more. Among these Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (all combined) leads with 1,004,413 persons followed by Balmiki, Chura or Bhangi (all combined) with 374,960 persons. Dhanak occupies third position with 206,783 persons. While Mazhabi occupies fourth position with 55,564 persons, other castes having population of more than 10,000 are Bauria or Bawaria; Bazigar; Kabirpanthi or Julaha; Khatik; Kori or Koli; Od; Sansi, Bhedkut or Manesh. Percentage of population of these castes to total scheduled caste population is given in Statement II:—

STATEMENT II

Name of Scheduled Caste	Percentage to total Scheduled Caste Population
1. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi	52·98
2. Balmiki, Chura or Bhangi	19·78
3. Dhanak	10·91
4. Mazhabi	2·93
5. Bazigar	2·10
6. Od	1·60
7. Kori or Koli	1·29
8. Bauria or Bawaria	1·26
9. Khatik	1·23
10. Kabirpanthi or Julaha	0·96
11. Sansi, Bhedkut or Manesh	0·74

All other castes have a population of even less than 10,000 in the State.

20. In Ambala district, Balmiki, Chura or Bhangi (43,356); and Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (171,854) are the only castes with a population of 10,000 or above. In Karnal district there are only 4 prominent castes *viz.*, Balmiki, Chura or Bhangi (113,039); Bazigar (16,596); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (174,347); and Mazhabi (14,389). In Rohtak district there are 3 castes having more than 10,000 population *viz.*, Balmiki, Chura or Bhangi (71,910); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (151,192); and Dhanak (67,338). Gurgaon district has 4 castes with more than 10,000 population. These are Balmiki, Chura or Bhangi (45,863); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (174,972); Dhanak (12,955); and Kori or Koli (18,265). In Mahendragarh there are only 2 castes *viz.*, Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (62,347); and Dhanak (25,105) with population of more than 10,000. In Hisar district there are as many as 7 scheduled castes with population of more than 10,000. These are Balmiki, Chura or Bhangi (56,337); Bauria or Bawaria (15,446); Bazigar (17,089); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (206,012); Dhanak (77,421); Mazhabi (40,178); and Od (20,676). Like Rohtak, Jind has also 3 castes *viz.*, Balmiki, Chura or Bhangi (37,260); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (63,689); and Dhanak (15,671) with a population of more than 10,000.

21. It is observed from this table that Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi is most prominent scheduled caste in all the districts of the State and this is the only caste with a population of more than 1 lakh in all the districts except Mahendragarh and Jind. From Statement II we find that this caste constitutes more than half of the total scheduled caste population (52·98%). Balmiki, Chura or Bhangi forms 19·78% and Dhanak 10·91% and no other castes forms even 3% of the scheduled caste population. In urban areas of the State, there are only 4 scheduled castes which have more than 10,000 population. These are, Balmiki, Chura or Bhangi (58,177); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (77,087); Dhanak (20,853) and Khatik (12,329). In rural areas of the State, we have again 11 scheduled castes with a population of more than 10,000. These are, Balmiki, Chura or Bhangi (316,783); Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi (927,326); Dhanak (185,930); Bauria or Bawaria (23,038); Bazigar (38,861); Mazhabi (54,248); Od (28,342); Kabirpanthi or Julaha (15,265); Khatik (11,017); Kori or Koli (15,970); and Sansi, Bhedkut or Manesh (13,384).

Economic Activity of the Scheduled Castes

22. From Statement-III given on the next page we observe that in rural areas of the State a greater proportion of scheduled castes population is active as compared with general population. While in urban areas male scheduled castes are less active as compared with general population of the males, comparatively scheduled caste females of urban areas are much more active than females of general population.

STATEMENT III

Percentage of Workers and Non-workers to total population among Scheduled Caste and General Population in Haryana State, 1971

	Rural Urban	Total Population			Workers			Non-workers		
		P	M	F	P	M	F	P	M	F
Scheduled Castes	Rural	100	100	100	27·28	48·02	3·58	72·72	51·98	96·42
	Urban	100	100	100	27·51	46·06	5·24	72·49	53·94	94·76
General Population	Rural	100	100	100	26·47	47·50	2·29	73·53	52·50	97·71
	Urban	100	100	100	26·31	46·19	3·00	73·69	53·81	97·00

23. Comparing employment of scheduled castes in different economic activities with general population in rural areas we find from Statement-IV given on the next page that the pattern followed by scheduled caste workers is quite different to general population workers. Most of the scheduled caste workers are engaged in agriculture labour and a very little proportion is working as cultivators. They are also found to be in less proportion as compared with general population in Trade and Commerce and Other Services, while their proportion in categories III, IV, V and VI are comparatively much higher than proportion of workers of general population to total workers in these economic activities. Their employment pattern in urban areas in agriculture sector, manufacturing, servicing and repairing and construction is similar to rural areas except for female workers in manufacturing, other than household industry. In Mining and Quarrying no workers are reported amongst scheduled castes in urban areas, while proportion of male scheduled caste workers in Transport and Other Services are much higher as compared with proportion of general population workers. However, proportion of female workers amongst scheduled castes in urban areas is lesser in Other Services, but female scheduled caste workers are in greater proportion as compared with general female workers in Trade and Commerce.

24. Statement V gives us percentage of male and female workers of prominent scheduled castes according to economic activity they are engaged in rural areas. From this statement we observe that most of the working scheduled caste population both males and females are engaged in agricultural labour. The next important activity is cultivation in which 18·17 per cent male workers and 11·28 per cent female workers are engaged. In altogether 73·20 per cent male workers and 69·86 per cent female workers are engaged in agriculture. The third important activity is 'Other services' in which 8·58 per cent male and 9·94 per cent female workers are employed. Manufacturing also absorbs a sizeable percentage of scheduled caste workers wherein as many as 9·69 per cent male workers and 12·43 per cent female workers are engaged. None of the other activities attract even 5 per cent male or female workers.

25. Examining prominent castes in rural areas we find that Megh, Bauria or Bawaria are the only prominent scheduled castes which engage more than 50 per cent male or female workers in cultivation. Other castes returning more than 30 per cent male workers or female workers in cultivation are Bazigar and Dumna, Mahasha or Doom. Bhanjra; Kabirpanthi or Julaha; Khatik; Kori or Koli; Megh and Sansi, Bhedkut or Manesh are the only castes which have returned less than 50 per cent male workers engaged in agriculture labour. Sansi, Bhedkut or Manesh is the only caste which has attracted more than 10 per cent male and female workers in plantation, livestock and hunting. Mining and Quarrying has attracted only negligible proportions of workers in all castes except from Megh, Bhanjra and Kori or Koli. More than 20 per cent male and female workers have been reported by Kori or Koli and Kabirpanthi or Julaha castes and more than 20 per cent female workers by Khatik caste in manufacturing, servicing and repairing. Other castes returning more than 10 per cent male or female workers in manufacturing, servicing and repairing are Bhanjra; Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi; Dhanak; and Dumna, Mahasha or Doom. Construction has not attracted many workers from scheduled castes. The only caste returning more than 10 per cent male workers is Kori or Koli, while Kabirpanthi or Julaha; Od; and Sansi, Bhedkut or Manesh are the other castes returning more than 10 per cent female workers. Percentage of trade workers in all castes is negligible except Bhanjra and Khatik. It is strange to note that Khatik caste has returned more than 25 per cent male and 10 per cent female workers. Probably these are the persons who are engaged both in processing and selling of meat etc. None of the castes has returned more than 5 per cent male or female workers in transport. More than 10 per cent male or female workers in other services has been recorded by Balmiki, Chura or Bhangi; Bhanjra; Dumna, Mahasha or Doom; and Kabirpanthi or Julaha castes.

26. In urban areas of State, other services is most prominent economic activity of the scheduled castes as a whole and amongst most of the prominent castes as revealed from Statement-VI. More than 50 per cent male workers have been reported by Balmiki, Chura or Bhangi; Dumna, Mahasha or Doom; and Sansi, Bhedkut or Manesh and more than 50 per cent female workers have been reported by Balmiki, Chura or Bhangi; Bazigar; Bhanjra; Dumna, Mahasha or Doom; and Mazhabi. Next prominent activity in urban areas is manufacturing, servicing and repairing which attracts a sizeable percentage of workers from Bhanjra; Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi; Dhanak; Kabirpanthi or Julaha; Khatik; Kori or Koli; and Megh. In manufacturing most of the workers are engaged in manufacturing, servicing or repairing other than household industry and comparatively less number of workers are engaged in manufacturing run on household industry. More than 20 per cent male or female workers have been returned in construction from Bauria or Bawaria; Bazigar; Kabirpanthi or Julaha; Kori or Koli; Megh; and Od castes. Dhanak and Khatik have returned a sizeable percentage of male and female workers in Trade. These persons are likely to be engaged in manufacturing and selling and not only selling. Transport has attracted more than 20 per cent male or female workers from Bazigar; Bhanjra; and Mazhabi castes.

27. **Civil Status.**—Comparing civil status of scheduled castes population with general population by broad age groups, as given in Statement-VII given on the next page, we find that scheduled caste population in Haryana State almost follow the same pattern as that of general population except for little variation in various marital status and age groups. This statement shows that scheduled caste population has a more broader base as compared with general population *i. e.* percentage of persons in age group 0-14 are more amongst scheduled castes than in general population. Even when their proportion in age group 15-44 is lower than general population, the proportion of married males and females in this age group is more than general population. There are lower proportion of never married persons except in age group 0-14 which is probably due to greater proportion of population in this age group. There is higher incidence of marriages in younger age group among scheduled castes as compared with general population as there are as many as 89 males and 244 females against 58 males and 181 females in general population per ten thousand males and females respectively. Lesser percentage of widowed males and females amongst scheduled castes as compared with general population may be due to comparatively more freedom for widow remarriage amongst scheduled castes than general population.

STATEMENT VII

Percentage distribution of Males and Females by Age and Marital Status among Scheduled Castes and General Population in Haryana State, 1971

Literacy and Educational Standard

28. From Statement-VIII given below we observe that scheduled castes in urban areas are still very backward and the proportion of literates as compared with general population is just half while that of females is almost one sixth. Comparing educational levels we find that scheduled castes have just 3·75 per cent males having acquired Matriculation or higher educational levels as against 14·21 per cent males in general population with equivalent educational levels. Scheduled caste females are much more backward as 0·48 per cent females only have acquired Matriculation or higher educational level against 6·91 per cent females in general population with equivalent educational levels. Educational levels of scheduled castes would still turn out to be much lower if we compare them with general population after excluding scheduled caste population.

STATEMENT VIII

Percentage distribution of Males and Females by Literacy and Educational levels among Scheduled Castes and General Population in Urban Areas of Haryana States, 1971

Educational levels	Scheduled Castes		General Population	
	Males	Females	Males	Females

N=Negligible

29. In case of rural areas of the State as depicted in Statement IX given below we find that scheduled castes are not so low as compared with general population than what they have returned in urban population.

STATEMENT IX

Percentage distribution of Males and Females by Literacy and Educational levels among Scheduled Castes and General Population in Rural areas of Haryana State, 1971

Educational levels	Scheduled Castes		General population	
	Males	Females	Males	Females
1	2	3	4	5
Total	**100**	**100**	**100**	**100**
I. Illiterates	80·23	97·46	67·43	90·75
II. Total Literates	19·77	2·54	32·57	9·25
1. Literate (without educational levels)	10·32	1·80	10·17	3·36
2. Primary or Junior Basic	8·24	0·71	18·49	5·37
3. Matriculation or Higher Secondary	1·18	0·03	3·67	0·48
4. Graduate and above	0·03	N	0·24	0·04

N-Negligible

30. In rural areas of the State, scheduled castes have 80·23 per cent illiterate males as compared with 67·43 per cent illiterate males amongst general population while 97·46 per cent females among scheduled castes are illiterate against 90·75 per cent in general population. Comparing educational levels we find that as against 3·91 per cent males having acquired Matriculation or above educational level in general population there are 1·21 per cent males only amongst scheduled castes. The plight of females is still worse as there are only 0·03 per cent females amongst scheduled castes who have acquired Matriculation or higher educational level as against 0·52 per cent females amongst general population in rural areas.

TABLE SC-I

Industrial classification of Persons at work and Non-workers by sex for Scheduled Castes

This table has been prepared in two parts : *Part A* for rural areas; and *Part B* for urban areas. The table gives the population of each Scheduled Caste by sex alongwith their classification into workers and non-workers. Workers of each scheduled caste are further classified into the following nine industrial categories of workers:—

I. As Cultivators;

II. As Agricultural Labourers;

III. In Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities;

IV. In Mining and Quarrying;

V. In Manufacturing, Processing, Servicing and Repairs;

(a) Household Industry

(b) Other than Household Industry

VI. In Construction;

VII. In Trade and Commerce;

VIII. In Transport, Storage and Communications; and

IX. In Other Services.

For detailed definition of workers and its industrial categories the reader may refer to Part II-A General Population Tables or Part II-B(i) General Economic Tables, Series 6(Haryana) of 1971 Census.

Data in this table have been presented for the State and each district. The castes for which there are no figures in any district have been deleted from the table under that district. This table corresponds to Table SCT-I Part A of 1961-Census . Table SCT-I Part A of 1961 Census, however, presented additional data for the workers engaged in special occupations *i.e.* 'tanning and currying of hides and skins' and 'scavenging', but no such classification has been attempted at the 1971 Census.

TABLE SC-II

Age and Marital Status for Scheduled Castes (caste-wise)

This table corresponds to Table SCT-II Part A of 1961-Census and gives the dtstribution of male and female population of each caste separately by the three broad age-groups *i. e.* 0—14, 15—44, 45+ and Age not stated. The population under each age-group is further classified according to the marital status *viz.*, 'Never Married', 'Married', 'Widowed', 'Divorced or Separated' and 'Unspecified marital status.' Persons who did not report their marital status have been grouped under 'unspecified marital status' for each group separately. The number of such persons in Haryana State was 552 (149 males and 403 females). A bulk of persons having unspecified marital status were in the age group 0—14 *viz.*, 453 persons (103 males and 350 females) followed by age group 15—44 with 83 persons (39 males and 44 females) and age group 45+ had just 16 persons (7 males and 9 females).

The total number of persons who did not report their age was only 54 (16 males and 38 females), of whom 52 (15 males and 37 females) were unmarried and 2 (1 male and 1 female) were married.

This table is presented for the State and each district without any rural or urban break-up. The castes for which there are no figures for any district have been omitted from the Table for that district. Castes have been arranged in alphabetic order.

TABLE SC-III

Part-A Education in Urban Areas only for Scheduled Castes

Part-B Education in Rural Areas only for Scheduled Castes

This Table presents statistics about the educational levels of the population belonging to each scheduled caste and has been prepared in two parts—Part-A for urban areas, and Part-B for rural areas. Part-A is similar to Table SCT-III Part A(i) and Part-B to Table SCT-III Part B(i) of 1961-Census except for a little elaboration of educational levels for rural areas in 1971.

For urban areas, the literates have been classified into the following seven educational levels:—

1. Literate (without educational level);
2. Primary or Junior Basic;
3. Matriculation or Higher Secondary;
4. Non-technical Diploma not equal to Degree;
5. Technical Diploma not equal to Degree;
6. University Degree or Post-graduate Degree other than Technical Degree; and
7. Technical Degree or Diploma equal to Degree or Post-graduate Degree.

In case of rural areas, however, the classification of educational levels have been confined to four only:—

1. Literate (without educational level);
2. Primary or Junior Basic;
3. Matriculation and above but below graduate; and
4. Graduate and above.

The test for literacy was the ability of a person to read and write with understanding in any language. In case he had attained any educational standard, the highest examination passed was recorded against Q.13 of the Individual Slip canvassed at 1971-Census. For a person who was studying in a particular class the highest educational level attained by him was the one he had actually passed and not the one in which he was studying. In case, a person held both general and technical qualifications, both of equivalent level, the technical qualification was given preference in recording the highest educational level attained.

The number of graduates and above in the rural areas of Haryana State was 294 (288 males and 6 females). The number of such persons in the urban areas was, however, 277 (260 males and 17 females) of whom only 10 (8 males and 2 females) have attained technical degree or diploma equal to degree or post-graduate degree. Besides, 8 persons in the urban areas (7 males and 1 female) had received technical diplomas not equal to degree, while the number of persons obtaining non-technical diploma not equal to degree in the urban areas was 28 (13 males and 15 females).

Data in this table are presented for the State and each district. The castes which were not returned in any district have been omitted from the table for that district.

TABLE SC—IV

Persons not at Work classified by Sex, Type of activity and Educational Levels for Scheduled Castes

Entire population has been divided into two broad streams of main activity namely workers and non-workers according to type of main activity a person engages himself/herself mostly. A non-worker is a person who, as his main activity, is not engaged in any economically productive work, but is basically non-working. In this Table, non-workers among the scheduled castes have been classified as under :—

1. Students;
2. Household duties;
3. Dependents and Infants;
4. Retired, rentiers and persons of independent means;
5. Beggars, vagrants, etc.;
6. Inmates of penal, mental and charitable institutions; and
7. Others.

Concepts of above categories of non-workers have been discussed in introductory note.

This Table also gives the 'educational levels' of all the non-workers *i.e.* whether 'Illiterate', 'Literate (without educational level)', 'Primary or Junior Basic', 'Matriculation and above but below Graduate' and 'Graduate and above'. The term 'literacy' has already been explained in the flyleaf to Table SC-III.

The Table, however, presents data for the total scheduled caste population and not for each caste separately. The data are given for the total, rural and urban areas of the State and each district. To some extent, the able corresponds to Table SC-I of 1961-Census. In 1961, the non-workers were categorised into four broad heads only *i.e.*

(a) Full time students;

(b) Persons seeking employment for the first time;

(c) Persons employed before but now out of employment and seeking work; and

(d) Others.

Comparison of data of two censuses except for students is not possible. Moreover, the last two categories of educational levels of 1971-Census were grouped together as 'Above Matriculation or Higher Secondary at the 1961-Census'.
