CENSUS OF INDIA 1961

PAPER No. 1 OF 1967

SUBSIDIARY TABLES B-I.6 AND B-II.3

WORKERS FROM 1901/11 TO 1961 BY
STATES AND UNION TERRITORIES
AND BY CITIES

Office of the

Registrar General and Census Commissioner for India

FOREWORD

All Subsidiary Tables relating to 1961 Census except Tables B-I.6 and B-II.3 are being published in Parts I-C(i) and I-C(ii). It was considered appropriate to publish Tables B-I.6 and B-II.3 as a separate Census Paper because of the specialised nature of the data contained in these tables which may be used by research scholars and demographers. In Table B-I.6, workers are classified by broad industrial categories and by States and Union Territories from 1901/1911-1961. In Table B-II.3, workers in each city and town group are classified by broad industrial categories from 1901/1911-1961. For each Table, workers per 1,000 of population and distribution of workers by broad industrial categories per 1,000 of total workers are also worked out.

Camparable series of working force were published for the first time in Paper No. 1 of 1962 (Final Population Totals). The methodology, on the basis of which the present Tables have been prepared, has since undergone some change as a result of incorporating the suggestions of the Study Group on Comparability of Census Economic Classifications set up by this office. The Tables were prepared in the Research Unit of this office and Har Gopal Saini, V. A. Deshmukh, H. C. Agarwal, Prem Kanta, Ved Prakash and R. K. Choudhary assisted in the intricate computational work involved in these Tables. K. K. Gaind, Stenotypist, typed the manuscript of the Tables. Shri B. R. Kalra, Research Officer under whose guidance the tabulation was done has done a commendable job. To all of them my thanks are due.

Explanatory Note	i–iii
Subsidiary Table B-I.6 :	
(i) Working force in India by Broad Industrial Categories from 1911—1961—by States	3–25
(ii) Workers per 1000 population in each State and per 1000 distribution of workers in Industrial Categories from 1901/1911—1961	26–37
Subsidiary Table B-II.3 :	
(i) Workers in each City and comparison of workers in Industrial Categories from 1901—1961	41–100
(ii) Workers per 1000 population in each City and comparison of workers in Industrial Categories from 1901—1961	101–145

EXPLANATORY NOTE

Methodology of Groupings of Workers and Non-workers 1901—1951 *according to* 1961 *Census Categories*

The methodology used for working out figures of workers and non-workers in 1901—1951 (except 1941) and their distribution in nine broad industrial categories according to 1961 Census is given below. The figures in Subsidiary Tables B-I.6 and B-II.3 are worked out on the lines of this methodology.

1951 *Census*

Workers in 1951 comprised—

(i) All self-supporting persons with productive principal means of livelihood, *i.e.*, all self-supporting persons other than (a) agricultural rent receivers belonging to livelihood Class IV and (b) self-supporting persons deriving their means of livelihood from non-agricultural, non-productive occupations, like beggars, pensioners, etc., belonging to livelihood Class VIII;

(ii) Self-supporting persons belonging to livelihood Class IV (agricultural rent receivers) but deriving secondary means of livelihood from productive occupations, *i.e.*, other than Class IV; and

(iii) All earning dependents in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from:—

(a) receipt of agricultural rent under Class IV, and

(b) non-agricultural non-productive occupations. (For calculating working force, no account has been made of the self-supporting persons whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood, as unlike rent receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood).

Earning dependents, however, were classified only into 8 livelihood classes and there was no further break-up of them into divisions and sub-divisions or groups.

On the experience of 1961 it was presumed that the earning dependents in 1951 also generally belonged to the household sector and were mostly family workers in the non-household sector. This is of course a big assumption to make but seems warranted by 1961 experience. Livelihood Class V corresponds with, Division, 0—3 of ISIC. Workers in household industry at two-digit level in 1961 covering Divisions 0—3 of ISIC, were added to family workers at non-household industry and their proportions at two-digit level were worked out for livelihood Class V of 1951. The earning dependents of livelihood Class V of 1951 were allocated to major groups of ISIC on the basis of the proportions so worked out. Earning dependents in livelihood Class VI, VII and VIII of 1951 were allocated to major groups of 1961 on the basis of the distribution of the family workers of 1961. For this purpose, family workers of major groups for 1961 were first recast into livelihood classes of 1951 and their proportions for each livelihood class were worked out. The earning dependents belonging to each livelihood class were then distributed on the basis of the proportions so worked out. The figures so obtained at major group level were consolidated into nine industrial categories of 1961.

Non-workers of 1951 were equal to—

(i) All non-earning dependents ;

(ii) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood ;

(iii) The following groups of self-supporting persons were included in non-agricultural Class VIII :—

(a) Persons living principally on income from non-agricultural property,

(b) Pensioners and remittance holders,

(c) Inmates of jails, asylums, alms-houses and recipients of doles, beggars and vagrants, and

(d) Other persons living principally on income derived from non-productive activity ;

(iv) Earning dependents whose own means of livelihood (secondary means of livelihood) was agricultural rent receiving under Class IV ; and

(v) Earning dependents whose secondary means of livelihood was non-agricultural, non-productive.

1931 *Census*

I. Workers :

(i) All earners following productive occupations ; and

(ii) All working dependents following productive occupations.

II. Non-workers :

(i) All non-working dependents ; and

(ii) Earners and working dependents following non-productive occupations :—

(a) Non-cultivating proprietors taking rent in money or kind ;

(b) Proprietors (other than agricultural land), fund, scholarship holders and pensioners ;

(c) Inmates of jails, asylums and alms-houses ;

(d) Beggars and vagrants ;

(e) Procurers and prostitutes ; and

(f) Other unclassified non-productive industries.

1921 *and* 1911 *Censuses*

I. Workers:

All "Actual workers" having productive occupations.

II. Non-workers:

(i) All "dependents"; and

(ii) All "Actual workers" in non-productive occupations as stated in case of 1931 Census.

1901 *Census*

I. Workers:

All "Actual workers" having productive occupations.

II. Non-workers :

(i) All "dependents"; and

(ii) "Actual workers" in non-productive occupations :

(a) Rent receivers ;

(b) Prostitutes, procurers, pimps ; etc.;

(c) Receivers of stolen goods. ;

(d) Witches, wizards, cow-poisoners ; etc ;

(e) House-rent, share and other property not being land ;

(f) Allowances for patrons or relatives ;

(g) Educational or other endowments, scholarships, etc. ;

(h) Mendicancy (not in connection with a religious order) ; and

(i) Pensioners, inmates of asylums, prisoners, etc.

The statement indicates the reclassification of groups and sub-divisions in earlier censuses on the lines of 1961 broad industrial classification.

The figures presented in Table B-I.6 are on the basis of re-organised States and are, thus, comparable. Changes upto district level have been effected by including or excluding an entire district from a particular State as the case was. Adjustments below district level were made on the basis of population on a pro-rate basis. Similarly, figures of working force for cities and towns in Table B-II.3 are also adjusted on the basis of comparative figures of population on a pro-rate basis.

STATEMENT

Comparative Chart of Economic (Industrial) Classifications 1901-1961 *in Broad Industrial Categories*
