PUBLICATION PROGRAMME

Tamil Nadu

(Series 19 relates to Tamil Nadu only. Under this series, the following publications will be issued.)

Portrait of Population	A Descriptive Analysis of 71 Census data
Part I—A	General Report (First Part)
Part I—B	General Report (Second part)
Part I—C	Subsidiary Tables
*Part II—A	General Population Tables (A Series)
*Part II—A Supplement	General Population Tables (Standard Urban Areas)
*Part II—B(i)	General Economic Tables (B-I Part A and B-II)
Part II—B(ii)	General Economic Tables (B-I Part B and B-III to B-IX)
Part II—C(i)	Distribution of Population—Religion, Scheduled Castes and Scheduled Tribes
Part II—C(ii)	Other Social & Cultural Tables and Fertility Tables
Part II—D	Migration Tables
*Part III—A	Report on Establishments
*Part III—B	Establishments Tables
*Part IV	Housing Report and Tables
†Part V—A	Special Tables for Scheduled Castes and Scheduled Tribes
Part V—B	Ethnographic Notes on Scheduled Castes and Scheduled Tribes
Part VI—A	Town Directory
Part VI—B	Special Survey Reports on Selected Towns
Part VI—C	Survey Reports on Selected Villages
*Part VIII A & B	Administration Report on Enumeration & Tabulation (for official use only)
Part IX	Census Atlas
*Part IX—A	Administrative Atlas (Two volumes)
Part X	District Census Hand Books
*A	Village and Town Directory
*B	Village and Townwise Primary Census Abstract
C	Analytical Report, Administrative Statements and District Census Tables
	Special Studies and other Miscellaneous Reports

ALL INDIA PUBLICATIONS

Volumes similar to those indicated above are being published at the All India level. Apart from these All India Census Tables on 1% sample basis, as Part II (Special) and a Special Report on Graduates and Technical personnel as Part VII have been published.

*Already published †Present publication.

PREFACE

The present publication contains the special tables on Scheduled Castes and Scheduled Tribes in Tamil Nadu. The statistics presented in the tables are compiled from the Individual Slips of the 1971 Census. Four tables on scheduled Castes and five tables on Scheduled Tribes are presented. The tables have been compiled by processing the individual slips after the main census sorting and compilation was over. The tables in this volume are similar to the tables published in Part V--Scheduled Castes and Tribes of the 1961 Census publications of Madras.

The tables are preceded by a fly leaf explaining in brief the salient features of the table that follows. Two maps--one on Scheduled Castes and other on Scheduled Tribes—are included in this volume. It is hoped that the publication would be of use to Sociologists, Anthropologists and others interested in the study of the Scheduled Caste and Scheduled Tribe population.

In the publication of this volume, I was assisted by Sri. T.R. Rajagopalan and later by Sri. T. V. Srinivasan and Sri. M. Thangaraju, Deputy Directors, Sarvasri N. Rama Rao and M. Panchapakesan, Assistant Directors, Sarvasri A.V. Vallinathan and R. Narayanan, Tabulation Officer, Shri V.V. Balan Nambiar Smt. B. Jayalakshmi, Statistical Assistants, Smt. M. Jagatheeswari, Research Assistant and Sri. A. Rajamani Artist. Other members of the staff who attended to the compilation of these tables are given in the following page. I place on record my appreciation of the good work and able assistance given by them in bringing out this publication.

Sri. R. B. Chari, I. A. S., Registrar General, India has been a source of inspiration for the early publication of the census volumes. I am grateful to him for the guidance and help rendered to me in this regard. I also thank Sri. K. K. Chakravorty, Assistant Registrar General (Census) and his staff for the scrutiny and early clearance of the tables published in this volume.

Lastly, I would like to extend my thanks to Sri. A. V. Bodas, Manager, Govt. of India Press, Nasik-6 and his colleagues for the expeditious printing of this book.

K. CHOCKALINGAM
Director of Census Operations
Tamil Nadu & Pondicherry

Madras,
5-5-1977.

Members of staff who were associated with the compilation of S. C./S. T. tables of Tamil Nadu

Kum. L. Tarasundari, Upper Division Clerk
Kum. P. Susheela, Assistant Compiler
Kum. M. C. Vijayalakshmi, Assistant Compiler
Kum. S. Thilakam, Assistant Compiler
Kum. B. Sarada, Assistant Compiler
Kum. S. Dhanalakshmi, Assistant Compiler
Smt. C. K. Banumathy, Assistant Compiler
Sri. S. Somasundaram, Assistant Compiler
Smt. B. Santhanalakshmi, Assistant Compiler
Smt. V. Lalitha, Lower Division Clerk
Smt. B. Rajeswari, Lower Division Clerk

TABLE SC—I PART A AND PART B

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES FOR RURAL AND URBAN AREAS (FOR EACH CASTE SEPARATELY)

2—1 Census T.N./76

TABLE SC—I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

Fly Leaf

For each Scheduled Caste recognised in Tamil Nadu and returned in 1971 Census, details of total population, workers and non-workers as also workers classified by the nine broad industrial categories are presented in this table. The data are presented separately for all persons, males and females, for the State as a whole, and for each district. Data are given separately for the rural areas and urban areas in Parts A and B of the table respectively. All the Scheduled Caste workers have been classified for purposes of this table into nine broad industrial categories. The industrial categories adopted are :

Industrial Category	Description
I	Cultivators
II	Agricultural Labourers
III	Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
IV	Mining and Quarrying
V	Manufacturing, Processing, Servicing and Repairs
	(a) Household Industry
	(b) Other than Household Industry
VI	Construction
VII	Trade and Commerce
VIII	Transport, Storage and Communications
IX	Other Services

For convenience, non-workers have been classified as X.

The present table is similar to table SCT Part A for rural and urban areas, presented in 1961. (vide Part-V-A(i)—Scheduled Castes and Tribes—Report and Tables—Census of India, Volume IX relating to Madras). There is difference in the industrial categories adopted between 1961 and 1971 Censuses. In the 1961 Census, category III included Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities, Mining and Quarrying but in 1971, a separate category has been provided for Mining and Quarrying, (category IV), (splitting the former III as II and IV). Household Industry which was category IV in 1961 has been brought under category V in 1971 which has two sub-categories (a) and (b) relating to "Household Industry" and "Other than Household Industry", respectively. Another important difference is between the type of activities included under "Household Industry" in the 1961 Census and those included in the 1971 Census. In the 1961 Census, Household Industry included activities under Cattle Cearing, Orchardry, Plantations, Forestry, Fishing, Mining and Quarrying along with those under 'Manufacturing and Repairs'. In 1971 Census however, activities falling under 'Household Industry' cover only those falling under "Manufacturing, Processing, Servicing and Repairs". The industrial Categories I to IX adopted for tabulation and presentation of data are linked with the National Industrial classification, 1970.

The definition of worker in 1971 Census is different from that of 1961. In the earlier Census, a person was considered as a worker according to his participation in any economically productive work. In the case of regular employment in any trade, profession, service, business or commerce, a person was taken as a worker if he was employed during any of the 15 days preceding the day on which he was enumerated. In the case of seasonal work like cultivation, livestock, dairying, etc. an hour's regular work a day throughout the greater part of the working season was sufficient to treat a person as a worker. Work included not only actual work but also effective supervision and direction of work. A full-time student who spent some time in his father's shop even for a day during the reference period of a fortnight was considered as a worker in 1961. For instance, a woman engaged basically in household duties, if engaged in addition, in pounding of rice for sale or wages or in domestic services for wages or rearing cattle, or selling firewood or any such work, was also treated as a worker. Thus, in 1961 Census, a person was categorised basically as a 'worker', even if such a person's contribution to work was extremely marginal.

In the 1971 Census, every individual was asked to declare his main activity, i. e., how he engaged himself for most of the time. All persons were thus divided into two broad streams of main activity as 'workers' and 'non-workers'. A 'worker' was defined clearly as a person whose 'main activity' was participation in any economically productive work by his physical

or mental activity. 'Work' included not only actual work but effective supervision and direction of work. The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration, and if this had been returned as his main activity, the person was treated as a worker and categorised accordingly. A person who normally worked but had been absent from work during the reference period on account of illness or travel, holiday, temporary breakdown, strike, etc., was treated as engaged in regular work, in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as workers. A person who was offered work but did not actually join duty was not treated as engaged on work. In respect of seasonal work like cultivation, livestock rearing, plantation, some types of household industry, etc., which are not carried on throughout the year, a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. A person was treated basically as a "non-worker" if he or she did not come under any of the categories of "worker". Thus, a person engaged primarily in household duties such as cooking for one's own household or performing one's own household duties, or student attending an institution or a rent receiver was classified as such for his main activity and was treated as "non-worker". For a fuller discussion on the 'worker' definition in Census and details of the industries included in the broad industrial categories etc., shown in this table, the reader is advised to refer to the preliminary Note and Fly-leaves to tables in the 1971 Census publication, Part II-B (i) of Tamil Nadu.

Of the total number of 79 Scheduled Castes specified in the Presidential Order, relating to Tamil Nadu only 75 have been returned during the 1971 Census and the remaining four Castes have not been returned. Scheduled Castes form 17.76% of the State's population and they are concentrated in rural areas. Nearly 83% of the total of 73 lakh Scheduled Castes live in rural areas of Tamil Nadu. The important Scheduled Castes from the point of view of strength are (1) Adi-Dravida, (2) Paraiyan, Parayan (Sambavar) (3) Pallan, (4) Chakkilian, (5) Arunthathiyar, (6) Samban, (7) Kudumban, (8) Madari and (9) Kuravan, Sidhanar.

Among the Scheduled Castes, 41.6% are workers, the percentage varying from 57.9 among males to 25.0 among females. A large majority of these castes are agricultural labourers. Of the Scheduled Caste workers, 63.8% are engaged as agricultural labourers and another 18.4% as cultivators. Among male Scheduled Caste workers, agricultural labourers form 57.0% and cultivators 22.7%. Among female Scheduled Caste workers, 79.7% are agricultural labourers and 8.2% cultivators. People engaged in other services form 5.4% of the total Scheduled Caste workers.

In the rural areas of the State where over 4/5 ths of the total number of Scheduled Castes are living, there is a higher proportion of workers, viz., 43.3%. In the urban areas, workers among Scheduled Castes form only 33.8%. Among Scheduled Caste workers in rural areas, 89.9% are engaged in agriculture as cultivators and agricultural labourers. It is significant to note that even in urban areas, among Scheduled Caste workers, the predominant category is only agriculture in which 35.3% are engaged as cultivators and agricultural labourers.

TABLE SC–II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES (CASTE-WISE)

TABLE SC-II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES—(CASTE-WISE)

This table furnishes data on individul scheduled Castes with cross-classification of marital status and broad age-group. It is similar to Table SCT Part A of 1061. For the total population of each Scheduled Caste as also for the three age-groups, 0—14, 15—44 and 45 and above, data are furnished in the table for the groups, 'never married', "married" "widowed", "divorced or separated" and "unspecified status", by males and females. This table presents data for the State and districts without rural urban break up.

Age, in Census, refers to the number of completed years, i.e., the total years completed last birthday and not the running years. A person who has never been married, at any time before the Census enumeration was treated as 'never married'. Persons currently married, whether for the first time or subsequently and whose marriage was subsisting at the time of the census enumeration with spouse living was considered as 'married'. Also, persons who were recognised by custom or society as married and persons in stable *'de facto'* union were treated as married in Census. Even when a marriage was disputed in the locality a person was treated as 'married' when the concerned individual returned himself/herself as in stable *de facto'* union. A "widowed person" was one whose husband or wife had died and had not married again. Persons separated from wife (or husband) and living separately without any intention of living together again or those who were divorced either by a decree of a law court or by an accepted social or religious custom, but who have not married again were taken as 'separated' or 'divorced'. Those who had not indicated any of the four marital status above were taken as persons of 'unspecified status'.

Among male Scheduled Castes, 55.28% fall under category 'never married' and 41.74% are in 'married, status. Among females, the proportion of never married is only 45·19. The S.C. females who are married form 43.98%. While about 10% among female Scheduled Castes are widowed only 2.5% of males are widowed. Among all Scheduled Castes in Tamil Nadu, we find that 39.3% are in the age-group of 0-14, 44.5% are in the age-group of 15-44 and 16.2% are of age 45 and above. The proportions in the different marital status categories and of age-groups by sex are likely to vary among the individual castes. The following statement presented for the Scheduled Caste population as a whole gives the percentage of Scheduled Castes in each marital status by sex age-groups.

Age-Group/ Marital Status		Never Married	Married	Widowed	Divorced or Separated	Unspecified Status
1		2	3	4	5	6
All ages	M	55·28	41·74	2.53	0·43	0·02
	F	45·19	43·98	9.97	0·85	0.01
0—14	M	99·98	0·02	N	..	..
	F	99·80	0·20	N	N	..
15—44	M	36·21	61.60	1.40	0.74	0.05
	F	13·13	80·28	5.09	1.48	0.02

TABLE SC III PARTS A & B
EDUCATION IN URBAN AND RURAL AREAS FOR SCHEDULED CASTES (CASTE-WISE)

TABLE SC-III

EDUCATION FOR SCHEDULED CASTES

Fly Leaf

This table presents data for each caste on the literacy aspect with details of different educational levels, sexwise. The table is given in two parts, A and B, the first relating to urban areas and the second one to rural areas. Data are shown for State and districts. The table is similar to Table SCT III Part A(i) and Part B(i) of 1961, published in the 1961 Census publication, Volume IX-Madras—Part V—A(ii). In the case of rural table, SC-III Part B, a new additional column showing sexwise data for Castes for "Graduate and above" has been presented now while in 1961 table, the highest educational level shown for rural areas was "Matriculation and above." The latter has now been split up into two, viz., 'Matriculation and above but below graduate' and 'Graduate and above.'

The total population under each caste has been given along with illiterates and literates with different levels of education. As in 1961 Census, persons who can both read and write with understanding in any language have been construed as literates in the 1971 Census. A person who was able to merely read but cannot write was not treated as a literate. There is no compulsion that a literate should have gone through some formal education or should have passed some minimum educational standard. Ability just to put one's signature is not sufficient in Census to qualify a person as being able to write with understanding. The 'test' for one's capacity in writing is his ability to write at least a simple letter in a language. All children aged four years or less were also treated as illiterates even if some of them had been attending some school and had picked up reading and writing a few odd words. For literates, the highest educational level attained has been ascertained. For persons undergoing study in a particular class, the highest educational level attained was the one actually passed and not the one in which they were studying. In respect of persons holding both general and technical qualifications, both of which are of equivalent levels, the technical qualification had been given preference in recording the highest educational level attained.

In Part A of the table relating to urban area data for the following educational levels are given :

(1) Primary or Junior Basic;

(2) Matriculation or Higher Secondary;

(3) Non-Technical Diploma not equal to Degree;

(4) Technical Diploma not equal to Degree;

(5) University Degree or Post-Graduate Degree other than Technical Degree;

(6) Technical Degree or Diploma equal to Degree or Post-Graduate Degree.

In the rural table, *i.e.*, S. C.-III Part B, data for only three educational levels are presented, *viz.*, (i) Primary or Junior Basic, (ii) Matriculation and above but below Graduate, (iii) Graduate and above.

Nearly 22 out of every 100 Scheduled Castes in the State are literates. Among males, it is 32.16% and among females, 11.32%. The above literacy ratio is above the national average of 14.47% for Scheduled Castes and Tamil Nadu ranks sixth if we consider all the 22 States in the country from high to low rates of literacy among Scheduled Castes. The least literacy ratio has been recorded in Bihar with a mere 6.53% literates among Scheduled Castes followed by Rajasthan (9.14%), Uttar Pradesh (10.20%) and Andhra Pradesh (10.66%). Kerala has recorded the highest proportion where nearly 2 in every 5 Scheduled Castes are literate. Illiteracy is very high among female Scheduled Castes with all India literacy percentage of only 6.44%. The least ratios of female literacy are in Bihar (1.03%), Rajasthan (1.25%) and Uttar Pradesh (2.46%).

The extent of illiteracy is higher in rural areas as compared to urban areas and is more among females than among males. Illiterates among male Scheduled Castes form 54.74% in urban areas and 70.61% in rural areas in Tamil Nadu. Among females, illiterates form a still higher rate, viz., 77.24% in urban areas and 91.05% in rural areas. The percentage of educated Scheduled Castes in relation to literate S.Cs. at all levels of education, is higher in the urban areas than in rural areas. Among literate male Scheduled Castes living in urban areas, nearly 59% have passed Junior or

Primary Basic examination and 8%, Matriculation or Higher Secondary Examination. The corresponding figures for the rural areas are 48% and 4%.

Among male Scheduled Castes, there are 1,717 persons with Graduate, Post-graduate or equivalent qualifications of whom 907 are in rural areas and 810 are in urban areas. Male Scheduled Castes with educational level of Matriculation or Higher Secondary number 59,749. Of them 23,607 are in urban areas and 36,142 are in rural areas. There are 243 females among Scheduled Castes who passes qualifications upto degree or equivalent level and 80 of them are in the rural areas. Among female Scheduled Castes, there are 12,457 persons who have passed Matriculation or Higher Secondary Examination and of this number 5,981 are in rural and 6,476 are in the urban areas of the State. The majority of the graduates among Scheduled Castes (nearly 80%) belong to 'Adi-Dravida', 'Pallan', 'Paracyan, Parayan, (Sambavar)' in rural as well as urban areas. Literates without obtaining any educational attainments are substantial among the total literates and this indicates that formal education in institutions and passing examination has not gained much ground. Among males, 33% of the literates in the urban areas and 48% in rural areas are literates without any educational level. Among females, these percentages for urban and rural areas are higher at 41% and 56% respectively.

TABLE SC-IV

PERSONS NOT AT WORK CLASSIFIED BY SEX TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES (NOT CASTE-WISE)

TABLE SC-IV

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES (not caste-wise)

Fly Leaf

This table corresponds to table SC-I of 1961 Census and gives data on non-workers among all the Scheduled Castes by nature of activity, sex and educational levels. The data have not been compiled caste-wise and are presented for total, rural and urban areas of the State and districts, separately.

As already indicated in the fly leaf to Table SC-I earlier, a non-worker in Census is one who under 'main activity' has returned as 'not engaged in any economically productive work', and has thus returned himself as basically a non-worker. This non-working category has been broadly sub-classified under seven categories as under and data are given under these seven heads in this table. In Table SC-I of 1961, similar data were presented for only four types of non-working categories. The categories of non-workers as at 1971 Census are :

(1) Fulltime Students;

(2) Household duties;

(3) Dependents and infants;

(4) Retired, rentiers and persons of independent means;

(5) Beggars, vagrants, etc;

(6) Inmates of penal, mental and charitable institutions;

(7) Others.

All those whose main activity is attending an educational institution including children attending schools have been treated as students. Even students participating in some economically productive work, but not to the same extent as a full time worker, by merely helping casually as unpaid family worker in family cultivation, household industry, trade or business etc., were treated only as students. 'Household duties, cover all those persons basically engaged in unpaid domestic duties doing no other work or even participating in some other work, but not to the same extent as a whole-time worker. The category of 'dependents' includes infants or children not attending school or a person permanently disabled from work because of illness or old age. Dependents include all non-workers, even if able-bodied, who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent. Girls or women attending to household duties had been categorised under 'Household Duties' and not as 'Dependents'. Persons who have retired from active service and doing no other work, or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, will come under the category, 'Retired, rentier, etc.'. Beggars, vagrants and independent women, without indication of source of income and persons of unspecified sources of subsistence and who are not engaged in economically productive work are treated under another category. Convicts in jails, inmates of penal, mental or charitable institutions—even if working under compulsion in carpentry, carpet-weaving, vegetable-growing etc. —have been classified in a separate category. Other non-workers not included in the above-mentioned six categories including those who are seeking work are classified under the last and residuary category o 'Others'.

Apart from the data for all the Scheduled Castes in State/Districts and for illiterates and literates without educational level, data on the non-working categories are presented in this table for the three educational levels of (i) Primary or Junior Basic (ii) Matriculation and above, but below graduate and (iii) Graduate and above.

Among the non-working Scheduled Caste population, the large majority are either dependents and infants or are engaged in 'household duties'. Among male non-workers, nearly 63% are 'dependents and infants' and another 30% are 'students'. If we consider female non-working population, 52% are engaged in household duties and another 38% are 'dependents and infants'. The non-working categories are detailed for different educational levels in the table. Of the illiterate males, among non-working Scheduled Castes 90% are dependents while among females 54% are engaged in household duties and 43% are dependents. Among persons of different educational levels students form a sizable ratio of non-workers.

Persons currently non-working and are seeking work are shown under the category of "Others" in this table and it is significant that of the total Scheduled Caste non-workers possessing qualifications of 'Matriculation and above but below graduate' 23.2% fall under 'others' and nearly 58% are students. Out of the 754 non-working Scheduled Caste members with qualifications of graduate and above levels 448 are students and 228 are under the category "Others". There are differences in the ratios between rural and urban areas as also between districts and these may be observed in the Table.

TABLE ST-I PARTS A & B

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED TRIBES IN RURAL AND URBAN AREAS (FOR EACH TRIBE SEPARATELY)

TABLE ST-I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED TRIBES

Fly Leaf

This table is similar to Table SC-I for Scheduled Castes and gives information on workers by categories and non-workers by sex for each of the Scheduled Tribe returned in the State in 1971 Census. Data are provided separately for rural and urban areas of the State as a whole and of the 14 districts in Parts A and B of this table.

For definitions of worker, non-worker and details of the broad industrial categories for which data are made available in this table, the reader may refer to the fly leaf for Table SC-I given earlier. The table is comparable to Table SCT-I Part B of 1961.

As per the President's list of Scheduled Castes and Tribes, there are 42 different tribes spread over the State of Tamil Nadu. Of this, barring 2 which is recognised in the entire State, all the other tribes are restricted to certain specified areas of the State. As per the 1971 Census returns, only 33 out of the 42 tribes listed, are found to exist in the State and none has returned the other nine tribes. In the 1961 Census, only 28 of the 42 tribes were returned. While seven new tribes have been returned in 1971 Census two tribes returned in the earlier census have not been returned in 1971 Census.

The total Scheduled Tribe population of the State is 311,515 and it was 251,991 in the last Census. The decadal increase in the tribal population works out to 23·62% as against the decadal variation of 22·30% for the general population. The Scheduled Tribes in 1971 form 0.76% of the State's population. Similar ratio during 1961 was 0·75% . Thus, there is no large variation in the ratio of Scheduled Tribe to total population as between 1961 and 1971. That most of the tribal population are in rural areas is revealed by the fact that among the rural population 1·02% are Scheduled Tribes. In urban areas, the ratio of Scheduled Tribes is only 0·14% in the State. The districts of Salem, North Arcot, Dharmapuri, Chengl-pattu, Coimbatore, Nilgiris, Tiruchirapalli and South Arcot have each more than 10,000 tribal population in them.

The important Scheduled Tribe of the State is the 'Malayali' who form over 50% of the total tribal population. The other prominent tribes of the State are Irular, Kuruman, Sholaga, Paniyan, Kattunayakan, Pulayan and Palliyan.

Of the total Scheduled Tribes in Tamil Nadu, 94·5% are in rural areas and only 5·5% are living in cities and towns. Among Scheduled Tribes, workers form 44·1.% The proportion of workers is high in the case of males than among females. The ratio of workers among male Scheduled Tribes is 62·7% while for females it is only 24·5%. These ratios are higher when compared to the all India ratios of work participation among Scheduled Tribes which is 38·5%; 55·9% for males and 20·7% for females. The tribal workers are predominantly engaged in agricultural work and this is observed from the fact that 82·2% of the workers are working either as Cultivators or as Agricultural Labourers; and another 10·6% are engaged in primary activities like Livestock rearing, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities. Among males 83·5%, are working as Cultivators and Agricultural labourers. This percentage is 78·7% for females. About 31% of the workers are engaged in Other Services and hardly 2% are working in Manufacturing, Servicing, etc. Though the extent of work participation and engagement among the different industrial categories of workers vary for the different tribes, the prominent feature of engagement in the primary sector (viz., agricultural activities, etc.) is observed uniformly. Differences are however noticed in the case of percentages when a comparison is made in the rural and urban sectors.

In rural areas, Cultivators and Agricultural Labourers form 84·95% of the total workers among Scheduled Tribes. If we consider the primary sector which includes besides agricultural work, workers in Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities as also Mining and Quarrying, the workers in such activities form 94·96%. Of the remaining 5·04% of workers, 2% are engaged in Other Services and another 1·12% are working in Trade and Commerce. In the case of both male and female tribal population in rural areas, the ratio of workers engaged in the primary sector does not vary much (94.79% for males and 95.41% for females. In the case of urban areas however, a rather reduced rate of 57·95% of the workers are engaged in the primary sector. An interesting aspect of the urban data is that nearly 17% of the tribal workers are engaged in public utility services while another 8% are in Trade and Commerce and 6% in work connected with Transport, Storage and Communications. Nearly 10·1% of the tribal workers are also employed in industries connected with Manufacturing, Processing, Servicing and Repairs of goods and services, and of this, only 1·5% are engaged in household industry and the rest are in non-household industries like factories, workshops, etc.

TABLE ST-II
AGE AND MARITAL STATUS FOR SCHEDULED TRIBES (TRIBE-WISE)

TABLE ST-II

AGE AND MARITAL STATUS FOR SCHEDULED TRIBES

Fly-Leaf

Similar to Table SC-II, this table gives data on individual Scheduled Tribes returned in Census with cross-classifications of age, sex and marital status. The table corresponds to Table SCT-II Part B, published in 1961 Census. For exact definitions of age, marital status groups, etc., as used in 1971 Census, reference may please be made to the fly leaf to Table SC-II, presented earlier.

Among the male Scheduled Tribes in Tamil Nadu 53·85% are unmarried and 42·63% are in the 'married' status; while 2·90% are 'widowed', 0·62% fall under 'divorced or separated' category. Among the tribal females, these ratios are slightly different; while 45·39% are 'never married', 46·10% of them are 'married'. In view of the practice of early marriage among females prevailing among tribal population and the general phenomenon of women of lower ages married to males of higher age brackets, the extent of 'married' is higher among females and consequently, there is lower ratio of 'unmarried' In the age-group, 0—14, it is natural that the majority of the population fall under 'never married'. Among tribal males of 0—14 ages, 99·98% are unmarried and among females of this group it is 99·56%, and is only slightly less. That a few Scheduled Tribe females even of this small age-group get married at early ages can be seen from a proportion of 0·44% as (married) under females of this age-group. Similar ratio for males is only 0·02%. Among tribes of age-group 15—44, a large majority are married (63·87% among males and 84·20% among females). It is noteworthy that nearly a third of the males of this age-group are 'never married'. The extent of 'widows' is very high, viz., 41·29% among female tribes of over 45 years. The number of persons falling under the various marital status categories and age-group may vary according to the customs and practices prevailing among the different Scheduled Tribes and this is a very important cultural factor affecting fertility and population variation among individual tribes. The data in this Table will throw light on this interesting phenomenon.

TABLE ST-III PARTS A & B EDUCATION IN URBAN AND RURAL AREAS FOR SCHEDULED TRIBES (TRIBE-WISE)

TABLE ST-III

EDUCATION FOR SCHEDULED TRIBES

Fly-Leaf

The extent of literacy prevailing among each Scheduled Tribe in the State and the educational attainments of different levels among the literate tribes can be seen from the data presented in this table. Data are presented for males and females separately to enable comparison. The urban data are given in Part A of the table while data for rural areas are shown in Part-B. The tables are similar to Table SCT-III Part A (ii) and SCT-III Part B(ii) of 1961 Census. The data are given in the same manner as in table SC-III for Scheduled Castes and the fly-leaf for table SC-III presented earlier may therefore be referred for details on literacy, levels of education, etc., as used in the table.

The percentage of literates among Scheduled Tribes is very low in Tamil Nadu (9·02%). This is lower than the national average literacy rate for Scheduled Tribes which is 11·30%. The highest literacy ratio among Scheduled Tribes of States is observed in Manipur with 28·71% followed by Meghalaya with 26·45%, and in these States, the total tribal population is small. The literates among tribal males of this State form 13·34% and 4·48% among tribal females are literates. Again, the literacy rate is lower in rural than in urban areas. In rural areas only 8·50% are literates while 17·94% are literates in the urban areas.

Very few among Scheduled Tribes possess good educational qualifications in recognised institutions and this is proved by the lower ratios of literates under the different educational levels shown in the table. Among tribal males living in urban areas of the State, nearly 43% of the total tribal literates are literates without any formal education whatsoever; and another 49% of them have passed only Primary or Junior Basic examination. Only 7·49% of them possess Matriculation or Higher Secondary qualification. Among tribal females living in cities and towns, 60·5% of the literates have not passed any examination and 35·5% have passed Primary or Junior Basic Examination. In the rural areas too, a similar situation exists where among tribal male literates &, 56% are without any education and 41% are qualified upto Primary level. Among rural females, 63% of literates are without qualification and 36% have education upto Primary level.

There are 672 males among Scheduled Tribes in the state who have passed Matriculation or Higher Secondary examination, and of this 519 are living in rural areas.There are 89 females with qualification Matriculation and of this 55 are in rural areas. Among the Scheduled Tribes who are Matriculates and are in urban areas, a large number are found to be among Irular, Kurumans and Kattunayakan. In the case of rural areas, the chief tribes with this qualification are Irular, Malayali, Kurumans and Kondareddis. There are in all only 34 Scheduled Tribes who are educated upto graduate/Post-graduate or equivalent level and of this 24 are males. Twenty-two of these 34, are found in the rural areas, and fifteen of these 22 graduates belong to Irular (5) Kondareddis (5) and Malayali (5). The different levels of education among individual tribes in rural and urban areas and among males and females vary much as can be observed from the table.

TABLE ST-IV

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED TRIBES (NOT TRIBE-WISE),

TABLE ST-IV

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED TRIBES

Fly Leaf

This table is similar to Table SC-I given earlier in this volume for the Scheduled Castes. The table will help in identifying the activities of such of those Scheduled Tribes who are non-workers and these activities are given under seven broad categories with cross-classifications for sex and educational levels. The data are not provided for individual Scheduled Tribes here. The table is comparable to ST-II of 1961 Census, the main difference being that in 1961 table, similar data were presented for each tribe and with four different non-working categories. In this table however, the data are shown only for all the tribes, put together and not tribe-wise. Data are presented for the total, rural and urban areas for the State and districts under different educational levels. The cross-classification with educational level was also not made in 1961. For detailed description of the seven categories of non-workers and educational levels presented, etc., the fly leaf for Table SC-IV may be referred.

As in the case of Scheduled Castes, the majority of the non-working tribal population are either 'dependents' or are engaged in 'household duties'). Nearly 77% of the male non-workers are 'infants and dependents' and another 17% are students. Only 2% are 'other non-workers' indicating that these are unemployed and seeking employment. Among female non-workers, 54% are engaged in 'household duties' and 40% are 'dependents and infants'.

Of the male illiterate non-workers, 88% are dependents and infants. Of the illiterate non-working females, 55% are engaged in 'household duties' and another 42% are dependents. Among literates and in the different educational levels, a higher ratio of 'students' is generally observed so far as males are concerned while among females, 'household duties, is prominent and a large majority are in this group. It is seen that there are only 6 male and 5 female graduates among Scheduled Tribes of the State who are non-workers. Of this, 5 males and one female are 'students' (obviously pursuing further studies) and of the rest, one male is 'retired', 3 females are engaged in 'household duties' and one female is a 'dependent'.

There are on the whole, 1,179 male and 749 female non-workers under the category "other non-workers" among the tribes and most of these individuals would be unemployed and seeking employment. Of the above figure, 955 males and 720 females are illiterate. There are also 334 'beggars, vagrants, etc.,, among the tribal population and 79 persons who are inmates of penal, mental and charitable institutions.

21—1 CensusT.N./76

TABLE ST—V
RELIGION FOR SCHEDULED TRIBES

TABLE ST-V

RELIGION FOR SCHEDULED TRIBES

Fly Leaf

This table gives data on the number of Scheduled Tribes belonging to different religious groups. Information is furnished for each individual tribe returned in Census and data are also made available for rural and urban areas separately as also for each sex. Data are given for the entire State and districts. The table is similar to the 1961 Table SCT-IV Part B. No such table has been compiled for Scheduled Castes in 1971 Census.

All the tribes in Tamil Nadu have returned one or the other of the three major religious groups in the State, viz., Hinduism, Islam or Christianity. The majority of the tribes are Hindus and this is evident from a high ratio of 99.74% of Hindus in the total tribal population of 311,515 in the State. While 0.23% are Christians, Muslims form only 0.04%. There are 115 persons belonging to Scheduled Tribes and professing Islam in the State and all these persons are males, living in rural areas only. Most of these tribal Muslims fall under the group of "Unclassified" tribes. There are 704 persons of Scheduled Tribes who are Christians and only 3 of them are in urban areas, the rest living in villages. Of the Christian tribal population 248 belong to the tribe, "Irular", 168 to "Sholaga", 99 to "Malayali", 57 to "Toda" 57 to "Palliyan" and 36 to "Kurumans". The sex ratio among Christian Scheduled Tribes is very high as compared to Hindu Scheduled Tribes. Of the Scheduled Tribes under 'Hindus', there are 950 females for every 1,000 males. Among the Christians 427 are females and only 277 are males giving a sex ratio of 1,542 females per 1,000 males. The above figures for Christians among the Tribes is somewhat interesting. The data are given in the table for each tribe in the State and district to enable the reader to have an idea on the religious faith among tribals which is an important characteristic from the cultural point of view.
