PREFACE

Unlike the previous Censuses, when the Subsidiary Tables were printed alongwith the Main Tables, this volume has been exclusively devoted to the Subsidiary Tables of the Main Tables. The only exception are the Subsidiary Tables to the Housing Tables (E-Series Tables), which have been published in Part IV—Report on Housing and Establishments.

The Subsidiary Tables are based on the data contained in the Main Tables published in Parts II-A, II-B, III and II-C of Vol. XX, 1961 Census, Himachal Pradesh. These Tables bring out the salient features of the Main Tables by displaying proportionate figures, in the various forms, for the administrative units of the Union Territory of Himachal Pradesh.

The purpose of the Subsidiary Tables is to make it easier to comprehend the various characteristics of the Main Tables. Thus a Subsidiary Table clearly brings to light the substance of a Main Table and at the same time makes it possible to do away with the bulky absolute figures given in the Main Table. In this sense the Subsidiary Tables surpass even the Main Tables in their utility in certain cases.

An introductory note explaining the various concepts connected with the data collected in 1961 Census precedes these tables. Further, all the Subsidiary Tables are preceded by a fly-leaf. explaining the source, the contents and the method of its preparation.

My thanks are due to the Manager and staff of the Government of India Press, for their whole hearted cooperation and help for bringing out this publication.

Boswell,
Simla-5.

INTRODUCTORY NOTE

The Subsidiary Tables

In all 70 Subsidiary Tables have been prepared and printed in this part of the 1961 Census Report in respect of Himachal Pradesh. These tables are based on A-Series—General Population Tables, B-Series—Economic and Household Economic Tables, C-Series and D-Series—Social, Cultural and Migration Tables, or the Main Tables. All the Main Tables except Household Economic Tables, have been prepared on full count. The Household Economic Tables are based on 20% Sample Households. Subsidiary Tables, based on E-Series—Housing Tables, have been printed in Part IV—Report on Housing and Establishments, of the 1961 Census Report in respect of Himachal Pradesh, whereas no Subsidiary Tables have been prepared in respect of Special Tables for Scheduled Castes and Scheduled Tribes SCT, SC and ST—Series—Main Tables. The material on which these Subsidiary Tables are based has been printed as indicated hereunder:—

Series of Tables	Description	Part of the 1961 Census Report in respect of Himachal Pradesh in Volume XX
A—Series	General Population Tables	Part II-A.
B—Series	Economic Tables and Household Economic Tables	Part II-B and Part III respectively.
C and D Series	Social, Cultural and Migration Tables	Part II-C.

Scheme of Presentation

A series-wise presentation of the Tables has been made in this volume. All the series appear one after the other alphabetically. This is intended to give homogeneity and comparability to the Subsidiary Tables. All the Subsidiary Tables have been prepared for the Union Territory and its six districts of Chamba, Mandi, Bilaspur, Mahasu, Sirmur and Kinnaur except a few cases where the Main Tables related to the urban areas only or where the district-wise data is not available.

A fly leaf bearing brief description of the material on which a particular Subsidiary Table is based and the method followed for its compilation, appears before every Subsidiary Table. It is intended to facilitate better and clear comprehension of these Subsidiary Tables.

The 1961 Census

The Main Tables on which these Subsidiary Tables are based were prepared on the basis of statistics collected by enumerators, who visited every household in their respective blocks during specific period 10th February to 1st March, 1961 excepting certain snowbound areas where an earlier count was made, and convassed on individual slip for every person and a household schedule for every household. A revisional round of three days was conducted to make relevant changes in the record due to the births and deaths that might have occurred before the 1st March 1961 and after the actual enumeration. The changes made relate to only numbers and not to any other data e.g. changes occurring in economic activity of certain persons, or age of certain persons etc. The data recorded in these forms was tabulated so we have the above mentioned, A—Series, B—Series, C and D—Series, E-Series, SC—Series, SCT—Series and ST—Series Tables. The individual slip, the household schedule, and the Census Population record (which was actually printed on the backside of the household schedule) are being reproduced here as Annexure I to this introductory note.

Rural and Urban Classification

To qualify for an urban area, a place should first be either a Municipal Committee or a Municipal Area, or under a Small Town Committee or a Notified Area Committee or a Cantonment Board. Consequently all localities which had local bodies in 1961—there were 12 such localities, or had a local body in 1951 and was also counted as a town then, —there was only one such locality were included

in urban areas in the Census of 1961. The number of urban areas increased from 11 in 1951 to 13 in 1961 by the formation of two new towns of Narkanda and Shri Naina Devi Ji in the light of the above definition. The remaining parts of Himachal Pradesh were treated as rural areas. Table A-IV printed in Part II-A in respect of Himachal Pradesh relates exclusively to towns.

It may be of interest to explain here the various concepts connected with the data collected in 1961 Census.

Workers and Non-Workers

In 1961 Census population, for economic classification has been divided into (*i*) Workers and (*ii*) Non-Workers. In the previous Censuses economic classification was done in terms of categories like economically independent, "Semi-independent" "Earning dependent" or "Non-earning dependent" i.e. purely on the basis of 'income', if any. In these Censuses the term 'actual worker' included even persons who were receiving 'income without doing work such as rentiers, royalty earners, retirees etc. These concepts of 'dependency' and 'income' gave way to the concept of actual 'work' in 1961 Census. Many women who would otherwise be dependent have found place among workers on the basis of actual agricultural work or work connected with household industry done by them. Similarly rentires royalty earners, retired persons, beggars, who although earn their livelihood in one way or the other have been classified as non-workers in 1961 Census.

So far economic classification in 1961 Census is concerned emphasis was laid on work. All those who worked, even if a worker derived no income for himself, such as an apprentice without stipend or wages, were workers. Exception was made for an adult woman who was engaged in household duties but was doing no other productive work to augment the family resources. Even part-time workers, such as women and children, who were engaged in work, such as rice pounding for sale or wages, or in domestic services for wages or for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc. or any such work were treated as workers. Work included not only actual work but effective supervision and direction of work. The basis of work would be satisfied in the case of seasonal work like, cultivation, livestock, dairying, household industry etc., if the person had had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work would be satisfied if the person was employed during any of the fifteen days preceding the day on which the enumeration took place. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause was treated as a worker. Though a person was deriving an income, but doing no productive work, such as retired person receiving a pension and not employed again, or a rentier or a person living on agricultural or non-agricultural royality, rent or dividend, for securing which he did not have to work and who did no other work, was a non-worker.

All the working persons engaged in any branch of productive work are primarily termed as 'Workers' and all others not engaged in any productive work are treated as 'Non-workers' in 1961 Census Economic Classification. The workers have further been classified into nine broad categories, while non-workers are put in category X—Non-Workers, which are explained hereunder—

Category I—As Cultivator: This category includes cultivators of land and cultivation includes ploughing, sowing and harvesting. A person was considered working as a cultivator if engaged as employer, single worker, or family worker in (*a*) cultivation of land or supervision or direction of cultivation of land, owned or held from Government and (*b*) cultivation of land or supervision or direction of cultivation of land held from private persons or Institutions for payment in money, kind or share. An agricultural labourer was, however, not considered as a cultivator. A person engaged in fruit growing or having orchard or plantations like tea, was also not a cultivator. Another class of persons not considered as cultivators was those who had given out their lands to others for cultivation for money, kind, or share of crop and who did not even supervise or direct cultivation of land.

Category II—As Agricultural Labourer: This category includes all those persons who worked in another person's land only as labourers without excercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce.

Category III—In Mining, Quarrying, Livestock Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities: This category includes the following classes of workers provided

they do not satisfy the conditions laid down in the concept of household industry:—

(*i*) Persons working in mining and quarrying,

(*ii*) Persons engaged in livestock, breeding and hunting,

(*iii*) Persons engaged in forestry and fishing,

(*iv*) Persons engaged in raising plantation crops, fruits and allied activities.

Category IV—At Household Industry : A household industry related to production, processing, servicing, repairing or making and selling of goods. But a household industry was not to be on the scale of a registered factory. It should have been conducted by the head of the household himself or mainly members of the household at home or within the village in the rural areas and only at home in urban areas. Main criterian for a household industry was the participation of one or more members of a household in rural areas. In the urban areas the industry should have been confined to the house. The concept of household industry as defined for Census purposes, does not include professions such as pleader, doctor or barber or washerman or astrologer. Persons working at household industry, as defined above, including those working as paid employees in other's household industry, are classified in this category of workers.

Category V—In Manufacturing other than Household Industry : This category of workers includes all those persons engaged in processing, manufacturing and repairing or making and selling of goods, not included in category IV—At Household Industry. Persons working in registered factories are also included in this category.

Category VI—In Construction : All persons engaged in construction and maintenance of buildings, including erection, flooring, decorative construction, electrical and sanitary installations are included in this category. This includes persons engaged in construction and maintenances of roads, railways, bridges, tunnels, telegraph and telephone lines, water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells and wells etc.

Category VII—In Trade and Commerce : Persons engaged or employed in wholesale and retail trade are included in this category. It also includes persons employed or engaged in other commercial activities like importing and exporting of goods and commodities, stocks, shares, insurance, money lending, banking and similar types of financial operations, auctionecring, distribution of motion pictures, and all other activities connected with trade and commerce, including hiring out of durable goods like electric fans, microphones etc.

Category VIII—In Transport, Storage and Communications : This category of workers includes all the persons engaged or employed in any form or mode of transport, storage and warehousing activities. It further includes those engaged in communications such as postal, telegraphic, wireless, signal, telephone, information and broadcasting.

Category IX—In Other Services : Persons employed in electricity, gas, water and sanitary services, public services, educational and scientific services, medical and health services, religious and welfare services, legal services, business services, community services and trade and labour association, recreation services, personal services, services not classified in these lines and activities not adequately described are included in this category.

Category X—Non-Workers : This category of persons includes all those who are not engaged in any productive work. (*i*) full time students (*ii*) persons attending exclusively to household duties (*iii*) dependents, infants and disabled (*iv*) retired, rentier or persons of independent means (*v*) beggar, vagarants etc. and (*vi*) inmates of penal mental and charitable institutions, all belong to the category of Non-Workers. Thus, actual productive work, and not the income, was the distributing factor for workers and non-workers.

Industrial Classification

In order to make a still deeper study of the workers (other than Cultivators and Agricultural Labourers) further classification of workers relating to the industrial categories III to IX has been made on the lines of the Indian Standard Industrial classification. The Subsidiary involved are B-IV.9, B-XIV A·1, B-XIV B·1, B-XVI·1, B-XVI. 2 and B-XVI·3. It is important that the concept of 'industry' should not be confused with that of 'occupation'. Industry means that sector of economic activity in which the earner is engaged *e.g.*, textile industry, automobile industry etc., whereas the 'occupation' describes the exact function that an individual performs in that sector, *e.g.*, weaver, fitter, carpenter etc.

Code structure of Industrial Classification

The following system of notation has been adopted in the classification of Industries:

Division: The entire range of economic activity is divided into nine 'Divisions' and a 'Code number' is given to each. The first digit of any code number represents the Division under which that activity is classified, e.g., the number given to the Manufacturing Division and manufacturing activity of any kind will have code numbers beginning with '2' or '3'.

Major Groups: Each 'Division' is then divided into a number of 'Major Groups' not exceeding ten. The first two digits of any code number together represent the 'Division' and the 'Major Group' under which that activity is classified. Thus the number "20" has been given to the "production of Foodstuffs' (Major Group) under 'Manufacturing" (Division).

Minor Groups: Each 'Major Group' is again sub-divided into a number of 'Minor Groups' not exceeding ten. The 'Minor Group' code number, *e.g.,* '5' under Major Group 20 relates to production of bread, biscuits, cake, etc. Thus, if we find code number 205 we know that it means production of bread, biscuits, cakes etc., (Minor Group) in the 'Foodstuffs Industry' (Major Group) in "Manufacturing" (Division). Again if we find number 701 we know that it means "Transporting by tramway, and bus service" (Minor Groups) in the "Transport Industry" (Major Group) in the "Transport, Storage and Communication" (Division).

A one-digit code number represents a division, a two-digit code number represents a major group of industries and a three-digit code number represents a minor group of industries. A classification more detailed than the minor groups (three digit level) has not been made.

The code number that should be allotted for economic activity connected with repairing or servicing will be the same as the code number provided for manufacturing of the article or product in that branch of industry (for example, repairing of electric lamps and fans will be classified under 375 and repairing of radios under 378) unless a code number is especially provided for repairs or servicing under the 'Minor Group' (for example, repairing of bicycles and tricycles has been classified under 388, and repairing and servicing of motor vehicles under 384).

The Indian Standard Industrial Classification is reproduced as annexure II to this note.

The correspondence of workers relating to the various Divisions of the I.S.I.C. on the one hand and Industrial Category of workers on the other hand, is detailed hereunder (Categories I—As Cultivator and II—As Agricultural Labourer are classifiable under Minor Groups 000 to 004 and a part of 005 of Division 0. But, as these constitute exclusively separate categories, these are naturally excluded from the Tables displaying data according to I.S.I.C.) :—

Industrial Category	Division of I.S.I.C.
III . .	Industrial Division (excluding Minor Groups 000 to 004 and part of 005 which form the Categories of I—As Cultivator and II—As Agricultural Labourer) and I, provided the industry does not satisfy the conditions laid down in the concept of household industry.
IV . .	Industrial Division 0 (excluding Minor Groups 000 to 004 and part of 005 which form the Categories I-As Cultivator and II-As Agricultural Labourer), I (partly) and 2 & 3 provided the industry satisfies the conditions laid down in the concept of household industry are satisfied.
V . .	Division 2 & 3 provided the industry is other than a household industry.
VI . .	Division 4
VII . .	Division 6
VIII . .	Division 7
IX . .	Division 5, 8 and 9 (excluding 999 which Minor Groups does not relate to workers, but to the fresh entrants to the Labour Market, who are included in the X category of Non-workers.

Occupational Classification

In 1961 Census workers have been classified according to the National Classification of occupations. Occupation signifies the exact function that a worker performs in the industrial sector,—e.g. fitter, carpenter etc. in any industry e.g. textile industry, chemicals industry, beverages industry etc. Subsidiary Tables B-V.1 and B-VI·1 display data with regard to occupations.

National Classification of Occupations

The code structure of the National Classification of occupations is similar to that adopted for Industrial Classification in as much as this classification is also a three digit classification.

Division—The entire range of occupations is divided into 10 divisions and a code number is given to each. The first digit of the code number represents the division under which that occupation is classified e.g. the code number given to the 'Sales workers' is '3' and sales occupations of any kind will have code numbers beginning with '3'. The code number of last Division is X while there is a composite division 7-8.

Group—Each Division is then divided into a number of groups not exceeding eleven. The first two digits of any occupational code number together represent the Division and the Group under which that occupation is classified. Thus occupational group code number '33' represents salesmen, shop assistants and related workers, under Division '3'—sales workers. In case of eleventh Group X is added to the Division code number.

Family—Each Group is again sub-divided into a number of occupational families not exceeding ten. The family is represented by the third digit added to the group occupational code number e.g. occupational family code number 330 represents salesmen and shop assistants wholesale and retail trade under Group '33'—salesmen, shop assistants and related workers, and under the occupational Division '3' sales workers.

The National Classification of occupations is reproduced as Annexure III to this note.

Employer, Employee, Single Worker and Family Worker

(*i*) An "Employer" is a person who has to employ other persons to carry on his work. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer even if he has power to employ another person on behalf of his employer or employers.

(*ii*) An "Employee" is a person who usually works for some other person for salary or wages in cash or kind.

(*iii*) A "Single Worker" is a person who works by himself but not as Head of household industry. He neither employs any one nor is employed by any other person.

(*iv*) A "Family Worker" is one of the members of a household who ordinarily does at least an hour's work every day during the working season in an industry, business or trade conducted by the household.

Household

The 1961 Census definition of a 'household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. Thus all the persons including guests, servants, taking meals from the common kitchen are included in 'household'. Unrelated persons living together in institutions like Hotels, Hostels, Sarais, Boarding houses were also treated as households.

Households engaged in cultivation

A household whose head or some other members are engaged in cultivation or in active supervision of cultivation of land is considered to be a cultivating household.

Interests in land

The cultivating households have been further classified into three classes according to interests in land:—

(*i*) Households engaged in cultivation of land entirely owned or held from Government

(*ii*) Households engaged in cultivation of land entirely held from private persons or institutions for payment in money, kind or share.

(*iii*) Households engaged in cultivation of land partly owned or held from Government and partly held from private persons or institutions for payment in money, kind or share.

Literacy and Educational Level

In 1961 Census, a person who could neither read nor write or could merely read but could not write in any language was considered illiterate. A person who could both read and write "a simple letter" with understanding was considered literate.

SUBSIDIARY TABLES TO A SERIES—GENERAL POPULATION TABLES

SUBSIDIARY TABLE A-I·1.

AREA AND POPULATION (ACTUAL AND PERCENTAGE) BY TEHSIL/ SUB TEHSIL DENSITY

This is a Subsidiary Table to the Main Table 'A-I Area, Houses and Population' printed in Part II-A of the Himachal Pradesh 1961 Census Report. It is based on the area, density and population figures shown respectively in columns 3, 4 and 9 of the Table A-I. The tehsils/sub-tehsils in each district have been grouped according to the various density ranges, i.e., 'under 100, 100-150, 150-200, 200-300, 300-450, 450-600, 600-750 and 750 and over'. The total area and the population figures of all the tehsils/sub-tehsils falling under these different density groups, together with the percentages which they bear to the total district figures of area and population respectively are shown one below the other as 'actual' and 'percentage' for each district in the Subsidiary Table.

There is no tehsil/sub-tehsil falling under the density groups 600-750 and 750 and over. Area figures for the sub-divisions in the case of Kinnaur District are not available and this accounts for nil information for this district.

Example

BILASPUR DISTRICT

Ghamarwin Tehsil

Population =79,293 (Col. 9 of the Main Table A-I)

Area =184·1 Sq. miles (Col. 3 of the Main Table A-I).

Density =Population ÷ Area=Density (Population per Sq. mile), i.e., 79,293 ÷ 184·1=430·706 (Col. 4 of the Main Table A-I) (Density range of 300—450 per Sq. mile)

Bilaspur Sadar Tehsil

Population =79,513 (Col. 9 of the Main Table A-I)

Area =265·0 Sq. miles (Col. 3 of the Main Table A-I)

Density =Population ÷ Area=Density (Population per Sq. mile), i.e. 79,513 ÷ 265·0=300·049 (Col. 4 of the Main Table A-I) (Density range of 300—450 per Sq. mile).

It follows that the two rather all the tehsils of Bilaspur District fall within the density range of 300—450. The actual figures of their total area (184·1+265·0=449·1 Sq. miles) and population (79,293+79,513=158,806 persons) are, therefore, shown in cols. 10 and 11 respectively under the said density range in the Subsidiary Table (S.T.) The percentages which they bear to the total district figures of area and population is 100 in each case, worked out as follows :

$$\text{Percentage area col. 10 (S.T.)} = \frac{\text{449·1 (Total area of all the tehsils)}}{\text{449·1 (Total area of district)}} \times 100 = 100\%$$

$$\text{Percentage population col. 11 (S.T.)} = \frac{\text{158,806 (Total population of all the tehsils)}}{\text{158,806 (Total population of district)}} \times 100 = 100\%$$

SUBSIDIARY TABLE A-I·2:

DISTRIBUTION OF 1,000 OCCUPIED RESIDENTIAL HOUSES AND 10,000 PERSONS BY RURAL AND URBAN AND COMPARISON WITH 1951 AND 1941 CENSUSES

This is the second Subsidiary Table (S.T.) to the Main Table (M.T.) 'A-I Area, Houses and Population' printed in Part II-A of the Himachal Pradesh 1961 Census Report. The source for rural and urban 'occupied residential houses' and 'number of persons' are as follows :

Census	Occupied residential houses	Number of persons
1	2	3
1961	Column 8 of the Main Table A-I	Column 9 of the Main Table A-I
1951	Columns 7-9 of Table A-I	Columns 10-12 of Table A-I
1941	Columns 5-7 of Table I	Columns 8-10 of Table I

Absolute figures pertaining to occupied residential houses and number of persons, i.e., population for the past Census years 1941 and 1951 are given in the following two statements for reference. It will be observed that two sets of figures are given in the Subsidiary Table and the statements, the second set of figures in brackets below the first set of figures. The reasons for these two sets of figures are explained in the foot notes to the Subsidiary Table and the statements.

In Kinnaur District there are no towns and hence nil account about urban areas for the district.

Accordingly, 'Kasumpti is treated as a deleted town of Mahasu District in the previous censuses, because it is not a town in 1961 Census, there are, therefore, two sets of figures in the rural and urban break-up for Mahasu District and as a result thereof for Himachal Pradesh Union Territory. In the first set of figures, the urban figures of Kasumpti town for the Census years 1941, 1931 and 1921, when it was a town, are not shown as such but stand included in rural figures. In the second set of figures the urban figures of Kasumpti town for the said Census years are shown as such, *i.e.*, included in urban figures.

4. There was a territorial change in Mahasu District during the last decade when Kinnaur District was carved out of it. The resultant figures as an effect of this change, adjusted for the 1951 Census and estimated for the Census years 1941, 1931 and 1921 have been shown against Kinnaur District.

SUBSIDIARY TABLE A-I·3.

PERSONS PER 1,000 HOUSES AND HOUSES (*i*) PER 100 SQUARE MILES IN RURAL AREAS AND (*ii*) PER SQUARE MILE IN URBAN AREAS AND COMPARISON WITH PAST CENSUSES

This is the third Subsidiary Table (S. T.) to the 'Main Table (M.T.) 'A-I Area, Houses and Population' printed in Part II-A of the Himachal Pradesh 1961 Census Report. The source of the data for houses, population and area are as follows:

*See Statement showing 1951 Area Figures given below.

Absolute figures pertaining to 'occupied residential houses' and number of persons, i.e., 'population for the Census years 1921 to 1951' may be seen in the two statements printed with the fly-leaf to the Subsidiary Table A-I.2.

For the purposes of working out the 1951 ratio of 'houses per 100 square miles' in rural area and 'houses per square mile' in urban area of each district in cols. 18 and 20 of the Subsidiary Table, the number of houses in 1951 adjusted to the jurisdiction of 1961 has been taken into account. The 1961 total area of the respective districts has thus been taken into account as the 1951 total area in each case. The 1951 rural area has been worked out by subtracting the 1951 area of the continuing towns from the total area of the respective districts. Absolute figures pertaining to areas, worked out as above, are given in the following statement.

In the case of rural and urban break-up of population, showing 'persons per 1,000 houses', two sets of figures are given, the second set of figures in brackets below the first set of figures for the Census years 1921—1941. The reasons for these two sets of figures are given in the foot note to the Subsidiary Table.

There are no towns in Kinnaur District and hence nil information in respect of urban account for the district.

2. As the figures for first set and second set are similar in respect of the districts other than Mahasu District and Union Territory only the one set of figures is, therefore, given for those districts.

* Columns relating to houses per 100 sq. miles in rural area and houses per sq. mile in urban area for the years 1921—41 have been omitted because the separate area figures for rural and urban areas of the censuses prior to 1961 are not available.

SUBSIDIARY TABLE A-I·4.

FEMALES PER 1,000 MALES AND COMPARISON WITH PREVIOUS CENSUSES

This is the fourth Subsidiary Table (S.T.) to the Main Table (M.T.) 'A-I Area, Houses and Population' printed in Part II A of the Himachal Pradesh 1961 Census Report.

Source of the rural and urban population figures are as follows—

Censuses	*Population*
1961	Cols. 10-11 of the Main Table A-I
1951	Cols. 13-18 of the Main Table A-I
1941	Cols. 11-16 of the Main Table I
1931	Cols. 11-16 of the Main Table I
1921	Cols. 11-16 of the Main Table I

Absolute figures of the rural and urban population for the Census years 1921—1951 are given in the following statement. It will be observed that there are two sets of figures given in the statement and the Subsidiary Table, the first set taking into account the new definition of town in 1961 Census in addition to the territorial changes in the district, while the second set only taking into account the territorial changes in the district.

NOTE:—1. The rural and urban break-up according to the first set of figures take into account the new definition of towns of 1961 Census in addition to the territorial changes in the district; while the second set shows only the territorial changes in the district.

2. As the figures for first set and second set are similar in respect of the districts other than Mahasu District and Union Territory, only one set of figures is, therefore, given for those districts.

3. The concept and method for working out the first set of figures are as below—
"From the total urban figures in the past censuses, the figures of towns which have been deleted in 1961 Census, are deducted. This gives comparable urban figures of a district in the past censuses".

Accordingly 'Kasumpti' is treated as a deleted town of Mahasu District in the previous censuses, because it is not a town in 1961 Census, there are, therefore, two sets of figures in the rural and urban a break-up for Mahasu District and as a result thereof for Himachal Pradesh, Union Territory. In the first set of figures, the urban figures for Kasumpti town for the Census years 1941, 1931 and 1921, when it was a town, are not shown in as such but stand included in rural figures. In the second set of figures the urban figures of Kasumpti town for the said Census years are shown as such, i.e., included in urban figures.

4. There was a territorial change in Mahasu District during the last decade when Kinnaur District was carved out of it. Theresultant figures as an effect of this change, adjusted for the 1951 Census and estimated for the Census years 1941, 1931 and 1921 have been shown against Kinnaur District.

The figures for the Subsidiary Table (S. T.) are worked out, as indicated below, on the basis of the Main Table (M.T.) A-I (1961) and the figures in the Statement printed above.

$$\text{Col. 2 S.T.} = \frac{\text{Col. 11 (Total) M.T. A-I (1961)}}{\text{Col. 10 (Total) M.T. A-I (1961)}} \times 1{,}000$$

$$\text{Col. 3 S.T.} = \frac{\text{Col. 4 (Total) Statement (1951)}}{\text{Col. 3 (Total) Statement (1951)}} \times 1{,}000$$

and so on for 1941, 1931 and 1921 Censuses on the basis of the figures given in the said statement in Cols. 12-13, 21-22 and 30-31 respectively.

$$\text{Col. 7 S.T.} = \frac{\text{Col. 11 (Rural) M.T. A-I (1961)}}{\text{Col. 10 (Rural) M.T. A-I (1961)}} \times 1{,}000$$

$$\text{Col. 8 S.T.} = \frac{\text{Col. 7 (Rural) Statement (1951)}}{\text{Col. 6 (Rural Statement (1951)}} \times 1{,}000$$

and so on for 1941, 1931 and 1921 Censuses on the basis of the figures given in the said statement in Cols. 15-16, 24-25 and 33-34 respectively.

$$\text{Col. 12 S.T.} = \frac{\text{Col. 11 (Urban) M.T. A-I (1961)}}{\text{Col. 10 (Urban) M.T. A-I (1961)}} \times 1{,}000$$

$$\text{Col. 13 S.T.} = \frac{\text{Col. 10 (Urban) Statement (1951)}}{\text{Col. 9 (Urban) Statement (1951)}} \times 1{,}000$$

and so on for 1941, 1931 and 1921 Censuses on the basis of the figures given in the said statement in Cols. 18-19, 27-28 and 36-37 respectively.

The figures have been rounded off to integers.

The district of Kinnaur is entirely rural and hence no urban information for this district.

SUBSIDIARY TABLE A-I·5.

VARIATION AND DENSITY

This is the fifth and the last Subsidiary Table (S. T.) to the Main Table (M. T.) 'A-I Area, Houses and Population' printed in the Part II-A of the Himachal Pradesh 1961 Census Report.

The variations, *i.e.*, the percentage increase (+) decrease (—) in the Subsidiary Table have been worked out on the basis of the population shown in tables mentioned below:

Census	Population—Total/Rural/Urban—given in
1961	Col. 9 of the Main Table A-I
1951	Cols. 10—12 of Table A-I
1941	Cols. 8—10 of Table I
1931	Cols. 8—10 of Table I
1921	Cols. 8—10 of Table I

It will be seen that the variation figures in columns 2, 3, 4 and 5 for 'total' in the Subsidiary Table are the same as given in the Main Table A-II. 'Variation in Population During Sixty Years' printed in the Part II-A of 1961 Census Report, except that they have been rounded off to one place of decimal.

Absolute figures of population for the years 1921 to 1951 may be seen for reference in the Statement 2 printed in the fly-leaf to the Subsidiary Table A-I·2.

In the rural and urban break-up of variations there are two sets of figures as explained in the foot note to the Subsidiary Table.

The density figures given in Col. 6 of the Subsidiary Table are the same as given in Col. 4 of the Main Tabl A-I referred above. For the purpose of working out the 1951 total/rural/urban d nsity of the districts in Col. 7 of the Subsidiary Table for comparative study with the 1961 density the population in 1951, adjusted to the jurisdiction of 1961 has been taken into account. The 1961 total area of the respective district has thus been taken into account as 'total' area of the district for 1951. The 1951 'rural' area has been worked out by substracting the 1951 area of the continuing towns from the total area of the respective district for first set of figures and by substracting the 1951 area of the continuing towns and the 1951 area of the deleted towns from the total area of the respective district for second set of figures. No town of 1951 Census has, however, be n d'el ted in 1961 Census. Absolute figures of area, worked out as above, are given in a statement printed in the fly-leaf to the Subsidiary Table A-I.3.

Figures for Cols. 6 and 7 have been rounded off to integers.

Density=Population=Area.

The district of Kinnaur is entirely rural and hence no urban information for this district.

SUBSIDIARY TABLE A-III·1.

DISTRIBUTION OF RURAL POPULATION BETWEEN VILLAGES OF DIFFERENT SIZES

and so on for each category of workers.

In the working out of the figures for the Subsidiary Table they have been rounded off to integers.

The cols. for 'Age not stated' have been left out in the Subsidiary Table as the figures for this category in the Main Table were not of high magnitude.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

In the Subsidiary Table.

SUBSIDIARY TABLE B-I·5

WORKERS PER 1,000 POPULATION IN EACH AGE-GROUP

The figures in the different columns of the Subsidiary Table (S.T.) have been worked out, as indicated below, on the basis of the absolute figures appearing in the Main Table (M.T.) 'B-I—Workers and Non-Workers classified by Sex and Broad Age-Groups' printed in Part II-B of the Himachal Pradesh 1961 Census Report.

$$\text{Col. 2 S.T.} = \frac{\text{Total of cols. 7+8 (Total) M.T.}}{\text{Col. 4 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 3 S.T.} = \frac{\text{Col. 7 (Total) M.T.}}{\text{Col. 4 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 4 S.T.} = \frac{\textit{Col. 8 (Total) M.T.}}{\text{Col. 4 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 5 S.T.} = \frac{\text{Total of cols. 7+8 (0—14) M.T.}}{\text{Col. 4 (0—14) M.T.}} \times 1{,}000$$

SUBSIDIARY TABLE B-III—PART A·1

DISTRIBUTION OF 1,000 WORKERS IN EACH SEX BY EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

The source of the figures in the Subsidiary Table (S.T.) is the data tabulated in the Main Table (M. T.) 'B-III-Part A, Industrial Classification of Workers and Non-workers by Educational Levels in Urban Areas only', which has been printed in Part II-B of the Himachal Pradesh 1961 Census Report.

In the Main Table columns have not been provided for 'Total Workers' by sex for various educational levels. To work out the figures for the Subsidiary Table, the figures of 'Total Workers' by sex for various educational levels have to be worked out first either by summation of the figures for the Categories I-IX or by substracting the figures of columns 23 and 24 from those of columns 3 and 4 respectively for the various educational levels in the Main Table. Thereafter the figures of the Subsidiary Table are worked out as indicated below :

$$\text{Col. 4 S.T.} = \frac{\text{Col. 3 (Illiterate) } \textit{minus} \text{ Col. 23 (Illiterate) M.T.}}{\text{Col. 3 (Total) } \textit{minus} \text{ Col. 23 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 5 S.T.} = \frac{\text{Col. 4 (Illiterate) } \textit{minus} \text{ Col. 24 (Illiterate) M.T.}}{\text{Col. 4 (Total) } \textit{minus} \text{ Col. 24 (Total) M.T.}} \times 1{,}000$$

and so on.

The Kinnaur District of Himachal Pradesh has no urban area and hence it does not figure in the Subsidiary Table.

In the working out of the figures for the Subsidiary Table they have been rounded off to integers.

In the Subsidiary Table

SUBSIDIARY TABLE B-III—PART A·2

DISTRIBUTION OF 1,000 WORKERS IN EACH INDUSTRIAL CATEGORY AND IN EACH SEX BY EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

The source of the figures in the Subsidiary Table (S.T.) is the data tabulated in the Main Table (M.T.) 'B-III—Part A, Industrial Classification of Workers and Non-Workers by Educational Levels in Urban Areas only', which has been printed in Part II-B of the Himachal Pradesh 1961 Census Report. The figures of the Subsidiary Table have been worked out as indicated below—

$$\text{Col. 5 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Illiterate) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 7 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Literate without educational levels) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 9 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Primary or Junior Basic) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 11 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Matriculation or Higher Secondary) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 13 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Technical diploma not equal to degree) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 15 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Non-technical diploma not equal to degree) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 17 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (University degree or post-graduate degree M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 19 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Technical degree or diploma equal to degree or post graduate degree Total) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 21 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Engineering) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 23 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Medicine) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 25 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Agriculture) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 27 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Veterinay \& Dairying) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 29 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Technology) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 31 (Industrial Category I) S.T.} = \frac{\text{Col. 5 (Teaching) M.T.}}{\text{Col. 5 Total) M.T.}} \times 1{,}000$$

$$\text{Col. 33 (Industrial Category II) S.T.} = \frac{\text{(Col. 5 (Others) M.T.}}{\text{Col. 5 (Total) M.T.}} \times 1{,}000$$

and so on for females of Industrial Category I and separately for males and females of Industrial Categories II to IX.

SUBSIDIARY TABLE B-IV·9

DISTRIBUTION OF 10,000 WORKERS OTHER THAN THOSE WORKING AS CULTIVATORS OR AS AGRICULTURAL LABOURERS BY DIVISION, MAJOR GROUP AND MINOR GROUP OF THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION

The source of the figures for the Subsidiary Table is cols. 1—7 of the Main Table 'B—IV Part C, Industrial Classification by Sex and Divisions, Major Groups and Minor Groups of persons at Work other than Cultivation, printed in Part II-B of the Himachal Pradesh 1961 Census Report.

The Subsidiary Table gives per 10,000 distribution of workers engaged in activities other than cultivation and agricultural labour by Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification (I.S.I.C.) for the Union Territory and each of its districts.

For each of the cols. 2—7, of the Subsidiary Table the 'Total', i.e. 'All Divisions' figures has been taken as 10,000. First they have been distributed in I.S.I.C. Divisions 0 to 9 and then further distributed in Major Groups and Minor Groups.

The figures have been rounded off to integers. Thus the total of the Major Groups under a Division is equal to the total figure given for the Division. Similarly the total of the Minor Groups under a Major Group is equal to the total figure given for the Major Group. The rounding off is such that for each col. of Subsidiary Table,

(*i*) The total of all the Divisions is equal to 10,000.

(*ii*) The total of all the Major Groups in a Division is equal to the figure of that Division.

(*iii*) The total of all the Minor Groups in a Major Group is equal to the figure of that Major Group. But it is not so in many cases, because the Minor Groups having figures less than 1 per cent of the respective Divisions (0·5 per cent in case of Divisions 2 and 3) have been excluded from the Main Table.

The district of Kinnaur is entirely rural and hence nil urban information for the District.

The Indian Standard Industrial Classification (I.S.I.C.) Divisions, Major Groups and Minor Groups are indicated by these Code Numbers in the Subisidiary Table. SUBSIDIARY TABLE B-V·1

DISTRIBUTION OF 10,000 WORKERS OTHER THAN THOSE WORKING AS CULTIVATORS OR AS AGRICULTURAL LABOURERS BY OCCUPATIONAL DIVISIONS, GROUP AND FAMILY OF THE NATIONAL CLASSIFICATION OF OCCUPATIONS

The source of the data for the Subsidiary Table is cols. 1 to 7 of the Main Table 'B-V, Occupational Classification by Sex of Persons at Work other than Cultivation' printed in Part II-B of the Himachal Pradesh 1961 Census Report.

The Subsidiary Table shows per 10,000 distribution of workers other than those engaged in cultivation and agricultural labour among various Occupational Divisions, Groups and Families of National Classification of Occupations (N.C.O.) for the Union Territory and each of its districts.

For each of the cols. 2 to 7 of the Subsidiary Table the 'Total' of 'All Divisions' has been taken as 10,000, first distributed into ten Occupational Divisions, i.e., 0 to 9 and X, and then further distributed into various Occupational Groups and Families.

The figures have been rounded off to integers. Thus the total of Occupational Groups under a Division is equal to the total figure given for the Division. Similarly the total of the Families under an Occupational Group is equal to the total figure given for the Occupational Group.

The rounding off is such that for each col. of subsidiary table,

(*i*) The total of all the Divisions is equal to 10,000.

(*ii*) The total of all the Occupational Groups in a Division is equal to the figure of that Division.

(*iii*) The total of all the Families in an Occupational Group is equal to the figure of that Occupational Group. But it is not so in many cases, because certain Families which have figures less than 1 per cent of the respective Divisions (0·5 % in case of Division 7-8) have been omitted from the Main Table.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

The National Classification of Occupations (N.C.O.) Divisions, Groups and Families are indicated by their code numbers in the Subsidiary Table. For study of these concepts the code structure of the National Classification of Occupations may be seen in the Introduction portion of this publication, which is printed there as 'Appendix III' to Introduction.

SUBSIDIARY TABLE B-VI·1

DISTRIBUTION OF 1,000 WORKERS IN EACH OCCUPATIONAL DIVISION AND IN EACH SEX BY EDUCATIONAL LEVELS IN URBAN AREAS ONLY

The source of this Subsidiary Table (S.T.) is Main Table (M.T.) 'B-VI—Occupational Divisions of Persons, at work other than Cultivation Classified by Sex, Broad. Age-Groups and Educational Levels in Urban Areas Only,' appearing in Part II-B of the Himachal Pradesh 1961 Census Report. The figures of the Subsidiary Table (S.T.) have been worked out as given hereunder—

$$\text{Col. 5 S·T·} = \frac{\text{Col· 8 (Total) M.T.}}{\text{Col. 6 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 6 S.T.} = \frac{\text{Col. 9 (Total) M·T·}}{\text{Col· 7 (Total) M·T·}} \times 1{,}000$$

$$\text{Col· 7 S·T·} = \frac{\text{Col· 10 (Total) M·T·}}{\text{Col· 6 (Total) M·T·}} \times 1{,}000$$

and so on.

$$\text{Col· 17 S·T·} = \frac{\text{Total of Cols· 20+22+24+26+28+30+32 (Total) M.T.}}{\text{Col. 6 (Total) M·T·}} \times 1{,}000$$

$$\text{Col. 18 S.T.} = \frac{\text{Total of Cols. 21+23+25+27+29+31+33 (Total) M·T·}}{\text{Col· 6 (Total) M·T·}} \times 1{,}000$$

$$\text{Col· 19 S·T·} = \frac{\text{Col· 20 (Total) M·T·}}{\text{Col· 6 (Total) M·T·}} \times 1{,}000$$

and so on.

The figures have been rounded off to integers. In case of Cols. 17-32 they have been first rounded off for Cols. 17-18 and then the figures for Cols. 19-32, have been rounded off.

There is no urban Area in Kinnaur District and it does not, therefore, figure in the Subsidiary Table.

SUBSIDIARY TABLE B-VIII PART A-1

DISTRIBUTION OF 1,000 MALES AND FEMALES WHO ARE UNEMPLOYED IN EACH AGE-GROUP ACCORDING TO EDUCATIONAL LEVELS IN URBAN AREAS ONLY

The Source for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-VIII Part A—Persons Unemployed aged 15 and above by Sex, broad Age-Groups and Educational Levels in Urban Areas Only', appearing in Part II-B of Himachal Pradesh 1961 Census Report. Separate figures for (A) Persons seeking employment for the first time and (B) Persons employed before but now out of employment and seeking work, have been shown. The Table has been prepared upto District Level.

The following method was adopted for working out the figures:—

$$\text{Col. 5 [15—19(A)] S.T.} = \frac{\text{Col. 7 (Illiterate) M.T.}}{\text{Col. 7 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 6 [15—19(A)] S.T.} = \frac{\text{Col. 8 (Illiterate) M.T.}}{\text{Col. 8 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 7 (15—19(A)] S.T.} = \frac{\text{Col. 7 (Literate without educational level) M.T.}}{\text{Col. 7 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 8 [15—19(A)] S.T.} = \frac{\text{Col. 8 (Literate without educational level) M.T.}}{\text{Col. 8 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 9 [15—19(A)] S.T.} = \frac{\text{Col. 7 (Primary or Junior Basic) M.T.}}{\text{Col. 7 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 10 [15—19(A)] S.T.} = \frac{\text{Col. 8 (Primary or Junior Basic) M.T.}}{\text{Col. 8 (Total) M.T.}} \times 1{,}000$$

and so on.

The figures have been rounded off to integers. In case of Cols. 19-34 they have been first rounded off for Cols. 19-20 and then figures for Cols. 21-34 have been rounded off. The Cols. for 'age not stated' have not been shown in the Subsidiary Table due to nil figures in the Main Table. The district of Kinnaur is entirely rural and hence it does not figure in the Subsidiary Table.

In the Subsidiary Table—

O=Nil.

SUBSIDIARY TABLE B-XII·3

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLD WORKERS (FAMILY/HIRED) ENGAGED IN CULTIVATION WITH AND WITHOUT HOUSEHOLD INDUSTRY BY EACH SIZE OF LAND CULTIVATED AND SIZE OF EMPLOYMENT BY FAMILY AND HIRED WORKERS IN RURAL AREAS ONLY

The source of the data for this Subsidiary Table (S.T.) is Main Tables (M.T.) 'B-XII—Sample Households engaged in Cultivation only, Classified by Size of Land Cultivated and Number of Family Workers and Hired Workers, in Rural and Urban Areas separately', and Main Table (H.T.) 'B-XV—Sample Households engaged both in Cultivation and Household Industry, Classified by Size of Land in Rural and Urban Areas separately', appearing in Part III os the Himachal Pradesh 1961 Census Report. The method adopted for working out figures of this Subsidiary Table is given below:—

Col. 2 (All sizes) S.T. = 1,000

$$\text{Col. 3 (All sizes) S.T.} = \frac{\text{Col. 3 (All sizes) (B-XII) M.T.}}{\text{Cols. 3+4+5 (All sizes) (B-XII) M.T.} + \text{Cols. 3+4+5 (All sizes) (B-XV) M.T.}} \times 1{,}000$$

Figures have been worked out in the same manner for other sizes of employments i.e. for Col. Nos. 18—21, 23—26 and 28—31.

Similarly figures have been worked out for other sizes of land (class ranges in acres) separately, i.e., less than 1 acre, 1·0—2·4 acres, 2·5—4·7 acres etc., and for each size of employment taking figures in Col. Nos. 2, 9, 12, 17, 22 and 27 as 1,000.

The figures have been rounded off to two places of decimals.

SUBSIDIARY TABLE B-XII·4

AVERAGE NUMBER OF FAMILY AND HIRED WORKERS PER CULTIVATING HOUSEHOLD BY EACH SIZE OF CULTIVATED HOLDING IN *RURAL AREAS* ONLY

The source of the data for this Subsidiary Table (S.T.) is Main Tables (M.T.) 'B-XII—Sample Households engaged in Cultivation only classified by Size of Land Cultivated and Number of Family Workers and Hired Workers in Rural and Urban Areas Separately' and 'B-XV—Sample Households engaged both in Clutivation and Household Industry classified by Size of Land in Rural and Urban Areas separately', printed in Part III of the Himachal Pradesh 1961 Census Report. The method adopted for working out figures of this Subsidiary Table is detailed below—

$$\text{Col. 2 (All sizes) S.T.} = \frac{\text{Cols. 3+4+5 (All sizes) (B-XII) M.T.+Cols. 3+4+5 (All sizes) (B-XV) M.T.}}{\text{Col. 2 (All sizes) (B-XII) M.T.+Col. 2 (All sizes) (B-XV) M.T.}} \times 1{,}000$$

SUBSIDIARY TABLE B-XIV PART A·1

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY ONLY BY PRINCIPAL HOUSEHOLD INDUSTRY AND WORKING STRENGTH *IN ALL AREAS*

The source for this Subsidiary Table (S.T.) is Main Table (M.T.) 'B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in All Areas; Part A—Households classified by Major Groups of Principal Household Industry and Number of Persons engaged', appearing in Part III of the Himachal Pradesh 1961 Census Report. The method adopted for working out the figures is detailed below:—

Col. 4 (Total) S.T. = 1,000

Industry No. Col. 5 (Total) S.T. $= \frac{\text{Col. 5 (1 person) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Col. 6 (Total) S.T. $= \frac{\text{Col. 6 (2 persons) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Col. 7 (Total) S.T. $= \frac{\text{Col. 7 (3—5 persons) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Col. 8 (Total) S.T. $= \frac{\text{Col. 8 (6—10 persons) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Col. 9 (Total) S.T. $= \frac{\text{Col. 9 (More than 10 persons) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Col. 10 (Total) S.T. $= \frac{\text{Col. 10 (Unspecified) M.T.}}{\text{Col. 4 (Total Households) M.T.}} \times 1{,}000$

Similarly the figures have been worked out for other industries, for rural and urban areas separately. The figures have been rounded off to two places of decimals.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

SUBSIDIARY TABLE B-XIV PART B·1

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY ONLY BY PRINCIPAL HOUSEHOLD INDUSTRY (DIVISION/MAJOR/MINOR GROUPS IN *ALL AREAS*

The source of the data for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in All Areas—Part B—Households classified by Minor Groups of Principal Household Industry', printed in Part III of the Himachal Pradesh 1961 Census Report. The following method has been adopted for working out the figures.

In Part B of the Main Table, the sample households, who are engaged in household industry only, have been classified by code numbers of I.S.I.C., minor groups of principal household industries indicating side by side the standard descriptions of the minor groups. In the Subsidiary Table the distribution of 1,000 sample households, engaged in household industry only, has been shown by principal household industry, classified by code numbers of I.S.I.C., divisions, major groups and minor groups of principal household industries indicating side by side their standard descriptions. From the Main Table, the figures of minor groups have been first grouped into major groups and then into divisions, and the figures, thereafter worked out for the Subsidiary Table as indicated below:—

Division: Col. 3 (Total) S.T. = 1,000

$$\text{Col. 4 (Rural) S.T.} = \frac{\text{Col. 4 (Division—Rural) M.T.}}{\text{Col. 3 (Division—Total) M.T.}} \times 1{,}000$$

$$\text{Col. 5 (Urban) S.T.} = \frac{\text{Col. 5 (Division—Urban) M.T.}}{\text{Col. 3 (Division—Total) M.T.}} \times 1{,}000$$

Major Group:

$$\text{Col. 3 (Total) S.T.} = \frac{\text{Col. 3 (Major Group—Total) M.T.}}{\text{Col. 3 (Division—Total) M.T.}} \times 1{,}000$$

$$\text{Col. 4 (Rural) S.T.} = \frac{\text{Col. 4 (Major Group—Rural) M.T.}}{\text{Col. 3 (Division—Total) M.T.}} \times 1{,}000$$

$$\text{Col. 5 (Urban) S.T.} = \frac{\text{Col. 5 (Major Group—Urban) M.T.}}{\text{Col. 3 (Division—Total) M.T.}} \times 1{,}000$$

and so on.

The figures have been rounded off to two places of decimals. The figures have been rounded off in such a way that the total of major groups is equal to the figures given for their division. Similarly the total of minor group comes to the figure for major group in which they fall.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

SUBSIDIARY TABLE B-XVI·1

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY PRINCIPAL HOUSEHOLD INDUSTRY IN DURATION

The source of data for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-XVI—Sample Principal Household Industry classified by Period of Working and Total Number of Workers engaged in Household Industry in All Areas', appearing in Part III of the Himachal Pradesh 1961 Census Report. The method adopted for preparation of the Subsidiary Table is detailed below:—

Major Group Col. 3(*a*) S.T. = 1,000

$$\text{Major Group Col. 4 (}a\text{) S.T.} = \frac{\text{Col. 4 (Rural) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 5 (}a\text{) S.T.} = \frac{\text{Col. 4 (Urban) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 8 (}a\text{) S.T.} = \frac{\text{Col. 12 (Rural) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 9 (}a\text{) S.T.} = \frac{\text{Col. 12 (Urban) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group. Col. 10 (}a\text{) S.T.} = \frac{\text{Col. 16 (Rural) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 12 (}a\text{) S.T.} = \frac{\text{Col. 20 (Rural) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 14(}a\text{) S.T.} = \frac{\text{Col. 24 (Rural) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

$$\text{Major Group Col. 15 (}a\text{) S.T.} = \frac{\text{Col. 24 (Urban) (}a\text{) M.T.}}{\text{Col. 4 (Total) (}a\text{) M.T.}} \times 1{,}000$$

Similarly figures have been worked out for "without cultivation" and for each major group and the figures have been rounded off to two places of decimals.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

In the Subsidiary Table
(*a*)=with cultivation
(*b*)=without cultivation

SUBSIDIARY TABLE B-XVI·2

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLD WORKERS ENGAGED IN PRINCIPAL HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY FAMILY AND HIRED WORKERS IN EACH DURATION

The source of the data for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-XVI—Sample Principal Household Industry classified by Period of Working and Total Number of Workers engaged in Household Industry in All Areas', printed in Part III of the Himachal Pradesh 1961 Census Report. The following method has been adopted for preparation of the Subsidiary Table:—

$$\text{Household Industry—Total—Col. 3 S.T.} = \frac{\text{(Cols. 5+6+7) Rural } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 4 S.T.} = \frac{\text{(Cols. 5+6+7) Urban } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 5 S.T.} = \frac{\text{(Col. 5 Rural } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 6 S.T.} = \frac{\text{(Col. 6 Rural } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 7 S.T.} = \frac{\text{Col. 5 Urban } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 8 S.T.} = \frac{\text{Col. 6 Urban } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 9 S.T.} = \frac{\text{Col. 7 Rural } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

$$\text{Household Industry—Total—Col. 10 S.T.} = \frac{\text{Col. 7 Urban } (a+b) \text{ M.T.}}{\text{(Cols. 5+6+7) Total } (a+b) \text{ M.T.}} \times 1{,}000$$

and so on each Household Industry—Total—Cols. 11 to 35.

Similarly the figures have been worked out for each Industry—(*a*) with cultivation and (*b*) without cultivation. The figures have been rounded off to two places of decimals.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

In the Subsidiary Table
(*a*) =with cultivation
(*b*) =without cultivation

SUBSIDIARY TABLE B-XVI·3

AVERAGE NUMBER OF FAMILY AND HIRED WORKERS PER HOUSEHOLD ENGAGED IN PRINCIPAL HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY THE DURATION OF HOUSEHOLD INDUSTRY *IN RURAL AND URBAN AREAS*

The source of data for the Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-XVI—Sample Principal Household Industry classified by Period of Working and Total Number of Workers engaged in Household Industry in All Areas', appearing in Part III of the Himachal Pradesh 1961 Census Report. The following method has been adopted for the preparation of the Subsidiary Table—

$$\text{Industry Rural—Total Col. 3 S.T.} = \frac{\text{(Cols. 5+6+7) Rural } (a+b) \text{ M.T.}}{\text{Col. 4 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 4 S. T.} = \frac{\text{(Cols. 5+6) Rural } (a+b) \text{ M.T.}}{\text{Col. 4 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 5 S. T.} = \frac{\text{Col. 7 Rural } (a+b) \text{ M.T.}}{\text{Col. 4 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 6 S. T.} = \frac{\text{(Cols. 5+6) Rural } (a+b) \text{ M.T.}}{\text{Col. 7 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 7 S. T.} = \frac{\text{(Cols. 9+10+11) Rural } (a+b) \text{ M.T.}}{\text{Col. 8 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 8 S. T.} = \frac{\text{(Cols. 9+10) Rural } (a+b) \text{ M.T.}}{\text{Col. 8 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 9 S. T.} = \frac{\text{Col. 11 Rural } (a+b) \text{ M.T.}}{\text{Col. 8 Rural } (a+b) \text{ M.T.}}$$

$$\text{Industry Rural—Total Col. 10 S.T.} = \frac{\text{(Cols. 9+10) Rural } (a+b) \text{ M.T.}}{\text{Col. 11 Rural } (a+b) \text{ M.T.}}$$

Similarly figures have been worked out for other periods of working for cols. 11 to 24 for Rural $(a+b)$ and (a) with cultivation and (b) without cultivation separately. The same method has been applied while calculating figures for Urban Total and (a) with cultivation and (b) without cultivation for the Principal Household Industry. The figures have been rounded off to two places of decimals.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

In the Subsidiary Table

(a) With cultivation.

(b) Without Cultivation.

*Stands for infinity where denominator is zero.

N = Negligible.

SUBSIDIARY TABLE B-XVII·1

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS BY SIZES OF HOUSEHOLDS

The source of the data for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'B-XVII—Sample Households classified by (i) Number of Male and Female Members by size of Households and (*ii*) Engagement (*a*) neither in Cultivation nor in Industry (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land 'Cultivated, printed in Part III of the Himachal Pradesh 1961 Census Report. The method detailed hereunder has been adopted for preparation of the Subsidiary Table—

$$\text{Col. 3 S.T.} = \frac{\text{Col. 3 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 4 S.T.} = \frac{\text{Col. 4 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 5 S.T.} = \frac{\text{Col. 5 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 6 S.T.} = \frac{\text{Col. 6 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 7 S.T.} = \frac{\text{Col. 7 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 8 S.T.} = \frac{\text{Col. 8 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 9 S.T.} = \frac{\text{Col. 9 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 10 S.T.} = \frac{\text{Col. 10 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

$$\text{Col. 11 S.T.} = \frac{\text{Col. 11 (Total) M.T.}}{\text{Col. 2 (Total) M.T.}} \times 1{,}000$$

Similarly figures have been worked out for other sizes of Sample Households. Figures have also been worked out separately for Rural and Urban, using the same method. The rounding off of the figures has been done upto two places of decimals.

The district of Kinnaur is entirely rural and hence nil urban information for this district.

SUBSIDIARY TABLE C-II·2

MARITAL STATUS OF 1,000 PERSONS OF EACH SEX IN GENERAL POPULATION AND COMPARISON WITH PREVIOUS CENSUSES

The source of the data for this Subsidiary Table (S.T.) is (1) the Main Table (M.T.) 'C-II—Age and Marital Status' appearing in Part II-C of the Himachal Pradesh 1961 Census Report; (2) Table C-III—Age and Civil Conditions—1951 Census Report; (3) Table VII—Age, Sex and Civil Condition by Religion—1931 Census Report; and (4) Table VII—Age, Sex and Civil Condition by Religion—1921 Census Report. Comparison has been made with the figures of past Censuses.

The figures of 'widowed' and 'divorced/separated are given separately only in 1961 Census. In the previous Censuses the figures for the two were combined together and given under 'widowed'. The figures for 'unspecified status' also are given in 1961 Census only. The figures of the Subsidiary Table have been worked out as below—

The source of the data for this Subsidiary Table (S.T.) is Main Table (M.T.) 'C-III—Part B— Age, Sex and Education in Urban Areas only', appearing in Part II-C of the Himachal Pradesh 1961 Census Report. The following method has been adopted for preparation of the Subsidiary Table—

$$\text{Col. 5 (Total population 5+) S.T.} = \frac{\text{Col. 5 (Age 5+) M.T.}}{\text{Col. 3 (Age 5+) M.T.}} \times 1{,}000$$

$$\text{Col. 6 (Total population 5+) S.T.} = \frac{\text{Col. 6 (Age 5+) M.T.}}{\text{Col. 4 (Age 5+) M.T.}} \times 1{,}000$$

$$\text{Col. 7 (Total population 5+) S.T.} = \frac{\text{Col. 7 (Age 5+) M.T.}}{\text{Col. 3 (Age 5+) M.T.}} 1{,}000$$

$$\text{Col. 8 (Total population 5+) S.T.} = \frac{\text{Col. 8 (Age 5+) M.T.}}{\text{Col. 4 (Age 5+) M.T.}} \times 1{,}000$$

$$\text{Col. 9 (Total population 5+) S.T.} = \frac{\text{Col. 9 (Age 5+) M.T.}}{\text{Col. 3 (Age 5+) M.T.}} \times 1{,}000$$

$$\text{Col. 10 (Total population 5+) S.T.} = \frac{\text{Col. 10 (Age 5+) M.T.}}{\text{Col. 4 (Age 5+) M.T.}} \times 1{,}000$$

and so on.

The figures have been rounded off to integers. In the case of cols. 19—34, the figures have first been rounded off for cols. 19-20 and then the figures for cols. 21—34 have been rounded off.

The district of Kinnaur is entirely rural and hence it does not figure in the Subsidiary Table.

VARIATION IN NATURAL POPULATION

The natural population of Himachal Pradesh in 1951 and 1961 is shown in this Subsidiary Table (S.T.), the source of the data for which is, (1) Main Table (M.T.) 'D-II—Place of Birth', appearing in Part II-C 1961 Census Report of Himachal Pradesh and (2) Table 'D-IV—Migrants', printed in Part II-A of 1951 Census Report. The Subsidiary Table has been prepared upto State level only, and the method adopted for the preparation of the table is given below—

Col. 2 S.T. = The enumerated population of Himachal Pradesh in 1961—and is represented by col. 3 against 'Total Population' in M. T.

Col. 3 S.T. = The total of all migrants born outside Himachal Pradesh, (1961 Census) and is represented by figures in col. 3 of the M. T., arrived at by substracting 'Born within the State' from the 'Total Population'.

Col. 4 S.T. = The total of all emigrants from Himachal Pradesh. This figure has been arrived at by the addition of all immigrants in other States of India, who are born in Himachal Pradesh. This data was collected from the Superintendents of Census Operations of other States.

Col. 5 S.T. = Derived by the addition of figures of cols. 2 and 4 substraction of figure of col. 3 in the Subsidiary Table

Similar is the process for columns 6—9 for the 1951 Census.

SUBSIDIARY TABLE D-III·1

DISTRIBUTION OF 10,000 PERSONS BORN OUTSIDE THE PLACE OF ENUMERATION BY PLACE OF BIRTH, DURATION OF RESIDENCE AT THE PLACE OF ENUMERATION AND SEX

The source of the data for this Subsidiary Table (S.T.) is the Main Table (M.T.) 'D-III—Migrants Classified by Place of Birth and Duration of Residence in Place of Enumeration', printed in Part II-C of the Himachal Pradesh 1961 Census Report. The Subsidiary Table is followed by an Inset Table showing individual States contributing 1 or more in 1,000 Total Migrants. The method followed in preparation of the Subsidiary Table is detailed below—

$$\text{Col. 3 S.T.} = \frac{\text{Col. 5 (Born elsewhere in the district of enumeration—Total of Rural, Urban and Unclassifiable) M.T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 4 S.T.} = \frac{\text{Col. 6 (Born elsewhere in the district of enumeration—Total of Rural, Urban and Unclassifiable) M.T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 5 S.T.} = \frac{\text{Col. 5 (Born elsewhere in the district of enumeration—Rural) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 6 S.T.} = \frac{\text{Col. 6 (Born elsewhere in the district of enumeration —Rural) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 7 S.T.} = \frac{\text{Col. 5 (Born elsewhere in the district of enumeration—Urban) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 8 S.T.} = \frac{\text{Col. 6 (Born elsewhere in the district of enumeration—Urban) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 9 S.T.} = \frac{\text{Col. 5 (Born elsewhere in the district of enumeration—Unclassifiable) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

$$\text{Col. 10 S.T.} = \frac{\text{Col. 6 (Born elsewhere in the district of enumeration—Unclassifiable) M. T.}}{\text{Total of cols. 3+4 (Total) M.T.}} \times 10{,}000$$

and so on.

The figures have been rounded off to integers. The figures have been first rounded off for the different durations of residence. Then they have been rounded off for various birth places with each duration of residence and lastly the rounding off has been done for Rural, Urban and Unclassifiable for 'Born elsewhere in the district of enumeration', 'Born in other district of State' and 'Born in each of the other States.'

The district of Kinnaur is entirely rural and hence no urban information for this district.
