Appendix IV	Towns showing their outgrowth with population	288—290
Appendix V	Places of tourist interest in the towns of the state	291—292
Map	Position of West Bengal in India 1981	

FOREWORD

Under the 1971 Census series publications, for the first time a state level town directory volume was brought out as a source of basic data in respect of all the towns in the state. The town directory volume of 1971 series proved useful to the planners, administrators, research workers, academicians and others and, therefore, the state level town directory based on the 1981 Census is also proposed to be published. The basic frame of the town directory of the 1981 series remains more or less the same as in the case of the 1971 series. However, a few modifications and innovations have been made to make it more informative and useful. It is with this objective in view that, besides a new statement, a detailed analytical note supported by a number of inset tables based on data on the primary census abstracts and infrastructure had been added.

(2) The volume is divided into two sections. Section-A presents an analytical note, the town directory covering 7 statements, townwise primary census abstract and a few appendices. Section-B contains a number of important maps. Statements I to VI of the town directory provide a wide range of demographic, economic, social and cultural data in respect of each town. These cover information on the location of towns, civic administration status, growth history, physical aspects, civic and other amenities, municipal finances, medical, educational, recreational and cultural amenities besides trade, commerce, industry and banking institutions, etc. These statements are broadly comparable to similar statements included in the town directory of the 1971 series and the data contained therein is amenable to a trend analysis. The statement VII of 1971 series of town directory relating to population by religion and Scheduled Castes and Scheduled Tribes has been dropped as its compilation is expected to take time. A new Statement IV-A, however, endeavours to provide information on civic and amenities in slums in Class-I and Class -II towns. It is hoped that this information will be useful for under taking new or strengthening the existing basic civic services in the slums to meet one of the requirements of the Minimum Needs Programme.

(3) The data for the town directory has been compiled in the Census Directorate by Shri S. Guha, Investigator under the direction of Shri S.N. Ghosh, IAS., the Director of Census Operations West Bengal His team of devoted workers led by Shri A.K. Dutta, Deputy Director of Census Operations worked painstakingly for compilation of the volume. The task of planning, designing and co-ordination of the project has been carried out by Dr. N.G. Nag, Deputy Registrar General, (Social Studies) of my office. Dr. B.K. Roy Deputy Registrar-General, (Map), provided the technical guidance in the preparation of the maps. The draft manuscripts compiled in the Census Directorate have been scrutinised in the Social Studies Division at the headquarters by Mrs. V.R. Khanna Investigator under the able guidance of Shri M. M. Dua, Senior Research Officer. I avail of this opportunity to thank all my colleagues who contributed to this project.

NEW DELHI
2 September, 1983

P. PADMANABHA
Registrar General, India

PREFACE

hri P. Padmanabha, former Registrar General, India, has in his Foreword lucidly delineated the cope of this publication and also the rationale for the Census Organisation taking up the project of compiling for each town in West Bengal wide-ranging non-census data.

It has been the tradition of the Census Organisation to collect information about certain basic amenities available in each town and village. This information for the village was compiled separately in the form of a Village Directory and included in the District Census Handbook. Likewise, the data for the towns were compiled in the form of a Town Directory, also included in the District Census Handbook. A Town Directory for the entire state for all the towns, municipal and otherwise, was also compiled. This Town Directory includes, besides Primary Census Data for each town, other relevant information about civic administrative status, growth of the town, functional category, physical aspects, municipal function, civic and other amenities, trade and industry and other basic cultural and social characteristics. Compilation of the data of non-census variety from different sources, mainly from the Block Development Officers and other authorities of the district administration as also from the municipal and other authorities, Revenue Officers of the State Government and also a number of other officers of the State Government, and compilation of entire information were undertaken by the Census Organisation under the able leadership and meticulous guidance of Shri S.N. Ghosh, Director of Census Operations, West Bengal, who had to resume his duties under the State Government in public interest, before this volume could be finalised. The credit for the successful operation goes entirely to Shri Ghosh.

Shri Arun Kumar Bhattacherya, Investigator had started the work under Shri Ghosh in collecting the information as per the formats of the Town Directory. Later, Shri Swapan Kumar Guha, Investigator under the direction of Shri S.N. Ghosh, former Director of Census Operations, West Bengal along with a team of able workers led by Shri A.K. Dutta, Deputy Director of Census Operations, West Bengal, worked tirelessly for compilation of this volume. The analytical note was prepared by Shri Guha, Investigator, under the guidance of Shri Dutta, Dy. Director. They were ably assisted by Smt. Sucheta Dutta, Statistical Assistant, Smt. Atashi Dasgupta, Computor, Smt. Amala Putatunda, Computor and Smt. Anita Mukherjee, Computor. We are grateful to them for their commendable help and assistance.

This organisation expresses its deep sense of gratitude to Shri P. Padmanabha, former Registrar General, India and Shri V.S. Verma, present Registrar General, India for their active interest and valuable suggestions and guidance during compilation of this Directory. Dr. N.G. Nag, Deputy Registrar General (SS) along with his dedicated colleagues had been a source of inspiration to this office for the completion of the project. Dr. Nag had never allowed this office to lose sight of any aspect of the work. At every stage he had inspired us to complete the project urgently. We express once more our deep sense of gratitude to Dr. Nag for the invaluable assistance rendered to us in over-seeing the completion of the project.

Shri A.K. Dutta, Deputy Director of Census Operations, West Bengal had actively taken interest in the supervision of the printing work. He was very actively and ably assisted by Sri Swapan Kumar Guha, Investigator and Shri Himangshu Saha Chowdhury, Printing Inspector. To all of them we are grateful for their commendable services.

We are also grateful to Govt. of India Press, Shimla for printing of this volume.

SUKUMAR SINHA
Joint Director of Census Operations,
West Bengal

CALCUTTA
The 25th November, 1985

ANALYTICAL NOTE

INTRODUCTION

In the process of urbanisation, new places come into being and already existing places grow in population. Both these aspects of urbanisation require a constant vigilence on the environmental and planning for the dwellers for a continuous length of time. The urban environment in India is greatly influenced by various governmental policy decisions and there are goals and objectives set at the national level for the development of future Indian Urban Centres. It is felt that the blue prints of developments in cities and urban complexes should have a definite basis so that the policy makers, planners and administrators will have a proper understanding of the urban situation of the country. The Census Directorates all over the country had focussed its attention on this situation and a programme of compilation of Town Directory for each and every state was set up in 1971 as ancillary to 1971 Census. The programme of publication of Town Directory as ancillary to 1981 Census has also been taken up with a few modifications and further developments. The Town Directory at all India level will also be brought out in census tradition as ancillary to 1981 Census. This volume "State Level Town Directory" deals with certain important information pertaining to each and every of 291 towns spread over the different parts of this state of West Bengal.

CENSUS CONCEPT OF URBAN AREA

Rural and Urban classification of population is an accepted demographic practice. But there has been varying criteria adopted for the recognition of units as urban at censuses of different countries. The ECAFE Seminar on Planning for Urban and Regional Development held at Tokyo, in October, 1966 recommended that census authorities should apply a simplified and standardised definition for qualifying an area as urban. In India, before the Census of 1961 the definition of an urban area varied from state to state. The uniform and somewhat rigid tests were sought to be applied throughout the country for the first time in 1961 census. The definition adopted in 1981 Census follows the definition of 1961 and 1971 Censuses without any deviation.

In Census terminology, by urban units what is meant is either (*a*) of municipalities and such other bodies of equivalent status (like Notified Areas, Cantonments etc.). which have been created by a definite legislation as urban areas or (*b*) such area which are urban as per census definition. In order to be considered as an urban unit, as per census definition, a specific geographical area (like mouza) must fulfill the following three conditions simultaneously.

(1) a population of at least 5,000

(2) a density of population of at least 400 per sq. km. and

(3) at least 75 percent of the male working persons in that area must be engaged in non-agricultural pursuits (except those in livestock, forestry, hunting, fishing, plantation, game propagation etc.).

Fulfilment of these three conditions simultaneously would make, as per census definition, a particular geographical area, an urban unit and normally is called a non-municipal town. There is, however, one exception to this rule. If a specific area has developed into a town due to existence of some project or because of being a health resort or a place of tourist attraction (meaning thereby projects or some sort or other being undertaken in such a place by either Government or private sector) such an area can be given the status of an urban area even without strictly fulfilling all the above three conditions specifically the conditions of there being a minimum population of 5,000.

Further, for the first time in 1981 Census, the concept of urban outgrowth has been introduced in West Bengal. The definition of urban outgrowth is almost similar to the earlier definition of the project town, in so far as an area, in order to be an urban outgrowth should fulfil at least the second and the third conditions of an urban unit necessarily but shall by definition fall short of the population figure or 5,000. But an urban outgrowth must be physically contiguous to any one of the urban areas as defined above and should have a minimum 600 population or so. Thus an urban outgrowth has been kept necessarily tagged to a "mother town". On the other hand, project towns may stand on their own——————qualifying as urban units by themselves.

URBAN AGGLOMERATION

The concept of urban agglomeration was introduced for the first time in 1971 Census. An urban agglomeration means a stretch of urban area coverning more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation. In 1971, West Bengal had 13 urban agglomerations : they were (1) Calcutta, (2) Asansol, (3) Barasat, (4) Habra, (5) English Bazar, (6) Budge Budge (7) Koch Bihar, (8) Baharampur, (9) Alipur Duar, (10) Kulti, (11) Bauria, (12) Uluberia and Krishnapur. Of them 5 agglomerations lost their identities in 1981. They are : (1) Krishnapur, (2) Barasat, (3) Budge Budge, (4) Uluberia and (5) Bauria. All of them, this time, got merged in Calcutta urban agglomeration. 1981 Census has led to finding of 32 urban agglomerations They are: (1) Calcutta, (2) Habra, (3) Rajpur, (4) Birlapur, (5) Kanyanagar, (6) Asansol, (7) Raniganj, (8) Ondal, (9) Kulti, (10) Krishnagar, (11) Dishergarh, (12) Niamatpur, (13) Katwa, (14) Nabadwip, (15) Ranaghat, (16) Birnagar, (17) Kharagpur, (18) Garhbeta-Amlogora, (19) Kolaghat, (20) Mrigala, (21) Singur, (22) Bahaampur, (23) Aurangabad, (24) Farakka Barrage township, (25) Domjur, (26) Adra, (27) English Bazar, (28) Balurghat, (29) Rayganj, (30) Mainaguri, (31) Alipur Duar and (32) Koch Bihar.

STANDARD URBAN AREA

The concept of standard urban area was developed at the 1971 Census and it connotes territories contiguous to an urban core which are likely to be urbanised in the next twenty years or so. It may be said to be the projected growth area of a city or town, the urban core, as in 1991. It comprises of towns and villages, which are already or likely to be under the intensive influence of the core town or city and also the intervening areas which are potentially urban. The standard urban Area thus contains all the urbanisable areas centring round the present city or town. Twenty Standard Urban Areas were demarcated in the State of West Bengal in 1971 Census and in 1981 Census the delineation of Standard Urban Areas are limited to twenty-one.

SCOPE OF TOWN DIRECTORY

We have already told that the Town Directory has been prepared for all the statutory towns like, Municipal Corporations (MC), Municipalities (M), Notified Areas (NA), Town Committees (TC) and cantonment areas as well as the non-statutory Census Towns (NM) including the out-growths. The particulars of each town have been presented in seven statements dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or recognised slums of the town having a population of 50,000 or more. The towns having outgrowths has been identified with the asterisk (*) mark and information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column. The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1 Population one lakh & above	Class I
2 Population from 50,000 to 99,999	Class II
3 Population from 20,000 to 49,999	Class III

4 Populaton from 10,000 to 19,999	Class IV
5 Population from 5,000 to 9,999	Class V
6 Population below 5,000	Class VI

A brief discussion on seven statements is given below :

STATEMENT I

This statement provides some basic data based on the primary census Abstract. It deals with the status and growth history of the town. The column nos. 1 to 5 give information on class, civic status, name of the town and its location code with the Police Station town belongs to. The area of the town in sq. kilometer has also been given. The col. no. 6 to 19 give demographic information of the town. Where the town did not have any urban status for the reference year(s), a 'dash' (—) has been given under the respective column(s). The decadal growth in percentage has been shown below the population figures from col. nos. 8 to 15. In case of statutory towns, the status has been fixed as on April 1980.

STATEMENT II

This statement deals with the physical aspects and location of the town as on April 1980. The statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns In that case the information noted from the nearest place where *it is available. This alternative, however, could not be followed* uniformly due to the fact that the data are not available for the nearest place even. In such cases information "Not available" (NA) has been noted. In the second part *i.e.* in column nos. 6 to 12 the locational particulars have been stated for the referrent town.

STATEMENT III

Data on municipal finances for the year 1978-79 have been presented relating to the civic administration of the statutory bodies The information in respect of the non-municipal census towns have also been collected whereever available and have been shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census towns having no information has been marked with information "Not available" (NA). The "other sources" in receipts side and "others" in Expenditure side *i.e.* the col. nos. 9 & 16 could not be specified for some of the towns as the sufficient information are not available. This statement contains 17 columns.

STATEMENT IV

The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referrent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referrent town gets services has been given. In absence of any of the public amenities as referred to in col. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

STATEMENT IV A

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in class I and class II towns only. The civic and other amenities that are being availble to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum where it is available.

STATEMENT V

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, semi-Government local bodies, charitable institutions, social service agencies like missionaries etc. have been counted. Where these facilities were not available, the distance of the nearest place where these facilities are available has been noted. The family planning centres attached to hospitals or Maternity and Child Welfare centres or primary Health centres have been treated as separate units. The maternity and child welfare centres, Veneral Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and indicated in "others" category of medical institutions.

While presenting the data on educational institutions, following systems were followed :

1. Primary or Elementary school—all nursery, kindergarten, pre-basic preprimary, Junior basic school upto Class V and primary school upto IV have been included in this category.

2. Junior secondary or Middle school (M)—All schools from Class V to class VIII including junior madrasa upto class VIII have been noted in this category.

3. Secondary school—all schools upto class X including schools providing senior cambridge course and high madrasa upto class X have been treated as high school.

4. Higher secondary/PUC—all educational institutions where the education is imparted for class XI and XII have been marked for this group.

While collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any competent authority and the specific classes of a school upto which the recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools with primary classes, the relevant groups of classes have been treated separately, *e.g.* a composite school having classes upto class XII (twelve) has been divided as follows :

Classes I to IV	Primary
,, V to VIII	Middle
,, IX and X	Secondary/Matriculation
,, XI and XII	HS/PUC

It is to be noted that by dint of the above kind of division we are not going by how many educational institutions physically exist within a town but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institutions they belong to. For example, the group marked as PUC, *i.e.* class XI and class XII may physically belong to a college, but for the purpose of the town directory, these two classes taken together has constituted one unit of PUC, the rest of the classes has been treated as a college. The column 6 also includes the instititions like teachers' training college, basic training college etc. The information on short hand, typewriting and other vocational training institutions have been given in col. 10. In this case only the recognised institutions have been considered. The "recognised" means by any statutory authority—like the education department, commerce department, labour department etc. of the Government or semi-government or autonomous bodies, public sector projects like municipality, corporation etc.

The vocational institutions like music/dancing school, Art college painting/clay modelling institutions etc. have also been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been covered by col. 15 under "others'. The cols. 17—20 deal with the recreational and cultural facilities of the town.

STATEMENT VI

The statement contains particulars of trade, commerce and industry of the town. It also depicts information on banking institutions, like banks, agricultural credit societies and non-agricultural credit societies,

The details of abbreviations used in different statements of Town Directory are given below :—

*Includes projected Figures of Assam.

One of the chief indicators of the degree of urbanisation is the percentage of urban population to the total population. Data relating to the growth of rural and urban population in India and the State of West Bengal since 1901 have been presented in Table I.

As compared to the all-India picture, the rural population of the State of West Bengal grew at a low rate for the decades 1901—1911, 1931—1941 and 1951—1961. For the decades 1941—51, 1961—71 and 1971—81 the state's growth of rural population is on the higher side.

As to the urban population of West Bengal, it is observed that in none of the decades it has shown any negative growth rates. In 1911, while state's urban growth rate registered 13.70 percent, only 0.35 per cent was registered in India. In 1921 there was a slight set back in proportion of urban population of state as compared to India and as compared to the previous decade of the state also. Again, in 1931 the urban growth rate of the state marked higher than the previous decade but still it registered a lower rate in all-India picture. The significant urban growth is observed in 1941 in West Bengal while the decadal variation registered as high as 63.69 percent which is much higher than the corresponding all-India rate. The reversal in the urbanisation trend in the state was observed in 1951 by falling of growth to 32.52 percent as compared to the all time high of the previous decade. This had again gone up to 35.97 in 1961 over the all-India rate of 26.41 per cent. The 1971 Census exhibits a lower growth in the state than 1961 by registering the urban proportion of population to the tune of 28.41 per cent and 38.23 percent at all-India level. The urban Population of West Bengal put up a growth rate to 31.73 percent during the current decade which is considerably a lower as for the growth of all-India population.

TABLE 2—PROPORTION OF URBAN POPULATION IN EACH STATE (ARRANGED IN DESCENDING ORDER OF PERCENTAGE OF URBAN POPULATION)

India/State	Total population	Urban population	Percentage of urban population to total population

*Includes projected figures of Assam where Census could not be held owing to disturbed conditions there.

†The population figures exclude population of area under unlawful occupation of Pakistan and China where Census could not be taken.

The porportion of urban population to the total population of each of the 22 states and a union Territories in India has been set out in Table 2. The states have been arranged in descending order of their proportion. Here the level of urbanisation has been determined by the percentage of urban population to total population during 1981. 23.31 percent of the total population of the country as a whole are town dwellers according to 1981 Census. This percentage worked out to 19.91 per cent in 1971 Census. Among the States in India, Maharashtra occupies the first position by holding 35.03 percent of its population in the urban sector. Maharashtra had toppled all the states in India in 1971 also by occupying 31.16 per cent urban population in the state. Next in order is Tamil Nadu with 32.95 per cent. Tamil Nadu had the similar position in 1971 with 26.69 percent urban population. Gujarat has kept its position in third place as in 1971 by yielding 31.10 per cent against 25.77 in 1971. Karnataka has moved up to the fourth rank from its fifth rank in 1971 by superseding West Bengal which occupied fourth place in 1971. In 1971, proportion of urban population in West Bengal and Karnataka was 24.45 and 22.33 percents respectively and in 1981 West Bengal has 26.47 percent urban population whereas Karnataka has increased its proportion to 28.89 per cent. The state with the lowest level of urbanisation is Himachal Pradesh with 7.61 per cent. In 1971 this state held 21st rank with the degree of urbanisation at 6.99 percent. Sikkim which occupied the lowest place in 1971 with 4.22 percent has elevated itself by six places a proportion of 16.15 in 1981.

TABLE 3—NEW TOWNS ADDED IN 1981 CENSUS

Sl. No.	Name with Status of the Town	Population

76	Sukdal (NM)	6,903
77	Uttar Bagdogra (NM)	8,708
78	Uttar Latabari (NM)	8,667

Although the state of West Bengal has come down to fifth rank during 1981 in the context of the degree of urbanisation, table 3 clearly exhibits that urbanisation in this state is on the increase. As many as 78 new places have been classified as towns for the first time in 1981 Census. Of them, 5 project towns viz. Bandel Thermal Power Project Town, Jaldhaha Hydel Power Project Town, Haringhata Dairy Farm, Kolaghat Thermal Power Project Town and Santaldih Thermal Power Project Town have been given the status of an urban area because of their possessing distinct urban characteristics though they may not satisfy all or any of the three conditions to be upgraded as urban units. Similar relaxation have been applied to Bakreswar Tourist Centre Township—a place of tourist attraction for religious performance, Digha Township—a tourist spot for sea beach and Srimantapur—a project town built up for Farrakka Barrage Township. All other census towns have fulfilled the rigorous application of criteria laid down in respect of the urban areas. The number of new town in 1971 was 43.

TABLE 4—TOWNS DECLASSIFIED IN 1981 CENSUS

Name with Status of the Town	Population
1	2
1 Haripal (NM)	8,445
2* Narayanpur (NM)	2,841

*Narayanpur was a Non-Municipal town in 1971 Census and in 1981 it has been an outgrowth of Panpur (NM).

If the census town loses any of the criteria to be treated as urban, it is generally lost its urban status. In 1981 Census, the 1971 Census town Haripal in the district of Hooghly has been declassified. Another census town of 1971, Narayanpur has lost the status of a census town in 1981 but it is remaining as outgrowth of Panpur Census town in the district of 24-Parganas.

TABLE 5—DISTRICT-WISE PROPORTION OF URBAN POPULATION IN DESCENDING ORDER

Name of District	Total population	Urban population	Percentage of Urban population to total population
1	2	3	4
1 Calcutta	3,305,006	3,305,006	100.00
2 Haora	2,966,861	1,338,793	45.12
3 Twenty Four Parganas	10,739,439	4,169,482	38.82
4 Hugli	3,557,306	1,050,529	29.53
5 Burddhaman	4,835,388	1,421,169	29.39
6 Darjiling	1,024,269	282,153	27.55
7 Nadia	2,964,253	639,869	21.59
8 Jalpaiguri	2,214,871	311,221	14.05
9 West Dinajpur	2,404,947	268,726	11.17
10 Murshidabad	3,697,552	346,018	9.36
11 Purulia	1,853,801	166,762	9.00
12 Medinipur	6,742,796	572,757	8.49
13 Birbhum	2,095,829	173,533	8.28
14 Bankura	2,374,815	181,247	7.63
15 Koch Bihar	1,771,643	122,260	6.90
16 Maldah	2,031,871	97,196	4.78

Table 5 has sub divided the entire state of West Bengal into its constituent districts and considered the rate of growth of urban population to total population in each district. A consideration of this table would show that when judged by the standard of percentage of urban to total population the city of Calcutta—as it should be—occupies the first position with 100% of its population being marked as urban. This was so in 1971 and earlier censuses also and there is nothing spectacular about it anymore. In this respect, the least urbanised district is Maldah which in 1981 has 4.78 per cent as the percentage figure of urban to total population against 4.22 per cent in 1971. Thus Maldah continues to be the least urbanised district both in 1971 and 1981.

While the city of Calcutta may be kept out of consideration for the simple fact that the entire district in the census terminology consists of urban areas only, it would be found that the next most urbanised district in 1981 is Haora. The district Haora had the significant proportion of urban population to total population in 1971 also and it occupied second rank in proportion of urban population in 1971. This district had the pride of covering 41.93 per cent and 45.12 per cent respectively as the percentage of urban to total population in 1971 and 1981. This stands to reason, for Haora with its industrial establishments and centres of trade and commerce is generally believed to be a highly urbanised area—at least that part of it which is contiguous to the city of Calcutta. There are two Class I cities in this district viz. Haora Municipal Corporation and Bally Municipality with a population of 744,429 and 147,735 respectively. Moreover, a sizeable portion of the urban area has been included with the Calcuta urban Agglomeration. Of the 107 constituent urban units and 37 out growths of Calcutta Urban Agglomeration, Haora has contributed 29 urban units including the two cities as stated above and 9 outgrowth covering a total population of 1,282,568.

Next in rank was and still is the district of Twentyfour Parganas with 35.15 per cent in 1971 and 38.82 per cent in 1981 of urban to total population. This district with a considerable industrial base is credited with a sizeable proportion of urban population. The district has the pride of having as many as 11 class one cities covering a population of 2,279,345 within the district out of 24 class one cities of the state, viz., (1) South Suburban, (2) Bhatpara, (3) Jadavpur, (4) Kamarhati, (5) South Dum Dum (6) Panihati, (7) Garden Reach, (8) Baranagar, (9) Naihati, (10) Barrakpur, (11) Titagarh. In addition to that there are four more urban agglomerations. in the district, viz., (1) Haora, (2) Rajpur, (3) Birlapur and (4) Kanyanagar with a total population of 2,53,393. Further, the district has added as many 56 urban units including the 11 cities as stated above and 20 out growths covering a total population of 3,581,983 to the Calcutta urban agglomeration.

The district Hugli has occupied next to twenty-four parganas in 1981 with 29.53 per cent urban population to total population. This district had the similar position in 1971 registering a figure of 26.47 per cent. At this moment there are three class one cities viz., (1) Hugli-Chinsurah, (2) Serampur and (3) Chandannagar in the district with the population of 358,147. 19 towns including 3 (three) cities as stated earlier and 7 (seven) outgrowths of the district have been included with the Calcutta urban Agglomeration.

The districts of Darjiling and Barddhaman have interchanged their positions. While Darjiling in 1971 was next to the rank of Hugli in ranking with 23.05 per cent, the district of Barddhaman was next to Darjiling accounting for 22.78 per cent in that year. In 1981, the district of Barddhaman has not only surpassed the figure of Darjiling but also has slightly forged of the district of Hugli by registering a figure of 29.39 percent. The same for Darjiling this time is 27.55 per cent. The district Barddhaman has around industrial base for which the degree of urbanisation has been raised significantly during this decade. The district is owning three class one cities—one is after the name of the district viz., Barddhaman and the others Durgapur and Asansol—both are big industrial chunks of the district as well as of the state. In addition to that the district has 8 urban agglomerations in all of which three have been classified as class one urban agglomerations. These are Asansol, Raniganj and Ondal—the notable industrial areas of the district. The remaining five are (1) Kulti, (2) Chittaranjan, (3) Dishergarh, (4) Katwa and (5) Niamatpur. While Kulti and Chittaranjan have been classified as class two urban agglomerations, Dishergarh and Katwa belong to class three and Niamatpur in class four urban agglomerations. All those class one cities and urban agglomerations have a total population of 1,315,505 according to 1981.

The western part of the state of West Bengal consisting the districts of Purulia, Bankura, Birbhum and part of Medinipur have improved just about marginally. These districts have that kind of geophysical features which has normally halted the urbanisation to a great extent and the degree of urbanisation in those districts seems to be at a low key.

The two south Bengal districts viz. Nadia and Murshidabad which are agriculturally prosperous as a typical part of the Gangetic plains, have maintained their individual proportion of growth of urban population. With a somewhat sharper increase, the degree of urbanisation in Nadia is moderate. Such increase in Nadia is partly due to the fact that at the southern most end of that district two urban units, viz. Kalyani notified Area and Gayeshpur Notified Area both of which have fallen within Calcutta Urban Agglomeration. Secondly, the 1981 Census resulted in identification of 4 new towns in Nadia and as many as 7 outgrowths, with the new towns accounting for a sizeable net urban population.

In North Bengal districts, the rate of growth of urbanisation—as indicated by the indication of percentage of urban to total population—has been of normal order by and large. The districts of Darjiling and Jalpaiguri are showing a relatively sharp increase in urbanisation. The figure of Jalpaiguri of 1971 was 9.60 per cent which increased to 14.05 per cent in 1981. This is some what a big jump. Similarly the decennial growth rate for the district of Jalpaiguri shows 84.91 per cent increase in urban population. The sharp increase in decennial growth rate of urban population in this district as well as increase in the percentage of urban population is explained by the fact that in 1981, four new towns—all non municipal and two outgrowths—which have come up in the district have contributed tremendously towards the urban population. In the background of a predominantly rural district like Jalpaiguri, the emergence of these four new towns and two outgrowths contributed a net addition of 106,386 of population in the urban sector has naturally inflated the percentage figures accordingly. This, however, does not necessarily mean that the district of Jalpaiguri has all on a sudden, become highly urbanised. It, on the other hand, goes to show that the emergence of some new towns coupled with a fairly high rate of growth of already existing urban areas have given the district Jalpaiguri a some what more urbanised look in pockets than it had before.

The relative sharp rise in the case of Darjiling district has apparently been caused by emergence of 3 new towns for the first time in 1981. These 3 towns taken together thus accounted for 23,279 urban population in the district. Further, the district has the pride of having one class one town viz. Siliguri Municipality which has grown at a very high rate, the rate of growth from 1971 to 1981 has been of the order of 58.36 per cent resulting in a total population of 154,378 in Siliguri Municipality itself.

The other three districts of North Bengal, have maintained a rate of growth as can be expected of predominantly agricultural areas. Even among them, however, the district of West Dinajpur is slightly way ahead of the districts of Maldah and Koch Bihar.

TABLE 6—DISTRIBUTION OF TOWNS BY POPULATION SIZE—*1971* AND *1981* CENSUS

Size Class of Town	Number of towns in 1971	1971 Population	Percentage of population of this Category of towns to total urban population	No. of towns in 1981	1981 population	Percentage of population of this Category of towns to total urban population
1	2	3	4	5	6	7
I	15	6,021,965	54.91	24	8,037,309	55.63
II	31	2,125,395	19.38	40	2,905,113	20.11
III	49	1,517,674	13.84	52	1,631,120	11.29
IV	60	824,642	7.52	92	1,314,159	9.10
V	59	440,935	4.02	63	489,567	3.39
VI	9	36,422	0.33	20	69,453	0.48
Total	**223**	**10,967,033**	**100.00**	**291**	**14,446,721**	**100.00**

The Table 6 brings to focus how the urban units of different classes have changed in number over the decade 1971—1981 and how the population in each class of urban units has increased over the same period and what kind of percent variation has the later produced. In dealing with the contents of this table it will also be discussed how the urban units of different size classes have shifted their respective positions over 1971—1981. In 1971, there were 15 Class I towns; in 1981, there are 24 towns belonging to this class. Of them, as many as 8 towns have shifted themselves to this class by dint of crossing minimum population figure, while 1 town is Bally Municipality which was enumerated along with Haora Municipal Corporation in 1971. In 1981 however, Bally Municipality which was enumerated along with Haora Municipal Corporation in 1971. In 1981 however, Bally Municipality has been considered as a separate census entity in accordance with the prevailing situation. Hence, Bally has emerged as a town—and a town of Class I in 1981 Census. Of the 8 urban units that moved up to Class I in 1981, 7 belonged to Class II and I to Class IV in 1971. The last one refers to Jadavpur municipality which did not exist as a municipality in 1971. This Municipality was created just before the 1981 Census through a merger of 10 non-municipal towns. Jadavpur Non-municipal town was one of those 10 non-municipal towns belonged to class IV in 1971. With the creation of this municipaliy, the total population crossed one lakh mark and thus Jadavpur moved up itself from Class IV in 1971 to Class I in 1981. In the case of other 7 class II towns of 1971, Barrackpur, Titagarh, Naihati, Siliguri and Nabadwip had been covering near one lakh mark in 1971 itself and the crossing of the said mark by the remaining two towns, viz. Balurghat and Chandannagar which had a population of 67,088 and 75,238 in 1971 respectively are somewhat remarkable.

There were 31 towns in class II in 1971 and there are 40 this time. We have already given an account that as many 7 class II towns of 1971 moved up to class I in 1981. So there is a net inclusion of 16 towns in Class II. Of them, 14 towns joined this class on promotion from Class III and 2 towns got themselves put in this class independently afresh. The later two towns are Kharagpur Railway Settlement— a non-municipal town—in the district Medinipur and Dabgram—another non-municipal town in Jalpaiguri district. In 1971, Kharagpur city was a conglomeration of (1) Kharagpur Municipality, (2) Kharagpur non-municipal town, (3) Kharagpur-II T, non-municipal town and Kharagpur Railway Settlement. In 1981, Kharagpur Railway Settlement stands on its own as an independent town and crossed the population mark of 50,000. In case of Dabgram, this mouza considered to be a rural area, in 1971 with a population of little over 38,000 as it could not qualify the criteria laid down for an urban area. In 1981, however Dabgram has qualified as an urban area and has registered as high a population as 76,402. These two towns have thus registered

there own lateral entry, into class II in 1981. The following class III towns of 1971 have earned their respective berths in Class II in 1981 by the dint of crossing the 50,000 Mark: Bhadreswar, Garulia, Bally Non-municipal town, Konnagar, Barasat, Ashoknagar-Kalyangarh, Ranaghat, Nangi, Chakdaha, Rayganj, Darjiling, Chittaranjan, Raniganj and Rajpur.

49 towns were put in Class III in 1971, we now have 52 towns in 1981 in this class From among those 49 towns, 2 towns viz. Kasba and Garfa have been merged with the newly formed Jadavpur Municipality, 14 towns have been included to Class II, 2 towns viz. Barrackpur Cantonment and Ondal have gone down to Class IV. Thus 31 towns of 1971 are still in Class III and there by 21 towns more have come to this class. Of these 21 towns 18 have come from Class IV, 1 each from Class V and VI and the town that obtained a lateral entry into Class III in 1981 is Bidhan Nagar Non-municipal town. Bidhan Nagar did not exist as an urban area in 1971. The following 18 towns have come from Class IV: Kalyani, Alipur Duar Railway Junction, Fort Gloster, Krishnapur, Chengail, Jhargram, Adra, Canning, Murshidabad, Dhupguri, Birlapur, Sainthia, Dubrajpur, Islampur, Gangarampur, Taherpur, Gayeshpur Govt. Colony, Diamond Harbour. The town which have joined Class III from Class V is Haldia, Phulia, a town that had only class VI status in 1971, has set up a unique case earning a promotion straightway to class III within a single decade.

Coming down to class IV, we find a sizeable increase in number. In 1971 we had 60 towns in the class. Of those 60, 5 towns viz. Bansdroni, Bademasar, Rajapur, Santoshpur and Jadavpur have been merged in Jadabpur Municipality and 18 already identified moved on to the next higher class. Offsetting these exclusions from Class IV, there are as many as 55 inclusions in this class in 1981. 32 of them are results of interclass shift and 23 are cases of fresh entry. Of the 32 mentioned above, 30 are cases of moving up from Class V to Class IV and 2 cases are already mentioned demoted towns from Class III to Class IV.

In 1971, Class V had 59 towns. Of them Kamdahari, Purba Putiari and Chakadaha got merged with Jadavpur Municipality. Kataganj-Gokulpur Govt. Colony merged with newly formed Gayeshpur Notified Area and Haripal ceased to be town. Thus 5 urban units left this class in 1981. 31 more towns also got excluded from this Class IV as a result of promotion from Class V to IV for 30 towns and from Class V to Class III for one town. As against these exclusions, inclusions range to 40. Of those 40, 2 are the cases of promotions from Class VI and the remaining 38 are cases of lateral entry. The promotions took place from Class VI in respect of Bandra and Podara.

Class VI was credited with the 9 towns in 1971. Of them, one town, viz. Narayanpur has lost its status as a town in 1981 and it is now an out growth. 2 Towns have moved up to class V and 1 town to class III. There are now 15 new entrants into this class.

From the above analysis we find that while 135 towns in all have retained their previous size class during the decade 1971—81, as many as 76 have moved from one class to another. Again, barring 2 cases of reversal, all the rest have moved to classes higher than their respective 1971 class. Of the two erstwhile towns one has been declassified and another has moved down to out growth. On the other hand, 78 new towns have come into existence this time. All these upgradation and new births of towns in 1981 signify a classic development in the growth of urbanisation in the state of West Bengal.

On the basis of the percentage of urban population to total population, it is the class I category which occupies the top position in 1971 and also in 1981. As to Class III category there has been a decrease during the decade in percentage to total population. The similar situation is observed in respect of the towns in Class V categories. Although the numerical strength of towns has been increased in both the categories of town in 1981 over 1971 but the proportion of urban population to total population is found to be down-graded. On the other hand, there are considerable increase of towns numerically in categories, I, II, IV and VI, but there is a very unimpres ible increase in proportion of urban population to total population.

TABLE 7(A)—DISTRIBUTION OF STATUTORY AND NON-STATUTORY TOWNS BY SIZE CLASS

Size Class of Towns	Total number of towns	Number of towns having statutory bodies	Number of non-municipal Census and Project towns
1	2	3	4
I	24	24	..
II	40	33	7
III	52	28	24
IV	92	14	78
V	63	4	59
VI	20	2	18
Total	**291**	**105**	**186**

The civic administration status of 291 towns of West Bengal has been reflected in Table 7(A). Of the 291 towns of West Ben al, 105 are administered by the statutory bodies. The remaining 186, what in census p..rlance, are census towns. All the Class I towns have the privilege of administered by statutory civic administration. As to Class II towns, 7 towns have no civic status and they are continuing as census towns. These are Kharagpur Railway Settlement in Medinipur, Dabgram in Jalpaiguri, Bally in Haora, Panchur and Nangi in Twenty-four parganas, Chittaranjan and Outer Burnpur in Barddhaman. Among them Kharagpur Railway Settlement and Chittaranjan are administered by Railway authorities and the other four have been covered under Panchayat. Of the 63 towns in size class V, only 4 towns have statutorily functioning bodies. They are Haldibari in Koch Bihar, Old Maldah in Maldah, Kharar and Kshirpai in Medinipur Only 2 towns in size Class VI are notified as statutory civic administration status. These towns are Mekhliganj and Tufanganj—both are in Koch Bihar. Mekhliganj Town Committee with 4534 inhabitants happens to be the smallest town served by the statutory body.

TABLE 7(B)—TOWN BY CIVIC STATUS

Size class of towns	Total number of towns	Number of towns having					
		Municipal Corporation	Municipality	Town Committee	Cantt. Board Committee	Notified town area authority	Others (specify each separately)
1	2	3	4	5	6	7	8
I	24	3	20	..	..	1	..
II	40	..	33	..	..	..	7
III	52	..	25	..	..	3	(NM) 24
IV	92	..	12	1	1	..	(NM) 78
V	63	..	3	1	..	..	(NM) 59
VI	20	..	..	2	..	..	(NM) 18
Total	**291**	**3**	**93**	**4**	**1**	**4**	**186**

Table 7(B) has subdivided the statutory towns into the nature of civic administration. Of the 105 statutory towns of West Bengal 3 have municipal corporations. They are Calcutta, Haora and Chandannagar. All these 3 towns are in the size class I. 93 towns have municipalities and the bulk of them has been in size class II. All the 4 Town Committees are located in the district Koch Bihar. Of them, Mathabhanga is in size class IV, Haldibari in size class V, Mekhliganj and Tufanganj in size class VI. Barrackpore Cantonment area in Twenty-four Parganas district is in size class IV. Of the 4 Notified Areas, Durgapur is in size class I and the other three viz., Kalyani Notified Area and Gayespur Notified Area in Nadia district and Sainthia Notified Area in Birbhum are in size class III.

Among the 186 non-municipal towns of the state, 5 towns i.e., Dabgram in Jalpaiguri, Kharagpur Railway Settlement in Medinipur, Chittaranjan in Barddhaman—all class II towns, Alipurduar Railway Junction in Jalpaiguri and Adra in Puruliya both Class III towns—are the railway colonies, There are 8 Townships in the state, all of which are Non-municipal. These are Bidhan Nagar Township in Twenty-four Parganas—a class III town, Farrakka Barrage Township in Murshidabad—a Class IV town, Sarakdih Nadiha (Sen Raleish Township), Jemari and Hindusthan Cables Town—all class V towns in Barddhaman, Haringhata Dairy Farm Town in Nadia —a class V town, Digha Township in Medinipur, Bakreswar Tourist Centre Township in Birbhum and Dum Dum Aerodrome Area in Twenty-Four Parganas. Bakreswar Tourist Centre Township with 186 inhabitants happens to be the smallest town in the state. Altogether 5 project towns are in the state. Of them, Haldia in Medinipur is a class III town, Bandel Thermal Power Project in Hugli, Kolaghat Thermal Power Project in Medinipur, Santaldih Thermal Power Project in Puruliya and Jaldhaka Hydel Power Project in Darjiling—all are class VI towns.

TABLE 8—DENSITY BY SIZE CLASS OF TOWNS 1981 CENSUS

Class of Town	Number of Towns	Density (Population (per sq. km.)
1	2	3
I	24	11,408
II	40	5,290
III	52	2,712
IV	92	2,579
V	63	2,221
VI	20	1,158
Total	**291**	**5,462**

NOTE :—Area figures calculated up to two places of decimals.

Density by sq. km. by size class of towns has been presented in Table 8. It is seen from the table that the density of the state as a whole is 5,462 per sq. km. Hence it may be noted that total urban area of the state is 2,645.10 sq. kms. The class I towns with a total area of 704.52 sq. kms. have the density as high as 11,408. The density in class II towns is 5.290 per sq. km. which is higher than the state average. The density in towns of all other size classes is much lower than the state average. The gap in density between the class I towns and the other size classes due to the reason that all the 24 class I towns of the state—are old towns except Durgapur. They record consequently a higher density. All the class I towns of the state have a tremendous population pressure due to the fact that these are the centre of administration, trade and commerce and industries. They are holding the key position in the state's economy, so they are populated densely than the towns of other size classes.

TABLE 9—SEX RATIO BY SIZE CLASS OF TOWNS, 1981 CENSUS

Class of towns	Number of Towns	Sex-ratio (Number of females per thousand males).
1	2	3
I	24	774
II	40	874
III	52	902
IV	92	869
V	63	867
VI	20	803
Total	**291**	**819**

The table 9 presents data relating to the proportion of the female population per thousand male as distributed in each size class of towns. While the sex ratio for the entire urban area of the state is 819 females per 1,000 males, it is as low as 774 for the class I towns as a whole. Among the class III towns the sex ratio is highest—there are 902 females per 1,000 males. It may be seen that the towns in class II, III, IV & V have higher sex ratio than the state urban, whereas the towns in size class I and VI have the less proportion of females per 1,000 males.

TABLE 10—AVERAGE NUMBER OF HOUSEHOLDS PER CENSUS HOUSE BY SIZE-CLASS OF TOWNS, 1981 CENSUS

Size class of towns	Number of towns	Average number of households per census house
1	2	3
I	24	1.02
II	40	1.01
III	52	1.02
IV	92	1.01
V	63	1.01
VI	20	1.01
Total	**291**	**1.02**

The average number of households per census house according to the size class of towns have been worked out in table 10. It is seen that the average number of households per census house is 1.02 in the entire urban of the state. The average number of households per census house is worked out to 1.02 for the towns in size class I and III. As to the towns in other size classes the household size is below the state average for urban.

TABLE 11—RAIN-FALL AND TEMPERATURE AT DISTRICT HEADQUARTERS TOWN

	Name of District	Name of the District Head Quarters Town	Average Annual Rain-fall (mm)	Temperature (c)	
				Maximum	Minimum
	1	2	3	4	5

2	Jalpaiguri . . .	Jalpaiguri	3130	36.3	7.2
3	Darjiling . . .	Darjiling	2496.3	17	9
4	West Dinajpur . .	Balurghat	632.3	30	262
5	Maldah . . .	English Bazar	1683.5	44.0	8.6
6	Murshidabad . .	Baharampur	1171.70	39	19
7	Nadia	Krishnanagar	1499	31	9.09
8	Twentyfour Parganas .	Alipur (Calcutta)	1321.1	37.8	14.7
9	Calcutta . . .	Calcutta	1321.1	37.8	14.7
10	Haora . . .	Haora	1586.38	31.91	22.10
11	Hugli	Chinsurah	1043.7	44	7.1
12	Medinipur . . .	Medinipur	996.40	44.5	8.5
13	Bankura . . .	Bankura	1320.32	44.03	8.13
14	Puruliya . . .	Puruliya	1217	46.6	7.8
15	Barddhaman . .	Barddhaman	1403.9	42.7	8.8
16	Birbhum . . .	Suri	1187	44.6	8.6

The climatological information has been depicted in Table-II. The data relate to the average annual rainfall in milimeter and the maximum-minimum temperature in centigrade for the year 1979 of the district headquarters town of the 16 districts have been depicted in this table. It would appear from the above table that there is a wide gap in average annual rainfall among the districts.

While in West Dinajpur, the annual rainfall had been recorded as 632.3 m.m., Koch Bihar had the five times more with 3282 m.m. Among the districts, Koch Bihar had the highest rainfall in 1979 followed by Jalpaiguri and Darjiling. All the three districts have dense forest areas which influence the rainfall to a larger extent. There are only two districts viz. West Dinajpur and Medinipur those received an annual rainfall of less than 1000. m.m Regarding temperature—maximum-minimum, these have been collected from the local officials of the districts, so, there should be some reservations as they deserve so before accepting the same.

TABLE 12 (A)—DISTANCE OF TOWNS FROM THE NEAREST CITY

Note :—The information of 5 towns, viz. Domohani, Mainaguri, Mal, Odlabari, Uttar Latabari—all in Jalpaiguri District—are not available.

The city exerts considerable influence in various spheres of life in the urban area that surrounds it. Proximity of town to a city is one of the important and major factors in the growth of the town. It is seen frequently that the surrounding towns enjoyed better facilities offered by the city close by. Table 12A provides data in respect of the proximity of towns by their size class to the cities.

Of the 291 towns of the state, the information on distance of towns from nearest city have been received from 286 towns. The information from five towns viz. Domohani, Mayanaguri, Mal, Odlabari and Uttar Latabari—all in Jalpaiguri district—are not available. There are 84 towns which lie very close to the cities by virtue of their physical proximity. Of these 84 towns 15 belong to Class I, 17 belong to Class II, 10 in size Class III, 22 in size Class IV, 17 in size class V and only 3 in size class VI. The 15 class I towns which are in close proximity to the cities are within the Calcutta Urban Agglomeration.

The towns in the range of 11—25 kms. are also 83. Among them 2 are in the size class of I and are constituents of the Calcutta Urban Agglomeration. 9 towns belong to Class II, 9 to class III, 31 to class IV, 24 to class V and 8 to class VI. Thus altogether 167 towns are located within a distance of 25 kms. of the cities. Of the remaining 119 towns, 37 in the range of 26—50 kms, 46 towns in 51—100 kms and 36 in more than 100 kms. Of the 37 towns in the distance range of 26-50 kms, only one town in the size class I. This is Durgapur Notified Area. The nearest city is located outside the state of West Bengal in respect of the three towns. Among them, one is viz. Balurghat in the size class I and Balarampur and Jhalda are in the size class IV. The former one is located in the distance range of 100 Kms. plus and later two in the distance range of 51—100 kms.

The proximity of the towns to the district headquarters are available in table 12(B) at a glance. It may be noted that all the headquarters of the 16 districts of the state are towns and so that the distance is reckoned as zero and as such they have been accounted for within 10 kms. out of 16 districts, 10 districts have no other town within 10 kms. except the district hqrs. itself. Six districts have 16 towns within a range of 10 kms. excluding the district hqrs. and the districts hqrs. Alipore has as many as 6 other towns leaving the hqrs itself within the said limits. It may be observed that maximum number of towns are situated within a radius of 11—25 kms. from their respective district hqrs. 36 such towns which is the largest number in this distance range have been grown up centering Alipur. The second largest number is 23 in centering Haora district head quarters. Chinsurah district hqrs. has the third largest number of towns in the same distance range. Almost all the towns in the distance range 11—25 kms. from the district hqrs. Alipur, Haora and Chinsurah are contiguous to each other and are constituent units of Calcutta Urban Agglomeration. Only one town from the district hqrs. Chinsurah and four towns each from the district hqrs. Alipore and Haora are beyond the limits of Calcutta Urban agglomerations.

In the distance range 26—50 kms. as many as 73 towns have been located from their district hqrs. Again, the largest no of towns has been built up in this range from the district hqrs Alipour. Once again, this may be mentioned here that most of the 25 towns in this range from district hqrs. Alipur are the constituent units of Calcutta Urban Agglomeration. Two interesting features in the distance range of 51—100 kms. are, 24 towns are away from their district hqrs. Barddhaman and 10 towns are away from their district hqrs. Medinipur. These have created no. of clusters of towns and have also formed number of urban agglomerations. Another important feature is noteworthy that 20 towns in the distance range 100 kms. above from the district hqrs. Barddhaman though located in a farthest distance from their respective district hqrs., a considerable no. of them have formed urban agglomerations. The town from their district hqrs. Barddhaman in the distance ranges 51—100 kms. and 100 kms. above are mostly situated in the Raniganj-Durgapur-Asansol industrial belt.

TABLE 13 (A)—TOWNS NOT CONNECTED BY RAIL

Distance from the nearest Rail Heads	No. of Towns
Up to 1—Km.	59
2—5 Kms.	65
6—10 Kms.	20
11—15 Kms.	4
16—25 Kms.	7
26 Kms. above	15

The table 13A presents data about towns not having any Railway station in the proximity of their boundaries. Network of railway is one of the dominant factors in the growth of urbanisation in a particular region due to the fact that the industries and commerce developed on a faster way if the railway communications serve the area properly and thus the entire economic structure is changed which lead to the rapid urbanisation. From the point of railway system, West Bengal has always been the excellent network of railways from hill station Darjiling in extreme north to the extreme south of Medinipur and east to west covering all the districts of the state. Of the 291 towns of the state, 121 towns have the railway facilities within their urban limits and 59 towns have a railheads within 1 km. only. As many as 65 towns are availing the railway within 2—5 kms. in the proximity of their boundaries. Only 26 towns of the state have the railway heads beyond 11 kms.

TABLE 13(B)—TOWNS NOT CONNECTED BY BUS-ROUTE

16—25 Kms.	Nil
26+ Kms.	1. Jaldhaka Hydel Power Project town (NM) 3,533

The 46 such towns in the state which are not connected by bus route. For 21 towns, the distance from the nearest bus route is up to 1 km. only and the towns located at a distance of 2 5 kms. from the nearest bus route are 20. Of the towns which are not connected by bus route, 3 of them belong to class II, 5 belong to class III, 16 to Class IV, 16 to Class V and 6 to class VI. Of the 107 statutory towns, only one viz. Birnagar Municipality is not connected by bus route. The town is situated at a distance of 6—10 kms. from the nearest bus route.

The Table 13(C) gives the list of towns having navigable rivers or canal within 10 kms. There are as many as 170 towns in the state which have the navigable rivers or canals close to the town or within 10 kms. of the town. The Ganga or Bhagirathi or Hooghly river is approching 112 towns in the state by touching the town or the towns located within 10 kms. It may be clarified here that the river Bhagirathi or Hooghly is the local name of the river Ganga within which these are flowing. In the table 13(C) the local name of the river as reported by the competent authority has been used. The river Ganga or Bhagirathi or Hooghly has a very high importance as compared to the network of roadways and railways. Two seaports of international repute are located on the river Hooghly. Of them, Calcutta is a very old seaport of the state of West Bengal with a vast area as its hinter-land. A large number of towns and cities are in its proximity. Another seaport in the state is Haldia. It is a fast developing deep seaport in eastern region of the country. The vessels from abroad come to these ports with full of merchandise and leave with the export goods

Table 14 indicates the per capita receipt and expenditure by size class of towns and civic status.

Of the 290 towns (excluding Barrackpur Cantonment), the data on receipts and expenditures have been received from 203 towns. Of the 87 defaulting towns, 85 have the non-municipal status and the remaining 2 viz. Jadavpur municipality and Habra municipality belonging to class I and Class II towns. While calculating the per capita receipts and expenditures the population of 85 defaulting towns and out growths of Balurghat, Singur and Kauyanagar towns have not been taken into consideration. Taking all the urban areas of the state together the per capita total receipts work out to Rs. 45.83. The per capita receipts from taxes is Rs. 18.06 only against Rs. 27.77 from all other sources. The per capita expenditure of all the 203 towns has been worked out too. The per capita total expenditure stands Rs. 41.00 and the per capita expenditure is found highest in public health and convenience. In all size classes of towns the per capita receipts are higher than the per capita expenditure.

It is evident from the table that the per capita receipts and expenditure are highest in the town group of class I and the lowest in the town group of Class V. The data reveals the trends of per capita receipts and as well as per capita expenditure in a decreasing manner among size classes I to V and the wide variation is observed in the town group of Class VI in comparison to class IV and class V. The per capita receipts of class VI towns has been accounted to Rs. 24.82 against the per capita expenditure of 15.60. All the size classes except class I are below the state averages of per capita receipts and expenditure.

TABLE 15—ROAD LENGTH BY AREA AND POPULATION

Size class of Town	Per 100 Sq. Km.			Per 1000 population.		
	Pucca Road Length	Kutcha Road Length	Total Road Length	Pucca Road Length	Kutcha Road Length	Total Road Length
1	2	3	4	5	6	7
I	473.75	133.22	606.97	0.42	0.11	0.53
II	446.82	200.36	644.50	0.85	0.38	1.22
III	317.86	177.52	485.87	1.19	0.67	1.83
IV	178.63	202.74	381.37	0.71	0.81	1.52
V	223.12	219.34	442.46	1.05	1.03	2.08
VI	207.82	109.95	317.77	1.75	0.92	2.67
Total	**347.81**	**175.75**	**525.02**	**0.64**	**0.32**	**0.96**

The road length by area and population can be studied with the help of Table 15. The two parameters viz. road length per 100 sq. kms. and road length per 1000 population of the towns have been adopted for comparative study in various size classes of towns. The data on road length has not been available from 13 non-municipal towns of the state. Of them, 2 towns belong to class III, 4 belong to class IV, 5 in class V and 2 in class VI. One class II and one class III towns viz. Nangi (NM) and Canning (NM) could not furnish the road length data in pucca and kutcha separately. The average road length per 100 sq. km. of the entire urban area of the state would work out to 525 02 kms. The break-up of pucca and kutcha road per 100 sq. kms. area has been depicted as 347.81 kms. and 175.75 kms.

The data i.e. road length by 100 population reveals that the average road length per mille is 0.96 kms. in the case of entire urban area of the state. If it is considered in pucca and kutcha roads separately it will be seen that 0.64 kms. of pucca roads for every 1000 population in urban areas of West Bengal where as it is just half of the pucca road i.e. 0.32 kms. in case of kutcha roads. Of the 277 towns (leaving 13 towns from where no data is available and Barrackpur Cantonment) in West Bengal, Calcutta, the capital city, has a network of 860 kms. roads, the average road length per mille of its inhabitants comes to 0.25 only. At the other extreme, Durgapur a class I city leads with 2.16 kms. for every thousand urban inhabitants.

TABLE 16(A)—DISTRIBUTION OF TOWNS BY TYPE OF SEWERAGE AND SIZE CLASS OF TOWN

Type of Sewerage/drainage	Size class of Towns					
	I	II	III	IV	V	VI
1	2	3	4	5	6	7
S . . .	9	4	4	4	..	..
OSD . . .	22	34	44	61	44	11
BSD . . .	8	7	3	1	1	..
PT . . .	..	..	..	..	3	2
CD . . .	..	..	2	..	..	..
NIL . . .	..	2	6	29	18	8

There are various types of sewerage and drainage system in different towns of the state and the data have been collected from 290 towns of the state and have been presented in table 16(A). One town for which the data has not been collected is Barrackpore Cantonment as it is strictly a military area. Those towns have more than one system of drainage, they have been counted seperately for each system. Out of 290 towns from which the information have been collected 216 of them have open surface drains. Only 21 towns have the system of sewers. Out of these towns, nine towns are in size-class of I and four town each come under class II, III and IV, 63 towns have no system of disposal. 60 of them belong to the status of non-municipal towns and the remaining 3 are statutory towns viz. Haldibari (TC), Tufanganj (TC) and Mekligang (TC)- all are in the district of Koch Bihar. The city of Calcutta is served by the underground sewerage as a pre-dominant system of the disposal of waste. But a portion of the city area is served by Box surface drains in absence of sewerage.

The towns having sewerage in a portion followed by open surface drains are—Asansol, Balurghat, Bhatpara, Haora, Serampore, South Dum-Dum, Titagarh, Duragapur—all class I, Uttarpara-Kotrung and Ranaghat—both in class II, Burnpur and Haldia in class III and Kolaghat, Kurseong and Lalgola in Class IV. 180 towns are being served by open surface drains as a single system of disposal 1.36 towns have the system of open surface drains in combination with other methods. Of the 237 towns from which the information are available, the system of open surface drains in 216 towns is prevalent independently or in combination with other methods of disposal.

TABLE 16 (B) LATRINES BY TYPE AND SIZE CLASS OF TOWNS

Size class of towns	Total Number of towns	Percentage distribution of			
		Water borne Latrines	Service Latrines	Others	Number of towns for which Information not available
1	2	3	4	5	6
I	24	48.35	35.36	16.29	1
II	40	33.46	40.30	26.24	1
III	52	32.34	26.16	41.50	2
IV	92	33.54	26.57	39.89	11
V	63	33.43	17.48	49.08	6
VI	20	43.37	15.03	41.60	2
Total	**291**	**38.12**	**33.62**	**28.26**	**23**

The Table 16(B) presents the distribution of towns by size class and the type of latrines they have. It is noticeable that the percentage of water borne latrines to total latrines of the urban area of the state is 38.12. The water borne latrines are connected to the septic tanks. In places served by sewerage system the latrines are connected to the sewerage. The proportion of service type latrines is much higher in class II towns as compared to other towns in different classes. The percentage of service latrines in class II towns is 40.30 against the state urban average of 33.62. The information from 23 towns is not available. The class I town which could not supply the account of type of latrines it possesses is South Suburban Municipality.

TABLE 16(G)—DISTRIBUTION OF TOWNS BY METHOD OF DISPOSAL OF NIGHT SOIL AND SIZE CLASS OF TOWNS

Method of disposal of night Soil	Size class of towns					
	I	II	III	IV	V	VI
HL	10	16	20	50	32	8
B	4	3	7	6	5	1
WB	14	26	14	9	4	2
ST	14	19	31	57	46	14
S	3	2	5	4	..	..
NA	1	1	..	6	7	3

The Table 16(c) presents the distribution of towns by their method of disposal of night soil. Leaving 18 towns who were failed to supply the information on disposal of night soil, all the 272 towns (except Barrakpur Cantonment) have the system of scavenging. The towns with more than one method of disposal, they have been counted separately. There are 136 towns in the state in which the night soil is carried as head loads only. Among them, the Koch Bihar Municipality—a class II and district hqrs. town is a noteworthy. Only 14 towns in the state who have the distinction of having the system of sewers for disposal of night soil. Two towns viz, Chittaranjan and Bidhan Nagar Towanship have the exclusive system of sewers. Headload method for disposal is prevalent in 10 class I towns. The similar method of disposal is also found in 16 class II towns, 20 class III towns, 50 in class IV, 32 in class V and 8 in class VI. It would be seen that in 136 towns, the night soil is removed on headload as a single method or in combination with other systems. The solitary class I town who could not supply the information is South Suburban Municipality.

TABLE 17(A) PROTECTED WATER SUPPLY BY SIZE-CLASS OF TOWNS

Size class of towns	Total No. of towns	Distribution of towns by the most common source of protected water Supply			
		T	TW	W	TK
1	2	3	4	5	6
I	24	24	..	..	..
II	40	38	2	..	..
III	52	40	12	..	..
IV	92	46	43	2	..
V	63	23	36	2	2
VI	20	9	9	2	..
Total	**291**	**180**	**102**	**6**	**2**

A picture regarding provision of protected water supply to the urban areas has been depicted in table 17A. The piped water facilities are available to 180 towns whereas the supply of protected water from tubewells is available to 102 towns. The supply of piped water as a single system is found in 29 towns only. There are 151 towns in the state where the piped water followed by the second common system of drinking water are supplied. It is interesting to point out that 77 towns of the state are depending fully on Tubewells for drinking water. All the class I towns of the state have the facility of piped water.

TABLE 17(B)—SYSTEM OF STORAGE OF WATER SUPPLY BY SIZE-CLASS OF TOWNS

Size class of Towns	Total number of towns	Distribution of towns by the most common Source of water storage system				
		OHT	SR	IG	BWP	NA
I	24	22	1	1	..	..
II	40	31	2	2	2	1
III	52	33	3	..	1	3
IV	92	36	2	1	..	7
V	63	18	1	2	..	2
VI	20	8	1	..	..	..
Total	**291**	**148**	**10**	**6**	**3**	**13**

The system of storage of water by size class of towns have been provided in Table 17(B). We have already furnished in table 17(A) that altogether 180 towns have the facility of tap water as a single source or in combination with other sources. The systems of storage of water have been collected from those 180 towns having the facility of piped water. It is seen from the table that the information on this aspect could not be furnished by 13 towns although they provide piped water in the respective urban areas. Of the remaining 167 towns, in 148 towns, overhead tank is the most common system of the storage of water. The service reservoirs have been placed in 10 towns exclusively.

TABLE 18(A)—FIRE FIGHTING SERVICES BY SIZE-CLASS OF TOWNS

Size Class of town	Total number of Towns	Number of towns where service is	
		available	not available
1	2	3	4
I	24	18	6
II	40	28	12
III	52	10	42
IV	92	7	84
V	63	2	61
VI	20	1	19
Total	**291**	**66**	**224**

*Information of Barrackpur Cantonment has not been furnished.

According to the information furnished in table 18(a), only 66 towns of the state have fire fighting service. Among the class I towns, only 18 towns have been covered by this service. The class I towns which are lacking the facility are Baranagar, Garden Reach, Jadavpur, Kamarhati, Titagarh—all in the district of Twentyfour Parganas and Nabadwip in the district of Nadia. All the district headquarters towns have this facility except Medinipur. The distt hqrs. town Medinipur is provided with such facility from Kharagpur Town of the same district located at a distance of 13 kms.

TABLE 18(B)—AVAILABILITY OF FIRE FIGHTING SERVICE OF OTHER PLACES BY TOWNS NOT HAVING IT

Size Class of towns	Total No. of Towns	Number of towns where fire fighting Service is not available and available at distance of				
		—5 Kms.	6-10 Kms.	11-20 Kms.	21+Kms.	Total (Col. 3-6)
1	2	3	4	5	6	7
I	24	5	..	1	..	6
II	40	4	2	3	3	12
III	52	8	2	11	21	42
IV	92	9	11	29	35	84
V	63	15	12	16	18	61
VI	20	3	1	7	8	19
Total	**291**	**44**	**28**	**67**	**85**	**224**

The towns not having the amenity of fire fighting services but they are served by other towns located at different distances have been put in table 18(B). The class I towns numbering 5 without fire fighting service avail the facility within a distance range of 5 km. Among them, Jadavpur, Garden Reach and Baranagar are served by the fire fighting services from Calcutta. Another 2 towns, viz. Kamarhati and Titagarh avail this facility from Panihati and Barrackpur respectively which are situated at a distance of 2 kms. only. one class I town viz. Nabadwip is served by its district hqrs. Krishnanagar located at a distance of 12 kms. 67 towns are situated in the distance range of 11.20 kms away from the places where the fire fighting services are available. Again, there are 85 towns in the state which are situated at a distance of 21 kms. or more from the places having fire fighting service.

TABLE 19—TOWNS NOT PROVIDING ELECTRICITY FOR DOMESTIC CONSUMPTION

Sl. No.	District	Name and status of the town	Population
1	2	3	4
1	Murshidabad	Paschimpunro Para (NM)	17,576
2	,,	Srimartapur (NM)	2,367
3	Haora	Banitabla (NM)	8,979
4	,,	Bipra Noapara (NM)	6,171
5	,,	Manikpur (NM)	14,873
6	,,	Raghudebbati (NM)	7,400
7	,,	Sarenga (NM)	17,141
8	Barddhaman	Sitalpur (NM)	12,045
9	,,	Nimeha (NM)	2,329

A mere glimpse of the table refers that the 11 towns have no electricity for domestic consumption. The information from 15 towns whether they are provided with the electricity for domestic consumption or not has not been available. Of the 9 towns, who are deprived of the facility, 4 are in class IV, 3 in class V and 2 in class VI. All of them have the status of non-municipality.

TABLE 20(A)—TOWNS HAVING SLUMS

Class of towns	Towns	Total No, of towns	No. of towns having slums	No. of slums
1		2	3	4
I		24	12	1,225
II		40	12	123
Total		**64**	**24**	**1,348**

Table 20(A) has been prepared from the information collected in statement IVA which deals with the slums in Class I & Class II towns. Of the 24 class I towns of the state of West Bengal, 7 towns have no notified or recognised slums at all as reported by the competent authorities. The information from 5 towns have not been received. The remaining towns numbering 12 have slums to the extent of 1225. The city of Calcutta alone has 1015 slums. The second place goes to Kharagpur Municipality having 117 slums. The municipal corporation of Haora-the second city of the state—have 26 slums. The remaining 67 slums are spread over 9 towns.

Among the class II towns of the state, 19 towns have no slums, the information from 9 towns were not available and the details received from 12 towns covering 123 slums. Of the 123 slums, the largest no. of slums has been concentrated in Garulia Municipality. In Garulia municipality, 44 slums have been found.

TABLE 20(B)—PROPORTION OF SLUM POPULATION IN TOWNS HAVING SLUM AREAS

Class of towns	Name of Towns	Population of of towns	Popultion of of slums	Proportion of slum population to total population of the town	Total area of slums. in sq. Kms.	Density in slums per sq. Km.
1	2	3	4	5	6	7
I	Asansol	187,039	90,000	48.12	7.77	11,583
	Bally	147,735	40,000	27.08	1.50	26,667
	Baranagar	170,343	40,000	23.48	1.40	28,571
	Calcutta	3,305,006	1,000,000	30.26	6.14	162,866

	Konnagar	51,211	14,000	27.34	0.12	116,667
	Medinipur	86,118	10,000	11.61	2.0	5,000
	Raiganj	60,343	3,560	5.90	1.22	2,918
	Rishra	81,001	55,807	68.90	NA	..
	Santipur	82,980	1,500	1.81	NA	..
	Uttarpara Kotrung	79,598	300	0.38	Negligible	..
	Sub-Total	873,269	250,056	28.63	14.12	9,200
	Total	**5,683,574**	**1,610,536**	**28.34**	**86.82**	**17,166**

Table 20(B) reflects the proportion of slum population to total population of the town and the density of slum population per sq. km. Although there are 26 slums in Haora Municipal Corporation, but the population of slums had not been assessed by the competent authority. The slum population in respect of Haora, Kamarhati and Titagarh towns were not available. The areas of slums located in Haora, Bankura, Garulia, Rishra and Santipur were not available. On the other hand, the areas of slums in Panihati and Uttarpara-Kotrung are negligible. The proportion of slum population and the density in slums, per sq. kms. have been worked out fo. each town having inforatmtion. The towns having no information on slum population or area of slums have not been taken into account while computing proportion of slum population to total population and density in slum population.

It is seen from the table that 28 28 per cent and 28 63 percent of the total population of class I and class II towns live in slums against 28.34 percent of the total population of class I and class II towns. Asansol towr has the highest proportion of slum population among the class I towns and Durgapur Town ranks second. Both the towns are located in the industrial belt of Barddhaman district. The density of slum population per sq. kilometer has been worked out too. Among the class I towns, Calcutta has the highest density of slum population by constituting 162866 persons. Next comes to Chandannagar which constitute 40789 slum population per sq. km. Among the class I towns the average density of slum population stands as 18714 against the state average of 17166. The highest density in class II towns is observed in Konnagar. Konnagar has a density of 116667 population per sq. kms.

TABLE 20(C)—AVAILABILITY OF CIVIC SERVICES IN SLUM AREAS

Class of towns	No. of towns having slums	No. of slums	No. of slums having			
			Paved roads	Community Latrines (with number)	Tap Points and Public hydrants (with number)	Road lighting Points (with number)
1	2	3	4	5	6	7
I	12	1,225	1,195	142 (27,328)	180 (15,574)	178(1,707)
II	12	123	111	17 (9)	84(597)	45(825)
Total	**24**	**1,348**	**1,306**	**159(27,337)**	**264(16.171)**	**223(2,532)**

NOTE :—There are road lighting points in 132 slums in calcutta, but the no of Points in those slums are not availale. The road lighting points numbering 1707 in bracket against class-I are meant for 46 slums only.

Availability of civic services in slum areas have been presented in table 20(C) of the 1225 slums in class I twons, the paved roads exist in 1195 slums. The slums in Calcutta, Panihati and South Subarban have paved roads but the length of the roads are not known. The slums numbering 30 located in Haora and Titagarh could not submit the information whether the paved roads they have at all. Regarding class II towns, of the 123 slums 111 have paved roads although 6 of them could not supply the data on road length. All the 6 slums are in Biadyabati and Champdani. The information on paved roads are not available from 5 slums. They are in the towns of Habra and Santipur. There is no paved roads in 7 slums. 1 of them in Habra, 4 in Konnagar, 1 in Raiganj and 1 in Uttarpara-Kotrung.

Community latrine is found existing in 142 slums in class I towns of which 132 alone in Calcutta. The information on latrine is not available from 31 slums and there is no latrine in 1052 slums located in the different class I towns of the State.

Of the 123 slums spread over 12 Class II towns, community latrine facilities are enjoyed by the population of 17 slums only. They are in Medinipur and Champdani.

180 slums in class I towns have the facility of tap points. Of the 1015 slums in Calcutta, 132 slums have such facility. Information on having tap points in class I towns is not available from 36 slums of Asansol, Bally and Haora.

Tap points have been provided in 84 slums of class II towns. No information have been received from 3 towns viz. Baidyabati, Bhadreswar and Santipur having a total slums of 10 only. 29 slums of class II towns have not the facility of tap points.

178 slums in 12 class I towns have the distinction of having road lights. Of the 1015 slums in Calcutta, road lights are provided for 132 slums only. But the account of road light points fixed for those 132 slums in Calcutta are not available. The road light points of 1707 in number have been fixed for 46 slums of class I town only. Of the slums in class II towns light points found in 45 slums only.

TABLE 20(D)—TYPES OF SEWERAGE IN SLUM AREAS

Class of towns	No. of towns having slums	Total No. of slums	No. of slums having						
			S	OSD	BSD	SD	CD	PT	No information
1	2	3	4	5	6	7	8	9	10
I	12	1,225	136	32	..	..	..	..	26 (Slums)
II	12	123	..	36	..	..	..	..	4 (Slums)
Total	**24**	**1,348**	**136**	**68**	..	..	..	..	**30 (slums)**

The types of sewerage availed by the residents of slum areas have been furnished in table 20(D). Only 136 slums covering two towns viz. Calcutta and Titagarh in class I have the sewerage system. Of the 1015 slums in Calcutta, 132 came under this facility. 32 slums of class I towns have open surface drains. These towns are south Suburban, Kamarhati, Durgapur, Bally (M) and Chandannagore (MC). In class II towns, 36 slums have open surface drains. These slums are found in Medinipur, Uttarpara, Kotrung Rayganj and Konnagar.

TABLE 20(E)—TYPES OF METHODS OF DISPOSAL OF NIGHT SOIL IN SLUM AREA

Class of towns	No. of towns having slums	Total No. of Slums	Slums classified by the methods of disposal of night soil					
			HL	B	WB	ST	S	Information not available
1	2	3	4	5	6	7	8	9
I	12	1,225	1,041	..	33	29	132	32 (Slums)
II	12	123	47	..	18	4	..	48 (Slums)
Total .	**24**	**1,348**	**1,088**	..	**51**	**33**	**132**	**80 (Slums)**

The methods of disposal of night soil in slum areas are shown in Table 20(E). Still the disposal of night soil by head load is a predominant method. There are 1041 slums in class I towns where the single process of disposal of night soil is headload. All the 132 slums where the disposal is done through sewers are in Calcutta. There are 5 slums in Baidyabati and 2 in Habra where the disposal methods could not be adopted in absence of any sort of latrine. The information from slums in Bally, Haora and Panihati—all class I towns and Garulia and Santipur—class II towns were not available.

TABLE—21(A)—TYPE OF MEDICAL FACILITIES BY SIZE CLASS OF TOWNS

Size class of towns	No. of towns	Population of towns in each size class	No. of Institutions						Others
			Hospital	Dispensary	Health Centre	Family Planning Centre	T. B. clinic	Nursing home	
1	2	3	4	5	6	7	8	9	10

Total	**291**	**14,446,721**	**256**	**389**	**77**	**65**	**22**	**48**	**221**

Table 21(A) given above deals with the type of facilities available in towns of different size classes. All the class I towns have atleast one hospital and the capital city of Calcutta have been provided with the as many as 63 hospitals. The second largest concentration of hospitals is found in Durgapur. In Haora there are 7 hospitals. In addition to the hospitals, other facilities like dispensaries, health centres, Family Planning Centres etc. are also exisiting in these towns. Regarding class II towns, although there are 46 hospitals, but out of 40 towns in this group only 27 have hospitals. 11 towns are served by dispensaries or T.B. Clinic or other type of medical facilities or dispensaries and other types both There are 2 towns in this group viz. Outer Burnpur and Panchur where not a single type of medical facilities are available but they are served by the facilities as available in Burnpur and Garden Reach. Outer Burnpur is very close to Burnpur town and Panchur is close to Garden Reach. Among the class III towns, Banitabla and Gayespur have no medical facilities. Banitabla has to depend on the medical facilities available at a distance of 3 kms. at Uluberia when Gayespur is served by the neighbouring town Kalyani. There are no medical facilities in 31 class IV towns, 32 in class V and 9 in class VI. The information from Barrackpur Cantonment, a class IV town, has not been collected.

TABLE 21(B)—USE OF MEDICAL FACILITIES AT OTHER PLACES BY TOWNS NOT HAVING THESE FACILITIES

Size Class of towns	No. of towns	No. of towns where the Medical facility mentioned in col. 3 is not available but available at distance of				
		—5Kms.	5-10 Kms.	10-20 Kms.	20—Kms.	Total cols. 3—7
1	2	3	4	5	6	7
I	24	..	..	..	..	..
II	40	2	..	..	..	2
III	52	2	1	..	..	3
IV	92	22	3	3	2	30
V	63	22	3	1	3	29
VI	20	6	2	1	..	9
Total	**291**	**54**	**9**	**5**	**5**	**73**

The availability of the medical facilities of one sort or the other from other places at a distance in absence of any basic medical facilities in the towns has been given in table 21(B). It reveals from the table that there are altogether 73 towns in the state where the facilities are absent. It may be further clarified that, 54 of them obtain the facility from other places located within 5 kms only. There are 9 towns in the state who have to go for medical treatment in places within a distance of 5—10 kms. only. The towns—2 in class IV and 3 in class V are to depend for medical attainment in other places which are situated beyond 20 kms. Among them, the town availed facility from Raygarj—a farthest point of 47 kms—is Dolkhola a class V town. The two class IV towns are Aurangabad and Paschim Punropara, both get medical feed from Jangipur. The remaining 2 class V towns are Balichak and Kaksa. They are fed by Kharagpur and Durgapur respectively. No information from Barrackpur Cantonment—a class IV town—has been collected.

TABLE 21(C)—NO. OF BEDS IN MEDICAL INSTITUTIONS

Size class of towns	No. of towns	No. of beds per 1000 population
1	2	3
I	24	2.85
II	40	2.85
III	52	3.56
IV	92	1.58
V	63	0.74
VI	20	2.61
Total	**291**	**2.74**

Availability of beds in the medical institution per 1000 population in the different size classes of towns has been given in table 21(C). While working out, this table, the population of those towns having hospitals but the number of beds are not available have been excluded. Such towns are South Suburban in class I, Kanchrapara Nangi and Bally (NM) in class II, Jiaganj and Uluberia in class III, Chinakuri and Old Malda in class IV and V respectively. The population of Barrackpur Cantonment, a class IV town has not been taken into account also. The number of beds per 1000 population in urban areas of the state works out to 2.74. The towns in size class III have the highest proportion of beds in the medical institutions. The proportion per 1000 population being 3.56. Class I towns have been proportion of 2.85. The lowest proportion of beds is found in towns belonging to the size class V. It is as low as 0.74 per 1000 population. It must be pointed out here that the number of inpatients in the medical institutions has always been much higher than the beds actually they have. It should also be noted here that the medical institutions in urban areas not only serve the local urban people, they cater to the vast rural population where the medical facilities are not available.

TABLE 22(A)—SCHOOLS PER 1000 POPULATION

Size class of towns	No. of towns	Number per 1000 population			
		Higher sec/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary and Middle	Primary
1	2	3	4	5	6
I	24	0.05	0.12	0.13	0.47
II	40	0.04	0.10	0.13	0.65
III	52	0.06	0.10	0.13	0.57
IV	92	0.04	0.11	0.14	0.58
V	63	0.04	0.13	0.17	0.53
VI	20	0.09	0.16	0.20	0.52
Total	**291**	**0.05**	**0.11**	**0.13**	**0.52**

Table 22(A) furnish data on the extent of facilities of the educational institutions in various size-classes per 1000 urban population. At the outset it may be stated that excepting 2 class V towns and 3 class VI towns, all other towns leaving Barrckapur cantonment have the education facilities of atleast one sort or the other. The towns who are not provided with such facilities are Ninga and Paruhat—both in calss V and Bakreswar Tourist Centre Township, Digha Township and Kolaghat Thermal Power Project Town in class VI. In the urban areas as a whole the proportions of PUC, secondary, Junior Secondary and Primary Schools stand per 1000 urban population 0.05, 0.11, 0.13 and 0.52 respectively. Considering the size-class of towns, the number of PUC institutions is highest in Class VI towns. Regarding, primary institutions the highest proportion is observed in considering the proportion of primary schools per 1000 population in class I towns separately it is seen that the highest proportion to the extent of 1.30 is in, Nabadwip and the lowest of 0.18 in Baranagar. The second position has gone to Haora by securing proportion of 0.58. The capital city of Calcutta has the proportion of 0.54.

TABLE 22(B)—ADULT LITERCY CENTRES

Size class of towns	No. of towns	No. of towns having Adult literacy Centres.
1	2	3
I	24	15
II	40	21
III	52	27
IV	92	40
V	63	19
VI	20	4
Total	**291**	**126**

The no. of adult literacy centres by size class of towns has been given in table 22(B). There are altogether 126 adult literacy centres in the urban areas all over the state of West Bengal. The percentage of adult literacy centres is highest in class II towns followed by class III. Among the class II towns, 52.05 percent of the towns have the centres and in case of Class III towns this percentage is 51.92 against the state average of 43.30.

TABLE 23—DISTRIBUTION OF WOMENS HOSTELS, STADIA, CINEMA, AUDITORIA/DRAMA/COMMUNITY HALLS AND PUBLIC LIBRARIES BY SIZE CLASS OF TOWNS

Size class of towns	Total No. of towns	Working Women's hostels (No)	No. of towns having			
			Stadia (No)	Cinema (No)	Auditoria etc. (No)	Public Libraries (No)
1	2	3	4	5	6	7
I	24	5 (10)	6 (11)	23 (190)	16 (112)	23 (445)
II	40	6 (12)	11 (13)	36 (83)	23 (51)	39 (286)
III	52	8 (8)	11 (12)	45 (73)	25 (43)	47 (169)
IV	92	4 (9)	1 (1)	43 (55)	20 (31)	63 (139)
V	63	1 (2)	1 (1)	14 (15)	16 (34)	47 (71)
VI	20	..	..	3 (4)	2 (2)	11 (16)
Total	**291**	**24 (41)**	**29 (38)**	**164 (420)**	**102 (273)**	**230 (1126)**

The table 23 gives information of towns having working womens' hostels, stadia, cinema, auditoria and public libraries. The table reveals that there are altogether 41 working womens' hostels spread over 24 towns of the state, 38 stadia situated in 29 towns, 420 cinema halls in 164 towns, 273 auditorium in 102 towns and 1126 public libraries in 230 towns. The information in respect of the working womens' hostels is lacking due to the fact that most of them have been set up privately which are not known to the local bodies. That is why we have received information of only 2 working womens' hostels in the capital city of Calcutta which have the recognition of the Government. The no. of public libraries in Calcutta is not available. The data from Barrackpur Cantonment have not been accounted for in the table.

Table 24(A), 24(B) and 24(C) give particulars of the 3 most important commodities manufactured in each town of the state by size class. It will be seen from the tables that several towns do not have any commodity to report and some of the towns do not have all the three important commodities to report. The particulars about the first important commodities manufactured has not been reported by 42 towns. In case of second and third commodities manufactured, 66 and 109 towns respectively have no commodity to report. The data regarding commodities manufactured are not available from 4 towns for first commodity, and 5 towns for second and third commodities. No particulars have been collected from Barrackpur cantonment.

Tables 25(A), 25(B) and 25(C) furnished data on imports of three most important commodities in each town of the state by size class. It is observed from the tables 25(A) and 25(B) that all the towns excepting 4 have imported first and second important commodity. The 4 towns could not supply the information of any important commodity imported. There are 4 towns in the state who have reported 2 commodities imported. Barrackpur Cantonment has not been taken into account in these tables.

The tables 2 (A), 26(B) and 26(C) indicate the distribution of towns by size class according to the first, second and third commodities exported. There are 23 towns in the state who do not export any commodity whatsoever. There are 60 towns who do not export second and third commodities. Again, 94 towns in the state happen to be the non-exporter, of third most important commodity. The reports of exporting first commodity from 4 towns, second and third commodities from 5 towns are not available. While preparing these tables, Barrackpur Cantonment has been ignored.

TABLE 27—DISTRIBUTION OF BANKING SERVICES, AGRICULTURAL AND NON-AGRICULTURAL CREDIT SOCIETIES BY SIZE-CLASS OF TOWNS

Size class of towns	Total No. of towns	No. of towns having Banks	Agricultural credit societies	Non-agricultural credit societies
1	2	3	4	5
I	24	24 (1,003)	3 (306)	14 (1,225)
II	40	40 (217)	11 (20)	24 (307)
III	52	50 (179)	25 (49)	28 (117)
IV	92	63 (124)	35 (53)	38 (96)
V	63	35 (45)	17 (25)	20 (33)
VI	20	5 (5)	1 (1)	6 (8)
Total	**291**	**217 (1,573)**	**92 (54)**	**130 (1,786)**

The details of the banks as well as agricultural and non-agricultural credit societies in the different towns according to their sizes classes have been shown in table 27. Of the 291 towns of the state 217 have banking facilities. If we examine the table class-wise it will be seen that all the class I and class II towns have one or more banks in their respective urban limits. Among the class III towns only 2 towns do not have any banking facilities. They are Birlapur and Krishnapur. Of the 92 class IV towns, Bowali, Chak-Kashipur and Guriahati have been left out as the information from them were not available and the Barrackpur Cantonment has been kept out of the computation. 25 towns in this size-class may be regarded as devoid of banking facilities. Calcutta tops with 696 banks within its urban limits. Next comes Haora with 125 banks—followed by Asansol with the no. 20. The largest no. of banks in class II towns are found in Baharampur. Baharampur has 15 banks. The second position in having banks is owned by English Bazar and Krishnanagar with 11 banks in each town. There are 10 banks in each of the towns of Koch Bihar, Medinipur and Puruliya. Suri tops with 10 banks in size-class III followed by Haldia and Ghatal. Haldia and Ghatal have 7 banks each. There are 6 banks in two class III towns. They are Bolpur and Dum Dum. Among the class IV Towns, Sonamukhi and Tarakeswar are having 5 banks each. Another two class IV towns, Memari and Pandua have 4 banks each in their respective urban limits. Of the 63 class V towns of the state, 35 have banks, one town viz. Sripur Bagharghol has no information in this respect. In the five class VI towns, each town has set up one bank in their respective areas.

The Agricultural Credit Societies are functioning in 92 towns of the state. The class I towns reported having agricultural credit societies are Balurghat, Haora and Hugli-Chinsurah. Haora has reported 300 credit socities, Hugli-Chinsurah and Balurghat have 1 and 5 societies respectively. Among the size-class III, 25 towns have such societies and it is highest in proportion to their size-classes. Next in rank the size class IV. It is notable that of the 20 towns in size-class VI only 1 has reported one society.

So far as the non-agricultural credit societies are concerned, the societies belonging to this category have been reported from 130 towns out of 290 excluding Barrackpur Cantonmnet in the state. The largest number of such societies are in Calcutta followed by Haora which have as many as 646 and 541 societies respectively at their credit. Jalpaiguri has scored with 89 such societies in class II size class, followed by Puruliya and Bangaon with 66 and 39 societies. The fourth rank has occupied by Bankura in which 23 such societies are functioning. If we proceed further in analysing the position of societies in towns in class IV size, it will be seen that Mahisadal occupies the top position by 13 societies and Khatra's rank second with the having of 10 societies. It is seen from the table that, conversely, larger the class of towns higher is the proportion of non-agricultural credit societies.

An analysis of the towns neither having any bank nor any agricultural credit societies or non-agricultural credit societies show that 14 belong to class IV, 18 belong to Class V and 12 belong to class VI.

TABLE 28—AVERAGE HOUSEHOLD SIZE BY SIZE-CLASS OF TOWNS

Size-class of towns	Average household size
1	2
I	5.28
II	5.38
III	5.49
IV	5.30
V	5.17
VI	4.97
Total ..	**5.32**

The table 28 reveals the average household size by size-class of towns. Although no definite trend in respect of the household size by size class of towns is observed, but it may be seen from the table that the population congestion is lowest in the towns belong to size-class VI followed by the towns in classes V, I and IV. The population congestions in the size-classes as stated above are lower than the state average of 5.32. The population congestions have been recorded in class II and class III towns as 5.38 and 5.49 respectively superseding the state average.

TABLE 29—PROPORTION OF LITERATES BY SEX AND SIZE-CLASS OF TOWNS

Size-class of towns	Population			Literates			Percentage of literates to total population		
	Total	Males	Females	Total	Males	Females	Total	Males	Females
1	2	3	4	5	6	7	8	9	10
I	8,037,309	4,531,889	3,505,420	5,348,528	3,249,988	2,098,540	66.55	71.71	59.87
II	2,905,113	1,549,854	1,355,259	1,796,997	1,073,074	723,923	61.86	69.24	53.42
III	1,631,120	857,667	773,453	940,536	564,125	376,411	57.66	65.77	48.67
IV	1,314,159	703,286	610,873	667,262	415,853	251,409	50.77	59.13	41.16
V	489,567	262,185	227,382	262,759	161,047	101,712	53.67	61.42	44.73
VI	69,453	38,531	30,922	36,894	23,582	13,312	53.12	61.20	43.05
Total	**1,444,6721**	**7,943,412**	**6,503,309**	**9,052,976**	**5,487,669**	**3,565,307**	**62.66**	**69.08**	**54.82**

The table 29 presents the percentage of literacy for towns falling in different size classes. The rate of literacy of the state as a whole according to 1981 Census has been registered as 40.94 against 33.20 in 1971. If we consider the rate for urban areas only for 1981 it is observed that the literate persons in the entire urban area of the state constitute 62.66 percent of the total urban population. The sexwise break-up of literacy rate for 1981 reveals that the percentages come out to 69.08 and 54.82 for males and females respectively.

The overall and the sexwise percentage of literacy is high in class I owns and the rates decrease gradually in class II, III and IV towns. Again, the proportion increases in class V towns but diminishes in class VI towns. Evidently, the urban literates are highly concentrated in cities and large towns which account for the larger proportion of the urban population as a whole. In Calcutta, the largest city of the state, 69.12 percent are literate while at Haora, the second largest city, the literate constitute 65.09 percent. Among the class I towns, the highest rate of literacy is marked in Barangar town which has registered as much as 75.59 percent. South Dum-Dum holds the second rank in the matter of literacy. The literates constitute 72.82 percent in South Dum Dum. Another class I town Hugli-Chinsurah accounts for 72.25 percent as literate.
