PREFACE

DEMOGRAPHIC DATA of the Census are the products of the inter play of a number of economic, cultural and social factors. The demographic situation in its totality on the other hand, influences the economic, social and cultural developments. It is this dynamic inter relationship which is intended to be highlighted by bringing together census and non-census data in the present volume.

This town directory presents for each town of Rajasthan its Primary Census Abstract alongwith such other basic information as civil administration, status and growth, functional categories, municipal finance, civil and other amenities, trade and industry. It is hoped that this compilation will help stimulate considerable research in the field of urban studies.

Compilation of non-census data presented in this book had called for assistance and close co-operation from the State Government which was made available to us in plenty for which we are ever so grateful. Shri Jagat Pal Singh, Deputy Director in-charge of the Social Studies Wing of this office, ably assisted by Shri Shamsher Singh and Shri Wali Haider, laboured hard to build up this work. Other members of the staff who were associated with the production of this work at various stages are listed overleaf. They all deserve thanks of this organisation.

We had originally intended to present maps of all towns in this book. Due to certain difficulties it has not been possible. Readers are, however, requested to consult our part IX-A Administrative Atlas (alongwhich a supplement has also been issued) which contains maps for all the towns in Rajasthan.

U. B. MATHUR
Deputy Director of Census Operations,
Rajasthan

CHAPTER I

INTRODUCTION

General

The Town Directory is the first attempt of its kind made by the Census organisation. The information given in this volume relates to the important aspects of life in a town. In a developing and progressing country like ours where large scale urbanisation is taking place, town planning is receiving wide and serious attention. Such planning has two dimensions. In the first place, newly emerging towns and colonies are to be planned and in the second, the old towns are to be given a face-lift. In both the cases, modern amenities have to receive maximum care and attention. Before old towns can be given a new look and new ones provided with the modern amenities, some basic statistics about the towns are a prime necessity for successful planning. The Town Directory provides such statistics at the town level. It gives us information about the civic administration status of towns, their rate of population growth since 1901, their functional categories, annual rainfall figures, temperature, nearest city, names of state/district/sub-divisional headquarters, nearest railway stations and bus stands, municipal finance (1968-69), civic and other amenities in towns like road length, system of sewerage/drainage, types of latrines, method of disposal of night soil, sources of protected water supply, fire fighting services, electrification, incidence of medical, educational, recreational, and cultural facilities and the extent of trade, commerce, industries, and banking in respect of all the towns. It will thus be seen that the information which has gone into the making of the Town Directory is of immense help to the administrators, planners etc. in coping with the ever-increasing needs for changes resulting from the fast pace of urbanisation in a developing and welfare State.

Concept of Urban Area

In 1961, all areas which were administered by Municipalities in 1951 and where municipal administration continued to subsist were included in urban areas. However, where municipal administration did not exist, the following three factors were required to be satisfied before any such area was included in urban area:

(a) a minimum population of 5000;
(b) 3/4th of male adult population was engaged in non-agricultural occupations; and
(c) a density of population was approximately 1000 per sq. mile.

On account of the 1961 definition of urban areas as many as 84 places were deleted from the 1951 urban list while three new towns were added to it as they possessed urban characteristics. With a view to trace the concept of 'town' back to 1951 we may review the definition of a town in 1951. A town was defined as:

(a) Every Municipality,
(b) Every Cantonment,
(c) Every place of usually not less than 5,000 inhabitants, and
(d) Any other place which was treated a town for special reasons (possessing urban characteristics) by the Superintendent, Census Operations.

For the purposes of the 1971 Census the term 'Town' stands for all urban units e.g. municipal towns, cities, cantonments and notified areas as well as all other places designated as Census Towns, which satisfy the following criteria:

(i) a minimum population of 5,000;
(ii) at least 75% of the male working population engaged in non-agricultural pursuits; and
(iii) a density of population of at least 400 per sq. km. (i.e. 1000 per sq. mile).

From the point of view of the revenue records, all urban units, too, comprise of one or more whole or part-villages depending upon the extent of municipalisation.

Till 1961, the population size-class was the only criterion for classifying towns. Towns were grouped under six classes according to population i.e., class I (100,000 and above), class II (50,000 to 99,999), class III (20,000 to 49,999), class IV (10,000 and 19,999), class V (5,000 to 9,999) and class VI (below 5,000). As seen above, during the Censuses anterior to that of 1961, existence of a self-governing local body, such as a municipality, was generally the main criterion for classifying a place as a town. If there was no municipality and the population was also less than 5,000 a place could be regarded as town if in the opinion of the Census authorities it had certain urban characteristics. There were, of course, a host of such urban attributes — cultural, economic and social — which helped the Census authorities to distinguish the urban areas from the rural, depending on their local knowledge and discretion. In 1961, however, an objective test was prescribed for determining the urban areas on a uniform basis throughout the country. To qualify as a town, at least 75% of the male working population of a particular place, as discussed above, was required to be engaged in non-agricultural pursuits, and, as we have seen, a large number of places had to be eliminated from the 1961 list of towns.

Civic administrationwise, of the 157 towns in Rajasthan, 11 are governed by Municipal Councils, 134 by Municipal Boards, one is governed by Notified Area Committee, one by Cantonment Board and 10 are governed by Panchayats. The towns governed by Panchayats have been treated as "Census Towns" for our purpose as per the alternate criteria given above, eventhough such towns do not have municipalities.

Towns in Rajasthan can be classified from two angles-populationwise, from the point of view of presentation of Census data, and in terms of the official categorisation of various Municipal Councils and Boards on the basis of population and budget. In terms of population, they are divided into six classes. Of these 7 are class I towns, i.e., 'cities' having population of one lakh and above; 7 are class II with 50,000-99,999 persons; 31 are class III with 20,000-49,999 persons; 67 are class IV with 10,000-19,999 persons; 41 are class V with population of 5,000-9,999 persons; and 4 are class VI with population of less than 5,000 persons. In terms of the classification done by the State Government, the 145 towns (leaving out the ten non-municipal 'Census Towns' as well as the two towns governed by a Notified Area Committee and a Cantonment Board, respectively) fall into five categories. Towns which have population of more than 50,000 belong to the first category, and are 11 in number, which means that 3 more towns are due for upgradation (all these 11 are governed by Municipal Councils, but populationwise, while 7 are class I, 4 are only class II towns). Towns which have annual income of more than two lakhs per annum belong to the second category. Their number is 14. Towns having annual income of more than one lakh and upto two lakhs belong to the third category, and their number is 22. 45 towns with an annual income of more than forty thousand and upto one lakh belong to the fourth category. Lastly, towns with annual income of up to forty thousand belong to the fifth category and they are 47 in number. 6 towns have not yet been classified by the State Government.

In addition to towns, two other concepts, namely, those of Urban Agglomeration, and Standard Urban Area deserve to be discussed here. An 'Urban Agglomeration' is a continuous urban spread constituted by a town and its adjoining urban outgrowth or two or more physically contiguous towns together with their outgrowths, if any. In this State there are four cases in which whole towns constitute urban agglomerations, namely.

(i) Bikaner City alongwith Bhinasar and Gangashahr towns;

(ii) Jaipur City alongwith Sanganer Census Town and Amber town;

(iii) Pilani town alongwith Vidyavihar town; and

(iv) Sawai Madhopur Town alongwith Man Town Notified Area.

Next, we may take note of the phenomenon of 'Part-villages'. Most of the towns in this State do not comprise of whole revenue villages which means that village-portions have been left out of the municipalities. In 1961, for Census purposes all such part-villages were treated as urbanised appendages of the towns concerned and data with regard to such part-villages were presented alongwith that pertaining to the core towns under the description of N.M.As. i.e., Non-Municipalised Areas. In 1971, an attempt was made, firstly, to ascertain the existence of all such Non-Municipalised Areas and secondly, to find out their true nature i.e. urban or rural. As a result of this enquiry, 115 cases of such part-villages have been discovered. Further, while 9 of these have urban characteristics, 103 are rural in character and the rest three have both urban as well as rural components. The 12 cases of urbanised village-portions have been added to the Urban Agglomerations of the concerned core-towns under the description of 'Outgrowth' alias 'such-and such village urban'.

As regards the 12 outgrowths, one of them makes a constituent of the Sawai Madhopur Urban Agglomeration while the remaining 11, alongwith their respective core-towns constitute 11 more Urban Agglomerations, making a total of 15 Urban Agglomerations—3 consisting only of cities/towns, 1 consisting of town as well as an outgrowth and, 11 consisting of only single core towns alongwith their outgrowths. The outgrowths have also been given sub-numbers derived from the code numbers of their respective core towns. Thus, 'IIIa' denotes an outgrowth of a town having the code number III. In the case of town code numbers in Roman numerals have been used; while in the case of district and tehsil code numbers, Arabic numerals have been used.

In the Town Directory, data pertaining to all the individual city/town constituents of an Urban Agglomeration has been given agglomerationwise.

As regards the second concept, namely, Standard Urban Area, in all 14 SUAs, have been decided upon. The Standard Urban Area may be defined as the projected growth area of a city or a town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. The standard urban area, however, has not been made a separate unit of presentation of data for the Town Directory.

SCOPE OF TOWN DIRECTORY

Information in respect of the Town Directory is presented in the form of seven Statements supplemented by information given in five Appendices.

Statement I: Status, growth history and functional category:

As indicated by the title itself, this statement provides some important data regarding the status, growth in terms of population and functional category of the towns in a district. Col. 1 gives the serial number, Col. 2 the name of town and the class of the town in question in terms of population in Roman numerals within parenthesis. The three constitutents of the location code given in Col. 3 indicate the code number of the district, code number of the tehsil and code number of the town, in the order and Col. 4 the name of the tehsil in which a town is situated. Towns have been arranged in alphabetical order. However, in the four cases in which whole towns have entered into urban agglomerations, the data pertaining to the constituent towns have been given, though separately, but at one place with the names of the towns minus the data occurring

again in alphabetical order. An indication "See such and such urban agglomeration" has been put against such towns. Where an urban agglomeration consists of only the core town and its outgrowth, the existence of such urban agglomeration has been indicated by putting an asterisk against the name of the concerned core town in this statement as well as the other statements of the Town Directory.

Col. 5, on the other hand indicates the civic administration status with the help of some symbols as also the category of the municipal body concerned in Arabic numerals within parenthesis. The symbols used in Col. 5 are these,

M	:	Municipality
C	:	Municipal Council
NAC	:	Notified Area
CB	:	Cantonment
P	:	Panchayat i.e. Census Town

Cols. 6 to 13 provide the decadal population figures for the town in question from 1901 to 1971. A dash under any of the columns indicates that the town was not having an urban status at the time of the Census in question while 'N.A.' indicates the non-availability of data. As already mentioned, the population figures pertaining to an outgrowth, wherever it occurs, have also been given in Col. 13 within parenthesis underneath the population of the core town of the urban agglomeration concerned.

Cols. 14 and 15 give the functional category of each town as per the 1961 and 1971 Censuses respectively. Predominance of non-agricultural occupations governs the urban characteristics of a town. The distribution of the working population in non-agricultural pursuits, therefore, presents a scientific mode of classifications according to the predominant functional characteristics of the population in a town. The industrial classification of all workers into the following nine categories, adopted at the 1961 and 1971 Censuses, provides a basis for the functional classifications of towns as it broadly corresponds to the divisions of the Standard Industrial Classifications.

Standard Industrial Classifications

However, there is some change between the concepts of functional classifications adopted for the Censuses of 1961 and 1971. This relates to working population. Whereas in 1961 persons engaged in "Mining and Quarrying" were classified along with those engaged in "Livestock, Forestry, Fishing, Hunting, and Plantations, Orchards and allied activities" (Industrial Category III), in 1971 they have been shown separately under category IV by dividing Industrial Category III of 1961 into III and IV. Persons engaged in Household Industry and classified under category IV in 1961 have been classified under category V alongwith the persons engaged in Manufacturing, Processing, Servicing, and Repairs in 1971. To distinguish such workers from 'other workers' they have been shown under category V(a), i.e., Household Industry and the remaining workers under category V(b), i.e., 'Other than Household Industry'. Further, persons engaged in business-services as also tea stalls and restaurants and included in category IX, i.e., 'Other Services' in 1961, have been included in Category VII, i.e., 'Trade and Commerce' for the purpose of 1971 Census.

As a result of this change in the concept of categories of workers, the corresponding divisions of Standard Industrial Classification have also undergone some change. Category III related partly to division O and partly to division 1 in 1961; it now relates to division 0 only. Category IV which related in 1961 Census to divisions 2 and 3, corresponds to division 1 for the purpose of 1971 Census. Category V remains in 1971 Census as in 1961 Census. Category VI which in 1961 Census corresponded to division 4, corresponds to division 5 in 1971 Census. Category VII related to division 6 only in 1961; in 1971 it relates to division 6 and partly to division 8 also. The position of category VIII corresponding to division 7 remains the same for the purpose of both the Censuses under reference. But, again, category IX which in 1961 Census corresponded to divisions 5, 8 and 9, corresponds to divisions 4 and 9 in 1971 Census.

The nine categories of workers have, however, been grouped into 5 broad functional classes for the purpose of both the Censuses in question. These are: (1) Primary Activities (Categories I, II, III and IV); (2) Industry (Categories V and VI); (3) Trade and Commerce (Category VII); (4) Transport (Category VIII); and (5) Other Services (Category IX).

The following two corresponding statements clarify the position further :

Industrial Categories of workers for 1961 Census	Corresponding divisions of the Standard Industrial Classification
1	2
I Cultivator	Part of 0
II Agricultural Labourer ..	Part of 0
III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting & Plantations, Orchards and allied activities	Part of 0 and 1
IV Household Industry ..	Part of 2 and 3
V Manufacturing, Other than Household Industry ..	Part of 2 and 3
VI Construction	Part of 4
VII Trade and Commerce ..	Part of 6
VIII Transport, Storage and Communications	Part of 7
X Other Services	Part of 5, 8 and 9

Industrial Categories of Workers for 1971 Census	Corresponding divisions of the Standard Industrial Classification
1	2
I Cultivators	Part of 0
II Agricultural Labourers ..	Part of 0
III Livestock, Forestory, Fishing, Hunting & Plantations, Orchards and Allied activities	Part of 0
IV Mining and Quarrying ..	Part of 1
Va Manufacturing, Servicing & Repairs of Household Industry	Part of 2 and 3
Vb Manufacturing, Servicing & Repairs of other than Household Industry	Part of 2 and 3
VI Construction	Part of 5
VII Trade and Commerce ..	6 and 8
VIII Transport, Storage and Communications	Part of 7
IX Other Services	Part of 4 and 9

The functional characteristics of towns are determined by working out the percentage of the working population under each of these five classes of economic activities to the total workers. If workers under one of the occupations form 40 per cent or more of their total number, it is considered a monofunctional town. If, however, such percentage is less than 40, the next predominant occupation is taken into account so that the total of the two may come to 60 per cent or above and such a town is called bi-functional. Again, if the total does not come upto 60 per cent, the third predominant occupation is taken into account and such a town is taken as multi-functional.

The data for this statement was obtained from the Directorate of Local Bodies as well as from the General Population Tables and the Census Altas belonging to the 1961 series of Census publications and the 1971 Urban Primary Census Abstract. The referrent year for this data is 1971.

Statement II : Physical aspects and location :

The statement gives the annual rainfall, temperature, nearest city, State Headquarter, District Headquarter, Sub-divisional/Tehsil Headquarter, the nearest railway station and the nearest bus stand in respect of each town in a district. Annual rainfall figures (Col. 4) represent the average for ten years (1961—70). Where temperature figures (Cols. 5 and 6) for a particular town were available, the same have been indicated, otherwise 'NA' has been put against the concerned town. However, in the latter case, temperature figures for neighbouring places have been indicated through footnotes. The neighbouring places are generally the nearest as the crow flies. The nearest city for the purpose of this statement (Col. 7) is the one situated in the district itself or in a neighbouring district or even in some neighbouring State. In the last case, the name of the State concerned is also given within parenthesis. In Cols. 8, 9 and 10 the distance in km. from the town in question to the headquarter concerned has also been given within brackets after the name of the headquarter town. The figures of zero indicates that the town in question is also the headquarter for the column heading. The same method of presentation applies to information regarding the nearest railway station and bus stand (Cols. 11 and 12). Initially, this statement had three more Cols. 13 to 15, for the purpose of showing navigable rivers, canals etc. As no such case obtained in this State, these three columns were eliminated.

The sources of information in respect of this statement were: The Meteorological Department, Tehsil Offices, Municipalities and the District Statistical Offices.

The referrent period in respect of this statement is the year 1969-70, generally speaking.

Statement III : Municipal finance :

From this statement we learn about the annual sourcewise income and headwise expenditure of the various urban civic administrative units in a district in terms of the financial year 1968-69. The statement forms two parts, Receipt and Expenditure, with the amount in rupees rounded off to the nearest '00. A dash, wherever it occurs in this statement, indicates nil or negligible amounts, and 'NA' that the information in question is not available.

We may explain here the various sources of income and heads of expenditure in respect of this statement, taking first the Receipt and then the Expenditure side. Receipt through taxes etc. (col. 3): There are two broad categories of taxes: "Obligatory" and "Others". Whereas Obligatory taxes (octroi, tax on land and buildings, tax on houses, land rent etc., and tax on vocation and profession) have to be imposed by every municipality, taxes of "Other" category (tax on vehicles and conveyances meant for hire, tax on animals used for riding, driving, draught or burden, toll on vehicles and other conveyances and animal entering the municipality, tax on boats, tax for scavenging and cleansing private latrines etc. lighting tax, water tax where a municipality provides for water supply, tax on artisans and any other taxes) are imposed by the various municipalities by choice though under the rules.

Revenue derived from municipal powers and property apart from taxes (Col. 4): This source covers holding of fairs and exhibitions, supply of milk, issue of licenses of various types, maintaining of cattle ponds, fines and penalties, tax on public vehicles, contracts, transport services, cinemas, providing boating facility; allotment, sale and lease of land, rent and contracts relating to parks and gardens and such other items.

Contingent grant (Col. 5): There are three types of Government grants: per capita grant, P.W.D. grant, and grants from the Social Welfare and other departments. Per capita grant is given by the State Government subject to certain conditions, to every municipality at the rate of 15 paisa, but in the case of municipalities located at the district headquarters an additional sum of Rs. 5,000 is also granted. P.W.D. grant is given for works like roads and drains. This is a matching grant and whereas in the case of municipalities located at district headquarters the government grants only 40 per cent of the total amount required for a work, in the case of all other municipalities this grant amounts to 75 per cent of the total amount required for a work. Social Welfare Department also grants amounts for various purposes, e.g., conversion of dry latrines into flush ones, for the purchase of tempos, scooters, vehicles, wheelbarrows etc. and for removing night-soil etc.

Loan and Advance (Cols. 6 and 7): Loans are generally granted by the L.I.C. and State Government though the municipality can borrow from private sources also subject to the condition that such loans will be used for works of permanent nature only. Advances are also made by the State Government to various municipalities for some specified purposes subject to the availability of funds. The "Other" sources of

income (Col. 8) may differ from one municipality to another, as for example, one municipality provides boating and skating facilities and runs a cinema, and, another runs buses. General Administration (Col. 10): The main heads of expenditure cover salary of staff, contingent expenditure on account of administration staff, police guards, etc. wherever kept, protection of municipal property and enforcement of the laws and collections of taxes etc. The secondary heads of expenditure pertain to the construction and maintenance of new public streets, 'dharamshalas', rest houses, other public buildings, and places for housing the poor, granting of loans for constructing houses, providing accommodation for any class of servants and employees of granting loans to the employees for this purpose, planting and maintaining roadside and other trees, providing recreational facilities promotion of public health, infant welfare, contribution towards any public funds raised for relief of human sufferings within and without a municipality, organising and maintaining shops and stalls for the sale of necessaries of life during the time of scarcity, holding fairs and exhibitions, and providing anti-rabic treatment, housing and maintaining destitute orphans and cripples maintaining maternity centres and child welfare clinics, private schools etc., public safety, public health and convenience, and public works (Cols. 11—13): The following are the items related to these heads of expenditure: lighting of public streets, places and buildings, watering of public streets and places, cleansing of public streets and places and sewers and all spaces not being private properties, removing of noxious vegetation and abating all public nuisances, removing filth, rubbish, night-soil, odour or any other noxious or offensive matters from privies, latrines or other common places, extinguishing of fires, regulating of offensive, dangerous trade or works, protecting of public latrines, privies, urinals, obtaining of supply or an additional supply of water, naming of streets, numbering of houses, keeping records of birth and death, arranging destruction or preservation of dogs within the municipality, arranging of preparation of compost manure from night-soil and rubbish, establishment and maintenance of cattle ponds etc. There are some special duties also which consist in providing special medical aid to the sick in times of the outbreak of a dangerous disease and taking such measures as may be required to prevent such an outbreak or suppressing the recurrence thereof, giving relief, and establishing and maintaining relief works in times of famine or scarcity for destitute persons within the limits of a municipality. Public Institutions (Col. 14): Such institutions are educational, cultural, religious and social. The municipalities can give aid to such institutions and patronise them; but such institutions should not be government run. The above description includes not all but some of the important items pertaining to the receipt and expenditure amounts of a municipality. The purpose is just to give a general idea of the sources of income and items of expenditure.

The information for this statement came from the civic administration units.

Statement IV : Civic and other amenities :

The purpose of this statement is to provide information with regard to the various amenities available in a town. The road length figures (Col 3) include, generally speaking, all pucka and kutcha roads within the limits of a town as well as the lanes etc. in some cases. Roads falling within municipal limits of a town are generally maintained by the civic bodies concerned. While some of these bodies take the technical help from the Public Works Department, some others have their own engineering personnel. Urban Improvement Trusts also maintain roads separately but information pertaining to them is not included in this statement. The system of sewerage/drainage (Col. 4) is indicated with the help of these symbols:

KD	:	Kutcha drainage
OSD	:	Open surface drainage
S	:	Sewer

As regards latrines (Cols. 5 to 7), flush latrines of various types are given under the heading 'waterborne', while those serviced manually by scavengers features under 'service'. The category of 'others' pertains to the various other latrines not manually or regularly serviced. In Col. 8 the actual method of the removal of night-soil, and not the final disposal or use of the same, is indicated. The purpose was to assess the extent of the use of human labour in removing the night-soil. The symbols used are these:

HL	:	Head-load
WB	:	Wheel barrow
T	:	Truck/Tractor
CL	:	Cart-load
S	:	Sewerage

In the case of protected water supply, only such towns as have regular protected water supply scheme as per the information received from the Public Health Engineering Department are indicated as beneficiaries of this system. Where a protected water supply scheme is under execution, the symbol UE has been used. The capacity in the context of protected water supply relates not to the storage but to the pumping. The symbols used to indicate the various sources are these:

W	:	Well
TW	:	Tubewell
TK	:	Tanks and reservoirs
R	:	River
C	:	Canal

Only such towns have been treated as having a fire-fighting service as provide for regular fire-fighting squads. As regards the electric supply, domestic connections (Col. 12) denote electric supply available to residential consumers for light, fans, and radios etc.,

Industrial connections (Col. 13) in this context signify electric supply available to industrial consumers and this can be for the purposes of small, medium, and large scale industries. Commercial connections (Col. 14) are those which are available to non-residential premises such as business houses, shops, cinemas, auditoria, clubs, public offices, railways, hospitals, schools, hostels, petrol pumps, X-ray plants etc. and religious premises and charitable homes and such portions of residential premises as are used for conducting of business. The category, 'Commercial' is further divided into two types: (i) that for light, fans and radios etc. and (ii) for small heat and power appliances. Road lighting points (Col. 15) denote street lighting systems including traffic control system and lighting of public parks etc. under municipalities, panchayats etc., but excluding private colonies. There is yet another category 'Others' (Col. 16) which in the present context pertains to agricultural connections and mixed-load connections.

Information given under the various columns of this statement was collected from the various civic bodies as well as the Public Health and Engineering Department, Rajasthan State Electricity Board and the various private electric supply companies.

The information in this statement refers to the year 1969 for Cols. 3 to 8, and 11; to 1971 for 9 to 10; and to 1969-70 for Cols. 12 to 15.

Statement V : Medical educational, recreational and cultural facilities :

Statement V presents data in respect of medical, educational, recreational and cultural facilities. Medical institutions in Col. 3 in the present context include both the Government and the recognised private institutions pertaining to allopathic, homoeopathic, ayurvedic, unani and naturopathic, systems. Private clinics etc. are, however, excluded. The number of beds for a category of medical institutions is indicated in Col. 4. The various medical institutions are denoted by these symbols:

H	:	Hospital
D	:	Dispensary
TBC	:	T. B. Clinic
HC	:	Health Centre
FC	:	Family Planning Centre
MCW	:	Maternity and Child Welfare Centre
PHL	:	Public Health Laboratory
AYU	:	Ayurvedic
HOM	:	Homoeopathic
UN	:	Unani
NP	:	Naturopathic

In the case of ayurvedic, homoeopathic, unani and naturopathic systems, only hospitals and dispensaries have been shown. Symbol H or D, as the case may be, has been added after the abbreviated symbols in respect of the four above named systems.

As regards educational facilities, information relating to certain specified categories of institutions has been given under Cols. 5 to 12, the remaining educational institutions such as universities, agricultural and veterinary colleges etc. are taken care of by Col. 13 under the heading 'others'. The figures within parenthesis in each case represent the incidence of a particular type of institution. In Col. 9 no symbols have been used and only the number of the concerned institutions is shown, the name of the institutions in full being given in a footnote.

In showing the various other educational institutions in Col. 13 of Statement V, the total number of such institutions has been indicated within parenthesis full names of these institutions being given by way of a footnote. In these cases, however, in which the number of a particular institution exceeds one and the institutions belong to different categories, the actual number of such institutions is also indicated against their names in the footnote, otherwise the number of institutions is not given in the footnote.

The symbols used are as follows:

Col. 5 A : Arts

S : Science

C : Commerce

In the case of Col. 5, where colleges with combined faculties exist, the symbols also have been combined accordingly. In the case of parks/stadia, and auditoria and drama halls, the figures indicating these units may mean one of the two amenities or both of them.

Relevant matter which went into the preparation of this statement came from the concerned directorates and universities etc. as well as the various local bodies.

Information provided in this statement is by and large for the year 1970-71.

Statement VI : Trade, commerce, industry & banking

The purpose of this statement is to provide certain essential data in order to facilitate a study of the economy of the various towns in a district. Particulars regarding trade, commerce, industry have been given by mentioning the three most important imported, exported, and manufactured commodities. The information provided here, however, does not reflect the volume of trade in terms of money. The number of banks given in Col. 12 in this statement included both the commercial and co-operative banks. The credit societies are those which provide loans for agricultural or non-agricultural purposes.

The information for this statement was collected from the Directorate of Industries, Reserve Bank of India, and the Registrar Co-operative Societies. The statement refers to the year 1969-70, but in some cases, as for example in the case of banks, figures for even upto the earlier part of 1972 have been included.

Statement VII : Population by religion

This statement projects before us the picture of the spread-up of various religions at town level in this State. The towns have been presented in alphabetical order and persons belonging to a particular religion have been shown sex-wise males and females. The statement covers Buddhism, Christianity, Hinduism, Islam, Jainism, Sikhism and two other categories, i.e. "Other Religions and Pursuasions" and the "Religion not stated". "The information for this statement was obtained from the table No. C-VII of the Census 1971.

APPENDICES

Appendix (i)

Appendix (i) indicates the location of the towns in the State. The towns have been arranged serially in alphabetical order and against each town, its District and Tehsil have been indicated.

Appendix (ii)

In this appendix towns have been arranged in order of population-size in descending order with alphabetical order of each town being indicated against it.

Appendix (iii)

This appendix presents the towns districtwise, and within the districts in the order of population-size. The order of districts is in accordance with their ascending code numbers.

Appendix (iv)

The purpose of this appendix is to give related information in respect of the outgrowths of the towns. For this purpose only relevant columns of the various statements have been used. Towns having outgrowths have been star marked in statements I, IV, V, VI and VII.

Appendix (v)

This appendix gives firstly the categories of various colleges as Arts, Science etc. and secondly, it indicates the number of towns having the various types of colleges.

Primary Census Abstract

The Town-wise Primary Census Abstract provides information regarding area, number of occupied residential houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literates and educated persons, and the break up of the total population into workers (nine broad industrial categories) and non-workers sex-wise. The totals for males have also been provided in each case. The Town-wise Primary Census Abstract is being presented, firstly, for the State as a whole, then followed by towns (in alphabetical order) unlike in the case of District Census Handbook Part-B, wherein Primary Census Abstract at district, tehsil etc. level is also included. The same concepts of urban area, as discussed earlier, have been followed in the case of Primary Census Abstract.

For the Urban Agglomeratoins data regarding all the individual components alongwith that of core towns have been presented in a consolidated manner at one place. In order to maintain the alphabetical sequence in each cases only the names of the constituent towns, minus data, feature at the place in order of their alphabetical sequence. An indication "See such and such urban agglomeration" has been put against such towns. The urban part-villages or outgrowths have been accommodated alongwith their core towns and the constituents of all the outgrowths have been explained with the help of footnotes.

The urban areas have, of course, been received from the municipalities and tehsils and in few cases, for the part-villages, the concerned approximate urban areas have been made use of. Whereas in the case of the State Primary Census Abstract (Urban) the area figures have been given upto one decimal point, in the case of towns such figures take note of upto two decimal points.

Changes in the presentation of Primary Census Abstract

The distribution of population by broad industrial categories has been made on the 1961 pattern except for the fact that Category III of 1961 has been divided into two categories viz., Category III workers in Livestock, Forestry, Fishing, Hunting, Plantations, Orchards, and allied activities and Category IV-workers in Mining and Quarrying. The category IV of 1961, namely, workers at Household Industry have been brought under Category V namely workers in Manufacturing, Servicing, Repairing etc. But the two are distinguished by suffixes (a) and (b) viz., Category V(a) at Household Industry and Category V(b) Workers in Manufacturing etc. other than Household Industry. There is no other change to the remaining broad industrial categories of workers and non-workers except for the fact that 'business services' as also tea stalls and restaurants which were included in Category IX at the 1961 Census are now included in Category VII namely Workers in Trade and Commerce.

Workers and non-workers — change in concept

Wide variations in the proportions of workers obtaining in 1961 and 1971 may be observed. The broad

classification of workers in the two Censuses is not comparable on account of a significant conceptual difference. While at the 1961 Census, stress was laid on work so that all people who work, including family workers, who are not in receipt of any income, and/or who can not earn enough for their maintenance were also included as 'Workers', at the 1971 Census the persons have been classified for their economic activity on the basis of what a person had returned as his main activity. The main activity was first ascertained according as he spent his time basically as a 'worker' producing goods and services or as a 'non-worker'. Thus, those who had returned themselves as housewives or students or retired persons etc, for their main activity have been classified accordingly under the category of Non-workers. For regular work in industry, trade or service the reference period was the week prior to the enumeration (which was a fortnight in 1961) and for seasonal work such as agriculture etc. the last one year was taken as a reference period.

CHAPTER II

ANALYTICAL NOTE

Urban Development in Rajasthan

Before going over to a detailed analysis of the urban data in respect of this State we may first make here some general observations regarding the urban developments in this state in the all-India context.

A look at the following table, will show that the urban population of Rajasthan registered a decrease in 1911 and 1921 to the extent of 4.83 and 0.03 per cent respectively. From 1931 onwards the urban population in this state has shown a progressive increase in percentage except for the year 1961 when the decadal percentage went up by 11.04 only. Compared with the all-India urban population figures, it will be observed that the growth rate in Rajasthan has been lower except in 1971 when Rajasthan had an edge over the all-India increase in urban population by registering an increase of 38.47 per cent, as against the all-India figures of 38.22 per cent.

TABLE No. 1

GROWTH OF POPULATION

	Rajasthan						All India					
	Total		Rural		Urban		Total		Rural		Urban	
Census Year	Population	Decadal percentage variation	Population	Decadal percentage variation	Population	Decadal percentage variation	Population	Decadal percentage variation	Population	Decadal percentage variation	Population	Decadal percentage variation

1931 ..	11,747,974	+14·14	10,018,769	+13·63	1,729,205	+17·21	278,867,430	+11·00	255,411,441	+14·46	33,455,989	+19·12
1941 ..	13,863,859	+18·01	11,746,758	+17·25	2,117,101	+22·43	318,539,060	+14,23	274,385,763	+7·43	44,153,297	+31·97
1951 ..	15,970,774	+15·20	13,015,499	+10·80	2,955,275	+39·59	360,950,365	+13·31	298,509,175	+8·79	62,441,190	+41·4
1961 ..	20,155,602	+26·20	16,874,124	+29·65	3,281,478	+11·04	439,072,582	+21·64	360,142,827	+20·65	78,929,755	+26·412
1971 ..	25,765,806	+27·83	21,222,045	+25·77	4,543,761	+38·47	548,159,652	+24·84	439,045,675	+21·91	+109,113,977	+38·22

Table given below shows the percentage of urban population to total population. It will be seen that in this respect Rajasthan occupies 10th position among all the states excepting the Union Territories and shows a higher percentage of urban population to total population as compared with such states as Kerala, Madhya Pradesh, Uttar Pradesh, Bihar, Orrisa, Himachal Pradesh etc.

TABLE No. 2

PROPORTION OF URBAN POPULATION IN EACH STATE (ARRANGED IN DESCENDING ORDER OF PERCENTAGE OF URBAN POPULATION)

Country/State/Union Territory	Total Population	Urban Population	Percentage of urban population to total population
1	2	3	4
INDIA	547,949,809	109,094,309	**19·91**
1 Maharashtra ..	50,412,235	15,711,211	31·17
2 Tamil Nadu ..	41,199,168	12,464,834	30·26
3 Gujarat ..	26,697,475	7,496,500	28·08
4 West Bengal ..	44,312,011	10,967,033	24·75
5 Mysore ..	29,299,014	7,122,093	24·31

7 Andhra Pradesh	43,502,708	8,402,527	19·31
8 Jammu and Kashmir ..	4,616,632	858,221	18·59
9 Haryana ..	10,036,808	1,772,959	17·66
10 RAJASTHAN ..	25,765,806	4,543,761	17·63
11 Madhya Pradesh	41,654,119	6,784,767	16·29
12 Kerala ..	21,347,375	3,466,449	16·24
13 Meghalaya ..	1,011,699	147,170	14·55
14 Uttar Pradesh ..	88,341,144	12,388,596	14·02
15 Manipur ..	1,072,753	141,492	13·19
16 Tripura ..	1,556,342	162,360	10·43
17 Bihar	56,353,369	5,633,966	10·00
18 Nagaland ..	516,449	51,394	9·95
19 Assam* ..	14,957,542	1,326,981	8·87
20 Orissa ..	21,944,615	1,845,395	8·41
21 Himachal Pradesh	3,460,434	241,890	6·99
Union Territories	6,341,021	4,348,531	68·58

*Includes Mizo district now constituted as Union Territory of Mizoram.

NOTE :—Union Territories combined.

We may now proceed with the analysis of urban data with the help of various tables. In the 1971 Census, 12 towns belonging to different categories, civic administrationwise, were added to the list of the towns. Of these 6 are Census Towns, 5 municipal towns, and 1 is notified area, as is evident from this following table:

TABLE No. 3

TOWNS ADDED IN 1971 CENSUS

Name of the Town	Population
1	2
1 Sadulshahar (M)	7,648
2 Mandi Padampur (P)	6,359
3 Bisau (M)	10,417
4 Khairthal (M)	10,687
5 Man town (NAC)	22,179
6 Sanganer (P)	11,617
7 Todaraisingh (M)	10,833
8 Sumerpur (P)	10,438
9 Jahazpur (M)	9,313
10 Begun (P)	8,348
11 Chhipabarod (P)	8,704
12 Pirawa (P)	7,277

No town was declassified in 1971, as may be seen from the table given below:

TABLE No. 4

TOWNS DECLASSIFIED IN 1971

Name of the Town	Population
1	2
NIL	

The districtwise proportion of urban to total population in descending order for each district in the state has been presented in the following table. Whereas Bikaner district has the highest such percentage, 41.38, Jalor district has the lowest, i.e. 4.42.

TABLE No. 5

DISTRICTWISE PROPORTION OF URBAN POPULATION IN DESCENDING ORDER

District	Total Population	Urban Population	Percentage of urban population to total population
1	2	3	4
1 Bikaner ..	573,149	237,151	41·38
2 Ajmer ..	1,147,729	432,110	37·65
3 Jodhpur ..	1,152,712	368,238	31·95
4 Jaipur ..	2,482,385	745,876	30·05
5 Churu ..	874,439	258,628	29·58
6 Kota ..	1,143,870	275,051	24·05
7 Sirohi ..	423,815	75,717	17·87
8 Tonk ..	625,830	109,194	17·45
9 Jhunjhunun ..	929,230	162,036	17·44
10 Sikar ..	1,042,648	177,548	17·03
11 Ganganagar ..	1,394,011	229,769	16·48
12 Jaisalmer ..	166,761	24,347	14·60
13 Bundi ..	449,021	65,548	14·60
14 Bharatpur ..	1,490,206	205,095	13·76
15 Udaipur ..	1,803,630	221,899	12·30
16 Nagaur ..	1,262,157	154,956	12·28
17 Sawai Madhopur	1,193,528	142,086	11·90
18 Pali	970,002	108,431	11·18
19 Bhilwara ..	1,054,890	116,306	11·03
20 Chittaurgarh ..	944,981	97,874	10·36
21 Jhalawar ..	622,001	58,805	9·45
22 Alwar ..	1,391,162	126,882	9·12
23 Barmer ..	774,805	56,225	7·26
24 Dungarpur ..	530,258	31,257	5·89
25 Banswara ..	654,586	33,204	5·07
26 Jalor ..	667,950	29,528	4·42

In the case of distribution of towns by population size, in 1961 and 1971, it will be seen from the following table that much changes have occurred in the number of towns in each size-class, populationwise. The maximum number of towns, 52, in 1961 belonged to class IV. In 1971 also the highest number, i.e. 67, belongs to the same class. To class I, there has been one addition in 1971 raising the number of cities in

the State to 7. The lowest number of the towns, 4, in 1961 belonged to class II; in 1971 the lowest number, 4, belongs to class VI. As in 1961, in 1971 also the highest percentage of urban population to total population obtains in the case of class I towns, though the percentage has risen from 37.84 in 1961 to 40.94 in 1971. Again, as in 1961, so also in 1971, the lowest such percentage belongs to class VI towns, the percentage being 1.04 and 0.36 respectively as may be seen from the following table:

TABLE No. 6

DISTRIBUTION OF TOWNS BY SIZE CLASS AND POPULATION SIZE 1961 AND 1971

Size-class and population size	No. of towns in 1961	Population	Percentage to total population	No. of towns in 1971	Population	Percentage to total population
1	2	3	4	5	6	7
I (100,000 & over)	6	1,241,562	37·84	7	1,860,326	40·94
II (50,000—99,999)	4	241,128	7·35	7	488,251	10·75
III (20,000—49,999)	23	667,337	20·34	31	910,133	20·03
IV (10,000—19,999)	52	707,581	21·56	67	936,859	20·62
V (5,000—9,999)	51	389,611	11·87	41	331,693	7·30
VI (Below 5,000)	9	34,259	1·04	4	16,499	0·36

In terms of the civic administration status, out of the total of 157 towns, 134 are governed by municipal boards, 11 by municipal councils, 10 by gram panchayats; and 2 have other status as is evident from the following table:

TABLE No. 7

TOWNS BY CIVIC STATUS

Size class/and population size	Total No. of towns	Number of towns having: Municipal Board	Municipal Council	Nagar Panchayat	Gram Panchayat	Other Status
1	2	3	4	5	6	7
I (100,000 & over) ..	7	..	7	..	..	..
II (50,000—99,999) ..	7	3	4	..	..	..
III (20,000—49,999) ..	31	29	..	..	..	2
IV (10,000—19,999) ..	67	64	..	..	3	..
V (5,000—9,999) ..	41	34	..	..	7	..
VI (Below 5,000) ..	4	4	..	..	..	..
Total ..	157	134	11	..	10	2

Information regarding the frequency of towns by functional categories, in 1961 and 1971 Censuses has been projected in the following table. It will be seen that there have been appreciable changes in the categories of the towns during the inter-censal period. The number of towns in the functional category "Industry" has risen to 8 in 1971 from 7 in 1961. It will also be seen that the number of towns having functional categories concerned with trade, commerce, transport, and industry etc. in 1971 is greater as compared with that in 1961. The functional categories of the towns by their size class have been projected in the table given below:

TABLE No. 8

FUNCTIONAL CATEGORY 1961—1971

Functional categories	No. of towns in 1961	No. of towns in 1971
1	2	3
1 Primary activity	30	29
2 Industry	7	8
3 Trade & Commerce	1	2
4 Transport	2	3
5 Service	20	14
6 Service-cum-Transport ..	1	..
7 Service-cum-Industry	10	8

So far as the rainfall figures are concerned, four towns recorded rainfall in the range of 100—200 mm during the years 1961—70, and only two towns between 100—110 mm, while in the case of one town, Mount Abu, such figures exceeded 1101 mm during the same period. The largest number of towns, 25, in this context falls in the 601—700 mm range. Rainfall figures for 29 towns were not available. As temperature figures for many towns were not available, no comparative analysis has been possible.

As regards the distances of the towns from the nearest city, it will be seen from the table below that the largest number of the towns, 40, have Jaipur as their nearest city and these towns belong to classes I, II, III, IV and V. Taking all towns an dall cities together it will be seen that the maximum number of towns falls in the 100 km and above range, whereas the second largest number belongs to the distance-category 51—100 km in terms of distance of towns from the nearest cities. As very few towns belong to the first 3 distance ranges, it may be concluded that the towns are generally situated at considerable distances from the cities. Only 14 towns have their nearest cities belonging to adjoining States.

TABLE No. 10
DISTANCE OF TOWNS FROM THE NEAREST CITY

Name of City	Size-groups of towns to which it is the nearest city	Total number of towns	Numbers of towns which are within a distance of				
			Upto 10 km	11—25 km	26—50 km	51—100 km	101 km & above
1	2	3	4	5	6	7	8

Seen in terms of the distance groups of various towns in relation to the district head-quarters, it will be observed from the following table that the largest number of the towns is situated within 51-100 km from district head-quarter followed by the towns in the distance-range 26-50 km:

TABLE No. 11

DISTANCE OF TOWNS FROM DISTRICT HEAD-QUARTERS

Name of district Head quarter	No. of towns within				
	Upto 10 km	11-25 km	26-50 km	51-100 km	Above 100 km

There are as many as 68 towns which are not connected by rail. In terms of distance from the nearest rail heads, the maximum number of such unconnected towns belongs to the above 25 km distance-range. All the towns have bus stand. There are no sea ports or regular ferry services in the State. The following table gives information regarding number of towns which are not connected by rail and their distance from the nearest rail heads:

TABLE No. 12

TOWNS NOT CONNECTED BY RAIL

Distance from the nearest rail heads	Number of towns
1	2
Upto 1 km	2
2 to 5 km	14
6 to 10 km	8
11 to 15 km	6
16 to 25 km	11
Above 25 km	27

The following table shows per capita receipt and expenditure figures by size-class of towns. It will be seen that the highest percentage of total receipt obtains in the towns belonging to class VI and the lowest in those belonging to class V. As regards the receipt through taxes, the highest percentage obtains in class VI and the lowest, again, in those of class V. The highest per capita receipt as well as the expenditure figures obtain in class VI towns (Rs. 37.66 and Rs. 38.98 respectively), while lowest per capita receipt and expenditure figures obtain in class V towns (Rs. 10.86 and Rs. 10.10 respectively):

TABLE No. 13

PER CAPITA RECEIPT AND EXPENDITURE BY SIZE-CLASS OF TOWNS

Size-class of Towns	No. of Towns	Per Capita						
		Receipt (in Rs.)			Expenditure (in Rs.)			
		Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	Expenditure on public health and conveniences	Expenditure on public institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9
I (100,000 & over)	7	14·94	9·66	5·28	13·49	5·88	0·05	7·56
II (50,000 to 99,999)	7	15·68	8·30	7·38	15·88	5·35	0·60	9·93
III (20,000 to 49,999)	31	13·10	7·27	5·83	12·82	3·52	0·31	8·99
IV (10,000 to 19,999)	67	14·33	6·56	7·77	12·55	3·58	0·39	8·58
V (5,000 to 9,999)	41	10·86	5·44	5·42	10·10	2·56	0·33	7·21
VI (Below 5,000)	4	37·66	24·15	13·51	38·98	8·72	0·02	30·24

The following table presents the road length figures by area and per thousand population in terms of size-class of towns. For pucka roads, the highest road length figures, per hundred sq. km belong to class I and the lowest to class V, 88.85 km, and 24.94 km respectively. The highest road length figures (pucka) per thousand population, obtain in towns of class V and the lowest in those of class III, that is, 0.68 km and 0.26 km respectively. As regards the kutcha roads, the comparable figures viz., 137.50 km and 9.35 km belong, respectively to classes VI and II:

TABLE No. 14

ROAD LENGTH BY AREA AND POPULATION

Size-class of Towns	Per 100 sq km		Per 1000 population	
	Road length (pucka)	Road length (kutcha)	Road length (pucka)	Road length (kutcha)
1	2	3	4	5
I (100,000 & over)	88·85	14·70	0·36	0·06
II (50,000—99,999)	71·60	9·35	0·38	0·05
III (20,000—49,999)	50·73	27·88	0·26	0·15
IV (10,000—19,999)	25·13	22·15	0·37	0·33
V (5,000— 9,999)	24·94	17·85	0·68	0·49
VI (Below 5,000)	68·75	137·50	0·67	1·33

Information about the types of sewerage/drainage existing in the towns of this state is contained in the following table. Size-classwise, majority of the towns have open surface drainages followed by kutcha drainage in the second place. Only 3 towns have partial sewerage facilities and these belongs to class I. Out of 157 towns the incidence of water-borne latrines is confined to 104 towns only:

TABLE No. 15

DISTRIBUTION OF TOWNS BY TYPE OF SEWERAGE AND SIZE-CLASS OF TOWNS

Type of sewerage/drainage	Size-class of Towns					
	I (100,000 & over)	II (50,000–99,999)	III (20,000–49,999)	IV (10,000–19,999)	V (5,000–9,999)	VI (Below 5,000)
1	2	3	4	5	6	7
Open surface drains	4	7	25	51	22	1
Sewerage/Open surface drains	3	..	..	..	..	..
Kutcha drains	..	..	6	12	11	3
Drains	..	..	..	1	3	..
Not applicable	..	..	..	3	5	..

Of the total number of latrines in all the towns the incidence of water-borne latrines is 17.98 per cent, of 'service' latrines 75.52 per cent and that of 'others' 6.50 per cent. It will, therefore, be seen that the extent of conversion of 'service' and 'others' types of latrines to water-borne on the whole will be to the tune of 82.02 per cent. In all, only 104 towns have water-borne latrines, though partially; and 53 have no water-borne latrines, whatsoever. Thus the extent of conversion of 'service' and 'others' types of latrines to water-borne latrines comes to 100 per cent in the case of 53 towns, and 80,85 per cent in case of the 104 towns having partial incidence of water-borne latrines, as is evident from the statement given below:

Category	No. of towns	Types of latrines			
		Water-borne	Service	Others	Total
1	2	3	4	5	6
Towns having water-borne latrines ..	104	43,117 (19·15)	169,642 (75·34)	12,397 (5·51)	225,156 (100·00)
Towns not having water-borne latrines	53	..	11,489 (78·20)	3,202 (21·80)	14,691 (100·00)
Total ..	157	43,117 (17·98)	181,131 (75·52)	15,599 (6·50)	239,847 (100·00)

As regards the disposal of night-soil, it will be seen from the following table that in majority of the towns the headload and cartload methods are most prevalent. The use of trucks/tractors/wheelbarrows is also made in some towns. In 3 towns, only the disposal of night-soil is partly effected through sewerage system.

TABLE No. 16

DISTRIBUTION OF TOWNS BY METHOD OF DISPOSAL OF NIGHT-SOIL AND SIZE-CLASS OF TOWNS

Method of disposal of night-soil	Size-class of Towns						Remarks
	I (100,000 & over)	II (50,000–99,999)	III (20,000–49,999)	IV (10,000–19,999)	V (5,000–9,999)	VI (Below 5,000)	
1	2	3	4	5	6	7	8

6 WB	..	..	2	4	..	1	..
7 Not available	..	..	1	3	1	..	..

In all 116 towns have protected water supply scheme and 41 towns are without these schemes. The total population of the towns which do not have protected water supply is, 545,870. Of the 157 towns 145 do not have fire-fighting services and they fall in size-classes II, III, IV, V and VI, their number being 3, 30, 67, 38, and 7 respectively. While 155 towns are electrified 2, namely, Anupgarh and Sadulshahar towns of Ganganagar district are not electrified and these fall in classes V and VI respectively.

Coming to the medical facilities, it will be seen from the following table that each size-class of towns has some hospitals with class IV having the highest number, 54. Similarly, dispensaries (allopathic and ayurvedic) are also spread over all size-classes; their largest number being in class III towns. It will, however, be seen that T.B. Clinics and other types of medical institutions do not cover each size-class of the towns:

TABLE No. 17

Type of medical institutions	Size-class of Towns					
	I (100,000 & over)	II (50,000—99,999)	III (20,000—49,999)	IV (10,000—19,999)	V (5,000—9,999)	VI (Below 5,000)
1	2	3	4	5	6	7
1 Hospitals ..	7	7	28	54	26	3
2 T.B. Clinics ..	7	6	11	2	..	..
3 Dispensaries ..	7	7	20	16	2	

TABLE No.17—*concld.*

10 Ayurvedic Dispensaries	7	4	17	25	22	2
11 Unani Hospitals ..	2	1	..	..	..	..
12 Unani Dispensaries	5	1	4	4	1	..
13 Homoeopathic Hospital	1	..	..	..	..	..
14 Homoeopathic Dispensaries	3	..	1	3	1	..

As may be seen from the following table, the highest number of beds per thousand population, belongs to the towns of class I and the lowest to those of class VI (4.48 and 0.97 respectively). Similarly, the highest number of beds in medical institutions obtains in class I and the lowest in class VI, 8334 and 16 respectively. The average for all the 157 towns in respect of the number of beds per thousand population comes to 3.14:

TABLE No. 18

Size-class of Towns	No. of towns	No. of beds in medical institutions	No. of beds per 1000 population
1	2	3	4
I (100,000 & over) ..	7	8,334	4·48
II (50,000—99,999) ..	7	1,315	2·69
III (20,000—49,999) ..	31	2,400	2·64
IV (10,000—19,999) ..	67	1,692	1·81
V (5,000 — 9,999) ..	41	498	1·50
VI (Below 5,000) ..	4	16	0·97
Total ..	157	14,255	3·14

As regards the number of secondary and primary schools per thousand population in terms of size-class of towns, the highest incidence of secondary schools, that is, 0.35, obtains in class IV and the lowest, 0.09, in classes I and II towns. The highest incidence of primary schools per thousand population, belongs to class VI and the lowest to class I towns (0.55 and 0.28) respectively. Only 23 towns have stadia. In all 101 towns have cinemas as against 56 which do not have them. Towns not having cinemas fall into classes III, IV, V and VI towns in the order of 3, 20, 29 and 4 respectively. While 140 towns have libraries, 17 do not have them. The towns without libraries fall in classes IV, V and VI having 6, 9 and 2 towns in that order. Of the 157 towns, 33 have auditoria/drama halls and 124 do not have them and these latter fall into all the six classes of towns having 1, 4, 20, 59, 36 and 4 towns respectively. Information regarding primary and secondary schools per 1,000 population is contained in the following table:

TABLE No. 19

PRIMARY AND SECONDARY SCHOOLS PER 1,000 POPULATION

S. No.	Size-class of Towns	No. of towns	No. per 1000 population	
			Secondary School	Primary School
1	2	3	4	5
1	I (100,000 & over)	7	0·09	0·28
2	II (50,000—99,999)	7	0·09	0·40
3	III (20,000—49,999)	31	0·09	0·34
4	IV (10,000—19,999)	67	0·35	0·33

6	VI (Below 5,000)	4	0·24	0·55
	Average ..		0·15	0·33

The position of various types of colleges in the State has been depicted in the Appendix V. Against each type of colleges is shown the number of towns in which such colleges are located.

In order to have some insight into the commercial and industrial aspects of the town life information has been collected regarding the three important commodities manufactured, imported or exported from each town. In case of few towns there does not apparently seem to be some correlation between the commodities manufactured, imported or exported e.g. the commodity manufactured may be plastic goods but its raw material and finished product may not appear among the important commodities imported or exported respectively from the town. The fact is that the raw material and finished product do not appear at high level among the commodities imported or exported and since information has been gathered in respect of only three important commodities the name of these have not appeared in the statement depicting the data.

We may now proceed with the analysis of the data in respect of the three important commodities manufactured in each town. Information is available in case of 130 towns in respect of all the three commodities. It is not available for any commodity in case of a class IV town viz. Rajakhera; for second and third important commodities for 2 class IV towns namely Pratapgarh and Nawai, and, 3 class V towns namely Salumbar, Nadbai and Kushalgarh; and, for third important commodity in case of 3 class III towns viz. Barmer, Baran and Makrana, 10 class IV towns viz. Nathdwara, Phalodi, Jaisalmer, Nimbahera, Sadri, Gangashahar, Pilani, Phulera, Sagwara and Kapasan, and, for 8 class V towns viz. Mandawa, Chhoti Sadri, Deshnoke, Sarwar, Pushkar, Bhinasar, Jobner and Sujangarh.

Edible oils, hydrogenated oil, ginned and baled cotton, textiles, wool and woollen goods, blankets, leather and leather goods, pesticides, engineering goods, tools and implements, zari, gota, kinari, plastic goods, medicines, soap, cement and cement articles, lime, various types of stones, alloys, iron and steel goods and implements, scissors and razors, hosiery, carpets, electric goods, felt, wooden and steel furniture, handicraft articles, paper, earthenwares, henna, minerals, agricultural tools and implements, automobile parts and spares, enamelled and costume jewellery, gum, poultry, rose-water and hand mills form the first important

commodities manufactured in various towns of the Rajasthan State. The first important commodity manufactured by size-class of towns and industrial category is presented in the following table:

TABLE No. 20-A

IMPORTANT COMMODITIES MANUFACTURED BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

(First Important Commodity)

Industrial Category division (Major group/ Minor group)		Size-class of Towns											
		I (100,000 & over)		II (50,000—99,999)		III (20,000—49,999)		IV (10,000—19,999)		V (5,000—9,999)		VI (Below 5,000)	
1		2		3		4		5		6		7

As regards information about the three important commodities imported it was available in respect of all the three commodities from 146 towns; in respect of two commodities from 6 towns, of which five are class III (Dausa, Sambhar, Jalor, Neem-ka-thana and Chaksu) and one class V town (Nadbai); in respect of one commodity only from two class V towns (Bagar and Pindwara); and, no information was available in this regard from three towns, two of which are class IV (Phulera and Jhalrapatan) and one class V (Parbatsar).

Food grains, sugar, mustard, groundnut, condiments, jaggery, hydrogenated oil, vegetables, tea, textiles, cotton, wool, gota, chemicals, dyes and colours, medicines, fertilisers, iron, stainless steel, silver, diesel oil, wood, stationary articles, machinery, various types of stones, grocery, articles of general merchandise, gunny bags and oil seeds are the commodities which form first important commodity imported by the various towns of the State. The following table shows the first important commodity imported by size-class of the town and industrial category:

TABLE No. 21-A

IMPORTANT COMMODITIES IMPORTED BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

(First Important Commodity)

Industrial catetory division (Major group/ Minor group)	Size-class of Towns											
	I (100,000 & over)		II (50,000—99,999)		III (20,000—49,999)		IV (10,000—19,999)		V (5,000—9,999)		VI (Below 5,000)	
1	2		3		4		5		6		7	
Division	**6**	**7**		**7**		**31**		**65**		**40**		**4**	
Major group	60	5		7		26		56		35		3	
Minor group	600	3	(Food grains)	1	(Food grains)	9	(Bajra/Rice/ Wheat/Food grains)	24	(Rice/Wheat/ Food grains)	18	(Wheat/Food grains/Rice)	..	
	601	1	(Sugar)	2	(Sugar/Mustard)	6	(Sugar/ Groundnut)	12	(Sugar/Chillies/ Groundnut/ Jaggery/ Coriander)	6	(Sugar/Hydrogenated oil/ Vegetables/ Tea)	2	(Mustard)
	602	1	(Wool)	4	(Fine cloth/ Wool)	11	(Cloth)	20	(Cloth/Cotton/ Gota)	11	(Cloth/Cotton)	1	(Cotton)
Major group	61	2		..		2		3		1		1	
Minor group	610	1	(Chemicals)	—		2	(Dying colours/ Fertilisers)	1	(Colours)	—		1	(Medicines)
	613	1	(Iron)	—		—		2	(Stainless steel/ Silver)	1	(Iron)	—	
Major group	62	—		—		—		1		2		—	
Minor group	620	—		—		—		—		1	(Diesel oil)	—	
	621	—		—		—		1	(Teak wood)	—		—	
	622	—		—		—		—		1	(Stationery Articles)	—	
Major group	63	—		—		1		1		—		—	
Minor group	630	—		—		1	(Machinery)	1	(Machinery)	—		—	
Major group	64	—		—		2		4		2		—	
Minor group	643	—		—		1	(Stone)	1	(Soap stone)	—		—	
	649	—		—		1	(Articles of general merchandise	3	(Gunnybags / Cotton seeds/ Grocery)	2	Grocery /Articles of general merchandise	—	

Food grains, cereals, oil seeds, edible oils, hydrogenated oil, sugar, jaggery, fruits, textiles, yarn, tea, caustic soda, coal, iron and iron goods, metals, petrol, diesel oil, kerosene oil, timber, leather and leather footwear, machines, machine and automobile parts and spares, cement, building material, sculptured stones, gold, rough precious stones, bones, grocery, articles of general merchandise and copper wire make the second important commodity imported by the various towns of the State. The information regarding second important commodity imported by size-class of the town and industrial category has been shown in the following table:

TABLE No. 21-B

IMPORTANT COMMODITIES IMPORTED BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

(Second Important Commodity)

Industrial category division (Major group/ Minor group)	Size-class of Towns					
	I (100,000 & over)	II (50,000-99,999)	III (20,000-49,999)	IV (10,000-19,999)	V (5,00-9,999)	VI (Below 5,000)

Food grains, cereals and pulses, fruits, vegetables, oil-seeds, jaggery, sugar, ghee, salt, hydrogenated oil, spices, tea, cotton, yarn, textiles, hosiery, liquor, medicines, chemical colours, imitation powder, coal, toilet goods, iron and iron goods, petroleum products, engine oil, wood, ply-wood, timber, machinery goods, electric goods, stone, cement, building material, asbestos, wool articles of general merchandise, grocery, bangles, biri and handicraft articles constitute the third important commodity imported by the various towns of the State. The information regarding the third important commodity imported by size-class of the town and industrial category has been presented in the following table:

TABLE No. 21-C

IMPORTANT COMMODITIES IMPORTED BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

(Third Important Commodity)

Industrial category division (Major group/ Minor Group)	Size-class of Towns					
	I (100,000 & over)	II (50,000-99,999)	III (20,000-19,999)	IV (10,000-19,999)	V (5,000-9,999)	IV (Below 5,000)

Information in respect of the three important commodities exported is available in case of 136 towns; in respect of two commodities in case of 13 towns, of which one is class I (Alwar), 6 class IV (Dausa, Merta, Sojat, Khandela, Deoli and Bidasar) and 6 class V towns (Pindwara, Khetri, Nawa, Pokaran, Pirawa and Kushalgarh); in respect of one commodity in case of one class IV town (Phalodi) only; and, not available in respect of any commodity in case of 7 towns, of which 4 are class IV (Sirohi, Ramgarh, Phulera and Jhalrapatan), 2 class V (Nainwa and Parbatsar) and one class VI town (Indergarh).

Food grains, pulses and cereals, milk, chillies, oilseeds, edible oil, ghee, vegetables, salt, spices, fruits, sugar, textiles, wool, gota, sheep and goat, gwar, flowers, water-pots, bamboos, moondhas, hand made paper, leather and leather footwears, ballbearings, tools, handmill, stone, stone-beams slabs, cement tiles, henna and articles of general merchandise form the first important commodity exported from the various towns of the State. The following table gives the information regarding first important commodity exported by size-class of towns and industrial category:

TABLE No. 22-A

IMPORTANT COMMODITIES EXPORTED BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

(First Important Commodity)

Industrial category division (Major group/ Minor group)	Size-class of Towns											
	I (100,000 & over)		II (50,000—99,999)		III (20,000—49,999)		IV (10,000—19,999)		V (5,000—9,999)		VI (Below 5,000)

The percentage distribution of population by religion and size-class of towns has been presented in the following table. It will be seen from this table that in respect of each class of towns and in terms of percentages, the highest incidence is that of Hinduism with Islam occupying second place. The largest number of towns showing percentage of 75+in respect of Hinduism obtains in class IV. In the case of Islam also the largest number of towns falls in the same class, but in the slab of upto 10 per cent. Except Hinduism no religion shows an incidence of 75+ percentage in any class of towns, though in class III Islam shows an incidence of 51.74 per cent in 1 town. Buddhism and Christianity have an incidence of only upto 10 per cent in the towns of this State. Jainism, however, has an incidence of 11—25 per cent in 35 towns and an incidence of 26—50 per cent in 1 town. Sikhism has an incidence of 11—25 per cent in only 3 towns. The incidence of other religions and pursuasions is restricted upto 10 per cent.

TABLE No. 23

PERCENTAGE DISTRIBUTION OF POPULATION BY RELIGION AND SIZE-CLASS OF TOWN

Size-class of Towns	Total Number of towns	Percentage distribution of population by religion	Religion							
			Buddhism	Christianity	Hinduism	Jainism	Islam	Sikhism	Other religions and persuasions	Religion not stated
1	2	3	4	5	6	7	8	9	10	11
I (100,000 & over) ..	7	(a) 75+	..	..	7	..	..	..	..	..

Coming to the size of households by size-class of towns, we find that the sizes are more or less constant in each size-class and range between 5.4 and 5.6 in terms of the size of households. The information re-

garding household size by size-class of towns is contained in the following table:

TABLE No. 24

HOUSEHOLD SIZE BY SIZE-CLASS OF TOWNS

Size-class of towns	Household-size
1	2
I (100,000 & over)	5·5
II (50,000—99,999)	5·5
III (20,000—49,999)	5·6
IV (10,000—19,999)	5·5
V (5,000— 9,999)	5·4
VI (Below 5,000)	5·5

Information regarding the percentages of distribution of workers by size-class of towns and industrial category has been presented in the following table. Size-classwise, the highest percentages of workers in towns belonging to classes I to IV is in industrial category IX. The highest percentge of workers in towns of class V belongs to industrial category I and in class VI towns to industrial category VII. The lowest percentage of workers in respect of the towns of all the size-classes is confined to industrial categories III and IV:

TABLE No. 25

PERCENTAGE DISTRIBUTION OF WORKERS BY SIZE-CLASS OF TOWNS AND INDUSTRIAL CATEGORY

Industrial Category	Size-class of Towns					
	I (100,000 over)	II (50,000—99,999)	III (20,000—49,999)	IV (10,000—19,999)	V (5,000—9,999)	VI (Below 5,000)
1	2	3	4	5	6	7
I	2·23	9·10	12·53	20·49	24·01	14.68
II	1·29	2·75	3·30	5·99	6.93	3·01
III	0·52	0·60	0·86	1·04	1·12	1·40
IV	0·74	0·36	0·46	0·44	0·48	0·40
Va	5·40	6·90	7·37	8·10	9·08	4·27
Vb	17·06	20·78	15·67	10·62	9·08	12·66
VI	4·12	4·85	4·87	3·98	4·81	2·25
VII	18·72	20·35	19·09	18·81	17·04	30·76
VIII	13·73	7·15	8·54	6·17	4·39	5·24
IX	36·13	27·16	27·31	24·36	23·26	25·33

It will be seen from the following table that in terms of size-class, the highest density of population, per sq. km., obtains in class I towns (cities) which are 7 in numbers. The lowest density per sq. km, obtains in the towns belonging to class V numbering 41 in all, the density here being only 367 as against 2,440 in the case of class I towns, proving that the larger the town, the larger is the density of population. This hypothesis, however, does not seem to apply in case of class VI towns where the density of population is higher than that obtaining in class IV and V towns..

TABLE No. 26

DISTRIBUTION OF TOWNS BY POPULATION-SIZE AND DENSITY

Size-class of Towns	Total No. of towns	Total population	Density per sq. km.
1	2	3	4
I (100,000 & over) ..	7	1,860,326	2,440
II (50,000—99,999) ..	7	488,251	1,897
III (20,000—49,999) ..	31	910,133	1,908
IV (10,000—19,999) ..	67	936,859	680
V (5,000— 9,999) ..	41	331,693	367
VI (Below 5,000) ..	4	16,499	1,010

The following table shows the average number of Census households per census house by density-range. To arrive at the density-range shown in the present and other tables, the entire density-range for all the towns of the state has been devided into octiles and each unit of octile has been used to constitute the range. It is evident from this table that in terms of density range, per sq km, the average number of households per census house is the highest, i.e., 1.12 in the density-range 25,001—30,000 and the lowest, i.e. 1.03, in the density-range 15,001—20,000 and 20,001—25,000. Hence the hypothesis that the towns with higher density of population have proportionately larger number of households per census house is not substantiated.

TABLE No. 27

NUMBER OF HOUSEHOLDS PER CENSUS HOUSE BY DENSITY-RANGE

Density range	No. of towns	Average number of house holds per Census house
1	2	3
Upto 1,000	64	1·06
1,001— 5,000	62	1·06
5,001—10,000	16	1·04
10,001—15,000	5	1·07
15,001—20,000	2	1·03
20,001—25,000	2	1·03
25,001—30,000	4	1·02
30,001+	2	1·15

In terms of size-class of towns, the number of females per thousand males is the highest in class V and the lowest in class VI towns, the number being 907 in the former class and 843 in the latter. The table below, however, does not lend support to the hypothesis that larger the size of population of a town, smaller the number of the females per thousand males. As may be seen from the following table smallest number of females per thousand males belongs to the towns having the smaller sizes of the population:

TABLE No. 28

SEX RATIO BY POPULATION SIZE

Size-class of Towns	Total No. of towns	Total population	No. of females per 1000 males
1	2	3	4
I (100,000 and over)	7	1,860,326	854
II (50,000—99,999) ..	7	488,251	866
III (20,000—49,999) ..	31	910,133	890
IV (10,000—19,999) ..	67	936,859	897
V (5,000— 9,999) ..	41	331,693	907
VI (Below 5,000) ..	4	16,499	843

In terms of density per sq km, the number of females per thousand males is the highest in the density range 30,001+and the lowest in the density-range 20,001—25,000 per sq km, the number of towns in both the cases being 2. The following table does not lend support to the hypothesis higher the density range lower is the number of females per thousand males.

TABLE No. 28-A

SEX RATIO BY DENSITY-RANGE

Density-range	No. of towns	Number of females per 1000 males
1		3
Upto 1,000	[illegible]	901
1,001— 5,000	62	862
5,001—10,000	16	892
10,001—15,000	5	855
15,001—20,000	2	865
20,001—25,000	2	853
25,001—30,000	4	913
30,001+	2	972

As regards the proportion of scheduled castes to total population in terms of percentage and size-class of towns, it is the highest in size-class VI, and lowest in size class I as may be seen from the following table. The table lends support to the idea that larger the 'population size of a town, smaller is the proportion of scheduled castes as services will be mechanised :

TABLE No. 29

PROPORTION OF SCHEDULED CASTES TO TOTAL POPULATION

(IN TERMS OF PERCENTAGE)

Size-class of Towns	Total Population	Proportion of scheduled castes to total population (in terms of percentage)
1	2	3
I (100,000 and over) ..	1,860,326	11·05
II (50,000—99,999) ..	488,251	14·51
III (20,000—49,999) ..	910,133	13·14
IV (10,000—19,999) ..	936,859	14·17
V (5,000— 9,999)	331,693	15·19
VI (Below 5,000)	16,499	18·10

Coming to the position of the scheduled tribes with regard to their proportion to total population in terms of percentage and size-class of towns, it will be observed from the table below that the highest percentage of their population obtains in class V and the lowest in class VI. These figures show that it is not possible to conclude any general hypothesis about the relation of the proportion of scheduled tribes to the size-class of the towns:

TABLE No. 30

PROPORTION OF SCHEDULED TRIBES TO TOTAL POPULATION

(IN TERMS OF PERCENTAGE)

Size-class of Towns	Total population	Population of scheduled tribes to total population (in terms of percentage)
1	2	3
I (100,000 and over) ..	1,860,326	1·38
II (50,000—99,999) ..	488,251	0·37
III (20,000—49,999) ..	910,133	1·00
IV (10,000—19,999) ..	936,859	2·36
V (5,000— 9,999)	331,693	2·74
VI (Below 5,000)	16,499	0·18

Viewed in terms of the density-range per sq km the percentage of literacy is the highest in density range 5,001—10,000, i.e., 49.31 and the lowest in density range 30,001+, .i.e., 32.50 per cent. The incidence of literacy does not seem to be related to the density of the population as, surprisingly, the lowest literacy percentage obtains in the towns having the highest density-ranges. Information regarding proportion of literates by density in terms of percentage is contained in the following table:

TABLE No. 31

PROPORTIONS OF LITERATES BY DENSITY (IN TERMS OF PERCENTAGE)

Density-range per sq km	No. of towns	Percentage of literacy
1	2	3
Upto 1,000	64	34·84
1,001— 5,000	62	45·38
5,001—10,000	16	49·31
10,001—15,000	6	42·25
15,001—20,000	2	33·19
20,001—25,000	2	41·38
25,001—30,000	4	40·58
30,001+	2	32·50

The following table shows that in terms of size-class of towns, the percentage of literacy is the highest in class I i.e., 49.98 per cent, and lowest in class V, i.e. 30.18 per cent. It will also be seen that the percentage of literacy is decreasing with the decrease in the size-class of town except in case of class VI towns where an abrupt increase is to be noted, partially proving that the literacy is directly related to the size of population in a town:

TABLE No. 31-A

LITERACY BY SIZE-CLASS OF TOWNS (IN TERMS OF PERCENTAGE)

Size-class of Towns	Population	Percentage of literacy
1	2	3
I (100,000 and over) ..	1,860,326	49·98
II (50,000—99,999) ..	488,251	42·19
III (20,000—49,999) ..	910,133	38·85
IV (10,000—19,999) ..	936,859	37·51
V (5,000— 9,999)	331,693	30·18
VI (Below 5,000) ..	16,499	44·57

Before analysing the position regarding workers engaged in various sectors, we may first briefly pinpoint the characteristics of the primary, secondary and tertiary sectors of the workers. Primary sector covers cultivators, agricultural labourers, workers engaged in live-stock, forestry, fishing, hunting, and plantation, orchards and allied activities and mining and quarrying. In the secondary sector fall the workers engaged in manufacturing, servicing, processing, repairs (both household and other than household industries); construction, and other services (only workers engaged in electricity supply and gas companies). To the tertiary sector belong the workers engaged in trade and commerce, transport, storage and communication and other services (excluding workers engaged in electricity supply and gas companies).

The following table projects the proportion of females in the various worker's categories by size-class of towns. In all industrial categories the highest percentage of female workers obtains in class II (7 towns) and the lowest in class VI towns (4 towns); in primary sector, it is the highest in class V (41 towns) and lowest in class I towns (7 towns); in secondary sector, the highest percentage of the female workers belongs to class II (7 towns) and lowest in class VI towns (4 towns); the highest percentage of female participants in tertiary sector obtains in towns of class I and the lowest in those belonging to class VI, there being 7 and 4 towns respectively. The highest participation rate of females for tertiary sector obtains in class I towns and the lowest in class VI towns, and in the case of all industrial categories such participation rate is again the highest in class II and lowest in class VI towns, though near highest percentage of female workers in primary sector obtains in class V towns. It may thus be seen that the participation rate of females in the working force is higher in towns having larger size of population, specially in the case of tertiary sector:

TABLE No. 32

PARTICIPATION RATE OF FEMALES (AS PER CENT TO TOTAL FEMALE POPULATION)

Size-class of Towns	Total No. of towns	Female workers as percent to total female population in			
		All Industrial categories	Primary sector	Secondary sector	Tertiary sector
1	2	3	4	5	6
I (100,000 and over) ..	7	3·81	0·33	0·86	2·62
II (50,000—99,999) ..	7	4·66	1·20	1·65	1·81
III (20,000—49,999) ..	31	3 31	0·85	0·99	1·47
IV (10,000—19,999) ..	67	3·81	1·67	0·85	1·29
V (5,000— 9,999) ..	41	4·65	2·26	1·06	1.33
VI (Below 5,000) ..	4	2·33	0·45	0·75	1·13

The following table shows that in terms of inter-sector distribution of working force by size-class of towns, the highest percentage of workers in the primary sector belongs to class V, 32.54, and the lowest to class I, 4.84, in respect of the secondary sector, the highest percentage, i.e., 32.54 obtains in class II and

the lowest in class VI, i.e. 19.19; in the case of tertiary sector, class I towns have the highest percentage of the workers 68.58 and class V has the lowest such percentage viz. 44.69. This table supports the idea that larger the towns by population-size smaller is the primary sector:

TABLE No. 33

INTER SECTOR DISTRIBUTION OF WORKING FORCE BY SIZE CLASS OF TOWNS

Size-class of Towns	No. of towns	No. of workers as per cent to total workers in		
		Primary sector	Secondary sector	Tertiary sector
1	2	3	4	5
I (100,000 and over)	7	4·84	26·58	68·58
II (50,000—99,999)	7	12·80	32·54	54·66
III (20,000—49,999)	31	17·15	27·91	54·94
IV (10,000—19,999)	67	27·96	22·70	49·34
V (5,000— 9,999)	41	32·54	22·77	44·69
VI (Below 5,000)	4	19·49	19·19	61·32

*5 The nearest place for which temperature figures are available is Bhilwara, max. 45·0 and min. 4·0.

*6 Temperature figures for Jaipur, the nearest place are max. 44·9 and min. 2·2.

*7 Temperature figures for Dholpur, the nearest place are max. 49·0 and min. 1·0.

*8 The nearest place for which temperature figures are available is Kota, max. 46·2 and min. 6·0.

*9 Temperature figures are for Erinpur Road the nearest centre, max. 47·0 and min. 4·0.

*10 The nearest place for which temperature figures are available is Jhalawar, max. 45·2 and min 3·6.

*11 The nearest place for which temperature figures are available is Pilani, max. 45·0 and min. 2·0.

*12 The nearest place for which temperature figures are available is Bharatpur max. 48·0 and min. 1·0.

*13 Temperature figures for Udaipur the nearest place are max. 42·3 and min. 2·3.

*14 The nearest place for which temperature figures are available is Ajmer, max. 43·3 and min. 1·5.

*15 Temperature figures for Kota the nearest city are max. 46·2 and min. 6·0. Though Bundi Road is the railway station, Kota (35 km. from Bundi) is preferred because of better transport facilities.

*16 The nearest place for which temperature figures are available is Alwar ,max. 45·0 and min. 4·0.

†Belongs to Bhilwara District.

*1 The nearest place for which temperature figures are available is Bhilwara, Max. 45·0 and min. 4·0.

*2 Temperature figures are for 1970, for Erinpura Road, the nearest centre, max. 47·0 and min, 4·0.

*3 Temperature figures are for Jodhpur, the nearest town, max. 45·9 and min. 3·4.

*4 The nearest place for which temperature figures are available is Sikar, max. 43·6 and min. 0·8.

*5 The nearest place for which temperature figures are available is Jhalawar Max. 45·2 and min. 3·6.

*6 The nearest place for which temperature figures are available is Pilani, max.45·0 and min. 2·0.

*7 The nearest place for which temperature figures are available is Anupgarh, max. 47·0 and min. 6·0.

*8 The nearest place for which temperature figures are available is Churu, max. 46 and min. 1.

*9 Temperature figures for Jaipur the nearest place, are max. 44·9 and min. 2·2.

*10 The nearest place for which temperature figures are available is Tonk, max. 46 and min. 2.

*11 Temperature figures for 1970 based on Basic Statistics, Rajasthan 1971.

*12 The nearest place for which temperature figures are available is Dholpur, max .49·0 and min. 1.0.

†Belongs to Jhunjhunun District

NOTE :—Where ever necessary, the name of district has been given in parenthesis.

APPENDIX-III

Towns arranged districtwise and within it in order of population-size

District/Town	Population
1 Ganganagar	
1 Ganganagar	90,042
2 Hanumangarh	32,532
3 Suratgarh	17,843
4 Nohar	16,704
5 Bhadra	14,080
6 Sangaria	13,000
7 Karanpur	11,538
8 Raisinghnagar	10,977
9 Sahulshahar	7,648
10 Mani Padampur	6,539
11 Anupgarh	4,571
12 Gajsinghpura	4,475
2 Bikaner	
1 Bikaner	188,518
2 Gangashahar	13,716
3 Nokha Mandi	1,222
4 Naasar	8,804
5 Deshnoke	8,231
6 Bhinasar	6,660
3 Churu	
1 Churu	53,185
2 Sujangarh	49,073
3 Sardarsahar	38,346
4 Ratangarh	31,506
5 Rajgarh	23,179
6 Dungargarh	21,412
7 Rajalesar	12,872
8 Taranagar	12,716
9 Bidasar	11,268
10 Chhapar	9,681
11 Ratanagar	5,390
4 Jhunjhunun	
1 Jhunjhunun	32,024
2 Nawalgarh	26,565
3 Chirawa	15,241
4 Pilani	13,101
5 Udaipur	12,442
6 Bisau	13,417
7 Mukandgarh	10,154
8 Mandawa	9,851
9 Surajgarh	9,780
10 Khetri	8,669
11 Vidyavihar	6,958
12 Bagar	6,834
5 Alwar	
1 Alwar	100,378
2 Rajgarh	11,019
3 Khairthal	10,687
4 Kherli	4,798
6 Bharatpur	
1 Bharatpur	69,902
2 Dholpur	31,865
3 Deeg	22,267
4 Bari	19,249
5 Kaman	15,754
6 Bayara	15,445
7 Rajakhera	12,976
8 Weir	8,848
9 Nadbai	8,789
7 Sawai Madhopur	
1 Gangapur	32,660
2 Hindaun	27,895
3 Karauli	27,793
4 Man Town	22,179
5 Sawai Madhopur	21,105
6 Todabhim	10,454
8 Jaipur	
1 Jaipur	615,258
2 Chomu	20,180
3 Dausa	18,925
4 Sambhar	15,811
5 Bandikui	13,152
6 Phulera	12,661
7 Kotputli	12,343
8 Sanganer	11,617
9 Chaksu	10,411
10 Amber	9,893
11 Jobner	5,625
9 Sikar	
1 Sikar	70,987
2 Fatehpur	34,929
3 Lachhmangarh	22,158
4 Ramgarh	15,068
5 Khandela	12,500
6 Neem-Ka-Thana	11,612
7 Sri Madhopur	10,294
10 Ajmer	
1 Ajmer	264,291
2 Beawar	66,114
3 Kishangarh	37,405
4 Nasirabad	25,732
5 Kekri	14,997

APPENDIX-III—concld.

District/Town	Population
10 *Ajmer*—concld.	
6 Bijainagar	8,502
7 Sarwar	7,728
8 Pushkar	7,341
