FOREWORD

One of the special features of 1971 Census is a compilation of directory of all the towns of the State. It includes seven statements giving the status, growth history and functional category of towns ; physical aspects and location ; civic and other amenities ; medical, educational, recreational and cultural facilities; trade, commerce, industry and banking and population by religion. The Primary Census Abstract of each town will also be presented in this directory.

The rationale for providing wide range of other information along with the primary census data of each town derives from the fact that the demographic data of the Census are on the one hand the products of the interplay of a number of economic, cultural and social factors ; on the other hand, the demographic situation in its totality influences the economic, social and cultural developments of villages, towns and areas of higher order. It is this dynamic inter-relationship which is intended to be highlighted, by bringing together census and non-census statistics and other data in the town directory.

Along with the qualitative and quantitative data, suitable maps have also been included in the directory. One map proposes to bring out the spatial relations of the towns of different size-groups. A set of Schematic maps of some towns intend to bring out in visual focus, the spatial pattern of distribution of functional areas inside the towns of different size groups and functional categories. In the context of these two sets of visual presentation, one important demographic character of the town, the gradience of the distribution of the population in different densities, is proposed to be brought out in a third map for some towns.

It is hoped that the town directory will stimulate considerable research in the various associated disciplines in the country.

The planning of the project has been done in the Social Studies Division in the Office of the Registrar General, India, under the guidance of my colleague Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies). The data have been compiled in the offices of the Directors of Census Operations. In the compilation of the data a large number of sources had to be tapped. I avail of this opportunity to thank all my colleagues associated with the project and also the various official and non official agencies without whose co-operation it would not have been possible to collect the manifold data for all the towns of the country.

A. CHANDRA SEKHAR,
Registrar General, India

NEW DELHI :
January 31, 1972.

PREFACE

This volume is one of the innovations of the 1971 Census in the sense that very useful data in respect of every town in the State has been made available at one place. Publication of the District Census Handbooks in a systematic manner, in which data of every village and town in a district is given, was started at the time of the 1951 Census. As of before, this time also valuable information in respect of every village and town in a district is being given in it. But in the light of increasing emphasis on urbanisation and its problems, it was considered appropriate by the organisers of the 1971 Census to bring out a separate publication giving data in respect of all the towns in a State in one volume, discussing the trends according to the size-class of towns.

In all there are seven statements in which details of various amenities available in the towns are presented. The urban Primary Census Abstract gives the break up of population in each town according to sex, literacy, workers, non-workers, etc. The write up, therefore, has been divided into nine Chapters—an Introductory Chapter followed by one each on the seven statements and the urban Primary Census Abstract.

An effort has been made to make the publication interesting and more meaningful by including maps and charts. The initial decision was to include two maps in respect of every town—one on land use pattern and the other on ward-wise density of population—in addition to a general map of the State giving location of every town. For a large State like ours having 250 towns, this would have meant preparation and inclusion of 501 maps. Apart from the time factor, the publication would have become very bulky. It was, therefore, decided subsequently to make a representative selection of the towns. This has also meant a total of 41 maps, spread throughout the length and breadth of this largest State in area in the country.

Apart from Shri K. K. Shrivastava, the Deputy Director of Census Operations, those who have really worked hard in the preparation of the manuscript and compilation of the statements are Dr. H. C. Jain, Tabulation Officer, and Sarvashri A. K. Jain and Parasram Noria, Computors. The latter has since left to join the State Directorate of Economics and Statistics. The maps and charts have been prepared by different draughtsmen and tracers but special mention must be made of Shri V. Mohan, Tabulation Officer in charge of the Map Section, whose guidance was available to each one of them. I am extremely grateful to all the above mentioned officials and the staff of the Map Section for the pains taken by them. But for their efforts, it would not have been possible to finalise the manuscripts so very early.

Before concluding I would like to place on record my sincere thanks to Shri A. Chandra Sekhar, our Registrar-General and Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies Division), who were ever willing to encourage and gave their valuable comments.

A. K. PANDYA

(ii) Others	O

CHAPTER 1

Introductory

1. Ancillary Studies became a part and parcel of Census taking in our country from the 1961 Census, Apart from ethnographic studies of individual scheduled castes and scheduled tribes, 49 villages were selected for intensive study. Monographs on two scheduled tribes and 10 villages have been published in the 1961-71 decennium in addition to "Fairs and Festivals of Madhya Pradesh", 'Zari embroidary and Batwa-making in Bhopal' and 'Handloom Sari Industry of Maheshwar'.

2. The emphasis in this Census has been shifted from the rural sector to the urban sector with a view to study its problems in the context of rapid urbanisation. Sixteen towns, including the cities of Jabalpur and Bhilainagar, have been selected for studies in depth. The following schedules are to be canvassed in every city/town:— (a) Town Schedule; (b) Household Schedule; (c) Commercial and industrial Schedule; (d) Institutional Schedule; (e) Neighbourhood and community life Schedule; (f) Bank Schedule; (g) Temple/Church/Mosque Schedule; and (h) Village Schedule. There is an elaborate compilation programme also running into over 500 tables based on data collected in the various Schedules.

3. The urban emphasis of the 1971 Census is also visible in Part A of the District Census Handbooks. As against one statement for the villages, there are seven statements for the towns. In order to have comparative idea about growth of towns in the different parts of the State, the information collected in respect of all the towns has been put together in each statement in his volume. This publication is infact a new feature of this Census. The analysis has been made on the basis of size class of towns and the broad conclusions are indicated in the succeeding chapters based on each statement.

4. A detailed reference to the scope and content of each statement would be made in the relevant chapter. It would suffice to mention here that very useful data has been collected in respect of every town in the seven statements, viz., origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, municipal finance, civic and other amenities, medical and educational facilities, and trade, industry, commerce and banking facilities. The data has been collected and compiled from various agencies and official publications. The source and period of information has been indicated below each statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

5. The Primary Census Abstract gives data in respect of each town based on information collected in the individual slip that was canvassed in this Census. Apart from total population, it contains information on literacy, scheduled castes and scheduled tribes, working population, occupied residential houses, number of households and area of the towns. The data relates to the town as a whole. Those interested in ward-wise details may refer to Part B of the concerned District Census Handbook.

6. The data presented in this Directory relates only to the statutory limits of towns and not of out growths listed in Appendix. Therefore, in order to appreciate the data in its proper perspective, it would be worthwhile to refer here to what is meant by the terms 'town' and 'urban agglomeration'.

7. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population of at least 5,000 with three-fourths of the adult male population engaged in non-agricultural pursuits. Accordingly, there were 219 towns in the State. However, 7 towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75 percent or more. But the list already finalised was not changed subsequently because as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as municipalities and inclusion of 7 more such towns was not likely to introduce greater demographic distortion than what was already present. There was no material change in the concept of 'town' in this Census and initially a list of 247 towns was prepared in consultation with the State Government and the Registrar-General, India. Later on, three more places were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and thus in all 250 places were recognised as towns in the 1971 Census.

8. The concept of 'urban agglomeration' which replaced the 'town group' concept of 1961 Census, was not new so far as our State is concerned. The 'town-group' concept of 1961 limited itself to the statutory limits of two adjoining towns (Bhopal-Govindpura, Durg-Bhilainagar etc.) but excluded intervening areas even though they may be urban in character. But in our State the concept of non-municipal urban area was adopted to bring into the urban fold intervening areas having predominent urban charateristics. This is precisely what the concept of 'urban agglomeration' has sought to achieve this time throughout the country.

The population data in respect of urban areas is being presented in all the Census publications in such a manner that *de-facto* urban agglomeration is a recognisable entity, data pertaining to which will be the sum total of the data of not only the *de-jure* (within municipal or other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

CHAPTER II

Growth of towns and urban population

9. The analysis made in this chapter is based on Statement I which presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status indicates the authority incharge of its administration. Thus, a town could have a municipal corporation, a municipality, a cantonment board, a gram panchayat, a notified area committee etc.

10. The growth of urban population in Madhya Pradesh has been keeping pace with the all India position. As a matter of fact, except during the decades 1901-1911 and 1941-51, the rate of growth of urban population in our State has been more than the all India average. This would be obvious from the following:—

TABLE No. 2

Growth of population

Census Year	MADHYA—PRADESH					ALL INDIA				
	Total Population	RURAL		URBAN		Total Population	RURAL		URBAN	
		Population	The decadal percentage variation	Population	The decadal percentage variation		Population	The decadal percentage variation	Population	The decadal percentage variation
1	2	3	4	5	6	7	8	9	10	11
1901 .	16,860,763	15,402,723	—	1,458,045	—	238,396,327	212,544,454	—	25,851,873	—
1911 .	19,440,965	18,141,958	+ 17·78	1,299,007	— 10·91	252,093,390	226,151,757	+ 6·40	25,941,633	+ 0·35
1921 .	19,171,750	17,731,538	— 2·26	1,440,212	+ 10·87	251,321,213	223,235,046	— 1·29	28,086,167	+ 8·27
1931 .	21,355,657	19,583,786	+ 10·45	1,771,871	+ 23·03	278,977,238	245,521,249	+ 9·98	33,455,989	+ 19·12
1941 .	23,990,608	21,637,831	+ 10·49	2,352,777	+ 32·78	318,660,580	274,507,283	+ 11·81	44,153,297	+ 31·97
1951 .	26,071,637	22,938,700	+ 6·01	3,132,937	+ 33·16	361,088,090	298,644,156	+ 8·79	62,443,934	+ 41·43
1961 .	32,372,408	27,745,174	+ 20·95	4,627,234	+ 47·70	439,234,771	360,298,168	+ 20·64	78,936,603	+ 26·41
1971 .	41,654,119	34,869,352	+ 25·68	6,784,767	+ 46·63	547,949,809	438,855,500	+ 21·80	109,094,309	+ 38.20

No doubt the growth-rate has shown a slight fall from 47.70 percent in 1951-61 to 46.63 percent in 1961-71, but the reasons are not far to seek. The project township of Bhilainagar, where construction work for a Steel Plant commenced in 1958, and Bhopal, which became the capital of new Madhya Pradesh consequent to re-organisation of the States in November, 1956, showed exceptionally high growth-rates of population in the dacade 1951-61. And if one takes into account the fact that new Madhya Pradesh established in 1956 is a bigger geographical unit than the erstwhile C.P. & Berar, the slight fall of about one percent in the growth-rate of urban population in the 1961-71 decade *vis-a-vis* the previous decade is more than explained.

11. Another conclusion which is quite obvious from Table 1 is the higher growth-rate of urban area in comparision to rural area. This is indicative of fast urbanisation. During the decade 1911-21 the rural population of the State as well as all-India decreased by 2.26 and 1.29 percent, respectively, while the urban population increased by 10.87 and 8.27 percent, respectively. There was a fall in the total population during the decade. This was mainly due to countrywide spread of fatal influenza and plague epidemics during the decade £ which resulted in the migration of substantial rural population to urban areas for medical help. The urban population of the State decreased by 10.91 percent during the decade 1901-1911 because plague had dislocated the urban figures, especially in the larger towns of northern and western parts of the present State of Madhya Pradesh, which were then parts of Central India Agency.*

The proportion of urban population in each State arranged in descending order of percentage of urban population, is as follows:—

TABLE No. 2

Sl. No.		Total Population	Urban Population	Percentage of urban population to total
	ALL INDIA . .	547,949,809	109,094,309	19.90

19	Assam	14,957,542	1,326,981	8·87
20	Orissa	21,944,615	1,845,395	8·41
21	Himachal Pradesh	3,460,434	241,890	6·99
	UNION TERRITORIES			
1	Chandigarh	257,251	232,940	90·55
2	Delhi	4,065,698	3,647,023	89·70
3	Pondicherry	471,707	198,288	42·04
4	Goa, Daman & Diu	857,771	226,774	26·44
5	Andaman & Nicobar Islands	115,133	26,218	22·77
6	Arunachal Pradesh	467,511	17,288	3·70

It is interesting to note that in the above table, Madhya Pradesh stands at the 11th place among the 21 States of the country, i.e., in 'Madhya' (centre).

13. One of the reasons for the rapid growth of urban population has been increase in the number of places recognised as towns in each succeeding Census.

In the 1971 Census, the following 34 places were added as towns and only 3 towns were declassified:—

TABLE No. 3

Towns added and declassified in 1971 Census

Towns declassified

Sl. No.	Name of the town	1961 Population
1	Arang	8,469
2	Datla Bandhi	3,860
3	Pendra	6,081

14. Although urban population has gone up over the years, its distribution has not been uniform throughout the State. This is partly due to uneven sizes of the districts, but the one inescapable conclusion is that districts having municipal corporations or cities

of one lac plus population have a relatively larger proportion of urban population. This would be clear from Tables 4 and 5, the latter Table clearly revealing the fact that although the number of towns in size classes I to III is below 30 percent in both 1961 and 1971 Census, the towns in these size classes account for nearly 70 percent of the total urban population. In other words, the benefits of rapid urbanisation, if any, have accrued to districts having bigger towns.

TABLE No. 4

Districtwise proportion of urban population in descending order

Sl. No.	District	Total population	Urban population	Percentage to total population
	STATE	**41,654,119**	**6,784,767**	**16·29**
1	Indore	1,025,150	642,899	62·71
2	Gwalior	858,005	442,208	51·54
3	Sehore	1,084,933	449,208	41·40
4	Jabalpur	1,686,080	683,554	40·54
5	Ujjain	862,516	306,602	35·55
6	Ratlam	626,534	181,227	28·93
7	Sagar	1,062,291	260,258	24·40
8	Khandwa	879,331	206,481	23·48
9	Hoshangabad	805,870	175,428	21·77
10	Mandsaur	961,522	194,529	20·23
11	Chhindwara	989,413	165,412	16·72
12	Durg	2,461,901	387,104	16·13
13	Dewas	594,336	94,874	15·96
14	Datia	255,267	37,436	14·67
15	Khargone	1,284,812	182,795	14·23
16	Vidisha	658,427	92,878	14·11
17	Damoh	573,263	78,977	13·78
18	Narsimhapur	519,270	67,324	12·96
19	Guna	783,748	100,170	12·78
20	Raipur	2,613,531	325,065	12·44
21	Shahdol	1,029,839	121,832	11·83
22	Shajapur	678,359	77,781	11·47
23	Chhatarpur	712,385	80,058	11·24
24	Bilaspur	2,440,962	264,113	10·82
25	Shivpuri	676,567	71,258	10·53
26	Morena	985,338	102,997	10·45
27	Satna	913,531	94,673	10·36
28	Dhar	842,400	85,650	10·17
29	Rajgarh	644,346	61,780	9·59
30	Bhind	793,955	73,397	9·24
31	Betul	736,196	67,669	9·19
32	Jhabua	667,811	48,823	7·31
33	Panna	429,077	30,462	7·10
34	Rewa	977,894	69,182	7·07
35	Balaghat	977,583	67,953	6·95
36	Surguja	1,326,439	89,040	6·71
37	Seoni	668,352	43,576	6·52
38	Raigarh	1,278,705	75,935	5·94
39	Mandla	873,577	48,701	5·57
40	Raisen	553,026	30,767	5·56
41	Tikamgarh	568,885	27,905	4·91
42	Bastar	1,515,956	56,635	3·74
43	Sidhi	776,786	9,364	1·23

The State proportion of urban population is 16·29 percent and the above table clearly indicates that only 11 districts out of 43 have higher proportion of urban population than the State figure.

TABLE No. 5

***Distribution of urban population according to size class of towns**

Population size	No. of towns in 1961	Population	Percentage to total population	No. of towns in 1971	Population	Percentage to total population
I (100,000 and over)	8	1,807,349	39·06	11	3,056,558	45·05
II (50,000—99,999)	5	380,245	8·22	11	696,051	10·26
III (20,000—49,999)	30	953,166	20·60	41	1,344,368	19·81
IV (10,000—19,999)	55	749,199	16·19	72	974,982	14·37
V (5,000—9,999)	96	672,111	14·53	90	684,768	10·09
VI (Below 5,000)	16	65,164	1·40	7	28,040	0·42
	210*			232**		

*Total number of towns was 219 in 1961. The above classification has been worked out on the basis of town-group viz Jabalpur Cantonment and Khamaria ; Sagar Cantonment ; Bairagarh and Govindpura ; Tikuri and Ordnance Factory Area Katni ; Pachmarhi and Durg (total nine towns) have been merged into town-groups.

**Total number of towns is 250 in 1971. The above classification has been done on the basis of urban agglomeration and as such 18 towns—Govindpura, Bairagarh, Sagar Cantonment, Jabalpur Cantonment, Khamaria (OFA) Durg, Ordnance Factory Area Katni, New Katni Railway Junction, Tikuri, Nargada Hari Dafai (Dhanpuri· Iklehra, Bhamodi, Chandameta, Butaria, Badkuhi Chirmiri Colliery, Pachmarhi Cantt. and South Jhagrakhand Colliery, get merged to form urban agglomerations

15. The distribution of towns according to civic status also reveals an interesting picture. Only 6 of the 10 Class I towns have corporations; the bulk of the towns—67 percent—have a municipality.

TABLE No. 6

Distribution of towns by civic status

Population size	Total No. of towns	Number of towns having					
		Corporation	Municipality	Gram panchayat	Non-Municipal	Cantonment Board	Notified Area committee
I	10	6	3	..	1	..	..

IV	72	..	62	8	1	..	1
V	100	..	53	41	3	1	2
VI	15	..	5	5	3	..	2
TOTAL	250	6	168	54	12	4	6

16. The towns of the State were classified by functions in the 1961 and 1971 Censuses. The method adopted for the functional classification was as follows:—

The nine industrial categories were grouped into the following five functional characteristics:—

(i) Primary Activities (Comprising Category I-Cultivation, II-Agricultural Labourers and III-Mining and Quarrying, Fishing, Livestock Hunting etc.).

(ii) Industrial (Comprising Category IV, Household Industry, V-Manufacturing other than Household Industry and VI-Construction)

(iii) Commercial (Comprising Category VII—Trade and Commerce)

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications).

(v) Services (Comprising Category IX—Other services).

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 percent of the total workers, the town was designated by that function. In case no single characteristic claimed 40 per cent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town. On the basis of the above criteria, the distribution of towns by functional categories in 1961 and 1971 and functional categories by size class of towns may be seen in tables 7 & 8.

TABLE No. 7

17. **Table 7 on functional classification does not include information about 3 towns (1. Arang, 2. Datla Bandhi, 3. Pendra) under col. 3 for 1961 Census since they were declassified in 1971.** This table indicates that the towns had a tendency to become more multi-functional and production oriented during the decade, for instance in 1961 as many as 29 towns were classified under Industry (serial No. 2) only, while in 1971 the number under this category went down to 17 while the number under categories (a) Mining (serial No. 5) (b) Primary activities-*cum*-Service-*cum*-Trade and Commerce (serial No. 9) (c) Service-*cum*-trade and commerce -*cum*-industry (serial No. 25) have shown increase by 17, 11 and 15, respectively. By and large, class I and II towns have close association with industry. Only one class I town, Bhopal, which is the capital of the State, has been classified under "Service".

CHAPTER III

Physical and Locational Aspects

17. The analysis made in this Chapter is based on Statement II which presents the data relating to physical and locational aspects as in 1969.

18.1 Rainfall data for 246 out of 250 towns are available, while the data of 4 towns (Lodhikhera, Pandhurna, Naila-Janjgir and Tirodi) is not available. About 42 percent of the towns, for which rainfall data is available, get annual rainfall between 1201 to 1600 m.ms. The number of towns getting annual rainfall in different ranges is indicated in the following table: —

TABLE No. 9

Range of annual rainfall (in m. ms.)	*No. of towns*
Below 700	6
701—900	42
901—1,200	89
1,201—1,600	103
1,601 and above	6
	246
Data not available	4
Total	250

18.2 Very few towns get annual rainfall below 700m.ms. and above 1600 m.ms. Minimum rainfall (about 624 m.ms.) is received in Gohad town of Bhind district, while the two hill station towns of Pachmarhi in Hoshangabad district get heaviest rainfall of about 2244 m.ms.

19.1 Temperature data of seven towns (Barwani, Lodhikhera, Pandhurna, Naila-Jangir, Ramanujganj, Sausar and Tirodi) out of 250 towns is not available The distribution of towns by different ranges of maximum and minimum temperature based on average daily temperature is as indicated in the following table:—

TABLE No. 10(a)

Range of Maximum Temperature (In centigrade)	*No. of Towns*
Below 25°	Nil
26° — 30°	3
31° — 40°	229
41° — 45°	11
46° and above	Nil
Total	243

TABLE No. 10(b)

Range of Minimum Temperature (In Centigrade)	No. of Towns
Below 5°.	Nil
6° — 10°	17
11° — 15°	5
16° — 20°	190
21° and above	31
Total	243

19.2 It would be apparent from the above table that about 94 percent of the towns, for which temperature data is available, have maximum temperature in the range of 31°C to 40°C., while about 78 per cent of the towns have minimum temperature in the range of 16°C to 20°C. Jhabua town is hottest, maximum temperature being 45°C, while the two hill station towns of Pachmarhi have pleasant climate with maximum temperature rising upto only 26.9°C. Shivpuri town experiences severe cold, the minimum temperature going as low as 5.8°C, while the minimum temperature of Raigarh town (21.5°C) is highest in the State. Winter is hardly felt in this town.

19.3 The data regarding annual temperature for 25 towns were received from the Director General of Observatories, Meteorological Department, Government of India, and have been indicated in columns 5 and 6 in addition to the data furnished by the Regional Metcorological Centre, Government of India, Nagpur. It may be mentioned that the data received from the Regional Meteorological Centre, Nagpur, is based on average daily temperature and it may be useful to indicate below the methodology for calculating the same.

19.4 The average daily temperature (maximum) is the annual means of monthly average maximum temperature based on 30 years data (1931—1960). From the total of daily maximum temperatures for a particular month the average monthly maximum temperature is arrived at by dividing the total by the number of days in a month. Similarly, from the total of average monthly temperatures thus obtained for several years, the annual average is worked out. Similar operations are done for minimum temperatures.

19.5 Inset table (table No. 11) below on annual temperature for 25 towns referred to above shows that bulk of these towns. (22) come in the maximum temperature range of 41°C—45°C, while about 66 percent of these towns (17) come in the minimum temperature range below 5°C.

	Total	**250**	**4**	**6**	**24**	**68**	**148**

20.2 It would be seen from the above table that about 59 percent of towns come in the distance range 101 km. and above. All the district headquarters are towns. The number of towns nearest by road from district headquarter in different distance ranges is as indicated in the following table.

TABLE No. 13

Sl. No.	Name of Distt. Head Quarter	Number of Towns				
		0—10 Km.	11—25 Km.	26—50 Km.	51—100 Km.	101 Km and above

	Total	**48**	**20**	**70**	**83**	**29**

NOTE.—In distance range 0.10 Km., besides the head quarte own of the district, the following towns are included.—

Betul—Betul-Bazar, Sagar—Sagar Cantt., Jabalpur—Jabalpur Cantt., Bilaspur-Sirgiti, Durg-Bhilainagar

20.3 The above table would show that 33.2 and 28 percent of the towns come in the distance ranges 51-100 Kms. and 26-50 Kms., respectively. Thirtyeight tahsil head-quarters indicated in table below have not been recognised as towns.

TABLE No. 14

38	KONTA.	KONTA

21. Very few towns (2.0 percent) are not on bus route but they are within 8 Kms. from the bus route. Quite a high percentage of towns (56.4 percent) are not connected by railway. Four towns are within a distance of ten kms. from navigable rivers.

CHAPTER IV

Finance of Local Bodies

22. Statement III, containing data regarding finance of the local bodies for the three years 1968-69, 1969-70 and 1970-71, has been analysed in this Chapter. Instructions envisaged collection of data for only one year (1968-69), but it was felt that in order to have better appreciation of the progress made by the local bodies, data for three years running should be collected and analysed. Financial data of the local bodies of 21 towns could not be incorporated in this Statement as they were not available for the years and reasons indicated in table below and, therefore, the analysis is limited to the data available.

TABLE No. 15

List of towns for which the local body finance could not be available.

Size class of town	Class-wise Sl. No.	Name of town	Year	Reason
1	2	3	4	5
I	1	Bhilainagar	1968-69 1969-70 1970-71	A Project township with no urban body
II	1	Govindpura	1968-69 1969-70 1970-71	A project township with no urban body
III	1	Rajhara Jharan Dalli	1968-69 1969-70 1970-71	A Project township with no urban body
	2	Korba Mining Area	1968-69 1969-70 1970-71	A Project township with no urban body
	3	Khamaria (OFA)	1968-69 1969-70 1970-71	Administration of township is under Central Government.
IV	1	Nepanagar	1968-69 1969-70 1970-71	A Project township with no urban body
	2	Mungeli	1968-69 1969-70	The records of municipal council have been seized by the police as such the data could not be made available.
	3	Naila Janjgir	1968-69 1969-70 1970-71	The municipality was constituted *w.e.f* 1,12-70 as such the data has been omitted
	4	Nainpur	1968-69	The municipality was constituted in November 1969 as such the data for 1968-69 could not be made available.
V	1	Khodargama	1968-69 1969-70 1970-71	A colliery township with no urban body
	2	Burhar	1968-69 1969-70 1970-71	Notified Area Committee constituted in January 1971 as such the data could not be made available.
	3	Amlai	1968-69 1969-70 1970-71	A Project township with no urban body.
	4	Beohari	1968-69 1969-70 1970-71	Notified Area Committee constituted *w.e.f.* 16-12-1970 as such the data is omitted
	5	Chirmiri	1968-69 1969-70 1970-71	Kurasia and Chirmiri towns have common Gram Panchayat. The financial data have been furnished against Kurasia town
	6	Ordnance Factory Area, Katni	1968-69 1969-70 1970-71	Administration of township is under Central Govt.
	7	Kirandul	1968-69 1969-70 1970-71	A Project township with no urban body.
	8	Johilla Colliery	1968-69 1969-70 1970-71	A colliery township with no urban body
	9	Patharia Kalan	1969-70 1970-71	The records of Gram Panchayat Patharia Kalan have been seized by the police as the data could not be made available.
	10	Iklehra	1969-70 1970-71	The data is not made available by the Gram-Panchayat.
VI	1	New Katni Rly Junction Area	1968-69 1969-70 1970-71	Administration of township is under Central Government.
	2	Panara	1969-70 1970-71	The Gram Panchayat Panara was abolished by the State Government as such the data could not made available.

23. The per capita receipt and expenditure of the local bodies by size class of towns is as indicated in the following table.

TABLE No. 16

Class of town	No. of Towns	Year	Per Captita						
			Receipt			Expenditure			
			Total receipt	Receipt through taxes etc.	Receipt from all Other Sources	Total expenditure	Expenditure on publi conveniences	Expenditure on public instutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9	10
Class I	9	1968-69	24·64	19·49	5·15	22·80	7·99	0·67	14·14
(100,000 & over)	9	1969-70	29·27	22·15	7·12	26·93	9·77	0·82	16·34
	9	1970-71	34·75	24·30	10·45	33·10	10·02	0·90	22·18
Class II	12	1968-69	22·75	12·02	10·73	23·02	9·45	2·35	11·22
(50,000—99,999)	12	1969-70	25·16	14·99	10·17	24·51	9·75	2·48	12·28
	12	1970-71	29·00	16·29	12·71	28·60	10·30	2·49	15·81
Class III	37	1968-69	20·03	13·20	6·83	19·79	6·99	0·99	11·81
(20,000—49,999)	37	1969-70	24·62	15·71	8·91	23·45	6·75	0·90	15·80
	37	1970-71	26·54	17·32	9·22	25·93	8·01	0·90	17·02
Class IV	68	1968-69	16·17	11·43	4·74	15·38	4·14	0·87	10·37
(10,000—19,999)	69	1969-70	19·81	11·92	7·89	18·41	5·42	0·70	12·29
	70	1970-71	22·83	13·46	9·37	21·55	6·94	0·69	13·92
Class V	92	1968-69	10·96	6·38	4·58	10·15	2·41	0·48	7·26
(5,000—9,999)	90	1969-70	12·82	7·37	5·45	11·64	3·01	0·70	7·93
	90	1970-71	16·12	8·17	7·95	13·89	4·12	0·63	9·14
Class VI	14	1968-69	4·64	2·45	2·19	4·76	1·23	0·08	3·45
(Below 5,000)	13	1969-70	5·75	2·78	2·97	5·60	1·32	0·10	4·18
	13	1970-71	6·78	3·31	3·47	5·52	1·30	0·15	4·07

25. It would be seen from the above table that total per capita expenditure is within total per capita receipt of the local bodies in each size class of towns and they match fairly well except that during the year 1968-69, the total expenditure of the local bodies in class II and VI towns is slightly more than total receipt. By and large, per capita expenditure on public health and conveniences as against per capita receipt through taxes etc. is quite encouraging. However, the per capita expenditure on public institutions is very low, while the percentage of expenditure under head "on all other aspects" is quite high. The per capita receipt of the local bodies in all size class of towns through taxes etc. has been constantly increasing from year to year which is indicative of urban growth and people's increasing contribution towards development of the urban areas.

CHAPTER V

Civic Amenities

Road:—

25.1 Road length per 1000 population and per 100 sq. km. of area by size class of towns is as indicated below:—

TABLE No. 17

Road length by area and population (Statement IV Col. 3)

Size Class of Town	Per 100 Km²		Per 1000 population	
	Pucca road length	*Kutcha* road length	*Pucca* road length	*Kutcha* road length
I . .	224·86	..	0·54	...
II . .	162·15	..	0·58	..
III . .	187·96	..	0·62	..
IV . .	110·37	..	0·61	..
V . .	75·11	..	0·53	..
VI . .	125·51	..	2·13	..

25.2 Road length of 18 towns and area of two towns as mentioned below are not available and information regarding them, has not been incorporated in table 17.

TABLE No. 18

Road length not available

Class of town	Sl. No.	Name of town
III	1	Datia
	2	Shahdol
	3	Sironj
	4	Tikamgarh
IV	5	Nainpur
	6	Nepanagar
	7	Bemetara
	8	Beohari
	9	Burhar
	10	Badkuhi
	11	Iklehra
	12	Gaurella
	13	Kasrawad
	14	Chirmiri Colliery
	15	Lahar
	16	Pichhore (Gwalior)
	17	Susner
VI	18	South Jhagrakhand Colliery

TABLE No. 19

Area not available

Class of Town	Sl. No.	Name of Town
V	1	Amlai
	2	Kotma

25.3 It would be apparent from the above table No. 17 that highest road length per 100 sq. km. (224.86 km.) is found in class I towns which is followed by Class III and II towns. Lowest road length (75.11 Km.) is found in class V towns.

25.4 On the other hand, as far as road length per thousand population is concerned, class VI towns lead other classes of towns. In this respect, class I towns rank fifth.

Sewerage:—

26.1 Distribution of towns by type of sewerage and arranged according to size class is as indicated in the following table.

TABLE No. 20

Distribution of towns by type of sewerage and size class of town (Statement IV Col. 4)

Type of sewerage/ drainage	Size Class of Towns					
	I	II	III	IV	V	VI
1 Open Surface Drains	7	10	24	51	65	9
2 Box Surface Drains .	1	1	3	—	2	1
3 Open/Box Surface Drains . . .	1	1	2	2	1	..
4 Information not received . . .	1	1	11	19	32	5
Total .	**10**	**13**	**40**	**72**	**100**	**15**

26.2 Information regarding 69 towns mentioned at serial No. 4 of the above table is not available and, therefore, analysis is restricted to the number of towns for which information is available. It would be seen from the above table that maximum number of towns in all size classes have open surface drains and the total number of such towns comes to 166.

Latrines:—

27.1 62.94 percent of the latrines in all the towns are service latrines, while only 17.26 percent are water borne. 29 towns have only service latrines and about 14 percent of them come under class V.

27.2 Distribution of towns by various methods of night soil disposal arranged according to size-class has been indicated in the following table.

TABLE No. 21

Distribution of towns by method of disposal of night soil and size class of towns (Statement IV col. 8)

Method of disposal of night soil	Size Class of towns					
	I	II	III	IV	V	VI
1 Head Load . .	..	..	6	20	32	3
2 Baskets . .	..	1	1	3	11	..
3 Wheel Barrows .	3	8	19	25	28	
4 Septic Tank . .	1	2	2	1	2	1
5 Head Load/Septic Tank . . .	1	..	1	3	1	1
6 Wheel Barrows/ Septic Tank . .	3	..	1	3	1	..
7 Head Load/Wheel Barrows . .	2	1	3	3	5	..
8 Head Load/Baskets	..	1	4	6	5	1
9 Baskets/Wheel Barrows . .	..	..	1	5	3	2
10 Head Load/Wheel Barrows/Septic Tank	..	..	1	..	..	..
11 Head Load/Baskets/ Septic Tank .	..	..	..	..	1	..
12 Baskets/Septic Tank	..	..	..	2	3	..
13 Information not received . . .	..	..	1	1	8	3
	10	**13**	**40**	**72**	**100**	**15**

27.3 Information regarding 13 towns indicated at serial No. 13 in the above table is not available and the data of these towns is not included in the analysis. It would be seen from the above table that in quite a good number of towns there are mixed methods of disposal of night soil. There are 101 towns where method of head-load is prevalent either wholly or partly and in 61 towns the method is limited to head load only. There are only 31 towns where septic tank system is prevalent either wholly or partly.

Water supply:—

28.1 Number of towns having water tap facility arranged according to size class is as indicated below.

TABLE No. 22

Size class of town	Total No. of towns	Number of towns having tap water facility	No. of towns where drinking water is supplied with other source
I	10	10	..
II	13	13	..
III	40	29	11
IV	72	33	39
V	100	28	72
VI	15	4	11
Total . .	**250**	**117**	**133**

28.2 It would be apparent from the above table that about 47 percent of the towns have water tap facility covering 77.07 per cent of the total town population. All the class I and II towns have water tap facility.

Fire fighting services:—

29.1 Number of towns having fire fighting services available within the towns arranged according to size class is as indicated below:—

TABLE No. 23

Size class of town	Total No. of towns	Number of towns having fire fighting service
I	10	10
II	13	10
III	40	12
IV	72	7
V	100	10
VI	15	1
	250	**50**

29.2 It would be seen from the above table that only one fifth of the towns of the State have fire fighting services.

Electricity:—

30. All the towns have electric street lights.

CHAPTER VI

Statement V

Medical facilities:—

31.1 The number of towns having different types of medical institutions run by Government arranged by size class of towns, is as indicated below :—

TABLE No. 24

Type of Medical Institutions	Size Class of towns						
	I	II	III	IV	V	VI	Total
(1) Hospital .	9	12	32	28	25	3	109
(2) Dispensary .	7	4	3	2	4	1	21
(3) Primary Health Centre	..	..	4	39	55	6	104
(4) T. B. Clinic .	7	3	12	4	1	..	27
(5) Family Planning Centre	10	12	31	2	3	..	58
Total .	**33**	**31**	**82**	**75**	**88**	**10**	**319**
Total No. of Towns .	10	13	40	72	100	15	250
No medical institutions	..	..	3	3	16	7	28

31.2 It may be seen from the above that about 85 percent of the towns come in the size classes III to V and about 77 percent of the medical institutions are located in the above size class of towns. Maximum number of towns (100) come in the size class V and maximum number of medical institutions (88) are also located in this size class of towns. In the state, there are 10 class I and 13 class II towns where there are 33 and 31 medical institutions, respectively. Twenty nine towns, falling in classes III to VI do not have any kind of Government medical institution. The list may be seen in Appendix V. Bulk of such towns are in the mining areas.

31.3 The number of beds in medical institutions per 1000 population by size class of towns is as indicated below:—

TABLE No. 25

Size Class of Towns	No. of Towns	No. of beds in medical institutions	No. of beds per 1,000 Population
I	10	5,555	2·2
II	13	1,554	1·9
III	40	2,426	1·9
IV	72	1,372	1·4
V	100	1,196	1·6
VI	15	82	1·4
Total . .	250	12,185	1·9

There are in all 12,185 beds in Government medical institutions in the towns of the State. The average number of beds per thousand population in the towns comes to 1.9. The number of beds per thousand population is maximum (2.2.) in class I towns, while it is minimum (1.4) in class IV and VI towns. The number of beds in class II and III towns is equal to the average number of beds (1.9), while in class V towns, the number of beds is less (1.6) than the above mentioned average. The beds in the medical institutions located in the towns are, however, availed to a great extent by the rural population.

Educational facilities:—

32. The number of technical colleges and polytechnics by size class of towns is indicated below:—

TABLE No. 26

Technical Colleges by Size Class of Towns

Size class of Town	Name of Town	Number of Colleges			
		Medical Colleges	Engineering Colleges	Polytechnics	Total Colleges
I	Indore . .	1	1	1	3
	Gwalior . .	1	1	1	3
	Bhopal . .	1	1	2	4
	Jabalpur . .	1	1	2	4
	Raipur . .	1	1	..	2
	Ujjain . .	..	1	1	2
II	Rewa . .	1	1	..	2
	Bilaspur . .	..	1	..	1
	Damoh . .	..	..	1	1
	Durg . .	..	..	1	1
	Khandwa . .	..	..	1	
III	Vidisha . .	..	1	1	2
	Balaghat . .	..	..	1	1
	Jaora . .	..	..	1	1
	Raigarh . .	..	..	1	1
	Seoni . .	..	..	1	1
	Shahdol . .	..	..	1	1
III	Tikamgarh .	..	..	1	1
	Harda . .	..	..	1	1
IV	Khurai . .	..	..	1	1
	Nowgong . .	..	..	1	1
	Sanawad . .	..	..	1	1
	Total .	6	9	21	36

32.2 It may be seen from the above table that 5 class I towns and one class II town have medical colleges, while 6 class I, 2 class II and 1 class III towns have engineering colleges. There are in all 21 polytechnics in 19 towns. Bhopal and Jabalpur, which are class I towns have, however, two polytechnics each. The number of technical and non-technical colleges by size class of towns is indicated below:—

TABLE No. 27

Technical and Non-Technical Colleges by Size Class of Towns.

Size Class of Towns	No. of Towns having Technical/ Non-Technical Colleges	No. of Towns not having any type of Colleges	Total No. of Towns
I	10	..	10
II	10	3	13
III	33	7	40
IV	33	39	72
V	15	85	100
VI	..	15	15
	101	149	250

32.3 There are in all 149 towns (mentioned in Appendix VI) which do not have college facilities and bulk of them come in the size classes III to VI. Raisen is the only district headquarter town which does not have college. Three class II towns (Govindpura and Jabalpur cantt. Mhow cantt.) do not have the above facilities. It may, however, be mentioned that the people of 2 towns avail of the college facilities in the adjacent towns of Bhopal and Jabalpur, respectively, while for Mhow cantt the colleges are located out of the statutary limit of cantonment. There are following nine universities in the towns of the State:—

Sl. No.	Name of University	Name of Town	Class of Town
1	University of Sagar . . .	Sagar	I
2	Vikram University . . .	Ujjain	I
3	University of Jabalpur . .	Jabalpur	I
4	Jawaharlal Nehru Krishi Vishwavidyalaya	Jabalpur	I
5	Indore University . . .	Indore	I
6	Jiwaji University . . .	Gwalior	I
7	Ravishankar University . .	Raipur	I
8	Awdhesh Pratap Singh University	Rewa	II
9	Indra Kala Sangit Vishwavidyalaya	Khairagarh	V

32.4 A University at the State capital, Bhopal, was established after 1969.

32.5 It may, however, be indicated that Sagar University is actually located in Gournagar, which is neither within the statutory limits of Sagar town nor any village though it is adjacent to Sagar Municipality. This area was originally a part of reserve forest which was handed over to the University by the State Government. Some of the Universities also offer teaching facilities as indicated below:—

Sl. No.	Name of University	Number of Departments/ Schools
1	University of Sagar	35
2	Vikram University	13
3	University of Jabalpur	17
4	Jawaharlal Nehru Krishi Vishwavidyalaya . .	26
5	Indore University	3
6	Jiwaji University	5
7	Ravishankar University	5
8	Awdhesh Pratap Singh University . . .	..
9	Indra Kala Sangit Vishwavidylaya . . .	3

32.6 The number of secondary, middle and primary schools per 1,000 population in the different classes of towns is as mentioned in the following table For a more realistic appreciation, the population in the age group 0.14 has been considered for primary and middle schools, while population in the age group 15-19 has been considered for higher secondary/high schools:—

TABLE No. 28

Secondary, Middle and Primary Schools Per 1000 Population.

Sl. No.	Size Class of Towns	No. of Towns	Number per 1,000 Population		
			Secondary School	Middle School	Primary School
1	I . .	10	0·94	0·32	1·00
2	II . .	13	1·10	0·30	0·86
3	III . .	40	1·05	0·33	0·91
4	IV . .	72	1·59	0·33	0·82
5	V . .	100	2·11	0·45	0·73
6	VI . .	15	2·01	0·49	0·80

32.7 It may be seen that the number of secondary and middle schools, by and large, is comparatively higher in the lower classes of towns, while in the case of primary schools, the number is comparatively higher in class I, II, and III towns. There are 12 towns (mentioned in Appendix-VII) which do not have high/higher

secondary school and bulk of them are located in the colliery areas.

Recreational facilities:—

33.1 The following (table No. 29) gives the details of facilities relating to stadia, cinemas and public libraries and reading rooms in the towns of the State:

TABLE No. 29

No. of Towns having Stadia, Cinemas, Auditoria/ Drama Halls and Public Libraries by Size Class.

Size Class of Town	Total No. of Towns	Stadia		Cinemas		Auditoria/Drama halls		Public Libraries	
		Towns having	Towns not having	Towns having	Towns not having	Towns having	Towns not having	Towns having	Towns not having
1	2	3	4	5	6	7	8	9	10
I	10	10	...	10	..	7	3	10	..
II	13	13	..	13	..	3	10	12	1
III	40	32	8	39	1	10	30	39	1
IV	72	37	35	60	12	6	66	57	15
V	100	25	75	44	56	11	89	66	34
VI	15	6	9	..	15	2	13	6	9
	250	123	127	166	84	39	211	190	60

33.2 All the class I and II towns have stadia and cinemas while all class I towns have also public libraries. Bulk of the towns which do not have such recreational facilities belong to lower size classes.

CHAPTER VII

Trade, Commerce, Industry and Banking

34. Statement VI, containing data regarding banking, agricultural and non-agricultural credit societies, and three most important commodities manufactured, imported and exported, has been analysed in this chapter.

35.1 The availability or absence of banking and credit facilities in the towns by size-classes has been indicated below:—

TABLE No. 30

Towns having Agricultural & Non-Agricultural Societies & Banking Service by size class

Size class of town	Banking Service			Agricultural Credit Societies			Non-Agricultural Societies		
	No. of towns having	No. of towns not having	Total towns	No. of towns having	No. of towns not having	Total towns	No. of towns having	No. of towns not having	Total towns
I	10	..	10	7	3	10	10	..	10
II	13	..	13	8	5	13	10	3	13
III	39	1	40	28	12	40	32	8	40
IV	70	2	72	55	17	72	30	42	72
V	90	10	100	80	20	100	34	66	100
VI	9	6	15	6	9	15	1	14	15
TOTAL	231	19	250	184	66	250	117	133	250

35.2 It would be seen from the above table that all class I and II towns have banking facility. Out of 40 class III towns, only 1 town viz., Sagar Cantonment do not have banking facility. The banking facilities in this town is availed of from the adjacent town of Sagar municipality with which it form urban agglomeration, a concept adopted in the 1971 Census. The number of towns, with percentage, which do not have banking facility, in classes III to VI is indicated below:—

Class	Total Number of towns	No. of towns not having banks	Percentage
III	40	1	2·5
IV	72	2	2·78
V	100	10	10·00
VI	15	6	40·00

35.3 If Sagar Cantonment is deemed to be enjoying banking facility for the reason indicated above, then the percentage of class III towns which do not have banking facility, comes to nil. For purposes of discussion regarding towns, which do not have banking facility, class IV to VI towns are relevant. In these classes, the percentage of towns which do not have banking facility, increases as the towns decrease in size-class. In other words, banking facility tends to increase directly in proportion to the growth of the towns and its urbanization.

35.4 Percentage of the towns which do not have agricultural credit societies and non-agricultural credit societies, size-class-wise, is indicated below:—

TABLE No. 30-A

Class of town	Percentage of towns not having agricultural credit societies to total number of towns	Percentage of towns not having non-agricultural credit societies to total number of towns
I	30·00	Nil
II	38·46	23·08
III	30·00	20·00
IV	23·61	58·33
V	20·00	66·00
VI	60·00	93·33

35.5 It may be seen from the above table that as regards non-agricultural credit societies, the percentage of towns not having this facility increases with the decrease in the size-class, except in class III towns where the percentage is slightly less in comparison to class II towns. But in respect of agricultural credit societies, the percentage of towns which do not have this facility has no specific relationship with the size-class. However, it appears that non-agricultural credit societies prosper more in bigger towns and agricultural credit societies in smaller towns. This is not at all surprising because smaller towns are rural in character.

Important Commodities Manufactured :

36.1 The data regarding three most important commodities manufactured, by size-class of towns and industrial category upto minor groups, have been indicated in the inset tables 31-A, 31-B and 31-C below :—

TABLE No. 31-A

Important Commodities Manufactured by Size Class of Towns and Industrial Category

FIRST IMPORTANT COMMODITIY

Industrial Category		Description	Size Class of Towns						
Major Group	Minor Group		I	II	III	IV	V	VI	Total
1	2	3 4		5	6	7	8	9	10
20 & 21		**Manufacture of Food Products** . . .	**1**	**4**	**9**	**26**	**16**	**3**	**59**
	204	Grain mill products	1	1	4	3	1	1	11
	205	Manufacture of bakery products	..	1	..	..	1	..	2
	206	Manufacture of and refining of sugar (vaccum pan sugar factories.)	..	..	2	..	..	..	2
	207	Production of indigenous sugar boora, Khandsari, gur etc. from sugar-cane, palm juice.	..	..	2	4	1	1	8
	211	Manufacture of other edible oils and fats e.g. mustard oil, ground nut oil, til oil etc. (Inedible oils shown under 315).	..	2	1	19	10	..	32
	215	Manufacture of ice	..	..	..	..	1	..	1
	219	Manufacture of food products not elsewhere classified.	..	..	..	..	2	1	3
22		**Manufacture of Beverages, Tobacco and Tobacco Products.**	**2**	**2**	**5**	**11**	**15**	..	**35**
	223	Production of country liquor and toddy	..	..	..	2	..	..	2
	226	Manufacture of bidi	2	2	4	9	15	..	32
	229	Manufacture of tobacco and tobacco products, not elsewhere classified.	..	..	1	..	..	..	1
23		**Manufacture of Cotton Textiles**	**3**	..	**5**	**8**	**12**	**1**	**29**
	230	Cotton ginning, cleaning and baling	..	..	3	4	6	..	13
	231	Cotton spinning, weaving, shrinking' sanforizing, mercerising and finishing of cotton textiles in mills.	3	..	..	1	1	..	5
	234	Production of Khadi	..	..	..	..	1	..	1
	235	Weaving and finishing of cotton textiles in handlooms, other than Khadi.	..	..	2	3	4	1	10
24		**Manufacture of Wool, Silk and Synthetic Fibre Textiles**	..	..	**2**	**2**	..	..	**4**
	245	Spinning Weaving and finishing of silk	..	..	1	2	..	..	3
	247	Spinning, weaving and finishing of other textiles synthetic fibres , rayons, nylons, etc.	..	..	1	..	..	..	1
25		**Manufacture of Jute, Hemp and Mesta Textiles** . .	..	..	1	..	..	..	1
	259	Manufacture of jute bags and other jute textiles not elsewhere classified.	..	..	1	..	..	..	1

1	2	3	4	5	6	7	8	9	10
26		**Manufacture of Textile Products (including wearing apparel other than footwear).**	..	..	..	..	1	..	**1**
	263	Weaving carpets, rugs and other similar textile products.	..	..	..	..	1	..	1
27		**Manufacture of Wood and Wood Products, Furniture and Fixtures.**	..	**1**	**1**	**2**	**3**	**2**	**9**
	271	Sawing and planing of wood (other than plywood)	..	..	..	..	1	..	**1**
	272	Manufacture of wooden and cane boxes, crates drums, barrels and other wooden containers, baskets and other rattan, bamboo, read and willow wares made entirely or mainly of cane, rattan, reed, bamboo and willow.	..	..	..	1	1	2	4
	273	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors and windows (excluding hewing and rough shaping of poles, bolts and other wood material which is classified under logging).	..	1	..	..	..	..	1
	276	Manufacture of wooden furniture and fixtures.	..	..	1	1	1	..	**3**
28		**Manufacture of Paper and Paper Products and Printing Publishing and Allied Industries.**	**1**	..	**1**	**2**	**1**	..	**5**
	280	Manufacture of pulp, paper and paper board including newsprint.	..	..	..	1	1	..	**2**
	283	Manufacture of paper and paper board articles not elsewhere classified.	1	..	1	1	..	..	**3**
29		**Manufacture of Leather and Leather and Fur Products (Except Repair)**	..	..	**1**	..	**1**	..	**2**
	291	Manufacture of footwear (excluding repair) except vulcanized or moulded rubber of plastic footwear.	..	..	1	..	..	..	1
	293	Manufacture of leather consumer goods (other than apparel and footwear).	..	..	..	..	1	..	1
30		**Manufacture of Rubber, Plastic, Petroleum and Coal Products.**	..	..	2	**2**	**7**	**3**	**14**
	303	Manufacture of plastic products not elsewhere classified (except house furnishing).	..	..	..	1	..	..	**1**
	307	Manufacture of other coal and coal tar products not elsewhere classified.	..	..	2	1	7	3	13
31		**Manufacture of Chemicals and Chemical Products (Except Products of Petroleum and Coal).**	..	..	**3**	**4**	**1**	..	8
	313	Manufacture of drugs and medicines	..	..	..	1	..	..	**1**
	314	Manufacture of perfumes, cosmetics, lotions, hair dressings, tooth pastes, soap in any form, synthetic detergents, shampoos, shaving products, cleansers, washing and scouring products and other toilet preparations.	..	..	2	3	1	..	6
	318	Manufacture of explosives and ammunition and fire works.	..	..	1	..	..	..	1

1	2	3	4	5	6	7	8	9	10
32		**Manufacture of Non-Metallic Mineral Products**	**1**	**3**	..	**3**	**5**	**1**	**13**
	322	Manufacture of earthen ware and earthen pottery	1	..	..	2	3	..	6
	324	Manufacture of cement, lime and plaster	..	2	..	1	2	..	5
	327	Manufacture of earthen and plaster statutes and other products.	..	..	..	..	..	1	1
	329	Manufacture of miscellaneous non-metallic mineral products such as slate products, abrasives, graphite products, mineral wool, silica products and other non metallic mineral products not elsewhere classified.	..	1	..	..	..	..	1
33		**Basic Metal and Alloys Industries**	**1**	..	**2**	..	..	..	**3**
	330	Iron and steel industries	1	..	2	..	..	..	3
34		**Manufacture of Metal Products and Parts Except Machinery and Transport Equipment.**	**1**	..	**3**	..	**4**	..	**8**
	340	Manufacture of fabricated metal products such as metal cans from tin-plate, terne plate or enamelled sheet metal metal, shipping containers, barrels, drums, kegs, pails, safes, vaults, enamelled, sanitary and all other fabricated metal products not elsewhere classified.	..	..	1	..	1	..	2
	342	Manufacture of furniture and fixtures primarily of metal.	..	..	1	..	2	..	3
	343	Manufacture of hand tools and general hardware	1	..	1	..	..	..	2
	345	Manufacture of metal utensils, cutlery and kitchenware	..	..	..	..	1	..	1
35		**Manufacture of Machinery, Machine Tools and Parts Except Electrical Machinery.**	..	**1**	**1**	..	..	..	**2**
	350	Manufacture of agricultural machinery and equipment and parts'	..	..	1	..	..	..	1
	355	Manufacture of refrigerators, airconditioners, and fire fighting equipment, and other parts, components and accessories.	..	1	..	..	..	..	1
36		**Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts.**	..	**1**	..	..	..	..	**1**
	360	Manufacture of electrical industrial machinery and apparatus and parts (such as electrical motors, generators, transformers, electro-magnetic clutches and brakes etc.)	..	1	..	..	..	..	1
38		**Other Manufacturing Industries**	..	..	**1**	**1**	..	**1**	**3**
	383	Manufacture of jewellery and related articles	..	..	1	1	..	..	2
	389	Manufacture of miscellaneous products not elsewhere classified such as costume jewellery, costume novelties, feather, plumes, artificial flowers, brooms brushes, lamp shades, tobacco pipes, cigarette holders, ivory goods, badges' wigs and similar articles.	..	..	..	..	..	1	1

38		**Other Manufacturing Industries**	..	..	..	2	..	..	2
	380	Manufacture of medical, surgical and scientific equipment.	..	..	..	1	..	..	1
	383	Manufacture of jewellery and related articles . .	..	..	..	1	..	..	1
		Towns not Reporting any Important Commodity . .	2	4	19	44	68	12	149
		Total	**10**	**13**	**40**	**72**	**100**	**15**	**250**

36.2 There are 53 towns where no important commodities are manufactured. The number of such towns, size-class-wise, with percentage to the total number of towns, is indicated below:—

Size Class of town	Total No. of towns	No. of towns not reporting any important commodity manufactured	Percentage of towns not reporting any commodity manufactured to total number of towns
I	10	..	Nil
II	13	1	7·69
III	40	3	7·50
IV	72	11	15.28
V	100	34	34·00
VI	15	4	26·67

36.3 All class I towns have reported manufacture of some commodity. In 12 class II towns, manufacture of some commodity have been reported. Mhow Cantonment is the only class II town where no article is manufactured for the reason that it is mainly a military habitation. In class III to V towns, the percentage of the towns not reporting "manufacture" increases with the decrease in the population size. In class VI towns also, quite a bulk of them do not actually manufacture any commodity but the percentage of towns not reporting "manufacture" of commodity is less than the percentage shown against class V towns for the reason that 3 out of 15 towns are colliery towns and mining has also been categorised under the head "manufacture" as per data supplied from the Directorate of Economics and Statistics, Madhya Pradesh, Bhopal.

36.4 The data regarding first important commodity manufactured is contained in Statement 31-A above. It would be seen that bulk of the towns manufacture articles covered under major groups 20-21 "Food Products", 22-"Beverages, Tobacco & Tobacco Products" and 23-"Cotton Textiles". A perusal of the classification under minor groups will indicate that quite a good number of these towns come in the smaller size-class and the items of manufacture relate to edible oils, bidi, cotton-ginning-cleaning, bailing and weaving-finishing of cotton textiles in handlooms, etc., Class I towns mainly manufacture the following items:—

1 Grain Mill Products

2 Bidi

3 Cotton Textiles

4 Paper Boards

5 Earthernware and Earthen potteries

6 Iron and Steel

7 Hand Tools and General Hardware

36.5 A similar trend is found regarding second and third important commodities manufactured. It may be observed that there is sufficient scope for industrialisation and manufacture of variety of articles in the towns of the State.

Important Commodities Imported:—

37.1 Three important commodities imported, by size-class of town and industrial category upto minor groups, have been indicated in the inset tables 32-A, 32-B and 32-C below:—

TABLE No. 32-A

Important Commodities Imported by Size Class of Towns and Industrial Category

FIRST IMPORTANT COMMODITY

Industrial Category		Description	Size Class of Towns						
Major Group	Minor Group		I	II	III	IV	V	VI	Total
1	2	3	4	5	6	7	8	9	10
60		**Wholesale Trade (W.T.) in Food, Textiles, Live Animals Beverages and Intoxicants.**	**9**	**10**	**31**	**61**	**83**	**14**	**208**
	600	Wholesale trade in cereals and pulses	2	5	7	15	10	7	46
	601	Wholesale trade in foodstuff other than cereals and pulses.	1	1	8	10	24	1	45
	602	Wholesale trade in textiles and textile products, like all kinds of fabrics, garments, shirtings, suitings, hosiery goods.	5	4	15	35	48	6	113
	606	Wholesale trade in tobacco and tobacco products	1	..	1	1	1	..	4
61		**Wholesale Trade in Fuel, Light, Chemicals, Perfumery, Ceramics and Glass.**	..	**1**	**1**	**3**	**4**	**1**	**10**

	602	Wholesale trade in textiles and textile products, like all kinds of fabrics, garments, shirtings, suitings, hosiery goods.	..	2	7	10	16	5	40
	606	Wholesale trade in tobacco and tobacco products	1	..	1	5	2	..	9
61		**Wholesale Trade in Fuel, Light, Chemicals, Perfumery, Ceramics, Glass.**	**3**	**2**	**5**	**6**	**10**	..	**26**
	610	Wholesalel trade in medicines and chemicals	..	1	4	4	8	..	17
	611	Wholesale trade in fuel and lighting products	..	..	..	1	..	..	1
	612	Wholesale trade in toilets, perfumery and cosmetics .	..	..	..	..	2	..	2
	613	Wholesale trade in metal, porcelain and glass utensil crockery and chinaware.	3	1	1	1	..	..	6
62		**Wholesale trade in Wood, Paper, Other Fabrics and Skin and Inedible Oils.**	..	**1**	**6**	**8**	14	**3**	**32**
	620	Wholesale trade in petrol, mobil oil and allied products	..	..	5	8	12	3	28
	621	Wholesale trade in wood, cane bamboo, thatches, etc.	..	1	1	..	2	..	4
63		**Wholesale Trade in all Types of Machinery, Equipment, including Transport and Electrical Equipment.**	..	**1**	..	**2**	**2**	**2**	**7**
	630	Wholesale trade in agricultural and industrial machinery, *e.g.* harvestors, sowing machines, etc.	..	1	..	1	2	1	5
	631	Wholesale trade in electrical machinery and equipment	..	..	..	1	..	1	2
64		**Wholesale Trade in Miscellaneous Manufacturing** .	**1**	**1**	**4**	**4**	**4**	**1**	**15**
	643	Wholesale trade in building materials . . .	..	..	1	3	3	1	8
	645	Wholesale trade in hardware and sanitary equipment	1	1	2	1	..	..	5
	646	Wholesale trade in scientific, medical and surgical .	..	..	..	..	1	..	1
	649	Wholesale trade in goods not elsewhere classified .	..	..	1	..	..	..	1
		Towns not Reporting any Important Commodity .	..	..	..	1	2	1	4
		Total	**10**	**13**	**40**	**72**	**100**	**15**	**250**

37.2 Table 32-A regarding first important commodity imported would show that the bulk of the towns import textile and textile products, medicines and chemicals, petrol, mobil oil and allied products, agricultural machinery, etc. The main items of import in class I and II towns relate to cereals and pulses, other food stuffs, textile products, agricultural machinery, tobacco products etc. The statement regarding second and third important commodity will also show that the lower size class towns generally import finished products; the higher size class of towns also import finished products but this is limited to items not manufactured there, along with cereals and other food stuffs.

Important Commodities Exported:—

38.1 Three important commodities exported, by size-class of town and industrial category upto minor groups, are as indicated in inset table 33-A, 33-B and 33-C below:—

TABLE No, 33-A

Important Commodities Exported by Size Class of Towns and Industrial Category

FIRST IMPORTANT COMMODITY

		Total	**10**	**13**	**40**	**72**	**100**	**15**	**250**

38.2 It would be seen from the above statements that bulk of the lower size-class of towns export articles like cereals, pulses and other food stuffs along with textile products manufactured therein, while bigger size class of towns export items like cereales, pulses, other food stuffs, etc., which are purchased for business and mill manufactured textiles, tobacco and tobacco products. The data mentioned in the above tables would indicate that generally the items exported from the bulk of the towns of the State more or less, belong to the primary sector of the economy, i.e. mainly agricultural produce. This is indicative of the fact that the economy of the State is still very much agricultural in character.

CHAPTER VIII

Statement VII

(1) Population by religion

39.1 Percentage distribution of population by religion and size-class of towns is given in table below:—

TABLE No. 34

Percentage distribution of population by religion and size class of towns

Size Class of Towns	No. of Towns	RELIGION								
		Budhism	Christianity	Hinduism	Jainism	Islam	Sikhism	Other Religion and persuation	Religion not stated	Total
1	2	3	4	5	6	7	8	9	10	11
I . . .	10	0·36	1·39	77·21	3·14	16·59	1·28	0·01	0·01	100·00
II . . .	13	0·25	1·91	79·68	2·50	14·11	1·52	0·01	0·01	100·00
III . . .	40	0·35	1·29	79·17	3·41	14·77	1·00	0·01	..	100·00
IV . . .	72	0·42	0·68	78·43	4·24	15·49	0·73	..	..	100·00
V . . .	100	0·18	0·92	80·45	3·63	14·28	0·53	..	..	100·00
VI . . .	15	0·02	1·58	85·57	1·58	10·96	0·28	..	..	100·00
Total . .	**250**	**0·33**	**1·27**	**78·56**	**3·33**	**15·42**	**1·07**	**0·01**	..	**100·00**

39.2 It would be seen from the above table that majority of the town population follow hindu religion (about 79 percent); next come followers of islam religion (about 15 percent). The percentage of population following jain religion is only about 3 while the percentage of people following other religions (boudh, christian and sikh) is negligible. It may further be seen from the above table that in smaller towns (class V and VI) the percentage of people following hindu religion is about 80 percent, while in higher category of towns it varies from about 77 to 80 percent. The percentage of people following islam religion is highest in class I towns (about 17 percent) while in other classes of towns the percentage varies from about 14 to 15, except in class VI towns where the percentage is about 11. The percentage of people following jain religion is about 3 to 4 in all classes of towns, except in VI towns where the percentage is slightly more than 1 and the highest percentage (slightly more than 4 percent) is found in class IV towns. About 2 percent christian population is found in class II and VI towns while in other classes of towns the percentage is less. Comparatively, higher percentage of people following sikh religion is found in bigger towns and the concentration is mostly in class I and II towns.

40.1 Distribution of towns by proportion of population by religion is as indicated in table No. 35 below:—

TABLE No. 35

Distribution of Towns by Proportion of Population by Religion

Size Class of Town	Total No. of Towns	Percentage of Population by Religion	Distribution of Towns by Religion							
			Budhism	Christianity	Hinduism	Jainism	Islam	Sikhism	Other Religion and persuation	Religion not Stated

40.2 It may be seen from the above table that in class I towns, there are 7 towns where the percentage of people following hindu religion is above 75 while only 3 towns come in the percentage range of 50-74. Regarding islam religion, maximum number of class I towns (6) come in the percentage range of 10-25 while two class I towns, Burhanpur (45.66 percent) and Bhopal (36.57 percent) come in the percentage range of 25-50. For other specified religions all the ten towns come in the percentage range below 10.

40.3 Nine class II towns have more than 75 percent population following hindu religion while the remaining 4 towns have 50-74 percent hindu population. Regarding islam religion, 6 towns each come in the percentage ranges 10-25 and less than 10, while only one town (Khandwa with 25.49 percent) comes in the percentage range of 25-50. Regarding other specified religions, all the towns come in the percentage range below 10, except that for jain religion one town (Mandsaur with 10.43 percent) comes in the percentage range 10-25.

40.4 There are 40 class III towns in the State and bulk of them have hindu population above 75 percent and 10-25 percent people following islam religion is found in quite a good number of towns. There are 1 and 6 towns where there is no popuation following boudh and sikh religions, respectively.

40.5 There are 72 class IV towns and in 51 towns, the percentage of people following hindu religion is about 75. Followers of islam religion range from 10-25 percent in 35 towns; they are less than 10 percent in 27 towns. Bulk of the towns where other specified religions are followed come in the percentage range below 10. It may also be mentioned that there is no population following jain, christian, sikh and boudh religions in 1, 5, 7 and 46 towns, respectively.

40.6 Forty percent of the towns in the State come in the category of class V towns where bulk of the towns, as in other classes, have more than 75 percent hindu population, while in 47 and 40 towns the percentage of people following islam religion comes in the percentage ranges 10-25 and less than 10, respectively. There is no population following jain, christian, sikh and boudh religions in 4,12,19 and 70 towns respectively.

40.7 There are only 15 class VI towns in the State and practically in all the towns (with the exception of one) hindu population is above 75 percent, while in bulk of the towns the percentage of people following islam religion is less than 10. In quite a good number of towns, the percentage of people following other specified religion is less than 10. In this class also, there are 1, 1, 4 and 10 towns where there is no population following jain, christian, sikh and boudh religions, respectively.

40.8 Contrary to the general trend, there are only 2 towns, Jaora (class III) and Begamganj (class IV), where the percentage of people following hindu religion is low and these towns with 49.60 and 48.86 percent come in the percentage range 25-50 in the above table.

CHAPTER IX

Primary Census Abstract

41 The basic statistics presented in the Primary Census Abstract relate to area, occupied residential Census houses, population (including institutional and houseless persons), literate and educated persons, workers classified into the nine industrial categories and non-workers.

Density of Population

42.1 As already indicated earlier, the figures presented in the Primary Census Abstract relate to the statutory limits of the towns. Thus the total area of towns in the State is 2408.11 sq. km. and the total population is 6,408,786 which gives an average density of 2661* per sq. km.

42.2 Density of population i.e., population per sq. km. is an index of congestion in terms of pressure of population on land. As the town grows in size, the density of population also keeps increasing. The following table give the distribution of towns by size-class of population and density.

TABLE No. 36

Distribution of towns by size-class of population and density

Size-Class of towns	Total Number of towns	Total population	Density of population per sq. km.
I	10	2,520,621	4,316
II	13	816,984	2,765
III	40	1,287,156	3,101
IV	72	979,937	1,870
V	100	744,539	1,509
VI	15	59,549	621
Total	**250**	**6,408,786**	**2,661**

42.3 It may be seen that the density keeps on increasing with the increase in the class of town. Except in the case of class II towns, the increasing trend is fairly consistent. The low figure in respect of class II towns is due to large scale extension in the limits of Rewa and Satna towns of this class in the year 1964 and 1968, respectively. The extension in area takes into account in each case sizeable portions of cultivated land and uninhabited areas which is evident from the fact that the density of population of Rewa and Satna has gone down from 3,530 and 2,157 persons per sq. km. in 1961 to 1,316 and 1,588 persons per sq. km. in 1971, respectively, whereas the population of these towns have registered an increase of 60.65% and 51.21% respectively, during 1961-71. These two cases appear to be somewhat exceptional so far as extension in limits in terms of area *vis-a-vis* population is concerned. However, the foregoing facts lead to the conclusion that higher the size class of towns, higher is the density of population.

42.4 As against the general impression that greater congestion in terms of pressure of population on land is found in large towns and cities, it is, however, interesting to note that some of the small towns considered individually exhibit very high density as will be evident from the following table which presents density figures of the first ten towns in the State.

TABLE No. 37

Class of town	Name of town	Civic status	Density per sq. km.	Rank (in descending order of density
VI	Chandameta .	NM	216,800	1
V	Badkuhi . .	NM	51,169	2
V	Iklehra . .	NM	48,900	3
V	Gaurella .	NM	39,778	4
IV	Chikhali Kalan	NM	39,169	5
V	Nalkhera .	M	33,014	6
IV	Butaria . .	NM	32,167	7
V	Chachaura-Binaganj	M	31,562	8
V	Kolaras . .	M	29,495	9
V	Unchahara .	NM	28,418	10

NM : Non-Municipal; M : Municipality.

42.5 It is a chance that all the small towns figure among the first ten in terms of very high density of population but it can not, however, be generalised as a rule that small towns exhibit high density. On the other hand all the small towns figure among the first ten in terms of lowest density as the following table would show:

*In computing the density of population per sq. km., area figures of Kotma and Amlai towns have not been taken into account as they were not available but the numerator includes the population of both. The distortion caused due to this is, however, insignificant.

TABLE No. 38

Lowest density in towns

Class of town	Name of town	Civic status	Density per sq. km.	Rank (in ascending order of density)
VI	Pachmarhi . .	NA	25	1
VI	Khajuraho . .	NA	161	2
V	Kirandul . .	NM	205	3
IV	Maharajpur . .	M	219	4
V	Beohari . .	NA	300	5
IV	Sihora . . .	M	378	6
V	Mhowgaon . .	NM	399	7
V	Khirkiya . .	NM	426	8
V	Pasan . . .	NM	431	9
V	Akaltara . .	NM	453	10

NA:—Notified Area; NM:—Non-Municipal; M:—Municipal.

42.6 Density of population in small towns considered individually, thus presents an erratic picture with very high and very low figures depending upon the peculiar characteristics in some cases and because of improper reporting of area figures in some cases. Of the towns shown in Tables 36 and 37 above, Chandamata. Badkuhi, Iklehra, Chikhali-Kalan and Butaria-all mining towns in the coal belt of the State have very high density of population. On verification of area figure and habitational pattern of Chandameta town an interesting fact has come to light. There is a mining labour camp which comprises of tents built in small area where migrant male labourers stay in good number, like slums, thereby causing an unduly large figure of density. The exceptionally low density of population in the other small towns is mainly on account of the fact that large portions of cultivated or waste lands formed part of the area figures. Thus density figures are meaningful only for the first three classes of towns which are in fact effectively urbanised and have in them fairly well defined limits in respect of habitation as such. Also, by the time a small town with its exceptional characteristics, which reflects very high density, attains the status of class III town, it gets normalised in terms of area and population in the course of urbanisation. Therefore, the fact remains that larger the towns, higher is the density of population.

Number of Households

43.1 With the exception of Garhakota and Panara, in all the towns in the State, the number of households is in excess of the number of residential census houses. Excess of the households is an index of congestion because of the sub-standard housing in town in this State. The ratio of the number of households to the number of residential census houses indicates the degree of congestion. The degree of congestion is generally found to be greater in larger towns, as the following table would show.

TABLE No. 39

Size class of town	No of Residential Census houses	No. of Household	Ratio (No. of HH to No. of RCH
I	368,043	478,930	1·30
II	128,997	163,104	1·26
III	203,628	248,898	1·22
IV	155,400	186,190	1·20
V	125,007	144,929	1.16
VI	11,557	12,696	1.10
Total .	**992,632**	**1,234,747**	1.24

43.2 As the towns grow in size, the increase in the number of residential census houses does not keep pace with the increase in the number of households and consequently the increase in population leads to congestion.

43.3 It has been found that higher the size-class of towns, greater is the pressure of population on land (i.e. higher the density) so also higher the size-class of towns, greater is the ratio of number of households to number of residential census houses. Thus corelating the density with the number of households per census house, the picture of congestion that emerges in different density range by size-class of towns is given in the following table:—

TABLE No. 40

No. of Households Per Census House by Density

Size Class of Town	Density Range per Sq. Km	Total No. of Towns	Average No. of House holds Per Census House
I	100 or below .	..	..

	10,001—20,000	..	..
	20,001 & above	4	1.03
	TOTAL	15	1.10

43.4 It may be seen that, by and large, the towns with higher density of population have proportionately greater number of households per census house, although a slightly distorted trend is visible, particularly in the density ranges in size-classes IV and V.

Household size

44.1 The ratio of the total population to the total number of households gives the average size of a household. The State average of the size of a household works out to 5.19. It ranges from 3.40 in Kurasia, a colliery township in Surguja district, to 6:69 in Bairagarh, a small trading town inhabited by Sindhis. Considering the situation in individual towns the first and last ten towns in terms of highest and lowest averages of the number of persons per household are as below:—

TABLE No. 41

First and last ten towns having the highest and lowest average size of household

S.No	Highest average Name of town	Average	Lowest average Name of town	Average
1	Bairagarh	6.69	Kurasia Colliery	3.40
2	Burhanpur	6.61	Chirmiri	3.45
3	Jabalpur cantt.	6.44	Pasan Colliery	3.46
4	Joura	6.27	Kirandul	3.63
5	Pichhore	6.25	North Jhagrakhand Colliery	3.68
6	Mhow Cantt	6.21		
7	Gogaon	6.14	New Katni Rly.Jn. Area	3.70
8	Ashta, Kasrawad	6.11	Rajhara Jharandalli	3.80
9	Agar, Jaora, Betul Bazar	6.06	Rewa, South Jhagrakhand Korba Colliery	3.85
10	Gohad	6.04	Bhilainagar, Amlai	3.88 3.89

44.2 This phenomenon of very uneven size of households existing in certain towns is due to a number of factors associated with urbanisation as well as the social set up in them. Towns in dacoity area of Bhind and Morena are characterised by large size households. Cantonments generally exhibit a high average owing to the fact that a sizable population in them lives in institutions like barracks, hostels etc. thereby returning large sized institutional households. On the other hand industrial and mining towns are characterised with low average size of households which is mainly due to the migratory character of the population in them. For want of proper housing facilities male members live as single-member household leaving behind their families in their original place of abode. In order, therefore, to study this phenomenon in urban areas the historical background of individual towns needs to be kept in view. However, the picture in totality by size-class of towns is given in the following table:—

TABLE No. 42

Class of towns	Total population	Total number of households	Household size
I	2,520,621	478,930	5.26
II	816,984	163,104	5.01
III	1,287,156	248,898	5.17
IV	979,939	186,190	5.26
V	744,539	144,929	5.14
VI	59,549	12,696	4.69
TOTAL	6,408,786	1,234,747	5.19

44.3 The figures arrived at in the above table suggest that greater the urbanisation, greater will be the average size of a household. Is it a phenomenon caused due to the greater disintegration of joint family system in the small towns vis-a-vis large towns? No such evidence is available nor does experience support such a conclusion. The picture revealed in the above table seems to be a statistical phenomenon and perhaps can be explained with the existence of comparatively greater number of institutional households in big towns, since the average size of an institutional household is relatively bigger than that of a non-institutional household. There are as many as 8548 institutions in urban areas (inclusive of urban outgrowths) of the State. The average size of an institutional household works out to 9.23 and that of a non-institutional household 5.13.

Scheduled Castes and Scheduled Tribes

45.1 Proportion of Scheduled Castes and Scheduled Tribes by size-class of towns is as given in table No. 43 and No. 44 below:—

TABLE No. 43

Proportion of Scheduled Castes

Class town	Total population	Percentage of Scheduled Castes to total population
I	2,520,621	9.91
II	812,423	9.39
III	1,287,156	9.40
IV	979,937	10.47
V	744,539	10.49
VI	59,549	11.14
TOTAL .	6,404,225	9.91

TABLE No. 44

Proportion of Scheduled Tribes

Class of Town	Total population	Percentage of Scheduled Tribes to total population
I	2,520,621	0.17
II	812,423	1.78
III	1,287,156	2.57
IV	979,937	2.45
V	744,539	5.52
VI	59,549	8.16
TOTAL . .	6,404,225	1.90

45.2 The average percentage of Scheduled Castes in the towns of the State is 9.91, ranging from 9.39 to 11.14 percent in the different classes of towns. The general trend is that comparatively, in bigger towns the percentage of Scheduled Castes is less. Similar trend is found for Scheduled Tribes also. The average percentage of Scheduled Tribes in the towns is 1.90 ranging from 0.17 to 8.16 percent. Sharp increase in the percentage is noticeable from class IV to class VI towns.

45.3 The percentage of Scheduled Castes and Scheduled Tribes in the cities of the State is given in table Nos. 45 and 46 below :

TABLE No. 45

Scheduled Castes Population in Cities

Name of city	Population	Percentage of Scheduled Castes
Indore	543,381	11.07
Jabalpur	426,224	8.81
Gwalior	384,772	15.63
Bhopal	298,022	5.56
Ujjain	203,278	13.28
Raipur	174,518	3.89
Bhilainagar	159,940	5.04
Sagar	118,574	17.83
Ratlam	106,666	7.79
Burhanpur	105,246	3.92
TOTAL	2,520,621	9.91

TABLE No. 46

Scheduled Tribes Population in Cities

Name of city	Population	Percentage of schoduled Tribes
Indore	543,381	0.04
Jabalpur	426,224	..
Gwalior	384,772	0.18
Bhopal	298,022	0.45
Ujjain	203,278	0.06
Raipur	174,518	..
Bhilainagar	159,940	0.11
Sagar	118,574	..
Ratlam	106,666	0.19
Burhanpur	105,246	..
TOTAL	2,520,621	0.17

45.4 It may be seen that in Gwalior, Ujjain and Sagar cities the percentage of Scheduled Castes is more than 15 while in Raipur the percentage is lowest (3.89 percent). It is equally low in Burhanpur (3.92 percent). The Scheduled Tribes in the cities are not even one percent, the average being only 0.17 percent. There is no Scheduled Tribes population in Jabalpur, Raipur, Sagar and Burhanpur cities because the tahsils where these cities are located do not come within the ambit of "The Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956". It may be indicated here that only those castes and tribes have been taken into account while showing their population, which are scheduled according to the above mentioned Presiden-

tial Order. There may be cases where persons belonging to the above castes and tribes have been hit by area restrictions.

Literacy :

46.1 The percentage of literates and educated in urban areas of the State is 49.89. It is interesting to note that all the three cantonment towns in the State within the first ten in terms of highest literacy—

1st: Pachmarhi Cantt. (64.77%); 2nd Jabalpur Cantt. (64.35%) 9th: Sagar Cantt. (57.93%); 4th to 8th and 10th being Khamaria, New Katni Rly. Jn. Area, O.F.A. Katni, Govindpura, Balaghat and Jhabua with literacy rates 61.74%, 61.47%, 60.62%, 60.58%, 58.38% and 57.88%, respectively. On the other hand, lowest literacy is found in Khajuraho 24.31% followed by Amlai (26.53%) and Johilla Colliery (27.41%). Among the first ten towns in terms of lowest literacy, four mining towns figure. Johilla Colliery is 3rd and Pasan (29.16%), North Jhagrakhand Colliery (30.22%), and Tirodi (31.32%) rank 5th, 8th and 10th respectively. Mining also comes under Primary Activity. Apart from mining, Primary Activity includes cultivation, livestock, forestry, fishing, hunting, plantations etc. which connote the rural pattern of economic activity. All the Primary Activity towns in the State are characterised with very low literacy. Among the industrial towns, high or low literacy perhaps depends upon the type of industrial activity predominent in them and the places from where it has drawn its working population. For instance, Govindpura is having 60.58% of literate population whereas the percentage in Nepanagar is only 47.84%; the former contains the Heavy Electricals Factory and the latter Newsprint Paper Mill. Both of them are contemporary towns having come into existence in 1961. Similarly, service towns are characterised with high literacy rates. This is evident from the fact that even in the predominantly tribal district of Jhabua, the district headquarters town, Jhabua, and the tahsil headquarters town, Jobat, exhibit a high percentage of literacy, it being 58.38% and 51.45% respectively. But the general trend is that higher the size class of towns, higher is the rate of literacy as the following table would show:—

TABLE No. 47

Proportion of literates by size class of towns

Class	Population	Percentage of literacy
I	2,520,621	52·77
II	816,984	53·76
III	1,287,156	49·37
IV	979,937	46·23
V	744,539	42·34
VI	59,549	41·04
TOTAL	6,408,786	49·89

46.2 But for the class II towns, which show a slightly higher rate of literacy as compared to the class I towns, a fairly consistent trend of increase of literacy with the increase in the size-class of towns is visible. Apart from the existence of Jabalpur Cantt. and Govindpura towns in class II group, which are having proportionately very high rate of literacy owing to the peculiar characteristics in them, the former being cantt. and the latter being the industrial towns employing comparatively more sophisticated type of personnel—the ralatively higher proportion of illiterate floating population in cities vis-a-vis towns seems to have improved the average of class II towns in comparision to class I towns:

46.3 The following table gives proportion of literates in towns by different density range.

TABLE No. 48

Proportion of literacy by density

Density range (per sq. km.)	No. of towns	Percentage of literacy
100 or below . . .	1	55.03
101— 500 . . .	9	37.88
501— 1,000 . . .	28	45.60
1,001— 2,000 . . .	43	47.30
2,001— 5,000 . . .	88	51.58
5,001—10,000 . . .	31	51.27
10,001—20,000 . . .	21	45.11
20,001 & above . . .	27	41.74
Unclassified	2	35.97
TOTAL . . .	250	49.89

46.4 The figures in the above table do not indicate any trend and, therefore, it does not lead to any valid conclusion that literacy is directly corelated with the density of population at least in towns of Madhya Pradesh.

Sex-ratio

47.1 Sex-ratio means number of females per 1000 males. The State urban average is 871 with a range of variation from 559 being the lowest in Jabalpur Cantt. to 1017 being highest in Sarangarh town. Sarangarh town is an isolated case where females outnumber males. Raigarh district in which Sarangarh is located has also the same position. The unbalanced sex-ratio towards the lower side is a phenomenon caused due

to urbanisation. The first ten towns in terms of lowest sex-ratio are given in the following table—

TABLE No. 49

Town with lowest sex-ratio

Rank (In descending order of sex-ratio)	Name of town	Sex-ratio
1	Jabalpur Cantt.	559
2	Pachmarhi Cantt.	652
3	Kirandul	653
4	South Jhagrakhand Colliery	709
5	Amlai	712
6	Chikhali Kalan	713
7	Sagar Cantt.	734
8	New Katni Rly. Jn. Area	751
9	O. F. A. Katni	755
10	Pasan, Panara	756

47.2 Of the towns indicated above 1st, 2nd and 7th are cantonments and 3rd, 4th, 6th and 10th are mining towns. Thus cantonments and mining towns predominate in terms of very low sex-ratio.

47.3 The following table gives sex-ratio by size-class of towns:

TABLE No. 50

Sex-ratio by size-class of towns

Size Class of towns	Total No. of towns	Total Population	No. of females per 1000 males
I	10	2,520,621	863
II	13	816,984	848
III	40	1,287,156	869
IV	72	979,937	900
V	100	744,539	894
VI	15	59,549	845
Total	**250**	**6,408,786**	871

47.4 Although it is a fact that low sex-ratio is a phenomenon caused due to urbanisation, but it can not be generalised that larger the towns, lower will be the sex-ratio which is evident from the above table.

47.5 The table below gives sex-ratio in towns by density range:—

TABLE No. 51

Sex-ratio by density range

Density range	No. of Towns	No. of females per 1000 males
100 or below	1	900
101— 500	9	851
501—1,000	28	893
1,001—2,000	43	846
2,001—5,000	88	874
5,001—20,000	21	895
20,001 & above	27	876
Unclassified	2	781
Total	**250**	**871**

47.6 Both the phenomena of low sex-ratio and high density are very much associated with urbanisation but there does not seem to exist a direct relationship between them in the towns of this state which is evident from the above table.

Workers and Non-workers:

48.1 The percentage of workers to total population, i.e., participation rate in urban areas of the State is 27.80. The highest participation rate town-wise is in Kirandul (53.42%) followed by Jabalpur Cantt. (43.77%), Amlai (42.30%), Jawad (38.63%) and Rajhara-Jharandalli (38:20%) and the lowest participation rate is found in Rampura (23.21%) followed by Khilchipur (23.54%), Bairagarh (23.63%), Nowgong (23.73%) and Butaria (23.76).

48.2 Participation is also considered as an index of the state of economy. A study of the participation rate in towns reveals that small towns with predominantly rural pattern of economic activity are characterised with high participation rate. Participation rate tends to decrease with the pace of urbanisation which is evident from the fact that the highly urbanised towns like Indore, Gwalior, Jabalpur and Bhopal show very low participation rate of 26.08%, 25.11%, 26.65% and 27.91%, respectively. The following table substantiates the above contention.

TABLE No. 52

Percentage distribution of workers and non-workers

Size Class of Towns	Percentage of workers and non-workers					
	Total		Male		Female	
	Workers	Non Workers	Workers	Non-Workers	Workers	Non Workers
I	26.90	73.10	45.19	54.81	5.71	94.29
II	28.86	71.14	47.21	52.79	7.22	92.78
III	27.62	72.38	45.44	54.46	7.12	92.88
IV	28.03	71.97	45.66	54.34	8.44	91.56
V	29.39	70.61	47.14	52.86	9.53	90.47
VI	31.50	68.50	50.81	49.19	8.64	91.36
Total	**27.80**	**72.20**	**45.85**	**54.15**	**7.08**	**92.92**

48.3 Although the trend is not very consistent but, by and large, it indicates that higher the size-class of towns, lower is the participation rate.

48.4 The classification of workers into the broad sectors of economic activity viz., Primary, Secondary and Tertiary have been done by grouping the industrial categories as under:—

Sector	Industrial Category
Primary	Cat. I Cultivators. Cat. II Agricultural Labourers. Cat. III : Livestock, Forestry, Fishing Hunting, Plantations, Orchard' & allied activities. Cat. IV : Mining & Quarrying.
Secondary	Cat. V Manufacturng. Processing, Servicing and Repairs — V(a) Household Industry; V(b) Other than Household Industry Cat. VI Construction
Tertiary	Cat. VII Trade and Commerce. Cat. VIII : Transport, Storage and Communications. Cat. IX : Other Services.

48.5 The following table gives the distribution of workers into three broad sectors of economy, viz., Primary, Secondary and Tertiary by size class of towns.

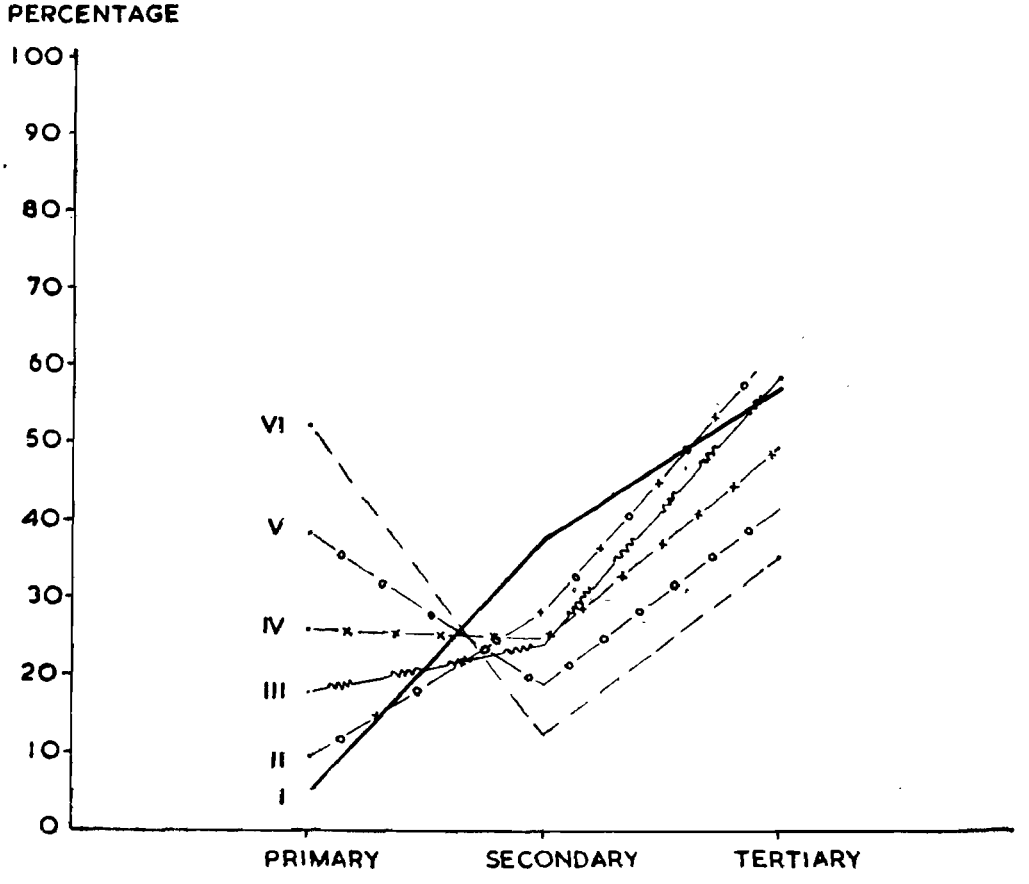

TABLE No. 53

Distribution of workers into Primary, Secondary and Tertiary Sectors, by size class of towns.

Size class of towns	No. of towns	No. of workers as percentage to total workers		
		Primary Sector	Secondary Sector	Tertiary Sector
I	10	5.08	38.09	56.83
II	13	9.51	28.30	62.19
III	40	17.93	24.07	58.00
IV	72	25·64	24.95	49·41
V	100	38.75	19.38	41.87
VI	15	52.48	12.49	35.03
Total	**250**	**16.03**	**29.40**	**54.57**

48.6 It is interesting to note that very small towns (Class VI) are characterised with higher proportion of workers in primary activity followed by tertiary activity with substantially low participaton in secondary activity. With the pace of urbanisation the proportion of workers in primary activity goes on declining with increase generally in tertiary sector and secondary sector. By the time the towns reach the class IV stage, which is regarded as the take off stage, the participation in primary and secondary sectors of economic activity reaches more or less at a parallel level and thereafter the partcipation in the secondary and tertiary sectors, increases with a substantial fall in primary sector. When plotted on a graph—abscissa showing the participation rate, and ordinate, the three sectors of econmic activity—the towns in small size classes present a 'V' shape curve slightly tilted towards the right and in the course of urbanisation i.e., higher size class towns, the 'V' shape curve tends to get tilted towards the left and finally at its maturity the curve emerges into nearly a straight line as may be seen in the chart given below:

PARTICIPATION RATE IN PRIMARY, SECONDARY TERTIARY SECTORS BY SIZE-CLASS OF TOWNS

48.7 When urban centres tend to grow faster in size, which is generally so as a consequence of industrialisation, rural pattern of economic activity tends to decrease at a comparatively faster rate and secondary and tertiary-sectors tend to grow simultaneously. It follows that the growth of one sector of economic activity conditions and facilitates the growth of the other.

48.8 A similar pattern emerges in the case of participation rate among females, except in the secondary sector, as would be evident from table No. 54.

TABLE No. 54

Participation rate among Females

Size Class of towns	Total No. of towns	Female workers as percentage of total female population			
		All Industrial categories	Primary sector	Secondary Sector	Tertiary Sector
I	10	5.71	0.51	1.76	3.44
II	13	7.22	1.42	1.93	3.87
III	40	7.12	2.13	1.54	3.45
IV	72	8.44	3.42	2.20	2.82
V	100	9.53	4.98	1.77	2.78
VI	15	8.64	4.51	0.93	3.20
Total .	**250**	**7·08**	**1·96**	**1·80**	**3·32**

48.9 The following table gives the percentage distribution of workers by size class of towns and industrial categories:—

TABLE No. 55

Percentage distribution of workers by size class of towns

	Industrial category	Size class of towns					
		I	II	III	IV	V	VI
I	Cultivator	1·94	3·42	6·87	10·69	16·52	10·35
II	Agricultural Labourer	1·71	3·81	5·20	9·42	12·80	7·79
III	Livestock, Forestry, Fishing, Hunting Plantations & allied Activities.	1·30	1·98	2·38	2·27	1·91	3·00
IV	Mining & Quarrying	0·13	0·30	3·48	3·26	7·52	31·34
	Primary Sector	**5·08**	**9·51**	**17·93**	**25·64**	**38·75**	**52·48**
V(a)	Manufacturing, Processing, Servicing & Repairs in Household industry.	6·11	6·60	6·07	10·47	9·72	4·22
V(b)	Manufacturing, Processing, Servicing & Repairs other than Household Industry.	28·35	18·74	14·18	12·05	7·69	5·08
VI	Construction	3·63	2·96	3·82	2·43	1·97	3·19
	Secondary sector	**38·09**	**28·30**	**24·07**	**24·95**	**19·38**	**12·49**
VII	Trade and Commerce	18·30	17·10	18·09	18·91	14·92	8·69
VIII	Transport Storage, & Communication	9·26	9·79	9·23	6·21	3·49	5·61
IX	Other Services	29·28	35·30	30·68	24·29	23·47	20·73
	Tertiary Sector	**56·83**	**62·19**	**58·00**	**49·41**	**41·87**	**35·03**
	Total	**100·00**	**100·00**	**100.00**	**100·00**	**100·00**	**100·00**

49 As indicated earlier, the primary sector relates to rural pattern of economic activity. It, therefore, tends to decrease in proportion as the towns grow in size. The phenomenon is visible in all the four-industrial categories falling under this sector. The percentage of workers in primary sector shows steep fall from 52.48% in class VI towns to 5.08% in class I towns. In the secondary sector, it is not the small scale or household industry that keeps pace with urbanisation, rather it stagnates but the organised industry grows at a faster rate as is evident from the fact that it shows more than five fold increase in the proportion of workers from VI to class I towns. Construction activity more or less maintains the same level of proportion throughout. In the tertiary sector, trade & commerce keep on increasing in proportion with the increase in size-class of towns. The percentage of workers in this industrial category increases from 8.69 in class VI to 18:03 in class I towns. Similarly, Transport & Communication industry keeps pace with the growth of towns, whereas the residual category, i.e. Other Services, maintains a rather slow rate of increase witah the growth of towns. To sum up, urbanisation is, by and large, associated with the growth of secondary and tertiary sectors of economic activity, where the growth of the former is comparatively faster.
