CENSUS OF INDIA, 1971

DISTRICT CENSUS HANDBOOK

PART B—TOWN AND VILLAGEWISE PRIMARY CENSUS ABSTRACT

BALASORE

THE MOTIF

People in the ancient empire of Kalinga were renowned for their maritime activities and are known to have colonised vast areas in Java, Sumatra, Borneo, Śiam, Laos and Southern China. Pliny has recorded that the sea-board district of Balasore was an integral part of the Kalinga empire. The motif shows a typical sea-going vessel used by the seafaring Kalingas.

PREFACE

The District Census Handbook is an innovation of 1951 Census. In that Census as well as in the next Census of 1961 the District Census Handbook was brought out in one volume. As indicated in the preface to the Handbook Part-A, the D. C. H. has been split into three parts for the first time in 1971 to be brought out separately. The first part—Part-A consists of the Town Directory and the Village Directory—the former incorporating some important statistical information relating to each town and the latter containing an array of statistical data relating to land use and various other amenities available in each village. These are mostly of non-census character.

Part-B, the present publication, contains the essence of the Census data known as Primary Census Abstract or simply P. C. A. It gives demographic details of each District, Subdivision, Tahsil and Police Station down to each village and town and within the town, each Ward and enumerator block. The aforementioned statistical information is enriched by administrative maps of the District, Tahsils and Police Stations.

To facilitate easy location of a village, lists of villages police-stationwise have been arranged in an alphabetical order and placed immediately before the P. C. A.

The primary census data of the district and of the lower administrative units up to the village level presented in this volume together with the mass of other essential particulars of non-census origin contained in Part-A provide a comprehensive picture of the district as a whole and of each of its constituent parts. It may not be too much to claim that no other publication provides such a wealth of essential material at the village level. The fact that our country is overwhelmingly rural in character makes this compilation all the more valuable. It is hoped that the Handbook will serve as a useful reference book and come in handy to administrators, planners, social scientists and research scholars to study and grapple with the economic and social problems at the grass-root level.

This compilation is the result of a series of complicated operations and tabulations. The village P. C. A. presented in this volume has been compiled by nearly 1,000 workers and supervisory staff of the four Regional Tabulation Offices who are no longer working in this organisation. They performed their work diligently under difficult conditions. To them must I extend my first vote of thanks.

Scrutiny and final preparation of the State, District and Village P. C. A. were done in the Central Tabulation Office. The workers and the supervisory staff in this office knew no holidays or conventional hours of work for the better part of a year, These sincere and tireless workers merit all praise.

Shri A. C. Panda, Draftsman and his associates of the Map Section under the guidance of Shri Lokanath Mishra, Tabulation Officer did splendid work in the preparation of the District, Tahsil and Police Station maps.

The D. C. H. Section headed by Shri D. Satpathy, O. A. S. (Junior), Tabulation Officer showed unflagging zeal in checking and rechecking the mass of figures and compiling and collating all the information to ensure accuracy.

I owe a special debt of gratitude to the Superintendent, Orissa Government Press, his Deputies and staff for the immense care they took in bringing out this volume.

For Shri Nisamoni Tripathy, Tabulation Officer and Shri Akshaya Kumar Mishra, Printing Inspector, who looked after the printing of this work, no detail was too small, be it in the press or in the course of proof reading. My warm thanks are due to them.

The production of this work is the joint endeavour of a large team of workers each one of whom has made significant contribution. I would, however, be failing in my duty if besides the officers mentioned above I do not make specific mention of the following persons but for whose zealous and devoted work, the production of this volume would not have been possible.

Regional Tabulation Office, Berhampur

Shri G. N. Patnaik, O. A. S. (Junior)	Tabulation Officer
Shri R. N. Patra, B. A. Shri R. N. Panigrahi Shri M. A. Khallique Shri B. M. Patnaik	Statistical Assistants

Regional Tabulation Office, Cuttack

Shri M. A. Raheman, B. A.	Tabulation Officer
Shri C. R. Mohanty, B. A.	Senior Technical Assistant
Shri M. D. Singh Shri D. C. Sahu, B. A.	Statistical Assistants

Regional Tabulation Office, Sambalpur

Shri P. K. Rout, M. Sc.	Tabulation Officer
Shri B. N. Patra Shri N. N. Samal Shri B. B. Mohanty Shri A. C. Samantaray	Statistical Assistants

Urban Tabulation Office

Shri N. Tripathy, B. A.	Tabulation Officer
Shri A. K. Paul	Statistical Assistant

Central Tabulation Office

Shri S. K. Swain, M. Sc.	Investigator
Shri N. Mohanty, B. A.	Tabulation Officer
Shri Dinanath Dutta, M. Sc.	Statistical Assistant
Shri Prafulla Kumar Sahoo, B. Sc. Shri Niranjan Sahoo, B. Sc.	Computors

Drawn in the Office of the Director of Census Operations, Orissa from the State map approved by the Survey of India. Jurisdictional changes in the District boundaries have been duly vetted by the D.L.R. & S., Orissa. 1972
East of Greenwich

AN EXPLANATORY NOTE

The Primary Census Abstract relating to different administrative units starting from the District down to each village and town are presented in this part of the D. C. H. The P. C. A. renders statistical account of the area of the unit to which it relates, number of occupied residential houses, number of households, total population by sex and literates, population of Scheduled Castes and Scheduled Tribes, workers classified into 9 industrial categories and non-workers. The data for each town and for each inhabited village are presented police-stationwise within each Tahsil of the District, the village being arranged in the order of Census location code number. For each town, the data are again presented wardwise and further down by each enumerator block.

The District P. C. A. together with the P. C. A. of the Subdivisions within it are presented in Statement I. In Statement II are given the data on religious composition of the population by sex (other than S. C. and S. T.) relating to the District as a whole and of the individual towns. Preceding the Tahsil P. C. A. is presented an administrative map of the Tahsil showing the police station boundaries, location of towns and large villages, communications, rivers, hills, forests together with important institutions, such as, high schools and colleges, medical institutions, Post and Telegraph Offices, rest houses, etc. It also contains an inset map indicating location of the Tahsil in the District. Then the P. C. A. of the Tahsil and of each police station, part police station and city/town within it are provided.

This is followed by police station P. C. A. An administrative map of the police station while giving the boundaries of villages and towns located within it and other details in common with the District and Tahsil maps specially brings out through symbolic representation villages of different population sizes, viz., below 200,200—499, 500—999, 1,000 and above. The uninhabited villages are shown by hollow circles. The shaded portion represents the area of the town.

The list of villages in the police station has been arranged in an alphabetical order to facilitate location. While presenting the urban P. C. A., the Census data relating to each town within the police station and of each ward within the town and by each enumerator block are furnished. Then the P. C. A. of each inhabited village within the P. S. is presented before the next police station of the Tahsil is taken up.

The P. C. A. is presented in 38 columns. Some of the important concepts occurring in the column headings are briefly explained below :

1. **House**—A Census House is a building or a part of a building having a separate main entrance from the road or common courtyard or stair-case, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

2. **Occupied Residential House**—An Occupied Residential House is a Census House which is partly or wholly used for the purpose of residence at the time of Census enumeration.

3. **Household**—A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

4. Scheduled Castes and Scheduled Tribes—A person is said to belong to a Scheduled Caste or Scheduled Tribe if he belongs to any one of the Castes or Tribes specified in the Scheduled Castes and Scheduled Tribes Order (Amendment) Act of 1956.

5. **Literate and Educated Persons**—A person is said to be literate if he can both read and write with understanding in any language. An educated person is one who has passed a written examination of a recognised educational standard.

6. Worker—A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The total workers appearing by sex under columns 15 and 16 have been classified into the following nine industrial categories of workers :

I. Cultivator
II. Agricultural Labourer
III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV. Mining and Quarrying
V. (*a*) Manufacturing, processing, servicing and repairs at Household Industry

(*b*) Manufacturing, processing, servicing and repairs Other than Household Industry

VI. Construction
VII. Trade and Commerce
VIII. Transport, Storage and Communications
IX. Other Services

(*i*) *Cultivator*—For purposes of census a Cultivator is a person who is engaged in cultivation by himself/herself or by supervision or direction in his/her capacity as the owner or lessee of land held from Government, or as a tenant of land held from private persons or institutions for payment of money, kind or share.

(*ii*) *Agricultural Labourer*—A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in cultivation but merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

(*iii*) *Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities*

(*iv*) *Mining and Quarrying*

These are self-explanatory.

(*v*) (*a*) *Household Industry*—A Household Industry is an industry conducted by the Head of the Household himself/ herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The Industry should not be run on the scale of a registered factoty.

A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as pleader or doctor or barber, musician, dancer, waterman, *dhobi*, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household.

(*v*) (*b*) *Manufacturing, processing, servicing and repairs Other than Household Industry*
(*vi*) *Construction*
(*vii*) *Trade and Commerce*
(*viii*) *Transport, Storage and Communications*
(*ix*) *Other Services*

These are self-explanatory.

7. **Non-worker**—A person is basically a non-worker if he or she does not come under any of the categories of 'Worker' mentioned above. A person who has merely been offered work but has not actually joined it is to be treated as a non-worker. The activities of non-workers have been classified into the following seven categories:

(*a*) *Household duties*—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. When a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale, etc., that economic activity is covered as secondary work.

(*b*) *Student*—This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school Even when such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they are treated primarily as students, since that is their main activity.

(*c*) *Retired person or Rentier*—A retired person, or a rentier, or a person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work comes under this category.

(*d*) *Dependant*—This includes all dependants such as infants or children not attending school or a person permanently disabled from work because of illness or old age.

(*e*) *Beggars, etc.*—This covers beggars, or vagrants or such cases as independent women without indication of source of income and those of unspecified source of subsistence and who are not engaged in any economically productive work.

(*f*) *Inmates of institutions*—This includes convicts in jails or inmates of a penal, mental or charitable institution.

(*g*) *Other non-workers*—All non-workers who may not come under any of the six categories above but are seeking work are included in this category.

Area figures—The area figures which are based on the information furnished by the local revenue authorities of the district in respect of tahsils, police stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages which were supplied by the Tahsildars are shown in acres. The area adopted for the district is the geographical area figures supplied by the Surveyor General, India. The total area of all tahsils in the district does not add up to the area of the district, because the former represents land use area. The disparity is explained in a suitable foot note to the District Census Abstract (Statement 1). Similarly the total of village areas may not tally with the rural area of the tahsil. The difference may be due to the fact that while the tahsil area takes into account hills, forests, rivers, etc., the village area may not include the same and also due to reasons of varying methods of computation adopted at different levels.

* These represent 'Geographical area'figures supplied by the Surveyor General, India. Figures for urban areas have been supplied by the local bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the Subdivisions or Tahsils will not tally with the District figures, because the former represent 'land use' area and are derived from the figures supplied by the local revenue authorities.
