CENSUS OF INDIA, 1971

DISTRICT CENSUS HANDBOOK

PART A—TOWN AND VILLAGE DIRECTORY

SAMBALPUR

PREFACE

The District Census Handbook first introduced as an ancillary to 1951 Census appeared as a State Government Publication in a more elaborate and ambitious form in 1961 Census. It was divided into 3 parts: Part I gave a narrative account of each District; Part II contained various Census Tables and a series of Primary Census data relating to each village and town; and Part III presented certain Administrative statistics obtained from Government Departments. These parts further enriched by inclusion of maps of the district and of police stations within the district were together brought out in one volume. The Handbook, for each one of the 13 Districts of the State was acknowledged to be highly useful.

2. But the purpose and utility of this valuable compilation somewhat suffered on account of the time lag that intervened between the conclusion of Census and the publication of the Handbook. The delay was unavoidable in the sense that the Handbook complete with all the constituent parts brought together in one volume had necessarily to wait till after completion of the processing and tabulation of Census data and collection and compilation of a large array of administrative and other statistics.

3. With the object of cutting out the delay, and also to making each volume handy and not-too-bulky it has been decided to bring out the 1971 District Census Handbook in three parts separately with the data becoming available from stage to stage as briefly indicated below:

Part A—This part will incorporate the Town Directory and the village Directory for each district. The town Directory will contain certain essential data completed in six statements relating to each town of the district. The Village Directory, besides giving statistical data relating to various amenities existing in a village, will also provide basic data bearing on land use.

A separate consolidated Town Directory will also be brought out at all-India level as well as at State level in Part VI-A of the Census publication series at a later stage.

Part B—Part B will render a stastistical account of each village as also of each town tahsilwise and within a tahsil, police-stationwise. For each town the data will again be presented wardwise and further down in terms of each enumerator block. The data so presented by the lowest administrative unit will include the number of occupied residential houses and households, total population by sex and literates, population of Scheduled Castes and Scheduled Tribes, workers classified into nine industrial categories and non-workers, generally referred to as Primary Census Abstract or simply P. C. A. This volume will also contain administrative maps of the district, tahsils and police-stations.

Part C—This will contain a short write-up on the district and will also contain administrative statistics and various Census Tables of the district.

4. In pursuance of this scheme publication of Parts A and B of the Hand-book has been taken in hand. It will be our endeavour to bring out both the parts for all the 13 districts of the State complete with P.C.A. and maps of different administrative units during this year and the next. Part C of the Hand-book will come out later.

5. An explanatory note is given at the beginning of the town Directory as well as the Village Directory introducing the statements included therein. The concepts and definitions of the various subjects covered in the Directory and the abbreviations adopted have been explained in these notes. To facilitate location of any particular village, the villages of each police station in a district have been arranged in an alphabetical order also indicating the code number of each village. The list is appended at the end of the Village Directory of each tahsil. An administrative map of the district is given at the beginning of the volume.

6. The information on amenities in the Village Directory have been collected through the agency of the Census enumeration staff and that of land use from the Tahsildars. The statistical data relating to Town Directory have been collected from different departments of the Central and State Governments, Block Development Officers and Executive Officers of Municipalities and Notified Area Councils.

7. Collection, collation and compilation of such massive data in respect of each of 51,639 villages and 81 towns in their various aspects is a formidable task. Though all possible care has been taken through check and recheck to

remove discrepancies in the figures, the possibility of errors still creeping into them cannot be altogether ruled out. Notwithstanding these limitations, the mass of the statistical information presented in the Directories will, it is hoped, come handy and prove useful to the Government, local bodies, scholars and other data users engaged in rural and regional planning.

8. I must place on record my deep appreciation and thanks tothe Heads of Departments of Government, Local Bodies, District Officers, Tahsildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils among others but for whose unstinted co-operation and help this voluminous compilation would not have been possible. In my office I am specially indebted to the Deputy Director Shri B.N.Das, Tabulation Officers Shri D. Satapathy and Shri L. N. Mishra and staff for the perseverance, diligence and zeal with which they applied themselves to this none-too-easy and arduous task.

TOWN DIRECTORY

TOWN DIRECTORY

Town

The definition of town for 1971 Census was more or less the same as adopted in 1961 which is as follows :

(*a*) All places with a Municipality, Corporation or Cantonment or Notified Town Area;

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000

(*ii*) At least 75 per cent of the male working population is non-agricultural;

(*iii*) A density of population of at least 400 per sq. kilometre (i. e., 1,000 per sq. mile).

After careful assessment in the light of the above criteria and in consultation with the District Collectors and State Government, a total number of 81 towns was adopted for 1971 Census. Two places, viz., Machkund and Soro which were declared as Census towns in 1961 were declassified and 10 more new places were considered eligible to be treated as Census towns for 1971 Census. The total mumber of 81 towns for 1971 Census includes 26 Municipalities, 38 Notified Area Councils and 17 Non-Municipal Census towns.

Urban Agglomeration

An important concept developed for 1971 Census is Urban Agglomeration. The idea is to delimit a comprehensive area having a continuous urban spread comprising the core town with its adjoining urban out-growth, or two or more contiguous towns with their urban out-growth, if any with a view to presenting a comprehensive demographic and socio-economic picture of the agglomerated urban area as a whole and of its constituent units separately. The urban agglomerations in this district with its Constituents finally adopted for 1971 Census are shown in a statement at Annexure-I.

In the Directory the data in respect of each town in the district has been presented in six statements. The towns within the district have been arranged in an alphabetical order and shown so in all the Statements, while for facility of reference the location code number assigned to each town and the Tahsil to which it belongs have been additionally incorporated in statement-I. In case of an agglomerated town the particulars of each constituent town of the agglomeration have been shown against such town grouped under the main town of the agglomeration. The constituent urban units, however, occur in their alphabetical order in the Statements and in such cases the reader is referred to "See under main town".

Standard Urban Area

Another important concept introduced in 1971 Census in the context of urban classification is the Standard Urban Area. This concept was designed to replace the concept of Town Group adopted at the 1961 Census. The Town Group was made up of independent urban units not necessarily contiguous to one another but were to some extent inter-dependent. The data for such Town Groups became incomparable from Census to Census as the boundaries of the towns themselves changed and the intermediate areas were left out of account.

Under the concept of Standard Urban Area an attempt has been made to delineate the contiguous rural and urban areas which were at present under intensive influence or which were likely to be under intensive influence of all towns and cities with a population of 50,000 and above. The purpose was to have a fixed area covering a large core town or city as well as the urbanised or potentially urbanisable adjoining areas. The entire such area will be treated as Standard Urban Area and comparable data for this fixed area as will be available during the next 2 or 3 Censuses will provide valuable material for urban developmental planning.

In consultation with the State Town Planning Organisation the following 8 core towns with adjoining areas have been adopted as Standard Urban Area for 1971 Census.

1. Cuttack
2. Puri
3. Bhubaneswar
4. Berhampur
5. Sambalpur
6. Rourkela
7. Balasore
8. Jeypore

A list of the urban and rural components of the Standard Urban Area in the district of Sambalpur is given at Annexure II.

Statements adopted for each Town

The scope and content of the statements adopted for each Census town and the codes and abbreviations used are briefly explained below :

Statement I—This Statement gives the status, growth history and functional category of the towns.

Under Columns 1 and 2 the serial number of the town in alphabetical order and the names of the towns with spelling as adopted in the official records have been furnished.

Under Columns 3 and 4, the location code of the town has been indicated while also giving the name of the Tahsil under which it is located.

Under Column 5, the civic administration status of the town as in 1970 has been indicated, such as, Municipality, Notified Area Council and Panchayat.

It has been shown by the following adopted codes:

M	:	Municipality
NAC	:	Notified Area Council
P	:	Panchayat

Under Columns 6—13, the population figures from 1901 to 1971 Census have been shown. The population figures of the towns have been incorporated from the year of their acquiring urban status.

Under Column 14, the functional category of the town has been recorded on the basis of 1961 Census.

The concept of functional classification is briefly explanied below:

The working population is divided into nine industrial categories, viz., I-As Cultivator ; II—As Agricultural labourer ; III—In Mining Quarrying, Livestock, Foresty, Fishing, Hunting and Plantations, Orchards and Allied activities ; IV—As Household Industry ; V—In Manufacturing other than Household Industry ; VI—In Construction ; VII—In Trade and Commerce ; VIII—In Transport, Storage & Communications and IX—In Other Services. These nine categories have been combined and regrouped into five broad functional Classifications:

(*i*) Primary activities (industrial categories I, II, and III) ;

(*ii*) Industry (Industrial categories IV, V and VI) ;

(*iii*) Trade and Commerce (Industrial category VII) ;

(*iv*) Transport (Industrial category VIII) and

(*v*) Services (Industrial category IX).

For each of the cities or towns the percentage of workers under each of these five classes of economic activities to its total workers has been calculated and according to the percentage values, its functional characters are determined. If for instance workers under one of the occupations form 40 per cent or more of the total workers, it will be a mono-functional city/town, e.g., industrial city or service city or town, etc. If the percentage is less than 40 the next predominant occupation is taken into account, so that the total of the two may come to 60 per cent or above. Such a city or town may be designated as bi-functional city or town, such as, industrial-*cum*-service city or town or commercial-*cum*-service city or town. If the total does not come up to 60 per cent the third predominant occupation is taken into account and such a city or town is designated as multifunctional city or town, e.g., industrial-*cum*-service-*cum*-commercial city or town and so on.

Statement II—This Statement gives physical aspects. The latitude and longitude, average annual rainfall and temperature have been shown against the name of each town under Columns 1 to 6. The distance of the town from the nearest city having population of 100,000 or more, State Headquarters, District Headquarters, Subdivision, Tahsil Headquarters, Railway Station, Bus route, Navigable river/canal within a radius of 10 Kms. and sea port within a radius of 50 Kms. have also been indicated in terms of Kilometre in Columns 7 to 14 respectively.

Statement III—This Statement depicts a picture of the Municipal Finance for the year 1968-69. The annual receipts have been shown in absolute figures. In columns 3 to 8 the receipts under different sectors of receipts have been tabulated with an indication of the total annual receipt in Column 9. Similarly, the annual expenditures under different heads including the total expenditure of the town have been presented in Columns 10 to 16.

Statement IV—The information relating to civi and other amenities as in 1969 have been show under different columns of this Statement ann presented with the help of adopted codes as explained below:

(*i*) Pucca and Kutcha roads existing in the town have been shown separately with their length in Kilometre with following codes.

PR	:	Pucca Road
KR	:	Kutcha Road

(*ii*) System of sewerage and drainage facilities have been shown by the following codes under Column 4.

S	:	Sewer
OSD	:	Open Surface Drains
BSD	:	Box Surface Drains
ST	:	Septic Tank

(*iii*) Latrines have been classified under three categories, e.g., water borne, service and others. Number of latrines of each category has been shown in Columns 5 to 7.

(*iv*) The method of disposal of night soil in the town is indicated by the following codes under Column 8.

HL	:	Head load
B	:	Basket
WB	:	Wheel Barrows
ST	:	Septic Tank Latrines
S	:	Sewerage

(*v*) Column 9 relates to the source of protected water supply. The various types of water supply are given below with the codes adopted against each.

TW	:	Tube-well Water
T	:	Tap Water
W	:	Well Water
Tk	:	Tank Water

Where more than one of such facilities are existing, the same have been indicated one after another by help of adopted symbols. Under column 10, the supply capacity of the source in gallons has been incidated wherever possible.

(*vi*) Under column 11 the availability and non-availability of fire fighting service have been shown. The word 'Yes' has been put against such service where it is existing and a dash (—) where it is not available.

(*vii*) Electrification facilites are shown by the number of connections under different consumption groups, viz., domestic, industrial, commercial, road light (points) and others under columns 12—16.

(*a*) Domestic consumption includes service connections to *bonafide* domestic consumers and household appliances.

(*b*) Industrial consumption includes service connections to large Industries, Medium and Small Industries including seasonal Industries.

(*c*) Commercial consumption includes service connection to all Government Offices, all Institutions, Hotels and all trade and business establishments, etc., excluding Cinemas.

(*d*) Street Lighting includes service connections for the purpose of street lighting only.

(*e*) Other Service connections include Cinemas, Irrigation and Agricultural loads.

Statement V—In this Statement particulars relating to medical, educational, recreational and cultural facilities in towns as in 1969 have been furnished with the help of following adopted codes and where more than one of such facilities are existing the same have been shown in numerical within brackets—

Under Column 3 :

H	:	Hospital
D	:	Dispensary
HC	:	Health Centre
FC	:	Family Planning Centre
TBC	:	T. B. Clinic
NH	:	Nursing Homes
O	:	Others

Under Column 4 :

Number of beds in medical institutions noted in column 3 have been shown.

Under Columns 5—13 :

Number of different types of Colleges, Technical schools, Recognised Commercial and vocational institutions Secondary schools, M. E. Schools, Primary Schools and other educational institutions nexisting in a town have been shown with help of the following codes—

A	:	Arts College only
S	:	Science College only
C	:	Commerce College only
L	:	Law College only
AS	:	Arts & Science College
AC	:	Arts & Commerce College
ASC	:	Arts, Science and Commerce College
SH	:	Shorthand
Type	:	Type-writing
Sh.		Type Shorthand and Type-writing
O	:	Others

Under columns 14 to 17 the number of recreational and cultural facilities such as Stadia, Cinemas, Drama Halls and Public Libraries including reading rooms existing in the town have been shown.

Statement VI—This Statement represents the information on Trade, commerce, industry and banking as in 1969. Columns 3—5 cover names of the three important commodities imported to the town, columns 6—8 indicate names of three important commodities exported from the town and columns 9—11 show the names of three important commodities manufactured in the town. The number of banks, agricultural credit societies and non-agricultural credit societies operating in the town have been shown under columns 12—14 respectively.

Apart from the particulars presented in the six statements, the land-use statistics in respect of the Panchayat town(s) [Census Town(s)] have been given in a separate Statement and appended as Appendix II at the end of the town and village Directory.

VILLAGE DIRECTORY

VILLAGE DIRECTORY

In this Directory the villages within each Police-Station in the district have been arranged according to the location code numbers assigned to the villages in an ascending order. The particulars of the villages have been compiled Tahsil-wise and within a Tahsil Police-stationwise. For facility of reference an alphabetical list of villages of each Police-Station with their location code numbers has been appended at the end of the Village Directory of each Tahsil.

The Village Directory contains two major divisions, viz., amenities and land use. Under columns 4 to 10 the information relating to educational, medical, power supply, drinking water, communications, Postal and Telegraph and staple food have been incorporated. Where only one type of a particular amenity is available in a village, it has been indicated by codes. In case of villages having more than one type of amenity, the same have been shown in numericals within the brackets without repeating the notations. The following codes have been adopted to explain various types of amenities existing in the village. As for land use, the data furnished by the Tahsildars have been adopted in case of surveyed villages only.

Column 3:

The area figures of the villages in acres as furnished by the Tahsildars have been adopted. In case of unsurveyed villages, the column is left blank for want of information.

Column 4

Phone	:	Telephone

Where the information is not available, NA for 'Not available' has been used. In case of uninhabited villages, 'U. I.' has been adopted.

Tahsilwise abstract of amenities for the district as a whole has been appended as Appendix I to the Village Directory.

In columns 11 to 15, the land use statistics have been presented. In certain cases the area of the village (Column 3) exceeds the aggregate of the areas under land use shown under columns 11 to 15. This seeming disparity is due to non-inclusion of Reserve forests, Waterways, Canals, etc., in the subsidiary land use figures. In case of unsurveyed villages it has not been possible to furnish the land use statistics.

The concepts of land use and definitions of column headings 11 to 15 of the Directory are briefly explained below :

Village—Village means a defined tract of land declared as such under law and includes both uninhabited village and unsurveyed village. Village area connotes the area contained within its exterior limits and excludes forest areas declared as reserved or protected forest under the Indian Forest Act, 1927 or any other law for the time being in force. However, it includes the unreserved forests known as 'Khesra forest or Gramya jungle. An unsurveyed village is considered as a village for all purposes of the Census, but does not have demarcated exterior limits.

Forest—Forests are broadly classified into two categories, namely, Village forests known in the common parlance as Khesra forest and reserved or protected forest. While village forests constitute an integral part of the village area, reserved and protected forests are not included in it. This is because individual or communal rights in land are not exercisable in the areas set apart as reserved or protected forests under the Indian Forest Act, 1927.

In the ex-State areas of Sambalpur district the concept of reserved forest has assumed specific significance by the amendment to Section 20 of the Indian Forest Act, 1927 (Vide Orissa Act XI of 1944). According to the amendment notwithstanding anything contained in the principal Act or in other law for the time being in force, any forest land or waste land in the merged territories recognised by the Ruler as reserved forest immediately before the date of merger, should be treated as reserved forest. Similarly forests recognised in the merged territories as Khesra forest, village forest or protected forest, or forests other than reserved forests should be treated as protected forest.

The extent of forest area in the village shown under column 11 is exclusive of the reserved/protected forest area.

Cultivable Land—The cultivable lands in the district have all along been divided into irrigated and unirrigated categories. The cropping pattern in these areas has taken shape and developed in accordance with the availability of irrigation and the periodicity thereof. The irrigated areas are mostly double-cropped or multi-cropped and the unirrigated (i. e., rainfed) areas are generally single-cropped and are susceptible to the vagaries of nature.

Irrigated Land—The extent of irrigated area shown under column 12 of the Village Directory includes the area under the ayacut command of all irrigation sources available in the district and is inclusive of the area irrigated by the indigenous systems of lift irrigation known as Tenda and flow irrigation from perennial springs. It covers ayacut command of the irrigation sources broadly divided into three categories, viz.,

(*i*) Major and medium irrigation works covering major and medium irrigation projects, diversion weirs, anicuts, minor and sub-minor distributaries etc.,

(*ii*) Minor irrigation works covering smaller diversion weirs, tanks, reservoirs, etc.; and

(*iii*) Lift irrigation works covering mechanised lift irrigation as well as the indigenous.

According to the statutory rules framed under the Orissa Irrigation Act, 1959, irrigation works are divided into four classes on the basis of the periodicity of water supply for the purpose of levy of water-rate. The extent of irrigated land under different sources of irrigation in a village has not been indicated in column 12 of the Village Directory as the data could not be made available by the Tahsildars. Therefore, the total land under irrigation in a village has been noted without indication of the sources.

Unirrigated Land—The unirrigated areas shown in column 13 are wholly rain-fed and dry. Depending upon the situation of the land and quality of the soil, they are mostly single-cropped. The staple crop, that is, rice is generally grown in the unirrigated lands. In some high and, miscellaneous crops are also grown which are known as Baje Fasal.

Classification of Land—Classification of land connotes grouping of similar lands for the purpose of assessing their productivity or levying land tariff, where necessary. The accepted rationale of land classification in the ordinary course is the availability of irrigation facilities. The cropping pattern of lands mainly depends on the supply of water for irrigation and changes in accordance with it.

For the purpose of land classification the district of Sambalpur may be considered in two parts, namely, the ex-State areas of Bamara and Rairakhol comprised in the district and the other areas. The last settlement in Bamara was conducted in 1927—29 and that in Rairakhol in 1932. A Nayabadi settlement was also made in the latter state in 1935—37. In the other areas of Sambalpur the last revision settlement was made between 1921—1925.

In the ex-State area of Bamara cultivated lands were classified mainly as Goda and Jala. Goda lands were essentially up-lands. The lands described as Jala denoted those used for the purpose of paddy cultivation. These two principa classes of land were further subdivided into variou classes as follows :

Jala	..	Bahal Aul Sardar
Jala	..	Aul Kamdar
Jala	..	Doyam Sardar
Jala	..	Doyam Kamdar
Jala	..	Soyam Sardar
Jala	..	Soyam Kamdar
Goda	..	Aul Sardar
Goda	..	Aul Kamdar
Goda	..	Doyam Sardar
Goda	..	Doyam Kamdar
Goda	..	Soyam Sardar
Goda	..	Soyam Kamdar

The nature and productivity of lands has under gone change due to various land improvement measures brought about after the last settlement. In the current settlement operation the following revised classifications have therefore been adopted.

1. Bahal Pani II
2. Bahal Sadharan
3. Berna Pani II
4. Berna Sadharan
5. Mal Pani II
6. Mal Sadharan
7. Goda I
8. Goda II
9. Gharbari
10. Bagayat I
11. Bagayat II
12. Bagayat III
13. Kachhar
14. Patit
15. Miscellaneous

In the above classification, Bahal lands denote the best paddy-growing lands, followed by Berna and Mal in a descending order of productivity. Goda lands connotes up-lands Bagayats connote lands used for horticulture. Kachhar lands mean riparian lands known for their rich productivity. Patit lands denote fallow lands.

The expression "Pani" suffixed to Bahal, Berna and Mal lands connotes the availability of irrigation to such lands.

Revision settlement operation has not been initiated in Rairakhol ex-State area so far.

Excluding the ex-State areas of Sambalpur district mentioned above, the classification of lands in the other areas was based on soil-unit system in the last settlement. This system was not a system for assessment of rent but was intended to be an arithmetical aid to the good assessment. Under the acre-unit system, it was possible to examine the rent of villages, holdings and classes of lands, to compare them and determine the relative pressure of rent. This was also done under the soil-unit system. The acre-unit system was, however, found suitable to areas where the land was flat and the soil homogenous. But in an irregular country with varying soil surface and rain-fall, where differences of soil, drainage and crops existed within a small area, the soil-unit system was found advantageous. The soil factors indicate the relative degree of productivity of soil and the soil-unit is rent pressure of each village.

In para 47 of the Final Report on the Land Revenue Settlement of the Sambalpur district, 1926 by Khan Bahadur Muhammad Hamid, are given the classifications of land adopted in the said settlement.

During the current settlement the following classifications have been adopted.

Bahal—Deep paddy lands which have the capacity to retain moisture for a long time are described as Bahal.

Berna—These are also paddy lands coming in between Bahal and Mal lands. But compared to Bahal lands they are less productive.

Mal—Paddy lands coming in between Berna and At are known as Mal. Mal lands are inferior to Berna lands in productivity and value.

At—At lands are up-lands and may either be plain lands or broken lands. These lands do not generally retain water and hence are not considered suitable for the cultivation of paddy, though short-term paddy is some times grown on them.

The aforesaid classes of lands are further sub-divided into Pani and Dofasali depending upon the availability of irrigation facilities and their suitability for the cultivation of a second crop.

Bagayat—Gardens and orchards are termed as Bagayat. They are sub-divided into three categories as Bagayat I, Bagayat II and Bagayat III depending upon the nature of horticulture practised on them.

Kachhar—Riparian lands which are known for their rich productivity are described as Kachhar.

Patit—Uncultivated fallow lands are termed as Patit.

Miscellaneous—Lands which can not be placed in any specific category stated above are described as miscellaneous lands.

The detailed classifications of lands adopted in the current revision settlement in the Sadar and Bargarh Sub-divisions of Sambalpur district are the following :

1. Bahal Khari Pani I Dofasali
2. Bahal Khari Pani II Dofasali
3. Bahal Pani I Dofasali
4. Bahal Pani II Dofasali
5. Bahal Khari Pani I
6. Bahal Khari Pani II
7. Bahal Khari
8. Bahal Pani I

9. Bahal Pani II
10. Bahal Sadharan
11. Berna Khari Pani I Dofasali
12. Berna Khari Pani II Dofasai
13. Berna Pani I Dofasli
14. Berna Pani II Dofasali
15. Berna Khari Pani I
16. Berna Khari Pani II
17. Berna Khari
18. Berna Pani I
19. Berna Pani II
20. Berna Sadharan
21. Mal Khari Pani I Dofasali
22. Mal Khari Pani II Dofasali
23. Mal pani I Dofasali
24. Mal Pani II Dofasali
25. Mal Khari Pani I
26. Mal Khari Pani II
27. Mal Khari
28. Mal Khari Pani I
29. Mal Pani II
30. Mal Sadharan
31. At Khari Pani I Dofasali
32. At Khari Pani II Dofasali
33. At Pani I Dofasali
34. At Pani II Dofasali
35. At Khari Pani I
36. At Khari Pani II
37. At Khari
38. At Pani I
39. At Pani II
40. At Unhari
41. At Sadharan
42. Bari Khari Pani I
43. Bari Khari Pani II
44. Bari Pani I
45. Bari Pani II
46. Bari Khari
47. Bari Sadharan
48. Barchha Khari
49. Barchha
50. Ghara
51. Pana Baraj
52. Bagayat I
53. Bagayat II
54. Bagayat III
55. Kachhar

Culturable Waste—The extent of culturable waste land furnished in column 14 of the Village Directory includes the area of two kinds of land, namely, culturable waste available for cultivation as such and other culturable lands not available for cultivation. The latter comprises pasture, grazing land (Gochar), tanks, water channels, etc., and are treated as communal lands. Since they are burdened with the right of the community they are not ordinarily alienable. In local parlance the culturable waste lands which are available for cultivation are known as "Abadjogya Anabadi". Those which are not available for cultivation are known as "Rakhit and Sarbasadharan lands".

Area not available for Cultivation—These are unculturable waste lands and also include built-up areas. Here too, as in the case of culturable waste the area shown in Column 15 of the Village Directory consists of two kinds of lands, namely, the unculturable waste like homesteads, barren lands, hills, rivers, nalas, etc., which but for their present unusable state would have been otherwise available for cultivation, and the other unculturable areas which would not be so available because of the communal rights involved. Market places, cremation grounds, etc., are included in the latter category. They are unalienable and are known as "Rakhit or Sarbasadharana lands".
