DISTRICT CENSUS HANDBOOK

PART A—TOWN AND VILLAGE DIRECTORY

GANJAM

PREFACE

The District Census Handbook first introduced as an ancillary to 1951 Census appeared as a State Government publication in a more elaborate and ambitious form in 1961 Census. It was divided into 3 parts : Part I gave a narrative account of each District ; Part II contained various Census Tables and a series of Primary Census data relating to each village and town ; and Part III presented certain Administrative statistics obtained from Government Departments. These parts further enriched by inclusion of maps of the district and of police stations within the district were together brought out in one volume. The Handbook, for each one of the 13 Districts of the State was acknowledged to be highly useful.

2. But the purpose and utility of this valuable compilation somewhat suffered on account of the time lag that intervened between the conclusion of Census and the publication of the Handbook. The delay was unavoidable in the sense that the Handbook complete with all the constituent parts brought together in one volume had necessarily to wait till after completion of the processing and tabulation of Census data and collection and compilation of a large array of administrative and other statistics.

3. With the object of cutting out the delay, and also to making each volume handy and not-too-bulky it has been decided to bring out the 1971 District Census Handbook in three parts separately with the data becoming available from stage to stage as briefly indicated below :

Part A—This part will incorporate the Town Directory and the Village Directory for each district. The Town Directory will contain certain essential data completed in six statements relating to each town of the district. The Village Directory, besides giving statistical data relating to various amenities existing in a village, will also provide basic data bearing on land use.

A separate consolidated Town Directory will also be brought out at all India level as well as at State level in Part VI-A of the Census publication series at a later stage.

Part B—Part B will render a statistical account of each village as also of each town tahsilwise and within a tahsil, police stationwise. For each town the data will again be presented wardwise and further down in terms of each enumerator block. The data so presented by the lowest administrative unit will include the number of occupied residential houses and households, total population by sex and literates, population of Scheduled Castes and Scheduled Tribes, workers classified into nine industrial categories and non-workers, generally referred to as Primary Census Abstract or simply P.C.A. This volume will also contain administrative maps of the district, tahsils and police stations.

Part C—This will contain a short write-up on the district and will also contain administrative statistics and various Census Tables of the district.

4. In pursuance of this scheme publication of Parts A and B of the Handbook has been taken in hand. It will be our endeavour to bring out both the parts for all the 13 districts of the State complete with P.C.A. and maps of different administrative units during this year and the next. Part C of the Handbook will come out later.

5. An explanatory note is given at the beginning of the Town Directory as well as the Village Directory introducing the statements included therein. The concepts and definitions of the various subjects covered in the Directory and the abbreviations adopted have been explained in these notes. To facilitate location of any particular village, the villages of each police station in a district have been arranged in an alphabetical order also indicating the code number of each village. The list is appended at the end of the Village Directory of each tahsil. An administrative map of the district is given at the beginning of the volume.

6. The information on amenities in the Village Directory have been collected through the agency of the Census enumeration staff and that of land use from the Tahsildars. The statistical data relating to Town Directory have been collected from different departments of the Central and State Governments, Block Development Officers and Executive Officers of Municipalities and Notified Area Councils.

7. Collection, collation and compilation of such massive data in respect of each of 51,639 villages and 81 towns in their various aspects is a formidable task. Though all possible care has been taken through check and recheck

to remove discrepancies in the figures, the possibility of errors still creeping into them cannot be altogether ruled out. Notwithstanding these limitations, the mass of the statistical information presented in the Directories will, it is hoped, come handy and prove useful to the Government, local bodies, scholars and other data users engaged in rural and regional planning.

8. I must place on record my deep appreciation and thanks to the Heads of Departments of Government, Local Bodies, District Officers, Tahsildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils among others but for whose unstinted co-operation and help this voluminous compilation would not have been possible. In my office I am specially indebted to the Deputy Director Shri B. N. Das, Tabulation Officers Shri D. Satpathy and Shri L. N. Mishra and staff for the perseverance, diligence and zeal with which they applied themselves to this none-too-easy and arduous task.

TOWN DIRECTORY

TOWN DIRECTORY

Town

The definition of town for 1971 Census was more or less the same as adopted in 1961 which is as follows ;

(*a*) All places with a Municipality, Corporation or Cantonment or Notified Town Area ;

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000 ;

(*ii*) At least 75% of the male working population is non-agricultural ;

(*iii*) A density of population of at least 400 per sq. kilometre (*i.e.*, 1,000 per sq. mile).

After careful assessment in the light of the above criteria and in consultation with the District Collectors and State Government, a total number of 81 towns was adopted for 1971 Census. Two places, *viz.*, Machkund and Soro which were declared as Census towns in 1961 were declassified and 10 more new places were considered eligible to be treated as Census towns for 1971 Census. The total number of 81 towns for 1971 Census includes 26 Municipalities, 38 Notified Area Councils and 17 Non-Municipal Census towns.

Urban Agglomeration

An important concept developed for 1971 Census is Urban Agglomeration. The idea is to delimit a comprehensive area having a continuous urban spread comprising the core town with its adjoining urban outgrowth or two or more contiguous towns with their urban outgrowth, if any, with a view to presenting a comprehensive demographic and socio-economic picture of the agglomerated urban area as a whole and of its constituent units separately. There is no urban agglomeration so far as this district is concerned.

In the Directory the data in respect of each town in the district has been presented in six statements. The towns within the district have been arranged in an alphabetical order and shown so in all the statements, while for facility of reference the location code number assigned to each town and the Tahsil to which it belongs have been additionally incorporated in Statement-I. In case of an agglomerated town the particulars of each constituent town of the agglomeration have been shown against such town grouped under the main town of the agglomeration. The constituent urban units, however, occur in their alphabetical order in the statements and in such cases the reader is referred to "See under main town".

Standard Urban Area

Another important concept introduced in 1971 Census in the context of urban classification is the Standard Urban Area. This concept was designed to replace the concept of Town Group adopted in the 1961 Census. The Town Group was made up of independent urban units not necessarily contiguous to one another but were to some extent inter-dependent. The data for such Town Groups became incomparable from Census to Census as the boundaries of the towns themselves changed and the intermediate areas were left out of account.

Under the concept of Standard Urban Area an attempt has been made to delineate the contiguous rural and urban areas which were at present under intensive influence or which were likely to be under intensive influence of all towns and cities with a population of 50,000 and above. The purpose was to have a fixed area covering a large core town or city as well as the urbanised or potentially urbanisable adjoining areas. The entire such area will be treated as Standard Urban Area and comparable data for this fixed area as will be available during the next 2 or 3 censuses will provide valuable material for urban developmental planning.

In consultation with the State Town Planning Organisation the following 8 core towns with adjoining areas have been adopted as Standard Urban Area for 1971 Census :

1. Cuttack
2. Puri
3. Bhubaneswar
4. Berhampur
5. Sambalpur
6. Rourkela
7. Balasore
8. Jeypore

A list of the urban and rural components of the Standard Urban Area in the district of Ganjam is given at Annexure I.

Statements adopted for each Town

The scope and content of the statements adopted for each Census town and the codes and abbreviations used are briefly explained below :

Statement I—This statement gives the status, growth history and functional category of the towns.

Under Columns 1 and 2, the serial number of the town in alphabetical order and the names of the towns with spelling as adopted in the official records have been furnished.

Under Columns 3 and 4, the location code of the town has been indicated while also giving the name of the Tahsil under which it is located.

Under Column 5, the civic administration status of the town as in 1970 has been indicated, such as, Municipality, Notified Area Council and Panchayat. It has been shown by the following adopted codes :

M : Municipality

NAC : Notified Area Council

P : Panchayat

Under Columns 6 to 13, the population figures from 1901 to 1971 Census have been shown. The population figures of the towns have been incorporated from the year of their acquiring urban status.

Under Column 14, the functional category of the town has been recorded on the basis of 1961 Census.

The concept of functional classification is briefly explained below :

The working population is divided into nine industrial categories, *viz.*, I—As Cultivator; II—As Agricultural labourer ; III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities; IV—At Household Industry ; V—In Manufacturing other than Household Industry; VI—In Construction ; VII—In Trade and Commerce; VIII—In Transport, Storage and Communications and IX—In Other Services. These nine categories have been combined and regrouped into five broad functional classifications.

(*i*) Primary activities (Industrial categories I, II and III) ;

(*ii*) Industry (Industrial categories IV, V and VI) ;

(*iii*) Trade and Commerce (Industrial category VII) ;

(*iv*) Transport (Industrial category VIII), and

(*v*) Services (Industrial category IX).

For each of the cities or towns, the percentage of workers under each of these five classes of economic activities to its total workers has been calculated and according to the percentage values, its functional characters are determined. If, for instance, workers under one of the occupations form 40 per cent or more of the total workers, it will be a mono-functional city/town, *e.g.*, industrial city or service city or town, etc. If the percentage is less than 40 the next predominant occupation is taken into account, so that the total of the two may come to 60 per cent or above. Such a city or town may be designated as bi-functional city or town, such as, industrial-*cum*-service city or town or commercial-*cum*-service city or town. If the total does not come up to 60 per cent, the third predominant occupation is taken into account and such a city or town is designated as multifunctional city or town, *e.g.*, industrial-*cum*-service-*cum*-commercial city or town and so on.

Statement II—This statement gives physical aspects. The latitude and longitude, average annual rainfall and temperature have been shown against the name of each town under Columns 1 to 6. The distance of the town from the nearest city having population of 1,00,000 or more, State Headquarters, District Headquarters, Sub-divisional/Tahsil Headquarters, Railway Station, Bus route, Navigable river/canal within a radius of 10 Kms., and Sea port within a radius of 50 Kms., have also been indicated in terms of kilometre in Columns 7 to 14 respectively.

Statement III—This statement depicts a picture of the Municipal Finance for the year 1968-69. The annual receipts have been shown in absolute figures. In Columns 3 to 8 the receipts under different sectors of receipts have been tabulated with an indication of the total annual receipt in Column 9. Similarly, the annual expenditures under different heads including the total expenditure of the town have been presented in Columns 10 to 16.

Statement IV—The information relating to civic and other amenities as in 1969 have been shown under different columns of this statement and presented with the help of adopted codes as explained below :

(*i*) Pucca and Kutcha roads existing in the town have been shown separately with their length in kilometres with following codes :

PR	:	Pucca Road
KR	:	Kutcha Road

(*ii*) System of sewerage and drainage facilities have been shown by the following codes under Column 4 :

S	:	Sewer
OSD	:	Open Surface Drains
BSD	:	Box Surface Drains
ST	:	Septic Tank

(*iii*) Latrines have been classified under three categories, *e.g.*, water-borne, service and others. Number of latrines of each category has been shown in Columns 5 to 7.

(*iv*) The method of disposal of night soil in the town is indicated by the following codes under Column 8 :

HL	:	Head load
B	:	Basket
WB	:	Wheel Barrows
ST	:	Septic Tank Latrines
S	:	Sewerage

(*v*) Column 9 relates to the source of protected water supply. The various types of water supply are given below with the codes adopted against each :

TW	:	Tube well water
T	:	Tap water
W	:	Well water
Tk	:	Tank water

Where more than one of such facilities are existing, the same have been indicated one after another by help of adopted symbols. Under Column 10, the supply capacity of the source in gallons has been indicated wherever possible.

(*vi*) Under Column 11, the availability and non-availability of fire-fighting service have been shown. The word 'Yes' has been put against such service where it is existing and a dash(—) where it is not available.

(*vii*) Electrification facilities are shown by the number of connections under different consumption groups, *viz.*, domestic, industrial, commercial, road lighting (points) and others under Columns 12—16.

(*a*) Domestic consumption includes service connections to *bonafide* domestic consumers and household appliances.

(*b*) Industrial consumption includes service connections to Large Industries, Medium and Small Industries including seasonal Industries.

(*c*) Commercial consumption includes service connections to all Government Offices, all Institutions, Hotels and all Trade and Business Establishments, etc., excluding Cinemas.

(*d*) Street lighting includes service connections for the purpose of street lighting only.

(*e*) Other service connections include Cinemas, Irrigation and Agricultural loads.

Statement V—In this statement particulars relating to medical, educational, recreational and cultural facilities in towns as in 1969 have been furnished with the help of following adopted codes and where more than one of such facilities are existing the same have been shown in numericals within brackets.

Under Column 3 :

H	:	Hospital
D	:	Dispensary
HC	:	Health Centre
FC	:	Family Planning Centre
TBC	:	T.B. Clinic
NH	:	Nursing Home
O	:	Others

Under Column 4 :

Number of beds in Medical Institutions noted in Column 3 have been shown.

Under Columns 5 to 13 :

Number of different types of Colleges, Technical Schools, Recognised Commercial and Vocational Institutions, Higher Secondary Schools, M.E. Schools, Primary Schools and other educational institutions existing in a town have been shown with help of the following codes :

A	:	Arts College only
S	:	Science College only
C	:	Commerce College only
L	:	Law College only
AS	:	Arts and Science College
AC	:	Arts and Commerce College
ASC	:	Arts, Science and Commerce College
Sh	:	Shorthand
Type	:	Type-writing
Sh. Type	:	Shorthand and Type-writing
O	:	Others

Under Columns 14 to 17, the number of recreational and cultural facilities such as Stadia, Cinemas, Drama Halls and Public Libraries including Reading Rooms existing in the town have been shown.

Statement VI—This statement represents the information on trade, commerce, industry and banking as in 1969. Columns 3—5 cover names of the three important commodities imported to the town, Columns 6—8 indicate names of three important commodities exported from the town and Columns 9—11 show the names of three important commodities manufactured in the town. The number of banks, agricultural credit societies and non-agricultural credit societies operating in the town have been shown under Columns 12—14 respectively.

Apart from the particulars presented in the six statements, the land use statistics in respect of the Panchayat town(s) [Census Town(s)] have been given in a separate statement and appended as Appendix II at the end of the Town and Village Directory.

ANNEXURE I

VILLAGE DIRECTORY

VILLAGE DIRECTORY

In this Directory the villages within each Police Station in the district have been arranged according to the location code numbers assigned to the villages in an ascending order. The particulars of the villages have been compiled Tahsilwise and within a Tahsil Police Station-wise. For facility of reference an alphabetical list of villages of each Police Station with their location code numbers has been appended at the end of the Village Directory of each Tahsil.

The Village Directory contains two major divisions, *viz.*, amenities and land use. Under columns 4 to 10 the information relating to educational, medical, power supply, drinking water, communications, Postal and Telegraph and staple food have been incorporated. Where only one type of a particular amenity is available in a village, it has been indicated by codes. In case of villages having more than one type of amenity, the same have been shown in numericals within the brackets without repeating the notations. The following codes have been adopted to explain various types of amenities existing in the village. As for land use, the data furnished by the Tahsildars have been adopted in case of surveyed villages only.

Column 3 : The area figures of the villages in acres as furnished by the Tahsildars have been adopted. In case of unsurveyed villages, the column is left blank for want of information.

Column 4 :

Pr. S. : Primary Schools including Sevashrams

Mid. S. : Middle Schools including Ashrams

Sec. S : Secondary Schools including Ashrams of Secondary standard

A : Arts College

S : Science College

C : Commerce College

L : Law College

AS : Arts and Science College

AC : Arts and Commerce College

ASC : Arts, Science and Commerce College

Trg. C : Training College (B. Ed. and M. Ed. Training College)

	Trg. S	: Training School (Elementary, Basic and C.T. Training School)
	O	: Others
Column 5 :	H	: Hospital
	D	: Dispensary
	HC	: Health Centre
	FC	: Family Planning Centre
	MCW	: Maternity and Child Welfare Centre
	O	: Others
Column 6 :	E	: Electricity
Column 7 :	TW	: Tube-well water
	T	: Tap water
	W	: Well water
	Tk	: Tank water
	R	: River water
	C	: Canal water
	F	: Fountain water
	O	: Others
Column 8 :	PR	: Pucca Road

	R	: River
	C	: Canal
	T	: Train

Column 9 :	PO	: Post Office
	PTO	: Post and Telegraph Office
	Phone	: Telephone

Where the information is not available, NA for 'Not available' has been used. In case of uninhabited villages, 'U.I.' has been adopted.

Tahsilwise abstract of amenities for the district as a whole has been appended as Appendix I to the Village Directory.

In columns 11 to 15, the land use statistics have been presented. In certain cases the area of the village (Column 3) exceeds the aggregate of the areas under land use shown under columns 11 to 15. This seeming disparity is due to non-inclusion of Reserve forests, Waterways, Canals, etc., in the subsidiary land use figures. In case of unsurveyed villages it has not been possible to furnish the land use statistics.

The concepts of land use and definitions of column headings 11 to 15 of the Directory are briefly explained below :

Village—Village means a defined tract of land declared as such under law and includes both uninhabited village and unsurveyed village. Village area connotes the area contained within its exterior limits and excludes forest areas declared as reserved or protected forest under the Indian Forest Act, 1927 or any other law for the time being in force. However, it includes the unreserved forest known as Khesra forest or Gramya jungle. An unsurveyed village is considered as a village for all purposes of the

Census, but does not have demarcated exterior limits.

Forest—Forests are broadly classified into two categories, namely, Village forests known in the common parlance as Khesra forest and reserved or protected forest. While village forests constitute an integral part of the village area, reserved and protected forests are not included in it. This is because individual or communal rights in land are not exercisable in the areas set apart as reserved or protected forests under the law. The forests of Ganjam district were administered under the Madras Forest Act, 1882 and now the Orissa Forest Act, 1972 (Orissa Act XIV of 1972) is in force in this area.

The extent of forest area in the village shown under column 11 is exclusive of the reserved/protected forest area.

Cultivable Land—The cultivable lands in the district have all along been divided into irrigated and unirrigated categories. The cropping pattern in these areas has taken shape and developed in accordance with the availability of irrigation and the periodicity thereof. The irrigated areas are mostly double-cropped or multi-cropped and the unirrigated (*i.e.*, rainfed) areas are generally single-cropped and are susceptible to the vagaries of nature.

Irrigated Land—The extent of irrigated area shown under column 12 of the Village Directory includes the area under the ayacut command of all irrigation sources available in the district and is inclusive of the area irrigated by the indigenous systems of lift irrigation known as Tenda and flow irrigation from perennial springs. It covers ayacut command of the irrigation sources broadly divided into three categories, *viz.*,

(*i*) Major and medium irrigation works covering major and medium irrigation projects, diversion weirs, anicuts, minor and sub-minor distributaries, etc.,

(*ii*) Minor irrigation works covering smaller diversion weirs, tanks, reservoirs, etc., and

(*iii*) Lift irrigation works covering mechanised lift irrigation as well as the indigenous.

According to the statutory rules framed under the Orissa Irrigation Act, 1959, irrigation works are divided into four classes on the basis of the periodicity of water supply for the purpose of levy of water-rate. The extent of irrigated land under different sources of irrigation in a village has not been indicated in column 12 of the Village Directory as the data could not be made available by the Tahsildars. Therefore, the total land under irrigation in a village has been noted without indication of the sources.

Unirrigated Land—The unirrigated areas shown in column 13 are wholly rainfed and dry. Depending upon the situation of the land and quality of the soil, they are mostly single-cropped. The staple crop, that is rice, is generally grown in the unirrigated lands. In some high land, miscellaneous crops are also grown which are known as Baje Fasal.

Classification of land : Classification of land as a concept of land management is connotative of the grouping of similar lands

for the purpose of assessing their productivity and imposing land tariff, where necessary. Such classification is generally made on the basis of the availability of irrigation facilities. Cropping pattern of the lands mainly depends on the supply of water for irrigation and undergoes change in accordance with it.

In Orissa, the district of Ganjam was first constituted in the year 1936 after its separation from the Madras Presidency. Subsequently, Parlakimedi Taluk including its agency areas, which was for a short spell in Koraput district, was transferred to Ganjam. The last settlement operation in the *ex*-estate areas of Ganjam was completed in 1938—1962. The operation covered all the *ex*-state areas including all Inam villages in the district of Ganjam barring Parlakimedi *ex*-estate areas. Settlement operation is now in progress in the *ex*-state areas of Parlakimedi and also in the ryotwari areas of the district. Settlement operation has also commenced in the unsurveyed areas of Ganjam agency.

For the purpose of land classification, the district of Ganjam may be considered in four parts, namely, (*i*) the *ex*-state areas including the *ex-Inam* villages, (*ii*) *ex*-estate areas of Parlakimedi, (*iii*) Ryotwari areas, and (*iv*) Unsurveyed areas of Ganjam Agency.

_Ex_-estate areas of Ganjam including _ex_-Inam villages :

In the last settlement operation (1938—1962) the lands in these areas were classified under three main classes *viz.*, wet, rainfed and dry. Each of these was further subdivided into three subclasses or tarams according to its productivity and safety of crops. Subclassification of each category of land was intended to be an aid to good assessment of rent.

Lands the crops of which were seldom liable to damage due to excessive rainfall or scanty rainfall were placed in the 1st class. Wet lands where crop failed in the year of scanty rainfall as well as in the years of excessive rainfall were placed in the 2nd class. Rainfed and dry lands which were not capable of retaining moisture were put in the 3rd class.

_Ex_-estate areas of Paralakimedi :

The land classifications introduced in these areas during the current settlement are as follows :

(*i*)	Irrigated double-cropped paddy lands ...	Bila Dofasali I Bila Dofasali II Bila Dofasali III
(*ii*)	Irrigated single-cropped paddy lands ...	Bila I Bila II Bila III
(*iii*)	Rainfed double-cropped paddy lands ...	Barsadhar Dofasali I Barsadhar Dofaspli II Barsadhar Dofasali III
(*iv*)	Rainfed single-cropped paddy lands ...	Barsadhar I Barsadhar II Barsadhar III
(*v*)	Dry lands ...	Padar I Padar II Padar III

'(*vi*) Bagayat lands ... Bagayat I
Bagayat II
Bagayat III

'(*vii*) Homestead lands beyond village sites

'(*viii*) Tanks

'(*ix*) Tota (Topes)

Ryotwari areas of Ganjam

The land classification adopted in the ryotwari areas of Ganjam were Bila, Padar and Bagayat. Bila lands denoted paddy lands and were grouped in three subclasses on the basis of their productive capacity. Padar lands denoted up-lands used for growing other crops. Bagayats denoted lands utilised for horticulture.

In the current settlement operation, the same classifications as prevailed in Parlakimedi *ex*-estate have been introduced in these areas.

Unsurveyed areas of Ganjam Agency

Original settlement operation for the preparation of maps and record-of-rights is under way in the unsurveyed areas of Ganjam agency. No classification of land for these areas is yet available.

Cultural Waste—The extent of culutrable waste land furnished in Column 14 of the Village Directory includes the area of two kinds of land namely, culturable waste available for cultivation as such and other culturable lands not available for cultivation. The latter comprises pasture, grazing land (Gochar), tanks, water channels, etc., and are treated as communal lands. Since they are burdened with the right of the community they are not ordinarily alienable. In local parlance the culturable waste lands which are available for cultivation are known as "Abadjogya Anabadi". Those which are not available for cultivation are known as "Rakhit and Sarbasadharana lands".

Area not available for cultivation—These are unculturable waste lands and also include built-up areas. Here too, as in the case of culturable waste the area shown in Column 15 of the Village Directory consists of two kinds of lands, namely, the unculturable waste like homesteads, barren lands, hills, rivers, nalas, etc., which but for their present unusable state would have been otherwise available for cultivation, and the other unculturable areas which would not be so available, because of the communal rights involved. Market places, cremation grounds, etc., are included in the latter category. They are unalienable and are known as "Rakhit or Sarbasadharana lands".
