An Account of Land Management in West Bengal, 1872-1952, by A. Mitra, containing extracts, accounts and statistics over the 80-year period and agricultural statistics compiled at the Census of 1951, with an Introduction. About 250 pages. Ready in June 1953.

Fairs and Festivals in West Bengal by A. Mitra, containing an account of fairs and festivals classified by villages, unions, thanas and districts. With a foreword and extracts from the laws on the regulation of fairs and festivals. About 75 pages. Ready in March 1953.

District Handbooks for each West Bengal District by A. Mitra. Each volume contains an Introductory essay, several important appendices, and about 82 tables, together with a list of ancient monuments in each district. Contains also a village directory where the J. L. No. of every village, its name, area, total population, number of houses, number of literates and population classified into eight livelihood classes are tabulated. The Handbook for Hooghly was published in May 1952, those for Burdwan and Malda are ready for publication. The whole series is expected to be complete by 1954. Each volume will contain about 300 pages (14 volumes).

A catalogue of the better known ancient monuments of West Bengal by A. Mitra. Will contain brief descriptions of extant ancient monuments in each district of the State, dating up to 1800, with exact location and present state. Translations of all inscriptions found in West Bengal and an account of all invasions or conquests of Bengal mentioned in inscriptions. With many plates. About 600 pages.

I CANNOT ACKNOWLEDGE too fully the debt I owe the following gentlemen in the preparation of this Part of the Report :

Sri Khagendranath Mitra, Deputy Superintendent of Census Operations, Calcutta.

Sri P. N. Kaul, Central Tabulation Officer, New Delhi.

Sri Susilchandra Niyogi, Assistant Superintendent of Census Operations, Calcutta.

Sri Binaybhushan Sengupta, my Personal Assistant.

NOTE

THE CENSUS OF 1951 WAS TAKEN between the 9th February and the 3rd March, 1951 (inclusive). The first twenty days from the 9th February were employed in taking a house to house count of every individual in the State and recording his return on a census slip. The slip was thereafter copied on the National Register of Citizens. The sunrise of the 1st March was the reference date for verification of this enumeration and three days from the 1st to the 3rd March were employed in verifying the record written up to the midnight of the 28th February. Births which were not recorded in the first round were now recorded, deaths which had occurred between the visit on the first round and sunrise of the 1st March were cancelled, and new arrivals between the date of the first round and the reference date were recorded provided it was ascertained that they had not been recorded to their knowledge elsewhere.

Simultaneously the National Register of Citizens containing the record of every individual was copied from the pad of slips. This was designed to act as a check to the work done by the enumerator.

The twentythree-day period of enumeration, devised primarily to lighten the burden of unpaid enumerators, was also calculated to neutralise the considerable volume of short-term migration which is a notable feature of the population of the State.

The following is a list of questions put to every individual in the country :—

(1) Name and relationship to the head of the household.

(2) What is your
  (*a*) Nationality ?
  (*b*) Religion ?
  (*c*) Special Group ?

(3) Are you unmarried, married, widowed or divorced ?

(4) What is your age on last birthday ?

(5) Were you born in this district ? If not, in what district and State ? State your father's or husband's name.

(6) Are you a displaced person from Pakistan ? If so, when did you come to the Indian Union and from which district of Pakistan ?

(7) What is your mother tongue ?

(8) What other Indian language do you commonly use ?

(9) Part I—Are you a selfsupporting person, a non-earning dependant, or an earning dependant ?
  Part II—Are you ordinarily
  (*a*) An employer ?
  (*b*) An employee ?
  (*c*) An independent worker ?

(10) Principal means of livelihood.

(11) Secondary or subsidiary means of livelihood.

(12) Can you
  (*a*) Read ?
  (*b*) Write ?
  (*c*) Read and write ?

(Give the highest form reached or examination passed.)

(13) Do you cultivate land for which you pay rent ? If so,
  (*a*) how much do you cultivate yourself and/or through hired labourers ?
  and (*b*) how much do you cultivate through bargadars, bhagdars or adhiyars ?

(14) Sex (whether male or female).

Answers were to be recorded with the use of contractions in the form of numerals in Q. 1 (relationship) ; Q. 3 (first letters like UM for unmarried, M for married, O for widowed, and X for divorced) ; Q. 5 (1 in the case of the person born in the district of enumeration) ; Q. 7 (1 in the case of a person's mother tongue being Bengali) ; Q. 9, pt. I (1 for a selfsupporting person, 2 for a non-earning dependant, and 3 for an earning dependant) ; Q. 9, pt. II (1 for an employer, 2 for an employee, 3 for an independent worker) ; and Q. 12 (X for ' unable to read or write ', 1 for ' able to read only ' and 2 for ' able both to read and write ').

Fuller tabulation for answers to question 6 was made than has been presented in this volume. The results will be published in a separate volume.

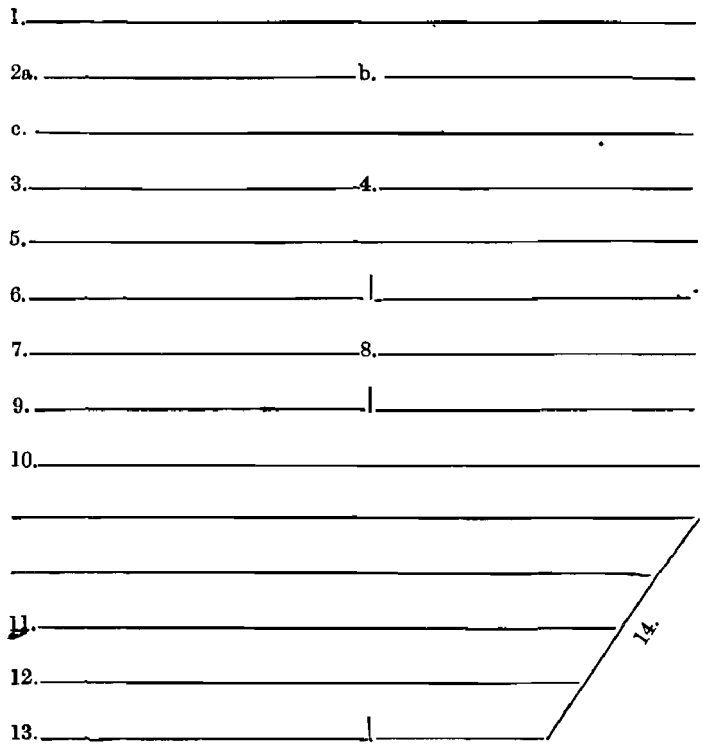

Question 13 was not an all-India question, but devised by the Government of West Bengal. The tabulation of data on this question is available in a separate publication.

Facsimile of a Census Slip

LOCATION CODE NUMBER OF CENSUS HOUSE

For facility of reference the following brief instructions issued to enumerators are reproduced :

Census Questions with Brief Instructions

(1) *Name and Relationship to head of household.*—After the name write 1 for the head of the household. For near relations, *viz.*, wife, son, daughter, brother, sister, father, mother, son-in-law, daughter-in-law, write actual relationship in full. For other distant relatives like cousins, etc., write 2. For unrelated persons like guests or visitors or friends, or menials or domestic servants living in the household write " O ".

(2) *Nationality, Religion and Special Groups.*—Part (*a*)—*Nationality :* Write " I " for all Indian nationals. For others, write nationality in full.

Part (*b*)—*Religion :* Write " H " for a Hindu, " M " for a Muslim, " C " for a Christian, " S " for a Sikh, and " J " for a Jain. For others, write fully as actually returned.

Part (*c*)—*Special Groups :* Write " A " for an Anglo-Indian, write " X " for any person who says he is not a member of any caste or tribe. Write 1 for any person who is a member of one of the castes mentioned in the list of non-backward castes supplied to you and is printed on page (viii) of this Handbook. In all other cases, write the name of the caste or tribe as returned by the person enumerated.

(3) *Civil Condition.*—Write " UM " for unmarried, " M " for married, " O " for widowed ; if divorced, write " X ". Write " M2 " for person who was widowed or divorced and has married again.

(4) *Age.*—Write age last birth day ; *i.e.*, the actual number of completed years. Write " O " for infants below one year of age.

(5) *Birth Place.*—Write 1 for every person born in your district. For others, write the name of the district, city or name of the country, where he was born according to the answer given. State name of father or husband.

(6) *Displaced Person from Pakistan.*—Apply the definition of a displaced person as given in the detailed instruction. If the person enumerated is *not* a displaced person, write " X " in both compartments. If he is a displaced person, write the date of arrival in India in the first compartment, and the district of origin in Pakistan in the second compartment.

(7) *Mother tongue.*—Write 1 for Bengali. For any other language write the mother tongue fully.

(8) *Bilingualism.*—If a person commonly speaks any Indian language other than his mother tongue, record it. For those who do not commonly speak any Indian language other than their own mother tongue, write " X ".

(9) *Economic Status.*—Part I—*Dependency :* Write 1 for a selfsupporting person, 2 for a non-earning dependant, and 3 for an earning dependant. Write the answer in the first compartment.

NOTE

Part II—*Employment :* If a selfsupporting person earns his principal means of livelihood as an employer, write 1 ; as an employee, write 2 ; as an independent worker, write 3. Write " X " in other cases, that is in the case of non-earning dependants and earning dependants, or in the case of those who earn their livelihood neither as an employer nor as an employee nor as an independent worker (*e.g.*, those who live on the income of government promissory notes). Write the answer in the second compartment.

(10) *Principal Means of Livelihood.*—The answer to this question should be recorded on every slip. If the slip relates to a selfsupporting person, record his principal means of livelihood. If the slip relates to a dependant (whether earning or non-earning), record here the principal means of livelihood of the selfsupporting person on whom he is dependent. The means of livelihood which provides the largest income is the principal means of livelihood for a self-supporting person who has more than one means of livelihood. In the case of other selfsupporting persons, it is the only means of livelihood.

Use the following contractions :

Write 1 for a person who cultivates land owned by him ; 2 for a person who cultivates land owned by another person ; 3 for a person who is employed as a labourer by another person, who cultivates land ; 4 for a person who receives rent in cash or kind in respect of lands which is cultivated by another person.

For all other means of livelihood, write fully and clearly what the person does in order to earn his livelihood and where he does it. Avoid vague and general terms. Do not merely write " service " or " labour ". If you are enumerating a trader, describe the articles in which he trades and state clearly whether he is a wholesale trader or a retail trader. If you are enumerating a factory worker, give the name of the factory in which he works, or the product he makes or helps in making, *e.g.*, in coal mines, a coal digger, in jute/cotton mills, a jute weaver, a cotton weaver or cotton spinner, etc.

(11) *Secondary Means of Livelihood.*—For a selfsupporting person who has more than one means of livelihood, write the means of livelihood next in importance to his principal means of livelihood. For an earning dependant, write also the means of livelihood which provides the earning. Use numerals given in question 10 for the four agricultural classes.

For a selfsupporting person who has only one means of livelihood, write " X " in this question. In the case of non-earning dependant also, write " X " in this question, because only the principal means of livelihood on whom he is dependent needs to be recorded in question 10 in his case.

(12) *Literacy and Education.*—Write " X " for a person who can neither read nor write ; write 1 for a person who can read but cannot write ; write 2 for a person who can both read and write. If a person who can read and write, has also passed any examination in which a written test has to be passed, note the highest examination passed in full, instead of writing 2.

(13) *Cultivation of Land for which Rent is Paid.*—The full question is : Do you cultivate land for which you pay rent ? If so,

(*a*) How much do you cultivate yourself and/or through hired labourers ? and

(*b*) How much through bargadars, bhagdars or adhyars ?

Divide this line of question 13 in two compartments by drawing a short vertical line in the middle, *e.g.*, as in question 6 or 9.

Write " X " in both compartments for persons to whom the question does not apply, *i.e.*, who do not cultivate land for which they pay rent. For the person who cultivates all his lands for which he pays rent, himself or through hired labourers and gives none of his lands in " barga " or " bhag ", enter the area of the land in the first compartment and add " X " in the second compartment.

For the person who cultivates some of his land for which he pays rent himself or through hired labourers and gives the rest in " bhag " or " barga " to others, put the different areas in the two compartments.

(14) *Sex.*—Write " M " for a male and " F " for a female. Eunuchs and hermaphrodites should be treated as males.

The definition of a ' Displaced Person ' is as follows : " A ' displaced person ' means any person who has entered India having left or being compelled to leave his or her home in Western Pakistan on or after the 1st March, 1947 or his/her home in Eastern Pakistan on or after the 15th October, 1946 on account of civil disturbances or the fear of such disturbances or on account of the setting up of the two dominions of India and Pakistan ".

It will be seen that Union Tables C.II, C.III, C.IV and C.V have been prepared on a ' Sample population '. The Registrar General for India's instruction for taking the 'Sample' was as follows :—

> " Break each pad (of 100 enumeration slips) and stack the slips of the pad ; and 'cut' the stack as in a card game. Place the lower portion above the upper portion and then deal the slips into the pigeonholes. You should deal the slips into pigeonholes in the order of 1, 2, 3, 4, 5, S, 6, 7, 8 and 9 successively. All the time, you should watch the slips of ' Displaced persons '. If you come across any slip of a Displaced person deal it in the pigeonhole of ' Displaced persons '."

NOTE

Hence it will be seen that the sample is not a sample of the total population but of the latter excluding the 'Displaced population'.

Thus the sample value for each district and administrative Division varied and necessarily differed from that of the State. These values are reproduced below for general convenience and facility of calculation :-

The Census of 1951 claims several unique features absent in previous Censuses of India. It will be of interest to mention them very briefly :—

(i) Quite the most unique, and certainly the most stupendous and valuable, feature of the last Census was the preparation of an account of *every mauza* or residential village in India containing its Jurisdiction List number, its authorised name, its area in acres, the number of its occupied houses, its total population and number of literates divided into males and females, and its population divided into the eight main livelihood classes, four agricultural and four non-agricultural, each further subdivided into males and females. West Bengal gives an account of 39,151 villages. This account is published for each district separately.

(ii) District Handbooks have been the second unique feature of the last Census. This Handbook series virtually brings the old District Gazetteers up-to-date in both parts : (*a*) general account and (*b*) statistics. The latter part is expanded a great deal for each district and contains much more Census and official statistics than were ever before presented.

(iii) The third unique feature of the last Census was the preparation of a complete National Register of Citizens purporting to contain a full census record of every person counted at the Census of 1951. This was prepared for each village and now forms the basis of the Union's Electoral Rolls.

(iv) The fourth unique feature of the Census of 1951 was the classification of the entire population according to its economic status into (*a*) dependency and (*b*) employment. Under (*a*) the population was divided into (i) selfsupporting persons, (ii) earning dependants and (iii) non-earning dependants, and under (*b*) into (i) employers, (ii) employees and (iii) independent workers.

(v) The fifth new feature of the last Census was the preparation of an account of households and families and their composition (Union Table C.I).

(vi) The sixth new feature was the tabulation by single year ages of a much larger sample population than in previous Censuses (Union Table C.V).

(vii) The seventh new feature was that no smoothing formulae were applied to the age returns as furnished by the respondent. The actual ages returned have been shown in groups and single years.

UNION TABLE A I—AREA, HOUSES AND POPULATION

This table corresponds to Imperial Table I of previous censuses but makes an important departure. To aid study of the all-India tables by large geographical units the administrative districts are arranged under the Registrar General's Natural Regions, Divisions, and Subdivisions. State Table A.I, however, rearranges this table under the familiar Commissioners' administrative Divisions in common with the old Provincial Table I.

It is doubtful whether areas given since 1872 will bear close examination and it is necessary to go into details to explain the still unsatisfactory state of affairs. Hitherto the practice seems to have been to accept the areas provided by the Government of Bengal. Failing accurate cadastral surveys, areas quoted up to the census of 1901 were probably approximate. Statements of inter-district and inter-provincial transfers of areas are given below but before 1931 the practice seems to have been to mention transfers in general terms. The title page to Imperial Table I of 1901 says : " the difference between some of the areas here shown and those in the corresponding table of 1891 is due to inter-district transfers as explained on the title page of Table II except in the case of Chittagong, for which district revised figures have been supplied by the Survey Department, and of a few districts where the figures in the last Census Report were found to differ slightly from those generally accepted as correct ", but does not give an account of how the differences are reconciled, nor, on the title page of Table II, the details of transferred areas. In 1911 the areas of some districts were taken from the Imperial Gazetteer, itself a slightly out of date reference so far as a census was concerned; for Jalpaiguri and three East Bengal districts revised figures were supplied by Settlement Officers ; while the area of 24-Parganas was increased by the inclusion of the Sundarbans. "The area shown for Calcutta, though different from that given in Table I of the Bengal Census Report of 1901, which excluded the 'water area' (*i.e.*, the Port and Canals), is the same as that given in Table I of the Calcutta Census Report of that year " (Title page of Table I, Bengal Census Report, Part II, 1911).

The title page of Table I of 1921 makes the following statement on areas accepted for the census of that year but does not offer the details of calculation which, issuing from so distinguished an authority, might have been of great value several decades later. " The figures adopted for the area of districts differ considerably from the figures used in the corresponding table in 1911. To a slight extent only the modifications correspond to changes of jurisdiction. Some of them correspond to changes due to alluvion and diluvion by the great rivers and some are based on the figures of fresh surveys made during the decade, but for the most part they have been made in an attempt to deal, in a consistent manner for all parts of the province, with the area under the waters of the rivers. The figures now given exclude the area of all rivers forming district boundaries, and also of rivers within each district when they are so large that the exclusion or inclusion of their area would materially affect the figures for density of population within the jurisdiction of the police stations through which they run. No forest area has been excluded." The title pages of Imperial Table I and Provincial Table I of 1931 also likewise do not attempt to reconcile differences between figures given in 1921 and 1931 but make the following statement : " The areas given differ in some cases from those given in the corresponding table of 1921. The figures of area adopted for police stations are those furnished by the Government of Bengal and used in estimating the area of districts for the purposes of Imperial Table I ; they exclude large rivers and arms of the sea falling within or forming the boundaries of administrative units ; and from the areas of police stations and subdivisions, but not of districts, parts of reserved forests and of the Sundarbans have been excluded. No comprehensive explanation is forthcoming of the variations in the figures of the area of police stations. Changes of jurisdiction, alluvion and diluvion and more accurate estimates of area based on fresh surveys or settlement operations may be taken as having contributed to the difference." The title page of Table I of 1941 makes a similar statement that ' the areas given differ in some cases from those given in the corresponding table of 1931. They are based on the figures supplied by the Government of Bengal ', and gives the details of inter-provincial transfer of areas during 1931-41.

For the Census of 1951 the Registrar General laid down that the area figures were to be supplied by the Surveyor General of India. The decision, a great step taken in the direction of uniformity and reconciliation of differences, has brought out clearly the anomalies that have so far existed and for which no detailed explanation has yet been offered. The point will best be illustrated by a statement of areas of West Bengal districts given for 1951 by the Surveyor General of India and the Director of Land Records and Surveys, West Bengal, and in successive census reports from 1901 to 1941. It so happens that districts with great rivers, wide stretches of water, and arms of the sea have mostly gone to East Bengal and cases of wide differences are therefore lost to this brief review.

NOTE—The areas of 24-Parganas, Nadia, Malda, West Dinajpur and Jalpaiguri in the above statement have been computed for their respective years from the areas given in census reports of those years of thanas which now constitute the jurisdiction of these districts. The Surveyor General's figure for the area of 24-Parganas has been reduced from 5,314·8 sq. miles to 5,292·8 sq. miles to increase the area of Calcutta from his figure of 10·3 sq. miles to the finally approved figure of 32·32 sq. miles. 9·21 sq. miles awarded to West Bengal by the Bagge Tribunal has been added to the D.L.R. & S.'s figure for Murshidabad because the area awarded is contiguous to Jalangi P.S. of that district.

The following districts underwent changes of jurisdiction and area ; this explains in part the differences in the above tabular statement.

Between 1901 and 1911—
Burdwan, Hooghly, Nadia, Dinajpur and Malda.

Between 1911 and 1921—
Birbhum and Nadia.

Between 1921 and 1931—
Malda . . . . . gain in area by transfer from Santal Parganas and Purnea—30 sq. miles (this gain is incorporated entirely in the post-partition territory of Malda).

The important supplement to Provincial Table I of 1931 does not, unfortunately, give an account of adjustments of area for *de facto* changes of jurisdiction.

Between 1931 and 1941—
Midnapur . . . . . loss by transfer to Mayurbhanj 0·25 sq. mile.
Murshidabad . . . . loss by transfer to Santal Parganas 0·13 sq. mile.
Malda . . . . . gain by transfer from Santal Parganas 16·72 sq. miles.
Dinajpur . . . . . gain by transfer from Purnea 2·20 sq. miles, but in the absence of details of transfer it is difficult to judge whether this gain has accrued to post-partition West Dinajpur.

Between 1941 and 1951—

NOTE—The following list has been compiled by the Director of Land Records and Surveys, West Bengal, of notifications since 1941 on the changes of jurisdictions of thanas within districts, of districts and of re-formed districts after 14th August, 1947.

(a) P. S. Mathabhanga and (b) P. S. Sitalkuchi ; (5) Subdivision Mekliganj with P. S. (a) P. S. Mekliganj and (b) P. S. Haldibari.

The area of Calcutta city is a case of much interest. In 1901 the area in Imperial Table I of Calcutta was given as 20 sq. miles while in Table I of the report for Calcutta the area including that of Garden Reach was given as 20,547 acres. The 1911 report gave the area as 32 sq. miles or 20,547 acres. In 1921 the area was 21 sq. miles but 11,954 acres, excluding the water areas (11 sq. miles) of Port and Canals. In 1931 the area was 33 sq. miles but 20,121 acres excluding the water area (11 sq. miles) of Port and Canals ; while in 1941 the area was both 33·70 sq. miles and 26,714 acres or 41·74 sq. miles. No very plausible explanation has been offered of discrepancies where they have occurred. In 1951 correspondence with the Calcutta Corporation, the Port Commissioners and the Director of Land Records and Surveys established the following area for the census district of Calcutta—

Total	**35·13 sq. miles**
Calcutta Municipal Area (which includes 2,804·09 acres being the entire Shore Port estate within the jurisdiction of Calcutta Corporation)	18,136 acres
Fort William and Maidan	1,283 acres
Canals	278 acres
The water surface of the Hooghly river appertaining to Calcutta district	4·35 sq. miles

The Surveyor General of India, however, determined this area to be 32·3 sq. miles, the discrepancy according to him, of 2·81 sq. miles being due to an error in the quantity accepted for Hooghly River. The total area enclosed within the banks of the river, flanking west side of the Corporation, comes to 3·08 sq. miles as against 8·71 mentioned by the Port Commissioners. As such, half 3·08 (*i.e.*, only 1·54) is to be added for this item instead of 4·35. No record has been obtained to confirm the water area of 11 sq. miles of the Port and Canals mentioned in 1921 and 1931. For this census, therefore, the area of Calcutta is 32·3 sq. miles although it needs to be borne in mind that the Port authorities took, outside this territorial limit, a census of inland and ocean-going vessels whose population has been shown against the Port.

The area of 24-Parganas is another case in point. According to the Director of Land Records and Surveys, West Bengal, the area of the district excluding that of the 24-Parganas Forest Division is 4,009·9 sq. miles. The Forest Directorate's estimate of the area of the 24-Parganas Forest Division is 1,630 sq. miles. This estimate of the area of 24-Parganas Forest Division of 1,630 sq. miles over and above the area of 24-Parganas given by him has not been disputed by the Director of Land Records and Surveys, West Bengal. The total of the two areas, 5,639·9 sq. miles, presents an excess of 347·2 sq. miles over the area of 5,292·7 sq. miles supplied by the Surveyor General of India and the latter suggests that this difference may " primarily be due to acceptance of different alignments for sea shore ".

The total area of West Bengal given by the Surveyor General of India is 30,775·3 sq. miles and by the Government of West Bengal 31,044·3. There is thus a difference of 269·0 sq. miles which cannot be readily reconciled and there is nothing for it but to leave the matter there.

Leaving aside the district of 24-Parganas which alone introduces the contentious matter of alignments of seashores there still exists a considerable difference between the areas given by the Surveyor General of India and the Director of Land Records and Surveys, West Bengal, for the rest of the State, which is mainly inland. The area given by the Surveyor General is 25,482·5 and that by the Director of Land Records, 25,404·4 or an excess of 78·1 sq. miles in favour of the Surveyor General's estimate. Discrepancies for districts like Burdwan, Birbhum, Bankura, Howrah, 24-Parganas, Nadia, Murshidabad, Malda, Darjeeling and Cooch Behar are so considerable that although in Union Table A.I the Surveyor General of India's areas have been given as authoritative, yet in order that a consistent account of density per square mile of rural and urban habitation may be presented, Union Table E as well as State Tables A.I and E have been prepared on the areas provided by the Director of Land Records and Surveys, West Bengal, these having been built up from cadastral units of mauzas and thanas. To sum up, Union Table A.I gives the areas supplied by the Surveyor General of India, while Union Table E and State Tables A.I and E give the areas supplied by the Director of Land Records and Surveys, West Bengal. It is to be added that the large rivers, inland water surfaces and forests have been included in their respective police station areas except the 24-Parganas Forest Division the area of which has been shown separately in State Table E.

Rural and Urban Population

All municipalities have been treated as towns. The tests applied on the claims of any area to be treated as a non-municipal town were as follows : the places so proposed were to have a population of not less than 5,000 and a density of not less than 1,000 inhabitants to the square mile, other matters for consideration being (*a*) the importance of the place as a centre of trade or distribution or administration, (*b*) the character of the population, *i.e.*, whether the majority of the residents were engaged in agricultural pursuits or worked in factories, mills and offices or were engaged in shopkeeping, cottage industries or other forms of business, an important point to remember being that in such a place it should be expected that at least three quarters of the adult male population would be chiefly employed in pursuits other than agriculture. Proposals from District Officers that finally passed these tests were approved by the local Government as non-municipal towns. Although the populations of the following localities were below 5,000 in 1951 they have been treated as towns because (*a*) they were declared as such by the local Government ; (*b*) three of them are old municipalities, four more are run by town committees and three others were treated as towns in 1941 ; (*c*) the density of each exceeds 1,000 persons per square mile ; and (*d*) except for Khatra where the number of persons and their dependants deriving their principal means of livelihood from agriculture and those deriving their livelihood from occupations other than agriculture are almost even, in all others the number of persons having non-agricultural livelihoods exceeds that of persons having agricultural livelihoods : (1) Ondal in Burdwan ; (2) Patrasair and (3) Khatra in Bankura ; (4) Garbeta and (5) Khirpai in Midnapur ; (6) Birnagar in Nadia ; (7) Old Malda in Malda ; (8) Mathabhanga ; (9) Haldibari ; (10) Tufanganj and (11) Mekliganj in Cooch Behar ; and (12) Gangtok in Sikkim. In 1951 among a total of 114 towns in West Bengal, 82 are municipalities, 31 non-municipal towns and one cantonment. Khargpur has a town within a town, called the Khargpur Railway Settlement.

The following statement shows the progress in the number of towns in West Bengal during 1901-1951.

NOTE.—Beldanga in Murshidabad counted as a town in 1921, 31 and 41 was omitted from the list in 1951, having lost its character as a town owing to the closure of its sugar mill. Buxa, then a cantonment in Jalpaiguri, was treated as a town in 1901, 11 and 21, while Lebong and Jalapahar, cantonments in Darjeeling, were treated as two separate towns in 1931 and 41 but included in Darjeeling town in 1951. Garden Reach went to Calcutta in 1931 and is not represented in 24-Parganas for that year. Cossipur-Chitpur and Manicktola were separate municipalities in 1901, 11 and 21. In 1901, 11 and 21 Barrackpur cantonment was included in (South) Barrackpur town. In Cooch Behar except the district headquarters, all others are managed by town committees.

The village in all censuses from 1901 is the cadastral survey mauza with a jurisdiction list number for its police station, and is practically synonymous with a residential village. The word village has been used in reference to the rural population in order to bring the table into conformity with the corresponding table of other States of India, but through most of West Bengal it is a term the use of which is liable to mislead. In the greater part of West Bengal the rural population live in a system of units, originally units of survey, to which the vernacular term mauza, is applied. This system of division is well understood and has the sanction of common use. The *village* in this table is, therefore synonymous with the *mauza*, even in Darjeeling district where residential villages have been grouped under mauzas, or, in the case of Cooch Behar with the *thak*. This has been so since 1901. The only exception is Sikkim where the

village is the area of a mandal or head man consisting of one or more hamlets or bustees. The number of villages in this table is exclusive of uninhabited mauzas and mauzas which now form part of towns. The following statement gives for each district the number of populated villages at each Census from 1901.

The variations over fifty years are due to (*a*) settlement operations changing the boundaries and number of mauzas, (*b*) changes in the number of uninhabited mauzas, (*c*) the absorption by towns of rural mauzas and (*d*) inter-district and inter-provincial transfers. The figure for 1911 for Jalpaiguri is probably inflated by the inclusion of a number of enumerators' blocks in several thanas, while figures for Sikkim for 1901 to 1931 represent the number of bustees or hamlets.

The following statement for 1951 gives for every district in West Bengal (i) the total number of mauzas borne on Jurisdiction Lists, (ii) number of uninhabited mauzas, (iii) number of mauzas included in urban areas, (iv) the number of inhabited villages and (v) number of towns. (iv) and (v) correspond to columns 3 and 4 in Union and State Tables A. I and their total corresponds to column 2 in Union and State Tables A. III.

[1] Includes 2 Refugee Camps and 2 Refugee Transit Camps.

[2] J. L. 14 of P. S. Manikchak amalgamated with J. L. 12 of the same P. S. and J. L. 31 of P. S. Kharba transferred to Purnea District.

[3] Part of each of 4 mauzas shown as included in towns in Jalpaiguri is in rural area, and these 4 mauzas are therefore counted in the total of inhabited villages and excluded from the total number of mauzas included in towns.

[4] Number provided by Deputy Commissioner, Cooch Behar, includes J. L. numbers, Chhit numbers, and Thaks. Since no mauza is entirely urban the number of mauzas included in towns is counted within the number of inhabited mauzas.

Census Houses

Occupied house refers to ' occupied census house '. The Registrar General defined a census house as a group of dwellings, a dwelling, or part of a dwelling, *with a separate main entrance.* Owing to the state of housing, this definition was abandoned as impossible of application to West Bengal and an amended definition was adopted : " A census house is a dwelling or part of a dwelling with a separate main entrance where a social unit, that is household lives. A household means a number of persons living and eating together in one mess with their resident dependants including servants ". This was a compromise between the Registrar General's precondition of a separate main entrance and the definition of the house in previous censuses as a family living and eating together in one mess and transferred the emphasis from the former to the latter. In previous censuses the census house was synonymous with the kitchen, that is, the number of separate kitchens in a dwelling determined the number of census houses in that dwelling. But even this compromise was found unworkable when faced with (*a*) countless cases of two or more families found to live in one room, with an outlet through another apartment, yet eating in separate messes within the room, and (*b*) persons or families living in single rooms or apartments of messes, hostels, hotels, with only one main entrance for their building, living their separate lives, yet eating on the house together. The definition that was ultimately accepted, for the census house in the State ranged from the minimum of one room in a dwelling, even if two or more families inhabited that one room, to the Registrar General's definition. Even if a room contained more than one family it was called only one census house. The census house has, thus, had a flexible application, especially in Calcutta, but outside of this city and the industrial cities and towns of 24-Parganas, Howrah and Hooghly, the amended definition of a household living in a place with a separate main entrance generally held good.

The following statement shows for each district the number of persons per occupied house, the number of females per 1,000 males by total, rural and urban populations and the percentage, of rural and urban to total population.

UNION TABLE A II—VARIATION IN POPULATION DURING FIFTY YEARS

This table corresponds to Imperial Table II of 1941. For changes in the areas of districts attention is invited to the title page of Union Table A.I. This table has been compiled from Imperial Table II of each census and checked with changes in population due to changes in area of each decade. The populations of Burdwan, Birbhum, Hooghly and Murshidabad, among districts unaffected by the Partition of 1947, have been adjusted as follows owing to changes in their areas during 1901-1921 :—

		1921	1911	1901
Burdwan . .	adjusted	1,434,771	1,533,874	1,528,290
	unadjusted	1,438,926	1,538,371	1,532,475
Birbhum . .	adjusted	851,725	940,162	906,891
	unadjusted	847,570	935,473	902,280
Hooghly . .	adjusted	1,080,142	1,090,097	1,049,041
	unadjusted	1,080,142	1,090,097	1,049,282
Murshidabad . .	adjusted	1,224,181	1,345,073	1,322,486
	unadjusted	1,262,514	1,372,274	1,333,184

Details of adjustments for Calcutta will be found in the report of this district with but a brief mention of them below. The following statement indicates the changes in the area of Calcutta over the fifty-year period :—

Changes in area of Calcutta, 1901-1951 (acres)

Total (in Sq. miles)	**32**	**32**	**32**	**44.8**	**41.7**	**32.32**

The increase in area of the Corporation from 1921 to 1931 was due to the inclusion of several large areas, the fall between 1931 and 1941 due to the exclusion of Garden Reach with the exception of the King George's Dock Area, the accession of 15 acres between 1941 and 1951 due, according to the Calcutta Corporation, to improved survey.

In this table the Port, between 1901 and 1941, covered, from the census point of view, the same categories of population as in 1951, although the area of 1951 seems wrongly to suggest a shrinkage in the area of operation (*see* title page of Union Table A.I). The populations of Calcutta district and Calcutta municipal area for the period 1901 to 1931 have been adjusted to their present areas as follows :—

Adjustment of Population of Calcutta District and Calcutta Municipal Area, 1901-1931

		1931	1921	1911	1901
Calcutta District . .	adjusted	1,140,862	1,031,697	998,012	920,933
	unadjusted	1,196,734	907,851	896,067	847,796
Calcutta Municipal Area .	adjusted	1,100,881	1,009,661	963,446	882,106
	unadjusted	1,156,753	885,815	861,501	808,969

The populations of the districts of 24-Parganas, Nadia, Malda, West Dinajpur and Jalpaiguri have been calculated for each census on the areas of police stations which now constitute them. Changes in their area over this period owing either to changes *inter se* of the areas of their thanas or to changes between 1901 and 1941 among them and those that have since gone to East Bengal have not been taken into account.

The following statement shows the percentage variation in the population of Natural Divisions and districts during 1901-1951 :—

UNION TABLE A III—TOWNS AND VILLAGES CLASSIFIED BY POPULATION

This table corresponds to Imperial Table III of previous censuses but shows in greater detail the number and population of inhabited towns and rural villages classified according to the size of their population. For the definition of 'village' and 'town' attention is invited to the title page of Union Table A.I. Column 2 combines the number of inhabited rural mauzas and the number of towns, but does not take into account the number of survey mauzas that have gone to make up the towns. Only such localities have been treated as 'towns' for this table as are so treated in Union Tables A.IV and A.V. Separate figures of the towns and inhabited rural mauzas combined together in column 2 of this table are given in columns 3 and 4 of Union and State Tables A.I. The number of inhabited rural mauzas of each class given in the table can be separately calculated by subtracting from the figures in columns 6, 9, 12, 15, 18, etc., of this table the total number of towns of the same class given under the same class in Union Table A.IV and under the same area in Union Table A.V.

The statement below gives the percentage ratios of populations of each district living in villages and towns of various population sizes.

UNION TABLE A IV—TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901

This table corresponds to Imperial Table IV of 1931. While in Union Table A.V cities and towns are arranged by districts and graded in each district according to size of population, in this table they are classified by population in the following six classes: I—those with a population of over 100,000; II—those with a population of 50,000 to 100,000; III—those with a population of 20,000 to 50,000; IV—those with a population of 10,000 to 20,000; V—those with a population of 5,000 to 10,000; and VI—those with a population of less than 5,000.

There were three cities in 1941 and two in previous censuses. The third locality, having exceeded a population of 100,000 and qualified as a city in 1941, was Bhatpara. In 1951 four more localities have returned populations exceeding 100,000 and have qualified to be called cities: Tollyganj, Garden Reach and South Suburbs in 24-Parganas and Khargpur Town in Midnapur. In 1951 there are, therefore, seven cities against three in 1941 and two before 1941.

The following is a statement of changes in the list of towns and cantonments from 1901 onwards; those, numbering 74 in 1951, which do not find a place in it are to be considered as having continued as towns throughout the fifty-year period. 'T' denotes town.

Figures for previous enumerations for towns newly added to the list at any census are not given. The totals given at the head of each class representing variations of populations of towns in that class during 1901-1951 do not agree with the sum of the entries below them owing to (*a*) the movement of towns between the classes due to changes in their population, (*b*) the retention in class totals of figures recorded at previous enumerations for towns since omitted, and (*c*) changes in the grouping of localities shown in some years as separate towns but in others combined together. The class totals therefore represent for each census year the total number of persons then living in towns of that class and not the total of persons then living in the towns now forming that class.

The following statement shows the progress in the number of towns of each class in West Bengal during 1901-1951.

Number of towns of each class, 1901-1951

A statement showing the total number of towns, municipalities, non-municipal towns and cantonments treated as separate towns in each district at each census during 1901-1951, will be found on the title page of Union Table A.I.

Seventeen new census towns have been shown for 1951 distributed by class as follows : Class III—Alipur Duar (Jalpaiguri) ; Class IV—Balurghat (West Dinajpur), Chittaranjan (Burdwan), Raiganj (West Dinajpur), Ichhapur Defence Estate (24-Parganas), Bauria (Howrah), Uluberia (Howrah), Kanchrapara Development Area Rural Colony (Nadia), Neamatpur (Burdwan) ; Class V—Diamond Harbour (24-Parganas), Jhargram (Midnapur), Disergarh (Burdwan), Canning (24-Parganas), Batanagar (24-Parganas), Memari (Burdwan) ; Class VI—Garhbeta (Midnapur) and Khatra (Bankura). Of these seventeen new towns Balurghat and Raiganj both of West Dinajpur became municipalities in 1951, after the census count, but their notified boundaries are slightly different from those adopted for the census ; several plots of Mauzas Bara Raghunathpur (J.L.139) and Hossenpur (J.L.137) have been added to Balurghat and Mauza Barua (J.L.152) to Raiganj.

For the purpose of the census the seventeen new towns consisted of the mauzas noted against each.

UNION TABLE A V—TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

This table replaces the old Imperial Table V by substituting classification by sex and eight main census livelihood classes for religion. The first part gives a summary of the livelihood classes of the urban population by Natural Divisions and administrative districts, while the second part gives an account of the towns of every district arranged by size of population.

A full explanation of the classification of an individual according to his livelihood will be found in paragraph 2 of the title page to Union Table B.III at page 161 of this volume.

UNION TABLE E—SUMMARY OF LIVELIHOOD CLASSES AND VARIATION IN POPULATION

This is a new table for 1951 and shows in the Union part summary figures for Natural Divisions and Districts and in the State part summary figures for Districts, police stations and towns. The total, rural and urban populations have been shown separately throughout, and in the State Table figures for towns have been included in those of the police stations under which they are situated and also shown separately in italics.

Two figures are given for the area of each district in State Table E : (a) indicates Area, rounded to the nearest integer, provided by Surveyor General, India. The total area of subdivisions will differ from this figure ; (b) indicates Area derived from Jurisdiction Lists and confirmed by the Director of Land Records and Surveys, West Bengal ; calculations of density are based on this figure. The density for 1941 (col. 10) has been calculated for the actual areas of rural and urban tracts as they existed in 1941. The same principle was followed for 1951. In calculating the percentage variation in population, the actual adjusted population of rural and urban areas at each census was adopted.

Statement containing percentage variations of population and proportion of the sexes for the period 1901—1951 will be found on the title page of Union Table A.II. The following statement shows the changes in density of population per square mile of Natural Divisions and Districts during 1901—1951. T—indicates total, R—rural, U—urban.

Changes in Density (persons per square mile) 1901—1951

(For facility of Comparison the rural and urban areas of 1951 have been used in calculating the following densities for former decades)

‡ Not declared as town in 1931 and 1941.

† Not declared as town in 1931.

(g) Excludes the towns of Canning, Batanagar, Ichhapur Defence Estate and Diamond Harbour with area of 4·0, 0·47, 0·89 and 2·5 sq. miles respectively and 1951.

* The entire area of Barrackpur P.S. is Municipal area of which Barrackpur Cantonment constitutes 1·43 sq. miles, an area of 753·20 acres or 1·176 Municipality shown under Titagarh P.S. The figures for the totals of Barrackpur P. S. have therefore been artificially shown to be the same as that of Barrackpur actually belonging to Barrackpur P.S. Similarly, Halisahar Municipality falling mainly in Bijpur P.S. has been shown under that P. S. although 502·02 acres by 0·78 sq. mile. Again, as noted above 1·176 sq. miles belonging to Barrackpur P.S. has gone into the 3·25 sq. miles of North Barrackpur Municipality shown the population of which has been shown under Jagaddal P.S. The two make up a rural area of 1·54 sq. miles against which the population columns have Jagaddal P.S., 1·54 sq. miles of rural area added to 5·64 sq. miles of urban area in Noapara P.S. makes a total of 7·18 sq. miles which exceeds the recorded

The urban area of Titagarh P.S. includes 360·14 acres or 0·56 sq. mile of Barrackpur Municipality belonging to Barrackpur P.S. and 202 acres or 0·32 sq. mile police station by 0·88 sq. mile. It is for the same reason that the printed total of Khardah P.S. falls short of the sum of rural and urban areas under it by 0·32

Jaynagar-Majilpur Municipality extends to a fraction of mauza Bansidharpur (J. L. 218) of Magrahat P.S.

** The figures shown for 24-Parganas Forest Division (except those of cols. 2 and 6) have been included in the respective police stations/sub. (Diamond Harbour) and Sagar (Diamond Harbour) Police Stations.

sq. miles, now forms part of North Barrackpur Municipality shown under Noapara P. S., and an area of 360·14 acres or 0·56 sq. mile forms part of Barrackpur Cantonment. For the same reason the figures for the totals of Noapara and Titagarh P.S. have been artificially swelled by inclusion of populations in areas of 0·78 sq. mile of it belongs to Naihati P. S., which explains why the rural area shown added to the urban area in that P.S. falls short of the printed total under Noapara P. S. Besides, 0·69 sq. mile of Noapara P.S. is covered by the Hooghly river and 0·85 sq. mile is rural area belonging to Kahuta Union Board, been for obvious reasons left blank, the population on the river having gone to the Municipalities on its bank and the rural population being shown under total area of 6·0 sq. miles of that police station by 1·18 sq. miles belonging to Barrackpur P.S.

of Titagarh Municipality belonging to Khardah P.S. This explains why the rural area added to the urban area in Titagarh P.S. exceeds the printed total of that sq. mile.

divisions in the jurisdiction of which they fall, which are Jaynagar (Sadar), Canning (Sadar), Hasnabad (Basirhat), Sandeshkhali (Basirhat), Mathurapur

UNION TABLE B I

LIVELIHOOD CLASSES AND SUBCLASSES OF THE POPULATION

This is a new table but will recall Imperial Table VIII Parts I and II of 1941, Imperial Table X Parts i and ii of 1931 and Imperial Table XVII of 1921. It misses the elaborate classifications of the 1931 and 1921 tables, which it reserves for Union Table B. III, but presents the statistics in a more readily understandable form. It divides the *entire* population into eight livelihood classes, and subdivides each class into three economic statuses.

The population is divided into two broad livelihood categories, *viz.*, the Agricultural Classes and the Non-Agricultural Classes. There are four Agricultural Classes as follows :—I—Cultivators of land wholly or mainly owned and their dependants. This class represents mainly the class of tenant cultivators known as rayats and korfarayats and also includes persons holding zamindari rights who cultivate their lands themselves, without the intervention of tenants. It thus represents all interests in land which actually till what they hold and their dependants ; II—Cultivators of land wholly or mainly unowned and their dependants. This class represents bargadars, bhagdars, and cultivators of similar status, the definition being a cultivator, who supplies his own plough, and cultivates land not his own, receiving in payment a share of the crop ; III—Cultivating labourers and their dependants. This class represents all classes of agricultural labourers who receive wages and includes Kisans, who are paid a share of the crop as wages, while land, manure, and agricultural implements are provided by the owner of land ; IV—Non-cultivating owners of land ; agricultural rent receivers and their dependants. This class represents land owners who live on rent from land but do not cultivate themselves. The four Non-Agricultural classes are persons, including their dependants, who are engaged in V—Production other than cultivation. Production includes primary and other productions, manufacture and repair ; VI—Commerce which includes every aspect of commerce, retail and wholesale ; VII—Transport, which includes every aspect of transport except persons employed in domestic transport duties ; and VIII—Other services and miscellaneous sources. This class includes practically all livelihoods that cannot be placed under the other seven livelihoods, and those which are not classifiable.

All these classes will be referred to as livelihood classes. Each of the eight livelihood classes is divided into three subclasses, with reference to its economic status : (i) Selfsupporting persons ; (ii) non-earning dependants ; and (iii) earning dependants. Where a person is in receipt of an income, and that income is *sufficient at least for his/her own maintenance* he/she is a *selfsupporting* person. Such income may be in cash or kind. Thus the test of *self-supporting* was applied *on every individual* and not on the head of the family. Anyone who is *not* a ' selfsupporting person ' in the above sense is a ' dependant '. A dependant may be either an ' earning dependant ', or a ' non-earning dependant ' ; the test is whether or not he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is an *earning dependant.* A person who does not secure any income either in cash or kind, is a *non-earning dependant.* Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them is regarded as earning a part of the income. None of them is a non-earning dependant. Each of them is classed as either a selfsupporting person or an earning dependant, according to the share of income attributable to him/her. The same applies to any other business carried on jointly. But anyone *who works* is not necessarily a selfsupporting person or an earning dependant. Thus, a housewife who cooks for the family, brings up the children, or keeps house is still a non-earning dependant, if she does not *also* command an income. But sons, who till their father's land, the father being alive, are earning dependants or even selfsupporting persons, according to the size of the income.

All non-earning dependants are economically passive and an account of this subclass will be found only in this table. They include persons performing housework or other domestic or personal services for other members of the same family household. But they do not include ' unpaid family workers ' or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. All earning dependants are economically semi-active. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. Their contribution to economic activity is taken into account in Union Table B. II. All selfsupporting persons are, ordinarily, economically active, and except those in the four Agricultural Classes of whom an account is available only in this table and Union Table B. II, a full account of them under the four Non-Agricultural Classes will be found in Union Table B. III.

This table therefore showing the numbers of twentyfour livelihood subclasses, grouped under four Agricultural Classes and four Non-Agricultural Classes, presents a picture of the economic status of the population and its economically active, semi-active, and passive persons.

UNION TABLE B II
SECONDARY MEANS OF LIVELIHOOD OF SELFSUPPORTING PERSONS AND EARNING DEPENDANTS

This is a new table for 1951 making an entire table from parts of Imperial Table VIII of 1941, parts I and II ; Imperial Table X of 1931, parts i and ii ; and Imperial Tables XVIII and XIX of 1921. Imperial Tables XVIII and XIX of 1921, each the converse of the other, taken together, were much more elaborate in certain particulars than the present table, but being symmetrically based on all the eight livelihood classes, vertically and horizontally, the latter is more uniform and comprehensive than the tables of 1921.

This table has nothing to do with non-earning dependants. It is concerned only with selfsupporting persons and earning dependants and sets forth the numbers of those among them in each of the eight livelihood classes who possess a secondary means of livelihood. The means of livelihood which provides the largest income is the Principal Means of Livelihood for a selfsupporting person who has more than one livelihood, and that next in importance to his Principal Means of Livelihood is called his Secondary Means of Livelihood (" Subsidiary Means of Livelihood " of 1941 and " Subsidiary Occupation " of 1931 and 1921). For an earning dependant the Principal Means of Livelihood of the selfsupporting person on whom he is dependant is also his Principal Means of Livelihood, and his own means of earning is his Secondary Means of Livelihood. Thus the stub in the table denotes the Principal Means of Livelihood by Livelihood Classes of all selfsupporting persons and earning dependants ; columns 2 and 3 and corresponding columns under other Livelihood Classes show the totals of those selfsupporting persons and earning dependants whose secondary means of livelihood fall under that particular Livelihood Class. Columns 4 and 5, and corresponding columns under other classes denote the totals of selfsupporting persons whose secondary means of livelihood fall under that class. Columns 6 and 7 and corresponding columns elsewhere, represent the totals of earning dependants only, whose own means of earning are shown under that particular class, while the Principal Means of Livelihood of the selfsupporting person on whom he is dependant is shown on the same horizontal line in the stub.

This table therefore gives a fuller account than is available in Union Tables B.I and B.III of the economic activity of selfsupporting persons. The contribution of eccnomically semi-active persons (earning dependants) is also shown under Livelihood Classes.

UNION TABLE B III

SELFSUPPORTING PERSONS CLASSIFIED AS EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUBDIVISIONS

This table elaborates Imperial Tables VIII and XI of 1941 and corresponds in part to Imperial Table X of 1931 and XVII of 1921. It omits mention of dependants of workers under each occupation (as shown in 1921) ; of 'working dependants' and 'subsidiary occupations' under each group (as in 1931) ; and of details of occupational groups as shown in 1931 and previous censuses. The table is thus different from Occupation or Means of Livelihood Tables of 1931 and before. It restricts itself to an account (i) solely of economically active or selfsupporting persons, and (ii) of four non-agricultural livelihood classes divided into ten Divisions and eightyeight Subdivisions as against an account in 1931 of (*a*) earners, working dependants and subsidiary occupations of the economically active and semi-active population ; (*b*) four main classes, divided into twelve subclasses, fiftyfive orders, and one hundred and ninetyfive groups.

The present classification corresponds closely to recommendations formulated by the United Nations Organisation. It has evolved a Scheme of Classification of all economic activities known as the "International Standard Industrial Classification Scheme". The Economic and Social Council of the United Nations recommended the use of this Scheme by all member Governments "either by adopting this system of classification as a national standard, or rearranging their statistical data in accordance with this system for purposes of international comparability". The present scheme of classification gives effect to the latter of the two alternatives of this recommendation. There are 10 divisions and 44 major groups of economic activities under the ISIC Scheme which include agriculture and, in addition, correspond to the 10 divisions and 88 subdivisions of Industries and Services under the ICEC Scheme. The elements of the ICEC Scheme which correspond to each individual division and each individual Major Group of the ISIC Scheme are set out in statement 2. Under the ISIC Scheme the Unit of Classification is the Organised Establishment (adopted in the censuses of 1921 and 1911 but abandoned after 1921 : see Imperial Table XXII of 1921 and Imperial Table XV-E of 1911). The commodity produced or the service performed as a result of the work of the Organised Establishment is the criterion for classifying the establishment. The classification of the establishment is the classification of every member of the establishment. Under the present Scheme (ICEC) the Unit of classification is, in every case, the individual. All *employers* and all *independent workers* are classified with reference to the commodity produced or service performed by them individually. This is the same as in the ISIC Scheme, there being no question of an "establishment" distinct from the individual in these cases. As regards *employees*, all persons engaged in production,commerce, or transport (and not being domestic servants) are classified under the appropriate subdivisions with reference to their own activity, and without reference to that of their employer. Domestic servants are classed in one subdivision without reference to the nature of their "work". All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen, and unskilled labour of every description) are classified with reference to the commodity produced or services rendered by their employers. Thus, there is a technical distinction regarding the unit of classification adopted in the two Schemes. But the difference is small, except as regards the allocation of those 'employees' who are individually engaged in activities classifiable as production, commerce, or transport, and those who are employed in "establishments" whose main purpose is classifiable differently from the activity of the individual employee.

Secondly, this table gives a full account of the economic activity of a selfsupporting person. But it gives no account of economically passive or semi-active persons except what is available in the Abstract of Persons subsisting on Non-Productive Activity. The classification of selfsupporting persons into employers, employees and independent workers is a new feature of 1951.

Thirdly, each geographical area is divided into Total, Rural and Urban, thus bringing out the distribution of occupations among urban and rural areas.

Economic activity is defined as including all activity of which the result is the production of useful commodities or the performance of useful services, but does not include the performance of domestic or personal services by members of a family household to one another. A selfsupporting person is either an (i) employer, (ii) an employee, or (iii) an independent worker. An *employer* is that person who has necessarily to employ other persons in order to carry on the business from which he secures his livelihood. A person who employs a cook or other person for domestic service is not an employer but doctors or lawyers who employ compounders and clerks are employers. Similarly, a moneylender who employs duns to chase debtors is an employer. These explanations seem necessary for a study of this table. Persons employed as managers, superintendents, agents, etc., who control workers as well as those who work in a subordinate capacity as wage-earners, salaried workers, are *employees*. An *independent worker* is a person who is not employed by anyone else and does not employ anybody else himself in order to earn his livelihood.

The most important of all economic activities is still the cultivation of land. This is divided into four livelihood classes and, except for what is shown in the Abstract of Persons subsisting on Non-productive Activity, excluded from this table, contrary to the practice of Classifications of Means of Livelihood up to the census of 1931. For an account of selfsupporting persons in the agricultural livelihoods the source is Union Table B. I.

The non-agricultural classes classified in Union Table B.I correspond to the Divisions and Subdivisions as follows : (*a*) Non-agricultural Class V (Production other than cultivation) corresponds to Divisions 0 to 4 : 0 Primary Industries not elsewhere specified ; 1 Mining and Quarrying ; 2 Processing and Manufacture—Foodstuffs, Textiles, Leather and Products thereof ; 3 Processing and Manufacture—Metals, Chemicals and Products thereof ; 4 Processing and Manufacture—not elsewhere specified : (*b*) Class VI (Commerce) corresponds to Division 6 (Commerce) : (*c*) Class VII (Transport) corresponds to Subdivisions 7.1 to 7.4 of Division 7 (Transport, Storage and Communications) : (*d*) Class VIII (Other services and miscellaneous sources) includes Division 5 (Construction and Utilities), Division 7 (Transport, Storage and Communications) with the exception of Subdivisions 7.1 to 7.4 ; Division 8 (Health, Education and Public Administration) and Division 9 (Services not elsewhere specified). This also includes other miscellaneous sources of livelihood, *e.g.*, income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not included in the body of the table which is limited to Industries and Services. Hence there will be a difference to this extent between the total selfsupporting persons of the non-agricultural classes in Union Table B.I and the total of this table. The reconciliation is effected by the Abstract which includes the following categories of persons subsisting on non-productive activity :

(i) Persons living principally on income from non-agricultural property.
(ii) Persons living principally on pensions, remittances, scholarships, and funds.
(iii) Inmates of jails, asylums, almshouses, and recipients of doles.
(iv) Beggars and vagrants.
(v) All other persons living principally on income derived from non-productive activity.

The present system of classification is, therefore, very different from that in 1931 and previous censuses. All the four main classes, twelve subclasses, fiftyfive orders and one hundred and ninetyfive groups of 1931 have been recast under four main classes, ten divisions, eightyeight subdivisions, and one hundred and sixtythree groups (115 in class V, 11 in class VI, *nil* in class VII and 37 in class VIII). The result is a reduction and rearrangement in the number of subclasses of 1931 (corresponding to Divisions in 1951), an increase from the number of Orders from 55 in 1931 to 88 Subdivisions in 1951, and a rearrangement and decrease from 195 groups in 1931 to 163 in 1951. The list below gives in detail the rearrangement in each category :

			XII 53, 54, 55

Thirtythree new subdivisions have been created in 1951 all but five of which have been necessitated by the growth of industry, manufacture and services. These are 0.6, 1.2, 1.4, 1.5, 1.6, 1.7, 2.1, 2.2, 2.3, 2.5, 2.8, 2.9, 3.2, 3.4, 3.5, 3.6, 3.7, 4.0, 4.1, 4.3, 4.5, 4.8, 4.9, 5.0, 5.3, 5.4, 5.6, 5.7, 6.2, 6.6, 6.7, 7.0, 8.9. A number of the other fiftyfive have been rearranged.

While the majority of groups are common to 1951 and 1931, the only difference being their rearrangement under Subdivisions and Orders, the following groups are new for 1951, having no corresponding groups in 1931 : 2.01, 2.02, 2.12, 2.22, 2.23, 2.51, 2.70, 2.84, 2.85, 2.90, 3.30, 3.40, 3.41, 3.42, 3.43, 3.61, 3.63, 3.64, 3.65, 3.82, 3.83, 3.84, 3.86, 3.87, 4.02, 4.06, 4.07, 4.08, 4.10, 4.11, 4.12, 4.43, 4.44, 4.63, 6.03, 6.15, 8.10, 8.22, 9.83. Almost all these groups have been necessitated by the growth of new industries and services during the twenty-year period 1931-1951, demanding specific

differentiation of employment in industry and services. On the other hand the following groups of 1931 are not differentiated in 1951 by the allotment of separate group numbers : 75, 79, 80, 119, 120, 121, 122, 123, 125, 138, 139, 140, 141, 142, 143, 144, 146, 147, 149, 152, 180, 181, 182, 185, 188, 190, 191, 192, 193, 194 : they represent mostly various aspects of trade, miscellaneous and unproductive services. The following is a comparative statement of groups in 1951 and 1931.

A mass of miscellaneous occupations has been packed into Subdivision 9·0 : for example, unspecified artisans, astrologers, Court of Wards servants, day labourers, unspecified engine drivers, horoscope makers, lathials, non-religious mendicants, palmists, zemindar's amlas.

Statement 1 below is an alphabetical list of a number of miscellaneous (including some uncommon or intractable) non-agricultural occupations. This list was furnished as a ready reckoner to sorters and tabulators sorting livelihoods, and will explain how a particular occupation was classified in this census. Statement 2 shows the relation of elements in the ICEC Scheme to Divisions and Major Groups of the ISIC Scheme.

State Table B.III represents the total population of each district under each livelihood group.

Statement 1

UNION TABLE C II—LIVELIHOOD CLASSES BY AGE GROUPS FOR SAMPLE POPULATION

This is altogether a new table for 1951 based on a sample population of each district. The sample was drawn according to the following instructions of the Registrar General of India. Enumeration was done on pads of 100 slips each, a slip containing the record of an individual.

" Break each pad and stack the slips of the pad ; and ' cut ' the stack as in a card game. Place the lower portion above the upper portion and then deal the slips into pigeon holes. You should deal the slips into pigeon holes in the order of 1, 2, 3, 4, 5, S, 6, 7, 8 and 9 successively. All the time, you should watch the slips of ' Displaced Persons'. If you come across any slip of a Displaced Person, deal it into the pigeon hole of ' Displaced Persons'."

Hence it will be seen that the sample is not a sample of the total population of a district or State but of the latter excluding the Displaced Population. It is roughly a tenth of the population of a district exclusive of its Displaced Population. A ' Displaced Person ' was defined by the Registrar General of India as follows : " A ' displaced person' means any person who has entered India having left or being compelled to leave his or her home in Western Pakistan on or after the 1st March 1947 or his/her home in Eastern Pakistan on or after the 15th October 1946 on account of civil disturbances or the fear of such disturbances or on account of the setting up of the two dominions of India and Pakistan. "

The following is a statement of percentages of the age groups under different livelihoods :

UNION TABLE D VII—LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

This is a new table for 1951 classifying the entire literate and educated population of West Bengal, Chandernagore and Sikkim into educational standards in the stub and into eight livelihood classes in the columns. The category 'literate' stands for a person who is 'able to read and write a simple letter but has not passed any written test'.

The following is a statement of percentages of educational standards among the literate population of West Bengal, which in its turn forms only 24·54 per cent of the total population of West Bengal.

UNION TABLE C III—AGE AND CIVIL CONDITION FOR SAMPLE POPULATION

This table is an abridgement of Imperial Tables VII of 1941 and 1931. Table VII of 1941 and 1931 used to consist of two parts, Part A being a summary for the State by community in 1941 and religion in 1931 and Part B containing details for districts by community and religion in 1941 and 1931 respectively. While the 1941 table was based on a sample of 1 in 50, and the 1931 table prepared on the total population, the 1951 table has been prepared on a sample population, the selection of which has been explained in the title page of Union Table C.II. There were 20 age groups for Part A and 14 for Part B in 1941 and 1931, while for 1951 there are only 11 age groups. Age and Civil Condition were classified in 1941 for each of five major communities for the State as a whole in Part A only and all communities combined in Part B. In 1931 Age and Civil Condition were classified for 11 religions in Part A and for 4 religions for each district in Part B. The community or religious basis of classification has been discarded entirely in 1951, the only refinement in its place being the distribution of each age group into total, rural and urban.

The following is a statement showing (i) percentages of Age Groups under different Civil Conditions, and (ii) percentages of Unmarried, Married and Widowed or Divorced males and females to total males and females under respective Age Groups :—

UNION TABLE C IV—AGE AND LITERACY FOR SAMPLE POPULATION

This table is an abridgement of Imperial Tables XI Parts (i) and (ii) of 1941 and XIII Parts A, B, C and D of 1931. The abridgement follows the same lines indicated in the title page of Union Table C.III. In the room of the columns " Literate in English " in 1941 and 1931 two columns for " Able to read only " have been introduced. The test of literacy was the ability to write a letter to a friend and to read the reply.

The figures for illiteracy, that is, those shown in columns 7 and 8 of the table are inclusive of the figures for " Able to read only " in columns 9 and 10. No person below the age of five has been treated as literate for any column.

The sample population was the same as drawn for Union Table C.II.

The following is a statement showing percentages of age groups for literacy.

UNION TABLE C V—SINGLE YEAR AGE RETURNS FOR SAMPLE POPULATION

This is a new table for 1951. The only table in the past which resembles it is the Subsidiary Table to Imperial Table VII of 1941 when "about 200,000 slips of Calcutta for individual age groups, by males and females" were sorted.

The sample population was the same as drawn for Union Table C.II.

UNION TABLE C I—HOUSEHOLD (SIZE AND COMPOSITION)

This is a new table for 1951 prepared from the National Register of Citizens which corresponds to the family schedule in the censuses of several countries. The table has been prepared on a sample roughly of 1 in 1,000 households taken from the National Register of Citizens. In fact the sample has been slightly larger. The instruction issued for selection of sample households was as follows :

" The abstract will be prepared from the National Register of Citizens. It will be based on a ' one in one thousand ' sample of the households recorded in the National Register of Citizens relating to each village or town/ward. The preparation of the abstract is the third and final stage of the sorting and compilation operations and will be taken up after the sorting has been completed and all the prescribed compiler's statements are posted and the other abstracts are prepared.

" The supervisor is responsible for the marking of the first sample household *in each* National Register of Citizens of his sub-district. For this purpose the supervisor should divide the total number of households *in each Register by one hundred* and add one to the remainder after the division. The number thus got will be the first sample household. He should mark the sample household *with a bold cross.*

" The compiler-checker should then mark all other sample households in a register. He should mark every thousandth household after the first sample household. In marking the sample households thus chosen, a bold tick should be used for the household after the first sample household and then the sample households should be marked with bold crosses and ticks alternately."

UNION TABLE D I—LANGUAGES

Part I—Mother Tongue

This table corresponds to Imperial Tables XV, Part i of 1931 and X of 1921. The languages returned are given in column 1 and in successive columns thereafter is given the distribution by locality and sex of those speaking them. The languages are given in the order of total number of speakers speaking them under three major heads: (i) languages of the Indian sub-continent, (ii) languages of other Asian Countries, (iii) languages of Continents other than Asia. The term 'tribal' denotes a group of languages where the enumerator could not make out what the language exactly was but was certain that the speaker belonged to a 'tribe'.

During compilation of the figures a number of dialects have been combined under the main language name. In the case of Darjeeling and Sikkim, however, all mother tongues returned, whether dialects or otherwise, have been shown. Languages that are distinct and separate in other States or parts of the World have been shown, however small the number of their speakers may be in this State. Scotch, a dialect of English, has been shown separately.

An alphabetical index of the language names returned is given below: brackets indicate the serial order in the table.

UNION TABLE D III—SCHEDULED CASTES AND SCHEDULED TRIBES

ABSTRACT OF ANGLO-INDIANS

The table was extracted to meet the requirements of several articles of the Constitution. Statement A below gives a list of scheduled castes and scheduled tribes as notified by the President for West Bengal. Statement B is a list of those Bengali castes which were by the West Bengal Government declared as *Non-Backward* for the purposes of the census on the eve of the census operations.

At the expense of the West Bengal Government the strength of each scheduled caste and scheduled tribe by locality and sex was extracted and will be published in a separate volume by the State Government.

UNION TABLE D IV—BIRTHPLACE

This table corresponds to Imperial Tables VI of 1931 and XI of 1921. In 1941 Table VI was confined to a sample population and restricted to the extraction of three categories only. The necessity for public economy has, however, restricted the detail in which particulars are shown and there are in the present table no figures by District or State of birth outside West Bengal. As such it is an abridgement of the 1931 table, from 67 items to only 38 in the present case.

The table has three parts. The main table is concerned with persons enumerated in West Bengal, Chandernagore and Sikkim wherever they may have been born; the first Subsidiary Table deals with immigrants into these areas from other States of India; and the second Subsidiary Table deals with persons who were born in them but enumerated in other States of India.

In order to facilitate reference by eliminating as far as possible from the table places with no entries, detailed particulars are not given in the table for localities in which persons were born who were returned either in very small numbers or from few districts. These details are grouped together in the table under a residuary total ("Elsewhere") within the next larger area in which they fall, and will be found *in extenso* in the supplement printed after the table.

UNION TABLE D IV—SUBSIDIARY TABLE

(i) Persons born in other States of India but enumerated in West Bengal, Chandernagore and Sikkim, classified by livelihood classes

This is a new table for 1951 classifying the population born in other States of India but enumerated in West Bengal, Chandernagore and Sikkim, by Sex, State of birth, and Livelihood Class. It does not give an account of persons born outside India.

The Livelihood Classes are the same as in other tables : I standing for Cultivators of land mainly owned and their dependants ; II for Cultivators of land mainly unowned and their dependants ; III for Agricultural labourers and their dependants ; IV for Non-cultivating landlords, agricultural rent receivers and their dependants ; V for persons engaged in Production other than cultivation and their dependants ; VI for persons engaged in Commerce and their dependants ; VII for persons engaged in Transport and their dependants ; VIII for persons engaged in Other Services and Miscellaneous Sources and their dependants.

The following is a statement of percentages of immigrants from other States of India classified in the eight livelihood classes. All percentages are in respect of the total population of immigrants in the State or District :

UNION TABLE D VI—NON-INDIAN NATIONALS

This is a new table. Every person was required to declare his nationality for the first time in the Census of 1951. Only three Non-Indian nationalities, each with a population of more than 10,000, have been shown *pro forma* in part I, the others being shown in parts II to IV which follow the table.

UNION TABLE D VI—NON-INDIAN NATIONALS

Part (i) Three Principal Non-Indian Nationals

(The Total represents the totals of all Non-Indian Nationals [Parts (i), (ii), (iii) and (iv)] and not merely of the three nationalities shown in this table)
