FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C.D. Block, etc., level maps depicting the boundaries and other important feature have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz, (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and, the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the District', I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the District during the decade. District and C.D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office S./Shri R.D. Aggarwal, D.N. Mahesh, Deputy Directors and Shri N.M. Alvi, Assistant Director organised and supervised the work of at different stages. In this voluminous job valuable assistance was rendered to me by Shri S.K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computers and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the P.C.A. Cell at the headquarters headed by Shri P.N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C.D. Block maps. Shri A.L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happend to be incharge of printing and for sometime also looked after the D.C.H. Section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

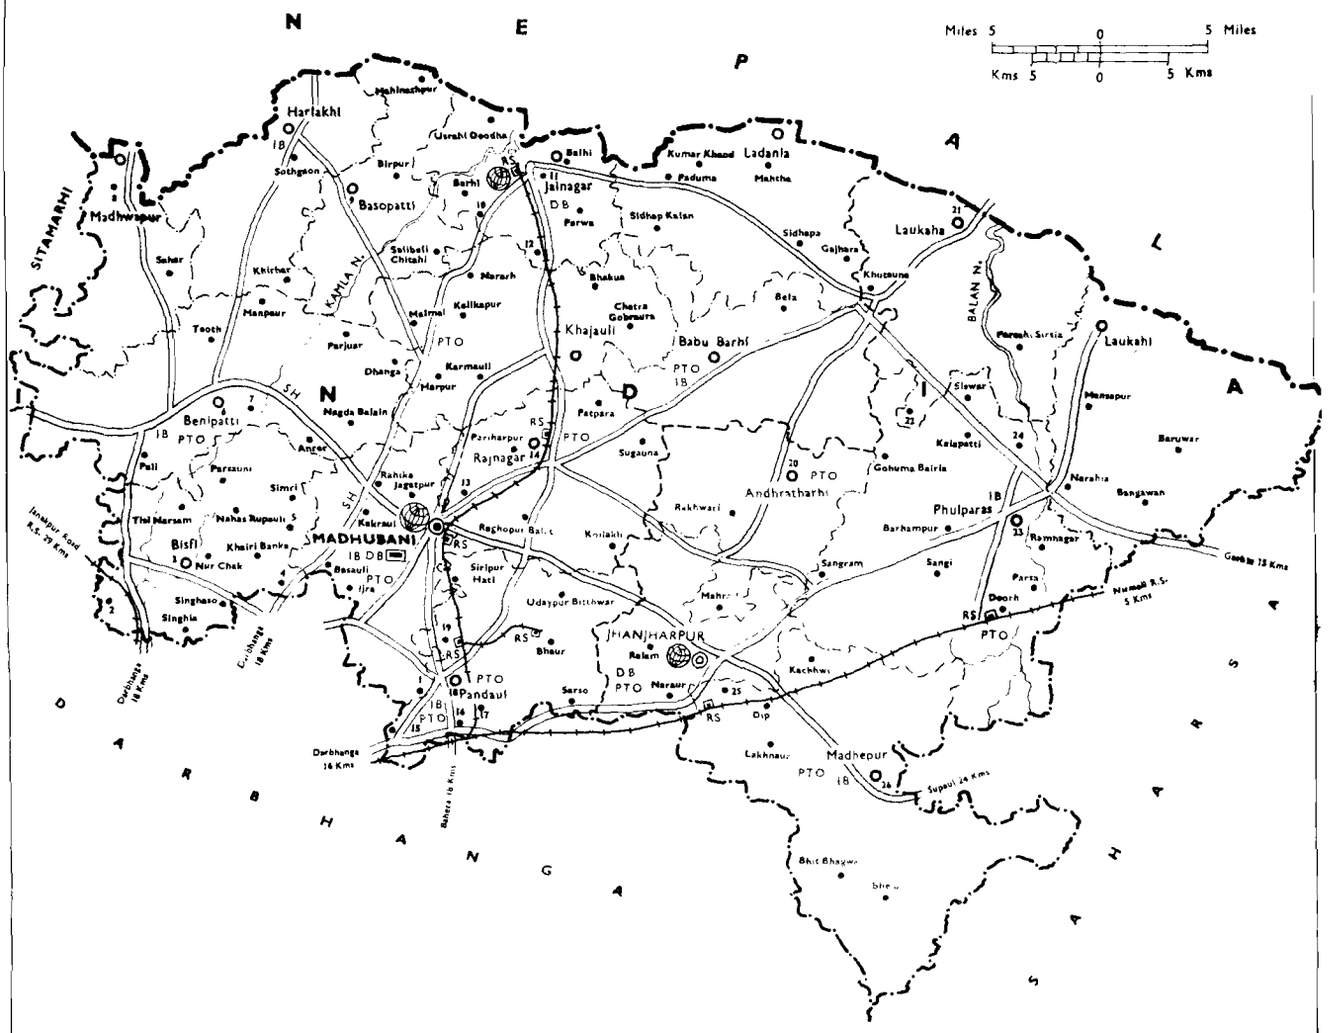

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s. New Sahni Printing Press, Patna, who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The newly created district of Madhubani was carved out of the old Darbhanga district in the year 1972 as a result of reorganisation of the districts in the State. This was formerly the northern subdivision of Darbhanga district. It consists of 18 Development Blocks. Bounded on the north by a hilly region of Nepal and extending to the border of its parent district Darbhanga in the south, Sitamarhi in the west and Saharsa in the east, Madhubani fairly represents the centre of the territory once known as Mithila and the district has maintained a distinct individuality of its own. The geographical features of the district, assuring a certain amount of security and seclusion, are responsible for the evolution of a somewhat characteristic culture. It was as a result of this assured security on account of geographical features that traditions could grow unhampered and the literacy pursuits in different directions could continue unabated through the ages. Naturally, therefore, the philosophical discussions and erotic poems found a fertile soil in the district. The district has a number of important villages and could be said to be the core of Maithili culture.

Practically there are no prehistoric sites in the district though remains of the earliest aboriginal population can be seen in some parts of the district. Hunter in his 'Statistical Account' has referred to the existence of the people, known as the *Tharus* in the erstwhile old subdivision of Madhubani. The *Bhars* are also believed to have belonged to some aboriginal race though nothing positive about them is known from any reliable source. The *Bhar* settlements in the north-eastern part of the district indicate that they possibily wielded some power in the remote part. From the work of Dr. Suniti Kumar Chatterji entitled 'Kiratajanakirti' it appears that *Kiratas* also inhabited the district for a considerable period. The Mahabharata also throws light on the *Kirata* culture. Prior to the Aryanisation of this land the area seems to have been under the aboriginal population and Shiva worship was predominant. The association of the family of Janaka with the worship of lord Shiva is an indication of the fact that though they formed the vanguard of Aryan culture they had to compromise with the local religious belief, dominated by the *Shaivas*. The kingdom of Videha included a greater portion of the district. In course of time it was ruled by a successive line of kings commonly known as Janakas.

If tradition is to be relied upon, the Pandavas during their exile stayed in some portion of the present district and Pandaul (block headquarters) is associated with them. Janakpur, capital of Videha is situated at a short distance to the north-west of the district in the Nepalese territory and tradition points to the village of Phulhar in the north-east corner of the Benipatti thana as the flower-garden where the kings' priests used to gather flowers for worship and identifies its temple with that of Devi Girija, which was worshipped by Sita before her marriage with Rama. Legends and traditions associate this district with a number of sages and master-minds of ancient times. Village Kakraul is associated with Kapil, Ahiari with Ahilya wife of Gautama, Bisaul with Vishwamitra and Jagban with Yajnavalkya (ascribed to the great sage of Mithila).

There is historical evidence to show that Videha (now Mithila) was one of the eight republics of Vrijjian confederacy long before the advent of Buddha. Though the headquarters of the Lichchhavis was at Vaishali, they wielded political power over certain parts of the present district of Madhubani also. The growing power of the Vrijji confederacy brought them into collision with the kingdom of Magadh.

Bimbisar, the founder of the Magadhan imperial power aspired for imperial power and the ambition

ran in the veins of his son, Ajat Shatru as well. Ajat Shatru subdued the Lichchhavis and conquered the whole of North Bihar. He brought Mithila under the control of the Magadhan empire. The history of the Lichchhavis comes down unbroken to the days of the imperial Guptas. The Lichchhavis founded a kingdom in Nepal and even the earliest royal house of Tibet owed its origin to the Lichchhavis of Vaishali. The migration of Lichchhavis to Nepal and Tibet marks a great event in the history of North Bihar and the district of Madhubani being at the core of the region must have played a dominant part in this great trek as the route to Nepal lay through this district.

Madhubani must have shared in the religious and cultural ferment which so deeply stirred the hearts of the people of the Gangetic Valley in the 6th century B. C. Since the whole of North Bihar was deeply influenced by the teachings of two great reformers (Mahavira and Buddha), it is only natural to infer that the people of Madhubani actively participated in the propagation of these reform movements. According to one theory Mahavira himself was a Vaideha domiciled in the suburb of Vaishali and was the son of a daughter of Mithila. Buddha also visited Mithila thrice and he had a great love for Vaishali. It may be further noted here that Buddha's most devoted disciple, Anand was a Vaidehamuni, a monk of the land of Videhas. Both the Jain and the Buddhist literature contain innumerable references to the district of Madhubani and its neighbouring territories. Very little is known about the history of Madhubani from the time of the Kusanas to the rise of the Guptas. If the traditional belief of Kanishka's taking away of Buddha's alms bowl can be given any credence, then it may be presumed that the Kushans ruled over the portions of North Bihar including Madhubani. According to a tradition in Mithila, the village Andhra Tharhi is associated with the rule of the Andhras (Satvahanas) in Bihar.

Between the fall of the Kushanas and the rise of the Guptas, the Bharasivas and the Vakatakas had ruled. The Bharasivas are associated with the Bhars of the erstwhile Darbhanga, Saharsa and North Munger. Numerous villages of the district are associated with the Bhars and they claimed power down to the 15th century. It also appears that after the fall of the Kushanas, the Lichchhavis regained political power and it was as a result of the matrimonial alliance between the Lichchhavis and the Gupta that the latter came to power in Magadha.

As a result of the aforesaid matrimonial alliance the Gupta succeeded in carving out a powerful empire. The Gupta renaissance brought in its trail the revival of the classical Sanskrit language. The temple at Uchchaith is fondly associated with Kalidasa though there is nothing positive to show that Kalidasa was a Maithil.

After a temporary period of instability, Madhubani came under the control of the Oinwaras, also known as the Kameshwara, Thakura or the Sugauna dynasty. These Hindu chiefs were left undisturbed by the Muslim conquerors who had by then conquered the whole of Mithila. When Haji Ilyas of Bengal divided Tirhut into two parts, the Oinwar Raja shifted his capital to Sugauna near Madhubani.

The district thereafter remained a part of the Mughal *Subah*. There was no event of great significance during the next century and a half. The Afghans who had settled in the district became active when they saw Mughal power declining. Alivardi Khan, however, hurried with his forces and inflicted a crushing defeat on the Afghans and quietened them for ever.

British period

The decisive victory of the British in the battle of Buxar in 1764 gave them undisputed sway over the Lower Provinces of Bengal. As a consequence, Madhubani, along with other parts of Bihar, passed under the control of British. The history of the district thereafter is merged with the history of British rule in India. The British administrators took steps to establish law and order. Besides the trouble-mongers in Mithila, they had also to deal with the incursions of the Nepalese. The trouble with Nepal culminated in the Indo-Nepalese war. After concluding peace with Nepal, the British administrators had a comparatively quiet time till the 1857 movement.

In 1857, patriotic fervour raged high in Madhubani district as in many other districts of Bihar. Later the call of the non-co-operation movement also found adequate response in the district of Madhubani and many people volunteered to serve the cause championed by Mahatama Gandhi. Khadi spinning and weaving was adopted as a must for congress workers. A Khadi centre was opened at Madhubani. It gradually expanded its activities. Khadi became very popular and Madhubani soon emerged as a renowned centre of Khadi production. The popularity of Khadi weaving and spinning in the district went a long way in inspiring the people towards the nationalist cause. Madhubani district played an important role in the country's freedom struggle.

(Source District Gazetteer, Darbhanga and District Census Handbook, 1961)

Natural divisions

The district consists of a vast low lying plain intersected by numerous streams and marshes, but traversed also in parts by upland ridges. The land is generally high, specially in blocks of Benipatti, Madhubani, Jainagar, Ladania, Laukaha and in the south of Phulparas, which contain stretches of highland. The soil of the district is highly calcarious. It is a mixture of clay and sand in varying proportions. In the major part of the district, clay or *matiari* is mostly found. This contains negligible proportion of sand and since it can retain moisture, it is suited to paddy cultivation.

In shape, the district resembles a parallelogram, its mean breadth from west to east being a little greater than its mean length from north to south. It consists of a rich alluvial plain intersected by numerous rivers and streams issuing from the Nepal hills and running almost parallel to each other from north to south. The important rivers of the district are the little Baghmati, Kamla, Karai, Balan and Tiljuga. The little Baghmati enters the district at Bishanpur Ugarpati about 16 Kms. west of Benipatti, and after being joined by its tributary the Dhaus near Bankuta, in the same block takes a south-easterly course. The Kamla river flows southward from the hills and falls into the little Baghmati. This river frequently changes its course and it's beds are found all over the north of the district. To the east of this river are little Balan and the Balan proper and the Tiljuga which skirts around the eastern boundary of the district.

Climatic conditions

The climate of this district is generally healthy. There are three well marked seasons, viz, a pleasant cold season, a hot, dry summer and the rainy season. The cold weather begins in November and continues upto February, though March is also somewhat cool. Westerly winds and dust storms begins to blow in the second half of March and the temperature rises considerably. May is the hottest month when the temperature goes up to about 42°C. Rains set in towards the middle of June when the temperature begins to fall and humidity rises. Though the rains continue till the end of September or the middle of October, these months are not so hot.

Rainfall

Madhubani district gets more rain than its adjoining districts. The rainfall in Madhubani town is nearer the district average. The rains usually start in the middle of June. The maximum rainfall occurs between the second half of July and first half of August. The average annual rainfall in the district varies between 1,000 and 1,500 mm. in a year. The district also gets some winter rain.

Flora and Fauna

Tirhut, which included Madhubani district also was formerly famous for the variety of its fauna in the days when forests covered large stretches of land which are now under the plough. The advancement of cultivation, the growth of population and the extension of means of communications have practically denuded the district of forest and also of wild buffaloes, tigers, elephants and leopards.

Among the birds found in the district are various kinds of quails, patridges and ducks, Snipes, cranes. storks and sparrow are commonly seen.

Fish are plentiful. The common varieties are *rohu, bachwa, tengra, katla, singhi* and *boan. Hilsa* is found only occasionally.

Land use pattern

As is mentioned in the district Gazetteer of Darbhanga (1962), until a century ago a great part of the land was uncultivated partly owing to the desolation caused by the terrible famine of 1770 and partly because of the oppression of the farmers by the landlords (Zamindars) for collection of revenue. From the middle of the 19th century, the position improved and reclamation of jungles started and the cultivated area has increased to three-fifths of the total area. There was still a considerable amount of swamp and marsh which remained under water for the greater part of the year. There were also many stretches of culturable jungles along the banks of streams and on the Nepal frontier where it was due to the large number of mango groves which strewed the land; this tract was the stronghold of Brahmanism and many of the groves had been planted with religious motives. The land in the district is mainly low and produce one crop in the year, and so the necessity for high cultivation does not arise. In a year of good rainfall no one would think of leaving rice lands fallow, and indeed, rice lands positively deteriorate when left uncultivated, as they become baked and hardened, the 'ails' or partitions between the fields become broken, and the drains by which the land would be usually irrigated get filled up or obliterated.

So far as agricultural production is concerned, the district is mainly a paddy and sugar-cane growing area. The staple food consists of rice, *dal* and vegetables. *Murhi* (fried rice), *gur, chura* and curd constitute their favourite refreshment. Use of *biri*, tobacco, *pan* and *supari* (betelnut) is very common.

Irrigational facilities

Madhubani, like other districts of North Bihar, is dependent for its crops on the local rainfall. The failure or premature cessation of rainfall is a disaster for the winter crops (especially rice) which is the main crop of the district. A considerable part of the district is flood-prone. The standing crops are also affected by heavy rains as well as water flowing out of Nepal territory.

Artificial irrigation is also practiced in the district though its full potential has not been realised. There the numerous streams and rivers which intersect the district are utilised for the supply of water to the winter rice crop especially in Khajauli and Phulparas blocks. In Benipatti block nearly one third of the net cropped area is irrigated from a complete system of *'pynes'* or artificial channels led off from the Kamla river. Besides these sources, tanks are used all over the district for the irrigation of the fields in their neighbourhood, either to expedite the transplantation of the winter rice seedlings or to prevent them from withering during a break in the rains. Tube-wells and artesian wells are also being utilised for the purpose of artificial irrigation.

Mines & Minerals

The district is formed of thick alluvial soil. Beds of *Kankar* or nodular lime stone of inferior quality are occasionally met with. The river banks are generally made up of new alluvium formed by continuous deposit of silt by the rivers. Saltpetre is the only mineral found in the district.

Industrialisation

Among the old-time industries which still continue is the manufacture of sugar and, in fact, sugar industry is one of the most important industries in the district and consumes the large output of sugar-cane.

Spinning and weaving are very old and highly developed handicrafts in the district. The Khadi Gramodyog Centre located at Madhubani is famous for weaving. There are still Maithil ladies who spin fine yarn and can weave beautiful textiles. It is said that some of them can spin the length of yarn needed for the sacred thread *(Janaul)* and put it in the capsule of a cardamom. This speaks of the high quality of the handloom textile of the district. The famous Madhubani Painting or the Mithila Painting as it is known is also the handiwork of the people especially the women of Madhubani.

Madhubani is essentially an agricultural district but there are also a number of small-scale industries.

Livestock

The District Gazetteer of Darbhanga (1962) mentions that rearing of cattle is an important

subsidiary occupation of the district. The district is well stocked with cattle, and the Khajauli and Phulparas blocks contain a large number of milch cattle, draught cattle and agricultural stock of all kinds. These two blocks contain the Jabdi and Bachaur parganas, which are noted for their breed of cattle. A number of veterinary hospitals and dispensaries have been opened at different centres in the district which has reduced the mortality of cattle.

Communications

The District Gazetteer of Darbhanga mentions that in the early days of British administration, North Bihar was far better provided with roads than the South Gangetic districts. Probably the most important reason for this was the extensive cultivation of indigo in the districts of North Bihar. It was, therefore, natural that attention would be given to the maintenance and improvement of means of communication.

The district has a well-knit communication system. It is served by the North Eastern Railway. It also has a sound system of roadways and considerable boat traffic in the bigger rivers. A Bus Depot of the Bihar State Road Transport Corporation is also functioning at the district headquarters. Before that private buses used to ply in major parts of the district. The district is covered by metre gauge railway between Darbhanga and Jainagar, Darbhanga to Nirmali and Darbhanga to Laukaha. The proposal for conversion of narrow gauge into broad gauge from Samastipur to Jainagar has almost been finalised. The landing ground for aircraft has also been constructed.

Trade and Commerce

As regards trade and commerce, this district exports fish, handloom cloth, *makhana* (water berries), mangoes, sugar-cane, *lichi*, paddy, and brass metal articles to various cities inside and outside the State. It imports medicine, machine, fine clothes, shoes and cosmetic materials from other places. Madhubani has been an important centre for trade with Nepal since the latter part of the 19th century. There used to be frontier trade registration offices at Madhwapur and Umgaon. The principal items of export from Madhubani to Nepal are cotton, sugar, silk, betelnut and tobacco and those of import from Nepal have been paddy, timber, mustard seed, pulses, etc. A number of rice mills and timber saw mills have been set up in the district on Nepal border.

Social and Cultural events

In some parts of the district Lord Indra (God of rains) is worshipped with great enthusiasm and devotion. Madhubani, the district headquarters, Jainagar, Rajnagar, and Madhepur are the important places where this festival is held for 7 days in the month of September and before Dussera. Thousands of people including females from different parts of the district attend the fair, meet their relatives, do shopping and finally return home. The sale of eatables during this period is the maximum as compared to the rest period of the year. It is said that this *puja* originated from Darbhanga Raj. The Dusadh community of this district also celebrates Shailesh *puja* in the month of September every year. It is said that Shailesh was the most popular king, who belonged to this community. This festival, however, is not popular among the Dusadh community of other districts.

Other religions functions are also regularly held by different communities in the district.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Andhratharhi

The village is the headquarters of the development block bearing the same name and is situated at a distance of 19 kms. from Jhanjharpur Rly. station. It has an old temple known as *Kamladitya* whose foundation was laid by Sridhar, the minister of Nanya Deva of Karnatak, the first ruler of Mithila. The temple contains images of Surya, Vishnu, Lakshmi and Astadal Kamal, The *Kamladitya* temple signifies both the Sun and Lakshmi-Vishnu.

2. Balirajpur

The village, situated about 25 kms. north-east of Madhubani, contains the remains of an old fortress known as Baligarh. Tradition ascribes the fort to king Bali of the epic period. It is protected by the Archaeological Department.

3. Basudevpur

This village, situated about 16 kms. east of Madhubani, was an important centre of the old Rajput Kingdoms of Bhara and Gandha. The Gandhwariya Rajputs of the district are associated with this place.

4. Bhawanipur

It is a large village situated 5 kms. from the block headquarters of Pandaul. The village is noted for its temple of Ugranath and traditional association with famous Maithili poet, Vidyapati. As the legend says, Vidyapati was such a great devotee of Lord Shiva that the latter began to serve Vidyapati as his servant named Ugna.

5. Bhit Bhagwanpur

The village lies about 9 kms. south of the block headquarters at Madhepur. The 1961 Census report mentions that it has an old temple of Lord Shiva known as Bideshwarsthan. It is believed that the deity was installed by Shri Bideshwar Thakur, the great-grand father of the renowned poet Vidyapati. Around the temple there are various carvings of black stones. The village is believed to have been the seat of Deobansi Rajas, remains of whose fortress still exist in the heart of the village.

6. Bideshwarsthan

Situated about 1 km. from Lohna Road railway station the village is noted for its Shiva temple named as Bideshwarsthan. Numerous devotees congregate at the temple every Monday particularly in the month of *Magha*. A large fair is also held annually on the occasion of *Shivaratri*.

7. Bisfi

A large village, situated 9 kms. from Kamtaul railway station, is the headquarters of the development block of same name. It is noted as the birth place of the renowned Maithili poet Vidyapati. The village contains some remnants of his house. The Devi temple in which the poet once used to recite hymns and offer prayers, also stands. Every year the birthday of poet Vidyapati is celebrated with great enthusiasm.

8. Kakraul

A village, situated at a distance of 24 kms. south from Laheriasarai, is famous for the Kapileshwar Mahadeo temple. It is said that the temple was built by Kapildeva Muni, the celebrated author of the collection of Vedic hymns called the *Sankhya Yoga*. A fair is held annually in January and people worship Lord Shiva.

9. Mangrauni

The village lies in the development block of Rajnagar and according to the Panjikars (local chroniclers) it is more than a thousand years old.

It has the privilege of producing a number of scholars with significant contribution to the world of learning.

10. Saurath

This is a roadside village on Madhubani-Jainagar road and contains a temple known as Somnath Mahadeva. It owes its importance to the annual *Sabha* held by Maithili Brahmins for negotiating marriages. Many *Panjikars*, who keep the geneaological records of different families, reside here.

11. Satghara

The village is situated about 2 kms. from Rajnagar railway station. It is noted for its palace of the Rajnagar Raj and beautiful temples. The buildings and the palace have been largely destroyed during the 1934 earthquake. It is a flourishing business centre also.

12. Shilanath

A village, situated 3 kms. south of Jainagar, has an old temple of Lord Shiva and has religious importance. A big fair is held annually on the occasion of *Kartik Purnima.*

13. Phulhar

The village is situated about 6 kms. west of the block headquarters at Harlakhi. The village contains the temple of Goddess Girija. It is said that princess Sita used to come here every day to worship the goddess. Lord Rama saw her for the first time at this place.

14. Kalna

The village lies 5 kms. east of the block headquarters at Harlakhi. It is noted for its temple of Kalneshwar Mahadeo said to have been built by king Janaka.

15. Uchaitha

The village in Benipatti block is noted for its temple of Bhagwati on the western bank of Thumane river. According to a legend, the renowned Sanskrit poet and dramatist Kalidas was blessed by Bhagwati at this place.

16. Jainagar

Jainagar is a notified area committee and the headquarters of the development block bearing same name. It contains the remains of a mud-built fort now in ruins. It is probably one of the several forts which Alauddin Hussain, king of Bengal constructed from Kamprup in Assam to Bettiah, in order to resist the incursions of the hill tribes.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentation of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census Organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirement of the Minimum Needs Programme of the Planning Commission.

A new statement (IV-A) of civic and other amenities for each area/locality identified as slum in Class I and II towns has been added. In this district, however, there is no Class I or II town and hence this information has not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled

Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward (circle). In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the General Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the thana jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are :

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative singnificance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion(ii) included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agriculturas population for the purpose of this criterion. Towns are further classified into the following six classe according to their population size :

Class of town		Population
I	..	1 lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000— 9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc, used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member household, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Workers—Persons who had worked even for a day in the above mentioned economically productive work have been treated as Workers.

Main worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477 A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act.—1976 (No.

108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Madhubani, with a population of 2,325,844 persons is divided into 18 Community Development Blocks consisting of 1,032 inhabited villages (out of a total number of 1,116 villages including 3 villages which are constituent units of the towns of the district) and 3 towns. With 3.33 per cent of the total population of the State, comprised within the district, it ranks 14th in the State in order of population. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Madhubani	174,389	89,605	84,784	129,244	65,103	64,141	45,145	24,502	20,643	80	68	1

18	Madhepur	207,720	104,651	103,069	207,720	104,651	103,069	...	...	...	130	118	...
	Total	**2 325,844**	**1,173,383**	**1,152,461**	**2,253,441**	**1,134,507**	**1,118,934**	**72,403**	**38,876**	**33,527**	**1,116**	**1,032**	**3**

It would be seen from the table above that among the C. D. Blocks, there is a wide range of variation in the distribution of population. Madhepur with 8.93 per cent of the Population of the district occupies the first place followed by Phulparas with 8.85 per cent. This may be attributed to the fact that the above two blocks contain the maximum number of inhabited villages, the respective percentage being 11.43 and 9.88 of the total number of inhabited villages in the district. The least populated

development blocks are Madhwapur and Ladania with 3.11 and 3.64 per cent respectively probably since they have much less number of inhabited village to their credit as is evident from the table above.

The average population of a development block in the district is 129,214 which is higher than the average population of a development block in State (119,105). As many as 8 out of 18 development blocks accounting for 44.40 per cent of the total have higher population than the average block population in the district. They contain as much as 59.17 per cent of the district population.

Madhubani district, which has been carved out of the old Darbhanga district, appears to have had less impact of urbanisation since 96.89 per cent of the population lives in the villages against the State-level breakup of rural and urban population of 87.53 and 12.47 per cent respectively. The total urban population contained in 3 towns is of the order of only 3.11 per cent of the population of the district. None of the 3 towns falls either in Class I (population 1 lakh and above) or Class II (population 50,000—99,999) range. The district does not have any urban agglomeration either.

Decadal change in population

Madhubani acquired the status of a district only after the 1971 Census. In fact, the subdivision of Madhubani as such in the old district of Darbhanga has been upgraded as the new district of Madhubani. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal variation (1971—81)		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Madhubani	135,535	102,616	32,919	174,389	129,244	45,145	+28.67	+25.95	+ 37.14
Bisfi	136.112	136,112	...	160,120	160,120	...	+17.64	+17.64	...

Madhepur	172,225	172,225	..	207,720	207,720	...	+20.61	+20.61	...
Total	**1,892,039**	**1,849,203**	**42,836**	**2,325,844**	**2,253,441**	**72,403**	**+22.93**	**+21.86**	**+69.02**

It would appear that the rise in the population of this district during the 1971—81 decade has been of the order of 22.93 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 21.86 per cent while the growth of the urban population over the decade has been as much as 69.02 per cent.

Another notable feature discernible from these data is that the growth rates amongst various C. D. blocks do not show a uniform pattern. Basopatti

block has registered the highest growth rate of 28.95 per cent which may be ascribed to the extension of jurisdiction of this block during the decade. There are 5 other development blocks, viz., Madhubani (28.67%), Andhratharhi (28.40%), Jhanjharpur (27.77%), Babu Barhi (25.72%) and Laukaha (25.37%) in which the growth rates have been more than 25 per cent. 9 blocks have shown growth rates varying between 20—25 per cent. There are 3 development blocks in the district, viz., Jainagar (15.89%), Bisfi (17.64%) and Madhwapur (19.32%) which registered growth rates below 20 per cent.

As already stated 96.89 per cent of the population of Madhubani district is rural. The corresponding proportion for the State is 87.53 per cent. It follows, therefore, that Madhubani is still among the less urbanised districts of Bihar. The increase in rural population during the last decade has been the highest in the case of Basopatti block (28.95%) closely followed by Andhratharhi block (28.40%).

As regards the growth in urban population, Madhubani block occupies the first position probably since it contains Madhubani (M), the district headquarters. Jhanjharpur town in Jhanjharpur block has recently been declared as a Notified Area with quite a good number of villages as its constituent units. This has resulted in very low growth rate in rural population of this block.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups :

Table 3—Distribution of villages by population ranges.

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
— 200	61	5.91
200 — 499	115	11.24
500—1,999	470	45.44
2,000—4,999	282	27.33
5,000—9,999	84	8.14
10,000+	20	1.94
Total	**1,032**	**100.00**

It would be seen from the alongside Table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 2,000—4,999 accounting for 45.44 and 27.33 per cent respectively of the total number of inhabited villages in the district. The medium-sized villages are thus much more in number than large-sized villages (with population above 5,000) in the district. The large villages comprise only 10.08 per cent of inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was 751 whereas for the old Darbhanga district it was as high as 1,571. According to the 1981 Census the average population size of an inhabited village in the State is 906 as against 2,184 for the district of Madhubani.

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
— 10	3	0.29
11— 20	1	0.10
21— 50	4	0.39
51 100	7	0.68
101 —200	33	3.20
201—300	47	4.55
301—500	240	23.25
501+	697	67.54
Not known	...	...
Total	**1,032**	**100.00**

The data presented in the above table highlight the fact that maximum proportion of villages in the district lies in the density range of 501+with 67.54 per cent followed by villages in the density range of 301—500 which account for 23.25 per cent,

It would further be seen that a very small number of villages fall in the density range below 300.

Proportion of Scheduled Castes/Tribes population in villages and towns

Tables 5, 6 and 7 furnished below indicate the proportion of the population of the Scheduled Castes and the Scheduled Tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and the Scheduled Tribes at micro-level, particularly, in relation to area development oriented programmes. The tables have been dealt with separately :

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	82	7.95
5 or less	162	15.70
6—10	243	23.54
11—15	220	21.32
16 - 20	121	11.72
21—30	122	11.82
31 and above	82	7.95
Total	**1,032**	**100.00**

It is discernible from the table that there are only 82 villages accounting for 7.95 per cent of the inhabited villages where the proportion of Scheduled Castes population to total population is more than 31 per cent and there are exactly equal number of villages which do not have any population of the Scheduled Castes at all. The maximum number of inhabited villages having Scheduled Castes population lies in the range of 6—10 per cent (23.54%) closely followed by 11—15 percentage range (21.32%).

Table 6—Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,013	98.16
5 or less	17	1.65
6—15	1	0.10
16—25	1	0.09
26—35	...	—
36—50	...	...
51 and above	...	...
Total	**1,032**	**100.00**

It will be seen from the table that dispersal of Scheduled Tribes population is not on the same pattern as in the case of Scheduled Castes population. As many as 1,013 out of 1,032 inhabited villages (98.16%) in the district have no Scheduled Tribes at all. There are only 17 villages (1.65%) which have a population of Scheduled Tribes. Even in these villages the Scheduled Tribes account for only 5 per cent of the total population or even less.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of the town	Total Population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Jainagar	11,955	2,201	21	18.41	0.18
Jhanjharpur	15,303	1,446	...	9.45	...
Madhubani	45,145	2,924	1	6.48	N
All towns	**72,403**	**6,571**	**22**	**9.08**	**0.03**

N—denotes negligible.

The table above indicates that the concentration of the Scheduled Castes in the towns of Madhubani district is of the order of 9.08 per cent of the total population as against 12.93 per cent in the rural areas (Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and the predominantly rural base of the economy of the district. The highest percentage of Scheduled Caste population is contained in Jainagar town with 18.41 per cent. The urban content of the population of the Scheduled Tribes in the district is almost negligible, being only 0.03 per cent. While Jhanjharpur town has not returned any Scheduled Tribes population at all, Madhubani town contains only single Scheduled Tribe person.

Literacy rates by population ranges of villages and towns

According to the Census terminology, a person who was able to read and write any language with understanding was treated as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately :

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
— 200	61	15.52
200— 499	115	16.60
500—1,999	470	19.61
2,000—4,999	282	20.85
5,000—9,999	84	23.11
10,000+	20	21.60
Total	**1,032**	**21.10**

It would be seen from the alongside table that literates form 21.10 per cent of the total population in the rural areas of the district as against 41.75 per cent (Table 9) in the urban areas. In the rural areas it is interesting to note that the literacy rate varies directly in relation to the population range of the villages except in 10,000+range where it has registered a marginal decline. The highest literacy rate can be seen in the villages in the population range of 5,000—9,999 with 23.11 per cent followed by population range 2,000—4,999 with 20.85 per cent. The lowest literacy rate is observed in the population range of less than 200 with only 15.52 per cent being literate. It, therefore, follows that the bigger the village the higher is the literacy percentage. Perhaps, because of higher population, educational facilities were provided in these villages earlier than in smaller villages.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Jainagar	47.72
Jhanjharpur	24.91
Madhubani	45.87
All towns	**41.75**

Among the towns, Jainagar has the highest proportion of literate population (47·72%) closely followed by Madhubani with 45.87 per cent. Jhanjharpur town has much less literate population to its credit (24.91%) probably since it has been notified as a statutory town only recently and prior to that it had all the rural characteristics.

Workers and Non-workers in rural and urban areas of the district.

The table furnished on the next page gives that percentage breakup of literates, main workers, marginal workers, total workers, non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table 10 Literates, Workers, Non-workers, Scheduled Castes/

Total workers in the district of Madhubani account for 29.83 per cent of the total population whereas the proportion of non-workers is as high as 70.17 per cent. Main workers (i.e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) constitute 28.21 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.62 per cent. The same trend can be observed in both the rural and urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 51.00 and 50.30 per cent respectively for males as against 8.27 and 5.71 per cent for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (2.56%) vis-a-vis male marginal workers (0.70%) in the district which may be due to the fact that apart from household activity they do some work during the day or the season to supplement the household income. It can be seen that except in one or two urban cases the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (29.96%) than in the urban areas (25.66%). The same pattern is perceptible in the case of main workers as well as the marginal workers who constitute 28.30 and 1.66 per cent of the rural population but only 25.14 and 0.52 per cent of the urban population. This may be due to the fact that in the rural areas people generally find easy employment in various agricultural activities, whereas, in the urban areas, household industries and other works do not offer equal short term job opportunities due to limited urban development .

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Madhubani	68	56 (82.35)	14 (20.59)	68 (100.00)	20 (29.41)	6 (8.82)	20 (29.41)	28 (41.18)	16 (23.53)
2	Bisfi	52	49 (94.23)	8 (15.38)	52 (100.00)	23 (44.23)	12 (23.08)	13 (25.00)	13 (25.00)	8 (15.38)
3	Benipatti	95	77 (81.05)	13 (13.68)	95 (100.00)	32 (33.68)	7 (7.37)	17 (17.89)	25 (26.32)	46 (48.42)
4	Madhwapur	40	35 (87.50)	10 (25.00)	40 (100.00)	12 (30.00)	5 (12.50)	7 (17.50)	8 (20.00)	4 (10.00)
5	Harlakhi	43	39 (90.70)	10 (23.26)	43 (100.00)	15 (34.88)	7 (16.28)	19 (44.19)	21 (48.84)	18 (41.86)
6	Basopatti	33	32 (96.97)	6 (18.18)	33 (100.00)	14 (42.42)	6 (18.18)	6 (18.18)	6 (18.18)	13 (39.39)
7	Khajauli	47	42 (89.36)	14 (29.79)	47 (100.00)	15 (31.91)	12 (25.53)	13 (27.66)	19 (40.43)	29 (61.70)
8	Jainagar	21	19 (90.48)	8 (38.10)	21 (100.00)	11 (52.38)	4 (19.05)	4 (19.05)	4 (19.05)	7 (33.33)
9	Ladania	28	28 (100.00)	7 (25.00)	28 (100.00)	13 (46.43)	8 (28.57)	4 (14.29)	7 (25.00)	3 (10.71)
10	Babu Barhi	59	48 (81.36)	18 (30.51)	59 (100.00)	24 (40.68)	8 (13.56)	13 (22.03)	12 (20.34)	16 (27.12)
11	Rajnagar	63	41 (65.08)	13 (20.63)	63 (100.00)	17 (26.98)	8 (12.70)	21 (33.33)	19 (30.16)	17 (26.98)
12	Pandaul	64	45 (70.31)	16 (25.00)	64 (100.00)	19 (29.69)	9 (14.06)	13 (20.31)	23 (35.94)	32 (50.00)
13	Jhanjharpur	47	39 (82.98)	9 (19.15)	47 (100.00)	13 (27.66)	5 (10.64)	3 (6.38)	16 (34.04)	16 (34.04)
14	Andhratharhi	46	39 (84.78)	5 (10.87)	46 (100.00)	13 (28.26)	7 (15.22)	7 (15.22)	12 (26.09)	15 (32.61)
15	Laukaha	43	35 (81.40)	40 (93.02)	43 (100.00)	10 (23.26)	2 (4.65)	7 (16.28)	8 (18.60)	9 (20.93)
16	Laukahi	63	51 (80.95)	7 (11.11)	63 (100.00)	17 (26.98)	12 (19.05)	8 (12.70)	8 (12.70)	13 (20.63)
17	Phulparas	102	90 (88.24)	15 (14.71)	102 (100.00)	34 (33.33)	14 (33.73)	19 (18.63)	28 (27.45)	33 (32.35)
18	Madhepur	118	87 (73.73)	8 (6.78)	118(100.00)	24 (20.34)	9 (7.63)	11 (9.32)	18(15.25)	16 (13.56)
	Total	**1,032**	**852(82.56)**	**221(21.41)**	**1,032(100.00)**	**326(31.59)**	**141(13.66)**	**205(19.86)**	**275(26.65)**	**311(30.14)**

Educational amenity—There are as many as 852 villages accounting for 82.56 per cent of the total number of inhabited villages (1,032) in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Ladania where cent per cent villages have this facility. It is followed by Basopatti and Bisfi blocks with 96.97 and 94.23 per cent respectively. The lowest number of villages with educational facility is in the development block of Rajnagar with only 65.08 per cent villages having the facility of education.

Medical amenity—The availability of medical amenity in the villages is considerably low as only 22.41 per cent of inhabited villages have it. Among the development blocks, Laukaha has the highest proportion of villages with medical facility, the percentage being 93.02. Madhepur block, on the other hand, has only 8 villages (6.78%) to its credit with medical facility.

Drinking water—It would be seen from the table that drinking water facility is available in all the inhabited villages of the district of Madhubani.

Post and Telegraph—Postal facilities (post & telegraph) are available only in 326 villages (31.59%) out of a total of 1,032 inhabited villages in the district. Jainagar block has the maximum number of villages having post and telegraph facility (52.38%) followed by Ladania (46.43%) and Bisfi (44.23%). In the remaining development blocks of the district the proportion varies from a minimum of 20.34 per cent (Madhepur block) to a maximum of 42.42 per cent (Basopatti block).

Market/Hat—The villages where market/*hat* is held constitute only 13.66 per cent of total number of inhabited villages in the district. Ladania block again has the maximum number of inhabited villages where market/*hat* is held, the percentage being 28.57 followed by Khajauli with 25.53 per cent. As shall be seen from the table, there are 4 development blocks in the district, viz., Laukaha (4.65%), Benipatti (7.37%), Madhepur (7.63%) and Madhubani (8.82%) where market/*hat* facility is available in less than 10 per cent of the villages.

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

Only 19.86 per cent of the total inhabited villages in the district are connected by one means of communications or the other. The majority of villages still do not have this facility. A development blockwise breakup of villages having any means of communication is given in the table at page 20. Harlakhi block has the highest proportion of villages (44.19%) which are connected by bus or rail or navigable river/canal services, etc., followed by Rajnagar block with 33.33 per cent of villages having one means of communication or the other. Jhanjharpur and Madhepur blocks have the least number of villages having communication facility, the percentage being 6.38 and 9.32 respectively. It appears that villages falling under these two blocks are still undeveloped on this account.

Approach road to village—With only 26·65 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Harlakhi with 48·84 per cent villages having *pucca* approach road again tops the list followed by Madhubani and Pandaul with 41.18 and 40·43 per cent respectively. As had been observed in the previous table Harlakhi block has better communication facility also which probably might also be due to better *pucca* approach road facility in the block. The development blocks which have considerably low number of villages with this facility are Laukahi (12·70%), Madhepur (15·25%) and Basopatti (18·18%).

Power supply—Electrified villages in the district constitute 30·14 per cent of the total inhabited villages. Power supply in these villages is utilised for either domestic or agriculture or other purposes such as commercial or industrial and in certain villages for all the above purpose.

Khajauli development block occupies the first position having the maximum proportion of electrified villages (61·70%) followed by Pandaul and Benipatti blocks with 50·00 and 48·42 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Madhwapur (10·00%), Ladania (10·71%) and Madhepur (13·56%). It follows, therefore, that pace of electrification in the villages of the above blocks is still not up to the mark.

Proportion of rural population served by various amenities.

While in Table 11 we had discussed details regarding a number of villages possessing educational, medical and other amenities. Table 12 below gives the proportion of rural population served by these amenities ;

Table 12—Proportion of rural population served by different amenities —

Sl. no.	Name of Development Block	Total Population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Madhubani	129,244	93.43	31.18	100.00	60.94	24.00	44.49	58.30	38.98
2	Bisfi	160,120	98.14	27.50	100.00	69.19	37.15	32.81	34.29	16.47
3	Benipatti	194,367	82.50	25.99	100.00	62.22	14.80	27.66	35.21	67.04
4	Madhwapur	72,325	96.19	43.26	100.00	56.97	28.44	36.61	29.45	11.74
5	Harlakhi	97,605	97.47	32.75	100.00	61.66	26.07	60.47	60.93	41.55
6	Basopatti	89,907	99.90	36.95	100.00	70.12	39.10	31.91	26.71	61.20
7	Khajauli	144,357	98.17	48.73	100.00	59.72	52.43	37.63	37.49	66.83
8	Jainagar	88,178	98.77	64.02	100.00	79.31	33.22	39.95	48.71	61.31
9	Ladania	84,747	100.00	42.67	100.00	73.20	48.96	29.33	35.96	20.54
10	Babu Barhi	113,060	96.00	39.49	100.00	67.83	22.81	27.24	27.03	38.51
11	Rajnagar	138,514	92.72	46.22	100.00	66.18	30.30	54.92	47.95	54.12
12	Pandaul	151,024	94.13	55.34	100.00	67.42	35.75	53.35	64.64	76.00
13	Jhanjharpur	74,923	96.93	36.85	100.00	52.68	24.56	18.45	59.72	57.21
14	Andhratharhi	96,103	92.23	24.01	100.00	53.32	28.68	30.39	41.96	50.73
15	Laukaha	103,535	95.67	98.91	100.00	54.94	25.51	42.70	42.70	47.93
16	Laukahi	101,967	92.62	30.67	100.00	45.46	39.89	22.50	22.19	40.53
17	Phulparas	205,745	97.52	29.10	100.00	62.22	29.02	37.93	43.49	45.16
18	Madhepur	207,720	92.41	23.54	100.00	48.23	18.02	27.85	34.51	30.92
	Total	**2,253,441**	**94.65**	**39.04**	**100.00**	**61.48**	**30.13**	**36.65**	**41.64**	**46.69**

It would be seen that educational facility is available to 94·65 per cent of the rural population in the district. As has been observed in Table 11 also in Ladania block cent per cent of the rural population is served by the educational facility closely followed by Basopatti block with 99·90 per cent. Only Benipatti block in the district is such where the proportion of rural population served by the facility of education is less than 90 per cent. Another noteworthy point is that the proportion of villages in the district enjoying educational facility is less being 82·56 per cent (as had been observed in Table 11) than the proportion of population which is as high as 94·65 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 39·04 per cent which is much more than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table indicates the number of those villages which do not contain different amenities arranged

by broad distance ranges (less than 5 kms., 5—10 kms. and 10+kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Villages not having the amenity of—	Number of villages where the amenity is not available and available at a distance of—			
	—5 kms.	5—10 kms.	10+ kms.	Total (cols. 2—4)
1	2	3	4	5
1. Education	179	1	...	180
2. Medical	626	178	7	811
3. Drinking water	...	...	...	...
4. Post and Telegraph.	661	45	...	706
5. Market/*hat*	632	257	2	891
6. Communication	542	248	37	827

As regards educational facility it would be seen that there are 180 villages out of 1,032 inhabited villages (17.44%) in the district which do not have educational facility but the facility is available at places situated within 5 kms., 5—10 kms. and also beyond 10 kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 kms. is 179 (17.34%) and that of villages having such facilities within a distance of 5—10 kms. is only 1 (0·10%). There are no villages having such facilities at a distance of more than 10 kms. The number of villages having other facilities within a distance of 5—10 kms. and 10+kms., is less than those having the facilities within 5 kms., though not in the same proportion. It follows, therefore, that for various facilities people belonging to majority of villages do not have to travel for more than 10 kms.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five size-groups.

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	58	48(82.76)	13(22.41)	58(100.00)	20(34.48)	4 (6.90)	18(31.03)	19 (32.76)	24(41.38)
6—15	367	304(82.83)	70(19.07)	367(100.00)	119(32.43)	66(17.98)	80(21.80)	122(33.24)	134(36.51)
16—50	590	485(82.20)	133(22.54)	590(100.00)	182(30.85)	68(11.53)	105(17.80)	132(22.37)	151(25.59)
51+	17	15(88.24)	5(29.41)	17(100.00)	5(29.41)	3(17.65)	2(11.76)	2(11.76)	2(11.76)
Unspecified	...	...	...	...	...	...	...	...	...
Total	**1,032**	**852(82.56)**	**221(21.41)**	**1,032(100.00)**	**326(31.59)**	**141(13.66)**	**205(19.86)**	**275(26.65)**	**311(30.14)**

It would appear from the above table that the maximum number of inhabited villages lie in the distance range of 16—50 kms. (57.17%) from the nearest town. There are only 58 villages accounting for 5·62 per cent which lie in the distance range of 0—5 kms., from the nearest town. With only 3 urban centres in the district and the position of the bordering districts being almost similar such a situation is but natural.

In case of educational and medical facilities, the proportion of villages is observed to be the highest in the distance group of 51+kms., from the nearest town whereas for post & telegraph,

communication and power supply the situation is just the reverse having maximum proportion of villages in the distance range of 0—5 kms., from the nearest town.

Interestingly, it can be seen from the table that in the case of the facilities of post and telegraph, communication, approach by *pucca* road and power supply the proportion of villages decreases with the increase in the distance range from the nearest town (except in the case of approach by *pucca* road in that there is marginal increase in the distance range of 6—15 kms.). It may be concluded that the villages which are nearer to the urban areas have benefited in respect of facilities of post & telegraph, communication, *pucca* approach road and power supply vis-a-vis these rural pockets which are beyond the pale of direct urban influence.

In the case of market/*hat* facility no particular trend emerges. Drinking water facility is available in all the villages in the district as already explained in the earlier paragraph.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges.

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communi-cation	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
— 499	176	71(40.34)	9 (5.11)	176(100.00)	10 (5.68)	6 (3.41)	9 (5.11)	21(11.93)	20(11.36)
500—1,999	470	407(86.60)	62(13.19)	470(100.00)	53(11.28)	23(4.89)	58(12.34)	89(18.94)	102(21.70)
2,000—4,999	282	272(96.45)	90(31.91)	282(100.00)	166(58.87)	57(20.21)	81(28.72)	106(37.59)	124(43.97)
5,000+	104	102(98.08)	60(57.69)	104(100.00	97(93.27)	55(52.88)	57(54.81)	59(56.73)	65(62.50)
Total	**1,032**	**852(82.56)**	**221(21.41)**	**1,032(100.00)**	**326(31.59)**	**141(13.66)**	**205(19.86)**	**275(26.65)**	**311(30.14)**

It can be seen from the table that the maximum number of villages, i.e., 470 (45·54%) in the district fall in the population range of 500—1,999 followed by 282 villages (27·33%) in the population range of 2,000—4,999. The lowest number of villages is observed in the population range of 5,000+being 104 (10·08%) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range. Generally, the villages having different amenities have a population range of 5,000+which further corroborates the fact that more facilities are generally available in large villages than in smaller ones.

Main staple food in the villages

The alongside table indicates that rice and wheat constitute the main staple food of the people in majority of villages in all the development blocks of the district.

Table 16—Main staple food in the majority of villages in each development block.

Serial number	Name of the development block	Main staple food
1	2	3
1	Madhubani	Rice, wheat
2	Bisfi	Rice, wheat
3	Benipatti	Rice, wheat
4	Madhwapur	Rice, wheat
5	Harlakhi	Rice, wheat
6	Basopatti	Rice, wheat
7	Khajauli	Rice, wheat
8	Jainagar	Rice, wheat
9	Ladania	Rice, wheat
10	Babu Barhi	Rice, wheat
11	Rajnagar	Rice, wheat
12	Pandaul	Rice, wheat
13	Jhanjharpur	Rice
14	Andhratharhi	Rice, wheat
15	Laukaha	Rice, wheat
16	Laukahi	Rice, wheat
17	Phulparas	Rice, wheat
18	Madhepur	Rice, wheat

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :-

Table 17—Distribution of villages according to land use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Madhubani	68	14,874.38	82.40	7.17
2	Bisfi	52	17,987.63	83.22	21.88
3	Benipatti	95	25,992.67	84.22	16.43
4	Madhwapur	40	10,569.23	81.72	27.07
5	Harlakhi	43	14,695.53	74.52	50.98
6	Basopatti	33	13,036.60	82.90	26.14
7	Khajauli	47	20,235.62	81.50	11.72
8	Jainagar	21	12,767.25	84.73	32.57
9	Ladania	28	18,385.04	88.99	9.97
10	Babu Barhi	59	18,769.46	90.37	13.33
11	Rajnagar	63	17,868.04	75.01	21.59
12	Pandaul	64	16,147.98	82.15	18.36
13	Jhanjharpur	47	10,564.58	83.13	18.90
14	Andhratharhi	46	14,750.59	92.20	12.42
15	Laukaha	43	21,346.58	76.37	7.01
16	Laukahi	63	26,568.73	78.84	9.12
17	Phulparas	102	34,596.19	79.35	3.57
18	Madhepur	118	34,823.68	77.67	1.81
	Total	**1,032**	**343,979.78**	**81.67**	**14.61**

It would be seen from the table that 81.67 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this only 14.61 per cent is irrigated. The area under irrigation is quite low mainly because the canal systems in the district are dependent upon rain-fed rivers for the supply of water and if the rains fail the canals also do not have water. The same applies to tanks, *chaurs* (vast shallow tanks).

Among the C. D. Blocks, the highest proportion of cultivable area is found in Andhratharhi block with 92.20 per cent closely followed by Babu Barhi and Ladania blocks with 90.37 and 88.99 per cent respectively. The lowest cultivable area is found in Harlakhi block with 74.52 per cent followed by Rajnagar block (75.01%).

The highest proportion of irrigated area to the total cultivable area is found to be in Harlakhi block with 50.98 per cent followed by Jainagar and Madhwapur blocks with 32.57 and 27.07 per cent respectively. In Madhepur and Phulparas blocks, the proportion of irrigated area to total cultivable area is found to be the least being 1·81 and 3·57 per cent respectively. It follows, therefore, that though there is considerable potentiality for cultivation in the district the irrigated area is much less which may be attributed to the fact that in a year of drought, when irrigation is most wanted, there is a scanty supply of water in the tanks and streams. Even the canal systems are rain-fed and when the rains fail, the canal can, at best, reach succour to only very limited areas.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to state.

Table 18—Growth, density and sex-ratio of urban population in the district in relation to the State.

	District						State					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (no. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (no. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,361,699	30,294	2.22	+23.10	4,034	878	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,601,048	36,133	2.26	+19.27	3,383	884	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,892,039	42,836	2.26	+18.55	10,525	822	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	2,325,844	72,403	3.11	+69.02	4,385	862	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district is 72,403 comprising 3·11 per cent of the district population. The corresponding percentage for the State is 12·47. The urban population of the district has remained rather constant till 1971 Census. There has, however been a very little rise during the 1981 Census from 2·26 in 1971 to 3·11 in 1981 Census as shall be evident from column 4 of the table. From column 5 of the table it is clear that the growth of urban population had been considerably low and had shown a downward trend till the 1971 Census. However, during the decade 1971—81 the growth rate has been very high as compared to previous decades and shot up to 69·03 per cent probably on account of expansion of old towns and also emergence of a new town, viz., Jhanjharpur (NAC). The trend of the growth of urban population in the State has been quite different. During the decade 1951—61 the urban population growth was of the order of 49·03 per cent whereas during 1961—71 it dipped to 43·95 per cent. Again during 1971—81 it has registered an increase of 54·76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade in the State as a whole. Similar trend has been observed in the case of Madhubani district.

The density of population in the urban areas of the district has always remained high as shall be evident from column 6 of the table. Except in 1971 Census when the density had abnormally risen to 10,525 (persons per sq. km.) the density has varied between 3,383 in 1,961 and 4,385 in 1981 Census. It follows, therefore, that the towns of the district are gradually becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of the urban population of the State, on the other hand, had not shown a similar rise till the 1971 Census. In 1981 Census, the density of the urban population of the State had shown a considerable increase having risen from 2,032 in 1971 to 2,727 but it was still much lower than that of Madhubani which stood at 4,385 persons per sq. km. in 1981.

Sex-ratio is determined by the number of females per 1,000 males. The sex-ratio for the urban areas of Madhubani district has all along been higher as compared to the urban areas of the State but has always been adverse for females. The urban areas, in fact, still suffer from a shortage of females as the towns attract mainly the male population by way of employment opportunities. The female

population continues to live in the villages because the people having agriculture as the main occupation and their moorings in villages do not migrate as a complete family unity. Higher cost of living in urban areas is another factor that discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There are 3 towns, viz., Madhubani (M), Jainagar (NAC) and Jhanjharpur (NAC) in the district of Madhubani. In 1981 Census only Jhanjharpur town with a population of 15,303 has been added in the district as indicated in Table 19.

Table 19—New town/towns declassified in 1981 Census.

Name of towns	Population 1981 Census
1	2
(a) *Added*—	
Jhanjharpur	15,303
(b) *Declassified*—	
Nil	

No town has been declassified in the present Census.

Receipt and expenditure in different towns

The table below gives the details of finances in the urban local bodies in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in town.

	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
Class, name and Civic status of the town	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniances	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV. Jainagar (NAC)	27.15	8.26	18.89	27.83	4.83	10.37	8.21	...	4.42
IV. Jhanjharpur (NAC)	...	...	...	...	...	...	...	...	...
III. Madhubani (M)	24.15	4.71	19.44	22.60	2.85	15.85	0.92	...	2.98
Total	**19.54**	**4.30**	**15.24**	**18.69**	**2.57**	**11.60**	**1.93**	...	**2.59**

It would be apparent from the above figures that the per capita total receipt is the highest in case of Jainagar (NAC). Going further in detail one can see that while receipt through taxes is the maximum in the case of Jainagar, receipt from all other sources is the highest in the case of Madhubani town.

Per capita total expenditure is again the highest in the case of Jainagar (NAC). Except expenditure on public health and conveniences where Madhubani (M) tops the list, on all other counts Jainagar (NAC) is in the forefront.

Jhanjharpur (NAC) has not maintained its accounts probably because it was notified as a statutory town only recently.

Schools per ten thousand population in towns

Primary and middle school facilities are generally available in all towns. The following table gives details of different categories of educational institutions per ten thousand population in different towns of the district :

Table 21—Schools per ten thousand population in towns.

	Number per ten thousand population			
Class, name and civic status of the town	Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV. Jainagar (NAC)	...	1.67	0.84	10.04
IV. Jhanjharpur (NAC)	...	1.96	1.31	5.23
III. Madhubani (M)	...	0.66	0.89	5.98
Total	...	**1.10**	**0.97**	**6.49**

It would be seen from the table that institutions such as Higher secondary/Inter/PUC/Junior college do not exist in any of the towns of the district. As regards secondary/matriculation level schools, there are, on an average, 1·96 schools per ten thousand population located in Jhanjharpur (NAC) which is the highest. The number of Junior Secondary/Middle schools is also the maximum in the case of Jhanjharpur town. Jainagar (NAC) has however, the highest number of primary schools in the district with an average of 10·04 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 6·49 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding the availability of beds in the medical institutions in different towns of the district.

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
IV. Jainagar (NAC)	1.00
IV. Jhanjharpur (NAC)	...
III. Madhubani (M)	1·44
Total	**1·06**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 1·06. The availability of beds in the hospital is the highest in case of Madhubani town, the district headquarters (1·44). Jhanjharpur town, on the other hand, does not have this facility at all probably because it had become a statutory town only recently.

Proportion of slum population in towns

The details of slums have been collected only in case of Class I and Class II towns. Relevant information was collected through local officials of the Municipalities, NACs as also through the Town Planning Department in 1979. Since none of the towns of Madhubani fall in Class I (Population 1 lakh and above) or Class II (50,000—99,999) range the information regarding slums has not been collected in respect of these towns. Table 23 has, therefore, not been presented.

Important commodities imported, exported and manufactured

The table below presents the most important commodities manufactured, exported and imported in the 3 towns of Madhubani district.

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV. Jainagar (NAC)	Aluminium utensils	Rice	Potato
IV. Jhanjharpur (NAC)	Handloom cloth	Rice	Edible oil
III. Madhubani (M)	Khadi cloth	Makhana	Wheat

Jainagar and Jhanjharpur towns having rice producing areas as their hinterland export rice to other places in the state.

Madhubani town manufactures Khadi cloth, which is the most important commodity produced there.

One notable feature is that the most important commodity manufactured and the most important commodity exported are not the same in the three towns of Madhubani district.

VD—denotes Village Directory.

PCA—denotes Primary Census Abstract.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdiction Lists of the State Government, those treated as outgrowths of towns or urban agglomerations and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz. '(—5 Kms.)', '(5—10 Kms.)' and '(10+ Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as the most modest educational amenity.

In column 6 of the Village Directory format, composit schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column. 10) and

whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area shown.
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abandoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in Cols. 15 to 19 have been presented in hectares upto two places of

the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column 5—Educational*

- P ... Primary or Elementary School (upto class IV)
- M ... Middle or Junior Secondary School (upto class VIII)
- H ... Matriculation or Secondary School (upto class X)
- PUC ... Higher Secondary, Intermediate, Pre-University, Junior College.
- C ... College
- I ... Industrial School
- Tr ... Training School
- Ac ... Adult Literacy Class/Centre
- O ... Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.

(ii) *Column 6—Medical*

- H ... Hospital
- MCW ... Maternity and Child Welfare Centre.
- MH ... Maternity Home
- CWC ... Child Welfare Centre
- HC ... Health Centre
- PHC ... Primary Health Centre
- PHS ... Primary Health Sub-centre
- D ... Dispensary
- FPC ... Family Planning Centre
- TB ... T. B. clinic
- NH ... Nursing Home
- RP ... Registered Private Practitioner
- SMP ... Subsidised Medical Practitioner
- CHW ... Community Health Worker
- O ... Others

(iii) *Column 7—Drinking Water*

- T ... Tap Water
- W ... Well Water
- Tk ... Tank Water
- TW ... Tube-well Water
- Hp ... Handpump
- R ... River Water
- F ... Fountain
- C ... Canal
- L ... Lake
- S ... Spring
- N ... *Nullah/Nala/Nallah*
- O ... Others
- NA ... Information Not Available

(iv) *Column 8—Post and Telegraph*

- PO ... Post Office
- TO ... Telegraph Office
- PTO ... Post and Telegraph Office
- Phone ... Telephone connection.

(v) *Column 10—Communications*

- BS ... Bus
- RS ... Railway Station
- NW ... Navigable Waterway (including river, canal, backwaters, etc.)

(vi) *Column 11—Approach to Village*

- PR ... *Pucca* Road
- KR ... *Kutcha* Road
- NR ... Navigable River
- NC ... Navigable Canal
- NW ... Navigable Waterway (other than river or canal)
- FP ... Foot Path

(vii) *Column 13—Power Supply*

- ED ... Electricity for Domestic purpose
- EAg ... Electricity for Agriculture purpose

EO ... Electricity for Other purposes like industrial, commercial, etc.
EA ... Electricity for All purposes listed above.

(viii) *Column 16—Irrigated by source*

GC ... Government Canal
PC ... Private Canal
W ... Well (without electricity)
WE ... Well (with electricity)
TW ... Tube-well (without electricity)
TWE ... Tube-well (with electricity)
Tk ... Tank
R ... River
L ... Lake
Wf ... Waterfall
O ... Others

(ix) *Column 20—Remarks*

N ... Copies of Newspapers coming in the village.
M ... Motor Cycles/Scooters available in the village.
C ... Cars/Jeeps available in the village
T ... Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions /amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Madhubani district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Schedules Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0-5, 6-10, 11-15, 16-20, 21-30 and 31 and above.

For the Scheduled Tribes (Part B) : 0-5, 6-15, 16-25, 26-35, 36-50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—MADHUBANI

VILLAGE AMENITIES AND

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+ kms., of the nearest place where the facility is available is given].

2. Development Blocks Jainagar, Babu Barhi, Rajnagar and Jhanjharpur contain no Scheduled Tribes population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (I) Status and growth history; (II) Physical aspects and location of towns, 1979; (III) Municipal finance, 1978-79; (IV) Civic and other amenities in towns; (IV/A) Civic and other amenities in Notified Slums; (V) Medical, educational, recreational and cultural activities and (VI) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix to the Town Directory. Since in the district of Madhubani there is no outgrowth in any of its town, this appendix has not been prepared.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census town (non-municipal towns) have been included as an Appendix II to the Village Directory as explained in the Village Directory section of this volume.

The details of the data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex-ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C.B.	...	Cantonment Board/Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year, 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town the available civic amenities in 1979. Since in this district there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000--99,999) town, Statement IV-A relating to the slums does not find place in the present volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The

information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H (Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D (Hom)	...	Dispensary (Homeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories—Arts,Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK

PART B

Urban Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and up to ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of village, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (cricle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their Location Code Numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
