PREFACE

District Census Handbooks are being regularly brought out by the Census Organisation on behalf of the State Government since 1951 Census. District Census Handbooks contain important and basic statistics relating to the districts in the State. The most important part of the Handbooks relates to the village-wise and urban block-wise Primary Census data–data at the micro level which is utilised in almost every field of administration and planning. Immediately on the completion of Census the administrative authorities, private agencies and academic institutions, in fact most data users are anxious to have the latest figures made available to them so that they are able to assess and pursue their activities in a more purposeful manner.

In order to make the necessary data available early to the Census data users, a major change has been made in publication programme of the District Census Handbooks of 1971 Census. Instead of incorporating all the information and statistics of a particular District in a single volume the same has been divided into three parts—'A', 'B' and 'C'—so that parts 'A' and 'B', containing (i) Village Directory and Town Directory (only Village Directory in this case because Lahul & Spiti District is completely rural) and (ii) Village-wise and Town-wise Primary Census Abstracts, (only Village-wise Primary Census Abstract because Lahul & Spiti District is completely rural) could be released early without waiting for the compilation of data to be included in part 'C'. Originally the programme was to bring out all the parts 'A', 'B' and 'C' independently, as soon as compilations for a particular part were completed. Since the data for Parts 'A' and 'B' was compiled simultaneously, it was decided to combine these parts in one volume, which I feel, will be more convenient to data users to consult as the volume contains primary statistics relating to the district at one place. The present volume consists of Parts 'A' and 'B' of the District Census Handbook of Lahul & Spiti. It is proposed to bring out Part 'C' of this publication, as also for other Districts independently later, because at present the administrative information has just started pouring in from the various Government Departments and Organizations. It will take some more time to put together these facts and figures into proper shape, for the Part 'C' volume.

As a result of re-organisation of the State of Punjab in 1966, 4 districts namely Kangra, Kulu, Simla and Lahul & Spiti were carved out from Punjab and included in the State of Himachal Pradesh raising the number of districts to ten. Lahul & Spiti is one of the four new districts in the present Census.

Lahul & Spiti District marks the country's boundary with Tibet in the North East of Himachal Pradesh. Ladakh district of Jammu and Kashmir adjoins this district, in the North and Chamba in the North-West. It is further bounded by Kulu and Kangra Districts in the West and Kinnaur in the South and South-East Villages in this part of the State are few and far between because the sturdy Tribals have made habitations only at selected spots which are comparatively hospitable in the all-round uninviting wilderness of lofty, bare and rugged mountains. In terms of area this district ranks first but in terms of density of population it occupies the lowest position with only 2 persons per Square Kilometer, amongst the ten districts of the State. The District derives its name from the two Tahsils of Lahul and Spiti of which it is comprised. Road communication with the outside world is possible only during summer months through the Rohtang Pass which rises to a height of 3978 metres above sea level. Similarly the two Tahsils are separated from each other by the colossal Kunzam range and the Jeepable Kutcha road connecting them passes through the Kunzam Pass (Height 4,547 metres above sea level). Spiti Tahsil is accessible to the outside world through Kinnaur also and this route is comparatively easier though its last lap is fit for ponies only. The District is an Artist's paradise – the views of bolossal mountain ranges are breath-taking.

To be cheerful seems to be a habit of the inhabitants of this region and one feels wonder-struck at the firmness of their resolve to grapple with the forces of nature for extraction of their livelihood. I am

sure, this volume will answer some of the basic and most pertinent statistical querries of sociologists, demographers and other social scientists.

I feel highly indebted to Shri A. Chandra Sekhar, Registrar General, India, for the personal considerations and guidance that I received from him consistantly. I owe my thanks to Dr. B. K. Roy Burman, Deputy Registrar General, India, who always solved my numerous problems, which I feel, required a good deal of patience.

SIMLA
15th March, 1973

ATTAR SINGH
Director of Census Operations,
Himachal Pradesh.

ACKNOWLEDGEMENT OF ASSISTANCE

GENERAL SUPERVISION

1. Shri C. D. Bhatt	Assistant Director of Census Operations

PART X—A

TOWN AND VILLAGE DIRECTORY

EXPLANATORY NOTE—PART A

1. History of the District Census Handbook

The District Census Handbook was an innovation of the 1951 Census. Prior to 1951 Census, the Census Reports and Publications threw up the data upto Tahsil/Sub-Tahsil, Town and District levels. Statistics for smaller territorial units than these were not published in any census publication. With the rapid development and socio-economic changes in the society, necessity of data for administrative unit at the lowest level was felt considerably by the Government and other organisations as well as the agencies using census statistics. With a view to removing this shortcoming, selected census statistics upto village level were incorporated in the District Census Handbooks of 1951 census.

Then it shall be seen that the 1951 Census Handbooks contained all the important census tables, in respect of a particular District as well as general information relating to Physical Aspects, Geology, Archaeology, Climate, Rainfall, History, Administration Medical and Public Health, Education and Literacy, Agriculture and Co-Operation, Industries, Local Bodies, Places of interest etc. relating to the district.

The District Census Handbooks for 1961 Census underwent complete transformation and attempts were made to make them informative. Information on all the aspects, covered in 1951 Census and an additional items also found place in 1961 District Census Handbooks Each District Census Handbook in 1961 Census was divided into four parts each part containing a specific set of information and statistics, as briefly discussed below :—

Part I Besides containing a narrative pertaining to introduction of the particular district, this part comprised mainly of write-up supported by small tables on topics like Physical Aspects, Population, the People, District Administration, Education, Medical and Public Health, Agriculture, Fisheries, Animal Husbandry, Panchayats, Local Bodies, Co-operative Societies, Banking, Industries, Employment, Service, Communications and Road Development, Land Revenue and Land Tenure, Price Trends and Community Developments, Flora and Fauna etc. In some Handbooks certain reprints of extracts from works of important authorities were also included.

Part II All the Census Tables pertaining to a District were included in this part.

Part III This part of the District Census Handbooks contained the Administrative Statistics on Agriculture, Administration, Medical and Public Health, Local Bodies, Transport and Communications, Livestock, Forests and other Departments.

Part IV This part mainly consisted of the Village Directory, which rendered an account of each Village and Town in the District. The Census information in this part was given under 36 suitable heads. In addition to the Census Statistics in respect of each village and town, information about the level of development and amenities was also collected and incorporated in this part. Amenities like Schools, Places of Worship, Medical Institutions, Roads, Railways, Telegraph and Post Offiees, Electricity etc, if available in a particular village/town were indicated with the help of specific abbreviations.

2. Scope of the District Census Handbooks

It has been the experience of this organization that due to various factors, most of which were beyond its control the publication of some of the 1961 District Census Handbooks was inordinately delayed, which resulted in unnecessary hardship to the data users. The utility of statistics lies in their timely publication. Statistical data published

late lose much of their relevance. With this in view, for the 1971 Census, priorities have been fixed for the publication of the different sets of information. It would be our utmost endeavour to publish the information as soon as the relevant tables and other material are ready. This, it is hoped, would result in the reduction of time-lag that usually occurs in making the information available to the Government and other data users.

The District Census Handbooks pertaining to 1971 Census are being brought out in two independent parts as follows :—

(i) (a) Part A : Town Directory and Village Directory:

The Village Directory gives for each village particulars of amenities available in the matter of Educational and Medical Institutions, Power Supply, Drinking Water Supply, Post and Telegraph Facilities, Communications, Particulars of Land Use, Weekly Markets, Places of Religious, Historical or Archaeological interest in the village.

Lahul & Spiti District is completely rural and therefore the seven statements of Town Directory do not find place in this Hondbook.

(b) Part B : Village-wise Primary Census Abstract :

This part contains the primary census data for each village. The Primary data pertains to Area, Occupied Residential Houses, Number of Households, Total Population and its Sexwise break-up, Sexwise Scheduled Caste and Scheduled Tribe Population, Sexwise Literate Population, Working Population by sex and by nine broad Categories i. e. Cultivators; Agricultural Labourers; those Working in Livestock, Forestry, Fishing, Plantations, etc.; Mining and Quarrying; in Manufacturing; in Construction; in Trade and Commerce; in Transport Storage and Communications; and in Other Services; and the Non-working population also with sexwise break-up.

(ii) Part C : Administrative Statistics and Report :

The administrative statistics in all fields of development pertaining to the District will be the main content of this part. The other census tables relating to the District i. e. General Population Tables, Economic Tables, Social and Cultural Tables, Migration Tables, Establishment Tables, Fertility Tables and Housing Tables, will also be included in this part.

3. Collection of Non-Census Data :

The information for the compilation of Village Directory was collected with the assistance of the Revenue Department of the Government of Himachal Pradesh. The Patwaris were drafted as enumerators and the Kanungos were deputed to supervise this work, under the overall control of the Tahsildar/Naib-Tahsildar concerned. The data was collected by Patwaris in a Schedule, especially devised for the purpose, strictly in accordance with a set of instructions issued in this behalf. However, later the officials of the Directorate of Census Operations, Himachal Pradesh were sent out in the field, again, with a view to rectifying the shortcomings and reconciling the discrepancies. Thus the information, by and large, pertains to mid 1970. The area figures were based on the 'Lal Kitab' or the Revenue village papers as maintained at the Tahsil/Sub-Tahsil level and the latest available figures were taken into account.

4. Village Directory Concept of Census Village :

In 1961, a Census village was the same as a Revenue village. After reorganisation of Punjab, Haryana and Himachal Pradesh on 1st November, 1966 some areas were transfered from the erstwhile state of Punjab to Himachal Pradesh. Whereas in some of these newly merged Districts/Tahsils etc. the revenue village is comparable in population size and area to the revenue village of the old Districts yet in most of the cases the average revenue village is much bigger in area and population than its counterpart in the old Districts. The difference is so marked that it render comparison of the village-wise statistics an exercise in futility. Therefore smaller rural units were considered as Census Villages in most of the newly merged areas of Himachal Pradesh. Lahul & Spiti is one such District where although a "Kothi" is a revenue village yet a "Village Hamlet" has been considered as a Census Village. Sub-Hadbast numbers (i. e. the revenue numbers) of the

various village hamlets or the census villages, were available for Spiti Tahsil. In case of Lahul Tahsil no such sub-hadbast numbers were available and therefore only Hadbast numbers of the "Kothis" have been incorporated in the Village Directory with suitable sub-numbers added by us. It may be relevant to detail here areawise, the names of the Smallest Census Rural Units considered as Census Villages in Himachal Pradesh. This information is given below :—

Name of Smallest Census Rural Unit considered as 'Census Village'	Area where considered
1	2
1. Revenue Village	(i) in the Districts of Chamba, Mandi, Bilaspur, Mahasu, Sirmaur, Kinnaur and Simla.
	(ii) Una Tahsil and Amb Sub-Tahsil of Kangra District.
2. "Tikka" having a distinct Sub-Hadbast Number	Kangra District excepting Una Tahsil and Amb Sub-Tahsil.
3. "Phatti" having a distinct Sub-Hadbast Number	Kulu District.
4. Village Hamlet (with/ without distinct Sub-Hadbast Number)	Lahul & Spiti District.

(ii) Presentation of Data : The village-wise data is displayed in 18 columns. Besides this, Abstracts of the Educational, Medical and Other Institutions and amenities in respect of Tahsils and the Districts have been incorporated in this publication. For according convenience in the identification of Census Villages, lists of villages arranged in alphabetical order showing their census location code numbers and the revenue numbers, have also been added.

(iii) Explanatory Note Regarding the Notations Used in the Village Directory :

Various notations have been used in the presentation of information pertaining to different amenities available in the Census Villages. These notations alongwith the particular amenities for which these stand are given here under :—

Column—4

1. Primary School	Pr. S
2. Junior Secondary or Middle School	Mid. S
3. Secondary or Higher Secondary School	Sec. S

Column—5

1. Hospital	H
2. Maternity and Child Welfare Centre	MCW
3. Health Centre	HC
4. Dispensary	D
5. Family Planning Centre	FC

Column—7

1. Tap Water	T
2. River Water	R
3. Fountain	F
4. *Others	O
5. Information not available	N.A.

Column—8

1. Pucca Road	PR
2. Kutcha Road	KR

Column—9

1. Post Office	PO
2. Telegraph Office	TO
3. Post and Telegraph Office	PTO
4. Telephone	Phone

Column—12

** Others	O

*The category of 'Others' includes Stream, "Kuhal", Nallah.
**The category of 'Others' includes "Kuhal".

5. Brief analysis of data

(a) Distribution of Villages by Area :

The following Table No. 1 shows the distribution of villages by area (in acres).

TABLE No. 1

Distribution of Villages by their Areas

Area (in acres)	Number of Villages
1	2
50 acres or less	122
51-100 acres	65
101-200 acres	28
201-500 acres	3
501-1000 acres	1
1001-2000 acres	...
2001-5000 acres	...
5001 acres and above	...
Total	219

A mere glance on this Table would reveal that Lahul & Spiti is a District where the villages are predominantly small sized. 122 villages out of a total of 219 i.e. about 56% of the villages have an area of 50 acres or less each. Another 65 villages fall in the size-class 51-100 acres. The comparatively bigger size-classes of 201-500 acres and 501-1000 acres together claim only 4 villages.

(b) Availability of Educational Facilities :

Table No. 2 reproduced hereunder, indicates number of villages in the District, having Educational Amenities upto various levels, by their respective distances from the nearest town.

TABLE No. 2

Distribution of Villages having Educational Amenities by distance from the nearest Town

Distance from the nearest Town	Total No. of Villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 Kms. or less	...	...	...	...	...	...
6 -10 Kms.	...	...	...	...	...	...
11—15 Kms.	...	...	...	...	...	...
16—25 Kms.	...	...	...	...	...	...
26—50 Kms.	40	4	1	1	...	...
51—100 Kms.	117	38	5	3	...	...
101—200 Kms.	58	34	5	1	...	...
201 Kms. and above	4	2	...	...	...	...
Total	219	78	11	5	...	...

Perusal of the above Table reveals very interesting situation. Because there is no Urban Area in Lahul & Spiti District, the nearest of the villages, 40 in number are located at distances between 26-50 Kms. from a town. Another 117 villages lie at distances between 51-100 Kms. and 58 villages are located between 101 to 200 Kms. from the nearest town. There are 4 such villages which have a distance of 201 Kms. and above from the nearest town. There being no town in the District itself, Manali town of Kulu District is the nearest town for the villages of Lahul & Spiti District. Another interesting feature of this data is the complete absence of facility of College Education in this District.

Of the 5 High or Higher Secondary Schools, one is

located in a village situated at a distance of 101-200 Kms. from the nearest town, 3 in villages lying at distance between 51 and 100 Kms. from the nearest town and 1 in a village lying between 26-50 Kms. from the nearest town. Of the 11 Middle Schools none is located in the 4 far flung villages. The 78 Primary Schools are almost equitably distributed all over the District.

(c) Availability of Medical Facilities :

Table No. 3 shows Tahsilwise number of Medical Institutions of any kind per 100 Sq. Kms.

TABLE No. 3

Medical facility per 100 Sq. Kms.

Tahsil	Total area* (in Sq. Kms.)	Number of Medical Institutions of any kind per 100 Sq. Kms.
1	2	3
Lahul	38.30	31
Spiti	13.28	90
Total	51.58	47

*Area figures according to Director of Land Records, Himachal Pradesh.

This Table is based on the area figures furnished by the State Director of Land Records which represent the reporting area. The area of the District as on 1st July, 1971, according to the Surveyor General, India is 12,015 Sq. Kms. (Provisional), whereas according to Director of Land Records it is only 51.58 Sq. Kms. Any conclusions made on the basis of the area figures according to the State Director of Land Records, which is the case here, are bound to be erroneous. The actual number of Medical Institutions in the District is only 24. But considering the data from another angle on the basis of the area figures according to Director of Land Records, Himachal Pradesh, there are 90 Medical Institutions in Spiti Tahsil as against 31 in Lahul Tahsil per 100 Sq. Kms. However taking into account the area figures of the Surveyor General the number of Medical Institutions of any kind per 100 Sq. Kms. in Lahul & Spiti works out at only 0.20 which is negligible. Tahsilwise break-up of Surveyor General's area figures is not available.

(d) Electric Power Supply :

Table No. 4, given hereunder, displays number of villages with electric power supply classified according to their distances from the nearest town :—

TABLE No. 4

Distribution of Villages with Electricity and distance from the nearest Town

Distance from the nearest Town	Total No. of Villages	No. of Villages with electric power supply
1	2	3
5 Kms or less	...	...
6—10 Kms.	...	...
11—15 Kms.	...	...
16—25 Kms.	...	...
26—50 Kms.	40	...
51—100 Kms.	117	21
101—200 Kms.	58	...
201 Kms. and above	4	...
Total	219	21

The District of Lahul & Spiti is comprised of remote area bordering Tibet. It would be noticed that only 21 villages out of a total of 219, in this District, all situated at distances of 51 to 100 Kms. from the nearest town, have been provided with the facility of electric power supply. This is obviously a pointer towards the underdeveloped state of this District, in the field of electricity.

(e) Communication :

The following Table No. 5 shows the number of villages according to their distances from the nearest town, connected by Pucca Road, Kutcha Road, and River. Pucca Road and Rail Kutcha Road and Rail, and Others.

TABLE No. 5

Distribution of Villages with different Communication facilities and distance from the nearest Town

Distance from the nearest town	Total No. of villages	Number of Villages connected by					
		Pucca Road	Kutcha Road	Pucca Road and River	Pucca Road and Rail	Kutcha Road and Rail	Others
1	2	3	4	5	6	7	8
5 Kms. or Less	...	...	...	...	...	...	...
6—10 Kms.	...	...	...	...	...	...	...
11—15 Kms.	...	...	...	...	...	...	...
16—25 Kms.	...	...	...	...	...	...	...
26—50 Kms.	40	...	40	...	...	...	...
51—100 Kms.	117	1	98	...	...	...	...
101—200 Kms.	58	...	33	...	...	...	...
201 Kms. and above	4	...	...	...	...	...	...
Total	219	1	171	...	...	...	...

As in other spheres, in the field of communications, also Lahul & Spiti District is very under-developed. Perusal of the above Table would show that none of the villages excepting one, in this District is connected by Pucca Road. The only means of communication are the Kutcha Roads. The four remotest villages do not have even this facility of a Kutcha Road.

(f) Postal Facilities :

Table No. 6 given hereunder shows number of Post Offices per 100 Sq. Kms. in the two Tahsils of this District :—

TABLE No. 6

Number of Post Offices per 100 Sq. Kms.

Name of Tahsil	Total area* (in Sq. Kms.)	No. of Post Offices per 100 Sq. Kms.
1	2	3
Lahul	38.30	29
Spiti	13.28	98
Total	51.58	47

*Area figures according to Director of Land Records, Himachal Pradesh.

As in case of Table No. 3, the figures in this table also do not present the true picture obtaining in the region, because the area figures utilized in these computations do not represent the geographical area and are very very small as compared to the figures according to the Surveyor General, India. The number of Post Offices per 100 Sq. Kms. is 29 in Lahul Tahsil as compared to 98 in Spiti Tahsil. The actual number of villages having Post Offices and Post and Telegraph Offices, respectively, in this District is only 22 and 2, respectively. Thus making computations on the basis of the area figures according to the Surveyor General, India, the number of Post Offices per 100 Sq. Kms in this District works out at only 0.20 which is negligible.

(g) Staple Food :

Staple Food of the inhabitants of Lahul is Barley, Wheat and Rice, whereas that of the inhabitants of Spiti Tahsil is Barley, Wheat and Peas. Barley is however the major crop of the area and therefore, the principle item of food.

(h) Land use Pattern

The land use data has been collected and compiled unde the following heads :

(i) Forests
(ii) Culturable Waste
(iii) Area not available for cultivation

The figures of

(i) Irrigated area
(ii) Un-irrigated area have also been compiled.

The following Table No. 7 shows the land use data in respect of villages according to their distances from the nearest Town.

TABLE No. 7

Percentage of average Cultivable Waste per village to average cultivated land per village by distance from the nearest Town

Distance from the nearest Town	No. of Villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 Kms or less			...	...	...	...
6—10 Kms			...		...	...
11—15 Kms.			...	. .	...	...
16—25 Kms.	. .		...		...	...
26—50 Kms.	40	536	13.40	767	19.18	143.13
51—100 Kms.	117	2,790	23 85	3,237	27.67	116.02
101—200 Kms	58	2,740	47.24	202	3 48	7.37
201 Kms or above	4	176	44.00	. .	...	...
Total	219	6,242	28 50	4,206	19.21	67.40

The above Table reveals that the area of total cultivable waste land is more than the total cultivated land in most of the villages. This is rather a very intriguing aspects and deserves highlighting. Lahul & Spiti is a District of steep mountains, narrow valleys with gushing torrents in deep gorges. There appears, generally to be scarcity of cultivated land in this District. The average cultivated land per village varies between 13 40 acres in the category of villages situated at a distance of 26-50 Kms. from the neareet town and 47.24 acres in those whose distance from the nearest town is 101-200 Kms. Percentage of average cultivable waste per village to average cultivated land per village ranges between 7.37 acres in the villages situated between 101-200 Kms. from the nearest town and 143.13 in those lying at 26-50 Kms. from the nearest town. According to these statistics the total cultivated land in this district is only 6,242 acres against the population of 23,538. No wonder the male working population of the District goes out to other parts of the State for seeking work.

PART X—B

VILLAGEWISE PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE—PRIMARY CENSUS ABSTRACT

1. Introductory :

Basic and important statistics revealed by 1971 Census in respect of primary census units i e., Village in rural areas and Enumerator's Block in urban areas have been presented under 38 columns of Primary Census Abstract.

2. Area figures :

Primary Census Abstract contains the indentification particulars of the Villages/Enumerator's Block and the respective area figures of each unit. The area figures in case of census villages are based on the Revenue Village papers as maintained in the respective Tahsil/Sub-Tahsil Offices, and were collected alongwith the non-census data pertaining to the Village Directory. The latest available figures were taken into account. The total of these area figures of the Tahsils do not tally with the Tahsil-wise and District-wise figures, because the former represent land use area, and do not necessarily include what is called as the "Non-reporting area". Further the figures given in case of district represent the geographical area figures supplied by the Surveyor General, India. The Tahsil-wise total area figures have been supplied by the Director of Land Records, Himachal Pradesh, whereas the area figures for towns have been furnished by the respective Local Bodies. In case of Districts and Tahsils/Sub-Tahsils, area figures for rural areas are derived by subtracting the urban areas from the total area.

3. Occupied Census Houses and Households :

The next item of information pertains to the number of occupied Residential Houses, and the number of Households in Village Enumerator's Block. It may be relevant to give here the definition of the terms 'House' and 'Household' as adopted in Census.

(*i*) *Census House* :- A Census House is a building or a part of a building inhabited or vacant and having a separate main entrance from the road or common courtyard or stair-case etc., used or recognised as a separate unit. It may be used for residential or non-residential purpose or both. If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common stair-case or a common courtyard leading to a main gate, they are considered as seprate Census Houses. If within a large enclosed areas there are separate buildings, then each such building is also considered as a separate House. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance is treated as separate Census House.

(*ii*) *Census Household* :- A Household is a group of persons who commonly live together and would take their meals from common kitchen unless exigencies of work prevented any of them from doing so. A household may be made up of related or unrelated persons.

4. Scheduled Castes and Scheduled Tribes :

Primary Census Abstract is, again, perhaps the only source of information on Scheduled Caste and Scheduled Tribe components of the villagewise/block-wise population. The Castes and Tribes listed as Scheduled Castes/Tribes in Himachal Pradesh under the Government of India, Ministry of Home Affairs, Scheduled Castes and Scheduled Tribes list Modification Order, 1956, constitute the Scheduled population in Census. It may be of interest to note here that, in fact, two different lists were utilised in the different areas of Himachal Pradesh. Such a course was necessitated in view of the merger of certain areas from the erst-while state of Punjab in Himachal Pradesh on 1st November, 1966, when the three states of Punjab, Haryana and Himachal Pradesh were reorganised. The lists pertaining to Punjab were utilised in the newly merged areas whereas the lists pertaining to Himachal Pradesh were utilised in the old areas of the State. These lists are given hereunder :-

LIST-I

List of Scheduled Castes and Scheduled Tribes for the District of (1) Chamba (excluding the towns of Dalhousie (M. C.), Dalhousie (C. B.) and Bakloh (C.B.) (2) Mandi (3) Bilaspur (4) Mahasu (5) Sirmaur and (6) Kinnaur.

SCHEDULED CASTES

1. Addharmi.
2. Badhi or Nagalu.
3. Bandhela.
4. Balmiki, Chura or Bhangi.
5. Bangali.
6. Banjara.
7. Bansi.
8. Barad.
9. Barar
10. Batwal.
11. Bawaria.
12. Bazigar
13. Bhanjra.
14. Chamar, Mochi, Ramdasi, Ravidasi or Ramdasia.
15. Chanal.
16. Chhimbe.
17. Chuhre.
18. Dagi.
19. Daole.
20. Darai or Daryai.
21. Daule.
22. Dhaki or Toori.
23. Dhaogri or Dhuai.
24. Doom or Doomna.
25. Dumne.
26. Hali.
27. Hesi.
28. Jogi.
29. Julahe.
30. Kabirpanthi, Julaha or Keer.
31. Kamoh or Dagoli.
32. Karoack.
33. Khatik.
34. Koli
35. Lohar
36. Mazhabi.
37. Megh.
38. Nat.
39. Od.
40. Pasi.
41. Phrera.
42. Rehar.
43. Rehara.
44. Sansi.
45. Sapela.
46. Sarde, Sarare or Siryare.
47. Sarehde.
48. Sikligar.
49. Sipi.
50. Sirkiband.
51. Teli.
52. Thathiar or Thathera.

SCHEDULED TRIBES

1. Gaddi.
2. Gujjar.
3. Jad, Lamba, Khampa and Bhot or Bodh.
4. Kanaura or Kinnara.
5. Lahaula.
6. Pangwala.

LIST-2

List of Scheduled Castes for the District of (1) Kangra (2) Kulu (3) Lahul & Spiti (4) Simla and (5) Towns of Dalhousie (M. C.), Dalhousie (C. B.) and Bakloh (C. B.) of Chamba District.

1. Ad-dharmi.
2. Balmiki, Chura or Bhangi.
3. Bangali.
4. Barar, Burar or Berar.
5. Batwal.
6. Bauria or Bawaria.
7. Bazigar.
8. Bhanjra.
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi.
10. Channal.
11. Dagi.
12. Dhanak.
13. Dumna, Mahasha or Doom.
14. Gagra
15. Gandhila or Gandil, Gandola.

16 Kabirpanthi or Julaha.
17. Khatik.
18 Kori or Koli.
19. Mariya or Marecha.
20. Mazhabi.
21. Megh.
22. Nat
23. Od.
24. Pasi.
25. Perna.
26 Pherera.
27. Sanhai.
28. Sanhal
29 Sansi, Bhedkut or Manesh.
30. Sapela.
31. Sarera.
32 Sikligar.
33 Sirkiband.
34. Darain
35. Dhogri, Dhangri or Siggi and
36 Sansoi.

List of Scheduled Tribes for Lahul and Spiti District only

1 Bhot or Bodh.
2. Gaddi and
3 Swangla.

Note - There are no Scheduled Tribes in Kangra District, Kulu District, Simla District and Towns of Dalhousie (M. C), Dalhousie (C. B) and Bakloh (C B) of Chamba District.

5 Literate and Educated Persons :

A person who can both read and write with understanding in any language is considered as literate. A person who can merely read but can not write is not taken literate It is not, however, necessary that a person who is literate should have had received any formal education or should have had passed any minimum educational standard.

6 Workers :

In 1971 Census a person whose main activity is participation in any economically productive work by his physical or mental activity is treated as a worker. Main activity is the one in which one engages oneself mostly. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business If a person has participated in any such regular work on any one of the days during this reference period and that work is returned as his main activity the person is categorised accordingly. Further, the main activity in case of seasonal work such as Cultivation, Livestock keeping etc, is ascertained with reference to such work in the preceding one year. Total population having been divided into the two groups of "Workers" and "Non-Workers", the Workers have further been classified by 9 broad categories according to their main activities. The 9 categories are briefly described hereunder :

I. *Cultivator* - For the purposes of the Census a person is considered as a cultivator if he or she is engaged in cultivation by his or herself or by supervision or direction in his or her capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as Wheat, Paddy, Jowar, Bajra, Ragi etc, and Pulses, Raw Jute and Kindred fibre Crop, Cotton etc, and other crops such as Sugarcane, Groundnuts, Tapioca etc. and does not include Fruit Growing, Vegetable Growing or keeping Orchards or Groves or working of Plantation like Tea, Coffee, Rubber, Cinchona and other medicinal plants.

II. *Agricultural Lobourer :-* A person who works in another person's land for wages in money, kind or share is regarded as an Agricultural Labourer. Such a person has no risk in the cultivation but he merely works in another person's land for wages. The labourer can have no right of lease or contract on land on which he works.

III. *Livestock, Forestry, Fishing, Hunting and Plantation Orchard and Allied Activities :-* Those engaged in Livestock production Agricultural, services, Hunting, Trapping and game propagation, Forestry

and Logging, Fishing, Plantations, Orchards etc, are included in this category.

IV. *Mining and Quarrying* :- This category includes all those who are working in only Mining or Quarrying activities.

V. *Manufacturing, Processing, Servicing and Repairs* - This category has two sub-categories, as below :-

(a) Household Industry :- A household Industry is defined as an industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory. Further, according to the census concept a Household Industry relates to production, processing, servicing, repairing or making and selling of goods.

(b) Other than Household Industry :- This sub-category includes Manufacturing, Processing, Servicing and Repairs, other than Household Industry as described above.

VI. *Construction* :- Those engaged in any type of construction and allied activities are included in this category.

VII. *Trade and Commerce* :- This category includes all those persons who are engaged in wholesale or retail trade in any goods. Those working in Restaurants and Hotels, Banking, Financing, Insurance, Real Estate and Business services are also classified under this category.

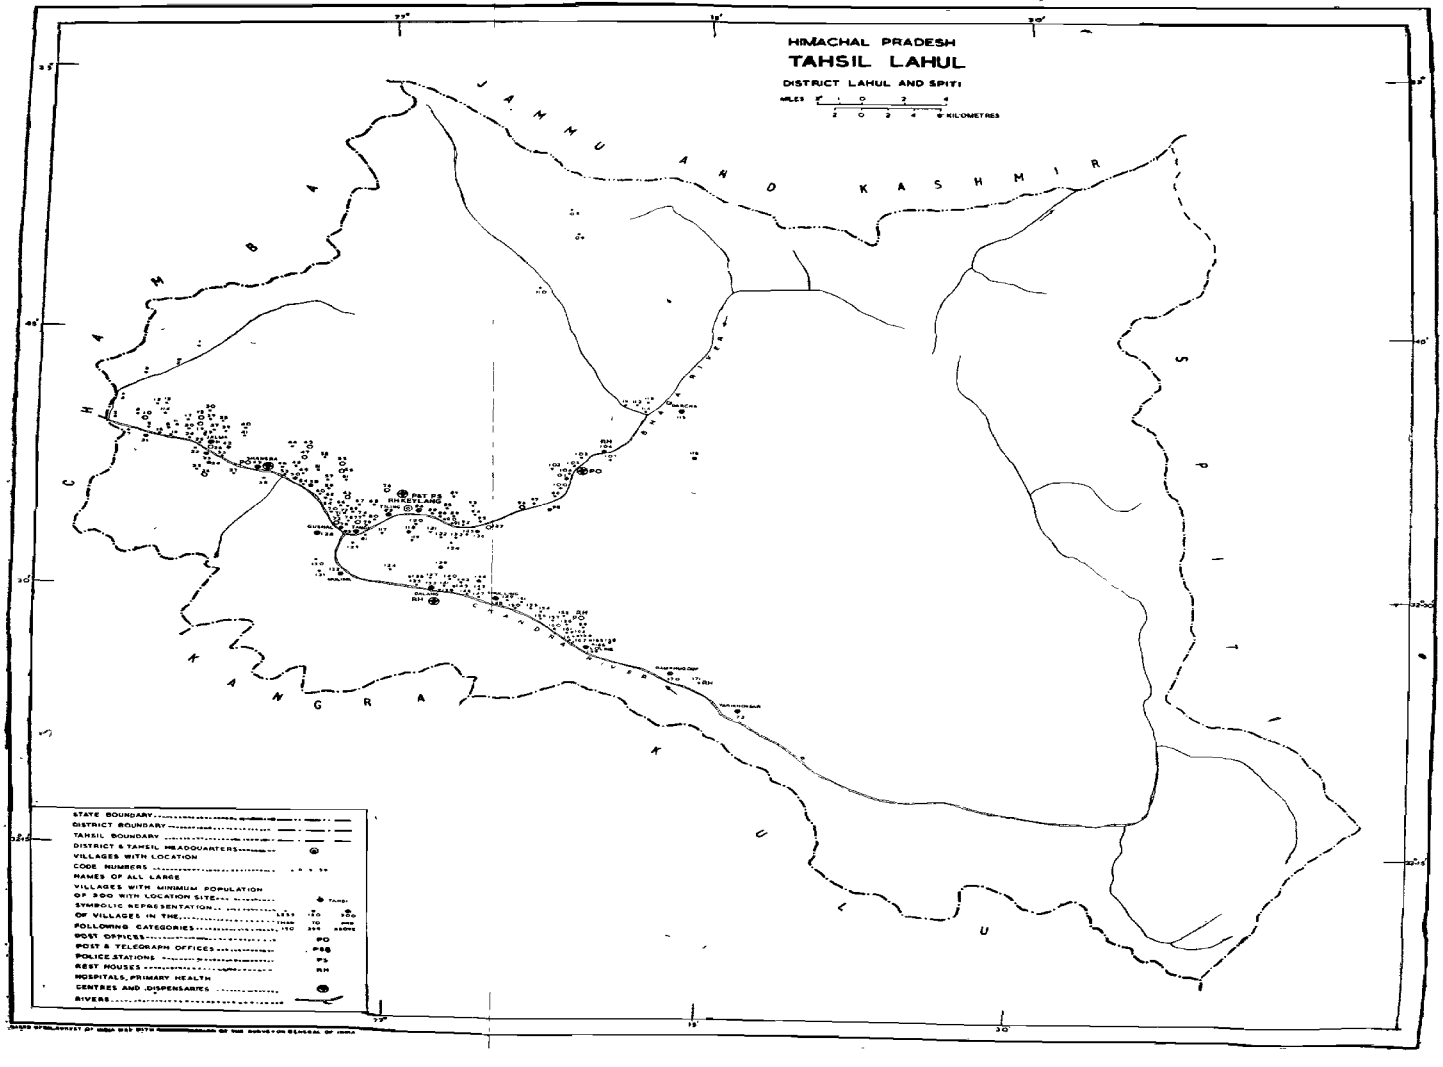

VIII. *Transport, Storage and Communications* :- This category includes Land, Water and Air transport. All activities connected with storage and warehousing and Communications like Postal, Telegraphy and Telephone etc, are also included in this category.

IX *Other Services* :- Those engaged in Community, Social and Personal Services, including Public Administration, Medical and Health Services, Recreational and Cultural Services, Community Services are included in this category. Persons who happen not to adequately described their activities or those whose services are not classified elsewhere also form part of this category of workers.

Non-Workers :- This group consists of those persons whose main activity is returned as one of the following :

(i) Household Duties.
(ii) Students
(iii) Retired Persons or rentiers.
(iv) Dependents.
(v) Beggars etc.
(vi) Institutions inmates of.
(vii) Other Non-Workers (Those seeking work).
