MOTIF

The brick-built ancient temple (c 700 A.D.) at Kalayat (District Jind) is a fine specimen of architectural beauty. Local tradition traces the name Kalayat to a possible Sanskrit word Kapilayatana meaning the house of Kapil Muni. It may be identified with the Kapilatirtha of the Mahabharata. It is believed that king Shalivahana built five temples here, two of which are still existing and of the remaining three, only some remains are left.

Out of the surviving two temples, one has been accepted as motif. This temple is fairly well preserved and carries intricate floral design worked out in uniform patterns in-baked bricks. The form suggests that this brick temple followed the Bhitargaon temple in Uttar Pradesh which goes back to about 4th-5th century A. D. It is a challenge to modern architecture that old monuments can withstand the rigours of time for so long.

CENSUS OF INDIA—1981

A—CENTRAL GOVERNMENT PUBLICATIONS

The publications relating to Haryana bear series No. 6 and will be published as follows:—

Part I-A	Administration Report—Enumeration (for official use only)
Part I-B	Administration Report—Tabulation (for official use only)
Part II-A	General Population Tables : } combined
Part II-B	Primary Census Abstract : }
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on houses and disabled population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes
Part X-A	Town Directory
Part X-B	Survey Reports on selected towns
Part X-C	Survey Reports on selected villages
Part XI	Ethnographic notes and special studies on Scheduled Castes
Part XII	Census Atlas

B—HARYANA GOVERNMENT PUBLICATIONS

Parts XIII—A&B District Census Handbooks-one for each district (Village and Town Directory and Primary Census Abstract).

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part —C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities in statement-V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station /CD Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri O.P. Bharadwaj, I.A.S., the Director of Census Operations, Haryana on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer, I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India.

PREFACE

In March, 1981 the provisional population totals of Haryana State were released after the enumeration was over. The actual enumeration was conducted from 9th February to 28th February, 1981, with a revisional round from Ist March to 5th March, 1981 in order to bring the Census count correct upto the reference date i.e., the sunrise of Ist March, 1981.

In Paper-1 of 1981 figures down to the district level and cities with population of 100,000 and above had been given and basic data relating to total population including sex ratio, density, decennial growth rate, literacy and sexwise breakup of population were presented. Thereafter a supplement to Paper-1 of 1981 was brought out presenting a few other characteristics of population based on provisional results of 1981 Census. It covered information on urban population and work participation rates of the male and female population. Data down to the tahsil and town levels in the form of Primary Census Abstract and on disabled persons were also included.

The 1981 series of District Census Handbooks to which this volume belongs has been divided into two parts. Part-A presents data obtained from the field on land use pattern and amenities such as drinking water, post and telegraph, educational, medical etc. available in each village and civic and other amenities in each town. Part-B presents demographic data down to the village level in rural areas and ward level in the case of urban areas. Enumeration blockwise figures of total population and Scheduled Castes population in case of urban areas are shown in an appendix at the end of Primary Census Abstract. Our attempt has been to present the information concerning each district in its maximum possible details in the hope that these volumes will prove useful to scholars, planners and those who are working to improve the economic condition of the people particularly in our State and generally in the country as a whole.

O.P. BHARADWAJ
Director of Census Operations,
Haryana

Dated : Chandigarh
the 4th December, 1982

ACKNOWLEDGEMENTS

In a country like India, with the dimensions of a sub-continent and one sixth of the world's population, Census is a gigantic task. That we have been able to accomplish it successfully is largely due to the inspiration and guidance of Shri P. Padmanabha, Registrar General and Census Commissioner, India. His deep understanding of both the conceptual as well as the practical aspects of Census and complete identification with the job have been a living example to us all and his ever-smiling and unruffled expression, always considerate and sympathetic view of our problems and polite but firm handling of difficult situations made him an ideal captain of the team engaged in a stupendous undertaking. First and foremost, therefore, I must express my grateful thanks to him for showing us the right direction in steering the Census ship through difficult waters.

For the massive operation of actual Census taking, the whole country is divided into convenient Enumeration Blocks covering about 750 persons in the rural areas and about 650 persons in the urban areas. In Haryana state, as many as 20,534 Enumeration Blocks were demarcated and 23,603 Enumerators and Supervisors were appointed and trained for the work of actual count, besides the Principal Census Officers, District Census Officers, Additional District Census Officers, Sub Divisional Census Officers, Charge Officers, Deputy Charge Officers and Assistant Charge Officers who organised and coordinated the work in their respective areas of jurisdiction. An over whelming majority of the Enumerators, and Supervisors was drawn from the Education Department of the state and the remaining from Central/State Government Departments and from the offices of Local Bodies. They canvassed the basic Census schedule i.e. the Individual Slip for each person by moving from house to house during the Enumeration period. I, therefore, take this opportunity to express my deep appreciation for these thousands of field workers who at considerable inconvenience to themselves worked hard to make the colossal task of the 1981-Census a success.

A large share of the credit goes to the State Census Officers in the districts who discharged their duties with full vigour and enthusiasm. I am really grateful to them for their ungrudging cooperaion. I must also acknowledge with gratitude the active help and cooperation extended by the Government of Haryana at all levels and the goodwill shown by the people of the state to the staff working for the Census Organisation.

The great mass of information collected in the field was edited and processed in our two Regional Tabulation Offices located at Ambala and Kurukshetra with the help of 500 odd Tabulators, Checkers and Supervisors. The compilation of Primary Census Abstract is an outcome of the hard labour put in by the dedicated team of officials consisting of Tabulators, Checkers, Supervisors, Statistical Assistants and Investigators in these Regional Tabulation Offices. All of them deserve praise for hard work put in by them to complete the work in the stipulated period. The Regional Tabulation Office at Ambala Sadar was looked after by Shri S.L. Bahl, Deputy Director who was assisted by Shri A.L. Kakkar, Investigator and four Statistical Assistants while the Regional Tabulation Office at Kurukshetra was controlled by Shri R.K. Puri, Deputy Director who was assisted by Shri Vinod Kumar Babbar, Investigator and four Statistical Assistants. Shri J R. Vashistha, Assistant Director, not only helped me in the Head office by effectively supervising the work of collection and compilation of data for Village and Town Directories and Editing and coding Cell but also worked as Deputy Director Incharge of both the Regional Tabulation Offices for some time when no other Officer was available for manning these offices. I would like to record my appreciation of the assistance provided by these officers/officials.

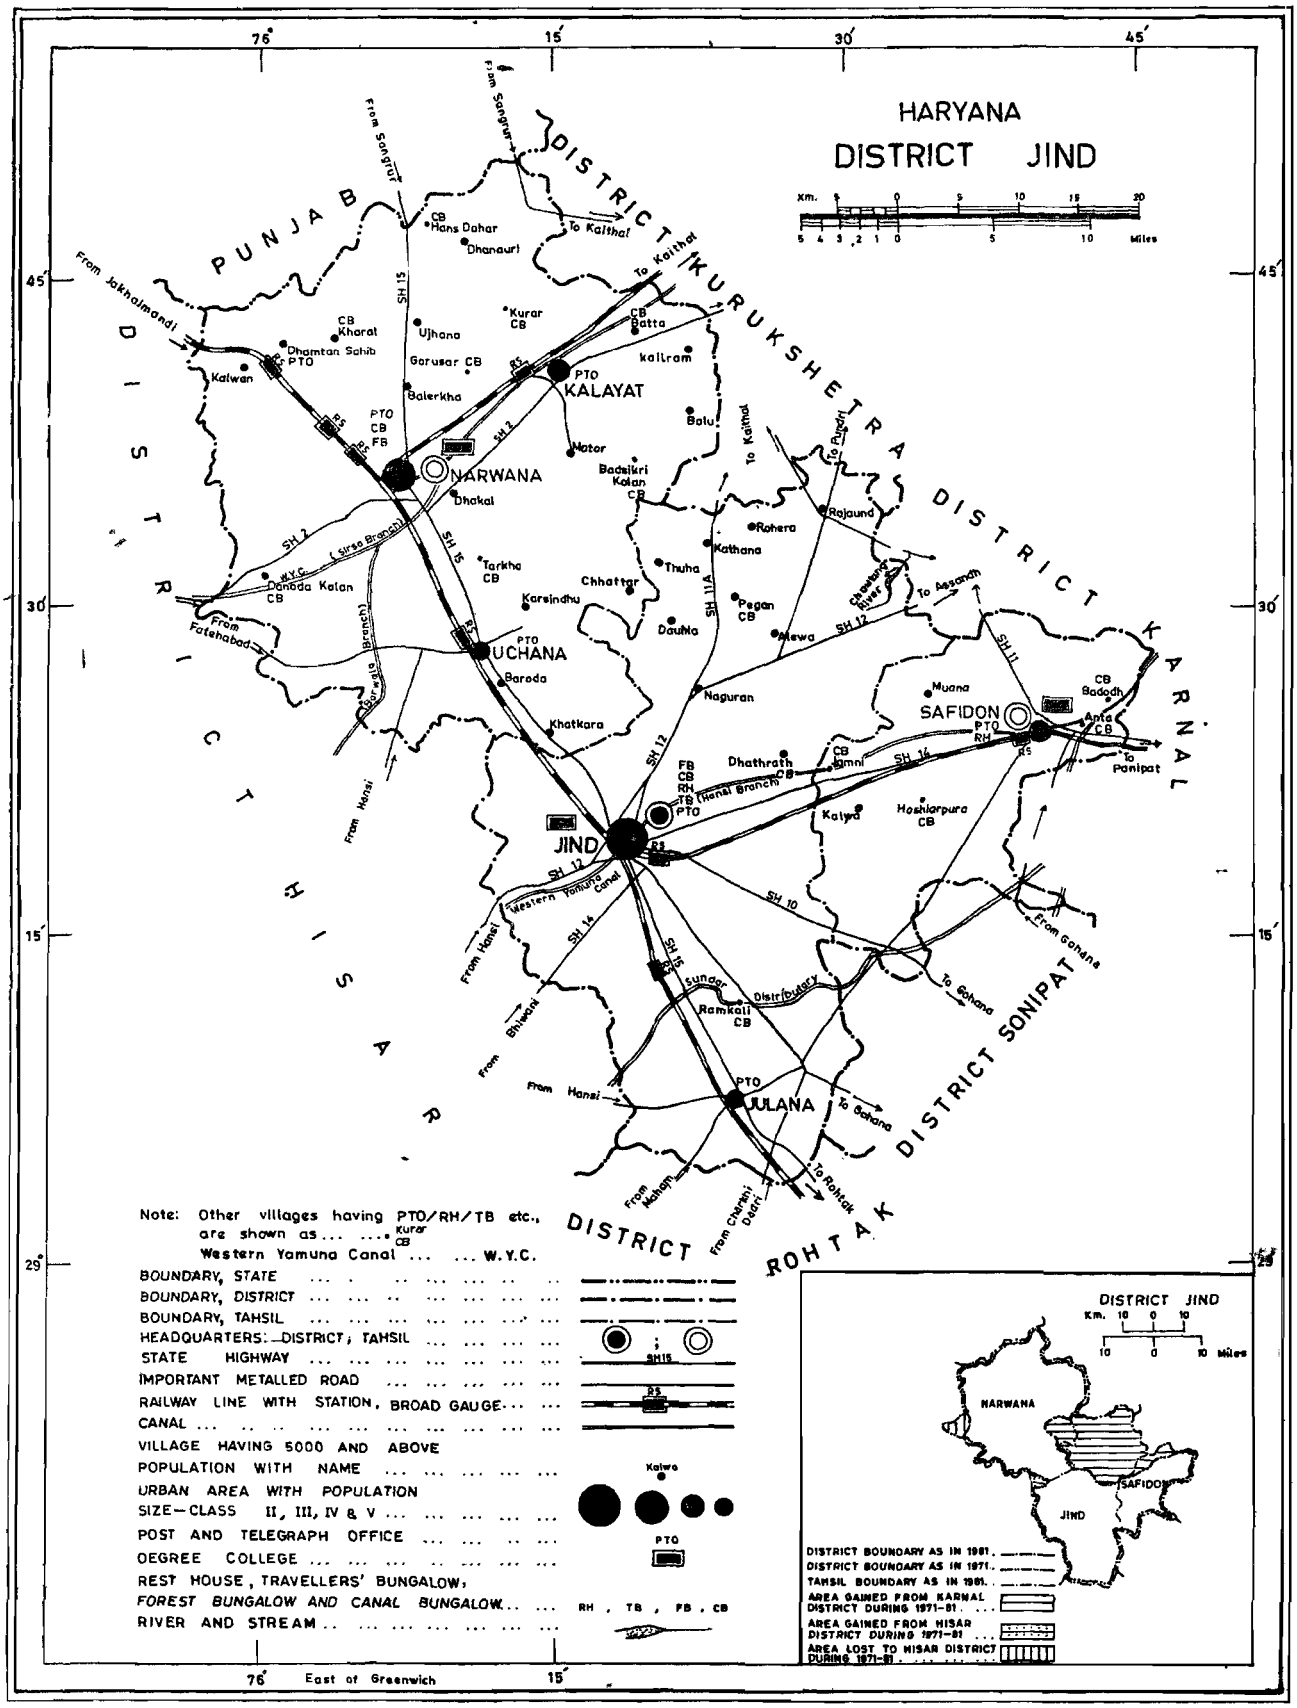

Village and Townwise Primary Census Abstracts prepared in the two Regional Tabulation Offices were checked and finalised in the Head office by a team of Statistical Assistants and Shri Jaswant Lal, Investigator under the supervision of Sarvshri J.R. Vashistha and J.N. Suri, Assistant Directors. These abstracts form Part B of this District Census Handbook.

The data contained in Village and Town Directories which form Part A of this Handbook was collected by us from the District Revenue Agency and the Local Bodies. We also approached various State Government Departments to provide the relevant data for cross checking the accuracy of the information collected from the field by the above mentioned two agencies. I am indebited to them for the cooperation and promptness with which they met our requirements. In my office, the data thus collected was processed and finalised into various statements by a team of efficient Computors, Statistical Assistants and Investigators. I would particularly mention in this connection the names of Sarvshri Koshy P. Zachariah and Amarjit Singh, Investigators and Mrs. S.P. Ratra, Statistical Assistant for the hard work put in by them.

The maps included in the Handbook and cover design were prepared in the Map Section headed by Shri J.P. Purohit, Cartographer under the competent supervision and able guidance of Shri S.R. Puri Research Officer (Map). I have also to mention the assistance rendered in the preparation of the draft of this Handbook by Shri R.K. Aggarwal, Deputy Director, Shri J.N. Suri, Assistant Director and Sh. S.R. Puri, Research Officer.

I have to record with gratitude the valuable assistance provided by Shri N.G. Nag, Deputy Registrar General (Social Studies), Dr. B.K. Roy, Deputy Registrar General (Map), Shri M.M. Dua, Senior Research Officer, Shri S.C. Srivastava, Assistant Central Tabulation Officer and their staff in scrutinising portions of this Handbook relating to their respective branches in the office of the Registrar General, India.

This brief section on acknowledgements is by no means exhaustive and there are many more unnamed people to whom my thanks are due but before I close I must thank Shri K R. Wadhera, Controller of Printing and Stationery, Haryana, for making a good job of the printing of this Handbook.

ANALYTICAL NOTE

CONCEPTS AND DEFINITIONS

It has been the tradition of the Indian Census to present Census data for rural and urban areas separately. In fact, in all the censuses throughout the world, this classification of census data into rural and urban units is generally recognised and data presented accordingly. But the distinction between rural and urban is not yet amenable to a single definition which could be applicable to all countries.

The Village defined

The definition of the village adopted in our State for the Census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is, as such, exclusively administrative in character. From this point of view, a village is better called a Revenue Estate, meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The Revenue Estate or 'Mauza' the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined "as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate." This definition of village has been adopted for the purposes of the Census ever-since the year 1901. The village, therefore, is not merely the inhabited area (*abadi deh*) of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

Urban area defined

After considerable thought, the following definition of an urban unit adopted at the 1961 and 1971 Censuses has been retained with a minor variation for the 1981 Census :

(a) All places with a municipality, corporation, cantonment board or a notified area committee etc.

(b) All other places which satisfied the following criteria :

(i) A minimum population of 5,000;

(ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

(iii) A density of population of at least 400 per square kilometre (1000 per square mile).

In 1961 and 1971 Censuses the males working in activities such as livestock, forestry, fishing, hunting and plantations, orchards and allied activities were treated as engaged in non-agricultural pursuits and therefore contributed to the 75 per cent criterion whereas in the 1981 Census these activities are treated at par with cultivation and agricultural labour for the purpose of this criterion.

In addition to all municipal areas/cantonment board, four villages namely (1) Babiyal in Ambala district, (2) Samalkha in Karnal district, (3) Gurgaon (rural) and (4) Jharsa in Gurgaon district satisfying the above criteria have been treated as census towns (non-municipal) in 1981 Census. Panchkula Urban Estate in Ambala district has also been treated as a town. The Faridabad Complex Administration consisting of Faridabad, Faridabad Township and Ballabgarh towns of 1971 and some surrounding villages, in Faridabad district has been treated as an independent town. The total number of towns in the State in 1981 Census has thus risen to 81 as compared to 65 in 1971 Census.

What is a Census House

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purpose or for both.

What constitutes a Household

A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called 'Institutional households.' By 'Houseless Household' is meant a household, the members of which do not have a house to live in and spend the night on foot paths etc. There may be one member households, 2 member housholds or multi-member households. For census purposes, each one of these types is regarded as a 'household'.

Definition of Scheduled Castes/Scheduled Tribes

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

"Scheduled Castes" mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

"Scheduled Tribes" mean such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of scheduled castes and scheduled tribes for each State and Union Territory. Accordingly, the Scheduled Castes and Scheduled Tribes are listed under a Presidential Order for each State and Union Territory. In the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, as amended uptodate, as many as 37 castes are listed as Scheduled Castes in the State of Haryana. There is, however, no Scheduled Tribe, listed as such, in Haryana State.

Who is literate

A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Worker defined

Like 1971 Census, a worker in 1981 Census is a person whose main activity is participation in any economically productive work by physical or mental activity. Work involves not only actual work but also effective supervision and direction of work. The main worker is one who has worked for 183 days or more in a year in one or more than one economic activity. A person who has worked for less than 183 days in a year is considered a marginal worker.

And a Non-worker

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

Connotation of Cultivator

For purposes of the Census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institution for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Who is Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

Meaning of Household Industry

Household industry is defined as an industry conducted by the head of the household himself/ herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

Standard Urban Area explained

The concept of the Standard Urban Area which was adopted for the first time in 1971 envisaged a constant statistical spatial reporting unit which was to serve as the basis of urban development planning for the concerned city or town. The Standard Urban Area is defined as "the projected growth area of a city or town having 50,000 or more population in 1971, as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Thus, it is a long term planning area and is to remain as a statistical reporting unit during the three successive Censuses—1971, 1981 and 1991".

In the case of Haryana, the following eleven Standard Urban Areas were delineated :

1. Ambala
2. Bahadurgarh
3. Bhiwani
4. Faridabad Complex Administration (previously known as Faridabad-Ballabgarh Complex).
5. Gurgaon
6. Hisar
7. Karnal
8. Panipat
9. Rohtak
10. Sonipat
11. Yamunanagar-Jagadhri

The concept of Urban Agglomeration

The concept of Urban Agglomeration adopted for the first time during the 1971 Census was an improvement on the concept of town group adopted in the 1961 Census. An urban agglomeration, must form a continuous urban spread constituting a town and its adjoining urban out-growths or two or more physically contiguous towns together with continuous well recognised urban out-growths, if any, of such towns.

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though they are outside the statutory limits of the corporation, municipality or cantonment, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units; at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining another such as a municipality and the adjoining cantonment and also other adjoining urban growths such as a railway colony, university campus, etc. Such outgrowths which do not qualify to be treated as individual towns in their own right are to be treated as urban appendages of the units to which they are contiguous.

In 1971 Census no place was recognised as a continuous urban spread deserving to be treated as an urban agglomeration in Haryana. However, the following four urban agglomerations have been delineated at the time of 1981 Census : —

Urban Agglomeration	Constituent towns or urban outgrowths
1. Yamunanagar (U.A.)	1. Jagadhri Workshop Railway Colony (M.C.) 2. Yamunanagar (M.C.) 3. Jagadhri (M.C.)
2. Hisar (U.A.)	1. Hisar (M.C.) 2. Haryana Agricultural University and Mini Secretariat
3. Ambala (U.A.)	1. Ambala Cantt.(C.B.) 2. Ambala Sadar (M.C.)
4. Gurgaon (U.A.)	1. Gurgaon (M.C.) 2. Gurgaon Census Town

THE DISTRICT

The district of Jind was carved out as a new district with the creation of the State of Haryana on the 1st November, 1966 as a result of the reorganisation of the composite State of Punjab. The tahsils of Jind, and Narwana which came to comprise the new district had, prior to reorganisation, formed part of the erstwhile Sangrur district of Punjab State. The third tahsil of Safidon was created later in 1967 from out of Jind tahsil. Tahsil Narwana consists of 140 villages and 3 towns, tahsil Jind has 149 villages and 2 towns and Safidon tahsil comprises of 65 villages and one town. With a population of 938,074 as per 1981 Census Jind ranks eighth among districts, with 7.26 per cent of the total population of the State. Being 3306 sq. kms. in area, it occupies 7.48 per cent of the total area (44,212* sq. kms.) of the State and areawise also ranks eighth in the State. Haryana has on an average 292 persons per sq. kilometre, with Faridabad district as the most thickly populated (466) and Sirsa as the sparsest (165). Jind district with 284 persons per sq. kilometre ranks ninth among the twelve districts of the State. In January, 1973 six villages were transferred to Narwana tahsil, 43 villages to Jind tahsil and 5 villages to Safidon tahsil from Kaithal tahsil of Kurukshetra district. One village namely, Barsola in Hansi Tahsil of Hisar district was transferred to Jind tahsil in 1974. Two villages namely Bithmara and Surewala of Narwana tahsil were transferred to Tohana tahsil of Hisar district in 1979.

The district lies between 29°03' and 29°50' North Latitude and 75°57' and 76°47' East Longitude. On its east and north-east lie the districts of Karnal and Kurukshetra. On the north-west it borders on the Patiala and Sangrur districts of Punjab. In the north-west, west and south-west it has a common boundary with district Hisar and in its south and south-east lie the Rohtak and Sonipat districts.

Since the last Census of 1971, there have been many changes in the boundaries of some of the existing districts and some new districts have also been formed. The new districts are Kurukshetra, Sonipat, Faridabad, Bhiwani and Sirsa. Thus increased the number of districts to 12 in 1981 as against 7 in 1971. The figures presented in this volume adhere to the boundaries of administrative units as on 31st December, 1979. They cover 39 tahsils and 81 cities/towns including the four Census towns in the State.

District Census Handbook

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook (DCH) consisting of Village and Town Directories and Village and Townwise Primary Census Abstract (PCA).

Prior to 1951, District level Census data formed part of general reports and tables. Publication of District Census Handbooks as independent publications began from 1951 Census only.

*Provisional

In 1961, attempts were made to make the District Census Handbooks more informative and these contained valuable Census data for each village and town of the district, indicating some basic amenities available in the villages. In 1971, the scope and coverage of both census and non-census statistics was further enlarged and the District Census Handbooks were published in two volumes, first containiing the two Parts A & B and the second comprising Part C alone :—

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

The publication of Part-C was considerably delayed because of delay in getting the administrative statistics from the various departments. So, Part-C has been dropped this time. Moreover, the administrative statistics would be available to the data users from the publications of the respective departments.

Part-A of the 1981 District Census Handbook contains Village and Town Directory and Part-B contains Village and Townwise Primary Census Abstracts. Both the parts have been combined together in this volume. A tahsil map showing the village boundaries, the location code numbers of the villages, the distribution of various amenities in villages and the size class of their population, has been given in the beginning of Section I—Village Directory. An alphabetical list of villages in each tahsil has also been given, along with a note explaining the codes used in the Village Directory. The codes used in the Town Directory have been explained at the beginning of Section II—Town Directory.

SCOPE

Village Directory

Amenities and land use

The Village Directory provides certain basic data separately for each village, the villages in the district having been arranged tahsilwise and within the tahsil, location codewise. At the time of Census enumeration each village was assigned a code number for purposes of identification.

The format of the village directory follows the pattern canvassed in 1971 Census except for a few additional columns. The column for total population and number of households has been added to facilitate analysis of the village directory data. The column for approach to village is aimed at having an idea of the number of inaccessible villages in a district. All the amenities except power supply in the village have been brought together with the instructions that if an amenity is not available in the village a dash(—) may be shown against the same in the relevant column but next to it the distance from the village of the nearest place where the facility is available may be given in broad ranges in brackets, the ranges being; "(—5 kms)", "(5—10 kms)" and "(10+kms)".

The Village Directory, therefore, contains information about the total area of the village (Column 3); total population and number of households (Column 4); and availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, day(s) of the market /hat and communications (Columns 5 to 10). In Columns 11 to 13, approach to village, nearest town and distance and availability or otherwise of power supply have been indicated. Column 14 shows the staple food of the people of the village. The area under different types of land use such as area under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and the area not available for cultivation has been given in Columns 15—19. In Column 20 have been indicated the places of religious, historical or archaeological interest along with the information regarding newspapers, motorcycles/scooters, cars/jeeps and tractors. The data presented in the village directory has been collected from the District/Tahsil revenue agency.

Appendix 1

This Appendix gives for each tahsil the number of villages having various levels and types of educational institutions, such as primary schools, middle schools, adult literacy centres etc. along with their number, various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as, taps, tubewells etc, post and telegraph offices, power supply, railway station, bus stop etc. and also the number of villages not having these amenities.

Appendix 2

This Appendix gives for each non-municipal town (i.e. place treated as town only for census purposes) the area under forest, irrigation, unirrigated land, culturable waste land and area not available for cultivation. But it remains blank as there is no such town in Jind district.

Appendix 3

This Appendix gives the list of villages where no educational, medical and public health facilities are available.

Appendix 4

This Appendix gives the list of villages with Scheduled Castes population in various ranges of proportion. Information is presented by the ranges 0—5 per cent, 6—10 per cent, 11—15 per cent, 16—20 per cent, 21—30 per cent and 31 per cent and above.

Town Directory

The Town Directory consists of seven statements almost similar to those adopted for 1971 Census. These statements have been compiled from the information supplied by the local bodies. A few new columns have been introduced with a view to facilitating analysis of the data. A significant addition is of class of town in every statement because the infrastructure of amenities and facilities found in urban areas can be analysed by taking the class of town into consideration. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose.

The columns on Scheduled Castes population in statement IV and adult literacy classes/centres in statement V have been provided keeping in view the Minimum Needs Programme of the Planning Commission.

Again if the fire fighting service as in statement IV and medical or educational facilities as in statement V are not available in the town, the name of the nearest town if in the same district or the name of the nearest district if in the same State or other State where available along with its distance from the referrant town is given. This is a new feature of 1981 Census as it is necessary to identify the areas with no specific facility in every district. Details contained in each statement are given below.

Statement I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, density, sex ratio and population/growth rate. In case a town did not enjoy urban status at any Census, the relevant columns under the headings 'Population and growth rate of the town at the Censuses of', and 'Sex Ratio' have been left blank. Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1981 Census population of the core town as follows :—

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Statement II gives the physical aspects of the various towns in the district. Data regarding minimum and maximum temperature is not available for any town in the district. Rainfall data is available for Jind and Narwana towns only.

Statement III indicates the position of Municipal Finances for the year 1978-79. Income and expenditure figures have been given in Rs. '00' in respect of each town in the district.

Statement IV shows civic and other amenities viz., roads, system of sewerage, number of latrines, method of disposal of night soil, water supply, fire-fighting service and the number of electric connections

as available during the year 1979. Sewerage facilities are available in the two towns of Jind and Narwana only in addition to open surface drains whereas the towns of Julana, Kalayat, Safidon and Uchana are served by open surface drains only. In all the towns except Kalayat the method of carriage of night soil is by wheel-barrows. In Kalayat, the practice of carriage of night soil as headload still continues. Fire-fighting service is available in Jind town only.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns. There is no Class I town in the district. Jind alone is a Class II town and there is no notified/officially recognised slum area in it.

Statement V reflects the position of medical, educational, working women's hostel, recreational and cultural facilities for each town in the district during the year 1979. Under the heading medical facilities, the number of hospitals/dispensaries/TB Clinics etc. has been shown separately alongwith the total number of beds available. Under the heading educational facilities, number has been given separately of Arts/Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training institutions, Higher Secondary/Secondary/Junior Secondary/Middle/Primary Schools and Adult Literacy Centres. The extent of availability of recreational and cultural facilities is reflected in the number of stadia, cinemas, auditoria and public libraries.

The towns of Julana, Kalayat and Uchana do not have any college. There are three colleges—two Arts colleges and one Arts, Science and Commerce College—in Jind and two Arts colleges in Narwana. Safidon has only one Arts college. There are eight Vocational Training institutions in the district—three in Jind, one in Kalayat and four in Narwana.

In Statement VI information regarding three most important commodities imported/exported and manufactured has been given alongwith the number of banks, agricultural credit societies and non-agricultural credit societies. The district has cotton ginning units and rice shellers as well as units manufacturing agricultural implements.

Primary Census Abstract of general population

(i) *District Primary Census Abstract.* In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each tahsil separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

(ii) *Tahsil-wise Primary Census Abstract.* Here figures for each village and town (and within the town wardwise) in a tahsil have been presented.

At the time of Census enumeration, enumeration blocks were formed in the villages, each block consisting of about 750 persons and in the towns, each block consisting of about 650 persons. But the data have not been given for each block separately in the case of rural areas. In the case of urban areas total population and Scheduled Castes population have been shown blockwise in the appendix. Data in Columns 6—28 of the Primary Census Abstract have been given sex-wise. During 1971 Census break-up of workers into nine industrial categories was given whereas categories III, IV, V(b) and VI to IX have been combined together while presenting 1981 Census figures. A new concept of 'Marginal Worker' has been introduced this time.

Appendix

This Appendix gives at urban block level the total population and Scheduled Castes population.

Primary Census Abstract of Scheduled Castes population

In the District Primary Census Abstract of Scheduled Castes population figures have been presented for the district as a whole as well as for each tahsil/town separately.

PHYSICAL ASPECTS

Jind district has sub-tropical continental monsoon climate. In its physical features it presents a level plain without any hill or stream. Water level is relatively low. Medium soils, particularly loam (*Bhangar and Nardak*), are found in the district. Canals are the main source of irrigation. The rainfall during 1979-80 was only 29.6 centimetres against 68.6 centimetres during 1978-79 and 76.3 centimetres during 1977-78. It reflects the inadequacy and uncertainty of rainfall which is mainly concentrated during the rainy season. This situation, however, has been considerably improved by the availability of irrigation facilities.

ECONOMY

The economy of the district is primarily agricultural. At the time of 1981 Census, 74 per cent of the total main workers were cultivators and agricultural labourers. There were 48 registered working factories in the district during the year 1979 and the estimated number of workers employed in them was 1,187. Twenty eight of these factories manufacture cotton textiles and 13 food products. There are some cotton ginning and pressing units and items like steel wires ropes, cattle feed and leather products are also manufactured. Of the 6 large and medium scale units in Jind, 3 are in public sector namely Milk Plant of the Haryana Dairy Development Corporation, Cattle Feed Plant of the Haryana Agro-Industries Corporation and Tannery Unit of the Haryana State Industrial Development Corporation. Three private sector units are the Industrial Cables (India) Ltd. at Kila Zafargarh (Julana), K.C. Textiles at Pindara (Jind) and Haryana Roller Flour Mills (Jind). There are many small scale units also. The range of items produced includes surgical cotton, stainless steel utensils, medicinal injections, steel fabricated items, candles, zinc sulphate, PVC wire, agricultural implements, hosiery goods and soap etc.

The district has adequate canal irrigation facilities. Area under cultivation of foodgrains, cotton and sugarcane was 328.4, 21.5 and 14.8 thousand hectares respectively during the year 1979-80. Among the foodgrains mostly wheat, bajra, gram and rice are grown. A very small area of .4 sq. kms. was covered under reserved forests during the year 1979-80. In 1977 the number of livestock in Haryana was 6,904,800 which includes cattle, buffaloes, horses and ponies, donkeys, sheep, goats, camels and pigs, etc. Jind district contributed only 623,000 animals to this figure and these mostly include cattle, buffaloes sheep, goats and pigs. During 1979-80 the number of different types of motor vehicles on road was 93,583 in the State out of which 2,425 came from Jind District.

HISTORY AND ARCHAEOLOGY

Brief history

This district was formed at the time of reorganisation of the composite state of Punjab and creation of Haryana in November, 1966 with the two tahsils of Narwana and Jind which had been part of the Sangrur district. The Sangrur district was itself carved out of the territories of erstwhile Patiala, Nabha and Jind States, collectively known as Phulkian States, on the formation of Patiala and East Punjab States Union (PEPSU) in 1948.

The history of Jind as a separate State as given in the Imperial Gazetteer dates from 1763, in which year the confederate Sikhs captured Sirhind town from Ahmad Shah Durrani's governor and partitioned the old Mughal province. The Raja of Jind is descended from Sukh Chain, a grandson of Phul, the ancestor of all the Phulkian families, who had previously been a mere rural notable. On Sukh Chain's death in 1751 Balanwali, which he had founded, fell to his eldest son Alam Singh, Badrukhan to his second son Gajpat Singh and Dyalpura to his youngest son Bulaki. On Alam Singh's death in 1754 Balanwali also passed to Gajpat Singh who was the most adventurous of the three brothers, and in 1755 conquered the imperial parganas of Jind and Safidon and over ran Panipat and Karnal, but was not strong enough to hold them. In 1766 Gajpat Singh made Jind town his capital. Nevertheless he remained a vassal of the Delhi empire and continued to pay tribute, obtaining in return in 1772 an imperial farman which gave him the title of Raja. In 1774, in consequence of a quarrel with the Raja of Nabha, he attacked Amloh, Bhadson and Sangrur, which were in the Nabha territories, and though he was compelled by the Raja of Patiala to relinquish the first two places, he succeeded in retaining the last, which has ever since remained part of the Jind state. In the next year the Delhi Government made an attempt to recover Jind, but the Phulkian chiefs combined to resist the attack, which was repulsed. Gajpat Singh built a fort at Jind in 1775. He died in 1789 and was succeeded by his two sons -Bhag Singh, who inherited the title of Raja with the territories of Jind and Safidon: and Bhup Singh, who obtained Badrukhan. Raja Bhag Singh shrewdly held aloof from the combination against the British. He died in 1819 after ruling for thirty-six years, and was succeeded by his son Fateh Singh, who died in 1822. Troublous times followed, and Sangat Singh, who succeeded his father Fateh Singh, was obliged for a period to desert his capital. He died childless in 1834 and the question of succession was finally settled in 1837, when Sarup Singh of Bazidpur, a second cousin of the deceassd Raja, was recognised as chief of all the territory that had been held by his great-grandfather Gajpat Singh, through whom he derived his title. The territory to which he thus succeeded consisted of Jind proper and nine other parganas. Raja Sarup Singh died in 1864. He was succeeded by his son, Raghubir Singh who was in every way worthy of his father. He died in 1887, leaving a grandson Ranbir Singh, to succeed him. Raja Ranbir Singh was only eight years old at his accession and a Council of Regency was appointed to carry on the administration until he attained majority. Full powers were given to him in November, 1899, in a darbar held at Sangrur.

He was still ruling the State when independence dawned in 1947. On the 5th May, 1948, the eight princely States of Patiala, Jind, Nabha, Faridkot, Kapurthala, Malerkotla, Nalagarh and Kalsia were merged together to form the Patiala and East Punjab States Union (PEPSU) consisting of eight districts

namely Patiala, Sangrur, Bhatinda (now spelt as Bathinda), Kapurthala, Mahendragarh, Kohistan, Barnala and Fatehgarh Sahib. In 1953, the number of districts was reduced to five, by merging Barnala with Sangrur, and Kohistan and Fatehgarh Sahib with Patiala.

Antiquity

According to the local tradition recorded in the Imperial Gazetteer the town of Jind owes its foundation to the Pandavas who are supposed to have built a temple here to Jainti Devi, the 'goddess of victory', around which sprang up the town of Jaintapuri since corrupted into Jind. Actually the Sanskrit name of the town was Jayanti which is first mentioned in the Mahabharata. The present name is obviously a corruption of this original Sanskrit name. The district of Jind represents one of the three major tirtha complexes of Haryana, the other two being Pehowa earlier known as Prithudaka and Kurukshetra or Thanesar.

The Mahabharata contains a detailed list of holy places in all these three complexes and associates a large number of them with the Jind and other towns in its vicinity. As many as eight tirthas are located according to tradition in Jind itself. Three of these tirthas have been mentioned in the Vamana Purana and are known as Somatirtha, Jwalamaleshwar and Bhuteshwara. The village of Barah about 11 kms. to the east of Jind, is associated with the Boar incarnation of Vishnu. Safidon, situated 36 kms. east of Jind and known in olden days by the name of Sarpadaman, is associated with Naga and Sarpadevi tirthas in the Great Epic and the Vamana Purana. At village Hat about 10 kms. to the south-east of Safidon are located at least five tirthas of which two namely Panchanada and Koti Tirtha find mention in early literature. Other villages similarly associated with various tirthas in literature or tradition include Ikas, Pindara, Nirjan, Sajooma, Ponkar Kheri, Kasoon, Simla, Sanghan, Mator, Kalayat and Barta. An other important tirtha that deserves specific mention however, is the village of Ram Rai, situated 8 kms. to the south-west of Jind. This name is a corrupt form of the original sanskrit name Ram Hrada mentioned in early literature including the Great Epic. This tirtha is associated with the Bhargava hero Parashurama who is said to have constructed five lakes with the blood of tyrant Kshatriya Kings whom he annihilated. The name literally means 'Lakes of Rama'. The place is also known for three other tirthas called Hatyaharana Suryakunda and Parashurama tirtha. The town of Kalayat is tradionally associated with Kapil Muni. There are some temples of considerable antiquity here which are of special architectural interest.

At several of these places people still gather on important occasions for taking a holy bath or performing Shraddha.

Tourist resorts

The State Government has provided oases of comfort, relaxation and recreation by creating tourist complexes for the road weary all over Haryana. These complexes include motels, restaurants and resorts. The Department of Tourism has developed a stop-over resort located in the heart of the district town of Jind. It provides facilities of restaurant, bar and camper huts.

ANALYSIS OF DATA

The following inset tables presented in this volume are based on the data compiled in the Village and Town Directory and the Primary Census Abstract.

Table 1 below indicates the population sexwise separately for rural and urban areas at district and tahsil level along with the number of villages and towns as per 1981 Census.

TABLE 1

Population, Number of Villages and Towns, 1981

Serial No.	Name of Tahsil	POPULATION									No. of villages		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1.	Narwana	399,701	215,766	183,935	351,403	189,761	161,642	48,298	26,005	22,293	140	139	3
2.	Jind	397,201	214,100	183,101	331,159	178,478	152,681	66,042	35,622	30,420	149	148	2
3.	Safidon	141,172	76,071	65,101	126,056	68,020	58,036	15,116	8,051	7,065	65	65	1
	Total District	938,074	505,937	432,137	808,618	436,259	372,359	129,456	69,678	59,778	354	352	6

Table 2 below gives percentage decadal (1971—1981) variation in population. This variation is more pronounced in urban areas than in rural areas. In Narwana Tahsil, the percentage decadal variation in respect of towns is the highest (74.69) which seems to be due to the notification of Kalayat as a town.

TABLE 2
Decadal change in distribution of population

Tahsil	POPULATION						Percentage decadal (1971-1981) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	8	4	5	6	7	8	9	10
Narwana	326,870	299,222	27,648	399,701	351,403	48,298	22.28	17.44	74.69
Jind	319,389	274,338	45,051	397,201	331,159	66,042	24.36	20.71	46.59
Safidon	118,310	106,300	12,010	141.172	126,056	15,116	19.32	18.59	25.86
Total District	764,569	679,860	84,709	938,074	808,618	129,456	22.69	18.94	52,82

Table 3 below presents distribution of villages according to the size of population. It shows that 49.15 per cent of the villages in the district are medium size having population in the range of 500—1999 whereas 37.78 per cent of the villages fall in the population range of 2,000—4,999.

TABLE 3
Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	6	1.71
200—499	13	3.69
500—1,999	173	49.15
2,000—4,999	133	37.78
5,000—9,999	26	7.39
10,000+	1	0.28
Total	352	100.00

Table 4 below shows the distribution of villages by density. In 56.25 per cent of villages in the district, the density of population per square kilometre falls in the range of 201—300. It is above 500 in two villages only,

TABLE 4
Distribution of villages by density

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
—10	6	1.71
11—20	1	0.28
21—50	1	0.28
51—100	5	1.42
101—200	46	13.07
201—300	198	56.25
301—500	93	26.42
501+	2	0.57
Not known	..	..
Total	352	100.00

Table 5 below gives the proportion of Scheduled Castes population to total population in the villages. In more than 40 per cent of villages percentage of Scheduled Castes population to total population is above 20 per cent. In 1.42 per cent of villages there is no Scheduled Castes population at all.

TABLE 5

Proportion of Scheduled Castes population to total population in the villages

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
NIL	5	1.42
5 or less	6	1.71
6—10	18	5.11
11—15	62	17.61
16—20	106	30.11
21—30	119	33.81
31 and above	36	10.23
Total	352	100.00

Table 6 below relating to proportion of Scheduled Tribes population to total population in the villages is not applicable as there are no Scheduled Tribes in the Haryana State.

TABLE 6

Proportion of Scheduled Tribes population to total population in the villages

16—25	Not applicable	
26—35		
36—50		
51 and above		
Total		

Table 7 below gives proportion of Scheduled Castes population to total population in each town of the district. Nearly 12 per cent of the total urban population in the district belongs to Scheduled Castes.

TABLE 7

Proportion of Scheduled Castes population in Towns

Name of the Town	Total population (including institutional and houseless population)	Total Scheduled Castes population	Percentage of Scheduled Castes population to total population
1	2	3	4
Jind	56,748	5,626	9.91
Julana	9,294	1,653	17.79
Kalayat	10,965	2,106	19.21
Narwana	29,242	3,487	11.92
Safidon	15,116	1,634	10.81
Uchana	8,091	1,088	13.45
All Towns	**129,456**	**15,594**	**12.05**

Table 8 below reflects literacy rates by population size of villages. Literacy rate for the district is 22.42. Majority of the villages in the district have the literacy rate near to or above the district level literacy rate.

TABLE 8

Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate (percent)
1	2	3
—200	6	38.22
200—499	13	26.25
500—1,999	173	24.31
2,000—4,999	133	22.57
5,000—9,999	26	19.09
10,000+	1	31.04
Total	**352**	**22.42**

Table 9 below indicates the literacy rates for the various towns in the district. The two towns of Jind and Safidon have the literacy rate higher than the district literacy rate (49.62). The newly created town of Kalayat has the lowest literacy rate.

TABLE 9

Literacy rates for Towns

Name of the Town	Literacy rate (percent)
1	2
Jind	56.61
Julana	43.85
Kalayat	34.19
Narwana	47.12
Safidon	49.93
Uchana	36.50
All Towns	**49.62**

Table 10 shows the position of literates, workers/non-workers, scheduled castes/tribes population in the district. About 19 per cent of the population in the district belongs to Scheduled Castes. The number of literates is around 26 per cent. Workers including marginal workers form about 35 per cent of the population whereas the remaining 65 per cent are non-workers.

TABLE

Literates, Workers, Non-workers, Scheduled

Name of Tahsil	Total Rural Urban	Total Population			S.C. population to total population	S.T. population to total population	Percentage Literates to total population		
		Persons	Males	Females			P	M	F

	All Villages	**151,835.84**	**351,403(50,544)**

† Although entered as 'Be-Chirag' (un-inhabited) in the Revenue records, the population shown against this village was enumerated at the time of 1981-Census.

Notes:—(1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.
(2) The Area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

Land Use

Amenities available (If not available within the village, a dash(—)is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+kms. of the nearest place where the facility is available is given)

†Total area figures for the district represent "Geographical Area Figures" supplied by the Surveyor General. Figures for urban areas are those supplied by the Local Bodies. Area figures for the rural areas are derived by substracting the urban area from the total area of the district. The total of area figures of Tahsils in a district will not tally with the district figures because the former are derived from the villagewise area figures supplied by the Tahsildars.
