HARYANA

DISTRICT CENSUS HANDBOOK

PARTS XIII A & B
VILLAGE & TOWN DIRECTORY

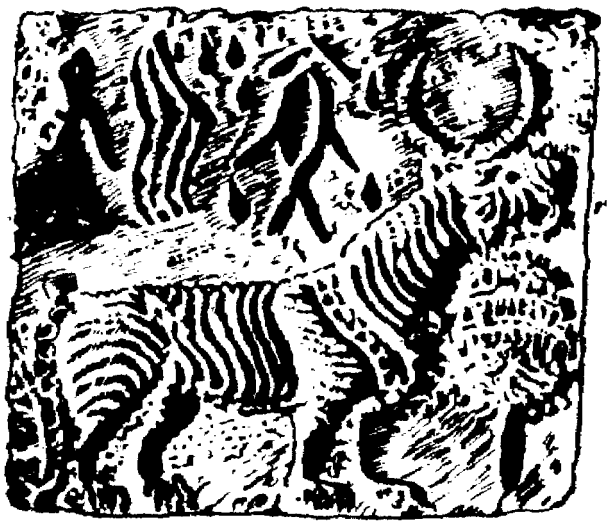

VILLAGE & TOWNWISE
PRIMARY CENSUS ABSTRACT

HISAR DISTRICT

O. P. BHARADWAJ
OF THE INDIAN ADMINISTRATIVE SERVICE
Director of Census Operations
Haryana

Published by the Government of Haryana
1983

MOTIF

The composite animal with a tiger's body and a bull's horns, represents the figure on a Harappan seal recovered during excavations at the important proto-historic site of Banavali in district Hisar. The seal also bears signs which are supposed to stand for letters of the Harappan script.

The district lies in the belt that produces the best breed of Haryana bulls from time immemorial. The bull was adopted as their totem by the Vedic tribe of Mahavrishas called Visanins in the Rigveda. The acquisition of a tiger's body by the Banavali bull while retaining its horns evidently signifies the increase in the areas of Hisar.

The Harappan script has not been successfully deciphered so far but it is likely that the tiger bull and other similar seals were used for official as well as commercial purposes.

CENSUS OF INDIA—1981

A—CENTRAL GOVERNMENT PUBLICATIONS

The publications relating to Haryana bear Series No. 6 and will be published as follows :—

Part I-A	Administration Report—Enumeration (for official use only)
Part I-B	Administration Report—Tabulation (for official use only)
Part II-A	General Population Tables : } combined
Part II-B	Primary Census Abstract : }
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on Houses and Disabled population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes
Part X-A	Town Directory
Part X-B	Survey Reports on selected towns
Part X-C	Survey Reports on selected villages
Part XI	Ethnographic notes and special studies on Scheduled Castes
Part XII	Census Atlas

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/CD Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisaton. The data have been collected and compiled in the State under the direction of Shri O. P. Bharadwaj, I.A.S., the Director of Census Operations, Haryana on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,

the 26th April, 1982.

P. PADMANABHA

Registrar General, India.

PREFACE

At the outset, it must be stated that the Census Operations of 1981 were carried out under the stewardship of Shri O. P. Bharadwaj, Director of Census Operations, Haryana and the credit for the successful conduct of the operation goes to him. Before, however, the report could be finalised he had to resume his duties under the State Government in public interest.

In March, 1981, the provisional population totals of Haryana State were released after the enumeration was over. The actual enumeration was conducted from 9th February to 28th February, 1981 with a revisional round from 1st March to 5th March, 1981 in order to bring the Census count correct upto the reference date i.e. the sunrise of 1st March, 1981.

In Paper-I of 1981 provisional figures down to the district level and cities with population of 100,000 and above had been given and basic data relating to total population including sex ratio, density, decennial growth rate, literacy and sexwise break-up of population were presented. Thereafter a supplement to Paper-I of 1981 was brought out presenting a few other characteristics of population also based on provisional results of 1981 Census. It covered information on urban population and work participation rates of the male and female population. Data down to the tahsil and town levels in the form of Primary Census Abstract and on disabled persons were also included.

The 1981 series of District Census Handbooks to which this volume belongs has been divided into two parts. Part-A presents data obtained from the field on land use pattern and amenities such as drinking water, post and telegraph, educational, medical etc., available in each village and civic and other amenities in each town. Part-B presents demographic data down to the village level in rural areas and ward level in the case of urban areas. Enumeration blockwise figures of total population and Scheduled Castes population in case of urban areas are shown in an appendix at the end of Primary Census Abstract. Our attempt has been to present the information concerning each district in its maximum possible details in the hope that these volumes will prove useful to scholars, planners and those who are working to improve the economic condition of the people particularly in our state and generally in the country as a whole.

Dated: Chandigarh
the 6th, June 1983

R. K. AGGARWAL

Deputy Director of Census Operations,
Haryana.

ACKNOWLEDGEMENTS

In a country like India, with the dimensions of a sub-continent and one sixth of the world's population Census is a gigantic task. That we have been able to accomplish it successfully is largely due to the inspiration and guidance of Shri P. Padmanabha, Registrar General and Census Commissioner, India. His deep understanding of both the conceptual as well as the practical aspects of Census and complete identification with the job have been a living example to us all and his ever-smiling and unruffled expression, always considerate and sympathetic view of our problems and polite but firm handling of difficult situations made him an ideal captain of the team engaged in a stupendous undertaking. First and foremost, therefore, we must express our grateful thanks to him for showing us the right direction in steering the Census ship through difficult waters.

For the massive operation of actual Census taking, the whole country is divided into convenient Enumeration Blocks covering about 750 persons in the rural areas and about 650 persons in the urban areas. In Haryana State, as many as 20,534 Enumeration Blocks were demarcated and 23,603 Enumerators and Supervisors were appointed and trained for the work of actual count. An overwhelming majority of the Enumerators and Supervisors was drawn from the Education Department of the State and the remaining from Central/State Government Departments and from the offices of Local Bodies. They canvassed the basic Census schedule i.e. the Individual Slip for each person by moving from house to house during the Enumeration period. We, therefore, take this opportunity to express our deep appreciation for these thousands of field workers who at considerable inconvenience to themselves worked hard to make the colossal task of the 1981-Census a success.

The Principal Census Officers, District Census Officers, Additional District Census Officers, Sub-Divisional Census Officers, Charge Officers and Deputy Charge Officers were responsible for organising and co-ordinating the work in their respective areas of jurisdiction. A large share of the credit goes to these State Census Officers in the districts who discharged their duties with full vigour and enthusiasm. We are really grateful to them for their ungrudging co-operation. We must also acknowledge with gratitude the active help and co-operation extended by the Government of Haryana at all levels and the goodwill shown by the people of the State to the staff working for the Census Organisation.

The great mass of information collected in the field was edited and processed in our two Regional Tabulation Offices located at Ambala and Kurukshetra with the help of 500 odd Tabulators, Checkers and Supervisors. The compilation of Primary Cenus Abstract is an outcome of the hard labour put in by the dedicated team of officials consisting of Tabulators, Checkers, Supervisors, Statistical Assistants and Investigators in these Regional Tabulation Offices. All of them deserve praise for hard work put in by them to complete the work in the stipulated period. The Regional Tabulation Office at Ambala Sadar was looked after by Shri S. L. Bahl, Deputy Director who was assisted by Shri A.L. Kakkar, Investigator and four Statistical Assistants while the Regional Tabulation Office at Kurukshetra was controlled by Shri K.K. Puri, Deputy Director who was assisted by Shri Vinod Kumar Babbar, Investigator and four Statistical Assistants. Shri J.R. Vashistha, Assistant Director, also worked as Deputy Director in the Regional Tabulation Offices for some time firstly when Shri S.L. Bahl, Deputy Director proceeded on leave and again on the transfer of Shri R. K. Puri, Deputy Director to the office of the Registrar General, India, New Delhi. We would like to record our appreciation of the assistance provided by these officers/officials.

Village and Townwise Primary Census Abstracts prepared in the two Regional Tabulation Offices were checked and finalised in the Head Office by a team of Statistical Assistants and Shri Jaswant Lal, Investigator under the supervision of Sarvshri J.R. Vashistha and J.N. Suri, Assistant Directors. These abstracts form Part-B of this District Census Handbook.

The data contained in Village and Town Directories which form Part-A of this Handbook was collected by us from the District Revenue Agency and the Local Bodies. We also approached various State Government Departments to provide the relevant data for cross-checking the accuracy of the information collected from the field by the above mentioned two agencies. We are indebted to them for the co-operation and promptness with which they met our requirements. In our office the data thus collected was processed and finalised into various statements by a team of Computors, Statistical Assistants and Sarvshri Amarjit Singh and Koshy P. Zachariah, Investigators under the supervision of Sarvshri J.R. Vashistha and J.N. Suri, Assistant Directors.

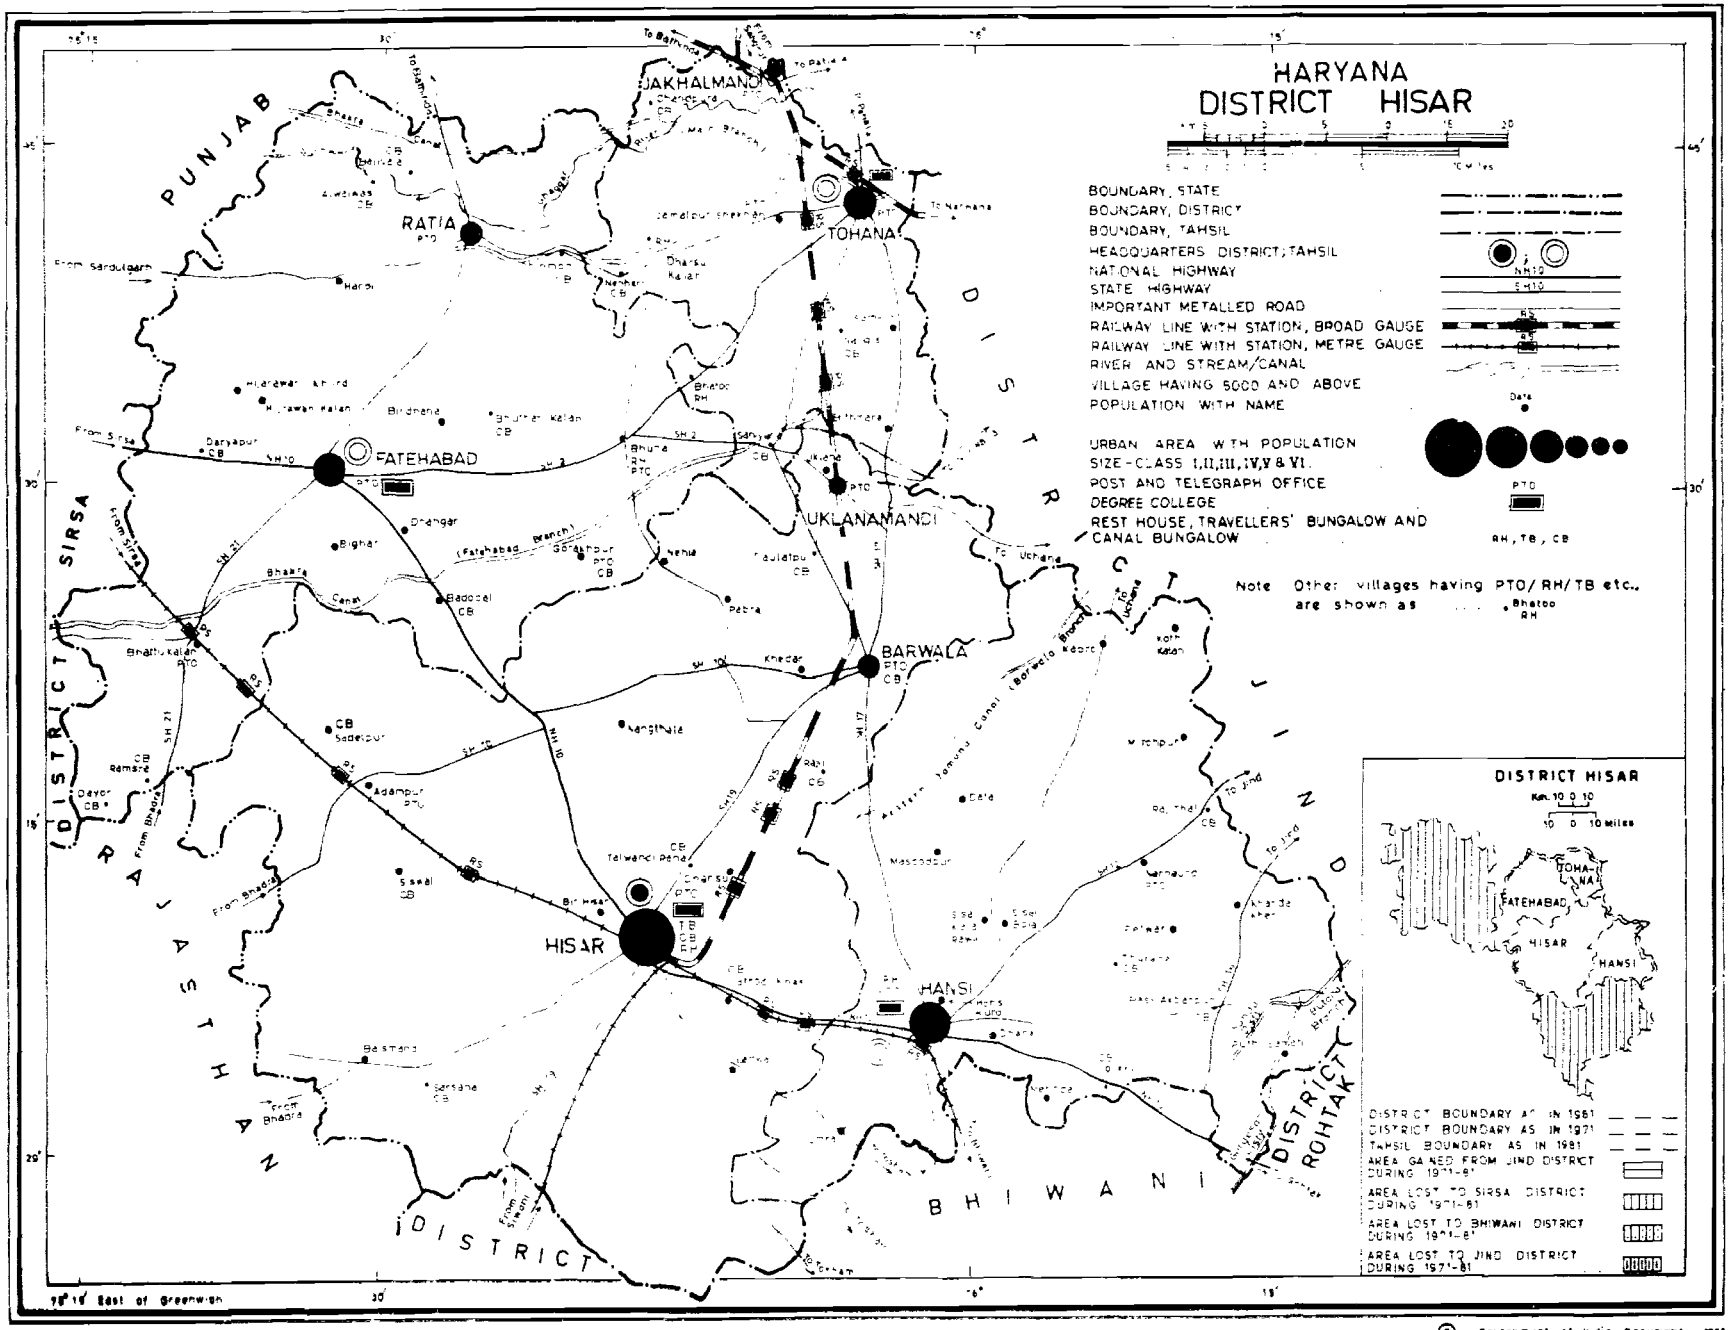

We have also to acknowledge the valuable assistance rendered by Shri Sudershan Kumar Gupta, Joint State Editor (Gazetteers), Haryana in drafting the chapter on 'History and Archaeology' of this Handbook.

The maps included in the Handbook and cover design were prepared in the Map Section headed by Shri J.P. Purohit, Cartographer under the supervision of Shri S. R. Puri, Research Officer (Map). We have also to mention the assistance rendered in the preparation of the draft of this Handbook by Shri J. N. Suri, Assistant

Director, Shri S. R. Puri, Research Officer and Shri P. N. Modgil, Research Officer.

We have to record with gratitude the valuable guidance provided by Shri N.G. Nag, Deputy Registrar General (Social Studies) and Dr. B.K. Roy, Deputy Registrar General (Map). Our thanks are also due to Shri M.M. Dua, Senior Research Officer, Shri S.C. Srivastava, Assistant Central Tabulation Officer and their staff in scrutinising portions of this Handbook relating to their respective branches in the office of the Registrar General, India.

This brief section on acknowledgements is by no means exhaustive and there are many more unnamed people to whom our thanks are due but before we close we must thank Shri K. M. S. Pillai, Controller and Shri P. Oommen, Deputy Controller of Printing and Stationery, Chandigarh Administration, for making a good job of the printing of this Handbook.

	Uninhabited	328	8
Number of Towns		81	8

ANALYTICAL NOTE

CONCEPTS AND DEFINITIONS

It has been the tradition of the Indian Census to present Census data for rural and urban areas separately. In fact, in all the censuses throughout the world, this classification of census data into rural and urban units is generally recognised and data presented accordingly. But the distinction between rural and urban is not yet amenable to a single definition which could be applicable to all countries.

The Village defined

The definition of the village adopted in our State for the Census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is, as such, exclusively administrative in character. From this point of view, a village is better called a Revenue Estate, meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The Revenue Estate or 'Mauza' the name given to the village in the Punjab Land Revenue Act, 1887,has accordingly been defined "as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate". This definition of village has been adopted for the purposes of the Census ever since the year 1901. The village, therefore, is not merely the inhabited area (*abadi deh*) of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

Urban area defined

After considerable thought, the following definition of an urban unit adopted at the 1961 and 1971 Censuses has been retained with a minor variation for the 1981 Census :

(a) All places with a municipality, corporation, cantonment board or a notified area committee etc.

(b) All other places which satisfied the following criteria :

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

In 1961 and 1971 Censuses the males working in activities such as livestock, forestry, fishing, hunting and plantations, orchards and allied activities were treated as engaged in non-agricultural pursuits and therefore contributed to the 75 per cent criterion whereas in the 1981 Census these activities are treated at par with cultivation and agricultural labour for the purpose of this criterion.

In addition to all municipal areas/cantonment boards, four villages namely (1) Babiyal in Ambala district, (2) Samalkha in Karnal district, (3) Gurgaon (rural) and (4) Jharsa in Gurgaon district satisfying the above criteria have been treated as census towns (non-municipal) in 1981 Census. Panchkula Urban Estate in Ambala district has also been treated as a town. The Faridabad Complex Administration consisting of Faridabad, Faridabad Township and Ballabgarh towns of 1971 and some surrounding villages, in Faridabad district has been treated as an independent town. The total number of towns in the State in 1981 Census has thus risen to 81 as compared to 65 in 1971 Census.

What is a Census House

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purpose or for both.

What constitutes a Household

A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called

"Institutional households". By 'Houseless Household' is meant a household, the members of which do not have a house to live in and spend the night on foot-paths etc. There may be one member households, 2 member households or multi-member households. For census purposes each one of these types is regarded as a 'household'.

Definition of Scheduled Castes/Scheduled Tribes

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

"Scheduled castes" mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

"Scheduled tribes" mean such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of scheduled castes and scheduled tribes for each State and Union Territory. Accordingly, the Scheduled Castes and Scheduled Tribes are listed under a Presidential Order for each State and Union Territory. In the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, as amended up to date, as many as 37 castes are listed as Scheduled Castes in the State of Haryana. There is, however, no Scheduled Tribe, listed as such, in Haryana State.

Who is literate

A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Worker defined

Like 1971 Census, a worker in 1981 Census is a person whose main activity is participation in any economically productive work by physical or mental activity. Work involves not only actual work but also effective supervision and direction of work. The main worker is one who has worked for 183 days or more in a year in one or more than one economic activity. A person who has worked for less than 183 days in a year is considered a marginal worker.

And a Non-worker

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

Connotation of Cultivator

For purposes of the Census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cutivation of land owned or held from Government or held from private persons, or institution for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Who is Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

Meaning of Household Industry

Household industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

Standard Urban Area explained

The concept of the Standard Urban Area which was adopted for the first time in 1971 envisaged a constant statistical spatial reporting unit which was to serve as the basis of urban development planning for the concerned city or town. The Standard Urban Area is defined as "the projected growth area of a city or town havidg 50,000 or more population in 1971, as it would be in 1991, taking into account not only the towns and villages which will get

merged into it but also the intervening areas which are potentially urban. Thus, it is a long term planning area and is to remain as a statistical reporting unit during the three successive Censuses-1971, 1981 and 1991".

In the case of Haryana, the following eleven Standard Urban Areas were delineated:

1. Ambala
2. Bahadurgarh
3. Bhiwani
4. Faridabad Complex Administration (previously known as Faridabad-Ballabgarh Complex).
5. Gurgaon
6. Hisar
7. Karnal
8. Panipat
9. Rohtak
10. Sonipat
11. Yamunanagar-Jagadhri

The concept of Urban Agglomeration

The concept of Urban Agglomeration adopted for the first time during the 1971 Census was an improvement on the concept of town group adopted in the 1961 Census. An urban agglomeration, must form a continuous urban spread constituting a town and its adjoining urban out-growths or two or more physically contiguous towns together with continuous well recognised urban out-growths, if any, of such towns.

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though they are outside the statutory limits of the corporation, municipality or cantonment, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units ; at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining another such as a municipality and the adjoining cantonment and also other adjoining urban growths such as a railway colony, university campus, etc. Such outgrowths which do not qualify to be treated as individual towns in their own right are to be treated as urban appendages of the units to which they are contiguous.

In 1971 Census no place was recognised as a continuous urban spread deserving to be treated as an urban agglomeration in Haryana. However, the following four urban agglomerations have been delineated at the time of 1981 Census :—

Urban Agglomeration	Constituent towns or urban outgrowths
1. Yamunanagar (U.A.)	1. Jagadhri Workshop Railway Colony (M.C.) 2. Yamunanagar (M.C.) 3. Jagadhri (M.C.)
2. Hisar (U.A.)	1. Hisar (M.C.) 2. Haryana Agricultural University and Mini-Secretariat
3. Ambala (U.A.)	1. Ambala Cantt. (C.B.) 2. Ambala Sadar (M.C.)
4. Gurgaon (U.A.)	1. Gurgaon (M.C.) 2. Gurgaon Census Town

THE DISTRICT

The present Hisar district comprises the tahsils of Fatehabad, Tohana, Hansi and Hisar. At the time of 1971 Census the two tahsils of Dabwali and Sirsa now forming Sirsa district and two tahsils of Bhiwani and Loharu now in Bhiwani district were part of this district. The tahsil of Tohana was created in 1972 and now consists of 88 villages and two towns Jakhalmandi and Tohana. Tahsil Fatehabad has 152 villages and two towns Fatehabad and Ratia, tahsil Hansi has 103 villages and one town Hansi whereas tahsil Hisar comprises 167 villages and three towns Uklanamandi, Barwala and Hisar. With a population of 1,496,534 as per 1981 Census Hisar ranks first among districts with 11.58 per cent of the total population of the State. Being 6,315 sq. kms. in area it occupies 14.28 per cent of the total area (*44,212 sq. kms.) of the State and areawise also ranks first in the State. Haryana has on an average 292 persons per sq. kilometre, with Faridabad district as the most thickly populated (466) and Sirsa as the sparsest (165). Hisar district with 237 persons per sq. kilometre ranks tenth among the twelve districts of the State and can be considered as sparsely populated. Details of jurisdictional changes that occurred in the various tahsils of the district upto 31-12-79 are given below :—

Name of Tahsil	Year	No. of villages	Transferred from tahsil	No. of villages	Transferred to tahsil
		Gained		Lost

*Provisional

In Hisar tahsil, village Mangali Jhara was bifurcated into two villages namely Mangali Jhara and Singhrani.

The district lies between 28° 53′ 45″ and 29° 49′ 15″ North Latitude and 75° 13′15″ and 76° 18′ 15″ East Longitude. On its north are the districts of Bathinda and Sangrur of Punjab, To its east is the district of Jind. Rohtak district lies on its southeast. On its south is the district of Bhiwani. To its southwest is Ganganagar district of Rajasthan. Sirsa district lies on its west.

Since the last Census of 1971, there have been many changes in the boundaries of some of the existing districts and some new districts have also been formed. The new districts are Kurukshetra, Sonipat, Faridabad, Bhiwani and Sirsa. Thus increased the number of districts to 12 in 1981 as against 7 in 1971. The figures presented in this volume adhere to the boundaries of administrative units as on 31st December, 1979. They cover 39 tahsils and 81 cities/towns including the four census towns in the State.

District Census Handbook

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook (DCH) consisting of Village and Town Directories and Village and Townwise Primary Census Abstract (PCA).

Prior to 1951, District level Census data formed part of general reports and tables. Publication of District Census Handbooks as independent publications began from 1951 Census only.

In 1961, attempts were made to make the District Census Handbooks more informative and these contained valuable Census data for each village and town of the district, indicating some basic amenities available in the villages. In 1971, the scope and coverage of both census and non-census statistics was further enlarged and the District Census Handbooks were published in two volumes, first containing the two Parts A & B and the second comprising Part-C alone:—

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

The publication of Part-C was considerably delayed because of delay in getting the administrative statistics from the various departments So, Part-C has been dropped this time. Moreover, the administrative statistics would be available to the data users from the publications of the respective departments.

Part-A of the 1981 District Census Handbook contains Village and Town Directory and Part-B contains Village and Townwise Primary Census Abstracts. Both the parts have been combined together in this volume. A tahsil map showing the village boundaries, the location code numbers of the villages, the distribution of various amenities in villages and the size class of their population, has been given in the beginning of Section I—Village Directory. An alphabetical list of villages in each tahsil has also been given, along with a note explaining the codes used in the Village Directory. The codes used in the Town Directory have been explained at the beginning of Section II—Town Directory.

SCOPE

Village Directory

Amenities and land use

The Village Directory provides certain basic data separately for each village, the villages in the district having been arranged tahsilwise and within the tahsil, location codewise. At the time of Census enumeration each village was assigned a code number for purposes of identification.

The format of the village directory follows the pattern canvassed in 1971 Census except for a few additional columns. The column for total population and number of households has been added to facilitate analysis of the village directory data. The column for approach to village is aimed at having an idea of the number of inaccessible villages in a district. All the amenities except power supply in the village have been brought together with the instructions that if an amenity is not available in the village a dash(—) may be shown against the same in the relevant column but next to it the distance from the village of the nearest place where the facility is available may be given in broad ranges in brackets, the ranges being ; "(—5 kms)", "(5—10 kms)" and "(10+kms)."

The Village Directory, therefore, contains information about the total area of the village (Column 3); total population and number of households (Column 4); and availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, day(s) of the market/hat and communications (Columns 5 to 10). In Columns 11 to 13, approach to village, nearest town and distance and availability or otherwise of power supply have

been indicated. Column 14 shows the staple food of the people of the village. The area under different types of land use such as area under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and the area not available for cultivation has been given in Columns 15—19. In Column 20 have been indicated the places of religious, historical or archaeological interest along with the information regarding newspapers, motorcycles/scooters, cars/jeeps and tractors. The data presented in the village directory has been collected from the District/Tahsil revenue agency.

Appendix 1

This Appendix gives for each tahsil the number of villages having various levels and types of educational institutions, such as primary schools, middle schools, adult literacy centres etc. along with their number, various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as taps, tubewells etc., post and telegraph offices, power supply, railway station, bus stop etc. and also the number of villages not having these amenities.

Appendix 2

This Appendix gives for each non-municipal town (i.e. place treated as town only for Census purposes) the area under forest, irrigation, unirrigated land, culturable waste land and area not available for cultivation. But it remains blank as there is no such town in Hisar district.

Appendix 3

This Apendix gives the list of villages where no educational, medical and public health facilities are available.

Appendix 4

This Appendix gives the list of villages with Scheduled Castes population in various ranges of proportion Information is presented by the ranges 0—5 per cent, 6—10 per cent, 11—15 per cent, 16—20 per cent, 21—30 per cent and 31per cent and above.

Town Directory

The Town Directory consists of seven statements almost similar to those adopted for 1971 Census. These statements have been compiled from the information supplied by the local bodies. A few new columns have been introduced with a view to facilitating analysis of the data. A significant addition is of class of town in every statement because the infrastructure of amenities and facilities found in urban areas can be analysed by taking the class of town into consideration. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose.

The columns on Scheduled Castes population in statement IV and adult literacy classes/centres in statement V have been provided keeping in view the Minimum Needs Programme of the Planning Commission.

Again if the fire fighting service as in statement IV and medical or educational facilities as in statement V are not available in the town, the name of the nearest town if in the same district or the name of the nearest district if in the same State or other State where available along with its distance from the referrent town is given. This is a new feature of 1981 Census as it is necessary to identify the areas with no specific facility in every district. Details contained in each statement are given below.

Statement I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, density, sex ratio and population/growth rate. In case a town did not enjoy urban status at any Census, the relevant columns under the headings 'Population and growth rate of the town at the Censuses of' and 'Sex Ratio' have been left blank. Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1981 Census population of the core town as follows:—

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Statement II gives the physical aspects of the various towns in the district. Data regarding minimum and maximum temperature is not available for any town in the district except Hisar. Rainfall data is available for all the towns except Barwala, Jakhalmandi, Ratia and Uklanamandi.

Statement III indicates the position of Municipal Finances for the year 1978-79. Income and expenditure figures have been given in Rs. '00' in respect of each town in the district.

Statement IV shows civic and other amenities viz., roads, system of sewerage, number of latrines, method of disposal of nightsoil, water supply, fire-fighting service and the number of electric connections as available during the year 1979. Sewerage facilities are available in the towns of Fatehabad, Hansi, Hisar, Tohana and Uklanamandi in addition to open surface drains whereas the towns of Barwala and Ratia are served by open surface drains only and Jakhalmandi by sewerage only. In all the towns except Ratia the method of carriage of nightsoil is by wheel barrows. In Ratia the practice of carriage of nightsoil as head load still continues. Fire-fighting service is available in Fatehabad, Hansi, Hisar and Tohana towns.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns. In this district Hisar is a Class I town and Hansi Class II town. Some slums exist in Hisar town only. Paved roads and electric connections (domestic as well as road lighting points) are available in some of these slums. Taps for supply of protected water have also been installed.

Statement V reflects the position of medical, educational, recreational, cultural and working women's hostel facilities for each town in the district during the year 1979. Under the heading medical facilities, the number of hospitals/dispensaries/T.B. clinics etc., has been shown separately along with the total number of beds available. Under the heading educational facilities, number has been given separately of Arts/Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training Institutions, Higher Secondary/Secondary/Junior Secondary/Middle/Primary Schools and Adult Literacy Centres. The extent of availability of recreational and cultural facilities is reflected in the number of stadia, cinemas, auditoria and public libraries.

The towns of Barwala, Jakhalmandi, Ratia and Uklanamandi do not have any college. There are five colleges—two Arts and Science colleges, one Science college and two Arts, Science and Commerce colleges in Hisar, two Arts and Commerce colleges in Hansi, one Arts and Commerce college in Fatehabad and one Arts college in Tohana. There are fifteen Vocational Training Institutions in the district—twelve in Hisar, two in Hansi and one in Tohana.

In Statement VI information regarding three most important commodities imported/exported and manufactured has been given along with the number of banks, agricultural credit societies and non-agricultural credit societies. Ginned cotton, agricultural implements, steel tubes, etc. are among the important items manufactured in the district.

Primary Census Abstract of general population

(*i*) *District Primary Census Abstract.*—In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each tahsil separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

(*ii*) *Tahsil-wise Primary Census Abstract.*—Here figures for each village and town (and within the town ward-wise) in a tahsil have been presented.

At the time of Census enumeration, enumeration blocks were formed in the villages, each block consisting of about 750 persons and in the towns, each block consisting of about 650 persons. But the data have not been given for each block separately in the case of rural areas. In the case of urban areas total population and Scheduled Castes population have been shown blockwise in the appendix. Data in Columns 6—28 of the Primary Census Abstract have been given sex-wise. During 1971 Census break-up of workers into nine industrial categories was given whereas categories III, IV, V(b) and VI to IX have been combined together while presenting 1981 Census figures. A new concept of 'Marginal Worker' has been introduced this time.

Appendix

This Appendix gives at urban block level the total population and Scheduled Castes population.

Primary Census Abstract of Scheduled Castes population

In the District Primary Census Abstract of Scheduled Castes population figures have been presented for the district as a whole as well as for each tahsil/town separately.

PHYSICAL ASPECTS

The district has a hot and dry climate. The rainfall is meagre and unreliable, which is mainly concent rated during monsoon. The rainfall during 1979-80 was only 21.7 centimetres against 57.8 centimetres during 19 77-78 and 49.5 centimetres during 1978-79. The district is dotted with sand-dunes of various shapes and sizes particu larly in the south-western parts where steppe type of vegetation is available. The district is alluvial plain except a flood plain of Ghaggar river in the north and sand-dunes topography in the southwest. The soils in the district are sandy and loamy sand (*Bagar*) relatively sandy loam, silty clay (*Naili* and *Chhachhra Dakar*) and loam (*Bhangar* and *Na rdak*). Underground water level in the north and north-east is comparatively high whereas it is low in the south and south-west. Due to a dense net work of canals, the cropping pattern in the area has undergone a change and cotton cultivation is becoming popular giving a hope of prosperity to the farmers.

ECONOMY

The economy of the district is primarily agricultural. At the time of 1981 Census, about 69 per cent of the total main workers were cultivators and agricultural labourers. Till the beginning of this century, the pattern of industrialisation remained mainly agriculture-oriented and need based. About 15 factories had come up there for cleaning and processing of cotton by 1904 A.D. Subsequently this number increased. In fact, the real industrial development took place after the country became independent. After the inception of Haryana in 1966, the industrial horizon of the district was further expanded.

There were 196 registered working factories in the district during the year 1979 and estimated number of workers employed in them was 7,323. 103 of these factories manufacture cotton textiles and 31 food products. The large and medium scale units are engaged in producing cotton and synthetic yarn, steel ingots/billets, hot rolled strips, bloom glass, plates, oxygen gas, ERW steel tubes, pipes and tubes etc. Hisar Textile Mills, Haryana Concast Limited, Jindal Strips Limited, Haryana Tube Manufacturing Company (Pvt.) Limited, Nav Bharat Steels (Pvt.) Limited, Jindal Industries Limited, Ravindra Tubes Limited at Hisar and Hansi Cooperative Spinning Mills at Hansi are some such units. Besides, there are many small scale units in the district and these are dominated by agro-based units like dal mills, cotton ginning factories, oil mills etc. Besides agro-based products, these units are engaged in the manufacture of furniture, wire drawing, air guns, surgical cotton, cycle tubes, nuts and bolts, steel re-rolling, fire bricks etc. The main cottage industries in the district are shoe making, carpentry, blacksmithy, tanning, pottery and weaving.

Irrigation in the district mostly depends upon canals. Area under canal irrigation during 1979-80 was 360 thousand hectares. Area under cultivation of foodgrains and cotton was 424.1 and 148.9 thousand hectares respectively during the year 1979-80. Among the foodgrains, mostly wheat, gram and bajra are grown. In 1977, the number of livestock in Haryana was 6,904,800 which includes cattle, buffaloes, horses and ponies, donkeys, sheep, goats, camels, and pigs etc. Hisar district contributed 812,600 animals to this figure and these mainly include cattle, buffaloes, sheep and goats. During 1979-80, the number of different types of motor vehicles on road was 93,583 in the State out of which 12,895 came from Hisar district.

HISTORY AND ARCHAEOLOGY

Brief history

The district derives its name from its headquarters city, called Hisar which is an abbreviation of Hisar-e-Feroza, the name acquired by the original town of Warais, as a result of construction of a fort (Hisar) by Feroz Shah Tughlaq about A.D. 1354.

Hisar district has yielded rich pre-Harappan sites of Banawali, Rakhigarhi (Rakhi Shahpur and Rakhi Khas) and Siswal, which take us back to the first half of the 3rd Millennium B.C. and possibly even earlier. The earliest settlers in the district were pre-Harappans. They were followed by Harappans, whose significant settlements so far known were Banawali, Rakhigarhi and Siswal. The disappearance of Harappan culture was probably caused by the diversion of the courses of the vedic rivers Sarasvati and Drishadvati and their gradual drying up as a result of the great flood mentioned in early literature and now confirmed by archaeological findings. The region was associated with the vedic tribes like Bharatas, Purus, Kurus, Mujavats and Mahavrishas. It was almost certainly a part of the Kuru Kingdom and with the dawn of the historical period it came under the rule of the Nandas and Mauryas. During 2nd century B.C., Agras came into prominence at Agroha. Towards the end of 2nd century B.C. or the beginning of 1st century B.C., they were subjugated by Indo-Greeks later supplemented by Sakas. The region thereafter formed part of the Kushana empire as gathered from discovery of their coins from Hansi. The Yaudheyas played an important part in the decline of the Kushanas and possibly controlled this area for some time. In 4th century A.D. it was subjugated by Samudragupta and after the Guptas overtaken by the Hunas. In the 7th century A.D. the district formed part of the empire of the Pushpabhutis who initially ruled from Thanesar till Harsha shifted his capital to Kannauj. Later in the 9th century A. D. the Pratiharas established their hold over the region.

The early 10th century saw the Ghaznavid inroads into the district. Sultan Masud led expeditions to Agroha and Hansi, at the latter place he faced a strong resistance. Masud's son Majdud was appointed Governor of Hansi

but later, his brother Mauded, the Governor of Ghazni, who managed to kill him, brought the region under his direct administrative control. The tradition attributing the foundation of Hansi to Anangapala, a Tomara ruler of Delhi, and the discovery of Tomara coins from Hansi and other places from the adjoining district probably suggest their re-capture of Hansi from the Ghaznavids, which, however, they soon lost to the Chauhans. The Chauhans seem to have taken special measures for protecting the area against Muslim incursions which however proved futile and the district alongwith Agroha and Hansi finally passed under the Muslim rule after the defeat of Prithviraja III in the second battle of Tarain (1192). Delhi, Ajmer, Sirsa and Hansi fell into the hands of the Muslims but they appear to have established no settled administrative control over the tract. In 1290 the district slipped into possession of the Khaljis who were followed by the Tughlaqs when in the time of Feroz Shah Tughlaq the district received special attention. The new ruler came to have somewhat unusual fancy for the tract, founded the towns of Fatehabad and built a fort at the site of the present town naming it 'Hisar-e-Feroza'. He also built canals to bring water to the tract and the Western Yamuna Canal was first got dug up by him in an existing dry bed, probably of the old Drishadvati river.

The year 1398 witnessed the invasion of Timur, more commonly known as Tamarlane. Timur, the fierce invader met the stiffest resistance in Bikaner and he then marched to Fatehabad via Sirsa. Ahruni, which probably corresponds to Ahrwan and Tohana were sacked and the inhabitants fled. The Tughlaqs were no match to the fierce invader and he left the area in chaos and confusion after his retreat.

In 1408, Hisar fell into the hands of the rebels but Muhammad Tughlaq recovered Hisar. In 1411, however, the area of Hansi came into the hands of Khizar Khan, who subsequently in 1414 ascended the throne of Delhi as the first of the Sayad dynasty. During the rule of Lodis the tract of Hisar or rather Hariana continued to form part of Delhi empire and was granted as a fief to one Muhabbat Khan in the reign of Bahlol Lodi.

The town of Hisar-e-Feroza appears to have been the headquarters of an imperial garrison at the time of Babar's invasion and it was a strategic centre in the operations prior to the battle of Panipat in 1526. On reaching Ghaggar, Babar learnt that troops from Hisar were advancing against him, he accordingly despatched Prince Humayun who took over the town which Babar formally gave him as a reward for his success in the military expedition.

During the reign of Akbar, Hisar was the headquarters of the revenue division or Sarkar of 'Hisar-e-Feroza', in the subah or province of Delhi. At the time of Aurangzeb's death in 1707 Nawab Shahdad Khan was Nazim of Hisar Sarkar. He ruled upto 1738 whereafter Bilochs of Farrukhnagar held sway upto 1760. During Biloch rule the district became a scene of triangular contest between the Sikhs of the northeast, the Bhattis of the north and north-west and the Muslim chiefs of the south. In 1774, Maharaja Amar Singh of Patiala took Fatehabad and Sirsa and annexed Rania held by Bhatti Muhammad Amir Khan.

In 1781, an agreement was reached under the treaty of Jind which restored the parganas of Hansi, Hisar, Rohtak, Maham and Tosham to the Delhi empire, gave Fatehabad and Sirsa to the Bhattis and left the remaining territories with the Sikhs. Raja Jai Singh was appointed Nazim of Hisar.

The last noteworthy actor in the history of the district before the advent of the British was the Irish adventurer, George Thomas who occupied the district and the adjoining areas in Hariana with his capital at Hansi and lorded over the area till he was driven out from here by the Sikh-Maratha-French confedracy.

In the beginning of the 19th century, the British East India Company appeared on the scene and the Marathas were ousted and Treaty of Surji Arjungaon was signed in 1803 by which Hariana along with Hisar district came under British rule. A British garrison was stationed in Hansi fort and Mirza Ilias Beg was appointed Nazim for the districts of Hisar and Rohtak. In 1810, the British led a force against the Bhattis. It captured Bhiwani and proceeded to Fatehabad, where the Bhatti chief was defeated and his territory was wrested by the Company who placed Gardiner incharge of the district with headquarters at Hansi.

In the Uprising of 1857, the people of Hisar district played a significant part. The sturdy Jats, Ranghars, Rajputs, Bishnois and Bhattis rose up against the British. The Hariana Light Infantry and 14th Irregular Cavalry revolted and by June, 1857, the entire district of Hisar was out of British control. But soon the district was brought under control and General Van Cortlandt marched with 550 men and restored order in Sirsa, Hisar and Hansi. The Hansi fort was completely dismantled and the Hariana tract alongwith the Hisar district was merged with Punjab.

Towards the close of the 19th century, there was general awakening among the people. A number of organisations were born of which the most significant was the Arya Samaj. Lala Lajpat Rai who practised as lawyer at Hisar, organised the Arya Samaj in 1886 and brought political awakening in the people. Congress party started its activity and the people of the district participated in the Rowlatt agitation 1919. Hartal was observed in Hisar and processions were taken out. The people of Hisar participated in Non-cooperation movement of 1920, Civil Disobedience movement of 1930 and Quit India movement of 1942. Many officers and soldiers from the district joined Indian National Army and two officers and 51 soldiers laid down their lives fighting for India's liberation.

Earlier in 1820 the north-western district of Delhi territory was divided into two separate districts, the northern and the western. The western district included Bhiwani, Hansi, Hisar and Sirsa with headquarters at Hansi. Four years later Bhiwani was attached with Rohtak and in 1832, its headquarters were shifted to Hisar. Ratia and Tohana areas were added to Hisar district and Sirsa (then called Bhatiana) was formed a separate district in 1837. In 1861, Bhiwani was again added to Hisar and in 1884, Sirsa district also came to be merged in it. The Provinces and States (Absorption of Enclaves) Order, 1950, enlarged the district further and added to it the erstwhile princely State of Loharu, withdrawing from it 15 villages at the same time. In 1961, the district consisted of the five tahsils of Hisar, Hansi, Fatehabad, Sirsa and Bhiwani. In 1968, the Sirsa tahsil was bifurcated into Sirsa and Dabwali and Bhiwani tahsil split up into Bhiwani and Loharu. Four years later in 1972 the tahsils of Bhiwani, Loharu and a few villages of Hisar and Hansi were excluded and formed into a separate district of Bhiwani. In 1975, Sirsa and Dabwali tahsils were excluded and Sirsa district was carved out leaving the district of Hisar in its present shape.

PLACES OF INTEREST

Banawali (Tahsil Fatehabad)

Banawali, an important Harappan site, lies 14 kms north-west of Fatehabad. The proto-historic mound spread over a quarter square kilometre was first occupied about the first half of the 3rd Millennium B. C. by a proto-urban chalcolithic community succeeded by the people of Harappan culture around 2300 B.C.

Banawali is the latest pre-Indus and Indus site of urban dimensions added to the archaeology of the Indian sub-continent and rivals in importance sites like Kotdiji and Chanhudaro (Sind-Pakistan), Kalibangan (Rajasthan), Surkotda and Lothal (Gujarat), Rakhigarhi and Mitathal (Haryana).

Excavations have revealed a well constructed fort-town of the Indus times overlying an extensive proto-urban settlement of the pre-Indus culture. A fairly coherent picture can be conjured up after piecing together the ancient relics that have been discovered. The people here lived in brick houses and used pottery and implements made of copper, bone and stone. They used beads and bangles as ornaments.

The town planning at Banawali is similar to that of the other Indus cities. Two sub-joined fortified areas, have been sub-divided into various house-blocks. Broad uninterrupted north to south thorough fares are met at right angles by east to west lanes and alleys. Beautiful dishes-on-stand, fruit stands, 'Kalash', jars with 'S' shaped necks, storage or sanitary jars, perforated jars, numerous vases, cooking handies, beakers, basins, goblets, chalice cups, handled cups etc. are the principal items of Indus pottery recovered at Banawali.

Another interesting find are the clay seals. One of those bears a three lettered epigraph and an engraved syncretic animal with a tiger's body and the bull's head. Other seals show a wild goat and ibex, while yet another seal contains an inscription. These seals were probably used for sealing packages of commercial goods or as passports or tokens of identity.

Rakhigarhi (Tahsil Hansi)

Perhaps the most extensive of the known Harappan sites in India Rakhigarhi lies on the north-east of Hansi at a distance of about 32 kms. on the Hansi-Jind route. Its dichotomous plan indicated by the twin mounds is typically Harappan. Its location some 350 kms. to the east of Harappa, 190 kms. east of Kalibangan and 80 kms. to the east of Banawali, might suggest Rakhigarhi to be the eastern-most provincial capital of the Harappans. The ancient site lies in the revenue jurisdiction of the present twin villages of Rakhi Shahpur and Rakhi Khas in Hansi tahsil. Among the characteristic other Harappan finds are bangles and beads of terracotta, a chess board like design drawn on a brick piece, a seal bearing a line of Harappan character, chert blades and massive mud brick constructions at regular intervals etc.

Siswal (Tahsil Hisar)

Siswal lies about 26 kms. west of Hisar on Hisar-Sirsa rail route while the mound of the ancient site (300 × 200 metres) is located about 300 metres to the north of the village.The old course of Drishadvati is perhaps traceable in the meandering depression south of the site. The wells dug out in the dry bed have shown considerable deposits of river sand.

The site has been excavated on a very limited scale, however, the ceramics and other finds from here testify to a contact between the pre-Harappan and Harappan cultures and concomitance of the late Siswal culture with mature Harappan culture.

The ceramics discovered from the site are divisible into 3 groups. The first is Kalibangan where, with all the typical fabrics and painting with white pigment in addition to black. The overall pattern of painted designs show individualistic features but the design elements are common Kalibangan. The second is marked by evolved Kalibangan and is characterised by austerity in shapes and designs, the absence of the use of white pigment and better potting. The pottery is painted in black or chocolate over red or pinkish surface with linear designs. The third is a Harappan type made of medium fabric thrown on fast wheel and treated with bright red slip in case of storage jars and with light red slip in case of other vessels.

The other finds include terracotta bangles painted with black oblique strokes on the exterior, biconical truncated terracotta beads, terracotta sling balls—oblong in shape bearing finger pressed marks on sides in the typical Harappan style, terracotta disc with tapering ends and terracotta triangular cakes etc.

Agroha (Tahsil Hisar)

Situated at a distance of about 24 kms. from Hisar on the Delhi-Sirsa road, Agroha has a series of rolling mounds of varying heights, occupying about 650 acres of land towards its north-west. Tradition has it that Raja Agra, later named as Agra Sain, used to live here and the remains of the fort on the top of the mound are connected with his residence. It is said that Agroha owes its origin to Agra Sain and the ancient name of the town was Agrodaka as revealed on the coins found during the excavations. The place has been referred in the Mahabharata and Ashtadhyayi and is believed to represent the capital of Agroha republic. The fort on the top was however constructed by Dewan Nanu Mall, Commander of Patiala forces between 1774 and 1777 A.D.

In the medieval period Agroha has been described as 'Agrah' a flourishing town forming an important division of 'Hisar-e-Feroza'. The severe famine in Muhammad Tughlaq's time caused considerable havoc in the area and it became a deserted city as reported by Ibn-i-Batuta. The latter gives an account of the demolition of the Hindu temples and buildings and the utilisation of the material by Feroz Shah Tughlaq in constructing 'Hisar-e-Feroza'.

The important finds from the site include big earthern jars with incised lines around spouted jars, handies, incense burners, cups, lids, dishes, four colour boxes, a decorated rattle, a small model shrine, shell bangles, two round terracotta decorated tablets, clay seals, a number of terracotta human and animal figurines and some copper objects etc.

Excavations at the mound have shown that it covered a well planned city. Baked brick walls, cemented floors and well built roads bear tell-tale signs of fire. Mounds of ash indicate that fire burnt the city down. Two pots of coins were recovered from here. One pot had five silver coins. These coins have a sun and a tree engraved on them. The second pot contained fifty-one square coins. Both the types of coins are stated to belong to the 2nd century B. C.

Hansi (Tahsil Hansi)

Hansi was once a formidable fort town on the Imperial road from Delhi to Lahore and Multan. Like many ancient ruins of Haryana, its antiquity is shrouded in mystery. But it is certain that its ancient name, on the eve of the Muslim conquest of India, towards the close of the 12th century, was 'Asika' as is recorded in the Hansi and Bijolia inscriptions of Prithviraj and contemporary Jain literature. The local people still call it Assi, not Hansi, as the muslim chroniclers misspelt it.

Under the early Pathan rulers, Hansi became a strong strategic fort. The emergence of the new towns of Fatehabad and Hisar in the 14th century A. D., however, relegated it into insignificance. At the turn of 18th century, George Thomas, an Irish free-lancer carved out a kingdom with Hansi as its nucleus. Later in the mid 19th century it became the headquarters of a British mercenary, Colonel Skinner, who raised the famous cavalry, Skinner's Horse.

Notwithstanding its political eclipse during the longer part of Muslim rule, Hansi continued to remain a centre of religion and learning. That aspect of its personality owes much of its association with the famous Sufi Saint, Baba Sheikh Farid, who spent twelve years in a little den here. The four qutbs, the disciples of Baba Farid, kept their connection with the shrine. It is true, much of its past is lost to time and much lies buried in the folds of the earth. The following are the important historical monuments of the Qila group:—

Barsi Gate—This is an important gate in the outer defences of the Hansi fort. A persian epigraph set up above the doorway, records the date of its construction, which corresponds to 1302 A.D.. It is a fine example of fort architecture.

The Gateway Complex of the Citadel—Standing on the roof-top of the Barsi gate, one can see, looking towards the north, at the foot of the imposing mound, another gateway complex called George Gate in perfect alignment with the former. The latter is provided in the southern inner wall giving access to the citadel, which is now in ruins. While going round the whole complex, one cannot fail to notice that the material of the old Hindu palaces and temples was freely made use of in its construction. There are two fine sculptured friezes, depicting a row of swans in different poses, now fixed one each in the gateway complex and the other in the Baradari.

Baradari—After climbing up the steep ascent of the mound, one reaches a long pillared structure called Baradari near the eastern brow of the mound, held by a mountainous defensive wall. Originally, this might have been a pillared hall of early Muslim architecture, in which the building material of old Hindu monuments was freely used.

Sayyid-Shah-ki-Khangah and the associated structures—At the northern end of the extensive mound, there is a group of structures, popularly known as Khangah, having a tomb of Sayyid-Niamat Ullah, who died here fighting during the campaign of Muhammad Ghori in 1191-92 A.D. In course of time, it became a sacred place for the Hindus as well. A fair is held every March. There are inscriptions in Arabic engraved on slabs or incised in

plaster. It is clear from these epigraphs, as well as the architecture, that it underwent successive changes in the past. Today, it is a small complex of monuments bearing a deserted look.

The second group popularly known as Chahar Qutbs group of medieval monuments is located to the west of the town and represents one of the important centres of the Chistia Order of Sufism in Haryana. These are:—

The Chahar Qutbs.—The tomb of the four qutbs, Sheikh Jamal-ud-din Hanswi, Sheikh Burhan-ud-din Sufi, Sheikh Qutb-ud-din Munawar and Sheikh Noor-ud-din. Jamal was the son of Hamid-ud-din and nephew of Niamat Ullah. On his father's death, he was given the administration of Hansi but he preferred religious order. He became the disciple of Baba Sheikh Farid of Pak Pattan. The tomb, which houses the mortal remains of these qutbs and some of their family members, is a domed structure of no particular architectural significance, although its historical and religious value is undeniable.

The Tomb of Mir Tajarah.—The most beautiful tomb in the complex is that of Mir- Tajarah Chief Surveyor of Sultan Hamid-ud-din. Mir was a disciple of Jamal, and is said to have originally built this tomb for his teacher. But the latter is said to have remarked "who knows for whom it is intended". Incidentally, the former died earlier and was himself buried there.

The Tughlaq Mosque.—The most imposing edifice is the larger mosque in the northern enclosure. It was originally constructed by Feroz Shah Tughlaq, although according to legend, it was constructed out of the money offered by Muhammad Tughlaq to the last Qutb.

The Chhatri.—A square canopied tomb, locally called 'Chhatri' is a little monument over three metres across. Four carved sandstone pillars support the enamelled canopy, and it contains two graves, said to be the oldest in Hansi.

Columnated structure.—A little away, ten ornamented red stone pillars carry four canopies and provide shade over eight graves (now largely demolished) of the descendants of Qutb Jamal.

Tombs of James Skinner and his wife.—To the north-west of the tomb of Ali Tajarah stand two beautiful small square tombs hiding the bodily remains of Colonel James Skinner and his wife. The cut-plaster decoration is tastefully executed and bespeaks of the continued craft traditions coming down from the Mughals.

Fatehabad (Tahsil Fatehabad)

Fatehabad is a tahsil town important for cotton produce and historical monuments. It was named after Fateh Khan, son of Feroz Shah Tughlaq in A.D. 1352. An important monument is the 'lat' or a stone pillar of Feroz Shah measuring slightly less than 5 metres in height and 1.90 metres in circumference, at the base. It stands in the centre of the Idgah. About three and a half metres length of the pillar above the ground, is a monolithic block of yellowish buff sandstone which has close resemblance to a similar portion of the pillar, now standing in front of a mosque at Hisar. It is more than likely that both these once made up a single monolithic pillar, which might have been erected by the Mauryan Emperor, Ashoka, who caused pillars to be set up all over his empire, bearing his royal religious decrees. Its original place might have been Agroha or Hansi. The Ashokan epigraph that was once engraved on the pillar in Fatehabad has been systematically chiselled off for writing the Tughlaq inscription which records the genealogy of Feroz Shah, in beautiful Tughra-Arabic characters carved in high relief. The one and a half metre high upper part of the pillar is made of red sandstone pieces with partial use of marble.

Humayun ki Masjid is another monument. It is a small and unassuming but proportioned and enamel decorated little mosque. According to a legend, the Mughal Emperor, on his flight to Amarkot, after his fateful defeat at the hands of Sher Shah Suri, happened to pass through Fatehabad on Friday, and is said to have prayed at the mosque. Humayun's inscription was originally found here and later studded into the screenwall of the Idgah.

Hisar (Tahsil Hisar)

Hisar the headquarters of the district lies at a distance of 164 kms from Delhi. Its identification with Aishukari or Isukara, an ancient city of Kuru janapada is highly doubtful. The original name of the site was Warais as reported by the Muslim historian Farishta. In 1352 A.D. Feroz Shah Tughlaq ordered the construction of the fort and on its completion named the place 'Hisar-e-Feroza' in 1354. It later came to be abbreviated to Hisar. The town was completely surrounded by an old wall with four gates viz., the Delhi and Mori to the east, the Talaki to the west and the Nagori to the south. The Chief objects of antiquarian interest are the palace and mosque complex and Gujri Mahal.

The only remains of Feroz Shah's palace located in the fort, are underground apartments which still exist in good state of preservation. Nearby, there is a small mosque known as Lat-ki-Masjid. There is a brown sandstone pillar or 'Lat' in the mosque complex. There is an inscription in Sanskrit at the top of the lower stone of the pillar. The pillar appears to be an ancient Hindu one, probably brought from Agroha. The pillars supporting the mosque are also of an old temple. Another interesting relic of antiquity is perhaps the Baradari in the Gujri Mahal outside the fort. The walls of the Baradari are thick and sloping with 12 doorways each with a window over

it. Inside are four old pillars of undoubted Hindu or Jain origin which support a roof of domes. The inner side of the doorways of the tombs are covered with what are evidently Hindu carvings. Below the building were three taikhanas, two of which were rooms, while the central one contained a small hauz or tank filled with pipes and was evidently used as a bath. It seems that the building was erected with the materials of some old Hindu temple.

Tourist resorts

The State Government has provided oases of comfort, relaxation and recreation by creating tourist complexes for the road weary all over Haryana. These complexes include motels, restaurants and resorts. A tourist resort Flamingo is located in Hisar town on the National Highway No. 10. It provides facilities of a guest house, camping huts, a restaurant, a liquor vend and a bar.

ANALYSIS OF DATA

The following inset tables in this volume are based on the data compiled in the Village and Town Directory and the Primary Census Abstract.

Table 1 below indicates the population sexwise separately for rural and urban areas at district and tahsil level along with the number of villages and towns as per 1981 Census.

TABLE 1

Population, Number of Villages and Town, 1981

Sl. No.	Name of Tahsil	POPULATION									No. of Villages		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F

5	VI. Jakhalmandi (M.C.)	161·03	41·57	119·46	142·61	21·59	14·43	7·05	1·08	98·46
6	IV. Ratia (M.C.)	32·17	22·40	9·77	30·69	14·31	3·27	11·17	0·59	1·35
7	III. Tohana (M.C.)	53·70	33·04	20·66	46·84	9·78	30·16	3·55	0·84	2·51
8	V. Uklanamandi (M.C.)	91·07	50·32	40·75	77·60	19·13	11·62	25·37	0·64	20·84
	Total	59·84	35·66	24·18	58·09	8·63	15·00	11·56	0·50	22·40

*Per capita receipt and expenditure has been worked out taking into account the population of Hisar (MC) only.

Table 21 below gives the number of schools per ten thousand population in towns. There is no Higher Secondary School in Barwala, Jakhalmandi, Ratia and Uklanamandi towns. Only one Secondary/Matriculation School per ten thousand population is available in the urban areas.

TABLE 21

Schools per ten thousand population in Towns

Class, name and civic status of Town	No. per ten thousand population			
	Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV. Barwala (M.C.)	..	1	1	1
III. Fatehabad (M.C.)	1	1	1	2
II. Hansi (M.C.)	1	1	1	2
I. Hisar (M.C.)	N	1	1	2
VI. Jakhalmandi (M.C.)	..	4	4	7
IV. Ratia (M.C.)	..	1	1	2
III. Tohana (M.C.)	N	1	1	2
V. Uklanamandi (M.C.)	..	3	3	1
Total	N	1	1	2

Notes.—1. '..' denotes 'nil'.
2. 'N' denotes negligible.

Table 22 below indicates the number of beds in medical institutions per 1000 population. The number of beds per 1000 populaton in urban areas comes to two.

TABLE 22

No. of beds in medical institutions in Towns

Class, name and civic status of the Town	No. of beds in medical Institutions per 1,000 population
1	2
IV. Barwala (M.C.)	N
III. Fatehabad (M.C.)	2
II. Hansi (M.C.)	1
I Hisar (M.C.)	2
VI. Jakhalmandi (M.C.)	2
IV. Ratia (M.C.)	1
III. Tohana (M.C.)	2
V. Uklanamandi (MC.)	1
Total	2

Note.—'N' denotes negligible.

Table 23 below shows proportion of slum population in Class I and II towns. In Hisar—the only Class I town in the district—the proportion of slum population to total population of the town comes to 9.75 per cent only.

TABLE 23

Proportion of slums population in Towns

Class, name and civic status of the Town*	Percentage of the slums population to total population of the town	Density in slums (per sq. km.)
1	2	3
I. Hisar (M.C.)	9·75	28,755
Total	9·75	28,755

*For Class I and Class II towns only.

Table 24 below shows the names of three most important manufactured, exported and imported commodities in case of each town.

TABLE 24

Most important commodity manufactured, imported and exported in Towns

Class, name and civic status of the Town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV. Barwala (M.C.)	Ginned Cotton	Wheat	Coal
III. Fatehabad (M.C.)	Agricultural Implements	Cotton Seeds	Ghee
II. Hansi (M.C.)	Ginned Cotton	Cotton and Cotton yarn	Steel
I. Hisar (M.C.)	Steel Tubes	Iron Pipes	Wheat
VI. Jakhalmandi (M.C.)	Mustard oil	Wheat	*Gur*
IV. Ratia (M.C.)	Agricultural Implements	Cotton	Cloth
III. Tohana (M.C.)	Agricultural Implements	*Tasla*	Paddy
V. Uklanamandi (M.C.)	Ginned Cotton	Cotton	Sugar

†Although entered as 'Be-Chirag' (Un-inhabited) in the revenue record, the population shown against this village was enumerated at the time of 1981-Census.

Notes.— (1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.

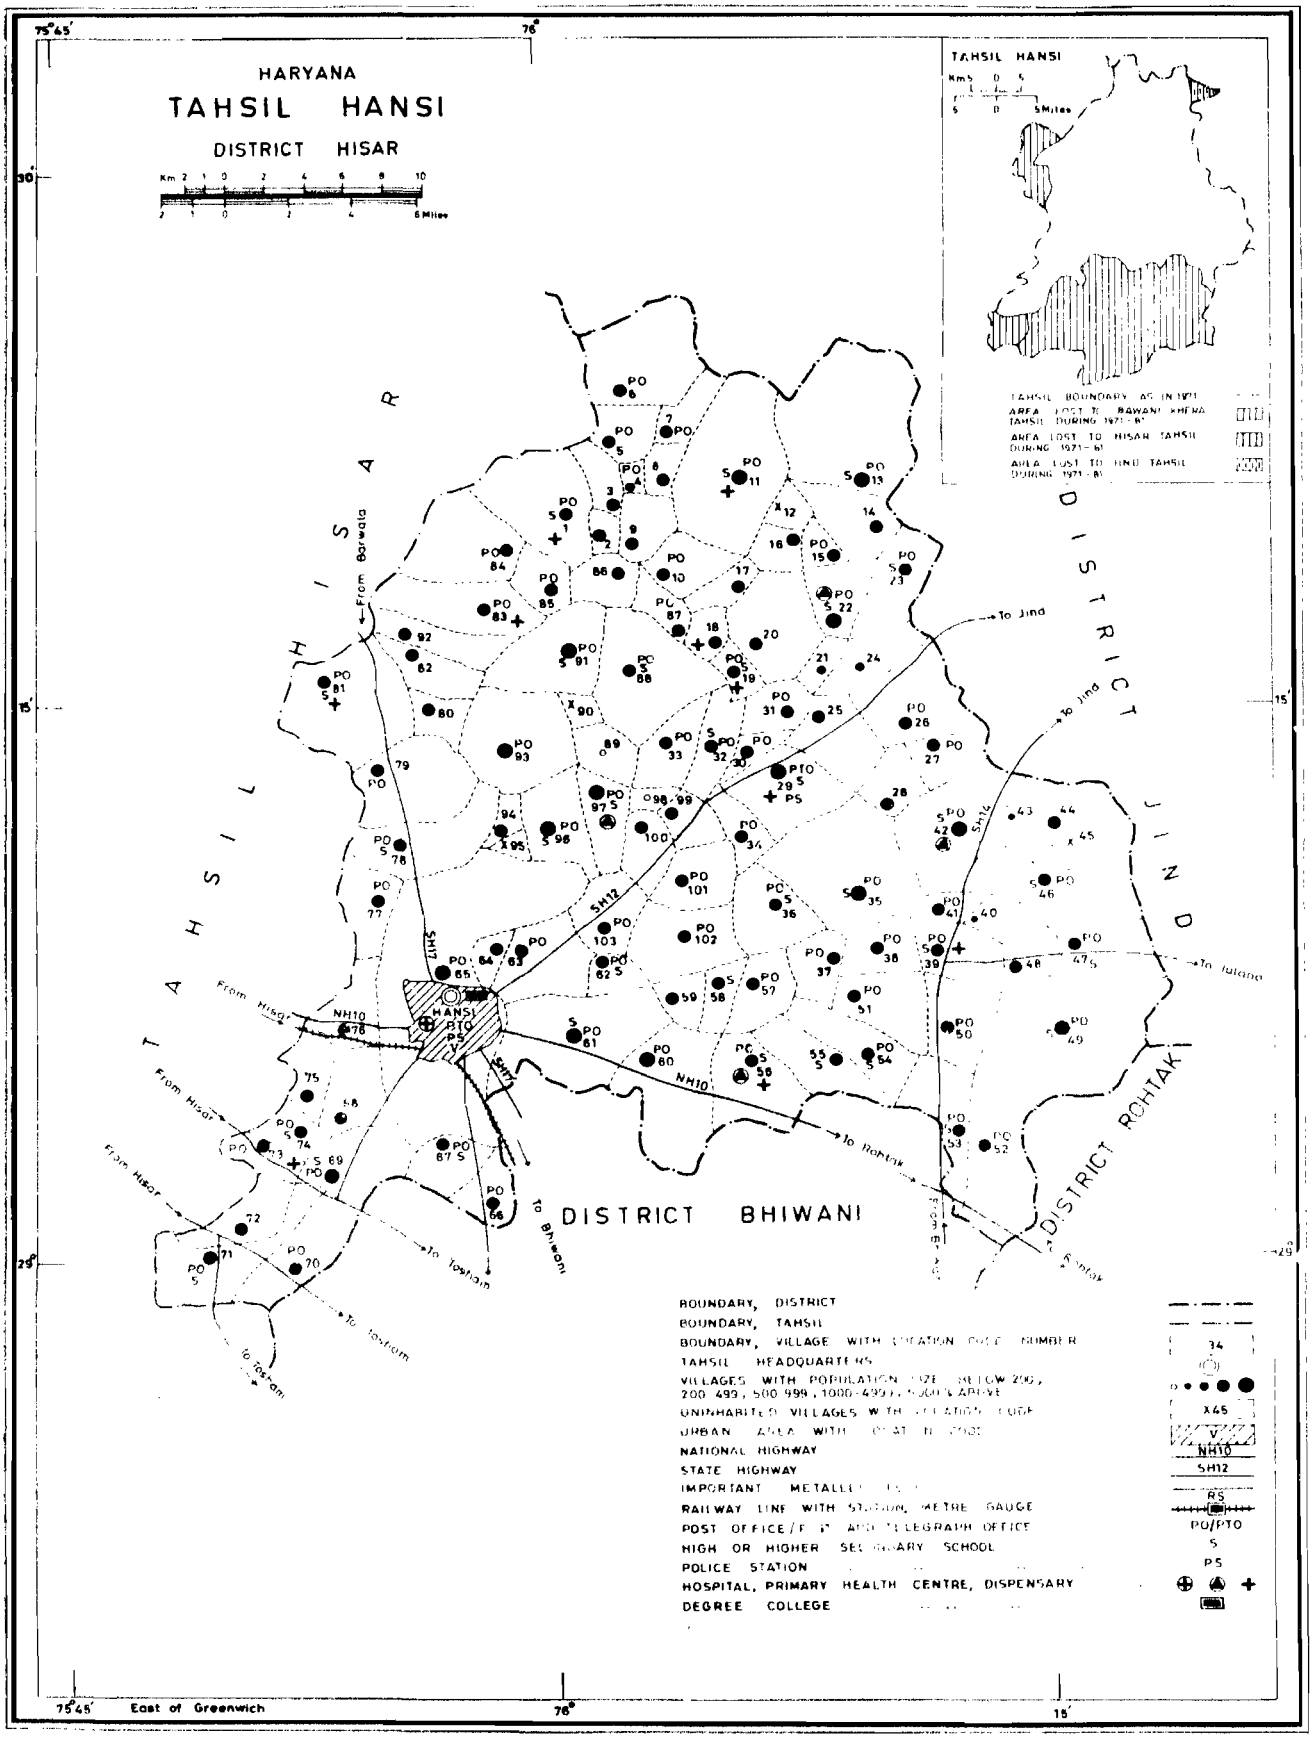

(2) The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

†Although entered as 'Be-chirag' (un—inhabited) in the revenue record, the population shown against this village was enumerated at the time of 1981-Census.

Notes:—(1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.
(2) The area of a village (Revenue estate) is based on the information supplied by the Revenue Patwari.

†Total figures for the district represents "Geographical Area" figures supplied by the Surveyor General. Figures for the urban area are those supplied by the Local Bodies. Area figures for the rural areas are derived by subtracting the urban area from the total area of the district. The total of area figures of tahsils in a district will not tally with the district figures because the former are derived from the village-wise area figures supplied by the Tahsildars.

Notes.—(1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.

(2) The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari and includes urban area, if any.

CENSUS ABSTRACT

†Although entered as 'Be-Chirag' (un-inhabited) in the revenue record, the population shown against the village was enumerated at the time of 1981-Census.

Notes:—(1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.
(2) The area of a village (revenue estate) is based on the information supplied by the revenue Patwari and includes urban area, if any.

CENSUS ABSTRACT

†Although entered as 'Be-Chirag' (Un-inhabited) in the Revenue record, the population shown against this village was enumerated at the time of 1981-Census.

Notes.—(1) Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.

(2) The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari and includes urban area, if any.
