FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional inbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the aminities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items.

A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of town into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the begining of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development officers and the Vice-Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the District'. I am indebted to them all.

The analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office S/Shri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N. M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computers and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the P. C. A. Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, happened to be in-charge of printing and for sometime also looked after the D. C. H. Section. I am thankful to them all.

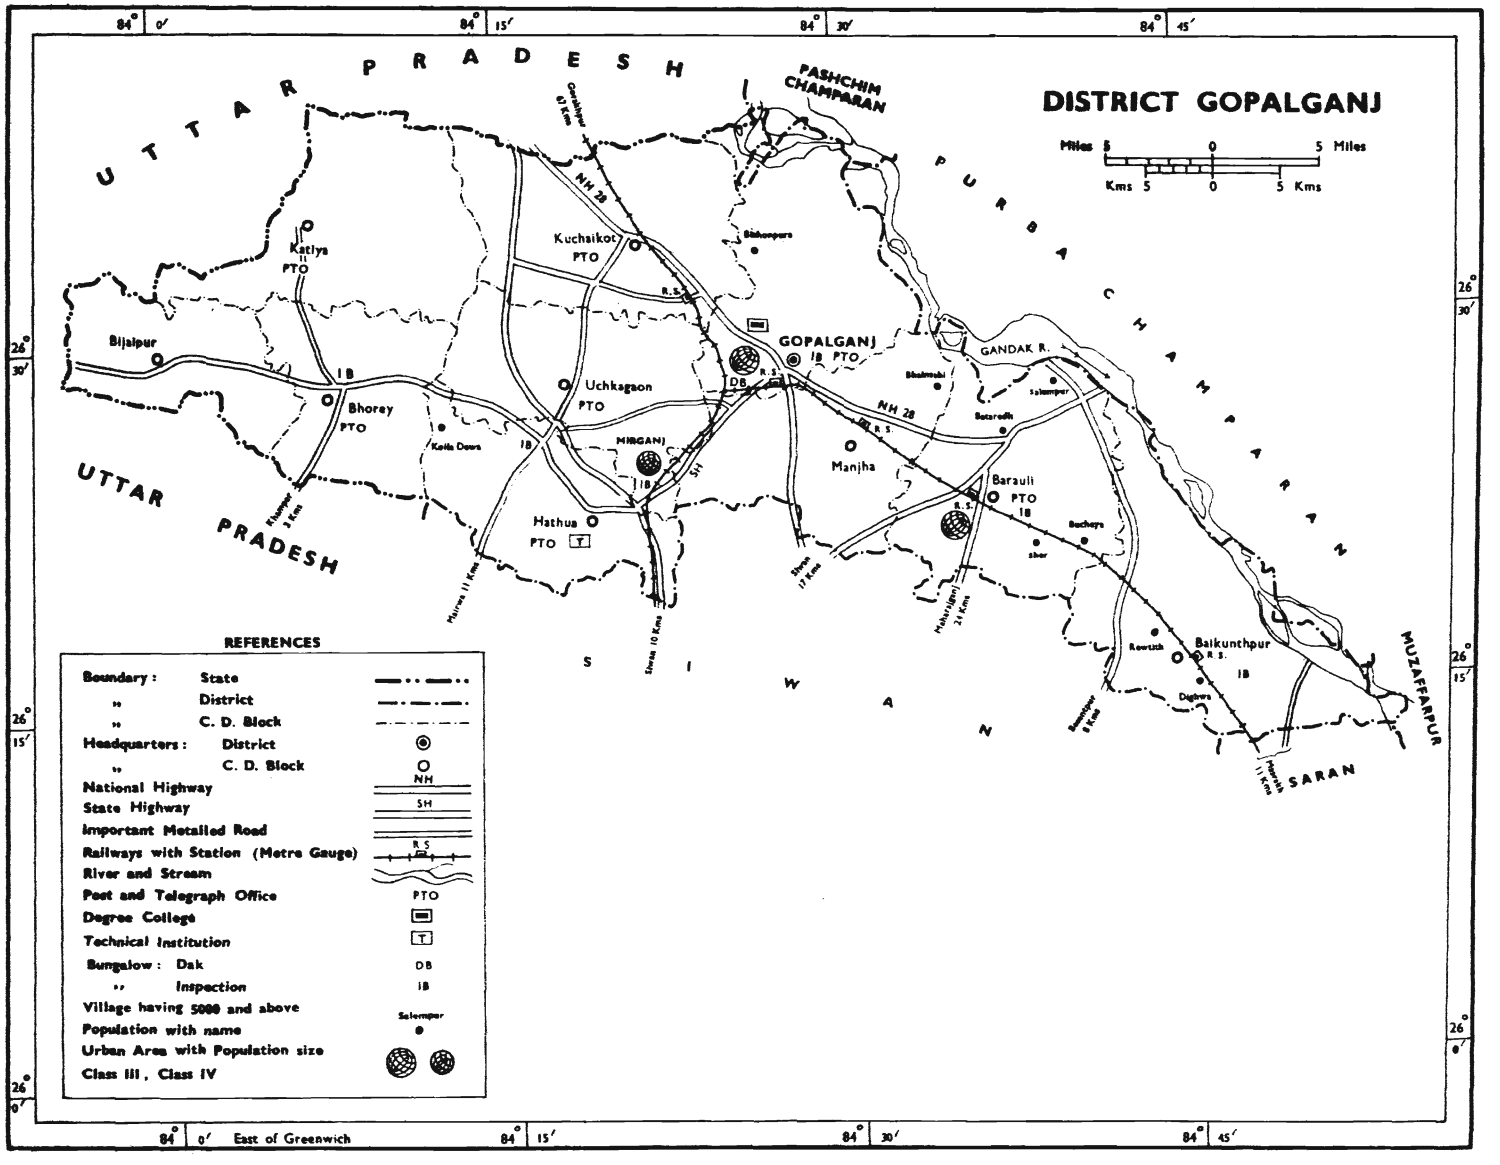

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s. Law Publishing House, Allahabad, who have undertaken the work of printing of this volume and accomplished the same with promptness.

District Census Handbook Parts A & B

ANALYTICAL NOTE

Brief History of the District

Gopalganj which till 1875 was only a tiny hamlet, was made a subdivision of old Saran district in the same year. It attained the status of an independent district on the 2nd of October, 1973. The newly created district is situated between latitudinal range of 26°12″ and 26°39″ N and longitudinal range of 83°54″ and 84°55″ E. It is bounded on the east by the Gandak river, on the south by the Siwan district, on the west and north by Gorakhpur district of U. P. It forms an alluvial plain bounded by the Gandak and intersected by five smaller rivers, flowing in the southern direction, namely the Jharahi, Khanwa, Daha, Gandaki and Dhanai.

The history of Gopalganj is a part of the history of old Saran district which included the present districts of Saran, Siwan and Gopalganj. The composite Saran district lying on one of the main lines of the Aryan advance, was probably occupied at an early period of Aryan races. According to a tradition preserved in vedic literature, the Videhas marched eastwards from the Saraswati until they reached the banks of the Gandak, and were informed by Agni, the god of fire, that their home lay to the east of its broad stream. In obedience to his directions, the Videhas crossed the river and founded a powerful kingdom on its eastern bank ; but it seems likely that some of them settled in Saran, which lay on the line of march, while the majority of them crossed the Gandak. Local legend and tradition, at least, are indicative of the fact that Saran was originally inhabited by original races, who were subdued or driven out by Aryan immigrants. The Cheros are said to have held the country for many centuries, and traces of their rule are still pointed out in the great mounds and fortifications found in different places. These aboriginal inhabitants are believed to have been subdued by immigrant Rajputs after a conflict which lasted for hundreds of years ; and the family records of the Harihobans Rajputs of Haldi in the adjoining district of Ballia say that their forefathers settled at Manjhi on the banks of the Gogra in this district, and after a protracted struggle conquered the Cheros, who had been lords of the country.

In the beginning of the 13th century the tide of Muhammadan conquest swept over Bihar ; and between 1211 and 1226 the Governor of Bengal, Ghias-ud-din Iwaz, carried his arms into the territory of the Raja of Tirhut, who had never before been subdued by the Muhammadan arms, and compelled him to pay tribute. There is, however, no record available on the history of this district till the close of that century, when Nasir-ud-din Bughra Khan, the son of the Emperor Ghias-ud-din Balban, was the king of Bengal, a weak ruler, into whose territories the Emperor of Delhi used to send shiploads of dacoits he caught and letting them loose there. On the death of the Emperor Balban, Nasir-ud-din's son, Muiz-ud-din Kiakobad, was raised to the throne ; and in 1288 Nasir-ud-din marched against him to enforce his own claims and advanced as far as the banks of the Gogra in Sarkar Saran. The upshot, however, was that father and son were reconciled, the former waiving his claims to the empire of Delhi and being permitted to retain Bengal as an independent kingdom.

In the middle of the 14th century Saran must have acknowledged the suzerainty of Ilyas Shah, the first independent Sultan of Bengal (1345—58), who invaded and ravaged Tirhut, harried the frontier of the Delhi empire, and built a fortress at Hajipur to consolidate his conquests. The Gogra now formed the boundary between the territory of the kings of Bengal and the Emperors of Delhi, but this outlying portion of the dominions of the former appears to have been wrested from them in 1397 by the kings of Jaunpur, who ruled over it for another century. It was, however, ceded by him in 1499 to the Emperor Sikandar Lodi, who advanced upon Bihar after subduing Jaunpur, and concluded a treaty at Barh, the terms of which were that Emperor should hold Bihar, Tirhut and Sarkar Saran, and all the

other countries he had subdued, provided he did not invade Bengal.

The treaty between Husain Shah and Sikandar Lodi was not honoured for a long time, for Nasrat Shah, the eldest and most capable of the son of Husain Shah, invaded Tirhut, extended his authority over this district, and even across the Gogra into the Ballia district, where an inscription shows that a mosque near Sikandrapur was built during his reign. He soon came into conflict with the Emperor Babar who himself marched into Bihar as the head of a large army to reduce the rebellions Afghan chiefs (1529). The Afghans were completely defeated and dislodged from their position ; and the attack made by the Bengal fleet and army was repulsed.

About half a century after this, Saran was finally amalgamated with the Mughal Empire, after Akbar had defeated the Afghans under the Bengal king, Daud Khan, and captured Patna in 1574. In this district an Afghan chief, Kabul Muhammad of Barharia, is said to have been one of Daud Khan's partisans ; but he was slain and his citadel taken by Jubraj Sahi, one of the early rulers of the Hathwa Raj, who wrested pargana Sipah from him and then retained it as a grant from Akbar. Saran now became a part of Bihar and under the direct control of a Governor ; in the Ain-i-Akbari it was treated as one of the six Sarkars forming the Subah or province of Bihar ; and in 1582 it was assessed to revenue by Akbar's Finance Minister, Todar Mal.

Saran did not again come into prominence until the closing days of Muhammadan rule, when the European merchant adventurers made settlements in the district. The English were also attracted to Chapra about this time by the trade in salt petre, which was in great demand for the manufacture of gunpowder.

The early days of British administration were troubled ones, owing to the rebellion of Maharaja Fateh Sahi of Husepur. Fateh Sahi was descended from a line of semi-independent chiefs who had long exercised great power in Saran ; and his immediate predecessor, Sardar Sahi, had demolished the fort of Maihauli and compelled its Raja to agree not to go about with flags and drums, the ensigns of Rajaship, until he had retaken them by force from the Rajas of Husepur. A kinsman of the powerful Balwant Singh, he chafed against the British rule, refused to pay revenue, resisted the troops sent against him, and was with much difficulty expelled from Husepur. Husepur, which appears to have been coterminous with the present subdivisions of Siwan and Gopalganj, was then farmed out to one Gobind Ram ; but Fateh Sahi, who had retired into a large tract of forest, called Bagh Jogini, lying between Gorakhpur and Saran and adjoining the territory under the Vizier of Oudh, took every opportunity to make raids into the district, to plunder the villages, and to stop the collections of revenue. The unsettled state of the country, his easy access to the territories of an independent prince, where British troops were unable to pursue him, and the impenetrable forest which surrounded his retreat, the collusion of the agents of the Vizier of Oudh, and above all, the attachment of the people to their expelled Raja and their dislike of a Government farmer, all contributed to favour his designs ; and he kept the country in a state of terror and the British authorities constantly on the alert. In 1772, Gobind Ram, the Government farmer, was put to death in one of these raids, and the revenue collections having come to a stand still, the Collector of Sarkar Saran recommended that Fateh Sahi should be induced to come in on the promise of an allowance being made to him by the Government. This proposal was accepted ; Gobind Ram's murder was forgiven on Fateh Sahi's solemnly denying any knowledge of the transaction ; and Fateh Sahi came to Patna, and promised to remain quietly with his family at Husepur. His turbulent disposition did not allow him to remain quiet for too long and within two months he broke his promise and once more became a border free-booter.

At this time Husepur was under the charge of one Mir Jamal, who was styled Superintendent of Government Revenue ; and after being under the direct management of Government for a year, it was let out in farm to Basant Sahi, a cousin of Fateh Sahi, on the security of Raja Chait Singh of Benares. In 1775 both Basant Sahi and Mir Jamal were

killed in a night attack by Fateh Sahi at Jadopur, a short distance from Husepur ; and Fateh Sahi eluded the pursuit of two companies of sepoys under Lieutenant Erskine, which were in the neighbourhood, and escaped with his booty to his forest fastness. Basant Sahi's head, it is said, was cut off and sent to his widow, who ascended a funeral pyre with it in her lap and became a *sati*. In dying, she pronounced a terrible curse on any of her descendants who should partake of any food with Fateh Sahi or any of his race ; to this day, it is said, the Maharajas of Hathwa have religiously refrained from touching food or drinking even a drop of water, while travelling through that part of the Gorakhpur district which is the property of the Rajas of Tamkuhi, the descendants of Fateh Sahi. Fateh Sahi was known as Kunwar Singh of Saran, and in fact he was probably the first to raise the standard of revolt when whole of India had yet to realise the humiliating experiences of a foreign rule. Even in nineteenth century English Society of India, admirers were not lacking.

[Source : District Gazetteer Saran, 1960.]

Natural Divisions

There are no hills in Gopalganj. Though the district presents the appearance of a level plain, the uniformity is broken here and there by the depressions and marshes dotted over the country. The district contains no forest as well.

River system

There are three great boundary rivers—the Ganga, Gandak and Gogra which are navigable by large boats all the year round. These three rivers have a mythical and historical association. There is also a net-work of minor streams flowing into the Gogra or Ganga, many of which are fed by the overflow of the Gandak and dry up in the hot weather. Alluvion and diluvion are constantly taking place along the banks of the Ganga, Gogra and Gandak. The beds of the rivers are generally sandy, and the banks are cultivated as near to the water's edge as possible. Along the channels of the larger rivers, there are often large expanses of low land which are flooded in the rains but are sown later in the year with spiring crops which always turn out well, owing to the rich layer of silt annually deposited. In some places during the dry season there is often a belt of tamarisk jungle between the river and the cultivated fields, and this is the first step in the conversion of the sandy riverain into arable soil.

Lakes, properly so called, do not exist in Gopalganj district, but a vast number of broads or marshes called *chaurs* may be found after the cessation of the rains. They used to contain water during the winter and in some one even into the hot weather and were the home of innumerable water-fowl. Most of the *chaurs* are drying up and are under cultivation. There is hardly any of the previous species of birds that used to visit these *chaurs* in thousands in winter.

There are very few large tanks in the district and even the existing ones are now not in proper order. With the changes in the financial condition, people no longer excavate tanks.

Climatic conditions

The seasons in Gopalganj are very similar to those in Saran, Siwan and Muzaffarpur. The hot weather beings about the middle of March, when hot westerly winds often accompanied by dust-storms, begin to blow during the day. At night the wind comes generally from the east and the temperature is comparatively cool, being lowered by occasional thunder-storms ; but the nights are extremely hot from the end of May till the first break of the monsoon which generally starts in the month of June. In a normal year the rains set in about the third week of June and continue with intermissions till about the end of September or the early part of October. The cold weather begins after the middle of October and continues till the beginning of March up to which time the days are still comparatively cool. This season is bracing and agreeable, at least from November till February ; the day temperature is low, the air dry and the nights distinctly cold. The climate is on the whole hot and dry, and though the winter months are delightfully cool, the heat is excessive in May and June.

Rainfall

The average annual rainfall for the district is about 1,016.76 mm. Generally the monsoon breaks in June. The peak month for rains is August.

Thereafter it starts declining with some rainfall in the months of September and October and by November the rainy season is almost over and November and December are the driest months in the year both in average rainfall and in average number of rainy days in a month.

Irrigational facilities

Irrigation is resorted to wherever the means are present, either from wells, tanks, streams, or *aharas*, i.e., reservoirs formed by constructing embankments across the line of drainage.

Irrigation from wells is very common in all areas except in the tracts bordering the Gandak river where there is prejudice against it on the ground that the soil is unsuitable. In the greater part of the district, however, well irrigation is feasible owing to the fact that sub-soil water is found very near the surface.

The soils in the district are alluvial and vary from the hard clay found in the low swamps, which is locally known as *bangar*, to the light sandy loam of the uplands called *bhath*. The former grows winter rice only while from the latter an autumn rice crop is generally obtained followed by a spring crop of cereals, pulses and oil-seeds. In the district as a whole these two soils are found in fairly regular proportions.

Cropping pattern

Paddy is the most important of the food crops in the district. One-fifth of it is *Bhadai* rice, harvested in the autumn and the remaining four-fifths is *Aghani* or winter rice. Other important crops grown in the district are wheat, sugar-cane and maize besides potato, pulses and oil-seeds. Sugar-cane and tobacco are the cash crops grown in the district.

Industries

There were formerly three industries in the district connected with opium, indigo and sugar, of which only the last now remains. The only other important industry is the manufacture of salt-petre. However, there are a number of small handicrafts, such as manufacture of brass, pottery, cloth-weaving, oil-pressing, etc.

Mines and minerals

There is no mining and heavy industry in the district. There are no minerals except nodular limestone (*kankar*) of good quality which is found throughout the district. It is used for metalling roads and for ballast on the railway but the supply is diminishing.

Communications

The North-Eastern Railway has two branches in the district. One runs through Siwan-Thawe-Gorakhpur and other through Siwan-Thawe-Gopalganj-Chapra route. Five block headquarters of the district have the privilege of being very near to the railway stations. All the block headquarters, however, have the facility of road communication.

Gopalganj being a riverine district, water transport plays an important role in the means of transport. In the past, when the railways and other steam services were not developed, boats were the chief means for transport of goods and passengers. Though inland water transport has declined, still its possibility in the district is great.

The district is not connected by the regular air route. There is, however, one landing ground at Hathwa, where small aeroplane lands. Telephone exchange is located at Gopalganj, the district headquarters, and also at Hathwa and Barauli.

Livestock

In line with other districts in the State this district also depends absolutely on livestock for pursuing agriculture which is the most important occupation. The Animal Husbandry Department has been trying to improve the breed by providing selected bulls and opening of artificial insemination centres. There is one veterinary hospital at the district headquarters. In each of the block headquarters there is one veterinary dispensary and two field veterinary centres.

Electrification

The Electricity Division in the district has two wings, one dealing with the transmission and other with distribution. Under the rural electrification

programme quite a good number of villages have been electrified in the district so far.

Jurisdictional changes

As has been mentioned in the beginning Gopalganj was a subdivision of the old Saran district until recently. After the reorganisation of the districts which took place in the year 1973, Gopalganj was separated from the old Saran district to form an independent district consisting of 10 development blocks, viz., Gopalganj, Manjha, Barauli, Baikunthpur, Kuchaikote, Hathua, Uchkagaon, Bhory, Katiya and Bijaipur.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS HISTORICAL, AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Thawe

A village situated 6 Kms. south of Gopalganj. It is a junction station of the North-Eastern Railway of the Mashakh-Thawe section and the Siwan-Gorakhpur loop. In the village there are remains of an old fort but the history of the fort is obscure. The Hathwa Raja had a palace there but it is now in decadent state. Close by the residence of the Hathwa Raja there is an old temple dedicated to the goddess Durga. Within the enclosure of the temple there is a peculiar tree, the botanical family of which has not yet been identified. The tree has grown up like the cross. Various legends are prevalent in connection with the idol and the tree. Food for jackals is still offered in the nearby jungle and a big fair is annually held in the month of *Chait* (March-April).

2. Dighwa Dubauli

A village in the extreme east of Gopalganj, 56 Kms. north of Chapra and 25 Kms. south-east of Gopalganj. It contains some ancient remains; of which the renowned historian Mr. Carlleyle has given the following account. At Dighwa Dubauli there is an ancient site and two extraordinary pyramidal-shape mounds. These two extraordinary mounds are situated close to the south-east of the village, and east and west of each other. The western mound is situated almost adjoining the south-eastern end of the village, and the eastern mound is situated at the distance of 640 feet to the east-south-east of the other, and close to the road. There is an old well here. A historical copper-plate, known as the Dighwa Dubauli plate dating back to 761-2 A. D. was found in tnis village.

3. Hathwa

A village in the district situated about 4 Kms. west of Mirganj. The place is closely associated with the Hathwa Raj about which the District Gazetter of Saran 1960 mentions as follows :

The Hathwa Raj family, which like the families of the Maharajas of Benares, Bettiah and Tikari is of Bhumihar Brahman caste is one of the oldest of the aristocratic families of Bihar. This family, which was originally known as that of Rajas of Husepur, claims an antiquity anterior to the Muhammadan conquest of India and is said to have been settled in Saran for more than a hundred generations. The genealogical tree of the family shows a line of 103 Rajas, the patronymic of the earlier Rajas being Sen, which was changed to Singh with the 16th in descent, to Mal, with the 83rd and to Sahi with the 87th of the line. The title of Maharaja seems to have been conferred by the Emperor of Delhi on the 86th Raja, Kalyan Mal and that of Maharaja Bahadur on the 87th Khem Karan Sahi. The earlier history of the family is obscure. The authentic history of the Hathwa family commences with the time of Fateh Sahi, who was Maharaja of Husepur when the East India Company obtained the Diwani of Bengal, Bihar and Orissa in 1765.

Chhattardhari Sahi, a grand-nephew of Fateh Sahi and grandson of Basant Sahi, in whose time the family seat was removed from Husepur to Hathwa rendered valuable assistance at the time of the Santhal rebellion and also during the Mutiny, the services rendered by him in 1857 receiving the special commendation of Government. Chhattardhari Sahi who died in 1858 had two sons, both of whom died before their father, leaving two sons each ; but during his lifetime he had nominated as his heir, Rajendra Pratap Sahi, his eldest great-grandson whose father had waived his right. The succession was contested by two other grandsons of deceased Maharaja, one of whom, Bir Pratap Sahi, fought the case till it was decided by the Privy Council in favour of Rajendra Pratap Sahi. It was decided that the Hathwa Raj is an impartible Raj which descends under the *Kulachar* or family rule of inheritance to the eldest son, to the exclusion of all his younger brothers, who are provided with sufficient land or an allowance in money for their maintenance.

Rajendra Pratap Sahi rendered good service in re-establishing order in the district at the close of the Mutiny and was granted some confiscated villages in old Shahabad as a reward for his services. He was succeeded by his son Krishna Pratap Sahi who received the title of Maharaja Bahadur and was made a K. C. I. E. in 1889. He died in 1896 and was succeeded by his son, the present Maharaja, Guru Mahadeo Asram Prasad Sahi. He was then only three years old and the estate was again taken under the management of the court of wards ; it was released in 1911 when the young man was placed under the guardianship of his mother. In 1914 he was installed on the *gaddi* by Sir Charles Bayley, the then Lt. Governor of Bihar and Orissa and also received the title of Maharaja Bahadur. The Kaiser-i-Hind gold medal was conferred on the Dowager Maharani in 1900 for the munificence of her charitable donations. The family residence is at Hathwa, 19 kilometres north of Siwan, where Maharaja Krishna Pratap Sahi built a palace, a large modern building with one of the finest Durbar halls in India.

4. Husepur

A village situated in the north-west of the district is on the western bank of Jharahi river. Historically this village is of some interest as it was formerly headquarters of the Maharajas of Hathwa when they were still rulers of the country. Contiguous to it to the north-east is Kalyanpur which was the site of still earlier residence. Mounds of bricks overgrown with jungle, is now left, which mark the ruins of old forts, and of moats now almost filled up. Kalyan Mal, who was the first in the line to receive the title of Maharaja from the Mughal Emperor, gave his name to the village of Kalyanpur, a nearby village as well as to the surrounding pargana which is called Kalyanpur Kuari. At Kalyanpur besides large tanks and wells the ruins of the fortress of Kalyan Mal are still traceable. Maharaja Khem Karan Sahi, descendant of Kalyan Mal, having removed his residence to Kalyanpur and built a fort there, that place was the headquarters of the family till Fateh Sahi became a rebel.

5. Jadopur

A village 8 Kms. to the north of Gopalganj where Fateh Sahi had killed his cousin Basant Sahi as he was enraged at the treachery of his cousin. A big *pipal* tree marks the scene of his death. The widow of Basant Sahi thereupon immolated herself on the funeral pyre, with thirteen of her handmaids holding the head of her deceased husband in her lap. A big banyan tree in the jungle to the east of the ruined fort at Husepur still marks the site of her death ; and there are fourteen small mounds of earth under the tree held sacred to the memory of *sati* ; members of the Hathwa Raj family do *puja* there, as also under the *pipal* tree at Jadopur where Basant Sahi was killed.

6. Gopalganj

It is the headquarters of the district of the same name. It lies on the west bank of the Gandakl river, about 3 Kms. from the main Gandak embankment, 93 Kms. north from Chapra, 34 Kms. north-east of Siwan with which it is connected by a good metalled road and also by a loop line of the North Eastern Railway running from Siwan to Thawe and on to Gorakhpur. It is a growing township. It was made the subdivisional headquarters in 1875 when it was only a tiny hamlet. It has developed considerably since then. The extension of the Mashrakh-Thawe line and the sugar factory at Harkhua brought in commercial prosperity to Gopalganj.

7. Mirganj

Mirganj is a township in Gopalganj district situated 16 Kms. north-west of Siwan and nearly midway between it and Gopalganj. It is a place of considerable commercial importance, being a centre at which grain from north and north-west is collected for export to Patna and elsewhere. Several Patna merchants have agents here, especially for linseed, cotton, *gur* and pulse. Being connected by both rail and metalled road it has considerable importance for trade. These commodities are sent to Mirganj market from the adjacent villages. The loop line from Siwan to Gorakhpur passes through Mirganj, connecting it with Railway line having Hathwa Railway station. Hathwa is only 4 Kms. away. After the passing of the Bihar Land Reforms Act, 1950, the Mirganj bazar which was formerly the property of the Hathwa estate had vested in the State.

It is said that Mirganj was named after a saint Mir Saheb who lived there for a long time. There is an unconfirmed story that the forefather of the present Hathwa Maharaj granted Mirganj to a *panda* or a priest of Gaya from whom it was later purchased by the high officials of the estate.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census Organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the levels of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post and telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census keeping in view the Minimum Needs Programme of the Planning Commission.

A new statement on civic and other amenities for each area/locality identified as slum in class I and II towns has been added. In this district, however, there is no class I or II town and hence this information has not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as occupied residential houses, number of households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal

workers and non-workers by sex in respect of each village and each urban ward (circle). In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that of General Primary Census Abstract and the level of presentation is exactly identical to that of the District Primary Census Abstract relating to general population.

For convenience of reference an Alphabetical List of Villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdictional list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in PCA (rural) and those in the Village Directory match and this is also in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

The urban criteria of 1981 vary slightly from those of 1961 and 1971 Censuses in that the males employed in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 Censuses whereas in the 1981 Census these activities have been treated as agricultural activities and therefore excluded from the purview of consideration for urban characteristics. Towns are further classified into the following six classes according to their population size :

Class of Town	Population
I	1 lakh and above (termed as city)
II	50,000—99,999
III	20,000—49,999

Class of Town	Population
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census house—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, two member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as Workers.

Main worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-Worker.

Scheduled Castes and Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477-A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given on next page.

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santhal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Gopalganj, with a population of 1,362,123 persons is divided into 10 Community Development Blocks consisting of 1,386 inhabited villages (out of total 1,566 villages in the district) and 3 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Gopalganj	139,572	72,071	67,501	112,305	57,314	54,991	27,267	14,757	12,510	93	80	1
2	Manjha	141,838	70,850	70,988	141,838	70,850	70,988	..	..	..	149	135	..
3	Uchkagaon	151,002	75,426	75,576	133,665	66,232	67,433	17,337	9,194	8,143	172	154	1
4	Hathua	137,793	68,747	69,046	137,793	68,747	69,046	..	..	..	129	123	..
5	Bhorey	91,669	45,847	45,822	91,669	45,847	45,822	..	..	..	172	149	..
6	Bijaipur	74,253	36,380	37,873	74,253	36,380	37,873	..	..	..	143	120	..
7	Katiya	122,594	61,361	61,233	122,594	61,361	61,233	..	..	..	224	199	..
8	Kuchaikote	172,684	85,942	86,742	172,684	85,942	86,742	..	..	..	222	211	..
9	Barauli	177,041	86,905	90,136	153,640	75,123	78,517	23,401	11,782	11,619	110	92	1
10	Baikunthpur	153,677	75,576	78,101	153,677	75,576	78,101	..	..	..	152	123	..
	Total	**1,362,123**	**679,105**	**683,018**	**1,294,118**	**643,372**	**650,746**	**68,005**	**35,733**	**32,272**	**1,566**	**1,386**	**3**

Among the C. D. Blocks, Barauli with 13.00 per cent of the population of the district occupies the first place followed by Kuchaikote with 12.68 per cent. The least populated C. D. Block is Bijaipur with only 5.45 per cent of the population of the district.

Gopalganj district which has been carved out of the old Saran district appears to have less impact of urbanisation since 95.01 per cent of the population lives in the villages. The total urban population contained in 3 towns is of the order of only 4.99 per cent of the total population of the district. None of the 3 towns, viz., Gopalganj (M), Barauli (NAC) and Mirganj (NAC) fall in the range of either Class I (Population 1 lakh and above) or Class II (50,000—99,999) towns. The district does not have any urban agglomeration either.

Decadal change of population

Gopalganj acquired the status of a district in the year 1973, i. e., only after the 1971 Census. In fact the subdivision of Gopalganj in the old Saran district as such has been upgraded as a district. The percentage increase in the population of the district and its development blocks is presented in the table on the next page.

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Gopalganj	107,283	90,030	17,253	139,572	112,305	27,267	+30.10	+24.74	+58.04
Manjha	113,711	113,711	..	141,838	141,838	..	+24.74	+24.74	..
Uchkagaon	119,631	107,575	12,056	151,002	133,665	17,337	+26.22	+24.25	+43.80
Hathua	113,556	113,556	..	137,793	137,793	..	+21.34	+21.34	..
Bhorey	76,491	76,491	..	91,669	91,669	..	+19.84	+19.84	..
Bijaipur	61,511	61,511	..	74,253	74,253	..	+20.71	+20.71	..
Katiya	100,473	100,473	..	122,594	122,594	..	+22.02	+22.02	..
Kuchaikote	139,913	139,913	..	172,684	172,684	..	+23.42	+23.42	..
Barauli	146,506	146,506	..	177,041	153,640	23,401	+20.84	+ 4.87	100.00
Baikunthpur	128,389	128,389	..	153,677	153,677	..	+19.70	+19.70	..
Total	**1,107,464**	**1,073,155**	**29,309**	**1,362,123**	**1,294,118**	**68,005**	**+22.99**	**+20.08**	**+132.08**

It would appear that the rise in the population of this district during the 1971—81 decade has been of the order of 22.99 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 20.03 per cent while urban population growth over the decade has been as much as 132.03 per cent. Barauli acquired the status of a town only in the 1981 Census.

As it is evident from the table, among the Development Blocks, Gopalganj has shown the highest increase in population over the decade with 30.10 per cent followed by Uchkagaon and Manjha with 26.22 and 24.74 per cent respectively. The increase in rural population during 1971—81 has been the highest in case of Gopalganj and Manjha blocks (24.74% each) followed by Uchkagaon C. D. block (24.25%). As regards growth in urban population, Gopalganj block obviously occupies the first position with 58.04 per cent, probably since Gopalganj town, the district headquarters, is situated in this very block. Barauli (NAC), has attained the status of the town only in 1981 Census.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the table presented alongside in six size groups.

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	184	13.28
200—499	375	27.06
500—1,999	676	48.77
2,000—4,999	140	10.10
5,000—9,999	10	0.72
10,000+	1	0.07
Total	**1,386**	**100.00**

It would be seen from table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499 accounting for 48.77 and 27.06 per cent of the total number of inhabited villages respectively in the district. The medium-sized villages are thus much more in number than large villages (5,000—9,999 and 10,000+) in the district. The large villages comprise only 0.79 per cent of the inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was 751 and in the old Saran district it was only 616.

Distribution of villages by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (Per. Sq. Km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	3	0.22
11—20	1	0.07
21—50	14	1.01
51—100	20	1.44
101—200	46	3.32
201—300	74	5.34
301—500	260	18.76
501+	968	69.84
Not known	..	..
Total	**1,386**	**100.00**

The data presented in the above table highlight the fact that maximum proportion of villages in the district lies in the density range of 501+with 69.84 per cent of villages followed by villages in the density range of 301—500 which account for 18.76 per cent villages.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is mostly contained in the medium-sized villages as already explained in the earlier paragraph.

Proportion of Scheduled Cas tes/Tribes population in villages and towns.

Tables 5, 6 and 7 furnished hereafter indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro-level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes population to total population in the villages

Percentage range of Scheduled castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	251	18.11
5 or less	220	15.87
6—10	294	21.21
11—15	212	15.30
16—20	134	9.67
21—30	158	11.40
31 and above	117	8.44
Total	**1,386**	**100.00**

It is discernible from the above table that there are only 117 villages accounting for 8.44 per cent of the inhabited villages, where the percentage of Scheduled Castes population to total population is more than 31 per cent and there are 18.11 per cent of the villages which do not have any population of the Scheduled Caste at all. The maximum number of villages, i. e., 294 accounting for 21.21 per cent of the total inhabited villages, have Scheduled Castes population in the range of 6—10 per cent.

Table 6—Proportion of Scheduled Tribes population to total population in the villages

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,167	84.20
5 or less	173	12.48
6—15	38	2.74
16—25	5	0.36
26—35	3	0.22
36—50	..	..
51 and above	..	..
Total	**1,386**	**100.00**

As regards the population of the Scheduled Tribes it can be seen from table on the back page that there are as many as 1,167 out of 1,386 inhabited villages (84.20%) in the district which have no Scheduled Tribes at all. It is only in 173 villages comprising of 12.48 per cent of total number of inhabited villages where the concentration of Scheduled Tribes population is less than 5 per cent. In the higher ranges the number of village is negligible.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Barauli	23,401	2,220	20	9.49	0.09
Gopalganj	27,267	3,229	137	11.84	0.50
Mirganj	17,337	1,140	408	6.58	2.35
All Towns	**68,005**	**6,589**	**565**	**9.69**	**0.83**

Table 7 indicates that the concentration of the Scheduled Castes in the towns of Gopalganj district is of the order of 9.69 per cent of the total population which is less as compared to rural areas. The highest percentage of Scheduled Castes population is contained in Gopalganj (M) with 11.84 per cent. The urban content of the population of the Scheduled Tribes is almost negligible in Barauli and Gopalganj towns. In only Mirganj town it is to the extent of 2.35 per cent of the total population's share.

Literacy rates by population ranges of villages and towns.

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 alongside gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately.

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	184	18.30
200—499	375	20.18
500—1,999	676	20.97
2,000—4,999	140	20.12
5,000—9,999	10	18.85
10,000+	1	18.82
Total	**1,386**	**20.47**

It would be seen that literates constitute 20.47 per cent of the population in the rural areas of the district as against 38.44 per cent in the urban areas. The highest percentage of literacy rate is observed for the villages in the population range of 500—1,999 accounting for 20.97 per cent followed by villages in the population ranges of 200—499 and 2,000—4,999 with 20.18 and 20.12 per cent respectively. The lowest percentage of literate population falls in the population range of less than 200 with only 18.30 per cent being literate. In the single biggest village in the district where the population is more than 10 thousand the level of literacy is not very significant at 18.82 as the literacy rate.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Barauli	26.94
Gopalganj	46.76
Mirganj	40.90
All towns	**38.44**

Among the towns, Gopalganj, being the district headquarters has the highest percentage of literate population (46.76%) followed by Mirganj town (40.90%). Barauli has the least quantum of literate population, the percentage being only 26.94.

Workers and non-workers in rural and urban areas of the district

The table below gives the break up of literates, workers, non-workers, and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks :

Table 10—Literates, Workers, Non-Workers, Scheduled Castes/Tribes population in the District

Name of Development Block	Total Rural Urban	Total Population			Percentage of S. C. Population to total population	Percentage of S. T. population to total population	Percentage of Literates to total population			Percentage of Main Workers to total population

Workers in the district of Gopalganj account for 26.73 per cent of the total population whereas the number of non-workers is as high as 73.27 per cent. As shall be evident from the table on back page the main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) comprise 25.92 per cent of the total population which is very close to the percentage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 0.81 per cent. The same trend can be observed in both the rural and urban areas of the district as also in almost all its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 47.64 and 47.09 per cent for males as against 5.94 and 4.88 for females which indicates that the participation of females in economically productive work is quite low.

Another notable feature is higher percentage of female marginal workers (1.06%) vis-a-vis male marginal workers (0.55%). It can be seen that except in one or two urban cases the same pattern prevails in all the rural and urban areas of the district.

It would also be seen that the percentage of main workers to the total population is higher in the rural areas (25.96%) than in the urban areas (25.20%). The same pattern is, however, not perceptible in the case of marginal workers, which constitute 0.80 per cent only of the rural population but 1.05 per cent of the urban population.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district.

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11

	Total	**1,386**	**870 (62.77)**	**232 (16.74)**	**1,386 (100.00)**	**138 (9.96)**	**211 (15.22)**	**252 (18 18)**	**278 (20.06)**	**242 (17.46)**

Educational amenity—There are as many as 870 villages accounting for 62.77 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Gopalganj with 86.25 per cent followed by Hathua block with 75.61 per cent. The lowest number of villages with educational facility is in the development blocks of Bijaipur and Katiya with 48.33 and 49.75 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low as only 16.74 per cent of villages have it. Among the development blocks, Katiya has the largest proportion of villages with medical facility, the percentage being 48.24. Bijaipur block, on the other hand, has the lowest number of such villages with only 1.67 per cent of the total villages enjoying medical facility.

Drinking water—It would be seen from the table that drinking water facility is available in all the villages of the district of Gopalganj.

Post & Telegraph—Postal facilities (Post & Telegraph) are available only in 138 villages (9.96%) in the district. Barauli block has the maximum number of villages having post and telegraph facility (27.17%) followed by Hathua (16.26%) and Gopalganj (15.00%). In the remaining development blocks of the district the number varies from a minimum of 4.03 per cent in Bhorey to a maximum of 9.48 per cent in Kuchaikote block.

Market/hat—The villages where market/*hat* is held constitute only 15.22 per cent of the total number of villages in the district. As will be seen from the table, Hathua block has the maximum number of villages (37.40%) closely followed by Barauli block (31.52%) where market/*hat* facility is available. In the remaining blocks the number of villages where market/*hat* is held varies between 7.50 (Gopalganj and Bijaipur blocks) and 18.70 per cent (Baikunthpur block).

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 18.18 per cent of the villages are connected by one means of communication or the other. The majority of villages are still devoid of this facility. A development blockwise break up of villages having any means of communication is given in the table on back page indicating that Hathua block comprises the highest proportion of villages (33.33%) which are connected by bus or rail or navigable river/canal services, etc., followed by Katiya with 29.15 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 6.25 per cent in Gopalganj block and the maximum of 19.57 per cent in Barauli block.

Approach road to village—With only 20.06 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Barauli blocks with 30.43 per cent villages having *pucca* approach road leads the list closely followed by Katiya and Hathua blocks with 29.15 and 26.83 per cent respectively. The development blocks which have the lowest number of villages having this facility are Uchkagaon (9.74%), Bhorey (11.41%) and Bijaipur (14.17%).

Power supply—The electrified villages in the district constitute as much as 17.46 per cent of the total number of villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Hathua development block occupies the first position having the maximum proportion of electrified villages (38.21%) followed by Kuchaikote and Manjha blocks with 27.01 and 22.22 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Katiya (2.51%) and Bhorey (8.05%).

Proportion of rural population served by various amenities.

While in Table 11 we had discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rural population served by these amenities :

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* Road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Gopalganj	112,305	94.45	6.22	100.00	28.85	14.09	6.59	18.18	7.23
2	Manjha	141,838	82.89	21.35	100.00	29.48	35.97	24.02	27.26	42.86
3	Uchkagaon	133,665	87.03	14.62	100.00	15.61	18.83	11.33	13.98	31.52
4	Hathua	137,793	93.21	17.48	100.00	31.21	43.72	49.85	39.56	61.52
5	Bhorey	91,669	76.88	22.78	100.00	20.58	33.28	20.12	24.76	24.34
6	Bijaipur	74,253	71.65	4.66	100.00	14.24	15.48	18.80	15.67	32.77
7	Kahiya	122,594	73.80	69.76	100.00	21.20	15.58	34.05	35.42	7.70
8	Kuchaikote	172,686	84.93	17.16	100.00	16.58	26.21	22.91	30.98	35.49
9	Baraull	153,640	84.51	44.98	100.00	45.13	51.54	30.50	34.77	35.37
10	Balkunthpur	153,677	80.35	38.91	100.00	20.65	34.53	23.91	16.10	17.53
	Total	**1,294,118**	**83.65**	**26.99**	**100.00**	**25.19**	**30.30**	**24.93**	**26.49**	**30.49**

It would be seen that educational facility is available to 83.65 per cent of the rural population in the district. The proportion varies between the maximum of 94.45 per cent in Gopalganj block and the *minimum of* 71.65 per cent in Bijaipur block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 62.77 per cent (as has been observed in Table 11) than the proportion of population which is as high as 83.65 per cent. *This may be* attributed to the fact that villages which possess educational facility contain large proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 26.99 per cent which is much more than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages not having different amenities at a distance of less than 5 Kms., 5—10 Kms. and 10—Kms.

The table indicates the number of those villages which do not contain *different* amenities arranged by broad distance ranges (less than 5 Kms, 5—10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of—	Number of villages where the amenity is not available and available at a distance of—			
	—5 kms.	5—10 kms.	10+kms.	Total (cols. 2-4)
1	2	3	4	5
1. Education	509	7	..	516
2. Medical	817	269	68	1,154
3. Drinking Water	..	..	..	..
4. Post & Telegraph	1,102	130	16	1,248
5. Market/*Hat*	1,047	125	3	1,175
6. Communication	762	319	53	1,134

As regards educational facility it wonld be seen that there are as many as 509 villages in the district (36.72%) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5—10 Kms. is only 7 whereas beyond 10 Kms. it is nil. The number of villages having other facilities within a distance of 5—10 Kms. and 10+Kms. is less than those having the facilities within 5 Kms., though not in the same proportion.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distributions of villages having different type of facilities by distance from nearest town in five size groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in Kms)	No. of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking Water	Post & Telegraph	Market/*Hat*	Communication	Approach by *Pucca* Road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	81	71 (87·65)	8 (9.98)	81 (100.00)	8(9.88)	9 (11.11)	18 (22.22)	27 (33.33)	21 (25.93)
6—15	449	311 (69.27)	53 (11.80)	449 (100.00)	66 (14.70)	92 (20.49)	87 (19.38)	98 (21.83)	124 (27.62)
16—50	812	465 (57.27)	165 (20.32)	812 (100.00)	62 (7.64)	107 (13.18)	144 (17.73)	151 (18.60)	94 (11.58)
51+	44	23 (52.27)	6 (13.64)	44 (100.00)	2 (4.55)	3 (6.82)	3 (6.82)	2 (4.55)	3 (6.82)
Unspecified	..	..	..	..	..	..	..	..	..
Total	**1,386**	**870 (62.77)**	**232 (16.74)**	**1,386 (100.00)**	**138 (9.96)**	**211 (15.22)**	**252 (18.18)**	**278 (20.06)**	**242 (17.46)**

It would appear from the above table that maximum number of inhabited villages lie in the distance range of 16—50 Kms. (58 59%) from the nearest town. With only 3 urban centres in the district such a situation is but natural. This is followed by villages in the distance range of 6—15 Kms. from the nearest town with 32.40 per cent. Only 23 villages (3.17%) are found to be in the distance range of more than 51 Kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 87.65 per cent for those situated within 5 Kms. from the nearest town and thereafter it decreases with the increase in the distance range from the nearest town. The same trend can be observed in the case of communication and *pucca* approach road facilities. In case of market/*hat* and power supply, the proportion of villages is observed to be the highest in the distance group of 6—15 Kms. However, a different situation is observed in case of medical facilities where the proportion of villages have increased with the increase in the distance range from town up to distance group of 16—50 Kms.

after which it has declined in the distance range of 51+. It can be said that the villages which are nearer to the urban areas have benefited in respect of education, communication and *pucca* approach road vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population range and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking Water	Post & Telegraph	Market / *Hat*	Communication	Approach by *Pucca* Road	Power supply
1	2	3	4	5	6		8	9	10
—499	559	174 (31.13)	49 (8.77)	559 (100.00)	11 (1.97)	24 (4.29)	74 (13.24)	86 (15.38)	39 (6.98)
500—1,999	676	552 (81.66)	123 (18.20)	676 (100.00)	54 (7.99)	113 (16.72)	130 (19.23)	139 (20.56)	131 (19.38)
2,000—4,999	140	134 (95.71)	53 (37.86)	140 (100.00)	64 (54.71)	65 (46.43)	42 (30.00)	49 (35.00)	64 (45.71)
5,000+	11	10 (90.91)	7 (63.64)	11 (100.00)	9 (81.82)	9 (18.82)	6 (54.55)	4 (36.36)	8 (72.73)
Total	**1,386**	**870 (62.77)**	**232 (16.74)**	**1,386 (100.00)**	**138 (9.96)**	**211 (15.22)**	**252 (18.18)**	**278 (20.06)**	**242 (17.46)**

It can be seen from the table that the maximum number of villages, i. e., 676 (48.77%) in the district fall in the population range of 500—1,999 followed by 559 villages (40.33%) in the population range of less than 4.99. The lowest number of villages is observed in the population range of 5,000+being 11 (0.80%) in number

It may be of interest to the readers to note that the proportion of villages having different amenities varies in direct relation to their population range except in case of educational facility where the proportion of villages has declined in the population range of 5,000+. Generally, the maximum number of villages having different amenities have a population range of 5,000+ which also corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

Main Staple Food in the villages

The alongside table indicates that rice and wheat constitute the main staple food of the people in all the development blocks of the district.

Table 16 --Main Staple Food in the majority of villages in each Development Block.

Sl. no.	Name of the Development Block.	Main staple food
1	2	3
1	Gopalganj	Rice, wheat
2	Manjha	Rice, wheat
3	Uchkagaon	Rice, wheat
4	Hathua	Rice, wheat
5	Bhorey	Rice, wheat
6	Bijaipur	Rice, wheat
7	Katiya	Rice, wheat
8	Kuchaikote	Rice, wheat
9	Barauli	Rice, wheat
10	Baikunthpur	Rice, wheat

Villages according to land use

The land utilization data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been

explained in the Analytical Note at the appropriate place.

The following table gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to Land Use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in Hectares)	Percentage of Cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Gopalganj	80	19,635.85	92.12	41.10
2	Manjha	135	18,260.76	88.94	57.86
3	Uchkagaon	154	17,924.12	93.83	74.38
4	Hathua	123	17,479.32	89.35	63.30
5	Bhorey	149	14,151.61	91.63	67.06
6	Bijaipur	120	12,189.88	94.08	54.50
7	Katiya	199	21,006.59	87.55	54.31
8	Kuchaikote	211	24,404.96	93.29	59.80
9	Barauli	92	20,792.35	87.68	54.85
10	Baikunthpur	123	23,572.62	91.27	44.27
	Total	**1,386**	**189, 418.06**	**90.86**	**56.53**

It would be seen from the table that 90.86 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 56.53 per cent area is irrigated. Among the C. D. Blocks, the highest percentage of cultivable area is found in Bijaipur block with 94.08 per cent closely followed by Uchkagaon, Kuchaikote and Gopalganj with 93.83, 93.29 and 92.12 per cent respectively. The lowest cultivable area is found in Katiya block which is also as high as 87.55 per cent of the total area.

The highest proportion of irrigated area to the total cultivable area is to be found in Uchkagaon block accounting for 74.38 per cent followed by Bhorey with 67.06 per cent and Hathua with 63.30 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Gopalganj block (14.10%). In the remaining blocks the percentage varies between 44.27 per cent and 59.80 per cent.

Growth density and sex-ratio of urban population.

The urban population of the district in each of the Censuses from 1951 together with the percentage increase over the decades is indicated in Table 18 below. It also indicates the variation in density and sex-ratio in the urban population of the district in relation to the State :

Table 18—Growth, density and sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total Population	Urban Population	%Urban Population	Decadal percentage variation in Urban Population	Density (Population Per. Sq. Km.)	Sex-ratio (No. of females per 1,000 males)	Total Population	Urban Population	%Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. Km.)	Sex-Ratio (No. of Females per 1,000 males
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	8,22,854	27,903	3.39	..	743	890	2,87,82,271	26,26,261	6.77	38.14	2,320	842
1961	9,26,736	23,482	2.53	—15.80	1,586	835	4,64,47,457	39,13,920	8.43	+49.03	1,915	811
1971	11,07,464	29,309	2.67	+24.81	1,988	815	5,63,53,369	56,33,966	10.00	+43.95	2,032	807
1981	13,62 123	68,005	4.99	+132.03	1,840	903	6,99,14,734	87,18,990	12.47	+54.76	2,727	832

Note : Since there was no town in Gopalganj district in 1941 Census the column 5 showing decadal percentage variation for the period 1941—51 is left blank.

It will be clear from the table that the extent of urbanisation is quite low in Gopalganj. Whereas the urban population of the district formed a mere 3.39 per cent of the total population in 1951 as compared to the State figure of 6.77 per cent ; even in 1981 only 4.99 per cent of the population was urban while the State figure went up to 12.47 per cent.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. During the decade 1951—61 the urban population of the district had shown a negative growth whereas in the decade 1961—71 there had been an increase of 24.81 per cent. The urban population has shown tremendous rise during the current decade (132.03% increase) in the district. The trend of the growth of urban population in the State has been quite different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it disped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urbanisation during the last decade.

The density of population in the urban areas of the district has also increased considerably over the decades as shall be evident from column 6 of the table. Between 1951 and 1981 the density of the urban population of the district has more than doubled from 743 persons per sq. km. to 1,840 persons per sq. km. This clearly indicates that the towns of Gopalganj district are gradually becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of the urban population of the State on the other hand had not shown a similar rise till the 1971 Census. In 1981 Census, however, the density of the urban population of the State has shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is higher than that of Gopalganj which stood at 1,840 persons per sq. km.

The sex-ratio for the urban areas of Gopalganj district has along been higher as compared to the urban areas of the State. The sex-ratio of the urban areas of the district has shown a successful decline till the 1971 Census. In the 1981 Census, the district has, however, shown a considerable improvement in favour of females, though there is still predominance of males over females.

Towns added and declassified in 1981

As a result of urbanisation towns are expending over the decades. The following table gives an idea about addition of towns as also the towns which have been declassified in the 1981 Census. The criteria for a place treated as a town have been explained in the Analytical Note at the appropriate place :

Table 19—New Town/Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
1	2
(*a*) *Added*—	
Barauli (NAC)	23,401
(*b*) *Declassified*—	
Nil	

There are 3 towns, viz., Gopalganj (M), Barauli (NAC) and Mirganj (NAC) in the district of Gopalganj. Only Barauli (NAC) town with population of 23,401 has been added in the 1981 Census.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Per Capita

Class, name & civic status of the town	Receipt (in rupees)				Expenditure (in rupees)				
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on Public health and conveniences	Public Works	Expenditure on Public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III—Barauli (NAC)	2.03	1.56	0.47	1.56	1.21	..	0.21	..	0.14
III—Gopalganj (M)	24.05	3.48	20.57	11.62	3.01	5.31	1.52	0.09	1.69
IV—Mirganj (NAC)	4.38	1.93	2.45	11.57	1.47	1.55	0.11	..	8.44
Total	11.45	2.42	9.03	8.15	1.99	2.53	0.71	0.04	2.88

It would be apparent from the above figures that the per capita receipt both through taxes and through all other sources is the highest in Gopalganj (M) whereas it is the lowest on both counts in Barauli (NAC).

Per capita total expenditure is again the highest in Gopalganj (M). However, the per capita expenditure incurred on other aspects is maximum in case of Mirganj (NAC).

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns. The following table gives in details of different categories of educational institutions per 10,000 population in different towns of the district :

Table 21—Schools per ten thousand population in towns

Class, name and civic status of the town	Number per ten thousand population			
	Higher Secondary/Inter/PUC/Junior College.	Secondary/Matriculation	Junior Secondary/Middle	Primary
1	2	3	4	5
III—Barauli (NAC)	..	0.43	1.71	3.42
III—Gopalganj (M)	0.37	1.47	1.47	6.23
IV—Mirganj (NAC)	..	1.15	2.31	3.46
Total	**0.15**	**1.03**	**1.76**	**4.56**

It would be seen from the above table that institutions like Higher Secondary School/Inter/PUC/Junior College are only situated in Gopalganj (M) accounting for an average of 0.37 institution per ten thousand population. As regards Secondary/Matriculation level schools, there are, on an average, 1.47 schools per ten thousand population located in Gopalganj (M) which is the highest followed by 1.15 such schools per ten thousand population in Mirganj (NAC). Mirganj (NAC) has, however, the highest number of Junior Secondary/Middle Schools in the district with an average of 2.31 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 4.56 per ten thousand population. In this category Gopalganj (M) has the highest number of schools with an average of 6.23 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns :

Table 22—Number of beds in Medical Institutions in towns

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
III—Barauli (NAC)	0.26
III—Gopalganj (M)	2.90
IV—Mirganj (NAC)	..
Total	1.25

The number of beds in Medical Institutions per 1,000 population for urban areas of the district works out to be 1.25. The availability of beds in the hospitals is the highest in case of Gopalganj (M) having 2.90 beds per 1,000 population. Mirganj (NAC) does not have this facility at all.

Proportion of Slum Population in towns.

Table 23 relating to details of slums in town has not been prepared in case of Gopalganj district since it is restricted to only Class I (population 1 lakh and above) and Class II (50,000—99,999) towns and Gopalganj district does not have any of these categories.

Three important commodities imported, exported and manufactured.

The table presents the most important commodities manufactured, exported and imported in the three towns of Gopalganj district.

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important Commodity		
	Manufactured	Exported	Imported
1	2	3	4
III—Barauli (NAC)	Edible oil	Khaddar and Handloom bed sheets	Oil seeds
III—Gopalganj (M)	Sugar	Molasses	Rice
VI—Mirganj (NAC)	Sugar	Sugar	Rice

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col.6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), Rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspaper coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their lacation code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been complied on the basis of *Mauzawar* Notes prepared for each village by the local officials at the community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance viz., '(—5Kms.)', '(5—10Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists, the total number of schools shown in the column shall be more than the number of educational institutions.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column. 10), and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of

classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests.
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Colums 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term include all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forest areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching gross, bumboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abandoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column 5—Educational*

P	...	Primary or Elementary School (upto class IV)
M	...	Middle or Junior Secondary School (upto class VIII)
H	...	Matriculation or Secondary School (upto class X)
PUC	...	Higher Secondary, Intermediate, Pre-University, Junior College.
C	...	College
I	...	Industrial School
Tr	...	Training School
Ac	...	Adult Literacy Class, Centre
O	...	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column 6—Medical*

H	...	Hospital
MCW	...	Maternity and Child Welfare Centre.
MH	...	Maternity Home
CWC	...	Child Welfare Centre
HC	...	Health Centre
PHC	...	Primary Health Centre
PHS	...	Primary Health Sub-centre
D	...	Dispensary
FPC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
RP	...	Registered Private Practitioner
SMP	...	Subsidised Medical Practitioner
CHW	...	Community Health Worker
O	...	Others

(iii) *Column 7—Drinking Water*

T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water
TW	...	Tube-well Water
HP	...	Handpump
R	...	River Water
F	...	Fountain
C	...	Canal
L	...	Lake
S	...	Spring
N	...	*Nullah/Nala/Nallah*
O	...	Others
NA	...	Information Not Available

(iv) *Column 8—Post and Telegraph*

PO	...	Post Office
TO	...	Telegraph Office
PTO	...	Post and Telegraph Office
Phone	...	Telephone connection.

(v) *Column 10—Communications*

BS	...	Bus
RS	...	Railway Station
NW	...	Navigable Waterway (including river, canal backwaters etc.)

(vi) *Column 11—Approach to Village*

PR	...	*Pucca* Road
KR	...	*Kutcha* Road
NR	...	Navigable River
NC	...	Navigable Canal
NW	...	Navigable Waterway (other than river or canal)
FP	...	Foot Path

(vii) *Column 13—Power Supply*

ED	...	Electricity for domestic purpose
EAg	...	Electricity for agriculture purpose
EO	...	Electricity for other purposes like industrial, commercial, etc.
EA	...	Electricity for all purposes listed above.

(viii) *Column 16—Irrigated by source*

GC	...	Government Canal
PC	...	Private Canal
W	...	Well (without electricity)
WE	...	Well (with electricity)
TW	...	Tube-well (without electricity)
TWE	...	Tube-well (with electricity).
Tk	...	Tank
R	...	River
L	...	Lake
Wf	...	Waterfall
O	...	Others

(ix) *Column 20—Remarks*

N	...	Copies of Newspapers coming in the village
M	...	Motor Cycles/Scooters available in the village.
C	...	Cars/Jeeps available in the village.
T	...	Tractors available in the village.

It is likely that a village may have more than one institution amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities have been given in parentheses after the appropriate symbol in cols. 5 or 6 and just after the symbol in col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries primary health centres, etc., and number of of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forest, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Gopalganj district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives developmet blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level plainning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B), 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—GOPALGANJ

Amenities available [if not available within the village, a dash(—) is shown in the column and next to it in brackets, the distance in broad ranges, viz., —5 kms. 5—10 kms. and 10+kms., of the nearest place where the facility is available is given].

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (I) Status and growth history ; (II) Physical aspects and location of towns, 1979 ; (III) Municipal finance, 1978-79 ;(IV) Civic and other amenities in towns ; (IV-A) Civic and other amenities in Notified Slums ; (V) Medical, educational, recreational and cultural activities and (VI) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration have been indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town have been furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The details of data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of town and, for each town, the area, number of households, population as per each Census since 1901, population density and sex-ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
CB	...	Cantonment Board/ Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 are generally based on the reports of the local officials. However, for towns where this information was available from the Office of the Director General of Observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of severage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a Slum in a Class I or Class II town, the available civic amenities in 1979. Since in the district of Gopalganj there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town statement IV-A relating to the Slums does not find place in the present volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town, in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational traning institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, Stadia, places of entertainment and libraries there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H(Hom)	...	Hospital (Homoeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homoeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories —Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HAND BOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or Circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the district, subdivisions and development blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the administrative and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban area. The concepts of village, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle) which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the village/urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
