

CENSUS OF INDIA 1981

SERIES—6

HARYANA

DISTRICT CENSUS HANDBOOK

PARTS XIII A & B

VILLAGE & TOWN DIRECTORY

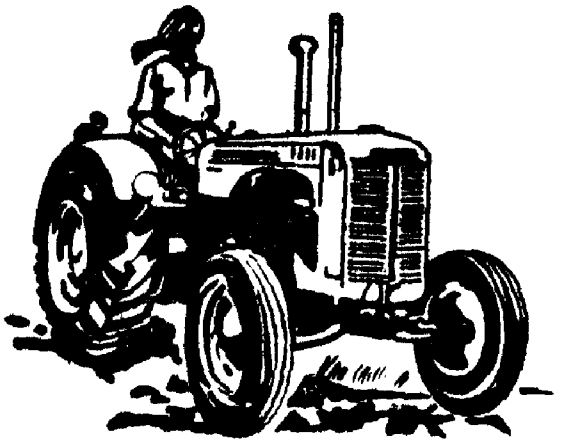

VILLAGE & TOWNWISE

PRIMARY CENSUS ABSTRACT

FARIDABAD DISTRICT

O. P. BHARADWAJ
OF THE INDIAN ADMINISTRATIVE SERVICE
Director of Census Operations
Haryana

Published by the Government of Haryana
1983

Haryana is also known as the tractor State of India. Most of the Tractors in Haryana are being built in Faridabad Industrial Complex and the motif symbolises this fact. The State Government have provided the required infrastructure which has attracted industry in all sectors and turned the complex into the industrial backbone of the State.

CENSUS OF INDIA—1981

A—CENTRAL GOVERNMENT PUBLICATIONS

The publications relating to Haryana bear Series No. 6 and will be published as follows:—

Part I-A	Administration Report—Enumeration (for official use only)
Part I-B	Administration Report—Tabulation (for official use only)
Part II-A	General Population Tables : } combined
Part II-B	Primary Census Abstract : } combined
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on houses and disabled population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes
Part X-A	Town Directory
Part X-B	Survey Reports on selected towns
Part X-C	Survey Reports on selected villages
Part XI	Ethnographic notes and special studies on Scheduled Castes
Part XII	Census Atlas

B—HARYANA GOVERNMENT PUBLICATIONS

Parts XIII—A&B District Census Handbooks—one for each district (Village and Town Directory and Primary Census Abstract)

Palwal Tahsil:	Ditto	63

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/CD Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri O.P. Bharadwaj, I.A.S., the Director of Census Operations, Haryana on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar

General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India.

New Delhi
the 26th April, 1982

PREFACE

At the outset, it must be stated that the Census Operations of 1981 were carried out under the stewardship of Shri O.P. Bharadwaj, Director of Census Operations, Haryana and the credit for the successful conduct of the Operation goes to him. Before, however, the report could be finalised he had to resume his duties under the State Government in public interest.

In March, 1981, the provisional population totals of Haryana State were released after the enumeration was over. The actual enumeration was conducted from 9th February to 28th February, 1981, with a revisional round from Ist March to 5th March, 1981 in order to bring the Census count correct upto the reference date i.e. the sunrise of 1st March, 1981.

In Paper-I of 1981 provisional figures down to the district level and cities with population of 100,000 and above had been given and basic data relating to total population including sex ratio, density, decennial growth rate, literacy and sexwise break-up of population were presented. Thereafter a supplement to Paper-I of 1981 was brought out presenting a few other characteristics of population also based on provisional results of 1981 Census. It covered information on urban population and work participation rates of the male and female population. Data down to the tahsil and town levels in the form of Primary Census Abstract and on disabled persons were also included.

The 1981 series of District Census Handbooks to which this volume belongs has been divided into two parts. Part-A presents data obtained from the field on land use pattern and amenities such as drinking water, post and telegraph, educational, medical etc. available in each village and civic and other amenities in each town. Part-B presents demographic data down to the village level in rural areas and ward level in the case of urban areas. Enumeration block-wise figures of total population and Scheduled Castes population in case of urban areas are shown in an appendix at the end of Primary Census Abstract. Our attempt has been to present the information concerning each district in its maximum possible details in the hope that these volumes will prove useful to scholars, planners and those who are working to improve the economic condition of the people particularly in our State and generally in the country as a whole.

Dated : Chandigarh
the 16th May, 1983

R. K. AGGARWAL
Deputy Director of Census Operations,
Haryana

ACKNOWLEDGEMENTS

In a country like India, with the dimensions of a sub-continent and one sixth of the world's population, Census is a gigantic task. That we have been able to accomplish it successfully is largely due to the inspiration and guidance of Shri P. Padmanabha, Registrar General and Census Commissioner, India. His deep understanding of both the conceptual as well as the practical aspects of Census and complete identification with the job have been a living example to us all and his ever-smiling and unruffled expression, always considerate and sympathetic view of our problems and polite but firm handling of difficult situations made him an ideal captain of the team engaged in a stupendous undertaking. First and foremost, therefore, we must express our grateful thanks to him for showing us the right direction in steering the Census ship through difficult waters.

For the massive operation of actual Census taking, the whole country is divided into convenient Enumeration Blocks covering about 750 persons in the rural areas and about 650 persons in the urban areas. In Haryana State, as many as 20,534 Enumeration Blocks were demarcated and 23,603 Enumerators and Supervisors were appointed and trained for the work of actual count. An overwhelming majority of the Enumerators and Supervisors was drawn from the Education Department of the State and the remaining from Central/State Government Departments and from the offices of Local Bodies. They canvassed the basic Census schedule i.e. the individual slip for each person by moving from house to house during the Enumeration period. We, therefore, take this opportunity to express our deep appreciation for these thousands of field workers who at considerable inconvenience to themselves worked hard to make the colossal task of the 1981-Census a success.

The Principal Census Officers, District Census Officers, Additional District Census Officers, Sub-Divisional Census Officers, Charge Officers and Deputy Charge Officers were responsible for organising and co-ordinating the work in their respective areas of jurisdiction. A large share of the credit goes to these State Census Officers in the districts who discharged their duties with full vigour and enthusiasm. We are really grateful to them for their ungrudging co-operation. We must also acknowledge with gratitude the active help and co-operation extended by the Government of Haryana at all levels and the goodwill shown by the people of the State to the staff working for the Census Organisation.

The great mass of information collected in the field was edited and processed in our two Regional Tabulation Offices located at Ambala and Kurukshetra with the help of 500 odd Tabulators, Checkers and Supervisors. The compilation of Primary Census Abstract is an outcome of the hard labour put in by the dedicated team of officials consisting of Tabulators, Checkers, Supervisors, Statistical Assistants and Investigators in these Regional Tabulation Offices. All of them deserve praise for hard work put in by them to complete the work in the stipulated period. The Regional Tabulation Office at Ambala Sadar was looked after by Shri S.L. Bahl, Deputy Director who was assisted by Shri A.L. Kakkar, Investigator and four Statistical Assistants while the Regional Tabulation Office at Kurukshetra was controlled by Shri R.K. Puri, Deputy Director who was assisted by Shri Vinod Kumar Babbar, Investigator and four Statistical Assistants. Shri J.R. Vashistha, Assistant Director, also worked as Deputy Director in the Regional Tabulation Offices for some time firstly when Shri S.L. Bahl, Deputy Director proceeded on leave and again on the transfer of Shri R.K. Puri, Deputy Director to the office of the Registrar General, India, New Delhi. We would like to record our appreciation of the assistance provided by these officers/officials.

Village and Townswise Primary Census Abstracts prepared in the two Regional Tabulation Offices were checked and finalised in the Head Office by a team of Statistical Assistants and Shri Jaswant Lal, Investigator under the supervision of Sarvshri J.R. Vashistha and J.N. Suri, Assistant Directors. These abstracts form Part-B of this District Census Handbook.

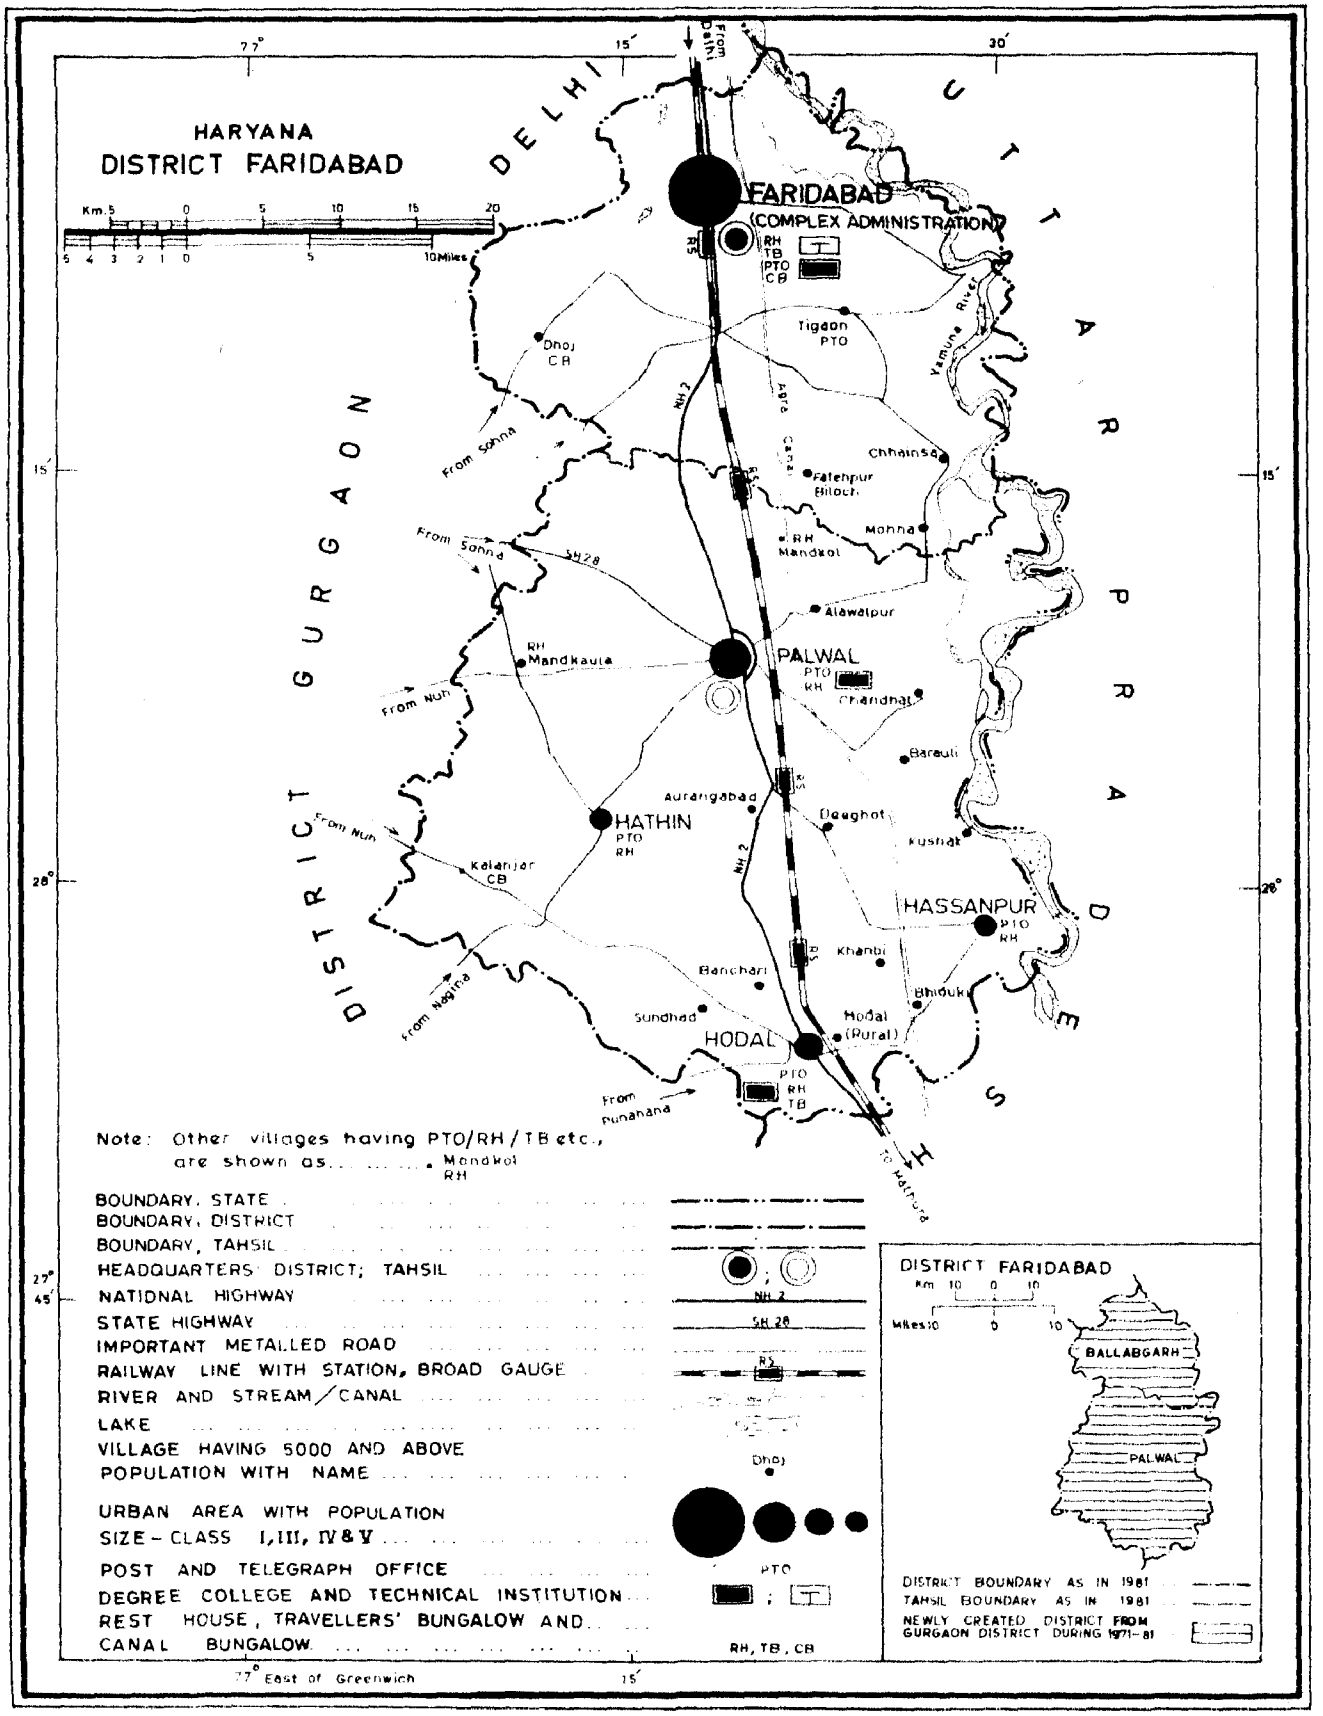

The data contained in Village and Town Directories which form Part-A of this Handbook was collected by us from the District Revenue Agency and the Local Bodies. We also approached various State Government Departments to provide the relevant data for cross-checking the accuracy of the information collected from the field by the above mentioned two agencies. We are indebted to them for the co-operation and promptness with which they met our requirements. In our office, the data thus collected was processed and finalised into various statements by a team of Computors, Statistical Assistants and Sarvshri Amarjit Singh and Koshy P. Zachariah, Investigators under the supervision of Sarvshri J. R. Vashistha and J.N. Suri, Assistant Directors.

The maps included in the Handbook and cover design were prepared in the Map Section headed by Shri J. P. Purohit, Cartographer under the supervision of Shri S. R. Puri, Research Officer (Map). We have also to mention the assistance rendered in the preparation of the draft of this Handbook by Shri J. N. Suri, Assistant Director, Shri S. R. Puri, Research Officer and Shri P. N. Modgil, Research Officer.

We have to record with gratitude the valuable guidance provided by Shri N. G. Nag, Deputy Registrar General (Social Studies) and Dr. B. K. Roy, Deputy Registrar General (Map). Our thanks are also due to

Shri M. M. Dua, Senior Research Officer, Shri S. C. Srivastava, Assistant Central Tabulation Officer and their staff in scrutinising portions of this Handbook relating to their respective branches in the office of the Registrar General, India.

This brief section on acknowledgements is by no means exhaustive and there are many more unnamed people to whom our thanks are due but before we close we must thank Shri K. M. S. Pillai, Controller and Shri P. Oommen, Deputy Controller, Printing and Stationery, Chandigarh Administration for making a good job of the printing of this Handbook.

ANALYTICAL NOTE

CONCEPTS AND DEFINITIONS

It has been the tradition of the Indian Census to present Census data for rural and urban areas separately. In fact, in all the censuses throughout the world, this classification of census data into rural and urban units is generally recognised and data presented accordingly. But the distinction between rural and urban is not yet amenable to a single definition which could be applicable to all countries.

The Village defined

The definition of the village adopted in our State for the Census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is, as such, exclusively administrative in character. From this point of view, a village is better called a Revenue Estate, meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such, for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The Revenue Estate or 'Mauza' the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined "as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate". This definition of village has been adopted for the purposes of the Census ever-since the year 1901. The village, therefore, is not merely the inhabited area (*abadi deh*) of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

Urban area defined

After considerable thought, the following definition of an urban unit adopted at the 1961 and 1971 Censuses has been retained with a minor variation for the 1981 Census :

(a) All places with a municipality, corporation, cantonment board or a notified area committee etc.

(b) All other places which satisfied the following criteria :

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per square kilometre (1000 per square mile).

In 1961 and 1971 Censuses the males working in activities such as livestock, forestry, fishing, hunting and plantations, orchards and allied activities were treated as engaged in non-agricultural pursuits and therefore contributed to the 75 per cent criterion whereas in the 1981 Census these activities are treated at par with cultivation and agricultural labour for the purpose of this criterion.

In addition to all municipal areas/cantonment board, four villages namely (1) Babiyal in Ambala district, (2) Samalkha in Karnal district, (3) Gurgaon (rural) and (4) Jharsa in Gurgaon district satisfying the above criteria have been treated as census towns (non-muncipal) in 1981 Census. Panchkula Urban Estate in Ambala district has also been treated as a town. The Faridabad Complex Administration consisting of Faridabad, Faridabad Township and Ballabgarh towns of 1971 and some surrounding villages, in Faridabad district has been treated as an independent town. The total number of towns in the State in 1981 Census has thus risen to 81 as compared to 65 in 1971 Census.

What is a Census House

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purpose or for both.

What constitutes a Household

A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of

persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called 'Institutional households'. By 'Houseless Household' is meant a household, the members of which do not have a house to live in and spend the night on foot paths etc. There may be one member households, 2 member households or multimember households. For census purposes, each one of these types is regarded as a 'household'.

Definition of Scheduled Castes/Scheduled Tribes

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

"Scheduled castes" mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

"Scheduled tribes" mean such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of scheduled castes and scheduled tribes for each State and Union Territory. Accordingly, the Scheduled Castes and Scheduled Tribes are listed under a Presidential Order for each State and Union Territory. In the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, as amended upto date, as many as 37 castes are listed as Scheduled Castes in the State of Haryana. There is, however, no Scheduled Tribe, listed as such, in Haryana State.

Who is literate

A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Worker defined

Like 1971 Census, a worker in 1981 Census is a person whose main activity is participation in any economically productive work by physical or mental activity. Work involves not only actual work but also effective supervision and direction of work. The main worker is one who has worked for 183 days or more in a year in one or more than one economic activity. A person who has worked for less than 183 days in a year is considered a marginal worker.

And a Non-worker

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

Connotation of Cultivator

For purposes of the Census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institution for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Who is Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

Meaning of Household Industry

Household industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

Standard Urban Area explained

The concept of the Standard Urban Area which was adopted for the first time in 1971 envisaged a constant statistical spatial reporting unit which was to serve as the basis of urban development planning for the concerned city or town. The Standard Urban Area is defined as "the projected growth area of a city or town having 50,000 or more

population in 1971, as it would be in 1991,taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Thus, it is a long term planning area and is to remain as a statistical reporting unit during the three successive Censuses-1971, 1981 and 1991".

In the case of Haryana, the following eleven Standard Urban Areas were delineated:

1. Ambala
2. Bahadurgarh
3. Bhiwani
4. Faridabad Complex Administration (previously known as Faridabad—Ballabgarh Complex)
5. Gurgaon
6. Hisar
7. Karnal
8. Panipat
9. Rohtak
10. Sonipat
11. Yamunanagar-Jagadhri

The concept of Urban Agglomeration

The concept of Urban Agglomeration adopted for the first time during the 1971 Census was an improvement on the concept of town group adopted in the 1961 Census. An urban agglomeration, must form a continuous urban spread constituting a town and its adjoining urban out-growths or two or more physically contiguous towns together with continuous well recognised urban out-growths, if any, of such towns.

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though they are outside the statutory limits of the corporation, municipality or cantonment, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units ; at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining another such as a municipality and the adjoining cantonment and also other adjoining urban growths such as a railway colony, university campus, etc. Such outgrowths which do not qualify to be treated as individual towns in their own right are to be treated as urban appendages of the units to which they are contiguous.

In 1971 Census no place was recognised as a continuous urban spread deserving to be treated as an urban agglomeration in Haryana. However, the following four urban agglomerations have been delineated at the time of 1981 Census :—

Urban Agglomeration	Constituent towns or urban outgrowths
1. Yamunanagar (U.A.)	1. Jagadhri Workshop Railway Colony (M.C.) 2. Yamunanagar (M.C.) 3. Jagadhri (M.C.)
2. Hisar (U.A.)	1. Hisar (M.C.) 2. Haryana Agricultural University and Mini Secretariat
3. Ambala (U.A.)	1. Ambala Cantt. (C.B.) 2. Ambala Sadar (M.C.)
4. Gurgaon (U.A.)	1. Gurgaon (M.C.) 2. Gurgaon Census Town

THE DISTRICT

The present Faridabad district comprising the tahsils of Ballabgarh and Palwal was created *vide* Haryana Government notification No. 3313-E(iv)-79/32194 dated 2nd August, 1979 which took effect from 15th August, 1979 At the time o f 1971 Census the two tahsils of Ballabgarh and Palwal now forming Faridabad district were part of Gurgaon district. At the time of formation of Faridabad district, 98 villages were also transferred to Palwal tahsil from Nuh tahsil of Gurgaon district. Tahsil Ballabgarh has 210 villages including 4 villages added due to riverain

action from Uttar Pradesh during the decade 1971—81 and one town Faridabad Complex Administration whereas tahsil Palwal comprises 295 villages and four towns of Palwal, Hathin, Hodal and Hassanpur. With a population of 1,000,859 as per 1981 Census Faridabad ranks sixth among districts with 7.75 per cent of total population of the State. Being 2,150* sq. kms. in area it occupies 4.86 per cent of the total area (44,212* sq. kms.) of the State and area wise ranks twelfth in the State. Haryana has on an average 292 persons per sq. kilometre, with Faridabad district as the most thickly populated (466) and Sirsa as the sparsest (165).

The district lies between 27°51'15" and 28°30'52" North Latitutde and 77°04'30" and 77° 32'50" East Longitude. On its north is the Union Territory of Delhi. To its northeast, east and southeast is the State of Uttar Pradesh. On its southwest and west is the district of Gurgaon.

Since the last Census of 1971, there have been many changes in the boundaries of some of the existing districts and some new districts have also been formed. The new districts are Kurukshetra, Sonipat, Faridabad, Bhiwani and Sirsa. Thus increased number of districts to 12 in 1981 as against 7 in 1971. The figures presented in this volume adhere to the boundaries of administrative units as on 31st December, 1979. They cover 39 tahsils and 81 cities/towns including the four Census towns in the State.

District Census Handbook

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook (DCH) consisting of Village and Town Directories and Village and Townwise Primary Census Abstract (PCA).

Prior to 1951, District level Census data formed part of general reports and tables. Publication of District Census Handbooks as independent publications began from 1951 Census only.

In 1961, attempts were made to make the District Census Handbooks more informative and these contained valuable Census data for each village and town of the district, indicating some basic amenities available in the villages. In 1971, the scope and coverage of both census and non-census statistics was further enlarged and the District Census Handbooks were published in two volumes, first containing the two Parts A & B and the second comprising Part C alone :—

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

The publication of Part-C was considerably delayed because of delay in getting the administrative statistics from the various departments. So, Part-C has been dropped this time. Moreover, the administrative statistics would be available to the data users from the publications of the respective departments.

Part-A of the 1981 District Census Handbook contains Village and Town Directory and Part-B contains Village and Townwise Primary Census Abstracts. Both the parts have been combined together in this volume. A tahsil map showing the village boundaries, the location code numbers of the villages, the distribution of various amenities in villages and the size class of their population, has been given in the beginning of Section I—Village Directory. An alphabetical list of villages in each tahsil has also been given, along with a note explaining the codes used in the Village Directory. The codes used in the Town Directory have been explained at the beginning of Section II—Town Directory.

SCOPE

Village Directory

Amenities and land use

The Village Directory provides certain basic data separately for each village, the villages in the district having been arranged tahsilwise and within the tahsil, location codewise. At the time of Census enumeration each village was assigned a code number for purposes of identification.

The format of the village directory follows the pattern canvassed in 1971 Census except for a few additional columns. The column for total population and number of households has been added to facilitate analysis of the village directory data. The column for approach to village is aimed at having an idea of the number of inaccessible villages in a district. All the amenities except power supply in the village have been brought together with the instructions that if an amenity is not available in the village a dash (—) may be shown against the same in the relevant column but next to it the distance from the village of the nearest place where the facility is available may be given in broad ranges in brackets, the ranges being; "(—5kms.)", "(5—10 kms.)" and "(10+kms.)".

*Provisional.

The Village Directory, therefore, contains information about the total area of the village (Column 3); total population and number of households (Column 4); and availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, day(s) of the market/hat and communications (Columns 5 to 10). In Columns 11 to 13, approach to village, nearest town and distance and availability or otherwise of power supply have been indicated. Column 14 shows the staple food of the people of the village. The area under different types of land use such as area under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and the area not available for cultivation has been given in Columns 15—19. In Column 20 have been indicated the places of religious, historical or archaeological interest along with the information regarding newspapers, motorcycles/scooters, cars/jeeps and tractors. The data presented in the village directory has been collected from the District/Tahsil revenue agency.

Appendix 1

This Appendix gives for each tahsil the number of villages having various levels and types of educational institutions, such as primary schools, middle schools, adult literacy centres etc. along with their number, various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as, taps, tubewells etc., post and telegraph offices,power supply, railway station, bus stop etc. and also the number of villages not having these amenities.

Appendix 2

This Appendix gives for each non-municiapal town (i.e. place treated as town only for Census purposes) the area under forest, irrigation, unirrigated land, culturable waste land and area not available for cultivation. But it remains blank as there is no such town in Faridabad district.

Appendix 3

This Appendix gives the list of villages where no educational, medical and public health facilities are available.

Appendix 4

This Appendix gives the list of villages with Scheduled Castes population in various ranges of proportion. Information is presented by the ranges 0—5 per cent, 6—10 per cent, 11—15 per cent, 16—20 per cent, 21—30 per cent and 31 per cent and above.

Town Directory

The Town Directory consists of seven statements almost similar to those adopted for 1971 Census. These statements have been compiled from the information supplied by the local bodies. A few new columns have been introduced with a view to facilitating analysis of the data. A significant addition is of class of town in every statement because the infrastructure of amenities and facilities found in urban areas can be analysed by taking the class of town into consideration. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose.

The columns on Scheduled Castes population in statement IV and adult literacy classes/centres in statement V have been provided keeping in view the Minimum Needs Programme of the Planning Commission.

Again if the fire fighting service as in statement IV and medical or educational facilities as in statement V are not available in the town, the name of the nearest town if in the same district or the name of the nearest district if in the same State or other State where available along with its distance from the referrent town is given. This is a new feature of 1981 Census as it is necessary to idenfity the areas with no specific facility in every district. Details contained in each statement are given below.

Statement-I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, density, sex ratio and population/ growth rate. In case a town did not enjoy urban status at any Census, the relevant columns under the headings 'Population and growth rate of the town at the Censuses of' and 'Sex Ratio' have been left blank. Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1981 Census population of the core town as follows:—

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Statement II gives the physical aspects of the various towns in the district. Data regarding minimum and maximum temperature is not available for any town in the district. Rainfall data is available only for the towns of Faridabad Complex Administration and Palwal.

Statement III indicates the position of Municipal Finances for the year 1978-79. Income and expenditur figures have been given in Rs. '00' in respect of each town in the district.

Statement IV shows civic and other amenities viz., roads, system of sewerage, number of latrines, method of disposal of night soil, water supply, fire- fighting service and the number of electric connections as available during the year 1979. Sewerage facilities are available in Faridabad Complex Administration only whereas all other towns are served by open surface drains. In all the towns except Faridabad Complex Administration the method of carriage of night soil is by wheel-barrows. In Palwal the practice of carriage of night soil by baskets also continues. Fire-fighting service is available in Faridabad Complex Administration only.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns. Faridabad Complex Administration — the only class I town in the district has 28 slum areas. Sewerage facility is available in all these slums. Taps for supply of protected water have also been installed in some of the slums.

Statement V reflects the position of medical, educational, recreational, cultural and working women's hostel facilities for each town in the district during the year 1979. Under the heading medical facilities, the number of hospitals/dispensaries/TB Clinics etc. has been shown separately along with the total number of beds available. Under the heading educational facilities, number has been given separately of Arts/ Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training Institutions, Higher Secondary/ Secondary/Junior Secondary/Middle/Primary Schools and Adult Literacy Centres. The extent of availability of recreational and cultural facilities is reflected in the number of stadia, cinema, auditoria and public libraries.

The towns of Hassanpur and Hathin do not have any college. There are three colleges —one Arts and Commerce College, one Arts and Science College and one Arts, Science and Commerce College in Faridabad Complex Administration, one Arts and Commerce College in Hodal and one Arts and Science College in Palwal. There are five Vocational Training Institutions in the district—three in Faridabad Complex Administration and two in Palwal.

In statement VI information regarding three most important commodities imported/exported and manufactured has been given along with the number of banks, agricultural credit societies and non-agricultural credit societies. Tractors, motor cycles, textiles, agricultural implements etc. are among the important items manufactured in the district.

Primary Census Abstract of general population

(i) *District Primary Census Abstract*:—In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each tahsil separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

(ii) *Tahsil-wise Primary Census Abstract*:—Here figures for each village and town (and within the town wardwise) in a tahsil have been presented.

At the time of Census enumeration, enumeration blocks were formed in the villages, each block consisting of about 750 persons and in the towns, each block consisting of about 650 persons. But the data have not been given for each block separately in the case of rural areas. In the case of urban areas total population and Scheduled Castes population have been shown blockwise in the appendix. Data in Columns 6—28 of the Primary Census Abstract have been given sex-wise. During 1971 Census break-up of workers into nine industrial categories was given whereas categories III, IV, V(b) and VI to IX have been combined together while presenting 1981 Census figures. A new concept of 'Marginal Worker' has been introduced this time.

Appendix

This Appendix gives at urban block level the total population and Scheduled Castes population.

Primary Census Abstract of Scheduled Castes population

In the District Primary Census Abstract of Scheduled Castes population figures have been presented for the district as a whole as well as for each tahsil/town separately.

PHYSICAL ASPECTS

The district has a sub-tropical continental monsoon climate. The rainfall distribution is relatively satisfactory in relation to the western parts of Haryana and it is mainly concentrated during the monsoon. District

is a plain area with a perennial river Yamuna on its east which has formed its flood plain area. Soils particularly loam (*Bhangar and Nardak*), and silty loam (*khadar*) are found in the district. Underground water level is comparatively low in the district. A good net work of canals has come up in the district assuring prosperity for the region. Wells and tubewells are also the important sources of irrigation in the area.

ECONOMY

The district has a mixed type of economy which is partly agricultural and partly industrial. At the time of 1981 Census, 41.93 per cent of the total main workers were registered under agrarian sector consisting of cultivators and agricultural labourers. Household Industries claimed 2.60 per cent while 'Other Workers' were 55.47 per cent in the district. Faridabad-Ballabgarh industrial complex which now forms part of Faridabad Complex Administration is the 10th largest industrial complex in the country. Three decades ago, Faridabad was just a piece of barren land with some mehendi trees. Till 1947 it remained a silent sleepy town with no industry. This complex developed after the partition of the country when a little over 4,000 displaced persons from West Punjab and North West Frontier Province came to settle down in this area and were given plots for shops and workshops. They worked hard to make Faridabad town grow at a phenomenal rate. Faridabad industrial complex has an edge over other industrial areas of the country. The first and foremost is its locational advantage. Its access to big markets like Bombay, Calcutta, Delhi and Madras etc. through rail, road, telephone and telex is another big factor contributing to the commendable growth of this complex. There were 834 registered working factories in the district during the year 1979 and estimated number of workers employed in them was 76,677. This district ranked first in the State in regard to registered working factories. 143 of these factories manufacture machinery and machine tools and 116 cotton textiles. The large and medium scale units are engaged in producing motor cycles, scooters, wheel rims, magnets, pistons, engines and brake equipments, mobile cranes, industrial tuggers, shunters, hand tools, auto tyres and tubes, electric motors, fans, printed cloth, A.C. sheets and moulded pipes, tractor equipments, air compressors and pneumatic tools, rubber footwears, diesel engines, yarn etc. Escorts Limited, Gedore Tools India Limited, Goodyear India Limited, DLF Universal Electronic (Private) Limited, East India Cotton Manufacturing Company Limited, Hyderabad Asbestos Cement (Private) Limited, Kelvinator of India Limited, K.G. Khosla and Company (Private) Limited, Bata India Limited, Luxmi Rattan Engineering Works and Usha Spinning and Weaving Mills (Private) Limited are some of the big units located in Faridabad Complex Administration. Some of these units not only help the country's economy but also support and assist a large number of ancillaries. They buy their requirement of spares from the ancillaries and also extend technical assistance to them so as to help augment their productive potential. Products of this industrial complex have found market in many foreign countries. Besides, there are many small scale units in the district and these manufacture metal products and parts, rubber, plastic, petroleum and coal products, chemicals and chemical products, wood and wood products, furniture and fixtures, cotton textiles, engineering goods, electronic goods and food products. This industrial complex yields considerable revenue to the State and the Central exchequers. It is a good show window of resurgent India's technical competence.

Irrigation in the district mainly depends upon tubewells and canals. During the year 1979, area irrigated by tubewells and canals was 50 thousand hectares and 38 thousand hectares respectively. Area under cultivation of foodgrains was 203.7 thousand hectares during the year 1979-80. Among the foodgrains, mostly wheat and bajra are grown. A very small area of 3 square kilometres is under reserved forests. During 1979-80 the number of different types of motor vehicles on road was 93,583 in the State out of which 10,785 came from Faridabad district.

HISTORY AND ARCHAEOLOGY*

Brief history

The district is named after the town Faridabad which is said to have been founded in A.D. 1607 by Shaikh Farid, treasurer of Jahangir, with the object of protecting the highway which passed through the town. Shaikh Farid built a fort, a tank and a mosque. Later, it came to be the headquarters of a pargana which was held in jagir by the Ballabgarh ruler. It was confiscated by the Government as the ruler took part in the 1857 Uprising.

The site for Faridabad township was selected by the Government of India for rehabilitating the displaced persons migrating from the North Western Frontier Province and Dera Ghazi Khan district (now in Pakistan) consequent upon the partition of India in 1947. To start with, the control of this township was vested in the Faridabad Development Board, which functioned under the authority of the Government of India through the Ministry of Rehabilitation. It was not considered desirable that the Central Government should retain a permanent enclave within the territory of the State Government and so the township was handed over to the Punjab Government in 1957.

Legend, however, fanciful, has it that the town Ballabgarh was founded by Ballhab Singh, the son of a poverty stricken cultivator. His mother as usual carried a few pieces of dry bread and onions as a midday repast for her husband who was tilling a tiny patch. She put down the child whom she had also carried in her lap in the shade under a tree and took the food to her husband where he was working. When she returned, she found a black serpent hovering with its hood raised over the baby. As the men around

*Source : District Gazetteer, Gurgaon, 1983.

rushed to kill the snake, a passing sadhu pleaded with them to desist, and prophesied the child would one day be a king. His words came true. Ballhab struck great fortune when two mules laden with gold mohurs strayed into the farm. This was the beginning of his rise. He and his successors ruled over 200 surrounding villages as fiefs of the Mughals for seven generations.

The fort in the town is said to have been built by Balram and possibly the name may be a corruption from Balramgarh. The township outside the fort precincts was laid out by Raja Bahadur Singh of Ballabgarh. It still bears the trace of his careful planning-quadrangular market-places, wells at cross-roads, and a large garden which he named Dilkusha. A chhatri and a pakka tank were constructed by the widow of Anrudh Singh, Raja of Ballabgarh till 1818, in the memory of her deceased husband. The fort, the tank and the chhatri are still there. The inner part of the fort now houses the police station and tahsil offices. The last of this dynasty was Nahar Singh, a martyr of the great Uprising of 1857. A monument and Nahar Singh Memorial Park have been raised by the municipal committee on the outskirts of the town to mark the centenary of the event. In January, 1972, the towns of Ballabgarh, Faridabad Old and Faridabad Township were included in the Faridabad Complex Administration. This complex was constituted to promote the planned development of the region particularly on the industrial side.

Places of interest

Hodal

Hodal lies at a distance of about 87 kilometres from Delhi and 72 kilometres to the south-east of Gurgaon. The oldest part of the town is on the hill formed by the debris of a still older habitation. Suraj Mal of Bharatpur was connected by marriage with the Jats of Hodal. During his time many magnificent buildings were erected: a fine old serai, a baoli and a masonry tank, but all these are now in ruins. Mention may, however, be made of a tank and a copse called Pando Ban with the shrine of Radha Krishna, situated at about a kilometre from the town. The tank and the temple are held in high esteem by the Hindus.

Palwal

Palwal is situated on the Delhi-Mathura National Highway about 61 kilometres from Delhi. The origin of the town is lost in legend and it is identified with the Apelava of the Mahabharata, a part of the Pandava kingdom of Indraprastha. Tradition associates with the same period the high mound of Aharwan, a village, a few kilometres to the south-west of the town. According to tradition, the town is said to have decayed for long and then been restored by Vikramaditya. The oldest part covers a high mound formed by the accumulated debris of many centuries. At the down-fall of the Mughal empire, along with the surrounding territory, it was given to General Due Boigne as a Jagir and after the conquest of Lord Lake to Murtaza Khan of Delhi for a few years, after which it was annexed by the British.

The places of interest are : Panchayati Temple (situated on the south of Palwal town, it is associated with the Pandavas in popular belief) : an old fort which was constructed during the Mughal period, now in ruins; Jama Masjid, which appears to date back to A.D. 1210, Idgah of Shihab-ud-din, built about A.D. 1211 ; presently in ruins and occupied by Jawahar Gaushala, and Tomb of Roshan Chiragh, which dates back to A.D. 1661, and was constructed by the saint, Roshan Chiragh, who levied a tax of one stone from every cartload that passed from Bharatpur to Delhi for building Shah Jahan's palace and with these the tomb was constructed.

Hathin

This town is located 16 kms. west-south of Palwal on Palwal-Hathin Road. According to local tradition the site was founded by a king in the heart of a jungle. A number of elephants used to graze in this jungle. Later on the place was named Hastin (elephant) and its corrupt form became Hathin. This tradition seems to be borne out by the discovery of a skeleton of an elephant during excavations at Autha, 15 kms south-east of Hathin. There are many mutilated art pieces near the site, but the most important and interesting piece is the railing pillar of Sunga period which is fixed in the wall of a tank and is worshipped as Khera Devta. The site has also yielded painted Grey Ware, early and later historic pottery.

Archaeological sites

A number of Painted Grey Ware sites have been found spread over the Faridabad district. This can be attributed to the nearness of this area to Indraprastha (Delhi), Hastinapur and Mathura. A research scholar from Kurukshetra University has identified some such sites ranging in date from proto-historic (late Harappan) to late medieval time. A brief account of some of the more important sites is given below : -

Aharwan (Tahsil Palwal)

This village lies 7 kms. south-west of Palwal. It has yielded Painted Grey Ware, early historic pottery and late medieval remains. The other finds recovered from the site include beads, balls, decorated discs and figurines of

Yaksha Vamanakas of Kushana period, figurines of elephant belonging to Gupta period and a seal in terracotta bangles of copper, faience and glass and copper coins of Hagamasa, Sodasa, Brahmamitra, Kota and later Kushanas.

Sondhad (Tahsil Palwal)

This village lies 4 kms. south of Hodal on Nuh-Hodal Road. According to local tradition, the village was founded during the Mahabharata period.

In addition to Painted Grey Ware, the site has yielded a number of art pieces in stone, viz., image of Vishnu of Kushana period, a bust of female attendant and head of a figure of Gupta period, Vishnu with Ayudhapurusas and Vidyadharayugala of early medieval period. A terracotta female figurine of Gupta period has also been recovered.

Chhainsa (Tahsil Ballabgarh)

This village lies 20 kms south of Ballabgarh on Ballabgarh-Mahana Road and is situated on the right bank of Yamuna. According to local tradition, the site is connected with Pandavas. It is also said that Sravan Kumar with his parents stayed here while he was coming from Mathura. The site has yielded Painted Grey Ware, early historic pottery and late medieval remains.

Tilpat (Tahsil Ballabgarh)

This village lies 5 kms east of Faridabad on Faridabad-Tilpat Road. It was one of the five territories which were demanded by the Pandavas and the denial of which by their cousin Duryodhana led to the Great Mahabharata War. The place has yielded Painted Grey Ware and early historic pottery.

Sihi (Tahsil Ballabgarh)

This village lies at a distance of about 37 kms. from Delhi on Delhi-Mathura Highway. It has been included in Faridabad Complex Administration since January 15, 1972.

Here is a temple situated on a mound, which according to the popular belief, marks the birth place of Sur Dass, a great devotee of Lord Krishna, and a well-known poet of Bhakti movement of the medieval period.

Some sherds of the Painted Grey Ware have been discovered on a mound nearby.

Tourist resorts

The State Government has provided oasis of comfort, relaxation and recreation by creating tourist complexes for the road wary all over Haryana. These complexes include motels, restaurants and resorts. In Faridabad, the Department of Tourism has developed following tourist resorts :—

Badkhal Lake at Badkhal

It is situated at a distance of 32 kms. from Delhi, about 5 kms. from Delhi-Agra Highway in Faridabad district. The lake is named after the nearby Badkhal village. The name Badkhal is possibly derived from Persian word 'be dakhal' which is suggestive of a place free from any interference. And rightly so, Badkhal lake has the reputation as an away-from-it-all tourist spot. All tourist facilites are spread across the rocks and ridges surrounding the lake. Standing majestically amidst natural land scape, expansive lush green lawns, terrace gardens, mounds, flowering trees and shrubs that lend a beautiful treatment to the surroundings, it is Haryana's prestigious 'rendezvous par excellence'. Facilities available include restaurants, motel, V.I.P. huts, conference hall, swimming pool, pool cafe, sauna and steam bath, massage, boating, angling, shopping centre, children's playground, camper huts, plants for sale, etc.

Magpie at Faridabad

It is situated at a distance of 30 kms. from Delhi on the Delhi-Agra Highway in Faridabad Complex Administration. Magpie is ideally suited for the busy business industrial executives and the tourists in a hurry. It is also equipped with arrangements for buffet lunches, conferences and garden parties. Facilities available include restaurant, motel, conference hall, bar etc.

Surajkund

It is situated at a distance of 18 kms. from Delhi in Faridabad district. Harking back to the times of Raja Suraj Pal of the Tomar dynasty, the surroundings of this ancient pool have been modernised and converted into a langurous retreat. Facilities available include motel, restaurant, bar, conference hall, boating, angling, camping, snack bar, plants for sale, camper huts, golf course etc.

Dabchick at Hodal

Dabchick Tourist Complex at Hodal is situated 92 kms. away from Delhi and about half way to Agra, on the Delhi-Agra National Highway. Facilities available include motel, air-conditioned restaurant, bar, cottages, camper huts, mini lake, boating, gift shop, conference room, recreational facilities etc.

ANALYSIS OF DATA

The following inset tables in this volume are based on the data compiled in the Village and Town Directory and the Primary Census Abstract.

Table 1 below indicates the population sex-wise separately for rural and urban areas at district and tahsil level along with the number of villages and towns as per 1981-Census.

TABLE 1

Population, Number of Villages and Towns, 1981

Serial No.	Name of Tahsil	POPULATION									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Ballabgarh	518,096	291,241	226,855	187,232	101,058	86,174	330,864	190,183	140,681	210	144	1
2	Palwal	482,763	260,922	221,841	405,033	219,170	185,863	77,730	41,752	35,978	295	281	4
Total District		1,000,859	552,163	448,696	592,265	320,228	272,037	408,594	231,935	176,659	505	425	5

Table 2 below gives percentage decadal (1971—1981) variation in population. This variation is more pronounced in urban areas than in rural areas.

TABLE 2

Decadal change in distribution of population

Tahsil	POPULATION						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Ballabgarh	323,376	200,559	122,817	518,096	187,232	330,864	60·21	—6·64	169·40
Palwal	392,156	341,805	50,351	482,763	405,033	77,730	23·10	18·50	54·38
District	715,532	542,364	173,168	1,000,859	592,265	408,594	39·88	9·20	135·95

Table 3 below presents distribution of villages according to the size of population. It shows that 57·18 per cent of the villages in the district are medium sized having population in the range of 500—1,999 and 16·00 per cent of the villages fall in the population range of 200—499.

TABLE 3

Distribution of villages by population ranges

Range of Population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	32	7·53
200—499	68	16·00
500—1,999	243	57·18
2,000—4,999	65	15·29
5,000—9,999	16	3·76
10,000+	1	0·24
Total	425	100·00

Table 4 below shows the distribution of villages by density. In 39·53 per cent of villages in the district, the density of population per square kilometre falls in the range 301—500 whereas in 23·29 per cent it falls in the range 201—300. It is above 500 in 15·53 per cent of the villages.

TABLE 4

Distribution of villages by density

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
—10	..	..
11—20	3	0·70
21—50	13	3·06
51—100	22	5·18
101—200	54	12·71
201—300	99	23·29
301—500	168	39·53
501+	66	15·53
Not known	..	..
Total	425	100·00

Table 5 below gives the proportion of Scheduled Castes population to total population in the villages. In 63·76 per cent of villages percentage of Scheduled Castes population to total population is between 6—30 per cent. In 11·76 per cent of villages there is no Scheduled Castes population at all.

TABLE 5

Proportion of Scheduled Castes population to total population in the villages

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	50	11·76
5 or less	52	12·24
6– 10	38	8·94
11– 15	54	12·71
16– 20	82	19·29
21– 30	97	22·82
31 and above	52	12·24
Total	425	100·00

Table 6 below relating to proportion of Scheduled Tribes population to total population in the villages is not applicable as there are no Scheduled Tribes in the Haryana State.

TABLE 6

Proportion of Scheduled Tribes population to total population in the villages

Palwal	47,328	6,743	14·25
All Towns	408,594	48,839	11·95

Table 8 below reflects literacy rates by population size of villages. Literacy rate for the district is 27·65. Majority of the villages in the district have the literacy rate higher than the district level literacy rate.

TABLE 8

Literacy rates by population ranges of villages

Range of Population	Number of villages in each range	Literacy rate
1	2	3
—200	32	26·53
200—499	68	28·12
500—1,999	243	27·85
2,000—4,999	65	26·72
5,000—9,999	16	27·29
10,000+	1	41·33
Total	425	27·65

Table 9 below indicates the literacy rates for the various towns in the district. Faridabad Complex Administration town has the literacy rate higher than the district literacy rate (55·93). Hassanpur town has the lowest literacy rate.

TABLE 9

Literacy rates for towns

Name of the Town	Literacy rate (per cent)
1	2
Faridabad Complex Administration	57·00
Hassanpur	41·48
Hathin	50·47
Hodal	44·53
Palwal	55·31
All Towns	55·93

Table 10 below shows the position of literates, workers/non-workers, scheduled castes/tribes population in the district. 15·66 per cent of the population in the district belongs to Scheduled Castes. The number of literates is 39·19 per cent. Workers including marginal workers form 31·22 per cent of the population whereas the remaining 68·78 per cent are non-workers.

TABLE

†Although entered as 'Be-Chirag' (Un-inhabited) in the Revenue record, the population shown against this village was enumerated at the time of 1981—Census.

*Total Population and part of the area of the village has come within the municipal limits of Hathin M.C.

Notes:—1. Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.

2. The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

†Total area figures for the district represents "Geographical area" figures supplied by the Surveyor General. Figures for Urban Areas are those supplied by the Local Bodies . Area figures for the rural areas are derived by substracting the urban area from the total area of the district. The total of area figures of tahsils in the district will not tally with the district figures because the former are derived from the village-wise area figures supplied by the Tahsildars.

†Although entered as 'Be-Chirag' (Un-inhabited) in the Revenue record, the population shown against this village was enumerated at the time of 1981—Census.

Notes :—1. Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.

2. The area of a village (revenue estate) is based on the information supplied by the revenue Patwari and includes urban area, if any.
