FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and village and town directory including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with thes view. A significant addition is class of town in all the seven statements of the town directory.

The infra-structure of amiinities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi :

P. PADMANABHA
Registrar General, India

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar* Notes and Town Directory forms (for village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as Charge superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the District.' I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and Village/Urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the district during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and whole-hearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my Office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha Asstt. Director was ably assisted by his team of Statistical Asstts. Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Dy. Directors and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha Asstt. Director.

Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. S/Shri A. L. Das, G. C. Mishra Asstt. Directors and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH section. I am thankful to them all. Shri S. C. Sexena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad, Stenographer and Shri Ashraful Hoda, L. D. C. who have done the typing work also deserve thanks.

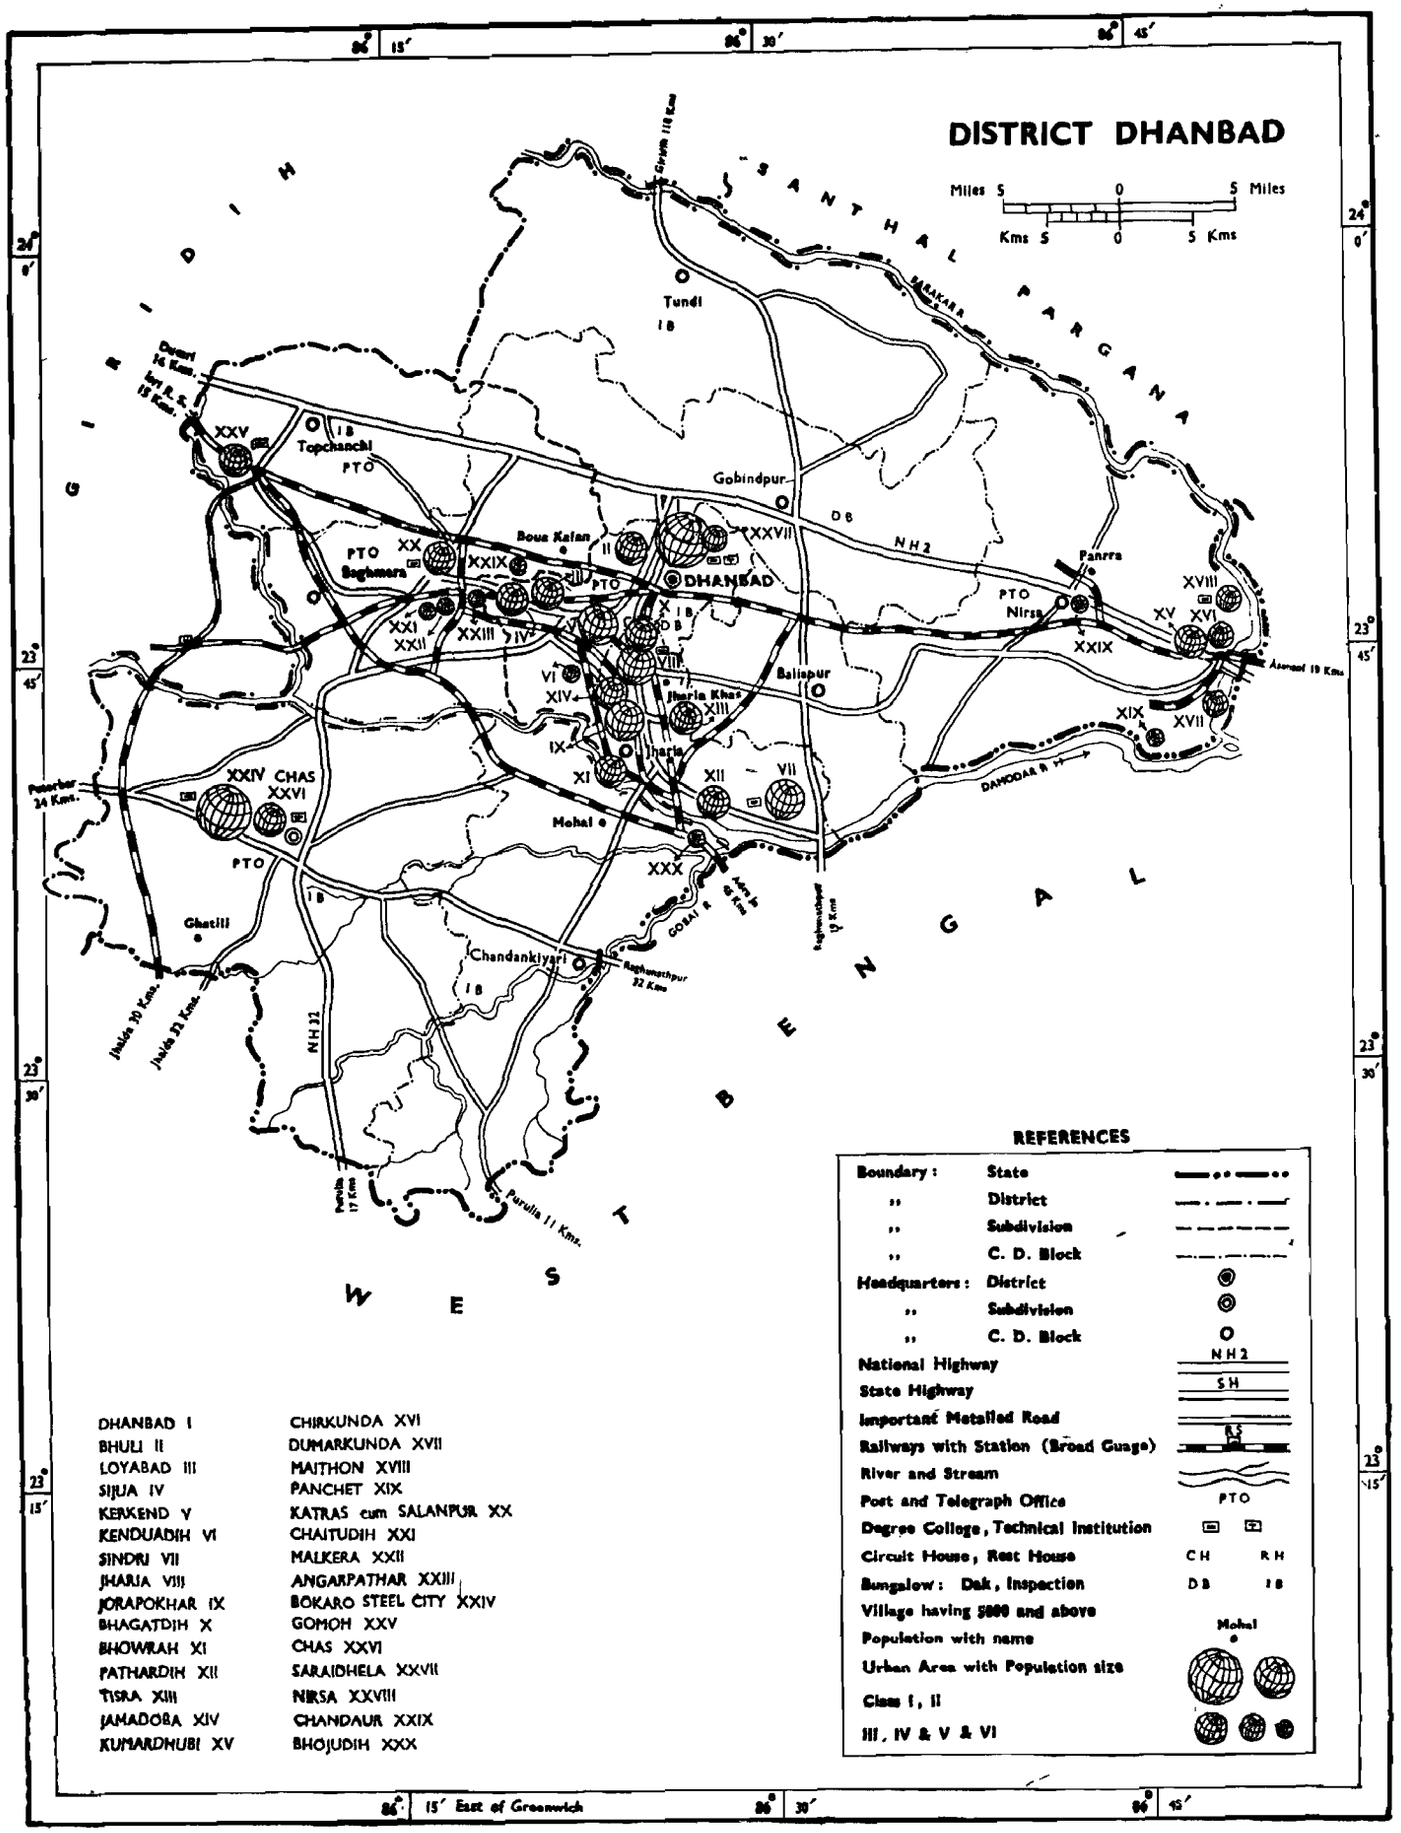

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received form him from time to time.

I owe my thanks to M/s J. P. Offset and Type Foundry, Patna who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

Dhanbad district was constituted in 1956 by carving out the old Dhanbad subdivision and Chas and Chandankiyari police stations of the Sadar subdivision of the erstwhile Manbhum district. Its boundaries have remained virtually intact thereafter. The reorganisation of the districts in the State of Bihar which took place after 1971 did not affect the district of Dhanbad. Dhanbad Municipality is the chief town and the headquarters of the district.

The district is bounded on the west by Hazaribag, on the north by Hazaribag and Santhal Pargana and on the east and south by Purulia district of west Bengal.

The district derives its name from Dhanbad, the headquarters. There is, however, no authentic record to show how Dhanbad took its name. One of the theories popular among the public is that this area was famous for the growth of *'Baid Dhan'* or *Baid* Paddy (Baid being a kind of paddy which ripens in October-November). Another far-fetched theory is that the name of Dhanbad is derived from *Dhan*, a Kolarian tribe that lived in this area. *'Baid'* has perhaps been taken from the Urdu word 'Abad' meaning occupied. The district was first known as 'Dhanbaid' (till Ist November 1956 Dhanbad was a subdivision of Manbhum District). It is believed that Mr.Luby, I.C.S., wrote officially and was permitted to drop the letter 'i' from *baid*.

Early history

The early history of the greater part of the Chotanagpur plateau is shrouded in mystery and that of Dhanbad district is particularly so. Details of even later periods are difficult to trace as the present district formed but a small and insignificant part of Manbhum. In the Settlement Report for Manbhum (1928) it has been stated that no rock inscriptions, copper plates or old coins were discovered and not a single document of copper plate or palm leaf was found in course of the Survey and Settlement operations. The oldest authentic documents produced were all on paper and barely even a hundred years old.

In view of these circumstances the District Gazetteer for Dhanbad (1964) merely reproduces the chapter on history in the Settlement Report of 1928 which pertains to the entire district of Manbhum.

The earliest civilisation in the district was that of the Jains who are ascribed by colonel Dalton to 500 or 600 B. C. The Saraks, who were the decendants of these Jains, were found in considerable number in the eastern part of the district as late as in 1928. The Jain civilisation was apparently superseded by the Brahmins before the seventh century A. D. The travel accounts of Hieun Tsang in seventh century A. D. make mention of a powerful kingdom ruled by Sasanka, a persecutor of the Buddhists, which extended from Midnapur on the east to Surguja on the west. According to one view it is held that Mundari tribes occupied the area south of Bihar in Pliny's time. Brahmanical civilisation was at its prime in the tenth century. It was destroyed completely by the Bhumij, a Mundari tribe, although it is stated that the

area occupied by the latter mainly extended to the south of the river Kasai in the area that is now largely contained in Purulia district of West Bengal.

During Akbar's reign in *circa* 1590, Raja Man Singh led his troops from Bhagalpur to Midnapur through Jharkhand and he might have passed through portions of Dhanbad. There are detailed accounts of the Panchet or Panchkote Estate which is now in Purulia district. Even when the district of Manbhum was acquired by the British in 1765, knowledge about the district scarcely extended beyond the Panchet Estate.

British rule

The history of the district during the early years of the British rule centred round a series of military operations to bring petty Zamindars or *Chuars* under control. In 1782-83 Major Crauford quelled the disturbances in Jharia. The Permanent Settlement was effected in 1796. By Regulation XVIII of 1805, the Jungle Mahals district was constituted into a separate magisterial charge with headquarters at Bankura. The next 25 years were uneventful. In 1832 disturbances broke out on account of disputed succession in Barabhum in which only the southern parganas of Manbhum were involved. By regulation XIII of 1833, the district of Jungle Mahals was broken up and a new district called Manbhum was constituted with headquarters at Manbazar which was transferred to Purulia in 1838.

1857 Movement

In 1857, the Deputy Commissioner had to flee from Purulia on account of the insurrection of the garrison comprising sixty four sepoys and twelve *sawars*. The garrison looted the treasury and released prisoners from the jail. They then marched off to Ranchi. The Court buildings and the Record room at Purulia were burnt. The disturbances were, however, quelled eventually when the Deputy Commissioner returned with reinforcement from Raniganj about a month later.

Agrarian troubles between the Zamindar of Tundi and his Santal *raiyats* threatened the district in 1869 and 1870 but they were suitably warded off.

The people of Dhanbad did not lag behind in the struggle for freedom. The various movements under the leadership of Mahatma Gandhi were fully supported by the people of Dhanbad.

Natural divisions

The district can be divided into three broad natural divisions, viz., (i) the north and north-western portions consisting of the hilly region, (ii) the uplands containing coal mines and most of the industries and (iii) the remaining uplands and plains lying to the south of the Damodar river consisting of culturable flat lands and includes the Bokaro Steel Plant and the industrial-*cum*-mining complex surrounding it. The north and north-western division is separated for the entire length from the other two divisions by the Grand trunk road.

In the western middle part of the district are the Dhangi hills, situated in the strip falling between the Grand trunk road in the north and the Grand chord line of the Eastern Railway in the south. These hills extend from Pradhankhanta to Gobindpur, reaching a maximum altitude of 1,256 feet at Dhangi. Further north, a branch of the Parasnath hill runs through Topchanchi and Tundi, the highest point of 1,500 feet being reached at Lalki. The southern part of the district is largely comprised of undulating land. The general slope is from west to east, the direction followed by the two major rivers, Damodar and Barakar.

Rivers

The Damodar is the most important river of the Chotanagpur plateau. It rises in Palamu and flows eastward between the plateaus of Ranchi and Hazaribag. It is joined by the Bokaro, the Konar and the Barakar rivers. The Damodar enters Dhanbad district at its confluence with the Jamuria, a stream which marks the western boundary of Dhanbad with Hazaribag district. Further east, the Damodar is joined by the Katri river which rises in the foot hills below Parasnath and traverses through the coalfield area. The Damodar flows for about 77 kms. through the district being joined by the Barakar at its eastern border near Chirkunda. The Panchet dam extending to roughly 6 kms. is built on river Damodar. The hydel station there generates 40,000 K. W. per hour.

The Barakar, which forms the northern boundary of the district, traverses about 77 kms. in the district. It flows in south westerly direction upto Durgapur and then south till it joins the Damodar near Chirkunda. The Maithan dam is located on this river about 13 kms. off its confluence with the Damodar. Attached to it is the Maithan Power Station with a generating capacity of 60,000 K.W.H.

Among other small rivers in the district are the Gobai, the Irji, the Khudia besides the river Katri.

Climatic conditions

The climate of the district is characterised by general dryness. It is very pleasant during the cold weather from November to February. Thereafter the climate becomes warm. It remains hot until the monsoon breaks towards the middle of June. With the setting in of rains the temperature falls and humidity rises. July to October are the rainy months. July and August are the wettest months. The average rainfall during July is 287mm and that in August 445 mm. The average annual rainfall in the district is approximately 1,300 mm. There is hardly any rain during December to February and the average for the three months from March to May is well below 76 mm.

Flora and Fauna

Forests in the district are largely confined to the north, bordering on the districts of Hazaribag and Santhal Pargana. Some of the important trees in the forests are *Sal, Sisoo, Siris, Palas, Mahua, Jamun,* and *Simal.* Bamboos are also common.

Wild animals such as tiger, panther, wild dog, wild boar and antelope are very rare now. Birds such as peacocks, peafowls, partridges, wild flows, green pigeons, etc. are seen in the forests of the district. Among the poisonous varieties of snakes, the cobra and the *Karait* are fairly common.

Mines and Minerals

The sedimentary *facies* of the archaean system of deposits (over 500 million years old) or Dharwar igneous rocks are well developed in Dhanbad district. The Condwana coal basins were formed much later. The Chotanagpur plateau was split into two portions by a series of faults and the depressions thus formed now contain the coalfields in the basin of the Damodar river. The Bokaro and Jharia areas are typical examples of areas under the system.

The Jharia coalfields cover an area of about 448 sq. kms (17 sq. miles) entirely situated within the district. The total reserve of this field is estimated at 5,000 million tons. The coal seams found here are, however, thinner and also fewer than in the Barakar field and it is, therefore, less important than the latter. A large part of the Jharia field is made up of Talchar rocks. The moisture content of the Barakar coals is comparatively low.

Among other important minerals found in the district are fire clay for the manufacture of fire-bricks and iron-ore. Mica is found in the

eastern portion of Baliapur and north of Jhalda Railway station. China clay and graphite are also available in certain pockets of the district.

Land use pattern

The district has rather poor and infertile soils largely laterite in composition. Alluvial deposits occur at the confluence of the Damodar and Barakar rivers. The soils of the district are broadly classified into four groups according to texture :

(i) Stony and gravelly—A low grade soil found near the foot hills.

(ii) Sandy soil—Locally known as *bali* found in the river.

(iii) Loamy soil—Found near the hills and formed by rain washings from higher areas.

(iv) Clayey soil—Found near the tanks and rivers, it is very productive.

Major portion of the land of the district is mainly used for agricultural purposes. The district of Dhanbad, however, is the only district where the non-agricultural population outnumbers the agricultural population. Roughly 74 per cent of the total population, according to the 1981 Census, derives its livelihood from the non-agricultural occupations, but one part of the district varies widely from another part. In the development blocks of Dhanbad-*cum*-Kenduadih-*cum*-Jagta, Jharia-*cum*-Jorapokhar-*cum*-Sindri and Nirsa-*cum*-Chirkunda, non-agricultural occupations dominate whereas in the remaining blocks people generally depend on agricultural pursuits.

Rice is the main crop of the district and covers the major portion of the gross area sown. Wheat is another important crop of the district. Among non-food crops sugar-cane and oil-seeds are most important although there is very small cultivation of them. The district's needs of vegetables and fruits are met from Ranchi, Gaya, Patna, Biharsharif, etc. The industrialisation of the district has resulted in non-agricultural use of even the cultivable lands.

Irrigational facilities

The rivers and streams of the district are hilly in character and cannot be used for irrigation unless water is stored. The slope of the land is such that rain water quickly runs into the hill streams. The level of water in these streams subsides quickly after a spell of rain and most of the streams dry almost completely after the rainy season. Wells are difficult and expensive to dig because of the presence of hard rock close to the surface. *Bundhs* and *Ahars* (artificial reservoirs) therefore, constitute the main source of the irrigation. Rain water is stored in *Ahars* or reservoirs and then led to the field by channels and sub-channels. Uplands are not irrigated ordinarily.

Recently a number of Medium and Minor Irrigation schemes have been taken up and executed in order to ensure a regular source of water supply. The schemes are intended more to supply assured irrigation to paddy crop.

Industrialisation

Dhanbad is the most industrialised district in the State of Bihar. The dominant industry of the district is coal mining and it is coal which has attracted and brought about a concentration of numerous other industries within its limits. The metallurgical coal of the Jharia coalfield within the district has given Dhanbad a very important place in the industrial map of the nation.

Next in importance among the industries in this district is the Fertilisers and Chemical industry at Sindri and the Bihar State Superphosphate Factory, a Govt. of Bihar undertaking. Another major industry in the district is the Refractory and Ceramic Industry. Among the few other large industrial establishments of the district, mention may be made of (i) Kumardhubi Fireclay and Silica Works Ltd., Kumardhubi, (ii) Reliance

Firebricks & Pottery Co. Ltd., Chanch, Chirkunda, (iii) The Bihar Firebricks and Potteries Ltd., Mugma, (iv) Hindustan General Electrical Corporation Ltd., Karampura, (v) Khandelwal Glass Works, Ambona, (vi) Loyabad Coking By-products Recovery Plant, Bansjora, (vii) M/s Shalimar Tar Products Ltd., Jharia, (viii) The A. C. C. Ltd., Sindri Cement Works, Sindri, and (ix) The Sijua (Jharia) Electric Supply Co. Ltd., Loyabad.

Apart from these heavy, medium and small industries, there are quite a number of small-scale units scattered all over the district. In Chas, there are number of shellac factories, in Chandankiyari, quite a large number of weavers have been carrying on their trade from generation to generation. In Tundi and Gobindpur, there are weavers of silk yarn and a number of potters, carpenters and blacksmiths engaged in their family trade. Besides these there are a number of flour mills, rice mills and small *bidi* manufacturing units.

Livestock

The livestock in this district is generally of a poor variety. Not much pasturage is available although there are stretches of jungle. There is not much popular response to improve the breed of the livestock. The development of the breed of cattle and buffaloes is essential for agricultural activities and availability of adequate quantity of milk. There has been a concerted effort on behalf of the State Government to tackle this problem by way of distribution of bulls of improved varities. In order to improve the breed of cattle quickly and also at low cost, artificial insemination centres with sub-centres have been opened in the district. Distribution of frozen semen has also been introduced in the district.

There are a number of veterinary hospitals and dispensaries spread over the entire district. Treatment, prevention and suppression of diseases of the livestock are the main functions of the veterinary institutions.

The livestock populations according to 1977 Cattle Census is indicated below :

Cows	228,973
Buffaloes	26,373
Bulls & Bullocks	149,681
Sheep	99,848
Goats	187,866
Pigs	28,483

Cattle shows are sometimes organised and prizes in cash or kind are awarded with a view to encouraging the local breeders.

The aboriginals of the district keep poultry and derive a side-income. There is a great demand for good birds and eggs throughout the district. There is abundant scope for development of poultry farming.

Fisheries

The rivers, streams, low-lying fields where water accumulates in the rainy season, ponds and marshes, indicate a rich potentiality for fisheries in the district. A large number of tanks are kept reserved for rearing fish. The Fisheries Department of the State Government has taken up a scheme for development of fisheries in the district.

In this district two types of boats, viz., (i) dug out canoes and (ii) plant built boats are used for catching fish in the Maithan and Panchet dams. Dug out canoes which ply in the rivers are stable and cheap. Plant built boats of various types are used in the strong current of large rivers like the Barakar and the Damodar. Small canoes are commonly used for catching *hilsa*, prawn, etc. Various types of nets and spears are used for catching fish.

The chief fish markets and trade centres in the district are at Jharia, Katras, Sindri, Chirkunda and Dhanbad. In Dhanbad town fish first goes to the wholesale fish market at Purana *Bazar* at Dhanbad and Jharia. From these markets fish is sent to retailers on auction basis.

Communication facilities

The district is well developed from the point of road communications. The Grand Trunk Road runs through the entire length of the district from west to east and divides it into two parts, i.e., one-third of the district to the north and two-thirds to the south. The area to the south is well served by roads as well as the railways whereas the northern portion, which consists of hills, is deprived of adequate communication facility. The following are the roads maintained by the Public Works Department in the district :

Road	Length in Kms
1. Grand Trunk Road (National Highway).	72
2. Gobindpur-Chas-Jamshedpur Road (up to Bengal border).	75
3. Gobindpur-Baliapur-Sindri road	24
4. Dhanbad-Pathardih-Sindri road	25.6
5. Raghunathpur-Chandankiyari-Chas road.	31.6
6. Rajganj-Katras-Jamdiha road	19.6
7. Pathardih-Chandankiyari-Baramasia road.	28.8
8. Giridih-Tundi-Gobindpur road	28
9. Jharia-Baliapur road	28

Most of the above roads are metalled. Besides the Public Works Department a few roads in the district are also maintained by the Zila Parishad, the Dhanbad Municipality and the Forest Department.

The district is well served by railways. There is a network of railway lines running through colliery areas. Important among them being :

(i) Kumardhubi-Gomoh Section—It is a part of the Grand Chord section under the Eastern Railway. It connects Dhanbad, with the Grand Chord mainline running from Howrah to Delhi *via* Asansol, Gomoh, Gaya and Mughalsarai.

(ii) Pradhankhanta-Pathardih Section

(iii) Dhanbad-Phularitand Section

(iv) Dhanbad-Pathardih Section

(v) Sudamdih-Gomoh Section.

Recently Dhanbad town has been connected with the State headquarters, Patna by two important rail connection, viz., the Patliputra Express and the Ganga Damodar Express.

Besides the above, there are other branch lines for carrying coal from one place of the district to another. The whole of the middle portion of the district is thus virtually infested with railways.

No river in the district is Navigable as most of them are hill streams which remain dry except during the rains.

The district is not on the air route but there is a small landing ground about 3 kms. north of Dhanbad. There are several aerial ropeways used for transporting sand to different collieries.

Trade and Commerce

The development of means of communication has had a great impact on trade and commerce of the district. There are numerous passenger buses and carrier trucks running within the district and connecting the district with other parts of the State and the other neighbouring States.

Trade in Dhanbad district consists mainly of exporting coal, hides and skins, marble and stone, oil, fuel, other mineral oils, gunnies, iron and steel, fireclay, firebricks, cement, sulphate of ammonia, etc. and of importing of cotton piece goods, salt, grains and pulses, kerosene oil, petrol, lime, vegetables, mustard oil, shoes, fish, sugar, tobacco and chillies.

The main retail marketing centres in the district are at Dhanbad, Katras, Jharia, Kumardhubi, Chirkunda, Sindri, Pathardih, Gobindpur, Nirsa and Tundi. At all these places retail shops for almost all the commodities locally consumed are found.

Electricity and Power

The district has got no sources of its own and receives most of its power supply from the State Electricity Board. Hydro-electricity is supplied to the district by the D. V. C., the two grids, namely Maithan and Panchet, of which are located in the district.

All the 30 towns of the district are electrified. In rural areas, however, the pace of electrification is comparatively slow. Out of 1,364 inhabited villages in the district only 204 or nearly 15 per cent have been electrified so far.

Social and Cultural events and Natural and Administrative Development

No major social or cultural event has taken place in the district of Dhanbad during the decade 1971—81.

Fairs and festivals are, however, held regularly in the district by different communities in complete harmony.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Babudi

The village is contained in Chas Development Block. It is noted for a 75′ high tower with 6′ thick walls and diameter of 10′. It is said to be very old.

2. Bansa

The village, which also lies in Chas block, has a *Sati-sthan* with stone walls, believed to be over 200 years old.

3. Charak Pathar

The village is situated in Gobindpur development block. It has a very large ancient boulder of white stone. It derives its name from this stone.

4. Chati Gobindpur

The village, which also is located in Gobindpur development block, contains two ancient pillars which are locally associated with Emperor Asoka and the Afghan Chief Sher Shah.

5. Gopalpur

The village lies in Nirsa-*cum*-Chirkunda development block. It contains an ancient pillar said to date back to the time of Emperor Asoka. There is also a large stone image said to be of Asoka himself.

6. Jhinjhipahari

The village is situated in Baghmara development block. It is said that an ancient temple of Lord Shiva was found when the mines here were being worked.

7. Meva

The village is situated in Nirsa-*cum*-Chirkunda block. It contains an ancient pillar said to date back to the time of Emperor Asoka. There is also a large stone image said to be of Asoka himself.

8. Panrra

The village which also lies in Nirsa-*cum*-Chirkunda block, is said to have derived its name from the Pandavas. According to local legend the Pandavas spent some period of their exile in hiding at this place. The village contains an ancient temple of Lord Shiva known as 'Pandaveshwar Mahadeo'. The temple is believed to have been constructed by a Hindu king at a much later date.

9. Chark-Khurd

The village, situated about 10 kms. from Tundi on the Dhanbad-Gobindpur-Giridih road, is noted for its hotspring.

10. Topchanchi

The village is the headquarters of the development block bearing the same name. It is situated on the Grand Trunk Road. The Parasnath hill is located nearby. The Topchanchi Water Reservoir spreads over an area of 214 acres. It is a noted picnic spot.

11. Maithan

It is a Census town situated about 48 kms. from Dhanbad and 5 kms. from Kumardhubi railway station. The Maithan Dam and Hydel Power Station are located in this town.

12. Panchet

This is also a Census town situated 9 kms. south of Chirkunda and about 54 kms. south-east of Dhanbad. The Panchet Dam, around which the township has developed, is located here.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The Dis rict Census Handbook which is fairly comprehensive and uniform is among the traditional documentation of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State government publication but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village an Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the levels of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that, if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy Classes/Centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the reguirements of the minimum Needs Programme of the Planning Commission.

A new Statement IV-A of civic and other amenities for each area locality identified as slum in class I and II towns has been added.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied

residential houses and households, total population, Population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivaaters, gricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages inrespect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as outgrowth of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdiction list pending revisional settlement survey) or are treated as Census town (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that villages the figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies.

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census, the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations. There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural popula-

tion and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified in to the following six classes according to their population size :

Class of town		*Population*
I	...	1 lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000—9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowth if any, of such town.

Other concepts and definitions which have been used in this volume are expalained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence etc.,

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Dhanbad, with a population of 2,115,010 persons is divided into 10 Community Development Blocks consisting of 1,364 inhabited villages (out of a total of 1,654 villages including 179 villages which are constituent units of towns in the district) and 30 towns. With 3.03 per cent of the total population of the State comprised within the district, it ranks 17th in the State in order of populaion. The Following table highlights the population, number of villages and towns for the district as also for its devlopment blocks ;

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Dhanbad-*cum*-Kendu-adih-*cum*-Jagta	339,158	195,002	144,156	38,404	21,852	16,552	300,754	173,150	127,604	86	39	7
2	Jharia-*cum*-Jorapokhar-*cum*-Sindri	359,609	207,815	151,794	17,282	9,838	7,444	342,327	197,977	144,350	64	5	8
3	Gobindpur	122,118	62,701	59,417	122,118	62,701	59,417	..	..	..	225	213	..
4	Tundi	83,175	42,057	41,118	83,175	42,057	41,118	..	..	..	296	261	..
5	Nirsa-*cum*-Chirkunda	264,924	143,207	121,717	181,497	96,141	85,356	83,427	47,066	36,361	267	225	6
6	Baliapur	69,071	35,872	33,199	69,071	35,872	33,199	..	..	..	62	61	..
7	Baghmara-*cum*-Katras	255,919	142,538	113,381	207,463	115,010	92,453	48,456	27,528	20,928	227	208	5
8	Chandankiyari	131,039	67,899	63,140	121,756	62,884	58,872	9,283	5,015	4,268	130	123	1
9	Chas	395,176	219,200	175,976	130,696	67,724	62,972	264,480	151,476	113,004	176	123	2
10	Topchanchi	94,821	49,835	44,986	72,848	37,544	35,304	21,973	12,291	9,682	121	106	1
	Total	**2,115,010**	**1,166,126**	**948,884**	**1,044,310**	**551,623**	**492,687**	**1,070,700**	**614,503**	**456,197**	**1,654**	**1,364**	**30**

It would be seen from the above table that the variation in the distribution of population among the C.D. Blocks is wider still. Chas emerges as the most populous block accounting for 18.68 per cent of the population of the district probably because Bokaro Steel City town is contained in this block. This is closely followed by Jharia-*cum*-Jorapokhar-*cum*-Sindri and Dhanbad-*cum*-Kendnadih-*cum*-Jagta blocks with 17.00 and 16.04 per cent of the population of the district presumably since the above two blocks contain 8 and 7 towns respectively and most of them are in the coal mining belt. Baliapur block, on the other hand, is the least populous C.D. Block with a population of only 69,071 persons (3.27%). It is quite apparent from the above table that the Development blocks which contain towns have comparatively large proportion of population vis-a-vis those blocks which do not comprise any town at all.

The average population of a development block in the district is 211,501 which is much higher than the average population of a development block in Bihar (119,105) 5 out of 10 blocks have populations above the district average. They contain as much as 76.35 per cent of the district population.

Dhanbad district has an urban population of 1,070,700 comprising 50.62 per cent of the district population. The existance of coal mines and other industries has made it the most urbanised district of the State. Only 49.38 per cent of the population lives in the villages as against the state break-up of rural and population of 87.53 and 12.47 per cent respectively. Dhanbad (M) and Bokaro Steel City are the only Class I towns (population 1 lakh and above) in the district. There are, however, 4 towns in the district viz., Kerkend town, Sindri (NAC), Jharia (NAC) and Jorapokhar town which fall in Class II range (population 50,000–99,999).Dhanbad U.A.,Bokaro Steel City U.A and Kumardhubi U.A are the three urban agglomerations contained in the district.

Decadal change in population

There has been no change in the Jurisdiction of Dhanbad district after the 1971 Census. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Dhanbad-*cum*-Kenduadih-*cum*-Jagta.	223,648	29,418	194,230	339,158	38,404	300,754	+51.65	+30.55	+54.84
Jharia-*cum*-Jorapokhar-*cum*-Sindri.	252,338	12,537	239,801	359,609	17,282	342,327	+42.51	+37.85	+42.75
Gobindpur	95,987	95,987	..	122,118	122,118	..	+27.22	+27.22	..
Tundi	70,540	70,540	..	83,175	83,175	..	+17.91	+17.91	..
Nirsa-*cum*-Chirkunda.	193,860	139,342	54,518	264,924	181,497	83,427	+36.66	+30.25	+53.03
Baliapur	52,406	52,406	..	69,071	69,071	..	+31.80	+31.80	..
Baghmara-*cum*-Katras.	179,361	153,027	26,334	255,919	207,463	48,456	+42.68	+35.57	+84.01

Topchanchi	73,346	57,360	15,986	94,821	72,848	21,973	+29.28	+27.00	+37.45
Total	**1,466,417**	**828,389**	**638,028**	**2,115,010**	**1,044,310**	**1,070,700**	**+44.23**	**+26.07**	**+67.81**

It would appear that the rise in the population of this district during the 1971 – 81 decade has been of the order of 44.23 per cent which is almost the double the decadal growth rate of the State which stands at 24.06 per cent. The rural population in the district has increased by 26.07 per cent while the urban population growth over the decade has been as much as 67.81 per cent. The higher increase in the urban population of Dhanbad may be attributed to mining and industrial activities and particularly the phenomenal growth of Bokaro Steel City.

As shall be evident from the table, the variation in growth rates are more pronounced in the development blocks. Chas block has shown the highest increase in population over the decade with 83.28 per cent due to expansion of Bokaro Steel town contained in it as already explained in the earlier paragraph. Next to it comes Dhanbad-*cum*-Kenduadih-*cum*-Jagta block with 51.65 per

cent probably because Dhandad (M), the district headquarters, falls in this block. Percentage decadal variation has been observed to be the least in the case of Tundi (17.91%) followed by Chandankiyari (19.87%) and Gobindpur (27.22%) blocks. One noticeable feature is that the blocks which have registered higher percentage increase contain considerable number of towns (vide Table I) vis-a-vis those blocks which either do not have any town at all or have only a few.

The increase in rural population during 1971-81 has been the highest in the case of Jharia-*cum*-Jorapokhar-*cum*-Sindri (37.85%) closely followed by Baghmara-*cum*-Katras (35.57%). The growth in the rural population of Chandankiyari block has been very tardy (11.38%).

The growth of the urban population during 1971—81 has been observed to be the highest in the case of Chas block (146.81%) obviously on account of the phenomenal growth of Bokaro Steel City contained in this block. The development blocks of Gobindpur, Tundi, and Baliapur blocks do not have any urban unit to their credit.

Village classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size groups :

Table 3—Distribution of villages by population ranges.

Range of population	No. of villages in each range	Perecentage of village in each range
1	2	3
—200	279	20.45
200—499	404	29.62
500—1,999	580	42.52
2,000—4,999	96	7.04
5,000—9,999	5	0.37
10,000+	...	...
Total	**1,364**	**100.00**

It would be seen from the table that mostly the villages in the district are small and medium-sized as the maximum proportion of villages in the district lie in the population range of 500—1,999 with 42.52 per cent followed by villages in the population range of 200—499 and less than 200 accounting for 29.62 and 20.45 per cent of the total number of inhabited villages respectively in the district. Small and medium-sized villages are thus much more in number than large villages (population above 5,000) in the district. The large villages constitute only 0.37 per cent of the inhabited villages in the district. Another striking feature is that there is no village in the district having a population of more than 10,000. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 whereas in Dhanbad district it was only 607. The average population size of a village in Dhanbad district, as per the 1981 Census, works out to 766 which is still lower than that of the State (906).

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below. :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	3	0.22
11—20	3	0.22
21—50	19	1.39
51—100	49	3.59
101—200	193	14.15
201—300	279	20.45
301—500	403	29.55
501+	415	30.43
Not Known	...	...
Total	**1,364**	**100.00**

The data presented in the table on page 15 highlight the fact that the proportion of villages varies in direct relation to their density range, the maximum being in the density range of 501 with 30.43 per cent followed by villages in the density range of 301—500 which account for 29.55 per cent of the villages.

It would further be seen that the proportion of villages falling in the density range below 300 constitute 40.02 per cent implying thereby that the number of thinly populated villages in the district is sizeable.

Proportion of Scheduled Caste/Tribe population in villages and towns.

Table 5, 6 and 7 furnished below indicate the proportion of the population of the scheduled castes and the scheduled tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the scheduled castes and the scheduled tribes at micro level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Caste population to Total population in the villages.

Percentage range of Scheduled Castes Population to Total Population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	405	29.69
5 or less	185	13.56
6 — 10	155	11.37
11 — 15	112	8.21
16 — 20	127	9.31
21 — 30	148	10.85
31 and above	232	17.01
Total	**1,364**	**100.00**

It is discernable from the table that there are only 232 Villages (17.01%) where the percentage of scheduled caste population to total population is more than 31 per cent and there are as many as 405 villages accounting for 29.69 per cent which do not have any population of the scheduled castes at all. Incidentally it may be observed that the highest proportion of villages with scheduled caste population lies in the percentage range of 31 and above.

Table 6—Proportion of Scheduled Tribe population to total population in the villages

Percentage range of Scheduled Tribes population to Total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	464	34.02
5 or less	231	16.93
6 — 15	159	11.66
16 — 25	106	7.77
26 — 35	75	5.50
36 — 50	72	5.28
51 and above	257	18.84
Total	**1,364**	**100.00**

It will be seen from the table that dispersal of the scheduled tribe population is not very different from the pattern of the scheduled caste population in the district. There are 257 villages (18.84%) where the percentage of scheduled tribe population to total population is more than 51 per cent. This percentage range of scheduled tribe population to total population contains the maximum proportion of villages (18.84%) in the district. There are, however, 464 villages (34.02%) out of a total of 1,364 villages in the district which do not contain any scheduled tribe population at all.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Caste Population to Total Population	Percentage of Scheduled Tribe Population to Total Population

Katras-*cum*-Salanpur	29,587	2,975	368	10.06	1.24
Kenduadih	5,470	1,287	82	23.53	1.50
Kerkend	75,186	20,439	1,403	27.18	1.87
Kumardhubi	27,826	2,995	720	10.76	2.59
Loyabad	26,475	7,747	419	29.26	1.58
Maithon	13,511	1,711	511	12.66	3.78
Malkera	5,094	1,759	61	34.53	1.20
Nirsa	8,923	1,685	299	18.88	3.35
Panchet	7,301	636	534	8.71	7.31
Pathardih	22,720	4,139	476	18.22	2.10
Saraidhela	11,956	1,465	296	12.25	2.48
Sijua	20,614	4,583	339	22.23	1.64
Sindri	70,645	4,631	4,934	6.56	6.98
Tisra	46,930	15,609	862	33.26	1.84
All Towns	**1,070,700**	**149,499**	**41,895**	**13.96**	**3.91**

The table above indicates that the concentration of the scheduled castes in the towns of the district is of the order of 13.96 per cent of the total urban population as against 17.36 per cent in the rural areas (Table 10).

The highest proportion of scheduled caste population is contained in Chaitudih town with 36.59 per cent closely followed by Angarpathar and Malkera towns with 35.38 and 34.53 per cent respectively. All the above three towns are Census towns and are also important coal mining centres. Curiously enough, one can observe from the table that the least proportion of the scheduled caste population is contained in Jharia (4.99%) Sindri (6.56%) and Dhandad (6.90%), all the 3 being the statutory towns. Even Bokaro Steel City town has only 7.69 per cent of the scheduled caste population.

The urban content of the population of the scheduled tribes is very low being only 3.91 per cent of the total population. In different towns also the proportion of scheduled tribe population is less than 10 per cent (except Bokaro Steel City town with 10.01%). Significantly, Chaitudih town does not contain any scheduled tribe population at all.

Literacy rates by population ranges of villages and towns.

According to the Census terminology, a person who was able to read and write with understanding in any language was treated as literate. While Table 8 on next page gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately.

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	279	20.06
200—499	404	21.82
500—1,999	580	25.89
2,000—4,999	96	30.57
5,000—9,999	5	25.23
10,000+	...	...
Total	**1,364**	**26.37**

It would be seen from the above table that literates form 26.37 per cent of the population in the rural areas of the district as against 51.63 per cent in the urban areas (Table 9). In the rural areas it is interesting to note that literacy is generally high in the villages with large population, the only exception being the population range of 5,000—9,999, where there are only 5 villages in number (as already explained earlier, the district of Dhanbad does not have any village with more than 10,000 population). It implies, there by, that villages with larger population have more educational facilities, and hence more literate population vis-a-vis the small villages with comparatively less number of inhabitants.

Table 9—Literacy rates for towns.

Name of towns	Literacy rate
1	2
Angarpathar	37.92
Bhagatdih	40.40
Bhojudih	74.45
Bhowrah	44.95
Bhuli	48.89
Bokaro Steel City	56.83
Chaitudih	32.26
Chandaur	33.78
Chas	45.90
Chirkunda	48.53
Dhanbad	65.30
Dumarkunda	35.32
Gomoh	63.06
Jamadoba	44.31
Jharia	59.85
Jorapokhar	44.24
Katras-*cum*-salanpur	56.74
Kenduadih	14.84
Kerkend	35.75
Kumardhubi	54.64
Loyabad	37.38
Maithon	64.16
Malkera	44.99
Nirsa	41.13
Panchet	54.77
Pathardih	44.70
Saraidhela	65.72
Sijua	42.96
Sindri	60.30
Tisra	34.66
All Towns	**51.63**

Among the towns, Bhojudih has the highest proportion of literate population (74.45%) followed by Saraidhela and Dhanbad town with 65.72 and 65.30 per cent respectively. The lowest literacy rate is observed in the case of Kenduadih town with 14.84 per cent. In the rest of the towns, the literacy rate varies between 32.26 per cent (Chaitudih town) and 64.16 per cent (Maithan town).

The literacy rate in the urban areas of the district is nearly double the rate in rural areas. The literacy rate in the district of Dhanbad is appreciably higher than majority of the districts of the State.

Workers and Non-Workers in rural and urban areas of the district.

The table on page 20 & 21 deals with the percentage break-up of literates, main workers, marginal workers, total workers, non-workers, and the proportion of the scheduled castes and the scheduled tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table 10—Literates, Workers, Non-workers,

Name of Development Block	Total Rural Urban	Total Population			Percentage of: S. C. population to total population	S. T. population to total population	Literates to total population			Main Workers to total population

Total workers in the district of Dhanbad account for 30.01 per cent of the total population whereas the proportion of non-workers is as high as 69.99 per cent. Main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) constitute 28.17 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district being only 1.84 per cent. The same trend can be observed in both the rural and urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers, including main workers, between the two sexes. The proportion of total workers and main workers is 48.28 and 47.03 per cent respectively for males against 7.57 and 5.00 per cent for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the high percentage of female marginal workers (2.57%) vis-a-vis male marginal workers (1.25%). This may be attributed to the fact that apart from the household duties, the females do some work during the day or the season to supplement the household income.

It will also be seen that the proportion of total workers and marginal workers is higher in rural areas than in the urban areas, the corresponding percentage being 30.98 and 3.36 (rural areas) and 29.07 and 0.36 per cent (urban areas) respectively. The proportion of main workers is, however, higher in urban areas (28.71%) than in rural areas (27.62%). This may be attributed to the fact that the scope of work in household industry and agriculture labour (in which the females are mostly engaged as marginal workers) is considerably limited in towns. These factors, therefore, depress the urban participation rates in terms of marginal workers and consequently the total workers. On the other hand in the urban areas, coal-mining and other industries engage large proportion of the workers on full time basis. This may presumably be one of the reasons responsible for higher proportion of main workers in the urban areas.

Dhanbad has a large number of mines and quarries as also a big steel plant located, at Bokaro Steel City apart from various other industrial establishments. It is natural, therefore, that the district of Dhanbad should provide wide avenues of employment in the above establishments by way of migration from the adjacent as well as non-adjacent districts.

Villages distributed according to availability of different amenities.

Table 11 on page 23 gives the distribution of villages according to the availability of different amenities in the district.

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with Percentage) of villages having one or more of the following amenities: Education	Medical	Drinking Water	Post and Telegraph	Market/*Hat*	Communications	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Dhanbad-*cum*-Kenduadih-*cum*-Jagta	39	30(76.92)	18(46.15)	39(100.00)	7(17.95)	1(2.56)	1(2.56)	15(38.46)	21(53.85)

7	Baghmara-*cum*-Katras	208	122(58.65)	31(14.90)	208(100.00)	21(10.10)	7(3.37)	73(35.10)	76(36.54)	56(26.92)
8	Chandankiyari	123	105(85.37)	14(11.38)	123(100.00)	13(10.57)	4(3.25)	15(12.20)	16(13.01)	..
9	Chas	123	106(86.18)	9(7.32)	123(100.00)	8(6.50)	4(3.25)	28(22.76)	29(23.58)	23(18.70)
10	Topchanchi	106	57(53.77)	10(9.43)	106(100.00)	11(10.38)	2(1.89)	23(21.70)	27(25.47)	11(10.38)
	Total	**1,364**	**834(61.14)**	**146(10.70)**	**1,364(100.00)**	**117(8.58)**	**32(2..35)**	**241(17.67)**	**293(21.48)**	**206(15.10)**

Educational amenity—There are as many as 834, villages accounting for 61.14 per cent of the total number of inhabited villages (1,364) in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Baliapur with 90.16 per cent villages so provided closely followed by Chas and Chandankiyari with 86.18 and 85.37 per cent such villages respectively. The smallest proportion of villages with educational facility can be observed in the development block of Jharia-*cum*-Jorapokhar-*cum*-Sindri with only 40.00 per cent.

Medical amenity—The availability of medical amenity in the villages is quite low and only 10.70 per cent villages have it. Among the development blocks, Dhanbad-*cum*-Kenduadih-*cum*-Jagta has the largest proportion of villages with medical facility (46.15%) propably because Dhanbad town, the district headquarters is located in this block. This is closely followed by Jharia-*cum*-Jorapokhar-*cum*-Sindri with 40.00 per cent since this block also contains two important towns viz., Jharia and Sindri. Tundi block, on the other hand, has the minimum proportion of villages (2.15%) where any kind of medical facility is available.

Drinking water—It would be seen from the table that drinking water facility is generally available in all the inhabited villages of the district of Dhanbad.

Post & Telegraph—Postal facilities (Post & telegraph) are available in 117 villages out of 1,364 inhabited villages (8.58%) in the district. Jharia-*cum*-Jorapokhar-*cum*-Sindri block has the maximum number of villages having post & telegraph facilities (40.00%) while Tundi block has the least (4.21%). In the remaining development blocks of the district the proportion of villages having post & telegraph facilities varies between 6.50% (Chas block) and 17.95 per cent (Dhanbad-*cum*-Kenduadih-*cum*-Jagta block).

Market/hat—The villages where market/*hat* is held constitute only 2.35 per cent of the total number of inhabited villages in the district. Here one can observe that Baghmara-*cum*-Katras block has the maximum proportion of villages where market/*hat* is held, the percentage, however, being as low as 3.37. There are 5 blocks in the district viz., Gobindpur (1.88%), Tundi (1.92%), Nirsa-*cum*-Chirkunda (1.78%), Baliapur (1.64%) and Topchanchi (1.89%) where market/*hat* is held in less than the district average of 2.35

per cent of villages. Significantly, none of the 5 villages of Jharia-*cum*-Jorapokhar-*cum*-Sindri block has the facility of market/*hat*. It follows, therefore, that bulk of the population in almost all the blocks of the district have to travel to different places to avail of market/*hat* facility.

Communication—The details of villages connected by bus, rail, navigable river/canal services etc., have been incorporated in the village Directory.

Only 17.67 per cent of the total number of inhabited villages in the district are connected by one means of the communication or the other. The majority of villages still do not have this facility. Jharia-*cum*-Jorapokhar-*cum*-Sindri has the highest proportion of villages (60.00%) which are connected by bus or rail or navigable river/canal etc., followed by Baliapur and Baghmara-*cum*-Katras blocks with 36.07 and 35.10 per cent of villages respectively having one means of communication or the other. The number of villages enjoying communication facility appears to be quite low in the case of Dhanbad-*cum*-Kenduadih-*cum*-Jagta (2.56%). Gobindpur (8.45%), and Nirsa-*cum*-Chirkunda (9.78%) blocks.

Approach road to villages—With only 21.48 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Jharia-*cum*-Jorapokhar-*cum*-Sindri with 60.00 per cent villages having *pucca* approach roads again tops the list followed by Dhanbad-*cum*-Kenduadih-*cum*-Jagta (38.46%) and Baliapur (37.70%) blocks. The development blocks which have the least number of villages having this facility are Nirsa-*cum*-Chirkunda (8.00%), Chandankiyari (13.01%) and Tundi (17.24%) blocks. It may also be seen that the development blocks which contain less number of villages having *pucca* approach road generally do not have proper communication facilities also.

Power supply—Electrified villages in the district constitute only 15.10 per cent of the total number of inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain cases for all the above purposes.

The highest proportion of villages having power supply facility is observed in the case of Jharia-*cum*-Jorapokhar-*cum*-Sindri block with 80.00 per cent followed by Dhanbad-*cum*-Kenduadih-*cum*-Jagta with 53.85 per cent villages having the facility of power supply. The lowest proportion of villages having power supply is contained in the development block of Tundi with 3.45 per cent, Chandankiyari block, on the other hand, does not have any village with power supply facility.

Proportion of rural population served by various amenities.

While Table 11 furnishes details regarding the number of villages possessing educational, medical and other amenities, Table 12 on page 25 gives the proportion of rural population served by these amenities.

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenities of—							
			Education	Medical	Drinking Water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Dhanbad-*cum*-Kenduadih-*cum*-Jagta	38,404	89.15	63.29	100.00	37.28	2.43	6.75	59.22	78.12
2	Jharia-*cum*-Jorapokhar-*cum*-Sindri	17,282	77.99	77.99	100.00	77.99	..	85.04	85.04	92.95
3	Gobindpur	122,118	81.47	16.91	100.00	16.82	7.63	16.33	24.27	17.57
4	Tundi	83,175	56.33	4.91	100.00	8.88	3.54	17.95	24·24	3.57
5	Nirsa-*cum*-Chirkunda	181,497	80.13	28.58	100.00	24.03	5.01	16.83	16.64	29.76
6	Baliapur	69,071	97.73	18.47	100.00	17.83	7.09	49.93	53.46	33.90
7	Baghmara-*cum*-Katras	207,463	74.99	24.39	100.00	15.82	7.34	43.14	43.08	38.83
8	Chandankiyari	121,756	93.62	20.45	100.00	24.30	7.25	21.70	19.25	..
9	Chas	130,696	92.46	8.20	100.00	10.65	4.59	26.09	25.39	22.05
10	Topchanchi	72,848	82.71	25.67	100.00	27.62	9.84	32.04	44.66	26.59
	Total	**1,044,310**	**82.13**	**22.22**	**100.00**	**19.93**	**6.17**	**27.82**	**31.88**	**26.49**

It would be seen that educational facility is available to 82.55 per cent of the rural population in the district. It may be seen that the proportion of rural population served by educational facility is the maximum in the case of Baliapur block with 97.73 per cent closely followed by Chandankiyari and Chas blocks with 93.62 and 92.46 per cent of the rural population served by the facility of education. The lowest proportion of rural population served by educational facility may be observed in the case of Tundi block (56.33%). Another noteworthy point is that the proportion of villages in the district enjoying educational facility is much less (being 61.14% vide Table 11) than the proportion of population, which avail of this facility, the percentage being 82.13. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In the case of medical facility also it may be seen that the proportion of rural population served is double the proportion of villages having medical facility. Similar trend can be observed in respect of other amenities also both in the district and in the various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table below furnishes the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 kms., 5—10 kms. and 10+kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5—10 Kms.	10+ Kms.	Total (cols 2—4)
1	2	3	4	5
1. Education	525	5	...	530
2. Medical	869	273	76	1,218
3. Drinking water	...	...	...	...
4. Post and Telegraph.	1,090	142	15	1,247
5. Market/*Hat*	649	389	294	1,332
6. Communication	700	274	149	1,123

As regards educational facility it would be seen that there are 530 villages out of 1,364 inhabited villages (38.86%) in the district which do not have educational facility within but the facility is available at places situated within 5 kms., 5—10 kms. and also beyond 10 kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 kms. is 525 (38.49%) and that of villages having such facility within a distance of 5—10 kms. is only 5 (0.37%) whereas the number of villages having these facilities at a distance beyond 10 kms. is nil. The number of villages having other facilities within a distance of 5—10 kms. and 10+kms. is less than those having the facilities within 5 kms. though not in the same proportion. One may observe that people in most of the villages do not have to travel for more than 10 kms. to avail themselves of various facilities.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different types of facilities by distance from the nearest town in five distance ranges.

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0— 5	231	155(67.10)	35(15.15)	231(100.00)	28(12.12)	6(2.60)	70(30.30)	83(35.93)	75(32.47)
6—15	592	394(66.55)	78(13.18)	592(100.00)	51(8.61)	17(2.87)	108(18.24)	108(18.24)	108(18.24)
16—50	541	285(52.68)	33(6.10)	541(100.00)	38(7.02)	9(1.66)	63(11.65)	102(18.85)	23(4.25)
51+	..	..	..	..	..	..	..	..	..
Unspecified	..	..	..	..	..	..	..	..	..
Total	**1,364**	**834(61.14)**	**146(10.70)**	**1,364(100.00)**	**117(8.58)**	**32(2.35)**	**241(17.67)**	**293(21.48)**	**206(15.10)**

It would appear from the above table that the maximum number of inhabited villages lie in the distance range of 6—15 kms.(43.40%) from the nearest town. There are as many as 231 villages accounting for 16 94 per cent which lie in the distance range of 0—5 kms. from the nearest town. Significantly none of the inhabited villages in the district lie in the distance range of 51 kms or more from the nearest town. With as many as 30 urban centres in the district such a situation is but natural.

It may further be observed from the table that the proportion of villages having different amenities decreases with the increas in the distance range from the nearest town (except in the case of *pucca* approach road facility where there is a very marginal rise in the distance range of 16—50 kms). It may be said that the villages which are nearer to urban areas have benefitted in respect of various civic and other amenities vis-a-vis those rural pockets which are beyond the pale of direct urban influence.

As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table on next page furnishes information regarding distribution of villages having different amenities by the size-class of population in four different ranges.

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenitiy of—			
		Education	Medical	Drinking water	Post and Telegraph
1	2	3	4	5	6
— 499	683	255(37.34)	26(3.81)	683(100.00)	20(2.93)
500—1,999	580	485(83.62)	76(13.10)	580(100.00)	57(9.83)
2,000—4,999	96	89(92.71)	41(42.71)	96(100.00)	37(38.54)
5,000+	5	5(100.00)	3(60.00)	5(100.00)	3(60·00)
Total	**1,364**	**834(61.14)**	**146(10.70)**	**1,364(100.00)**	**117(8.58)**

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—			
		Market/*Hat*	Communication	Approach by *pucca* road	Power supply
1	2	7	8	9	10
—499	683	4 (0.59)	82(12.01)	109(15.96)	53(7.76)
500—1,999	580	15 (2.59)	116(20.00)	134(23.10)	108(18.62)
2,000—4,999	96	13(13.54)	42(43.75)	48(50.00)	43(44.79)
5,000+	5	..	1(20.00)	2(40.00)	2(40.00)
Total	**1,364**	**32(2.35)**	**241(17.67)**	**293(21.48)**	**206(15.10)**

It may be seen from the table that the maximum number of inhabited villages i.e., 683 (50.07%) in the district fall in the population range of less than 499 followed by 580 villages (42.52%) in the population range of 500—1,999. The lowest number of villages is observed in the population range of 5,000+ being only 5(0.37%) in number. It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range (except in the population range of 5,000+ where there is decline in the case of communication, *pucca* approach road and power supply facilities). This further corroborates the fact that more facilities are generally available in larger villages than in the smaller ones.

Main staple food in the villages

The table alongside indicates that rice and wheat constitute the main staple food of the majority of the people in most of the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block.

Serial number	Name of the Development Block	Main staple food
1	2	3
1	Dhanbad-*cum*-Kenduadih-*cum*-Jagta	Rice, wheat
2	Jharia-*cum*-Jorapokhar-*cum*-Sindri	Rice, wheat
3	Gobindpur	Rice, wheat
4	Tundi	Rice, maize
5	Nirsa-*cum*-Chirkunda	Rice, wheat
6	Baliapur	Rice, wheat
7	Baghmara-*cum*-Katras	Rice, wheat
8	Chandankiyari	Rice, wheat
9	Chas	Rice, wheat
10	Topchanchi	Rice, wheat

Villages according to land-use

Land utilization data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land-use

Sl. no.	Name of the Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of culti-vable area to tolal area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Dhanbad-*cum*-Kenduadih-*cum*-Jagta	39	5,493.89	57.18	0.37
2	Jharia-*cum*-Jorapokhar-*cum*-Sindri	5	874.05	44.25	25.10
3	Gobindpur	213	32,913.79	73.20	3.21
4	Tundi	261	37,883.95	61.88	12.62
5	Nirsa-*cum*-Chirkunda	225	39,744.07	62.90	10.60
6	Baliapur	61	15,602.00	65.34	10.45
7	Baghmara-*cum*-Katras	208	26,647-47	68.20	3.60
8	Chandankiyari	123	36,502.59	71.30	11.66
9	Chas	123	38,438.68	67.44	13.34
10	Topchanchi	106	17,670.29	71.56	12.29
	Total	**1,364**	**251,770.78**	**67.14**	**9.62**

It would be seen from the table that 67.14 per cent of the total area of the district is cultivable and of this only 9.62 per cent land is irrigated. It may be mentioned that the term 'cultivable' as used in Table 17 includes culturable waste, land under miscellaneous tree crops and groves, permanent pastures and grazing lands, other fallows and cultivated lands. Among the C. D. Blocks, the highest proportion of cultivable area is observed to be in Gobindpur block with 73.20 per cent cultivable area closely followed by Topchanchi and Chandankiyari blocks with 71.56 and 71.30 per cent respectively. The lowest cultivable area is found in Jharia-*cum*-Jorapokhar-*cum*-Sindri block with 44.25 per cent of land brought under cultivation.

The highest proportion of irrigated area to the total cultivable area is observed in the case of Jharia-*cum*-Jorapokhar-*cum*-Sindri accounting for 25.10 per cent followed by Chas and Tundi blocks with 13.34 and 12.62 per cent respectively. The proportion of irrigated area is found to be the lowest in Dhanbad-*cum*-Kenduadih-*cum*-Jagta block with only 0.37 per cent of irrigated area to the total cultivable area. It indicates that though government has taken up different projects to provide irrgational facilities still considerable portion of cultivable area is deprived of required irrigational facilities in spite of having adequate potentiality for cultivation.

Growth, Density and Sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State :

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

Census Year	District						State					
	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	924,764	79,475	8.59	+101.47	1,565	656	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,182,837	289,913	24.51	+264.79	1,774	647	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,466,417	638,028	43.51	+120.08	1,502	675	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	2,115,010	1,070,700	50.62	+ 67.81	2,423	742	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district is 1,070,700 comprising 50.62 per cent of the district population. The corresponding percentage of urban population for the State is 12.47 per cent. In 1951 Census the proportion of urban population in the district was only to the extent of 8.59 per cent whereas in the successive censuses it rose to 24.51 per cent (1961 Census), 43.51 per cent (1971 Census) and finally to 50.62 per cent (1981 Census) as indicated above. This clearly shows that the pace of urbanisation in the district has been very fast and the district of Dhanbad, as a matter of fact, is the most urbanised district in the State. In 1971 Census also this district, with 43.51 per cent urban population had the highest level of urbanisation. This may be attributed to development of communication, rapid industrialisation, expansion of numerous coalfields; establishment of government offices and very fast growth of avenues of trade and commerce.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. The decadal growth in urban population has shown the maximum increase during 1951—61 (264.79%) probably because of the addition of as many as 16 new towns in the district in the 1961 Census. During 1961—71 the decadal growth rate in urban population came down to 120.08 per cent since in the 1971 Census only 6 towns were added in the district, Bokaro Steel City being one of them. The district has, however, registered the minimum growth rate in its urban population during the current decade (67.81%), though it is still higher than the decadal growth rate of the urban population for the State (54.76%). The trend of growth of urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the carlier decades.

The density of population in the urban areas of the district has shown considerable rise in the 1981 Census (2,423 persons per sq. km.) probably on account of expansion of coal-mines and other industries in the district. Dhanbad, Bokaro Steel City, Sindri and Jharia are a few towns in the district which are becoming more over-crowded due to very large implex on account of greater job opportunities, better educational and medical facilities available due to all round development taking place there. The density of urban population of the State had all along been higher than that for the district. In 1981 Census, the density of the urban population of the State also had shown considerable increase having risen from 2,032 in 1971 to 2,727 in the 1981 Census which is higher than that of Dhanbad which stood at 2,423 persons per sq. km.

Sex-ratio is determined by the number of females per 1,000 males. Though the sex-ratio of the urban areas of the district has all along been lower than that of the urban areas of the State, it has shown an upward trend during 1971 and 1981 Censuses. The sex-ratio in urban areas of the district as well as the State have been adverse for females at all censuses. The urban areas, in fact, still suffer from a shortage of females as the towns attract mainly the male population by way of employment opportunities. The female pupulation continues to live mainly in the villages because of higher cost of living in the urban areas which discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There are 30 towns in the district of Dhanbad as per the 1981 Census. The district contains the largest number of towns in the State. In 1971 Census there were 26 towns in the district 5 new towns, viz., Malkera, Saraidhela, Nirsa, Chandaur and Bhojudih have been added in the present Census as per the details indicated in Table 19 below :

Table 19—New Town/Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
Added	
Malkera	5,094
Saraidhela	11,956
Nirsa	8,923
Chandaur	6,297
Bhojudih	9,283
Declassified—	
Bera	3,326

Only one town, viz., Bera has been declassified in the 1981 Census as shown in table above.

Receipt and expenditure in different towns

The table on next page gives the details of finances in the urban local bodies in terms of per capita receipt and expenditure.

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town		Per capita

IV. Maithon	C.T.	..	..	..	..	..	..	..	..	..
V. Malkera	C.T.	..	..	..	..	..	..	..	..	..
V. Nirsa	C.T.	..	..	..	..	..	..	..	..	..
V. Panchet	C.T.	..	..	..	..	..	..	..	..	..
III. Pathardih	C.T.	..	..	..	..	..	..	..	..	..
IV. Saraidhela	C.T.	..	..	..	..	..	..	..	..	..
III. Sijua	C.T.	..	..	..	..	..	..	..	..	..
II. Sindri	NAC	32.76	21.95	10.81	25.89	3.39	13.85	0.22	4.15	4.28
III. Tisra	C.T.	..	..	..	..	..	..	..	..	..
	Total	**10.18**	**5.64**	**4.54**	**8.63**	**3.46**	**2.80**	**0.85**	**0.32**	**1.20**

It would be seen from the above table that out of 30 towns in the district only Dhanbad (M), Jharia (NAC) and Sindri (NAC) maintain accounts of town finances. The rest 27 towns are non-statutory (Census towns) and, therefore, do not maintain any such account.

As shall be evident from the table, the per capita receipt is the highest in the case of Jharia (NAC). Going into further details, one observes that receipt through taxes as also from all other sources is also the highest in the case of Jharia town.

As regards per capita expenditure also one can see that Jharia (NAC) tops the list. While the per capita expenditure incurred on public health and conveniences and public institution is the highest for Sindri (NAC), the per capita expenditure incurred on all other counts is the maximum in the case of Jharia (NAC)

The overall per capita receipt and expenditure for the urban areas of the district works out to Rs. 10.18 and Rs. 8.63 respectively.

Schools per ten thousand population in towns

Facilities of primary and middle schools are generally available in all the towns. The following table gives details of the different categories of educational institutions per ten thousand population in different towns of the district :

Table 21—School per ten thousand population in towns

Class, name and civic status of the town		Number per ten thousand population			
		Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/Middle	Primary
1		2	3	4	5
V. Angarpathar	C.T.	..	1.85	1.85	5.55

V. Kenduadih	C.T.	..	..	1.83	3.66
II. Kerkend	C.T.	..	0.13	1.06	3.06
III. Kumardhubi	C.T.	..	0.72	2.16	2.88
III. Loyabad	C.T.	..	0.38	0.76	3.02
IV. Maithon	C.T.	..	0.74	3.70	2.22
V. Malkera	C.T.	..	1.96	3.93	3.93
V. Nirsa	C.T.	1.12	1.12	1.12	1.12
V. Panchet	C.T.	..	1.37	1.37	2.74
III. Pathardih	C.T.	..	0.44	2.20	3.52
IV. Saraidhela	C.T.	..	0.84	0.84	1.67
III. Sijua	C.T.	..	0.49	0.97	4.37
II. Sindri	NAC	0.14	0.57	1.27	0.99
III. Tisra	C.T.	..	0.21	0.43	1.92
Total		**0.07**	**0.54**	**1.42**	**2.21**

It would be seen from the table that institutions such as Higher Secondary/Inter/PUC/Junior College exist only in 6 out of 30 towns. The average number of such institutions per ten thousand population is the highest in the case of Nirsa town (1.12). As regards secondary/ matriculation level schools there is 0.54 school per ten thousand population in the urban areas of the district. The average number of such schools per ten thousand population is the highest in the case of Malkera town (1.96) closely followed by Chirkunda (1.93) and Angarpathar (1.85). Junior Secondary/Middle Schools are, however, found to be the maximum in the case of Dumarkunda (4.84) closely followed by *Chaitudih* (4.81). *Chaitudih* has the highest

number of primary schools in the district with an average of 9.63 such schools per ten thousand population. The average number of primary schools in the urban areas of the district works out to 2.21 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institution in the urban areas of the district :

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town		Number of beds in medical institutions per 1,000 population.

V. Malkera	C.T.	3.73
V. Nirsa	C.T.	0.90
V. Panchet	C.T.	4.11
III. Pathardih	C.T.	..
IV. Saraidhela	C.T.	69.00
III. Sijua	C.T.	1.36
II. Sindri	NAC	2.51
III. Tisra	C.T.	2.34
Total		**3.01**

The number of beds in medical institution per 1,000 population for urban areas of the district works out to 3.01. The availability of beds in the hospitals is the highest in Saraidhela town having 69.00 beds per 1,000 population. The lowest number of beds is found to be in the case of Bhagatdih town only 0.44 beds per 1,000 population. As many as 5 towns in the district viz., Angarpathar, Bhojudih, Chandaur, Kenduadih and Pathardih do not have the facility of beds in medical institutions.

Proportion of Slum Population in towns

The details of slums have been collected only in the case of Class I and Class II towns. Relevant information was collected through the local officials of the Municipalities, NACs, etc., as also through the Town Planning Department in 1979. Though Bokaro Steel City and Dhanbad qualified as class II towns (population 50,000—99,999), no information regarding slum was available from either of the two towns. Table 23 has, therefore, not been presented in this volume.

Important commodities imported, exported and manufactured.

The table on next page lists the most important commodities manufactured, exported and imported in the 30 towns of the district.

Table 24—Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town		Most important commodity		
		Manufactured	Exported	Imported
1		2	3	4
V. Angarpathar	C.T.	Cooking coal	Cooking coal	Rice

III. Sijua	C.T.	Hard coke	Coal	Rice
II. Sindri	NAC	Urea	..	Rock phosphate
III. Tisra	C.T.	Cooking coal	Coal	Rice

Dhanbad being chiefly a coalfield area, one can see from the table that as cooking hard coke is the most important commodity manufactured in as many as 15 out of 30 towns as also the most important commodity exported from these towns to other places. While pig-iron is the most important commodity manufactured as also exported to other places from Bokaro Steel City town, mustard oil and fire bricks are the main item which is manufactured and exported from Chirkunda and Dumarkunda towns respectively. In the other towns, the most important commodity manufactured and the most important commodity exported are not the same. 3 towns, viz., Bhojhudih, Chandaur and Malkera have not reported this information.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), Post and telegraph (col 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc. have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance,-viz., '(5 kms.)', (5-10 kms.)' and '(10+kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village

is served by any mode of public transport such as bus, rail, waterway etc., (column 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown.
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e. g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolted blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but one put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this cotegory. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Block-wise.

Following is the list of abbreviations used in the Village Directory :

(*i*) *Column* 5— ***Educational***

- P — Primary or Elementary School (upto class IV).
- M — Middle or Junior secondary School (upto class VIII).
- H — Matriculation or Secondary School (upto class X).
- PUC — Higher Secondary, Intermediate, Pre-University, Junior Collage.
- C — College
- I — Industrial School
- Tr — Training School
- Ac — Adult Literacy Class/Centre
- O — Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.).

(*ii*) *Column 6* — ***Medical***

- H — Hospital
- MCW — Maternity and Child welfare Centre.
- MH — Maternity Home
- CWC — Child Welfare Centre
- HC — Health Centre
- PHC — Primary Health Centre
- PHS — Primary Health Sub-Centre
- D — Dispensary
- FPC — Family Planning Centre
- TB — T. B. Clinic
- NH — Nursing Home
- RP — Registered Private Practitioner.
- SMP — Subsidised Medical Practitioner.
- CHW — Community Health worker
- O — Others

(*iii*) *Column 7* — ***Drinking Water***

- T — Tap Water
- W — Well Water
- Tk — Tank Water
- TW — Tube-well Water
- Hp — Handpump
- R — River Water
- F — Fountain
- C — Canal
- L — Lake
- S — Spring
- N — *Nullah/Nala/Nallah*
- O — Others
- NA — Information Not Available

(*iv*) *Column 8* — ***Post and Telegraph***

- PO — Post Office
- TO — Telegraph Office
- PTO — Post and Telegraph Office
- Phone — Telephone connection

(*v*) *Column 10* — ***Communications***

- BS — Bus
- RS — Railway Station
- NW — Navigable Waterway (including river, canal, backwaters, etc.)

(*vi*) *Column 11*— ***Approach to Village***

- PR — *Pucca* Road
- KR — *Kutcha* Road
- NR — Navigable River
- NC — Navigable Canal
- NW — Navigable Waterway (other than river or canal).
- FP — Foot Path

(*vii*) *Column* 13—***Power Supply.***

- ED — Electricity for domestic purpose

EAg — Electricity for agriculture purpose.

EO — Electricity for other purposes like industrial, commercial etc.

EA — Electricity for all purposes listed above.

(*viii*) *Column 16—Irrigated by source*

GC — Government Canal

PC — Private Canal

W — Well (without electricity)

WE — Well (with electricity)

TW — Tube-well (without electricity)

TWE — Tube-well (with electricity)

Tk — Tank

R — River

L — Lake

Wf — Water fall

O — Others

(*ix*) *Column 20—Remarks*

N — Copies of Newspapers coming in the village.

M — Motor Cycles/Scooters available in the village.

C — Cars/Jeeps available in the village.

T — Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of Columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells etc., post and telegraph offices, power supply, railway station, bus stop, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) ; 0—5, 6—10, 11—15, 16—20, 21—30, and 31 and above.

For the Scheduled Tribes (Part B) : 0—5, 6—15, 16—25, 26—35, 36—50, and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—DHANBAD-*CUM*-KENDUADIH-*CUM*-JAGTA **VILLAGE**

AMENITIES AND

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5kms., 5—10 kms and 10+kms., of the nearest place where the facility is available is given].

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) Physical aspects and location of towns 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns; (ivA) Civic and other amenities in Notified Slums; (v) Medical, educational, recreational and cultural activities and (vi) trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix to the Town Directory.

In statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an appendix II to the Village Directory.

The details of the data covered in statements I to VI and IVA and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961,1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C.B	...	Cantonment Board/ Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/ canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of observatories the same has

been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery.
BWP	...	Borewell Pumping System.
PT	...	Pressure Tank

Statement IVA

This statement gives, for each such area/ locality as is known or identified as a slum in a Class I or Class II town the available civic amenities in 1979.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local Officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H (Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all Categories—Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Type writing.
Sh Type	...	Shorthand and Typewriting
O	...	Others

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/ Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other Workers"

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an anneture has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban Classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation.

In the Village/Urban ward wise primary Census Abstract the village have been arranged in the ascending order of their thana numbers which also respresent their location code numbers After making entries for all the village in a development block the figures for each town and ward/ circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.

Note : 1. Towns treated as such for the first time in 1971 Census which continue as towns in 1981 Census are shown with asterisk (*) on their left.

2. Towns treated as such for the first time in 1981 Census are printed in *italic*

3. Roman numerals within brackets after the names of the towns indicate their location code numbers.

4. The abbreviations have been used for the status of the towns :

M—Municipality,

N—Notified area Committee,

Others Are Census Town.

Note : 1. Towns treated as such for the first time in 1971 Census which continue as towns in 1981 Census are shown with asterisk (*) on their left.

2. Towns treated as such for the first time in 1981 Census are printed in *italics*

3. Roman numerals within brackets after the names of the towns indicate their location code numbers.

4. The abbreviations have been used for the status of the towns :

M—Municipality,

N—Notified Area Committee,

Others are Census Towns.
