# MOTIF ON THE COVER

*A "Gaddi" woman with her sheep and goats*

*Gaddi, a generic name, is a separate clan mainly found in Brahmaur tahsil of Chamba district along the both banks of upper Ravi and its tributaries Their main occupation is rearing of sheep and goats In winter they move down to the warmer places alongwith their flocks while in summer, pastures and grassy lands on high altitude are their abodes The exact meaning of the word 'Gaddi' as the term refers to a territorial group of people attired in woollen clothes with DHORA round their waist and belong to castes like Rajput, Khatri, Rana and Thakur They are entirely Hindus both in origin and in their social organisation They are said to have come from the plains, driven by Muslim persecution and adjusted in a very different ecological situation from the plains. Gaddis are contented people, nature lover, fond of music and have their own customs*

Statement V Medical, educational, recreational and cultural facilities, 1979 386—387
Statement VI Trade, Commerce and Banking, 1979 388—389
Appendix V Towns showing their outgrowths with population 390
8 **Part B-Primary Census Abstract** 393
(i) Chamba District 394—395
(ii) Pangi Tahsil 394—407
(iii) Chaurah Tahsil 408—437
(iv) Saluni Sub-tahsil 438—461
(v) Chamba Tahsil 462—493
(vi) Bhattiyat Tahsil 494—521
(vii) Brahmaur Tahsil 522—545
(viii) Sihunta Sub-tahsil 546—555
Appendix VI Statement showing jurisdiction of enumerators block in urban areas 556—557
9 **Primary Census Abstract for Scheduled Castes and Scheduled Tribes** 561
(i) Primary Census Abstract for Scheduled Castes 564—565
(ii) Primary Census Abstract for Scheduled Tribes 568—569
Appendix VII Blockwise total, scheduled castes and scheduled tribes population 570—572

# FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census The DCH is constantly referred to by planners, administrators, academicians and researchers It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for the rural areas and wardwise for each city or town It also provides data on infrastructure and amenities in villages and towns, etc

The District Census Handbook series was initiated during the 1951 Census It contained important census tables and PCA for each village and town of the district During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted At the same time, comparability with the 1971 data has also been kept in view All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind The new item on approach to the village is to have an idea about the villages in the district which are inaccessible, A new column, 'total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view A significant addition is class of town in all the seven statements of the town directory The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into

consideration The addition of the columns on civic administration status and population in a few statements also serves this purpose

The format of the primary census-abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to tahsil/town levels At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value The district and tahsil/ Police Station/C. D block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication

This publication is a joint venture of the State Government and the Census Organisation The data have been collected and compiled in the State under the direction of Shri K L Negi, the Director of Census Operations, Himachal Pradesh on behalf of the State Government which has borne the cost of printing The task of planning, designing and co-ordination of this publication was carried out by Shri N G Nag, Deputy Registrar General (Social Studies) of my office, Dr B K Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M M Dua, Senior Research Officer I am thankful to all who have contributed in this project

New Delhi,
the 26th April, 1982

P PADMANABHA,
Registrar General, India

# PREFACE

The data collected at 1981 Census has to be tabulated and finalised so that the utility of the data is not minimised for data users and the present volume is an endeavour towards that end In the recent past the need for a handy census publication has grown because it serves as a ready reckoner to various administrators and planners for taking policy decisions The scholars who are engaged in projects such as sociology, anthropology can not do without the basic statistics and there are yet others who are keen to know how many are we and how distributed This handbook contains information down to the village level in the rural areas and ward level in the urban areas which are the smallest units of administration

2 The District Census Handbooks in respect of each district of the Pradesh were brought out for the first time in 1951 Census. Prior to this the census reports contained data up to district/tahsil/ town level only With the change of time the necessity of data for the lowest administrative unit i e- "*Village*" was felt by the Government as well as by the various data using agencies Keeping this object in view, the publication of the District Census Handbooks form a part of publication of the census programme as a State Government publication

3 The District Census Handbook is constantly referred as the most reliable single source of information on population data Apart from bare statistics on population, we have tried to give brief historical background, geographical conditions, land and the people, other important activities and details of recent changes that have taken place during the last decade in the district The analytical note given in the beginning of this book will enable the reader to form a background of the district It contains two parts Part A comprises of Village and Town Directory whereas in Part B village and townwise Primary Census Abstracts have been given The information in the Village and Town Directory has been collected through the revenue agency/civic authorities and has been cross checked from other concerned implementing agencies Primary Census Abstract is based upon the data collected during the population count

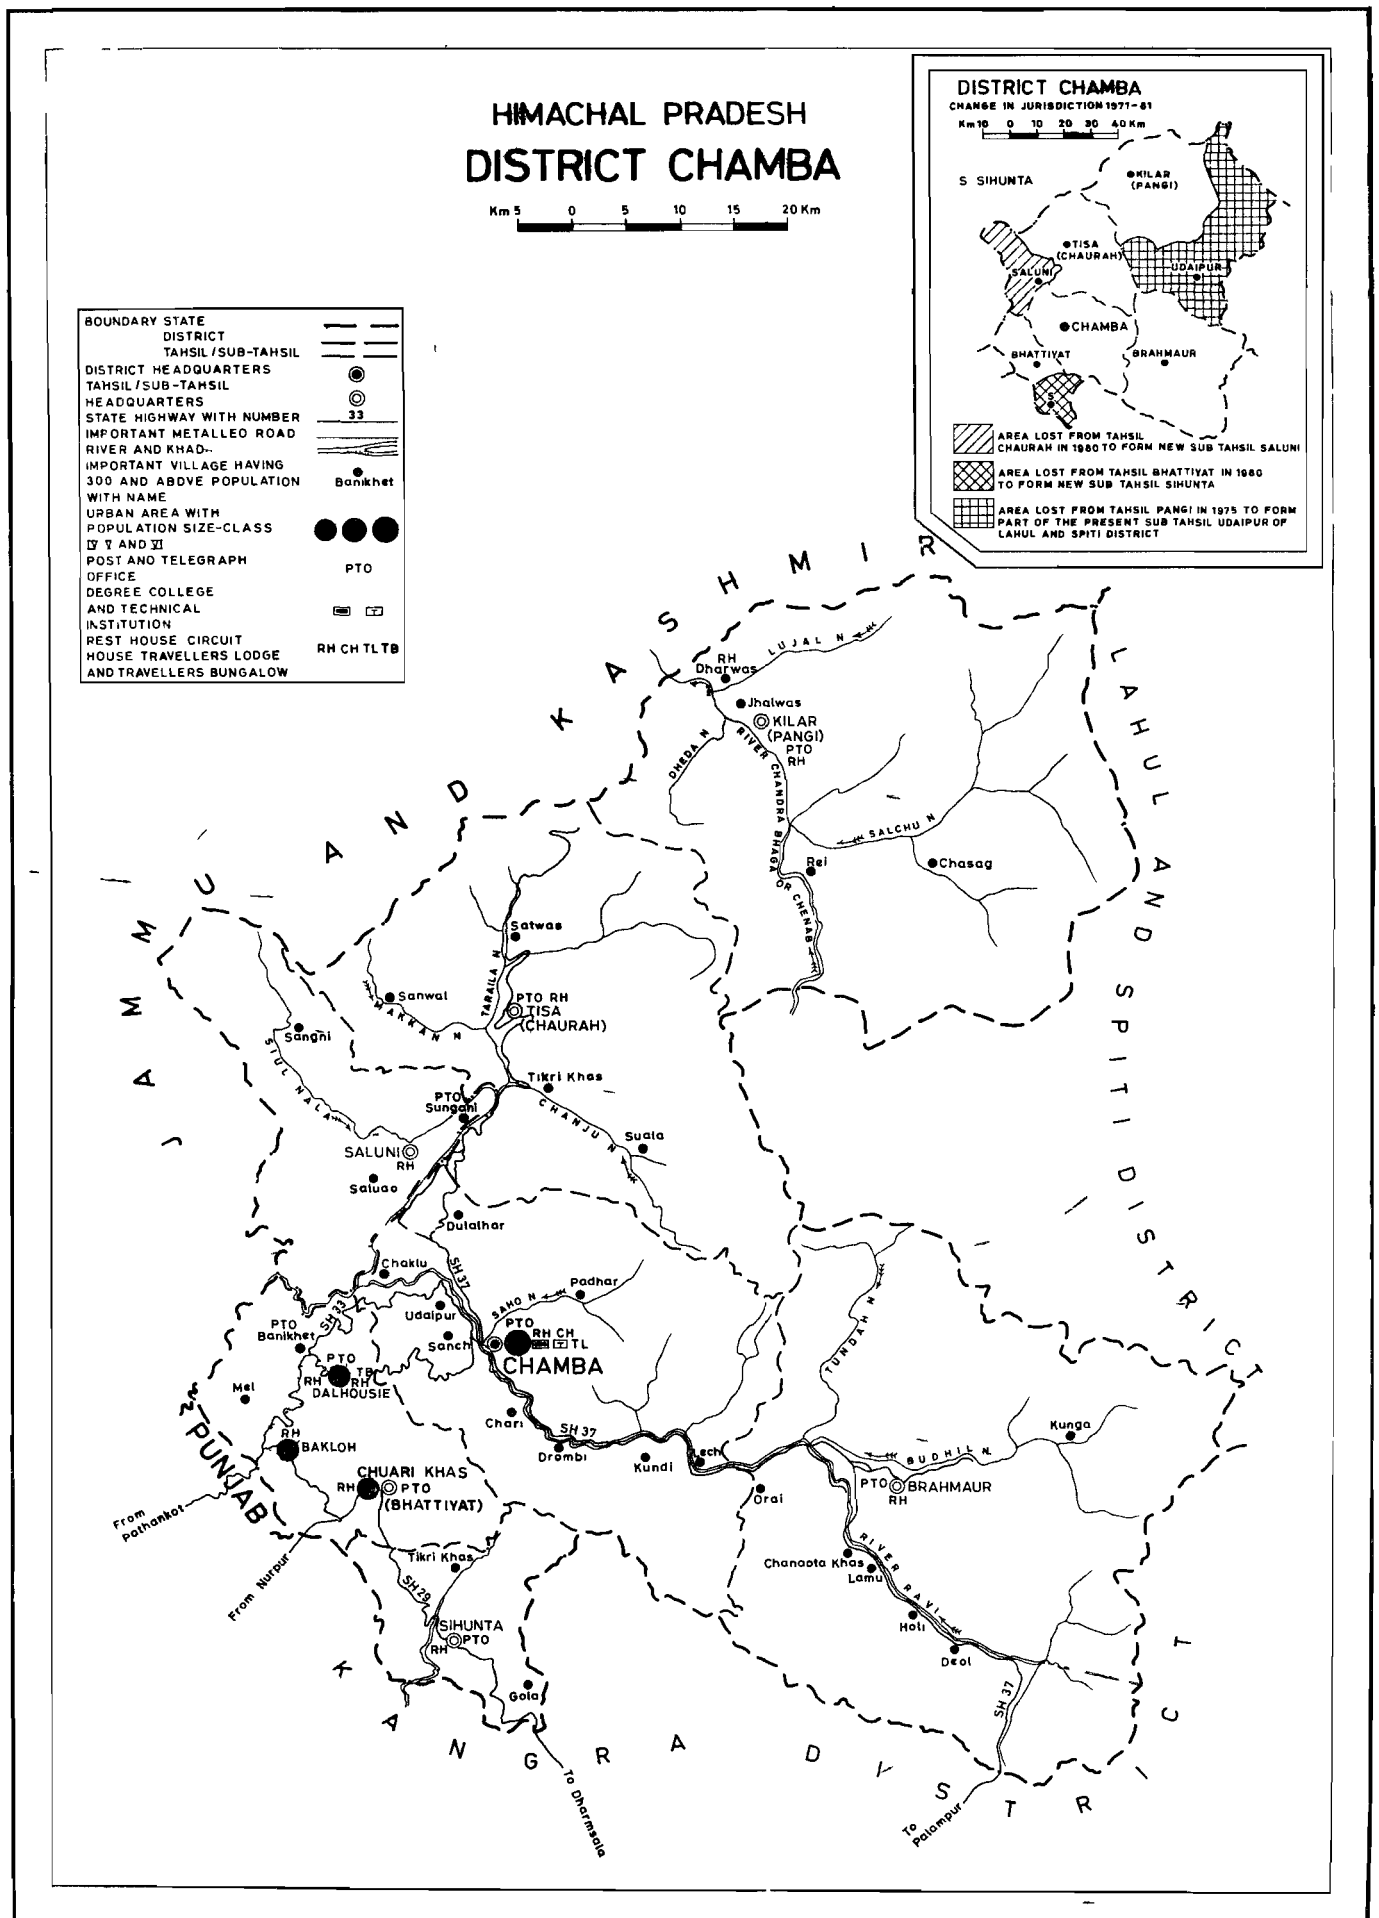

4 Initially, this work was undertaken under the guidance of Sh K L Negi, IAS who deserves all credit for the success of the 1981 Census Operations in Himachal Pradesh He had to leave the organisation for taking up other important assignment, before the present volume could be made ready for the press I owe a great deal of gratitude to all my office colleagues, hundreds of enumerators and supervisors who worked in the field during 1981 Census It is not possible to mention their names here as also large number of Tabulators/Checkers/Supervisors who prepared initial tables for this publication I am grateful to them all During 1981 Census and subsequent compilation of data of this book we had the privilege of having the constant and enlightened guidance and encouragement from Shri P Padmanabha, the Registrar General and Census Commissioner, India, which has enabled us to bring out this book in time

5 I shall feel greatly rewarded if the book comes to the expectation of data users

# ANALYTICAL NOTE

Chamba district was formed as a separate administrative unit on the merger of the erstwhile State with Himachal Pradesh on the 15th April, 1948 At that time it had three tahsils and two sub-tahsils. Now the district comprises of five tahsils and two sub-tahsils In all there are 1,580 villages in the district, the most populous of them being Surgani with a population of 2,558 persons as per 1981 Census There are 5 urban units in the district

**History** - Prior to the merger of the princely States after the independence the area comprising the district was known as Chamba State Chamba State has a very old history of its own The name of this State is found in the Vansavali (genealogical role of the Rajas) The available epigraphical records and copper plate title deeds also throw much light on the old history of the State Since the State was sheltered by its snow clad mountain barriers, it escaped the destruction of monuments of old civilisation at the hands of the foreign invaders As the history reveals Chamba State was founded about the middle of the 6th century A D Maru is said to have been the founder of the ruling family of the State He was a Suraj-Vansi Rajput and is said to have migrated from Ayodhya alongwith his family He is stated to have penetrated into the upper valley through the outer hills and is said to have conquered the territory from the local petty chiefs Brahampura which is considered to be the present Brahmaur village was founded by him and he made it capital of the State It is also stated that the original State was very small in size and was confined in the valley of the Ravi from below Barabanghal with its tributaries the Budhil and the Tundahen as far down as Chhatrari The Maru's rule was only nominal and it is said that after having founded the State he made it over to his son Jaistambh and himself retired by detatching from the worldy affairs Jaistambh was succeeded by Jaistambh and Mahastambh

Subsequent rulers were Adi Varman, Deva Varman, Mandara, Kantara, Pragalbha, Ajya Varman, Mushuna Varman, Hamsa Varman, Saravarman, Sainya Varman and Sahila Varman

Sahila Varman who ruled around 920 A D. was the last among the Brahampura Rajas He conquered the lower Ravi valley and shifted the capital from Brahampura to the present Chamba town He was visited by 84 *Yogis* who after being highly pleased by the Raja's hospitality promised him ten sons In due course the promise was fulfilled and in addition, one daughter was also born who was named Champavati The Raja accompanied by one of the *Yogis* named Charpatnath, the queen and the princess Champavati after conquering the lower portion of the Ravi valley halted on the plateau on which the present Chamba town is situated Champavti revealed her liking to the place and asked her father Sahila Varman to found a town at the place and make it the capital of his State The town was subsequently founded around 930 A D and named as Champa after his daughter Another legend is that Chamba might have derived its name from the *Champa* trees which are found in and around the town Right from the founding of the town in 930 A D it has uninteruptedly been the seat of the government The Raja who ruled the Chamba state after Sahila Varman and had Chamba town as their capital were as under

*Yugakar Varman (A D 940)* Not much is known about this Raja except a copper plate deed bearing his name which is still in existence This plate is the oldest discovered He is believed to have erected the temple of Gauri Shankar in Chamba near the Lakshmi Narain temple

*Vidagdha Varman (A D 960)*: A copper plate deed granted in the 4th year of his reign is available which mentions his father Yugakar and his mother Bhogamati Devi

*Dodaka Varman (A D 980)* · The name appears as Dogdha in a stone inscription ·

Other Rajas who ruled Chamba after Dodaka Varman were Vichitar Varman, Dhairya Varman, Salavahana Varman (1040 A D), Soma Varman (1060 A D), Asata Varman (1080 A D), Jasata Varman (1105 A D), Dhala Varman (1118 A D), Uday Varman (1120 A D) Ajita Varman, Daityari Varman, Prithi Varman, Lalita Varman (1143 A D), Vijaya Varman (1175 A D), Raja Varman, Sara Varman, Kirti Varman, Ajita Varman, Madana Varman, Narakanajar Varman, Asha

Varman, Jimut Varman, Vairasi Varman (1330 A D), Manikya Varman(1370 A D), Bhot Varman (1397 A D), Sangram Varman (1442 A D), Anand Varman (1475 A D), Ganesha Varman and Partap Singh Varman (1559 A D)

Partap Singh Varman undertook the task of building and repairing a number of temples including the Lakshmi Narain temple and he defeated the Katoch forces and captured a sizeable territory including Guler Partap Singh Varman was contemporary with Akbar and Chamba might have become subject and tributary to the Mughal empire Todar Mal, the Finance Minister of Akbar subdued Chamba and other states of Kangra group and Chamba was compelled to surrender Rihlu and the territory to the east of that province as also the areas of Chari and Gharoh Except these there was no interference on the part of the Mughal empire in the affairs of the internal administration of the Hill States

Partap Singh's successors were Vir Vahnu (1586 A D), Balabadhra (1589 A D), Janardan (1613 A D), Prithvi Singh (1641 A D), Chatar Sinh (1664 A D), Udai Singh (1690 A D), Ugar, Singh (1720 A D), Dalel Singh (1735 A D), Umed Singh (1748 A D) During Umed Singh's reign the territory of the state was enlarged to the south of the Dhauladhar up to the border of Mandi The fort of Pathiyar near Palampur was also garrisoned by his troops and Bir Bangahal was also under his influence The Khan chandi portion of the palace was also erected by him and a palace at Nada was also built This place was named as Rajnagar He was succeeded by Raj Singh (1764 A D) and Jit Singh (1794 A D)

*Sri Singh (1844 A D)* It was during his reign that Chamba state, came under the influence of British regime The state was attached politically to Jullundur Division Subsequently it was transferred to Amritsar Division in 1862 and finally to Lahore Division The Raja was married to a Suket princess and during his minority the economy of the state was completely shattered because of mismanagement and extravagance The Raja, therefore, asked for the services of an officer from the British Government and Major Blair Reid was appointed Superintendent of the State in January, 1863. Major Reid carried out important and far reaching reforms Post office, primary school, state hospital and a residency were instituted Reforms were carried out in the administration of forests The important places were linked with roads and income from revenue was augmented Raja Sri Singh died in 1870 and was succeeded by his brother Gopal Singh

*Gopal Singh (1870 A D)* Raja Gopal Singh like his brother Sri Singh had the assistance of a political officer The reforms initiated by Raja Sri Singh were pushed on by Gopal Singh Several new roads were constructed and efforts were made to beautify the town The primary school at Chamba was raised to middle standard The people who had earlier been dependent on orthodox methods of treating ailments were more attracted towards the state hospital He, later on, abdicated in favour of his eldest son Sham Singh and spent the remaining years of his life at Manjir until his death in March 1895

*Sham Singh (1873 A D)* He was installed as Raja by General Reynell Taylor the then Commissioner of Amritsar on the 7th October, 1873 Mian Avtar Singh was appointed as his Wazir Settlement operations of land were carried out Col Blair Reid retired in March, 1877 and was succeeded by Mr R T Burny under whose administration the communication system was further improved Chamba-Brahmaur, Chamba-Chowari and Chamba-Khajiar roads were built Mr R T Burnney was succeeded by Capt C H T Marshall who geared up the developmental works in the state Sham Singh Hospital was expanded with facilities for treating inpatients with 40 beds The hospital was also fully equipped with all necessary medical and surgical appliances In 1881 a dispensary was opened at Tissa Leper asylum started by the "Mission to Lepers" in 1876 was taken over by the state in 1881 The palace was renovated and a number of new houses were built Sheetla bridge over the Ravi damaged by the floods in 1894 was replaced by a suspension bridge of iron at the cost of nearly a lakh of rupees A net work of Post offices in the interior of the state was started The judicial department adapted to local conditions was reorganised on the British pattern Police

force was increased to maintain law and order Buildings and roads were maintained by the Public Works Department Education was fostered by opening new schools and promising pupils were offered scholarships for study within and outside the state A small military force consisting of 300 infantry and 30 cavalry with 4 guns was formed and barracks were erected in the neigh bourhood of the town The state was also visited by Sir Mackworth Young, Lt Governor of Punjab in 1901 and by Lady and Viceroy Curzon in 1900 Because of his prolonged illness Sham Singh abdicated in favour of his brother Mian Bhuri Singh in 1904

*Bhuri Singh (1904-1919 A D)* - Before his installation as Raja, Bhuri Singh had been associated with the administration as Wazir for seven years and he discharged his duties with great ability The developmental works started during the reign of Sham Singh were carried through by Bhuri Singh Roads in the vicinity of Chamba town were widened In 1906 a new Dak Bungalow was built in the town Apart from this a commodious guest house was constructed in the town and another one in the suburb of Dharog A public reading room and Library was opened The Middle school was upgraded to a High school in 1905 and the famous Bhuri Singh Museum was inaugurated in 1908 A power house was installed on river Sal in the vicinity of the town and the town was electrified in 1910 in addition to the completion of water supply Raja Bhuri Singh died in 1919 and was succeeded by his elder son Ram Singh

*Ram Singh (1919-1935* A D *)* Soon after his accession, the Raja gave a great fillip to the education As many as fifteen new village schools were opened Physical education was also introduced On 1st November, 1921 the state came under the direct control of the Government of India in the Political Department A large portion of road from Chamba to Nurpur was realigned and completed upto the state border Chamba-Brahmaur road which was completed upto the twentieth mile was carried on to Kiani with a suspension bridge over the Ravi Drainage system was provided in the Chamba town to improve sanitation To overcome water scarcity during summer a big tank was constructed A new power house was started Raja Ram Singh died on the 7th December, 1935 at Lahore and was succeeded by Raja Lakshman Singh

*Lakshman Singh (1935-1948* A D *)* At the time of his installation, Raja Lakshman Singh was minor and as such the state remained under council of administration consisting of three members, including a President till the Raja came of age in 1945 Major Toulnim was the first President of the council During his reign the existing projects were carried through and a cart road joining Chamba with the plains was also completed On the 8th March, 1948 the state merged with the Indian Union and was assigned the status of a separate district in Himachal Pradesh

**People** The population of Chamba district is predominantly Hindus and next come the Mohammadans followed by the Sikhs The Jains and the Christians constitute a negligible proportion of the district population Some portion of the original inhabitants have come from the plains of Punjab Among the Hindus, mention may be made of Rajputs, Kanets, Brahmins etc Many of the Rajputs are most probably the descendants of the invaders from the plains Numerically, they constitute a small community Rajputs occupied a prominent position in the state before its integration with Himachal Pradesh in 1948 They are known as Mians, Thakurs, Jagirdars, Rathis and Ranas Brahmins mostly migrated to the area in the early period of the history as priests and religious devotees The Gaddi Brahmins profess that their ancestors came from Delhi to Brahmaur during the time of Raja Ajay Varman A D 780-800 Rajputs and Kanets though originally two distinct communities, but, with the passage of time have become one through common customs, habits and marital relations Besides, Scheduled Castes which are mainly Kolis, Dumnas, Lohars, Badhis are also found all over the district In addition, the Scheduled Tribes mainly consisting of Gujjars and Gaddis are also found in the district

The Gaddis are a separate community The

term Gaddi is a generic name Brahmins, Rajputs, Khatris, Thakurs and Rathis are covered under this term They are found mostly in Brahmaur tahsil of the district It is believed that Gaddi community originally belonged to the plains Due to religious atrocities during the regime of Aurangzeb, the Mughal Emperor, they migrated to Brahmaur There is a local saying "Ujjaria Lahore te basiya Brahmaur" which means that Brahmaur was populated by persons who ran away from Lahore

*Gujjars* A limited number of Gujjar families residing in the district are permanent inhabitants and are found in Chaurah, Chamba and Bhattiyat tahsils and Saluni sub-tahsil Some of the Gujjars also migrated to the district who come during summer to graze their cattle on high pastures and move down to the plains before winter Their main occupation is rearing of cattle The marriages are restricted within their own community and they are mostly uneducated

*Pangwalas* They also fall under the category of Scheduled Tribes They generally live within Pangi tahsil in the parganas of Kilar, Sach and Dharwas and are mainly engaged in agricultural activities Bhots, another Scheduled Tribe community, are also found in Pangi tahsil and are mainly residing in the upper reaches of the tahsil

**Language** – The language commonly spoken in the district is western Pahari in 5 distinct dialects Of these, Chambeali is spoken in Chamba town and its neighbourhood over a considerable area extending to the whole of Chamba tahsil Gaddi or Brahmauri is being spoken in the upper Ravi valley comprising of Brahmaur tahsil Bhattiyali is the dialect of Bhattiyat tahsil and Sihunta sub-tahsil and Chaurahi is being spoken in Chaurah tahsil and Saluni sub-tahsil and some villages of Chamba tahsil Pangwali is being spoken in the Pangi tahsil except a few villages where the inhabitants are Bhots, who speak a language which is overwhelmingly akin to Tibetans

Chambeali, in modified form, is the only dialect used in writing, but, is less in use now During the state period, all the official business with the parganas used to be conducted in Tankri script using Chambeali With the spread of modern education, the use of Tankri has almost extinguished except that it is being used by few people belonging to the business community In the urban areas, Hindi, Urdu and Punjabi are commonly spoken by all The Parachinari displaced persons speak Pashto but this is confined to their own community During the regime of Rajas the Tankri script which is believed to have been derived from the Sharada script was much in use For a number of years, Urdu in the Arabic script was the court language in Chamba Now English and Hindi are the official languages

**Housing & Furniture** - In the urban areas of Chamba and Dalhousie, houses are of common design, made of dressed stones and wood In the construction of the houses, timber is used in great quantity due to its easy availability The houses are generally two to three storeyed buildings with separate kitchen and cowshed The design of the houses is not uniform The design of the house depends upon the location of site In the rural areas, majority of the houses are single storeyed, but in the high hills some of them are two/three storeyed In single storeyed houses, roofs are generally flat, made of shingles on which clay is spread and is pressed hard The walls of the houses are generally built of stone and wood Timber mainly comprising of Taun and Kail and occasionally Deodar is also used Doors are made of Kail In most of the houses provision of ventilation and light is very limited Generally, the shape of the houses is square or rectangular. With the opening of roads and availability of raw material, the construction of houses has also undergone a change and well to-do families have started the construction of houses where provision of light and ventilation is also made In addition, facilities of separate kitchen, bath and toilet are also made

There are not many houses in the rural areas where modern furniture is available Charpai, mats of paddy straws, kharchas and asans are the common items of household furniture in the interior Two or three wooden boxes or steel

trunks are found in each house for keeping valuable things and clothes These items of furniture are being replaced and the use of table, chair and modern cots are being found in the houses of persons belonging to the service community or economically better placed families Household utensils which were mainly of brass and bronze have been replaced by aluminium utensils The stainless steel utensils are also fast replacing the aluminium utensils With the availability of electricity facilities in the rural areas as well as shortage of fuel wood the use of heaters for heating as well as cooking purposes is becoming popular Radios and transistors which were found with a few people 20 years back are now most commonly seen in the villages

**Food & Dress** - Maize and wheat are the staple food of the people They also take rice occasionally It is also being commonly used in Chamba and Bhattiyat tahsils, where it is grown in abundance In Brahmaur and Pangi tahsils, Cheena and inferior types of millets are used Villagers take butter, milk and are very fond of curry Mustard oil is used for the preparation of vegetables but on ceremonial occasions ghee is used In Pangi and Brahmaur tahsils which remain under snow for about 6 months, people consume liquor locally distilled Many women also drink though not in the public as a rule The common man can not afford but include meat in his diet except on special occasions With the passage of time Desi Ghee is being replaced by hydrogenated vegetable oils and use of tea is also becoming popular The food is generally taken four times a day i e *Nawari* which corresponds to the breakfast and consists of chapati taken with *sag* or *chhach Kalwar* is akin to lunch and consists of maize or wheat chapatis taken with vegetable or *lassi Arehni* which is taken in the afternoon resembles with *kalwar Biali* corresponds to the dinner and consists of rice or wheat/maize chapatis taken with *dal* or vegetable

Mostly woollen garments are worn Cotton turban, home spun and locally woven patti *pyjama* and coat is the typical dress of the Chamba people A change in the traditional dress has been noticed both in the rural and urban areas *Patti pyjamas* and coats are being replaced by trousers and bushirts Women wear *kurta* or Panjabi *kameez* and *salwar* They put on nylon or other synthetic cloth *dupatta* called *chadru* In the areas of Brahmaur and Chaurah tahsils and Saluni sub-tahsil, people mostly wear woollen coats Men use the *chol* and the *dora* The common head dress of the Chaurah and Pangi women is *joji* Cotton or synthetic colourful shirts and woollen *pattu* tied with a cotton piece around the waist are the important items of dress for Chaurah women In Pangi tahsil, women put on black woollen *churidar pyjama cholan*, *kameri*, a full size shirt, *joji* or *chadru*. On festive occasions people put on new clothes and are heavily loaded with ornaments

**Physical Features** - The district is situated astride the main Himalayas, touching on the fringe at one corner a bit of Shivalik ranges, before the start of plains on the other side of the border It is situated between north latitude 32° 10' and 33° 13' and east longitude 77° 55' It is bounded by Jammu & Kashmir on the north-west and west and by Ladakh area of Jammu & Kashmir State, Lahul of Lahaul & Spiti district and Bara Bhangal area of Kangra district on the north-east and east and on the south-east and south by the districts of Kangra and Gurdaspur of Punjab

**Configuration** - The district is more or less rough oblong in shape contracted towards the north The entire district is mountainous with an altitude ranging from 610 metres to about 6,400 metres above mean sea level, but, the habitation is found upto about 3,000 metres There are three big valleys i e (i) Beas Valley, (ii) Ravi Valley or Chamba Valley and (iii) Chenab or Pangi-Chamba-Lahul Valleys. The valleys on the south-west of the district are fertile The Ravi or Chamba valley, as a whole, is tolerably open and presents many delightful contrasts In the lower areas of the valley, vegetation is semi-tropical and at the higher elevation the trees are belonging to pinus longifolia, oak and chestnut and above these are birch and juniper In this valley the villages are diminutive In the villages upto an altitude of 2,100 metres two crops are sown while in the villages above 2,100 metres only one crop is grown

The region between the Pangi and Zaskar

ranges comprise the valley of Chenab (Chanderbhaga) as it is called in the higher hills but flows at higher level than the Ravi This valley is divided into two parts, Gurdhar and Pangi The scenery is sublime and imposing and nature appears in her wildest and grandest moods The area is sparsely populated Winter in Pangi and Lahul is very severe and snowfall usually begins as early as October and the entire valley remains under deep snow till March or April Communications with the outside world are completely cut off During these months, the people are mostly confined to their houses

The tract between the Hathidhar and the Dhauladhar falls in the Beas valley and with the addition of small portion of the lower Ravi valley forms the Bhattiyat tahsil and Sihunta sub tahsil It is most populous and fertile valley of the district Its vegetations are semi-tropical and the bamboo, pipal and the mango flourish luxuriantly in the course of proximity of the fir, the barberry and the oak Generally two crops are sown in a year

**Hills** - There are three well defined snowy ranges of the Himalayas in Chamba district The one nearest to the plains is called outer Himalaya or Dhauladhar It separates the basin of the Beas from the Ravi It begins on the right bank of the Beas and running north by west forming the boundary between Mandi and Kullu Dhauladhar forms a lofty mountain barrier with peaks from 4 300 metres to 5,200 metres The passes are from 2,400 metres to 4,600 metres The lower slopes are covered with forests of oak and pine The sites are seamed with winter coarses The lofty peaks rise in stern and rugged grandeur covered by wastes of snow. The inner Himalaya or zaskar range separates Chamba Lahul from zaskar and farther west forms the northern boundary of the Kashmir valley The mean altitude of this range is about 5,500 metres and some of the peaks rise to about 6,100 metres The passes are 5,200 metres to 5,500 metres high and are more difficult owing to the size of the permanent glaciers

There is a low range, the Hathidhar which runs parallel to the south of Dhauladhar. The highest point of this range is 1,615 metres above the mean sea level The Dhar is steeper on its southern side On its northern flank it is covered with dense undergrowth forests of chil and dwarf oaks

**River System** - There are two main rivers i e the Ravi and the Chenab or Chanderbhaga in the district

The Ravi is the main river of the district and drains the whole of Chamba valley between Dhauladhar and Pangi ranges In its upper reaches, the river is called Rauti or Irauti It rises in the mid-Himalaya and Bara Bhangal ranges This range separates it from the Beas in the upper Kullu It flows through Bara Bansu, Tretha and Chanota to Ulansa Budhil and Tundah are the two main tributaries After passing Piur, Rakh and Mehla, the river courses to the noth-west and approaches Chamba town where the Saho or Sal from the Saho ranges merges with the river The other largest tributary of the river is Siul and it flows westward and touches Jammu territory at the point where the Seawa stream forming the boundary falls into it from north It then bends to the south-west and skirting the terminal spurs of the Dhauladhar separates Chamba from Jammu and finally leaves the district at Kheri to the plains at Shahpur During winter the Ravi is generally very low and the water is quite clear. During the summer the volume of flow increases with the melting of snow in the upper reaches The maximum flow is reached during rainy season Some fishing is also carried out in the river downwards Chamba town

The Chenab or Chanderbhaga, as it is called in this part of the country, rises near the top of the Bara Lacha Pass in Lahul, by two heads, the Chander and Bhaga These two unite at Tandi and form the Chenab, the river of great size and volume and flows immediately to the north-west of mid-Himalaya At Thirot it enters Chamba and forms the boundary between Chamba and Lahul and follows a westerly course to Tindi after which it turns to the north At Shaor and Purthi there are villages on the right bank The valley again becomes narrow as far as Mindhal and Sach From this point, it is more open The river flows on a north-westerly direction through picturesque scenery, past Kilar and Dharwas to the Ganaur

or Sansari Nala where, it leaves the territory Thence, it continues its course through Padar, Kishtwar and the outer hills in Jammu territory to the plains Gold in small quantity is found in Chanderbhaga and gold washing was carried out at some places on a small scale The main tributaries of the river are Miyar Nala, meeting the Chanderbhaga at Udaipur and Saichu Nala joining the river at Sach On the left bank, the river receives small ice-streams from snowy passes in the Pangi range These are the Chobia and Kalicho streams at Triloknath, Harser, Drati and Marhu streams near Tindi and Cheni and Sach streams near Mindhal and Kilar

There are two better known lakes in the district at Manimahesh in Brahmaur tahsil and at Khajiar in Chamba tahsil Manimahesh is considered sacred and a fair is held there on the occasion of Radha-Ashtmi falling in the month of September and the pilgrims from far and near gather there to have a dip in the icy-cold water of the lake It is situated at an altitude of 4,170 metres

Khajiar lake is located in one of the most picturesque saucer shaped plateau about 1 5 Km long and 1 Km broad surrounded by dense pine forests of gigantic undisturbed and unspoiled deodars This place has a soothing and refreshing quietness in its atmosphere It has a small lake in the middle with small floating islands

**Forests** - At the close of the year 1980-81, the total area under forests was recorded to be 4,921 81 sq Kms According to the Forest Department, of this, 374 09 sq Kms were under reserve forests, 2,407 13 sq Kms under protected forests and the rest 2,140 59 sq Kms under undemarcated forests During this period, the out-turn of major forest products like timber and fuel was 112 65 thousand cubic metres valuing at Rs 43,527 60 thousand The value of minor forest products like herbs, fodder, grass, gum and resin and other products was estimated at Rs 4,328 thousand

These forests lie in the Shivalik of the Himalayas at the height between 1,066 to 3,657 metres above mean sea level The composition and condition of the forests considerably varies with the altitude The forests may broadly be classified into the following categories

(i) Himalayan sub-tropical blue pine forests- These are found at an elevation of 1,066 to 1,524 metres Chil is largely sprung up on grassy slopes Among other trees Pyrus pashia (kainth),Pistacia integerrima (kakreran), Alb zzia stipulate (siris), Olea cuspidata (kao), Querous incana (ban), Grewira oppositifolia (dhamman) and Cedrela toona (toon) are worth mentioning

(ii) Ban Oak forests - These serve as chief source of winter fodder and excellent fuel and remarkable wood for agricultural implements Ban occupies an important position in the agricultural economy of the district These forests are found at an elevation of 1524 to 2,438 metres above mean sea level The main specie is Ban-Oak These forests represent the remain of climax vegetation that has been replaced through the ages, largely as a result of falling, with coniferous forests mainly of Deodar and Kail

(iii) Deodar Forests - This type occurs at the same altitude as ban, oak The main species found in these forests are the Oak, Litsea umbrosa (chirindi), Celtis australis (khark), Cedrela Serrata (dauri), Populus ciliata (chaloon), Carpinus faginea (charkri), Ulmus villosa (maral), Cornus macrophylla (haleau) and other species too numerous to mention

(iv) Western mixed coniferous forests-These forests are found at an elevation of 2,438 to 3,048 metres above mean sea level The spruce and silver fir attain large dimensions and the growing stock per hectare is considerable Deodar is generally seen scattered, singly or in groups along the crests of spurs and ridges Associated with the firs and frequently forming considerable bits of deciduous forests in depressions and nalas are the aesculus indica (goon), bugians regia (khor), acer sp (mandar), Celtis australis (kharak), Prunus padus (jammu), ulmus wallichana (maral), fraxinus floribunda (tunnu) and morus serrata (karun)

(v) Kharsu oak forests - These are mixed coniferous forests of spruce and silver fir are bits of kharsu oak with their characteristic brown

tinged foliage festooned with mosses

(vi) Lower blue pine forests - These forests are represented by the blue pine forests of the dry eastern zone Here kail grows in remarkable pure evenaged formations On eastern and north-eastern slopes the kail extends right upto 3,657 metres elevation, although above 3,048 metres it is generally stunted and deformed

(vii) Moist alpine scrub or grass lands- Extensive tracts of alpine pastures are stretched above the forest limits to the line of perpetual snow Great variety of medicinal herbs and flowers are found in them Dhup (jurinea-Macrocephala), mohri (Aconitum vapellus), patis (Aconitum hetrophyllum), kaur (Pieronhiza kurroon) and kuth (Saussura lappa) are some of the well known valuable plants Banafsha (Viola odorata), bankakru (Podophyllum emodi), mushkbala (Valeriana wallichi) and thuth (Salvia mooreroftiana) are also found in abundance in the deodar and fir zone

To rejuvenate the forest wealth the state Government has adopted three dimensional forest farming. Under the scheme, the forest department supplies saplings @ 10 paise per saplings Initially, these were distributed free of cost to the people but in order to create a sense of proper utilisation of the saplings a nominal charge of 10 paise was fixed The policy of the Government is that of the total forest area, 60 percent of the forest land should be covered under the commercial species like chil, khair, deodar, fur, spruce and the remaining 40 percent of the forest land is to be covered under the species for fodder, fuel wood, poplar and bamboo Further, if the people opt for 4 hectares of land or more for plantation they are given technical guidance and fencing material free of cost In order to check and discourage the destruction of forests, the exploitation of forest wealth has been nationalised and it is being done through the Himachal Pradesh Forest Corporation

**Fauna** - The district is rich in animals and birds many of which are rare

**Animals**

1 Rhesus monkey or common bunder
2 Brown bear (lal bhalu)
3 Himalayan black bear (rinch)
4 Yellow bellied weasel
5 Strip-backed weasel
6 Snow leopard
7 Leopard or panther
8 Leopard cat
9 Common jungle cat
10 Lynx
11 Red lynx or caracal
12 Striped hyaena
13 Common fox or hill fox
14 Common Indian porcupine
15 Indian wild bear
16 Bharal or blue sheep
17 Himalayan ibex
18 Musk deer
19 Ghoral
20 Indian muntjac ( jungli bakeri )
21 Serow
22 Jackal
23 Common otter (ud bilao)
24 Small or classless otter
25 Upland hare
26 Barking deer (kakar)

Among the mammals barking deer (kakar), ghoral and leopard are found in the lower areas in addition to other animals like fox or porcupine At higher elevations black and red bears are common Musk deer are also found

**Birds** - A large number of bird species is found in the district as the altitude, climate and the vegetation exhibit large variations

**(A) Game birds** - Different types pheasants, viz the horned pheasant(locally known as Phulgar) the kolsas and in the most part both the black and the gray 'Khakhrola' are found in this district at different elevations The chakor is found in most parts and both the black and the gray partridges are also quite common Wood partridge is found in deodar and oak forests between altitude of 2,000 metre and 2,500 metres Peacocks and jungle fowls are found

Extracted from District Census Handbook — Chamba of 1961 Census

in the lower hills

**(b) Other birds** - The Himalayan Tree Pie, (2) The Himalayan Nut Cracker, (3) The Indian Grey Tit, (4)Simla Black Tit, (5)Laughing Thrush (6) White throated Laughing Thrush, (7) Rufous Babbler, (8) Spotted Babbler, (9) White necked Bulbul, (10) Dark Grey Bush Chat, (11) Ruby Throat, (12) Spotted Forktail, (13) White Capped Redstart, (14) Plumbeous Redstart, (15) Whistling Thrush, (16) Orange Minivet, (17) Tickellies Willow Warbbler, (18) Goldfinch, (19) Greenfinch (20) Cinnamon Tree-Sparrow, (21) Common Swallow, (22) Blue Beaded Beeater, (23) Trogon, (24) Alpine Swift, (25) Forest Anagle Owl, (26) White Bellied Snow Pigeon, (27) White Crested Kaleej (28) Painted bush Quail, (29) Chukor, (30) Wagtails and (31) Fly-catcher

**Reptiles** - Poisonous snakes are not common except in the part adjacent to Kangra The Cobra is rare but Karait is now uncommon and vipers are also sometimes found Non-poisonous snakes and grass snakes are quite common Rock lizards are found everywhere

**Fish** - The species of fish found in the district are

| | | |
|---|---|---|
| 1 | Barbus (Tor) | Putitora Mahsir |
| 2 | Labeo dero | Gid |
| 3 | Labeo dyocheilus | Kuni |
| 4 | Barilius bedelisis | Patha |

**Climate** - The district is wholly mountainous with altitudes ranging from 600 metres to 6,400 metres above the mean sea level and the climate generally found vary from semi-tropical to semi arctic In lower parts of the Bhattiyat tashil and Sihunta sub-tahsil the climatic conditions are similar to those of Kangra and Shivalik ranges In this zone, the temperature begins to increase rapidly after the middle of April and rises continuousely till the beginning of the monsoon The rainy season is prolonged and heavy while the winters are pleasant and enjoyable In the higher reaches, the climate is temperate In the Ravi valley the climatic conditions vary with the altitudes Arctic conditions prevail along the higher ranges for several months in winter and the passes are blocked with snow in Brahmaur and Pangi tahsils The summer is mild and the winter is severe In the Chanderbhaga valley, the climate is

temperate in summer and semi-arctic in winter The summer is exceedingly mild and pleasant. Owing to the scanty rainfall the degree of humidity is always low The winter is very severe and snowfall starts in October and continues till March and April At the end of the year 1980, there were 11 rain gauge stations in the district at different elevations On the basis of rainfall data in respect of these centres, the district had 188 cm rainfall during 1980 against the figures of 239 7 in 1979 and 288 7 in 1978 The district is having rainy season from the middle of June to the middle of September and has bulk of the rainfall during this season Snow may fall as early as the beginning of October The snowfall on the Dhauladhar, Pangi ranges and Zaskar range is heavy and in severe winter it lasts from the early November to late March

**Geology** - Chamba district covers an area of 6,528 sq Kms in the Shivalik and lesser and central Himalayan region and is typically rugged terrain with moderate to high relief There are two important mountain ranges, the Pir Panjal Range 6,008 metres high) and Dhaul dhar Range 4,5 1 metres high) that traverse the district in a general NW-SE trend The Pir Panjal Range divides water for two major rivers i e the Chenab in the north and the Ravi in the south These rivers with their tributaries control the drainage of the area

The rocks exposed in the district have been classified into certain groups and encompass a period from precambrian (over 600 million years) to recent times These groups are Kalhel, Salooni, Manjir and Chamba-Basantpur, Mandi-Darla volcanies, Murree and Shivalik The rock types are generally sand stone, shale, slate, limestone, conglomerates and quartzites Locally one comes across the in-durated clays of Shivalik group The Kalhel, Salooni and Basantpur groups contain fossil remains of past times The study of these fossils help in differentiating relative ages of the rock types

A huge granite body, named as Dhauladhar range, imparting it a rugged profile In the Pangi valley of Chamba district, apart from Chamba and Basantpur groups, older metamorphics and gneissose which may be over 600 million years old are also exposed

**Agriculture** - Agriculture is the mainstay of the majority of the population in the district Of the total main workers 69 30 percent fall in the category of cultivators/agricultural labourers In the district except cottage industries which cater to the local requirements, there is hardly any industry worth mentioning In addition, the trading activities are also of limited extent as the district is not surplus in respect of the agricultural products The soil is generally loamy in texture with a little more percentage of clay on the high tops as well as on the lower elevations in Bhattiyat and Chamba tahsils At higher elevations, the soil is well supplied with organic matters Its extent is low at mid-elevation and minimum in the low lying valleys Generally, two crops are taken from the land Maize is the main crop of Kharif season and potato and paddy are also sown where the conditions so permit Some area is also cultivated for growing pulses and other minor millets Wheat and barley are the major Rabi crops The period of sowing and harvesting of crops depends upon the elevations In the Pangi valley there are two sowing seasons i e one in October and the other in April when snow melts Both the crops are ready for harvesting at about the same time towards the end of July Millets and coarse cereals like ogla, kangni, china, chilai and bathu constitute important crops of the cold region of Brahmaur and Pangi where maize is not sown during the Kharif

Ever since the implementation of various land programmes, the Government has endeavoured to increase the agricultural production by introducing the improved varieties of seeds, increased use of chemical fertilizers, chemical pesticides, improved implements and extension of irrigational facilities

The wheat seed of SONALIKA and KALYAN introduced by the Agriculture Department of the State Government in the district around 1968-onwards are being replaced by V L 421 The other varieties introduced in the district are SONALIKA-O,S. 308, R R 21 and R D 1553 These varieties are suitable for timely

and late sowing and under irrigated conditions in the valleys, lower and mid-hills as well as dry temperature tract These mature early and are also easy in thrashing V L 421 is newly released high yielding variety which is recommended for cultivation in the low and mid hills to replace the existing KALYAN SONA (K 227), R D 1923 Of the total 43,464 hectares of cultivated area, the area under wheat during 1979-80 was 17,379 hectares

The predominant Kharif crops of the district are maize, paddy and pulses Paddy is grown all over the district and in deep valleys wherever irrigation facilities are available Most popular varieties are CHINA 988, IR 579, NORIN 8 and NORIN 18 Of late, HIMDHAN which has been released in 1978 by the Himadhal Pradesh Agriculture University is being recommended for the higher hills

As already stated, maize is one of the main important crop in the district Apart from local varieties of maize, two improved varieties have been introduced i e early composite and composite 421 which are suitable for high hills

Amongst the vegetables grown during the Kharif season are tomato, peas, potato and cabbage Mostly, these crops are grown to meet the local requirements

In order to meet the improved seed requirements of the cultivators, six seed multiplication farms are functioning at Bhanota, Rajpura, Bhagat, Thullet, Ahla and Dharwas

**Horticulture** - The variations in the climatic and soil conditions in the district present immense possibilities for the development of horticulture Dueto lack of communication facilit es, the cultivation of fi uits was not taken upon a large scale prior to 1955 The district has suitable pockets for the production of hazelnut, chilgoza, apricot, walnut, peach, apple, pear, plum, quince and mango Since late sixties, the district has made considerable progress in the field of horticultural activities The apple orchards are located predominantly in Chaurah, Brahmaur, Chamba and Pangi tahsils and Saluni sub-tahsil where delicious varieties of red, royal and golden etc are mostly found Plum is being grown in Chamba and Brahmaur and besides the local varieties Sentaroza and Maricoza have been introduced by the Horticulture Department Walnuts are grown all over the district and of late commercial varieties of walnut have found favour Chilgoza is mostly found in Pangi area and certain pockets of Brahmaur tahsil Mango is generally found in the lower portion of Bhattiyat tahsil and Sihunta sub-tahsil Besides the local varieties, the Dussehri variety is also being propagated

The lower areas of development blocks of Chamba, Tissa and Salooni are most suitable for propagating the plantation of olive There are three olive development centres in the district and these are at Lanji, Saro and Rajnagar Upto the year 1979-80 as many as 10,000 saplings were planted/grafted

In order to meet the plant requirements of the cultivators, the department is maintaining progeny orchards and nurseries in the district At the end of the year 1980-81, 9 progeny orchards were functioning In addition, the department is also maintaining 5 fruit plant nurseries centres in the district The plant protection centre is located at Chamba with a sub-centre at the block headquarters which provides technical guidance to the orchardists and supplies pesticides Under the component plan, loans and subsidies are provided on the supply of plants, fertilizers and pesticides to the various segments of the population The subsidies are to the extent of 50 percent in the case of Scheduled Castes and Scheduled Tribes and backward areas, 30 percent to the marginal farmers and 25 percent to the small farmers In order to provide a market for the horticultural produce, the Horticulture Department of the State Government have started fruit canning unit in the public sector at Rajpura and another such unit is functioning at Chamba in the cooperative sector The area under fruit production increased from 2,846 hectares in 1978-79 to 3,642 hectares in 1980-81. During the same period,the fruit production increased from 2,062 tonne to 2,432 tonne

**Land, Landuse Pattern and Tenancy** :- Before the introduction of the Himachal Pradesh

Abolition of Big Landed Estates and Land Reforms Act, 1953, there were three types of holdings in the district (i) zamindari, (ii) pattedari and (iii) bhaichara But, with the promulgation of the aforesaid Act, the zamindari has been abolished and the tenants who were the actual cultivators of the land have been conferred the proprietary rights except in the case of minors, widows, disabled and serving personnel Before the introduction of Land Reforms Act, the tenants used to pay different types of rents and used to render services to the landlords as well In order to do away with the uneconomic holdings, the State Government had initiated the consolidation of holdings under the Consolidation of Holdings Act and accordingly bulk of the uneconomic holdings have been done away with According to the agriculture census report 1977, the number and area of operational holdings in the district is given as under

| Size of Holding | Total Holdings | Area in hectares |
|---|---|---|
| 1 | 2 | 3 |
| Below 0 5 hectares | 15,746 | 3,810 |
| 0 5-1 0 hectares | 13,509 | 9,896 |
| 1 0-2 0 hectares | 13,576 | 18,915 |
| 2 0-3 0 hectares | 4,673 | 11,223 |
| 3 0-4 0 hectares | 1,668 | 5,681 |
| 4 0-5 0 hectares | 612 | 2,723 |
| 5 0-7 5 hectares | 398 | 2,371 |
| 7 5-10 0 hectares | 62 | 531 |
| 10 0-20 0 hectares | 30 | 370 |
| 20 0-30 0 hectares | 1 | 21 |
| 30 0-40 0 hectares | 1 | 31 |
| 40 0-50 0 hectares | 1 | 44 |
| 50 0 and above | — | — |

**Animal Husbandry** - Livestock is the main wealth next to agriculture of a large chunk of rural population in the district Every house invariably keeps a few cows or buffalos, sheep, goats, pigs and ponies Animals are kept for milk as well as for work purposes and sheep and goats are reared for meat and wool in addition to providing manure for the fields A large proportion of nomadic population of the district depends mainly on livestock rearing for their livelihood The livestock population increased from 662,465 in 1972 to 709,523 in 1977 thus showing a growth rate of 7 10 percent

The improvement of breed of livestock remains the main concern of the department of Animal Husbandry in the district which, indeed, has taken a considerable stride in this direction At the end of the year 1980-81, there were 17 veterinary hospitals and 47 veterinary dispensaries in the district in addition to the functioning of 6 artificial insemination centres. The veterinary hospitals are located at Chamba, Sahu, Koti, Churi in Chamba tahsil, Tissa, Himgiri in Chaurah tahsil, Kihar in Saluni sub-tahsil, Bathri/ Dalhousie, Chowari in Bhattiyat tahsil and Sihunta in Sihunta sub-tahsil, Kilar and Dharwas in Pangi tahsil, Brahmaur, Holi, Tundah and Gharola in Brahmaur tahsil Of the 47 veterinary dispensaries, 10 have been reported from Chamba tahsil, 7 from Chaurah tahsil, 8 from Saluni sub-tahsil, 11 from Bhattiyat tahsil/Sihunta sub-tahsil, 6 from Pangi tahsil and 5 from Brahmaur tahsil The local breeds of cows are being replaced by cross-breed jersey, and brown Swiss The rearing of jersey cows is finding favour with the people due to high yield of milk and long period of lactation The department is making available the jersey heifers at subsidised rates to the various segments of the population Artificial insemination facilities are made available at veterinary institutions in the district for which the department charges nominal rates Under the special livestock production programme, the cross-breed of jersey and holestin heifers of 4 to 28 months are being supplied to the people at subsidised rates

In order to improve the breed of buffalo in the district, murrah buffalo bulls have been distributed to the various panchayats in the district In addition these bulls have also been distributed among the nomadic gujjars for upgrading their stocks

**Sheep** - Sheep not only provide wool, but also mutton and manure Essential commodities like foodgrains, salt and *gur* are carried on their backs where other means of transport are not possible Most of the sheep in the district especially in Pangi and Brahmaur areas are being reared as migratory flocks Due to ecxessive

snowfall, the breeders move on to lower areas during the winter months To evolve a suitable breed of sheep carrying a higher yield and superior quality of wool, sheep breeding farm was established at Sarol during the 2nd plan period In this farm, research work is being carried on regarding the suitability of various breed of sheep in the district The crossing of local sheep with Rambullet and Spanish Marino rams has been carried out in the farm In addition, the Russian and German sheep have also been tried in the district In order to provide practical training in the sheep rearing and management practices sheep and wool extension centres were started at various places in the district during the various plan programmes These centres have provided necessary training to the breeders in the wool shearing etc Wool analysis laboratory was also functioning at Sarol with a view to ascertain the quality and degree of fineness of wool Various incentives are provided to the people for the purchase of sheep under the Rural Development Agency and Scheduled Castes and Scheduled Tribes Component Plan

**Poultry Farming** - In order to supplement the income of small and marginal farmers various schemes have been formulated for encouraging the poultry farming in the district A beginning was made during the First Five Year Plan by opening one poultry farm at Chamba Two more poultry units at Chowari and Tissa were established during the Second Five Year Plan These poultry units have succesfully introduced the exotic breed of birds in the district In addition to providing birds at subsidised rates, the department is also making available the feed to the breeders and also deputing the breeders for various training programmes in the poultry management

**Dairy Farming** - In order to improve the standard of living, the department is making strenuous efforts in increasing the production of milk in the district With this object in view, milk supply scheme was introduced in the district during December, 1978 At the end of the year 1981, only one chilling plant was functioning in the district The milk is procured through the cooperative milk societies and a nominal commission is being charged from the suppliers

**Fodder** - To ensure adequate supply of fodder, the department is supplying fodder seed to the farmers at no loss no profit basis

**Irrigation** - The hilly terrain of the district presents difficulties in providing adequate irrigation facilities The only source of irrigation available in the district is the kuhls Under the various plan programmes, the State Government has taken up various small irrigation schemes in the district Of the 40,681 hectares of net area sown in the district, only 3,543 hectares were having the irrigation facilities which shows that large tract of the cultivable land depends upon the vagaries of weather

**Fisheries** - The activities of the Fisheries Department broadly cover (i) conservation of raverine fisheries, (ii) enforcement of fisheries legislation, (iii) trout culture in Siul river and (iv) propagation of mirror carp fish

**Industries** - No large or medium scale industry exists in the district From the industrial point of view, the district is most backward Chamba produces shawls and other woollen raffal and cotton fabrics Chamba chappals are pretty famous and are in great demand. Chamba *rumals* are very artistic and are finding a steady demand Attempts are being made to revive this beautiful old craft Among the village industries, mention may be made of weaving, carpentry, blacksmity which are practised since time immemorial to cater to the local needs Spinning and weaving are common among the hill people Nearly, all the agriculturists in the upper hills make woollen cloth for their own use The woollen clothes especially pattis and blankets of Pangi and Brahmaur are in great demand Himachal Pradesh Khadi and Village Industries Board is maintaining a number of spinning centres in the district The Himachal Pradesh Handlooms and Handicrafts Corporation is assisting the handloom weaver artisans by way of providing raw material, marketing facilities and

improved modern designs The corporation is maintaining the following centres in the district

(i) Chamba Footwear, Chamba
(ii) Chamba Textile, Chamba
(iii) Chamba Rumal centre, Chamba
(iv) Wooden Utensils centre, Jagti (Brahmaur)

In addition, the corporation is also making arrangements for the procurement and supply of woollen yarn to the tribal areas of Pangi and Brahmaur and the system of collecting the finished products has also been introduced The district is also having 3 units dealing with manufacture of Dhoop One industrial training institute is functioning at Chamba where training facilities in 12 trades/crafts with a provision of 244 seats exists One carpet weaving centre for Tibetans is also functioning at Dalhousie

The district being industrially backward is enjoying various incentives provided by the State Government as well as by the Central Government These include concessional finances, subsidy on rate of interest, margin money, loan under the State Aid Industries Act, capital subsidy, freight subsidy, under-writing of share capital, provision for providing industrial plots at concessional rates, relief from income tax and sales tax and relief in electricity tariff etc At the end of the year 1980-81, 260 registered units were functioning in the district The Industries Department had advanced loans worth Rs 75,000 to ten loanees during 1979-80

**Power** - Before independence the electricity facilities were confined to Chamba town where the power was supplied by local hydro electric station which was commissioned in 1910 The district is having hydel generating station at Gharola and Brahmaur, in addition to the work on the Baira Siul Power Project In the Ravi basin investigation work on Chamera Hydel Project remained in progress Of the 1,098 inhabited villages in the district, as many as 557 villages or 50 73 percent have been provided with electricity facilities

**Transport** - In the absence of the railways and navigable rivers, the district is entirely dependent upon the road transport system At the end of the year 1980-81, the Himachal Pradesh Road Transport Corporation had a fleet of 53 buses plying on 42 routes In addition, the buses of Punjab Roadways and Jammu & Kashmir Road Transport Corporation continued to ply in the district The plying of private buses was restricted to Pathankot-Dalhousie and Pathankot-Bakloh roads of the district The goods transport is mainly being operated by the private operators The total road length in the district including roads other than national highways as on 31st March, 1981 stood at 2,051 kms The road length per 100 sq kms in the district comes to 31 4 kms During the period under report, the road length of motorable double lane, motorable single lane, jeepable and car and other roads was 71 kms, 852 kms, 119 kms, and 1,009 kms, respectively

**Trade, Commerce & Banking** - There is not much trading and commercial activity in the district except catering to the requirements of the local inhabitants The commodities imported in the district are cloth, foodgrains, utensils, cigarette, kerosene oil, building materials etc The trading centres available in the district are at Chamba, Dalhousie, Chowari, Tissa, Sihunta, Saluni and Brahmaur Most of these imports are being received from Pathankot or Amritsar The articles of export are timber, forest produce, honey, shawls and Chamba chappals In the rural areas, there are small shops atleast one small shop in a slightly bigger village The shopkeepers stock almost all the goods with due regard to the consumers' taste and requirement

1957 saw the opening of a branch of the State Bank of India at Chamba It caters to the needs of the urban areas in the extension of banking facilities A branch of the Himachal Pradesh State Cooperative Bank Ltd was opened on the 16th April, 1965 Initially, it provided credit facilities to the cooperative societies only which further advanced loans to the individual members In the subsequent years, the banking facilities in the district were expanded As on

the 31st March, 1981, there were as many as 24 branches in the district The detailed break-up of which are State Bank of India at Chamba, Mehla, Dalhousie, Bathri, Kakira, Chowari, Sihunta, Banikhet, Surangani and Saluni The Punjab National Bank has its branches at Chamba Dalhousie, Tissa, Brahmaur and Bakloh Central Bank of India, United Commercial Bank and New Bank of India have one branch each In addition, the Himachal Pradesh Cooperative Bank has branches at Chamba, Chowari, Kakira, Sihunta, Saluni and Tissa The State Bank of India is the lead bank of this district with a view to give financial aid to the needy persons for the agricultural, horticultural and industrial development The credit plan envisages a credit outlay of Rs 151 39 lakhs spread over a period of 3 years

**Fairs and Festivals** - The following are some of the important fairs and festivals held and observed in Chamba district

(1) *Minjar Fair* - Of all the fairs of Chamba district, Minjar is the most popular. There are many beliefs about its origin There is a legend that many centuries ago, Ravi was flowing through the Chamba where now Chowgan is situated There is a temple of Champawiti on the right side of the river and that of Hari Rai on the other side A Mahatma who was staying by Champawati temple used to visit Hari Rai temple by swimming the river Raja Sahila Verman and people of Chamba town requested the Mahatma to make some arrangement so that all could visit the sacred temple of Hari Rai The Mahatma asked the people to come to the temple of Champawati and where a Yajna was performed with the help of Brahmins for seven days A cord of seven different colours was prepared and it was given the name of Minjar On completion of the Yajna, the river changed its course According to another legend the fair is held for worship of Varuna-the God of waters

Minjar fair is held in the month of Sravana every year The fair starts on the second sunday of Sravana with the distribution of Minjar During the regime of erstwhile State, Raja used to participate in the fair Till recently a male buffalo used to be pushed into the river In 1955 or so a Minjar flag was introduced by the Municipal Committee It is hoisted by the Deputy Commissioner in the Chowgan on the morning of second sunday indicating the beginning of the fair Minjar is distributed and the tournaments start from that day On the third sunday, there is a large gathering A writer has beautifully expressed "A picturesque panorama accentuated with unusual mirth and gaiety, oozes out during the third week of Sravana"

The people sing seasonal songs of their own area Of all the songs sung during the fair, Kunjari is the most charming Being a very old folk song, it is traditional and has a typical tune

(2) *Sui Fair of Chamba* - Sui fair is as old as the time when Chamba became the capital of the state For the capital there was no proper supply of water Raja Sahila had a water course made from Sarohta stream round the Shah Madar Hill but the water did not enter the channel and it was ascribed to a super natural cause The Brahmins who were consulted pronounced that water would pass if the Rani or her son were sacrificed There is another tradition that the Raja had a dream in which he was directed to offer his son as sacrifice But the Rani insisted to sacrifice her own life A grave was dug near the Balota village and she was buried alive When the grave was filled up water began to flow and has been flowing ever-since The Rani was deified for her sacrifice and is worshipped as 'Sui Mata' The fair is held on the last three days of April every year Last day of the fair is known as Sukrat On the evening of the closing day Sukrat is sung This is a song connected with the fair The fair is colourful and its charm is enhanced by the songs not only at the fair but in all houses

(3) *Mani Mahesh Fair* - Mani Mahesh is situated about 35 kms from Brahmaur. Lord Shiva is believed to reside there Shiva had granted a boon to Brahmni Devi that every pilgrim must worship her before proceeding to Mani

Mahesh The oracles of Keling and Mani Mahesh are consulted as to whether their pilgrimage would be successful and accepted by Shiva Pilgrims collect at Brahmaur and start for the *yatra* They reach Mani Mahesh lake after covering the distance in two stages The pilgrims have to be at the lake on the morning of Radha Ashtami which falls 15 days after Krishna Janam Ashtami in the month of August-September Every devout pilgrim must take a dip in the early hours of the morning which is considered as sacred A dip in the lake is taken only after taking a dip first in the Gauri Kund which is situated about a Km before Mani Mahesh lake. In the past only women used to take a dip in this kund but now all avail of this Besides this two dips in the spring at Hudsar and Dhanchhoh are also essential The pilgrimage to Mani Mahesh is considered as sacred Some of the pilgrims go bare feet The pilgrims go on shouting Mani-Mahesh-ki-Jai People return to Brahmaur on the 5th or 6th day On their way back, people bring two plants growing in the area These are called Ghugi and Banand

(4) *Nag Fair* - This fair is held in Banikhet village in the month of Asadha (June) for two days It is held in honour of Nag Deota whose temple is situated in the village On 22nd, people come and make offerings to the Nag Deota On 23rd, wrestling matches are held

(5) *Khajiar Jatar* - Khajiar village is about 24 kms from Chamba A Jatar is held here on the fourth night of Jaistha (May) and continues uptil the next morning The fair is managed by Temple Committee of Lakshmi Narain temple Chamba The fair starts at 10 P M with the Kirtan of Khasi Nag and continues till 3 A M The people make offerings of ghee, wheat flour, coconuts etc to the Nag

(6) *Salooni Jatar* - This Jatar is held on 1st Jaistha (May) every year at Salooni On this day Nag Deota is worshipped with incense and wheat bread is offered to him A goat or ram is sacrificed After offering the bread to the Nag Deota it is distributed

(7) *Phool Jatar* - This Jatar begins in the month of Asvina (October) each year for four days at Kupha This is the most popular fair of Pangi area Men and women mix freely and there are great rejoicings This Jatar is the last fair of the year and after this the region has heavy snowfall

(8) *Bhanjraru Chhinj* - The fair is held on 14th Asadha (June) at Bhanjraru for a day It is held in the name of Lakhdata His worship is done by the people in their homes The people believe that by worshiping the Lakhdata, cows and buffalo give more milk and ghee Ghee is hoarded in his name Wrestling matches are held and prizes are distributed

(9) *Baar* - This festival is held on the last tuesday of Pausa (January) Kali Maie is worshipped Local dishes are eaten in the evening

(10) *Sheel* - This festival is observed in Pangi on the day of Amavash of Phalguna or Chaitra With this festival starts the spring and fear of snow is vanished The people take ghee and chapatis in the morning In the evening various dishes are prepared and as customary these dishes are taken on the next festival i e Pareed Goddess Lakshmi is worshipped

**Places of Historical and Tourist Interest** - There are many places of historical and tourists interest in the district and a brief description about some of the important places is given below

1 *Mani Mahesh* - It is situated about 35 kms from Brahmaur and is at a height of 4,183 metres at the base of Kailash peak The peak is regarded sacred as Kailash Lord Shiva is believed to reside there Mani Mahesh fair is held here and the lake attracts thousands of pilgrims every year who take most sacred dip at the Mani Mahesh lake

2 *Khajiar* - It is a well known beauty spot with an attractive meadow This village is about 27 kms from Chamba at a height of 2,141 metres There is an old temple of Khasi Nag near the lake from where this p ace has derived its name There is a P W D rest house, a Summer house and a youth hostel

3 *Kalatope* - It is about 13 kms. from Dalhousie on way to Khajiar and at a height of 2,446 metres It is a well known picnic spot and there is a forest rest house. Litterally 'Kalatope' means black cap It is connected by a Jeepable road and the place has derived its name from thick forests

4 *Saluni* - This place is situated in Saluni sub-tahsil and is about 67 kms from Chamba It is at a height of 1,835 metres This is a beauty spot on the top of a ridge opening into Bhandal valley From here one can enjoy a panoramic view of snow covered hills and valleys Salooni Jatar is held here on 1st May every year

5 *Tissa* :- It is the headquarters of Chaurah tahsil and is about 69 kms from Chamba There is a temple of Chamunda Devi in the village The Devi has eight arms and rides on lion, her *vahan* Tissagarh Jatar is held here every year in the month of August-September for four days Bhanjraru, a nearby village has grown into an official colony

6 *Kilar* - It is the headquarters of Pangi tahsil It is about 109 kms from Chamba. Tahsil and Block Development Office is located here

7 *Midhal* - This place is in Pangi tahsil on the left bank of the Chanderbhaga river In this village there is a temple of Chamunda Devi At this place Mindal fair is held every year during the month of August-September The fair is held during the night on Puranmashi

8 *Lama dal lake* :- The lake is situated about 48 kms from Chamba at a height of 3,670 metres It has approach from the nearest rest house at Darkund There is a Shiva temple which attracts pilgrims from Chamba and Kangra

9 *Chamba* :- It was the capital of the princely state and now serves as the headquarters of the district of the same name situated on the right bank of Ravi at a height of 917 metres It is 56 kms from Dalhousie via Banikhet and 51 kms via Khajiar. In the centre of the town there is a vast Chaugan The temples dedicated to Shiva are worth seeing Chandra Gupta, Radha Krishna, Gauri Shankar, Trimukh Linga, Lakshmi Damodar, Bhagwati and Champavati are well known temples of the town and throw light on Chamba's ancient heritage Bhuri Singh Museum of Chamba has an excellent collection of paintings of the Kangra and Basoli schools A big fair 'Minjar fair' is held in the town every year in August when visitors get a chance to enjoy the folk music and dances of the hills

10 *Dalhousie* - Dalhousie remained a very popular hill station till the partition of the country and lies on the outer slopes of the Dhauladhar It comprises of five distinct hills viz Balun, Kathlag, Potreyn, Tehra and Bakrota extending from 1,525 metres to 2,378 metres above sea level Its surroundings, bracing climate and bewitching scenic beauty make Dalhousie an ideal beauty spot The station is having all the modern amenities There are convent school, college, public school, civil and military hospital, churches, temple, gurdwara and Arya Smaj Mandir Dalhousie has a microwave station

11 *Brahmaur* - It is the tahsil headquarter of Brahmaur tahsil and is about 67 kms from Chamba town, at an elevation of 2,141 metres above sea level It is believed to be the capital of the princely state from 6th to 10th century There are temples dedicated to Hari Har (Shiva), Narsinghji, Ganesh, Lakshmna, Keling and Sheetla These temples stand in the Chaurasi area This place is connected by road

**Administrative Changes** - There have been some inter district as well as inter tahsil changes in the district after 1971 Census 118 villages of Pangi tahsil were transferred to Lahul & Spiti district Two new sub-tahsils viz Saluni and Sihunta were created during the decade of 1971-81 Saluni sub-tahsil was carved out of Chaurah tahsil whereas Sihunta sub-tahsil was created from Bhattiyat tahsil Chuari Khas was declared as a Notified Area Committee during the 1981 Census

**District Census Handbook and its Scope** · The District Census Handbook is the innovation of 1951 Census which brought down the census data to the town/village level Until then, census presented data mostly upto the district/tahsil/sub-tahsil/town level only This innovation, perhaps, was prompted by the realisation of the need of data at the grass-root level for data users, both for administrative planning and academic studies

2 The District Census Handbook innovation of 1951 continued undisturbed in 1961 presentation with a few additions to it· However, in 1971 it was further realised that the combination of the census and non-census data in a single publication as was the precedent from 1951 onwards became unwieldy and delayed the timely publication of the census results Therefore, it was felt that the census data should be delinked from the non-census data and the publication should be brought out in two volumes First volume, dealt with the village and town directory and also the village/townwise Primary Census Abstract of the district The second volume dealt with the non-census data and social, economic and cultural tables

3 In 1981 Census there has been a further slight innovation wherein the District Census Handbook consists of only one volume which contains village and town directory in Part-A, and in Part-B, village/townwise Primary Census Abstract of the concerned district

4 The District Census Handbook of 1951 contained, apart from census data, the other general information about the district, like physical, socio-cultural and administrative aspects of the district which included both the census and the non-census data In 1961 the scope of the District Census Handbook was sought to be made more comprehensive by including certain additional items and dividing the entire presentation into four parts First part dealt about the land and the people Second part contained census tables Third part gave information regarding agriculture, medical and health etc Fourth part consisted village/town directory

5 As already stated, the District Census Handbook underwent further innovation in 1971 Census wherein it was split up into two volumes First, dealing with the village and town directory and also town/villagewise Primary Census Abstract of the district Second part dealt with non-census data and other socio-cultural and economic tables

6 In 1981 Census, with a view to avoid delay in bringing out the publications and also to streamline the publication programme the second part of 1971 Census Handbook has been omitted Thus, the present volume of the District Census Handbook will bring about the village/town directory in part A, and in Part B town/villagewise Primary Census Abstract of the concerned district. Part A, village directory, will contain information about the name of the village, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraph, communication, power supply, village market and the distance from the town etc. This part also contains information about socio-cultural aspects like food habits of the people, land use in the village, forests, irrigational resources, cultivable waste and the places of religious, historical and archaeological interest Similarly, the town directory contains seven statements, which would deal with area of the town, number of the households, population and rate of growth of the town during the last eight decades, density of population of the town, sex ratio, status of civic administration, its finances and other socio-educational, cultural and developmental activities and the amenities that might have been undertaken or provided As already stated Part B would contain the town/villagewise Primary Census Abstract which includes information/data about the total area of the village, occupied residential houses, total number of households, population and its sex-wise break-up, so also the break-up of Scheduled Castes and Scheduled Tribes, literacy and the break-up of the population by sex into four broad industrial categories like cultivators, agricultural labourers, household industries and other workers. Apart from the aforesaid data, the Primary Census Abstract will contain data on the marginal workers and non-workers also

7 It would be pertinent to mention here that the sources of information for the town and the village directory have been mainly the revenue agency supplemented by the concerned departments like education, medical, co-operation and the local bodies The information so collected from the various sources have been thoroughly scrutinised so as to ensure its authenticity

**Census Definitions and Concepts** In order to understand the precise import of the meaning of words used in the analysis of data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases used herein

**Urban Area** The census definition of an urban area is given as under

(a) All places with a municipality, corporation, cantonment board or notified areacommittee etc

(b) All other places which satisfy the following criteria

(i) a minimum population of 5,000

(ii) at least 75 percent of male working population engaged in non-agricultural pursuits, and

(iii) a density of population of at least 400 persons per sq km (1,000 persons per sq mile)

In the absence of the any of the aforesaid characteristics the place will be treated as rural

**Urban Agglomeration and Standard Urban Area:** The urban agglomeration represents a continuous urban spread containing a town and its adjacent urban outgrowth or more physically contiguous town together with contiguous urban outgrowth which may actually fall within revenue limits of a village/villages These 'urbanised' villages or outgrowths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread The urban agglomeration represents a spatial urban spread at a given time The Standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages which are expected to get merged with it but also intervening rural areas which are potentially urban This covers all extra municipal outgrowth such as suburb (industrial and residential), railway colonies, civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991

2 Like the urban agglomeration, the standard urban area is also an area unit which extends beyond the main city or town limit-municipal or otherwise However, unlike in the case of urban agglomeration which represents the actual urban spread at a given time the standard urban area is larger area unit which includes not merely urban areas lying in close proximity to all surroundings and intervening rural pockets which are likely to be urbanised by 1991 and those serve the role of constant statistical reporting unit for three censuses viz 1971, 1981 and 1991 irrespective of the change in local administrative boundaries of the area unit within the standard urban area In fact, the agglomeration involving a core town, of population of 50,000 or above are submerged in the standard urban area involving with core town The utility of this concept basically lies in the fact when the limits of existing town change, the standard urban area as such is not expected to undergo any change As a consequence, the data generated by census for standard urban areas becomes more meaningful as it is comparable with different decades

3 The characteristic features of a standard urban area is (i) it should have a core town of a minimum population of 50,000 (ii) contiguous area made of all other urban as well as of rural administrative unit should have close mutual socio-economic linkage with the core town and (iii) probability that the entire area will get urbanised within a period of 2/3 decades

*Village* - In Himachal Pradesh, as elsewhere the smallest rural habitation is the village It generally follows the limits of a revenue village i e recognised by the district administration The revenue village need not necessarily be a single agglomeration of habitation. It may have one or more hamlets But the revenue village has

a definite surveyed boundary and each village is a separate administrative unit with separate village account

1 In Himachal Pradesh following rural units are treated as revenue village or equivalent :

1 Revenue village In the districts of Chamba, Mandi, Bilaspur, Shimla, Kinnaur, Sirmaur and Solan, Una excepting Bangana tahsil and Lahul & Spiti district (in respect of villages transferred from Pangi tahsil)

2 "Tikka" having Kangra and Hamirpur districts a district sub- and Bangana tahsil of Una hadbast number district

3 "Phatti" having Kullu and Lahul & Spiti a distinct sub- districts (except villages hadbast number transferred from Pangi)

*Census House* - A Census House is a building or part of a building having separate entrance from the road or courtyard or staircases etc used or recognised as a separate unit, it may be occupied or vacant It may be used for a residential or non-residential purpose or both

*Household* - A household is a group of persons who commonly live together and would take their meal from the common kitchen unless exigencies of work prevented any of them from doing so There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are Boarding Houses, Messes, Hostels Residential Hostels, Rescue Homes, Jails and Ashrams These are called "Institutional" households There may be one member households, two member households or multi-member households For census purposes, each one of these types is regarded as a 'Household' The important link in finding out whether there is a household or not is a common kitchen

**Scheduled Castes and Scheduled Tribes** - The Scheduled Castes and Scheduled Tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Article 341 and 342 of the Constitution The lists of the Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order, 1950 These lists have been modified or amended or supplemented from time to time On the reorganisation of the States the Scheduled Castes and Scheduled Tribes (Modification) Order came into force from October, 1956. However, the first one affecting the Himachal Pradesh has been, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 The main purpose of this Amendment Act was to remove the area restrictions in respect of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the State, unlike in the 1956 Order where these were notified in relation to different regions of the State registering area restrictions

2 In pursuance of the latest Presidential Order referred above, following castes have been treated as Scheduled Castes throughout the State :

1 Ad Dharmi
2 Badi, Nagalu
3 Balmiki Bhangi, Chuhra, Chura, Chuhre
4 Bandhela
5 Bangali
6. Banjara
7 Bansi
8 Barad
9 Barar, Burar, Berar
10 Batwal
11 Bauria, Bawaria
12 Bazigar
13 Bhanjra, Bhanjre
14 Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasi, Mochi
15 Chanal
16 Chhimbe, Dhobi
17. Dagi
18. Darain
19 Darai, Daryai
20. Daule, Daole
21 Dhaki, Toori

22 Dhanak
23 Dhaogri, Dhuai
24. Dhogri, Dhangri, Siggi
25 Doom, Doomna, Dumna, Dumne, Mahasha
26 Gagra
27. Gandhila, Gandil, Gondola
28. Hali
29. Hesi
30 Jogi
31 Julaha, Julahe, Kabirpanthi, Keer
32 Kamoh, Dagoli
33 Karoack
34 Khatik
35 Kori, Koli
36 Lohar
37 Marija, Marecha
38. Majhabi
39 Megh
40 Nat
41 Od
42 Pasi
43. Perna
44 Phrera, Pherera
45 Rehar, Rechara
46 Sanhai
47 Sanhal
48 Sansi, Bhedkut, Manesh
49 Sansoi
50 Sapela
51 Sarde, Sarera, Sarare, Saryare, Sarehde
52 Sikligar
53 Sipi
54 Sirkiband
55 Teli
56. Thathiar, Thethera

3. Similarly, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 as promulgated undar the the Presidential Order declares the following tribes as the Scheduled Tribes throughout the State

1 Bhot, Bodh
2 Gaddi (excluding the territories specified in sub-section (i) of the Punjab Reorganisation Act, 1966 (31 of 1966), other than the Lahul & Spiti district)
3 Gujjar (excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966)
4 Jad, Lamba, Khampa
5 Kannaura, Kinnara
6 Lahaula
7 Pangwala
8 Swangla

4 Thus, from preceding para, it is clear that the tribes at serial Nos 1, 4, 5, 6, 7 and 8 have been treated as Scheduled Tribes throughout the State of Himachal Pradesh wherever they live, whereas in case of Gaddi and Gujjar the area restrictions still persist as given in the preceding paragraph

*Literate* A person who can both read and write with understanding in any language is to be treated as literate A person who can merely read but cannot write is not a literate It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard Children upto the age of four years have been treated as illiterate irrespective of whether they attend the school or not

*Work* · Work is defined as participation in any economically productive activity Such participation may be physical or mental in nature Work involves not only actual work but also effective supervision and direction of work

*Main Worker* A person who has primarily worked for a major period of the year is a main worker By major part of the year it is intended to find out that the person has worked for 183 days or more or in other words worked for 6 months or more

*Marginal Worker* .- A person who has worked for less than six months or 183 days but worked at least a day during the year before enumeration is considered as marginal worker

*Non-Worker* - A person who has not worked at all during the preceding one year from the date of enumeration is a non-worker

*Cultivator* - A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind or share Cultivation includes supervision or direction of cultivation

*Agricultural Labourer* - A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer He or she has no risk in cultivation but he or she merely works in another person's land for wages An agricultural labourer has no right to lease or control on land on which he/she works

*Household Industry* - It is an industry which involves atleast manufacturing, or processing or servicing, or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the house where the household lives in the urban area The large proportion of the workers in a household industry should consist of members of the household including the head The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act

*Other Workers* - All workers i e those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all Government servants, Municipal employees etc In fact, all those who work in field of economic activities other than cultivation, agricultural labour or household industry are other workers

*Employer* - An employer is a person who has to employ other persons in order to get work performed i e such person is not responsible for his or her personal work but also for giving work to others for carrying out the economic activities

*Employee* - An employee is a person who usually works under some other persons for salary or wages in cash or kind There may be persons who are employed as Managers, Superintendents, Agents etc and in that capacity employ or control other workers on behalf of their own employers, such persons are only employees and not employers

*Single Worker* - A single worker is a person who works by himself/herself He/she is not employed by anyone else and in his/her turn does not employ anybody else This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of producers co-operative which one of the partners or members of said producers co-operative is a single worker

*Family Worker* - A family worker is a member who works without receiving wages in cash or kind, in an industry, business, in a trade or service For example, the working member in a family of Dhobi where they all work and each does not receive wages separately will be family worker There may be family workers in industry, trade Family worker must be related by ties of blood or marriage but such workers can belong to different households Thus, what is important is that such workers must necessarily be related even though they may be living in different households The family workers may or may not be entitled to share and the profit in the work or business carried on either by person or head of the household or the relative

# ANALYSIS OF THE DATA

**Population** Table given below shows the decadal growth of population of Chamba district since 1901 The population increased from 130,244 in 1901 to 311,147 persons in 1981, thus, showing as increase of 138 90 percent during the last 80 years against an increase of 122 93 percent for the State The analysis of table raveals that the district has witnessed a continuous modest increase in population as compared to the State which recorded a decrease in population at 1911 During 1901-1911, the population of the district increased by 6 68 percent The growth rate slightly declined to 4 74 percent during 1921 and 3 48 percent in 1931 At 1941 it increased to 15 81 percent and again slipped to 0 08 percent in 1951 This low increase can partly be attributed to the partition of the country when majority of the Muslim population migrated to Pakistan The population of the district increased by 23 72 percent during 1951-61 and 16 34 percent during 1961-71 The growth rate for 1981 Census comes to 23 86 percent which is the highest since 1901 against 23 71 percent for the State The increase in the State though in conformity with the trend may be attributed to the execution of various projects in the district In terms of population Chamba ranks sixth while in terms of area it occupies the second position in the State

**Decadal variation in Population since 1901**

| Year | Persons | Males | Females | Decade variation | Percentage decade variation |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1901 | 130,244 | 68,432 | 61,812 | — | — |
| 1911 | 138,943 | 73,238 | 65,705 | +8,699 | +6 68 |
| 1921 | 145,526 | 76,891 | 68,635 | +6,583 | +4 74 |
| 1931 | 150,591 | 78 838 | 71,753 | +5,065 | +3 48 |
| 1941 | 174,394 | 93,043 | 81,351 | +23,803 | +15 81 |
| 1951 | 174,537 | 92,143 | 82,394 | +143 | +0 08 |
| 1961 | 215,929 | 115,090 | 100,839 | +41,392 | +23 72 |
| 1971 | 251,203 | 129,130 | 122,073 | +35,274 | +16 34 |
| 1981 | 311,147 | 160 752 | 150,395 | +59,944 | +23 86 |

2 Table given below reveals the number of females per 1,000 males Sex ratio obtaining in the district since 1901 is pretty erratic In 1901, there were 903 females per 1,000 males This number decreased to 897 in 1911 and to 893 in 1921 In 1931 it touched the figure of 910 The sex ratio for 1941 and 1951 stood at 874 and 894 respectively In 1961 the sex ratio was 876 and it increased to 945 in 1971 For 1981 Census the sex ratio for the district comes to 936 against the State average of 973 As compared to the State the district ratio was higher upto 1931 and thereafter it was having lower ratio

**Sex ratio since 1901**

| Year | Females per 1,000 Males |
|---|---|
| 1 | 2 |
| 1901 | 903 |
| 1911 | 897 |
| 1921 | 893 |
| 1931 | 910 |
| 1941 | 874 |
| 1951 | 894 |
| 1961 | 876 |
| 1971 | 945 |
| 1981 | 936 |

TABLE 1

**Population, number of villages and towns, 1981**

| Sl No | Name of Tahsil/ Sub-tahsil | Population | | | | | | | | | No of villages | | No of towns |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | | | Rural | | | Urban | | | Total | Inhabited | |

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 1 | Pangi | 12,256 | 6,401 | 5,855 | 12,256 | 6,401 | 5,855 | — | — | — | 106 | 60 | — |
| 2 | Chaurah | 45,879 | 24,732 | 21,147 | 45,879 | 24,732 | 21,147 | — | — | — | 312 | 179 | — |
| 3 | Saluni | 42,529 | 22,347 | 20,182 | 42,529 | 22,347 | 20,182 | — | — | — | 258 | 202 | — |
| 4 | Chamba | 104,153 | 52,597 | 51,556 | 90,392 | 45,373 | 45,019 | 13,761 | 7,224 | 6,537 | 307 | 242 | 1 |
| 5 | Bhattiyat | 49,744 | 25,162 | 24,582 | 42,211 | 21,188 | 21,023 | 7,533 | 3,974 | 3,559 | 252 | 231 | 4 |
| 6 | Brahmaur | 29,944 | 16,012 | 13,932 | 29 944 | 16,012 | 13,932 | — | — | — | 252 | 104 | — |
| 7 | Sihunta | 25,642 | 13 501 | 13,141 | 26,642 | 13,501 | 13,141 | — | — | — | 93 | 80 | — |
| | Total | 311,147 | 160 752 | 150,395 | 289,853 | 149,554 | 140,299 | 21,294 | 11,198 | 10,096 | 1,580 | 1,098 | 5 |

3 Table 1 deals with tahsilwise population, number of villages and towns in the district as per 1981 Census The district has returned a population of 311,147 (160,752 males and 150,395 females) Of the total population, 289,853 or 93 16 percent have been returned from the rural areas and 21,294 or 6 84 percent from the urban areas The break-up of the rural/urban population in the State being 92 39 percent and 7 61 percent respectively The district has 1,580 villages Of these, 1,098 are inhabited and there are also 5 towns in the district

In terms of population, Chamba tahsil with 104,153 or 33 47 percent of the district population is the biggest Of the total population of the tahsil, 90,392 persons or 86 79 percent have been returned from the rural areas and 13,761 persons or 13 21 percent from the urban areas It has 307 villages of which 242 are inhabited Chamba town is the only urban area in the tahsil

Bhattiyat tahsil having a population of 49,744 is the second biggest in the district It constitutes 15 99 percent of the total population of the district 42,211 persons or 84 86 percent have been returned from the rural areas and 7,533 persons or 15 14 percent from the urban areas The tahsil has 252 revenue villages of which 231 are inhabited and there are 4 towns viz Dalhousie M C, Cantonment Board Dalhousie, Cantonment Board Bakloh and Chuari Khas & Notified Area Committee

Chaurah tahsil shares a proportion of 14 75 percent of the district population As per 1981 Census, the tahsil has a population of 24,732 It has 312 villages of which 179 are inhabited The tahsil is entirely rural

Saluni sub-tahsil has a population of 42,529 or 13 67 percent of the district population returned from 202 inhabited villages

Brahmaur tahsil has a population of 29,944 or 9 62 percent returned from 104 inhabited villages The tahsil has in all 252 villages and is entirely rural

Sihunta sub-tahsil has a population of 26,642 or 8 56 percent of the district population Of the 93 villages in the sub-tahsil, 80 are inhabited

Pangi tahsil in terms of population is at the lowest rung of the ladder and has a population of 12,256 It comprises of 3 94 percent of the district population Out of 106 villages in the tahsil only 60 are inhabited

TABLE 2

**Decadal change in distribution of population**

| Sl No. | Name of Tahsil/ Sub-tahsil | Population | | | | | | Percentage decadal (1971-1981) variation | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | 1971 | | 1981 | | | | | |
| | | | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | Pangi | 9,794 | 9,794 | — | 12,256 | 12,256 | — | +25 14 | +25 14 | — |
| 2 | Chaurah | 35,146 | 35,146 | — | 45,879 | 45,879 | — | +30 54 | +30 54 | — |
| 3 | Saluni | 31,947 | 31,947 | — | 42,529 | 42,529 | — | +33 12 | +33 12 | — |
| 4 | Chamba | 83,102 | 71,288 | 11,814 | 104,153 | 90,392 | 13,761 | +25 33 | +26 80 | +16 48 |
| 5 | Bhattiyat | 42,897 | 35,867 | 7 030 | 49,744 | 42,211 | 7,533 | +15 96 | +17 69 | +7 16 |
| 6 | Brahmaur | 27,067 | 27,067 | — | 29,944 | 29,944 | — | +10 63 | +10.63 | — |
| 7 | Sihunta | 21,250 | 21,250 | — | 26,642 | 26,642 | — | +25 37 | +25 37 | — |
| | Total | 251,203 | 232,359 | 18,844 | 311 147 | 289,853 | 21,294 | +23 86 | +24 74 | +13 00 |

4 Table 2 deals with the decadal change in the distribution of population during 1971-81 During the decade under review, the population of the district increased by 23 86 percent, rural population increased by 24 74 percent whereas the urban population increased by 13 00 parcent The rural population increased from 232,359 in 1971 to 289,853 in 1981 The corresponding figures for the urban areas are 18,844 and 21,294

Tahsilwise, Saluni sub-tahsil has recorded the highest growth rate i e 33 12 percent followed by Chaurah tahsil (30 54 percent) and Sihunta sub-tahsil (25 37 percent) closely followed by Chamba and Pangi tahsils whereas the lowest growth rate of 10 63 percent has been observed in case of Brahmaur tahsil Considering the rural areas separately, the same ranking has been observed In the urban areas Chamba tahsil has returned a growth rate of 16 48 percent whereas in Bhattiyat tahsil the urban population has increased by 7 16 percent

TABLE 3

**Distribution of villages by population ranges**

| Range of population | No of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Less than 200 | 499 | 45 45 |
| 200-499 | 477 | 43 44 |
| 500-,1,999 | 121 | 11 02 |
| 2,000-4,999 | 1 | 0 09 |
| 5,000-9,999 | — | — |
| 10,000+ | — | — |
| Total | 1,098 | 100 00 |

5 Table 3 deals with the distribution of villages according to the range of population In Chamba district, the maximum number of villages i e. 499 or 45 45 percent of the inhabited villages have a population less than 200 persons Another 477 villages constituting 43 44 percent of the total villages fall in the population range of 200-499 persons. Only 121 villages or 11 02 percent have a population ranging between 500-1,999 One village namely SUNGANI of Saluni sub-tahsil has a population of 2,558 and falls in the population range of 2,000-4,999 There is not even a single village in the district which has a population of 5,000 and more The above figures show that the district is studded with smaller size of villages

TABLE 4

**Distribution of villages by density**

| Range of Density (per sq km) | Total No of villages in each density range | Percentage of villages in each density range |
|---|---|---|
| 1 | 2 | 3 |
| 0 10 | 38 | 3,46 |
| 11-20 | 32 | 2 92 |
| 21-50 | 135 | 12 30 |
| 51-100 | 227 | 20 67 |
| 101-200 | 402 | 36 61 |
| 201-300 | 171 | 15 57 |
| 301-500 | 61 | 5 56 |
| 501+ | 32 | 2 91 |
| Not known | — | — |
| Total | 1,098 | 100 00 |

6 Table 4 indicates the distribution of villages by density of population. Of the total 1,098 inhabited villages 402 villages or 36 61 percent fall in the density range of 101-200 persons per sq Km, 227 villages constituting 20 67 percent fall in the density range of 15-100 persons per sq Km and 171 villages or 15 57 percent fall in the density range of 201-300 persons per sq km Another 135 villages or 12 30 percent fall in the density range of 21-50 persons per sq km In other words, 85 15 percent of the total villages fall in the middle ranged density i e 21-300 persons per sq km 61 villages or 5 56 percent fall in the density range of 301-500 persons per sq km while 32 villages each fall in the density range of 11-20 persons per sq km and 501 and above persons per sq km The remaining 38 villages or 3 46 percent of the total inhabited villages fall in the density range of 10 or less than 10 persons per sq km

TABLE 5

**Proportion of Scheduled Castes population to total population in the villages**

| Percentage range of Scheduled Castes population to total population | No of Villages in each range | Percentage of Villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| *Nil | 309 | 28,14 |
| 0-5 | 115 | 10 47 |
| 6-10 | 96 | 8,74 |
| 11-15 | 97 | 8,84 |
| 16-20 | 92 | 8 38 |
| 21-30 | 143 | 13 02 |
| 31-50 | 147 | 13 39 |
| 51-75 | 69 | 6 29 |
| 76 and above | 30 | 2 73 |
| Total - | 1,098 | 100 00 |

*Excludes villages having no Scheduled Castes population

7 Table 5 shows the proportion of Scheduled Castes population to total population in the villages There are 309 villages out of 1,098 inhabited villages in the district which have no Scheduled Castes population at all In terms of percentages, 28 14 percent villages fall in this category 147 villages or 13 39 percent of the total villages in the district have Scheduled Castes population ranging between 31-50 percent of the total population 69 villages comprising 6 29 percent have Scheduled Castes population ranging between 51-75 percent of the total population and there are 30 another villages which have Scheduled Castes population of more than 76 percent and above of the total population 143 villages or 13 02 percent have Scheduled Castes population between 21-30 percent of the total population 115 villages comprising 10 47 percent of the villags in the district have Scheduled Castes population upto 5 percent, while 96 villages constituting 8 74 percent of the total villages have Scheduled Castes population between 6-10 percent to the total population The number of villages in the percentage range of 11-15 and 16-20 comes to 97 and 92 respectively It is evident from the above table that except 309 villages where there is no Scheduled Castes population at all whereas in the rest of the villages of the district the Scheduled Castes population is evenly distributed

TABLE 5 A

**Proportion of Scheduled Castes population to total population during the last 3 Censuses in Himachal Pradesh and Chamba District**

| Year | Himachal Pradesh | | | Chamba District | | |
|---|---|---|---|---|---|---|
| | Total Population | Scheduled Castes Population | Scheduled Castes Population to total population | Total Population | Scheduled Castes Population | Proportion of Scheduled Castes population to total population |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1961 | 2,812,463 | 643,851 | 22 89 | 215,929 | 32,838 | 15 21 |
| 1971 | 3,460,434 | 769,572 | 22 24 | 251,203 | 38,156 | 15 19 |
| 1981 | 4,280,818 | 1,053,958 | 24 62 | 311,147 | 61,408 | 19 74 |

8 Table 5A gives the proportion of Scheduled Castes population to total population during the last three censuses in the state and in Chamba district The percentage of Scheduled Castes population to total population in the state slightly decreased from 22 89 percent in 1961 to 22 24 percent in 1971 and again this percentage increased to 24 62 percent in 1981 Similarly, in Chamba district, the Scheduled Castes constituted 15 21 percent of the total population of the district in 1961 and this percentage slightly decreased to 15 19 percent in 1971 and again the proportion of Scheduled Castes population increased to 19 74 percent in 1981 Census This clearly shows that Scheduled Castes population in the district moved in accordance with the state figures In absolute terms, the Scheduled Castes population of Chamba district increased from 32,838 persons in 1961 to 38,156 persons in 1971 and to 61,408 persons in 1981 During the last three decades, the share of the Scheduled Castes population to the total population remained less as compared to the state figures

TABLE 6

**Proportion of Scheduled Tribes population to total population in the villages**

| Percentage range of Scheduled Tribes populati n to total Popul at on | No of Villages in each range | Percentage of Villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Nil* | 366 | 33 33 |
| 0-5 | 113 | 10 29 |
| 6 15 | 93 | 8 47 |
| 16 25 | 67 | 6 10 |
| 26-35 | 51 | 4 65 |
| 36 50 | 74 | 6 74 |
| 561-75 | 99 | 9 02 |
| 76 and above | 235 | 21 40 |
| Total | 1,098 | 100 00 |

*Excludes villages having no Scl eduled Tribes population

9 Table 6 reveals the proportion of Scheduled Tribes population to the total population in the villages There are 366 villages or 33 33 percent of the inhabited villages of the district which have no Scheduled Tribes population Another 113 villages or 10 29 percent of the total villages have Scheduled Tribes population upto 5 percent of the total population 93 villages or 8 47 percent of the total villages have Scheduled Tribes population ranging between 6-15 percent to the total population 67 villages or 6 10 percent of the total villages have Scheduled Tribes population ranging between 16-25 percent to the total population 51 villages fall in the range of 26 to 35 percent while 74 villages or 6 4 percent of the total inhabited villages have Scheduled Tribes population ranging between 36-50 percent of the total population 99 villages have Scheduled Tribes population falling between 51-75 percent of the total population and the remaining 235 villages or 21 40 percent of the total inhabited villages have Scheduled Tribes population of 76 percent and above to the total population It may, however, be worthwhile to mention that the district has tribal area pockets Brahmaur and Pangi tahsils of the district are entirely tribal areas

TABLE 6 A

**Proportion of Scheduled Tribes population to total population during the last 3 Censuses in Himachal Pradesh and Chamba District**

| | Himachal Pradesh | | | Chamba District | | |
|---|---|---|---|---|---|---|
| Year | Total Population | Scheduled Tribes Population | Proportion of Scheduled Tribes population to total population | Total Population | Scheduled Tribes Population | Proportion of Scheduled Tribes population to total population |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1961 | 2,812 463 | 122,326 | 4 35 | 215,929 | 63,991 | 29 64 |
| 1971 | 3,460,434 | 141,610 | 4 09 | 25 ,203 | 67,852 | 27 01 |
| 1981 | 4,280,818 | 197,263 | 4 61 | 311,147 | 95,726 | 30 77 |

10 Table 6A gives the proportion of Scheduled Tribes population during the last 3 Censuses in the state and in Chamba district The Scheduled Tribes population increased from 122,326 in 1961 to 141,610 in 1971 and 197,263 in 1981 in Himachal Pradesh The percentage of Scheduled Tribes population to total population decreased from 4 35 percent in 1961 to 4 09 percent in 1971 The share of Scheduled Tribes to the total population again increased to 4 61 percent in 1981 In the district, the Scheduled Tribes population increased from 63,991 in 1961 to 67,852 in 1971 and to 95,726 in 1981 In terms of percentages, the share of the Scheduled Tribes population to total population decreased from 29 64 percent in 1961 to 27 01 percent in 1971 and this percentage again increased to 30 77 percent in 1981 From the above figures, it is evident that the percentage share of Scheduled Tribes population to total population both in the state and in the district maintained the indentical trend The higher percentage of Scheduled Tribes population in the district as compared to the state is mainly due to the fact that Brahmaur and Pangi tahsils of the district are entirely tribal areas In addition to the fact that the tribal population of the other parts of the state have also settled in the district either due to government jobes or commercial activity

TABLE 7

**Proportion of Scheduled Castes/Scheduled Tribes population in towns**

| Name of the Town | Total Population | Total Scheduled Castes Population | Total Scheduled Tribes Population | Percentage of Scheduled Castes Population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 Bakloh (C B ) | 1,664 | 261 | 1 | 15 69 | 0 06 |
| 2 Chamba (M C ) | 13 761 | 2 896 | 453 | 21 04 | 3 29 |
| 3 Chuari Khas (N A C) | 1 680 | 339 | 131 | 20 18 | 7 80 |
| DALHOUSIE URBAN AGGLOMERATION | 4,189 | 556 | 15 | 13 27 | 0 36 |
| (i) Dalhousie (M C ) | 2,936 | 393 | 15 | 13 56 | 0 51 |
| (i) Dalhousie (C B ) | 1,253 | 158 | — | 12 61 | — |
| All Towns | 21,294 | 4,052 | 600 | 19 03 | 2 82 |

Note Dalhousie a id Dalhousie cantonment are the two constituent units of Dalhousie urban Agglomeration

11 Table 7 deals with the proportion of Scheduled Castes/Scheduled Tribes population in the towns of the district Of the 21,294 urban populotion of the district, 4,052 or 19 03 percent of the total population belong to the Scheduled Castes and 600 persons or 2 82 percent of the total urban population to Scheduled Tribes Townwise, Chamba Municipal Committee has Scheduled Castes population of 2,896 persons out of the total population of 13,761 persons which constitute 21 04 percent of the total population of the town whereas 453 persons belonging to the Scheduled Tribes constitue 3 29 percent to the total population Chuari Khas Notified Area Committee has Scheduled Castes population of 339 persons and 131 persons belonging to the Scheduled Tribes In terms of percentages, the Scheduled Castes constitute a proportion of 20 18 percent and Scheduled Tribes 7 80 percent of the total population of 1,680 persons In Dalhousie urb in agglomeration out of the total population of 4 189,556 persons belong to Scheduled Castes and 15 to Scheduled Tribes In terms of percentages, the Scheduled Castes constitute a proportion of 13 27 percent and Scheduled Tribes 0 36 percent of the total population It may, however, be mentioned that no Scheduled Tribes population has been returned from Dalhousie Cantonment Board Bakloh town has a total population of 1,664 persons of which 261 persons or 15 69 percent belong to Scheduled Castes and there is only one person belonging to the Scheduled Tribe

TABLE 8

**Literacy rate by population ranges of villages**

| Range of population | No of Villages in each range | Literacy rate |
|---|---|---|
| 1 | 2 | 3 |
| Less than 200 | 499 | 19 68 |
| 200 499 | 477 | 21 22 |
| 500-1,999 | 121 | 29 70 |
| 2,000 4 999 | 1 | 57 08 |
| 5,000-9,999 | — | — |
| 10,000+ | — | — |
| Total | 1,098 | 23 67 |

12 Table 8 shows the literacy rate by population ranges of the villages Literacy plays an important role in the social and economic development of the region The rural literacy rate for the district as a whole as per 1981 Census comes to 23 67 percent as against the state figure of 40 42 percent and it stands at the bottom end amongst the districts of the state Of the 1,098 inhabited villages, 499 villages with population of less than 200 have literacy rate of 19 68 percent In 477 villages or 43 44 percent of the total villages with the population range of 200-499 have literacy rate of 21 22 percent 121 villages or 11 02 percent of the total villages each having population of 500-1,999 persons have literacy rate of 29 70 percent One village falling in the population range of 2,000-4,999 has literacy rate of 57 08 percent which is the highest among the villages of the district The literacy trend indicates that higher the size of the villages with regard to population higher is the percentage of literacy This is perhaps due to the fact that educational facilities are available more in these villages

TABLE 8 A

**Proportion of literates to total population by Sex since 1961**

| Year | Literates | | | Proportion of litera es | | |
|---|---|---|---|---|---|---|
| | Total | Males | Females | Total | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1961 | 26 921 | 22,313 | 4,608 | 12 47 | 19 39 | 4 57 |
| 1971 | 47,488 | 36 300 | 11,188 | 18 90 | 28 11 | 9 17 |
| 1981 | 82,310 | 61,872 | 20,438 | 26 45 | 38 49 | 13 59 |

13 Table 8A shows the sex-wise literacy rate since 1961 in the district The literacy rate which was barely 12 47 percent in 1961 increased to 18 90 percent in 1971 and to 26 45 percent in 1981 The literacy rate obtaining in the district in all the three censuses was much lower as compared to the state figures Sex-wise the literacy rate among the males which was 19 39 percent in 1961 increased to 28 11 percent in 1971 It again increased to 38 49 percent in 1981 Among the females, the literacy rate was only 4 57 percent in 1961 It steadily increased to 9 17 percent in 1971 and 13 59 percent in 1981 against the state figure of 31 46 percent This shows that the district has still to achieve much in the field of literacy as compared to the other districts of the state

TABLE 9

**Literacy rate for towns**

| Name of Town | Literacy rate |
|---|---|
| 1 | 2 |
| 1 Bakloh (C B) | 59 80 |
| 2 Chamba (M C) | 67 55 |
| 3 Chauri Khas (N A C) | 54 40 |
| *DALHOUSIE URBAN AGGLOMERATION (U A) | 59 58 |
| (i) Dalhousie (M C) | 60 52 |
| (ii) Dalhousie Cantonment (C B) | 57 38 |
| All Towns | 64 34 |

Note Dalhousie and Dalhousie Cantonment are the two Constituent units of Dalhousie Urban Agglomeration

14 Table 9 reveals the literacy rate of the population of the district living in the towns All the five towns put together, the literacy percentage among the 21,294 urbanites comes to 64 34 percent Among the districts of the state, it ranks seventh Chamba Municipal Committee has the highest literacy rate amongst all the towns of the district with 67 55 percent literates Dalhousie Municipal Committee comes next with literacy rate of 60 52 percent while Bakloh Cantonment Board has returned literacy of 59 80 percent. Chuari Khas Notified Area Committee has returned the lowest literacy rate of 54 40 percent in the urban areas of the district Next above to it is Dalhousie Cantonment Board which has literacy rate of 57 38 percent.

15 Table 10 shows the percentage of Scheduled Castes, Scheduled Tribes, literates, main workers, marginal workers, total workers and non-workers to the total population in the district and tahsils separately for the rural and urban areas

Scheduled Castes Constitute 19 74 percent of the total population in the district as a whole This percentage for the rural areas comes to 19 79 percent and for urban areas 19 03 percent The corresponding figures for the state are 24 52 percent, and 25 22 percent and 17 34 percent This shows that there is a less concentration of Scheduled Castes in the district as compared to the state as a whole This is partly due to the fact that Pangi and Brahmaur tahsils are the tribal belts where the people have returned themselves as Scheduled Tribes

Tahsilwise, in Saluni sub-tahsil which is entirely rural the Scheduled Castes constitute a proportion of 24 36 percent of the total population followed by Chaurah tahsil (24 34 percent) and Chamba tahsil (23 03 percent rural being 23 33 percent and urban 21 04 percent) The Scheduled Castes constitute a proportion of 14 91 percent in Sihunta sub-tahsil while the lowest proportion of 7 50 percent to the total population has been observed in respect of Pangi tahsil

Scheduled Tribes constitute a proportion of 30 77 percent in the district as a whole-rural being 32 82 percent and urban 2 82 percent The corresponding figures for the state as a whole are 4 61 percent-rural being 4 91 percent and urban 0 96 percent

In Pangi tahsil 87 89 percent of the total population belong to Scheduled Tribes followed by Brahmaur tahsil where this category of population constitute 82 28 percent of the total population The other tahsil having the higher proportion than the district average is Sihunta (35 11 percent) In Saluni sub-tahsil, the Scheduled Tribes comprise 9 17 percent of the total population The second lowest is Chaurah tahsil with a percentage of 11 00 percent

The total literacy as already stated in the earlier paragraphs in the district is 26 45 percent, rural literacy being 23 67 percent and urban 64 34 percent The corresponding figures for the state are 42 48 percent, 40 42 percent and 67 44 percent The district ranks lowest in the state so for the literacy rate is concerned This can partly be due to the location of the district in the northern tip of the state and difficult approach to Pangi and Brahmaur tahsils of the district which are entirely tribal The total male literacy in the district and the percentage of rural/urban break-up are 38 49 percent, 36 03 percent and 70 62 percent respectively The females literacy and the percentage of rural/urban break-up are 13 59 percent, 10 44 percent and 57 37 percent respectively

Tahsilwise, Sihunta sub-tahsil has returned literacy rate of 32 58 percent The male literates constitute 44 40 percent of the total male population while females constitute 20 42 percent

Bhattiyat tahsil is the second highest in the district with regard to literacy rate It has literacy rate of 32 39 percent, rural being 27 73 percent and urban 58 48 percent Of the total males in the tahsil 45 14 percent have been returned has literates, the rural and urban break-up being 41 55 percent and 64 32 percent respectively The female literacy rate in the tahsil comes to 19 34 percent rural being 13 81 percent and urban 51 95 percent

In Chamba tahsil 29 21 percent of the total population have been returned as literates, the rural/urban break-up being 23 37 percent and 67 55 percent respectively Among the males 41 19 percent have been classified as literates The literacy rate among the males in the rural areas comes to 35 95 percent while in the urban areas it is 74 09 percent The females literacy is 16 99 percent, the rural/urban break-up being 10 70 percent and 60 32 percent respectively

In Saluni sub-tahsil 23 72 percent of the total population have been returned as literates The

literacy rate among males being 37 59 percent and only 8 35 percent of the female population of the tahsil is literate

In Brahmaur tahsil, the total literacy percentage comes to 22 50 percent, male literacy being 34 21 percent and females 9 03 percent

In Pangi tahsil the total literacy rate being 19 58 percent 32 10 percent of the males and 5 81 percent of the females population are literates

Chaurah tahsil has the lowest literacy percentage of 17 16 percent, males literacy being 27 96 percent and females 4 54 percent

Of the total population of 311,147 of the district, 109,279 persons or 35 12 percent fall under the category of main workers The rural/urban break-up being 35 38 percent and 31 48 percent respectively Among the males, 88,769 are main workers (83,104 rural and 5,665 urban) In terms of percentages, 55 22 percent in total, 55 57 percent in the rural areas and 50 59 percent of the urban male population fall under the category of main workers As many as 20,500 females in the district have been classified under main workers Of this, 19,462 are from rural areas and the remaining 1,038 from urban areas In terms of percentages of the total female population, 13 63 percent in the district, 13 87 percent in the rural areas and 10 28 percent in the urban areas are main workers

Tahsilwise, in Pangi tahsil the total main workers are 52 49 percent of the total population The male main workers being 57 57 and the female main workers 46 94 percent In terms of percentages, Pangi tahsil has the maximum percentage of main workers to the total population in the district

Chaurah tahsil has 46 72 percent main workers, the male/female main workers break-up being 63 53 percent and 27 05 percent respectively In terms of percentages of main workers to the total population, it occupies the second position in the district

In Saluni sub-tahsil, the total main workers are 38 32 percent of the total population The male main workers being 57 81 percent and female main workers 16 75 percent

In Brahmaur tahsil, the total main workers are 34 39 percent of the total population, the male main workers being 56 10 percent and females 9 43 percent

In Bhattiyat tahsil, the total main workers are 30 59 percent, male main workers being 52 72 percent and females 7 94 percent In the rural areas the total main workers being 30 09 percent The male main workers are 52 58 percent and females 7 44 percent In the urban areas of the tahsil 33 38 percent of the total population are main workers, the male main workers being 53 50 percent and female main workers 10 93 percent

In Chamba tahsil, the total main workers are 30 56 percent of the total population and rural/urban break-up being 30 58 percent and 30 43 percent respectively The male main workers being 52 21 percent in the tahsil as a whole 52 72 percent in the rural areas and 48 99 percent in the urban areas The female main workers constitute 8 48 percent of the total female population in the tahsil The rural/urban break-up being 8 26 percent and 9 93 percent respectively

Sihunta sub-tahsil is at the tail end in the district with regard to the percentage of main workers to total population The total main workers are 29 14 percent, male main workers being 49 97 percent and female main workers 7 74 percent

The above figures clearly show that the female participation in the economic activities is far less as compared to the males in all the tahsils of the district except Pangi tahsil Even in the case of males the participation rate is less than 50 percent in most of the tahsils This clearly indicates that either the population is too young or too old In addition some of the people might not be having work during the major part of the

year This has got a direct bearing on the modest standard of living in the district

In Chamba district 13 60 percent of the total population falls under the category of marginal workers The rural/urban break-up being 14 52 percent and 1 12 percent respectively Among the males 3 87 percent of the total male population are marginal workers The rural/urban break-up being 4 12 percent and 0 50 percent respectively The female marginal workers constitute a proportion of 24 00 percent to the total female population The rural/urban break-up being 25 60 percent and 1 80 percent respectively The district has higher percentage of marginal workers to the total population as compared to the state figure where 8 01 percent of the total population fall under the category of marginal workers The males/females break-up being 3 02 percent and 13 14 percent respectively

Tahsilwise, Chamba tahsil has returned the highest percentage of marginal workers to the total population In the tahsil as a whole 15 62 percent of the total population has been classified as marginal workers, the rural/urban break-up being 17 92 percent and 0 54 percent respectively The marginal workers constitute 4.85 percent to the total population (5 56 percent in the rural areas and 0 41 percent in the urban areas) 26 61 percent of females in the tahsil fall under the category of marginal workers, the rural/urban break-up being 30 38 percent and 0 67 percent respectively These figures clearly show that there is more concentration of marginal workers among the females as compared to the males In addition, the marginal workers are more conspicuous in the rural areas as compared to the urban These are mainly due to the fact that females in addition to attending to the domestic chores also engage themselves in the agricultural operations Moreover, in the urban areas, there is a tendency to have wholetime job rather than the partial employment

In Brahmaur tahsil, 14 95 percent of the total population fall under the category of marginal workers The male marginal workers being 2 76 percent and females 28 97 percent

In Bhattiyat tahsil the marginal workers constitute 13 28 percent of the total population The rural/urban break-up being 15 26 percent and 2 18 percent respectively The male marginal workers being 2 50 percent The rural/urban break-up being 2 84 percent and 0 65 percent respectively The females marginal workers constitute 24 32 percent of the female population The rural/urban break-up being 27 77 percent and 3 88 percent respectively

In Saluni sub-tahsil marginal workers constitute 11 79 percent of the tahsil population The males marginal workers being 4 52 percent and females 19 84 percent

In Chaurah tahsil the marginal workers are 13 81 percent of the total population The males marginal workers being 3 32 percent and females 26 08 percent

In Sihunta sub-tahsil, the total marginal workers are 10 73 percent of the total tahsil population The males marginal workers are 4 04 percent and females 17 61 percent

Pangi tahsil has the lowest percentage of marginal workers In the tahsil 6 12 percent of the total tahsil population constitute the marginal workers The males marginal workers being 3 39 percent and females 9 10 percent

The above figures reveal that female marginal workers are much higher in percentage than male marginal workers and the percentage of urban marginal workers are much lower as compared to the rural marginal workers. This is apparently because the female population in the district apart from attending to the domestic chore assist the family either in agriculture operations or in other non-agricultural pursuits Hence, mostly they are part-time workers In urban areas, the people have a wholetime work primarily due to the concentration of various offices as well as commercial activities which provide wholetime work

In Chamba district, 48 72 perceut of the population constitute the total workers The rural/urban break-up being 49 90 percent and 32 60 percent respectively Among the males 59 09 percent in the district, 59.69 percent in the rural areas and 51 09 percent in the urban areas fall under the category of workers Among females 37 63 percent constitute the workers The rural/urban break-up being 39 47 percent and 12 08 percent respectively Chaurah tahsil has the highest percentage of workers to total population in the district Of the total population 60 53 percent constitute the workers The male workers being 66 85 percent and females 53 13 percent

Tahsilwise, Pangi tahsil is the second highest with regard to the proportion of workers to total population In this tahsil 58 61 percent of the total population fall under the category of workers The male workers being 60 96 percent and females 56 04 percent

Salunī sub-tahsil has 50 11 percent of the total population as workers The male workers being 62 33 percent and females 36 59 percent

In Brahmaur tahsil the workers constitute 49 34 percent of the total population, the male being 58 86 percent and females 38 40 percent

In Chamba tahsil 46 18 percent of the total population fall under the category of workers The rural/urban break-up being 48 50 percent and 30 97 percent respectively The male main workers being 57 06 percent in the tahsil, 58 28 percent in the rural areas and 49 40 percent in the urban areas The female workers constitute 35 09 percent of the tahsil popoulation The rural/urban break-up being 38 64 percent and 10 60 percent respectively

In Bhattiyat tahsil 43 87 percent of the total population fall under the category of workers The rural/urban break-up being 45 35 percent and 35 56 percent respectively The male main workers being 55 22 percent and females 32 26 percent In the rural areas the male and female workers constitute 55 42 percent and 35 21 percent of the respective population

Sihunta sub-tahsil is at the lowest rung of ladder in the district with regard to the percentage of workers to total poulation The workers constitute 39 87 percent of the total population The male workers being 54 01 percent and female workers 25 35 percent

The district has a non-working population of 51 28 percent In the rural areas about half of the population (50 10 percent) and in the urban areas about 2/3rd of the population (67 40 percent) falls under the category of non-workers The male non workers constitute a proportion of 40 91 percent The proportion of non-workers among the females is higher as compared to the males both in the rural as well as in the urban areas 62 37 percent of the female population falls under this category. The female non-workers constitute 60 53 percent of the total population in the rural areas and 87 92 percent in the urban areas.

Tahsilwise, Sihunta sub-tahsil is at the top where 60 13 percent of the total population constitute the non-workers The male non-workers being 45 99 percent and females 74 65 percent

Bhattiyat tahsil ranks second in the district The non-workers constitute 56 13 percent of the total tahsil population The rural/urban break-up being 54 65 percent and 64 44 percent respectively The male non-workers being 44 78 percent This percentage is 44 58 percent in rural areas and 45 85 percent in the urban areas The female non-workers constitute 67 74 percent of the total female population The rural/urban break-up being 64 79 percent and 85 19 percent respectively

In Chamba tahsil the non-workers constitute 53 82 percent The rural/urban break-up being 51 50 percent and 69 03 percent respectively The male non-workers being 42 94 percent and females 64 91 percent In the rural areas 41 72 percent of the males and 61 36 percent of the females are non-workers while in the urban areas these

figures are 50 60 percent and 89 40 percent respectively

In Brahmaur tahsil, the non-workers constitute 50 66 percent of the total population The male non-workers being 41 14 percent and females 61 60 percent

Sa'uni sub-tahsil has a non-working population of 49 89 percent The male non-working population being 37 67 percent and females 63 41 percent

In Pangi tahsil, 41 39 percent of the total population falls under the category of non-workers The male non-working population constitutes 39 04 percent and females 43 96 percent

Chaurah tahsil has non-working population of 39 47 percent The male non-working population being 33 15 percent and females 46 87 percent

The figures in the above table reveal that in all the tahsils of the district an overwhelming percentage of population falls under the category of non-workers This may be partly due to the fact that because of opening of more educational institutions due to which large number of persons join the economic activities at a later stage Secondly, it can be due to non-availability of productive work Thirdly, due to certain social customs both in case of males and females and more particularly female population where society does not approve their participation in certain activities which otherwise would have been a productive work The female non-working population is much higher in the urban areas as compared to the rural areas This is mainly due to the fact that in rural areas The women folks in addition to their domestic work assist their men folks in agricultural operations whereas in urban areas particularly women folks do not get work to supplement household income and thus wholly spend their time to the domestic chores only and partly the urban society does not approve of their doing work in certain spheres of activities

16 Tables 11 and 12 deal with the distribution of villages and the population covered according to different amenities available

TABLE 11

**Distribution of Villages according to the availability of different amenities**

| Sl No | Name of Tahsil/ Sub-Tahsil | No of inhabited Villages | No (with percentage) of Villages having one or more of the following amenities | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Education | Medical | Drinking Water | Post and Telegraph | Market/ Hat | Communi-cation | Approach by Pucca Road | Power Supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | Pangi | 60 | 36(60 00) | 6(10 00) | 60(100 00) | 9(15 00) | — | — | | |
| 2 | Chaurah | 179 | 77(43 02) | 11(6 15) | 179(100 00) | 32(17 88) | — | 23(12 85) | — | 66(36 87) |
| 3 | Saluni | 202 | 84(41 58) | 16(7 92) | 202(100 00) | 32(15 84) | — | 34(16 83) | 7(3 47) | 120(59 41) |
| 4 | Chamba | 242 | 175(72 31) | 31(12 81) | 242(100 00) | 54(22 31) | — | 57(23 55) | 41(16 94) | 143(59 09) |
| 5 | Bhattiyat | 231 | 89(38 53) | 8(3 46) | 231(100 00) | 22(9 52) | — | 55(23 81) | 41(17 75) | 167(72 29) |
| 6 | Brahmaur | 104 | 73(70 19) | 31(29 81) | 104(100 00) | 22(21 15) | — | 8(7 69) | — | 30(28 85) |
| 7 | Sihunta | 80 | 45(56 25) | 7(8 75) | 80(100 00) | 15(18 75) | — | 19(23 75) | 7(8 75) | 31(38 75) |
| | Total | 1,098 | 579(52 73) | 110(10 02) | 1,098(100 00) | 186(16 94) | — | 196(17 85) | 96(8 74) | 557(50 73) |

In Chamba district out of 1,098 inhabited villages, 579 villages or 52 73 percent covering a population of 202,015 or 69 70 percent have educational institutions of one type or the other in the village itself 110 villages (10 02 percent) covering a population of 51,163 (17 65 percent) have medical institutions of one type or the other in the village itself All the 1,098 villages are covered under the drinking water supply schemes 186 villages (16 94 percent) covering a population of 78,630 or 27 13 percent of the total population have post and telegraph facilities 196 villages (17 85 percent) covering a population of 73,848 or 25 48 pereent have the communication facilities 96 villages (8 74 percent) covering a population of 38,251 or 13 20 percent of the total population have approach by pucca road 557 villages or 50 73 percent of the total inhabited villages in the district covering a population of 177,816 or 61 35 percent of the total population have the facilities of power and electricity

TABLE 12

**Proportion of Rural Population served by different amenities**

| Sl No | Name of Tahsil/ Sub-Tahsil | Total Population of inhabited Village in the Tahsil/ Sub-Tahsil | Proportion of Rural population served by the amenity of | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Education | Medical | Drinking water | Post and Telegraph | Market Hat | Communi-cation | Approch by Pucca Road | Power Supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | Pangi | 12,256 | 8,678(70 81) | 1,974(16 11) | 12,256(100 00 | 2,994(24 43 | — | — | — | — |
| 2 | Chaurah | 45,879 | 25,511(55 60) | 5,297(11 55) | 45,879(100 00 | 11,880(25 89) | — | 9,667(21 07) | — | 21,415(46 68) |
| 3 | Saluni | 42,529 | 24,446(57 48) | 7,223(16 98) | 42,529(100 00) | 12,521(29 44) | — | 11,757(27 64) | 4,647(10 93) | 29,466(69 28) |
| 4 | Chamba | 96,392 | 75,439(83 46) | 16,519(18 27) | 90,392(100 00) | 26,973(29 84) | — | 26,091(28 86) | 18,705(20 69) | 62,688(69 35) |
| 5 | Bhattiyat | 42,211 | 23,155(54 86) | 3,529(8 36) | 42,211(100 00) | 8,167(19 35) | — | 13,192(31 25) | 10,053(23 82) | 33,135(78 50) |
| 6 | Brahmaur | 29,944 | 26,078(87 09) | 12,055(40 26) | 29,944(100 00) | 8,669(28 62) | — | 3 764(12 57) | — | 13,878(46 35) |
| 7 | Sihunta | 26,642 | 18,708(70 22) | 4,566(17 14) | 26,642(100 00) | 7 526(28 25) | — | 9,377(35 20) | 4,846(18 19) | 17,234(64 69) |
| | Total | 289,853 | 202,015(69,70) | 51,163(17 65) | 289,853(100 00) | 78,630(27 13) | — | 73,848(25 48) | 38,251(13,20) | 177,816(61 35) |

Table 12, Tahsilwise,- of the 60 inhabited villages in Pangi tahsil, 36 villages covering a population of 8 678 or 70 81 percent have educational institutions of one type or the other 6 villages covering a population of 1,974 or 16 11 percent have the medical facilities All the 60 villages are covered under the drinking water supply scheme 9 villages covering a population of 2,994 (24 43 percent) have the post and telegraph facilities None of the village in the tahsil has bus facility, linked with pucca road and power and electricity facilities

Out of 179 villages in Chaurah tahsil 77 villages (43 02 percent) covering a population of 25,511 (55 60 percent) to have the aducational facilities 11 villages covering a population of 5,297 (11 55) percent have the medical facilities All the villages are covered under the drinking water supply scheme 32 villages (17 88 percent) covering a population of 11,880 (25 89 percent) have the post and telegraph facilities 23 villages covering a population of 9,667 (21 07 percent) have the communication facilities and 66 villages covering a population of 21,415 (46 68 percent) have been electrified None of the village in the tahsil has been linked by pucca road

Out of 202 inhabited villages in Saluni sub-tahsil, 84 villages covering a population of 24,446 (57 48 percent) have educational institutions of one type or the other 16 villages covering a population of 7,223 (16 98 percent) have the medical facilities and all the 202 villages are covered under the drinking water supply scheme Post and telegraph facilities are available in 32 villages covering a population of 12,521 or 29 44 percent 34 villages covering a population of 11,757 have the communication facilities and 7 villages having a population of 4,647 are linked with pucca road 120 villages covering a population of 29,466 (69 28 percent) have got power/ electricity facilities

In Chamba tahsil 175 villages or 72 31 percent of the total inhabited villages covering a population of 75,439 (83 46 percent) have the educational facilities of one type or the other in the village 31 villages with a population of 16,519 or 18 27 percent of the total tahsil population have the medical facilities All the villages are covered under the drinking water supply scheme Post and telegraph facilities are available in 54 villages covering a population of 26,973 (29 84 percent) 57 villages covering 23 55 percent of the total villages and having a population of 26,091 (28 86 percent) have the communication facilities 141 villages with a population of 18,705 (20 69 percent) have been linked with pucca road 143 villages covering 59 09 percent of the total villages and with a population of 62,683 have the facilities of power and electricity

In Bhattiyat tahsil out of 231 villages, 89 villages or 38 53 percent of the total villages with a population of 23,155 or 54 86 percent of the total rural population have the educational facilities in the village itself Medical institutions of one type or the other are available in 8 villages or 3 46 percent of the total villages covering a population of 3,529 (8 36 percent) All the villages are covered under the drinking water supply scheme Post and telegraph facilities are available in 22 villages with a population of 8,167 55 villages comprising of 23 81 percent of the total villages covering a population of 13,192 or 31 25 percent of the rural population have the communication facilities 41 villages or 17 75 percent of the total villages with a population of 10,053 comprising 23 82 percent of the rural population have been linked with pucca road 167 villages or 72 29 percent of the total villages with a population of 33,135 (78.50 percent, have electricity facility in the villages

In Brahmaur tahsil out of 104 villages, 73 villages constituting 70 19 percent of the total number of villages in the tahsil covering a population of 26,078 (87 09 percent) have been covered under the educational facilities of one type or the other 31 villages or 29 81 percent of the total villages covering a population of 12,055 comprising 40 26 percent of the total population have got medical facilities of one type or the other All the villages have the drinking water facilities 22 villages or 21 15 percent of the total villages with a population of 8,569 (28 62 percent) have post and telegraph facilities 8 villages or 7 69 percent of the total villages covering a population of 3,764 (12 57 percent) have got communication facilities None of the village has the approach by pucca road 30 villages or 28 85 percent of the total villages with a population of 13,878 have got the facilities of electricity in the village

In Sihunta sub-tahsil out of 80 villages, 45 villages or 56 25 percent of the total villages with a population of 18,708 comprising 70 22 percent of the the total population have the educational institutions of one tyye or the other in the village

Only 7 villages or 8 75 percent of the total villages with a population of 4,566 comprising 17 14 percent of the total population have the medical institutions of one sort or the other in the village All the villages have the facilities of drinking water Post and telegraph facilities are available in 15 villages or 18 75 percent of the total villages covering a population of 7,526 (28 25 percent) 19 villages comprising 23 75 percent of the total villages with a population of 9,377 have the communication facilities 7 villages with a population of 4,846 or 18 19 percent of the total population have been linked with pucca roads The electricity and power supply is available in 31 villages covering a population of 17,234

TABLE 13

**Distribution of Villages not having certain amenities arranged by distance ranges from the places where these are available**

| Villages not having the amenity of | Number of villages where the amenity is not available & available at the distance of | | | |
|---|---|---|---|---|
| | —5 Kms | 5-10 Kms | 10+Kms | Total (Cols 2-4) |
| 1 | 2 | 3 | 4 | 5 |
| 1 Education | 476 | 35 | 8 | 519 |
| 2 Medical | 458 | 344 | 186 | 988 |
| 3 Drinking Water | — | — | — | — |
| 4 Post & Telegraph | 667 | 171 | 74 | 912 |
| 5 Market/Hat | — | — | — | — |
| 6 Communication | 353 | 223 | 326 | 902 |

17 Table 13 deals with the distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Out of 519 villages where educational facility within a distance of 5 kms For another 35 villages this facility is available within a distance range of 5-10 kms and for the remaining 8 villages the educational facilities are available at a distance of more than 10 kms

In the district there are 988 villages where the medical facilities are not available Of these villages, this facility is available upto a distance of 5 kms in respect of 458 villages Another 344 villages have this facility within a distance range of 5-10 kms The remaining 186 villages have this facility beyond 10 kms In the district 912 villages have no post and telegraph facilities. The overwhelming number of villages i e 667 have this facility within a distance range of less than 5 kms and another 171 villages have this facility within a distance range of 5-10 kms and the rest of the 74 villages have it beyond 10 kms

Communicationwise 902 villages have no communication facility Of this, 353 villages have bus facility at less than 5 kms distance and another 223 villages have this facility within 5-10 kms and the remaining 326 villages have this facility beyond 10 kms

TABLE 14

**Distibution of villages according to the distance from the nearest town and availability of different amenities**

| Distance range from the nearest town (in Kms) | No of inhabited villages in each range | No (With percentage) of villages having the amenity of | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post and Telegraph | Market/ Hat | Communi-cation | Approach by Pucca Road | Power Supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 0-5 | 52 | 31(59 62) | 5(9 62) | 52(100 00) | 11(21 15) | — | 12(23 08) | 10(19 23) | 47(90 38) |
| 6-15 | 182 | 92(50 55) | 12(6 59) | 182(100 00) | 26(14 29) | — | 40(21 98) | 31(17 03) | 110(60 44) |
| 16-50 | 421 | 222(52 73) | 40(9 50) | 421(100 00) | 77(18 29) | — | 103(24 47) | 54(12 83) | 254(60 33) |
| 51+ | 443 | 234(52 82) | 53(11 96) | 443(100 00) | 72(16 25) | — | 41(9 26) | 1(0 23) | 146(32 96) |
| Unspecified | — | — | — | — | — | — | — | — | — |
| Total | 1,098 | 579(52 73) | 110(10 02) | 1,098(100 00) | 186(16 94) | — | 196(17 85) | 96(8 74) | 557(50 73) |

18 Table 14 deals with the distribution of villages according to distance from the nearest town and the availability of different amenities In the district there are 52 villages within the distance range of 5 kms from the nearest town Of this, 31 villages or 59 62 percent have the educational facilities 5 villages or 9 62 percent have the medical facilities All the villages have the drinking water facilities Post and telegraph facilities are available in 11 villages or 21 15 percent of the total villages of this category 12 villages or 23 08 percent have the communication facility and 10 villages or 19 23 percent have approach by pucca road 47 villages or 90 38 percent have the facilities of electricity

182 villages fall in the distance range of 6-15 kms from the nearest town Of this, 92 villages or 50 55 percent have the educational facilities Medical facilities are available in 12 villages All the villages have drinking water facilities 26 villages have the post and telegraph facilities 40 villages have the communication facilities and 31 villages have approach by pucca road and 110 villages have the facilities of electricity 421 villages fall in the distance range of 16-50 kms from the nearest town Of this 222 villages or 52 73 percent have the educational facilities and 40 villages or 9 50 percent have the medical facilities in the village itself Post and telegraph facilities have been reported from 77 villages or 18 29 percent of the villages of this category 103 villages have communication facility within the village itself 54 villages have approach by pucca road and 254 villages are electrified

443 villages fall in the distance range of 51 kms and above from the nearest town Of these villages, 234 villages have the educational facilities, 53 villages or 11 96 percent have been served by medical facilities All the villages have drinking water facilities Post and telegraph facilities are available in 72 villages or 16 25 percent of the villages in this category 41 villages or 9 26 percent of the villages have the communication facilities and only one village has the approach by pucca road 146 villages or 32 96 percent of the total villages have the facilities of power and electricity

TABLE 15

**Distribution of villages according to population range and amenities available**

| Population range | No of inhabited villages in each range | No (With percentage) of villages having the amenity of | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post & Telegraph | Market/ Hat | Communication | Approach by Pucca Road | Power supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| —499 | 976 | 476(48 77) | 74(7 58) | 976(100 00) | 134(13 73) | — | 144(14 75) | 71(7 27) | 457(46 82) |
| 500-1,999 | 121 | 102(84 30) | 35(28 93) | 121(100 00) | 51(42 15) | — | 51(42 15) | 24(19 83) | 99(81 82) |
| 2,000 4,999 | 1 | 1(100 00) | 1(100 00) | 1(100 00) | 1(100 00) | — | 1(100 00) | 1(100 00) | 1(100 00) |
| 5,000+ | — | — | — | — | — | — | — | — | — |
| Total | 1,098 | 579(52 73) | 110(10 02) | 1,098(100 00) | 186(16 94) | — | 196(17 85) | 96(8 74) | 557(50 73) |

19 Table 15 deals with the distribution of villages according to population range and amenities available Of the 1,098 inhabited villages in the district, an overwhelming number of villages i e 976 fall in the population range upto 499 persons Of these villages, 476 have the educational facilities of one type or the other in the villages itself 74 villages have the medical facilities All the villages have drinking water facilities The post and telegraph facilities have been made available to 134 villages or 13 73 percent 144 villages or 14 75 percent have the communication facilities and 71 villages have approach by pucca road 457 villages or 46 82 percent of the total villages in this range have the facilities of electricity in the village

There are 121 villages in the district each having a population between 500-1,999 Of this, 102 villages have educational facilities 35 villages have medical facilities and all the villages have the drinking water facilities The post and telegraph facilities have been made available in 51 villages and the equal number of villages have the communication facilities 24 villages have approach by pucca road and 99 villages have been electrified There is only one village namely SURGANI of sub-tahsil Saluni having a population of 2,558 falls in the population range of 2,000-4,999 This village has got all the amenities

The perusal of the above figures shows that the availability of these facilities is more pronounced in the case of bigger size of the villages

TABLE 16

**Main staple food in the majority of villages in each tahsil/sub-tahsil**

| Sl No | Name of Tahsil/ Sub-tahsil | Main staple food |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Pangi | Wheat, Barley |
| 2 | Chaurah | Maize, Wheat, Barley |
| 3 | Saluni | Maize, Wheat, Rice |
| 4 | Chamba | Maize, Wheat, Rice |
| 5 | Bhattiyat | Maize, Wheat, Rice |
| 6 | Brahmaur | Maize, Wheat, Barley |
| 7 | Sihunta | Maize, Wheat, Rice |

20 Table 16 deals with the tahsilwise main staple food in the majority of villages In Pangi tahsil, the main staple food consists of wheat and barley while in Churah and Brahmaur tahsils it consists of maize, wheat and barley In the remaining tahsils of the district the staple food consists of maize, wheat and rice

TABLE 17

**Distribution of Villages according to land use**

| Sl No | Name of Tahsil/ Sub Tahsil | No of inhabited Villages | Total area (in hectares) | Percentage of Cultivable area to total area | Percentage of irrigated area to total Cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Pangi | 60 | 42,597 00 | 17,278 00(40 5 ) | 959 00(5 55) |
| 2 | Chau ah | 179 | 37,475 64 | 32,793 08(87 51) | — |
| 3 | Saluni | 202 | 37,170 70 | 34,525 06(92 88) | — |
| 4 | Chamba | 242 | 68,455 22 | 56,800 83(82 98) | 113 72(0 20) |
| 5 | Bhattiyat | 231 | 36,856 00 | 24,274 00(65 86) | 847 00(3 49) |
| 6 | Brahmaur | 104 | 35,018 71 | 29,209 29(83 41) | 12 14(0 04) |
| 7 | Sihunta | 80 | 19,819 00 | 16,117 00(81 32) | 882 00(5 47) |
| | Total | 1,098 | 277,392 27 | 210,997 26(76 06) | 2,813 86(1 33) |

21 Table 17 deals with the distribution of villages according to landuse The total area of 1,098 inhabited villages in the district comes to 277,392 27 hectares Of this 210,997 26 or 76 06 percent of the total area are cultivable Only 2,813 86 hectares or 1 33 percent of the cultivable area are under irrigation

Tahsilwise, 60 villages of Pangi tahsil put together have a total area of 42,597 hectares Of this, 17,278 hectares or 40.56 percent are cultivable and 959 hectares or 5 55 percent of the cultivable area have the irrigation facilities 179 villages of Chaurah tahsil have a total area of 37,475 64 hectares Of this, 32,793 08 hectares or 87 51 percent are cultivable Saluni sub-tahsil has a total area of 37,170 70 hectares spread over in 202 villages Of this, 34,525 06 hectares or 92 88 percent are cultivable 242 inhabited villages of Chamba tahsil have a total area of 68,455 22 hectares, Of this, 56,800 83 hectares or 82 98 percent, are cultivable and 113 72 hectares of cultivable area have the irrigation facilities 231 villages of Bhattiyat tahsil have a total land area of 36,856 hectares The cultivable area constitute 65 86 percent of the total area of 24,274 hectares

Of this, 847 hectares or 3 49 percent have the irrigation facilities 104 villages of Brahmaur tahsil have a total land area of 35,018 71 hectares Of this, 29,209 29 hectaies or 83 41 peicent are cultivable Sihunta sub-tahsil has a land area of 19,819 hectares Of this, 16,117 hectares or 81 32 percent are cultivable and only 882 hectares have the irrigation facilities.

The low percentage of cultivable area to the total area obtaining in Pangi and Bhattiyat tahsils is due to the fact that some of the areas have not been cadasterally surveyed

22 Appendix-I gives the tahsilwise abstract of educational, medical and other amenities available in the villages In Chamba district, 575 villages have 604 primary schools, 112 villages have 113 middle schools, and 37 villages have a high school each and one village has a higher secondary school 12 villages have equal number of Adult Literacy Centres and 5 villages have equal number of other educational institutions There are 519 villages where no educational facilities of any sort are available

Tahsilwise, in Pangi tahsil 35 villages have equal number of primary schools, 6 villages have middle schools one in each village and 2 villages have high schools one in each and one village has an other type of educational institution There are 24 villages in the tahsil where no educational facilities are available

In Chaurah tahsil 75 villages have 76 primary schools 11 villages have 11 middle schools one in each village and 2 villages have equal number of high schools one in each 12 Adult Literacy Centres and 2 other institutions have also been reported from the equal number of villages There are 102 villages in the tahsil which have no educational facilities of any type

Saluni sub-tahsil has 86 primary schools in 84 villages, 16 middle schools in 15 villages and 6 high schools in equal number of villages One village has higher secondary school There are 118 villages which are not having any educational institution

192 primary schools have been reported from 174 villages of Chamba tahsil 39 villages have equal number of middle schools one in each and one high schools in each village has been reported from 12 villages 2 other educational institutions have been reported from 2 villages There are 67 villages in the tahsil where no educational institution of any sort is located

In Bhattiyat tahsil 90 primary schools are located in 89 villages 17 villages have equal number of middle schools and 7 villages have one high school in each village There are 142 villages where no educational institutions are located

In Brahmaur tahsil 73 villages have 79 primary schools and 14 villages have equal number of middle schoools and another 5 villages have high schools one in each 31 villages have no educational institutions located in the village itself

In Sihunta sub-tahsil, 46 primary schools are located in 45 villages while 10 villages have middle schools one in each village and 3 villages have equal number of high schools 35 villages have no educational institutions In the district as a whole, 56 villages have equal number of dispensaries 7 villages have 8 hospitals while 3 maternity and child welfare centres have been reported from 3 villages 8 villages have equal number of primary health centres and 26 primary health sub-centres have been reported from 26 villages 29 community health workers have been reported from equal number of villages and 3 villages have 5 other medical institutions Of the 988 villages in the district where no medical facilities are available, 54 villages are in Pangi tahsil, 168 villages in Churah tahsil, 186 villages in Saluni sub-tahsil, 211 villages in Chamba tahsil and 223 villages in Bhattiyat tahsil 73 villages in each tahsil/sub-tahsil of Brahmaur and Sihunta are without any medical facilities

Tahsilwise, in Pangi tahsil 4 dispensaries have been reported from equal number of villages In addition, one village has a hospital and 3 villages have equal number of primary health sub-centres

In Chaurah tahsil 8 dispensaries, 2 hospitals, 1 each of maternity and child welfare centre, primary health centre, community health workers and other institutions have been reported from the respective equal number of villages In addition, 4 primary health sub-centres have been reported from equal number of villages

In Saluni sub-tahsil 9 villages have 9 dispensaries, 4 primary health sub-centres one in each village and one hospital and one primary health centre from each village In addition 2 villages have 4 medical institutions of other type

In Chamba tahsil 17 villages have 17 dispensaries One village has 2 hospitals and a primary health centre is located in one village In addition 4 primary health centres and 9 primary health sub - centres, one in each village has been reported from equal number of villages

In Bhattiyat tahsil five villages have equal number of dispensaries There is one hospital villages have 2 primary health sub-centres and a primary health centre in one village 2 Brahmaur tahsil has 9 dispensaries one in each village One village has a hospital, 2 villages have equal number of Primary Health sub-centre and 28 villages have equal number of health worker one in each

Sihunta sub-tahsil has 4 dispensaries and 2 primary health sub-centres in addition to the one each maternity and child welfare centre and primary health centre

In the district all the villages have been covered under the drinking water supply scheme 494 villages have tap water source, 37 villages have well water, 13 villages have tank water while 57 villages depend upon river water 49 villages depend upon fountain water 122 villages have canals as the drinking water source In addition, 891 villages in the district have more than one sources in the villages itself

Tahsilwise, Pangi tahsil has got 14 villages having tap water and 127 villages have other source of drinking water 46 village in the district have more than one source of drinking water in the village itself

In Chaurah tahsil 77 villages have tap water 20 villages have well water for drinking purposes 2 villages have tank water, 3 villages have river water and 8 villages depend upon fountain water 2 villages have canals as the source for drinking water 235 villages have other sources of drinking water while 147 villages of the tahsil have more than one source of drinking water in the village itself

In Saluni sub-tahsil 86 villages have tap water 6 villages depend upon well water 2 villages each use tank and river water while 4 villages have canals as drinking water source 255 villages have other sources of drinking water and 131 villages of the tahsil have more than one source of drinking water in the village itself

In Chamba tahsil 151 villages have tap as the source of drinking water 19 villages depend upon river water, 41 villages have fountain water and 34 villages have canals for drinking water purposes 296 villages have other sources of drinking water while 193 villages in the tahsil have more than one source of drinking water in the village itself

In Bhattiyat tahsil tap water is available in 81 villages, 3 villages depend upon well and 2 villages on tank water and 15 villages use river water for drinking purposes 71 villages have canals/kuhls for drinking water purposes and 477 villages have other sources of drinking water 212 villages in the tahsil have more than one source of drinking water in the village itself

In Brahmaur tahsil 55 villages have tap as the drinking water source and 18 villages depend upon river water 158 villages have other source of water for drinking purposes and 88 villages have more than one source of drinking water

In Sihunta sub-tahsil 30 villages have tap as the drinking water source and 8 villages each depend upon well and canal water 6 villages use tank water for drinking purposes 74 villages in the sub-tahsil have more than one source of drinking water

In the district 165 villages have post offices, 2 villages have post and telegraph offices, 10 villages have post offices with phone, 9 villages have post and telegraph and telephone facilities

Tahsilwise, in Pangi tahsil 8 villages have post offices and one village has post and telegraph office 29 villages of Chaurah tahsil have post offices, 2 villages have post office and telephone facilities and one village has post and telegraph and telephone facilities In Saluni sub-tahsil 29 villages have post offices 2 villages have post and telegraph and telephone and one village post office and telephone facilities In Chamba tahsil 147 villages have post offices, 6 villages post and telephone facilities and one village has got post office, telegraph and telephone facilities 17 villages of Bhattiyat tahsil have post offices, 4 villages have post and telegraph and telephone facilities and one village post office and telephone 21 villages of Brahmaur tahsil have post offices facilities and one village has post office and telegraph facilities 14 post offices and one post office, telegraph and phone have been reported from equal number of villages in Sihunta sub-tahsil Communicationwise, there are 196 villages which have the bus stops Of this, 23 villages are in Chaurah tahsil, 34 in Saluni sub-tahsil, and 57 in Chamba tahsil There are 55 villages having bus stops in Bhattiyat tahsil and 8 and 19 villages in Brahmaur and Sihunta tahsil/sub-tahsil respectively There is not even a single village in Pangi tahsil conected by bus

There are 557 villages in the district which have electricity facilities and 541 villages have yet to be electrified

Tahsilwise, 66 villages have the facilities of electricity in Chaurah tahsil, 120 villages have been electrified in Saluni sub-tahsil 143 villages in Chamba tahsil and 167 villages in Bhattiyat tahsil The number of electrified villages in Brahmaur tahsil comes to 30 while in Sihunta sub-tahsil it is 31 There is not even a single village in Pangi tahsil which has got the facilities of electricity

TABLE 18

**Growth, Density and Sex-ratio of Urban Population in the District in relation to the State**

| | District | | | | | | State | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Census Year | Total population | Urban population | Percentage of urban population | Decadal percentage variation in urban population | Density (population per sq km) | Sex-ratio (No of females per 1,000 males) | Total population | Urban population | Percentage urban population | Decadal percentage variation in urban population | Density (population per sq km) | Sex-ratio (No of females per 1,000 males) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1951 | 174,537 | 7,955 | 4 56 | +40 34 | N A | 802 | 2,385,981 | 153,82 | 6 45 | +78 66 | N A | 664 |
| 1961 | 215,929 | 17,188 | 7 96 | +116 07 | 1,091 | 586 | 2,812,463 | 178,275 | 6 34 | +15 89 | 1,254 | 650 |
| 1971 | 251,203 | 18,844 | 7 50 | +9 63 | 1,133 | 862 | 3 460 434 | 241 890 | 6 99 | +35 68 | 1,556 | 749 |
| 1981 | 311,147 | 21,294 | 6 84 | —13 00 | 1,135 | 902 | 4,280,818 | 325,971 | 7 61 | +34 76 | 1 537 | 795 |

23 Table 18 deals with the growth rate, density and sex ratio of urban population in the district in relation to the state during the last four censuses As already discussed in the preceding paragraph, Chamba district is predominatly a rural track and has a meagre urban population The urban population in the district increased from 7,955 in 1951 to 21,294 in 1981 In terms of percentages, the trend is erratic one The urban population comprised of 4 56 percent of the district population in 1951 and this proportion increased to 7 96 percent in 1961 and again slipped down to 7.50 percent in 1971 This proportion has further decreased to 6 84 percent in 1981

Census In terms of decadal percentage variations, the urban population of the district showed an increase of 116 07 percent during 1951-61 and during 1961-71 the percentage growth rate was only 9 63 percent The urban population increased by 13 percent during 1971-81 This shows that except during 1951-61, the urban population had a very modest growth rate The abrupt increase in the urban population during 1951-61 is due to the settling of refugees during the partition of the country Comparing share of urban population in the district viz-a-viz with the state it is noticed that at 1951 Census the district was having a lesser proportion of urban population as compared to the state

During the next two subsequent censuses i e 1961 and 1971, the district was having a slightly higher percentage of urban population as compared to the state At 1981 Census, the trend was slightly reversed in respect of the district Comparing the growth rate in the district and in the state, it may be mentioned that except during 1951-61, the district was having lower growth rate as compared to the State The density of population per sq km in the urban areas of the district gradually moved from 1,091 persons per sq km in 1961 to 1,133 persons per sq km in 1971 and 1,135 persons per sq km in 1981 The corresponding figures for the state are 1,254, 1,556 and 1,537 respectively This shows that the density per sq km in the urban areas of the district is less as compared to the state averages It is also evident that the towns of the district are well scattered The number of females per 1,000 males in the urban areas of the district decreased from 802 in 1951 to 556 in 1961 In the subsequent two censuses, this sex-ratio became more favourable and it increased to 862 in 1961 and touched the level of 902 in 1981 The corresponding figures for the urban areas of the state as a whole are 664, 650,749 and 795 The sex-ratio in the state as well as in the district maintained the same trend

TABLE 19

**New towns/towns declassified in 1981 Census**

| Name of Towns | Population 1981 Census |
|---|---|
| 1 | 2 |
| (a) Added | |
| 1 Chuari Khas | 1,680 |
| (b) Declassified | — |
| — | — |

24 Table 19 deals with the new towns notified in the district and the towns declassified in 1981 Census Chuari Khas Notified Area Committee in Bhattiyat tahsil was notified as a town for the first time during 1979-80 As per 1981 Census, this town has a population of 1,680 There is no urban area in the district which was treated as a town during the earlier censuses, but, now treated as rural area

TABLE 20

**Per capita receipt and expenditure in towns**

| Class, name and civic status of towns | Per Capita | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Receipt | | | Expenditure | | | | | |
| | Total receipt | Receipt through taxes | Receipt from all other sources | Total expenditure | General administration | Expenditure on public health and conveniences | Public works | Expenditure on public institutions | Other aspects |

| VI Chauri Khas (N A C) | 16 07 |
| DALHOUSIE Urban AGGLOMERATION (U A) | 7 88 |
| ( ) VI Dalhousie (M C) | 10 56 |
| (ii) VI Dalhousie (C B) | 1 60 |
| Total | 14 98 |

27 Table 22 deals with the number of beds in the medical institutions in the towns All the towns put together in the district, the number of beds in the medical institutions per 1,000 of population comes to 14 98 Chamba Municipal Committee has the maximum number of beds i e 18 68 per 1,000 population followed by Chuari Khas Notified Area Committee where 16 07 beds are available per 1,000 of population In Dalhousie Municipal Committee, 10 56 beds are available per 1,000 of population while in Dalhousie Cantonment Board it is 1 60 and Bakloh Cantonment Board 1 20 The higher beds ratio available in Chamba is due to the location of the district headquarters in the town whereas in Chuari Khas the higher ratio is due to the location of a civil hospital

TABLE 23

**Most important commodity manufactured, imported and exported in towns**

| Class, name and civic status of the town | Most Importan commodity | | |
|---|---|---|---|
| | Manufactured | Exported | Imported |
| 1 | 2 | 3 | 4 |
| VI Bakloh (C B) | Wollen Carpets | Pears | Foodgrains |
| IV Chamba (M C) | Wollen Shawls, Blankets and cloth | Timber | Foodgrains |
| VI Chuari Khas (N A C) | "Doop" (Incense) | "Dhoop" (Incense) | Foodgrains |
| DALHOUSIE URBAN AGGLOMERATION (U A) | "SEE CONSTITUENT UNITS" | | |
| (i) VI Dalhousie (M C) | Tibetan Traditional Carpets | Timber | Foodgrains |
| (ii) VI Dalhousie (C B) | — | Timber | Foodgrains |

28 Table 23 deals with the most important commodity manufactured, imported and exported in the towns In Bakloh Cantonment Board, woollen carpets are manufactured whi'e pears are exported and foodgrains are imported In Chamba Municipal Committee woollen shawls, blankets and cloth are manufactured It is deficient in foodgrains which are being imported from the adjoining Punjab State and timber constitutes the item of export In Chuari Khas, Dhoop (incense) is manufactured and the same is exported It is deficient in foodgrains which are imported from the adjoining areas of Punjab State Dalhousie Municipal Committee is known for the Manufacture of Tibetan traditional carpets and the export mainly consists of timber The town is deficient in foodgrains which are imported Dalhousie Cantonment Board exports timber and imports foodgrains

29 Statement I deals with the status and growth history of the towns in the district Chamba is the biggest town of the district so for as population is concerned with a total area of 2 35 sq km There are 2,852 households with a population of 13,761 The town is enjoying an urban status since 1901 The population of the town decreasd by 7 95 percent during 1901-11 Thereafter, the growth of population was modest upto 1951 Census During 1951-61, the population increased by 25 53 percent and during 1961-71 it increased by 37 33 percent The growth rate during 1971-81 slipped down to 16 48 percent The abrupt increase in the growth rate during 1961-71 can partly be attributed to the increased trading activities in the town with the linking of interiors of the district with the tahsil headquarters which was made possible with the construction of more roads etc and also due to increased Government activities The town has the maximum density of population i e 5,856 persons per sq km in the district The sex-ratio i e the number of females per 1,000 males has steadily increased from 828 in 1961 to 864 in 1971 and 905 in 1981 The sex ratio obtaining in the town is the highest except in the case of Bakloh and Dalhousie Cantonment Boards Bakloh Cantonment Board was treated as urban area in 1901 and was declassified in 1951 In the subsequent censuses, it was treated as an urban area The town witnessed a negative growth rate except during the decades 1901-11 and 1931-41 The decline in population can mainly be attributed to the fact that it has got hardly any trading activities As per 1981 Census, it has an area of 2 58 sq kms and a population of 1,664 persons consisting of 487 households It has a density of 645 persons per sq km and the sex-ratio increased from 584 females per 1,000 of males in 1961 to 1,057 in 1971 and 1,298 in 1981 Chuari Khas another Class VI town of the district was Notified Area Committee during 1980-81 It has an area of 2 13 sq kms with a population of 1,680 persons comprising of 420 households The density of population comes to 789 persons per sq km and the sex-ratio is 854 females per 1,000 males Dalhousie Municipal Committee enjoys the uninterrupted urban status since 1901 The population of the town showed a decline during the censuses of 1931, 1951 and 1981 The population increased from 1,316 persons in 1901 to 4,296 persons in 1971 In the subsequent census it came down to 2,936 persons thus showing a decrease of 31 66 percent during 1971-81 The town has an area of 7 58 sq kms and the number of households according to 1981 Census comes to 836 It has a density of 387 persons per sq km The sex-ratio which was only 304 in 1961 increased to 806 in 1971 and again came down to 727 in 1981 Census Dalhousie Cantonment Board constituted a part of Dalhousie Municipal Committee upto 1921 It became independent urban area in 1931 and has a population of 852 persons During 1931-41, it registered a growth rate of 59 27 percent and the population touched 1,357 persons The town was declassified at 1951 Census Again in 1961 it was treated as an urban area and had a population of 2,699 persons In 1971, the population touched the lowest level of 827 persons and subsequenty increased to 1,253 persons at 1981 Census During 1971-81, the population of the town has increased by 51 51 percent It has the lowest density i e 304 persons per sq km The sex-

ratio i e number of females per 1,000 males showed a continuous increase from 319 in 1961 to 727 in 1971 and 955 in 1981

30 Statement II deals with the physical aspects and location of the towns as in 1979 Bakloh Cantonment Board is situated at a distance of 375 kms from Shimla, the state headquarters and 71 kms from Chamba, the district headquarters town The sub-divisional headquarters is at Dalhousie at a distance of 31 kms and tahsil headquarter is Chuari Khas at a distance of 28 kms Pathankot at a distance of 61 kms is the nearest city of the town and Nurpur Road-Jasoor at a distance of 52 kms is the nearest railway station The town is connected with bus route

Chamba town, the district headquarter of Chamba district, is at a distance of 436 kms from Shimla, the state headquarters The town experienced an average annual rainfall of 19088 7 mm Pathankot at a distance of 122 kms is the nearest city as well as the railway station of the town It is connected by bus route The town is also a sub-divisional and tahsil headquarter of the Chamba sub-division and the tahsil

Chuari Khas experienced average rainfall of 1,881 5 mm Chamba, the district headquarters, is at a distance of 96 kms and Dalhousie which is the sub-divisional headquarters of the town is at a distance of 56 kms The town serves the tahsil headquarter of the Bhattiyat tahsil It is at a distance of 56 kms from Pathankot which is the nearest city and Nurpur Road-Jasoor at a distance of 36 kms is the nearest railway station The town is linked with bus route

Dalhousie Municipal Committee received average rainfall of 2,290 6 mm and had the maximum temperature of 32 5 and minimum 3 0 centigrade Chamba town, the district headquarters, is at a distance of 56 kms and Chuari Khas which is the tahsil headquarter of the town is at a distance of 56 kms It serves as a sub-divisional headquarter town The nearest city and the rail-way station are at Pathankot at a distance of 81 kms It is connected with a bus route Dalhousie Cantonment Board received average rainfall of 2,090 6mm and the maximum temperature touched 32 5 centigrade while the minimum was 3 0 centigrade It at a distance of 395 kms from the State headquarters i e Shimla and 55 kms from Chamba town, the district headquarters It is at a distance of 1 km from Dalhousie which is the sub-divisional headquarter town and at a distance of 55 kms from Chuari Khas, the tahsil headquarter of the town The nearest city and the railway station of the town is at Pathankot at a distance of 80 kms

31 Statement III deals with the municipal finances for the year 1978-79 Bakloh Cantonment Board had a total income of Rs 540 40 thousand Of this, Rs 312 20 thousand were received as Government grant, Rs 32 10 thousand as revenue from the municipal properties and Rs 23 20 thousand through taxes and the remaining Rs 172 90 thousand from other sources Of the total expenditure of Rs 536 20 thousand, the maximum amount i e Rs 217 00 thousand was spent on public health followed by Rs 137.30 thousand on public works, Rs 92 60 thousand on public institutions, Rs. 26 90 thousand on general administration, Rs 17 70 thousand on public safety and the remaining Rs 44 70 thousand on other items

Chamba Municipal Committee had a total income of Rs 1,364 60 thousand Of this, Rs 1,061 90 thousand were through the taxes, Rs 180 thousand from Government grant, Rs 56 10 thousand from the municipal properties etc and the remaining Rs 8 70 thousand through other sources Of the total expenditure of Rs 1,356 80 thousand, Rs 390 20 thousand were spent on general administration, Rs 298 80 thousand on public health, Rs 174 50 thousand on public works, Rs 66 50 thousand on public safety and Rs 427 00 thousand on other items including public institutions

Of the total income of Rs 586 30 thousand of Dalhousie Municipal Committee, Rs 244 80 thousand were through the taxes, Rs. 154 thous-

and constituted the Government grant, Rs 112 30 thousand from municipal properties etc , Rs 75 20 thousand from other sources On the expenditure side, out of total of Rs 604 10 thousand, Rs 208 00 thousand were spent on public works, Rs 177 80 thousand on public safety, Rs 122 80 thousand on general administration, Rs 81 50 thousand on public safety and Rs 14 00 thousand on the other heads

Dalhousie Cantonment Board had a total income of Rs 503 60 thousand Of this, Rs 204 30 thousand were from the municipal properties etc , Rs 149 90 thousand from taxes, Rs 134 70 thousand grants from the Goverment and the remaining Rs 14 70 thousand from other sources It had a total expenditure of Rs 558 80 thousand Public health and conveniences comprise the major share of the expenditure i e 232 50 thousand followed by public institutions (Rs 59 50 thousand), public works (Rs 51 70 thousand), general administration (Rs 32 50 thousand) etc

32 Statement IV deals with the civic and other amenities provided by the local bodies in their respective towns in 1979 Bakloh Cantonment Board has a pucca road length of 6 70 kms and katcha road length of 1 60 kms The sewerage system is open surface drains and pit The local body is maintaining 52 water borne and 3 other types of latrines while 8 water borne and 20 service latrines are being maintained by private persons The method of disposal of night soil is septic tank and head load The water supply source is tank It has its own fire fighting service The town has 208 domestic electric connections, 61 commercial connections and 68 street light points

Chamba Municipal Committee has a pucca road length of 33 01 kms and katcha road length of 1 49 kms The system of sewerage is open surface drains 18 water brone and 8 service latrines are being maintained by the local body The corresponding figures in respect of private latrines are 383 and 825 respectively The method of disposal of night soil is baskets and septic tank The source of water supply in the town is tap and the water is stored in a tank The town has its own firefighting service It has 2,180 domestic electric connections, 33 industrial, 855 commercial The local body is maintaining 524 street light points in the town

Chuari Khas Notified Area Committee has a pucca road length of 3 50 kms and katcha road length of 0 50 kms The system of sewerage is open surface drains and pit 41 water borne latrines are being maintained privately The method of disposal of night soil is septic tank and the source of drinking water is tap It has a reservoir with a capacity of 45,430 litres The firefighting services for the town are available at Bakloh at a distance of 28 kms There are 243 domestic electric connections, 93 commercial, 4 industrial in addition to the 31 street light points

Dalhousie Municipal Committee has a pucca road length of 14 96 kms and katcha road length of 11 kms The system of sewerage is open surface drains and pit There are 50 (13 water borne and 37 service) latrines maintained by the Municipal Committee and 876 water borne and 382 service latrines are private The method of disposal of night soil is septic tank and basket Tap is the source of drinking water and is being supplied through a service reservoir The Municipal Committee depends upon the Dalhousie Cantonment Board for firefighting service There are 847 domestic, 333 commercial, 6 industrial electric connections in addition to 467 street light points

Dalhousie Cantonment Board has a pucca road length of 10 75 kms and katcha road length of 0 55 kms The system of sewerage is open surface drains There are 36 water borne public latrines apart from 123 private latrines The night soil is being disposed of through baskets and septic tanks Tap is the source for drinking water and is being supplied through the service reservoir The town has its own firefighting arra-

# PART A-VILLAGE AND TOWN DIRECTORY

ngements and has 182 domestic, 93 commercial and 1 industrial electric connections in addition to 92 street light points

33 Statement V deals with the medical, educational, recreational and cultural facilities available in the towns in 1979 If these amenities are not available within the town itself, then the places where these are available have been incorporated in the Statement Bakloh Cantonment Board, a Class VI town of the district has one hospital with 2 beds only For Arts and Science College, it depends upon Pathankot at a distance of 61 kms The nearest medical college for the town is at Jammu at a distance of 169 kms For engineering college and polytechnic the nearest places are Ludhiana at a distance of 246 kms and Batala 133 kms respectively Both these places are in Punjab Regarding vocational training institutes it has one such institution The nearest higher secondary/high school is at Kakira at a distance of 4 kms The town has one middle and 2 primary schools It has 2 reading rooms and a cinema house

Chamba Municipal Committee has 3 hospitals in addition to one ayurvedic hospital All these hospitals have a indoor capacity of 257 beds The town has its own arts and science college The nearest medical college is at Jammu at a distance of 230 kms For engineering college and polytechnic, the nearest places are at Ludhiana at a distance of 307 kms and Batala at a distance of 194 kms The town has 9 vocational training institutes It has 2 higher secondary and secondary level schools each, 3 middle schools, 11 primary schools and 1 nursery school One adult literacy centre is also functioning in the town It has one cinema hall and a auditorium, 3 public libraries and 18 reading rooms

Chuari Khas has one hospital with 27 beds and one family planning centre For arts and science college, the town depends upon Pathankot which is at a distance of 56 kms Ayurvedic college Paprola in Kangra district is at a distance of 134 kms. from the town Ludhiana at a distance of 241 kms and Batala at a distance of 128 kms are the nearest places for engineering college and polytechnic respectively The nearest higher secondary school is at Kakira at a distance of 24 kms and so is the case with vocational institutions It has one high school, 2 middle and primary schools each Adult literacy centre is at Gehrana at a distance of 3 kms from the town

Dalhousie Municipal Committee has one hospital with 25 beds, 2 dispensaries (one each of allopathic and avurvedic), one family planning centre and one nursing home with 6 beds The nearest arts and science college is at Chamba at a distance of 56 kms and the nearest medical college is at Jammu at a distance of 189 kms Ludhiana at a distance of 266 kms and Batala at a distance of 153 kms are the nearest places for engineering college and polytechnic respectively It has one higher secondary school, 4 secondary and middle schools each in addition to 5 primary and one nursery schools The town has one cinema hall, 2 auditoriums and one public library and a reading room

Dalhousie Cantonment Board has one hospital with 2 beds For arts and science college it depends upon Chamba which is at a distance of 55 kms The nearest medical college is at Jammu at a distance of 188 kms Like other places, Ludhiana is the nearest place for engineering college and Batala for polytechnic institute The nearest high/middle school available is at Dalhousie at a distance of 1 km only It has one primary school The town has one cinema, one public library and a reading room

34 Statement VI deals with trade, commerce, industry and banking facilities in the towns of the district in 1979 The district as a whole is deficient in foodgrains and in all the towns the first important item of import consists of foodgrains, cloth constitutes the second important item of imports in Bakloh and Chuari Khas while in Dalhousie Municipal Committee and Dalhousie Cantonment Board vegetables and fruits constitute the second most important item of imports Sugar is the second important commodity of import in

Chamba town and third important item of import in all the towns except Chamba where edible oil occupies the third position

Of the important items of export from the towns, pears are exported from Bakloh while timber constitutes the most important item of exports of Chamba Municipal Committee, Dalhousie Municipal Committee and Dalhousie Cantonment Board while Dhoop (incense) is the most important item of export of Chuari Khas Woollen carpets are exported from Bakloh while apples from Dalhousie Municipal Committee, Dalhousie Cantonment and fruits, juices and jams from Chamba Municipal Committee Chamba chappals and other footwears are the other important items of export of Chamba town whereas Tibetans traditional carpets are exported from Dalhousie Woollen carpets are manufactured in Bakloh town while Chamba mainly manufactures woollen shawls, blankets and cloth The manufacturing of Tibetans traditional carpets is being carried out at Dalhousie The fruits, juices and james rank number two with regard to manufacturer of Chamba town, edible oils in Chuari Khas woollen shawls in Dalhousie Chamba chappals and other footwears are among the other items of manufacture of Chama and Dalhousie and leather shoes are manufactured in Chuari Khas Bakloh town has one bank and one non-agricultural credit society 5 banks and 12 non-agricultural credit societies have been reported functioning in Chamba town Chuari Khas has 2 banks and one agricultural credit and a non-agricultural credit societies Dalhousie Municipal Committee has two banks and one non-agricultural credit society In Dalhousie Cantonment Board, the functioning of one non-agricultural credit society has been reported

# SECTION I-VILLAGE DIRECTORY

**Village Directory** Village Directory which is one of the traditional documents of the census has been canvassed during 1981 Census too On the basis of the information the Village Directory schedule can broadly the divided into three parts The first deals with the basic amenities available to a village like the education, medical drinking water, post and telegraphs, communication, power supply and market etc In this part, it has been sought to ascertain whether the above facilities exist in a village and if it does then to what extent/level If the above amenities are not available then nearest village/town with a distance where the aforesaid facilities/amenities have been made available

2 The second deals with the land use which has been endeavoured to conform to the pattern of classification of the land use as recommended by the Ministry of Food & Agriculture, Government of India which has recommended the maintenance of records of land use pattern under five categories which are

1 Forests
2 Not available for cultivation
   (a) Land put to non-agricultural uses
   (b) Barren and unculturable lands
3 Other uncultivated lands excluding fallow lands
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4 Fallow lands
   (a) Fallow land other than current fallows
   (b) Current fallows
5 Net area sown

The source of information for the aforesaid items had been the revenue record shown/converted into hectares

3 The third part of the Village Directory deals about the information of the places of historical, archaeological and religious importance in a village This apart, it also deals with the socio-economic level of the people It also endeavours to gauge social and economic level of the people by para-meters like the number of motor cycles, scooters, jeeps, cars and tractors available in the village and the number of newspapers inflow to the village

4 The first part dealing with the amenities needs elaboration which is given as under

*(a) Educational Amenities* The various level of the educational amenities provided in a village has been shown for the sake of convenience in the abbreviations given as under

| | | |
|---|---|---|
| (1) | Primary and elementary schools upto 4th Classe | P |
| (2) | Junior Secondary or Middle Schools upto 8th Classes | M |
| (3) | High Schools/Secondary Schools upto 10th Classes | H |
| (4) | Higher Secondary Schools/Pre-University/Junior College/Intermediate (including 10+2 system) | PUC |
| (5) | Colleges of all types upto Graduate level and above | C |
| (6) | Industrial School | I |
| (7) | Training School | Tr |
| (8) | Adult education classes/Centre | AC |
| (9) | Other educational Institutions like Sanskrit Pathshala, Senior basic School, Maktab etc. | O |

Where there are more than one Institutions of same type in a village, the same have been indicated in figures against the appropriate abbreviation e -g P(3), M(2), H(2), etc Where no educational facility in the village was available, the distance of next nearest village where such educational facilities exist has been given in brackets with a dash viz √ (—5), √ (—10) and √ (10+)

*(b) Medical Amenities :* Any one of the following amenities available in the village has

been shown in abbreviations against the name of each medical institution

| | | |
|---|---|---|
| 1 | Hospital | H |
| 2 | Maternity and Child Welfare Centre | MCW |
| 3 | Maternity Home | MH |
| 4 | Child Welfare Centre | CWC |
| 5 | Health Centre | HC |
| 6 | Primary Health Centre | PHC |
| 7 | Primary Health Sub-Centre | PHS |
| 8 | Dispensary of all types | D |
| 9 | Family Planning Centre | FPC |
| 10 | T B Clinic | TB |
| 11 | Nursing Home | NH |
| 12 | Registered Private Practitioner | RP |
| 13 | Subsidised Medical Practitioner | SMP |
| 14 | Community Health Worker | CHW |
| 15 | Others | O |

2 In the aforesaid Health Centre of various levels family planning advice and clinical facilities may also be available which have not been shown separately If there are more than one Institutions of same type in the village, the same have been indicated in numbers against abbreviation e g H(2), D(3) etc In view of a variety of medical amenities for which a number of codes as above have been suggested, it would not be possible to provide too many details under each such amenity Thus all registered medical practitioner whether Ayurvedic, Unani or Allopathic have been covered under the code 'RP' It would be appropriate to mention that the term "Community Health Worker" does not refer to workers in extension programmes like Malaria eradication, Agriculture etc It refers to only those para-medical personnel who have been trained for dispensing medicines for minor ailments Where no facility is available within the village a dash(—) has been shown in the relevant column But next to it in brackets, the distance in broad ranges viz —5 km , 5—10 km and 10+ kms of the nearest place where the most modest medical amenity like dispensary, Community Health Worker, Primary Health Centre or or Hospital is available has been given

*(c) Drinking Water Amenities* The types of the portable drinking water supply sources available within the village have been given in the abbrevations as under

| | | |
|---|---|---|
| 1 | Tap water | T |
| 2 | Well water | W |
| 3 | Tank water | Tk |
| 4 | Tube Well water | TW |
| 5 | Hand Pump | HP |
| 6 | Fountain | F |
| 7 | Canal/Kuhls | C |
| 8 | River water | R |
| 9 | Lake | L |
| 10 | Nallah | N |
| 11 | Other sources (like baories etc ) | O |

*(d) Post & Telegraph Amenities* Post & Telegraph has been given in the abbreviations as under

| | | |
|---|---|---|
| 1 | Post Office | PO |
| 2 | Telegraph Office | TO |
| 3 | Post & Telegraph Office | PTO |
| 4 | Telephone Connection | Phone |

*(e) Day/Days of Market/Hat* No such traditional practice exists in the entire district

*Communication* This indicates the type of communication amenities either by bus, railways or navigable waterway available to the village, the abbreviations adopted are given as under

| | | |
|---|---|---|
| 1. | Bus | BS |
| 2 | Railway Station | RS |
| 3 | Navigable water way (including river/canal) | NW |

2 If anyone of these amenities were not available to the village then the nearest such facility available with a distance in bracket is given viz (—5), (5—10) and (10+)

(*f*) *Approach to village* The approach to village refers to the state of road etc leading to the village This is to see whether the village is approachable by pucca road or katcha road or by navigable canal or water way or both The approach to village is to be indicated by the following codes

| | | |
|---|---|---|
| 1 | Pucca Road | PR |
| 2 | Katcha Road | KR |
| 3 | Navigable River | NR |
| 4 | Navigable Canal | NC |
| 5 | Navigable water way (other than river or canal) | NW |
| 6 | Foot Path | FP |

If there is more than one such facility the same has been indicated separately by individual codes

(*g*) *Nearest Town and Distance* The distance of nearest town is given in Kms in brackets This has been filled in purely on the basis of local enquiry The nearest town so indicated need not be within the State itself The nearest town even in another State has been indicated wherever necessary alongwith the name of the state Further, operational convenience has been taken into consideration while showing the nearest distance of town

(*h*) *Electricity Supply* If the electricity is actually available whatever may be the form of its use it has been shown as available The codes used for various category of electricity are as under

| | | |
|---|---|---|
| 1 | Electricity for don estic purpose only | ED |
| 2 | Electricity for agriculture purpose only | EAg |
| 3 | Electricity for other purposes like industrial, commercial etc only | EO |
| 4 | Electricity for all purposes listed above | EA |

*(i) Staple Food* Here the terms staple food has been used only in terms of grain and on other food material The name of the grain consumed by the inhabitants for the major part of the year has been treated a staple food of the inhabitants, where it was not possible to pin-point the foodgrain or in other words, where the inhabitants have been using more than one type of foodgrains more than one names have been given

*Land Use* · As already stated the total area of the land in its 5 broad categories has been compiled from the revenue records In the first category, types of land under forests has been indicated and in the second and third information about cultivated area, irrigated or un-irrigated has been shown The irrigated area has been further split up as per the sources of irrigation Fourth being the area under cultivable waste which includes meadows, groves and pastures etc Lastly, the area not available for cultivation such as residential area, paths and un-culturable waste etc has been given

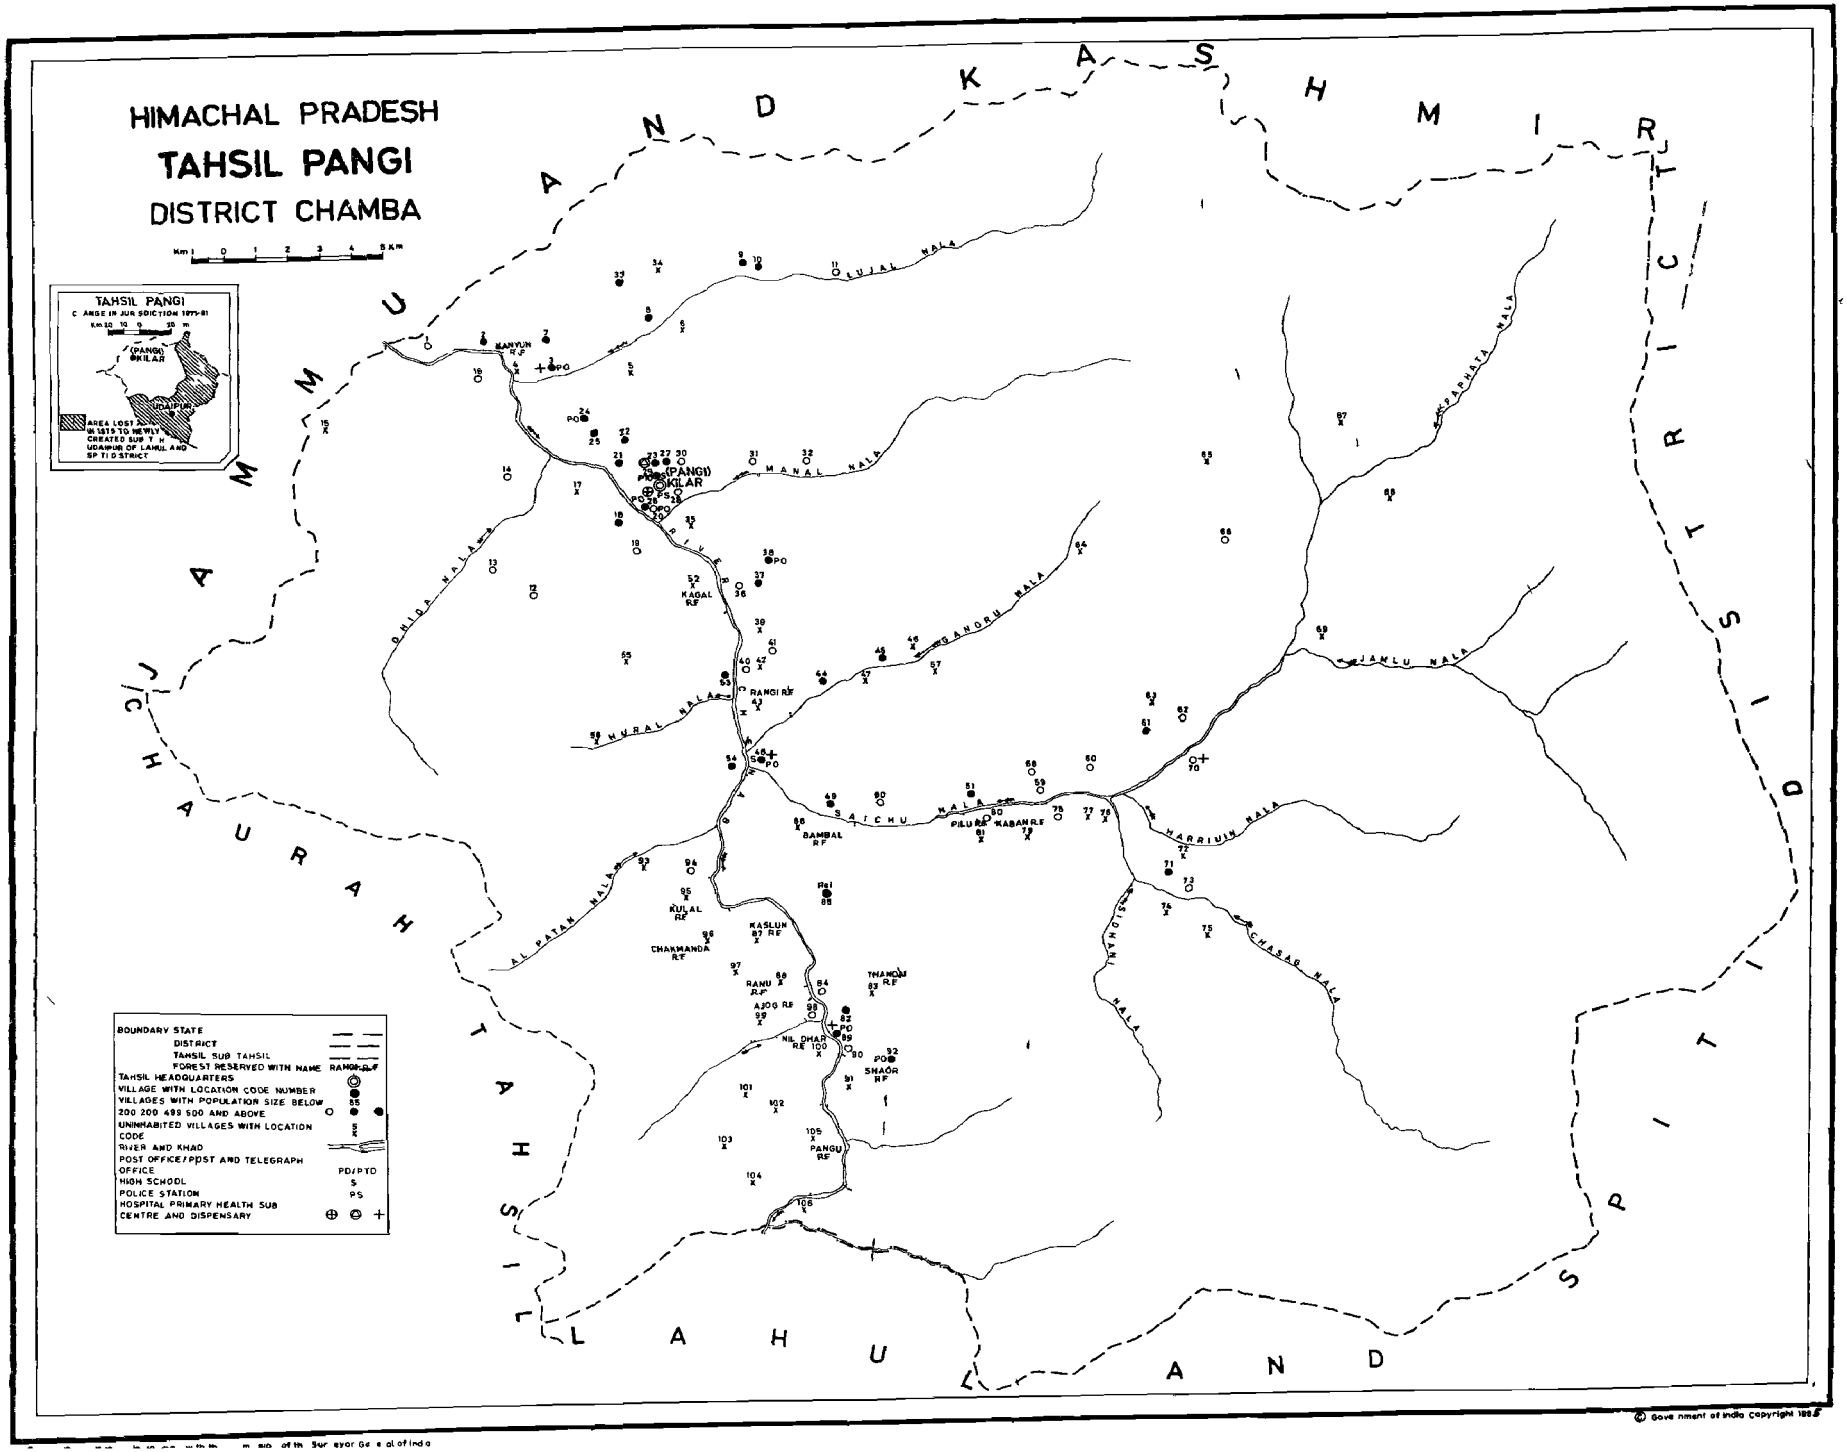

Abbreviations used for various sources of irrigation are detailed below

| | | |
|---|---|---|
| 1 | Government Kuhl/Canal | GC |
| 2 | Private Kuhl/Canal | PC |
| 3 | Well (without electricity) | W |
| 4 | Well (with electricity) | WE |
| 5 | Tubewell (without electricity) | TW |
| 6 | Tubewell (with electricity) | TWE |
| 7 | Tank | Tk |
| 8 | River | R |
| 9 | Lake | L |
| 10 | Water fall | Wf |
| 11 | Others | O |

Abbreviations used for the information collected in part-C of the Village Directory are explained below

| | | |
|---|---|---|
| 1 | Copies of newspapers coming in the village | N |
| 2 | Motor cycles/Scooters available in the village | M |
| 3 | Cars/Jeeps available in the village | C |
| 4 | Tractors available in the village | T |

*Excludes Villages with no Scheduled Tribes Population

# SECTION II TOWN DIRECTORY

As already dealt in the preceding pages, the information about Town Directory is being presented in six statements each dealing with a Particular set of information in respect of all the urban areas of the district In addition to these statements another statement IV—A depicting the data for the slum areas of the towns having a population of 50,000 or more has also been included Certain improvisations have been carried out in comparison to 1971 Town Directory in most of the statemants keeping in view the requirement of the data for various purposes and convenience for its analysis

2 The statement I relate to status and growth of the towns since 1901 Census This statement has been divided into two parts The first form columns 1 to 5 deals with the locational and area particulars, whereas columns 6 to 19 deal with the demographic particulars The column 6 gives number of households including housebless households, whereas columns 7 to 15 give population of the towns since 1901 The columns 16 gives density of population per sq km as per 1981 Census Columns 17 to 19 depict sex ratio in three Censuses since 1961 Census In this statement class of the town, area in sq. kms and number of households, density and sex ratio since 1961 are the new additions

3 Statement II—deals with the physical aspects and location of towns Broadly, this statement can be divided into two parts, first dealing with rainfall and temperature data (columns 3-5) while in the second part (columns 6-12) name and distance from State headquarter, District headquarter, Sub-division/Tahsil headquarter, nearest city with a population 1 lakh and more Railway Station, Bus route and Navigable river/canal (if within 10 kms) have been presented in respect of each town In column 2, the class of the town has been added this time to facilitate the analysis

4 The Rainfall data has been obtained from the Rainfall Table published by the Revenue Department and is based on the average of last 10 years from 1971 to 1979 Information for other columns have been obtained from the local bodies

Statement III—Data relating to civic administration status and municipal finance for the year 1978-1979 has been presented in this statement In column 3, the civic administration status in 1980 has been given whereas in columns 4 to 10 income of the local body from various sources has been presented and in columns 11 to 17 expenditure on various items is given These figures have been given in 'oo' with a view to save the printing space The class of the town has been added in column 2 Information for this statement has been collected from the concerned local body

6 Statement IV—The statement contains 19 columns Columns 2 to 6 are the new additions of this statement The statement on the one hand depicts general information about the towns like, class of the town, population, scheduled castes and scheduled tribes population and road length in kms, on the other hand elicit information relating to system of sewerage, No of different types of latrines, method of disposal of night soil, protected water supply, availability of fire fighting service and number of electric connection of dieffrent types System of sewerage and method of disposal of night soil are being presented upto two methods wherever available in order of importance and information on number of private latrines is based on estimates as no actual information was available with the local authorities The categorization of electric connections is based on the record maintained by the Himachal Pradesh, Electricity Board The source of this information, being the Public Works Department, local bodies and Himachal Pradesh Electricity Board

7 Statement IV-A-Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented Shimla is the only town which falls under this category This information is required to be presented in respect of each slum separately The information relates to population of the slum, paved roads, system of sewerage, number of latrines, method of disposal of night soil, number of tap points/public tyrants and number of domestic connections, road lighting points and others The main source for this information is the concerned local body Since there is no such town in the district as such this statement has not been included here

8 Statement V In this statement information relating medical facilities, Educational facilities recreational and cultural facilities has been presented Broadly this statement can be divided into 4 parts In part one, particulars relating to class and population has been given Part two which contains columns 4 and 5 relates to various types of medical facilities and number of beds in each type of medical institution Columns 6 to 15 deals with the various types of educational facilities available Where these facilities were not available the distance from the nearest place where it is available has been given It may also be mentioned here that in case of composite schools like Hr Secondary Schools having High, Middle and Primary Classes the same have been considered against each level In column 15 the other includes institutions like Sanskrit institutions etc The fourth part deals with the columns 17 to 20 where in particulars relating to recreational and culture facilities have been presented

9 Columns 2 and 3 deal with class of town and columns 15 and 16 deal with Aduit Literacy Centres and working women's hostel with number of seats are the new additions this time Information for this statement has been collected from the Chief Medical Officer, District Education Officer, Industries Department, Social Welfare Department and the respective local bodies

10 Statement VI -The statement depicts information relating to three most important commodities imported exported and manufactured, number of banks and number of agricultral and non-agricultural Credit Societies All the columns of the 1971 Town Directory have been retained and column relating to class of the town has been added this time The commodities have been mentioned in order of volume Information for this statement has been primarily collected from the Industries Department, concerned banks, co-operative department and the concerned local body

11 For determining the class of towns the population of each town during 1981 Census has been considered The following are the ranges for determining the class of the town

| Population range | Class |
|---|---|
| Less than 5,000 | VI |
| 5,000-9,999 | V |
| 10,000-19,999 | IV |
| 20,000-49,999 | III |
| 50,000-99,999 | II |
| 1 Lakh and above | I |

12 The details of abbreviations used in each statement is given below —

**Statement I**

# PART B-PRIMARY CENSUS ABSTRACT

**Primary Census Abstract** In this part basic population figures in respect of each village in case of rural areas and for each block in case of urban areas have been presented in 28 columns for each tahsil/town, separately Information relating to persons seeking/available for work is not being presented as contemplated earlier in columns 29 and 30 of this statement In census terminology this statement is called Primary Census Abstract

2 This Abstract can broadly be divided into five parts In the first part which contains first two columns, locational particulars in respect of each village/block have been given The first column relates to code number which has been assigned to each village within each tahsil in a particular geographical order and for each block within a town In the second column, name of each village in English and Hindi, has been given along with its Hadbast Number In urban areas, the block number has been given in this column

3 The second part of the statement relates to the information pertaining to total area, number of occupied residential houses, number of households, sex-wise distribution of population, sex-wise population of Scheduled Castes/Tribes and literacy figures of each village and for each block in case of urban areas In other words, this part primarily deals with demographic and social aspect The 3rd column deals with the total area of the village in hectares as maintained in the village revenue records For urban areas total area in sq kms down to ward has been presented In column 4, total number of occupied residential houses have been presented In this column information relating to vacant and other houses which are being used for non-residential purposes, has not been included This information is based on Abridged Houselist of 1981 enumeration unlike such other particulars which are based on houselist Column 5 deals with the total number of households in the village/block Columns 6–8 deal with the 1981 Census total and sex-wise population figures of that village/block These columns include houseless and institutional population also In columns 9-12 sex-wise population of Scheduled Castes and Scheduled Tribes have been presented Columns 13-14 deal with sex-wise literacy figures

4 The fourth part from columns 15-26 deal with the working population In columns 15-16 sex-wise main workers have been given where-as from columns 17-24 information relating to these workers into 4 broad categories of workers by sex have been presented These categories include workers engaged as Cultivators, Agricultural Labourers, Household Industry and the remaining workers which fall under the industrial classification in category III, IV, V (b) and VI to IX It may be noted here that particulars about these categories of workers are not being presented in the Primary Census Abstract itself separately In columns 25-26 sex-wise particulars of marginal workers have been presented These workers are other than the main workers and were engaged in economic pursuits for only some portion of the year The definition of which has been given in the analytical portion of this book This information is being presented in the Primary Census Abstract for the first time

5 The fifth part deals with the persons who are economically inactive and are dependent on others This information has been presented in columns 27 and 28

6 The district abstract of this information has been presented first and thereafter data in respect of each tahsil has been presented by rural and urban components separately

APPENDIX—VI

**Statement Showing Jurisdiction of Enumerator's Block in the Urban Areas**

| शहर का कोड नं० सहित नाम Name of Town with Location Code No. | वार्ड नं० Ward No | ब्लाक नं० Block No | जनगणना मकानों के अनुसार प्रत्येक ब्लाक की सीमा Jurisdiction of each block in terms of Census House Nos |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| डलहौजी (न० पा०) 1/II | | | |
| Dalhousie (M. C) 1/II | 1 | 1 | House No 1 (1) to 70 (14) |
| | | 2 | House No 71 (1) to 119 |
| | 2 | 3 | House No 1 (1) to 72 (4) |
| | 3 | 4 | House No 1 to 62 (3) |
| | 4 | 5 | House No 1 (1) to 30 |
| | | 6 | House No 1 (1) to 50 (6) |
| | 5 | 7 | House No 1 (1) 16 (7) |
| | | 8 | House No 1 to 21 (9) |
| | 6 | 9 | House No 1 (1) to 63 (2) |
| | 7 | 10 | House No 1 (1) 37 (3) |
| | 8 | 11 | House No, 1 (1) to 50 (2) |
| | 9 | 12 | House No 1 (1) to 55 (2) |
| डलहौजी (छा० बो०) 1/III | | | |
| Dalhousie (C. B) 1/III | 1 | 1 | House No 1 (1) to 52 |
| | | 2 | House No 1 (1) to 14 (2) |
| | | 3 | House No 1 (1) to 51 |
| | | 4 | House No 1 (1) to 43 (8) |
| बकलोह (छा० बो०) 1/IV | | | |
| Bakloh (C. B) 1/IV | 1 | 1 | House No 1 (1) to 84 (6) |
| | | 2 | House No 1 to 49 |
| | | 3 | House No 1 to 88 (2) |
| चुवाड़ी खास (अ० क्षे० स०) 1/V | | | |
| Chuari Khas (N A C) 1/V | 1 | 1 | House No 1 to 33 |
| | 2 | 2 | House No 1 to 41 |
| | 3 | 3 | House No 1 to 76 |
| | 4 | 4 | House No 1 to 172 |
| | | 5 | House No 1 to 182 |

# PRIMARY CENSUS ABSTRACT FOR SCHEDULED CASTES AND SCHEDULED TRIBES

**Primary Census Abstract for Scheduled Castes and Scheduled Tribes** - In this section the Primary Census data for Scheduled Castes and Scheduled Tribes for the district and for each tahsil, has also been given with a view to compare this data with the total population

# PRIMARY CENSUS ABSTRACT
