FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census The DCH is constantly referred to by planners, administrators, academicians and researchers It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town It also provides data on infrastructure and amenities in villages and towns, etc

The District Census Handbook series was initiated during the 1951 Census It contained important census tables and PCA for each village and town of the district During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA The 1971 DCH series was planned in three parts Part-A related to village and town directory, part-B to village and town PCA and part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted At the same time, comparability with the 1971 data has also been kept in view All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development A few new items of information have also been introduced to meet some of the requirements of the revised Minimum Needs Programme Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind The new item on approach to the village is to have an idea about the villages in the district which are inaccessible A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind It is expected that this will help the planner to chalk-out programmes on provision of civic amenities for the improvement of slums The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration The addition of the columns on civic administration status and population in a few statements also serves this purpose

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census

In order to avoid delay in publication of 1981 DCH series it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town levels At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value The district and tahsil/police station/C.D Block etc , level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication

This pubication is a joint venture of the State Government and the Census Organisation The data have been collected and compiled in the State under the direction of Shri K L Negi, the Director of Census Operations, Himachal Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N G Nag, Deputy Registrar General (Social Studies) of my office Dr B.K Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P PADMANABHA,
REGISTRAR GENERAL, INDIA.

New Delhi,
the 26th April, 1982.

PREFACE

The mass of data collected during 1981 Census has to be given timely concrete shape so that the utility of the data does not get minimised for the data users and this Handbook has been an endeavour towards that end

2 The District Census Handbook contains two parts Part A deals with the Village and Town Directory and Part B gives broad socio-economic data of the people of the district The District Census Handbook begins with the analytical note This note by no means is an authoritative analysis about the district but it touches a broad gamut of historical, physical and socio-economic characters of the district just to acquaint a lay reader about the district In other words, analytical note basically intends to introduce the readers about district so that it helps in forming a background about the district

3 The information in Village/Town Directory has been collected through the Revenue Agency/Civic authorities at the grassroot level in the State which was cross checked from the other concerned implementing agencies Primary Census Abstract is the compilation of the data collected in the field in 1981 Census While Part A provides glimpse of previous decade's progress, Part B gives panorama of basic data on the socio-economic conditions of the people in the district

4 The District Census Handbook is not meant to be taken in for leisure reading It is rather a Biblical reference book for data users i e the administrators, the planners and the scholars for the next decade This District Census Handbook, while on the one hand, provides a broad glimpses of past decades socio-economic changes on the other, it serves a sort of benchmark for future action plan for the Government

5 My colleagues and I shall feel amply rewarded if this book comes up to the expectation of our readers as single best source of objective information of an enduring value on this district

6 During the entire period of 1981 Census and subsequent compilation of data for this book, we had the honour of having constantly enlightened guidance and encouragement from Shri P. Padmanabha, Registrar General and the Census Commissioner, India which has enabled us to bring out this book in time But for his inspiration and personal interest it would not have been possible to timely complete this massive work

7 In anatomical completion of this book, efforts put up at various levels of the staff of this Directorate, the consolidated staff, vast number of the field enumerators, supervisors and other officials involved in 1981 Census deserve special mention and it is because of their unfailing hard work that we could achieve successful completion of this book I am undoubtedly grateful to them all

8 It indeed, was a rare opportunity for me to be associated as the author of this book I shall feel my endeavours suitably rewarded if the book proves useful to the readers

Shimla,
the 17th February, 1982.

ANALYTICAL NOTE

History.—The erstwhile Bilaspur ruling family claims its descent from Chanderwanshi Rajputs who ruled in Chanderi in the Bundelkhand region of Madhya Pradesh which now forms part of Guna district. It is said that the seventh ruler of Chanderi kingdom Harihar Chand had a dream of Goddess Jawalamukhi and decided to seek his fortune in a shrine Consequently, he handed over the kingdom to his youngest son and started proceeding towards Jawalamukhi alongwith his remaining four sons and established themselves at Jhandbhari where they constructed a fort and settled there for sometime and thereafter proceeded to Jawalamukhi They paid a visit to Nadaun, the capital of Raja of Kangra It is stated that friendly tournaments were held at Nadaun between the two Rajas in which the Chanderi King came out successful Thereafter, tent pegging context was held where the Raja of Kangra promised to give his daughter to the man who succeeded in taking a certain peg Sabir Chand, the youngest son of Chanderi King, entered the list but losing control of his horse was killed in the process of tent pegging Later on, it was detected that some deception was practised on him by Kangra Raja with the result a battle ensued between the forces of two kings where the Kangra Tikka and the Chanderi King Harihar Chand were both killed

2 The remaining three Chanderi Princes retired to the Jawalamukhi shrine where the reining Goddess appeared for whom they had long prayers and promised each of them a kingdom In fulfilment of her prophacy one of the three princes was adopted by Raja of Kumaon and the other son Gambhir Chand took possession of Chamba and the eldest son Bir Chand got Jhandheri now in Hoshiarpur district It is Bir Chand who later constructed the temple of Naina Devi and made his capital nearby this temple known Kahlur He further subjugated the local Thakurs and Ranas and extended the jurisdiction of his kingdom Kahlur and during his 33 years of rule subjugated about 15 neighbouring princely states He was ultimately checked, by Raja of Sirmaur with whom he ultimately concluded peace Thus, he carved out a kingdom of Kahlur for himself Bir Chand was followed by a number of his successors and last of them Kahan Chand conquered the Hindur State (Nalagarh) and gave it to his second son Sujeet Chand from whom the present ruling line of Nalagarh descends

3 The history of Bilaspur state has been very authoritatively dealt with by Hutchison and J Vogel in their edition "History of Punjab Hill States Volume II" which has been extracted and placed in the appendix for the benefit of the interested readers The capital of Bilaspur ruling dynasty continued at Kotkahlur until 1600 AD when the heir apparent Bik Chand fled across the Sutlej with his mother to a place called Sunhani where he settled, when his father,then ruler, Gyan Chand had embraced Islam at the behest of the Mughal Vice-Roy at Sirhind and returned to Kotkahlur after convertion Later when Raja Gyan Chand died, his son Bik Chand returned to Kotkahlur and got himself installed as the king But, he continued his capital at Sunhani on the right side of river Sutlej Later in about 1650 AD when Deep Chand of the same dynasty succeeded as Raja of Kahlur State he developed a strong dislike to the place and decided to change his capital It is said that he accompanied by 4 Faqirs 2 Hindus-2 Mohammandans sought a new site for the capital and finally fixed up at a place on the left bank of Sutlej river traditionally called "Bias Gufa" after the name of Rishi Vyas who had said to have taken penance in this Gufa There, he erected a palace called 'Dholar' overlooking the river and founded a town on the river bank which was called Bilaspur after the name of Bias Gufa which later on began to be called Bilaspur. Eversince, the capital of the Bilaspur ruling dynasty continued at Bilaspur and even after the transfer of power the capital continued to be at the same place, though, the original town established by Chandel dynasty has submerged in 'Gobind Sagar' A new township above the old one has been built to rehabilitate the displaced

4 The princely state was taken over under the Central Government administration in October, 1948 Subsequently by an act of Parliament, this was merged in Himachal Pradesh on the 1st July, 1954 which hereafter was converted into district with the erstwhile princely state's jurisdiction intact Initially, it consisted of two tahsils namely Ghumarwin tahsil and Bilaspur Sadar tahsil Now the third sub-tahsil has been created called Naina Devi sub-tahsil

5 Bilaspur had been a town in 1891 and 1901 Censuses, but, was declassified thereafter until 1931 Census when it was again classified as town Naina Devi Ji was classified as town in 1953 when a Small Town Committee was set up for the pilgrims and the local population of the locality

People.—The people consist of the early inhabitant[s] of this area and are made up of Rajputs, Brahmans and Kanets, who came alongwith them to cater to their religious needs The other sections of the people consists of *Rathis*, Gujjars, Jats, Chamars and Kolis Chamars and Kolis are the Scheduled Castes There is a sprinkling of other castes Badhis, Kabir-panthies, Lohars, Jullaha, Doomnas and Bhanjare

Nearly all the Rajputs are of the Chandel clan and offshoots of the ruling family They are usually classified as Kahluriya Mians and Chandelas

The Kahluriya Mians are those who discended from Rajas and have adopted the same name—Ajmer Chandia, Tara Chandia and Kalyan Chandia The Chandelas are other Rajputs, whose connection with the ruling family is noted in history Their families are named according to the villages held by their founders. The Kahluria Mians do not touch the plough as * to the Rajput, war was the only occupation and the only weapon was the sword

*Kangra Settlement Report page 37-38.

The main branches of the Brahmans are the Shukals and Krishans The Shukals are devided into Sasani and Dharebar and the Krishans into Acharaj, Bedwa and Panda The Sasanis are, strict and orthodox. They serve as priests to the higher castes, and are nearly all muafidars They don't intermarry with any of the Brahmans of higher hills, and not even with Parasramis Sasanis accept Dharebar girls in marriage, but they don't give their own daughters in marriage to Dharebar The Dharebars are the priests of Kanets and practise all their peculiar customs such as reet and widow remarriage. They follow the plough and are not muafidars In fact their wearing of the sacred thread is practically the only distinguishing mark of their being Brahmans

The Acharajes, Bedwas and Pandas belonging to Krishan class of Brahmans are considered inferior to Sasanis and Dharebars They accept alms from all classes and are found to be occasionally indulging in witchcraft

The Kanets are in large numbers They are said to be divided into about 80 sub-divisions, the more important being Noiru, Maharu, Dodhwalu, Bhadogul, Dalgawal, Katwal, Dagsechi, Jamhiani, Sahreli and Kasoli

Some of them claim to be descendants of various Rajas—the Maharus, whose ancestor is said to have been Tegh Chand, third son of Raja Kahn Chand—the 11th Raja The Kanets are now fast appropriating to them the status of Rajputs and consider themselves to be at par with them

The Rathis of Bilaspur are believed to be the descendants of Rajputs and Kanet mothers Their sub-divisions are Maharani, Baroti, Bandri, Dhuli, Bharol, Lohtri, Rajnal, Charial, Sin, Basahri, Ikthania, Tania and Kharial

Gujjars have been declared as Scheduled Tribes in the old areas of State The Hindu Gujjars have more or less settled on land and follow the plough In their case, the rearing of cattle is really a subsidiary occupation, agriculture being the primary one The Muslim Gujjars more or less follow a nomadic life, the men tending the cattle in the forests and the women attending to the sale of milk products In summer they move to higher hills in search of new pastures and in winter they come to Bilaspur They form the floating population

The Chamars carry on trade in leather and the Kolis are weavers, although occasionally they may be be trading in leather shoes They also furnish the agriculture labour Generally speaking they do not hold land

Language—The spoken dialect of the people is Kahluri which is an offshoot of Punjabi Grierson calls it "Rude Punjabi" similar to that spoken in Hoshiarpur district The written script is "Devnagri"

In the Royal Asiatic Society Park Street Calcutta Volume XVII, Rev T Grahme Bailey describes Bilaspuri as.

"There are in all six dialects spoken in Bilaspur, or Kahlur as the State is sometime called (Plate 3) In the centre of the State extending to a distance of six or seven miles in every direction from the Capital is the standard dialect of Bilaspuri or Kahluri Immediately to the west of this, in the portion of the State which juts out westwards and is bounded on the north by the district of Kangra, we find a dialect which we may call Western Bilaspuri To the north of the standard dialect are found two minor dialects that to the west near the Kangra border, to which we may give the name Northern Bilaspuri, while that on the east near the Mandi border is the same as Mandiali which has been treated in the Language of the Himalays Immediately south of the area of the standard dialect the people speak a slightly different dialect which I have called Southern Bilaspuri, it is a narrow strip of country on the Nalagarh border, and to the east of this in south-east Bilaspur is found a dialect locally known as Dami. It extends over the border into Arki State and beyond it commences the Kiunthali dialect which is spoken all over the Central Simla States"

"The Bilaspur dialects are so closely allied that one might call them one dialect Bilaspuri or Kahluri. I have preferred the former name as the State is much better known to the outside world as Bilaspur, the name Kahlur hardly being known to any one who has not visited the State"

Social and Cultural events—The people of the district celebrate various festivals almost round the year Hardly a month passes on without one type or the other type of festival being celebrated in one part of the district or the other Amongst the predominantly celebrated festivals, Baisakhi is one It is celebrated in the month of April throughout the district In fact, the year begins with the celebration of Basant-panchvin in the month of January/February which heralds the end of the winter and the beginning of the spring Another fair known as Haryali is celebrated in the month of July to heralds as the name suggests green-ness and verdure The festival known as the Janamashtmi, the anniversary of Lord Krishna's birth day is celebrated in August/September every year which begins with community singing of religious songs and worship in the temples for long hours Elderly people and the ladies keep fast on this day Dussehra is celebrated in the month of October which begins with the staging of Ram Lila in various central places of the tahsils On the last day the effigy of Ravana is burnt which entails lot of rejoicing both amongst the young and the old alike Diwali festival is celebrated in the month of October/November which commemorates the victory of Rama over Ravana and the return of Rama to Ayodhya and the celebration of Diwali with illumination Apart from these predominant fairs, there are lot of other festivals celebrated at the household level like Lohri, Shivratri, etc

2 The district has to well known pilgrimage centres, one is the Markand and the other Shri Naina Devi Ji The Markand pilgrimage centre is situated in the Sadar tahsil of Bilaspur district and a temple in the memory of the sage Markandey exists there It is so called because this was a place of birth of renowned Rishi known as Markandey who was believed to be

contemporary to Rishi Vyas of Mahabharta fame There are two holy tanks here It is popularly believed that the father of Markendey had performed penance to Brahma to fulfil his desire of son at this place which was ultimately fulfilled Now the people come from far of places particularly in the spring season to earn Divine grace to be blessed with sons and get immunity from diseases and difficulties In fact, the temple was construted at the time of Raja Jagat Chand by Bhajan Dass with the help of Raja Jagat Chand The mother of Raja Anand Chand has constructed a Thakur-Dwara in fulfilment of her woe for a son

3 Another centre of great pilgrimage is Naina Devi Ji which is located at the top of triangular hill commanding unparalled down hill upto Anandpur Sahib on the one side and the massive 'Gobind Sagar' on the other The Himachal Government has created a separate sub-tahsil known as Naina Devi sub-tahsil in reverance of Goddess Durga There are different versions of the coming up of this temple According to one belief Raja Daksh out of pride did not invite his son-in-law Lord Shiva to a Yajna This, his daughter took an offence and burnt herself into the fire Shiva being informed, rushed to this sacrificial fire and to his amazement found her half burnt In desparation Shiva carried her half burnt body on his shoulders from one hill to another in the Himalayas Her charred mortal remains dropped one by way from place to place and in the course of this, perhaps, her eyes (Nain) were said to have fallen on this hill where later on, the Lord Shiva constructed a temple which ultimately gained the eminence of Naina Devi temple Another version goes that the temple was built by Pandavas The third legend that the Goddess Naina was discovered by a Gujjar

4 Guru Gobind Singh, the 10th Guru, had also visited this temple and spent sometime A week long Sharavana Ashtami Fair is held here every year when lacs of pilgrims from Punjab, Haryana and Himachal Pradesh throng over this holy place singing devotional songs and journey towards the temple by prostrating themselves

5 The various fairs are celebrated with great rejoicing throughout the district Some of them as already mentioned have predominantly religious overtones like the Markand fair, Naina Devi fair which have already been discussed Similarly, another fair known as Guga fair is celebrated at Geharwin in commemoration of Guga, a Hindu Rajput Prince who in his youth subdued his enemies most heriocally It is commonly believed that the worship of Guga wards off danger from snakes Other comparatively less known fairs are Chakrana fair at village Chakrana and Bharnot fair at Bharnot in Geharwin block, Baisakhi bath at Bachhretu in Geharwin block and Baisakhi fair at Hatwal in Ghumarwin tahsil

6 The most important non-religious fair is the Nalwari Fair which is celebrated in the month of April The Nalwari Fair is inseparably attached with the cattle wealth It was commenced for the first time about 93 years ago by Mr W Goldstein, Superintendent of Simla Hill States to afford opportunity to the rural people to exchange bullocks.

7 The first mela was held in 1889 in Bilaspur while bullocks from erstwhile states of Patiala and Nalagarh and Una and Ropar tahsils were brought here and were purchased by the agriculturists of Mandi, Suket, Kangra and other locals This legacy eversince continued unabated till today However, since 1934 the mela was given new dimension by adding to it the activities like sports, games and cultural shows by the State Government

8 The Bilaspur district intially constituted of two tahsils of Bilaspur Sadar and Ghumarwin In January, 1980, the State Government created a separate sub-tahsil called as Naina Devi sub-tahsil with headquarters at Swarghat out of Bilaspur Sadar tahsil. Thus, the district now has two tahsils and one subtahsil

Food and Dress :—The staple food is maize, rice and occasionally wheat Maize is favourite and is constantly eaten from September to May Rice may also be taken once a day The agricultural classes have three meals a day Early in the morning they have some maize or wheat bread left over from the last evening This is called 'Datialu' and forms the breakfast The mid-day meal consists of maize or wheat bread taken with some dal and chhachh. In the evening rice is taken if one can afford it otherwise the same maize bread is again served with some dal and vegetables Meat is not taken so frequently There is no organised effort to rear poultry birds although some people do rear them.

No heavy clothing is required Ordinarily clothing for men consist of a shirt and a dhoti or pyjama The turban has now been replaced by a type of Gandhi cap More often people now go bare headed The upper classes have started using better clothing mostly bushirts and trousers

In winter people use woollen clothes prepared from home spun wool which is locally woven In summer khadar or cheap mill made cotton cloth is used When villagers attend any fair or festival they are attired in their best

The women wear a long shirt and pyjama or suthan The head is covered with a coloured dopatta. The punjabi kameez and salwar is more commonly to be widely used now and cheap rayons or nylons are used for dopattas'

Housing and Furniture :—In rural Bilaspur the houses are mostly built of mud, stone and brick plastered inside and outside with clay They are generally double-storeyed with windows The roofs are thatched with either bamboo leaves or grass Occasionally slates are used. Now more houses have C.G I sheets The upper floor is used for storing and as living rooms The lower storey is used more as living rooms Cattle are kept separately The temple of the village deity is nearly always pucca

The household furniture is made up of stringed cots and manjris or rice stalks or date palms It is seldom that some one keeps a chair, a table or any item of modern furniture. Household utensils are of brass

and bronze Earthen-wares and wooden vessels are used. One or two wooden boxes or steel trunks are kept and used for keeping valuables and clothes

Physical features :– The Bilaspur district is predominantly situated in the basin of river Sutlej It lies between 31°12'-30" and 31°35'-30" north latitude and between 76°23'-45" and 76°55'-40" east longitude According to Central Statistical Organisation it has an area of 1,167 sq kms Its largest length from east-west is 29 miles and breadth from north to south is 26 miles

2 The district is almost equally half divided by river Sutlej and is bounded on the north by Mandi and Hamirpur districts, on the west by Una and Hamirpur districts, on the south by Nalagarh tahsil and on the east by Arki tahsil thereby giving oblong configuration The district is cris-crossed by low hills and deep valleys, the highest hill point is called Dhar Bahadurpur which is at 6,378 ft above from sea level and the lowest point is about 1,000 ft from sea level The district is divided into seven Dhars (hills) popularly called Dhar Naina Devi, Dhar Kot, Dhar Tuini, Dhar Bandla, Dhar Jhinjiar, Dhar Ratanpur and Dhar Bahadurpur Of these seven Dhars, the principal Dhar is Naina Devi where the Kotkahlur, the ancient capital of the state, had been situated

River System :—The principal river that passes through the district is the Sutlej river which divides the district almost into two equal halves It enters the district near Kasol in the north-east and traversing it in a course of 56 miles leaves at near Naila in the south-west The Sutlej river is joined by seven tributaries from both sides There are three main tributaries known as Ali khad, Gamrola khad and Sir khad The length of Ali khad is round 16 miles It rises in Shimla district and passes through Bahadurpur Dhar joining the river Sutlej at Bilaspur The water is used for irrigating land, for running gharats etc , on its way by the people Gamrola khad also rises in Shimla district and after draining Ratanpur Dhar joins the river Sutlej nearly 4 kms downwards from Bilaspur town This river is also useful to the people for irrigating land Sir khad takes its origin at Wah Devi, six miles off tahsil Sarkaghat in Mandi district After draining Kot-ki-Dhar and a greater portion of Ghumarwin tahsil it joins the river Sutlej at Serimatla, a few kilometres downwards Bilspur

Two small khads known as Sukar and Saryali rise in the Hamirpur district and join Sir khad at village Balgar after draining the western portion of the district The last khad being the Gambhar khad rises in Solan district, but, river bed being very deep is not of a much use

Geology :—Geologically, most of the area of Bilaspur district is covered by comparatively younger strata, representing the Tertiaries and Quarternary rocks and it is only in the eastern portion that the older rocks belonging to earlier period are found The older formations have thrust contact with the Tertiaries The following table gives the geological sequence in this area

Alluvium, sand beds, boulders

Older alluvium, gravel terraces sand beds etc

Upper-Boulders beds, sand rocks and soft clays

Middle-Sand stones and clays, sandstones much indurated

Lower-Concretionary, clays (Nahans) (Streaked-purple)

Purple sandstones and purple and dark clays
Greenish sandstones and clays

Olive-green shales, fossiliferous limestones, etc.

Cherty limestones and dolomite with shale

Yellowish, greenish earthy shales and clays
Greyish, pink, earthy and buff massive dolomite
Hard, greyish massive dolomites and limestones
Pink, limestone, thin banded at base
Dolomites, shaly limestones with some slates
Pink, pale pink quartzites, strongly ripple marked, inter-bedded red gritty shales

Rocks and places according to Geological Sequence

Forests:—The forests of the Bilaspur district can be divided in three broad categories (1) Chil forests (2) Scrub jungle and (3) Bamboo forests The Chil forests are found on 2,000 to 5,000 feet elevation on the north and north-east aspects of the main ridges They

are found on the tertiary sand rocks of the Kasauli formations while the scrub jungles contain a great many species of which the most important are Sheesham and Tun These occur at low elevation generally near the cultivated lands and a good many of them are also found on the banks of the Sutlej river The bamboo forests are found on 1,200 to 3,000 feet elevation Most of these forests cover a large portion of the northern slope of Naina Devi Dhar The main varieties of bamboo are small, khurri and the large bans A third specie called nal bans used to be extensively cultivated by the villagers near the villages

2 The principal marketable forest products are Chil timber, bamboo, rosin, Bhabar grass and Katha Bhabar grass is found in Naina Devi Dhar which is used for rope making, rafting timber and thatching

3 The forests have been broadly classified into reserve, undemarcated protected and demarcated protected forests Many measures are being adopted by the Forest Department to check indiscriminate felling or lopping of the forests and supplant in a phased manner the uneconomical forests into economically useful forests The various botanical names of the trees/shrubs/climbers are given below

List of Common trees, shrubs and climbers found in the forests of Bilaspur Forest Division

Family	*Botanical Name*	*Local Name*
Acanthaceae	Adhatoda-vasica	Basuti
Amarilli daceae	Agavasisalana	Kohar Patha
Ana cardia ceae	Rhus-cotinus	Tung
	Rhus-parvifolia	Amb
	Mangifera Indica	
	Pistacia-integetrima	Kakar Singi
	Lannea-Coromandelica	Salambra
Apocynaceae	Carissa-opaca	Garna
	Holarrhena-antidysenterica	Keor
	Nerium-odorum	Ghanira
	Vallaris-solanacea	Kali Dudhali
	Ichnocaxpus-frutascens	Bakarbel
Asclepiadaceae	Cryptolepis-buchanani	Dudhli
	Calotropis-procera	Ak
	Tylopnora-hirsuta	Tuni
Araliaceae	Hedera-nepalensis	
Berberidacea	Berberis-lycium	Kasmale
	Berbenis-aristala	Kasmale
Bexaceae	Flacoutia-indica	Kangu
Bignoniaceae	Stereospermum-pusonatum	Padal
	Oroxylum-indicum	Tatplanga
Boraginaceae	Ehretia-lacvis	Chamrot
	Cordia-dichotoma	Lasura
Caprifoliaceae	Viburnum-cotinifolium	
	Lonicera-quinquelocularis	
	Abelia-triflora	
Cactaceae	Opintia-monacantha	Chhitaar Thohar
Capparidaceae	Capparis-zeylancia	
	crataeva-reldgiosa	Barna

	Ficus-religiosa	Pipal
	Ficus-palmata	Dagla
	Ficus-cunia	
	Ficus-glomerata	Gulliar
	Ficus-roburghi	Tiamli
Verbenaceae	Vitex-negundo	Bana
	Lantana-camera	Pardessi Buti
	Premna-latifolia	Bakar
	Clerodendron-infor-tunatum	Motia
	Gmelina-arborea	Kunubar
	Tectona-grandis	Sagwan(Introduced)
Vitaceae	Vitis-semicordata	

Fauna —The commonly found carnivorous animal is panther called Bagh which is found around Naina Devi, Naswar and Bachhretu areas

2 There are considerable number of herbivorous animals, the common names being Ghoral, Barking Deer or Kakkar, Sambhar, wild goats, porcupine, flying squirrel Some of the other species of the animals being Himalayan fox, wild cat, mongoose, monkeys and langoors Amongst the birds, the popular species being red jungle-fowl, pea fowl, partridge, and quils pheasant(chakor, doves and pigeons)

3 Some of the acquatic birds like ducks and geese are said to come from long distances to Gobindsagar Amongst reptiles are the common krait, rat snakes, water snakes, grass snakes, etc

Mines and Minerals —The industrial survey report of Himachal Pradesh bring out enormous deposits of limestone, clay, quartzites suitable for various industries in the district which has been hitherto lying dormant because of the non-exploitation Traces of iron, gold, lignite, pyrite, gypsum and slates have been found

2 Limestones deposits are found in Panjgain, Bandla, Kothipura, Logad, Bari and Burmana Sand deposits have been traced throughout the district along with Sutlej river basins So, also the Bajri. Bolder stones are found on a commercial scale in Ghumarwin tahsil. Sample scale lignite have been noticed near Delag, iron near Ratanpur, gold in streams/rivers Gold pyrite and gypsum are found in Malyawar forests, quartzites in Sungal, Bandla, Chamlok, Sulag, etc

Electricity and Power —The entire district derives its power/electricity requirements from the Ganguwal Hydro Electric Power House Ending March, 1981, there were as many as 28,056 power/electricity connections in the entire district of which domestic connections constituted 25,131, commercial connections, 2,336, industrial connections 315, power for agriculture connections 264 and the rest 10. The district is connected with 33 KV transmission system from Ganguwal Power House which further extends to Mandi and Kullu.

2. The famous Bhakra Dam Power Plants are situated in Bilaspur district The Bhakra Dam has two

power plants, one on the left bank and other on the right bank The left bank power plant has 5 generating units of 90 MW each and the right bank power plants has 5 generating units of 120 MW each All the generating units have been completed and commissioned in April, 1969, though, few of the generating units were completed by 1966. The distribution of the power from these units is managed by the Bhakra Management Board constituting of the representatives from the surrounding beneficiary states

Land, Land use pattern and Tenancy —Before the introduction of the Himachal Pradesh Abolition of Big Landed Estates and Land Reforms Act, 1953, there were three types of tenancy system prevalent in the district (1) Zamindari (2) Pattedari and (3) Bhai-chara But, with the promulgation of the aforesaid Act, the Zamindari has been abolished and the tenants who were the actual cultivators of the lands have been conferred the proprietary rights Even, wherever the tenancy existed in one garb or the other, objection at will by the landlord has been made difficult and the rights of the tenants for occupancy secured

2. In order to do away with the uneconomical holdings, the State Government had also initiated consolidation of holdings under the Consolidation of Holdings Act and accordingly bulk of the uneconomical holdings has been done away According to agriculture census report 1976-77, the number and area of operational holdings in the district has been given as under

Size of Holdings	*Number*	*Area (Hects)*
1	2	3
Below 0.5 Hect.	9,498	2,816
0 5—1 0 Hect.	8,759	6,446
1.0—2 0 Hect	9,364	13,508
2.0—3 0 Hect.	4,344	10,493
3 0—4 00 Hect.	1,977	6,697
4 0—5 00 Hect.	1,019	4,503
5 0—7.5 Hect	833	4,968
7.5—10.00 Hect	173	1,447
10.0—20.00 Hect.	84	1,060
20 0—30 00 Hect	4	92
30.0—40.00 Hect.	2	74
40 0—50 00 Hect	1	47
50 00 and above Hect.	.	
Total	36,058	52,151

Agriculture —Agriculture in Bilaspur district is the avocation of the largest number of people constituting almost 88 per cent of the total population But, bulk of the land is under dry farming because of the lack of irrigational facilities

2. Lot of developmental activities like the Small Farmers Development Agency Programme and Rural Integrated Development Programme have been introduced to boost up the economy of the overwhelming agricultural population of the district

3 Under the Small Farmers Development Agency, small and marginal farmers are supplied agricultural implements like ploughs, chaff cutters, thrashers, diesel engine, etc Under the animal husbandry programme of the same scheme jersey cows, buffaloes, sheep, pigs and poultry birds are provided to the small and marginal farmers on 30 per cent and 33⅓ per cent subsidized rates In addition to the aforesaid programme, under the Rural Integrated Development Programme in all three blocks of Sadar Bilaspur, Ghumarwin and Geharwin, additional help is being rendered to small and marginal farmers regarding agricultural implements, animal husbandry etc In another scheme which provides employment to the population is the soil conservation programme where the soil conservation of the agricultural land is being carried out by the Agriculture Department/Forest Department whereas in Government land the Forest Department undertakes the soil conservation Under the centrally sponsored scheme of River Valley Project, the programme is carried out in a selected micro water sheds approved by the Government of India and land development is executed under the State sector in rest of the catchment area The scheme involves reclamation, remodelling of existing terraces and construction of new terraces and minor irrigation works by constructing check dams etc

4 The role of the Agriculture Department in introduction of improved varieties of seeds is considerable Apart from improving varieties, equal emphasis is being laid on the multi-cropping system so as to increase the production and income of the farmers. Wheat is the main rabi crop of the district and along with it emphasis is being laid with considerable success to sow gram in the wheat fields under the multi-cropping pattern The various varieties being introduced are Sonalika (S-308, RR-21, RD-1553) It is recommended by the Agriculture Department for timely and late sowing and under irrigated conditions in the valleys, lower and mid hills areas as well as in dry temperature track This is a high degree resistant plant. It matures early and also easy in thrashing. VL-421 is newly released high yielding variety which is recommended for cultivating in low and medium rainfed conditions in the low and mid hills to replace the existing Kalyan Sona (K-227, RD-1593). Yet another variety recommended is Shailza It has been recommended for timely sowing under irrigated conditions in the valleys and low hill areas. It is a double dwarf variety of wheat

5 As already mentioned, gram is the major rabi pulse crop of the district and also being encouraged to be sown with wheat under the introduction of multi-

cropping system Apart from the aforesaid crops, other rabi pulses/oilseeds are the brown sarson, toria, raya which collectively called as rape seeds, the varieties being BS H1 (brown sarson Haryana-1), Toria DK 1, Raya Varuna

6. The predominant kharif crops of the district are maize, paddy and pulses The improved variety of the paddy is HIMDHAN This variety of the paddy was released in 1978 by Himachal Pradesh Agriculture University, Palampur This variety can be grown successfully upto 4,500 ft height from sea level Another variety introduced is CHINA 988 This variety can be grown both in irrigated as well as rainfed areas It is a short duration crop with the result has very fast germination capacity and withstands drought considerably Still another variety being introduced is IR-579 which was released in 1971 It is a dwarf-cum-high yielding variety of paddy, other varieties in the district being Norina-18, R-575 and T-23 T-23 is selection from desi-basmati group of varieties suitable for cultivating under irrigated conditions upto an altitude of 1,000 metres

7 Other improved varieties being introduced in the district are Himalaya-1 and Himalaya-2

8 As already stated maize is one of the main important crop in the district Apart from local variety of maize, 2 improved varieties have been introduced-one early composit. It has been recommended for cultivating in the areas lying between upto 415 metres above sea level. The plant is medium tall with thick stamp Yield average is 33 quintals per hectare compared to 24 quintals per hectare of the local variety Another being the Vijay variety which matures within 110 to 120 days The plant is tall vigorous and has dark green leaves. VI 421 is double cross hybrid maize suitable for high hill areas The plant is medium tall The kharif pulses are mash, rajmash, soyabeen etc Improved varieties being introduced are mash-Kullu-4, T-9, Moong-shining moong No 1, Rajmash Him-1, HPR-12(Jawala)

9 Amongst the vegetables grown during the kharif season are tomato-Solan Gola variety, Shimla-mirch of california wonder variety and chillies of Solan yellow variety, brinjal of pusa purpule black beauty, bhindi of pusa saweni, beans of premier variety and kentucky wonder variety

10. The cash crops are predominantly ginger in Namhol area, peas of Arkol variety and to a little extent tobacco and cotton which are grown in some parts of the district

11 There are 2 seed Multiplication Farms in Bilaspur district-one at Auhar situated on the Bilaspur-Hamirpur road with a cultivable area of 15 80 hectares, the second farm is situated at Deoth at a distance of 16 kms from Bilaspur on Shimla road This farm has a total cultivable area of 9 02 acres Both these farms grow and multiply seeds of different cereal and pulse crops During 1978-79 to 1980-81 opium cultivation was also practised in these farms and an average yield of 73 Kgs per hectare were obtained which was said to be the highest in India The third farm known as Luhnu Vegetable Nursery Farm is situated about 1 km away from Bilaspur. On this farm vegetables are grown along with other seed multiplication activity In this farm the off season onion crop and peas Arkol are being experimented which has given very good results

Horticulture —The popularisation of horticulture in the district is being done primarily through the Government Progeny-cum-Demonstration Farms In Bilaspur district there are 6 progeny farms, one at Nihal, other at Nihari, 3rd at Baroha, 4th at Saloha, 5th at Kot-Kahloor and the last farm being at Guru-ka-Lahore These farms provide better progeny to the farmers and the farmers are also given training regarding the latest horticulture practices on these farms The progency that are being propagated on these farms for the benefit of the agriculturists of the district are Lemon, Galgal, Guava, Peaches, Appricot, Mango and Papaya etc Though the horticulture movement is still at nascent stage, nonetheless, the farmers have taken the propagation of aforesaid varieties of fruits in the right earnest and the time will come that the aforesaid efforts of the Government combined with positive public response will surely improve the economy of the district to a considerable degree

Irrigation —In Bilaspur district the cultivable land to the extent of as much as about 88 per cent is under dry cultivation and only about little over 8 per cent of the land is covered under irrigation The land being terraneous and lack of perennial rivers, the irrigation system in the district is very modest Bulk of the dry land has been covered under lift irrigation system As many as 39 lift irrigation schemes have been completed which cover an irrigated land of 10 to 324 acres under each scheme

Animal Husbandry —According to 1977 Cattle Census of the State, there are 225,000 animals in the district This is apart from the 18,275 poultry birds in the district In the entire district there are 10 Vety Hospitals, 15 Vety Dispensaries, 1 Mobile Dispensary, 2 Semen banks and 15 Artificial Insemination Centres

2 There is a livestock farm at Kothipura which is at the ditance of 12 kms from Bilaspur It was established in 1958 to begin with as a goat breeding farm which has been converted into jersey cattle breeding since 1972 It was established with a view to undertake pure breeding of imported jersey milk cattle for production of pedigree bull/calves and heifers On an average, 40 male calves are supplied every year for breeding through artificial insemination and natural way

3 The training is also imparted to the farmers on this farm in the improvement of animal husbandry practices The farm grows leucena plants extensively to meet the fodder requirements and also for demonstration purpose and the nurseries of plants are distributed to the farmers This apart, a bio-gas plant has been also set up for demonstrating to the farmers to meet the gas requirements for cooking

power plants, one on the left bank and other on the right bank The left bank power plant has 5 generating units of 90 MW each and the right bank power plants has 5 generating units of 120 MW each All the generating units have been completed and commissioned in April, 1969, though, few of the generating units were completed by 1966 The distribution of the power from these units is managed by the Bhakra Management Board constituting of the representatives from the surrounding beneficiary states

Land, Land use pattern and Tenancy —Before the introduction of the Himachal Pradesh Abolition of Big Landed Estates and Land Reforms Act, 1953, there were three types of tenancy system prevalent in the district (1) Zamindari (2) Pattedari and (3) Bhai-chara But, with the promulgation of the aforesaid Act, the Zamindari has been abolished and the tenants who were the actual cultivators of the lands have been conferred the proprietary rights Even, wherever the tenancy existed in one garb or the other, objection at will by the landlord has been made difficult and the rights of the tenants for occupancy secured

2 In order to do away with the uneconomical holdings, the State Government had also initiated consolidation of holdings under the Consolidation of Holdings Act and accordingly bulk of the uneconomical holdings has been done away According to agriculture census report 1976-77, the number and area of operational holdings in the district has been given as under

Size of Holdings	*Number*	*Area (Hects)*
1	2	3
Below 0 5 Hect.	9,498	2,816
0 5—1 0 Hect	8,759	6,446
1 0—2 0 Hect	9,364	13,508
2 0—3 0 Hect	4,344	10,493
3 0—4 00 Hect	1,977	6,697
4 0—5 00 Hect	1,019	4,503
5 0—7 5 Hect	833	4,968
7.5—10 00 Hect	173	1,447
10 0 —20 00 Hect.	84	1,060
20 0—30 00 Hect	4	92
30 0 —40 00 Hect	2	74
40 0 —50 00 Hect	1	47
50 00 and above Hect		
Total	36,058	52,151

Agriculture —Agriculture in Bilaspur district is the avocation of the largest number of people constituting almost 88 per cent of the total population But, bulk of the land is under dry farming because of the lack of irrigational facilities

2 Lot of developmental activities like the Small Farmers Development Agency Programme and Rural Integrated Development Programme have been introduced to boost up the economy of the overwhelming agricultural population of the district

3 Under the Small Farmers Development Agency, small and marginal farmers are supplied agricultural implements like ploughs, chaff cutters, thrashers, diesel engine, etc Under the animal husbandry programme of the same scheme jersey cows, buffaloes, sheep, pigs and poultry birds are provided to the small and marginal farmers on 30 per cent and 33½ per cent subsidized rates In addition to the aforesaid programme, under the Rural Integrated Development Programme in all three blocks of Sadar Bilaspur, Ghumarwin and Geharwin, additional help is being rendered to small and marginal farmers regarding agricultural implements, animal husbandry etc In another scheme which provides employment to the population is the soil conservation programme where the soil conservation of the agricultural land is being carried out by the Agriculture Department/Forest Department whereas in Government land the Forest Department undertakes the soil conservation Under the centrally sponsored scheme of River Valley Project, the programme is carried out in a selected micro water sheds approved by the Government of India and land development is executed under the State sector in rest of the catchment area The scheme involves reclamation, remodelling of existing terraces and construction of new terraces and minor irrigation works by constructing check dams etc

4 The role of the Agriculture Department in introduction of improved varieties of seeds is considerable Apart from improving varieties, equal emphasis is being laid on the multi-cropping system so as to increase the production and income of the farmers. Wheat is the main rabi crop of the district and along with it emphasis is being laid with considerable success to sow gram in the wheat fields under the multi-cropping pattern The various varieties being introduced are Sonalika (S-308, RR-21, RD-1553) It is recommended by the Agriculture Department for timely and late sowing and under irrigated conditions in the valleys, lower and mid hills areas as well as in dry temperature track This is a high degree resistant plant It matures early and also easy in thrashing VL-421 is newly released high yielding variety which is recommended for cultivating in low and medium rainfed conditions in the low and mid hills to replace the existing Kalyan Sona (K-227, RD-1593) Yet another variety recommended is Shailza It has been recommended for timely sowing under irrigated conditions in the valleys and low hill areas It is a double dwarf variety of wheat

5 As already mentioned, gram is the major rabi pulse crop of the district and also being encouraged to be sown with wheat under the introduction of multi-

cropping system Apart from the aforesaid crops, other rabi pulses/oilseeds are the brown sarson, toria, raya which collectively called as rape seeds, the varieties being BS H1 (brown sarson Haryana-1), Toria DK 1, Raya Varuna

6 The predominant kharif crops of the district are maize, paddy and pulses The improved variety of the paddy is HIMDHAN This variety of the paddy was released in 1978 by Himachal Pradesh Agriculture University, Palampur This variety can be grown successfully uptil 4,500 ft height from sea level Another variety introduced is CHINA 988 This variety can be grown both in irrigated as well as rainfed areas It is a short duration crop with the result has very fast germination capacity and withstands drought considerably Still another variety being introduced is IR-579 which was released in 1971 It is a dwarf-cum-high yielding variety of paddy, other varieties in the district being Norina-18, R-575 and T-23 T-23 is selection from desi-basmati group of varieties suitable for cultivating under irrigated conditions upto an altitude of 1,000 metres

7 Other improved varieties being introduced in the district are Himalaya-1 and Himalaya-2

8 As already stated maize is one of the main important crop in the district Apart from local variety of maize, 2 improved varieties have been introduced-one early composit It has been recommended for cultivating in the areas lying between upto 415 metres above sea level The plant is medium tall with thick stamp Yield average is 33 quintals per hectare compared to 24 quintals per hectare of the local variety Another being the Vijay variety which matures within 110 to 120 days The plant is tall vigorous and has dark green leaves VI 421 is double cross hybrid maize suitable for high hill areas The plant is medium tall The kharif pulses are mash, rajmash, soyabeen etc Improved varieties being introduced are mash-Kullu-4, T-9, Moong-shining moong No 1, Rajmash Him-1, HPR-12(Jawala)

9 Amongst the vegetables grown during the kharif season are tomato-Solan Gola variety, Shimla-mirch of california wonder variety and chillies of Solan yellow variety, brinjal of pusa purpule black beauty, bhindi of pusa saweni, beans of premier variety and kentucky wonder variety

10 The cash crops are predominantly ginger in Namhol area, peas of Arkol variety and to a little extent tobacco and cotton which are grown in some parts of the district

11 There are 2 seed Multiplication Farms in Bilaspur district-one at Auhar situated on the Bilaspur-Hamirpur road with a cultivable area of 15 80 hectares, the second farm is situated at Deoth at a distance of 16 kms from Bilaspur on Shimla road This farm has a total cultivable area of 9 02 acres Both these farms grow and multiply seeds of different cereal and pulse crops During 1978-79 to 1980-81 opium cultivation was also practised in these farms and an average yield of 73 Kgs per hectare were obtained which was said to be the highest in India The third farm known as Luhnu Vegetable Nursery Farm is situated about 1 km away from Bilaspur. On this farm vegetables are grown along with other seed multiplication activity In this farm the off season onion crop and peas Arkol are being experimented which has given very good results

Horticulture —The popularisation of horticulture in the district is being done primarily through the Government Progeny-cum-Demonstration Farms In Bilaspur district there are 6 progeny farms, one at Nihal, other at Nihari, 3rd at Baroha, 4th at Saloha, 5th at Kot-Kahloor and the last farm being at Guru-ka-Lahore These farms provide better progeny to the farmers and the farmers are also given training regarding the latest horticulture practices on these farms The progency that are being propagated on these farms for the benefit of the agriculturists of the district are Lemon, Galgal, Guava, Peaches, Appricot, Mango and Papaya etc Though the horticulture movement is still at nascent stage, nonetheless, the farmers have taken the propagation of aforesaid varieties of fruits in the right earnest and the time will come that the aforesaid efforts of the Government combined with positive public response will surely improve the economy of the district to a considerable degree

Irrigation — In Bilaspur district the cultivable land to the extent of as much as about 88 per cent is under dry cultivation and only about little over 8 per cent of the land is covered under irrigation The land being terraneous and lack of perennial rivers, the irrigation system in the district is very modest Bulk of the dry land has been covered under lift irrigation system As many as 39 lift irrigation schemes have been completed which cover an irrigated land of 10 to 324 acres under each scheme

Animal Husbandry —According to 1977 Cattle Census of the State, there are 225,000 animals in the district This is apart from the 18,275 poultry birds in the district In the entire district there are 10 Vety Hospitals, 15 Vety Dispensaries, 1 Mobile Dispensary, 2 Semen banks and 15 Artificial Insemination Centres

2 There is a livestock farm at Kothipura which is at the ditance of 12 kms from Bilaspur It was established in 1958 to begin with as a goat breeding farm which has been converted into jersey cattle breeding since 1972 It was established with a view to undertake pure breeding of imported jersey milk cattle for production of pedigree bull/calves and heifers On an average, 40 male calves are supplied every year for breeding through artificial insemination and natural way

3 The training is also imparted to the farmers on this farm in the improvement of animal husbandry practices The farm grows leucena plants extensively to meet the fodder requirements and also for demonstration purpose and the nurseries of plants are distributed to the farmers This apart, a bio-gas plant has been also set up for demonstrating to the farmers to meet the gas requirements for cooking

Dairy—The above said livestock farm has jersey breed adult cows numbering 80 and their milk production is supplied to Bilaspur milk supply scheme Further, to meet the milk requirements of the Bilaspur town, milk chilling plant has been established from November, 1981, onwards which uptil 31st March, 1982 had collected as much as 67,354 5 litres of milk chilled and distributed to the people in the town

Poultry Farming—In order to supplement the income of small and marginal farmers, 91 farmers were given training in poultry farming during the year 1981-82 Under this scheme as many as 66 poultry units have been set up in the district where nearly 600 quintals of feed to the poultry has been distributed

Fisheries—Because of the massive Gobind Sagar Lake facing Bilaspur district, the fisheries production in Bilaspur, indeed, is the highest in the state During the year 1981 as much as 412 metric tonnes of fish were procured from Gobind Sagar and 110 metric tonnes from other rivers Thus, the total production for the year was to the extent of 531 metric tonnes valued at Rs 37 78 lacs There were as many as 879 licenced fishermen in the district in 1981 The State Government distributes subsidy for setting up fish ponds to the Scheduled Castes fihsermen in the form of net, boats, tent etc The State Government have further set up a fish farm at Deoli which is 15 kms away from Bilaspur towards Mandi to supply mirror carp fish seeds to the Gobind Sagar and the farmers The total area of the farm is around 11 acres in which water area is only 5 4 acres which has two breeding tanks In addition to it there are 14 nursery ponds on the farm Whatever fish seedlings are to be released to Gobind Sagar from this farm can be directly done from nursery ponds and breeding tanks through a common releasing channel which leads to Ali khad which ultimately feeds Gobind Sagar The finger-lings move along the current of the river and reach their destiny Gobind Sagar with water current that is how the breeding is done on mass scale and also mortality of fish seedling reduced by avoiding transportation Right from the inception of the farm in 1962 onwards uptil 1981 as much as 9,923,964 fish seeds have been released to Gobind Sagar

Industries—There are no large scale industries in the district The reasons for which are obvious, firstly lack of raw materials, secondly no local market for the produce and thirdly no adequate communication facilities for setting up large scale industries However, on the basis of local raw material available Associated Cement Company Ltd has started setting up cement factory at Gagal with an installed capacity of 18,000 metric tonnes per day The other industries set up at various places in Bilaspur district are given as under

1 M/s Himalaya Industry, Industrial Area, Bilaspur, H P

2 M/s Emkay Paints and Allied Products, Industrial Area, Bilaspur

3 M/s Glory Briquetting Works, Industrial Area, Bilaspur

4 M/s Mahamaye Steel Industries, Main Market, Bilaspur

5 M/s Santosh Iron Works, Ghumarwin

6. M/s Dassons Steel Furniture, Industrial Area, Bilaspur

7 M/s Him Wooden Furniture and Allied Products, Bilaspur

8 M/s Shiv Shakti Udyog, Industrial Area Bilaspur

9 M/s Jeewen Industries, Village Jubbal, P O Jukhala.

10 M/s Naina Soap Factory, Village and P O Berthin

11 M/s Shanker Thread Reels and Balls, Village and P O Ghumarwin

12 M/s Himachal Shoe Maker Gramoudyog Association, Bilaspur

13 M/s Joyati Allied Products, Industrial Area, Bilaspur

14 M/s J C Paper & Chemical Industries Association, Bilaspur

15 M/s Himachal Thread Industry, Industrial Area, Bilaspur

16 M/s Dogra Hosiery, Industrial Area, Bilaspur

17 M/s Indira Binding Works, Industrial Area, Bilaspur

18 M/s Dogra Drugs Pharms, Industrial Area, Bilaspur

19 M/s Naina Devi Singdil Dhoop Works, Naina Devi

20 M/s Ashoka Industries, V P O Jukhala

21 M/s Kashyap Ayurvedic Pharmacy, Bilaspur

22 M/s Shashi Gramoudyog Institution, Industrial Area, Bilaspur

23 M/s Peers India Pvt Ltd Industrial Area, Bilaspur

24 M/s Rosin & Turpentine Factory at Jablic

25 H P M I D C Furniture Factory

26 H P Fruit Canning Unit

Apart from the aforesaid industries, the traditional industries like weaving, basketary and rope making, blacksmithy, carpentary, silver smithy and flour mills have been in vogue since time immemorial, though, with the coming up of modern industries and change in the taste of the people, the traditional industries have lost their importance and consequently on the decline yet they still play a vital role in the traditional rural economy.

Trade, Commerce and Banking —The commodities imported in the district are cloth, foodgrains, utensils, cigarette, building material etc Whatever the bulk of trade goes in the district, it is only Bilaspur proper that has the maximum trading activities otherwise there are no organised trading centres in the district The items that are exported predominantly from the district are forest produce like rosin and turpentine oil, katha, timber, ginger and fish etc

2 As on the 31st March, 1982, there were as many as 24 Banks in the district The detailed break-up of which are State Bank of India at Bilaspur, Namhol, Talai and Shri Naina Devi Ji The State Bank of Patiala have its branches at Bilaspur, Barmana Gwalthai and Bharari The New Bank of India has one branch at Bilaspur only The United Commercial Bank plays greater role than rest of the bank which has centres at Bilaspur, Berthin, Jhänduta, Ghumarwin, Jukhala, Gehrwin, Beri, Kuthera, Bassi and Swarghat The State Co-operative Bank have its branches at Bilaspur, Bertheri, Ghumarwin and Beri Punjab National Bank has only one branch at Hatwar

3 According to lead Bank sources the total advances made by all the banks upto 31st December, 1981, were 3,08,48,000

Transport —The total fleet strength of the Bilaspur Region Himachal Road Transport Corporation has 61 buses, 1 truck, 1 Jeep, 1 recovery van as in March, 1982 The daily coverage of vehicles on pucca routes has been 9,784 kms while the coverage on katcha routes has been 1,886 kms Thus, there are 51 routes plying by the Bilaspur region having a daily coverage of 11,670 kms The new routes introduced during the last 5 years are

Shimla—Talai
Shimla-Chhakoh
Bilaspur-Ludhiana

Bilaspur-Galod via Berthin

Bilaspur-Bathoh via Jukhala & Rani-Kotla

Bilaspur-Ladror via Barota

Bilaspur-Dehr via Bermon, Salwar and Kandror.

Ghumarwin-Georpattan

Ghumarwin to Ghumarwin round service via Kuthera, Jahoo, Ladror

Another round service Ghumarwin to Ghumarwin via Kandror, Samela and back

Third round service to Ghumarwin via Bharari Ladror, Bagetu and Khutheru

The services extended during the last 5 years are

(1) Shimla—Bangana extended to Raipur

(2) Shimla—Bilaspur extended to Mandi

(3) Mandi—Sundernagar extended to Slapper

(4) Bilaspur—Tali extended to Salwar

(5) Bilaspur—Mandi extended to Duhdiah

(6) Bilaspur to Bogetu extended to Ladror

(7) Bilaspur—Jukhala extended to Bandla

(8) Bilaspur—Deoth extended Saili

The routes completed upto 31st March, 1981 in Bilaspur district are double lane pucca National Highway 24 75 kms , single lane pucca state highways and district roads included 111 kms and single lane kutcha 347 51 kms

Places of religious, historical, archaeological and tourist interest —The places of religious importance are, as already mentioned, the Markand and Naina Devi Ji which have been dealt in detail already Other places of religious sanctity are Jhanda temple at village Bolu 16 Kms east of Bilaspur where a fair is held every year in the month of June Another place of religious importance is the temple of Sidh Baba which is situated near Chakmoh at a distance of about 50 kms from Bilaspur In fact, the village is precisely located in Hamirpur district Thousands of people visit the temple in the month of March and April to get the blessings of Sidh Baba

2 Lastly, the shrine of Guga Pir at Geharwain has been already discussed A fair here is also held in the month of August/September

3 The most famous and the oldest, religious place is the Vias-Gufa It is stated that the famous Rishi Vias had lived in this Gufa in penance It is further stated that this Gufa had a underground passage of Markandey temple where the Saint Markandey was in penance who happened to be the contemporary of Rishi Vyas The name of the present Bilaspur town traces its origin from Rishi Vyas in whose reverance the town was first known as Viaspur now called Bilaspur

4 Amongst the place of historical interest, the Fort of Kotkehlur comes on the top where Bir Chand established himself as over-Lord of this area and constructed this fort The fortress is in ruins now It is situated a few kilometres away from Ganguwal Hydro Electric Station The state was known as Kahlur state till the seat of the Government was shifted to present Bilaspur in about 1650 A D

5 There are seven ancient small fortresses in the district at Bachhretur, Bahadurpur, Basseh, Fatehpur, Sariyun, Swarghat and Tiun Sunhani which is located

on the right bank of the river Sutlej has the distinction of being the princely state capital from 1600 A D to 1650 A D The village is situated on the banks of Sir khad which is the tributary of river Sutlej

6. Bhakra Dam Amongst the places of tourist interest, Bhakra Dam occupies the predominant position It is the highest straight gravity Dam in the world It is situated in Naina Devi sub-tahsil about 14 kms upstream from Nangal town The first idea of constructing of Dam was mooted by Sir Louis Dane, the then Lieut Governor of Punjab who had toured from Suni to Bilaspur and then onwards to Ropar But, no perceptible progress was made due to prohibitive cost of construction In 1938-39, the districts of Rohtak and Hissar experienced a severe drought resulting in enormous loss of human and cattle life The scheme was again mooted but could not be executed due to the commencement of Second World War It was only in 1948 after the Independence that the execution of the project commenced The construction of the Dam was completed in October, 1962 The height of the Dam is 740 ft and its length at the top is 1,700 ft with 30 ft width The approximate cost of the Dam being 170 crores The Dam is known as Bhakra Dam after the name of the village Bhakra in Bilaspur district Every day thousands of tourists visit this Dam which indeed, is awe-inspiring and in the words of Pandit Nehru "Bhakra Nangal Project is something stupendous, something which shakes you up when you see Bhakra, the new temple of resurgent India is the symbol of India's progress"

Gobind Sagar Lake When one reaches the highest point of the Dam, one feels overwhelmed by the massive man made lake behind the Dam known as 'Gobind Sagar' named after Guru Gobind Singh It is 96 5 kms in length with gross storage capacity of 7 80 million acre ft of water or 19,621 million cubic metres of water This water which once caused havoc through floods has proved a boon for agriculture, and industrial development of Punjab, Haryana and Rajasthan It moves the wheels of four hydroelectric power houses at Bhakra, Ganguwal and Kotla Power Plants with installed capacity of 1204 MW of electric power and brings under irrigation to 26 lacs hectares or 65 lacs acres of land in the states of Punjab, Haryana and Rajasthan The rear beautiful lake sprawling beyond even the Bilaspur town is indeed a tourist paradise with its boating facilities and mirror carp fish to add to its comsine

Bilaspur Town After submerging of the old princely Bilaspur town which was set up in about 1650 AD, the new township has come up just above the old town with improved designs The town is the seat of district Headquarters It has the temples of Raghunath-Ji and Gopal Ji Khan Mukheshwar and Deomati where the fairs are held

Kandror Bridge The bridge has been constructed across the river Sutlej linking the Bilaspur Sadar tahsil with Ghumarwin tahsil The construction had started in 1959 which was opened to traffic in 1965 with a initial cost of Rs 27 lacs.

Deoli This is a village situated at a distance of about 15 kms from Bilaspur on the road to Mandi. There are two tanks and hatchery of 14 nursery ponds in this village set up at the cost of Rs 3 68 lacs Apart from exporting mirror carp finger-lings outside Himachal, the main function of this hatchery is to keep constant supply of finger-lings to 'Gobind Sagar'.

Namhol Namhol is about 30 Kms from Bilaspur on the Bilaspur-Shimla road There is a Thakur-Dwara constructed in 1883 by Raja Amar Chand Besides, the place is the main centre of ginger trade

Swarghat Swarghat is the sub-tahsil headquarters of Naina Devi sub-tahsil It is situated about 42 kms downward on Bilaspur-Kiratpur road The village is surrounded by pine trees and the lushgreen bhabar grass The elevation of the village being 3,700 ft above sea level

District Census Handbook and its scope —The District Census Handbook is the innovation of 1951 Census which brought down the census data to the town/village level Until then, census presented data mostly upto the district/tahsil/sub-tahsil/town level only This innovation, perhaps, was prompted by the realisation of the need of data at the grass-root level for data users, both for administrative planning and academic studies

2 The District CensusHandbook innovation of 1951 continued undisturbed in 1961 presentation with a few additions to it However, in 1971 it was further realised that the combination of the census and non-census data in a single publication as was the precedent from 1951 onwards became unwieldy and delayed the timely publication of census results Therefore, it was felt that the census data should be delinked from the non-census data and the publication should be brought out in two volumes First volume dealt with the village and town directory and also the village/townwise Primary Census Abstract of the district The second volume dealt with the non-census data and social, economic and cultural tables

3 In 1981 Census there has been a further slight innovation wherein the District Census Handbook consists of only one volume which contains village and town directory in Part A, and in Part B, village/town-wise Primary Census Abstract of the concerned district

4 The District Census Handbook of 1951 contained, apart from census data, the other general information about the district, like physical, socio-cultural and administrative aspects of the district which included both the census and the non-census data In 1961 the scope of the District Census Handbook was sought to be made more comprehensive by including certain additional items and dividing the entire presentation into four parts First part dealt about the land and the people Second part contained census tables Third part-the information regarding agriculture, medical and health etc Fourth part consisted Village/Town Directory

5 As already stated, the District Census Handbook underwent further innovation in 1971 Census

wherein it was split up into two volumes First, dealing with the village and town directory and also town/village-wise Primary Census Abstract of the district Second part dealt with non-census data and other socio-cultural and economic tables

6 In 1981 Census, with a view to avoid delay in bringing out the publications and also to streamline the publication programme the second part of 1971 Census Handbook has been omitted Thus, the present volume of the District Census Handbook will bring about the village/town directory in part A, and in part B town/villagewise Primary Census Abstract of the concerned district Part A, village directory will contain information about the name of the village, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communication, power supply, village market and the distance from the town etc This part also contains information about socio-cultural aspects like food habits of the people, land use in the village, forests, irrigational resources, cultivable waste and places of religious historical and archaeological interest Similarly, the Town Directory contains seven statements which would deal with area of the town, number of households, population and rate of growth of the town during the last eight decades, density of population of the town, sex ratio, status of civic administration, its finances and other socio-educational, cultural and developmental activities and the amenities that might have been undertaken or provided As already stated part B would contain the town/villagewise Primary Census Abstract which includes information/data about the total area of the village, occupied residential houses, total number of households, population and its sex-wise break-up, so also the break-up of Scheduled Castes and Scheduled Tribes, literacy and the break-up of the population by sex into four broad industrial categories like cultivators, agricultural labourers, household industries and other workers Apart from the aforesaid data, the Primary Census Abstract will contain data on the marginal workers and non-workers also

7 It would be pertinent to mention here that the sources of information for the Town and the Village Directory have been mainly the revenue agency supplemented by the concerned departments like education, medical, co-operation and the local bodies The information so collected from the various sources have been thoroughly scrutinised so as to ensure its authenticity

Census Definitions and concepts :—In order to understand the precise import of the meaning of words used in the analysis of data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases used herein

Urban Area The Census definition of an urban area is given as under

(a) All places with a municipality, corporation, cantonment board or notified area committee etc.

(b) All other places which satisfy the following criteria

(i) a minimum population of 5,000

(ii) at least 75% of male working population engaged in non-agricultural pursuits, and

(iii) a density of population of at least 400 persons per sq km (1,000 persons per sq mile)

In the absence of the any of the aforesaid characteristics the place will be treated as rural

Urban agglomeration and Standard Urban Area The urban agglomeration represents a continuous urban spread containing a town and its adjacent urban out-growth or more physically contiguous town together with contiguous urban out-growth which may actually fall within revenue limits of a village/villages These 'urbanised' villages or out-growths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread The urban agglomeration represents a spatial urban spread at a given time The standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages which are expected to get merged with it but also intervening rural areas which are potentially urban This covers all extra municipal out-growth such as suburb(industrial and residential), railway colonies, civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991

2. Like the urban agglomeraion the standard urban area is also an area unit which extends beyond the main city or town limit-municipal or otherwise However, unlike in the case of urban agglomeration which represents the actual urban spread at a given time the standard urban area is a larger area unit which includes not merely urban areas lying in close proximity to all surroundings and intervening rural pockets which are likely to be urbanised by 1991 and those serve the role of constant statistical reporting unit for three censuses viz 1971, 1981 and 1991 irrespective of the change in local administrative boundaries of the area unit within the standard urban area In fact, the urban agglomeration involving a core town of population of 50,000 or above are submerged in the standard urban area involving with core town. The utility of this concept basically lies in the fact when the limits of existing town change, the standard urban area as such is not expected to undergo any change As a consequence, the data generated by census for standard urban areas becomes more meaningful as it is comparable with different decades

3 The characteristic features of a standard urban area is (i) it should have a core town of a minimum population of 50,000 (ii) contiguous area made of all other urban as well as of rural administrative unit should have close mutual socio-economic linkage with the core town and (iii) probability that the entire area will get urbanised within a period of 2/3 decades

Village —In Himachal Pradesh, as elsewhere, the smallest rural habitation is the village It generally follows the limits of a revenue village i e recognised by the district administration The revenue village need not necessarily be a single agglomeration of habitation It may have one or more hamlets But the revenue village has a definite surveyed boundary and each village is a separate administrative unit with separate village account

1 In Himachal Pradesh following rural units are treated as revenue village or equivalent

1	Revenue Village	In the districts of Chamba, Mandi, Bilaspur, Shimla, Kinnaur, Sirmaur and Solan, Una excepting Bangana tahsil and Lahul & Spiti district(in respect of villages transferred from Pangi tahsil)
2.	"Tikka" having a distinct sub h adbast number	Kangra and Hamirpur districts and Bangana tahsil of Una district.
3	'Phatti" having a distinct sub-hadbast number	Kullu and Lahul & Spiti districts (except villages transferred from Pangi)

Census House —A census house is a building or part of a building having separate entrance from the road or court-yard or staircases etc. used or recognised as a separate unit, it may be occupied or vacant It may be used for a residential or non-residential purpose or both

Household —A household is a group of persons who commonly live together and would take their meal from the common kitchen unless exigencies of work prevented any of them from doing so There may be a household of persons related by blood or a household of unrelated persons or having a mix of both Examples of unrelated households are Boarding Houses, Messes, Hostels, Residential Hostels, Rescue Homes, Jails and Ashrams These are called "Institutional" households There may be one member households, two member households or multi-member households For Census purposes, each one of these types is regarded as a 'Household' The important link in finding out whether there is a household or not is a common kitchen

Scheduled Castes & Scheduled Tribes —The Scheduled Castes and Scheduled Tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Article 341 and 342 of the Constitution The lists of the Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) order, 1950 and the Constitution (Scheduled Tribes) order, 1950 These lists have been modified or amended or supplemented from time to time On the re-organisation of the States the Scheduled Castes and Scheduled Tribes (Modification) order came into force from October, 1956 However, the first one affecting the Himachal Pradesh has been the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 The main purpose of this Amendment Act was to removed the area restrictions in respect of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the state, unlike in the 1956 order where these were notified in relation to different regions of the state registering area restrictions

2. In pursuance of the latest Presidential Order referred above, following castes have been treated as Scheduled Castes throughout the state .

1 Ad Dharmi.
2 Badi, Nagalu
3 Balmiki, Bhangi, Chuhra, Chura, Chuhre
4 Bandhela
5 Bangali
6 Banjara
7 Bansi
8 Barad
9 Barar, Burar, Berar
10 Batwal
11 Bauria, Bawaria
12 Bazigar
13 Bhanjra, Bhanjre
14 Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi
15 Chanal
16 Chhimbe, Dhobi
17. Dagi
18 Darain
19 Darai, Daryai
20. Daule, Daole
21 Dhaki, Toori
22 Dhanak
23 Dhaogri, Dhuai
24 Dhogri, Dhangri, Siggi
25. Doom, Doomna, Dumna, Dumne, Mahasha
26 Gagra
27 Gandhila, Gandil, Gondola
28 Hali
29 Hesi
30 Jogi
31 Julaha, Julahe, Kabirpanthi, Keer
32 Kamoh, Dagoli
33 Karoack
34 Khatik
35 Kori, Koli
36 Lohar
37 Marija, Marecha
38 Mazhabi
39. Megh
40 Nat
41 Od
42. Pasi
43. Perna
44 Phrera, Pherera
45. Rehar, Rechara
46 Sanhai
47. Sanhal

48 Sansi, Bhedkut, Manesh
49 Sansoi
50 Sapela
51 Sarde, Sarera, Sarare, Saryare, Sarehde
52 Sikligar
53. Sipi
54 Sirkiband
55 Teli
56 Thathiar, Thethera

3 Similarly, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 as promulgated under the Presidential order declares the following Tribes as the Scheduled Tribes throughout the State

1 Bhot, Bodh

2 Gaddi (excluding the territories specified in sub-section (1) of the Punjab Re-organisation Act, 1966 (31 of 1966), other than the Lahul & Spiti district)

3 Gujjar (excluding the territories specified in sub-section (1) of section 5 of the Punjab Re-organisation Act, 1966 (31 of 1966)

4 Jad, Lamba, Khampa

5 Kannaura, Kinnara

6 Lahaula

7 Pangwala

8 Swangla

4 Thus, from preceding para, it is clear that the Tribes at serial No 1, 4, 5, 6, 7 and 8 have been treated as Scheduled Tribes throughout the state of Himachal Pradesh wherever they live, whereas, in case of Gaddi and Gujjar the area restrictions still persist as given in the preceding paragraph

Literate A person who can both read and write with understanding in any language is to be treated as literate A person who can merely read but cannot write is not a literate It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard Children upto the age of four years have been treated as illiterate irrespective of whether they attend the school or not

Work Work is defined as participation in any economically productive activity Such participation may be physical or mental in nature Work involves not only actual work but also effective supervision and direction of work

Main Worker A person who has primarily worked for a major period of the year is a main worker. By major part of the year, it is intended to find out that the person has worked for 183 days or more or in other words worked for 6 months or more

Marginal Worker A person who has worked for less than six months or 183 days but worked at least a day during the year before enumeration is considered as marginal worker

Non-Worker A person who has not worked at all during the preceding one year from the date of enumeration is non-worker

Cultivator A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind or share Cultivation includes supervision or direction of cultivation

Agricultural Labourer A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer He or she has no risk in cultivation but he or she merely works in another person's land for wages An agricultural labourer has no right to lease or control on land on which he/she works

Household Industry It is an industry which involves at least manufacturing, or processing, or servicing, or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the house where the household lives in the urban area The large proportion of the workers in a household industry should consist of members of the household including the head The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act

Other Workers All workers i e those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all Government servants, municipal employees, etc In fact all those who work in field of economic activities other than cultivation, agricultural labour or household industry are other workers

Employer An employer is a person who has to employ other persons in order to get work performed i e such person is not responsible for his or her personal work but also for giving work to others for carrying out the economic activities

Employee An employee is a person who usually works under some other persons for salary or wages in cash or kind There may be persons who are employed as Managers, Superintendents, Agents etc and in that capacity employ or control other workers on behalf of their own employers, such persons are only employees and not employers

Single Worker A single worker is a person who works by himself/herself He/she is not employed by anyone else and in his/her turn does not employ anybody else This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and

also a member of producers cooperative which one of the partners or members of said producers cooperative is a single worker

Family Worker A family worker is a member who without receiving wages in cash or kind, in an industry, business, in a trade or service For example, the working member in a family of Dhobi where they all work and each does not receive wages separately will be family worker There may be family workers in industry, trade Family worker must be related by ties of blood or marriage but such workers can belong to different households Thus, what is important is that such workers must necessarily be related even though they may be living in different households The family workers may or may not be entitled to share and the profit in the work or business carried on either by person or head of the household or the relative

ANALYSIS OF THE DATA

Population —Table given below indicates the decadal growth of population of the Bilaspur district right from 1901 onwards Column 6 of the table reveals that uptil 1931 Census the decadal growth rate of the population has been modest with 5 26 per cent growth rate in 1921 Census and 3 06 per cent growth rate in 1931 Census Thereafter, the district has experienced a considerable spurt in the growth rate of population with 9 25 per cent decadal variations in 1941 Census and 14 29 per cent increase in 1951 Census This has further shot up to 25 94 per cent in 1961 Census whereas the trend has been somewhat reversed then onwards with 22 66 per cent decadal growth rate in 1971 Census The population again has retraced its previous trend in 1981 Census also with 26 99 per cent decadal growth rate

2 Though, no precise reason can be attributed for the district growth trend of 1971 Census, but, it may be that due to the massive displacement of the population of the district as a consequence of the coming up of the 'Gobind Sagar' the population had considerably out migrated from the district However, change in the trend during 1971—81 in the growth of population can be attributed to various industrial and developmental activities predominantly sponsored by the State Government which had tended to attract the influx of the outside population

3 The sex ratio table since 1901 uptil 1981 Census reveals a clear upward trend of the female population throughout the last 80 years Whereas in 1901 Census the proportion of female population was 840 for per 1,000 males It has narrowed down to 993 females for per 1,000 males in 1971 and then on female ratio has outplaced the males in 1981 Censu with 1,002 females for every 1,000 males One might hazard to say that this trend may not be purely because of the female births being more than males, but, due to the lack of job opportunities, the males have tended to migrate outside the district whereas the females continued to stay at home to tend the fields, hence, the higher females population compared to males This can at best be stated to be part of the reason may not be the whole reason.

Decadal variation in Population since 1901

Year	Persons	Males	Females	Decade variaion	Percentage decade variation
1	2	3	4	5	6
1901	90,873	49,384	41,489		
1911	93,107	50,009	43,098	+2,234	+2 46

TABLE 1

4 Table 1 deals with the population, number of villages and towns in 1981 Census. As already stated, Bilaspur district is a predominantly rural district with three very modest towns and 942 inhabited villages The habited villages and un-inhabited villages put together come to 1,016 The total rural population spread to 942 inhabited villages are 235,784 , male rural population being 117,153 persons and female rural population 118,631 persons Tahsilwise, the rural population of Ghumarwin tahsil is 148,417 persons Males being 71,924 and the females 76,493 Bilaspur Sadar tahsil has a population of 59,362 persons, males being

30,439 and females 28,923 Naina Devi sub-tahsil has a total population of 28,005 persons, males being 14,790 and females 13,215 Thus, Bilaspur Sadar tahsil and Naina Devi sub-tahsil have a predominant male population whereas Ghumarwin tahsil has a higher female population as compared to males

5 The urban population of the 3 modest sized towns are, Bilaspur town 8,063 persons, males being 4,483 and females 3,580, Ghumarwin town has 2,903 persons with 1,555 males and 1,348 females Naina Devi town has a population of only 618 persons with 381 males and 237 females

6 Ghumarwin tahsil has the largest number of villages It has 596 villages, of which 543 are inhabited villages Bilaspur Sadar tahsil has 281 villages, of which 278 are inhabited and lastly Naina Devi sub-tahsil has only 139 villages, of which 121 are inhabited

TABLE 1

Population, number of Villages and Towns

Serial No	Name of Tahsil/ Sub-Tahsil	POPULATION									No of villages		No of Towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	Inhabited

2	Bilaspur	67,425	34,922	32,503	59,362	30,439	28,923	8,063	4,483	3,580	281	278	1
3	Naina Devi	28,623	15,171	13,452	28,005	14,790	13,215	618	381	237	139	121	1
	District	**247,368**	**123,572**	**123,796**	**235,784**	**117,153**	**118,631**	**11,584**	**6,419**	**5,165**	**1,016**	**942**	**3**

TABLE 2

7 Table 2 deals with the decadal changes in the distribution of the population of the district During 1971—81, the district has registered a growth rate of 26 99 per cent compared to 22 66 per cent in 1971 Census The rural growth rate during this decade has been 27 25 per cent and the urban growth rate 21 96 per cent Tahsilwise, the growth rate of Ghumarwin tahsil has been 26 38 per cent, rural growth rate being 26.02 per cent and the urban 47 59 per cent Bilaspur Sadar tahsil has a growth rate of 27 37 per cent, rural growth rate being 29 33 per cent and urban growth rate 14 58 per cent Naina Devi sub-tahsil has a total growth rate of 29 45 per cent, rural growth rate being 29 55 per cent and urban 25 10 per cent From the aforesaid, it is evident that Ghumarwin town has experienced a maximum growth rate of 47 59 per cent during 1971--81 This is predominantly because with the classification as town in 1971 Census, the town has got a few new State departments like the P W D , Irrigation and Banks etc In other words, it has assumed the role of a growth centre in the area The reason for low growth rate of Bilaspur can be attributed to the optimum expansion of the town already taken place i e up to 1971 Census and there has not been much further scope for expansion Naina Devi is basically a pilgrimage centre rather than a place with urban characteristics Therefore, the population cannot be expected to increase much.

TABLE 2

Decadal change in distribution of Population

Serial No	Name of Tahsil/Sub-Tahsil	POPULATION								
		1971			1981			Percentage decadal Variation (1971-81)

8. Table 3 deals with the distribution of villages by population ranges In Bilaspur district maximum number of villages i e 549 villages constituting 58 28 per cent of the villages in the district have a population less than 200 persons The villages that fall between population range of 200—499 persons are 293 villages which constitute 31 11 per cent of the total number of villages in the district The next category of the villages with a population ranging between 500—1,999 are 98 villages which comprise 10 40 per cent of the total number of villages in the district Two villages in the district have a population above 2,000 but less than 5,000 each There is not a single village in the district with a population of 4,999 persons and above In other words, Bilaspur district predominantly is composed of tiny villages

TABLE 3

Distribution of villages by Population range

Range of Population	No of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	549	58 28
200–499	293	31 11
500–1,999	98	10 40
2,000–4,999	2	0 21
5,000–9,999		
10,000+		
Total	942	100 00

9 Table 4 indicates the distribution of villages by density of population Of the 942 villages in the district, maximum number of 286 villages constituting 30 36 per cent of the total number of villages in the district has a density of population ranging between 301—500 persons per sq km Another 222 villages which constitute 23 57 per cent of the total number of villages in the district have a density of population in the range of 201—300 persons per sq km Next comes 211 villages constituting 22 40 per cent of the total number of villages in the district in the density range of 101—200 persons per sq km Below this are 103 villages with 10 93 per cent of the total number of villages in the district having density of population above 500 persons per sq km Remaining 63 villages, 26 villages, 18 villages and 13 villages which constitute 6 69 per cent, 2 76 percent, 1 91 per cent and 1 38 per cent of the total number of villages in the district have a density range of 51—100 persons per sq km , 21—50 persons per sq km , up to 10 persons per sq km. and 11—20 persons per sq km respectively. It is evident that the overwhelming number of villages fall in the density range of 201 to 500 persons per sq km

TABLE 4

Distribution of villages by density

Range of Density (Per Sq Km)	Total No of villages in each density range	Percentage of villages in each density range

16–20	100	10 62
21–30	168	17 83
31–50	192	20 38
51–75	88	9 34
76+	22	2 34
Total	942	100 00

*Excludes villages having no Scheduled Castes Population

or 9 34 per cent of the total villages in the district having a scheduled castes population ranging between 51—75 per cent to the total population Lastly 22 villages or percentage-wise 2 34 per cent of the villages have a scheduled castes population above 76 per cent to the total population

Thus, the table indicates that except 156 villages where there are no scheduled castes population at all, in rest of the villages of the district, the scheduled castes population is clearly evenly distributed in the villages with a little fluctuation from village to village

TABLE 5A

11 Table 5-A deals with the proportion of scheduled castes population to the total population during the last three censuses in the state and the district In 1961 Census the scheduled castes population of the state was 22 89 per cent of the total population This marginally went down to 22 24 per cent in 1971 Census which again showed rising trend in 1981 Census with 24 62 per cent of the scheduled castes population in the state In absolute terms, there were 1,053,958 scheduled castes population in the state

Similarly in Bilaspur district the scheduled castes population in 1961 Census was 24 14 per cent which was slightly above the state average This further went up in 1971 Census with 24 47 per cent scheduled castes population in the district The trend continued in 1981 Census also with 25 99 per cent scheduled castes population in the district Thus, the district has a higher average of scheduled castes population compared to the state as a whole during the last three censuses In absolute terms, Bilaspur district has a scheduled castes population of 64,284 persons

TABLE 5 A

*Excludes villages having no Scheduled Tribes Population

13 Table 6-A gives the proportion of scheduled tribes population during the last three censuses in Himachal Pradesh and Bilaspur district respectively In absolute terms, Himachal had a scheduled tribes population of 122,326 persons in 1961 Census, 141,610 persons in 1971 Census and 197,263 persons in 1981 Census thereby constituting a percentage of 4 35 per cent in 1961 Census, 4 09 per cent in 1971 Census and 4 61 per cent in 1981 Census Compared to State's scheduled tribes population, Bilaspur district has almost half of it with absolute scheduled tribes population of 4,213 in 1961 Census, 5,236 in 1971 Census and 6,604 in 1981 Census thereby constituting 2 65 per cent scheduled tribes population in the district in 1961 Census, 2 69 per cent scheduled tribes population in 1971 Census and 2 67 percent scheduled tribes population in 1981 On the whole, with a little slump the scheduled tribes population in the district has remained on even level during the decades under review

TABLE 7

14 Table 7 deals with the proportion of scheduled castes/scheduled tribes population in the towns The Bilaspur municipality has scheduled castes population of 1,522 persons out of the total population of 8,063 persons which constitute 18 88 per cent of the total populatoin of the town, whereas there are 12 persons belonging to scheduled tribes which constitute 0 15 per cent to the total population of the town In Ghumarwin Notified Area Committee, of the total population of 2,903 persons, 726 persons are scheduled castes and 8 persons scheduled tribes, thus comprising 25 01 per cent scheduled castes to the total population of the town and 0 28 per cent of the scheduled tribes population to the total population of the town Naina Devi Municipal Committee with a population of 618 persons has 76 scheduled castes and 13 scheduled tribes only Percentagewise, there are 12 30 per cent scheduled castes population in the town and 2 10 percent scheduled tribes population to the total population respectively All, three towns combined, the total urban population is 11,584 persons out of which 2,324 persons are scheduled castes and 33 persons scheduled tribes Thus scheduled castes and scheduled tribes in all the three towns put together constitute 20 06 per cent and 0.28 per cent respectively

TABLE 7

Proportion of Scheduled Castes/Scheduled Tribes Population in towns

Name of the town	Total Population	Total Scheduled Castes Population	Total Scheduled Tribes Population	Percentage of Scheduled Castes Population to total Population	Percentage of Scheduled Tribes Population to total Population
1	2	3	4	5	6
Bilaspur (M C)	8,063	1,522	12	18 88	0 15
Ghumarwin (N A C)	2,903	726	8	25 01	0 28
Naina Devi (M C)	618	76	13	12 30	2 10
All Towns	**11,584**	**2,324**	**33**	**20 06**	**0 28**

TABLE 8

15 Table 8 deals with the literacy rates by population ranges of the villages Out of 942 inhabited villages, 549 villages with the population of less than 200 persons have a literacy rate of 41 44 per cent Another 293 villages with the population range of 200—499 persons have a literacy rate of 42 79 per cent. Another 98 villages in the population range of 500—1,999 persons have the highest literacy rate of 45 84 per cent and the balance of remaining 2 villages with the population range in 2,000—4,999 persons have a literacy percentage of 41 18 percent Thus, all villages of the district put together have a literacy percentage of 43 52 per cent in 1981 Census The literacy trend indicates that higher the population higher is the percentage literacy range This perhaps can be attributed to the convenience in opening educational institutions in big villages earlier than smaller ones

TABLE 8

Literacy rate by Population ranges of Villages

Range of Population	No of villages in each range	Literacy Rate
1	2	3
Less than 200	549	41 44
200–499	293	42 79
500–1,999	98	45 84
2,000–4,999	2	41 18
5,000–9,999		
10,000+		
	942	**43 52**

16 Table 8-A deals with sexwise literacy rate since 1901 Census in the district In 1901 Census, Bilaspur district had a negligible literacy rate of 1 14 per cent only, male literacy 2 07 per cent and female literacy to the negligible percentage of 0 03 per cent During the last 80 years tremendous progress has been done in the field of education and by 1981 Census, the total literacy of the district has come up to 44 69 per cent, male literacy being 54 65 per cent and female 34 76 per cent respectively The literacy of the district in 1971 Census was 32 87 per cent, male literacy 44 64 per cent and female literacy 21 02 per cent The table reveals that uptil 1951 Census there has not been much education amongst the people of the district, but, eversince the educational activity appears to have taken a sudden spurt when the total literacy rate in 1961 Census shot up to 19 46 per cent as compared to 5 59 per cent in 1951 Census The male literacy in 1961 Census was 31 71 per sent compared to 9 61 per cent in 1951 Census and the female literacy 6 59 per cent in 1961 Census as compared to 1 35 per cent in 1951 Census In fact, after convertion of separate Union Territory, the State Govt appears to have started educational activity on a war footing with the result that there has been noticeable increase in the literacy percentage of both the sexes

TABLE 8 A

Literacy Rate by Sex since 1901

Year	Literacy Rate		
	Total	Male	Female
1	2	3	4
1901	1 14	2 07	0 03
1911	1 73	3 18	0 06
1921	3 44	6 23	0 25
1931	2 50	4 55	0 21
1941	N A	N A	N A
1951	5 59	9 61	1 35
1961	19 46	31 71	6 59
1971	32 87	44 64	21 02
1981	44 69	54 65	34 76

TABLE 9

17 Table 9 deals with the literacy rates of the population of the district living in the towns Bilaspur town has the highest literacy rate amongst all the three towns in the district with 72 68 per cent literates Next comes Naina Devi Municipal Committee with 64 08 per cent literates and in the bottom among the three is the Ghumarwin Notified Area Committee with 58 46 per cent literacy All three towns put together, the literacy percentage amongst 11,584 urbanited comes to 68 66 per cent

TABLE 9

Literacy Rate for Towns

Name of the Town	Literacy Rate
1	2
Bilaspur (M C)	72 68
Ghumarwin (N A C)	58 46
Naina Devi (M C)	64 08
All Towns	**68 66**

18 Table 10 deals with scheduled castes/scheduled tribes population, literates, workers, non-workers in the district with rural/urban break-up in each category As already mentioned, Bilaspur district ranks amongst a very few districts of the state which has considerably higher literacy percentage The district has 44 69 per cent literates to the total population of which 54 65 per cent are male literates and 34 76 per cent female

19 Columns 11 to 13 show the percentage of main workers to the total population The perusal of these columns reveals that only about one third or specifically 31 80 per cent of the total population of the district are main workers In other words the aforesaid percentage of people have got the work for more than 6 months or 183 days or above in a year. Of this, 45 38 per cent are male main workers and 18 24 per cent female main workers Tahsilwise, Ghumarwin tahsil has 31 88 per cent main workers, male main workers being 42 63 per cent and female main workers 21 74 per cent Bilaspur Sadar tahsil has total main workers of 31 39 per cent, the male and female main workers break-up being 50 15 per cent and 11 24 per cent respectively Naina Devi sub-tahsil has 32 31 per cent main workers Of this, 47 73 per cent main workers are males and 14 91 per cent main workers are females

20 The aforesaid figures indicate that only about one third of the people in the district and the tahsils have got jobs or preoccupied with productive work during the major part of the year.

21 The marginal workers in the district as a whole are 9 85 per cent of the total population, the male marginal workers being 3 89 per cent and females 15 81 per cent Tahsilwise, Ghumarwin tahsil has 9 62 per cent marginal workers, male marginal workers being 3 70 per cent and female marginal workers 15 21 per cent Bilaspur Sadar tahsil has 8 28 per cent marginal workers in the entire tahsil, male marginal workers being 2 73 per cent and females 14 24 per cent. Naina Devi sub-tahsil has 14 80 per cent marginal workers of which 7 46 per cent are male marginal workers and 23 07 per cent are female marginal workers

Here one would notice that in all the three tahsils/ sub-tahsils of the district, the percentage of female marginal workers are far greater than the male marginal

workers This basically appears to be due to the fact that apart from attending the unproductive domestic work and other household duties, the females assist their males folks in the agricultural operations and may be in the cottage industries like weaving knitting basket making etc so as to supplement the family income

If we combine the main workers and the marginal workers, the total working population of the district comes to 41 65 per cent The total male workers being 49 27 per cent and females 34 05 per cent This would indicate that while one half of the male population of the district has got work at least sometime during the year, in case of female population only one third are engaged in productive work of one sort or the other during the same period Tahsilwise, Ghumarwin tahsil has 41 50 per cent total workers to the total population, male workers being 46 33 per cent and female workers 36 95 per cent In Bilaspur Sadar tahsil, the total workers are 39 67 per cent, male workers being 52 88 per cent and females 25 48 per cent Naina Devi sub-tahsil has total workers of 47 11 per cent Of this, 55 19 percent happen to be male workers and 37 99 per cent female workers

22 Column 20 indicates that the district has a total non-working population of 58 35 per cent, male non-working population being 50 73 per cent and female 65 95 per cent Tahsilwise, Ghumarwin tahsil has non-working population of 58 50 per cent, the male non-working population being 53 67 per cent and female 63 05 per cent Bilaspur Sadar tahsil, tops the district with 60 33 per cent non-working population, male non-working population being 47 12 percent and female 74 52 per cent Naina Devi sub-tahsil has non-working population of 52 89 percent male non-working population being 44 81 per cent and females 62 01 per cent

23 The aforesaid figures indicate that the Bilaspur district has overwhelming dependency population This abnormally high dependency ratio can be partly due to wide spread education where the younger generation join productive working force much later Secondly, it can be due to the non-availability of productive work Thirdly, due to certain social inhibitions both in case of males and females and particularly female population where society does not approve their participation in certain activities which otherwise would have been a productive work

Another interesting characteristics in the aforesaid table is the female non-working population in the urban areas is much higher than in the rural areas This apparently appears to be due to the fact that in rural areas the women folks in addition to their domestic work assist their men folks in agricultural operations, whereas in urban areas particularly the women folks do not get work to supplement their men's income and thus wholly spend their time to the domestic chores only and partly the urban society does not approve of their doing work in certain areas of activity.

24. Table 11, table 12 and table 13 deal with the distribution of villages according to availability of different amenities, proportion of rural population served by different amenities and distribution of villages not having certain amenities arranged by distance ranges from the places where these are available respectively

TABLE 11

25 Looking at the district as a whole, of the 942 inhabited villages, 329 or 34 93 per cent of the villages with the population of 58 71 per cent have got the educational facility of the one sort or the other The remaining 612 villages have educational facilities available not in their villages, but, at the distance of less than 5 Kms and one village has the educational facility within the reach of 5—10 Kms Thus, 613 villages do not have educational facility of any sort in the village itself, but, they avail it within a reasonable distance from their village Similarly, 161 or 17 09 per cent of the villages constituting a population of 34 26 per cent have a medical facility of one type or the other and the balance of 781 villages do not have any medical facility in the village itself, but, of these, 745 villages have the medical facility available within the distance of 5 Kms from the village and remaining 36 villages have medical facility at the distance ranging between 5 to 10 Kms

26 As far the drinking water is concerned, the district seems to be in happy position where all villages have the drinking water facility of one type or the other

Regarding post and telegraph facility, 115 villages comprising 12.21 per cent of the total number of villages of the district with the population of 27 86 per cent have one type or the other post and telegraph facility There are 827 villages in the district which have no post and telegraphs facility in the village itself Of them, 804 villages have this facility within less than 5 Kms distance and balance of 23 villages have to travel a distance of 5 to 10 Kms to avail the post and telegraph facility.

27. 504 villages or percentagewise 53.50 per cent of the total villages of the district covering the population of 65.31 per cent have got communication facility available upto the village The balance of 438 villages do not have the communication facility available upto the village. Of this, 425 villages have to travel a distance less than 5 Kms to reach the communication point and the remaining 13 villages have to still further travel a distance ranging between 5 to 10 Kms. to avail the communication facility

28 182 villages have a approach by pucca road which constitutes 19 32 per cent of the total villages covering a population of 24 74 per cent and 715 villages covering the total number of 75 90 per cent of the total villages of the district with a population of 85 85 per cent have been connected with power/electricity supply

29 Column 4 of table 11 and 12 shows that in Ghumarwin tahsil, out of 543 villages, 190 villages having a population of 59 45 per cent have got educational facility in the village itself In Bilaspur Sadar tahsil out of total of 278 villages 88 having a population of 53 43 per cent have got educational facility in the village itself In Naina Devi sub-tahsil of the 121 villages 51 villages with a population of 66 01 per cent have got educational facility

TABLE 12

30 Regarding medical amenities Ghumarwin tahsil with 17 31 per cent of the villages, Bilaspur 15 83 per cent of the villages and Naina Devi sub-tahsil 19 01 per cent of the villages covering a population of 36 66 per cent, 28 20 per cent and 34 43 per cent respectively have the medical facility in the village itself

31 Regarding post and telegraphs, in Naina Devi sub-tahsil and Bilaspur Sadar tahsil only about 1/4th population have this facility in the village itself In Ghumarwin tahsil, 67 villages having a population of 29 90 per cent have the facility available in the village itself

32 Communicationwise, in Ghumarwin and Bilaspur Sadar tahsils little over 50 per cent of the villages with a population of 65 82 per cent and 61 29 per cent respectively have been covered whereas in Naina Devi sub-tahsil, 86 villages with a population of 71 16 per cent have been provided with the communication facility

TABLE 13

33 As far approach by pucca roads is concerned only 12 89 per cent of the villages in Ghumarwin tahsil, 24 46 per cent in Bilaspur Sadar tahsil and 36 36 per cent villages in Naina Devi sub-tahsil with a population of 19 43 per cent, 27 12 per cent and 47 81 per cent respectively have been covered.

34 As far power supply 78 64 percent of the villages in Ghumarwin tahsil, 76 62 per cent in Bilaspur Sadar tahsil and 61 98 per cent villages in Naina Devi sub-tahsil covering a population of 87 39 per cent, 86 71 per cent and 75 84 per cent respectively have been provided with power/electricity supply.

35 Two points are distinctly noticeable in the aforesaid analysis of the amenities. One, the percentage of population covered under the various amenities is much higher than the percentage of villages covered

TABLE 11

Distribution of villages according to the availability of different amenities

Sl No	Name of Tahsil/ Sub-Tahsil	No of inhabited villages	No (With Percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power supply

	Total	**235,784**	**138,438 (58 71)**	**80,790 (34 26)**	**235,784 (100)**	**65,680 (27 86)**		**153,993 (65 31)**	**58,333 (24 74)**	**202,417 (85 85)**

TABLE 13

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		—5 Kms	5—10 Kms	10+ Kms	Total (Cols 2—4)
	1	2	3	4	5
1	Education	612	1		613
2	Medical	745	36		781
3	Drinking Water				
4	Post & Telegraph	804	23		827
5	Market/Hat	.			
6	Communication	425	13		438

Two, in providing amenities consideration of the size of the population appears to have outweighed the more number of villages Thus, though, large number of villages have no medical, education and post and telegraphs facilities, but, the overwhelming population has been covered under the aforesaid amenities

TABLE 14

36 Table 14 deals with the distribution of villages according to distances from the nearest town and availability of different amenities There are 133 villages situated upto a distance of 5 Kms from the town Another 307 villages are situated within the distance of 6—15 Kms from the town Over 50 per cent i e 501 villages are situated within the range of 16—50 Kms from the town and there is only one village which is over 50 Kms distance from the town Thus, of the 133 villages which are within the distance of 5 Kms from the town, 46 villages have education facilities, 15 have medical and post and telegraphs facilities, all villages have got drinking water facility, 69 villages have communication facility, 37 villages are approachable by pucca road and 119 of them have got power supply

37 Of the 307 villages within the distance range of 6—15 Kms. from the town, 115 villages have education facility, 55 have medical facility, all villages have drinking water facility, 39 villages have post and telegraphs facility, 173 villages have communication upto the village, 89 villages have approach by pucca roads, 251 villages have electricity/power connections Of the 501 villages in the district which are within the range of 16—50 Kms from the town, 168

TABLE 14

Total	942	329(34 93)	161(17 09)	942(100 00)	115(12 21)		504(53 50)	182(19 32)	715(75 90)

villages have education facility, 91 villages have medical facility, all villages have drinking water facility, 61 villages have post and telegraphs facility, 261 villages are linked with communication, 56 villages have approach by pucca roads and 345 villages have power/electricity connections There is one village which is at the farthest distance from the town i e beyond 50 Kms has drinking and communication facility in the village itself For education, medical and post and telegraphs, the villagers have to go beyond their village to avail any one of them and also the village has neither pucca road nor the power supply

TABLE 15

38 Table 15 deals with the distribution of villages according to population range and amenities available. As already stated overwhelming villages in the district are small in population. Overwhelming number of 842 villages have population up to 499. Of them, 242 villages comprising 28 74 per cent of the total number of villages have education facility, 109 villages comprising 12 95 per cent of the total number of villages have medical facility, indeed all villages have drinking water facility, 70 villages or 8 31 per cent of the total number of villages in this range have post and telegraphs facility Little over 50 per cent of the villages have communication links 155 villages are approachable by Pucca road and 622 or 73 87 per cent of the villages are connected with power/electricity supply

TABLE 15

Distribution of villages according to Population range and amenities available

Population Range	No. of inhabited villages in each range	Number (with percentange) of villages having the amenity of							
		Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communication	Approach by Pucca Road	Power supply
1	2	3	4	5	6	7	8	9	10
Upto 499	842	242(28 74)	109(12 95)	842(100 00)	70(8 31)		431(51 19)	155(18 41)	622(73 87)
500—1,999	98	85(86 73)	50(51 02)	98(100 00)	43(43 88)		71(72 45)	27(27 55)	91(92 86)
2,000—4,999	2	2(100 00)	2(100 00)	2(100 00)	2(100 00)		2(100.00)		2(100 00)
5,000+									
Total	**942**	**329(34 93)**	**161(17 09)**	**942(100 00)**	**115(12 21)**		**504(53 50)**	**182(19 32)**	**715(75 90)**

39 Another 98 villages have a population range of 500—1,999 Of them 85 villages have education facility, 50 villages have medical facility, all villages have drinking water available to them, 43 villages have post and telegraphs facility, 71 villages have communication upto the village, 27 villages are approachable by pucca roads and 91 villages have electricity/power supply

40 The remaining 2 villages fall in the population range of 2,000—4,999 Both the villages have education , medical, drinking water, post and telegraph and power supply facilities available to them However, both are linked with katcha road The aforesaid figures again lead to the conclusion that bigger the villages more are amenities available to them and smaller the villages in population lesser the amenities

TABLE 16

41 Table 16 deals with the main (staple food) habit in majority of the villages in each tahsil As the column 3 of the table indicates maize, wheat and rice are the staple food of the people of Bilaspur Sadar tahsil and Naina Devi sub-tahsil and in Ghumarwin tahsil staple food is limited to maize and wheat only, and the rice appears to be of some luxury to them

TABLE 17

42 Table 17 gives the distribution of villages according to land use The Bilaspur district with 942 inhabited villages has a total land area of 109,763 36 hectares Of this, the cultivable area happens to be 80,858 29 hectares which constitutes 73 67 per cent of the total land area Of this cultivable area 2,268 34 hectares are irrigated which comprise modest percentage of 2 81 per cent to the total cultivable area in the district.

TABLE 16

Main staple food in the majority of villages in each tahsil

Sl No	Name of Tahsil/Sub-tahsil	Main Staple food
1	2	3
1	Ghumarwin	Maize, Wheat
2	Bilaspur Sadar	Maize, Wheat, Rice
3	Naina Devi	Maize, Wheat, Rice

TABLE 17

Distribution of villages according to land use

Sl. No	Name of Tahsil/ Sub-tahsil	No of inhabited villages	Total area (Hect)	Percentage of cultivable area to total area (Hect)	Percentage of irrigated area to total cultivable area (Hect)
1	2	3	4	5	6
1	Ghumarwin	543	56,961 12	41,164 41(72 27)	1,014 48(2 46)
2	Bilaspur Sadar	278	27,471 63	21,530 62(78 37)	1,115 13(5 18)
3	Naina Devi	121	25,330 61	18,163 26(71 76)	138 73(0 76)
	Total	**942**	**109,763 36**	**80,858 29(73 67)**	**2,268 34(2 81)**

Tahsilwise, Ghumarwin tahsil with 543 inhabited villages has a total land area of 56,961 12 hectares Of this, 41,164 41 hectares or 72 27 per cent of the land is cultivable, and of the aforesaid cultivable area 2 46 per cent is irrigated at the moment

43 So, also in Bilaspur Sadar which has 278 inhabited villages has a total land area of 27,471 63 hectares Of this, 78 37 per cent of the land is cultivable and of the aforesaid cultivable area 5 18 per cent is irrigated at present

44 In Naina Devi sub-tahsil, there are 121 inhabited villages with total land area of 25 330 61 hectares of which 71 70 per cent is cultivable and of the aforesaid cultivable area 0 76 per cent is under irrigation at the moment Of the three tahsils Naina Devi sub-tahsil has the maximum waste land followed by Bilaspur Sadar In fact, the cultivable area is just 1/6th of the total area in Naina Devi sub-tahsil and little less than 1/3rd of the total land area in Bilaspur Sadar

TABLE 18

45 Table 18 deals with growth rate, density and sex ratio of the urban population in the district in relation to the state population As already analysed in some of the preceding table, Bialspur district has overwhelmingly a rural population Column 4 of the aforesaid table reveals that in 1951 Census the district had a urban population of 2 97 per cent with the percentage growth rate of 30 35 per cent during the decade and had a female population of 826 for per 1 000 males, whereas the state percentage during the same period being 6 45 per cent decadal variation 78 66 per cent and sex ratio 664 females for every 1,000 males The aforesaid figures for the district

TABLE 18

Growth, Density and Sex-ratio of Urban Population in the district in relation to the State Population

Census Year	District						State					
	Total Population	Urban Population	Percentage of Urban Population	Decadal percentage variation in Urban population	Density (population per Sq Km)	Sex-ratio (No of Females per 1,000 Males	Total Population	Urban Population	Percentage of Urban Population	Decadal percentage variation in Urban Population	Density (population per Sq Km)	Sex-ratio (No of Females per 1,000 Males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1931	126,000	3 745	2 97	+30 35	N A	826	2,385,981	153,827	6 45	+78 66	N A	664
1941	153 300	7,752	4 88	+107 00	832	636	2,812,463	178,275	6 34	+15 89	1,254	650
1971	194,786	9,403	4 88	+22 52	778	775	3,460,434	241,890	6•99	+35 68	1,556	749
1981	217,333	11 534	4 68	+21 96	933	805	4,280,818	325,971	7 61	+34 76	1,537	795

In 1961 Census came upto 4 88 per cent, decadal growth rate 107 00 per cent and density of population 832 persons per sq Km sex ratio came down to 686 females per 1 000 males compared to state urban population of 6 34 per cent, decadal growth rate of 15 89 per cent and desnsity of population of 1,254 persons per sq Km and sex ratio slumped to 650 females per 1,000 males The trend in 1971 Census has been 4 88 per cent urban population with the growth rate of 22 52 per cent and the density of population of 778 persons per sq Km and the sex ratio climbed up to 775 females for 1,000 males Same for the state as a whole has been 6 99 per cent urban population, decadal growth rate of 35 68 per cent and the density of population further increased to 1,556 persons per sq Km and the sex ratio also showed upward trend with 749 females for 1,000 males The latest trends of 1981 Census are urban population of 4 68 per cent, with a stagnant growth rate at 21 96 per cent However, the density of population has gone up with 933 persons per sq Km and sex ratio has reached 805 females per 1,000 males The state ratio during the same period being 7 61 per cent urban population with 34 76 per cent decadal growth rate and the density of population 1,537 persons per sq Km sex ratio has shown a rising trend with 795 females for 1,000 males

46 The over all picture indicates that in the district as well as in the state the urbanization is moving at a very slow pace, with the result, the decadal variation

TABLE 19

Per Capita receipt and expenditure in towns

Class, name and civic status of the Town	Per Capita								
	Receipts			Expenditure					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public work	Expenditure on public institutions	Other aspects

of the urban population is almost stagnant and rather is showing a slight downward trend during 1971—81 Census and there is a noticeable upward trend in the female sex ratio compared to male in the urban areas

TABLE 19

47 Table 19 deals with the per capita receipt and expenditure in the towns The total per capita receipts for all the three towns put together are Rs 154 77 Bulk of the per capita receipts jointly for Naina Devi Municipal Committee and Bilaspur Municipal Committee are through taxes which constitutes Rs 49 66 whereas in case of Ghumarwin Notified Area Committee the entire receipts are through other sources per capita expenditure of all the three towns are Rs 129 03 Bulk of the expenditure goes on public works and general administration But municipalitywise Naina Devi Municipal Committee has the maximum income and the expenditure, bulk of which is received through taxes and spent on public works, health and public convenience

TABLE 20

48 Table 20 gives schools per 10,000 population in the towns There are 1 73 educational institutions above matriculation for every 10 000 population in all the three towns put together and the matriculation and equivalent institutions for same number of population being 3 45 So, also in case of middle and equivalent, Institution But, in case of primary schools this ratio between population and institutions comes to 6 04

49 Townwise, Bilaspur has 1 24 educational institutions above matric and up to degree level for every 10,000 population, matric and equivalent educational institutions works out to 2 48, middle and equivalent works out to 2 48 and primary 3 72 Ghumarwin Notified Area Committee has 3 44 educational institutions for 10,000 population and the same ratio for matric and equivalent and 6 89 middle and equivalent and 10 33 at primary level Naina Devi Municipal Committee has no educational facility above matriculation level nor in middle and equivalent level but matric and equivalent level it has 16 18 institutions for every 10,000 population and same ratio continues at primary level too

TABLE 20

Total	**17 78**

50 Table 21 deals with number of beds in the medical institutions in the towns All the three towns put together have 17 78 beds for every 1,000 population Townwise break-up being Bilaspur Municipal Committee 21 58 beds for every 21,000, similarly Ghumarwin Notified Area Committee 10 33 beds and Naina Devi Municipal Committee 3 24 beds for every 1 000 persons

TABLE 22

51 Table 22 deals with the most important commodity manufactured, exported and imported in the towns As already stated, there are not much activities in all the three towns as the towns are very small and do not have much trade commerce and industrial activities in any one of them However, few small scale industries and trading activities do go on Bilaspur municipality manufacture match splints and exports it and amongest imports the most important item is foodgrains In Ghumarwin Notified Area Committee manufactures are wooden furnitures which are exported to the areas around and imports foodgrains Naina Devi Municipal Committee has its importance because of the religious sanctity attached to Durga Temple and obviously most important to be manufactured is Dhoop which even gets exported also As the overwhelming land area being uncultivable in Naina Devi sub-tahsil, the predominant item to be imported is the foodgrain.

TABLE 22

Class, name and civic status of the to	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
V Bilaspur (M C)	Match Splints	Match Splints	Foodgrains
VI Ghumarwin (N A C)	Wooden Furniture	Wooden Furniture	Foodgrains
VI Naina Devi (M C)	'Dhoop' (Incense)	'Dhoop' (Incense)	Foodgrains

52 Appendix I deals with the various educational institutions, medical institutions, source of drinking water and the type of communication available to the villages

53 In Bilaspur district there are 297 villages with 307 primary schools Tahsilwise, in Ghumarwin 171 villages have 176 primary schools In Bilaspur Sadar tahsil, 76 villages have 80 primary schools In Naina Devi sub-tahsil, 50 villages have 51 primary schools

54 92 villages in Bilaspur district have got middle schools Tahsilwise, in Ghumarwin tahsil all 59 villages have middle schools Bilaspur Sadar has 18 villages and Naina Devi sub-tahsil has 15 villages all of them having middle schools There are 22 villages in Ghumarwin tahsil, 6 villages in Bilaspur Sadar and 6 villages in Naina Devi which all put together comes to 34 villages having matriculation and equivalent schools in each village There are 7 villages in the district 4 in Ghumarwin, 2 in Bilaspur Sadar and 1 in Naina Devi which have education facilities over matriculation level Ghumarwin has 23 adult literacy centres spread in 22 villages, Bilaspur Sadar has 20 adult literacy centres spread over in 18 villages and Naina Devi has 2 adult literacy centres in two villages Thus, the total of 42 villages have 45 adult literacy centres in the entire district There are 2 villages in Ghumarwin tahsil which have other type of educational institutions These facilities apart, there are altogether 613 villages in the district which are having no education facility of any type The tehsilwise break-up of them are 353 villages in Ghumarwin tahsil, 190 villages in Bilaspur Sadar tahsil and 70 villages in Naina Devi sub-tahsil have no education facilities of any type

55 There are 18 villages in Ghumarwin tahsil, 11 villages in Bilaspur Sadar and 8 villages in Naina Devi sub-tahsil each having dispensary Thus, of the 942 inhabited villages 37 villages have dispensary in the district But, none of the village has a hospital One village in Bilaspur Sadar tahsil and one village in Naina Devi sub-tahsil has maternity child welfare centre 3 villages in Bilaspur Sadar tahsil have got primary health centres only No village in entire Ghumarwin tahsil has family planning centre 37 villages in Ghumarwin tahsil, 7 villages in Bilaspur Sadar tahsil and 6 villages in Naina Devi sub-tahsil have got primary health sub-centres There are 48 community health workers stationed in 46 villages in the Ghumarwin tahsil, 36 community health workers stationed in 32 villages in Bilaspur Sadar tahsil and 17 community health workers in 14 villages in Naina Devi sub-tahsil There are 33 other institutions spread over to 17 villages of the Ghumarwin tahsil, 10 other institutions spread over in 7 villages of the Bilaspur Sadar tahsil and one in Naina Devi sub-tahsil In all, there are 449 villages in Ghumarwin tahsil, 234 in Bilaspur Sadar and 98 villages in Naina Devi sub-tahsil with a district total of 781 villages having no medical institutions of any sort in the village

56 There are 57 post offices in Ghumarwin tahsil, 27 post offices in Bilaspur Sadar tahsil and 13 post offices in Naina Devi sub-tahsil All put together there are 97 post offices in the entire district There is only one post and telegraph office in Ghumarwin tahsil, post offices with phone are 4 in Ghumarwin tahsil, 2 in Bilaspur Sadar tahsil and 1 in Naina Devi sub-tahsil Post and telegraph offices with phone are 3 in Ghumarwin tahsil, 1 in Naina Devi sub-tahsil 238 villages in Ghumarwin tahsil have bus stops and 70 villages have navigational water ways 134 villages in Bilaspur Sadar tahsil have bus stops in the village itself and 22 villages have navigational water way In Naina Devi sub-tahsil 64 villages have bus stops, one village has railway station and 41 villages have navigational water way Thus, 436 villages in the district have bus stops and 133 have navigational water way for communication In respect of power supply, 427 villages in Ghumarwin tahsil, 213 villages in Bilaspur Sadar tahsil and 75 villages in Naina Devi sub-tahsil have been electrified But, 116 villages in Ghumarwin tahsil, 65 villages in Bilaspur Sadar tahsil and 46 villages in Naina Devi sub-tahsil totalling to 227 villages in the district are yet to be supplied electricity connections

57 There are 6 statements each deals with the various aspects of the urban areas each one of them is being separately dealt as under

58 Statement I deals with the status and growth history of the town in the district Bilaspur Sadar, indeed, is the oldest town of the district It was created so in 1901 Census when it had a population of 3,192 only The town was declassified during 1911 and 1921 Censuses and reclassified as town again in 1931 Census The town has experienced a negative growth rate of 5 21 per cent during the

decade 1961—71 Even otherwise, the growth of town has never been impressive enough except in 1961 Census which can, indeed, be attributed to sudden development of certain specific factors, like the completion of new township and the expansion of the Government departments stationed in Bilaspur town The density of population of Bilaspur town is 908 persons per sq Km Sex ratio during the last three Censuses has shown upward trend continuously with 675, 757 and 799 females per 1,000 males during 1961, 1971 and 1981 Censuses respectively The Ghumarwin Notified Area Committee was for the first time declared as urban area in 1971 Census which had the population of 1,967 persons at that time It has registered a considerable growth during 1971—81 with 47 59 per cent growth rate during the decade Density of population being 936 persons per sq Km, sex ratio unlike the rural area of the tahsil is unfavourable to the females with 867 females for 1,000 males in 1981 Census The ratio in 1971 Census was 843 females for 1 000 males The Ghumarwin Notified Area Committee has total area of 3 10 sq Kms spread over by 637 households including houseless households Naina Devi Municipal Committee except its religious sanctity is the tiniest of the three towns with 0 44 sq Kms area inhabited by 114 households It was declared town for the first time in 1961 Census when it had the population of 328 persons only In 1971 Census the population rose to 494 and in 1981 Census saw the population increase to 618 The density of population in Naina Devi is the highest in all the three towns with 1 405 persons per sq Km and curiously the female population has shown a constant decline during the last three censuses The female population in all three towns combind per 1 000 males during 1961 1971 and 1981 Census being 988 777 and 622 respectively

59 Statement II deals with the physical aspects of the towns as in 1979 Bilaspur Municipal Committee, the seat of district headquarters is situated at the distance of 90 Kms from Shimla according to Himachal Road Transport Corporation source The nearest city for the town is Chandigarh which is at a distance of 136 Kms and to catch the nearest railway station one has to travel 64 kms to Kiratpur Sahib One of the scenic splendour and the tourist paradise of the Bilaspur town is the Gobind Sagar' which not only provide navigation boating but is the source of the quality fish called mirror carp which brings considerable income to the people

60 Ghumarwin Notified Area Committee is situated on Shimla-Hamirpur road at the distance of 122 kms from Shimla and 32 Kms from Bilaspur It is the seat of sub-divisional headquarters and within 10 Kms from the back water of the 'Gobind Sagar' The town is situated 168 kms away from the nearest city of Chandigarh and the nearest railway station happens to be Kiratpur Sahib which is 96 Kms away as per Himachal Road Transport Corporation

Naina Devi is the seat of religious sanctity and is located at the distance of 72 kms away from Bilaspur and 146 kms from Shimla The sub-tahsil headquarters of the Naina Devi is at Swarghat which is 30 Kms away The nearest city is Chandigarh which is 108 kms from Naina Devi and the nearest railway station is Anandpur Sahib for which one has to travel 20 kms before reaching 'Gobind Sagar' which is within 6 kms is the nearest navigable lake on the River Sutlej

61 Statement III deals with the municipal finances as on 1978-79, of the three towns, Naina Devi has the highest total revenue receipts amounting to little over Rs 10 lakh followed by Bilaspur with revenue receipts of nearly Rs 7 lacs Ghumarwin Notified Area Committee has the lowest total receipts with Rs 85 800 annual revenue receipts While in Bilaspur Municipal Committee the maximum revenue is received from the taxes Naina Devi gets maximum revenue through the Government grants So, also is the source of revenue of Ghumarwin Notified Area Committee Columns 11 to 17 of the aforesaid statement deals with the expenditure side of the town Maximum expenditure by all the three municipalities are on public works, health and convenience, though, in Bilaspur town maximum expenditure is on the civic administration

62 Statement IV deals with the civic and other amenities provided by the civic bodies as in 1979 The Bilaspur Municipal Committee has total pucca road length of 17 43 kms and katcha road length of 14 68 kms Ghumarwin Notified Area Committee has pucca road length of 7 kms and katcha road length of 2 kms Naina Devi Municipal Committee has pucca road length of 0 16 kms The sewerage system in Bilaspur town is sewer and open surface drains and in Ghumarwin and Naina Devi open surface drains and pit The number of latrines in Bilaspur town are public latrines 26 and private latrines 2 000 In Ghumarwin there are no public latrines, but private latrines number 30 In Naina Devi bulk of the latrines are public latrines which number 12 and there is only one private latrine available in the town The method of disposal of night soil in Bilaspur town is through sewer and in Naina Devi and Ghumarwin it is through septic tanks The water supply sources in all the three towns are the taps The system of storage happened to be in Bilaspur service reservoir over head tanks and Bore Well pumping capacity of which has been shown in brackets in column 13 of the statement In Ghumarwin and Naina Devi storage system is service reservoir and the capacity of which has been given in the brackets in the relevant column of the statement Bilaspur township does not have fire fighting service It has to depend on Beas Sutlej Link Project, Slapper which is in Mandi district at the distance of 28 Kms So is Ghumarwin Notified Area Committee whereas Naina Devi depends upon Nangal town for fire fighting service which is at the distance of 32 kms

63 In Bilaspur town there are 1,593 domestic electricity connections, 34 industrial and 659 commercial connections In Ghumarwin 698 domestic, 18 industrial and 265 commercial electricity connections have been given In Naina Devi 105 domestic, 1 industrial and 43 commercial electricity connections have been given There are 553 road light points in Bilaspur town, 55 in Ghumarwin and 72 in Naina Devi

64 Statement V deals with the medical educational, recreational and cultural facilities available as in

1979 in the various towns Bilaspur town has 1 hospital 1 dispensary and 1 family planning centre The hospital has 174 beds including T B centre which has 20 beds. There is one Arts and Science Degree College The nearest Medical College is at Shimla and the nearest Engineering College at Chandigarh The nearest Polytechnic is at Sundarnagar in Mandi district There are 5 vocational training institutions like the girls industrial training institute, rural industrial training institute, craft training centre run by Nehru Yuvak Kendra, a tailoring centre,and one carpet training centre, one higher secondary school, two high schools, two middle schools, three primary schools and two nursery schools and one adult literacy centre For entertainment there is one stadium, 2 cinema halls, 1 public library and one reading room

65 In Ghumarwin Notified Area Committee there is one health centre with thirty beds and one family planning centre For Arts and Science College it depends upon Bilaspur and the nearest Medical College is at Shimla and the nearest Engineering College at Chandigarh and Polytechnic at Hamirpur There is one Industrial Extension centre (Rural) at Ghumarwin, one higher secondary school, one secondary school and two middle schools, three primary schools and one nursery school For the sports, there is one stadium only

66 In Naina Devi there is one Ayurvedic Dispensary with 2 beds For college the nearest point is Anandpur Sahib and for Medical, Engineering and Polytechnic institutions the nearest town/city happens to be Chandigarh For other vocational institutions the nearest place is Nangal There is one school having upto secondary classes and one primary schoc ll in the town. For middle classes the students have to go to village Badoh at a distance of 2 kms

67 Statement VI deals with trade, commerce, industries and banking activities in the towns as in 1979 Most of the import trading items to all the towns are foodgrains, sugar, cloth, vegetables and edible oils Most of the export items happen to be match splints, wooden furniture, sheet metal articles, wooden and steel furniture, fish and sewing machines Bilaspur has 4 banks and 3 non-agricultural credit societies whereas Ghumarwin has 2 banks and 2 Agricultural Credit Societies Naina Devi Municipal Committee has one bank and one non-agricultural credits society

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Village Directory. Village Directory which is one of the traditional documents of the census has been canvassed during 1981 Census too On the basis of the information the village directory schedule can broadly be divided into three parts The first deals with the basic amenities available to a village like the education, medical, drinking water, post and telegraph, communication, power supply and market, etc In this part, it has been sought to ascertain whether the above facilities exist in a village and if it does then to what extent/level If the above amenities are not available then nearest village/town with a distance where the aforesaid facilities/amenities have been made available

2 The second deals with the land use which has been endeavoured to conform to the pattern of classification of land use as recommended by the Ministry of Food & Agriculture, Government of India The Government of India, Ministry of Food & Agriculture has recommended the maintenance of records of land use pattern under five categories which are

(1) Forests

(2) Not available for cultivation

(a) Land put to non-agricultural uses

(b) Barren and unculturable lands

(3) Other uncultivated lands excluding fallow lands

(a) Permanent pastures and other grazing lands

(b) Lands under miscellaneous tree crops and groves not included in the net area sown

(c) Culturable wastes

(4) Fallow lands

(a) fallow land other than current fallows

(b) Current fallows

(5) Net area sown

The source of information for the aforesaid items had been the revenue record shown/converted into hectares

3 The third part of the Village Directory deals about the information of the places of historical, archaeological and religious importance in a village This apart, it also deals with the socio-economic level of the people It also endeavours to gauge social and economic level of the people by para-meters like the number of motor cycles, scooters, jeeps, cars and tractors available in the village and the number of newspapers inflow to the village

4 The first part dealing with the amenities needs elaboration which is given as under

(*a*) *Educational Amenities.*—The various levels of the educational amenities provided in a village has been shown for the sake of convenience in the abbreviations given as under

1	Primary and Elementary Schools up to 4th class	P
2	Junior Secondary or Middle Schools up to 8th Class	M
3	High Schools/Secnodary Schools upto 10th Class	H
4	Higher Secondary Schools/Pre-University Junior College/Intermediate (including 10+2 system)	PUC
5	Colleges of all types upto Graduate level and above	C
6	Industrial School	I
7	Training School	Tr
8	Adult education class/centre	AC
9	Other educational Institutions like Sanskrit Pathshala, Senior Basic School, Maktab, etc	O

Where there are more than one Institution of same type in a village, the same has been indicated in figures against the appropriate abbreviation e g P(3), M(2), H(2), etc where no educational facility in the village was available, the distance of next nearest village where such educational facilities exist been given in bracket with a dash viz (—5), (5—10) and (10+)

(*b*) *Medical Amenities*—Anyone of the following amenities available in the village has been shown in abbreviations against the name of each medical institution

1	Hospital	H
2	Maternity and Child Welfare Centre	MCW
3	Maternity Home	MH
4	Child Welfare Centre	CWC
5	Health Centre	HC
6	Primary Health Centre	PHC
7	Primary Health Sub-Centre	PHS
8	Dispensary of all types	D
9	Family Planning Centre	FPC
10	T B Clinic	TB
11	Nursing Home	NH
12	Registered Private Practitioner	RP
13	Subsidised Medical Practitioner	SMP

14	Community Health Worker	CHW
15	Others	O

2 In the aforesaid Health Centres of various levels family planning advice and clinical facilities may also be available which have not been shown separately If there are more than one Institution of same type in the village, the same have been indicated in numbers against the abbreviation e g H(2), D(3) etc In view of a variety of medical amenities for which a number of codes as above have been suggested, it would not be possible to provide too many details under each such amenity Thus all Registered Medical Practitioners whether Ayurvedic, Unani or Allopathic have been covered under the code 'RP' It would be appropriate to mention that the terms 'Community Health Worker' does not refer to workers in extension programmes like Malaria eradication, Agriculture etc It refers to only those para-medical personnel who have been trained for dispensing medicines for minor ailments Where no facility is available within the village a dash (—) has been shown in the relevant column But next to it in brackets, the distance in broad ranges viz —5 Km , 5—10 Kms and 10+Kms of the nearest place where the most modest medical amenity like Dispensary, Community Health Worker, Primary Health Centre or Primary Health Sub-Centre or Hospital is available has been given

(*c*) *Drinking Water Amenities* —The types of the potable drinking water supply sources available within the village have been given in the abbreviations as under :

1	Tap water	T
2	Well Water	W
3	Tank water	Tk
4	Tubewell water	Tw
5	Hand pump	Hp
6	Fountain	F
7	Canal/Kuhls	C
8	River water	R
9	Lake	L
10	Nullah	N
11	Other sources (like baories etc)	O

(*d*) *Post & Telegraph Amenities* —Post & Telegraph has been given in the abbreviations as under

1.	Post Office	PO
2	Telegraph Office	TO
3	Post & Telegraph Office	PTO
4	Telephone Connection	Phone

(*e*) *Day/Days of the Market/Hat* —No such traditional practice exists in the entire district

Communications —This indicates the type of the communication amenities either by bus, railways or navigable water way available to the village, the abbreviations adopted are given as under

1	Bus	BS
2	Railway Station	RS
3	Navigable water way (including river/canal)	NW

2 If any one of these amenities were not available to the village then the nearest such facility available with a distance in brackets is given viz (—5), (5—10) and (10+)

(*f*) *Approach to Village* — The approach to village refers to the state or road etc leading to the village This is to see whether the village is approachable by pucca road or katcha road or by navigable canal or water way or both The approach to village is to be indicated by the following codes

1	Pucca Road	PR
2	Katcha Road	KR
3	Navigable River	NR
4	Navigable Canal	NC
5	Navigable Water way (other than river or canal)	NW
6	Foot Path	FP

If there is more than one such facility the same has been indicated separately by individual codes.

(*g*) *Nearest Town and distance* —The distance of nearest town is given in Kms in brackets This has been filled in purely on the basis of local enquiry The nearest town so indicated need not be within the state itself The nearest town even in another states have been indicated wherever necessary alongwith the name of the state Further, operational convenience has been taken into consideration while showing the nearest distance of town

(*h*) *Electricity Supply* .—If the electricity is actually available whatever may be the form of its use it has been shown as available The codes used for various category of electricity are as under

1	Electricity for domestic purpose only .	ED
2	Electricity for agriculture purpose only .	EAg
3.	Electricity for other purposes like industrial, commercial etc only .	EO
4.	Electricity for all purposes listed above ..	EA

(*i*) *Staple Food* —Here the terms staple food has been used only in terms of grains and no other food material The name of the grain consumed by the inhabitants for the major part of the year has been treated a staple food of the inhabitants, where it was not possible to pinpoint the foodgrains or in other words, where the inhabitants have been using more than one type of goodgrain more than one names has been given

Land Use —As already stated the total area of the land in its 5 broad categories has been compiled from the revenue records In the first category, types of land under forests has been indicated and in the second and third information about cultivated area, irrigated or unirrigated has been shown The irrigated area has been further split up as per the sources of irrigation Fourth being the area under cultivable waste which includes meadows, groves and pastures etc Lastly, the area not available for cultivation such as residential area, paths and unculturable waste etc has been given

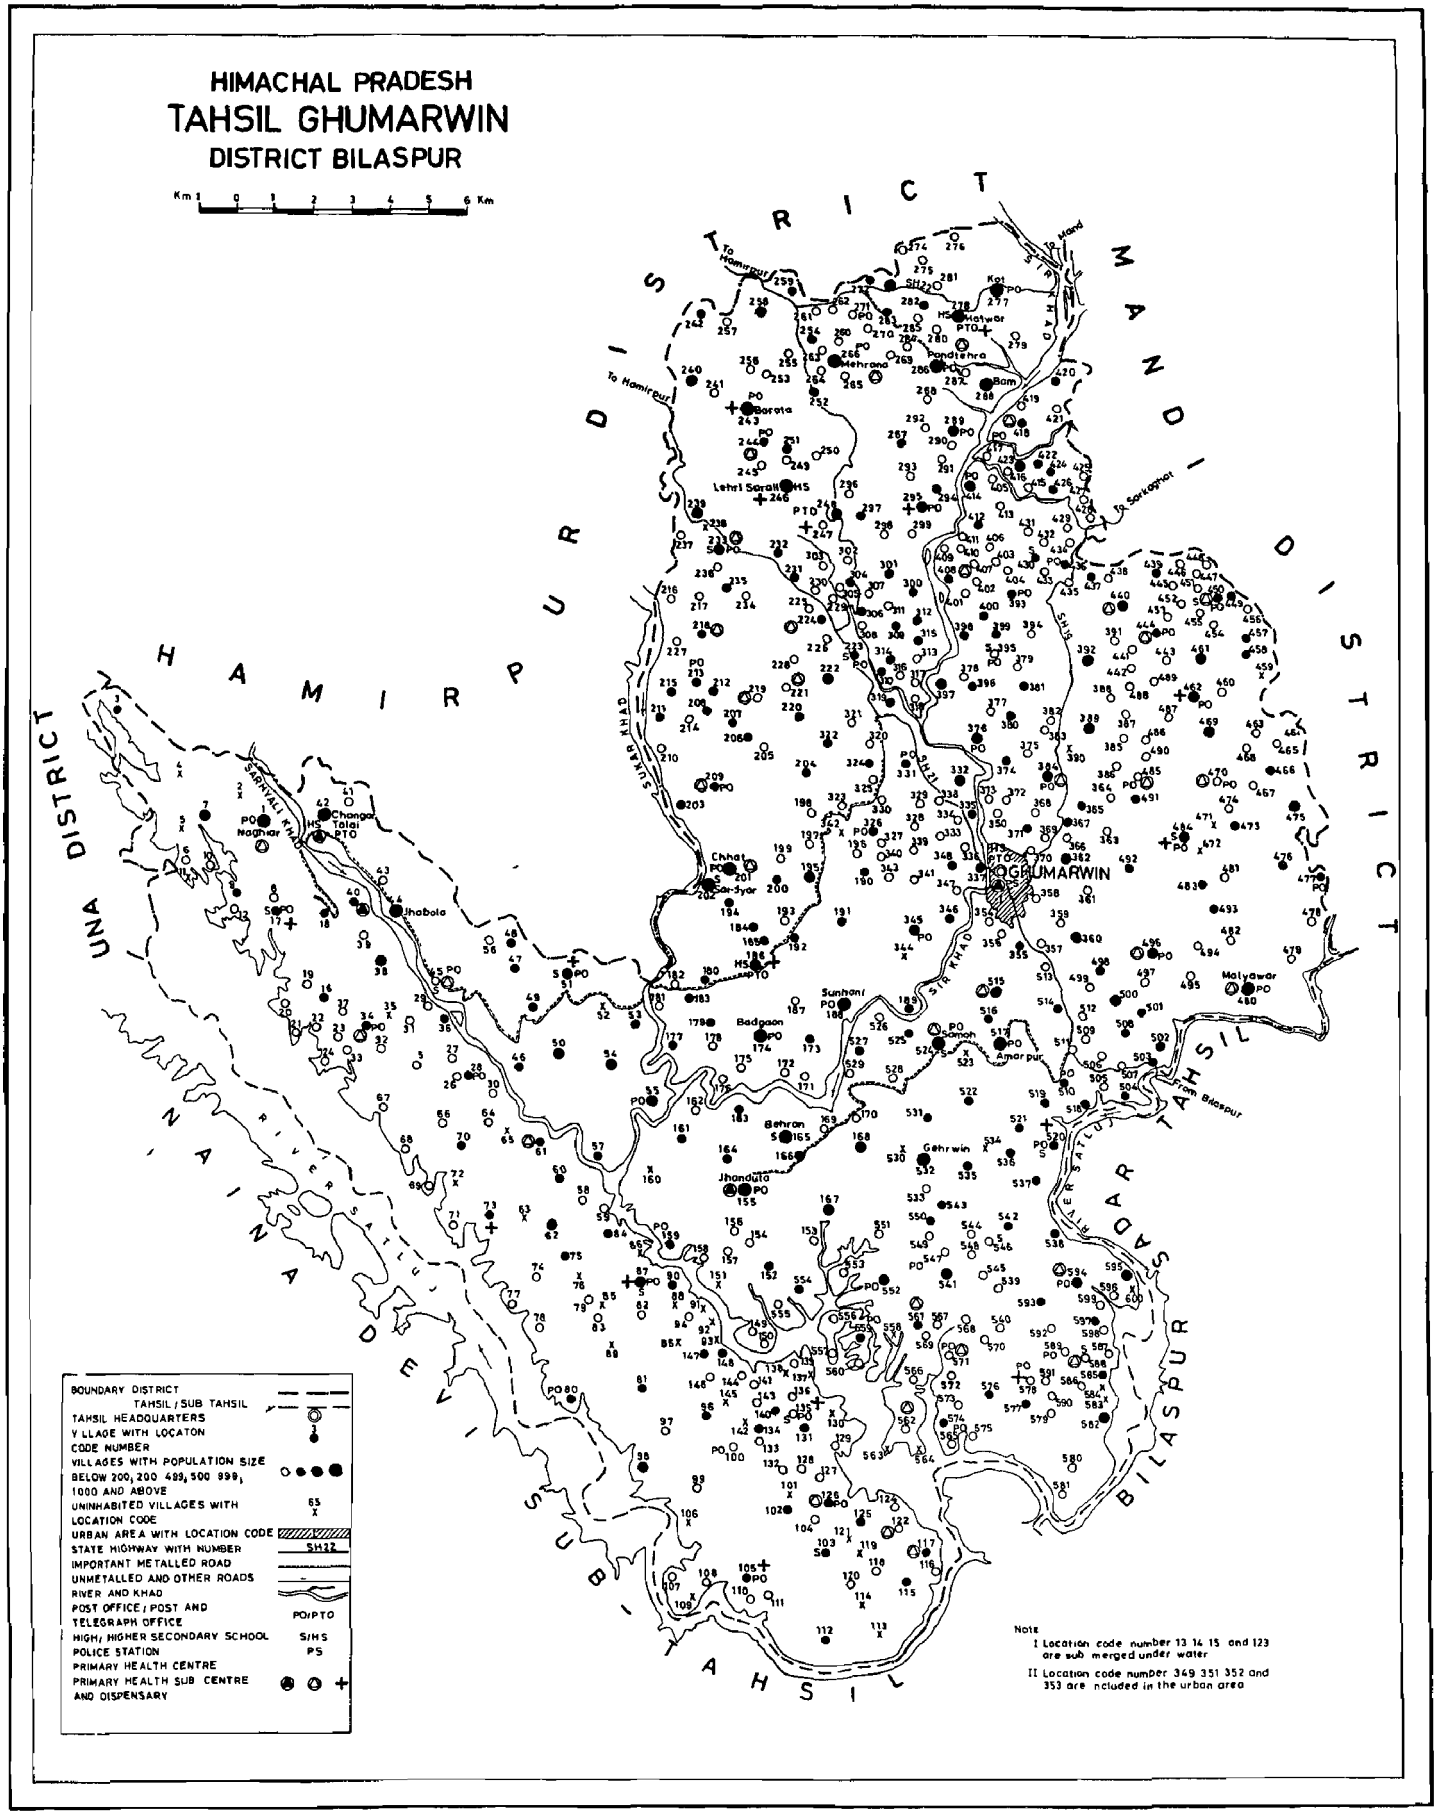

Abbreviations used for various sources of irrigation are detailed below

1	Government Kuhl/Canal	GC
2	Private Kuhl/Canal	PC
3	Well (Without electricity) .	W
4	Well (with electricity) .	WE
5	Tubewell (without electricity)	TW
6	Tubewell (with electricity) .	TWE
7	Tank	Tk
8	River	R
9	Lake .	L
10	Waterfall	Wf
11	Others	O

Abbreviations used for the information collected in part C of the Village Directory are explained below:

1	Copies of newspapers coming in the village	N
2	Motorcycles/Scooters available in the village	M
3	Cars/Jeeps available in the village	C
4	Tractors available in the village	T

SECTION II—TOWN DIRECTORY

As already dealt in the preceding pages, the information about Town Directory is being presented in six statements each dealing with a particular set of information in respect of all the urban areas of the district In addition to these statements another statement IV-A depicting the data for the slum areas of the towns having a population of 50,000 or more has also been included Certain improvisations have been carried out in comparison to 1971 Town Directory in most of the statements keeping in view the requirement of the data for various purposes and convenience for its analysis

2. The statement I—Relate to status and growth of the towns since 1901 Census This statement has been divided into two parts The first from column 1 to 5 deals with the locational and area particulars, whereas columns 6 to 19 deal with the demographic particulars The column 6 gives number of households including houseless households, whereas columns 7 to 15 give population of the towns since 1901 The column 16 gives density of population per sq km as per 1981 Census Columns 17 to 19 depict sex ratio in three Censuses since 1961 Census In this statement class of the town, area in sq kms and number of households, density and sex ratio since 1961 are the new additions

3 Statement II—Deals with the physical aspects and location of towns Broadly, this statement can be divided into two parts, first dealing with rainfall and temperature data (columns 3—5) while, in the second part (columns 6—12) name and distance from state headquarter, District headquarter, sub-division/tahsil headquarter, nearest city with a population of 1 lakh and more, Railway Station, Bus route and Navigable river/canal (if within 10 Kms) have been presented in respect of each town In column 2, the class of the town has been added this time to facilitate the analysis

4 The Rainfall data has been obtained from the Rainfall table published by the Revenue Department and is based on the average of last 10 years from 1971 to 1979 Information for other columns have been obtained from the local bodies

5 Statement III—Data relating to civic administration status and municipal finance for the year 1978-79 has been presented in this statement In column 3, the civic administration status in 1980 has been given whereas in columns 4 to 10 income of the local body from various sources has been presented and in columns 11 to 17 expenditure on various items is given These figures have been given in 'oo' with a view to save the printing space The class of the town has been added in column 2 Information for this statement has been collected from the concerned local body

6 Statement IV—The statement contains 19 columns Columns 2 to 6 are the new additions of this statement The statement on the one hand depicts general information about the towns like, class of the town, population, scheduled castes and scheduled tribes population and road length in kms , on the other hand elicit information relating to system of sewerage, number of different types of latrines, method of disposal of nightsoil, protected water supply, availability of fire fighting service and number of electric connections of different types System of sewerage and method of disposal of nightsoil are being presented upto two methods wherever available in order of importance and information of number of private latrines is based on estimates as no actual information was available with the local authorities The categorisation of electric connections is based on the record maintained by the Himachal Pradesh Electricity Board The source for this information being the Public Works Department, Local Bodies and Himachal Pradesh Electricity Board

7 Statement IV-A—Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented Shimla is the only town which falls under this category This information is required to be presented in respect of each slum separately The information relates to population of the slum, paved roads, system of sewerage, number of latrines, method of disposal of nightsoil, number of tap points/public tyrants and number of domestic connections, road lighting points and others The main source for this information is the concerned local body Since there is no such town in the district as such this statement has not been included

8 Statement V—In this statement information relating to medical facilities, educational facilities, recreational and cultural facilities has been presented Broadly this statement can be divided into 4 parts In part one, particulars relating to class and population has been given Part two which contains columns 4 and 5, relates to various types of medical facilities and number of beds in each type of medical institution Column 6 to 15 deals with the various types of educational facilities available Where these facilities were not available the distance from the nearest place where it is available has been given It may also be mentioned here that in case of composite schools like Hr Secondary Schools having High, Middle, and Primary Classes the same have been considered against each level In column 15 the other includes institutions like Sanskrit institutions etc The fourth part deals with the columns 17 to 20 wherein particulars relating to recreational and cultural facilities have been presented

9 Columns 2 and 3 deal with class of town and columns 15 and 16 deal with Adult Literacy Centres and working women's hostel with number of seats are the new additions this time Information for this statement has been collected from the Chief Medical Officer, District Education Officer, Industries Department, Social Welfare Department and the respective local bodies

10 Statement VI—The statement depicts information relating to three most important commodities imported, exported and manufactured, number of banks and number of agricultural and non-agricultural credit societies All the columns of the 1971 Town Directory have been retained and column relating to class of the town has been added this time. The commodities have been mentioned in order of volume Information for this statement has been primarily collected from the Industries Department, concerned

banks, Cooperative Department and the concerned local body.

11 For determining the class of towns, the population of each town during 1981 Census has been considered The following are the ranges for determining the class of the town

Population range	Class
Less than 5,000	VI
5,000—9,999	V
10,000—19,999	IV
20,000—49,999	III
50,000—99,999	II
1 Lakh and above	I

PART B—PRIMARY CENSUS ABSTRACT

Primary Census Abstract.—In this part basic population figures in respect of each village in case of rural areas and for each block in case of urban areas have been presented in 28 columns for each tahsil/ town separately Information relating to persons seeking/available for work is not being presented as contemplated earlier in columns 29 and 30 of this statement In Census terminology this statement is called Primary Census Abstract

2 This Abstract can broadly be divided into five parts In the first part which contains first two columns, locational particulars in respect of each village/ block have been given The first column relates to code number which has been assigned to each village within each tahsil in a particulars geographical order and for each block within a town In the second column, name of each village in English and Hindi, has been given alongwith its Hadbast Number In urban areas, the block number has been given in this column

3 The second part of the statement relates to the information pertaining to total area, number of occupied residential houses, number of households, sexwise distribution of population, sexwise population of Scheduled Castes/Tribes and literacy figures of each village and for each block in case of urban areas In other words, this part primarily deals with demographic and social aspect The 3rd column deals with the total area of the village in hectares as maintained in the village revenue records For urban areas total area in sq kms down to ward has been presented In column 4, total number of occupied residential houses have been presented In this column information relating to vacant and other houses which are being used for non-residential purposes, has not been included This information is based on abridged house list of 1981 enumeration unlike such other particulars which are based on houselist Column 5 deals with the total number of households in the village/block Columns 6—8 deals with the 1981 Census total and sexwise population figures of that village/block These columns include houseless and institutional population also In columns 9—12 sexwise population of Scheduled Castes and Scheduled Tribes have been presented Columns 13-14 deals with sexwise literacy figures

4 The fourth part from columns 15—26 deals with the working population In columns 15—16 sexwise main workers have been given whereas from columns 17—24 information relating to these workers into 4 broad categories of workers by sex have been presented These categories include workers engaged as cultivators, agricultural labourers, household industry and the remaining workers which fall under the industrial classification in category III, IV, V(b), VI to IX It may be noted here that particulars about these categories of workers are not being presented in the Primary Census Abstract itself separately In columns 25—26 sexwise particulars of marginal workers have been presented These workers are other than the main workers and were engaged in economic pursuits for only some portion of the year The definition of which has been given in the analytical portion of this book This information is being presented in the Primary Census Abstract for the first time

5 The fifth part deals with the persons who are economically inactive and are dependent on others This information has been presented in columns 27 and 28

6 The district abstract of this information has been presented first and thereafter data in respect of each tahsil has been presented by rural and urban components separately

EXTRACTS FROM HISTORY OF THE PUNJAB HILL STATES, VOL II, BY J HUTCHISON, L.R.C P & S E AND J PH VOGEL, Ph D

The ruling family of Bilaspur is of the Chandarbansi race, and is descended from the ancient Rajas of Chanderi in Bandelkhand It is interesting to note that traditionally the three Hill States of Kahlur (Bilaspur), Hindur (Nalagarh) and Chanehni in Jammu, all claims the same origin.

The clan name of the ruling family is Kahlura, from the name of the original capital, in keeping with common custom in the hills, in accordance with which the State usually took its name from its capital

The only authority for the history of the State seems to be the Shashi Bansa Binod, compiled from ancient records by Kavi Ganesh Singh, and published in 1892 It is in old Hindi verse and contains many interesting details in addition to the genealogical roll of the Rajas.

The Tawarikh-i-Rajputan Mulke-i-Punjab by Thakur Kahn Singh Balaurea, also contains a history of the State.

The Binod gives a detailed chronological record for each reign from Vik 754 A D 697 down almost to the present time It is certain however, that the State was founded at a somewhat later date than that claimed for it in the Binod. We know that Suket and Keonthal, which were founded not later than A D 770, and there have been 50 Rajas against 44 in Bilaspur Allowing twenty-two years to a reign we may conclude that the State was founded about A D. 900 The Rajas of Bilaspur, however, seem to have been a long-lived race, and it is possible that an earlier date should be assigned for the foundation of the State. The dates in the Binod seem approximately reliable after A D. 1300.

In the Binod the following couplet occurs, referring to the conquests of Bir Chand, the founder of Bilaspur State·

Pahla Baghal Jite Kunihar thakurai,
Beja, Dhami marker, Keonthal pai dai
"Having conquered Baghal, the chiefships of Kunihar, Beja and Dhami, an advance was made against Keonthal".

From this it is evident that Suket and Keonthal must be older than Bilaspur.

The other States mentioned belong to the Barah Thakuraian, now called Simla Hill States, one of which is Keonthal, originally twelve but now twenty in number, owing to later foundations.

Previous to the foundation of the [illegible] was under the rule of Ranas and Thakurs, as was the condition of things everywhere in the hills before the advent of the Rajas These diminutive States were at constant feud among themselves and thus fell an easy prey to superior force It was in this manner that Bilaspur, and all the larger Hill States of a latter time, were founded

Bir Chand, C.A.D 900—The founder of Bilaspur State was Raja Bir Chand a cadet of the Chandel Rajput family, then ruling Chanderi in Bandelkhand The ruler of the State at that time was Harihar Chand who had five sons named Gobind Chand, Bir Chand, Gambir Chand, Kabir Chand and Sabir Chand. Leaving his ancestral kingdom in the possession of his eldest son, he travelled north with his other sons and an army, into the Punjab being super-naturally guided, as the Binod States, by the goddess of flame at Jawalamukhi in Kangra After reaching the hills they conquered a place called Jhandbhari, now in Hoshiarpur, and having built a fort settled there for a time They then went on to Jawalamukhi to pay their devotions at the shrine Nadaun being near, a visit was paid to the Raja of Kangra, then resident there When engaged in the game of tent-pegging during the visit, the youngest of the four brothers, named Sabir Chand, was thrown from his horse and killed. This was attributed to treachery on the part of the Kangra Raja, and led to an encounter in which he and Harihar Chand were both killed Bir Chand then assumed command of the force and retired to the Satluj Valley, where he conquered a territory from the local rulers and settled on the left bank

Being guided by some propitious signs to a site for his capital he built a temple to Naina Devi on one of the seven dhars, now called dhar Naina Devi At the end of the hill he erected a fort called Kot-Kahlur and founded a town on the plain, called Naina Devi, as the Capital of the new State

The local petty chiefs were then attacked and subjected, and an advance was made against the Arah Thakuraian, which were all overcome These were · Baghal, Kunhiar, Beja, Dhami, Keonthal, Kothar, Jubbal, Baghat, Bajji, Mailog, Mangal and Balsan

Tribute was imposed upon them, and they were also under obligation to render feudal service when summoned, and to attend for the presentation of their nazars at the yearly Sairi or Autumn Jalsa in Asuj. The yearly tribute amounted to Rs. 7,800, and, it is said, was paid down to the beginning of British rule in 1815.

With the aid of the Ranas and Thakurs, Bir Chand invaded Sirmour and annexed a portion of that State and fixed the boundary at Gorakhgarh

He also took one pargana from Hindur, then under older rulers, and fixed his boundary at Manaswal in the Dun. The Satluj was also crossed and a portion of territory annexed on the right bank, called Dharkot

Bir Chand was followed by a number of Rajas of whom we know only the names These were Udhran Chand, Jaskarn Chand, Madanbrahm Chand, Ahl Chand, Kahil Chand, Slar Chand, Men Chand, Sen Chand, Sulkhan Chand, Kahn Chand

The last of these, being the eleventh in descent from Bir Chand, conquered Hindur and gave it to his second son, Sujit Chand, from whom the ruling line of Hindur or Nalagarh is descended

Kahn Chand was succeeded by Ajit Chand, Gokal Chand, Udai Chand, Gen Chand, Prithvi Chand and Sangar Chand The last had ten sons from whom are descended the Darol, Jhandwal, Sangwal, Ghall Nanglu, Meghori and Dokhli Mian families, still extent in the State

Megh Chand, C A D 1300—Megh Chand, the eldest son, succeeded to the gaddi Being of a harsh and tyrannical disposition, the people bore with him for a time, and then turned against him and forced him to leave the State He retired to Kullu along with some of his servants, and was kindly received by the Raja. One of his kinsmen, called Mal Darol went to Delhi to lay a complaint before the Sultan, and he sent an order to restore Megh Chand, with a force in support The Raja was, therefore, recalled from Kullu and resumed his position after some fighting On his return the zamindars of Deleg were the first to come forward and present their nazars In consequence of this they enjoy, down to the present time, the special privilege of presenting their nazars first at the Sairi Jalsa or Durbar, before even the officials and all other subjects of the State

For his fidelity Mian Mal Darol was appointed Wazir and a jagir was granted to him

Megh Chand was followed by his son Dev Chand and after him came Alim Chand and Abhisand Chand, the latter of whom is said to have ruled in the reign of Sikandar Lodi. It is related to him that being on one occasion on the plains near Anandpur, he happened to fall in with an Amir on his way to Lahore, with a large cavalcade The butchers in the Amir's army had seized some cattle, and were about to slaughter them for food, when the Raja ordered his men to kill the butchers and rescue the cattle This was done, and on hearing of it the Amir pursued the Raja's force into hills, and laid seige to Kot Kahlur Being unable to capture it, a strong elephant was brought to burst open the doors and the Raja severed its trunk with a stroke of his sword and killed the Amir, named Tatar Khan, and defeated his army His son, hearing of his father's death, came with an army pretending friendship, and was invited into the fort A return visit is always paid on such occasions, and on the Raja and his youngest son, Sundar Chand, going to the camp to pay this visit they were persuaded to lay aside their arms and were then treacherously killed The bodies were recovered after some fighting and cremated—the Ranis becoming sati

Sampuran Chand, C A D 1380—Sampuran Chand succeeded, but had only a short reign. Strong ill-feeling existed between him and his brother, Rattan Chand, ending in a quarrel in which the Raja was killed.

Rattan Chand, C A D 1400—Ratan Chand was installed and had a long reign He is said to have been invited to Dehli by the Sultan, whose name is not mentioned, and distinguished himself by killing a tiger at a hunt, for which he received a khillat and other honours, in recognition of his bravery A sword with which he was presented is still preserved

He had two sons, Narindar Chand and Mian Mithu and was succeeded by the former, but no details have come down regrding his reign nor of those of Fath Chand, Pahar Chand, Ram Chand and Uttam Chand.

Gyan Chand, C.A.D. 1570—Gyan Chand who followed is said to have been a contemporary of Akbar, and we may assume that in his reign or about his time Bilaspur, like all the other Hill States, became subject and tributary to the Mughal Empire. No reference to the State occurs in any of the Muhammadan histories of the time

Gyan Chand was of an overbearing nature and his attitude towards the smaller States aroused strong feeling against him A complaint was made to the Viceroy at Sirhind, who sent a force and had the Raja arrested and brought into his presence The Viceroy was so impressed with his fine appearance that he persuaded him to embrace Islam and gave his own daughter in marriage. Gyan Chand had three sons—Bik Chand, Rama and Bhim,— and the two younger also became Muhammadans, with a large number of the people. The heir-apparent, Bik Chand, remained in the Hindu faith and on his father's return fled across the Satluj, with his mother, to a place called Sunhani, where he settled Later, he went to Kangra where he was kindly

welcomed by Raja Tirloka Chand (A D 1600—12) and received his daughter in marriage and took up his residence in a place assigned to him The Rani, however, was of a very forceful disposition, and not liking her husband she was at no pains to conceal her feelings This was keenly resented by him and through the Wazir of Kangra he had the following question put to her father, "if your shoe pinches what should be done" ? To this the Raja answered "Cut it and make it fit properly" Bik Chand took the hint and severely chastised the Rani, then fearing the consequences, he mounted a swift horse and fled to Kahlur An army was sent in pursuit, but failed to arrest him, and he settled in his own home at Sunhani, and afterwards made it up with the Raja of Kangra Gyan Chand died after a long reign, and was succeeded by Bik Chand

Bik Chand, C A D 1600—On his accession, probably about A D 1600, Bik Chand went to Kot Kahlur, perhaps for his installation, leaving his two Ranis, who were both enceinte, at Sunhani One of these was from Kangra and the other from Baghal A son was born to the Kangra Rani, but she delayed in passing on the news to the Raja, and the other Rani's son, having been born almost at the same time, the news of his birth arrived first On learning this the Kangra rani at once claimed priority for her son, which on full inquiry was acknowledged, and he was recongnised at Tikka or heir-apparent His name was Sultan Chand and that of the other Kesab Chand Bik Chand had a long reign, and his sons grew-up to manhood with strong feeling existing between them, owing probably to both claiming the gaddi.

Sultan Chand, C A D 1620—Sultan Chand was installed as Raja on Bik Chand's demise, but a few years later the ill feeling between the brothers came to a head in a fierce encounter, in which both the young princes were killed. Sultan Chand left a son named Kalian Chand who succeeded

Kalian Chand, C A.D 1630—Kalian Chand was a contemporary of Raja Shayam Sen of Suket (A D 1620—50) whose daughter was his chief Rani We may therefore, assume that he came into power about A D 1630. He built a fort on the borders of Hindur which caused hostile feeling and ultimately led to war between the two States The Raja of Hindur was killed, leaving an infant son. Being afraid of harms to the State the Rani took the bold step of throwing herself on Kalian Chand's protection, being a near relative and entrusted the young prince to his care Kalian Chand accepted the charge, installed the Raja and acted as his guardian in the management of the State till he came of age.

Towards the end of Kalian Chand's reign an unfortunate event occurred which brought disaster on himself and the State Bilaspur and Suket were not on friendly terms, and the Suketi Rani was jealous for her father's honour While she and the Raja were one day engaged in playing a game of chess, a hill bard was heard singing Kalian Chand's praises, in the course of which he was called "the lord of seven dhars" on being told the names of these dhars the Rani remarked that one of them was her father's This so enraged the Raja that he struck her on the head with the chess board and drew blood The Rani then sent a letter to her father, written in blood, to warn him of coming trouble War broke-out soon afterwards' and in a battle that was fought at Mahadeo Kalian Chand's horse was not under him On asking a horse from a Sanghwal Mian, a kinsman of his own, his request was refused, and he was overtaken and mortally wounded, and died on the way to Bilaspur The spot is still called Kalian Chand ki dwari The Suketi Rani became sati On account of the disloyal action of their ancestor, no member of the Sanghwal family, to this day, is permitted to use of a horse from the State

Tara Chand C A D 1645—Kalian Chand had eight sons of whom Tara Chand was the eldest Tara Chand succeeded, but was of a weak and timid disposition and paid little attention to State affairs As a result inroads were made into the country, and much territory was lost to neighbouring States The tributary States also ceased to give attendance and present their nazars Taragarh fort in Hindur, now demolished was built by him

Dip Chand, C A D 1650—Dip Chand succeeded about A D 1650, and did much to restore the prestige of the State The residence of the ruling family had continued to be at Sunhani, from the time of Bik Chand D ip Chand conceived a strong dislike to the place, and determined on making a change Accompained by four faquirs, his advisors--two Hindu and two Muhammadan-he, therefore, sought a new site for the capital, and finally fixed upon a place on the left bank of the Sutlej, traditionally called Biasgufa. There he erected a palace called Dholar, overlooking the river, and founded a town on the river bank, and called it Bilaspur, now Bilaspur He then settled the people in the town according to their various castes and occupations in life. A temple, called Deomati, had been built by a former Raj a and it became the family temple, or Kulaj, of the Bilaspur ruling family The date given in the Binod for this event is A D 1654.

The Raja had two Ranis, Kunkam Devi from Kullu and Jalal Devi from Mandi, of whom the former bore a daughter and the latter two sons named Bhim

Chand and Dhan Chand Most of the territory lost in the previous reign was recovered, and the small Ranas of the Thakuraian, who had broken away from the State control, were reduced to subjection

A difficulty arose regarding the use of Jaidea, as the Mians, or royal kinsmen, claimed it on an equality with the Raja Dip Chand passed an order that in future the Jaidea should be offered only to the Raja, and Jai to the Mians As a refusal to obey involved the loss of their jagirs, all the Mians agreed to comply At the same time the salutation of Ram Ram was fixed for the Ranas

Dip Chand, is said to have been sent on an expedition to the north-west frontier with his contingents by Aurangzeb and so distinguished himself that on his return he received a present of five lakhs of rupees

About A D 1656 the Sikhs, then rising into power, invaded Bilaspur and reduced it to submission

Soon afterwards the Raja went on a visit to Nadaun where he was welcomed by the Raja of Kangra, with all honour, but at the dinner, poison was put into his dish, and, though warned by one of his servants, he ate of the food and died

Bhim Chand, C A D 1667—Dip Chand's death was a serious loss to the State, as his son was only a child Manak Chand, brother of the late Raja, was appointed Wazir, but proved tyrannical and imprisoned the old officials, on hearing this, Jalal Devi, the queen-mother, had him expelled from the State and released the officials

Manak Chand went to the Raja of Kangra and tried to persuade him to invade Kahlur and annex the State He, however, declined without the permission of the Mughal Viceroy at Sirhind They, therefore, both went to Sirhind, and by misrepresentation induced the Viceroy to send an army to invade Kahlur Bhim Chand, who was then 14 years old, sent to Hindur and the Barah Thakuraian for help and repelled the invasion

Bhim Chand was then called upon for help by his relative, the Raja of Kullu, whose territory was invaded by Bashahr He advanced as far as Nirmand, capturing several forts and expelling the invaders, and restored the lost territory to Kullu

At a later time in Bhim Chand's reign there were other wars with the Sikhs who were then beginning to find their way into the hills Guru Gobind Singh in his early years resided much in the outer hills, bordering on the plains, and rendered assistance to the Hill Chiefs in resisting the exactions of the Mughal Governors of Kangra fort As they gained power, however, they began to encroach on the Hill States, causing apprehension among the Rajas, that they might be expelled from their territories In A D 1682 Guru Gobind Singh was in Bilaspur State, and trouble arose between him and Bhim Chand, in which the latter was defeated and lost many men This defeat rankled in the Raja's mind, and in 1685 he leagued himself with Guler, Kangra and other States, and again attacked the Sikhs, but again fared badly at their hands

In 1700 a dispute again occurred, and Raja Bhim Chand and Alam Chand of Kangra attacked the Sikhs, only to be completely routed Not content even then, an attack was made on Anand pur with a large army, but they failed to take it and were dispersed Yet after all these encounters the Guru, in 1701, concluded peace with Bhim Chand once more, though he had been the leader of the confederacy against the Sikhs

The Chronicle then records an incident in the family which had sad consequences Dip Chand left two widow Ranis—of whom Jalal Devi was Bhim Chand's mother, and Kunkam Devi had one daughter Some of the officials, for some reason, sought to stir up bad feeling between them, and fabricated a report that Jalal Devi wanted to arrange the marriage of Kunkam Devi's daughter to her brother—The Raja of Mandi—and that Bhim Chand had expressed his approval Kunkam Devi was opposed to the marriage, and, not knowing that it was a false statement, she set fire to her house and she and her daughter perished in the flames Both the Raja and Jalal Devi were much distressed by this occurrence, and to expiate the sin a temple was built, containing the likeness of the deceased Rani, and a sadabrat appointed, which is still maintained down to the present day

Bhim Chand died about A D 1712, and was succeeded by his son, Ajmer Chand

Ajmer Chand, C A.D 1712—Ajmer Chand had a peaceful reign of long duration. He was of a religious temperament and frequented the temples, engaging much in Puja One day while

thus engaged, he dropped the image on the ground by accident, and in expiation for this act, and dread of the consequences, he subjected himself to corporal punishment and a fine of Rs 50,000 which was given to the poor

He married in Garhwal, Sirmour and the Thakuraian, and had seven sons, of whom the eldest was Devi Chand He built a fort called Ajmergarh on the borders of Hindur, and died in A D 1741

Devi Chand, C A D 1741—Soon after his accession a revolt took place in Hindur, and Raja Man Chand and his son were both killed The people then approached Devi Chand and invited him to take over the State This, however, he declined to do, and installed Gaje Singh Hindurea, a member of the Hindur ruling family, as Raja, and from him are descended the present Rajas of Nalagarh

At a later date Abhai Chand of Jaswan invaded Kangra, and Devi Chand went to the help of Raja Ghamand Chand This must have been later than 1751 At a still later time Abhai Chand of Jaswan was expelled by his brother, Jagrup Chand and Devi Chand restored him to his State

He also recovered the State territory that had been annexed by the Mughals, and when the Nawab of Jalandhar, Adina Beg Khan, showed displeasure, the Raja sent his Wazir to arrange the matter, in which he was successfull

During Devi Chand's reign the State pro,pered so much that the Chungi dues in the town amounted to Rs 20,000, and many people from the plains came and settled in the State

In A D 1762 the Satluj was blocked in Bajji State for forty-two days by a large landslide, and a great part of Bashahr was flooded To save his State from the flood on the bursting of the dam, the Raja posted men—each with a gun—a kos apart, from Bajji to Rupar, with orders to fire all along the line when the dam burst in order to give warning, and no damage was done to life or property within the State

Devi Chand built the fort of Dhawaikot, and gave the Ramgarh fort to Bijai Singh of Hindur

In his reign a Bhat Brahman, named Jangar, came from Benares, with whom the Raja became friendly and granted him a village, still in the possession of the family

Mahan Chand, A D 1778—Devi Chand was married to a Katoch princess, and late in life had a son, named Mahan Chand, born in A D 1772, who was six years old at the time of his father's death Mahan Chand being a minor the administration remained in the hands of Ramu of the Darol family and other officers, in association with the Rani

The last of the Mughal Kiladars still held the Kangra Fort, and in 1781 it was besieged by the Sikhs under Jai Singh Kanheya, alongwith Raja Sansar Chand of Kangra Saif Ali Khan had appealed to the Rani of Bilaspur for help which was readily given, owing probably to encroachments on the State by the Kangra Chief In March, 1783 Forster, the traveller, passed through Bilaspur , in the disguise of a Muhammadan merchant on his way from Nahan to Jammu and Kashmir He tells us little of Bilaspur itself but his reference to the siege, and the part the Rani was playing, is of much interest He states that the Bilaspur camp, through which he passed, consisted of "about 800 horses and 8,000 footmen, armed with matchlocks, swords, spears and clubs, huddled together on two sides of a hill in a deep state of confusion and filth" Of the Rani's part in the war he thus writes —"Unable himself (Kiladar of Kangra Fort) to repel the enemy, the Mahomedan solicited the aid of the Bilaspur Rani, who, with the spirit of a heroine, afforded speedy and vigorous succour to her neighbour whose cause she had already revenged by plundering the destroying almost every village in Kangra the Chief of which now asserts that the Rani, seeing his country destitute of defence, seized, under colour of assisting her ally, the occasion of augmenting her own power"

The fort was surrendered to the Sikhs soon afterwards, and came into Sansar Chand's hands in 1786, and he did not forget to repay in kind the part the Rani had played in the war, and the trouble she had given him

Ramu, the Wazir, died in 1785, and on the withdrawal of his conciliatory influence some differences arose between the Rani and the other officials She called in Bairagi Ram, who had formerly been Wazir of Mandi, and appointed him to the vacant post He, however, only made matters worse by

committing the old officials to prison and oppressing the people, so they rose against him and killed him Zorawar Chand, younger brother of Raja Devi Chand, was then appointed Wazir and held office till Mahan Chand came of age

On obtaining full power the Raja showed no interest in State affairs, and spent his time in sensual pleasures and low company This alienated from him the loyalty of his subjects and brought disaster upon the State Raja Sansar Chand in 1795, invaded the territory on the right bank of the Satluj and occupied Chauki Hatwat Being unable to oppose him alone, the Rani sent to Dharam Parkash, Raja of Sirmour, offering Rs 50,000 for assistance, and an army came in response Fighting ensued in which the Kahlur forces were defeated and Dharm Parkash was killed Sansar Chand then occupied all the territory on the right bank and built a fort on dhar Jhanjar The Rani probably died soon afterwards

These losses made no impression on Mahan Chand, who continued to spend his time as before, refusing to listen to his officials. Seeing this the Ranas of the Barah Thakuraian renounced their allegiance in 1793, and Raja Ram Chand of Nalagarh, his own kinsman, forsook him and allied himself with Sansar Chand He also annexed the portion of Kahlur territory adjoining his own State Mahan Chand at last became alarmed and sent to the Sikh Sardars, Gurdit Singh and Desa Singh, residing at Anandpur, for help They came, but again defeat followed and the Sardars were killed The Raja of Hindur (Nalagarh) then invaded the territory, and burnt Bilaspur and captured the Forts of Fathpur, Bahadurpur and Rattanpur In 1808 the Sikhs annexed Hathawat, Jhanbhari and Dharkot

In the late years of the eighteenth century the Gurkhas of Nepal were seized with the desire to enlarge their borders and had conquered the hill tracts as far west as the Satluj by 1802 Their headquarters were at Garhwal In his great extremity Mahan Chand turned to them for help, by sending an invitation to Amar Singh Thapa, the Gurkha Commander, to invade Kangra In this he was supported by all the Chiefs of the Kangra States subject to Raja Sansar Chand, each of whom promised a contingent This invitation was eagerly accepted, being in full accord with their own designs, and they crossed the Satluj in the end of 1805, and defeated Sansar Chand's forces at Mahal Mori As a result the portion of the State on the right bank annexed by Sansar Chand was restored and the Gurkhas laid seize to Kangra Fort In 1809, when the seige had lasted four years, Sansar Chand appealed to Ranjit Singh for help, and he compelled the Gurkhas to retire across the Satluj, but they still continued to occupy Bilaspur and the other States till 1814, when the first Nepalese war began, in consequence of their invasion of British territory. In 1815 they were defeated and driven across the Jamna, and in the following year they had to evacuate Kumaon and retire to their old border on the Gogra

When the war began, Government called upon all the Hill Chiefs east of the Satluj and in the Thakuraian to send contingents, promising their restoration to their territories on the expulsion of the Gurkhas. Almost all of them gave their support, and were confirmed in possession of their States at the close of the war The Sanad granted to Bilaspur is dated 6th March 1815, confirming to Raja Mahan Chand the territory on the left bank, while the portion on the right bank, restored by the Gurkhas, was held on condition of allegiance and tribute to the Sikhs, being in Sikh territory Jhanbhari, annexed by the Sikhs in 1808, was not restored, and is now in Hoshiarpur District

Mahan Chand's only son, Kharakh Chand, was born in A D 1813, and the Jyotishi, in drawing out his horoscope, found that he had been born under an unlucky star, and would be the cause of great calamity to the State,— a prediction fully fulfilled Mahan Chand was forbidden to see him for twelve years, and the boy was sent to a distant village, called Kalar, to be brought up

On the expulsion of the Gurkhas the claim of Bilaspur to the suzerainty over the Barah Thakuraian was disallowed by Government, and they were brought directly under British control They had been independent since 1793

In 1819 the section of the State on the right bank of the Satluj was invaded by a Sikh force under Desa Singh Majithia, the Nazim or Governor of the Kangra Hills, assisted by a contingent from Raja Sansar Chand, and the forts of Pichrota, Nikalgarh and Biholi Devi were captured The Sikhs also crossed the Satluj at Bilaspur, but Government then intervened and the force retired It would appear, however, that from that time, if not earlier, the State had to pay tribute to the Sikhs for the territory on the right bank

Mr. Moorcroft passed through Bilaspur in March, 1820 and has left an interesting reference to the State ·

"The Raja, at first, seemed disinclined to honour us with any particular notice I had, however, throughout my march, continued to exercise my professional skill and administer medicines to the sick I had also frequent opportunities of performing the operation for cataract, which is singularly common in the hills At Bilaspur, during the three days of our stay, I operated for this complaint upon eighteen cases The Raja hearing of this, and, being indisposed condescended to visit me and request my assistance He was very anxious that I should have remained with him, until the effect of my treatment could be fully ascertained, but this was impossible, as it was necessary for me to secure my progress to Kulu whilst the passes were open. I was, therefore, obliged to decline compliance with his solicitations"

In 1823 Raja Mahan Chand, at the end of ten years from the birth of his son, yielded to an overpowering desire to see him, and sent for him As the full period of twelve years had not expired, this action on the part of the Raja was regarded as a bad omen, and his death in the following year (1824), was attributed to his non-compliance with the terms of the warning He had been Raja for 46 years.

Kharakh Chand, A D 1824—Kharakh Chand's reign marks the darkest page in the history of Bilaspur From early youth he seems to have fallen under the baneful influence of evil companions and acquired vicious habits that remained with him during his short life On coming of age and being invested with full power, he began to fulfil his destiny, as predicted in his horoscope He took no interest in State affairs, and left the administration entirely in the hands of his officials, spending his time in the pursuit of sensual pleasures in the company of others like-minded For some years, things seem to have remained quiescent in the State, and when Mr Vigne passed through Bilaspur, in June, 1835, he received every attention. He remarks "I had forwarded a letter to the Raja of Bilaspur who provided me and my people with every necessary, and assigned me quarters in a summer house, standing in the midst of a grove or orange trees, from the edge of which I looked down upon the Sutlej I had intended to call upon the Raja the next day, but he sent to inform me that he would pay the first visit, so I waited at home Towards evening however, he sent an elephant for me, saying that he had forgotten to call, and accompanied by such pressing invitation that I waived all ceremony and mounted the elephant The Rajah, a good-looking young man, with a fair complexion, and of middling stature, was sitting outside his palace, a low but spacious, flat roofed, white building on a 'green' close to the river and below the town"

Mr Vigne, passed through Bilaspur to Suket and Mandi, in 1835, to begin four years of continuous travel in the Western Hills On his way back he again passed through Bilaspur in March, 1839, and found a deplorable change The State administration was completely disorganised, and civil war was in progress, as the result of long-continued tyranny and oppression The Bazar was almost deserted and the town half-depopulated, owing to so many of the inhabitants having fled into other States for security The Raja's chief enjoyment was riding on fighting elephants, of which he kept a great number When money for his pleasures was required, and treasury was empty, he seized the property of the officials The opulent classes were subjected to heavy exactions, and even the jagirdars—his own kinsmen—had their jagirs confiscated When the burden became unbearable, the people went to Mian Jagat Chand the Raja's uncle, and begged of him to help them The Political Agent was then called from Ambala, and he admonished the Raja, but his advice was disregarded Finally a revolt occurred, led by the two uncles, one of whom was Jagat Chand, and fighting continued for some time This was the condition of things when Mr Vigne passed through He was himself treated with great discourtesy and had great difficulty in procuring the necessary transport to resume his journey Shortly afterwards the Raja contracted smallpox and died

Jagat Chand, A.D 1839— Kharakh Chand died childless, and, on hearing of his death, Mian Jagat Chand came and performed the funeral rites. Notice was sent to the Political Agent at Ambala, and he came at once He was informed that there was no direct heir, and none of the widow Ranis was enceinte It seems that one of the Mians or royal kinsmen, named Mian Changhnian, descended from Suchet Chand, second son of Raja Ajmer Chand, was next in the succession, but Jagat Chand had taken the leading part in their defence against the oppressive rule of Kharakh Chand, and the people all acclaimed him as Raja After full inquiry, in the presence of the Rajas of Sirmour and Hindur, the Political Agent reported to Government in favour of Mian ·

Jagat Chand, and he was duly installed, in April, 1839

Two of Kharakh Chand's Ranis, twin sister, were from Sirmour, and had returned to that State on Jagat Chand's accession Some time later, it was given out that the younger Rani was pregnant, and the fact had been concealed from fear of Jagat Chand A son was said have been born in November of the same year.

Jagat Chand affirmed that the child was surreptitious

The Ranis then returned to Bilaspur with an army, furnished by the Raja of Sirmour, and a force from Suket to claim the Gaddi The officials and army officers of the State deserted Jagat Chand and went over to the other side, and he had no alternative but to flee to Hindur to save his life Information was sent to the Political Agent, who came with a force, and, after inquiry dispersed the party opposed to Jagat Chand and restored him to power

Raja Jagat Chand was descended from Raja Ajmer Chand (A D 1712), through his third son, Mian Chimna He was of a devotional spirit, and spent much time daily in the performance of the rites of his religion On his accession he refunded the loan of Rs 1,20,000 contracted with Nalagarh during the disturbances, and restored peace and prosperity to the State The amount was subscribed in full by the people of the State, at the rate of Rs 4 a plough, and the parganas of Fatehpur, Bahadurpur and Ratanpur, made over as security for the loan to Ram Chand of Nalagarh, were then recovered

In 1847, on the cession of the Jalandhar Doab to the British Government, after the first Sikh war Jagat Chand was confirmed in the possession of the territory on the right bank of the Satluj, which the State had held since 1809 on terms of allegiance and tribute to the Sikhs The British Government waived its claim to the tribute, but required the Raja to abolish transit duties in his territory

Raja Jagat Chand had only one son, named Narpat Chand, who died in 1844, leaving a son, named Hira Chand, nine years of age As the Raja was now well advanced in years, his chief concern, during the later years of his reign, was to prepare his grandson in every way for the high position he was to fill When he came of age, in 1850, Jagat Chand, with the consent of Government, abdicated in his favour, and retired from the State, to spend the rest of his life in Brindaban and other holy places He died in 1857

Hira Chand, A D 1857—Raja Hira Chand was installed by the Deputy Commissioner of Simla, and proved himself a capable ruler He gave much attention to the provision of tanks and other conveniences at different places of pilgrimage, and had trees planted along the main highways for shade, with arrangements at the stages for the comfort of travellers

In 1857 effective support in many directions was rendered to Government during the Mutiny, in acknowledgement of which a salute of 11 guns was granted as an honour to the State, and also a valuable khillat and other gifts In the same year his son, Amar Chand, was born

Raja Hira Chand made a great many changes in the financial department of the State Till 1863 the land revenue was paid in kind—the State taking one-third of the produce In that year the Raja reorganised the system, and made the revenue demand payable partly in cash and partly in kind, in certain selected portions of the territory Mian Bhangi was his Wazir and, though illiterate was an able and intelligent officer, who rendered great help in many ways in the early years of British rule

In 1867 a long strip of country called Baseh Bachretu, extending into the heart of Kahlur, and originally State territory, was restored to the State Some time before the Doab was ceded by the Sikhs in 1846, this tract had been taken possession of by Lehna Singh son of Desa Singh Majithia, Nazim or Governor o the Kangra Hills Having been annexed by the Sikhs it was treated as a part of the Kangra district, but granted in jagir to the Raja of Kahlur, subject to land tax and was finally restored, subject to the payment of a small tribute. equal to the previous amount The State was thus restored to its ancient limits, except Jhanbhari, the original nucleus, now in the Hoshiarpur District, which. was treated as British territory. In 1871 Lord Mayo, the Viceroy and Governor-General, passed through Bilaspur on his way to Kangra.

Raja Hira Chand was present at the Proclamation Durbar in January, 1877 and received a medal

In 1882, accompanied by his son, Tikka Amar Chand, he paid a visit to Simla, where he had previously built a residence, for an interview with the Viceroy and the Commissioner, and was taken seriously ill Medical aid failed to bring relief and, realising his father's

dangerous condition, the Tikka Sahib had him removed in a palki but he died at Maholi on the way to Bilaspur

Amar Chand, A D 1883—Raja Amar Chand was installed by the Deputy Commissioner of Simla in January, 1883, and had a short reign In the autumn of the same year Sir Charles Aitchison, Lieutenant Governor of the Punjab passed through Bilaspur on his way to Kangra and Chamba

Raja Amar Chand was unfortunate in his administration of the State, owing to the inadequate assistance rendered by his officials The administration in consequence became very disorganised, resulting in disorder and outbreaks of violence, from discontent at change made in the tenure of land Strong measures had to be adopted to suppress these disorders and restore peace Raja Amar Chand extended the system of cash payment in the land revenue demand, initiated by his father, and also abolished begar, recovering in lieu a cash rate of 25 per cent called bathanga

In 1885 a small State force was organised consisting of 40 cavalry and 200 infantry

In 1886 the old administrative sub-divisions of the State were re-arranged, and the old names disused in favour of tahsils and thanas, as in British territory

In 1887 Hindi and English schools were opened and the Forest Department was organised

In 1888 a suspension bridge was built across the Satluj some way above Bilaspur,—one of the Chief events of the reign—and Raja Amar Chand died towards the end of the same year

Bajai Chand, A D 1889—Raja Bajai Chand was installed in 1889 As he was still a minor, a Council of Regency was formed, and the Raja was sent to the Chiefs College, Lahore, to complete his education He was invested with full power in 1893

Almost from the first, Raja Bajai Chand seems to have become discouraged about State affairs He was desirous of administering the territory on the British model, but received no assistance from his officials in carrying out his plans. He became depressed and dispirited in consequence, and indicated a wish to divest himself of his administrative duties The Political Officer advised the appointment of a Council, and this was done, but with unsatisfactory results The services of an experienced officer were then secured from Government, and Lala Hari Chand was appointed Wazir in 1902 To him the Raja made over the administration of the State, and took his departure to Benares, where he had already caused a house to be built at considerable cost There he chiefly resided till his death

In 1903 Mian Amar Chand was appointed Manager of the State, and carried out many reforms in an efficient manner The administration had been in an unsatisfactory condition for a long time, and State affairs, were in disorder. The Manager entered upon his duties with energy and discretion In a few years all debts were discharged, Criminal, Civil and Revenue Courts were established, a school and hospital were built , a police force was organised and system introduced into every department of the State The administration continued to be conducted on the same lines the Raja residing in Benares, till 1927, when he finally abdicated in favour of his son, Anand Chand, and died in 1930

On January 9th, 1933, H H Raja Anand Chand was installed by the Hon'ble Mr J A O Fitz Patrick, Agent to the Governor General Punjab States

Most of the Rajputs in Bilaspur State are Chandias, that is, they belong to different branches of the ruling family These families are numerous, and all enjoy jagir pensions from the State, amounting in the aggregate to Rs 40,000 a year They are called "the Mian families", and the chief names are--Ajmerchandia, Kaliyanchandia, Tarachandia, Sultanchandia

Bilaspur State rendered substantial service to Government during the great war, which was duly acknowledged

The political control of the State was transferred from the Panjab Government to the Government of India from 1st November, 1921.
