FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract(PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement

(IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil /Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/ C.D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B.B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI :
The 26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part-A containing the Village and Town Directories and (ii) Part-B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office Sarvashri R. D. Aggarwal, D.N. Mahesh, Deputy Directors and Shri N.M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S.K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computors and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the PCA Cell at the headquarters headed by Shri P.N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C.D. Block maps. Shri A. L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R.B. Singh, Dy. Director happened to be in charge of printing and for sometime looked also after the DCH Section. I am thankful to them all.

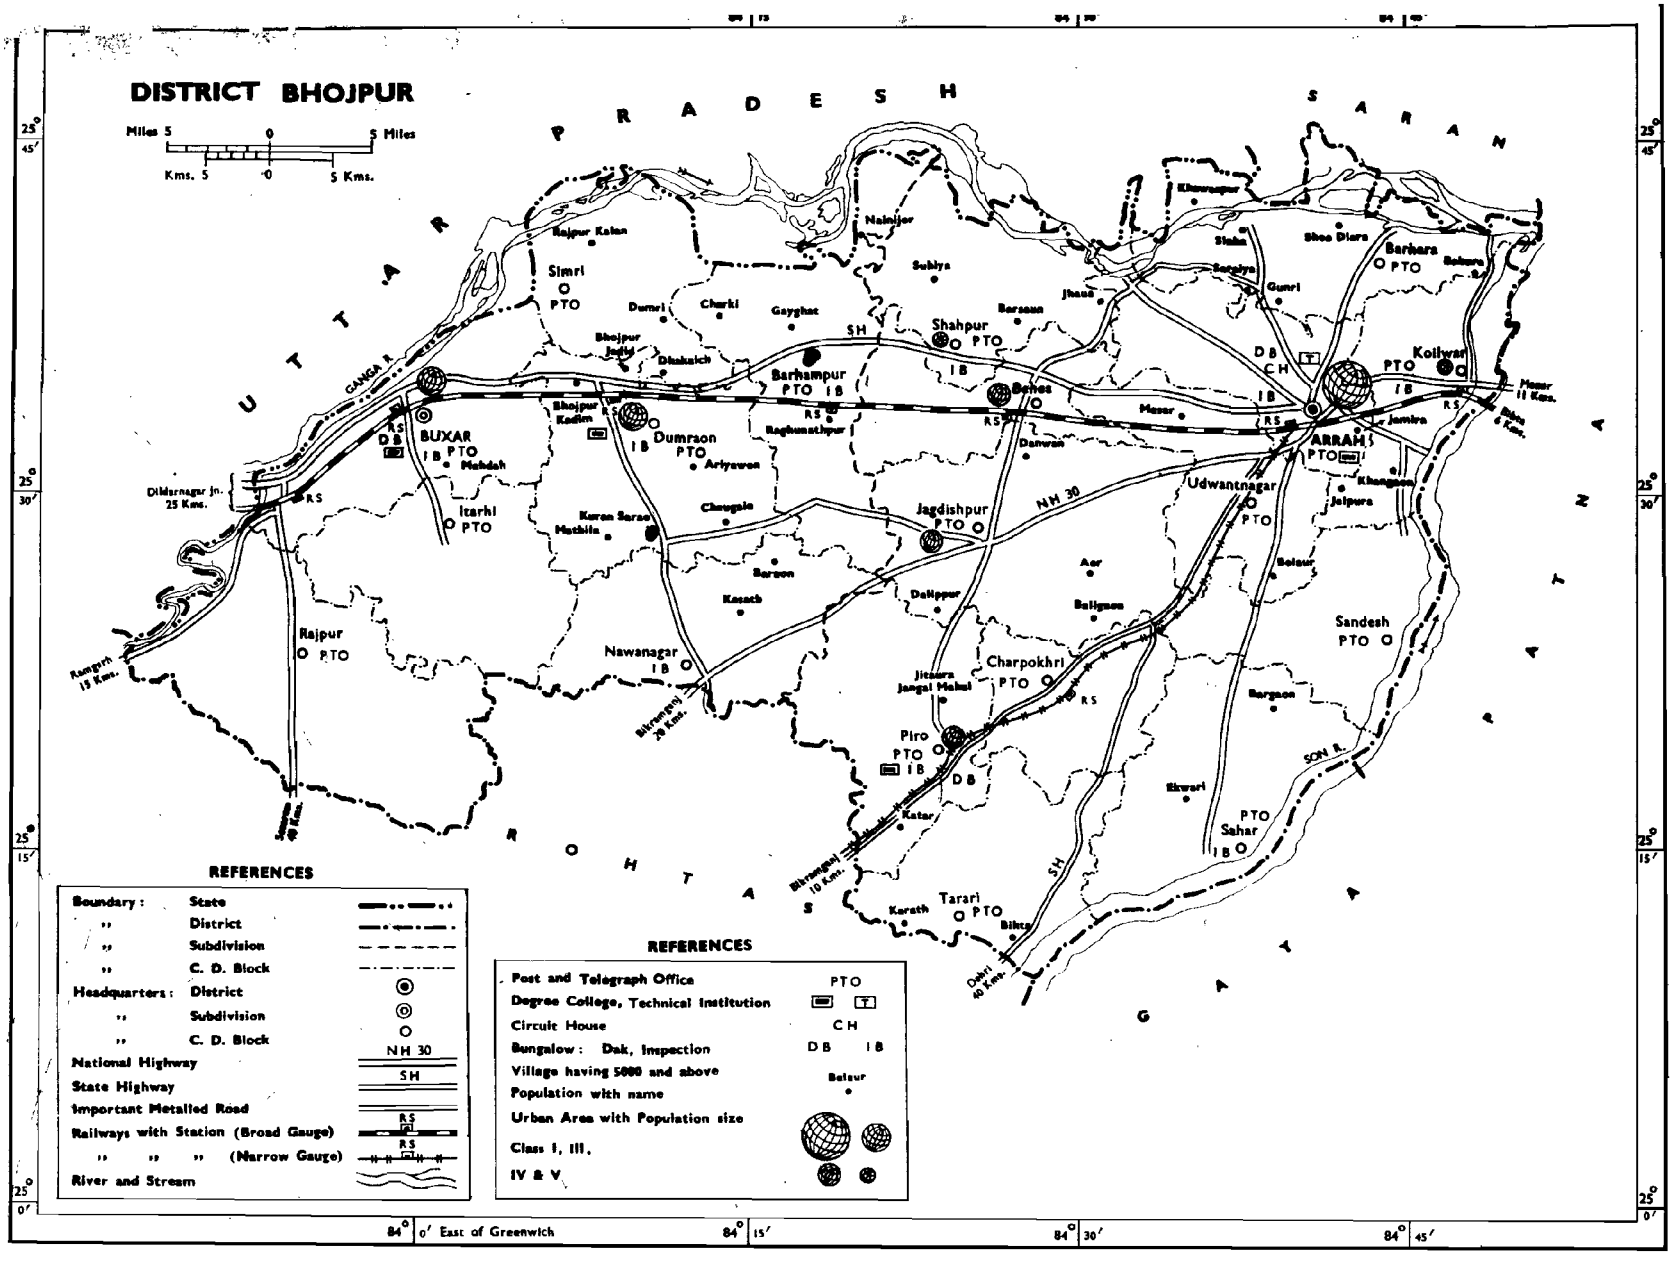

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

I am also thankful to Dr. N.G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Shiva Mudranalaya, Allahabad who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The present district of Bhojpur consists of areas under Arrah Sadar and Buxar subdivisions of the old Shahabad district. The district of Bhojpur came in existence in the year 1972. Arrah town is the headquarters of the district and also its principal town. The district is bounded on the north by the district of Saran and Balia district of Uttar Pradesh; on the south by the district of Rohtas; on the west by the districts of Ghazipur and Balia of Uttar Pradesh; on the east by the districts of Patna and Gaya.

Bhojpur district has a close linkage with that of its parent district of Shahabad which has an old and interesting history. In the pre-historic days also there is evidence of the area being inhabited. The 1961 Census report of Shahabad describes the history of the district in the following manner ;

> "According to some legends, the Kharwars were the original settlers in the hilly tracts near Rohtas. The Oraons also claim that they ruled over the country between Rohtas and Patna. It is said that Arrah, the present headquarters of the district, derives its name from the Sanskrit word, 'aranya', which means forest. It suggests that the entire area around modern Arrah was heavily forested in old days. According to mythology, sage Viswamitra, the family *guru* of Rama, had his *ashram* somewhere in this region. He was disturbed in his *Yagna* (sacrificial offering) by the *rakshasas* who abounded in the thick forests surrounding the area. The killing of the famous *rakshasi*, Tadika, by Rama when he was still a boy under training in the *ashram* of Viswamitra is said to have taken place near the present Buxar."

The history of Buxar goes back even prior to the period of Ramayan. The word Buxar is said to have been derived from Vyagharsar. The tiger face of Rishi Vedshira, which was outcome of the curse of the sage Rishi Durvasha, could be restored after bathing in a holy tank which was later named as Vyaghra Sar.

Buxar is famous since the Epic period for being the seats of eminent saints. It is said that Ahilya wife of Gautam Rishi restored her humanly body from that of stone and got salvation from mere touch of the feet of Rama. The place where this happened is known as Ahirauli situated six kilometres away from Buxar. Till the sixteenth century, the history of Buxar is hidden in darkness. The deciding battle between Humayun and Sher Shah was fought at Chousa in 1530 A.D. Again, in 1764, this place came into highlight when the historic battle between Britishers and Nawab of Bengal, Mirkashim was fought at Kathikauli which is six kilometres east of Buxar town. The 1961 Census report describes the early period of the old Shahabad district which includes the present district of Bhojpur as under :

> "In the old days, Shahabad formed part of the ancient kingdom of Magadh which also contained portions of the present Patna and Gaya districts. Though included in the kingdom of Emperor Asoka, the general absence of Buddhists monuments from a greater part of the district suggests that it remained almost immune from the Buddhist influence of the time"

> "The famous Chinese pilgrim, Hieun-Tsang, who journeyed through the country in the seventh century A.D., paid a visit to Mo-Ho-Solo in Shahabad. This place has been identified with the present village Masar, ten kilometres west of Arrah. The Chinese pilgrim found that the inhabitants were all Brahmins who did not respect the law of Buddha. He, therefore, felt disappointed and did not proceed to any other place in the district."

> "Not much is known about the history of the district after the fall of the Guptas. In all

probability it relapsed into the hands of the aboriginal tribes and came under the control of petty chieftains. The most dominant people during this period were the Cheros. They ruled over the greater portion of the district. Then came the Rajputs from Ujjain in the Province of Malwa. Raja Bhoj was their king and the term 'Bhojpur' now applicable to the area is derived from him. The Rajputs had a series of conflicts with the aboriginals and succeeded in usurping parts of their territory, but it took them many hundred years to subdue the aboriginals completely."

The Medieval period history of this district has been described in the following words:

"While encamping at Arrah in 1529 after his victory over the Afghan rulers, Babar proclaimed his sovereignty over Bihar. In commemoration of this event, the place was called Shahabad, which literally means "the city of the Emperor". This name was later applied to the Sarkar within which Arrah was included and eventually to the entire district."

After the death of Babar, Sher Shah once again became active and Humayun had to suffer a crushing defeat at his hands at Chausa which secured Sher Shah the imperial throne of Delhi. The rule of Sur dynasty which was founded by Sher Shah did not last long and the Mughals soon regained the throne of Delhi. Akbar, after his accession, tried to extend his empire and consolidate it and in course of it included the district of Shahabad in his empire, though the control was not very tight. Akbar's General, Man Singh, established his stronghold at Ramgarh and made efforts to organize the revenue administration of the district on a sound footing. But the local chiefs continued to resist. The Rajas of Jagdishpur and Bhojpur defied the Mughals. The Raja of Bhojpur rebelled against Jehangir. His successor, Raja Pratap, was done to death by Shah Jehan and the queen was forced to marry a Muslim courtier. This finally quietened the Bhojpur family. But stray troubles continued till the last days of Mughals. The district was frequently overrun by contending Mughal armies.

The next event of importance took place in 1764 during British period when Nawab of Bengal, Mir Kasim had a fight with the Britishers. However, the English won the decisive battle over Mir Kasim in 1764.

Another event of note in the district thereafter was the rebellion of Raja Chait Singh of Benares which shook the very foundations of the English power in India. Chait Singh, however, lost eventually. After this the district had a very uneventful history till 1857 when Kuer Singh revolted against the Britishers in line with the Mutineers.

Natural Divisions

Bhojpur district consists of two subdivisions, viz., Arrah Sadar and Buxar comprising 19 development blocks stretching over an area of 4,098.0 square kilometres. The entire strip of land between the river Ganges on the north and the main line of the Eastern Railway on the south is a low lying alluvial plain. It receives deposits of silt from the Ganges almost every year and is extremely fertile. In fact, this region is considered to be the best wheat-growing area in the State.

The district has rivers running almost throughout its perimeter. The Ganges forms the northern boundary of the district. The river Karmanasa joins the Ganges near Chausa. The low-lying rich alluvial plains in the north-eastern end owe their fertility to the river Ganges. The rivers Konch, Ganghat, Chher and Banas all fall into the Ganges.

The Sone is another important river in the district. The Sone enters the district at the trijunction of Palamu, Mirzapur in Uttar Pradesh and Bhojpur districts. It runs along the southern and eastern boundaries of the district until it merges into the river Ganges near Maner in Patna district.

Climatic conditions

The climate of the district is of moderately extreme type. The hot weather begins about the middle of March, when hot westerly winds begin to blow during the day. The months of April and May are extremely hot. In a normal year the monsoon sets in by the third week of June and the rains continue with intermissions till about the end of September or the early part of October. The cold weather begins from the month of November and lasts till the beginning of March. January is the coldest month when the temperature comes down as low as 10°C. From the month of April till the first break of the monsoon the district experiences occasional thunder-storms also.

Rainfall

Rains set in sometime in June accompanied by a fall in temperature and increase in humidity. The

district experiences maximum rains during the months of July and August. The average rainfall, in normal conditions, recorded in these months are in the proximity of 300 mm. The district gets easterly winds from June to September which bring rains. From October the direction of the winds is reversed and westerly winds blow till May. There is slight rainfall in October, but November and December are quite dry. Some winter rain occurs in January and February.

Forests

The 1961 District Census Handbook of Shahabad describes the flora and fauna of the district in the following manner :

"The district was previously full of forests. It is said that the name 'Arrah' is a contortion of the word 'aranya' which, in Sanskrit, means 'jungle'. The forests, it seems, suffered considerable damage during the years 1759-1765 when the district was frequently overrun by contesting Mughal armies. It also suffered large-scale devastation in the year 1761-62 when the forces of Kassim Ali Khan passed through the district. During the visit of Francis Buchanan in the year 1812-13 the area covered by forests had gone down to nearly 22 per cent of the total area of the district. In the recent past, the forests suffered again during the period of *Zamindari* abolition. Afforestation has been taken up to increase the forest area. The forests of the district are not rich in their products. Firewood is the most important among its product."

"The district had a wide variety of wild animals and game birds when the forests were thick and unfrequented by human beings. With the increase in irrigation facilities the area under cultivation has grown, consequently, diminishing the forests. The wild animals have suffered in the process and their numbers have gone down very considerably. Hyaenas and spotted deer are found sometimes in the plains mostly adjacent to the hills."

"Fish-eating crocodiles are found in larger rivers. Common crocodiles are seen in others. Geese of various varieties, wild duck, teal, partridges, quail, peafowl and jungle fowl are among the game birds found in the district"

Irrigational facilities

The rivers Sone and Ganges are the perennial sources of surface water. They can provide irrigation to major portion of agricultural lands. In the pre-*Zamindari* abolition days the Zamindars used to maintain *ahars* and *pynes* which served the purposes of both irrigation and drainage in certain pockets of the district. Ordinary wells also used to be a good source of irrigation.

The District Gazetteer of Shahabad (1966) mentions as follows:

"The agricultural prosperity of the district depended on artificial irrigation, without which many tracts would be uncultivated, and the land would be unable to grow sufficient food crops to sustain its population. The three great sources of irrigation were artificial reservoirs, wells and the Sone canals all of which helped to supplement the natural supply of water and to compensate for its inadequacy or untimely distribution.

Ahars are artificial reservoirs meant to collect the rain water. These long shallow tanks were protected by small embankments and served as an artificial catchment basin for receiving the water coming down from the adjacent lands. From the *ahars* water channels (*pynes*) are constructed or *pynes* are made to the nearest stream or water-course. The maintenance of the *pynes* was the responsibility of the landlords and the rights of the tenants to the use of water were duly recorded in the *fard-pashi*.

The sources of artificial irrigation mentioned so far, however, are of minor importance as compared to the Sone Canal System which has been the most important source of irrigation in the district from the year it was constructed. The remodelling of Sone Canal System known as the Sone Barrage Project had been done recently in order to improve upon the Sone irrigation system built in 1868—74. The Sone Barrage Project consists of the three units, namely, the barrage on the river Sone, remodelling of the canal system and a high level canal system. The remodelled Sone Canal System was likely to irrigate an additional area of about 1·7 lakh acres of *kharif*, 40 thousand acres of *rabi* and 1 lakh acres of hot weather crops within the Sone Command."

Land use pattern

In this district both the irrigated and unirrigated areas excepting the hills and forests are being exploited for cultivation. Even some of the large *jhils* like one at Dumraon, which was a duck-shooting area, have been dewatered and put to crop and grows *boro* crops. Intensive agriculture is also being attempted by what is popularly known as the Package Programme. The Block Development authorities are also trying to extend cultivation and improve the output. The remodelled Sone Canal System has the objective of bringing in more land under cultivation. Horticulture is spreading and orchards are springing up in all parts.

Rice, wheat, barley, grams and pulses are the main crops of the district. The winter rice forms the greater part of this crop. Gram is by far the most important among the pulses grown in the district. Other pulses grown are *rahar*, *khesari* and *masuri*. The important among the crops of the district other than rice and wheat are oil-seeds and sugar-cane. The straw is used as fodder and for roofing the house.

Mines and Minerals

The mineral resources of the district have so far been little exploited. The lime manufacture in the Sone valley below the Rohtas plateau is of recent origin. *Kankar* is found in almost all parts of the plains, particularly in the beds of rivers and along the banks of the Sone. It is used for metalling roads, and is also burnt in order to obtain lime.

Industrialisation

After bifurcation of the old Shahabad district in the new districts of Bhojpur and Rohtas the large scale industries now generally fall in Rohtas district. There are, however, different types of Small-scale and Cottage Industries located in the district of Bhojpur, the details of which have been given below:

(i) *Soap Industry*—It is mainly concentrated in Arrah and Buxar.

(ii) *Timber and Furniture works*—It is located at Arrah, Buxar, Behea and Dumraon.

(iii) *Leather Industry*—There are individual leather workers distributed all over the district. There is a concentration of them at Khilafatpur village in Buxar Subdivision who are engaged in shoe-making. There is a shoe-making centre in the village which has also been receiving help from the Industries Department.

(iv) *Dumraon Industries*—This is managed by the Dumraon Maharaja, the ex-landlord of Dumraon. There is a lantern factory under this management known as Dumraon Lantern Factory. It is equipped with all the necessary machineries and other implements required for the manufacture of lanterns. The lanterns have a market within the State as also outside the State.

Livestock

The district of Bhojpur has a large majority of the people engaged in agricultural pursuits deriving their livelihood from agriculture or pasture. The possession of livestock generally adds to the social status of the farmer. The quality of the livestock has had some improvement because of serious efforts of the Government and the response of the farmers. Since the district has quite a large population of prosperous agriculturists mostly due to the suitability of facilities of canal irrigation, the farmers in the canal irrigated area have a considerable cattle wealth.

Communications

The district has been fairly rich in road communication for a long time. Francis Buchanan has mentioned in 'Shahabad Journal' that there are some very good roads in the district. He travelled "by a very good road with brick bridges from Koilwar to Arrah". He also mentions of a few other good roads viz., "the great road to Buxar, the Benaras road, road to Sasaram, and the great road to Dumraon." Patna-Arrah-Buxar road, Behea-Piro road, Dumraon-Nasriganj road, Sasaram-Bikramganj-Arrah road are also worth mentioning.

Arrah, the district headquarters, is on the main line of the Eastern Railway, It enters the district at Koilwar on the east and moves *via* Buxar to Moghalsarai on the west.

The Ganges is navigable all the year round and goods are transported to Calcutta on the east and places in Uttar Pradesh on the west through the river. Boats also ply in the Sone intermittently, though the district has a net work of canals.

Credit facilities

The Central Co-operative Banks located in the important towns of the district work as the pivot of Co-operative banking and credit. All the Co-operative societies are supposed to be affiliated to these banks for credit facility. These banks extend finance only to Co-operative institutions which in turn pass on the same to their members. Financing by these banks is

restricted to short-term and medium-term loans for agricultural purposes only. Short-term loans are advanced to agriculturist members to meet their needs such as seeds, manures, etc. Medium-term loans are advanced for purchase of livestock, agricultural implements, etc.

Trade and Commerce

The important wholesale markets in the district are Arrah, Buxar and Behea. The main commodities exported from Arrah Railway Station are rice, paddy, *gur*, mango, stone-chips and the main imports are cloth, engineering goods, medicine, etc. The main places where commodities are sent are Patna, Bhagalpur, Calcutta, etc. The main places from where commodities come to Arrah are Calcutta, Bhagalpur, Muzaffarpur, Kanpur, Hapur, Bombay, etc. Arrah town, the district headquarters has a number of important market areas such as Mahalla Nawada and Chowk Bazar. The town is well served by railways, roadways and waterways.

Behea is at a distance of about 20 kilometres from Arrah and is served by Eastern Railway and a good road. It is a very important grain market.

Buxar is a subdivisional town and an important trade centre. It is also served by railways, roadways and waterways. It is located on the bank of river Ganges and the main trade of the town is grain, vegetables, fish and manufactured goods of Jail industry (Central Jail, Buxar manufactures *newar*, carpets, etc.). There are also a number of *mandies* and important marketing centres located at Arrah and Buxar.

Social and Cultural events

No major social or cultural event has taken place in the newly created district of Bhojpur since it came into existence. Religious functions are, however, held regularly by different communities.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Dalaur

The village is situated 2 kilometres east of Jagdishpur and is noted as the site of the final battle between Babu Kuer Singh and the British forces in 1857.

2. Giddha

Situated 6 kilometres from Kulharia Railway Station in Koilwar block, the village is noted for the large contingent it provides to the Indian army.

3. Koilwar

The recently declared notified area committee, the town lies on the western bank of river Sone about 50 Kms. west of Patna and is the headquarters of the development block-*cum*-anchal of the same name. It is supposed to have a healthy climate and a sanatorium for T. B. patients has been built at a distance of two kilometres from the main town. There is a long road-*cum*-rail bridge over the river Sone. The upper part of the bridge serves the railways whereas pedestrians and vehicular traffic use the lower part.

4. Kulharia

The village lying in the Koilwar block is famous because of the Kulharia family whose members have great contributions towards the welfare of the State. One of the biggest colleges in the State, B.N. College of Patna was founded by Babu Bisheshwar Narain Singh, an ex-Zamindar of Kulharia family. His descendants have the credit of starting various other educational institutions.

5. Bibiganj

The 1961 Census Report mentions the village as follows:

> "The village, situated 6 kilometres west of Arrah on the Arrah-Shahpur Road, has a bridge which is famous as the site of a battle between the Britishers and Babu Kuer Singh in 1857. There is also a forest known as 'Sarayan' used as the headquarters of guerilla warfare by Babu Kuer Singh."

6. Masurhi (Katho)

The village, which is situated 5 kilometres east of Jagdishpur, has a 300-year old grave of the Muslim saint, Masar Dewan. It is held as sacred by the Muslims.

7. Tar

Situated about 10 Kms. north-west of Piro the village derives its name from Tadika, a giantess killed by Lord Rama. There is an old tank in the village which is said to be the wrestling ground of Tadika.

8. Behea

A recently notified town in the Sadar subdivision it is on the main line of the Eastern Railway. It is well connected by road. Behea was formerly the home of a branch of Harihobans Rajputs. It is believed that the Raja, Bhopat Deo, violated Mahini, a Brahmin woman, who thereupon burnt herself to death and in dying imprecated the most fearful curses on the Harihobans Rajputs. After this tragedy the clan left Behea and moved across the Ganges to Ballia. The tomb of Mahini lies under a *pipal* tree close to the Railway at Behea and is visited by hundreds of worshippers especially the women.

9. Deo

The village has the remains of a temple of Sun-God, believed to have been built by the Sea-God in ancient times. The temple was ravaged by Mahmud Ghazni. Indra, Baroon and Kuber are enshrined in it.

10. Arrah

The District Gazetteer of Shahabad (1966) describes the town as follows:

> "General Cunningham has identified Arrah with the place mentioned by Hiuen-Tsiang as that at which Asoka set up a Stupa to commemorate the conversion by Buddha of the demons of the desert who feasted on the blood and flesh

of men. Even to this day, a legend lingers that this part of the country was the home of a powerful demon named Bakra, whose daily food was a human being supplied either by the village of Bakri or by Chakrapur, as Arrah was then called. During their wanderings, the five Pandavas came to Chakrapur and were entertained by a Brahman whose turn it was to supply a victim for the demon. Bhim Pandava, on hearing this declared that as he had eaten the Brahman's salt, he would go himself to the demon; and setting forth, he fought and killed him at Bakri, and then brought his body to Chakrapur. This myth is found in a more complete form in the Mahabharatas and General Cunninghan considers that it must have been one of the five honoured legends of antiquity which the Buddhists adopted for the glorification of their great teacher. The village Bakri still exists in the near neighbourhood of Arrah, and though there are no ancient remains at either place, the Brahmanical legend of Bakrasur is, in the opinion of General Cunninghan, so clearly identical with that of the man-eating demons described by the Chinese pilgrim that he accepts Arrah as the site of the stupa and lion pillar erected by Asoka."

11. Buxar Town

This is an old town situated on the bank of Ganges river and is the headquarters of Buxar subdivision. The District Gazetteer of Shahabad mentions about this town as follows:

"Headquarters town of the subdivision of the same name, Buxar is said to have been the home of many of the authors of Vedic hymns and to have been called originally *Vedagarbha* i. e., the womb or origin of the Vedas. Local tradition derives the name of the town from a tank near the temple of Gauri Shanker which was originally called *aghsar* or effacer of sin, but in course of time came to be called *baghsar*. The story runs that a *rishi* or sage, called Bedsira, having transformed himself into a tiger to frighten the *rishi* Durvasa of whom he was jealous, was doomed by the latter to retain that form for ever. He was restored to his original shape by bathing in the holy tank of *aghsar* and then worshipping Gauri Shankar, and in commemoration of this event the spot was called *Vyaghrasar* or *Baghsar*, i. e., the tiger tank. The most notable temple in the town is that of Rameswar Nath Mahadeo to which pilgrims resort from distant places"

"Buxar is famous as the scene of the defeat (on the 23rd October 1764) of Mir Kasim and the Nawab-Wazir of Oudh, Shaja-ud-daula. The fort of Buxar standing on a high bluff above the Ganges and effectually commanding the reaches of that river, was long a position of considerable strategic importance."

12. Chausa

The famous site of battle fought between Humayun and Sher Shah in 1539 A.D. Humayun had to take the "Bhisti" (water man's) help for crossing the Ganges as he was being persued by Sher-Shah. in recognition of the Bhisti's service Humayun made the waterman Emperor for one day (*Ek din Ka Badshah*) and the latter issued leather coins to mark his day-long reign.

13. Ahirauli

Situated about 5 kilometres north-east of Buxar, the village has a temple of Devi Ahilya. According to local tradition, it dates to the pre-historic days. Ahilya, the wife of the sage Gautam, had been transformed into stone by the curse of a sage. She was redeemed by Lord Ramchandra.

14. Kharika

The village, which is situated about 6 kms. south-west of Rajpur, is noted for the fierce battle between the forces of Babu Kuer Singh and the British in the year 1857.

15. Bhojpur Kadim

Situated 5 kms. from Dumraon, the village was said to be the seat of Raja Bhoj. The village, which is on Arrah-Buxar road has some ruins, a portion of which is known as the '*Krishichetra*'. It is believed that members of the royal family, who lived here enjoyed water sport at the above place which is known as *Jalkrida*. On excavation, brick-built walls have been found.

16. Brahampur

It is a large village in the Buxar subdivision, situated on Arrah-Buxar road. It is about 38 Kms. west of Arrah. The village contains the famous Brahmneshwar temple which existed at the time of invasion of Mahmud Ghazni who destroyed it. The temple is said to have been re-built by Raja Man Singh. A very large cattle fair is held in February-March every year.

17. Dumraon

The District Gazetteer of Shahabad mentions as follows:

"Dumraon town in Buxar subdivision is situated on the main line of the Eastern Railway. The town is best known in connection with the Dumraon Raj, to which family it has given its name. The principal buildings are the palace and pavilion of the Raj, both excellent examples of modern Hindu architecture. The former residence of the Dumraon family is said to have been destroyed by Mir Kasim Ali. Within the palace grounds stands a temple dedicated to Sri Bihariji, where great religious festivals are celebrated on the birth-days of Rama and Krishna, to which *Pandits* are invited from all parts of India. Dumraon town is intimately associated with the Dumraon Raj family. Dumraon Raj has sponsored a member of religious and charitable institutions. Dumraon town and the suburbs are full of beautiful temples and tanks with separate *pucca* Ghats for men and women. The largest and by far the most important one is the temple of 'Shri Bihariji' (Lord Krishna with Radhika Rani-already described above) built about 1840 by Maharaja Jai Prakash Singh and situated within the *Garh* compound. This temple is a great attraction for people from far and near. There are a number of other temples of Shri Bihariji at Dumraon and Varanasi and charitable trusts are associated with such temples."

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new Statement IV-A of civic and other amenities for each area/locality identified as slum in Class I and II towns has been added.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information con-

tained in it is almost similar to that in the General Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana Jurisdiction List pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that the villages figuring in the PCA(rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies.

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census, the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria:

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size:

Class of town	*Population*
I	1 lakh and above (termed as city)
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths if any, of such town.

Other concepts and definitions which have been used in this volume are explained below:

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix ef both. There may be one-member households, two-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Workers—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & *Scheduled Tribes*—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below:

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Bhojpur, with a population of 2,407,600 persons is divided into 19 Community Development Blocks consisting of 1,799 inhabited villages (out of 2,381 villages including 30 villages which are constituent units of towns in the district) and 8 towns. Comprising 3.44 per cent of the total population of the State, the district ranks 11th in the State in order of population. The following table highlights the population, number of villages and towns for the district as also for its development blocks;

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Arrah	234,277	122,992	111,285	109,166	55,504	53,662	125,111	67,488	57,623	134	88	1

	Total	**2,407,600**	**1,238,508**	**1,169,092**	**2,149,443**	**1,100,458**	**1,048,985**	**258,157**	**138,050**	**120,107**	**2,381**	**1,799**	**8**

It would be seen from the table on previous page that among the C.D.Blocks, the range of variations in population distribution is indeed great. Arrah block has the largest population accounting for 9.73 per cent of the district's population presumably because Arrah town, the district headquarters is situated in this very block. This is followed by Jagdishpur block with 8.76 per cent. The least populated C.D.Block is Charpokhri with only 3.13 per cent of the population of the district because a good number of villages in this block are sparsely populated as compared to villages of other C.D.Blocks.

Bhojpur district appears to have had less impact of urbanisation since 89.28 per cent of the population lives in the villages. The total urban population contained in 3 towns is of the order of only 10.72 per cent of the population of the district. Arrah(M) is the only Class I town (population 1 lakh and above) in the district. There is no Class II town (population 50,000—99,999) in the district nor any urban agglomeration.

Decadal change in population

Arrah Sadar and Buxar subdivisions of the old Shahabad district now constitute the jurisdiction of the Bhojpur district after separation of Sasaram and Bhabua subdivisions and creation of new Rohtas district. The percentage increase in the population of the district and its development blocks is presented in the table below;

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Arrah	183,283	90,364	92,919	234,277	109,166	125,111	+27.82	+20.81	+34.65

Tarari	90,436	90,436	..	105,048	105,048	..	+16.16	+16.16	..
Piro	119,110	119,110	..	141,757	127,689	14,068	+19.01	+7.20	..
Buxar	128,882	97,191	31,691	156,848	113,896	42,952	+21.70	+17.19	+35.53
Itarhi	76,063	76,063	..	89,838	89,838	..	+18.11	+18.11	..
Rajpur	120,951	120,951	..	143,034	143,034	..	+18.26	+18.26	..
Simri	107,610	107,610	..	124,327	124,327	..	+15.53	+15.53	..
Barhampur	105,785	105,785	..	133,599	133,599	..	+26.29	+26.29	..
Dumraon	130,740	107,771	22,969	158,357	128,797	29,560	+21.12	+19.51	+28.70
Nawanagar	95,063	95,063	..	110,883	110,883	..	+16.64	+16.64	..
Total	**1,995,146**	**1,824,575**	**170,571**	**2,407,600**	**2,149,443**	**258,157**	**+20.67**	**+17.81**	**+51.35**

It would appear that the rise in the population of this district during the 1971—81 decade has been of the order of 20.67 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 17.81 per cent while urban population growth over the decade has been as much as 51.35 per cent.

As shall be evident from the table, the variations in growth rates are more pronounced in the development blocks. Shahpur development block has shown the highest increase in population over the decade with 28.42 per cent followed by Arrah and Barhampur with 27.82 and 26.29 per cent respectively. The increase in rural population during 1971—81 has been the highest in case of Barhampur block (26.29%) followed by Behea block(21.63%). As regards the growth in urban population, Behea block occupies the first position with 40.58 per cent followed by Buxar block with 35.53 per cent increase in urban population. Both the blocks contain only one town, viz. Behea (NAC) and Buxar (M) respectively. The most populous town in the district is, however, Arrah(M), the district headquarters, though its decadal growth rate (34.65%) has been only next to the above two towns. Koilwar, Piro and Shahpur have been included in the urban list for the first time in 1981 Census.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the follcwing table in six size-groups;

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	207	11.51
200—499	394	21.90
500—1,999	908	50.47
2,000—4,999	247	13.73
5,000—9,999	40	2.22
10,000+	3	0.17
Total	**1,799**	**100.00**

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499 accounting for 50.47 and 21.90 per cent of the total number of inhabited villages respectively in the district. The medium and small size villages are thus much more in number than large villages (population above 5,000) in the district. The large villages comprise of only 2.39 per cent of the inhabited villages in the district. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 which was almost equal to that of old Shahabad district (which constituted both the Bhojpur and Rohtas districts) being 752.

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below:

Table 4—Distribution of villages by density

Range of density (per Sq. Km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
0—10	7	0.39
11—20	5	0.28
21—50	11	0.61
51—100	38	2.11
101—200	81	4.50
201—300	148	8.23
301—500	464	25.79
501+	1,021	56.75
Not known	24	1.34
Total	**1,799**	**100.00**

The data presented in the above table highlights the fact that maximum proportion of villages in the district lies in the density range of 501 + with 56.75 per cent followed by villages in the density range of 301—500 which account for 25·79 per cent.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is mostly contained in the medium and small villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes/Tribes population in villages and towns.

Tables 5, 6 and 7 furnished below indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of

the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro-level, particularly, in relation to area development oriented programmes. The tables have been dealt with separately:

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	339	18.84
5 or less	191	10.62
6—10	252	14.01
11—15	297	16.51
16—20	248	13.79
21—30	271	15.06
31 and above	201	11.17
Total	**1,799**	**100.00**

It is discernible from the table that there are as many as 201 villages, where the percentage of Scheduled castes population to total population is more than 31 per cent and there are 339 villages which account for 18·84 per cent of the villages which do not have any population of the Scheduled castes at all. Among the villages with scheduled castes population the maximum number of villages, i. e., 297 accounting for 16·51 per cent of the total inhabited villages where the Scheduled castes population is in the range of 11—15 per cent and the least number (191) accounting for 10·62 per cent of the villages where the scheduled castes population is in 5% or less range which indicates that there is not much variation in number of villages in different percentage range of scheduled castes population to total population.

Table 6—Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,628	90.49
5 or less	157	8.73
6—15	9	0.50
16—25	2	0.11
26—35	3	0.17
36—50	..	..
51 and above	..	..
Total	**1,799**	**100.00**

As regards the population of the Scheduled tribes it can be seen from Table 6 that there are as many as 1,628 out of 1,799 inhabited villages (90.49%) in the district which have no Scheduled tribes at all. It is only in 157 villages comprising 8·73 per cent of the total number of inhabited villages where the concentration of Scheduled tribes population is less than 5 per cent. In the higher ranges the number of villages is either negligible or nil.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Arrah	125,111	12,763	340	10.20	0.27
Behea	11,602	1,222	216	10.53	1.86
Buxar	42,952	3,950	162	9.20	0.38
Dumraon	29,560	2,562	288	8.67	0.97
Jagdishpur	17,621	1,610	86	9.14	0.49
Koilwar	7,936	818	4	10.31	0.05
Piro	14,068	1,542	18	10.96	0.13
Shahpur	9,307	1,181	24	12.69	0.26
All Towns	**258,157**	**25,648**	**1,138**	**9.94**	**0.44**

The table on previous page indicates that the concentration of the Scheduled Castes in the towns of Bhojpur district is of the order of 9.94 per cent of the total population which is less as compared to rural areas. It may be attributed to the fact that they have been less mobile probably because agriculture and allied activities still remain to be their main source of livelihood. The highest percentage of Scheduled Castes population is contained in Shahpur (NAC) with 12·69 per cent. The urban content of the population of the Scheduled Tribes is almost negligible, being only 0·44 per cent of the total urban population. Only in Behea (NAC) the proportion of Scheduled Tribes exceeds 1 per cent. In rest of the towns the proportion of Scheduled Tribes is much less.

Literacy rates by population ranges of villages and towns.

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately:

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	207	25.55
200—499	394	25.60
500—1,999	908	29.17
2,000—4,999	247	29.31
5,000—9,999	40	31.24
10,000+	3	25.94
Total	**1,799**	**29.16**

It would be seen above that literates form 29·16 per cent of the population in the rural areas of the district as against 49·62 per cent in the urban areas. In the rural areas it is interesting to note that except in the population range of 10,000+ where there are only 3 villages, the literacy rate varies directly in relation to the population range of the villages. The highest percentage of literacy rate can be seen for the villages in the population range of 5,000—9,999 and 2,000—4,999 with 31·24 and 29·31 per cent literates respectively and the lowest in the population range of less than 200 with 25·55 per cent being literates.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Arrah	55.88
Behea	42.05
Buxar	53.92
Dumraon	39.21
Jagdishpur	34.43
Koilwar	43.81
Piro	42.36
Shahpur	32·71
All towns	**49.62**

Among the towns, Arrah (M), being the district headquarters, has the highest percentage of literate population (55.88%) followed by Buxar(M) (53.92%), which is the headquarters of the Buxar subdivision. In rest of towns the literacy rate varies between 32·71 per cent (Shahpur town) and 43·81 per cent (Koilwar town).

Workers and non-workers in rural and urban areas of the district.

The table furnished on next page gives the percentage break up of literates, main workers, marginal workers, total workers, non-workers and the number of the Scheduled castes and the Scheduled tribes in the rural and urban areas of the district as well as in its development block in relation to total population.

Table 10—Literates, Workers, Non-Workers, Scheduled Castes/

Name of Development Block	Total Rural Urban	Total Population			Percentage of S.C. Population to total population	Percentage of S.T. Population to total population	Literates to total population			Main Workers to total population

Total workers in the district of Bhojpur account for 26·93 per cent of the total population whereas the number of non-workers is as high as 73.07 per cent. As shall be evident from the table on back pages, the main workers (i.e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) comprise 25.21 per cent of the total population which is very close to the percentage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.72 per cent. The same trend can be observed in both the rural and urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 44.84 and 43·96 per cent respectively for males as against 7·96 and 5·36 per cent for females which indicates that the participation of females in economically productive work is quite low.

Another notable feature is higher percentage of female marginal workers (2·60%) vis-a-vis male marginal workers (0·88%). It can be seen that except in one or two urban cases the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (27·26%) than in the urban areas (24.18%). The same pattern is perceptible in the case of marginal workers who constitute 1·85 per cent of the rural population but only 0·56 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities, whereas in the urban areas, household industries and other works do not offer equal job opportunities in view of the limited urban development.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district:

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities—

	Total	**1,799**	**1,344(74.71)**	**352(19.57)**	**1,799(100.00)**	**368(20.46)**	**109(6.06)**	**260(14.45)**	**257(14.29)**	**643(35.74**

Educational amenity—There are as many as 1,344 villages accounting for 74.71 per cent of the total number of inhabited villages (1,799) in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Sahar with 96.12 per cent followed by Barhara and Koilwar with 92.98 and 88.33 per cent respectively. The lowest number of villages with educational facility is in the development blocks of Rajpur and Buxar with57.07 and 60.83 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low and only 19.57 per cent villages have it. Among the development blocks, Sahar again has the largest proportion of villages with medical facility, the percentage being 38.83. Rajpur block, on the other hand, again has the minimum proportion of villages enjoying medical facility, the percentage being 9.09 only.

Drinking water—It would be seen from the table that drinking water facility is generally available in all the inhabited villages of the district of Bhojpur.

Post and Telegraph—Postal facilities (Post & telegraph) are available only in 368 villages (20.46%) out of a total of 1,799 inhabited villages in the district. Barhara block has the maximum number of villages having post and telegraph facility (31.58%) closely followed by Shahpur (31.33%) and Barhampur (30.14%). In the remaining development blocks of the district the proportion varies from a minimum of 12.63 per cent (Rajpur block) to a maximum of 27.72 per cent (Piro block).

Market/Hat—The villages where market/*hat* is held constitute only 6.06 per cent of the total number of inhabited villages in the district. Barhara block again has the maximum number of villages where market/*hat* is held, the percentage being 17.54 followed by Simri block with 15.12 per cent. As shall be evident from the table there are only 3 development blocks, viz. Barhara, Sahar and Simri in the district which have the facility of market/*hat* in 10 villages or more. In the remaining blocks the number of villages where market/*hat* is held varies between 2 and 9 which clearly indicates that bulk of the population have to travel to different places to avail of market facility.

Communication—The details of villages connected by bus, rail, navigable river/canal services etc., have been incorporated in the Village Directory.

It would be seen from this table that only 14.45 per cent of the total villages in the district are connected by one means of communication or the other. The majority of villages are still devoid of this facility. A development block-wise break up of villages having any means of communication is given in the table on back page indicating that Udwantnagar block comprises the highest proportion of villages (33.33%) which are connected by bus or rail or navigable river/canal services, etc., followed by Koilwar with 28.33 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 3.57 per cent in Nawanagar block and the maximum of 25.00 per cent in Buxar block.

Approach road to village—With only 14.29 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Udwantnagar block with 36.23 per cent villages having *pucca* approach road again tops the list followed by Koilwar and Sandesh blocks with 25.00 and 24.69 per cent respectively. The development blocks which have the lowest number of villages having this facility are Nawanagar (2.68%) and Itarhi (2.99%). Simri block does not have any village at all having *pucca* approach facility.

Power Supply—Electrified villages in the district constitute as much as 35.74 per cent of the total number of inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Behea development block occupies the first position having the maximum proportion of electrified villages (75.00%) closely followed by Buxar and Dumraon blocks with 70.83 and 64.37 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Udwantnagar (5.80%) and Tarari (11.83%).

Proportion of rural population served by various amenities.

While in Table 11 we had discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rural population served by these amenities:

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* Road	Power supply

18	Dumraon	128,797	96.55	34.80	100.00	57.02	21.67	34.33	42.02	73.83
19	Nawanagar	110,883	93.12	38.70	100.00	48.47	21.31	18.76	11.08	41.10
	Total	**2,149,443**	**91.90**	**40.11**	**100.00**	**47.87**	**19.10**	**27.05**	**24.70**	**50.24**

It would be seen that educational facility is available to 91.90 per cent of the rural population in the district. The proportion varies between the maximum of 99.46 per cent in Sahar block and the minimum of 82.67 per cent in Rajpur block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 74.71 per cent (as has been observed in Table 11) than the proportion of population which is as high as 91.90 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 40.11 per cent which is much more than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table alongside indicates the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of—	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5—10 Kms.	10+Kms.	Total (cols. 2—4)
1	2	3	4	5
1. Education	451	4	..	455
2. Medical	955	387	105	1,447
3. Drinking water	..	..	..	..
4. Post & Telegraph	1,278	143	10	1,431
5. Market/*Hat*	847	680	163	1,690
6. Communication	814	572	153	1,539

As regards education facility it would be seen that there are as many as 451 villages in the district (25.07%) which do not have any educational facility within the village but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5—10 Kms. is only 4 whereas beyond 10 Kms. it is nil. The number of villages having other facilities within a distance of 5—10 Kms. and 10+ Kms. is less than those having the facilities within 5 Kms. though not in the same proportion.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five size groups:

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in Kms.)	Number of inhabited villages in each range	Number(with percentage) of villages having the amenity of— Education	Medical	Drinking water	Post & Telegraph	Market/*Hat*	Communication	Approach by *Pucca* Road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	206	149(72.33)	32(15.53)	206(100.00)	37(17.96)	3(1.46)	38(18.45)	38(18.45)	85(41.26)
6—15	619	476(76.90)	125(20.19)	619(100.00)	137(22.13)	49(7.92)	107(17.29)	102(16.48)	313(50.57)
16—50	959	706(73.62)	191(19.92)	959(100.00)	189(19.71)	55(5.74)	114(11.89)	117(12.20)	244(25.44)
51+	15	13(86.67)	4(26.67)	15(100.00)	5(33.33)	2(13.33)	1(6.67)	..	1(6.67)
Unspecified	..	..	..	..	..	..	..	..	..
Total	**1,799**	**1,344(74.71)**	**352(19.57)**	**1,799(100.00)**	**368(20.46)**	**109(6.06)**	**260(14.45)**	**257(14.29)**	**643(35.74)**

It would appear from the table on back page that maximum number of inhabited villages lie in the distance range of 16—50 Kms. (53.31%) from the nearest town. With only limited number of urban centres in the district such a situation is but natural. This is followed by villages in the distance range of 6—15 Kms. from the nearest town with 34.41 per cent. The proportion of villages lying in the distance range of more than 51 Kms. is almost negligible being only 0.83 per cent.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 72.33 per cent for those situated within 5 Kms. from the nearest town and thereafter it increases with the increase in the distance range from the nearest town except for the fact that there is a marginal decline in the distance range of 16—50 Kms. The same trend can be observed in the case of medical, post and telegraph and market/*hat* facilities. In case of communication and *pucca* approach road facilities, the proportion of villages is observed to be the highest in the distance group of 0—5 Kms. and thereafter it decreases with the increase in the distance group from the nearest town. For power supply facility also a similar situation is observed with a slight exception in the distance range of 6—15 Kms. It can be said that the villages which are nearer to the urban areas have benefited in respect of communication, *pucca* approach road and power supply vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communi-cation	Approach by *Pucca* Road	Power supply
1	2	3	4	5	6	7	8	9	10
—499	601	234(38.94)	33(5.49)	601(100.00)	11(1.83)	3(0.50)	41(6.82)	50(8.32)	133(22.13)
500—1,999	908	827(91.08)	157(17.29)	908(100.00)	148(16.30)	30(3.30)	109(12.00)	109(12.00)	330(36.34)
2,000—4,999	247	242(97.98)	128(51.82)	247(100.00)	168(68.02)	49(19.84)	86(34.82)	77(31.17)	151(61.13)
5,000+	43	41(95.35)	34(79.07)	43(100.00)	41(95.35)	27(62.79)	24(55.81)	21(48.84)	29(67.44)
Total	**1,799**	**1,344(74.71)**	**352(19.57)**	**1,799(100.00)**	**368(20.46)**	**109(6.06)**	**260(14.45)**	**257(14.29)**	**643(35.74)**

It can be seen from the table that maximum number of villages, i.e., 908 (50.47%) in the district fall in the population range of 500—1,999 followed by 601 villages (33.41%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000+ being only 43 (2.39%) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except in case of educational facility where the proportion of villages has declined in the population range of 5,000+ though the decrease is very marginal. Generally, the maximum number of villages having different amenities have a population range of 5,000+ which also corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

Main staple food in the villages

The table on next page indicates that rice and wheat constitute the main staple food of majority of the people in all the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block.

Sl. no.	Name of Development Block	Main staple food
1	2	3
1	Arrah	Rice, wheat
2	Udwantnagar	Rice, wheat
3	Jagdishpur	Rice, wheat
4	Behea	Rice, wheat
5	Shahpur	Rice, wheat
6	Barhara	Rice, wheat
7	Koilwar	Rice, wheat
8	Sandesh	Rice, wheat
9	Sahar	Rice, wheat
10	Charpokhri	Rice, wheat
11	Tarari	Rice, wheat
12	Piro	Rice, wheat
13	Buxar	Rice, wheat
14	Itarhi	Rice, wheat
15	Rajpur	Rice, wheat
16	Simri	Rice wheat
17	Barhampur	Rice, wheat
18	Dumraon	Rice, wheat
19	Nawanagar	Rice, wheat

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks:

Table 17—Distribution of villages according to land use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Arrah	88	13,848.53	94.29	26.86
2	Udwantnagar	69	16,518.41	90.33	79.08
3	Jagdishpur	91	27,414.78	89.41	66.67
4	Behea	76	12,073.62	90.33	52.82
5	Shahpur	83	11,825.98	95.58	7.43
6	Barhara	57	20,297.56	88·42	8.96
7	Koilwar	60	14,171.82	93.58	45.14
8	Sandesh	81	18,080.82	84.15	68.11
9	Sahar	103	25,063.05	80.49	81.53
10	Charpokhri	87	12,984.39	90.08	90.12
11	Tarari	93	19,219.07	85.96	79.30
12	Piro	101	20,956.30	90.17	88.08
13	Buxar	120	18,178.23	86.37	57.09
14	Itarhi	134	21,331.11	90.55	72.95
15	Rajpur	198	30,508.82	89.86	91.45
16	Simri	86	12,875.69	83.16	25.30
17	Barhampur	73	17,348.36	96.01	41.47
18	Dumraon	87	21,766.54	90.93	60.74
19	Nawanagar	112	21,109·31	91.92	85.45
	Total	**1,799**	**355,572.39**	**88.87**	**62.87**

It would be seen from the table that 88.87 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 62.87 per cent area is irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Barhampur block with 96.01 per cent closely followed by Shahpur and Arrah blocks with 95.58 and 94.29 per cent respectively. The lowest cultivable area is found in Sahar block which also is as high as 80.49 per cent.

The highest proportion of irrigated area to total cultivable area is found in Rajpur block accounting for 91.45 per cent closely followed by Charpokhri with 90.12 per cent and Nawanagar with 85.45 per cent. The proportion of irrigated area to the total cultivable area is found to be less than even 10 per cent in case of Shahpur (7.43%) and Barhara (8.96%) blocks which indicates that the villages in these two blocks are deprived of required irrigational facilities in spite of having potentiality in cultivation.

Growth, density and sex-ratio of urban population.

The urban population of the district in each of the censuses from 1951 together with the percentage variation over the decade is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to Bihar State:

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (number of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (number of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,416,642	110,219	7.78	+16.05	2,934	917	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,657,097	131,336	7.93	+19.16	2,583	867	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,995,146	170,571	8.55	+29.87	2,405	851	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	2,407,600	258,157	10.72	+51.35	2,454	870	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district is 258,157 comprising 10·72 per cent of the district population. The corresponding percentage of the State is 12·47. The urban population of the district has thus been increasing steadily over the decades. From colum 5 of the table it is evident that the growth of urban population in the district over the decades has been faster than the total population. The growth of urban population in the district has been from 16·05 per cent in 1951 to 51.35 per cent in 1981 Census whereas for the State the rise in urban population has been rather steady since the corresponding increase has been from 38·14 per cent to 54·76 per cent.

The density of population in the urban areas of the district was quite high in 1951 being 2,934 persons per sq. km. Thereafter it had shown a downward trend in the next two censuses. However, again in 1981 Census it has shown a slight upward trend. The density of the urban population of the State on the other hand had not been high till the 1971 Census. In 1981 Census, however, the density of the urban population of the State has shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is higher than that of Bhojpur which stood at 2,454 persons per sq. km.

The sex-ratio for the urban areas of Bhojpur district has all along been higher as compared to urban areas of the State but has always been adverse for females. The urban areas, in fact, still suffer from a shortage of females as all the towns serve only a limited purpose, the population being mainly agricultural with its moorings in villages.

Towns added and declassified in 1981

Out of the 8 towns in the district, 3 towns, viz., Koilwar, Piro and Shahpur Notified Area Committees have been added in the 1981 Census. The population of these 3 towns has been indicated in the table on the next page.

Table 19—New Town/Towns declassified in 1981 Census

Name of Town	Population 1981 Census
1	2
(*a*) *Added*—	
(i) Koilwar	7,936
(ii) Piro	14,068
(iii) Shahpur	9,307
(*b*) *Declassified*—	
Nil	

No town has, however, been declassified during the present Census.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name & civic status of the town	Per capita								
	Receipt in (Rs.)			Expenditure in (Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on Public health and conveniences	Public works	Expenditure on Public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
I. Arrah (M)	17.60	7.42	10.18	16.94	1.22	0.95	4.84	..	9.93
IV. Behea (NAC)	3.93	1.21	2.72	1.49	1.48	0.01	..	..	..
III. Buxar (M)	21.29	4.65	16.64	22.21	0.83	3.44	1.43	..	16.51
III. Dumraon (M)	11.94	2.61	9.33	7.33	1.07	0.76	0.47	1.65	3.38
IV. Jagdishpur (M)	8.14	0.48	7.66	6.45	4.04	1.93	0.01	..	0.47
V. Koilwar (NAC)	1.60	0.34	1.26	1.34	0.64	..	0.70	..	..
IV. Piro (NAC)	2.60	0.48	2.12	1.25	1.11	0.07	..	..	0.07
V. Shahpur (NAC)	..	..	..	..	..	..	..	..	..
Total	**14.36**	**4.79**	**9.57**	**13.36**	**1.27**	**1.26**	**2.66**	**0.19**	**7.98**

It would be apparent from the above figures that the per capita receipt is the highest in case of Buxar (M), the headquarters of Buxar subdivision. However, on going in details under different heads it can be seen that while receipt through taxes is the highest in case of Arrah (M), receipt through all other sources is maximum in case of Buxar (M). Receipt on both the counts is the lowest in Koilwar (NAC).

Per capita total expenditure is again the highest in Buxar (M). While, the per capita expenditure incurred on general administration is maximum in case of Jagdishpur (M), the per capita expenditure on public works is highest in Arrah (M).

Shahpur (NAC) does not maintain the town finance account probably since it is a recently notified statutory town.

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns. The following table gives details of different categories of educational institutions per ten thousand population in different towns of the district:

Table 21—Schools per ten thousand population in towns

Class, name & civic status of the town	Number per ten thousand population			
	Higher Secondary/Inter/PUC/Junior College	Secondary/Matriculation	Junior Secondary/Middle	Primary
1	2	3	4	5
I. Arrah (M)	0.16	1.04	2.40	6.47
IV. Behea (NAC)	..	1.72	1.72	4.31
III. Buxar (M)	0.47	1.16	2.10	3.26
III. Dumraon (M)	..	1.35	2.03	3.38
IV. Jagdishpur (M)	..	1.13	2.84	5.68
V. Koilwar (NAC)	..	1.26	2.52	3.78
IV. Piro (NAC)	..	0.71	1.42	6.40
V. Shahpur (NAC)	..	1.07	1.07	2.15
Total	**0.15**	**1.12**	**2.21**	**5.19**

It would be seen from the table on back page that institutions like Higher Secondary School/Inter/PUC/ Junior College do not exist in any of the towns except Arrah and Buxar, being the headquarters of the respective subdivisions. As regards Secondary/Matriculation level schools, there are on an average, 1.72 schools per ten thousand population located in Behea (NAC) which is the highest followed by 1·35 such schools per ten thousand population in Dumraon (M). Junior Secondary/Middle schools are, however, found to be maximum in case of Jagdishpur (2·84) followed by koilwar (2·52). Arrah (M) has, however, the highest number of primary schools in the district with an average of 6·47 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 5·19 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns of the district:

Table 22—Number of beds in medical institutions in towns

Class, name & civic status of the town	Number of beds in medical institutions per one thousand population
1	2
I. Arrah (M)	1.33
IV. Behea (NAC)	..
III. Buxar (M)	0.61
III. Dumraon (M)	5.99
IV. Jagdishpur (M)	1.02
V. Koilwar (NAC)	26.97
IV. Piro (NAC)	0.43
V. Shahpur (NAC)	3.76
Total	**2.49**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to be 2·49. The availability of beds in the hospitals is the highest in case of Koilwar (NAC) having 26·97 beds per 1,000 population because of location of Sanatorium (T.B. hospital) in the town. Behea (NAC) does not have this facility at all.

Proportion of slum population in towns

The details of slums have been collected only in case of Class I and Class II towns. The information was gathered through local officials of the Municipalities, Notified Area Committees as also through the Town Planning Department of the State Government in 1979. Since before 1981 Census only Arrah (M) fell in Class II (population 50,000—99,999) range the information regarding slum was collected in respect of this town only, though Arrah town has after 1981 Census, been upgraded as Class I town (population 1 lakh and above). The table below gives certain interesting feature regarding the slum in Arrah town.

Table 23—Propotion of slums population in towns

Class, name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (per sq. km.)
1	2	3
I. Arrah (M)	32.05	27,843

It can be seen that proportion of slum population is of the order of 32·05 per cent of the total population of the town. Overcrowding and congestion in the slum can be imagined from the fact that the density (persons per Km^2) of the slum is as high as 27,843 persons per square kilometre.

Important commodities imported, exported and manufactured.

The table below presents the most important commodity manufactured, exported and imported in the towns of the district.

Table 24—Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
I. Arrah (M)	Soap	Foodgrain	Cloths
IV. Behea (NAC)	Trailor	Rice	Stone plates
III. Buxar (M)	Rahat	Rice	Wheat
III. Dumraon (M)	Cotton yarn	Cotton yarn	..
IV. Jagdishpur (M)	..	..	..
V. Koilwar (NAC)	..	..	..
IV. Piro (NAC)	..	..	..
V. Shahpur (NAC)	..	..	..

In Dumraon town it has been observed that cotton yarn, the most important commodity which is manufactured in the town is also the same most important item which is exported to other places. In other towns, however, the most important commodity manufactured and the most important commodity exported is not the same. Jagdishpur, Koilwar, Piro and Shahpur have not reported this information, perhaps because there is no such commodity worth mentioning.

VD denotes Village Directory
PCA denotes Primary Census Abstract

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col.8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(—5 Kms.)', '(5—10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the dispensaries/community health worker has been taken as most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows:

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below:

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in Cols. 15 to 19 have been presented in hectares up to two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 do not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies etc., are generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory:

(i) *Column* 5—*Educational*

P	..	Primary or Elementary School (up to class IV)
M	..	Middle or Junior Secondary School (up to class VIII)
H	..	Matriculation or Secondary School (up to class X)
PUC	..	Higher Secondary, Intermediate, Pre-University, Junior College.
C	..	College
I	..	Industrial School
Tr	..	Training School
Ac	..	Adult Literacy Class/Centre
O	..	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column* 6— *Medical*

H	..	Hospital
MCW	..	Maternity and Child Welfare Centre.
MH	..	Maternity Home
CWC	..	Child Welfare Centre
HC	..	Health Centre
PHC	..	Primary Health Centre
PHS	..	Primary Health Sub-Centre
D	..	Dispensary
FPC	..	Family Planning Centre
TB	..	T.B. Clinic
NH	..	Nursing Home
RP	..	Registered Private Practitioner
SMP	..	Subsidised Medical Practitioner
CHW	..	Community Health Worker
O	..	Others

(iii) *Column* 7—*Drinking Water*

T	..	Tap Water
W	..	Well Water
Tk	..	Tank Water
TW	..	Tube-well Water
Hp	..	Handpump
R	..	River Water
F	..	Fountain
C	..	Canal
L	..	Lake
S	..	Spring
N	..	*Nullah/Nala/Nallah*
O	..	Others
NA	..	Information not available

(iv) *Column* 8—*Post and Telegraph*

PO	..	Post Office
TO	..	Telegraph Office
PTO	..	Post and Telegraph Office
Phone	..	Telephone connection.

(v) *Column* 10—*Communications*

BS	..	Bus
RS	..	Railway Station
NW	..	Navigable Waterway (including river, canal, backwaters, etc.)

(vi) *Column* 11—*Approach to Village*

PR	..	*Pucca* Road
KR	..	*Kutcha* Road
NR	..	Navigable River
NC	..	Navigable Canal
NW	..	Navigable Waterway (other than river or canal)
FP	..	Foot Path

(vii) *Column* 13—*Power Supply*

ED	..	Electricity for Domestic purpose.
EAg	..	Electricity for Agriculture purpose.
EO	..	Electricity for Other purposes like industrial, commercial, etc.
EA	..	Electricity for All purposes listed above.

(viii) *Column* 16—*Irrigated by source*

GC	..	Government Canal
PC	..	Private Canal
W	..	Well (without electricity)
WE	..	Well (with electricity)
TW	..	Tube-well (without electricity)
TWE	..	Tube-well (with electricity)
Tk	..	Tank
R	..	River
L	..	Lake
Wf	..	Waterfall
O	..	Others

(ix) *Column* 20—*Remarks*

N	..	Copies of Newspapers coming in the village.
M	..	Motor Cycles/Scooters available in the village.
C	..	Cars/Jeeps available in the village.
T	..	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below:

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives, for each non-municipal town (i.e., place treated as town only for Census purposes), the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivaiton. In Bhojpur district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below;

For the Scheduled Castes (Part A): 0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B): 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—ARRAH

VILLAGE

AMENITIES AND

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz., —5 kms., 5—10 kms. and 10+kms., of the nearest place where the facility is available is given].

Serial no.	Name of village with Thana no.		Total area of the village (in hectares)	Total Population and number of households	Educational	Medical	Drinking water (potable)	Post and Telegraph	Day or days of the Market/*hat*, if any	Communications (Bus stop, Rail. station, Waterways)

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) Physical aspects and location of towns 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns (iv A) Civic and other amenities in Notified Slums (v) Medical, educational, recreational and cultural activities and (vi) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally. However there is no urban agglomeration in Bhojpur district.

For such places as are treated as outgrowths of a particular town, details are not shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population are incorporated in the Appendix to the Town Directory. Since none of the towns of Bhojpur is having any outgrowth, no information has been furnished in the appendix.

In statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) are included as an Appendix II to the Village Directory as already discussed in the Village Directory section of this Volume. However, in this district since there is no Census town this appendix does not contain any information.

The details of the data covered in statements I to VI and IVA and the various codes used in the Town Directory statements are given below;

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below:

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C. B.	...	Cantonment Board/Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from State, District and Subdivisional Headquarters and from nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The Information in columns 3 to 5 are generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are:

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances

and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night soil, source and capacity of protected water supply, fire fighting services and number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under:

Column 6—

PR	..	*Pucca* Road
KR	..	*Kutcha* Road

Column 7—

S	..	Sewer
OSD	..	Open Surface Drains
BSD	..	Box Surface Drains
SD	..	Sylk Drains
CD	..	Cesspool Method
Pt	..	Pit System

Column 11—

HL	..	Head Loads
B	..	Baskets
WB	..	Wheel Barrows
ST	..	Septic Tank Latrines
S	..	Sewerage

Column 12—

TW	..	Tube-well Water
T	..	Tap Water
W	..	Well Water
Tk	..	Tank Water

Column 13—

OHT	..	Overhead Tank
SR	..	Service Reservoir
IG	..	River Infiltration Gallery
BWP	..	Borewell Pumping System
PT	..	Pressure Tank

Statement IVA

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement:

Column 4—

H	..	Hospital (Allopathic)
H (A)	..	Hospital (Ayurvedic)
H (U)	..	Hospital (Unani)
H (Hom)	..	Hospital (Homeopathic)
D	..	Dispensary (Allopathic)
D (A)	..	Dispensary (Ayurvedic)
D (U)	..	Dispensary (Unani)
D (Hom)	..	Dispensary (Homeopathic)
HC	..	Health Centre
FC	..	Family Planning Centre
TB	..	T. B. Clinic
NH	..	Nursing Home
O	..	Others

Colum 6—

A	..	Arts only
S	..	Science only
AS	..	Arts and Science only
C	..	Commerce only
AC	..	Arts and Commerce only
ASC	..	Combined for all categories Arts, Science and Commerce
L	..	Law

Column 10—

SH	..	Shorthand
Type	..	Typewriting
Sh Type	..	Shorthand and Typewriting
O	..	Others

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under—

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other workers."

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's block-wise in each urban area. This may be particularly useful for the administrative and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban ward wise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.

NOTES: (i) Towns treated as such for the first time in 1981 Census have been printed in *italics*.

(ii) Towns treated as such for the first time in 1971 Census, which continue as towns in 1981 Census have been shown with asterisk (*) on their left.

(iii) Roman numerals within brackets after the name of towns indicate their location code numbers.

(iv) The abbreviations have been used for the status of towns:
M—Municipality
N—Notified Area.

Notes:
(i) Towns treated as such for the first times in 1981 Census have been printed in *italics*
(ii) Towns treated as such for the first time in 1971 Census which continue as towns in 1981 Census are shown with asterisk(*) on their left.
(iii) Roman numerals within breackets after the names of towns indicate their location code numbers.
(iv) The abbreviations have been used for the status of towns.
M—Municipality
N—Notified Area.
