# FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to Village and Town Directory, Part B to Village and Town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new

items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
*Registrar General, India*

NEW DELHI :
*the 26th April*, 1982

# PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development Officers and the Vice-Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the district during the decade. District and C.D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office Sarvashri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N. M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computors and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the PCA Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, happened to be incharge of printing and for sometime also looked after the D.C H. section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Job Printers, Allahabad who have undertaken the work of printing of this volume and accomplished the same with promptness.

PATNA :

# DISTRICT CENSUS HANDBOOK PARTS A & B

## ANALYTICAL NOTE

### Brief history of the District

Begusarai district, which was a part of Munger district till 1971 Census acquired the status of an independent district on 2nd October, 1972. Earlier it was the north-western subdivision of Munger district lying on the other side of the Ganges. Begusarai is the chief town and the headquarters of the district. Earlier half way through the *Bazar* in this town was an inn (*sarai*) from which the town presumably derives its name.

The district is bounded on the north by Samastipur district and part of Munger district, on the south by Munger and Patna districts on the east again by Munger district and on the west by the districts of Samastipur and Patna.

### Early history

There was practically no historical knowledge of the remote past of Begusarai district until recently. The two newly discovered Pala inscriptions at Nawlagarh (discovered by Prof. R. K. Chaudhary of G. D. College Begusarai according to the District Gazetteer of Munger) and some rare images of the Pala period at Jaimangalgarh point to the existence of Pala rule in Begusarai district also. The Nawlagarh inscription no. 1 throws a considerable light on Pala history in North Bihar. Nawlagarh inscription no. 1 also throws light on the *Krimila Visaya* in the Bagusarai district as it is constituted today. Nawlagarh inscription no. 2 shows that there was a Buddhist Vihara at Nawlagarh. The Nawlagarh inscriptions belong to the reign of Vigrahpala II or Vigrahpala III. By the time of Rampala, the empire of the Palas had definitely broken into pieces. Up to the end of Vigrahpala III's reign Mithila and consequently Begusarai District was included in the Pala dominion. It is difficult to say how long the Palas continued to rule in this region. Nanyadeva of the Karnata dynasty began his rule in 1094 A.D. and his dynasty ruled over that area for a long period. There has been a certain amount of research regarding the antiquities at Nawlagarh and Jaimangalgarh which shows that this area played a very important part particularly in the early Pala period.

Nawlagarh, 25 Kms. north-west of Begusarai, is surrounded from all sides by fortifications with gates and a canal on the western side. There are a number of mounds. Some excavations were carried out and some fine sculptural remains in black stone, big earthen jars, broken pieces of ancient pots, small beads and earthen seals, one silver coin and a broken Vishnu image with an inscription on the pedestal and other terracottas have been found. The date of the Vishnu image has been determined sometime in the latter half of the eleventh century A.D.

Jaimangalgarh, 20 Kms. north of Begusarai town, is still an important religious centre and on every Tuesday and Saturday hundreds of people assemble there to worship the goddess Jaimangala. Surrounded on all sides by a moat and then by a lake known as Kabar Tal, the area with high mounds presents a picturesque site. There was a patch of jungle which has been cleared and the Kabar lake drained out for reclaiming the submerged lands. The mounds have been levelled down and the area is being used for agricultural purposes. Ordinary agricultural ploughing up has led to the discovery of ancient bricks, clay balls, remains of old structures and a brick wall. An inscribed gold plaque was said to have been found but it is now missing. On the north-eastern side there are distinct mounds called Daitaha Dih. These mounds are still preserved.

The origin of the temple of goddess Jaimangala is believed to be very ancient. Some very fine black stone images of Varaha, Badrinarain, Ganga, Shiva Parvati, etc., and one artistic column in black stone have also been found. All these indicate that Jaimangalgarh like Nawlagarh, was also an important centre during the Pala period. The theory that Jaimangalgarh was the centre of Sakticult during the Pala period has also been advanced.

# DISTRICT CENSUS HANDBOOK PARTS A & B

## ANALYTICAL NOTE

### Brief history of the District

Begusarai district, which was a part of Munger district till 1971 Census acquired the status of an independent district on 2nd October, 1972. Earlier it was the north-western subdivision of Munger district lying on the other side of the Ganges. Begusarai is the chief town and the headquarters of the district. Earlier half way through the *Bazar* in this town was an inn (*sarai*) from which the town presumably derives its name.

The district is bounded on the north by Samastipur district and part of Munger district, on the south by Munger and Patna districts on the east again by Munger district and on the west by the districts of Samastipur and Patna.

### Early history

There was practically no historical knowledge of the remote past of Begusarai district until recently. The two newly discovered Pala inscriptions at Nawlagarh (discovered by Prof. R. K. Chaudhary of G. D. College Begusarai according to the District Gazetteer of Munger) and some rare images of the Pala period at Jaimangalgarh point to the existence of Pala rule in Begusarai district also. The Nawlagarh inscription no. 1 throws a considerable light on Pala history in North Bihar. Nawlagarh inscription no. 1 also throws light on the *Krimila Visaya* in the Bagusarai district as it is constituted today. Nawlagarh inscription no. 2 shows that there was a Buddhist Vihara at Nawlagarh. The Nawlagarh inscriptions belong to the reign of Vigrahpala II or Vigrahpala III. By the time of Rampala, the empire of the Palas had definitely broken into pieces. Up to the end of Vigrahpala III's reign Mithila and consequently Begusarai District was included in the Pala dominion. It is difficult to say how long the Palas continued to rule in this region. Nanyadeva of the Karnata dynasty began his rule in 1094 A.D. and his dynasty ruled over that area for a long period. There has been a certain amount of research regarding the antiquities at Nawlagarh and Jaimangalgarh which shows that this area played a very important part particularly in the early Pala period.

Nawlagarh, 25 Kms. north-west of Begusarai, is surrounded from all sides by fortifications with gates and a canal on the western side. There are a number of mounds. Some excavations were carried out and some fine sculptural remains in black stone, big earthen jars, broken pieces of ancient pots, small beads and earthen seals, one silver coin and a broken Vishnu image with an inscription on the pedestal and other terracottas have been found. The date of the Vishnu image has been determined sometime in the latter half of the eleventh century A.D.

Jaimangalgarh, 20 Kms. north of Begusarai town, is still an important religious centre and on every Tuesday and Saturday hundreds of people assemble there to worship the goddess Jaimangala. Surrounded on all sides by a moat and then by a lake known as Kabar Tal, the area with high mounds presents a picturesque site. There was a patch of jungle which has been cleared and the Kabar lake drained out for reclaiming the submerged lands. The mounds have been levelled down and the area is being used for agricultural purposes. Ordinary agricultural ploughing up has led to the discovery of ancient bricks, clay balls, remains of old structures and a brick wall. An inscribed gold plaque was said to have been found but it is now missing. On the north-eastern side there are distinct mounds called Daitaha Dih. These mounds are still preserved.

The origin of the temple of goddess Jaimangala is believed to be very ancient. Some very fine black stone images of Varaha, Badrinarain, Ganga, Shiva Parvati, etc., and one artistic column in black stone have also been found. All these indicate that Jaimangalgarh like Nawlagarh, was also an important centre during the Pala period. The theory that Jaimangalgarh was the centre of Sakticult during the Pala period has also been advanced.

The Pandas of Jaimangalgarh had been granted rent free land which they held during the Hindu and Muslim periods. The Pandas are in possession of three *sanads* dated 1794 A.D. Not only was Jaimangalgarh allowed to remain revenue free but Government gave an annual grant for the purpose of feeding monkeys and keeping alight a lamp which was to be burnt day and night in the temple. In 1852 on the discovery that the obligations were not being fulfilled the grant was stopped.

Not much is known separately about Begusarai district besides the latest ditcovery mentioned above and the history of this district is almost merged with the history of its parent district Munger. During the Mutiny of 1857, the tranquillity of the district was not broken, largely owing to the prompt measures taken by the administration.

The role of Begusarai in the freedom movement has been very important and deserves much more than a passing reference. The people of the district did not carry on an isolated movement, but as a part of the general movement in India as a whole. The people of the district faithfully followed the different phases of the National Independence Movement with great enthusiasm and determination.

**Natural divisions**

The district is fringed on the north by a level upland tract, and on the south by the Gangetic riverain, where land is constantly being formed or washed away by the swift silt laden current. To the north of the district is a large but shallow lake called the 'Kabar Tal' and to the east of the latter are large areas of grass jungle intersected by rivers and swamps. To the south of the Gandak there is a strip, about 5 Kms. broad, which is liable to flood. Further south the district is densely populated and well cultivated.

The alluvial plains of the district are well known for the richness, fertility and productiveness of its soil. Fringed by the river Ganges on the south, the district can claim to be extensively served by the natural waterways of rivers Burhi Gandak, Balan and Bagmati and by the lake Kabar Tal. The river Burhi Gandak winds from north-west to south-east of the district in big loops which had earlier caused much damage in the shape of high floods.

**Climatic conditions**

The climate of the district is fairly bracing. The seasons are the same as in other parts of Bihar. The summer starts in the beginning of March and lasts till the middle of June. During this period the westerly wind blows which causes high temperature and low percentage of the humidity. The monsoon usually breaks in the third week of June and linger till September and sometimes till early October. The mercury drops considerably after the onset of monsoon. The winter season starts from November when the mornings and evenings are very cool and pleasant. In December and January the temperature goes down further and the nights are very cold. There are occassional mild showers during this period and one experiences biting cold during the night and early morning.

The average normal rainfull of the district is 1021 m.m. As has been said earlier the rains usually start in the middle of June. The maximum rainfall occurs in the month of August. The district also gets some winter rain.

**Flora and fauna**

Mango orchards are common in most villages in the district which are not subject to floods. Trees such as *ijar* or oak, myrtle, *peepal*, banyan, *gular* and *pakar* are frequently met with. The district does not provide any facility for big game shooting. The gangetic *diara* abounds in blue bulls and wild pigs which were a pest to the cultivators and *shikaris* come to the rescue of the farmers to save their crops from the ravages of these animals.

**Mines and Minerals**

The district is rather poor in the field of mines and minerals. The land mainly consists of old or recent deposits of alluvium.

**Land use Pattern**

The district is basically agricultural in character. The richness of the soil allows several crops to be grown all round the year. The main food crops in the southern, eastern and

western parts of the district are wheat and maize while paddy is grown in some parts of the north, the remaining portion being wheat growing. Sugar-cane is the main cash crop in the north and a large part of the Bakhri and Cheria Bariarpur blocks are the reserved areas of the New India Sugar Mills at Hasanpur Road situated on the border of the district on the north-east. The main cash crop in the remaining part of the district is chilli which, in good years, can be a very paying crop.

**Irrigational facilities**

The district has seen the growth of a network of embankments from its very early days (since Begusarai as a subdivision came in existence in 1870). One of the two oldest embankments was the Munger Bundh which runs along the left bank of the Baya river and protects a large part of Teghra and Bachhwara blocks from inundation. To the south of Begusarai lies the famous Gupta Bundh which is an old Zamindari embankment. An important system of embankment along the rivers Burhi Gandak and Balan, known as 'Musmara Prabhandha Mohanpur embankment' was constructed by Government in the waterways department in the year 1950-51.

Irrigation plays a very important role in agriculture. It is often said that agriculture is a gamble in the hands of monsoon. This is only because of inadequate and uncertain irrigational facilities. Crop harvest can be raised to a great extent through assured irrigation. Earlier in the district only tube-wells, surface percolation wells, *rahat* pumps, electric and diesel pumps were some of the sources through which irrigation was possible. In addition to the above now the Government is paying adequate attention to the improvement and expansion of irrigational facilities in the district through various medium and minor irrigational sehemes.

**Industrialisation**

The district was covered by a network of indigo factories of Europeans till the indigo industry itself died a natural death. The main occupation of the people of this district was agriculture. The *mallahs* and *gorhis* of Cheria Bariarpur especially of the Kabar Tal area do a lot of fishing and bird catching, the catch being usually exported to big cities. Before independence there was no other industry of importance. The potter community of Mansurchak was once well known for its skill especially in painting earthen ware but now only a few potter families remain as the sole evidence of this flourishing community.

However, after independence the district has made considerable progress in the field of industry. Barauni Industrial Estate has been set up where so many large and small industries are functioning. These industries offer more employment opportunities to the people. Prominent among these industries are Oil Refinery, Thermal Power, Fertilizer Corporation, Milk Plant, Fertilizer Granulation Plant etc.

**Livestock**

The cattle of Begusarai district is generally of an average quality rather than of a very superior breed.

The development of the breed of cattle and buffaloes is essential for agricultural activities, milk production and over all rural prosperity. The State Government has been making concerted efforts in this direction for quite some time.

The All India Key Village Scheme sponsored by Government of India is in operation in this district. The scheme aims at improving the general efficiency of the cattle by adopting scientific methods of breeding, feeding, disease control and marketing. Selected bull-calves are reared centrally for distribution after maturity for the purpose of upgrading the breed of the animals. In order to improve the breed of cattle quickly and also at low cost a number of artificial insemination centres with sub-centres have been opened in the district.

In the recent past there has been development in the field of Animal Husbandry in the district. At village Singhoul, a cattle fair is held every year in the month of *Ashwin*. The people of this area buy and sell their improved animals in the fair. A milk plant has also been set up at Barauni where skimmed milk powder, butter, ghee, etc., are produced. The milk plant has also offerred employment opportunities to the local people.

**Fisheries**

In this district there are many ponds where fishes of improved varieties are found. Under

the different five year plans development of fisheries has been taken up and a fisheries wing under the Animal Husdandry Department is functioning in the district. Development of communications has proved very helpful in the export of fish to other places.

**Trade and commerce**

The development of the means of communication that has taken place has had a great impact on the trade and commerce of the district.

The main items of import in the district are grains, cloth, coal and stationery goods, etc. The main items of export are chillies, caster seeds and maize. Teghra and Barauni are the main centres of trade in chillies.

**Communication facilities**

In the field of transport and communication, the district has developed considerably. The construction of the Rajendra Bridge on the Ganges at Hathidah ( in Patna district ) has greatly benefitted the district, particularly in the development of industrial township of Barauni.

A National Highway has also been constructed which is known as the Assam Access Road (NH 27). It starts from Barauni and goes right up to Gauhati in Assam. The district is well served by railways. The railway station at Barauni is the junction of the Eastern and North Eastern Railways. The establishment of Garhara yard, considered to be one of the biggest in the country, has considerably increased the trading activity and linked up many parts of the country in the movement of various commodities.

The district is well served by rivers. There is an aerodrome at village Ullao besides the one at the district headquarters, Begusarai.

**Electricity and Power**

At one time the district used to receive all its electrical energy from the power house at Begusarai. With the constitution of the State Electricity Board and the Channelization of the D. V. C. electrical generation, there has been a radical change in the position. The Thermal Power Station at Barauni now caters to the needs of large areas in North Bihar.

All the towns of the district have electricity. In the rural areas, the pace of electrification is comparatively slow. However, considerable attention is now being paid to rural electrification and villages have been electrified to a great extent.

**Social and Cultural events and Natural and Administrative Development.**

The Begusarai subdivision of old Munger district was upgraded and got the status of an independent district on 2nd October, 1972. It consists of 11 development blocks and 4 towns. Begusarai district now forms part of Darbhanga Division.

Some religious fairs and *melas* are held at Semaria Ghat on the occasion of *Kartik Purnima*, *Baisakh Purnima* and *Magh Purnima*. Fairs and *melas* are also held at Begusarai, Teghra and Purihara on the occasion of *Durga Puja*. Other fairs and festivals are held regularly in the district by different communities in complete harmony.

## BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

### 1. Birpur

A village in Barauni block, it is situated on the northern bank of the river Balan, 10 Kms. away from Begusarai. Ancient stone images of Lord Vishnu and other deities were discoverd in the bed of an old tank in 1959. Believed to date back to the Gupta period, these are fine specimens of exquisite craftsmanship.

### 2. Chamtha

A village in Bachhwara block, it is situated on the northern bank of the Ganges. An old temple, which still exists in the village, is believed to have been constructed to commemorate a great sage who used to take his daily bath in the Ganges at this palce.

### 3. Cheria Bariarpur

It is the headquarters of the block of the same name. The prefix Cheria has been added to distinguish it from other village named Bariarpur. Cheria is presumably a corrupt form of *Chiriya* (bird), its significance arising for the existence of numerous game birds in the Kabar Tal and other lakes in the vicinity

### 4. Jaimangalgarh

This place is situated 16 Kms. away from the district headquarters towards north in Cheria Bariarpur block. Ancient images of Barah, Badri Narayan, Shiva and Parwati located in the temple here are worth seeing. The temple attracts a large number of worshippers on certain days of the year.

### 5. Jhamtia Ghat

A *ghat* on the Ganges, it is about 2 Kms. west of Bachhwara. Devotees of lord Shiva, who offer oblations of the Ganges water in the Shiva temple at Vidyapatidham, associated with the death of the famous Maithili poet Vidyapati, first bathe in the river Ganges at Jhamtia Ghat and collect the sacred water there.

### 6. Kabar Tal

It is large lake in the northern part of the district near Cheria Bariarpur. It covers an area of about 22 sq. Kms. It used to be a haven for birds of numerous varieties and used to attract hunters. After the execution of the Kabar Drainage Scheme, however, the lake becomes almost dry from November onwards. There is water only in the deeper parts of the lake, known as Mahalaya and Kachalaya. Deep water paddy is grown in the lake area.

### 7. Naulagarh

The place is situated in Bhagwanpur block about 14 Kms. from Begusarai. There are a number of mounds here. In course of excavations some fine sculptural remains in black stone, big earthen jars, broken pieces of ancient pots, a broken Vishnu image with an inscription on the pedestal and other terracottas have been found.

### 8. Semaria

It is a small village on the northern bank of the Ganges opposite Mokameh. Huge congregations of devotees assemble here for bathing in the Ganges on *Kartik* and *Maghi Purnima* days, when large fairs are held.

### 9. Barauni

It is a fast growing industrial town in the disdrict. With the establishment of the Oil Refinery and the Thermal Power Plant in the public sector the town is developing into an industrial complex. The town has been placed in an excellent position in regard to communications.

## HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and Government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census Organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

**Scope of the District Census Handbook**

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilisation of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and Adult Literacy Classes/Centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirement of the Minimum Needs Programme of the Planning Commission.

A new statement on civic and other amenities for each area/locality identified as slum in Class I and II towns has been added. The information in this regard was collected in the year 1979. Since non of the towns in Begusarai district in that year qualified as Class I and Class II the details of slum was not collected from the district at all, though as per the 1981 Census Begusarai (M) and Barauni town now falls in Class II range.

Statement IV A relating to slums has, therefore, not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward/circle. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented

in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

**Census concepts of rural and urban areas and other terminologies.**

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are :

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size :

| *Class of town* | | *Population* |
|---|---|---|
| I | ... | 1 lakh and above (termed as city) |
| II | ... | 50,000–99,999 |
| III | ... | 20,000–49,999 |
| IV | ... | 10,000–19,999 |
| V | ... | 5,000– 9,999 |
| VI | ... | Less than 5,000 |

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

*City*—A city is a town with a population of one lakh and above.

*Census House*—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

*Occupied residential house*—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

*Household*—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, two-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

*Literate*—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

*Definition of work*—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

*Worker*—Persons who had worked even for a day in the above mentioned economically productive work have been treated as Workers.

*Main Worker*—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

*Marginal Worker*—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

*Non-worker*—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

*Scheduled Castes and Scheduled Tribes*—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108

of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

## A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

## B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

## ANALYSIS OF DATA

### Population, number of villages and towns

The district of Begusarai, with a population of 1,456,343 persons is divided into 11 Community Development Blocks consisting of 692 inhabited villages (out of a total number of 1,229 villages) and 4 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

**Table 1—Population, number of villages and towns, 1981**

| Sl. no. | Name of Development Block | Population | | | | | | | | | Number of villages | | Number of towns |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | | | Rural | | | Urban | | | Total | Inhabited | |
| | | P | M | F | P | M | F | P | M | F | | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 1 | Begusarai | 245,861 | 128,396 | 117,465 | 177,556 | 91,619 | 85,937 | 68,305 | 36,777 | 31,528 | 133 | 83 | 2 |
| 2 | Matihani | 104,365 | 54,058 | 50,307 | 104,365 | 54,058 | 50,307 | .. | .. | .. | 116 | 41 | .. |
| 3 | Barauni | 215,079 | 112,962 | 102,117 | 158,713 | 82,763 | 75,950 | 56,366 | 30,199 | 26,167 | 143 | 78 | 1 |
| 4 | Teghra | 98,804 | 50,516 | 48,288 | 69,424 | 35,597 | 33,827 | 29,380 | 14,919 | 14,461 | 112 | 32 | 1 |
| 5 | Bachhwara | 116,209 | 59,426 | 56,783 | 116,209 | 59,426 | 56,783 | .. | .. | .. | 114 | 72 | .. |
| 6 | Bhagwanpur | 110,900 | 55,835 | 55,065 | 110,900 | 55,835 | 55,065 | .. | .. | .. | 190 | 91 | .. |
| 7 | Cheria Bariarpur | 88,440 | 44,832 | 43,608 | 88,440 | 44,832 | 43,608 | .. | .. | .. | 41 | 34 | .. |
| 8 | Khudabandpur | 80,177 | 40,058 | 40,119 | 80,177 | 40,058 | 40,119 | .. | .. | .. | 74 | 48 | .. |
| 9 | Bakhri | 160,968 | 83,475 | 77,493 | 160,968 | 83,475 | 77,493 | .. | .. | .. | 123 | 102 | .. |
| 10 | Balia | 133,872 | 68,892 | 64,980 | 133,872 | 68,892 | 64,980 | .. | .. | .. | 138 | 76 | .. |
| 11 | Sahebpur Kamal | 101,668 | 52,416 | 49,252 | 101,668 | 52,416 | 49,252 | .. | .. | .. | 45 | 35 | .. |
| | **Total** | **1,456,343** | **750,866** | **705,477** | **1,302,292** | **668,971** | **633,321** | **154,051** | **81,895** | **72,156** | **1,229** | **692** | **4** |

Among the C. D. Blocks, Begusarai with 16.8 per cent of the population of the district occupies the first place followed by Barauni with 14.7 per cent. The least populated C. D. Block is Khudabandpur with only 5.5 per cent of population of the district spread over 48 inhabited villages out of a total of 79 villages in the block. Teghra block with the least number of inhabited villages (being 32 in number) and one town constitute 6.8 per cent of the population of the district.

Begusarai district which has been carved out of the old Munger district, appears to have had less impact of urbanisation since 89.42 per cent of the population lives in the villages. The total urban population contained in 4 towns is of the order of only 10.58 per cent of the population of the district. None of the 4 towns, viz., Begusarai (Municipality) and Barauni (IOC) Township constituting Begusarai Urban Agglomerations, Barauni and Teghra fall in class I (Populations 1 lakh and above) range. Even in the category of class II towns there are only two towns viz., Begusarai (M) and Barauni.

### Decadal change in population

Begusarai acquired the status of a district only after the 1971 Census. The figures for 1971 have, therefore been recast. The percentage increase in the population of the district

and its development blocks is presented in the table below :

**Table 2—Decadal change in distribution of population**

| Development Block | Population | | | | | | Percentage decadal (1971—81) variation | | |
|---|---|---|---|---|---|---|---|---|---|
| | 1971 | | | 1981 | | | | | |
| | Total | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Begusarai | 182,171 | 138,087 | 44,084 | 245,861 | 177,556 | 68,305 | +34.96 | +28.58 | +54.94 |
| Matihani | 81,701 | 81,701 | .. | 104,365 | 104,365 | .. | +27.74 | +27.74 | -- |
| Barauni | 157,262 | 115,350 | 41,912 | 215,079 | 158,713 | 56,366 | +36.76 | +37.59 | + 34.49 |
| Teghra | 77,287 | 57,450 | 19,837 | 98,804 | 69,424 | 29,380 | +27.84 | +20.84 | + 48.11 |
| Bachhwara | 92,869 | 92,869 | .. | 116,209 | 116,209 | .. | +25.13 | +25.13 | -- |
| Bhagwanpur | 91,811 | 91,811 | .. | 110,900 | 110,900 | .. | +20.79 | +20.79 | -- |
| Cheria Bariarpur | 75,794 | 75,794 | .. | 88,440 | 88,440 | .. | +16.68 | +16.68 | .. |
| Khudabandpur | 67,922 | 67,922 | .. | 80,177 | 80,177 | .. | +18.04 | +18.04 | -- |
| Bakhri | 130,305 | 130,305 | .. | 160,968 | 160,968 | .. | +23.53 | +23.53 | -- |
| Balia | 107,593 | 107,593 | .. | 133,872 | 133,872 | .. | +24.42 | +24.42 | -- |
| Sahebpur Kamal | 82,714 | 82,714 | .. | 101,668 | 101,668 | .. | +22.92 | +22.92 | .. |
| **Total** | **1,147,429** | **1,041,596** | **105,833** | **1,456,343** | **1,302,292** | **154,051** | **+26.92** | **+25.03** | **+45.56** |

It would appear that the rise in the population of this district during the 1971–81 decade has been of the order of 26.92 per cent. The rural population in the district has increased by 25.03 per cent while urban population growth over the decade has been as much as 45.56 per cent.

As shall be evident from the table, among the development blocks, Barauni has shown the highest increase in population over the decade with 36.76 per cent followed by Begusarai and Teghra with 34.96 and 27.84 per cent respectively. Cheria Bariarpur block registered the lowest increase in population, only 16.68 per cent over the decade. The increase in rural population during 1971–81 has been the highest in the case of Barauni (37.59%) followed by the development block of Begusarai (28.58%). As regard the growth in urban population, Begusarai block obviously occupies the first position with 54.94 per cent, since Begusarai town, the district headquarters and the Barauni IOC town are situated in this very block.

**Villages classified by population ranges**

The distribution of villages by their population range is given in Table 3 in six size groups :

**Table 3—Distribution of villages by population ranges.**

| Range of population | Number of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| — 200 | 100 | 14.45 |
| 200— 499 | 99 | 14.31 |
| 500—1,999 | 277 | 40.03 |
| 2,000—4,999 | 171 | 24.71 |
| 5,000—9,999 | 30 | 4.33 |
| 10,000+ | 15 | 2.17 |
| **Total** | **692** | **100.00** |

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500–1,999 followed by villages in the population range of 2,000–4,999. Medium size villages (500–1,999) thus account for as much as 40.03 per cent of the total number of inhabited villages in the district. The large villages (2,000–4,999 and 5,000–9,999) comprise next highest percentage 29.04 of the inhabited villages. However, very large village (10,000 and above) form a

very small proportion with only 2.17 per cent of the total number of inhabited villages in the district.

**Villages classified by density**

The density of population is defined as number of persons per sq. km. It indicates the extent of crowding in a particular area. The distribution of villages by their density in the district is given in Table 4 below :

**Table 4—Distribution of villages by density**

| Range of density (per sq. km.) | Total number of villages in each density range | Percentage of villages in each density range |
|---|---|---|
| 1 | 2 | 3 |
| 0— 10 | 4 | 0.58 |
| 11— 20 | 5 | 0.72 |
| 21— 50 | 7 | 1.01 |
| 51—100 | 9 | 1.30 |
| 101—200 | 25 | 3.61 |
| 201—300 | 30 | 4.34 |
| 301—500 | 70 | 10.12 |
| 501+ | 541 | 78.18 |
| Not known | 1 | 0.14 |
| **Total** | **692** | **100.00** |

The data presented in the table above highlight the fact that maximum proportion of villages in the district lies in the density range of 501 and above with 78.18 per cent followed by villages falling in the density range of 301–500 with 10.12 per cent.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that the density of population in the villages is generally high, as already explained in the earlier paragraph.

**Proportion of Scheduled Castes/Tribes population in villages and towns.**

Tables 5, 6 and 7 furnished hereafter indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro-level, particularly in relation to area development oriented programmes. The tables have been dealt with separately :

**Table 5—Proportion of Scheduled Castes population to total population in the villages.**

| Percentage range of Scheduled Castes population to total population | Number of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Nil | 112 | 16.18 |
| 5 or less | 78 | 11.27 |
| 6—10 | 111 | 16.04 |
| 11—15 | 121 | 17.49 |
| 16—20 | 79 | 11.42 |
| 21—30 | 87 | 12.57 |
| 31 and above | 104 | 15.03 |
| **Total** | **692** | **100.00** |

From the table above, it is apparent that there is no concentration of the Scheduled Caste population in any particular range of villages in the district. On the other hand 16.18 per cent of the inhabited villages have no Scheduled Caste population at all. The table further reveals that the Scheduled Caste population is spread over 83.82 per cent of the inhabited villages of the district.

The proportion of the Scheduled Caste population to total population in different range of villages is not very uneven. There are 121 villages, accounting for 17.49 per cent of the total number of inhabited villages in the district, where 11 to 15 per cent persons belong to the Scheduled Castes. This is followed by villages constituting 16.18 per cent of the total inhabited villages where the population of the Scheduled Caste is nil. Villages having Scheduled Caste population in the range between 6–10 per cent of total population number 111 and account for 16.04 per cent of total number of the populated villages.

**Table 6—Proportion of Scheduled Tribes population to total population in the villages.**

| Percentage range of Scheduled Tribes population to total population | Number of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Nil | 685 | 98.99 |
| 5 or less | 6 | 0.87 |
| 6—15 | 1 | 0.14 |
| 16—25 | .. | .. |
| 26—35 | .. | .. |
| 36—50 | .. | .. |
| 51 and above | .. | .. |
| **Total** | **692** | **100.00** |

As regards Scheduled Tribes population it can be seen from table that there are only 7 such villages in the district. Even among these, in 6 villages, the population of the Scheduled Tribes is as low as 5 per cent or less of the total population. There are as many as 685 villages accounting for 98.99 per cent of the total number of villages in the district which have no Scheduled Tribes population at all.

**Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns**

| Name of the town | Total population | Total Scheduled Castes population | Total Scheduled Tribes population | Percentage of Scheduled Castes population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| Barauni | 56,366 | 4,357 | 88 | 7.73 | 0.16 |
| Barauni I.O.C. | 11,672 | 458 | 15 | 3.92 | 0.13 |
| Begusarai | 56,663 | 6,143 | 27 | 10.85 | 0.05 |
| Teghra | 29,380 | 2,757 | 7 | 9.38 | 0.02 |
| **All towns** | **154,051** | **13,715** | **137** | **8.90** | **0.09** |

Table 7 indicates that the concentration of the Scheduled Caste population in the towns of Begusarai district is much less compared to the rural areas being only 8.90 per cent of the total population (Table 10). The highest percentage of Scheduled Caste population is contained in Teghra town with 9.38 per cent followed by Barauni with 7.73 per cent of the total population. The urban population content of the Scheduled Tribe population is almost negligible in all the 4 towns of the district as has been observed in the case of the rural areas also.

**Literacy rates by population ranges of villages and towns.**

According to the census definition a person who was able to read and write with understanding in any language was taken as literate. While Table 8 furnished alongside gives the literacy rates of villages classified by population ranges, Table 9 shows the literacy rates of towns in the district. The tables have been discussed separately :

**Table 8—Literacy rates by population ranges of villages.**

| Range of population | Number of villages in each range | Literacy rate |
|---|---|---|
| 1 | 2 | 3 |
| — 200 | 100 | 18.20 |
| 200— 499 | 99 | 20.97 |
| 500—1,999 | 277 | 22.66 |
| 2,000—4,999 | 171 | 22.49 |
| 5,000—9,999 | 30 | 25.47 |
| 10,000+ | 15 | 28.13 |
| **Total** | **692** | **23.89** |

It would be seen that literates form 23.89 per cent of the population in the rural areas of the district as against 44.45 per cent in the urban areas. In the rural areas it is interesting to note that the literacy rate varies directly in relation to the population range of the villages. However, there is marginal exception in the case of 171 villages with 2,000–4,999 range of population where the literacy rate was slightly lower than that in the lesser range of population. The highest percentage of literacy rate can be observed for the villages in the population range of 10,000 and above with 28.13 per cent literates followed by villages in the next higher population range with 25.47 per cent literates and the lowest in the population range of less than 200 with only 18.20 per cent as literates.

**Table 9—Literacy rates for towns**

| Name of the town | Literacy rate |
|---|---|
| 1 | 2 |
| Barauni | 38.73 |
| Barauni I.O.C. | 73.68 |
| Begusarai | 49.55 |
| Teghra | 34.01 |
| **All towns** | **44.45** |

Among the towns, Barauni, I.O.C. being an industrial town, has the highest percentage of literate population (73.68%). The remaining three towns viz., Begusarai, Barauni and Teghra have more or less an equal proportion of literate population though much less as compared to Barauni I.O.C town.

**Workers and non-workers in rural and urban areas.**

The table presented on next page gives the break up of literates, workers, non-workers, and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks.

## Table 10—Literates, Workers, Non-workers, Scheduled Castes/Scheduled Tribes population in the district

| Name of Development Block | Total Rural Urban | Total Population | | | Percentage of: S. C. population to total population | Percentage of: S. T. population to total population | Literates to total population | | | Main Workers to total population | | |

Workers in the district of Begusarai account for 29.34 per cent of the total population where as the number of non-workers is as high as 70.66 per cent. As shall be evident from the Table 10, the main workers (i. e., those who had worked for 6 months, i.e., 183 days or more during the reference period of 1 year) comprise 28.23 per cent of the total population which is very close to the percentage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.11 per cent. The same trend can be observed in the rural and urban areas of the district as also in most of the development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 48.81 and 48.37 per cent for males as against 8.61 and 6.79% for females which indicates that the participation of females in the economically productive work is quite low.

Another notable feature is the higher percentage of female marginal workers (1.82%) vis-a-vis male marginal workers (0.44%). It can be seen that the same pattern prevails in all the rural and urban areas of the district. It will also be seen that the percentage of main workers to the total population is higher in the rural areas (28.61%) than in the urban areas (25.01%). The same pattern is perceptible in the case of marginal workers who constitute 1.20 per cent of the rural population but only 0.33 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities whereas in the urban areas household industries and other works do not offer equal job opportunities in view of limited urban development.

**Villages by availability of different amenities**

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

**Table 11—Distribution of villages according to the availability of different amenities**

| Sl. no. | Name of Development Block | Number of inhabited villages | Number (with percentage) of villages having one or more of the following amenities: Education | Medical | Drinking water | Post and Telegraph | Market/ *Hat* | Communication | Approach by *Pucca* Road | Power supply |
|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | Begusarai | 83 | 61(73.49) | 16(19.28) | 83(100.00) | 18(21.69) | 6(7.23) | 27(32.53) | 21(25.30) | 61(73.49) |
| 2 | Matihani | 41 | 29(70.73) | 8(19.51) | 41(100.00) | 10(24.39) | 1(2.44) | 3 (7.32) | 10(24.39) | 23(56.10) |
| 3 | Barauni | 78 | 47(60.26) | 13(16.67) | 78(100.00) | 17(21.79) | .. | 20(25.64) | 30(38.46) | 55(70.51) |
| 4 | Teghra | 32 | 22(68.75) | 8(25.00) | 31(96.88) | 7(21.88) | 2(6.25) | 15(46.88) | 9(28.13) | 24(75.00) |
| 5 | Bachhwara | 72 | 55(76.39) | 35(48.61) | 72(100.00) | 12(16.67) | 3(4.17) | 16(22.22) | 24(33.33) | 38(52.78) |
| 6 | Bhagwanpur | 91 | 68(74.73) | 24(26.37) | 91(100.00) | 20(21.98) | 8(8.79) | 32(35.16) | 30(32.97) | 46(50.55) |

| 8 | Khudabandpur | 48 | 39(81.25) | 14(29.17) | 48(100.00) | 13(27.08) | 3(6.25) | 17(35.42) | 14(29.17) | 30(62.50) |
| 9 | Bakhri | 102 | 64(62.75) | 22(21.57) | 102(100.00) | 19(18.63) | 3(2.94) | 23(22.55) | 24(23.53) | 54(52.94) |
| 10 | Balia | 76 | 49(64.47) | 12(15.79) | 76(100.00) | 13(17.11) | 5(6.58) | 7 (9.21) | 4 (5.26) | 31(40.79) |
| 11 | Sahebpur Kamal | 35 | 30(85.71) | 9(25.71) | 35(100.00) | 13(37.14) | 3(8.57) | 14(40.00) | 13(37.14) | 11(31.43) |
| | **Total** | **692** | **490(70.81)** | **174(25.14)** | **691(99.86)** | **153(22.11)** | **37(5.35)** | **185(26.73)** | **190(27.46)** | **402(58.09)** |

*Educational amenity*—There are as many as 490 villages accounting for 70.31 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Sahebpur Kamal with 85.71 per cent followed by Khudabandpur block with 81.25 per cent. The lowest number of villages with educational facility is in the development blocks of Barauni and Bakhri with 60.26 and 62.75 per cent respectively.

*Medical amenity*—The availability of medical amenity in the villages is quite low in that only 25.14 per cent villages have it. Among the development blocks, Bachhwara block has the largest proportion of villages where medical facility is available, the percentage being 48.61. Balia block,on the other hand has the lowest number of such villages with only 15.79 per cent of the total villages enjoying medical facility.

*Drinking water*—Water facility is generally available in all the villages except one village in Teghra block, of the district of Begusarai.

*Post & Telegraph*—Postal facilities (post & telegraph) are available only in 153 villages (22.11%) in the district. Sahebpur Kamal has the maximum number of villages having post and telegraph facility (37.14%) followed by Cheria Bariarpur (32.35%) and Khudabandpur (27.08%). In the remaining development blocks of the district the number varies from a minimum of 16.67 per cent in Bachhwara to a maximum of 24.39 per cent in Matihani block.

*Market/Hat*—The villages where market/*hat* is held constitute only 5.35 per cent of the total number of villages in the district. As can be seen from the table, there is no village with this facility in Barauni development block. In the remaining 10 blocks the number of villages where market/*hat* is held varies between one in Matihani and 8 in Bhagwanpur.

*Communication*—The datails of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 26.73 per cent of the villages are connected by one means of communications or the other. The majority of the villages are still devoid of this facility. A development blockwise break up of villages having any means of communication is given in Table 11 above which shows that Teghra block comprises the highest proportion of villages (46.88%) which are connected by bus or rail or navigable river/canal services, etc., followed by Sahebpur Kamal with 40.00 per cent and Khudabandpur with 35.42 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 7.32 per cent in Matihani and the maximum of 35.16 per cent in Bhagwanpur block.

*Approach road to village*—With only 27.46 per cent villages having *pucca* approach roads it is there that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Barauni block with 38.46 per cent villages having *pucca* approach road tops the list closely followed by Sahebpur Kamal and Bachhwara blocks with 37.14 and 33.33 per cent villages having approach roads respectively. Balia development block has the lowest number of villages having the facility with only (25.26%) of the villages served with *pucca* approach roads.

*Power supply*—Electrified villages in the district constitute as much as 58.09 pet cent of the total number of villages. Power supply in these villages is utilised for either agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Cheria Bariarpur block occupies the first position having the maximum proportion of electrified villages (85.29%) followed closely by Teghra, Begusarai and Barauni with 75.00, 73.49 and 70.51 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Sahebpur Kamal (31.43%), Balia (40.79%) and Bhagwanpur (50.55%).

**Proportion of rural population served by various amenities.**

While Table 11 furnishes details regarding number of villages possessing educational, medical and other amenities, Table 12 on next page gives the proportion of rural population served by these amenities.

**Table 12—Proportion of rural population served by different amenities**

| Sl. no. | Name of Development Block | Total population of inhabited villages in the Development Block | Proportion of rural population served by the amenity of— | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Education | Medical | Drinking water | Post and Telegraph | Market/ *Hat* | Communication | Approach by *Pucca* road | Power supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | Begusarai | 177,556 | 93.60 | 34.03 | 100.00 | 43.05 | 9.05 | 35.01 | 26.81 | 89.97 |
| 2 | Matihani | 104,365 | 96.75 | 56.52 | 100.00 | 54.96 | 6.90 | 5.25 | 43.32 | 76.22 |
| 3 | Barauni | 158,713 | 90.00 | 45.45 | 100.00 | 58.58 | .. | 47.25 | 55.93 | 77.23 |
| 4 | Teghra | 69,424 | 92.23 | 32.03 | 99.98 | 51.57 | 14.79 | 74.98 | 54.24 | 92.34 |
| 5 | Bachhwara | 116,209 | 95.27 | 69.25 | 100.00 | 59.15 | 4.63 | 41.15 | 54.25 | 69.23 |
| 6 | Bhagwanpur | 110,900 | 93.55 | 38.89 | 100.00 | 45.88 | 19.85 | 45.69 | 43.20 | 69.42 |
| 7 | Cheria Bariarpur | 88,440 | 92.98 | 62.44 | 100.00 | 59.08 | 28.84 | 53.47 | 45.29 | 94.51 |
| 8 | Khudabandpur | 80,177 | 95.75 | 55.99 | 100.00 | 59.87 | 10.90 | 61.44 | 58.69 | 75.45 |
| 9 | Bakhri | 160,968 | 90.55 | 46.54 | 100.00 | 49.63 | 14.65 | 45.17 | 46.71 | 67.20 |
| 10 | Balia | 133,872 | 90.59 | 46.73 | 100.00 | 51.96 | 31.18 | 34.17 | 25.35 | 71.40 |
| 11 | Sahebpur Kamal | 101,668 | 97.92 | 57.64 | 100.00 | 68.50 | 17.58 | 44.16 | 52.28 | 64.94 |
| | **Total** | **1,302,292** | **93.23** | **48.65** | **100.00** | **53.87** | **13.70** | **42.47** | **44.50** | **76.58** |

It would be seen that educational facility is available to 93.23 per cent of the rural population in the district. The proportion varies between the maximum of 97.92 per cent in Sahebpur Kamal block and the minimum of 90.00 per cent in Barauni block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 70.81 per cent (as has been observed in Table 11) than the proportion of population which is as high as 89.42 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 48.65 per cent which is slightly less than double the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

**Distribution of villages having different amenities at a distance of less than 5 kms.,5—10 kms. and 10+kms.**

The table alongside furnishes the details of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5–10 Kms. and 10+Kms.) from the places where these are available.

**Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.**

| Village not having the amenity of— | Number of villages where the amenity is not available and available at a distance of— | | | |
|---|---|---|---|---|
| | —5 Kms. | 5—10 Kms. | 10+ Kms. | Total (cols. 2—4) |
| 1 | 2 | 3 | 4 | 5 |
| 1. Education | 193 | 9 | .. | 202 |
| 2. Medical | 417 | 98 | 3 | 518 |
| 3. Drinking water | 1 | .. | .. | 1 |
| 4. Post and Telegraph | 482 | 56 | 1 | 539 |
| 5. Market/*Hat* | 381 | 253 | 21 | 655 |
| 6. Communication | 323 | 164 | 20 | 507 |

As regards educational facility it would be seen that there are as many as 202 villages in the district (29.19%) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5 to 10 Kms. is almost insignificant

being only nine. One can observe similar trend in respect of other amenities as well, though not in the same proportion. But for marketing facilities people do not have to travel for more than 10 Kms. to avail themselves of facilities such as medical, postal or transport.

**Availability of different amenities in the villages according to the distance from the nearest town.**

The following table gives the distribution of villages having different types of facilities by distance from the nearest town in five distance groups :

**Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.**

| Distance range from the nearest town (in Kms.) | Number of inhabited villages in each range | Number (with percentage) of villages having the amenity of— | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post and Telegraph | Market/ *Hat* | Communication | Approach by *Pucca* road | Power supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 0— 5 | 92 | 70(76.09) | 26(28.26) | 92(100.00) | 15(16.30) | 4(4.35) | 35(38.04) | 39(42.39) | 59(64.13) |
| 6—15 | 320 | 219(68.44) | 80(25.00) | 319(99.69) | 72(22.50) | 15(4.69) | 83(25.94) | 105(32.81) | 188(58.75) |
| 16—50 | 280 | 201(71.79) | 68(24.29) | 280(100.00) | 66(23.57) | 18(6.43) | 67(23.93) | 46(16.43) | 155(55.36) |
| 51+ | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| Unspecified | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| **Total** | **692** | **490(70.81)** | **174(25.14)** | **691(99.86)** | **153(22.11)** | **37(5.35)** | **185(26.73)** | **190(27.46)** | **402(58.09)** |

It would appear from the above table that the maximum number of inhabited villages (46.24%) lie within the distance range of 6–15 Kms. from the nearest town. This is followed by the villages (40.46) per cent in the distance range of 16–50 Kms. from the nearest town. Not a single village is found to be in the distance range of more than 51 Kms.

It can be observed from the table that the proportion of villages having educational facility is the highest 76.09 per cent for those situated within 5 Kms. from the nearest town. It declines with the increase in the distance of the villages from the nearest town. Thereafter, it again increases to 71.79 per cent in the distance group of 16–50 Kms. The percentage is observed to be the highest (76.09%) in the distance range of 0–5 Kms. and lowest (68.44%) in the distance range of 6–15 Kms. However, in case of medical facility it declines with the increase in the distance of the villages from the nearest town as can be observed from the table. As mentioned earlier drinking water facility is available in all the villages except one situated in the distance range of 6–15 Kms. If medical facility is on decline with the increase in the distance of the villages from the nearest town the reverse can be seen in case of postal facility. With the increase in the distance of the villages from the nearest town the postal facility also increases from 16.30 per cent in the distance range of less than 5 Kms. to 23.57% in the distance range of 16–50 Kms. Similar trend can be seen in case of market/*hat* facility. However, in case of communication, approach to villages by *pucca* road and power supply it can be said that the villages which are nearer to the urban areas have benifited in respect of these facilities. The trend for the three facilities is same as can be seen in the table. While there is steady decline in the percentage with the increase in the distance of the villages from the nearest town in case of communication and power supply it is perceptible in case of approach to villages by *pucca* road in the distance range of 16–50 Kms.

**Villages according to population ranges and amenities available.**

The table given on next page furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

**Table 15--Distribution of villages according to population range and amenities available**

| Population range | Number of inhabited villages in each range | Number (with percentage) of villages having the amenity of— | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post and Telegraph | Market/ *Hat* | Communi-cation | Approach by *Pucca* road | Power supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| —499 | 199 | 48(24.12) | 19(9.55) | 198(99.50) | 3(1.51) | 2(1.01) | 23(11.56) | 34(17.09) | 65(32.66) |
| 500—1,999 | 277 | 232(83.75) | 53(19.13) | 277(100.00) | 30(10.83) | 11(3.97) | 76(27.44) | 70(25.27) | 166(59.93) |
| 2,000—4,999 | 171 | 165(96.49) | 69(40.35) | 171(100.00) | 79(46.20) | 13(7.60) | 60(35.09) | 57(33.33) | 129(75.44) |
| 5,000+ | 45 | 45(100.00) | 33(73.33) | 45(100.00) | 41(91.11) | 11(24.44) | 26(57.78) | 29(64.44) | 42(93.33) |
| **Total** | **692** | **490(70.81)** | **174(25.14)** | **691(99.86)** | **153(22.11)** | **37(5.35)** | **185(26.73)** | **190(27.46)** | **402(58.09)** |

It can be seen that the maximum number of villages, i. e., 277 (40.03%) in the district fall in the population range of 500–1,999 followed by 199 villages (28.75%) in the population range of less than 500. The lowest number of villages is observed in the population range of 5,000+ being only 45 in number.

It may be of interest to the readers to note that the proportion of villages having different amenities varies in direct relation to their population range. The maximum number of villages having different amenities have a population range of 5,000+ which also corroborates the fact that more facilities are generally available in larger villages than in the smaller ones.

**Main staple food in the villages**

The table alongside indicates that wheat, rice and maize constitute the main staple food of the people in the district. While wheat is the common staple food in all the eleven development blocks, rice is taken as staple food besides wheat in six development blocks, viz., Begusarai, Barauni, Teghra, Cheria Bariarpur, Khudabandpur and Bakhri. In the remaining five blocks maize is yet another staple food apart from wheat.

**Table 16—Main staple food in the majority of villages in each development block.**

| Sl. no. | Name of Development Block | Main staple food |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Begusarai | Rice, wheat |
| 2 | Matihani | Wheat, maize |
| 3 | Barauni | Rice, wheat |
| 4 | Teghra | Rice, wheat |
| 5 | Bachhwara | Wheat, maize |
| 6 | Bhagwanpur | Wheat, maize |
| 7 | Cheria Bariarpur | Rice, wheat |
| 8 | Khudabandpur | Rice, wheat |
| 9 | Bakhri | Rice, wheat |
| 10 | Balia | Wheat, maize |
| 11 | Sahebpur Kamal | Wheat, maize |

**Villages according to land use**

The land utilization data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place. The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

**Table 17—Distribution of villages according to land use**

| Sl. no. | Name of Development Block | Number of inhabited villages | Total area (in Hectares) | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Begusarai | 83 | 20,919.35 | 87.70 | 37.11 |
| 2 | Matihani | 41 | 20,624.12 | 66.73 | 33.88 |
| 3 | Barauni | 78 | 14,991.00 | 76.59 | 37.25 |
| 4 | Teghra | 32 | 8,332.52 | 72.00 | 59.08 |
| 5 | Bachhwara | 72 | 14,739.26 | 81.05 | 36.72 |
| 6 | Bhagwanpur | 91 | 14,250.23 | 91.12 | 36.99 |
| 7 | Cheria Bariarpur | 34 | 15,333.33 | 89.94 | 20.49 |
| 8 | Khudabandpur | 48 | 9,509.19 | 82.20 | 29.52 |
| 9 | Bakhri | 102 | 17,471.04 | 81.60 | 33.73 |
| 10 | Balia | 76 | 18,052.05 | 79.57 | 38.97 |
| 11 | Sahebpur Kamal | 35 | 14,751.82 | 77.95 | 27.97 |
| | **Total** | **692** | **168,973.91** | **80.64** | **34.67** |

It would be seen from the table that 80.64 per cent of the total area of the district is utilised for cultivation (Cultivable area) and of this 34.67 per cent area is irrigated. Among the C. D. Blocks, the highest percentage of cultivable area is found in Bhagwanpur block with 91.12 per cent followed by Cheria Bariarpur, Begusarai and Khudabandpur with 69.94, 87.70 and 82.20 per cent respectively. The lowest cultivable area is found in the Matihani block (66. 73 per cent).

The highest proportion of irrigated area to the total cultivable area is to be found in Teghra block accounting for 59.08 per cent followed by Balia with 38.97 per cent and Barauni block with 37.25 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Cheria Bariarpur block (20.49%). In the remaining blocks the percentage varies between 27.97 per cent and 37.11 per cent.

**Growth, density and sex-ratio of urban population.**

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 on next page. It also indicates the variation in density and sex-ratio in the urban population of the district in relation to the State.

**Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State**

| | District | | | | | | State | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Census year | Total population | Urban population | %Urban population | Decadal percentage variation in urban population | Density (population per sq. km.) | Sex-ratio (no. of females per 1,000 males) | Total population | Urban population | % Urban population | Decadal percentage variation in urban population | Density (population per sq. km.) | Sex-ratio (no. of females per 1,000 males) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1951 | 793,942 | 44,842 | 5.65 | + 16.42 | 3,205 | 980 | 38,782,271 | 2,626,261 | 6.77 | +38.14 | 2,320 | 842 |
| 1961 | 954,333 | 96,908 | 10.15 | +116.11 | 1,546 | 940 | 46,447,457 | 3,913,920 | 8.43 | +49.03 | 1,915 | 811 |
| 1971 | 1,147,429 | 105,833 | 9.22 | + 9.21 | 2,923 | 857 | 56,353,369 | 5,633,966 | 10.00 | +43.95 | 2,032 | 807 |
| 1981 | 1,456,343 | 154,051 | 10.58 | + 45.56 | 4,180 | 881 | 69,914,734 | 8,718,990 | 12.47 | +54.76 | 2,727 | 832 |

As shall be evident from the table, the rise in the proportion of the urban population to the total population in the district of Begusarai has not been steady over the decades where as the urban population of the state has shown an upward trend since 1951. It is interesting to note that the proportion of urban population to the total population (10.15%) in Begusarai district was higher than that (8.43%) of the State in 1961. However, it came down to 9.22 per cent in the case of the district but rose to 10.00 per cent for the State in 1971. Thereafter the district registered an increase in urban population to 10.58 as against the 12.47 per cent of the State in 1981. The rise in the proportion of the urban population to the total population in the district of Begusarai was less than double in 1961 over that of 1951 but has been very tardy since 1961 as compared to that of the State which has shown an increasing trend since the first Census taken in independent India.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. The urban population has more than tripled itself in 1981 over that of 1951 in the district. However, the trend of growth of the urban population both in the State and the district has been quite different. During the decade 1951–61 the growth of the urban population was of the order of 49.03 per cent in the State as against 116.11 per cent in the district while in the case of the State it dipped to 43.95 per cent in 1961–71 in the case of the district it came down to 9.21 per cent which was a phenomenal decline. Again during 1971–81 the urban population of the State registered an increase of 54.76 per cent where as the increase in case of the district was of the order of 45.56. Thus the rate of urbanization has again picked-up during 1971–81 in Begusarai district.

The density of population in the urban areas of the district has also been varying over the decades as can be seen from the column 6 of the table. Although between 1951 and 1981 the density of the urban population of the district has increased from 3,205 persons per sq. Km. to 4,180 persons per sq. Km. it was lower than that of 1951 in 1961 and 1971 as is evident from the table. Similar pattern can be seen for the State in column 12 of the table. The density declined in 1961 in both the districts and in the State but thereafter has shown an upward trend in 1971 and 1981. This clearly indicates that the towns of Begusarai district are rapidly becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of urban population of the State on the other hand had not shown a similar rise till the 1971 Census. In 1981 Census, the density of the urban population of the State had shown considerable increase having risen then 2,032 in 1971 to 2,727 but was still much lower than that of Begusarai which stood at 4,180 persons per sq. Km.

Interestingly, the sex-ratio for the urban areas of Begusarai district has been more favourable for females in all the successive Censuses than that for the urban areas of the State. The demographers may like to study this phenomenon in detail to ascertain the reasons thereof.

**New Town/Towns declassified in 1981 Census.**

There are 4 towns, viz., Begusarai (M), Barauni I.O.C. township, Barauni and Teghra last 3 being Census towns in the district of Begusarai. In 1971 Census also the position was the same. No new town has been added in 1981 Census nor has any town been declassified. This table has therefore, not been presented.

**Receipt and expenditure in different towns**

The table below gives the details of town finance in terms of per capita receipt and expenditure :

**Table 20—Per capita receipt and expenditure in towns**

| Class, name and civic status of the town | Per capita | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Receipt (in rupees) | | | Expenditure (in rupees) | | | | | |
| | Total | Receipt through taxes | Receipt from all other sources | Total expenditure | General administration | Expenditure on public health and conveniences | Public works | Expenditure on public institutions | Other aspects |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| II—Barauni (C T) | -- | -- | -- | -- | .. | .. | .. | .. | .. |
| IV—Barauni I.O.C. Township (C T) | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| II—Begusarai (M) | 18.61 | 5.03 | 13.58 | 19.06 | 1.22 | 8.82 | 5.64 | 0.11 | 3.27 |
| III—Teghra (C T) | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| **Total** | **6.84** | **1.85** | **4.99** | **7.01** | **0.45** | **3.24** | **2.07** | **0.04** | **1.21** |

Since Begusarai is the only statutory town and the remaining three are the Census towns figures for per capita receipt and expenditure are mentioned only for that town.

**Schools per ten thousand population in towns.**

Primary and middle school education facilities are generally available in all towns. The table furnished alongside gives details of different categories of educational institutions per 10,000 population in different towns of the district :

**Table 21—Schools per ten thousand population in towns.**

| Class, name and civic status of the town | Number per ten thousand population | | | |
|---|---|---|---|---|
| | Higher Secondary/ Inter/PUC/ Junior College | Secondary/ Matriculation | Junior Secondary/ Middle | Primary |
| 1 | 2 | 3 | 4 | 5 |
| II—Barauni (C T) | 0.18 | 0.35 | 1.06 | 1.95 |
| IV—Barauni I.O.C. Township (C T) | .. | 1.71 | 1.71 | 3.43 |
| II—Begusarai (M) | .. | 0.71 | 1.59 | 3.71 |
| III—Teghra (C T) | .. | 0.68 | 1.36 | 3.40 |
| **Total** | **0.06** | **0.65** | **1.36** | **2.99** |

It would be seen from the table furnished on page 23 that institutions such as Higher Secondary/ Inter/ PUC/Junior College are only situated in Barauni Census town accounting for an average of 0.18 institution per ten thousand population. As regards Secondary/Matriculation level schools there are on an average 1.71 schools per ten thousand population located in Barauni I. O. C. township which is the highest followed by 0.71 such schools per ten thousand population in Begusarai (M). Barauni I.O.C. township also has the highest number of Junior Secondary/Middle Schools in the district with an average of 1.71 such schools per 10,000 population closely followed by Begusarai (M) with an average of 1.59 and Teghra (Census town) with 1.36. The average number of primary schools in the urban areas of the district is 2.99 per ten thousand population. In this category Begusarai (M) has the highest number of schools with an average of 3.71 per 10,000 population. In the remaining three towns the average varies between 1.95 and 3.43 schools per ten thousand population.

**Beds in the medical institutions in towns**

The table below furnishes information regarding availability of beds in the medical institutions per 1,000 population in different towns :

**Table 22—Number of beds in medical institutions in Towns.**

| Class, name and civic status of the town | Number of beds in medical institutions per one thousand population |
|---|---|
| 1 | 2 |
| II—Barauni (CT) | 0.89 |
| IV—Barauni I.O.C. Township (CT) | 2.57 |
| II—Begusarai (M) | 3.57 |
| III—Teghra (CT) | 0.17 |
| **Total** | **1.86** |

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to be 1.86. It is the highest in case of Begusarai (M) having 3.57 beds per 1,000 population and the lowest in Teghra (Census town) with only 0.17 beds per 1,000 population.

**Proportion of slum population in towns**

Table 23 has not been prepared in case of Begusarai district since it is restricted to only Class I (population 1 lakh and above) and Class II (50,000–99,999) towns and Begusarai district does not have any town in either categories.

**Three important commodities imported, exported and manufactured.**

The table below presents the most important commodities manufactured, exported and imported in the three towns of Begusarai district. The information for Barauni I.O.C. township is nil.

**Table 24—Most important commodities manufactured, imported and exported in towns.**

| Class, name and civic status of the town | Most important commodity | | |
|---|---|---|---|
| | Manufactured | Exported | Imported |
| 1 | 2 | 3 | 4 |
| II—Barauni (CT) | Butter cream | Butter cream | Coal |
| IV—Barauni I.O.C. Township (CT) | .. | .. | .. |
| II—Begusarai (M) | Eri-silk | Maize | Rice |
| III—Teghra (CT) | Candles | Vegetables | Rice |

In only Barauni town it has been observed that butter cream the most important commodity which is manufactured in the town is also the most important item which is exported to other places. In other towns, however, the most important commodity manufactured and the most important commodity exported are not the same.

# DISTRICT CENSUS HANDBOOK
# PART A

# Village Directory

## SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col.10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, un-irrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(—5 Kms.)', '(5—10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the dispensaries/community health worker has been taken as the availability of most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of Middle School as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterways, etc. (column. 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.

3. Other uncultivated lands excluding fallow lands—

   (a) Permanent pastures and other grazing lands,

   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,

   (c) Culturable wastes.

4. Fallow lands—

   (a) Fallow lands other than current fallows,

   (b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

*Forest*—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

*Land put to non agricultural use*—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

*Barren and unculturable lands*—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

*Permanent pastures and other grazing lands*—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

*Land under miscellaneous tree crops and groves*—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

*Culturable waste*—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

*Current fallows*—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

*Other fallows*—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years, have been treated as other fallows.

*Cultivated area*—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Block-wise.

**Following is the list of abbreviations used in the Village Directory :**

(*i*) *Column* 5—*Educational*

| | |
|---|---|
| P | .. Primary or Elementary School (upto class IV) |
| M | .. Middle or Junior Secondary School (upto class VIII) |
| H | .. Matriculation or Secondary School (upto class X) |
| PUC | .. Higher Secondary, Intermediate, Pre-University, Junior College. |
| C | .. College |
| I | .. Industrial School |
| Tr | .. Training School |
| Ac | .. Adult Literacy Class/Centre |
| O | .. Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.) |

(*ii*) *Column* 6—*Medical*

| | |
|---|---|
| H | .. Hospital |
| MCW | .. Maternity and Child Welfare Centre. |
| MH | .. Maternity Home |
| CWC | .. Child Welfare Centre |
| HC | .. Health Centre |
| PHC | .. Primary Health Centre |
| PHS | .. Primary Health Sub-centre |
| D | .. Dispensary |
| FPC | .. Family Planning Centre |
| TB | .. T. B. Clinic |
| NH | .. Nursing Home |
| RP | .. Registered Private Practitioner. |
| SMP | .. Subsidised Medical Practitioner. |
| CHW | .. Community Health Worker |
| O | .. Others |

(*iii*) *Column* 7—*Drinking Water*

| | |
|---|---|
| T | .. Tap Water |
| W | .. Well Water |
| Tk | .. Tank Water |
| TW | .. Tube-well Water |
| Hp | .. Handpump |
| R | .. River Water |
| F | .. Fountain |
| C | .. Canal |
| L | .. Lake |
| S | .. Spring |
| N | .. *Nullah/Nala/Nallah* |
| O | .. Others |
| NA | .. Information not available |

(*iv*) *Column* 8—*Post and Telegraph*

| | |
|---|---|
| PO | .. Post Office |
| TO | .. Telegraph Office |
| PTO | .. Post and Telegraph Office |
| Phone | .. Telephone connection |

(*v*) *Column* 10—*Communications*

| | |
|---|---|
| BS | .. Bus |
| RS | .. Railway Station |
| NW | .. Navigable Waterway (including river, canal, backwaters, etc.) |

(*vi*) *Column* 11—*Approach to Village*

| | |
|---|---|
| PR | .. *Pucca* Road |
| KR | .. *Kutcha* Road |
| NR | .. Navigable River |
| NC | .. Navigable Canal |
| NW | .. Navigable Waterway (other than river or canal) |
| FP | .. Foot Path |

(*vii*) *Column* 13—*Power Supply*

| | |
|---|---|
| ED | .. Electricity for domestic purpose. |
| EAg | .. Electricity for agriculture purpose. |
| EO | .. Electricity for other purposes like industrial, commercial, etc. |
| EA | .. Electricity for all purposes listed above. |

(*viii*) *Column* 16—*Irrigated by source*

| | |
|---|---|
| GC | .. Government Canal |
| PC | .. Private Canal |
| W | .. Well (without electricity) |
| WE | .. Well (with electricity) |
| TW | .. Tube-well (without electricity) |
| TWE | .. Tube-well (with electricity) |
| Tk | .. Tank |
| R | .. River |
| L | .. Lake |
| Wf | .. Waterfall |
| O | .. Others |

(*ix*) *Column* 20—*Remarks*

| | |
|---|---|
| N | .. Copies of Newspapers coming in the village. |
| M | .. Motor Cycles/Scooters available in the village. |
| C | .. Cars/Jeeps available in the village. |
| T | .. Tractors available in the village. |

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

**Appendix I**

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc., and also the number of villages not having any of these amenities.

**Appendix II**

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forest, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation.

**Appendix III**

This appendix gives, development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

**Appendix IV**

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A)—

0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B)—

0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes and Scheduled Tribes population for local area planning for the weaker sections of the population.

| | 657 | Rasulpur |

NOTE—* Excludes Villages with no Scheduled Caste Population.

## B—SCHEDULED TRIBES

| Range of Scheduled Tribes Population (Percentages) | Thana no. | Name of village |
|---|---|---|
| 1 | 2 | 3 |
| **DEVELOPMENT BLOCK—BARAUNI** | | |
| *0—5 | 472 | Asurari |
| | 521 | Telar |
| 6—15 | 504 | Bihat |
| **DEVELOPMENT BLOCK—BACHHWARA** | | |
| *0—5 | 43 | Rani |
| | 239 | Sirirampur Bhaunath |
| **DEVELOPMENT BLOCK—CHERIA BARIARPUR** | | |
| *0—5 | 191 | Majhaul |
| **DEVELOPMENT BLOCK—SAHEBPUR KAMAL** | | |
| *0—5 | 663 | Sahebpur Kamal |

NOTE—1. * Excludes villages with no Scheduled Tribe population.

2. Begusarai, Matihani, Teghra, Bhagwanpur, Khudabandpur, Bakhri and Balia C. D. Blocks contain no Scheduled Tribe population.

# Town Directory

## SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering; (1) Status and growth history; (2) Physical aspects and location of towns, 1979; (3) Municipal finance, 1978-79; (4) Civic and other amenities in towns; (4A) Civic and other amenities in Notified Slums; (5) Medical, educational, recreational and cultural activities and (6) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix. Since in the district of Begusarai there is no outgrowth in any of the town, this appendix has not been prepared.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory as explained in the Village Directory section of this volume.

The details of the data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

**Statement I**

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

*Column* 2—

| | | |
|---|---|---|
| M. Corp. | ... | Municipal Corporation |
| M | ... | Municipality |
| CB | ... | Cantonment Board/ Cantonment. |
| NAC | ... | Notified Area Committee |
| CT | ... | Census Town |

**Statement II**

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

*Column* 13—

| | | |
|---|---|---|
| R | ... | River |
| C | ... | Canal |

**Statement III**

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

**Statement IV**

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire fighting services and the number of various types of electricity connections are also presented in this statement. If fire fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

*Column* 6—

| | | |
|---|---|---|
| PR | ... | *Pucca* Road |
| KR | ... | *Kutcha* Road |

*Column* 7—

| | | |
|---|---|---|
| S | ... | Sewer |
| OSD | ... | Open Surface Drains |
| BSD | ... | Box Surface Drains |
| SD | ... | Sylk Drains |
| CD | ... | Cesspool Method |
| Pt | ... | Pit System |

*Column* 11—

| | | |
|---|---|---|
| HL | ... | Head Loads |
| B | ... | Baskets |
| WB | ... | Wheel Barrows |
| ST | ... | Septic Tank Latrines |
| S | ... | Sewerage |

*Column* 12—

| | | |
|---|---|---|
| TW | ... | Tube-well Water |
| T | ... | Tap Water |
| W | ... | Well Water |
| Tk | ... | Tank Water |

*Column* 13—

| | | |
|---|---|---|
| OHT | ... | Overhead Tank |
| SR | ... | Service Reservoir |
| IG | ... | River Infiltration Gallery |
| BWP | ... | Borewell Pumping System |
| PT | ... | Pressure Tank |

**Statement IV-A**

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in this district there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town, Statement IV-A relating to the slums does not find place in the present volume. This has already been explained in the 'Analysis of Data' section of this volume.

**Statement V**

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement:

*Column* 4—

| | | |
|---|---|---|
| H | ... | Hospital (Allopathic) |
| H (A) | ... | Hospital (Ayurvedic) |
| H (U) | ... | Hospital (Unani) |
| H (Hom) | ... | Hospital (Homoeopathic) |
| D | ... | Dispensary (Allopathic) |
| D (A) | ... | Dispensary (Ayurvedic) |
| D (U) | ... | Dispensary (Unani) |
| D (Hom) | ... | Dispensary (Homoeopathic) |
| HC | ... | Health Centre |
| FC | ... | Family Planning Centre |

*Column* 4—concld.

| | | |
|---|---|---|

| S | ... | Science only |
| AS | ... | Arts and Science only |
| C | ... | Commerce only |
| AC | ... | Arts and Commerce only |
| ASC | ... | Combined for all categories— Arts, Science and Commerce |
| L | ... | Law |

*Column* 10—

| | | |
|---|---|---|
| SH | ... | Shorthand |
| Type | ... | Typewriting |
| Sh Type | ... | Shorthand and Typewriting |
| O | ... | Others. |

**Statement VI**

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

## TOWN

## STATEMENT

### STATUS AND

# Urban/Village
# Primary Census Abstract

## TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other Workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

**Rural/Urban classification**

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

**Mode of presentation**

In the village/urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

**Area figure**

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
