FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/Union Territory Administration. It *inter alia* provides data/ information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981 some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV--A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0—6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census alongwith the corresponding codes of 1981.

This publication is a joint venture of the State Govt./UT Administration and the Census Organisation. The data have been collected and compiled under the direction of Shri V.S. Chaudhri and Shri Ramesh Negi, Directors of Census Operations, Haryana on behalf of the State Govt. which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M. Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K. Singh, Deputy Director who was assisted by Shri N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi

June 11, 1992

A. R. NANDA

Registrar General, India

PREFACE

The District Census Handbook (DCH) compiled by the Census Organisation on behalf of the State Government is one of the most valuable publications of the Census. The DCH is widely made use of by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. It is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city/town. It also provides data on infrastructure and amenities in villages and towns etc.

The Census Operations of 1991 were carried out under the stewardship of Shri V.S. Chaudhri, the then Director of Census Operations, Haryana and the credit for the successful conduct of the operation goes to him. Before, however, the report could be finalised he had to resume his duties under the State Government in public interest.

The actual enumeration was conducted from 9th February to 28th February, 1991 with a revisional round from 1st March to 5th March, 1991 in order to bring the Census count correct upto the reference date i.e. the sunrise of 1st March, 1991. We had come out earlier with a publication titled "Provisional Population Totals" within a fortnight of the completion of 1991 Census and thereafter a Supplement was issued in May, 1992 giving provisional data on rural-urban composition of population, classification of workers into main workers and marginal workers and further categorisation of main workers into cultivators, agricultural labourers, workers in household industry and other workers. Also provisional figures of population upto tahsil and town level were published therein. Villagewise and wardwise Primary Census Abstract was computerised on National Informatics Centre (NIC) Haryana and the final population totals were released in January, 1993.

Since the district is still the basic functional unit of administration, the District Census Handbook is of special importance to all concerned with administration, policy making and planning. It is of equal value to the scholars, social scientists, geographers, businessmen etc. Its scope has been discussed in detail in the foreword. The data contained in it has been sorted out and presented along lines determined after careful consideration and thoughtful discussions. One of the most important innovations of the 1991 Census is the presentation of data at Community Development Block level which will help the planners in formulation of micro-level developmental plans. Attempt has been made to narrate briefly a few important events of the district in freedom struggle and post Independence era covering socio-economic developments. Efforts have been made to highlight the activities of voluntary organisations who are in the service of the humanity. I hope it will serve as a popular reference book for all data users.

During the entire period of 1991 Census and subsequent compilation of data for this book we had the honour of having enlightened guidance and encouragement from Shri A.R. Nanda, Registrar General and Census Commissioner of India which enabled us to bring out this publication in time and I express my grateful thanks to him. I have to record with gratitude the valuable guidance provided by Shri M.K. Jain, Deputy Registrar General (Social Studies), Mrs. Minati Ghosh, Deputy Registrar General (Map) and Shri N. Rama Rao, former Deputy Registrar General (Census and Tabulation).

I record my appreciation for the painstaking and dedicated services rendered by Shri R.K. Aggarwal, Joint Director who supervised bringing out of this publication. Shri S.R. Puri, Research Officer (Map) was instrumental in processing and compilation of data in the form of various statements and preparation of the draft of this handbook. Shri Ranvir Gupta, Deputy Director completed processing and compilation of PCA in record time in Regional Tabulation Office, Panchkula. Lastly, I record my appreciation for the best efforts of all my staff members and enumerators deployed in Census Operation.

Dated : Chandigarh,
the 20th January, 1993

RAMESH NEGI
Director

ANALYTICAL NOTE

CONCEPTS AND DEFINITIONS

As you know, it has been the tradition of the Indian Census to present the data for rural and urban areas separately. The 'village' and the 'town' are universally recognised as the basic units of habitation. The administration also recognises the division of population into 'rural' and 'urban' areas. Actually, the rural-urban dichotomy is accepted all over the world and the Census data invariably presented separately for the two.

The Village

The definition of the village adopted in our State for the census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is, as such, exclusively administrative in character. From this point of view, a village is better called a 'Revenue Estate' meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The 'Revenue Estate' or 'Mauza', the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate. This definition of village has been adopted for the purposes of the census ever since the year 1901.

The village, therefore, is not merely the inhabited area *(abadi deh)* of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

Urban Area

Urban area is specially defined for the census purposes. In the 1991 Census, the same criteria as in 1981 Census have been adopted. The definition of an urban unit is as follows :—

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc;

(b) All other places which satisfied the following criteria;

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

(iii) A density of population of at least 400 per square kilometre (1000 per square mile)

The urban criteria of 1981 varied slightly from that of the 1961 and 1971 Censuses. The males working in activities such as fishing or logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion of the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities were treated as on par with cultivation and agricultural labour for the purpose of this

criterion. In 1991 Census also, the activities of livestock, forestry, fishing, hunting, plantations and orchards and allied activities have been treated as agricultural activities while applying the test of male working population.

At the time of 1971 Census, places having municipalities, cantonment boards and notified area committees were treated as towns only. Other demographic characteristics declaring a place as urban centre were not tested as the State Government did not favour creation of 'Census Towns' based on the definition and the Director of Census Operations, Haryana did not use this criteria for declaring any rural area as urban. But at the time of 1981 Census, the above demographic criteria were tested and as a result four villages were declared as Census Towns (non-municipal) namely Babiyal in Ambala district, Samalkha in Karnal district and Jharsa and Gurgaon (Rural) in Gurgaon district. Panchkula Urban Estate in Ambala district was also treated as a town in 1981. The Faridabad Complex consisting of Faridabad township, Faridabad and Ballabgarh towns of 1971 and some surrounding villages in Faridabad district; was treated as an independent town in 1981. In addition, all areas having a municipality or cantonment board were treated as towns.

At the time of 1991 Census, the cases of all rural units having a population of 4,000 or more in the 1981 Census, were examined. Jharsa Census Town of 1981 could not fulfil the criteria required for an urban area and was dropped from the town list alongwith Rania M.C. which was denotified as rural. Ten Census Towns of 1991 Census are Pinjore (Rural) and Babiyal of Ambala district; Mustafabad, Farakhpur and Bilaspur of Yamunanagar district; Uncha Siwana of Karnal district; Kheri Sampla of Rohtak district; Dundahera and Gurgaon (Rural) of Gurgaon district and Dharuhera of Rewari district. The total number of towns in 1991 Census has thus risen to 94 as compared to 81 of 1981 and 65 in 1971 Census.

Urban Agglomeration

The concept of 'Urban Agglomeration' adopted for the first time during the 1971 Census was an improvement over the concept of 'Town Group' adopted in 1961 Census. In Haryana, this concept was adopted in 1981. The Registrar General of India directed us that the concept of urban agglomeration adopted for the 1981 Census will remain valid for the 1991 Census as well. Accordingly, an urban agglomeration must form a continuous urban spread constituting a town and its adjoining urban out-growths (OGs) or two or more physically contiguous towns together with continuous well recognised urban growths, if any, of such towns. In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, military camps, etc. and even though they are outside the statutory limits of the corporation, municipality or cantonment board, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be realistic to treat such areas lying outside the statutory limits of a town as rural units, at the same time each individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such area deserves to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining one another such as a municipality and the adjoining cantonment and also other adjoining urban out-growths which did not qualify to be treated as individual towns in their own right should be treated as urban appendages of the units to which they are contiguous.

In 1971 Census, no urban agglomeration was recognised in Haryana in the absence of any such proposal from the district authorities. But at the time of 1981 Census, the then Registrar General, India stressed that proposal for formation of urban agglomerations should be duly considered and we delineated four urban agglomerations. In 1991 Census the following seven urban agglomerations (including four of 1981) were recommended to the Registrar General. India and got approved :—

Urban agglomeration	Constituent town(s) and/or urban outgrowth
(1) Yamunanagar U.A.	(a) Yamunanagar (M.C.)
	(b) Jagadhri (M.C.)
	(c) Jagadhri Workshop Railway Colony (M.C.)
(2) Hisar U.A.	(i) Hisar (M.C.)
	(ii) Haryana Agricultural University Campus and Mini Secretariate (O.G.)
(3) Karnal U.A.	(i) Karnal (M.C.)
	(ii) Part of Sector 6, Urban Estate (O.G.)
(4) Ambala U.A.	(a) Ambala Sadar (M.C.)
	(b) Ambala Cantt. (C.B.)
(5) Gurgaon U.A.	(a) Gurgaon (M.C.)
	(b) Gurgaon (Rural) (C.T.)
(6) Bahadurgarh U.A.	(i) Bahadurgarh (M.C.)
	(ii) Sector 6, HUDA (O.G.)
(7) Pundri U.A.	(i) Pundri (M.C.)
	(ii) Part of village Fatehpur (O.G.)

Urban agglomerations at serial numbers 1, 2, 4 and 5 above were also in 1981 Census and were accepted without any change.

Standard Urban Area

A new concept of 'Standard Urban Area' introduced in 1971 Census was also followed for the 1981 and 1991 Censuses. The 'Standard Urban Area' is defined as the projected growth area of a city or a town having 50,000 or more population in 1971, as it would be in 1991, taking into account not only the urban and rural units which will get merged into it but also the intervening areas which are potentially urban and have mutual socio-economic links with the core town. It is a long term planning area and is to remain as a continuous statistical reporting unit during the three successive Censuses 1971, 1981 and 1991, irrespective of the changes in the boundaries of local administrative units within the tract.

In the case of Haryana, the following eleven 'Standard Urban Areas' were delineated :--

1. Ambala
2. Yamunanagar-Jagadhri
3. Karnal
4. Panipat
5. Sonipat
6. Bahadurgarh
7. Rohtak
8. Faridabad Complex
9. Gurgaon
10. Bhiwani
11. Hisar

Census House

A 'Census House' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be household of persons related by blood or a household of unrelated persons or having a mix or both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called institutional households. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'.

Definition of Scheduled Castes/Scheduled Tribes

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

'Scheduled Castes' mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

'Scheduled Tribes' mean such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of 'Scheduled Castes' and 'Scheduled Tribes' for each State and Union Territory. Accordingly, the 'Scheduled Castes' and 'Scheduled Tribes' are listed under the Presidential order for each State and Union Territory.

There are 37 'Scheduled Castes' in Haryana as listed in Part I under 'Haryana' of Schedule I of the Scheduled Castes and Scheduled Tribes (Modification) Order 1956, corrected up-to-date and notified by Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976. There is, however, no 'Scheduled Tribe', listed as such, in Haryana State.

Literate

A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children below the age of 7 years have been taken as illiterate in 1991 Census. In 1971 and 1981 Censuses, children below the age of 5 years were recorded as illiterate. At the time of 1991 Census, the Department of Education in the Ministry of Human Resource Development and the Planning Commission desired that in the 1991 Census, children in the age group 0-6 should be considered as illiterate since the ability to read and write with understanding is not generally achieved, specially in the rural areas, until a child attains the age of 7 or more. This has been done perhaps to make the Indian Census data comparable with the international statistics on the subject.

The concepts and definitions relating to economic questions in general and 'work' in particular adopted in 1981 Census retained in 1991 for the sake of comparability. However, greater care was taken to frame the questions in such a way as to help netting unpaid workers on farm or in family enterprises. In order to ensure that the economic activity of women and children working on farm and in the family enterprises was properly enumerated, special emphasis was laid on the training of enumerators and it was stressed that they should ask probing questions especially in case of women to find out if they worked any time at all last year or any of the seasons in the reference period. Further, the question on seeking/available for work was asked in the 1991 Census from non-workers only and not from marginal workers as was done in the 1981 Census. In the case of those seeking/available for work, a question whether they had ever worked before was asked, which will help in knowing the number of fresh entrants to the labour force.

Main Worker

A main worker is a person whose main activity is participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. For determining a worker, he/she should have worked for six months or 183 days or more in one or more than one activity. Workers are classified into nine industrial categories :—

I-Cultivator

For purposes of the census a person is considered working as cultivator, if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Cultivation invloves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc, and other crops such as sugarcane, ground-nuts, tapioca, etc, and pulses, raw jute and kindred fibre crop, cotton, etc, and does not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

II-Agricultural Labourer

A person who works on another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III-Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities

It covers persons engaged in rearing of livestock such as goats, horses, pigs, ducks, bees, silk worms, etc and production of wool, raw silk etc; plantation and conservation of forests, felling and cutting of trees, production of fuel, gathering of fodder, gums, resins, etc; sea, coastal and inland water fishing, pisciculture, collection of pearls, conches shells, sponges, etc; hunting, trapping and game propagation for commercial purposes only; plantation such as tea, coffee, rubber, tobacco, edible nuts, fruits, ganja, betel nuts, etc including orchard farming; and other allied activities such as pest destroying, operation of irrigation system, animal shearing and livestock services (other than veterinary services), grading agricultural and livestock products, soil conservation, soil testing, etc.

IV-Mining and Quarrying

It includes persons engaged in mining and quarrying activities such as mining of coal, lignite, crude petroleum, natural gas, iron ore, manganese, gold, silver, copper ore, and quarrying of stones, clay and sand pits, precious and semi-precious stones, mica, gypsum, etc.

V (a)-Manufacturing, Processing, Servicing and Repairs in Household Industry

It covers the persons engaged in manufacturing, processing, servicing and repairs in Household Industry. 'Household Industry' (HHI) is defined as an industry carried on by the head of household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house in which the household lives in the case of urban areas. The workers in a household industry generally consist of members of the household including the head. The industry should not be run on the scale of a factory which would qualify for being registered under the Indian Factories Act. Lastly, a household industry should relate to production, processing, servicing, repair or making and selling (but not merely selling) of goods. It does not include professions such as a pleader, doctor, barber, musician, dancer, waterman, dhobi, astrologer, etc, or merely trade or business, even if such professions, trade or services are run at home by members of the household.

V (b)-Manufacturing, Processing, Servicing and Repairs in other than Household Industry

It includes persons engaged in manufacturing, processing, servicing and repairs (other than Household Industry).

VI—Constructions

It includes persons engaged in construction activities such as maintenance of buildings, roads, railways, telegraph, telephone, water ways and water reservoirs, hydro electric projects, industrial plants, activities allied to construction such as plumbing, heating and air conditioning installation, setting of tiles, marbles, bricks, etc. construction of electrical installation etc.

VII-Trade and Commerce

It covers persons engaged in wholesale and retail trade of any type like cereals, pulses, foodstuff, textiles and textile product; wholesale trade in animals, straw and fodder; in medicines, chemicals, fuel lighting products, porcelain, glass utensil, crockery, etc. in all types of machinery, equipment including transport and electrical equipment, trade in furniture, rubber and rubber products, building material, clocks, eye-glasses, medical and surgical instruments, precious metals, stone, jewellery. etc; in grocery, vegetables, fruit selling, meat, poultry, bakery products, dairy products, pan, bidi, aerated water etc., in readymade garments, retail trade in books and stationery. It also includes restaurants, cafes and other eating places, hotels, rooming houses, camps and other lodging places.

VIII-Transport, Storage and Communications

It includes persons engaged in transportational, storage and communicational activities such as railways, tramways, motor buses, bullock carts, ekka, tonga, etc, ocean and coastal water, inland water transport, air transport, services rendered to transport such as packing, crating, travel agencies, etc. It also includes activities like storage, warehousing, communication such as postal, telegraph, wireless, telephone, etc.

IX-Other Services

It includes all other persons engaged in various types of economic activities who are not covered under industrial categories I to VIII.

Marginal Worker

A person who had worked for less than 183 days in a year is considered as a marginal worker.

Non-Worker

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

BRIEF HISTORY*

The name of the district is derived after its headquarters' town, Ambala. It is surmised to have been founded by one Amba Rajput during the 14th century. In any case there is no reason to doubt the antiquity of the region which is well established on the basis of the discovery of numerous pre-historic, proto-historic and historical sites. On the basis of explorations and excavations it is possible to give an outline of the chronological sequence of the earliest cultures of the district.

---

* Source : Extracts from Haryana District Gazetteers--Ambala,1984

The earliest inhabitants of the district were a primitive people using stone tools of the lower palaeolithic age such as choppers, cores, unworked flakes, scrapers, cleavers and hand-axes. These have been discovered from Dara Kharoni, Mansa Devi (Bilaspur), Pinjore, Suketri and from the region extending from Pinjore to Nalagarh. Unfortunately, this district has not so far yielded any pre-Harappan or mature Harappan site.

With the advent of the Aryans sometime in the later half of the second millenium B.C. (generally associated with the people using Painted Grey Ware pottery) began a new era in the history of the district (old Ambala district) which is supported by literary evidences at successive stages. The Aryans settled in the land of their sacred rivers and their prominent tribes, the Bharatas, Purus and Kurus fought battles here, performed yajnas (sacrifices) and recited and composed Vedic hymns. The Ambala area was included in the kingdom of the Pandavas and their successors, the Parikshitas. The district has also yielded coins of Indo-Parthian Gondophernes (from Ambala and Naraingarh) and a coin of Mahakshatrapa Rajuvala (from Ambala).

The discovery of Kushana bricks at several places and the coins of Vasudeya (found at Panjlasa in Naraingarh tahsil) and the recovery of abundant Kushana finds in the neighbouring districts justify the conclusion that this district was included in the Kushana empire which extended to Mathura and Varanasi in the east. The region of Buria, Sugh and Jagadhri of old Ambala district has yielded several coins of Amoghabhuti, a chieftain of the famous Kunindas. Kuninda coins were procured also from Naraingarh and Sadaura. The Kunindas, who were settled between the Satluj and the Yamuna, were the collaborators of the Yaudheyas (another famous republican people, settled over a larger area covering parts of Punjab, Haryana, Rajasthan and western Uttar Pradesh), in ousting the foreign Kushanas beyond the Satluj. Some of the Kuninda coins are cast on Kushana model bearing the figure of Siva with trident and the symbols of deer, tree and river. In course of time the Kunindas lost their independent existence probably because of their fusion with the expanding republic of the Yaudheyas whose coins have been found almost all over Haryana. This receives some support from the Prayaga Prasasti (Allahabad Pillar Inscription) of Samudragupta in the 4th century A.D. which does not mention the Kunindas, though it refers to the Yaudheyas.

According to R.C. Majumdar, the region between Lahore and Karnal (which included also the Ambala district) formed a part of Samudragupta's empire. Gupta hold over the region continued under Chandragupta-II Vikramaditya whose expedition to Punjab and Bactria is recounted in the Mehrauli Pillar inscription and whose silver coins are found in plenty all over the eastern Punjab.

In the seventh century A.D. the district formed a part of the Srikantha Janapada of the Pushpabhutis of Thanesar. Rajyavaradhana and Harshavardhana marched through this region to meet the Huna menace in the north.

Our running survey of events shows that towards the close of the seventh and first part of the eighth century A.D., the district fell a prey to the imperial ambitions of Yasovarman of Kanauj and Lalitaditya, the ruler of Kashmir. It was included in the empire of Partihara Mihira Bhoja (A.D. 833-A.D. 890) which extended up to the Takkadesa in the north. In the tenth century A.D. Mahmud Ghazni and his successors several times

raided the district. During the 12th century A.D. peace and order was restored in the district by the Chauhanas of Delhi who brought it under their administrative control. The inscription, dated A.D. 1164 gives an idea of the role which the region played in resisting the Muslim invaders. In this context the appointment of Kilhana, the maternal uncle of Prithviraja II as governor of Hansi becomes significant. Kilhana defeated the ruler of Panchapura (Pinjore) and extended Chauhana rule over that region. The district finally passed on to the Muslim rule as a result of the decisive victory of Shihab-ud-din Ghuri over Prithviraja III in the second battle of Tarain (A.D. 1192).

It appears that during this period (i.e., from 9th to 12th century A.D.) the district (old Ambala district) retained its importance as a centre of religious pilgrimage and temple worship. Kapal Mochan, Sadaura, Jagadhri and Pinjore were its important tirthas (places of pilgrimage), while the discovery of various images representing Vishnu, Uma-Maheshvara, Ganesh, Kartikeya, Surya, Gaja-Lakshmi, Tirthankaras and Buddha at several places suggests existence of beautiful temples which were probably destroyed during the Muslim invasions.

After the death of Shihab-ud-din Ghuri, Qutb-ud-din Aibak established Muslim rule in north India. No reference of the region now comprising the Ambala district is available but possibly the region was included in the Sultanate at some stage. Tabakat-i-Nasiri refers to the victories of Sultan Nasir-ud-din Mahmud in the vicinity of Pinjore and gain of the spoils from there. After Firuz's death, the region felt the full force of those intensive discords which rent the Delhi kingdom. As a result, Ambala, along with other adjacent territories, possibly went out of the control of the Tughluqs. Then followed the invasion of Timur (1398) who devastated the whole countryside in the region upto Siwalik hills (possibly including Pinjore).

Akbar's reign is full of events. The Ain-i-Akbari mentions that mahals of Ambala, Khizrabad, Sadaura and Mustafabad (covering mostly the area lying in old Ambala district) formed part of Sirhind sirkar of the Delhi Subah. There were brick forts at Khizrabad and Sadaura. Shah Jahan built the Rang Mahal, a well built palace with massive stone arches at Buria. Fidai Khan, Aurangzeb's Master of Ordnance laid a beautiful Mughal garden at Pinjore.

After Aurangzeb's death, the political position changed and various forces rose in opposition to the empire. Banda Bahadur (1670—1713), launched a fierce attack on the Ambala area (1709-10). However, his success proved to be short lived. At Sadaura, Banda gave a tough battle to the Mughals (1710) but lost the ground to their superior forces. After the defeat of Banda, Khidmat, a Mughal official governed the Ambala territory till 1739, when Nadir Shah launched a heavy attack on Ambala on February 17, 1739.

After Nadir's retreat from India, chaos and confusion which spread in every nook and corner of the Mughal empire held the Ambala territory in its dark fold.

In 1750's Qutab Shah wrongly called Rohella from the Meerut division, appeared on the scene. Expelled by the Marathas from there, he occupied an extensive tract comprising the present districts of Ambala, Yamunanagar, Kurukshetra and Karnal. He defeated the imperial forces sent against him at Karnal on March 11, 1755, but he was soon over-powered by

Adina Beg, the Governor of the Doab in April 1755. The Delhi authorities got pleased with this daring feat of Adina and gave the entire sirkar of Sirhind including Ambala, to him. But Adina's hold over the region proved short-lived. Ahmed Shah Abdali who made several invasions commencing with 1757 held this area for a number of years.

The newly founded small principalities of Naraingarh, Shahazadpur, Kesri, Ramgarh and Raipur etc. of present Ambala district continued to exist as independent potentates until the British came on the scene in 1805. However, the British, on assumption of control over Delhi wished to bring these principalities under their political influence. The bellicose Chiefs disliking this prospect, formed a confederacy to fight the British and started opposing them.

After taking the chiefs in the Ambala area under their protection, the British controlled the affairs of all the states in the region in a most effective manner through the political agency at Ambala. The political agency of Ambala was transformed into commissionership under the Commissioner of the cis-Satluj states and the political supervision and control over the states was intensified. By 1846 several chiefships had lapsed owing to their failure to have male heirs, and the so called break-down of administrative machinery. The British acquired strips of territory around Ambala which was formed into Ambala district in 1847.

The Ambala district played a significant part in the Uprising of 1857. Ambala was a military depot of great importance then. A large number of European and Indian troops were stationed here. In 1857 as elsewhere, the entire Indian troops stationed here were vaguely disaffected towards the British.

Thus the British were too alert to be caught napping at Ambala and the sepoys failed to transform their intentions into a working reality. But they succeeded at Meerut. Had the Ambala troops succeeded like the Meerut ones, they would have greatly added to the forces of the rebels.

The First World War broke out in 1914. The people of Ambala helped the government in its war efforts; the village peasants gave recruits for the army, and the urban rich contributed to the war loan and funds. But when thousands of them were discharged from army after the conclusion of the war, the ex-soldiers and their families suffered. This made them disaffected towards the government.

There was great deal of political activity in Ambala district after the war. Like other parts of India, the people over here opposed the Rowllatt Bills, and passed resolutions condemning the government action on February 11, 1919. After the passage of the second Rowllatt Bill, i.e. Criminal Law Emergency Powers Act in March 1919, the people of Ambala opposed it quite effectively.

On August 1, 1920, when Mahatma Gandhi launched the Non-Co-operation Movement, the struggle became, as elsewhere, very intense in Ambala. A large number of people joined the struggle and offered themselves for satyagraha. Lala Murlidhar, renounced his title and several other medals received from the government. A number of students left schools and colleges and several lawyers boycotted law courts. Foreign cloth was replaced by khadi. About 45 shopkeepers of Ambala promised not to sell foreign goods.

In 1930, an all-India movement, the Civil Disobedience Movement was again launched by Mahatma Gandhi, which bestirred the nation. Ambala was no exception. On April 6, 1930, a huge procession marched through the main streets of the city and leaders made soul stirring speeches.

As elsewhere, breaking of salt law also became a prominent feature of the anti-British struggle in the district. Even ladies came forward and on April 26, 1930 women volunteers prepared salt in the Anaj Mandi, Ambala. The salt which was subsequently auctioned, fetched 63 rupees.

This rapid survey of the pre-historical and historical events indicate that the area of the Ambala district always remained a part of the mainstream of the Indian history.

Prior to the formation of Haryana in November, 1966, Ambala district had six tahsils but during the Reorganisation, it lost Nalagarh tahsil to Himachal Pradesh, Rupnagar tahsil and a major portion of Kharar tahsil to Punjab and a few villages including the Chandigarh Capital Project Area to the newly formed Union Territory of Chandigarh. It retained only 3 tahsils, Ambala, Jagadhri and Naraingarh including 153 villages and the Kalka town transferred from Kharar tahsil. Later in 1967, 153 villages and the Kalka town were taken out of the Naraingarh tahsil and formed into a separate Kalka tahsil.

At the time of 1981 Census, the Ambala district comprised of four tahsils namely Kalka, Naraingarh, Ambala and Jagadhri and there were no jurisdictional changes in this district during the decade 1971--81.

Now, the Ambala district comprises the tahsils of Kalka, Panchkula, Naraingarh, Ambala and Barara. The district experienced jurisdictional changes during the decade 1981—91. Two new tahsils of Panchkula and Barara were formed during the decade 1981-91. Panchkula tahsil was created by transferring 77 villages of Kalka tahsil and 19 villages of Naraingarh tahsil in October, 1989. Out of these 96 villages, four villages are fully merged in Panchkula Urban Estate. The sub-tahsil of Barara containing 87 villages has been upgraded to a full-fledged tahsil in October, 1989. The Jagadhri tahsil and Sadaura sub-tahsil of Naraingarh tahsil which were part of Ambala district in 1981 Census are now part of newly created district of Yamunanagar. Kalka tahsil has 106 villages and three towns of Kalka M.C., H.M.T Pinjore M.C. and Pinjore (Rural) (Census Town). Panchkula tahsil has 92 villages and one town of Panchkula Urban Estate. Naraingarh tahsil has 218 villages and one town of Naraingarh M.C. Ambala tahsil has 235 villages and four towns of Ambala M.C., Ambala Sadar M.C., Ambala Cantt. C.B. and Babiyal (C.T.). Barara tahsil contains 87 villages only. It is the only tahsil in Ambala district which does not contain any urban centre.

DISTRICT CENSUS HANDBOOK

The compilation of the census data at village and town level is a laborious and time-consuming job. The District Census Handbook compiled by the Census Directorate on behalf of the State Government, is one of the most wanted publications of the Census.

It was decided at the time of 1951 Census, for the first time, that census data should be published for individual villages and towns

also. The district was considered to be the most manageable and rational unit for the publication of such data. This is how the publication of the 'District Census Handbook' was started. It contained important census tables and primary census abstract for each village and town of the district. During 1961 census, the scope of the 'District Census Handbook' was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including primary census abstract. The descriptive account of the district included the various non-census items of information such as physical features, climate, flora and fauna, places of interest, social and cultural life, a brief history of the district and its administrative machinery. Information on the land use pattern, main crops, irrigation, trade and commerce, industries, means of communications, rainfall, livestock, education, medical and health, etc, was collected from various Government departments and included in the scope of 'District Census Handbook'. This job was an enormous one and could cause substantial delay in the printing of 'District Census Handbooks'. To avoid this delay, the '1971 District Census Handbook' series was planned in three parts. Part A related to village and town directory, Part B to village and townwise primary census abstract and Part C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on census and amenity data in respect of villages. The 1971 District Census Handbooks were published in two volumes, first containing the two Parts A and B and the second comprising Part C alone. The publication of Part C was considerably delayed because of delay in getting the administrative statistics from the various departments. So in Haryana, we could publish Part C in respect of one district (Ambala) only. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

The 1981 District Census Handbook series contained some new features along with the restructuring of the formats of village and town directory. At the same time comparability with the 1971 data had also been kept in view. The restructuring of the format of the village directory and town directory and incorporating more exhaustive data on infrastructure aspect were introduced to meet some of the requirements of the Revised Minimum Needs Programme. In order to avoid delay in the publication of 1981 District Census Handbooks, it was designed that Part A of the volume contained village and town directory and Part B the primary census abstract of villages and towns including the scheduled castes/scheduled tribes primary census abstract upto tahsil/town levels. At the beginning of the 'District Census Handbook' a detailed analytical note supported by a number of inset tables based on census and non-census data in relation to the infrastructure had been introduced to enhance its value. Both the parts were combined together and published in one volume so far as Haryana was concerned.

The coverage of information to be included in 'District Census Handbooks' of 1991 series is more or less the same as was in 1981 Census but with more detailed industrial categories on the pattern of 1971-DCH series. The main frame on presentation of data in 'District Census Handbooks' of 1991 series has undergone a change. Now, it has been decided to adopt C.D. Block as the main unit of presentation of data in village PCA and also in 'Village Directory' as it has to depict one to one parity with the PCA. Thus, C.D. Block

is the main unit of presentation of data, rather than the traditional tahsil in the village PCA. The district figures in the village/town PCA have been followed by the first C.D. Block, its villages and census towns and outgrowth, if any, and thereafter the second C.D. Block and its constituents and so on. The data pertaining to towns/ cities/U.As have been presented in the end after the last C.D. Block. As such, the census towns and outgrowths of the statutory towns falling within the jurisdiction of C.D. Block have been included as the urban portion of C.D. Block.

At the end of village/town PCA, an appendix has been added containing the names and codes of C.D. Blocks or parts of C.D. Blocks included in each tahsil and also the separate PCA totals for each tahsil in a district, giving total, rural and urban population of each tahsil. This appendix provides continuation of earlier census presentation of data.

As usual, the alphabetical list of villages has been given preceding the 'Village Directory' of each C.D. Block. Accordingly, villages have been arranged alphabetically tahsilwise within each C.D. Block because in many cases the villages of one C.D. Block belong to more than one tahsil.

Part A of the 1991 District Census Handbook contains 'Village and Town Directory' and Part B consists of 'Village and Townwise Primary Census Abstract. Both the parts have been combined together into one volume. The district and tahsil maps showing boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication. C.D. Block boundaries are shown on tahsil maps.

SCOPE

Village Directory

Amenities and land use

The 'Village Directory' furnishes certain basic statistics for each village. The villages in the district have neen arranged C.D. Blockwise and within C.D. Block, location codewise. At the time of Census each village was allotted a code number for purposes of identification.

The format of 'Village Directory' is similar to '1981 Census-Village Directory' format except for deletion of two columns namely 'staple food' and 'remarks' column giving information about places of religious, historical or archaeological interest, etc. The Village Directory, therefore, contains information about total area of the village, total population and number of households, availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, communications; approach to village; nearest town and distance; power supply; area under different types of land use such as under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and area not available for cultivation. The data presented in the 'Village Directory' have been collected from the district/tahsil revenue agency and other related offices of the district.

Appendix 1

This Appendix gives for each C.D. Block the number of villages having various levels and types of educational institutions, such as primary

schools, middle schools, etc; along with their number, various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as taps, tubewells etc, post and telegraph offices, communications such as railway station, bus stop etc, power supply available/not available in villages. In Haryana, we have Village Health Guides in place of Commnity Health Workers, and so the data have been presented accorrdingly. Information regarding Audlt Literacy Classes/Centres may be considered as nil as the Audlt Literacy Scheme has been abolished in Haryana.

Appendix 2

This Appendix represents for each non-municipal town (i.e. place treated as town only for Census purposes) the area under forest, irrigated by source, unirrigated land, culturable waste land and area not available for cultivation.

Appendix 3

This Appendix gives the list of villages where no educational, medical, drinking water, post and telegraph, communications and power supply amenities are available.

Appendix 4

This Appendix depicts the list of villages with Scheduled Caste population in various ranges of proportion to total population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above. It may be stated here that there is no Scheduled Tribe in Haryana.

Town Directory

The Town Directory contains seven statements almost similar to those adopted for 1981 Census. These statements have been compiled from the information supplied by the local bodies. Details contained in each statement are given below.

Statement I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, population and growth rate, density and sex ratio of the town at different censuses. In case a town did not enjoy urban status at any Census, the relevant columns under the headings 'Population and growth rate of the town at the censuses of' and 'Sex Ratio' have been left blank. Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1991 Census population of the core town as follows :-

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Statement II provides the physical aspects such as rainfall and temperature of the various towns in the district and locational aspects of each town with respect to its distance from state headquarters, district headquarters, sub-division/tahsil headquarters, nearest city with population of one lakh and more, railway station, bus route, etc.

Statement III indicates the position of municipal finances for the year 1988-89. Income and expenditure figures have been given in Rs. '00' in respect of each town in the district under various heads.

Statement IV shows civic and other amenities viz. road length, system of sewerage, number of latrines, method of disposal of night soil, water supply, fire fighting service and the number of electric connections as available during the year 1989. This statement also contains information regarding total population and scheduled caste population to give clear cut picture of the amenities available with respect to population size of each town.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns.

Statement V explains the position of medical, educational, working women's hostel, recreational and cultural facilities for each town in the district during the year 1989. Under the heading medical facilities, the number of hospitals/dispensaries/TB clinics etc. has been shown separately along with the total number of beds available. Under the heading educational facilities, number has been given separately of Arts/Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training Institutions,Higher Secondary/ Secondary/Junior Secondary/Middle/Primary Schools, etc,. In regard to recreational and cultural facilities the number of stadia, cinemas, auditoria and public libraries is indicated. There are no Adult Literacy Classes/ Centres in Haryana.

In Statement VI information regarding three most important commodities imported/exported and manufactured has been given along with the number of banks, agricultural credit societies, and non-agricultural credit societies for each town of the district.

Primary Census Abstract of general population :—

(i) District Primary Census Abstract—

In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each C.D. Block separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

(ii) C.D. Blockwise Primary Census Abstract—

Here figures for each village in a C.D. Block have been presented. Census towns and outgrowths of the statutory towns falling within the jurisdiction of C.D. Block have been included as the urban portion of C.D. Block. Data pertaining to towns/cities/U.As have been presented in the end after the last C.D. Block.

At the time of Census enumeration, enumeration blocks were formed in the villages containing about 750 persons and in the towns, about 650 persons in each block. But the data have not been given for each block separately in the case of rural areas. In the case of urban areas total population and Scheduled Caste population have been shown blockwise in the Appendix-II.

Appendix-I

This Appendix gives total, rural and urban population of each tahsil in a district. This provides continuation of earlier census presentation of population data.

Appendix-II

This Appendix gives at urban block level the total population and Scheduled Caste population.

Primary Census Abstract of Scheduled Caste population

In the District Primary Census Abstract of Scheduled Caste population, figures have been presented for the district as a whole as well as for each C.D. Block/town separately.

PHYSICAL ASPECTS

Ambala district is bounded by Himachal Pradesh in the north and north-east, by Yamunanagar district in the east, by Kurukshetra district in the south and by Punjab and Union Territory of Chandigarh in the West.

The district has a sub-tropical continental monsoon climate where we find seasonal rhythm, hot summer, cool winter, unreliable rainfall and great variation in temperature. In winter, frost sometimes occurs during December and January. The district also receives occasional winter rains from the western disturbances. The rainfall is generally restricted to rainy season. The district has sharply rising Siwalik hills and foot-hill rolling plain in the north and north-east, a doom in Pinjore area and flood plain along the Ghaggar river. Morni hills lying in Panchkula tahsil constitute the highest point of the district as well as of Haryana. The important rivers/streams of the district are Ghaggar (Rigvedic Sarsvati), Markanda, Dangri, Begna, Baliali, etc. Generally, the slope of the district is from north-east to south-west, in which direction most of the rivers/nadis/ rainfed torrents flow down and spread much gravels and pebbles in their beds. Only the Sirsa nadi, in Kalka tahsil, flows towards north-west through a narrow belt of Siwalik tract. The district is devoid of any perennial river. The soils in the district are mainly light loam (Seoti), piedmont (Ghar and Kandi), Siwalik (Pahar), Siltyclay (Naili and Chhachhra-Dakar), etc.

The soils as classified by the National Burèau of Soil Survey and Land Use Planning (ICAR) Nagpur, the district has mainly Ochrepts-Orthents and Ustalfs-Fluvents types of soils.

The under-ground water in the district occurs under confined and semi-confined conditions which is generally fresh and suitable for domestic and irrigation purposes. The underground water level is relatively high in the southern parts and low in the north and north-east which is a hilly tract. Seismically, the district lies in a region where earthquakes of moderate to high intensity had been felt in the past. Being situated near to Himalayan Boundary Fault Zone, it is prone to earthquakes. The district

has a favourable climate for the growth of rich and abundant vegetation due to reasonably good rainfall and elevation. *Shisham* (Dalbergia sissoo), Kikar (Acacia nilotica) and Mango (Mangifera Indica) are the important tree species grown in the plains. *Safeda* (Eucalyptus hybrid) has been introduced since 1963 in forest areas as well as on private lands. The natural vegetation is mainly of forest growth and its degradation stages. Tropical Dry Deciduous Forests and Sub-Tropical Forests are found here.

The district has 90 square kilometres of area under reserved forests, most of which falls in Kalka tahsil and 287 square kilometres of area under protected forests.

ECONOMY

The present district of Ambala has a mixed type of economy. Out of a total population of 1,116,878, about 28.64 per cent of its population has been enumerated as main workers in the district against 28.66 per cent for the state as a whole at the time of 1991 Census. In the district, 37.54 per cent of its main workers are engaged in agricultural activities which include cultivators and agricultural labourers against 57.77 per cent for the state as a whole which explains subsistence type of agricultural activities as well as diversification of economic activities in the district. The proportion of main workers engaged in household industry is 2.18 per cent in the district against 1.53 per cent for Haryana. The percentage of main workers in manufacturing, processing, servicing and repairs (other than household industry) is 9.60 in Ambala district against 9.03 for the State. The proportion of main workers in construction, trade and commerce, transport, storage and communications is relatively high in the district than the State figures. Other services claim 29.89 per cent of the total main workers in the district and this proportion is quite high as compared to the State figure of 16.10 per cent.

The district serves as an important link between the hills and the plains. The present district of Ambala remained industrially backward particularly till the beginning of the twentieth century. Its manufacturing units were few and unimportant. The only important industry before 1883-84 was Durri (Carpet) manufacturing at Ambala. The district had made rapid progress in the field of industrial development since 1947. The district now has a prominent place in the industrial map of Haryana and Ambala, Ambala Cantonment, Panchkula Urban Estate, H.M.T. Pinjore and Surajpur are important industrial centres. Manufacturing of scientific and surgical instruments is an old and important industry of the district and most of its units are located in Ambala City and Ambala Cantonment. Important centres for the manufacture of electrical and electronic goods are again in Ambala City and Ambala Cantonment. Industrial units at these two places are engaged in manufacturing of electric appliances like electric presses, electrical ovens, electrical motors of various sizes, electric grinders and mixers and electronic goods like voltage stablizers, electric meters and accessories of refrigerators. These towns are famous all over India for Mixies. The provisional data available in the Statistical Abstract of Haryana (1990-91) for the year 1990, explain that there were 4843 registered working factories in Haryana, out of which 316 were in Ambala district employing 16,801 workers.

Agriculture retained its foremost place in the economy of the district by engaging 37.54 per cent of the main workers in cultivation and agricultural labour. The government is making all efforts to enhance agricultural production by distributing improved seeds, fertilizers and

pesticides, increasing irrigation facilities and promoting latest techniques of multiple cropping practices and mechanised farming. It also keenly promotes animal husbandry, fisheries and forestry which play a subsidiary but an important role in the agricultural economy. Irrigation in the district mostly depends upon tubewells. The percolation wells are also found in the tahsils of Naraingarh, Panchkula and Kalka but these are located in plain areas where sub-soil water is not too low. *Kuhl* irrigation is also prevalent in hilly tract of the district.

The crops grown in the district can be divided into two main categories namely kharif and rabi, locally known as sawani and sadhi. The former is the summer season harvest and the latter is the winter season harvest. Any crop which does not strictly fall within these two harvests is known as a zaid crop and its harvest is termed as zaid kharif or zaid rabi, according to the harvest with which it is assessed. For example, Toria (an oilseed) is cultivated as zaid kharif and vegetables, melon and green fodder as zaid rabi. The major kharif crops are sugarcane, groudnuts, paddy and maize while the minor or subsidiary crops are chillies, bajra, jowar, pulses, vegetables, etc. The major rabi crops are wheat, gram, barley and oilseeds while minor ones are massar, barseem, methi, onion and other winter vegetables.

Irrigated area under cultivation of food crops and under other non-food crops including oilseeds was 149 thousand hectares and 8 thousand hectares respectively during the year 1989-90. Out of a total of 247 square kilometres of reserved forests in the State during the year 1990-91, 90 square kilometres of reserved forests are found in Ambala district. Area under reserved forests is the highest in Ambala district among the 16 districts of Haryana.

A UNIQUE EXPERIMENT

In the early eighties, it was observed that due to heavy siltation, Sukhna Lake of Chandigarh has started losing its storage capacity. The Central Soil and Water Conservation Research and Training Institute (CSWCRTI) Chandigarh, found that the problem was mainly due to over-grazing, browsing, illicit felling and faulty agricultural practices by the communities living in the lower Siwaliks. The Haryana Forest Department along with CSWCRTI mooted the idea of constructing an earthfill Bund above a gully head to divert and dispose rain water through a safe outlet. Sukho Majri, a Gujjar hamlet about 4 km from Pinjore Garden was approached. Once stored rain water was available for irrigating their marginal lands, the villagers agreed to protect the catchment areas by not letting their animals graze in the forests. This mutual trust so generated, gave rise to the concept of social fencing. Gradually Haryana Forest Department developed a number of strategies like water harvesting dams, fodder and fibre grass leases and enrichment planting of Bhabbar grass, etc. to enlist the participation of communities in forest management. The idea of joint management spread to the neighbouring villages and then the village communities formed 'Hill Resource Management Societies (HRMSs)'. Thus the concept of natural regeneration of forests through people's participation adopted in the Siwaliks has resulted in the increase in output of fodder grass and fibre grass productivity and sale of Forest Department's fodder and fibre grass leases directly to the communities by abolishing the middle men which helped in checking siltation in Sukhna Lake and reduce soil erosion.

PLACES OF INTEREST

The Ambala district comprises a region which as a cradle of a great civilisation and culture has a glorious past. Located in the region, is the valley of the Rigvedic Sarasvati which was, in times gone by, a hub of great activity. The district abounds in many places, the antiquity of which has been established by archaeological explorations and excavations. Some other more recent places have acquired importance on account of their economic and industrial development. Still others have been developed as tourist spots like Morni hills and Pinjore complex.

The following paras describe the important places of interest in the district.

Ambala

The town has the headquarters of the district, is also known as Ambala City to differentiate it from Ambala Cantonment. It is a railway station on the Delhi-Ludhiana railway line adjacent to Ambala Cantonment.

The town is said to have been founded during the 14th century by one Amba Rajput, from whom it derives its name. Another version assigns the name of the town to Bhawani Amba whose temple; the date of which is not known, exists in the town. Third version, however, is that the name is distortion from Ambwala or the mango village, judging from the number of the mango groves that existed at one time in its immediate neighbourhood.*

There are three historical gurdwaras, namely Badshahi Bagh Gurdwara, Sis Ganj Gurdwara and Manji Sahib Gurdwara. The first is associated with Guru Gobind Singh, the second with Guru Teg Bahadur and the third with Guru Hargovind. Annual celebrations are held and offerings in the form of pankhas (fans) are made at the famous Muslim shrines of Lakhi Shah (Tej-ud-Din Chisti) and Tawaqul Shah. A temple of Bhawani Amba is located in the town and is visited by a large number of devotees.

In 1968, a stagnating water tank near bus stand was transformed into a lake. A park was developed on the outskirts of the lake. In addition to boating arrangements in the lake, a light house and coloured fountains also provide splendid picturesque to the park.

Ambala Cantonment

Ambala Cantonment lies in the south-east of the Ambala City. It is an important railway junction where Delhi-Kalka and Saharanpur-Ludhiana railway lines intersect. The Grand Trunk Road, a national highway, also passes through the town.

This cantonment was established in 1843. It is said that after the abandonment of Karnal Cantonment in 1841 on account of the prevalence of malaria, the troops were marching to a place near Sirhind which had been selected as a possible site for the new cantonment. After halt of two days, it was decided to turn the scales in favour of a cantonment at Ambala.

The town has progressed well as a consequence of industrial units having been established in it. The place has assumed importance as the centre for the manufacture of scientific and surgical instruments and as an important railway junction.

---

* Source : Haryana District Gazetteer–Ambala, 1984

Kalka

Kalka, headquarters of the tahsil of the same name, lies on the Ambala-Simla national highway. It is the terminus of the broad gauge Delhi-Kalka railway line and the starting point of narrow gauge Kalka-Simla railway line (opened in 1903). It forms the gateway of Himachal Pradesh and most of the traffic and trade between the hills and the plains passes through it.

The area now forming Kalka was part of erstwhile princely state of Patiala but was acquired by the British in 1846 and was included in Simla district. It was transferred to Ambala district in 1899. A famous Kalka Devi temple is located on the Kalka-Simla road near octroi post. A fair is held every year in March-April.

Mansa Devi Temple (Panchkula tahsil)

The shrine of Mansa Devi lies in Bilaspur village, about three kilometres east of Manimajra (Chandigarh U.T.). There are two temples dedicated to the goddess here. The older one is said to have been built by the ruler of Manimajra (c.A.D. 1815). The legend is that originally the shrine was in the territory of erstwhile princely state of Nahan and the stream which supplied water to the pilgrims visiting the temple, was cut off by some hill people causing great distress to the pilgrims. Thereupon the goddess appeared in dream of Gurbaksh Singh, ruler of Manimajra and asked him to construct a temple for her at this place. This temple contains thirty-eight panels of wall paintings besides floral designs painted all over the ceiling and the arches leading into the temple. The drawings of the temple are not of high standard but a great variety of themes is illustrated. The other temple is said to have been constructed by Maharaja Karam Singh of erstwhile Patiala State (C.A.D. 1861) to commemorate his success in the battle against the Gurkhas.

The fairs are held twice a year in March-April (chet sudi ashthmi) and September-October (asoj sudi ashthmi).

Morni Hills (Bhoj Jabial-Panchkula tahsil)

The Morni hills are offshoots of Siwalik ranges which run in two parallel ranges. The village of Morni (Bhoj Jabial) lies on the mountain side, at 1,220 metres above mean sea level. Tradition assigns the name of Morni to a queen who is believed to have ruled this area.

Among the spurs of hills, lie two lakes, the larger is about 550 metres long and 460 metres broad and the other about 365 metres either way. A hill divides the two lakes but there is some hidden channel as the level of the two lakes remains the same. The people look upon the lakes as sacred. There is an old fort which is now in ruins. The hills are covered by pine trees. The climate is salubrious and the area is suitable for trekking. The Haryana Government has developed this hill resort and provide facilities to tourists. A motorable road was constructed to connect the Morni hills with Haryana State highway near Panchkula. A forest tourist hut 'Lal Munia' and a P.W.D. rest house were also constructed to accommodate tourists and trekkers.

Naraingarh

Headquarters of the tahsil and sub-division of the same name, it is located 38 kilometres from Ambala to its north-east.

The town derives its name from its founder, Raja Lakshmi Narain of Sirmaur (Himachal Pradesh) who on the decline of the Mughal empire, built a fort at Kulsan; and called it after himself, Naraingarh. The fort now houses tahsil offices and police station.

Panchkula Urban Estate

The new urban estate of Panchkula is broadly enclosed by Ambala-Kalka national highway, Ambala-Kalka railway line and Chandigarh-Panchkula road. It is developed on the outskirts of Chandigarh, amongst the picturesque background of the Siwalik hills and the Ghaggar river.

The township has the headquarters of tahsil and Sub-Division and has been sub-divided into residential sectors, industrial sectors, parks and areas for regional recreation, major institutions, whole-sale markets and government and semi-government offices. An ancillary industrial estate of HMT with built-up sheds has been established. Bharat Electronics Limited (A Government of India Enterprise) was set up on approximately 23 hectares of land in the industrial area of Panchkula Urban Estate. Construction work was commenced in 1984 and the main production and service buildings were occupied in 1987. At present it has a total strength of 673 employees and is mainly manufacturing communication equipments. The entire area lying between Ambala-Kalka national highway and the Ghaggar river has been earmarked for regional recreation. This area will have a golf course, a deer park, a zoological garden, an exhibition ground and a children's park etc. A beautifully designed youth hostel to provide cheap and comfortable accommodation for young tourists is situated on the bank of the Ghaggar. Very popular with the people of Chandigarh and with those travelling to Himachal Pradesh, 'Red Bishop' a bar and a restaurant is a comfortable stopover. A Jainendra Gurukul was established there in 1929 which is now running as a high school.

Panchkula, a rapidly growing town of Haryana, adjoining Chandigarh, has a number of voluntary welfare associations. To name a few, prominent among them are Panchkula Residents Welfare Federation (Registered) which came into existence on 3rd July, 1989. At present, the Federation has affliation of 13 associations representing 11 different sectors of the Panchkula Urban Estate. The Federation has successfully taken up various matters with the appropriate authorities for the welfare of the residents of Panchkula. Panchkula Consumers Forum is another important organisation which is doing excellent job in getting the genuine complaints of consumers removed and generating a feeling that a consumer should get the real worth of what he spends for. Senior Citizens Council Panchkula was launched in 1989 who worked hard in bringing out a scheme for establishing a 'Day Care Centre for the Aged' and got a grant-in-aid amounting to Rs. 27,900 (a quarter) against the approved expenditure of Rs. 31,000 (10 per cent of which is borne by the Council) on 27th March, 1991 and the 'Day Care Centre for the Aged' started functioning in a rented house. SOS Children's Village Association (Bal Niketan) housed in Sector 2, Panchkula is doing a wonderful job for the care and protection of destitute children. SOS Children's Village Association known as Bal Niketan, Panchkula is a voluntary organisation founded in 1978 by a group of devoted retired officers and eminent citizens to render complete assistance for rehabilitation of destitute children as normal respectable members of our society

Pinjore

It is an ancient historical and religious place. It is said to be the earliest habitation of man and it is said that the early man lived in Pinjore region round about Chandigarh, one and half crores years ago. Tools of lower Palaeolithic period, fabricated on quartzite, have been found from the region stretching from Pinjore to Nalagarh. The place is associated with five Pandavas who en route to Himalayas during their exile stayed here for sometime. The place was then known as Panchpura later corrupted to Pinjore. The name Panchpura was deciphered from the Pinjore Baoli inscription found from here. Important sculptures and other antiquarian remains recovered from the place can be assigned to the period ranging between 9th century A.D. to 12th century A.D. Pinjore is famous for the beautiful Mughal Garden, perhaps the loveliest and the oldest in northern India. It is said to have been made by Fidai Khan in the 17th century. The Haryana Government, of late, have recreated the whole complex by adding coloured illuminations to the play of fountain water, providing rest places, picniking facilities and a mini zoo. It has also been renamed as Yadavindra Garden as a mark of respect to the late Yadavindra Singh Maharaja of the erstwhile princely State of Patiala. The main gate of the garden opens on the highest terrace and seven terraces descend gradually into the distant boundary of the garden. In the middle of the first terrace is the Shish Mahal in the Rajasthani-Mughal style with small windows and apertures. There is a lyrical Hawa Mahal, approached by steps on the side of the wall. The second terrace is uplifted by large arched doorways, above which there is the Rang Mahal. Cleverly devised by the architect, the view of lower terraces is from the open hall way below. The palace has an enormous open courtyard. We descend, by concealed steps on both sides of the big house, to the third terrace where the cypresses and flower bed lead down to dense groves of fruit trees on each layer. The density of the dark green foliage evokes brooding depths. The upward flow of water from the fountains cools the eyes. There is a cube-like Jal Mahal, with a square fountain bed and a plinth to sit down on for pleasure. The next terrace is flanked by denser groves of trees, lightened by the water devices in the middle. The end structure of the door way has recently been made into a disc-like open air theatre. The stiff outer wall of the garden is reminiscent of the fort walls, which has now all around miniature pavilions housing the zoo. A Bhima Devi temple and an old baoli in the town have legendary connection with Pandavas. The place became more prominent with the establishment of HMT factory in 1963 near the garden which has an independent municipal committee known as H.M.T. Pinjore.

ANALYSIS OF DATA

Introduction of inset tables in the District Census Handbook is a gainful feature of 1991 Census which is aimed at catering to the needs of planners, data users and public at large in a brief and convincing way which will facilitate the analysis of Census data. Each such table conveys a reasonable picture of different characteristics of the district. The following inset tables included in this volume are based on the data compiled from Village and Town Directory and Primary Census Abstract.

Table 1 below gives the rural population of each C.D. Block in the district with sexwise break up and also the total number of villages and inhabited villages in each C.D. Block as per 1991 Census. In Ambala district, there are 752 villages, out of which 711 are inhabited containing

a rural population of 719,884. Among the C.D. Blocks, Barara claims the highest population residing in 137 inhabited villages, which is closely followed by Ambala in which 175 inhabited villages fall. It reflects that villages of Barara C.D. Block are more populous. Sadaura C.D. Block, of which major portion falls in Yamunanagar district, has only 3 villages of Ambala district, claiming a population of 2,963.

TABLE 1

Population and number of villages, 1991

Sr. No.	Name of C.D. Block	Population of villages			No. of villages	
		Persons	Males	Females	Total	Inhabited
1	2	3	4	5	6	7
1.	Pinjore	95,009	52,033	42,976	127	122
2.	Morni	16,487	8,834	7,653	15	15
3.	Barwala	48,284	26,494	21,790	56	51
4.	Raipur Rani	82,631	44,472	38,159	85	82
5.	Naraingarh	110,004	58,210	51,794	130	126
6.	Ambala	181,891	97,414	84,477	183	175
7.	Barara	182,615	96,933	85,682	139	137
8.	Sadaura (Part)	2,963	1,566	1,397	3	3
District		719,884	385,956	333,928	738*	711

* Excludes 12 villages wholly merged in towns and 2 villages treated as census towns.

Table 2 below provides population of each of the urban centres of the district with sexwise break up where towns have been arranged in their alphabetical order. The highest population has been recorded in Ambala M.C. whereas the Pinjore (Rural) which is a Census Town is least populated. Pinjore (Rural) has been treated as an urban area for the first time in 1991 Census. Ambala Cantonment is the only town in the district as well as in the State where females outnumbered males.

TABLE 2

Population and number of towns, 1991

Sr. No.	Name and civic administration status of town	Population		
		Persons	Males	Females
1	2	3	4	5
1.	Ambala (M.C.)	119,338	61,852	57,486
2.	Ambala Cantt. (C.B.)	49,017	23,483	25,534
3.	Ambala Sadar (M.C.)	90,872	47,309	43,563

TABLE 2--concld.

Population and number of towns, 1991

Sr. No.	Name and civic administration status of town	Population		
		Persons	Males	Females
1	2	3	4	5
4.	Babiyal (C.T.)	12,750	6,674	6,076
5.	H.M.T. Pinjore (M.C.)	5,516	2,910	2,606
6.	Kalka (M.C.)	27,281	14,794	12,487
7.	Naraingarh (M.C.)	13,832	7,224	6,608
8.	Panchkula Urban Estate (E.O.)	70,375	38,074	32,301
9.	Pinjore (Rural) (C.T.)	8,013	4,262	3,751
District		396,994	206,582	190,412

Table 3 below presents information about the new towns and towns declassified/merged in 1991 Census. Pinjore (Rural) is a new town which has been added in 1991 Census as a Census Town. There is no town in the district which has been declassified or merged in 1991 Census.

TABLE 3

New towns/towns declassified merged in 1991 Census

Name of town	Population (1991 Census)
1	2
(a) **Added**	Population (1991 Census)
(i) Pinjore (Rural) (C.T.)	8,013
(b) **Declassified**

(c) **Wholly merged with other**	
Nil	

Table 4 below shows the distribution of population by residence and decadal change and also presents percentage of urban population to total population. Among the five tahsils of the district, Ambala is the most populous tahsil with 519,330 persons where the proportion of urban population in the tahsil is 52.37 per cent which is again, the highest. Kalka tahsil with 105,562 persons is least populated. Barara tahsil does not contain any urban area and hence entirely rural. Naraingarh tahsil contains only one town of Naraingarh where 6.60 per cent of its total population resides.

TABLE 4
Decadal change in distribution of population

Tahsil	Population						Percentage decadal (1981-91) variation			Percentage of of urban population	
	1981			1991							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urabn	1981	1991
1	2	3	4	5	6	7	8	9	10	11	12
1. Kalka	77,448	50,343	27,105	105,562	64,752	40,810	36.30	28.62	50.56	35.01	38.66

3. Naraingarh	166,933	157,563	9,370	209,430	195,598	13,832	25.46	24.14	47.62	5.61	6.60
4. Ambala	427,179	194,069	233,110	519,330	247,353	271,977	21.57	27.46	16.67	54.57	52.37
5. Barara	96,929	96,929	--	117,153	117,153	--	20.86	20.86	--	--	--
District	856,324	575,500	280,824	1,116,878	719,884	396,994	30.43	25.09	41.37	32.79	35.54

Table 5 below shows the distribution of villages according to the size of population in each C.D. Block and the district as a whole. Figures given in the parenthesis indicate percentage of villages in each population range. It reflects 58.51 per cent of the total villages in the district are medium sized having population in the range of 500--1999 which is closely followed by 21.38 per cent villages in the range of 200—499. There is only 1 village belonging to Barara C.D. Block whose population is more than 10,000 in the entire district. There are 6 villages in the district whose individual population ranges between 5000 and 9999, of which, 3 villages are of Barara C.D. Block, 2 villages of Raipur Rani C.D. Block and 1 village of Barwala C.D. Block.

TABLE 5
Percentage distribution of villages by population ranges, 1991

C.D. Block	No. and percentage of inhabited villages	No. and percentage of villages in each range (Figures in parenthesis indicate percentage of villages in each range)					
		less than 200	200—499	500—1999	2000—4999	5000—9999	10,000 and above
1	2	3	4	5	6	7	8
Pinjore	122(17.16)	24(19.67)	36(29.51)	51(41.80)	11 (9.02)	--	--
Morni	15 (2.11)	--	5(33.33)	8(53.34)	2(13.33)	--	--
Barwala	51 (7.17)	10(19.61)	7(13.73)	28(54.90)	5 (9.80)	1(1.96)	--
Raipur Rani	82(11.53)	6 (7.32)	21(25.61)	46(56.10)	7 (8.53)	2(2.44)	--
Naraingarh	126(17.72)	10 (7.94)	32(25.40)	75(59.52)	9 (7.14)	--	--
Ambala	175(24.62)	12 (6.86)	31(17.71)	116(66.29)	16 (9.14)	--	--
Barara	137(19.27)	6 (4.38)	19(13.87)	90(65.69)	18(13.14)	3(2.19)	1(0.73)
Sadaura (Part)	3 (0.42)	--	1(33.33)	2(66.67)	--	--	--
District	711(100.00)	68 (9.56)	152(21.38)	416(58.51)	68 (9.57)	6(0.34)	1(0.14)

Table 6 below gives the distribution of villages by density. Density reflects land/population ratio of the area. There are 271 villages accounting for 38.12 per cent of the total inhabited villages of the district which fall in the density range of 301--500 persons per square kilometre. The density range of 201--300 claims 24.75 per cent of the villages, followed by the density range of 501+ containing 20.53 per cent of villages. In the density ranges of 11--20 and 10 and below, the percentage of inhabited villages is less than 1 per cent in each range.

TABLE 6

Distribution of villages by density

Range of density (per sq. km)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	4	0.56
11—20	4	0.56
21—50	10	1.41
51—100	25	3.52
101—200	75	10.55
201—300	176	24.75
300—500	271	38.12
501+	146	20.53
Total	711	100.00

Table 7 below depicts the sex ratio for rural population in each of the C.D. Blocks in the district. Sex ratio in India conveys the number of females per 1000 males. The sex ratio is 865 for Haryana whereas it is 885 for the district. In the rural areas of the district, the sex ratio is 865. Among the C.D. Blocks, it is the highest (892) in Sadaura C.D. Block (Part) and the lowest (822) in Barwala C.D. Block.

TABLE 7

Sex ratio for rural population of C.D. Blocks, 1991

S. No.	Name of C.D. Block	Number of females per 1,000 males
1	2	3
1.	Pinjore	826

District		865

Table 8 below represents the sex ratio in urban areas of the district. The urban sex ratio for the district as a whole is 922. It is 1087 in Ambala Cantonment which is the highest in the district as well as in the state. The lowest sex ratio (844) has been found in Kalka town. High sex ratio in urban areas suggests the male selective out migration for better job opportunities which are available outside. Very high sex ratio in Ambala Cantonment may be attributed to family inmigration and male selective outmigration.

Table 9 below depicts the proportion of scheduled caste population to total population in the villages. The proportion of scheduled caste population to total population is more than 30 per cent in 278 villages

accounting for 39.10 per cent of the total inhabited villages in the district. The percentage of scheduled caste population ranges from 21—30 per cent in 18.85 per cent of the villages while the proportion ranges from 0—5 per cent in 118 villages claiming 16.60 per cent of the inhabited villages. The lowest proportion (7.31 per cent) of villages fall in the percentage range of 6--10 of scheduled caste population to total population.

TABLE 9

Table 11 below gives the percentage of scheduled caste population to total population in each town of the district. The proportion of scheduled

caste population is the highest (27.06 per cent) in Naraingarh town whereas it is the lowest (6.91 per cent) in Panchkula Urban Estate. Numerically, the maximum population of scheduled castes (13,563) has been found in Ambala Sadar and the minimum number of scheduled castes (606) has been recorded in H.M.T. Pinjore.

Table 12 below presents the literacy rates for rural population in each C.D. Block for males and females separately, excluding children in the age group 0—6. The general literacy rate for the State as a whole is 55.85 per cent whereas it is 66.41 per cent for the district. Even the rural literacy rate (58.03 per cent) of the district is higher than the total literacy rate of the State. The rural literacy rate of the district for males is 68.79 per cent and 45.52 per cent for females. As expected male literacy rate is comparatively higher than the female literacy rate in all the C.D. Blocks. Among the C.D. Blocks, the literacy rate is the highest in Barara and the lowest in Morni for both males and females.

TABLE 12

District		58.03	68.79	45.52

Table 13 below provides literacy rate for all the towns in the district, excluding children in the age group 0—6. The urban literacy rate for the district as a whole is 81.28 per cent and it is 86.62 per cent for males and 75.52 per cent for females. Among the various towns of the district the literacy rate is the highest in H.M.T. Pinjore (89.62 per cent) and the lowest in Babiyal Census Town (74.81 per cent). As expected, literacy rates are relatively higher in urban areas and among the males.

Table 14 below depicts the percentage of main workers, marginal workers and non-workers for rural population in each C.D. Block of the district. The percentage of rural main workers to rural population is the highest (31.16) in Barwala C.D. Block and the lowest (27.78) in Barara C.D. Block. The proportion of rural male main workers to rural male population is again the highest (55.32 per cent) in Barwala C.D. Block and the lowest (50.29 per cent) in Barara C.D. Block. The percentage of rural female main workers to rural female population is the highest (4.84) in Pinjore C.D. Block and the lowest (1.32) in Naraingarh C.D. Block.

Table 15 below gives the percentage of main workers, marginal workers and non-workers in each town of the district. In urban areas of the district as a whole, 28.07 per cent of the total population has been recorded as main workers, 0.14 per cent as marginal workers and 71.79 per cent as non-workers. Among the towns, the proportion of main workers to total population is the highest (32.80 per cent) in Panchkula Urban Estate and the lowest (19.66 per cent) in Ambala Cantonment.

Table 16 below presents the distribution of inhabited villages according to the availability of different amenities. Among the inhabited villages, drinking water and power supply are available in all the villages. Approach to villages by pucca roads has been recorded in 96.77 per cent of the inhabited villages and 72.15 per cent of the villages have communication facilities. For the purposes of communications only public transport, like bus, rail and waterway has been considered. Amenities like education, medical and post & telegraph are available in 81.43 per cent, 33.05 per cent and 28.83 per cent of the inhabited villages respectively.

Table 17 below gives the proportion of rural population served by different amenities. Drinking water and power supply are available to the entire rural population. Overwhelming majority of the population residing in villages is approachable by pucca road (98.02 per cent), served by educational facilities (93.48 per cent), and communications (81.70 per cent). Medical facilities are available to 56.99 per cent of the rural population whereas 52.09 per cent of the population enjoys post and telegraph facilities.

Table 18 below presents the distribution of villages not having certain amenities, according to the distance ranges from the place where these are available. Post and Telegraph facility is not available to 506 villages out of 711 inhabited villages in the district. Out of 506 such villages, it is available to 416 villages within a distance of 5 kilometres, to 85 villages within 5--10 kilometres and to 5 villages beyond 10 kilometres. Similarly, out of 476 such villages, medical facility is available to 373 villages within a distance of 5 kilometres, to 86 villages within 5--10 kilometres and to 17 villages beyond 10 kilometres. It explains the pattern that in case various amenities are not available within the village limits, majority of the villages get these amenities within a distance of 5 kilometres.

TABLE 18

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at distance of			
	-5 kms	5—10 kms	10+ kms	Total (cols. 2—4)

Table 20 below depitcs the distribution of inhabited villages according to population range and amenities available. It reflects that the proportion of amenities increases with the increase in the size of population of the villages. In other words, the larger population sized villages relatively have more noted amenities. There are seven villages having population 5000 and more where all the noted amenities are available.

TABLE 20

Total	711	579 (81.43)	235 (33.05)	711(100.00)	205 (28.83)	—	513 (72.15)	688 (96.77)	711(100.00)

Table 21 below gives the distribution of inhabited villages according to land use. The percentage of cultivable area to total area is the highest (87.08) in Sadaura C.D. Block (Part) which contains only 3 villages of Ambala district while the percentage is lowest (49.17) in Pinjore C.D. block which has undulating topography. The proportion of cultivable area to total area in the district is 74.81 per cent. The percentage of irrigated area to total cultivable area is 60.14 per cent in the district. It is the highest in Sadaura C.D. Block (Part) (75.23 per cent) and the lowest (10.36 per cent) in Morni C.D. Block which contains hilly topography.

TABLE 21

Distribution of villages according to land use

C.D. Block	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5
1. Pinjore	122	18,770.21	49.17	22.24
2. Morni	15	3,741.28	77.99	10.36
3. Barwala	51	17,010.66	60.92	43.42
4. Raipur Rani	82	26,011.82	71.12	38.71
5. Naraingarh	126	33,164.32	75.47	68.75
6. Ambala	175	48,486.89	82.23	73.60
7. Barara	137	48,362.07	83.30	67.67
8. Sadaura (Part)	3	773.00	87.08	75.23
District	711	1,96,320.25	74.81	60.14

Cultivable area = Irrigated + unirrigated area

Table 22 below depicts the per capita receipt and expenditure in the case of each town of the district. Per capita receipt and expenditure are the highest in Ambala Sadar and the lowest in H.M.T. Pinjore. It also gives some impression about the economic health of the towns.

TABLE 22

Per capita receipt and expenditure in towns

Class, name & civic status of the town		Per capita								
		Receipt			Expenditure					
		Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
	1	2	3	4	5	6	7	8	9	10
I	Ambala(M.C.)	159.93	89.56	70.37	159.44	35.87	105.52	7.90	0.57	9.58

V	Pinjore (Rural)(C.T.)	14.44	0.20	14.24	13.35	..	..	0.15	..	13.20
	Total	204.57	111.92	92.65	179.49	53.15	65.23	29.31	3.51	28.29

Notes : (1) '..' denotes 'Nil'.

Table 23 below shows the number of schools per 10,000 population in each town of the district. In the urban areas of the district as a whole, we find 1 higher secondary, 2 secondary/matriculation, 2 middle and 3 primary schools per 10,000 population. The proportion of various levels of schools are relatively high in Pinjore (Rural) and H.M.T. Pinjore and low in Naraingarh town.

TABLE 23

Schools per 10,000 population in towns

Class, name and civic status of town		No. per 10,000 population			
		Higher Secondary/ Inter/PUC/Junior College	Secondary Matricula-tion	Junior Secondary/ Middle	Primary
	1	2	3	4	5
I	Ambala (M.C.)	1	2	2	3
III	Ambala Cantt. (C.B.)	1	1	1	3
II	Ambala Sadar (M.C.)	N	2	2	1
IV	Babiyal (C.T.)	..	2	2	3
V	H.M.T. Pinjore (M.C.)	2	4	4	5
III	Kalka (M.C.)	1	2	2	4
IV	Naraingarh (M.C.)	1	1	1	1
II	Panchkula Urban Estate (E.O.)	1	1	2	3
V	Pinjore (Rural) (C.T.)	1	6	6	6
	Total	1	2	2	3

Notes : (1) '..' denotes 'Nil'.

(2) 'N' denotes 'Negligible'.

Table 24 below shows the number of beds in medical institutions per 1,000 population in each town of the district. In the district as a whole, the number of beds in medical institutions per 1,000 population comes to 2 whereas it is the highest (4) in Naraingarh town and the lowest (nil) in Babiyal Census Town. It also explains the degree of adequacy of the provision of beds in medical institutions in relation to its ever growing population.

TABLE 24

No. of beds in medical institutions in towns

Class, name and civic status of the town		No. of beds in medical institutions per 1,000 population
	1	2
I	Ambala (M.C.)	3
III	Ambala Cantt. (M.C.)	N

III	Kalka (M.C.)	2
IV	Naraingarh (M.C.)	4
II	Panchkula Urban Estate (E.O.)	N
V	Pinjore (Rural) (C.T.)	1
	Total	2

Notes : (1) '..' denotes 'Nil'.

(2) 'N' denotes 'Negligible'

Table 25 below gives the proportion of slums population to total population and density of population per square kilometre in slums in all the class I and class II towns of the district. There are three such towns (Ambala M.C.-class I, Ambala Sadar M.C. and Panchkula Urban Estate-both class II towns) and the proportion of slums population to total population is the highest (18.33 per cent) in Panchkula Urban Estate where the growth of population during 1981--91 is the highest in Haryana.

TABLE 25

Proportion of slums population in towns

	Class, name and civic status of the town*	Proportion of the slums population to total population of the town	Density in slums (per sq. km)
1		2	3
I	Ambala (M.C.)	9.82	N.A.
II	Ambala Sadar (M.C.)	8.34	36,438
II	Panchkula Urban Estate (E.O.)	18.33	45,745
	Total	11.48	65,712**

Notes : N.A. means not available.

*For Class I and Class II towns only.

**It excludes the data of Ambala (M.C.) as area under slums is not available.

Table 26 below provides the most important commodity manufactured, imported and exported in the case of each town of the district. It explains the industrial/occupational character of the towns. Towns of Ambala region are prominent centres for manufacturing scientific goods and *durries;* H.M.T. Pinjore and Panchkula Urban Estate for tractors and tractor parts respectively; Kalka for baskets; Pinjore (Rural) Census town for stoneware and Naraingarh town for mustard seed oil.

TABLE 26

Most important commodity manufactured, imported and exported in towns

Class, name and civic status of the town		Most important commodity		
		Manufactured	Exported	Imported
1		2	3	4
I	Ambala (M.C.)	Durries	Cloth	Cotton
III	Ambala Cantt. (C.B.)	Scientific goods	Wheat flour	Wheat
II	Ambala Sadar (M.C.)	Scientific goods	Scientific goods	Petroleum and crude oil
IV	Babiyal (C.T.)	Science apparatus	Science apparatus	Building material
V	H.M.T. Pinjore (M.C.)	Tractors	Milling machines	Steel
III	Kalka (M.C.)	Pathrotti baskets	Pathrotti baskets and bamboo baskets	Television, radio sets and parts
IV	Naraingarh (M.C.)	Mustard seed oil	Fruit	Cloth
II	Panchkula Urban Estate (E.O.)	Tractor parts (H.M.T.)	HUDA nursery plants	Cement
V	Pinjore (Rural) (C.T.)	Stone-ware	Stone-ware	Cement

PR,KR	Naraingarh (8)	EA	..	T(308.37),TW(25.09),TWE(283.28)	145.68	12.08	40.87
			..	**T(506.44),TW(42.09),TWE(464.35)**	**166.71**	**35.51**	**64.34**

2. In case, a portion of a revenue estate (village) has merged in the town or treated as outgrowth of a town, only the rural area has been given against that village and a word 'Part' has been added after the village name.

3. The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

4. Where a town and a village bear an identical name, the word 'rural' has been added after the name of the village.

5. In Morni C.D. Block (Panchkula tahsil) 21315.28 hectares of unmeasured hilly area falling under 14 Bhojs has not been accounted for in any of the villages.

6. †Although entered as 'Be-chirag' (un-inhabited) in the revenue record, the population shown against this village was enumerated at the time of 1991 Census.

7. *Major portion of Sadaura C.D. Block falls in Yamunanagar district.

†Total area figures for the district represent "geographical area" figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local bodies. Area figures for the rural area are derived by subtracting the urban area from the total area of the district. The total of area figures of C.D. block in a district will not tally with the district figures because the former are derived from the villagewise area figures supplied by the tahsildars.

@ It includes 213.15 km^2 of unmeasured hilly area falling under 14 Bhojs and has not been counted for in any of the villages of Morni C.D. Block.

‡ Falls in Yamunanagar district.

2. In case, a portion of a revenue estate (village) has merged in the town or treated as outgrowth of a town, only the rural area has been given against that village and a word 'Part' has been added after the village name.

3. The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

4. Where a town and a village bear an identical name, the word 'rural' has been added after the name of the village.

5. In Morni C.D. Block (Panchkula tahsil) 21315.28 hectares of unmeasured hilly area falling under 14 Bhojs has not been accounted for in any of the villages.

6. † Although entered as 'Be-Chirag' (un-inhabited) in the revenue record, the population shown against this village was enumerated at the time of 1991 Census.

7. *Major portion of Sadaura C.D. Block falls in Yamunanagar district.

1. †Total area figures for the district represent 'geographical area' figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local bodies. Area figures for the rural areas are derived by subtracting the urban area from the total area of the district. The total area figures of tahsil in a district will not tally with the district figures because the former are derived from the villagewise area figures supplied by the tahsildars.

2. It includes 213.15 Km² of unmeasured hilly area falling under 14 Bhojs and has not been counted for in any of the villages of Panchkula tahsil.

3. Tahsils treated as such for the first time in 1991 Census are underlined.
