FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Town wise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar* Notes and Town Directory forms (for Village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as Charge superintendents under the supervision of the District Census Officers and the Subdivisonal Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the District'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and Village/Urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the district during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and whole-hearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my Office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Asstt. Director was ably assisted by his team of Statistical Asstts., Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Dy. Directors and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha, Asstt. Director,

Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. S/ Shri A. L. Das, G. C. Mishra, Asstt. Directors and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH Section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad, Stenographer and Shri Ashraful Hoda, L.D.C. who have done the typing work also deserve thanks.

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Sant Mudranalya, Patna who have undertaken the work of printing of this volume and accomplished the same with promptness.

Patna :
the 28th June,

B. B. LAL
Director of Census Operations, Bihar

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The district of Muzaffarpur forms part of the North Bihar plains and is located centrally in Tirhut Division. The old Muzaffarpur district was created in 1875 for the sake of administrative convenience by splitting up the earlier district of Tirhut. It was named after its principal city, Muzaffarpur, founded in the 18th century by Muzaffar Khan, an *amil* (revenue farmer). After formation of Sitamarhi and Vaishali districts (which earlier were subdivisions of Muzaffarpur district) in the year 1972 as a result of reorganisation of districts in the State, Muzaffarpur district now has two subdivisions, viz., Muzaffarpur East and Muzaffarpur West consisting of 8 and 6 development blocks respectively.

The district is bounded on the north by Purba Champaran and Sitamarhi districts, on the south by the district of Vaishali, on the east by the districts of Darbhanga and Samastipur (part) and on the west by Saran and part of Gopalganj districts. The headquarters of both the subdivisions are located in Muzaffarpur town which is the principal city and also the headquarters of the district.

The name of the district, as stated earlier, has been derived after its principal city, Muzaffarpur. The earlier part of the history of the district as described in the 1961 District Census Handbook mentions that little is known about the original inhabitants of this ancient land of North Bihar. Glimpses of its early history can, however, be had from the accounts and legends preserved in the Vedic literature. According to an account, the Videhas of Aryan stock, accompanied by *Agni*, the God of fire, marched eastwards from the banks of the river Saraswati. On reaching the banks of the Gandak they were told by *Agni* to settle to the east of that river, which they did. They cleared the marshes and took up cultivation. They also founded a powerful kingdom which later came to be ruled by the great king Janak, whose daughter Sita was married to Lord Rama. The kingdom of Janak, known as Mithila, was the most progressive of the contemporary kingdoms. The court of the king of Mithila was a great centre of learning to which scholars from different parts of the country were drawn. Yajnavalkya, the famous sage who undertook the revision of *Yajurveda*, was the chief priest of king Janak.

The recorded history of the district dates back to the rise of the Vrijjian Republic which replaced the Videhan monarchy. The centre of power also shifted from Mithila to Vaishali, the capital of the Republic, which is identified with the modern Basarh in Hajipur Subdivision. The Vrijjian Republic was a confederation of eight clans, of which the Lichchhavis were the most important. They gradually gained strength and came in conflict with the powerful kingdom of Magadh. Bimbisar (Circa 519 B. C.), the founder of Magadh imperialism, had secured his position by concluding matrimonial alliances with the neighbouring Estates of the Kosalas and the Lichchhavis. But after he was assassinated by his son Ajatshatru, Vaishali was invaded and Ajatshatru extended his sway over Tirhut. It was at this time that the foundation of Patliputra (the modern Patna) was laid at the village Patali on the banks of the river Ganga. Ajatshatru built a fortress here to keep watch over the Lichchhavis on the other side of the river.

Medieval period

The District Census Handbook of 1961 further adds that there is a great dearth of material on the history of North Bihar from the visit of Hiuen Tsang till the rise of the Pala dynasty. During Hiuen Tsang's visit, Muzaffarpur was under the control of Harsha, a powerful sovereign of North India (606-647 A. D.). After his death, the district passed on to the local chiefs. In the 8th century A. D., Gopala, the first of the Pala kings, became the ruler of Bengal. He extended his authority over Bihar in about 750 A. D. The Palas continued to have their hold over Tirhut until 1019 A. D. when the Chedi kings (of Central India) established their sway. They were replaced towards the close of the 11th century by the rulers of the Sena dynasty. Mithila became the north-western province of their kingdom. Lakshman Sena was a powerful king of this dynasty. His reign is still commemorated in some parts of North Bihar by the use of the Lakshman Sena era, the first year of which corresponds to 1119-20 A. D. (probable year of the coronation of Lakshman Sena).

Muslim period

Ghias-ud-din Iwaz, the Governor of Bengal between 1211 and 1226, was the first Muslim invader in Tirhut. Hes ubdued the Raja of Tirhut and extorted tributes from him. Iwaz, however, could not succeed in conquering the kingdom. It was only in 1323 that Ghiyas-ud-din Tughlak succeeded in establishing his sway over the district.

The history of Muzaffarpur will not be completed without a reference to the Simraon dynasty which was founded by one Nana or a Nanyupa Deva about the time Ghias-ud-din Iwaz invaded Tirhut. Nana established himself at Simraon in the north-east part of Champaran and eventually succeeded in extending his power over the whole of Mithila and Nepal. It is said that one of his sons ruled over Nepal, while another, Ganga Deva, reigned over Mithila. He is considered to be the first to have constituted fiscal divisions for revenue administration in Bihar. His kingdom was split up into *Parganas* which in turn comprised of several *Panchayats*. While a *Choudhary* or headman was appointed to collect revenue from each *Pargana*, the *Panchayats* were elected to settle disputes. Narsimha Deva succeeded his father, Ganga Deva as the ruler of Mithila. He quarrelled with his kinsman, the ruler of Nepal, with the result that Mithila and Nepal were separated for ever. Ramasimha of this dynasty was an able administrator and a great patron of Vedic literature. During his period numerous commentaries on Vedas were compiled and a code of conduct was drawn for the guidance of the Hindus in their religious and social life. He is also credited with the introduction of the system of *Patwaris* or village accountants who were paid ten rupees per month from the village funds.

Harasimha Deva, grandson of Ramasimha Deva was the last king of the dynasty. It was during his regime that Tughlak Shah invaded Tirhut in 1323. He seized the fort of the king who fled away to Nepal. With the fight of Harasimha Deva the Muslim emperors of Delhi gained control over the territory. Tughlak Shah made Kameshwar Thakur incharge of Tirhut and thus was founded the Thakur dynasty which ruled over Tirhut till the early years of the 16th century. Though sovereignty had passed on to the Muslims, the Hindu chiefs enjoyed complete autonomy and their possessions remained undisturbed.

The whole of North Bihar appears to have passed on to the kings of Jaunpur towards the close of the 14th century. It remained under them for about a hundred years until Emperor Sikandar Lodi of Delhi defeated the king of Jaunpur and retrieved the territory. Meanwhile, the king of Bengal, Hussain Shah, had become quite powerful. He extended his power over large tracts in Bihar. Hence, after his victory over the king of Jaunpur, the Emperor advanced against Hussain Shah in 1499. Hussain Shah found it difficult to resist the imperial forces and offered to withdraw from Bihar, Tirhut and the *Sarkar* Saran, provided the Emperor agreed to desist from interfering with his possessions in Bengal. The terms were agreed to and a treaty was accordingly concluded at Barh. Having thus got control over Tirhut, Sikandar Lodi marched with his forces to establish his authority. He defeated the Raja of Tirhut who was let off after a handsome ransom was realised from him.

The treaty, however, could not last long. The kings of Bengal often raiding Tirhut in the early 16th

century made Alauddin, the Governor of Tirhut. The power of the kings of Bengal waning and, with the fall of Mahmood Shah, North Bihar became a part of the Mughal Empire. But though Muzaffarpur, and with it the entire North Bihar, had been annexed, the control was tenuous and petty chieftains continued to be powerful. The whole of North Bihar contained a large number of Afghan settlers whose numbers had increased owing to the immigration of those who had refused to serve the Mughals especially when Daud Khan became the king of Bengal. It was only after a fierce fight that the Mughals defeated Daud Khan, who had his strong hold at Patna and Hajipur. After the fall of the Afghan king, a separate *Subah* of Bihar was constituted and placed under a Mughal Governor. Tirhut formed part of this *Subah*.

English period

The victory of the English in 1764 in the battle of Buxar gave them control over the whole of Bihar. After establishing their authority the English took steps to strengthen their hold. In course of time they emerged as rulers and succeeded in subduing the entire district. But when they wanted to extend their authority over Nepal, the Gurkhas proved a hard nut to crack. They retaliated by seizing about 200 villages between 1787 and 1813. The English complained of raids from Nepal in 1815 also. All this led to the Nepal War which eventually ended with the establishment of peace with Nepal. There was no event of great consequence in the district after the conclusion of treaty with Nepal until the Movement of 1857.

The success of the insurgents at Delhi caused great concern to the English inhabitants in the district. The entire district and the Indian forces stationed in it were already indignant, and at an opportune moment the 12th Irregular Cavalry revolted, seized the mail and attacked the treasury, jail and administrative offices. But the arrival of Gurkha troops from Nepal enabled the English to crush India's first attempt to gain independence. Revolutionary fervour was, however, beginning to permeate the country. Muzaffarpur also played its role and was the site of the famous Bomb case of 1908. A bomb was thrown at the carriage of Pringle Kennedy, a leading member of the Muzaffarpur Bar. He was actually mistaken for Kingsford, the District Judge of Muzaffarpur. Kingsford had inflicted very deterrent punishment on young Bengali revolutionaries while he was the Chief Presidency Magistrate of Calcutta, and the bomb was actually meant for him. Khudi Ram Bose, a boy of barely 18 years, was hanged for throwing the bomb. After independence, a memorial to this young patriot was constructed at Muzaffarpur.

The political awakening in the country in the period after the First World War stimulated nationalist movement in the Muzaffarpur District also. The Congress gave a call for non-co-operation with the Government in all matters. The visit of Mahatma Gandhi to Muzaffarpur in December, 1920 and again in January, 1927 had immense effect in arousing the latent feelings of the people. There was encouraging response and numerous persons came forward to serve the cause of the nation under the inspiring leadership of the Mahatma. The district continued to play a prominent role in the country's struggle for freedom. On the 15th of August, 1947, when the country became independent, the occasion was celebrated with great enthusiasm at Muzaffarpur.

Natural divisions

The district of Muzaffarpur comprises an extensive plain formed by the alluvium brought by the Gandak, the Bagmati and other rivers which flow through it. The ground is not marked by any high contour and at many places there are chains of shallow marshes which serve the purpose of drainage for excessive water due to rainfall and overflow of the stream. The alluvial plain is a tract of great fertility. The soil of the district is largely alluvial. A special feature of the district is that due to continuous deposit of silt, many of its river-beds are higher than the adjoining areas. This leads to frequent floods during the rainy season particularly in north-east and south-west parts of the district.

The Gandak, Bagmati, Burhi Gandak and Baya are the important rivers besides a few streams. The

Gandak, which has its origin in the mountains of Nepal, enters the district near Karnaul in Sahebganj block and flows in the south-easterly direction. It is known as the Narayani and Saligram in the plains, while at its source it is known as *Sapt-Gandaki*. The river has vast irrigation and power potentialities and the Gandak project has been implemented for harnessing its resources. Like the Gandak, the Bagmati also has its origin in Nepal. It enters the district in Mirapur C. D. Block. It flows along a serpentine course almost parallel to the Burhi Gandak and finally joins it in the district of Darbhanga. The Burhi Gandak, which is known as the *Sikrahna* enters the district near the village Ghosaut in Mirapur block and Muzaffarpur lies on its southern bank. During the dry season the river is fordable at many places. During the rains, however its current is swift. The river is navigable during the greater part of the year. It had great importance before the introduction of the railways and was used as the main trade route. Even now, heavily loaded boats ply on it. River Baya emanates from the Gandak a little west of the Muzaffarpur district. It enters the district near Karnaul in Sahebganj block and flows in the south-easterly direction almost parallel to the parent river and ultimately joins the Ganga.

Climatic conditions

Muzaffarpur has a dry and healthy climate with three well marked seasons—the cold, the hot and the rainy. The cold weather begins in early November and lasts till March. January is the coldest month when the mercury sometimes drops to 4-5°C. Dust storms and westerly wind usher in the hot weather in early April. The temperature begin to rise and the maximum is attained in May. The heat is intense until the rains come sometime in the middle of June. The rainy season lasts till the end of September or the middle of October. With the close of rains the temperature falls and the climate becomes rather agreeable.

The normal rainfall of the district is approximately (1182mm). More than 75 per cent of the total annual rainfall is recorded during the monsoon period.

Flora and Fauna

The district is a vast alluvial plain watered by the rivers mentioned earlier. It is rich in vegetation and its green fields are dotted with groves of mango, bamboo and other trees. The land being fertile, no area has been left for wild growth and the entire district is devoid of any forest. In the marshy land between the Burhi Gandak and the Bagmati, *babul* trees are found. In the vast stretch of land beyond the Bagmati various food-crops and vegetable are grown.

With continuous extension of the area under cultivation, wild buffaloes, gazelle, deer and tiger have disappeared. The only wild animals sometimes seen in the district are the fox and the jackal besides the *nilgai* and the wild pig in the grassy *diaras*.

The district also abounds in fish, common among which are *sujja, lilsa, rewa, rohu, singhi, bachwa, tengra, kewai*. Poisonous snakes like *gehuman, karait, lohiar*, etc., are found in the district. Crocodiles are occasionally seen in the Gandak river.

Mines and Minerals

The entire district is formed of alluvial soil. *Kankar* is found in some parts of the district. It is actually limestone of inferior quality which finds use as road-metal. No mineral of any economic importance is found in the district.

Land-use pattern

The district is basically agricultural in character. The soil of the district is highly calcareous. Among the different kinds of the soil found here are sandy, loamy, light clayey and *usar*. Paddy is grown mostly on clayey soil which is known locally as *mahiwari*. Sandy loam, which is known as *balsundari*, is particularly suited for *rabi* cultivation. Rice is the main crop of the district. It accounts for the major portion of the gross area sown. Maize is the next important crop for the district. Wheat is also grown in some parts of the district. Sugar-cane, potato and barley are some of the non-cereal crops grown. The district is famous for mango and *lichi* which are exported to other parts of the State also.

Of the total area of the district, about 82 per cent area, is cultivable and the rest is of non-agricultural use. In the wake of the green revolution campaign, improved methods of cultivation has been introduced by adopting better agricultural implements, certified seeds and chemicals. Government has taken a number of measures to train the farmers and supply them the required seeds and fertilizers at village level itself. Financial assistance as well as loans to the needy farmers has also been made available through State Government agencies and Nationalised Banks including the Gramin Banks.

Irrigational facilities

Irrigation in Muzaffarpur involves watering of the fields on one hand and dewatering of the water-logged areas on the other. After independence considerable attention has been paid to both these problems in the district. A number of schemes have been executed or taken up in the district during the recent period for meeting the above problems. Besides, expansion of irrigational facilities in the district has been done through adoption of various Medium and Minor Irrigation Schemes, open borings, irrigation wells and tube-wells during different plan periods.

Fisheries

The district is encircled by rivers such as Burhi Gandak, Bagmati, Gandak, Lakhandei, Baya, etc. The total area covered by ponds and tanks under Government sector is approximately 220 hectares whereas under private sector its area is nearly 100 hectares. The Government sector *Jalkars* are settled with the Fishermen's Co-operative Societies functioning in every block of the district. Presently the Fisheries Department of the State Government is able to cater to only 25 per cent to 40 per cent of the total demand of the fish of the district.

Industrialisation

Muzaffarpur district is the centre of several industries, big and small. The Prabhat Zarda Factory, I. D. P. L., Bharat Wagon and Engineering Ltd., a unit of Leather Development Corporation, Muzaffarpur Dairy, a unit of the Bihar State Dairy Corporation are the major industries located in Muzaffarpur town and its periphery. The above industries have generated considerable employment and have also been helpful in establishing a number of small industries including a few cottage industries. Very good infrastructure is available in the neighbourhood of the town. The *pucca* roads which connect the State and National Highways are the significant achievements in the field of communication. The Thermal Power Plant coming up at Kanti, about 14 Kms. away from Muzaffarpur offers considerable scope for further industrialisation of the district which would enhance the employment potential.

Livestock

Livestock is very important in a district like Muzaffarpur with a predominantly agricultural economy. As per the cattle Census conducted in the year 1979, the number of different kinds of livestock in the district was as under—

Cows	...	105,497
Buffaloes	...	112,326
Bulls & Bullocks	...	176,048
Sheep	...	4,048
Goats	...	303,651
Pigs	...	3,022

In order to safeguard the livestock from various diseases and epidemics and also to improve the breed, the Animal Husbandry Department of the State Government has adopted some very useful and concrete measures. It has established veterinary hospitals, sub-centres, artificial insemination centres, poultry farms and village schemes all over the district covering majority of villages. Poultry development has received considerable attention in the community development blocks and the rapid increase in the number of fowls is largely attributable to these measures.

Communications

The district has well developed means of communication. It has a net work of railways and well maintained roads. Country boats also ply in the larger rivers.

All the 14 block headquarters are linked with the district headquarters, Muzaffarpur by *pucca* roads, while the National Highway passes through Sakra, Musahri, Kanti and Baruraj blocks. P. W. D. roads passes through the remaining blocks. Sakra, Kurhani, Kanti and Motipur blocks are linked with rail also. Village link roads have also improved during the last 10 years. A large number of schemes have been taken up by the Rural Engineering Organisation as also under the Hard Manual Labour Scheme and the Food For Work Programme. Train and buses are the main sources of communication. Almost all the roads are nationalised and the buses of Bihar Rajya Transport Corporation ply on these roads. Besides, private buses also ply on some routes.

Trade and Commerce

In Muzaffarpur district, trade consists mainly of export of sugar, tobacco, oil-seeds, and jute and of import of cotton textiles, coal, iron and steel products, petroleum products and other consumer goods.

The main business places in the district are Muzaffarpur town, Motipur, Sahebganj, Sakra, Dholi, Bochaha and Saraiya. The main trade is wholesale trade of cloth and foodgrains. The wholesale trade of cloth is centrally located in Sutapatti in Muzaffarpur town which is one of the biggest markets in North India where cloth in bulk is received directly from the mills. The whole of North Bihar is sufficiently fed from the Muzaffarpur wholesale market. The foodgrain market in the district is the largest secondary market in North Bihar. To safeguard the interest of producers, the State Government, has established Bazar Samitis at Muzaffarpur, Motipur and Sahebganj and has a big marketing yard at Muzaffarpur functioning since 1978. It has 99 business stalls where the producers bring the commodities for sale.

Electricity and Power

Out of 1,813 villages in the district, about 33 per cent have since been electrified. Construction of a Thermal Power Station at Kanti has been taken up which is likely to generate 200 Megawatt of electricity in near future.

Social and Cultural events and Natural and Administrative developement.

After creation of Sitamarhi and Vaishali districts in the year 1972 (earlier they were subdivisions of old Muzaffarpur district), Muzaffarpur district now consists of the following 14 development blocks ;

(1) Musahri, (2) Minapur, (3) Bochaha, (4) Aurai, (5) Katra, (6) Gaighatti, (7) Dholi (Moraul), (8) Sakra, (9) Kurhani, (10) Kanti, (11) Saraiya, (12) Paroo, (13) Sahebganj and (14) Baruraj.

Agriculture has assumed still greater importance recently owing to the incentives given to farmers by State Government in the shape of subsidy, loans and irrigational facilities. Many new industries have come up and they are likely to flourish more after the opening of the Hajipur bridge. There has been marked improvement in the field of education also as a large number of new educational institutions have started functioning.

Fairs and festivals are held regularly by different communities in the district.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Ambara Chowk

Ambarati, 40 kms. from Muzaffarpur, is situated in Saraiya block on Muzaffarpur-Rewa road. It is believed to be the village home of Amrapali, the famous court dancer of Vaishali.

2. Hardi

It is a large village situated on the southern border of Baruraj block, about 14 kms. from Motipur. The place is famous for the annual *Hardi Basant Mela* which lasts for about a month and is important for purchase and sale of cattle. The fair is held on the occasion of *Basant Panchami.*

3. Jaintpur

The village is situated about 10 kms. north-east of Paru and 26 kms. west of Muzaffarpur. It is noted as the site of a large *math* which has now been converted into a college. An annual fair is held on the eve of *Dashehra* known as *Damodar Dashehra Mela.*

4. Katra Garh

The place is situated nearly 35 kms. north-east from Muzaffarpur. During the reign of Akbar, Katra Garh was one of the states of the Moghal empire. It was then named as Akbarpur. In Katra block, several idols, ornaments, earthen pots and other chemical articles of historical importance have been found in course of excavations.

5. Khudi Ram Bose Memorial

A memorial tablet has been raised in the memory of Khudi Ram Bose who was executed at Muzaffarpur Jail in the year 1908 on the charge of throwing a bomb on Mr. Kingsford, the District & Session Judge of Muzaffarpur. The memorial tablet is situated opposite the present residence of the District and Session Judge.

6. Motipur

The village lies in Baruraj block and is situated about 28 kms. from Muzaffarpur on the Muzaffarpur-Motihari National Highway No. 28. It was an important centre for indigo production in the last century. It is still an important commercial centre and has a sugar factory.

7. Rajkhand

It is situated about 5 kms. from the headquarters of Aurai block on Aurai-Saidpur P.W.D. road. There is an old temple of Bhairav Nath. A big cattle fair is held every year on the occasion of *Shivaratri.*

8. Turki

The village is the headquarters of Kurhani block and is situated about 14 kms. south of Muzaffarpur on the Muzaffarpur-Hajipur road. It is noted for its educational institutions, viz., Teachers' Training College and Janta College which impart instruction in social and basic teaching. There is a *Kabirpanthi Math* which is engaged in social work. An annual fair is held in *Baisakh.*

9. Turki

Another village bearing the same name in Minapur block situated about 9 kms. north of Minapur. A cattle fair is held annually on the occasion of *Kartik Purnima.*

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/hat and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirement of the Minimum Needs Programme of the Planning Commission.

A new statement (IV-A) of civic and other amenities for each area/locality identified as slum in Class I and II towns has been added.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes litera-

tes, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it, is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana Jurisdiction List pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies.

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1951 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1951. At the 1951 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size :

Class of town		Population
I	...	1 lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000—9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with contiguous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census house—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons, who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as Workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976), dated 18th

September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

The district of Muzaffarpur, with a population of 2,357,388 persons is divided into 14 Community Development Blocks consisting of 1,729 inhabited villages (out of a total number of 1,829 villages including 16 villages which are the constituent units of the only town of the district) and 1 town. With 3.37 per cent of the total population of the State comprised within the district it ranks 13th in the State in order of population. The following table highlights the population, number of villages and town for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Musahri	340,676	184,464	156,212	150,260	78,878	71,382	190,416	105,586	84,830	138	119	1
2	Minapur	159,826	82,726	77,100	159,826	82,726	77,100	..	..	..	154	152	..
3	Paclala	110,824	57,056	53,768	110,824	57,056	53,768	..	..	..	134	119	..
4	Aurai	142,141	71,919	70,222	142,141	71,919	70,222	..	..	..	116	105	..

6	Gaighatti	132,857	67,514	65,343	132,857	67,514	65,343	..	..	..	84	78	..
7	Dholi (Moraul)	116,935	58,971	57,964	116,935	58,971	57,964	..	..	..	80	78	..
8	Sakra	153,011	76,792	76,219	153,011	76,792	76,219	..	..	..	121	121	..
9	Kurhani	213,137	108,034	105,103	213,137	108,034	105,103	..	..	..	166	162	..
10	Kanti	206,410	104,610	101,800	206,410	104,610	101,800	..	..	..	176	170	..
11	Saraiya	164,825	81,464	83,361	164,825	81,464	83,361	..	..	..	154	150	..
12	Paroo	182,084	90,310	91,774	182,084	90,310	91,774	..	..	..	158	137	..
13	Sahebganj	117,751	59,195	58,556	117,751	59,195	58,556	..	..	..	131	126	..
14	Baruraj	195,827	99,103	96,724	195,827	99,103	96,724	..	..	..	137	137	..
	Total	2,257,388	1,201,064	1,156,324	2,166,972	1,095,478	1,071,494	190,416	105,586	84,830	1,829	1,729	1

It would be seen from the Table 1 that among the C.D. Blocks, there is a wide range of variation in the distribution of population. Musahri with 14.45 per cent of the population of the district occupies the first place, probably because Muzaffarpur town, the district headquarters is located in this very block. It is followed by Kurhani and Kanti blocks with 9.04 and 8.76 per cent of the district population respectively. The least populated C. D. Block is Bochaha with 4.70 per cent of the population of the district.

The average population of a block in the district is 168,385. Only 5 blocks out of 14 or 35.71 per cent of the total number have higher population than the average indicated above. They contain as much as 48.28 per cent of the total district population.

Muzaffarpur district, which has been trimmed after carving out of Vaishali and Sitamarhi districts, appears to have had less impact of urbanisation since 91.92 per cent of the population lives in the villages against the State break up of rural and urban population of 87.53 and 12.47 per cent respectively. The total urban population contained in the only town of Muzaffarpur is only 8.08 per cent of the population of the district. The low urban population content may be attributed to the fact that the district has only 1 town to its credit. Muzaffarpur (M) falls in Class I range (population 1 lakh and above). The district does not have any urban agglomeration.

Decadal change in population

Muzaffarpur subdivision of the old Muzaffarpur district, now constitutes the jurisdiction of present district of Muzaffarpur after reorganisation. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Development Block	Population						Percentage decadal (1971—81) variaton		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Musahri	242,726	116,347	126,379	340,676	150,260	190,416	+40.35	+29.15	+50.67
Minapur	131,620	131,620	..	159,826	159,826	..	+21.43	+21.43	..
Bochaha	93,126	93,126	..	110,824	110,824	..	+19.00	+19.00	..
Aurai	120,303	120,303	..	142,141	142,141	..	+18.15	+18.15	..
Katra	104,875	104,875	..	121,084	121,084	..	+15.46	+15.46	..

Baruraj	157,683	157,683	..	195,827	195,827	..	+24.19	+24.19	..
Total	**1,909,059**	**1,782,680**	**126,379**	**2,357,388**	**2,166,972**	**190,416**	**+23.48**	**+21.56**	**+50.67**

It would appear that rise in the population of this district during the 1971—81 decade has been of the order of 23.48 per cent which is less than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 21.56 per cent while urban population growth over the decade has been as high as 50.67 per cent. The higher growth in the urban population is partly attributable to the expansion of Muzaffarpur town and also due to rural-urban migration.

As shall be evident from the table, variation in growth of population among the development blocks is wider still. Musahri block has shown the highest increase in population over the decade with 40.35 per cent probably because Muzaffarpur town, the district headquarters is located in this block. The next highest increase in population is observed in Baruraj and Sakra blocks with 24.19 and 24.17 per cent respectively. Percentage decadal variation has been observed to be the least in case of Katra (15.46%) followed by Sahebganj (17.20%) and Dholi (17.79%) blocks.

The increase in rural population during 1971—81 has been the highest again in case of Musahri block (29.15%) followed by Baruraj (24.19%) and Sakra (24.17%) blocks which may, perhaps, due to less outward movement of people in search of employment, etc., on account of having affluence at home.

As regards growth in urban population, it can be seen from the table that Musahri is the only block which contains a town, viz., Muzaffarpur (M), and it has registered an increase of 50.67 per cent growth rate over the decade.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the alongside table in six size-groups :

Table 3 – Distribution of villages by population ranges,

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
— 200	144	8.33
200— 499	381	22.04
500— 1,999	935	54.08
2,000—4,999	225	13.01
5,000—9,999	35	2.02
10,000 +	9	0.52
Total	**1,729**	**100.00**

It would be seen from the table that mostly the villages in the district are medium and small-sized as the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499 accounting for 54.08 and 22.04 per cent of the total number of inhabited villages respectively in the district. Medium and small-sized villages are thus much more in number than large villages (population above 5,000) in the district. The large village with a population of 5,000 and more constitute only 2.54 per cent of the inhabited villages in the district. There are 9 villages in the district (0.52%) having more than 10,000 persons each. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 whereas in the old Muzaffarpur district it was as high as 1,116. The average population size of an inhabited village in the district of Muzaffarpur, as per the 1981Census, works out to 1,253 which is still high as against the State average of 906.

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent

of crowding in a particular area. The distribution of village in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
0— 10	3	0.17
11— 20	3	0.17
21— 50	9	0.52
51—100	17	0.98
101—200	43	2.49
201—300	58	3.36
301—500	293	16.95
501+	1,297	75.01
Not known	6	0.35
Total	**1,729**	**100.00**

The data presented in the above table highlight the fact that the proportion of villages in the district varies in direct relation to the density range, the maximum being in the density range of 501 kms. or more with 75.01 per cent followed by villages in the density range of 301—500 which account for 16.95 per cent of the villages.

It would further be seen that comparatively small number of villages fall in the density range below 300 implying thereby that the number of thinly populated villages in the district is quite low.

Proportion of Scheduled Castes/Tribes population in villages and towns

Tables, 5, 6 and 7 furnished alongside indicate the proportion of the population of the Scheduled Castes and the Scheduled Tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and Scheduled Tribes at micro-level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population.	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	204	11.80
5 or less	163	9.43
6—10	279	16.14
11—15	328	18.97
16—20	213	12.32
21—30	298	17.23
31 and above	244	14.11
Total	**1,729**	**100.00**

It is discernible from the table that there are only 244 villages (14.11%) where the percentage of Scheduled Caste population to total population is more than 31 per cent and there are 204 villages out of a total of 1,729 inhabited villages (11.80%) which do not have any population of the Scheduled Castes at all. The maximum number of inhabited villages having Scheduled Caste population lies in the range of 11—15 per cent (18.97%) followed by 21—30 percentage range (17.23%).

Table 6—Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,706	98.67
5 or less	21	1.21
6—15	1	0.06
16—25	...	...
26—35	...	...
36—50	...	...
51 and above	1	0.06
Total	**1,729**	**100.00**

It will be seen from the table that the dispersal of Scheduled Tribe population is not on the same pattern as that of the Scheduled Caste population. As many as 1,706 out of 1,729 inhabited villages (98.67%) in the district have no Scheduled Tribes at all. There are only 21 villages comprising 1.21 per cent of the total number of inhabited villages which have a population of Scheduled Tribes. Even in these villages the Scheduled Tribes account for only 5 per cent of the total population or even less. In the higher ranges the proportion of villages is either negligible or nil.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in the towns

Name of town	Total Population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Muzaffarpur (M)	190,416	13,474	237	7.08	0.12
All Towns	**190,416**	**13,474**	**237**	**7.08**	**0.12**

The table above indicates that the percentage of Scheduled Caste population in the town of Muzaffarpur district (there is only one town, viz., Muzaffarpur Municipality) is of the order of 7.08 per cent of the total population as against 16.37 per cent in the rural areas (Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and predominantly rural base of the economy of the district. The extent of Scheduled Caste population in Muzaffarpur (M) is obviously the same, viz., 7.08 per cent. The urban content of the population of the Scheduled Tribes in the district is almost negligible being only 0.12 per cent. As stated earlier there is only one town, viz., Muzaffarpur (M) in the district of Muzaffarpur. The figures relating to urban areas of the district is, therefore, identical to that of Muzaffarpur town.

Literacy rates by population ranges of villages and towns

According to the Census terminology a person who was able to read and write any language with understanding was treated as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately :

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	144	18.32
200—499	381	18.96
500—1,999	935	20.64
2,000—4,999	225	22.14
5,000—9,999	35	21.91
10,000+	9	20.70
Total	**1,729**	**21.12**

It would be seen from the table alongside that literates form 21.12 per cent of the total population in the rural areas of the district as against 59.94 per cent in the urban areas (Table 9). In the rural areas it can be observed that literacy rate varies between the maximum of 22.14 per cent in the population range 2,000—4,999 and the minimum of 18.32 per cent in the population range of less than 200 persons.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Muzaffarpur (M)	59.94
All towns	**59.94**

The proportion of literate population in Muzaffarpur (M), which is the only town in the district, is as high as 59.94 per cent. The literacy rate in the urban areas of this district is more than two and a half times the rate in rural areas. It is actually the poor performance of rural areas which is responsible for pulling the district downward in the overall assessment of literacy.

Workers and Non-workers in rural and urban areas of the district.

The table on next page gives the percentage break up of literates, main workers, marginal workers, total workers, non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table—10 Literates, Workers, Non-workers, Scheduled Castes/Tribes population in the district

Name of Development Block	Total Rural Urban	Total Population			Percentage of S. C. population to total population	Percentage of S. T. population to total population	Percentage of Literates to total population			Percentage of Main workers to total population

Total	**T**	**1.63**	**0.84**	**2.45**	**29.78**	**50.93**	**7.76**	**70.22**	**49.02**	**92.24**
	R	**1.76**	**0.90**	**4.63**	**30.22**	**51.83**	**8.07**	**69.78**	**48.12**	**91.93**
	U	**0.16**	**0.14**	**0.17**	**24.81**	**41.64**	**3.85**	**75.19**	**58.36**	**96.15**

Total workers in the district of Muzaffarpur account for 29.78 per cent of the total population whereas the proportion of non-workers is as high as 70.22 per cent. Main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of one year) constitute 28.15 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very low in the district, being only 1.63 per cent. The same trend can be observed in both the rural and urban areas of the district as also in almost all the development blocks except, Katra block where the proportion of marginal workers is as high as 18.63 per cent (Males—8.33%, Females—28.38%).

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 50.98 and 50.14 per cent respectively for males as against 7.76 and 5.31 per cent respectively for females which indicate that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (2.45%) vis-a-vis male marginal workers (0.84%) in the district. It may be due to the fact that apart from household duties women do some work for the day or the season to supplement the household income. It can be seen that the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (30.22%) than in the urban areas (24.82%). The same pattern is perceptible in the case of main workers as well as the marginal workers who constitute 28.46 and 1.76 per cent respectively of the rural population but only 24.65 and 0.16 per cent respectively of the urban population. This may be due to the fact that in the rural areas people generally find an easy employment in various agricultural activities, whereas, in the urban areas, household industries and other works do not offer equal short-term job opportunities due to limited urban development.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking Water	Post and Telegraph	Market/*Hat*	Communication	Approach by *Pucca* road	Power supply

10	Kanti	170	118(69.01)	45(26.32)	170(100.00)	23(13.45)	23(13.45)	32(18.71)	45(26.32)	87(50.88)
11	Saraiya	150	110(73.33)	16(10.67)	150(100.00)	21(14.00)	30(20.00)	43(28.67)	46(30.67)	69(46.00)
12	Paroo	137	98(71.53)	34(24.82)	137(100.00)	26(18.98)	36(26.28)	45(32.85)	41(29.92)	29(21.17)
13	Sahebganj	126	85(67.46)	15(11.90)	126(100.00)	15(11.90)	23(18.25)	26(20.63)	10(7.94)	21(16.67)
14	Baruraj	137	100(72.99)	29(21.17)	137(100.00)	28(20.44)	28(20.44)	19(13.87)	28(20.44)	57(41.61)
	Total	1,729	1,208(69.87)	337(19.48)	1,729(100.00)	295(17.06)	252(14.57)	393(22.73)	409(23.66)	591(34.18)

Educational amenity—There are as many as 1,208 villages accounting for 69.87 per cent of the total number of inhabited villages (1,729) in the district where educational facility is available. The highest proportion of villages with educational facility is in the Development Block of Aurai where 77.14 per cent villages have this facility. It is followed by Katra and Musahari blocks with 76.00 and 75.63 per cent villages respectively having educational facility. The lowest number of villages with educational facility is in the Development Block of Bochaha with only 50.42 per cent villages having the facility of education.

Medical amenity—The availability of medical amenity in the villages is considerably low as only 19.49 per cent of inhabited villages have got it. Among the development blocks, Aurai, again has the highest proportion of villages with medical facility, the percentage being 52.38 per cent. This is followed by Dholi and Paroo blocks with 37.18 and 24.82 per cent of villages enjoying this facility. Kurhani block, on the other hand, has only 4.32 per cent of the villages where any kind of medical facility is available.

Drinking water—It would be seen from the table that drinking water facility is available in all the inhabited villages of the district of Muzaffarpur.

Post and Telegraph—Postal facilities (post & telegraph) are available in 295 villages out of a total of 1,729 inhabited villages (17.06%) in the district. Gaighatti block has the maximum number of villages having post and telegraph facilities (32.05%) followed by Dholi (30.77%) and Aurai (23.81%) blocks. Bochaha block has the least number of villages having postal facilities (8.40%). In the remaining development blocks of the district the proportion varies from a minimum of 9.21 per cent (Minapur block) to a maximum of 20.44 per cent (Baruraj block).

Market/Hat-The villages where market/*hat* is held constitute 14.57 per cent of the total number of inhabited villages in the district. Paroo block has the maximum number of inhabited villages where market/*hat* is held, the percentage being 26.28 followed by Baruraj and Sahebganj blocks with 20.44 and 18.25 per cent respectively. As shall be evident from the table, there are 3 development blocks in the district, viz., Kurhani (8.02%), Bochaha (8.40%) and Musahri (9.24%) where market/*hat* facility is available in less than 10 per cent of the villages.

Communications—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

Only 22.73 per cent of the total inhabited villages in the district are connected by one means of communication or the other. The majority of villages are still do not have this facility. Musahri block, which contains Muzaffarpur town, the district headquarters, has the highest proportion of villages (50.42%) which are connected by bus or rail or navigable river/canal services, etc., followed by Paroo block with 32.85 per cent of villages having one means of communication or the other. Katra block has the least number of inhabited villages to its credit (12.00%) having communication facility. It appears that villages falling under this block are still very much undeveloped on this account.

Approach road to villages—With only 23.66 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Musahri with 41.18 per cent villages having *pucca* approach roads tops the list followed by Sakra and Saraiya blocks with 31.40 and 30.67 per cent respectively. The development block which has the lowest number of villages having this facility is Sahebganj which has only 7.94 per cent villages having *pucca* approach road facility. It is generally seen that development blocks which have better communication facilities also contain larger proportion of villages having *pucca* approach road facility.

Power supply—Electrified villages in the district constitute 34.18 per cent of the total inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Dholi block occupies the first position having maximum proportion of electrified villages (64.10%) followed by Kanti and Saraiya blocks with 50.88 and 46.00 per cent respectively. The lowest proportion of villages having power supply is observed in Aurai and Minapur blocks with 7.62 and 11.84 per cent respectively which indicates that electricity is yet to reach majority of villages in these two blocks.

Proportion of rural population by various amenities

While in Table 11 we have discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rual population served by these amenities :

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development block	Total population of inhabited villages in the Development block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Musahri	150,260	89.58	41.22	100.00	46.04	16.73	55.85	50.73	62.43
2	Minapur	159,826	84.12	25.26	100.00	26.60	25.74	21.17	22.36	16.95
3	Bochaha	110,824	72.14	30.26	100.00	24.42	20.14	30.09	29.22	44.31
4	Aurai	142,141	93.81	76.84	100.00	52.26	35.04	41.63	31.88	25.72
5	Katra	121,084	95.61	38.44	100.00	56.71	38.30	8.87	11.21	28.45
6	Gaighatti	132,857	91.26	39.12	100.00	59.72	37.75	28.97	29.84	62.96
7	Dholi (Moraul)	116,925	92.96	53.20	100.00	56.70	23.25	31.05	30.12	71.80
8	Sakra	153,011	90.61	34.34	100.00	38.16	31.55	27.35	38.58	56.83
9	Kurhani	213,137	86.45	10.67	100.00	36.96	17.89	28.06	34.01	48.35
10	Kanti	206,410	87.92	34.64	100.00	31.69	30.96	31.53	38.10	61.16
11	Saraiya	164,825	89.55	22.98	100.00	30.45	40.22	37.86	39.86	61.35
12	Paroo	182,084	91.53	42.49	100.00	49.49	52.67	48.84	44.46	45.88
13	Sahebganj	117,751	85.73	20.45	100.00	27.77	32.96	21.72	14.66	32.39
14	Baruraj	195,827	89.26	29.57	100.00	47.13	43.21	28.04	33.22	58.59
	Total	**2,166,972**	**88.71**	**34.60**	**100.00**	**41.31**	**32.21**	**32.04**	**33.10**	**49.10**

It would be seen that educational facility is available to 88.71 per cent of the rural population in the district. In Katra block, maximum proportion of rural population is served by the educational facility, the percentage being 95.61 closely followed by Aurai, Dholi and Paroo blocks with 93.81, 92.96 and 91.53 per cent of population respectively enjoying this facility. Pachla is the only block in the district where the proportion of rural population served by the facility of education is less than 80 per cent (72.14%). Another noteworthy point is that the proportion of villages in the district enjoying educational facility is less (being 69.87 per cent vide Table 11) than the proportion of population which is as High as 88.71 per cent. This may be attributed to the fact that villages which possess educational facility contain, larger population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served is of the order of 34.60 per cent which is much higher than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table indicates the number of villages which do not contain different amenities arranged by broad distance ranges (less than 5 kms., 5-10 kms. and 10+kms.) from the places where these are available :

Table 13—Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Villages not having the amenity of	Number of villages where the amenity is not available at a distance of—			
	—5 Kms.	5-10 Kms.	10+Kms.	Total (Cols. 2-4)
1	2	3	4	5
1. Education	518	3	..	521
2. Medical	1,070	308	14	31,92
3. Drinking water	..	..	..	..
4. Post and Telegraph	1,295	139	..	1,434
5. Market/*Hat*	1,270	207	..	1,477
6. Communication	991	335	10	1,336

As regards educational facility it would be seen that there are 521 villages out of 1,729 inhabited villages (30.13%) in the district which do not have educational facility but the facility is available at places situated within 5 kms., 5—10 kms. and also beyond 10 kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 kms. is 518 (29.9€%) and that of villages having such facilities within a distance of 5—10 kms. is only 3 (0.17%) whereas beyond 10 kms. the number of such villages is nil. The number of villages having other facilities within a distance of 5—10 kms. and 10+kms. is less than those having the facilities within 5 kms. though not in same proportion. It follows, therefore, that for various facilities people belonging to majority of villages do not have to travel for more than 10 kms.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different types of facilities by distance from the nearest town in five distance groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of —							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power Supply
1	2	3	4	5	6	7	8	9	10
0—5	72	54 (75.00)	17 (23.61)	72 (100.00)	21 (29.17)	10 (13.89)	36 (50.00)	37 (51.39)	42 (58.33)
6—15	284	190 (66.90)	46 (16.20)	284 (100.00)	39 (13.73)	30 (10.56)	81 (28.52)	88 (30.99)	129 (45.42)
16—50	1,197	841 (70.26)	244 (20.38)	1,197 (100.00)	216 (18.04)	180 (15.04)	231 (19.30)	263 (21.97)	397 (33.17)
51+	176	123 (69.89)	20 (17.05)	176 (100.00)	19 (10.80)	32 (18.18)	45 (25.57)	21 (11.93)	23 (13.07)
Unspecified		..	..	..	..	..	..	..	..
Total	1,729	1,208 (69.87)	327 (19.49)	1,729 (100.00)	295 (17.06)	252 (14.57)	393 (22.73)	409 (23.66)	591 (34.18)

It would appear from the table at previous page that the maximum number of inhabited villages lie in the distance range of 16—50 kms. (69.23%) from the nearest town. With only one urban centre in the district and the position of bordering districts being not very different such a situation is but natural. This is followed by villages in the distance range of 6—15 kms. from the nearest town (16.43%).

In case of educational, medical, post and telegraph, communication, *pucca* approach road and power supply facilities, the proportion of villages is observed to be the highest in the distance group 0—5 kms. from the nearest town, It can be said that the villages which are nearer to the urban areas have benefited in respect of the above mentioned facilities vis-a-vis those rural pockets which are beyond the pale of direct urban influence.

In case of market/*hat*, however, the situation is just the reverse. The maximum proportion of villages with the facility of market/*hat* is in the distance range of 51+kms. from the nearest town.

Interestingly,it can be seen from the table that the proportion of villages having power supply and *pucca* approach road facilities decreases with the increase in the distance range from the nearest town.

As has been observed in other tables also, drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communi-cation	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—499	525	178(33.90)	44(8.38)	525(100.00)	8(1.52)	12(2.29)	75(14.29)	77(14.67)	104(19.81)
500—1,999	935	763(81.60)	170(18.18)	935(100.00)	115(12.30)	119(12.73)	215(22.99)	230(24.60)	317(33.90)
2,000—4,999	225	224(99.56)	94(41.78)	225(100.00)	134(59.56)	93(41.33)	79(35.11)	79(35.11)	139(61.78)
5,000+	44	43(97.73)	29(65.91)	44(100.00)	38(86.36)	28(63.64)	24(54.55)	23(52.27)	31(70.45)
Total	**1,729**	**1,208 (69.87)**	**337 (19.49)**	**1,729 (100.00)**	**295 (17.06)**	**252 (14.57)**	**393 (22.73)**	**409 (23.66)**	**591 (34.18)**

It can be seen from the table that the maximum number of villages, i. e.,935 out of the total inhabited villages (54.08%) in the district fall in the population range of 500—1,999 followed by 525 villages (30.36%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000+ being 44 (2.55%) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except for educational facility where there is very marginal decline in the case of villages in the population range of 5,000+. Generally, the maximum proportion of villages having different amenities have a population range of 5,000+ which further corroborates the fact that more facilities are generally available in large villages than in small ones.

Main staple food in the villages

The table on next page indicates that rice and wheat constitute the main staple food of the people in majority of villages in all the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block.

Serial no.	Name of Development Block	Main staple food
1	2	3
1	Musahri	Rice, wheat
2	Minapur	Rice, wheat
3	Bochaha	Rice, wheat
4	Aurai	Rice, wheat
5	Katra	Rice, wheat
6	Gaighatti	Rice, wheat
7	Dholi (Moraul)	Rice, wheat
8	Sakra	Rice, wheat
9	Kurhani	Rice, wheat
10	Kanti	Rice, wheat
11	Saraiya	Rice, wheat
12	Parco	Rice, wheat
13	Sahebganj	Rice, wheat
14	Baruraj	Rice, wheat

Villages according to land-use

The land utilisation data of the villages in the district have been incorporated in the village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land-use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Musahri	119	17,754.74	84.31	26.24
2	Minapur	152	23,639.74	79.96	52.18
3	Bochaha	119	15,636.79	88.36	30.51
4	Aurai	105	19,019.89	86.09	26.88
5	Katra	75	18,642.34	81.56	15.81
6	Gaighatti	78	20,841.77	69.49	33.67
7	Dholi (Moraul)	78	17,269.41	93.39	28.48
8	Sakra	121	17,492.31	79.48	18.55
9	Kurhani	162	25,804.42	79.41	40.35
10	Kanti	170	28,504.75	86.29	32.51
11	Saraiya	150	24,584.90	88.74	26.81
12	Paroo	137	27,666.96	86.54	15.42
13	Sahebganj	126	18,354.70	87.68	4.47
14	Baruraj	137	31,353.50	86.20	22.85
	Total	**1,729**	**306,566.22**	**84.08**	**26.99**

It would be seen from the table that 84.08 per cent of the total area is utilised for cultivation (cultivable area) and of this only 22.69 per cent is irrigated. The low proportion of irrigated area is presumably on account of failure or premature cessation of rainfall which also results, in failure of main sources of irrigation. However, now adequate attention is being paid to the provision and expansion of irrigation facilities in the district.

Among the C. D. blocks, the highest proportion of cultivable area is found in Dholi block with 93.39 per cent closely followed by Saraiya and Bochaha blocks with 88.74 and 88.36 per cent respectively. The lowest cultivable area is found in Gaighatti block with only 69.49 per cent of the land brought under cultivation.

The highest proportion of irrigated area to total cultivable area is observed in Minapur block with

41.72 per cent followed by Kurhani block with 32.04 per cent. The lowest proportion of irrigated area to total cultivable area is observed in Sahebganj block, being only 3.92 per cent. It indicates that though Government has taken up different projects to provide irrigational facilities still there are large number of villages which are deprived of the required irrigational facilities inspite of the potentiality for cultivation.

Growth, density and sex-ratio of urban population.

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over to decades is indicated in Table 18 below. It also shows the variatian in density and sex-ratio in the urban population of the district in relation to State :

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.).	Sex-ratio (no. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (no. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,377,181	73,594	5.34	+35.94	4,059	738	38,782,271	2,626,261	6.77	+38.14	2,329	842
1961	1,598,346	109,048	6.82	+48.18	5,329	695	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,909,059	126,379	6.62	+15.89	8,116	757	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	2,357,388	190,416	8.08	+50.67	12,229	803	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district is 190,416 comprising 8.08 per cent of the district population. The corresponding percentage for the State is 12.47. The increase in urban population of the district has been rather tardy till 1971 Census, the proportion of urban population having risen from 5.34 per cent in 1951 to 6.62 per cent in 1971. As a matter of fact, in 1971 Census there had been a marginal decline in the urban population content of the district vis-a-vis the proportion of urban population in 1961. In 1981 Census, however,the urban population has shown a slightly higher increase, its proportion rising from 6.62 in 1971 to 8.08 in 1981. The rise of the urban population content of the State, on the other hand, has rather been faster, the proportion of urban population having increased from 6.77 in 1951 to 12.47 in 1981. It, therefore, follows that this district, even now, is less urbanised in the State probably because there is only one urban unit.

From column 5 of the table it is clear that the growth of urban population has shown an upward trend over the decades except during the decade 1961—71 when the growth rate has slashed down to 15.89 per cent on account of reduction in number of villages as contituent units of Muzaffarpur town. The trend of growth of urban population in the State has been slighty different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade as observed for the district of Muzaffarpur also.

The density of population in the urban areas of the district has always remained much higher as compared to the density of populaton in the urban areas of the State. This clearly indicades that Muzaffarpur town is becoming more crowded. Being the only urban unit of the district the movement of

population from rural to urban areas is mostly taking of place in the town of Muzaffarpur only.

The sex-ratio for the urban areas of Muzaffarpur district has all along been lower as compared to the urban areas of the State and has been adverse for females over the decades. The urban areas, in fact, still suffer from a shortage of females as the towns attract mainly the male population by way of employment opportunities. The female population continues to stay in the villages because the people having agriculture as the main occupation and their moorings in villages do not migrate as a complete family unit. Higher cost of living in the urban areas is another factor that discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There is only one town, viz., Muzaffarpur (M) in the district of Muzaffarpur. In 1971 Census also the position was the same as Muzaffarpur subdivision in the old Muzaffarpur district (which has been upgraded as Muzaffarpur district now) also consisted of one town only, viz., Muzaffarpur (M). No town has either been added or declassified in the present Census. No information has, therefore, been presented in Table 19 below :

Table 19—New Towns/Towns declassified in 1981 Census.

Name of Towns	Population 1981 Census
1	2
(a) *Added*	
Nil	...
(b) *Declassified*	
Nil	...

Receipt and expenditure in different towns

The table below gives the details finances in the Urban local bodies in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
Class, name and civic status of the town	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
I. Muzaffarpur (M)	35.15	18.59	16.56	33.60	1.88	20.93	7.09	0.08	3.62
Total	**35.15**	**18.59**	**16.56**	**33.60**	**1.88**	**20.93**	**7.09**	**0.08**	**3.62**

It would be apparent from the above figures that the per capita total receipt in Muzaffarpur (M), the only town in the district, is Rs. 35.15 which is more than per capita total expenditure (Rs. 33.60). More than half of the total receipt is received through taxes as shall be evident from Table 20 above. The per capita receipt through other sources (Rs. 16.56) is close to per capita receipt through taxes (Rs. 18.59).

The per capita expenditure on public health and conveniences (Rs. 20.93) is also more than half of the per capita total expenditure (Rs. 33.60). The per capita expenditure on public works (Rs. 7.09) is less than half the per capita expenditure on public health and conveniences (Rs. 20.93). On other counts the per capita expenditure is much less.

Schools per ten thousand population in towns

Primary and middle school facilities are generally

available in the town. The following table gives details of different categories of educational institutions per ten thousand population in the only town of the district :

Table 21—Schools per ten thousand population in towns

Class, name and civic status of town	Number per ten thousand population			
	Higher Secondary/ Inter/PUC/Junior College	Secondary/ Matriculation	Junior Secondary/Middle	Primary
1	2	3	4	5
I. Muzaffarpur (M)	3.10	0.74	3.26	3.83
Total	**3.10**	**0.74**	**3.26**	**3.83**

The number of Higher Secondary/Inter/PUC/ Junior College per ten thousand population in Muzaffarpur (M) works out to 3.10. The number of Secondary/Matriculation level school works out to 0.74. Similarly, the number of Junior Secondary/ Middle and Primary Schools per ten thousand population is 3.26 and 3.83 respectively for Muzaffarpur town. The table clearly indicates that the average number of Secondary/Matriculation level schools is much less than other categories of educational institutions which are very close to each other.

The figures for the urban areas of the district are identical to figures of Muzaffarpur (M), being the only town in the district.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in the town of the district :

Table 22—Number of beds in Medical Institutions in towns.

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
I. Muzaffarpur (M)	4.45
Total	**4.45**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 4.45. The availability of beds in the hospital in Muzaffarpur (M), the only town, is also the same.

Proportion of slum population in towns

The details of slums have been collected only in the case of Class I and Class II towns. Relevant information was collected through local officials of the Municipalities, NACs as also through the Town Planning Department in 1979. Muzaffarpur (M), qualifies as Class I town (population 1 lakh and above). The following table gives details regarding slums in Muzaffarpur town :

Table 23—Proportion of slum population in towns

Class, name and civic status of the town	Proportion of the slum population to total population of the town	Density in slums (per sq. km.)
1	2	3
I. Muzaffarpur (M)	32.85	46,333
Total	**32.85**	**46,333**

The table above indicates that slum population in Muzaffarpur (M) constitutes 32.85 per cent of the total population of the town.

The density of slums (number of persons per sq. km.) is as high as 46,333 which is indicative of the fact that the slums are over crowded and there is ample scope for improvement in the living standard of the people residing in slums.

Important commodities imported, exported and manufactured

The table below presents the most important commodity manufactured, exported from and imported into Muzaffarpur (M) :

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
I. Muzaffarpur (M)	Railway wagon	Prabhat *zarda*	cloth

It can be observed from the table given alongside that most important item, which is manufactured in Muzaffarpur town, is railway wagon. The famous Arthur Butler Factory in the town is reputed for this work.

The most important commodity, which is exported to different places from Muzaffarpur town is Prabhat *Zarda*, a kind of tobacco used by the people along with betel.

Cloth, is the most important commodity which is imported in the town. Muzaffarpur town is a very important trade centre for cloth.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10), and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For unirhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(—5 kms.)', '(5—10 kms.)', and '(10+kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by ranges of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary school in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village served by any mode of public transport such as bus, rail,

waterway, etc. (column. 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests.

2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.

3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellane ous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.

4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while columns 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forests land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e. g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Landunder miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abandoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in wnich data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each Village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column 5—Educational*

P	...	Primary or Elementary School (upto class IV).
M	...	Middle or Junior Secondary School (upto class VIII).
H	...	Matriculation or Secondary School (upto class X).
PUC	...	Higher Secondary, Intermediate, Pre-University, Junior College.
C	...	College
I	...	Industrial School
Tr	...	Training School
Ac	...	Adult Literacy Class/Centre
O	...	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab etc.).

(ii) *Column 6—Medical*

H	...	Hospital
MCW	...	Maternity and Child Welfare Centre.
MH	...	Maternity Home
CWC	...	Child Welfare Centre
HC	...	Health Centre
PHC	...	Primary Health Centre
PHS	...	Primary Health Sub-centre
D	...	Dispensary
FPC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
RP	...	Registered Private Practitioner
SMP	...	Subsidised Medical Practitioner
CHW	...	Community Health Worker
O	...	Others

(iii) *Column 7—Drinking Water*

T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water
TW	...	Tube-well Water
Hp	...	Handpump
R	...	River Water
F	...	Fountain
C	...	Canal
L	...	Lake
S	...	Spring
N	...	*Nullah/Nala/Nallah*
O	...	Others
NA	...	Information Not Available

(iv) *Column 8—Post and telegraph*

PO	...	Post Office
TO	...	Telegraph Office
PTO	...	Post and Telegraph Office
Phone	...	Telephone connection

(v) *Column 10—Communications*

BS	...	Bus
RS	...	Railway Station
NW	...	Navigable Waterway (including river, canal, backwaters, etc.).

(vi) *Column 11—Approach to Village*

PR	...	*Pucca* Road
KR	...	*Kutcha* Road
NR	...	Navigable River
NC	...	Navigable Canal
NW	...	Navigable Waterway (other than river or canal).
FP	...	Foot Path

(vii) *Column 13—Power Supply*

ED	...	Electricity for Domestic purpose
EAg	...	Electricity for Agriculture purpose.
EO	...	Electricity for Other purposes like industrial, commercial etc.
EA	...	Electricity for All purposes listed above.

(viii) *Column 16—Irrigated by source*

GC	...	Government Canal
PC	...	Private Canal
W	...	Well (without electricity)
WE	...	Well (with electricity)
TW	...	Tube-well (without electricity)
TWE	...	Tube-well (with electricity)
Tk	...	Tank
R	...	River
L	...	Lake
Wf	...	Waterfall
O	...	Others

(ix) *Column 20—Remarks*

N	...	Copies of Newspapers coming in the village.
M	...	Motor Cycles/Scooters available in the village.
C	...	Cars/Jeeps available in the village.
T	...	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Muzaffarpur district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :—

For the Scheduled Castes (Part A) : 0—5,6—10, 11—15, 16—20, 21—30, and 31 and above.

For the Scheduled Tribes (Part B) : 0—5,6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

VILLAGE

DEVELOPMENT BLOCK—MUSAHRI

AMENITIES AND

Amenities available [if not available within village, a dash(—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+kms., of the nearest place where the facility is available is given].

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) Physical aspects and location of towns 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns; (ivA) Civic and other amenities in Notified Slums; (v) Medical, educational, recreational and cultural activities and (vi) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix to the Town Directory. Since in the district of Muzaffarpur there is no out-growth in its town, this appendix has not been pre-sented.

In statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory. However, since there is no Census town in the district this appendix has not been prepared.

The details of the data covered in statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C. B.	...	Cantonment Board/Cantonment
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director

General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night soil, source and capacity of protected water supply, fire fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town the available civic amenities in 1979.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of

entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H(Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6--

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Type Writing
Sh Type	...	Shorthand and Type Writing
O	...	Others

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statements.

There is no outgrowth in the town of Muzaffarpur district.

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry
4. Other Workers

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's block-wise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundry of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of

rural areas and urban wards (circles) in the case of urban areas. The concepts of village, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers, which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
