FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to Village and Town Directory, Part B to Village and Town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restruc uring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimize the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new

items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/ Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

NEW DELHI :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, viz (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides the District Primary Census Abstract for the Scheduled Castes and Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms (for Village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen / Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as charge superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers. had sent to us material which was used for writing the 'Brief history of the district', I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and Village/Urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and whole-hearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Assistant Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Assistant Director was ably assisted by his team of Statistical Assistants, Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Assistant did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the

supervision of the respective Dy. Directors and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha, Assistant Director. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. S/Shri A. L. Das, G. C. Mishra, Assistant Directors and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH Section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication showed very keen interest in the matter and I am specially thankful to him. Shri Md. Sajjad Stenographer and Shri Ashraful Hoda, L. D. C. who have done the typing work also deserve thanks.

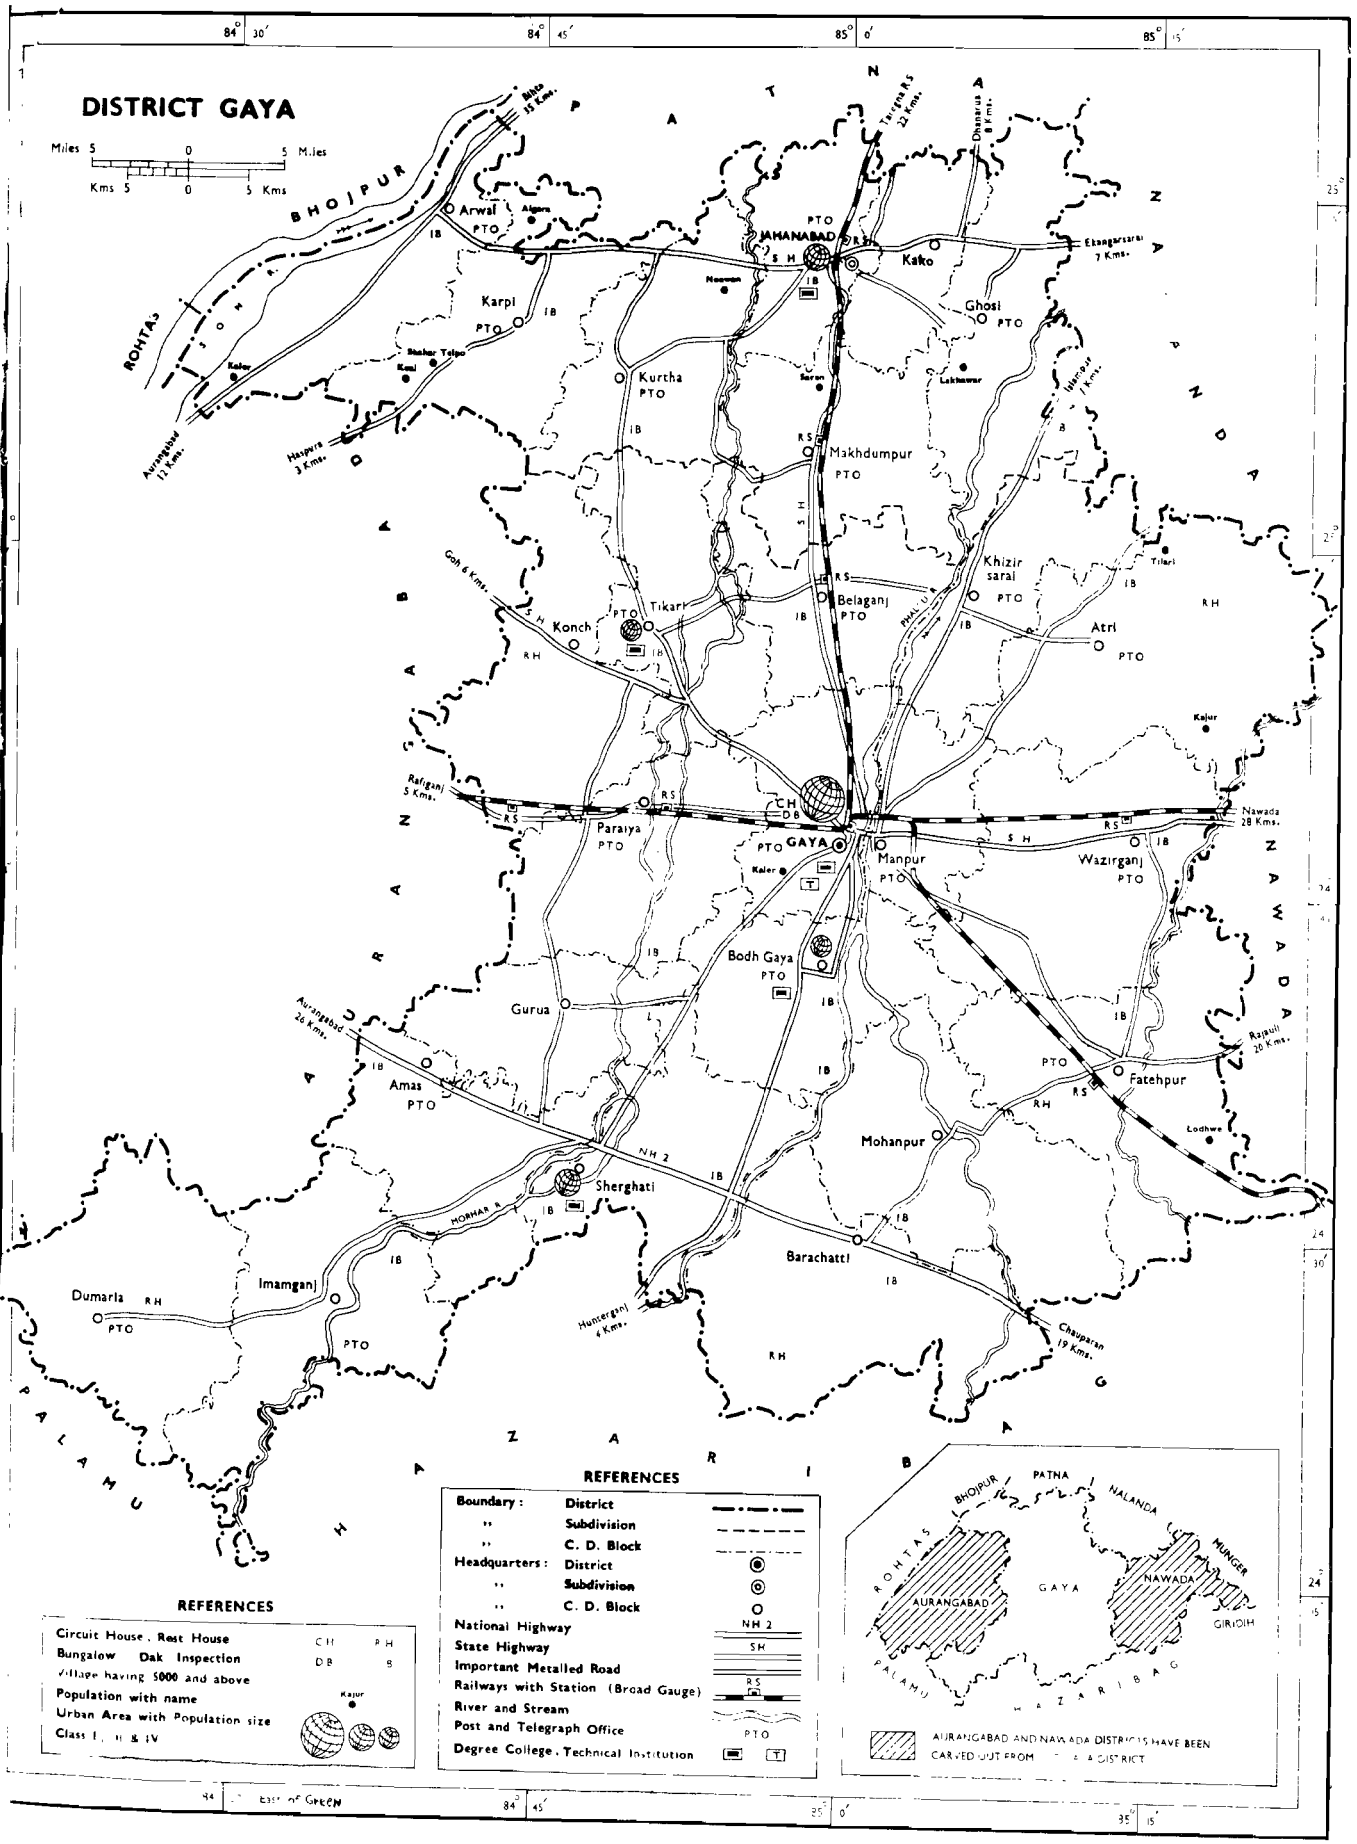

I am personally indebted to shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am also thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s. Parrissun Printing Press, Patna, M/s. Manas Mudrak, Patna & M/s. U. P. Printing Press, Allahabad, who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The district of Gaya lies virtually in the heart of Bihar. Gaya formed parts of Bihar and Ramgarh districts till 1865. When Behar subdivision was transferred to Patna district in that year, a new district known as the district of Gaya was created. Since its inception in the year 1865 Gaya district was intact till 1972. In January, 1973 Nawada and Aurangabad subdivisions of the district were separated and given the status of independent districts. As a result of this reorganisation the present district of Gaya is now left with only two subdivisions, viz., Gaya Sadar and Jehanabad consisting of 18 and 7 community development blocks respectively. The city of Gaya is the headquarters and the principal town of the district.

The district is bounded on the north by Patna and Nalanda districts, on the east by Nawada and Hazaribag districts, on the south by Hazaribag and Palamu districts and on the west by the districts of Aurangabad and Bhojpur.

Gaya is one of the holiest spots for the Hindus and there is a regular flow of pilgrims in the town to offer *pindas* in the Gaya *kshetra* or *dham* as it is called. The flow of pilgrims peaks up during *Pitripaksha*, the first fortnight of the Hindi month of Ashwin, corresponding to September-October. Bodh Gaya, which is situated about 11 kms. south of Gaya town, is also the holiest place for the Buddhists. Buddhists from different countries visit the spot almost daily. It is at Bodh Gaya that Lord Buddha achieved *nirvan* or enlightenment.

There are interesting legends about the origin of the name 'Gaya'. The name aGay according to the *Bhagavata purana* has its origin from a Demon king Gayasur who dwelt in the town. Another legend contained in the *Vayu purana* suggests that Gaya was the name of a demon who performed a rigid penance for thousand years.

Early history

The district of Gaya formed an integral part of the ancient kingdom of Magadh which also included the undivided district of Patna. The history of Gaya is, therefore, the history of a part of Magadh. The city of Gaya, among the oldest in the world, has seen the rise and fall of many a civilisation. Magadh had an unprecedented history, culture and civilisation in its palmy days. Gaya was a special part of it, and, therefore, Gaya can doubtless boast of its past. Magadh came into prominence in the sixth century B. C. but legends refer to dynasties ruling here much earlier.

According to the 1961 District Census Handbook, Gaya became prominent during the reign of King Bimbisara, a ruler of the Haryankakula dynasty. It was during this period that both Buddha and Mahavira preached their doctrines. It is said that Gautama Buddha was invited to visit the Brahmayoni Hills by the Brahmins and Kshatriyas then living in Gaya. It was from here that Gautama moved to Bodh Gaya and attained enlightenment. Buddha then went on to Sarnath to 'move the wheel of Dharma'. He came to Gaya again and converted the *jatila* ascetics, and with them went to Rajgir on the invitation of King Bimbisara. Buddha lived in Gaya district for a considerable time and sites of his stay can still be located.

With the fall of the Haryankakula dynasty, the Sisunagas came to power and conquered Avanti (Malva). The Sisunagas were set aside by Mahapadmananda, who founded the Nanda dynasty. He extended his empire to include practically the whole of northern India. The Nandas were followed by the Mauryas who established their capital at Patliputra or modern Patna. During the reign of Emperor Ashoka, Gaya came into prominence once again. Ashoka embraced Buddhism, and went on a pilgrimage to Bodh Gaya where he built a temple and a monastery. It was during Ashoka's reign that a branch of the Mahabodhi tree was taken to Ceylon, now known as Sri Lanka. Not much is known about the history of Gaya between the end of the Mauryan rule in 184 B. C. and the rise of the Guptas.

The next prominent date in the history of Gaya is about 330 A. D. Samudra Gupta of the Gupta dynasty was the king of Magadh and Meghavarma, the king of Ceylon, built a monastery at Bodh Gaya. A copper plate inscription of Samudragupta's time has been found at Gaya. Gaya was the headquarters (Gayadhistan) of the Gaya district (Visheya) in the Gupta empire. An official seal of Gaya Visheya has been found in Nalanda. Local dynasties came into prominence after the fall of the Gupta empire. In the region of the Barabar Hills a Maukhari feudal dynasty consisting of Yagnavarman, Sardula Varman and Avanti Varman ruled for three generations. Inscriptions of these rulers have been found in the Barabar and Nagarjuna Hills. Later, Gaya was included in the empire of Harsha.

Hiuen Tsang, Chinese traveller who visited India between 630 and 645 A. D. during the reign of Harsha found the district quite prosperous. There were numerous Buddhist shrines in the district and all were well maintained. He found a magnificient monastery at Gunamati, which has been identified with a place south of Dharawat. In close proximity to this place was the school of Sheelbhadra. The Chinese traveller also visited Gaya and found the town well fortified. He offered worship at Bodh Gaya and was highly impressed by the monasteries and the *stupas* that stood around the temple and by the monasteries.

After the death of Harsha (648 A. D.) the later Gupta King Madhavagupta, a friend of Harsha, restored the fortunes of the later Gupta dynasty. But north-eastern India was soon plunged into anarchy. This ended with the election of Gopala, who founded the Pala dynasty. Bihar (including Gaya) formed a part of the Pala empire. An inscription of the 20th year of the reign of Dharampala, son of Gopala has been found in Bodh Gaya temple. A large number of images and temples were dedicated in the time of the Pala Kings like Devapala, Surapala and Narayanpala. Some of their inscriptions have been found on images. However, Magadh appears to have passed temporarily under the control of the imperial Gurjara Pratiharas of Kanauj, the inveterate rivals of the Palas. However, Pala King Naryanpala soon recovered the lost Kingdom. The district did not have any important event thereafter until the Afghans overran Bihar including the district of Gaya.

Muslim period

The District Census Handbook, 1961 further mentions that sometime after 1193 but before 1200 A. D. Mohammad-bin-Bakhtiyar Khilji invaded Bihar. He stormed Oddantapuri (Biharsharif) and Nalanda monasteries. Gaya suffered with other parts of the State. The invaders were intolerant of the monasteries and other non-Islamic religious institutions, and large-scale persecution of the monks and priests ensued. The monasteries and temples were ransacked and destroyed, the monks and priests were slain, and the idols broken. Those monks who could escape fled to Tibet, Nepal and southern India, and Buddhism was practically effaced from the land of its birth. Biharsharif became the headquarters of Muslim rulers in Bihar. Soon after Gaya was made a part of the Muslim *Subah* of Bihar. There is inscriptional evidence that Emperor Firoz Tughlak visited village Kako in Jehanabad subdivision on his way to Bihar.

The control of Bihar passed into the hands of the Sherqui dynasty of Jaunpur from 1394 to 1486, Gaya was thus tagged on with the Kingdom of Jaunpur, whose kings granted *jagirs* to Pathan Chiefs. Rajput and Bhumihar landlords also acquired some power. Sher Shah also held Gaya during

his ascendency to power. After the fall of his dynasty, the Mughals gained control of the district. In the last years of the Mughal empire when the central authority became weak, Gaya was overrun on a number of occasions by the armies of several aspirants to power. During the period of turmoil, the district was split up into a number of principalities, each maintaining its own army. The Raja of Tikari was a very powerful chief in the central part of the district. So was the Raja of Ramgarh in the western region. He openly defied the Viceroys of the Province. This state of affairs continued till the British finally succeeded in establishing their hold over the district.

British period

During the British period, there was no event of consequence except when Raja Ram Narayan, the Deputy Governor of Bihar, led an expedition to punish Bishun Singh, the Zamindar of Siris and Kutumba, on his refusal to pay revenue. Gaya became an integral part of the British empire after the battle of Buxar in 1764. Thereafter the East India Company gained full control over the lower provinces of Bengal. Gradually they built up the edifice of the elaborate administrative machinery wherewith the British governed India for two centuries. It was not till almost a hundred years later that the seething discontent over foreign domination found an organised and sustained expression in the Movement of 1857.

The Movement of 1857

Initially, the success of the movement led by the Rajput chief Kunwar Singh of Jagdishpur did not have much impact in the district of Gaya. The Collector of Gaya had been assured of assistance by the local people (particularly Gayawals). The news of further successes of the freedom fighters, however, goaded the wavering elements in Gaya and the Collector found a growing support for the national cause. He apprehended open defiance of his authority even from those who had, earlier pledged their support to him. The Collector immediately quit the town with the Government treasure. No sooner had he moved, the town was besieged by the nationalists. Gaya, which had practically forsaken the foreign yoke for a brief spell was restored to the British by a contingent consisting of Captain Rattray's Sikh soldiers and some British troops.

In the years following the 1857 movement, the Government took measures to tighten their grip over the Indians. The participants of the movement were crushed and the loyalists rewarded. The natural and innate yearning of the people for complete political independence could not, however, be suppressed for long. Gaya continued to have a prominent place in all freedom movements in the subsequent period. It also became a very important place in the annals of Freedom Movement on account of the famous session of the Indian National Congress at Gaya in 1922. Whatever happened thereafter is a matter of modern history and need not be recalled here.

(Source : District Census Handbook, 1961 & District Gazetteer, Gaya.)

Natural divisions

The district of Gaya is broadly divided into two distinct geographical units. The southern part is hilly region with a wide belt of brushwood jungle at their base. Much of this tract is barren and uncultivable because of the upward slope towards the south. The major portion of the cultivable land of the district, however, consists of flat alluvial plain which comprises the whole of Jehanabad subdivision and northern part of Sadar subdivision as well.

The entire southern boundary of the district is broken by a number of ridges and spurs projecting from the Chotanagpur plateau. The hills on the northern side are Bhindas and Jethian ranges, which extend from near Bodh Gaya north-eastward for a distance of about 65 Kms. with only two breaks and rises at the Hadia Hill to a height of 1472 feet. Of the hills that are isolated and scattered notable are the Barabar Hills, the Hasra, Pahra and Chirki Hills, the Brahmayoni Hill and a host of others. The hills on the southern border

of Gaya district are merely the northern scraps and outliers of the Palamu and Hazaribag plateaus.

Before the reorganisation of the old district of Gaya, the most important river was the Sone on the western border of the district but now it touches certain parts of Arwal block of Jehanabad subdivision only.

Phalgu is another important river which flows from south to north passing through the eastern part of the district headquarters. It is formed by the junction of the rivers Nilajan and Mohane some 3 Kms. below Bodh Gaya. Both these rivers are very turbulent when they enter the plains of Gaya as they are subject to high floods. In Gaya city itself, the rise in the level of the Phalgu at times affects the normal flow of traffic. But during the dry season, the river bed is simply a vast expanse of sand with a small serpentine stream winding its way through. The river Phalgu is hardly able to reach Poonpoon river in Patna district and only one of its branch in the shape of small *pyne* falls into the branches of the Poonpoon at Dewaria of Patna district. The river Phalgu is highly respected by the Hindu who offer 'Pind' (oblations) to their ancestors on its banks.

Climatic conditions

Gaya suffers from extremes of climate. It becomes very hot during the summer and quite cold during the winter. Summer begins in late March. May and June are extremely hot. The mercury shoots up to 46°C in shade in May. Gaya city is known for its dry and intense heat and is supposed to be one of the hottest places in India. This is mainly attributable to the barren rocky hills surrounding the city and vast sandy bed of the river Phalgu to its immediate east.

Rains set in during the second half of June bringing great relief to the heat oppressed people. The rainy season begins in June and lasts till the end of September or early October. The average normal rainfall in the district is 1,150 mm. The district receives more than 90 per cent of its total annual rainfall from the monsoon. The district gets some winter rain also.

Flora and Fauna

After separation and creation of Nawada as an independent district, Gaya is now left with only a small chunk of forests. There are two forest divisional headquarters at Gaya, viz., the Gaya Forest Division and the Gaya Afforestation Division.

The cultivable tract is, however, dotted with bamboo groves and mango orchards. Palm, tamarind, mango, *peepal* and banyan trees are commonly found near the village settlements. Among other trees in the region are *Bel*, *Neem*, *Siris*, *Seesum*, *Simal* and jack-fruit. The alluvial plain in the major portion of the district is a fertile country. Paddy, sugarcane and a great variety of food crops are extensively grown here. The Afforestation Division has taken up plantation of *Khair*, Eucalyptus, *Sisam*, Teak, *Siris*, Chakund, *Nim*, *Mahua*, etc.

There is a Gautama Buddha Wild Life Sanctuary declared under the Wild Life (Protection) Act, 1972. It is coming up as a tourist centre in the district.

Mines and Minerals

The geological formation of the hills and ridges from Bodh Gaya to Rajgir in Nalanda district is mostly quartzite. Great masses of granite and slate are also found in the southern hills. The granite found in the region has fine grains and is very homogenous.

Land-use pattern

The district is basically agricultural in character. In the northern and north-eastern region covering the whole of Jehanabad subdivision and a part of Gaya Sadar subdivision fertile alluvium is found. This is locally known as *Kewal* and is very suitable for growing paddy, wheat and sugarcane. The area falling under this region is well irrigated, fairly fertile and thickly populated. The entire agricultural operation is divided into two crop seasons, viz., *Kharif* and *Rabi*. *Kharif* is further subdivided into *Bhadai* and *Aghani* and *Rabi* into *Rabi* and *Garma*.

Rice is the main crop of the district. It accounts for the major portion of the gross area sown. Other important foodgrains grown are maize, pulses and barley. Sugarcane is the only cash crop grown in the district.

Irrigational facilities

The agricultural prosperity of Gaya depends on an extensive system of artificial irrigation. In the old days, mostly *pynes*, *ahars*, wells, etc., used to be utilised for artificial irrigation. After independence considerable attention has been paid to improve the irrigational facilities. Large amounts of money have been spent by the Irrigation, Agriculture and Revenue Departments of the State Government over various kinds of irrigation schemes. In addition to the above the Agriculture and Revenue Departments have also executed a number of medium irrigation schemes and minor irrigation schemes besides sinking a considerable number of surface percolation and open boring wells.

Industrialisation

The town of Gaya is practically the only manufacturing town in the district. The other place worth mentioning in the district is Guraru, where there is a sugar mill. Manpur which is situated to the east of Gaya town across the Phalgu river is an important belt of cottage industry. There are a number of families in Buniadganj and near Manpur who are engaged in weaving cloth on hand and power-looms. The main items of production are towels, bedsheets, *Dari*, coarse *Dhoti*, *Saree* and long cloth. Silk weaving is also carried on at Buniadganj. Stone carving is done at village Patharkatti in Atri block. The art of stone carving was introduced in this district about 200 years ago by some workmen of Jaipur brought from there to build the Vishnupad temple. There are also other industries which are engaged in production of Railway sleeper and hume pipes, etc. In the rural areas of the district mostly rice and floor mills are located. The district is, however, considered to be industrially backward.

Livestock

In the district of Gaya local breed of cattle are generally found but for draught purposes mostly *Bachaur* breed are preferred. Very few cows and bullocks of Haryana breed are also found. The bullocks are used mainly as draught animals. Some cows of Bhojpur and Sahiwal breeds of cattle are found for milk purposes. The local breed is not of very good quality. In recent years a redeeming feature has been noticed. Murra breed of buffaloes and Haryana breed of cows are becoming popular in the district. Generally bullocks are utilised for ploughing the land and drawing carts. In hilly areas and some other tracts he-buffaloes are also employed for these purposes.

According to the last cattle Census, the number of different types of cattle is as follows :—

Cows	535,441	Sheep	31,734
Buffaloes	332,748	Pigs	56,128
Goats	330,153	Chicken	345,503

In order to control animal diseases a number of veterinary hospitals, dispensaries, etc., have been opened in the district. For improving the breed of the cattle quickly and at a low cost, artificial insemination centres with sub-centres are in operation in the district.

Cattle fairs and shows are held every year at Bhusunda, Sherghati, Mahkar (Amraut), Barachatty and Dharhar in Sadar subdivision and at Kako, Manikpur and Tehta in Jehanabad subdivision.

Hides and bones from the district are exported to Calcutta and Madras as there is no tannery in the district.

Trade and Commerce

The chief centres of trade in the district are located at Gaya, Tekari, Sherghati, Bankey Bazar, Jehanabad and Arwal. The trade consists mainly of export of oil-seeds, *gur*, hides, stone chips and vegetables. The principal imports are coal, cloth, kerosene oil, tea, cotton, timber, tobacco, spices, dried and fresh fruits, paper and other consumer goods.

The district is covered with a net work of markets consisting of a number of permanent shops

dealing mainly in grains and vegetables. The important markets normally meet daily and commodities are brought to the markets for sale. Gaya sadar subdivision contains approximately 22 markets whereas Jehanabad subdivision has 13 markets to its credit. In the rural areas of the district *Hats* (village markets) function usually twice a week.

Public distribution system has been introduced in urban as well as in rural areas of the district since long. Essential commodities like sugar, kerosene oil, coarse cloth, wheat, rice, cement are distributed through public distribution system.

Communications

The district of Gaya is well served by a network of roads. The famous Grand Trunk Road (National Highway No. 2) cuts across the southern part of the district from east to west and passes *via* Sherghati town in the district. This road has put the district on the road map of India and provides easy transport facility to Calcutta in the east and Delhi in the west. Apart from the above, the State Public Works Department maintain black-topped roads in the district. Important among them are the roads connecting (i) Nawada-Gaya, (ii) Jehanabad-Ekangarsarai, (iii) Gaya-Dobhi and (iv) Gaya-Jehanabad. The district is now a well knit unit with good macadamised roads and a number of buses ply on them including the State buses managed by the Bihar State Road Transport Corporation.

Gaya City is on the Grand Chord Section of the Eastern Railway, and is connected with Patna by the Patna-Gaya Branch line. The eastern part is served by the South Bihar section of the Eastern Railway. It leaves the main line at Kiul, cuts across Nawada district and joins the Grand Chord line at Manpur near Gaya on the other side of the river. Apart from the above a section runs through the south-eastern portion and stretches from Gaya to Dhanbad.

Since most of the rivers in the district are shallow and become dry during the summer, there is not much of the river communication.

Electricity and Power

The district receives its entire power supply from the Damodar Valley Corporation. The power house in Gaya City was taken over by the State Government some years ago. When the D. V. C. power became available, this power house became defunct. All the towns of Gaya have electricity. In the rural areas, the pace of electrification is comparatively slow. However, considerable attention is now being paid for rural electrification and recently a large number of villages have been electrified. In all over 20 power sub-stations have been installed in the different parts of the district. Domestic and commercial use accounts for a considerable part of power consumption.

Social and Cultural events and Natural and Administrative development

The district of the Gaya got trimmed after separation and creation of Nawada and Aurangabad as independent districts which earlier were subdivisions of this district. As a result of reorganisation of districts, Gaya is now left with only 25 community development blocks and 5 towns. It now forms part of the newly created Magadh Division. Gaya City is the headquarters of Gaya district as well as the headquarters of Magadh Division.

Gaya celebrates *rathayatra* and *gopastami melas* at different parts of the year with great pomp during the period of *pitripaksha mela* Hindus from all over India come to offer *Pindas* (oblations) to their deceased ancestors.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL, AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Amethi

The village lies in Wazirganj block, about 3 Kms. north of Wazirganj Railway Station. Several stone images have been found near a tank in village. Lord Buddha is believed to have stayed in the village for a day. To commemorate the event, an annual fair is held on the occasion of *Shivaratri*.

2. Anand Garh Palace

The palace is situated about 5 Kms. south-west of Karpi block headquarters and is noted for its picturesque surroundings, and beautiful gardens and tanks. The buildings and embellishments represent fine specimens of architecture and sculpture.

3. Arsi Kalan (Bhura)

The village is situated in Gurua block about 3 Kms. west of Gurua Police Station. It is known for its perennial spring. The place is considered to be holy as it was the traditional place of abode of the ancient sage Shringi Rishi. Two large fairs are held in the villages, one on the day of *Chaitra Sankranti* in the month of April and the other on the occasion of *Kartik Purnima* in the month of November.

4. Bakruar

The village lies in Bodh Gaya block on the bank of the river Niranjana about 14 Kms. south of Gaya.

It is believed that Lord Buddha on his penance and eventual enlightenment was offered *Khir* (rice pudding) by Sujata here. There is a mound in the village known as *Sujata Kutir*, said to cover the site of her original home. Buddhists and others often come to the village to see the historical mound.

5. Bhelawar

The village is situated in Kako block, about 11 Kms. south-east of Jehanabad Railway Station. It is known for its ancient temple of Lord Shiva. The remains of the stone gates of the temple compound can still be seen on the outskirts of the village. Sculptures of Hindu and Muslim periods have been discovered here. A large fair is held annually on the occasion of *Shivaratri*.

6. Bhaikh

The village is located at a distance of about 11 Kms. from Makhdumpur, the block headquarters. It contains a hillock known as Sidheshwar Nath, on the summit of which there is the divine emblem of Lord Shiva. The hill contains two caves, Karnachaupar and Sudama, attributed to Emperor Ashoka. The third is believed to have been the abode of a sage and is accordingly named after him as Lomash Rishi cave. Nearby is a lake called the *Patal Ganga*, said to have been excavated by Emperor Ashoka. The place was visited by the Chinese pilgrim, Hiuen Tsang and finds mention in his travel accounts.

7. Bodh Gaya

It is a place of international renown where Buddha attained enlightenment more than 2,500 years ago. It is situated on the left bank of river

Niranjana, about 12 kms. south of Gaya and is also the headquarters of the block of the same name. The chief objects of veneration are the Mahabodhi temple, a portion of which is believed to be more than two thousand years old, and the *Peepal* tree nearby, under which Buddha sat in meditation before he got enlightenment. The present tree is considered to be sacred, as it is believed to have sprung out of a sapling from the original tree under which Buddha sat. A number of monasteries and temples have been built lately by several Buddhist countries in their own architectural designs. There is also a museum containing rare Buddhist relics. The place is regarded as the holiest of the holy by the Buddhists, and a large number of visitors are attracted from far and near. Vinoba Bhave had also set up a centre (ashram) for carrying on developmental activities (Sarvodaya).

8. Burhgere (Budhgere)

It is located at a distance of about 5 kms. from Gaya on the Gaya-Nawada Road in Manpur block. It is village with historical association. It is believed that Buddha made a brief sojourn here in course of his journey from Bodh Gaya to Rajgir. The ruins of a fortress in the village seem to vouch for its antiquity.

9. Choar

It is an ancient village in Wazirganj block situated about 19 kms. south of Wazirganj Railway station. It contains a temple of Lord Shiva, which is said to be very old. A mysterious phenomenon about the worship at this temple is that water poured on the *lingam* disappears instantaneously.

10. Dharmaranya

The place is situated at a distance of 3 Kms. from Bodh Gaya and is located near village Silaunza on river Mahane. It is said that Yudhishthira performed a *yagnya* (sacrificial offering) at this place some time after the epic war of Mahabharata. A pond and a few small but well designed temples dedicated to different Gods are believed to be associated with this event. The place is also held to be holy by the Buddhists, as Lord Buddha is believed to have meditated here for some time.

11. Gaya City

It is one of the most ancient towns of India and regarded as an important place of pilgrimage by the Hindus all over India. Pilgrims from far and near come to offer oblations to their deceased forefathers. It is believed that the offering of *pindas* at Gaya entitles the souls of the departed to a place in heaven. A large number of pilgrims come during the *pitripaksha* (a fortnight dedicated to fathers) every year.

The present building of the famous Vishnupad was built by Rani Ahilya Bai. Inside the temple, there are marks believed to be the footprints of Lord Vishnu. On the road leading to the Vishnupad Temple, there is a tank called the Suraj Kund, and to the west of the tank stands a temple dedicated to the Sun God. This is a very famous temple and contains a fine figure of the Sun God. Gaya has many other sacred tanks and temples. The temple of *Dukh Harni Mai* and the Jumma Masjid are well known places of tourist interest.

Gaya is an important Railway Junction on the Grand Chord line of the Eastern Railway and is the headquarters of Gaya district and the newly created Magadh Division.

12. Ghejan

It is an ancient village in Kurtha block, situated about 19 Kms. south-west of Jehanabad. It contains an old fortress where stone images of the Gupta period have been found. These are preserved in the museum at Patna.

13. Ghora Ghat

The village is situated on the bank of river Lilajan, 24 Kms. south-east of Sherghati, the block headquarters. A barrage has been built across the river at this point and the Lilajan Canal System originates from here. A small township has sprang

up and the place assumes great scenic beauty during the rainy season. A large number of people visit the barrage site.

14. Guneri

It is an old village situated about 10 Kms. south-west of Gurua block. A large number of images of Lord Buddha have been found in this village.

15. Kako

The village is the headquarters of the block of the same name and is situated on the Jehanabad-Biharsharif road, about 10 Kms. east of Jehanabad Railway station. According to a local legend, Ramchandra's stepmother, Rani Kaikeyi of Ayodhya lived here for sometime and the village took its name after her. The village has also a tomb of Hazrat Bibi Kamal Sahiba, a great Muslim lady saint. It is said that this lady was the aunt of Hazrat Makhdum Saheb of Biharsharif and possessed divine powers. A large number of devotees from all over Bihar come to offer prayers and obtain her blessings.

There is a temple in the north-east corner of the village. A very old image of the Sun God is installed in it. A large number of people visit the temple on Sundays.

16. Kenar Paharpur

It is an old village in Wazirpur block, famous for brass metal products. Ancient statues of Lord Buddha and others are seen in many houses and some of them are available for sale also.

17. Kespa

The village lies in Tikari block, 13 Kms. from the block headquarters. It has an old and famous temple of Tara. A large number of devotees assemble here in the month of *Chaitra* to offer prayers to the Goddess. Images of Lord Buddha and other Gods have been found here in the course of excavations.

18. Konch

The village, which is the headquarters of Konch block, is situated at a distance of 30 Kms. from Gaya on the Gaya-Goh Road. It has a big brick-built temple dedicated to Lord Shiva, said to have been built in the 15th century A. D. by Bhairavendra. Among other sculptures found in the temple, the most notable one is a slab on which various incarnations of Lord Vishnu are depicted.

19. Kurkihar

The village lies about 5 Kms. north-east of Wazirganj. The village has a well known temple dedicated to Goddess Bhagwati, and there are some beautiful old stone images in the courtyard of the temple. According to a local legend, Lord Krishna's consort, Rukmini's father hailed from this village.

A remarkable collection of bronze antiquities of the Buddhist period has been obtained from this village and kept in the Patna Museum.

20. Rameshwar Bagh

It is a beautiful mango grove situated on the Tikari-Gaya road at a distance of about 6 Kms. from Tikari. Inside is the palace of Tikari Raj having doors and windows and also a tank. It is a favourite picnic spot.

21. Sandeshwar

The place is situated 5 Kms. from Fatehpur. It is famous for an old temple of Lord Shiva constructed some three centuries ago. It is said that the *Shiva Linga* enshrined in that temple emerged by itself from the earth. Every year on the occasion of *Shivaratri*, a big fair is held.

22. Sonepur

The village is situated on the bank of the river Jamune, 3 Kms. west of Belaganj. It is noted for its temple dedicated to the Sun God, and held in very high esteem by the local people. A fair is held here on the occasion of *Chhathha* festival.

23. Tikari

It is the headquarters of the block of the same name. It used to be the seat of the erstwhile Tikari Raj. The fort at Tikari was built by Sundar Singh, son of Dhir Singh, the founder of estate. Though now it is deserted and dilapidated, it still stands as a magnificient relic of the good old days.

24. Utren

This is a big village situated in Konch block at a distance of 24 Kms. from Gaya on the Gaya-Goh Road. To the south of it, there are remains of a fort said to be some 600 years old. Some dome-like structures can still be seen on the fort. The fort is believed to have been built by a Nawab.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Hand book which is fairly comprehensive and uniform is among the traditional documentation of the census organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statement of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new statement (IV-A) on civic and other amenities for each area/locality identified as slum in Class I and II town has been added.

Primary Census Abstract which forms part of the District Census Handbook provides basic infor-

mation such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the General Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Census, 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or tolas) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census, the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census Towns by the Director of Census Operations since they satisfied the required following criteria:

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census Towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population nnd excluded from non-agricultural population for the purpose of this criterion.

Towns are further classified into the following six classes according to their population size :

I	1 lakh and above (termed as city)
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below.

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or stair case, etc. used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Occupied residential house – 'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household – A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate – A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of Work – Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker – Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main Worker – If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal Worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker – If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes – Under Articles 341(1) and 342(1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477 A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976), dated

18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar.

ANALYSIS OF DATA

Population, number of villages and towns

The district of Gaya, with a population of 3,134,175 is divided into 25 Community Development Blocks consisting of 3,513 inhabited villages (out of a total number of 3,873 villages) and 5 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1 — Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Gaya Town C. D. Block	344,941	184,823	160,118	97,866	52,580	45,286	247,075	132,243	114,832	107	92	1

25	Ghosi	157,478	80,482	76,996	157,478	80,482	76,996	...	...	...	156	151	...
	Total	**3,134,175**	**1,597,238**	**1,536,937**	**2,794,171**	**1,415,928**	**1,378,243**	**340,004**	**181,310**	**158,694**	**3,873**	**3,513**	**5**

Among the C. D. Blocks, Gaya Town Block with 11.00 per cent of the population of the district occupies the first place followed by Arwal with 5.47 per cent. The least populated C. D. Block is Dumaria with only 1.93 per cent of population of the district although it consists of a larger number of inhabited villages than serveral other C. D. Blocks.

Gaya district which has been reduced in size after its bifurcation and formation of Nawada and Aurangabad districts appears to have had less impact of urbanisation since 89.2 per cent of the population lives in villages. The total urban population contained in 5 towns is of the order of only 10.8 per cent of the population of the district. Barring Gaya (Municipality) with a population of about 2.47 lakh none of the four towns, viz., Bodh Gaya (NAC), Sherghati (NAC), Tikari (M) and Jehanabad (M) fall either in class I (population 1 lakh and above) or class II (50,000—99,999) range. The district does not have any urban agglomeration either.

Decadal change in population

With the exclusion of certain parts to form the new districts of Nawada and Aurangabad after 1971 Census and for the sake of comparability of data with 1981 Census data the figures of Gaya district for 1971 have been recast. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Gaya Town C. D. Block	250,298	70,414	179,884	344,941	97,866	247,075	+37.81	+38.99	+37.35

Mohanpur	76,315	76,315	...	94,159	94,159	...	+23.38	+23.38	...
Barachatti	73,398	73,398	...	91,933	91,933	...	+25.25	+25.25	...
Jehanabad	99,677	70,479	29,198	126,958	82,323	44,635	+27.37	+16.81	+52.8
Makhdumpur	116,638	116,638	...	138,901	138,901	...	+19.09	+19.09	...
Kurtha	134,302	134,302	...	159,826	159,826	...	+19.00	+19.00	...
Karpi	116,403	116,403	...	137,578	137,578	...	+18.19	+18.19	.
Arwal	146.983	146,983	...	171,593	171,593	...	+16.74	+16.74	...
Kako	76,075	76,075	...	91,435	91,435	...	+20.19	+20.19	...
Ghosi	131,781	131,781	...	157,478	157,478	...	+19.50	+19.50	...
Total	**2,547,442**	**2,307,645**	**239,797**	**3,134,175**	**2,794,171**	**340,004**	**+23.03**	**+21.08**	**+41.7**

It would appear that the rise in the population of this district during the 1971–81 decade has been of the order of 23.03 per cent. The rural population in the district has increased by 21.08 per cent while urban population growth over the decade has been as much as 41.79 per cent.

As shall be evident from the table, among the Development Blocks, Gaya Town has shown the highest increase in population over the decade with 37.81 per cent followed by Amas and Gurua with 30.47 and 28.94 per cent respectively. The increase in rural population during 1971-81 has also been the highest in these three C. D. Blocks, Gaya (38.99 per cent), Amas (30.47 per cent) and Gurua (28.94%). As regards the growth in urban population Bodh Gaya registered a phenomenal rise with 125.66 per cent during the decade. It is followed by Jehanabad (52.87 per cent) and Tikari (41.16 per cent). Gaya town, the headquarters of the district had an increase of 37.35 per cent during 1971–81. Comparatively slow rise in urban population in Gaya town which is the headquarters of the district can be attributed mainly to the slow industrial and commercial growth.

Villages classified by population range

The distribution of villages by their population ranges is given in the table below in six size groups :

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
–200	510	14.52
200–499	1,112	31.65
500–1,999	1,641	46.71
2,000–4,999	236	6.72
5,000–9,999	12	0.34
10,000+	2	0.06
Total	**3,513**	**100.00**

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499. The medium size villages (500—1,999) thus account for as much as 46.71 per cent of the total number of inhabited villages in the district. The large villages (2,000—4,999 and 5,000—9,999) comprise only 7.06 per cent whereas very large villages (10,000 and above) form a very small proportion with only 0.06 per cent of the total number of inhabited villages in the district. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 and in the composite old Gaya district it was only 660.

Villages by density

The density of population is defined as number of persons per sq. Km. It indicates the extent of crowding in a particular area. The distribution of villages by their density in the district is given in the Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
–10	10	0.28
11–20	23	0.66
21–50	53	1.51
51–100	69	1.96
101–200	224	6.38
201–300	392	11.16
301–500	1,118	31.82
501+	1,624	46.23
Not known	..	..
Total	**3,513**	**100.00**

The data presented in the table above highlight the fact that maximum proportion of villages in the district lies in the density range of 501 and above with 46.23 per cent followed by villages falling in the density range of 301—500 with 31.82 per cent.

It would further be seen that a very small number of villages fall in the density range below 300

implying thereby that number of thinly populated villages in the district is quite low.

Proportion of Scheduled Caste/Tribe population in villages and towns

Tables 5, 6 and 7 furnished hereafter indicate the proportion of the population of the Scheduled Castes and Scheduled Tribes in the villages and towns of the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Tribes at micro-level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes Population to Total Population in the villages

Percentage range of Scheduled Caste population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	231	6.58
5 or less	125	3.56
6 – 10	203	5.78
11 – 15	302	8.60
16 – 20	363	10.33
21 – 30	786	22.37
31 and above	1,503	42.78
Total	**3,513**	**100.00**

From the table above it is apparent that there are as many as 1,503 villages, accounting for 42.78 per cent of the total number of inhabited villages in the district, where more than 30 per cent persons belong to the Scheduled Castes. This is followed by villages where the population of the Scheduled Castes ranges between 21 and 30 per cent of total population and these villages which number 786 account for 22.37 per cent of total number of inhabited villages. It is interesting to note that the proportion of villages varies in direct relation to the percentage content of the Scheduled Caste population in the total population. There are only 6.58 per cent of the villages in the district which do not have any Scheduled Caste population.

Table 6—Proportion of Scheduled Tribes Population to Total Population in the villages

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	3,457	98.40
5 or less	48	1.37
6—15	3	0.08
16 – 25	2	0.06
26 – 35	..	..
36 – 50	1	0.03
51 and above	2	0.06
Total	**3,513**	**100 00**

It would appear from the table above that there are only 56 villages which have a population of the Scheduled Tribes. Even among these, in 48 villages the population of the Scheduled Tribes is as low as 5 per cent or less of the total population. There are as many as 3,457 villages accounting for 98.40 per cent of the total number of villages in the district which have no Scheduled Tribe population at all.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes Population in Towns

Name of the town	Total Population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Bodh Gaya	15,724	5,079	...	32.30	...
Gaya	247,075	23,326	200	9.44	0.08
Jehanabad	44,635	5,871	24	13.15	0.05
Sherghati	20,289	3,334	20	16.43	0.10
Tikari	12,281	1,448	13	11.79	0.11
All Towns	**340,004**	**39,058**	**257**	**11.49**	**0.08**

Table 7 indicates that the concentration of the Scheduled Caste population in the towns of Gaya district is much less compared to the rural areas, being only 11.49 per cent of the total population. The highest percentage of Scheduled Caste population is contained in Bodh Gaya town with 32.30 per cent followed by Sherghati with 16.43 per cent of the total population. The urban population content of the Scheduled Tribes is almost negligible in all the 5 towns of the district as has been observed in case of the rural areas also.

Literacy rates by population ranges of villages and towns

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 furnished below gives the literacy rates by villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately :

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
–200	510	16.58
200–499	1,112	21.81
500–1,999	1,641	27.18
2,000–4,999	236	30.65
5,000–9,999	12	34.78
10,000+	2	37.08
Total	**3,513**	**27.32**

It would be seen that literates form 27.32 per cent of the population in the rural areas of the district as against 52.70 per cent in the urban areas. In the rural areas it is interesting to note that the literacy rate varies directly in relation to the population range of the villages The highest percentage of literacy rate can be observed for the villages in the population ranges of 10,000 and above and 5,000—9,999 with 37.08 and 34.78 percent literates respectively and the lowest in the population range of less than 200 with only 16.58 per cent as literates.

Table 9—Literacy rates for towns

Name of Town	Literacy rate
Bodh Gaya	30.49
Gaya	55.99
Jehanabad	45.52
Sherghati	46.35
Tikari	51.58
All towns	**52.70**

Among the towns, Gaya, being the district headquarters, has the highest percentage of literate population (55.99%) followed by Tikari with 51.58 per cent of literate population. Of the remaining three towns, viz., Sherghati, Jehanabad and Bodh Gaya while the first two towns have more or less an equal proportion of literate population though much less as compared to Gaya town, the last town has substantially less proportion of literate population, probably because it has attained statutory urban status only in 1971.

Workers and non-workers in rural and urban areas

Table 10 on next page gives the break up of literates, workers, non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks.

Table 10—Literates, Workers, Non-workers, Scheduled Castes/Scheduled

Percentage

Workers in the district of Gaya account for 32.63 per cent of the total population whereas the number of non-workers is as high as 67.37 per cent. As shall be evident from the Table 10 the main workers (i. e., those who had worked for 6 months, i. e. 183 days or more during the reference period of 1 year) comprise 30.81 per cent of the total population which is very close to the percentage of the total workers in the district implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to total working population is very insignificant in the district being only 1.82 per cent. The same trend can be observed in the rural and urban areas of the district as also in most of the development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 48.42 and 47.74 per cent respectively for males as against 16.22 and 13.21 for females which indicates that the participation of females in the economically productive work is quite low.

Another notable feature is the higher percentage of female marginal workers (3.01%) vis-a-vis male marginal workers (0.68%). It can be seen that the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of main workers to the total population is higher in the rural areas (31.62%) than in the urban areas (24.19%). The same pattern is perceptible in the case of marginal workers who constitute 1.98 per cent of the rural population but only 0.05 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities whereas in the urban areas household industries and other works do not offer equal job opportunities in view of limited urban development.

Village by availability of different amenities

Table 11 below gives the distribution of the villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (With Percentage) of villages having one or more of the following amenities: Education	Medical	Drinking Water	Post and Telegraph	Market/ *Hat*	Communications	Approach by *Pucca* road	Power Supply

	Total	**3,513**	**2155(61.34)**	**417(11.87)**	**3,513(100.00)**	**450(12.81)**	**120(3.42)**	**490(13.95)**	**534(15.20)**	**1,839(52.35)**

Educational amenity—There are as many as 2,155 villages accounting for 61.34 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Arwal with 84.92 per cent followed by Dumaria block with 81.82 per cent. The lowest number of villages with educational facility is in the development blocks of Barachatti and Mohanpur with 35.23 and 37.93 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low in that only 11.87 per cent villages have it. Among the development blocks Kako block has the largest proportion of villages where medical facility is available, the percentage being 21.51. Imamganj block, on the other hand has the lowest number of such villages with only 4.69 per cent of the total villages enjoying medical facility.

Drinking water—Interestingly, it would be seen from the table that drinking water facility is generally available in all the villages of the district of Gaya.

Post and Telegraph—Postal facilities (Post and telegraph) are available only in 450 villages (12.81%) in the district. Arwal block has the maximum number of villages having post and telegraph facility (25.40%) followed by Makhdumpur (23.81%) and Karpi (21.10%). In the remaining development blocks of the district the number varies from a minimum of 4.93 per cent in Mohanpur to a maximum of 19.31 per cent in Konch block.

Market/Hat—The villages where market/*hat* is held constitute only 3.42 per cent of the total number of villages in the district. As can be seen from the table in Manpur block of the district the facility of market/*hat* does not exist in any of the villages while in another block Gaya town this facility is available only in one village. In the remaining 23 blocks the number of villages where market/*hat* is held varies between 2 and 12.

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 13.95 per cent of the villages are connected by one means of communication or the other. The majority of the villages are still devoid of this facility. A development blockwise break up of villages having any means of communication is given in the table. It would be seen that Gaya town block comprises highest proportion of villages (32.61%) which are connected by bus or rail or navigable river/canal, etc., followed by Manpur with 31.17 per cent and Atri with 26.81 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between 3.08 in Fatehpur block and 22.16 per cent in Kurtha block.

Approach road to village—With only 15.20 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Gaya Town block with 38.04 per cent villages having *pucca* approach road tops the list, followed by Khizirsarai and Konch blocks with 27.45 and 24.83 per cent respectively. The development blocks which have the lowest number of villages having this facility are Fatehpur (1.54%), Imamganj (4.17%) and Mohanpur (4.43%) while none of the villages in Dumaria block have this facility.

Power supply—The electrified villages in the district constitute 52.35 per cent of the total number of villages. The power supply in these villages is utilised for either agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Kako development block occupies the first position having the maximum proportion of electrified villages (90.32%) followed closely by Belaganj, Khizirsarai and Jehanabad with 86.73, 85.29 and 84.69 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Dumaria (0.91%), Mohanpur (15.76%) and Arwal (16.67%).

Proportion of rural population served by various amenities

While in Table 11 we have discussed details regarding number of villages possessing educational,

medical and other amenities, Table 12 furnished below gives the proportion of rural population served by these amenities :

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total Population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking Water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power Supply
1	2	3	4	5	6	7	8	9	10	11

11	Belaganj	112,607	93.37	37.91	100.00	35.08	8.22	19.87	23.38	90.55
12	Khizirsarai	92,230	90.81	27.04	100.00	33.54	6.15	32.02	39.14	92.28
13	Atri	137,092	90.53	34.12	100.00	41.19	9.96	31.64	18.11	66.86
14	Manpur	67,826	89.93	21.77	100.00	27.00	...	44.83	32.71	62.03
15	Wazirganj	147,106	80.30	24.94	100.00	24.50	6.69	33.30	33.36	77.05
16	Fatehpur	129,854	73.79	23.70	100.00	25.90	16.34	14.96	4.77	41.30
17	Mohanpur	94,159	63.67	14.49	100.00	13.81	8.52	8.25	6.75	25.07
18	Barachatti	91,933	64.13	15.08	100.00	16.00	7.34	6.85	11.55	46.51
19	Jehanabad	82,323	93.14	20.40	100.00	28.36	4.17	20.34	20.40	89.18
20	Makhdumpur	138,901	90.78	29.09	100.00	43.68	4.79	15.02	18.44	69.19
21	Kurtha	159,826	88.65	23.69	100.00	40.49	8.50	29.40	26.01	82.65
22	Karpi	137.578	93.83	36.60	100.00	50.03	17.22	22.75	24.58	61.79
23	Arwal	171,593	95.42	33.08	100.00	43.22	22.23	25.71	38.11	19.84
24	Kako	91,435	88.01	39.76	100.00	31.59	16.96	36.58	34.02	93.71
25	Ghosi	157,478	91.53	20.02	100.00	35.43	10.50	12.19	12.86	78.51
	Total	**2,794,171**	**83.91**	**24.23**	**100.00**	**29.81**	**9.26**	**22.89**	**23.23**	**63.54**

It would be seen that educational facility is available to 83.91 per cent of the rural population in the district. The proportion varies between the maximum of 95.42 per cent in Arwal block and the minimum of 62.75 per cent in Gurua block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less, being 61.34 per cent (vide Table 11) than the proportion of population which is as high as 83.91 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 24.23 per cent which is also more than double the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Villages according to land-use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place. The following table gives the percentage of culturable area as also the proportion of irrigated area to the total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land use

Sl. no.	Name of the Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Gaya Town C. D. Block	92	15,710.62	84.55	57.99
2	Bodh Gaya	128	22,191.01	82.55	61.57
3	Sherghati	143	22,698.58	87.54	60.98
4	Amas	172	25,484.71	59.11	49.18
5	Imamganj	192	30,201.52	58.55	60.68
6	Dumaria	110	30,667.84	42.39	31.94
7	Gurua	167	18,242.97	87.40	70.59
8	Paraiya	134	25,593.02	78.24	62.01
9	Konch	145	29,298.23	87.28	58.05
10	Tikari	148	22,893.73	83.47	73.31
11	Belaganj	113	19,739.51	83.06	21.31
12	Khizirsarai	102	18,136.58	77.62	66.67
13	Atri	138	38,271.13	84.73	53.01
14	Manpur	77	12,323.97	85.82	61.05
15	Wazirganj	191	35,209.59	82.78	49.44
16	Fatehpur	195	37,513.26	61.77	49.31
17	Mohanpur	203	32,348.10	61.94	53.62
18	Barachatti	193	34,124.67	45.53	29.24
19	Jehanabad	98	13,959.84	90.47	62.48
20	Makhdumpur	126	24,106.83	85.63	61.27
21	Kurtha	167	24,062.36	87.61	89.10
22	Karpi	109	25,073.99	87.37	77.72
23	Arwal	126	26,034.18	80.79	81.16
24	Kako	93	13,133.53	91.38	85.70
25	Ghosi	151	26,882.45	84.86	73.73
	Total	**3,513**	**624,902.22**	**75.43**	**60.27**

It would be apparent from the table 75.43 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 60.27 per cent area is irrigated. Among the C. D. blocks the highest percentage of cultivable area is found in Kako block with 91.38 per cent closely followed

by Jehanabad with 90.47 per cent, Kurtha, Sherghati, Gurua and Karpi with 87.61, 87.54, 87.40 and 87.37 per cent respectively. The lowest cultivable area is found in the Dumaria block with only 42.39 per cent land under cultivation.

The highest proportion of irrigated area to the total cultivable area is to be found in Kurtha block accounting for 89.10 per cent followed by Kako with 85.70 per cent and Arwal block with 81.16 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Belaganj block (21.31%). In the remaining blocks the percentage varies between 29.24 per cent and 77.72 per cent.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also indicates the variation in density and sex-ratio in the urban population of the district in relation to the State :

Table 18—Growth, Density and sex-ratio of urban population in the district in relation to the State

	District						State					
Census year	Total Population	Urban Population	%Urban Population	Decadal percentage variation in Urban population	Density (Population per Sq. Km.)	Sex-ratio (No. of females per 1,000 males)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in Urban population	Density (Population per Sq. Km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,760,660	159,432	9.06	+23.79	2973	870	38,782,271	2,626,261	6.77	+38.14	2320	842
1961	2,075,270	196,930	9.49	+23.52	2392	847	46,447,457	3,913,920	8.43	+49.03	1915	811
1971	2,547,442	239,797	9.41	+21.77	3100	855	56,353,369	5,633,966	10.00	+43.95	2032	807
1981	3,134,175	340,004	10.85	+41.79	4152	875	69,914,734	8,718,990	12.47	+54.76	2727	832

As shall be evident from the table, the rise in the proportion of the urban population to the total population in the district of Gaya has been very tardy over the decades from 9.06 per cent in 1951 to 10.05 per cent in 1981 as compared to that of the State which has shown an increase from 6.77 per cent in 1951 to 12.47 per cent in 1981. It is also interesting to note that the proportion of urban population to total population of Gaya district remained higher as compared to that of the State in the first two decades.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. The urban population has more than trebled itself over the last three decades. The trend of the growth of urban population in the State has been quite different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade. The decadal percentage growth in the urban population of Gaya district has steadily declined from 23.79 in 1941—51 to 21.77 till 1961—71 but in 1971—81 the district registered a rise of 41.79 per cent in urban population.

The density of population in the urban areas of the district has also increased appreciably over the decades from 1961 onwards as shall be evident from column 6 of the table. The density of population was less in 1961 than in 1951 but thereafter it has steadily increased. Between 1951

and 1981 the density of the urban population has increased from 2,973 persons per Sq. Km. to 4,152 persons per Sq. Km. This clearly indicates that the towns of Gaya district are gradually becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of the urban population of the State on the other hand had not shown a similar rise till the 1971 Census. In 1981 Census, the density of the urban population of the State had shown a considerable increase having risen from 2,032 in 1971 to 2,727 in 1981 but it was still much lower than that of Gaya district which stood at 4,152 persons per Sq. Km.

The sex-ratio for the urban areas of Gaya district is more favourable for females in all the successive Censuses than for the urban areas of the State. The demographers may like to study this phenomenon in detail to ascertain the reason thereof.

Towns added and declassified in 1981

There are 5 towns, viz., Gaya (M), Bodh Gaya (NAC), Jehanabad (M), Sherghati (NAC) and Tikari (M) in the district of Gaya. In 1971 Census also the position was the same. No new town has been added in 1981 Census nor has any town been declassified in the present Census. Hence this table has not been presented.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name and Civic status of the town.	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on Public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV. Bodh Gaya (NAC)	0.94	0.62	0.32	1.33	0.56	0.23	0.37	...	0.17
I. Gaya (M)	22.32	8.93	13.39	28.46	0.58	6.80	2.71	0.09	18.28
III. Jehanabad (M)	26.80	1.76	25.04	26,09	2.29	18.31	1.29	...	4.20
III. Sherghati (NAC)	2.06	1.56	0.50	1.48	0.77	0.04	0.64	...	0.03
IV. Tikari (M)	21.14	1.13	20.01	17.45	8.14	7.92	...	...	1.39
Total	**20.67**	**6.88**	**13.79**	**24.89**	**1.09**	**7.65**	**2.19**	**0.07**	**13.89**

It would be apparent from the above figures that the per capita receipt through all other sources is the highest in Jehanabad (M) followed by Tikari (M), and Gaya (M). However, total per capita receipt is higher in Gaya (M) than in Tikari (M) because the former has the highest per capita receipt through taxes. Bodh Gaya (NAC) has the lowest per capita receipt both through taxes and through all other sources.

Per capita expenditure is the highest in Gaya (M) followed by Jehanabad (M) and Tikari (M). However, the per capita expenditure incurred on general administration is observed to be higher in Tikari (M) as compared to the other four towns. The per capita expenditure on public works and other aspects is again the maximum in case of Gaya (M).

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns. The following table gives details of different categories of educational institutions per 10,000 population in different towns of the district :

Table 21—School per ten thousand population in towns

Class, name and Civic status of the town	Number per ten thousand population			
	Higher Secondry/Inter/PUC Junior College	Secondary/Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV. Bodh Gaya (NAC)	..	0.64	0.64	3.82
I. Gaya (M)	0.04	0.85	2.47	3.56
III. Jehanabad (M)	..	0.90	2.02	3.36
III. Sherghati (NAC)	..	0.99	3.94	3.45
IV. Tikari (M)	..	3.26	3.26	8.96
Total	**0.03**	**0.94**	**2.44**	**3.74**

It would be seen from the above table that institutions such as Higher Secondary School/Inter/ PUC/Junior College are only situated in Gaya (M) accounting for an average of 0.04 institution per ten thousand population. As regards Secondary/ Matriculation level schools there are on an average, 3.26 schools per ten thousand population located in Tikari (M) which is the highest followed by 0.99 such school per ten thousand population in Sherghati (NAC). Sherghati (NAC) has the highest number of junior Secondary/Middle Schools in the district with an average of 3.94 such schools per 10,000 population closely followed by Tikari (M) with an average of 3.26. The average number of primary schools in the urban areas of the district is 3.74 per ten thousand population. In this category Tikari (M) has the highest number of schools with an average of 8.96 per 10,000 population.

Beds in the medical insititutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns :

Table 22—Number of beds in medical institutions in towns

Class, name and civic Status of the town	Number of beds in medical institutions per 1,000 population
1	2
IV. Bodh Gaya (NAC)	..
I. Gaya (M)	2.89
III. Jehanabad (M)	0.69
III. Sherghati (NAC)	0.30
IV. Tikari (M)	0.98
Total	2.24

The number of beds in Medical Institutions per 1,000 population for urban areas of the district works out to 2.24. This is the highest in case of Gaya (M) having 2.89 beds per 1,000 population and the lowest in Sherghati (NAC) with only 0.30 beds per 1,000 population. Bodh Gaya (NAC) does not have this facility at all.

Proportion of slum population in towns

Out of 5 towns in Gaya district only Gaya town comes under the category of Class I as its population is more than one lakh. It is for this town alone that the information regarding proportion of the slum population to the total population of the town as also density in slum per Sq.km. are furnished in the following table :

Table 23—Proportion of slums population in towns

Class, name and Civic status of the town	Proportion of the slums population to total population of the town	Density in slum (per Sq. km.)
1	2	3
I. Gaya (M)	40.16	76,331

The following table presents the most important commodities manufactured, exported and imported in the 5 towns of Gaya district :

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV. Bodh Gaya (N A C)	Handloom cloth	Vegetables	Kirana goods
I. Gaya (M)	Handloom cloth	Vegetables	Iron
III. Jehanabad (M)	..	Paddy	Salt
III. Sherghati (NAC)	Shoes	Rice	Cloth
IV. Tikari (M)	..	Wheat	Coal

In the two towns of Gaya and Bodh Gaya it has been observed that handloom cloth is the most important commodity manufactured and exported while vegetable is another important commodity which is exported. In another towns, however, the most important commodity manufactured and the most important commodity exported are not the same.

DITSTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the villages, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not availble for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdiction Lists of the State Government, those treated as outgrowths of towns or urban agglomerations and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of Mauzawar Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance viz., '(–5 Kms.)', '(5 - 10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column 10) and whether the village

is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows:

1. Forests.
2. Not available for cultivation –
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands —
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is indentical to Category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to Category 3 (a+b+c) above while column 19 contains information relating to Category 2 (a+b).

The concepts of land use pattern are explained below:

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e. g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands— All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves— All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abandoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in Cols. 16 to 19 have been presented in hectares upto two places of

the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory:

(i) *Column 5—Educational*

P	..	Primary or Elementary school (up to class IV)
M	..	Middle or Junior secondary school (up to class VIII)
H	..	Matriculation or Secondary school (up to class X)
PUC	..	Higher secondary, Intermediate, Pre-University, Junior college.
C	..	College
I	..	Industrial school
Tr	..	Training school
Ac	..	Adult Literacy class/centre
O	..	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column 6—Medical*

H	..	Hospital
MCW	..	Maternity and Child welfare Centre.
MH	..	Maternity Home
CWC	..	Child Welfare Centre
HC	..	Health Centre
PHC	..	Primary Health Centre
PHS	..	Primary Health Sub-centre
D	..	Dispensary
FPC	..	Family Planning Centre
TB	..	T. B. Clinic
NH	..	Nursing Home
RP	..	Registered Private Practitioner
SMP	...	Subsidised Medical Practitioner
CHW	..	Community Health Worker
O	..	Others

(iii) *Column 7—Drinking water*

T	..	Tap Water
W	..	Well Water
Tk	..	Tank Water
TW	..	Tube-well Water
Hp	..	Handpump
R	..	River Water
F	..	Fountain
C	..	Canal
L	..	Lake
S	..	Spring
N	..	*Nullah/Nala/Nallah*
O	..	Others
NA	..	Information not available

(iv) *Column 8—Post and Telegraph*

PO	..	Post Office
TO	..	Telegraph Office
PTO	..	Post and Telegraph Office
Phone	..	Telephone connection.

(v) *Column 10—Communications*

BS	..	Bus
RS	..	Railway Station
NW	..	Navigable Waterway (including river, canal, backwaters etc.).

(vi) *Column 11—Approach to village*

PR	..	*Pucca* Road
KR	..	*Kutcha* Road
NR	..	Navigable River
NC	..	Navigable Canal
NW	..	Navigable Waterway (other than river or canal).
FP	..	Foot Path

(vii) *Column 13—Power Supply*

ED	..	Electricity for Domestic purpose.
EAg	..	Electricity for Agriculture purpose.
EO	..	Electricity for Other purposes like industrial, commercial, etc.
EA	..	Electricity for All purposes listed above.

(viii) *Column 16—Irrigated by source*

GC	..	Government Canal
PC	..	Private Canal
W	..	Well (without electricity)
WE	..	Well (with electricity)
TW	..	Tube-well (without electricity)
TWE	..	Tube-well (with electricity)
Tk	..	Tank
R	..	River
L	..	Lake
Wf	..	Waterfall
O	..	Others

(ix) *Column 20— Remarks*

N	..	Copies of Newspapers coming in the village.
M	..	Motor Cycles/Scooters available in the village.
C	..	Cars/Jeeps available in the village.
T	..	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below:

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centre, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutions, various types of sources of drinking water such as, taps, tube-wells, etc., post and telegraph offices power supply, railway station, bus stop, etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Gaya district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below:

For the Scheduled Castes (Part A): 0—5, 6—10, 11—15, 16—20, 21—30, and 31 and above.

For the Scheduled Tribes (Part B): 0—5, 6—15, 16—25, 26—35, 36—50, and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

VILLAGE AMENITIES AND

DEVELOPMENT BLOCK—GAYA TOWN

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms and 10+kms, of the nearest place where the facility is available is given].

Serial no.	Name of village with Thana no.		Total area of the village (in hectares)	Total Population and number of households	Educational	Medical	Drinking water (potable)	Post and Telegraph	Day or days of the Market/*hat*, if any	Communications (Bus stop, Rail. station, Waterways)

1. * Excludes villages with no Scheduled Tribes Population.
2. Development Blocks Dumaria, Gurua, Konch, Belaganj, Khizirsarai, Atri, Mohanpur & Kurtha contains no Scheduled Tribes Population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) Physical aspects and location of towns, 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns; (iv-A) Civic and other amenities in Notified Slums (v) Medical, educational, recreational and cultural activities and (vi) trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix to the Town Directory. Since none of the towns of Gaya is having any outgrowth, the appendix has not been prepared.

In statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of census towns (non-municipal towns) have been included as an Appendix II to the Village Directory. However, as already explained earlier this district does not have any census town as such.

The details of the data covered in statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
CB	...	Cantonment Board/Cantonment
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories the same has

been used. This has been indicated in the foot-note to the statement.

The abbreviations used in this statement are :

Column 13--

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institution and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	B x Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13--

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/ locality as is known or identified as a Slum in a Class I or Class II town, the available civic amenities in 1979. This has already been explained in the 'Analy.is of Data' section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of

entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H (Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all Categories—Arts, Science and Commerce.
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Type writing
Sh Type	...	Shorthand and Type writing
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit sccieties are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to manual sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their Location Code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
