	(b) Village Directory Statement	108
11.	**Madarihat Police Station**	
	(a) Alphabetical list of villages	117
	(b) Village Directory Statement	118
12.	**Alipurduar Police Station**	
	(a) Alphabetical list of villages	122
	(b) Village Directory Statement	124
13.	**Kalchini Police Station**	
	(a) Alphabetical list of villages	141
	(b) Village Directory Statement	142
14.	**Kumargram Police Station**	
	(a) Alphabetical list of villages	149
	(b) Village Directory Statement	150
Appendix I	Police Stationwise Abstract of Amenities	158
Appendix II	Land utilistation data inrespect of Non-Municipal Town	162
Appendix III	Police Stationwise list of villages where no amenities are avaliable	163
Appendix IV	List of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by ranges	164

SECTION II—TOWN DIRECTORY

Statement I	Status and Growth History	186
Statement II	Physical Aspects and Location of Towns, 1979	188
Statement III	Municipal Finace, 1978-79	190
Statement IV	Civics and other amenities, 1979	192
Statement IVA	Civics and other amenities in Notified slums, 1979	194
Statement V	Medical, Educational, Recreational and Cultural facilities, 1979	196
Statement VI	Trade, Commerce, Industry and Banking, 1979	200
Appendix	Towns showing their outgrowth with population	202

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report., administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in board ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objetive in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households", has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total populatioa has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic ann other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town lavels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. This district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Goverement and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, IAS, the Director of Cenaus Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Direcrorates havc been scrutinised in the Social Studies Division at the head quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India.

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Village and Town Directory included in the publication relate to the district of Jalpaiguri. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census Operations in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shti N. Rama Rao, Asstt. Registrar General for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Jalpaiguri (Principal Census Officer) and his innumerable colleagues including the Charge Superintendent. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of the data have been done by the Central Tabulation Unit of this office under the supervision of Shri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operations (since retired) and later under Sri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have

been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Shri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Shri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among the officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Choudhury, WBCS., and Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to M/s. Mili Art Press, 36, Imdad Ali Lane, Calcutta-700 016 for the printing of this publication.

Calcutta

SUKUMAR SINHA
Joint Director of Census Operations,
West Bengal

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows:

(a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

(b) All other places which satisfied the following criteria :

(i) A population of 5,000 as the minimum,

(ii) Density per square kilometre would be a minimum of 400, and

(iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/citp the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrawths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfils the last two criteria of being an urban unit, but it falls short on the population front, *i e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

CENSUS HOUSE

We defined the Census house in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-resinential purposes or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use."

HOUSEHOLD

We defined household as follows : "The household in a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both"

SCHEDULED CASTES/SCHEDULED TRIBES

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled castes or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to

ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheuled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

LITERATES

In the census terminology, a persons who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated at illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorted. This information is vital for manpower planning.

MAIN WORKERS

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive or each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, *viz.* main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly . . . . . There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary

work of those persons. . . . . .participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census any one who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as ie 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts *viz.* (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workes in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workes were divided in nine categories.

MARGINAL WORKERS

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

NON-WORKERS

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired Persons, (iv) Beggers etc., (v) Inmates of Institution, (vi) Dependents and (vii) Others.

BRIEF HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook was started printing from 1951 Census. The Government and the Development agencies felt necessity of the data at micro-level for the social and economic development, all over the country during the post independence era. Until then, the compilation of data was limited to district, police station and town levels only. In 1951, it was extended up to the mouza level.

The publication programme of District Census Handbook of 1951 continued undisturbed in 1961 also and it was enlarged with the introduction of official statistics.

The major changes in the District Census Handbook publication were introduced in 1971. The District Census Handbook 1971 was divided into three parts *viz.* Part XA, Part XB and Part XC. The first part dealt with Village and Town Directories. In Village Directory the villagewise data on amenities available was given and the information in respect of each town was given the Town Directory. The Part XB consists of Villege and Townwise, (Wardwise for Municipalities, Town Committees and all Statutory Towns) Primary Census Abstract of the concerned district.

The third part *i.e.* Part XC dealt with the non-census data and social, economic and cultural tables. All the three parts were printed either in two volumes *i.e.* Part XA & XB and Part XC or in three volumes Part XA, Part XB and Part XC separately according to the size of districts.

The scope of District Census Handbook 1981 has been enlarged considerably specially in relation to the amenities available in the villages and towns and landuse pattern in villages and non-municipal towns. The collecton of data on recognised slums of Class I and Class II towns of the state is a new addition of 1981 in.

the Town Directory Portion of the District Census Handbook. The format of the primary census abstract have been restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips is an important addition. Workers have been categorised in four sectors instead of nine in 1971.

SCOPE OF VILLAGE DIRECTORY

A twenty column format was canvassed during 1981 Census period for collection of data from each and every mouza within each police station. This is called village directory. The mouzas within a police station have been represented in order of their location codes. This twenty column format has been divided in four parts. The column nos. 1—4 represent general information, columns no. 5—14 represent amenities available, columns nos. 15 to 19 are meant for landuse pattern and the column 20 contains special information in respect of historical, archaeological and religious interest about the mouza. At the end of each police station, the totalling has been done for col. nos. 3 to 6 and 15—19. If any amenity is not available in the village a dash '—' has been marked in the relevant column and next to it the distance of the nearest place where the facility is available has been given in the broad ranges.

The following systems were followed for indicating educational institutions, if ans, located within the villages. The abbreviations used for the educotional institutions are also given below :

1. Primary of Elementary School (P)

   All nursery, kindergarten, pre-basic, pre-primary, Junior Basic School upto Class V and Primary School upto Class IV have been inclueed in this group.

2. Junior Secondary or Middle School (M)

   All schools from Class V to Class VIII including Junior Madrasa upto Class VIII have been noted in this group.

3. Secondary School (H)

   All schools upto Class X including the schools providing Senior Cambridge Course and High Madrasa upto Class X have been treated as high school.

4. Higher Secondary School (PUC)

   All educational institutions where the education is imparted for Class XI and XII have been marked for this group.

While collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any competent authority and the specific classes of a school upto which recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools, with primary classes, the relevant groups of classes have been treated separately, *e.g.*, a composite school having classes upto XII (Twelve) has been divided as follows :

Classes from I to IV	..	(P)
,, ,, V to VIII	..	(M)
,, ,, IX to X	.	(H)
,, ,, XI to XII	..	(PUC)

It is to be noted that by dint of the above kind of division, we are not going by how many educational institutions physically exist within a village, but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institution they belong to. For example, the grouping marked at PUC *i.e.* Class XI and Class XII may physically belong to a college, but for the purpose of the Village Dircetory, these two classes taken together has constituted one unit of PUC., the rest of the classes has been treated as a college.

5. College (C)

   Any college with the disciplines of Arts, Science and Commerce have been grouped here.

6. Industrial School (I)

7. Training School (Tr)

8. Adult Literacy Class/Centre (AC)

9. Other Educational Institution (O)

   (Sanskrittole, Senior Basic School, Makhtab etc. have been noted as others).

It is needless to mention once again that in sl. no. 5 to 9 the institutions having recognition from any competent authority have been taken into account.

In case of more than one institution of a type in the village, the number of institutions have been indicated in brackets. If any of the educational institutions as stated above is located in a village the existence of other types of educational institutions located in nearest village(s) have not been collected. Suppose, a primary school is functioning in the village, but there is no middle or high school in the village under feference, in this case we have not indicated the distance of the nearest place where a middle school or a high school exists. Similarly, if there is a high school only a particular village, no efforts are given for collecting distance of a nearest place where a primary or middle school exists. The distance by ranges of a nearest place where educational facility is available have been collected from villages having no facility of any of the above mentioned nine categories of educational institutions.

In the medical fields there are a variety of amenities. These are indicated with abbreviations whether within the village exists any of the following medical institutions :

Hospital	H
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
TB Clinic	TB
Registered Private Practitioner	RP
Community Health Worker	CHW
Others	O

The information have been collected in respect of those institutions only which are organised and/or aided by Government/Semi-Government/Public bodies/locol bodies/social service agencies like the missioneries. The institutions run by private individuals have not been covered. But the information on Registered Private Practitioners of any branch have been noted. If there are more than one facility in the village, the same have been indicated in appropriate abbreviations. In case of more institutions of a type in the village, the number of institutions have been indicated against the abbreviations in bracket where no amenity is available within the village, a dash (—) has been shown in relevant column and any of the facilities as given above available in a nearest place have been noted showing the distance in broad ranges.

The sources of drinking water available within the village have been indicated by codes as follows :

Tap	—	T	Fountain	—	F
Well	—	W	Canal	—	C
Tank	—	TK	Lake	—	L
Tubewell	—	TW	Spring	—	S
Hand Pump	—	HP	Nallah	—	N
River Water	—	R	Others	—	O

If there are more than one source of drinking water in the village, the same have been indicated in appropriate abbreviations in the relevant column. In absence of any source of drinking water in the village, a dash '—' has been given in the relevant column and next to it the distance in broad ranges of the nearest place where any of the aforesaid facilities is available has been given.

The Post & Telegaraph amenities available within the village have been collected by codes as given below. The Post-office includes Branch and Sub Post Offices also. The villages having no facilities in respect of Post & Telegraph, have been marked by dash (—) in the relevant column and next to it the distance in broad ranges of the nearest place where any of the facilities as given below is available has been noted.

Post Office	—	PO
Telegraph Office	—	TO
Post & Telegraph Office	—	PTO
Telephone connection	—	Phone

The information on hat, market have been collected for each vallage. The day(s) of the week on which market/hat is held have been taken into account. Where the market/hat is held daily in a village, it has been recorded as "daily". In absence of hat/market in the village, the distance in broad ranges of the nearest place have been shown where it is held.

It has been looked whether the village is served by any mode of public transport like bus, rail and waterways and the abbreviations adopted for this purpose are given below :

Bus	BS
Railway Station	RS
Navigable Waterways (including river, canal etc).	NW

If there is more than one facility in the village, these haven been indicated separately by individual codes as given above. If no facility is available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges of the nearest place where the facility is available is given.

Approach to the village refers to the state of roads leading to the village from the communication centre. The approach to village has been indicated by following abbreviations :

Pucca Road	PR
Kuccha Road	KR
Naviable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal)	NW

If there is more than one approach to a village, the same has been given by appropriate codes in the relevant column.

The name of the nearest town and its distance in kilometers from the village has been collected. Tho nearest town so indicated may not be located within the state of West Bengal, this may be located in the neighbouring state also. The operational conveniences have only been taken into consideration while collecting this information. Only those towns have been considered, which have been declared urban according to 1981 Census.

The facilities of power supply have been collected from the village where it is available in the following codes :

Electricity for Domestic Consumption	ED
Electrieity for Agricultural Consumption	E. Ag.
Electricity for other purposes like industrial, commercial etc.	EO
Electricity for all purposes listed above	EA

Where the power is consumed for more than one purpose, this has been indicated accordingly.

The staple food, only in terms of grains, consumed by the majority population of the village during the major portion of the year have been recorded. The grains may be rice, wheat, jawar, maize etc. Sometimes a combination of these grains have been consumed by the villagers as the staple food. In that case, it has been indicated as reported.

The land use pattern of the village has been presented in five broad categories. These are as follows :

1. Forest .. This include all lands classed as forests under any legal enactment dealing with forests. This may be owned by the state or by any private individual. Land maintained as potential forest land have also been treated as forests. Any area used for any other purpose but situated within the forest so defined, is treated as 'forest'.

2. Irrigated land .. It relates to the land which has actually been irrigated under different types of irrigation for the purpose of cultivation. The sourcewise break-up of area in hectares under different systems of irrigation has been given. The codes in respect of sources have been noted as under :

Government Canal	GC
Private Canal	PC

Well (without electricity)	W
Well (with electricity)	WE
Tube well (without electricity)	TW
Tube well (with electricity)	TWE
Tank	TK
Lake	L
River	R
Waterfall	WF
Others	O

3. Unirrigated land . . All areas under rainfall crops or under dry rice cultivation have been classified as unirrigated areas.

4. Culturable waste . . It is defined as the lands within cultivated holdings have not been cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles. Land under thatching grasses, bamboo bushes and other groves for fuels etc., which are not included under orchards or forests and land grazing, meadows have also been included in this category.

5. Area not available for cultivation . . This stands for barren, uncultivable land and land put to non-agricultural use. Barren and unculturable lands cover land within cultivable holdings which cannot be brought under cultivation without incurring a high cost. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, *e.g.* rivers and canals etc.

Any important place of religious, historical and archaeological interest within the village have also been mentioned in the village directory. Information on the number of copies of newspapers coming in the village, and motor cycles/scooters/cars/Jeep and tractors available in the village have been mentioned accordingly and denoted the following codes :

Newspapers	N
Motor cyeles/scooters	M
Cars/Jeep	C
Tractor	T

In addition to the information that have been collected through Block Development Office, the following four appendices to the Village Directory have also been compiled.

I. Police Stationwise abstract of educational, medical and other amenities.

II. Land utilisation data in respect of non-municipal (non-statutory) Ceosus Towns.

III. Police Stationwise list of villages where no amenities are available.

IV. Police Stationwise list of villages according to the proportion of scheduled castes/scheduled tribes population by ranges.

The first two appendices have been provided for obtaining actual position regarding various amenities available in the police station and as well in the district and the land utilisation pattern in the non-municipal census towns which have been treated urban by virtue of the criteria prescribed for urban units. Appenidix-III has been devised for planning input in areas where basis infra-structure is lacking. Appendix-IV has been prepared for the purpose of planning of welfare programmes for scheduled castes and scheduled tribes at micro-level, particularly in relation to the area development oriented programmes.

SCOPE OF TOWN DIRECTORY

The Town Direetory has been prepared for all thc staturory towns like Municipal Corporations (MC), Municipalities (M), Notified Areas (NA), Town Committees (TC) and Contonment areas as well as the non-statutory census towns (NM) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or organised slums having a population of 50,000 or more. The towns having outgrowths have been identified with the asterisk (*) and the information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column.

The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1.	Population one lakh and above	.. Class	I
2.	Population from 50,000 to 99,999	.. „	II
3.	Population from 20,000 to 49,999	.. „	III
4.	Population from 10,000 to 19,999	.. „	IV
5.	Population from 5,000 to 9,999	.. „	V
6.	Population less than 5,000	.. „	VI

A brief discussion on seven statements is given below :

Statement I

This statement provides some basic data based on the primary census abstract. It deals with the status and growth history of the town. The column nos. 1 to 5 gives information on class, civic status, name of the town and its location code with the police station the town belongs to. The area of the town in square kilometre has also been given. The column nos. 6 to 19 give demographic information of the town. Where the town did not have any urban status for the reference year (s), a 'dash' (—) has been given under these columns (s). The decadal growth in percentage has been shown below the population figures from column nos. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

Statement II

The statement deals with the physical aspects and Location of the town as on April 1980.. This statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns. In that case the information noted from the nearest place where it is available. This alternative however,

could not be followed uniformly due to the fact that the data are not avalable for the nearest place even. In such cases the information not available (NA) has been stated. In the second part *i.e.* in column nos. 6 to 12 the locational particulars have been stated for the referrent town.

Statement III

Data on municipal finance for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have been shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (NA)

Statement IV

This statement contains 19 columns. The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referrent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referrent town gets services has been given. In absence of any of the public amenities as referred to in cols. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

Statement IVA

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in Class I and Class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum.

Statement V

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, Semi-Government, Local Bodies, Charitable Institutions and Social Service Agencies like Missionaries etc. have been counted. Where these facilities were not available, the distance of the nearest place where these facilities are available has been noted. The Family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The maternity and Child Welfare Centres, Veneral Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and indicated in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as a Village Directory has been followed in respect of the school and college education. The column 6 includes educational institution like Teachers' Training College, Basic Training College etc. The information on short-hand, type-writing and other vocational training institutions have been given in column 10. In this case only the recognised institutions have been considered. The "recognised" means recognised by any statutory authority—like the Education Department, Commerce Department, Labour Department etc., of the Government or Semi Government or autonomous bodies, public sector projects like municipality, corporation etc.

The vocational institutions like Music/Dancing school, Art College, Painting/Clay modelling institutions etc. have been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been taken in col. nos. 15 under "Others". The columns 17-20 deal with the recreational and cultural facilities of the town.

Statement VI

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and Non-agriceltural Credit Societies.

The details of abbreviations used in different statements of Town Directory are given below :

BRIEF HISTORY OF THE DISTRICT

The district Jalpaiguri as an administrative unit of the state came into being on 1st January 1869. The present district is comprised of the Western Duars (since 1865) and the then police stations Jalpaiguri and Rajganj of Rangpur district (since 1869). It may be noted that a portion of present Jalpaiguri was a subdivision in the Rangpur district now in Bangladesh (from 1854 to 1869). Historically, the development of the district started only after the growth of the tea plantations which begun in 1874-75. The Western Duars which had been once a very thinly populated forest area, became gradually populated with the development of inhabited villages, tea gardens and small factories.

The district has been so named after its principal town Jalpaiguri. The name Jalpaiguri is said to have derived from 'Jalpai' or olive tree and 'Guri' or place, meaning thereby, the place abounded with the olive trees. The names Jalpaiguri might as well be associated with 'Jalpes', i.e. 'Siva', the presiding deity of the entire region. from the time immemorial.

PHYSICAL ASPECTS

The district Jalpaiguri lies between 26°16′ and 27°0′ north latitude and between 88°4′ and 89°53′ east longitude. Looking like an irregular rectangle, the district is bounded in the north by Bhutan and the district of Darjiling, on the south by the district of Rangpur of Bangladesh and the district of Koch Bihar, on the west by the district of Darjiling and Bangladesh and on the east by the Eastern Duars in Assam which forms part of the district of Goalpara, the right bank of river Sankosh form the demarcation line. The Duars form the gateway of mountains. Western Duars is the part of the tract which falls within the district of Jalpaiguri. There are eleven Duars or passes to Bhutan from India, of which 5 are located in Jalpaiguri district viz. Chamurchi, Lakhimpur, Balla, Baksa (Buxa) and Kumargram. These are from the west to east. The principal rivers of the district are the Mahananda, the Tista, the Jaldhaka, the Torsha, the Kalajani, the Raidak and the Sankosh. In addition, numerous rivulets, ranging from small to medium are flowing within the district. Among them, the Saun, the Karatoa, the Chaol, the Talma, the Jamuna, the Panga, the Karala, the Chukchuka, Rukruka, the Gadadhar, the Dhardhara, the Dharla, the Lish, Gish, Chitijhora, the Murti, Chel, Jiti, the Galandi, the Duduya, the Dam Dima, the Tusati, the Mujnai, the Buritorsha, the Sanjal, the Sili Torsha and the Jainti deserve mention. The district has an area of 6227.0 sq. kms.

MAJOR CHARACTERISTICS OF THE DISTRICT

(1) The forests in the district cover an area of 172.56 thousand hectares as per the information available in 1976-77 which means that slightly more than one-fifth of total area is covered by the forests. The entire forest area is reserved and protected under the Forest Development of the Government of West Bengal. The forest is well known for the sal trees of better quality. These forests have been broadly classified as Moist Tropical forests.

(2) The district is conspicuous for the absence of mines. The rocks found in the district are mainly the slates, quartzites and dolomites. The delomite limestone bands found in the Buxa Duars form the most important mineral deposit of the area. It is found all along in the hill range from near Lapchaco to Raidak. The lignite is found in patches throughout the entire stretch of the west side of Jayanti river. The iron ores of low to medium grade are found near Gaopota. The lime obtained from dolomite is of superior quality and having adequate tensile strength. Deposits of magnesium, sulphate are found at some localities in the foothills region.

(3) There is no hydro-electric or thermal power station in the district. The electricity is the main source of power in the district. This is derived through the West Bengal State Electricity Board. It is supplied from the Jaldhaka Hydel Power Project in Darjiling, desel stations of Jalpaiguri, Mal and Birpara in the district and from the desel station of Chengrabandha of Koch Bihar District.

(4) The clarrification of landuse area in Jalpaiguri as on 1976-77 is given below :

(i)	Net cropped area	. .	327.47 thousand hectares
(ii)	Land put to non-agricultural uses	. .	79.64 ,,
(iii)	Barren and unculturable waste	. .	1.08 ,,
(iv)	Permanent pastures and other grazing land	. .	0.21 ,,
(v)	Misc. tree crops and groves	. .	8.16 ,,
(vi)	Culturable waste	. .	23.18 ,,
(vii)	Other Fallow land (other than current fallow)	. .	1.19 ,,
(viii)	Current fallow	. .	2.63 ,,

(5) According to 1981 Census 49.60% of the total workers of the district are engaged in agricultural pursuits. In the year 1976-77, the total area under production of foodgrains was 342.1 thousand hectares of land. During the same year, rice was cultivated in 297.1 thousand hectares of land, wheat in 32.0 thousand hectares, pulses in 5.7 thousand hectares and oilseeds in 5.3 thousand hectares. As on 31st March 1976, the tea plantation area of the district was estimated at 59.8 thousand hectares of land. The fibres mainly jute and masta were cultivated in 37.4 thousand hectares during 1976-77. The food grains produced in 1976-77 were 343.3 thousand tonnes, of which 340.3 thousand tonnes being cereals. Out of the cereals again, rice and wheat produced to the extent of 277.5 thousand tonnes and 56.9 thousand tonnes respectively. The fibres produced during the period were 250.4 thousand bales (180 kg. in each thousand bale) of which Jute alone was produced 235.5 thousand bales and the rest masta. The production of tea during the same period was 92,722.0 thousand tonnes.

During the year 1976-77 the yields per hectare of rice and wheat were 934 kgs. and 177.9 kgs. respectively. The sources of irrigation in the district are private tanks and tubewells only. Although there are large number of rivers and rivulets in the district, but the river system is not advantageous to the irrigation of the district. There is no large or medium sized irrigation project in the district. However, there are minor irrigation schemes like Deep Tubewells and River Lift Irrigation in the district. The district had 33 Deep Tubewells and 27 River Lift Irrigation by the end of December 1977.

According to the landuse data of the villages of the district (1981 Census), only 6.82 percent of the total cultivable area is irrigated.

(6) Varities of small scale and cottage industries are found in the district. They are rice and oil milling, wheat and spices grinding, stone-crushing, saw-mills, automobile workshops, engineering workshops, carpentry, hosiery, leather works, bakery, making of steel trunks, manufacture of Candles, brick and tiles, suitcase making, bidi making, pottery, toy making, cane and bamboo works, clay-modlling, tea-chest manufacturing etc. According to 1977, there were the following registered working factories with number in each type of industries in the district :-

Name of Industries	Number
1. Flour milling (by power machine)	2
2. Rice milling (by power machine)	10
3. Bread making	1
4. Manufacture of biscuits, cake etc.	1
5. Manufacture of mustard oil, ground nut oil, til oil etc.	1
6. Tea processing	141
7. Manufacture of ice	1
8. Other food processing and activities	1
9. Cotton textiles not elsewhere classified	1
10. Manufacture of readymade garments	1
11. Manufacture of plywood and veneer	1
12. Sawing and planning of wood (other than plywood)	54
13. Manufacture of plywood chest for tea etc.	1
14. Manufacture of buskets made from bamboo, cane, reed and grass	1
15. Bamboo, cane and reed furniture	1

Name of Industries	Number
16. Envelope printing, picture post card printing, embossing etc.	1
17. Manufacture of lime	1
18. Manufacture of structurals	3
19. Manufacture of drums, tanks, rails and metal containers	1
20. Manufacture of utensils	2
21. Manufacture of general items of non-electrical machinery etc.	2
22. Manufacture of general jobbery engineering etc.	3
23. Generation and transmission of electric energy	6
24. Pipeline transport	1
25. Storage and warehousing not elsewhere classified	1
26. Educational services rendered by technical or vocational colleges, schools and other institutions	1
27. Repair of motor vehicles and motor cycles	6
28. Repair of enterprises not elsewhere classified	1

The most important industry of the district is tea. In 1976, there were 151 tea estates in the district covering an area of 59,988 hectares.

(7) The principal commodities exported from the district are tea, jute, timber and tobacco. The main items of import are spices, oil, rice, sugar, pulses, wheat, iron, steel, cement, coal, petrol etc.

(8) King Nilambar of Kamlapur-Kamrup, is said to have constructed several roads connecting his capital with different places of the territory under his control. The remnants of these roads are still to be seen in various places. One such road is found along the north-western direction leading to Jalpeswar temple. It still exists under the name of Dinhata-Mekliganj Road. At present, the State Highway connects the district headquarters Jalpaiguri with subdivisional headquaters and most of the block headquarters. The national highway is also providing link to the district with important places of the country such as Delhi, Patna, Lucknow, Calcutta, Gauhati etc. etc. Besides, New Jalpaiguri to New Bangaigaon (Assam) is provided with broad gauge and from Katihar Junction (Bihar) to Kamakhayaguri with the meter gauge rail connection is in the district. Both the category of lines connect several stations within the district.

As per the public works and public works (Roads) in 1977, the stretch of 1,068 kilometres is categorised as Extra municipal roads, of which 957 kilometers are surfaced and 111 unsurfaced. Whereas as per the data (1976) of statutory bodies of the district, of the 125.79 kilometres roads 80.25 kms are metalled and rest unmetalled.

PLACES OF RELIGIOUS, HISTORICAL OR ARCHAEOLOGICAL AND TOURIST INTEREST

There are quite a number of temples in and around the town Jalpaiguri, some of which are quite old. The temples are Maskalai Bari Smasan Kali temple, Baikunthanath temple, Dinbazar Kalibari, Babupara Jogmaya Kali temple etc. The old Brahmo Samaj temple was established in the town in 1901 and its new temple in 1913. Shri Ramakrishna Asrama was established in 1923. A big mosque was built in Jalpaiguri—Siliguri road in 1875. Another mosque, in Dinbazar area of the town was constructed in 1902. Two churches, one in Jalpaiguri town and another on Haldibari road were built in 1882 and 1896 respectively.

The Jalpes temple is situated on the bank of the Jhorda river in the village Garhtali of Maynaguri police station. The maintemple is a good specimen of blend of the Hindu and Muslim architectures. It is said that Pran Narayan, the king of Koch Bihar reconstructed the temple in 1665. The ruins of the Batesvara temple are found in at village Madhavdanga under P. S. Maynaguri. The ruins are indication of the fact that it was a stone temple. There is a siva temple in the village Byangkandi near new Maynaguri. It is situated on the bank of the river Jhorda. Foundation of another temple, viz. the temple of Bhadesvara is found just below the high embankment of the new Maynaguri railway station. The temple of Petkati Debi is situated to the east of the New Maynaguri railway station. The temple is the seat of Chamunda locally called Petkati. A temple resembling a Buddist pagoda is situated in the village Sannyasir Hat over Rajganj police station. The saying goes that it was constructed by Scott.

Garh Mendabari is situated in mouza Dakshin Barajhar Forest in Alipurduar police station. The State Directorate of Archaeology made some excavation at the site and unearthed remnants of a fort. The fort is called the Fort of Nal Raja and it occupies a space of about 1.295 sq.kms. According to the Department of Archaeology it belongs to the Gupta age. The wild life Sanctuary Saldagana at Jaldapara can be approached from Hasimara railway station. The Sanctuary is a place of tremendous tourist attraction.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District Census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951 and 1961. A large number of inset tables has been prepared on Town Directory and Village Directory to make the analysis more scientific and acceptable.

TABLE 1

The police station-wise distribution of inhabited villages according to the availability of different amenities are seen in table 1. The school facilities are available in 658 villages out of the total 736 inhabited villages of the district which indicates that 89.40 percent of the inhabited villages in Jalpaiguri district avail the amenity of education. The medical, drinking water and Post & Telegraph facilities are available in 216, 731 and 263 villages respectively. The percentages being 29.35, 99.32 and 35.73. 33.15 and 38.04 percent of the villages are having market or hat and communication. A little over 50 percent and 25 percent of the villages have the amenities like approach by pucca road and power supply respectively.

TABLE 1—DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES

Sl. No.	Name of P. S.	No. of inhabited Villages	No. (with Percentage) of Villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Rajganj	28	24	8	28	12	11	10	19	9
			85.71	28.57	100.00	42.86	39.29	35.71	67.86	32.14
2	Jalpaiguri	29	23	12	29	16	17	6	14	9
			79.31	41.38	100.00	55.17	58.62	20.69	48.28	31.03
3	Mal	101	70	16	97	14	9	33	44	16
			69.31	15.84	96.04	13.86	8.91	32.67	43.56	15.84
4	Mitiali	30	30	19	30	20	9	11	20	19
			100.00	63.33	100.00	66.67	30.00	36.67	66.67	63.33

TABLE 2

Table 2 furnishes the proportion of rural population of inhabited villages served by different amenities. Among the 14 police stations of the district, the rural areas of the police stations of Mitiali and Kumargram received the highest level of amenity in the matter of education (100%). In the matter of Medical, 94.38 percent of the population of Birpara police station received the facility. It is significant to note that, there are 12 police stations in the district, where the hundred percent of the rural people are having the facility of drinking water.

TABLE 2—PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES

TABLE 3

The table 3 above furnishes the distribution of villages not having certain amenities arranged by distance ranges from the places where such facilities are available. There are 78 villages in the district, where the educational facility is not available in the village, but available at some distances. Of those 78 villages, 67 avail education at a distance of 5 Kilometers or less. 10 villages have this amenity at a distance of 5—10 Kilometres, while only one village has this amenity at a distance of 10 Kilometres plus. Similarly the medical facility is not available in 520 villages itself. 338 of them avail the medical facility at a distance of —5 K.Ms, 131 villages at a distance of 5—10 Kms. and the rests of 10+Kms. Only 5 villages in the district have no drinking water. They have to avail this amenity at a distance of —5 Kms. only. The people dwelling in the 473 villages have to avail the opportunity of Post and Telegraph at a different distance i.e. less than 5 Kms. for 398 villages, 5—10 Kms. for 64 villages and 10 Kms. plus 11 villages. Market/Hat and communication are lacking in 492 and 456 villages respectively.

TABLE 3—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		— 5 Kms	5 — 10 Kms	10 + Kms	Total
	1	2	3	4	5

5	Market/Hat	420	60	12	492
6	Communication	222	62	172	456

TABLE 4

This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 736 in the district, 50 villages which are situated in the distance range of 0—5 Kms. from the nearest town avail the amenities of drinking water to 100%, education to 82%, medical to 38%, post and telegraph to 42%, market/hat to 16%, communication to 58%, approach by pucca road to 68% and power supply to 50%. Similarly, 248 villages which are located in the distance range of 6—15 Kms. from the nearest town avail the amenity of drinking water to 99.19%, education to 90.32%, medical to 18.95%, post and telegraph to 32.66%, market/hat to 30.99%, communication to 37.60%, approach by pucca road to 42.98% and power supply to 17.79% only.

The villages which are located in the distance range of 16-50 Kms. from the nearest town in the district number 376 in which the amenities of drinking water and education are availed by 99.20% and 89.10% respectively. On the other hand, the amenity like medical is availed by 33.51%, post and telegraph by 35.90%, market/hat by 36.03%, communication by 39.43%, approach by pucca road 48.04% and power supply by 26.89·/. only. All the 62 villages located at a distance of 51 Kilometres or more have the facility of drinking water. Educational facility is availed by 93.55·/. villages, post and telegraph by 41.94·/., market/hat by 20.63·/., communication by 33.33·/., approach by pucca road 44.44·/. and power supply by 34.92·/.

TABLE 5

Table 5 relates the distribution of villages according to population range and amenities available. There are 63 villages out of the 736 in the district under the population range of 499, 52.38·/. of them avail the amenity of education, the amenity of medical by 3.17·/. of villages only, the drinking water by 93.65·/., post and telegraph by 12.70·/., market/hat by 4.76·/., communication by 12.70·/., and approach by pucca road by 20.63·/.. All the 315 villages in the population range of 500-1999 have the drinking water. Education is availed by 90.79·/. of villages located in this population range while the medical is availed by 16.51·/. only. Among other amenities, post and telegraph is available in 24.13·/., market/hat in 21.90·/., communication in 27.30·/., pucca road in 38.10·/. and power supply in 12.70 percent of villages. There are 296 villages which come under the population range of 2000-4999. The amenities of education, medical and drinking water are available in 94.59·/., 38.18·/. and 99.66·/. of villages in this range respectively. The post and telegraph service is availed by 44.93·/. of villages, market/hat by 42.23·/., communication by 48.31·/., pucca road by 61.49·/. and power supply by 34.46·/. of these villages in this range. In the population range of 5000+there are 62 villages. All the villages in this range have the drinking water. 95.16·/. and 79.03·/. of the villages in this range have the facilities of education and medical respectively. On the other hand 74.19 percent of the villages in this range are served by post and telegraph, market/hat is availed by 75.81·/., communication by 69.35·/., pucca road by 87.10·/. and power supply by 72.58·/. of villages.

TABLE 5—DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE

14	Kumargram	Rice & Wheat

TABLE 7

This table gives the distribution of inhabited villages according to land use. There are altogether 736 inhabited villages in the district which cover total area of 586,637.86 hectares. The percentage of cultivable area to total area works out to 50.67. On the other hand, the percentage of irrigatad area to total cultivable area is recorded 6.82. The maximum cultivable area to total area i. e. 83.94% is found in Banarhat P. S. The highest percentage of irrigated area to total area is recorded by Mitiali police station.

TABLE 7—DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE

Sl. No.	Name of P. S.	No. of inhavited Villages	Total Area (in hectares)	Percentage of Cultivable Area to Total Area	Percentage of Irrigated Area to Tolal Cultivable Area

TABLE 8

Table 8 gives data in respect of the growth, density and sex ratio of urban population in the district of Jalpaiguri in relation to the state, during the decades 1951 to 1981. The percentage of urban population to total population in this district has gone up from 7.22 in 1951 to 14.05 in 1981. The corresponding percentage of urban population of the state as a whole records 23.88 to 26.47 during this period. The sex ratio of the urban population of the district which was 679 in 1951 has steadily increased to 768, 829 and 885 in 1961, 1971 and 1981 respectively.
