CENSUS 1951.

1 PRELIMINARY SORTING INSTRUCTIONS

1. You are supplied with a sorting shelf and a few bundles of census pads. Each bundle has a green label. The first entry in the green label will have four numbers separated by a dash (-)(e.g. 1-2-7-12). In the case of municipalities there will be only three numbers (e.g. 1-II-4).

   First verify that these entries are the same for all the block bundles.

   If there is any difference, keep such bundles separate and your supervisor will tell you what to do in such cases.

2. The second entry in the label is the block number. Arrange the block bundles in serial order in the shelf.

   If any bundle is left out in the series or is outside the series, inform your supervisor. If one bundle contains more than one block number, keep the bundle separate and take instructions from the supervisor.

3. In the check form issued to you, write your name and enter in the first column the serial numbers of the blocks. Fill up the second column with the first set of numbers in the block label.

4. Open the first bundle. Cut the block label and keep it separate. Count the number of pads and enter in the third column of the check form.

   Take particular care to see that only pads without even a single slip having entries are counted as un-used.

   Tie the used pads into one bundle with the block label at top and keep it in one compartment of the shelf. The unused pads should be stocked by your side.

   After the pads have been arranged, take the National Register Sheets and count the sheets having entries. Note this number in the check form and keep it along with the census pads. If there are any unused sheets, keep it separate.

   The bundle will also contain a sheet of paper called the village statistics form. Keep it along with the national register sheets.

5. Proceed as in 4 with all the block-bundles.

   When you have finished this, you will be having in each compartment of the shelf, the census pads, National Register sheets and village statistics form. You may also have a stock of unused pads, unused national register sheets and village statistics forms. You would also have filled the entries in the check form.

6. Your Supervisor will now take charge of the national register sheets, the village statistics forms, and the unused pads and forms and the block labels.

7. With the appliance supplied to you, remove the wire in the pad and collect in one lot all the slips under your charge. Keep the bits of wire in one place or else it might hurt you when you sit down for work.

(To be continued)

Superintendent of Census Operations.

CENSUS 1951.

2

Preliminary Sorting Instructions.

Sorter's Ticket '0'.

1. Collect all the slips belonging to the same code-number marked on the slips. Note that in the case of municipalities there will be 3 numbers (Eg. 2-III-5) and in the non-municipal areas 4 numbers (Eg. 2-3-5-4).

2. Select 10 compartments in the shelf and taking a lot of slips deal them into the compartments one at a time until the whole lot that has been heaped in (1) is completed. Take the slips in the 6th compartment and bundle them. This will be called the '10 per cent Sample'. Bundle all the slips in the remaining nine compartments. This will be called the general 'slips'. In the processes that follow, the sample and general slips will be kept separate.

3. Select two compartments and mark them M and F. Deal the general slips into these two puttings slips for Males into M and slips for Females into F. After completing the whole lot, count the slips in each of the compartments and using the elastic bands supplied, tie them in lots of 100 slips. The last lot may contain only less than 100 slips. Thus the 'General' slips have been formed into two lots - Males and Females - each lot containing a number of smaller bundles. (**Tie all these small bundles into one. Proceed in the same way with the Female slips).

Repeat the above operation on the sample slips. When you have completed both, enter the numbers you have counted in the statement supplied to you and inform your supervisor. He will arrange for the checking of your work.

4. The slips so prepared have now to be sorted into eight occupational groups, I, II, III, IV for agriculture and V, VI, VII, VIII for non-agriculture. Against question 10 of the slip, you will find this information. The first 4 categories will be entered against question 10 with the help of numbers 1,2,3 & 4. The remaining four categories will be described in question 10. You have been supplied with a printed list of occupations and using this list, you will have to decide as to which of the Nos. 5, 6, 7, 8, the particular slip will correspond. Make a full study of the printed list of occupations and the corresponding number before you start sorting.

Select eight compartments and deal the slips into the appropriate place.

Note: (i) Start with the sample slips.
(ii) The Male bundles and Female bundles should not be mixed.
(iii) When you have finished the Sample bundle, the slips for males and females will be formed into eight bundles each so that there will be 16 bundles on the whole. Each of these may contain a number of smaller bundles of 100 slips tied with the elastic band. The eight occupational bundles for Males and Females will be kept separate.
(iv) After finishing the sample slips, start on the general slips.
(v) When you have finished the slips, enter in the sorter's ticket '0' that will be supplied to you and inform your supervisor who will arrange for the checking.

The entries in sorter's ticket '0' should be made neatly and legibly in ink. The ticket should be handled with care.

Trivandrum,
13-4-1951.

SUPERINTENDENT OF CENSUS.

CENSUS 1951.

Sheet No.3.

Formation of Census Tracts

(For Supervisors and Compiler-Checkers only)

Note. The sorter's Tickets '0' and the slips for each kara (for Travancore area), village (Cochin area) and ward for municipalities have to be collected before the formation of Census Tracts is taken up; for each kara, there will be 32 sorters tickets '0', 16 for the general slips and 16 for the sample slips. These 16 tickets will fall under two; 8 tickets for Males and 8 tickets for females. The eight tickets will correspond to the eight occupational classifications.

1. You are supplied with a list of Tracts. With the help of the book of code-numbers, collect together all the bundles and the corresponding sorter tickets '0' for the tracts, one at a time. Check the bundles and see that only those bundles for the particular tract have been collected together.

2. Break open the bundles and form two sets, one corresponding to general slips and the other for sample slips.

3. Open the general slip bundles and form up the two groups of Males and Females.

4. Start with the slips for Males. Take 8 boxes and mark them as 1, 2, 3, ...8. Open the bundles one at a time and distribute the sub-bundles into the boxes according to the number of the occupational group of the slips.

Open a register containing the following details:-

1. Box No..... General / Sample
2. Tract No. ....
3. Sex ....
4. Occupational group No.

5. Proceed in this way with the female slips and then start on the Sample slips.

6. When you have finished with the tract, note that there will be 32 boxes, 16 for general slips and 16 for sample slips.

Note.

When you have assigned the slips to boxes, there may be, particularly for sample slips, sufficient space for sample slips of other tracts also. In such cases, you may allot sample slips of other tracts in it. But take care to bundle and label the slips of each tract separate.

K Narayanan Nair

CENSUS 1951.

Sheet No. 4.

4

The Sorter Tickets.

Note. The slips have been formed into census Tracts and for each tract there are 32 boxes.

1. The following sorter Tickets (S.T.) have to be prepared:

S.T.1. This ticket relates to Dependency classification. It will also give the secondary Means of Livelihood if any of the persons.

S.T.2. It gives the occupational classification of persons having 5, 6, 7 or 8 as their means of livelihood and the status of the person as Employer, Employee and Independent worker under each occupation.

S.T.3. (Only for Sample slips). It gives age groups and civil condition.

S.T.4. (Only for Sample slips). It gives age groups and literacy.

S.T.5. (Only for Sample slips). It gives the number under each individual age.

S.T.6. It relates to religion and classification of each religion under Scheduled Castes, Scheduled Tribes, Backward class, Non-Backward classes and Anglo-Indians.

S.T.7. It relates to details of Birth Place.

S.T.8. It relates to Nationality.

S.T.9. It relates to mother-tongue.

S.T.10. It relates to educational standard.

Note. Sorter Tickets 3, 4 and 5 have to be prepared only on the Sample slips of each tract. Sorter Tickets 1, 2, 6, 7, 8, 9 and 10 have to be prepared for both general and sample slips.

2. In preparing the different sorter tickets, the following serial order will be followed:

General	Sample or Displaced Persons.
S.T. 1	S.T. 1
S.T. 2 (for M/L 5, 6, 7 & 8).	S.T. 2 (for M/L 5, 6, 7 & 8)
...	S.T. 3
...	S.T. 4
...	S.T. 5
S.T. 6	S.T. 6
S.T. 7	S.T. 7
S.T. 8	S.T. 8
S.T. 9	S.T. 9
S.T. 10	S.T. 10

3. As soon as the various Sorter Tickets are completed, they have to be posted to the corresponding posting statements as detailed below:-

Sorter Ticket	Posting Statement.
S.T. 1 ...	1 and 2.
S.T. 2 ...	i. Livelihood group abstract. ii. 3, 4, 5 and 6.
S.T. 3 ...	7 and 8
S.T. 4 ...	9
S.T. 5 ...	10
S.T. 6 ...	11
S.T. 7 ...	12
S.T. 8 ...	13
S.T. 9 ...	14
S.T. 10 ...	15

4. When the 10 sorter-tickets and corresponding posting statements are complete, you proceed to the preparation of the Census Abstract of Sample House-holds.

The Supervisors and Compiler-checkers should carefully study the above sequence of sorting and compiling work. The details of the processes are described in the hand-book "Sorting and Compilation ~~Work~~ Instructions" and spare no pains in mastering it.

Narayanan Nair

SUPERINTENDENT OF CENSUS OPERATIONS.

Trivandrum,
17th April, 1954.

NGN/.

CENSUS 1951.

Sheet No.5 (Sorter Tickets 1 and 2).

Sorter Ticket 1.

NOTE. In sorting for this ticket, you should look to the entry in the first compartment of 9. The entry will be 1 or 2 or 3.

1. Mark three compartments in your shelf with numbers 1, 2 and 3 and deal the slips into these according to the number given in the first compartment of question 9. When you have so dealt all the slips, the compartment (1) will contain all the slips of self-supporting persons, (2) will have the slips of non-earning dependants and (3) will have all the slips of earning dependants.

2. Count the slips in (2) and bundle it in lots of 100.

3. Take the slips in compartments 1 and 3 and keep them separately in two lots. Mark nine compartments in the shelf with numbers 0, 1, 2....8, Start with the slips in the first lot viz , the slips with entry 1 in the first compartment of question 9. Turn your eye to the answer in question 11. Slips without any entry in question 11 should be assigned to the compartment marked 0. If the entry in question 11 is any of the numbers 1, 2, 3 or 4, deal the slip into the appropriate compartment marked 1, 2, 3 or 4. In case, theentry is the name of an occupation, you should assign the slip to one of the compartments 5, 6, 7 or 8 bearing in mind the principles of economic classification for sorter Ticket '0'.

4. When all the slips have been sorted, count the slips in each of the nine compartments and enter in the sorter Ticket 1.

5. Proceed as in 3 with the slips of the third lot. Note that all slips will have an entry in question 11. The compartment marked '0' will have no slips.

6. Remember to keep in tact all the slips with 1 in the first compartment of question 9. These slips alone will be taken for sorter-Ticket '2'.

NOTE

Sorter Ticket 2.

1. (This ticket has to be prepared only for self-supporting persons in livelihood classes 5, 6, 7 and 8. These slips have already been sorted out in Sorter Ticket '0'

2. Industries and services have been classified under 10 divisions and these are denoted by 0, 1, 2.....9. Under each division, there are a number of sub-divisions. Each sub-division is further divided into a number of groups. (See the printed list supplied to you). An industrial group will, therefore, have a code number of the type 8-17. This would mean the 7th group of the 1st sub-division of the 8th division. Refer to the pamphlet and note that this corresponds to 'Nurses').

First Process.

1. While sorting for sorter Ticket 0, you would have formed a mental picture of the most common industries and services peculiar to the area taken for sorting. Your Supervisor will help you to select and fix ten items for first sorting. Write in full the names of these 10 items and start sorting. All slips that do not belong to any of the 10 groups will have to be kept in a 11th compartment. After all the slips have gone through one round, collect and count the slips in each of the 10 compartments. Enter in sorter Ticket 2.

2. Select another set of industries and services next in importance and sort out the slips in the 11 compartments. Proceed in this manner until all the slips have been assigned to appropriate means of livelihood groups.

NOTE. i. Keep separately the slips of each group.

ii. When you are sorting the slips corresponding to occupational group 8, the slips should be sorted under the following sub-groups:-

1. Persons living principally on income from non-agricultural property.

2. Persons living on pensions, remittances, scholarships and fund

3. Inmates of jails, asylums, alm-houses and recipients of doles.
