PREFACE

The Registrar-General, India, recommended to State Governments, the publication of District Census Handbooks containing 1951 Census data for the districts and such other information as may be of general interest. The Government of Travancore-Cochin accepted the recommendation and sanctioned in Government Order No. RM. 3-3468|RD dated 23-5-1951 the publication of four District Census Handbooks for the State. The present volume is published in pursuance of this order.

The Handbook is divided into three parts: Part I contains a short sketch of the district and the people. Part II embodies the Census Tables for the district. For purposes of comparative study, three of the most important State Tables—A 1. Area, Houses and Population, A 2. Variation in Population during 50 years (1901-1951) and Economic Table—Livelihood Classes—have been placed at the beginning of this part. Each Table is preceded by a short note explaining its contents. Part III devoted to Village Statistics is the result of an attempt made to bring together the main details relating to villages in this district. An index of place-names has been appended to this part to facilitate ready reference.

It is hoped that the Handbook will serve as a frame for future studies and that its scope and coverage will be increased from time to time.

This work would not have been possible but for the co-operation and assistance of the State Government at every stage of its preparation. Almost all departments have helped me with their contributions. I wish to record my acknowledgment in particular to the departments of Agriculture, Public Health, Labour, Public Instruction, Electricity, Telephones, Forest and Geology.

The Tahsildars and Municipal Commissioners in the State have borne the brunt of the work involved in the collection of facts and figures contained in the Handbook. To them, I tender my special thanks.

Other agencies who have been of great assistance are the Travancore Devaswom Board, Indian Central Cocoanut Committee, Indian Rubber Board and Cochin Harbour Administration. It is a pleasure to acknowledge my thankfulness to them.

The printing of the Handbook was done by the Government Central Press, Trivandrum, at a time when the Press was working at full pressure on other urgent and voluminous items of printing for Government. It is therefore, with very great pleasure, that I place on record my appreciation of the untiring efforts of the Superintendent and his assistants in bringing out the Handbook.

It is only fair that I add a word about my office staff who were patiently at work evolving step by step the Tables from the large mass of data collected at the Census. Checking and cross-checking of the Tables has been a difficult task; so also has been the typing of the Tables. I wish to express my feelings of gratefulness to one and all of my assistants for their devoted labours in this behalf. I must single out my Personal Assistant, Sri K. Paramaswara Menon, M. A., for the unfailing help he gave me at each stage of the work. He unstintedly shared with me the responsibility in producing the Handbook and I wish to express my appreciation of the work done by him.

I shall be failing in my duty if I do not place on record my gratefulness to Sri R. A. Gopalaswami, I. C. S., Registrar-General, for the guidance and the stimulating suggestions received from him in this work.

U. SIVARAMAN NAIR.

Office of the
Superintendent of Census Operations,
Trivandrum, 18th October 1952.

DISTRICT CENSUS HANDBOOK

TRICHUR

Part I

A SHORT SKETCH

A. DISTRICT AND PEOPLE

1. INTRODUCTORY

Trichur, the northern-most district in the State has been formed by addition of the taluks of Kunnathunad and Parur formerly belonging to the Kottayam district in Travancore, to the erstwhile Cochin State immediately after the integration of the two States in July, 1949. The area of the district is 1,968·4 square miles, forming 21·5 per cent of the total area of the State. Out of this, towns cover an area of 45·3 square miles, and the rural area covers 1923·1 square miles. The headquarters of the district is Trichur.

The district is divided into eight taluks. The names, headquarters, and relative areas and population of these taluks are as follows :—

Name of taluk	*Headquarters*	*Percentage*	
		Area	*Population*
Cochin-Kanayannur	Ernakulam	8·06	22·29
Kunnathunad	Perumbavoor	18·43	13·87
Parur	Parur	5·73	10·50
Cranganur	Cranganur	0·89	2·34
Mukundapuram	Irinjalakkuda	26·16	16·62
Trichur	Trichur	12·60	16·23
Talappilly	Vadakkancheri	13·13	11·93
Chittur	Thattamangalam	15·00	6·22

The Chittur taluk consists of two disconnected parts the smaller of which, comprising an area of 105 square miles, lies on the eastern side of the Western Ghats encircled by the Madras State.

The population of the district according to the 1951 Census is 2,315,640; this forms a little less than one-fourth of the State population.

2. PHYSICAL FEATURES

The physical configuration of the district shows the same diversity as that of the other districts in the State. From the forest-clad Western Ghats in the east the land slopes to the west and presents a series of hills and valleys traversed east to west by several rivers, the waters of which arrested by the peculiar action of the Arabian Sea spread themselves out in numerous lakes or lagoons along the coast.

Mountains

The Western Ghats are composed of a succession of bluff ridges and conical peaks and present in general a very irregular outline. The chief ranges of hills that form the chain are (i) the Nelliampathi and Pothundi in Trichur taluk, (ii) the Machad in Talappilly, (iii) the Paravattani in Chittur, (ii)the Palappilly, Kodassery and Adirapilli in Mukundapuram and (i) the Malayattur in Kunnathunad. These ranges vary in height from a few hundred feet to about 5,000 feet above sea level and among the labyrinth of these ranges are some elevated table lands, the chief of which is the Nelliampathi plateau with an average elevation of 3,000 ft. Karimalagopuram in the Nelliampathi range and Vellani in the Paravattani range are less extensive plateaus but the former has an average elevation exceeding 4,000 feet. Besides these mountain ranges, there are several isolated hills of varying elevation that lie dotted here and there over the laterate plains.

Peaks

Nellikotta or Padagiri on the Nelliampathi, 5,200 ft. high, is the loftiest peak in the district and Karimalagopuram is also nearly of the same altitude. Among the other peaks are Vellachimudi, Valiyavana Ridge, Myanmudi, Valavachan, Mulankunnu, Kuvayali, Vimpalakavala, each a little over 4,000 feet in height, and Pannimudi, Nadukani, Sherunelli, Valiyalavara, Tottivara, Kantalpara, each over 3,000 feet high. The chief peaks of Paravattani are Vellani, Thirumani and Ponmudi ; of Machad, Kodikuttiakunnu; of Kodassery, Kodasserykoomban, and Kumbitanmudi ; of Palappilly, Pandimudi, Kumpancheri and Irulumala ; and of Malayattur, Kurusumudi. About a third of the district is mountainous, covered with forests containing valuable species of timber and abounding in a large variety of game. Plantations crops like rubber, tea, coffee and cardamom are grown on the highlands and the slopes of mountains.

Rivers

Owing to the shortness of the distance between the mountains and the sea, most of the rivers are small. The chief rivers are the Periyar, (or Alwaye) the Chalakkudi, the Karivannur, the Ponnani (or Bharathapuzha) and the Chittur.

The Periyar (length 142 miles) rises in and flows for the most part of its length through the Kottayam District; but in its lower reaches when the river is both broad and deep it traverses the Trichur District. The water of the river is believed to have medicinal virtues and consequently Kaladi, Chowwara and Alwaye on the river are resorted to by large numbers of people during the hot months of the year. At Alwaye the river branches into two, one arm flowing in a northwesterly direction into the Cranganur backwater and the other flowing in a southerly direction into the backwater near Varapoly; one branch of the southern arm empties itself into the backwater near Thrippunnithura.

The Chalakkudi. The chief streams which combine to form the Chalakkudi river rise in the Anamalai and Nelliampathi hills. The combined river flows through wild mountainous country for about 50 miles as far as Kanjirapally where it reaches the plains. Its flow is interrupted by numerous rapids and falls the chief of which is the picturesque fall at Adirapalli, an almost vertical drop of over a 100 ft. From Kanjirapally the river takes a tortuous course for about 20 miles, and empties itself into the right arm of the Periyar at Elanthikkara, 6 miles east of Cranganur. It is 90 miles long and is navigable as far as Kanjirapally. The chief tributaries are the Parambikulam, the Kuriyar and the Sholayar.

The Karivannur formed by the junction of the Manali and the Kurumali, discharges itself partly in the Manakodi lake and partly into the Chetva backwater. The tributaries dry up during the hot season, but they are useful for floating timber during monsoon months. The total length of the river is nearly 40 miles and it is navigable for about 15 miles for half the year.

The Ponnani or the Bharathapuzha river, the longest on the west coast, forms the boundary between the Trichur and the Malabar Districts for about 25 miles. It is useful to the State as a convenient outlet for the timber extracted from the Pothundi and Machad forests.

The Chittur is that portion of the Aanamalai river which flows through this district for a length of 15 miles in a bed of rock and sand. The fall in the level of river is availed of for the construction of anicuts for irrigation purposes in Chittur taluk.

Among other minor streams used for irrigation may be mentioned the Vadakkancheri (length 27 miles) and the Viyyur (length 15 miles) which fall into the Enamakal lake.

Backwaters and lakes

The backwaters in this district and the canals connecting them form part of a chain that stretches from Ponnani in Malabar to Trivandrum in the south. They are very irregular in form with a width ranging from 4 miles to 40 yds. and branching out into a number of shallow channels containing several low alluvial islands. The backwaters are at their best both in point of breadth and depth between Cranganur and the southern boundary of the district, while those towards the north are generally narrow and shallow. But almost throughout their length, they are navigable for all sizes of countryboats throughout the year. Communicating with the sea at three points viz., Cochin, Cranganur and Chetva they are affected by the flood tides twice in every 24 hours, when they rise about 2 feet, and flow at the rate of 2½ miles an hour except during the monsoon months, when the rapidity is according to the volume of the flood water. The banks are generally low and often marshy, and the shore on either side is densely covered with cocoanut palms or bordered by paddy fields.

The sea originally extended as far as the eastern shore of the present line of backwaters and the strip of land between the backwaters and the sea and the backwaters themselves came into existence in comparatively recent times. The tract between the Cranganur and Chetva bars called Manappuram, came into existence some centuries before the Christian era but the tract between Cochin and Alleppey called Karapuram was formed some centuries later and Vaipin (or Puthuvaipu, the island between the Cochin and Cranganur bars) was formed only in the 14th century.

There are several fresh water lakes in the State, the chief of which are the Enamakal and Manakodi in Trichur taluk, the Muriyad in Mukundapuram and the Kattakampal, in Talappilly. The first two are connected with each other and has a combined area of 25 sq. miles. At the commencement of the hot weather, these lakes are drained and their beds cultivated with paddy.

Islands

The backwaters in the Cochin-Kanayannur taluk are dotted with several islands, the chief being Mulavakkad, Kadamakudi, Cheranellur, Kumbalangi, each about 4 sq. miles in extent; Edakochi, Kumbalam, Cheppanam, Venduruthi and Chennamangalam are each about a sq. mile. Pullut three sq. miles in extent forms part of Cranganur taluk while Arimboor about 9 sq. miles and Pullu, 1½ sq. miles, are picturesque islands in the Enamakal-Manakodi lake. Most of the islands in the backwaters were formed by the deposit of alluvium brought down by the rivers during the monsoons. They are generally low and swampy, abounding in coconut palms.

The Willingdon island (area about 800 acres) has been formed by the spoils of the dredging carried out in connection with the construction of the Cochin harbour.

Coastline

The sea board is an unbroken stretch of sand; there are however outlets from the backwater to the sea at Cochin and Cranganur. Cochin is a seaport whose use and importance have been recently improved by the removal of the bar which prevented the entry of large ships into the inner harbour and by the deepening of the inner harbour. Cranganur, 'the Muziris' of ancient writers and a flourising port for several centuries has fallen into decay on account of the blocking of the mouth of the river by sand banks. Until recently sailing craft used to call here with salt from Bombay; even these vessels had to stand out in the sea and unload their cargo into barges.

There are smoothwater anchorages at Njarackal similar in origin and character to the mud-banks at Alleppey. The mud flat at Njarackal extends about three miles along the shore and four and a half miles out to sea. Ships can ride safely in these roads and load and unload cargo at all seasons. Before the construction of the Cochin harbour ships from Cochin used to take refuge here during the south west monsoon.

Natural sub-divisions

The district can be divided into three natural sub-divisions, the highlands, the midlands and the lowlands. The lowland covers 19 per cent, the midland 48 per cent. and the highland, 33 per cent. of the total area of the district.

3. GEOLOGY

The Western Ghats are formed of Archaean gneisses and charnockites. The midlands and lowlands are covered by thick lateritic formations. Patches of sandy beds and clays occur along the coastal fringe.

Economic minerals

White silica sand suitable for glass manufacture is found at Eroor, Puthiyakkara, Nettur, Panangad and Palluruthi in the district.

China clay is found below the laterites in many localities. Workable deposits occur in Mulanthuruthi, Amballoor, Irimpanum, Chennamangalam, Krishnan-kotta, Poyya, Shanmughom canal area, Kizhupilli kara etc. The Cochin Potteries at Chalakudi are manufacturing fire-bricks from the quarrying clay brought from Kizhupillikara.

An inferior type of clay containing iron compounds occurs in several parts of the State and is used for tile and brick manufacture; a number of factories engaged in this industry are located in Trichur, Ollur, Pudukkad and Karuvannur.

The chief building material in the district is laterite which occurs in all parts of it, except in the low sandy plains and the isolated portion of the Chittur taluk.

4. CLIMATE, RAINFALL AND VEGETATION

Climate

A heavy annual rainfall, a warm humidity of the atmosphere and a uniform temperature throughout the year are the characteristic features of the climate of this district, as of the State, generally.

The year may be divided into three seasons, the dewy, the hot and the rainy. The dewy season lasts from December to February; the days are hot, the nights chill and there is heavy dew fall. The hot season begins in February and lasts till June; both days and nights are hot, though the heat may be moderated by occasional showers and in the coastal regions, by the sea breeze. Strong land winds blow in the northern parts of the district. June to November may be considered as the rainy season The southwest monsoon sets in June and lasts till August, June and July witnessing the heaviest rainfall. The north-east monsoon strikes in October and continues till November. As a rule, the rainfall is heavier in the mountainous and sub-montane tracts than in the coastal area The average rainfall in the sea board is about 120 inches in the plains and in the eastern portions of the Chittur taluk, 60 inches. The abundance as well as the irregular distribution of the rainfall is due to the Western Ghats, which arrests the rain clouds brought up from the Indian Ocean by the monsoon winds, and cause rain to precipitate in the narrow stretch of country between them and the sea. The rain clouds passing through Chittur are not caught in this manner as some of them escape through the Palghat gap to Coimbatore, and consequently Chittur receives less rain than other parts of the district. The southwest monsoon is responsible for more than seventy five per cent of the rainfall; the northeast monsoon is of short duration. The average number of rainy days during the year is 130 in Cochin, 145 in Trichur, 151 on the Nelliampathies and 100 in Chittur-Thattamangalam.

The annual mean temperature on the coast (for Cochin) is 83°, the mean highest and the mean lowest temperature respectively are 93° and 74°. On the whole, the climate though moist and often unpleasant, is not particularly unhealthy. The lower hills and parts of the Chittur taluk are feverish during the dry months while the sea-board tracts breed elephantiasis.

Vegetation

The flora of the district are rich in variety and luxuriance thanks to the copious rainfall and the humidity of the soil and atmosphere.

The most valuable trees of the forests are teak, ebony and blackwood. Among other timber trees found in the forests are irul, maruthu, thembavu, mailellu, venga, venteak and kunni vaka ; there are also a number of soft wood trees and some varieties of bamboo.

Among the important trees cultivated in the midlands and lowlands may be mentioned cocoanut and arecanut, grown in all parts of the State, talipot, found only in the northern taluks, palmyra, grown mainly in east Talappilly and Chittur, mango, jack, plantain (several varieties of it are grown), cashew (grown in sites too high for irrigation), tamarind and drumstick.

5. AGRICULTURE

Soils

The prevailing soil is a red ferruginous loam. At the foot of the Ghats and in the isolated portion of the Chittur taluk, this loam is derived from gneiss. On the slopes of the Ghats there is in several places an overlying layer of black mould formed of decayed vegetable matter. In the middle zone which contains the major portion of the cultivated area the soil is lateritic, varying in quality from rich loam to uncultivable laterite. In the lowlands the soil is arenacious, consisting mostly of recent deposits of sand and mud due to river alluvium. In the Chittur taluk a layer of black cotton soil is found in some areas.

Irrigation

Taking advantage of the fall in the level of the Chittur river a number of anicuts have been built across the river to divert water for irrigation.

In recent years lift irrigation from the Periyar by means of electric pumps has been adopted at some places in the Kunnathunad and Parur taluks ; the area so irrigated comes to about 15,000 acres. In other taluks the sources of irrigation are tanks, 'chiras' and wells.

Implements

The irrigation appliances are the local picottah and mhote.

Agricultural implements include the local ploughs, spades of different patterns, rakes and levelling planks. Tractors and iron ploughs are coming into use gradually.

Manures

The soils are generally deficient in nitrogen, phosphorus and in many cases, potash also. Lime is deficient except in certain areas of Chittur taluk.

Agriculturists are now using fertilisers like groundnut cake, ammonium sulphate and bone-meal in increasing quantities.

Principal crops

The following statement gives the area under principal crops :

Name of taluk	Area in sq. miles				Area in sq. miles under principal crops		
	Total	Occupied	Wet-land	Dry-land	Paddy	Cocoanut	Tapioca
District	**1968·4**	**1135·8**	**465·3**	**670·5**	**670·2**	**138·3**	**135·7**
Cochin-Kanayannur	158·6	116.2	49·4	66·8	54·5	30·9	44·1
Kunnathunad	362·7	238·3	95·4	142·9	98·0	1·7	25.3
Parur	112·7	101·2	48·6	52·6	51·3	42·5	3·4
Cranganur	17·5	14·7	4·6	10·1	3·1	10·0	..
Mukundapuram	514·9	209·2	85·1	124·1	125·8	27·3	16·9
Trichur	248·0	153·0	73·2	79·8	95·2	18·7	31·9
Talappilly	258·5	181·0	63·3	117·7	124·0	4·8	14 1
Chittur	295·5	122·2	45·7	76·5	88·3	2·4	..

The area under the other important crops in the district are :—

Rubber	10·70	square miles
Tea	2·63	„ „
Pepper	6·51	„ „

Paddy

Paddy is the most important crop of this district. In certain areas there are three crops taken during the year, *viz.*, Viruppu, Mundakan and Punja. The first crop is the viruppu, and is purely rainfed. The seeds are generally sown broadcast in April-May after the first showers of rain, and the harvest is in August-September. In the low-lying viruppu fields transplantation takes place in June-July. Mundakan is the second crop occupying the ground from September-October to January. This is generally transplanted and requires irrigation being only partly rain-fed. The third crop, punja is cultivated from January to May and depends entirely on irrigation facilities. (This is sown broadcast or transplanted).

There are lands in which all the above three crops are raised successively in a year. A good extent is under viruppu and mundakan, but the majority of wet lands are single crop viruppu lands.

The single crop swamp paddy lands adjoining the backwaters are subject to floods in the monsoon, and to tides from the sea in the hot months. The soil becomes very saline in the hot months, and the success of the crop depends on heavy rainfall which washes off the salinity.

Kole lands (covering about 20,000 acres in Trichur, Mukundapuram and Talappilly are fresh water lakes which are drained during December-January by engines. A short duration type of paddy which matures in three months is cultivated between January and May. The fertility of these lake beds is kept up by the deposit of silt every year during the monsoons. In some of these kole lands, a deep-water variety of rice called Kuttaden is cultivated. The seeds are sown broadcast in March-April and the harvest is in November-December. By the time the plants are a foot high, the lands get flooded but the plants always keep above water level.

Other cereals

Besides paddy, ragi and chamai are grown to a small extent. Maize and jowar are cultivated sparsely as garden crops.

Pulses

Horse-gram is grown in rotation with paddy in the high lands after the viruppu crop is harvested. Cow-peas are grown in garden lands and bunds of paddy fields during the south-west monsoon. Green gram, and black gram are grown only to small extent, while the cultivation of red gram is negligible.

Oil seeds

Groundnuts are grown as a dry crop in Chittur taluk and its cultivation is entirely confined to this taluk; about 20,000 acres are cultivated. Gingelly is grown to a small extent in rotation with paddy, and also in garden land.

Cotton

Cotton is grown in the Chittur taluk.

Livestock

The indigenous breed of cattle is weak and stunted in growth and has been steadily deteriorating. The cows are bad milkers and bulls too weak for heavy draught. Good draught bullocks and milch cows are imported from outside.

The Government farm at Ollukkara in Chittur taluk is raising pure-bred Scindi cattle and also trying to improve local stock with the help of Scindi bulls.

Inadequacy of local production

Even though the area under rice is estimated at 640 sq. miles it has to be pointed out that the local production is insufficient for the requirements of the district. Improvement of agricultural production can be achieved only by the introduction of improved methods of cultivation and increased facilities for irrigation. One of the chief obstacles to raising the efficiency of agriculture is the existence of uneconomic holdings. Soil erosion and agricultural indebtedness are also major problems.

Fisheries

Sardines, and mackerel form the most important fishes of this district. Whitebait, dorab, butter fish, seerfish and jewfish are also obtained during certain seasons in the year. Catfish, perches, sharks and rays are obtained occasionally. The chief inland fishes are prawns, mullets, bhekti, milk fish and pearl spot. Carps, snake head and catfish are the important freshwater fishes. The chief fishing centres are Ernakulam, Fort Cochin, Njarackal, Munambom, Eriyad and Azhikode. There is a Government fish farm at Njarackal. Dried prawns are exported to Burma; besides dry fish, some fresh fish is sent from Ernakulam by rail to Bangalore.

6. LAND TENURES

All lands are classed as Pandaravaka, or Puravaka, the State having the jenmom or proprietary right over the Pandaravaka land, while the proprietary right over Puravaka land rests with private individuals or public institutions.

The chief land systems of tenancy under which tenants hold lands owned by others are :—

I—Verumpattom. This is simple leasehold. By a series of legislative enactments culminating in the Cochin Tenancy Act (118 M. E.) hailed as the Magna Carta of tenants, tenants have occupancy rights in the lands held by them.

II—Kanam. Verumpattom becomes a kanam when the landlord acknowledges liability to pay a lump sum to the tenant on the redemption of his lease.

III—Pankuvaramdars—Under this tenancy tenants raise crops on agricultural lands in partnership with the owners, the terms of partnership varying from place to place.

IV—Kudikidappukar. Under this arrangement landlords allow tenants to occupy a portion of their land generally for putting up a house.

V—Otti (Mortgages). Tenancy under this head take different forms in different regions.

7. TRANSPORT AND COMMUNICATIONS

In former times when waterways formed the only traffic routes, the navigable rivers, backwaters and canals, particularly abundant in the southern taluks of the State, provided cheap and easy transport. In the 19th century, several improvements were made to these waterways; new canals were constructed to link up some of the backwaters. Though in recent times, waterways have generally suffered from the rivalry of roads and railways, they still carry on a considerable volume of trade and passenger traffic. These waterways extend in the north, as far as Tirur in Malabar and in the south, they join the backwater and canal system in the Kottayam district.

Road making, started in the fifties of the last century, has made great progress and the whole district is now covered by a net-work of main roads and village roads. The development of the Cochin Harbour gave a new impetus to road construction. A major achievement during recent years is the Chalakkudi-Anamalai road (length about 50 miles) "one of the prettiest hill roads in India, which at one spot reaches an elevation of 2900 feet" and opens up the planting districts in the Anamalais.

The volume of motor traffic, both passenger and good, has registered a rapid rise in recent years. In many places they have completely eliminated bullock-carts as carriers. The State Transport Department has so far organised only services between a few towns in the southern taluks in this district.

The following table gives the length of roads and canals in the different taluks :—

Length of Roads and Canals (in miles)

Name of taluk		Main Roads	Planter's Roads	Village Roads	Canals.
Total	..	756·7 755·87	..	319·37	48·45
Cochin-Kanayannur	..	72·42	..	...	..
Kunnathunad	..	173·04	..	58·12	20·00
Parur	..	63·41	..	76·38	16·83
Crangannur	..	2·50	..	21·00	3·00
Mukundapuram	..	136·50	..	48·25	8·62
Trichur	..	120·12	..	40·37	..
Talappilly	..	124.88	..	26·75	..
Chittur	..	63·50	..	48·50	..

The metre-gauge Shoranur-Ernakulam Railway constructed between 1899-1902 was converted into a broad-gauge railway (1930-35) in connection with the development of the Cochin harbour; in 1940 the railway was extended to the harbour to help the traffic of the port. The total length of the railway running through this district is now 72 miles.

Cochin is an air port, (the aerodrome being situated on the Willingdon Island) and an important halting place for regular services.

Posts, Telegraphs and Telephones. Almost all villages have post offices. Telegraph offices exist in all towns. Telephone connection in the district are detailed below :—

Serial No.	Name of Exchange or public call office	Number of connections
1	Perumbavoor P. C. O. ..	11
2	Kuruppampady P. C. O. ..	Nil
3	Alwaye Exchange ..	46
4	Alwaye palace post Office P. C. O.	Nil
5	Eloor P. C. O. ..	Nil

8. ELECTRIC POWER

Diesel power stations were established at Kalamasseri, Nemmara, Mattancheri, Ernakulam and Trichur, the last three under licensee ownership. With the extension of the Pallivasal hydro-electric system, the power stations at Kalamasseri, Mattancheri and Ernakulam were closed.

This district derives its electric supply from the Pallivasal hydro-electric system and the Pykara system of the Madras Electricity Department, the latter supply being utilised for distribution in the Chittur area. 63 K. W. lines and substations have been erected for transmission and transformation respectively of power received from the Pallivasal hydro-electric system.

Alwaye is the most important consuming centre in this direct. Industries run on electricity include aluminium fertilisers and chemicals, textiles, glass, tile works etc.

Tracts of paddy land in the Kunnathunad and Parur taluks are irrigated from the Periyar river by means of electric pumps. Electricity is also being employed on a large scale to dewater kole lands in Trichur areas for purposes of rice cultivation.

In order to meet the increasing demand for power in this district, the Poringalkuthu hydro-electric scheme was taken up. This scheme contemplates the development of power from the Chalakkudi river, in 4 stages. Under the first stage which is now under execution, a dam will be built across the river near Poringalkuthu to store about 1,200. m. c. ft. of water. This water will be utilised for running 3 numbers of 8,000 K. W generating sets totalling 24,000 K. W over a head of about 600 feet. The scheme is programmed for completion by the end of 1954.

9. FACTORY INDUSTRIES

Cotton textiles — The first textile mill to be set up in the district was the Sitaram Spinning and Weaving Mills at Trichur, established in 1909. It is the largest textile factory in the State In recent years, a few more mills have been started, the Alagappa Textiles at Alagappanagar, near Pudukkad, (a spinning mill,) the Sri Chitra Mills, Alwaye, engaged in the bleaching of grey cloth, the Cochin Mahalakxmi Mills at Mulankunnathukavu (producing yarn), Vanaja Textiles, Trichur and Ashok Textiles, Alwaye.

Rayon textiles — Travancore Rayons, Perumbavoor is designed to produce transparent paper andrayons from the locally available reeds (the estimated capacity is 1 1 4 tons of transparent paper and 5 tons of rayon per day). The factory is now producing transparent paper and rayons from imported pulp.

Chemicals and fertilisers — Fertilisers and Chemicals (Travancore) at Alwaye started in 1947, manufactures ammonium sulphate and superphosphate (the installed capacity is 45,000 tons of ammonium sulphate and 12,000 tons of superphosphate). It also produces sulphuric acid, calcium carbonate, carbon dioxide and wood tar. A caustic soda plant has also been set up recently.

Indian Aluminium Co., Alwaye started in 1943 is engaged in the manufacture of aluminium ingots from aluminia (the annual production is 2,410 tons of aluminium).

Aluminium

The Ogale Glass Factory at Alwaye, started in 1944 uses the beach sands from Sherthala and manufactures bottles, tumblers, chimney ware and other glassware.

Glass

Work on the construction of the Indian Rare Earths Factory designed to process monozite and other minerals of strategic importance, found in the beach sands of the State, a concern jointly owned by the Government of India and the State Government is in progress at Alwaye.

Rare Earths

The Cochin Potteries at Chalakkudi, originally started as a Government concern is now worked by a private firm; it makes a large variety of glazed jars. The Standard Potteries, Alwaye manufactures a large range of clay products

Ceramic Industry

Alwaye, Trichur Pudukkad and Ollur are the centres of tile industry.

Tiles

Oil extraction by machine power was started at Cochin towards the end of the last century. There are oil mills at Cochin and Ernakulam of which the Tata Oil Mills at Ernakulam, established in 1918 (whose products include cocogem, hamam soap, 501 laundry soap, eaulde cologone, hair oil, glycerine) deserves special mention.

Cocoanut oil nut industry

The Vanchinad Match Works near Perumbavur utilises soft wood from the local forests. The making of splints and veneers is carried on as a cottage industry in the neighbourhood of the factory. There are also a few small match factories at Chalakkudi and Trichur.

Match industry

There are saw mills at Chalakkudi, Trichur, Ollur and Alwaye.

Timber industry

There is a plywood factory at Chalakkudi. Small plywood factories are working at Angamali and Nemmara. Boat building is carried on by the Madura Company at Cochin.

A fish and fruit canning factory is working at Ernakulam; there is another factory at Trichur also (for canning pine applies).

There are a number of coir factories in Cochin and the neighbourhood.

Brunton and Co., Cochin, makes boat engines and builds bodies for motor and steam launches. There are a few small firms engaged in the manufacture of agricultural tools and various articles of common use from iron and steel. There are also repair shops at Trichur and Cochin.

Engineering works.

There are a number of rice mills in the district, mostly in the Trichur taluk.

There are a number of printing establishments at Ernakulam and Trichur.

Printing establishments

The number of registered factories is about 200 and the number of factory workers about 20,000.

10. COTTAGE INDUSTRIES

Cotton weaving is carried on in all taluks, particularly in the Cochin-Kanayannur, Chittur and Talappilly taluks, where a considerable number of people are engaged in it. No power loom has been reported among the textile establishments classified as small industries.

Cotton weaving

Arecanuts have to be cured for the market. They are plucked when tender, husked and the kernels sliced, boiled and dried. In the taluks of Talappilly, Trichur and Mukundapuram, a large number of men and women are engaged in this industry. Pazhanji, Vadakkancheri, Kunnamkulam, Irinjalakkuda and Trichur are the centres of the industry,

Curing of arecanuts

The oil crushing industry is carried on in all taluks. Small power-driven mills are being installed in some places and show a tendency to supplant ghanies.

Oil extraction

Coir Retting facilities and cheap water communications have made Parur and Cochin-Kanayannur taluks seats of the coir industry.

Pottery Village potters (mostly belonging to the Kusava caste) make a large variety of earthenware articles for domestic use. Trichur, Mukundapuram, Talappilly and Kunnathunad taluks have fairly large numbers of potters.

Mats and baskets Mat and basket weaving is carried on at all places where bamboos and reeds are obtained from the forests ; it is generally one of the traditional occupations of certain low castes.

Bell metal works A variety of articles required for domestic use are made from bell metal and brass, though the industry has declined in recent years owing to changes in habits and fashions Trichur and Chittur are the chief centres of the industry in this district.

Grass mats Kora grass mat weaving is an important industry in parts of the Talappilly and Chittur taluks. High quality mats of fine texture and tasteful design are often made.

Lemon grass The distillation of lemon grass is carried on in some taluks particularly Kunnathunad.

Polishing of imitation stones Synthetic stones coming from Switzerland are polished and re-exported to foreign countries; Trichur, Ollur, Pudukkad are the chief centres of this industry.

Jaggery In the coastal tracts, sweet toddy tapped from cocoanut trees is used for making jaggery.

Fish curing Fish-curing is an important cottage industry in the Cochin-Kanayannur taluk

Other industries Small smithies mending agricultural implements are found in many places in rural areas ; repair shops have sprung up in the towns.

The furniture industry and leather works are found in all towns. Bidi making is carried on in all towns on a cottage-industry basis

11. PUBLIC HEALTH

The general public health conditions of this district may, on the whole, be considered to be satisfactory. The climate is pleasant for the major part of the year. Drinking water mostly obtained from wells is generally good except in the coastal regions where it is brackish ; there is, however, water scarcity in summer in most of the villages in the Chittur taluk. There is pipe water supply for the villages of Nemmara and Ayilur in the Chittur and Thiruvilwamala in the Talappilly taluks. The three major municipalities also have protected water supply.

The following are the chief communicable diseases in the district :

i. Small pox often breaks out in the dry months, in spite of mass vaccination.

ii. Cholera is generally imported from the Coimbatore district. Inoculation, disinfection and chlorination of water supplies are carried on intensively to control the disease.

iii. Plague. Mattanchery, the biggest commercial centre in the State and the seat of godowns is often affected by plague. Control measures have succeeded in preventing any out-break in recent years.

iv. Malaria is endemic in the hilly tracts of Chittur and Talappilly Taluks. Anti-malarial measures include D. D. T. and pyrethrin spraying.

v. Filariasis is prevalent in the coastal taluks.

12. EDUCATION

Beginnings of State activity State activity in the field of education began from the time of Col. Munro ; at his instance a proclamation was issued in 1818, establishing 33 Malayalam schools, one in each pravarthi "with the avowed object of training up young men for State service as writers and accountants". However, these State schools were not an improvement on the old village schools and were abolished in 1832. In 1835 Dewan Sankarasubbayya established six Malayalam schools, one in each taluk ; though they were soon eclipsed by English schools they lingered on till 1890.

English education

The first English school started in 1818 at Mattancheri by an English missionary, Rev. J. Dawson, with the aid of a grant from Government did not strike root and had to be closed down in three years. In 1835 another English school was opened in Jew Town. Later, government English schools were opened at Trichur (1837), Ernakulam (1845) and Trippunithura. Under the fostering care of Mr. A. F Sealy, the Ernakulam School was raised to a high school; and the first batch of candidates for the Matriculation Examination was presented in 1868. In 1875 it was raised to the status of a second grade college and in 1925 it became a first grade college. Meanwhile a number of private colleges were also started in various parts of the district.

By 1875 Government English schools were opened in all important centres in the State. The promulgation of rules for the giving of grants in aid to private agencies in 1889 led to the opening of several private schools. The education of girls also received special attention.

The following table gives some details regarding the colleges in this district for the academic year 1950-51 :—

Sl No.	Name of institution	Course of study	Strength			Number of students living in hostels			Number of full-time teachers

Taluk-wise details of schools in this district and their strength for the school year 1950-51 are given in a separate statement appended to this part; as may be seen from the statement there are 1164 schools and 339, 259 pupils.

Printing presses and periodicals

The number of printing establishments in this district is 142. The history of journalism in this district dates back to the sixties of the last century. At present there are eight dailies (six published from Ernakulam and two from Trichur). There are also about a hundred other journals devoted to literature, art, politics, business and commerce.

Libraries

There is one district library (The Ernakulam Public Library), two taluk libraries and 361 other libraries; Government help the libraries with grants.

13. LOCAL SELF-GOVERNMENT

Municipalities

There are eight municipalities in this district. Municipal councils consist partly of elected and partly of nominated members, the elected members forming not less than three-fourths of the total number. All municipal councils have the right of electing their chairmen and enjoy powers of taxation. Among the obligatory functions of municipalities are sanitation, lighting of public streets, vaccination and registration of births and deaths. In addition, municipalities attend to the maintenance of existing roads and opening of new roads, the organisation of child welfare centres and free midwifery service. Some municipalities also run libraries and give grants-in-aid to Ayurvedic and other dispensaries.

Panchayats

Panchayats are the local self-government institutions in rural areas. Panchayats were instituted in 1925. There are now 123 panchayats in the district. A new Panchayat Act was passed in 1950, with a view to vesting the panchayats with more powers, particularly powers of taxation and providing for elections under adult franchise. Under the Act, there will be 132 panchayats in the district.

The activities of the panchayats cover all aspects of rural welfare. Conservancy arrangements, sweeping of streets, street-lighting, improvement of roads, construction of public wells, tanks, latrines and midwifery service are some of the items of work attended to by these local bodies. Besides, some of them promote rural reconstruction work by running libraries or reading rooms, encouraging compost-making, distributing improved seeds and maintaining stud bulls.

14. DEVELOPMENT PROJECTS

The following are the chief development projects in the district :—

Peechi Irrigation project. The main feature of the project is the construction of a masonry dam across the Manali river to store the waters that run to waste during the monsoon and utilise them for irrigation. The site of the dam is 15 miles north-east of Trichur. The length of dam is 750 feet and its maximum height 130 feet over the deepest bed. The capacity of the reservoir is 4,000 million c. ft. with a waterspread of 5 sq. miles. The canal system consists of 50 miles of main canals and 100 miles of branch canals and 4 main, and a number of small, acquducts. The estimated cost of the project is Rs. 196 lakhs ; when completed it will irrigate 46,000 acres of land and also provide drinking water to Trichur town. The project is expected to be completed by the end of 1953.

The Chalakkudi river diversion project. At Thumburumuzhi about 10 miles east of Chalakkudi a weir with a maximum height of 12 feet above river bed and length of 450 feet is built across the Chalakkudi river to divert the water to paddy fields lower down. Suitable training walls lead the water to the right and left bank head-sluices. The canal system involves construction of 35 miles of main canals and 90 miles of branch canals. It is intended to benefit 50,000 acres of land including existing paddy fields and dry land to be converted into paddy fields. It will solve the drought problem of the kole fields of Mukundapuram and Trichur taluks by diverting the water of Chalakkudi river into the Kurumali river. The estimated cost of the scheme is 153 lakhs for the first stage and 57·5 lakhs for the second stage. It is expected to be completed in 1953.

Vadakkancheri River Valley Scheme. It is proposed to store water for irrigation in the upper reaches of the river by throwing an earthern dam across the Vadakkancheri river at Vazhani. The capacity of the reservoir is 800 million c. ft. It will irrigate 11,000 acres of land. The cost is Rs. 57·5 lakhs ; the scheme is expected to be completed by May, 1953.

Poringalkuthu hydro-electric project. This scheme is intended to develop electric power from the Chalakkudi river with the aid of a reservoir in the foot hills of the Western Ghats at Poringalkuthu. A masonry dam across the river will create a reservoir with storage capacity of 1130 million c. ft. Water will be conveyed through a tunnel nearly 4000 ft. long to penstock pipes ; the project is expected to produce 24000 k. w. of power. It is expected to be completed in 1954 ; the total estimated cost is Rs. 260 lakhs.

15. BACKWARD CLASSES

Social reform

Time was when Kerala was considered as the most caste-ridden part of India. The old order has however, been changed and changed rapidly, during the past half century. A social reform movement with the avowed object of removing the social and economic disabilities of citizens belonging to the so-called "low-castes" was inaugurated early in the 19th century by the ruling soyereigns. Several iniquitous taxes imposed on these castes were abolished. Sale or purchase of low caste people were restricted ; taboos imposed on the use of several articles, dress covering the upper part of the body, ornaments etc. by low-castes were removed. Later, slavery in all forms was abolished.

Public roads were thrown open to all castes. Schools were specially established for them, and subsequently free admission to Government as well as aided schools was given to them. Suitable provisions were made for the recruitment of backward classes to the public service. A comprehensive programme for the amelioration of the condition of backward communities was launched by Government about three decades ago. Thanks to these measures, (the Temple Entry Proclamation, throwing open Hindu temples to all classes and the enactment of the Civil Marriages Act were important milestones in the path of progress), and the uplift work carried on by Christian and Hindu missions, caste barriers have broken down, so that today caste is no longer the controlling feature of social life.

Scheduled Castes

In this district the number of people belonging to the Scheduled Castes is 259,970 or 11 % of the total population.

Scheduled Tribes

4,741 people were enumerated as members of Scheduled Tribes. These people living in the highland region, seem to be diminishing in numbers. How these communities can be helped to maintain their strength and their culture against the impact of modern civilization is a problem for social anthropologists.

16. SOCIAL CONDITION

Houses

A peculiar feature of the country is the scattered disposition of houses or the complete absence of the street-system in rural areas except in parts of Chittur taluk; each house even the humblest stands in its own ground, surrounded by at least a few essential trees and plants, a practice conducive to personal and social hygiene. This factor accounts for the comparative freedom from epidemics in the State.

The houses of the poor people are built of mud with no doors or windows and thatched with plaited cadjan or palmyra leaves or, in some places, grass. The houses of the middle classes have walls made of wood or sun-dried or burnt bricks; they have substantial roofs and also doors and windows and may either be thatched or tiled. The richer classes have large houses built according to new fashions, of brick or concrete and equipped with drainage and other modern conveniences.

Dress

In matters of dress, new fashions (based on those in vogue in other parts of India) like the shirt, the coat, the blouse, the sari, and coloured silk clothes are rapidly spreading among all classes. A similar transformation is taking place in regard to ornaments, too.

Food

Rice is the staple food of the people; owing to the increasing scarcity of rice in the State, the low-income-groups are compelled to use tapioca in the place of rice (the effect of this habit on physique and health has not yet been scientifically studied). Some sections of Hindus are vegetarians. The Christians and Mahomedans generally eat more fish and meat than the others. New tastes in food are beverages like tea and coffee which have spread even into the countryside.

Amusements

While time-honoured amusements like Kathakali, Thullal etc. are still enjoyed by the less sophisticated people of the countryside, the cinema has established itself everywhere as the most popular form of recreation; even the small towns have at least one cinema house. Music is in great demand; dramas especially those with accent on music are also appreciated. Western games like foot-ball, tennis, volley ball, badminton, etc. enjoy great popularity, among the youth.

Festivals

The national festival is Onam (in August-September) celebrated by feasts and sports. Vishu (New year's day) in April, Dipavali (in November) particularly for Tamilians and Thiruvathira (in December-January) are also occasions for festivity and rejoicing among Hindu communities. The Christians and Mahomedans celebrate their religious festivals. There are, besides, important festivals in temples and churches lending gaiety and colour to life in the localities.

Inheritance

About quarter of a century ago, the marumakkathayam system of inheritance (the matriarchal system) was given up by most communities in favour of the makkathayam (patriarchal system). Along with the marumakkathayam system, the joint family system was also abandoned; few communities now follow it.

Position of Women

Women in Kerala have always enjoyed much freedom and respect in society. They have made rapid progress in modern education so that today women belonging to several communities are found in the professions and in public life.

B. POPULATION (Analytical Summary)

17. DISTRIBUTION OF POPULATION

The population of Trichur district has increased by 114 per cent. during the past fifty years. The number of inhabitants per square mile is 1,176 giving per capita 54 cents of land. 84 per cent. of the population are confined to rural areas ; 43 per cent. are literate and 47 per cent depend on agriculture for their means of livelihood.

Density.

The number of persons per square mile of occupied land is 2,039 as against 1,176 based on the entire area of the district. The extent of occupied land is only 31 cents per head.

The distribution of population according to the natural sub-divisions is given below :

Sub-division	Area as a percentage of the total	Population as a percentage of the total	Density
District ..	100·0	100·0	1,176
Lowland ..	19·0	38·0	2,347
Midland ..	48·4	56·7	1,379
Highland ..	32·6	5·3	191

Natural Sub-divisions

The lowland comprising an area slightly less than a fifth of that of the district has 38 per cent. of the population. The density per square mile is 2,347. The rest of the population is mostly confined to the midland region with a density of 1,379 persons per square mile.

The following table gives the distribution of population in the taluks.

Name of taluk	Percentage population in taluk	No. of inhabitants per square mile		Land per capita (cents)	
		Total	Occupied area	Total	Occupied area
District ..	100·0	1,176	2,039	54	31
Cochin-Kanayannur ..	22·3	3,255	4,442	20	14
Kunnathunad ..	13·9	886	1,348	72	47
Parur ..	10·5	2,157	2,402	30	27
Cranganur ..	2·3	3,092	3,681	21	17
Mukundapuram ..	16·6	748	1,840	86	35
Trichur ..	16·2	1,515	2,456	42	26
Talappilly ..	11·9	1,069	1,526	60	42
Chittur ..	6·3	488	1,179	131	54

Taluks

Cochin-Kanayannur and Cranganur are the most thickly populated taluks in the district. Land per-capita in these two taluks is only 20 cents. Chittur taluk has the lowest density with 131 cents of land per head.

A glance at the figures of land per capita shows that the pressure on land in the lowland taluks of Cochin-Kanayannur, Parur and Cranganur is very great and that every inch of land has been brought under occupation. (The differences between figures of per capita land for the total area and occupied area are due to the existence of lakes and back-waters in these taluks). The remaining taluks are hilly and contain dense forests; the land per capita based on total area is very much in excess of that based on occupied area. The opening up of forests for cultivation and the improvement of irrigation facilities are fast in progress. The coming decade will naturally diminish the pressure on land in these taluks. Even so, no great material relief is to be envisaged as the maximum area of land available per person is small.

The following table gives the distribution of population in rural and urban areas in the taluks.

Name of taluk	Percentage of taluk population		No. of inhabitants per square mile				
			Rural		Urban		
	Rural	Urban	Total	Occupied area	Total	Non-Municipal	Municipal
District ..	84	16	1,014	1,788	8,073	4,068	11,603
Cochin-Kanayannur ..	74	26	2,490	3,448	22,698	...	22,698
Kunnathunad ..	92	8	881	1,279	3,634	2,627	6,755
Parur ..	91	9	2,038	2,280	4,966	..	4,966
Cranganur ..	65	35	3,162	4,280	2,970	2,970	...
Mukundapuram ..	92	8	698	1,757	4,033	4,033	..
Trichur ..	80	20	1,238	2,035	13,952	9,876	14,573
Talappilly ..	94	6	1,019	1,462	6,144	..	6,144
Chittur ..	72	28	356	887	7,050	12,889	5,277

Rural-urban distribution

84 per cent. of the people in the district live in rural areas. In Kunnathunad, Parur, Mukundapuram and Talappilly, the percentage of rural population exceeds 90 while in Cochin-Kanayannur and Chittur the percentages are a little over 70. In the small taluk of Cranganur only 65 per cent. live in rural areas.

Rural density

In the district, the number of persons in rural areas is 1,014 per square mile of total area and 1,788 per square mile of occupied area. The highest rural density is in Cranganur; Cochin-Kanayannur comes next. The lowest density is in Chittur. It may be mentioned in this connection that Cranganur, Cochin-Kanayannur and Parur taluks are all in the lowland and these taluks stand high in point of rural density. The density decreases as the mountainous nature of the land becomes more marked

Urban density

The density of population in urban areas is consistently high in all taluks. The grouping of municipal towns with non-municipal towns has in general increased the density in non-municipal towns and decreased that in municipal towns. Thus, the urban density for the whole district is 8,073 while the density for municipal towns is 11,603 and that for non-municipal towns 4,068. The density of Ernakulam and Mattancheri municipal towns is almost 22,700 and that of Trichur is over 14,500. The figures for the three municipalities show a very high degree of over-crowding. In the remaining municipalities, the density varies between 5,000 and 7,000.

The urban characteristics in Chittur taluk are different from those in the remaining taluks. Here the non-municipal towns have a density very much in excess of that in the municipal towns. The municipality is of recent growth and consists of two towns separated by a distance of about four miles, the intervening land being almost rural in character. The non-municipal towns consist of closely packed houses more or less in the form of streets. This explains the enormous disparity in densities of municipal and non-municipal towns in Chittur.

18. SIZE AND COMPOSITION OF HOUSEHOLDS

In regard to dwelling houses, the following table summarises the information collected at this census :—

Name of taluk	No. of inhabitants per 100 houses			No. of houses per square mile
	Total	Rural	Urban	
District ..	622	710	608	189
Cochin-Kanayannur ..	660	817	617	493
Kunnathunad ..	588	695	580	151
Parur ..	607	649	603	355
Cranganur ..	608	582	620	509
Mukundapuram ..	611	663	607	122
Trichur ..	653	724	638	232
Talappilly ..	612	579	614	175
Chittur ..	581	607	572	84

Number of inmates per house

About 6 inmates per house is the district average. The greatest over-crowding is found in Cochin-Kanayannur and Trichur where the number of inmates per house is over 6·5. In urban areas, over 7 persons per house is the average. The towns in Cochin-Kanayannur have over 8 persons per house.

Information regarding the distribution of families according to size is contained in the following table.

Size of households	District		Rural		Urban	
	Number	Density	Number	Density	Number	Density
Small (3 members or less)	192	2·36	192	2·37	194	2·33
Medium (4 to 6 members)	453	4·97	461	4·97	409	4·95
Large (7 to 9 members)	260	7·71	259	7·71	265	7·77
Very Large (10 or more members)	95	11·65	88	11·57	132	11·93

Households

It will be observed that about 45 per cent of the households are medium-sized with 4 to 6 members, 26 per cent large-sized with 7 to 9 members, while 19 per cent have less than 3 members; 10 per cent have over 10 members. The percentage of large-sized families is higher in urban areas than in rural places.

In regard to family structure, the results of analysis are as follows :—

Relationship	Population		
	District	Urban	Rural
ALL	1,000	1,000	1,000
Heads of households and wives ..	298	292	299
Sons of heads of households ..	239	228	241
Daughters of heads of households ..	208	197	210
Other male relations ..	99	122	94
Other female relations ..	156	161	156

Family Structure

Among household population a little less than thirty per cent. form heads of households and their wives, 45 per cent are sons and daughters of heads of house-holds and the remaining 25 per cent are other relations. Unrelated persons in house-holds are very rare.

19. AGE, LITERACY AND CIVIL CONDITION

The distribution of population according to age is given below : —

Age group		Persons	Males	Females
ALL	..	1,000	1,000	1,000
0— 4	..	140	146	135
5— 9	..	114	120	109
10 —14	..	123	128	119
15—24	..	212	206	217
25—34	..	140	137	144
35 —44	..	107	105	108
45—54	..	79	77	81
55—64	..	52	50	53
6:—74	..	24	23	25
75 and over	..	9	8	9

Age

38 per cent. of the population is below 15 years of age, 54 per cent between ages 15 and 54 and the remaining 8 per cent over 55 years of age. Thus over 50 per cent of the population may be considered more or less fit for work. Further, as there are only 8 per cent in the 45-54 age group, as against 24 per cent in the group 5-14, the 54 per cent between the ages 15-54 will be continuously replaced during the present decade.

In regard to literacy, the following table gives estimates (per 1,000 persons) of literates (sex-wise in broad age groups.

Age-group	Literates per 1,000.			Percentage of literates in each age-group.		
	Persons	Males	Females	Persons	Males	Females
ALL	433	5 2	347	43	52	35
0— 4	..	..	..	..	..	..
5— 9	26	28	23	22	24	21
10—14	78	87	69	63	68	58
15—24	135	147	123	64	71	56
25—34	82	100	65	59	73	46
35—44	51	69	34	48	66	31
45—54	32	46	19	41	60	23
55—64	19	29	9	36	57	18
65—74	8	12	4	33	54	16
75 & over	2	4	1	28	45	14

Literacy

In the above table columns 2, 3 and 4 give the number of literates per 1,000 persons, males and females respectively. The last three columns give the number of literates per 100 persons, males and females respectively in each age-group. It will be seen that 43 per cent of the total population are literates, the percentages amongst males and females being 52 and 35. The high values of percentage of literates in the age-groups—over 10 for males—serve as an index of the progress of education among males during the past decades. Among females, comparitively high percentage values are seen only in the age groups 10—14 and 15—24 showing that female education was popular only since the last two decades.

Data on the marital status of the people are summarised below :

Age-group	Number per 1,000 who are					
	Unmarried		Married		Widowed or divorced	
	Males	Females	Males	Females	Males	Females
ALL	299	251	177	194	13	66
0— 4	71	69	..	..	..	..
5—14	121	116	..	..	..	..
15—24	87	57	14	52	..	3
25—34	16	6	51	61	1	7
35—44	3	2	47	42	2	11
45—54	1	1	34	25	2	15
55—64	..	..	21	11	3	16
65—74	..	..	8	3	3	10
75 & over	..	..	2	..	2	4

Civil condition

It will be seen that 55 per cent. of the people are unmarried, 37 per cent. are married and the remaining 8 per cent. are widowed or divorced. The percentages of married males and females are almost equal showing that polygamy is very rare.

The distribution of unmarried persons in the age-groups raises a very interesting problem. In the decade to come, females in the age groups 5—14 and 15—24 forming about 17 per cent. of the total population have normally to get married. The men have to come ordinarily from the age-groups 15—24 and 25—34 and these two groups give only 10 per cent. Thus the decade to come will witness a large number of young women remaining unmarried. This tendency can be avoided only by encouraging the younger men in the ages 22, 23 and 24 in the latter half of this decade to marry.

20. RELIGION

The following table gives the distribution of population according to religion :

Religion		District	Urban	Rural
ALL	..	1000	1000	1000
Hindu	..	593	518	607
Muslim	..	91	137	82
Christian	..	316	345	311

Religion

Nearly 59 per cent. are Hindus, 32 per cent. are Christians and 9 per cent. are Muslims. The percentage of Hindus in rural areas is higher than that in towns while amongst the Muslims and Christians, the higher percentages are seen in towns.

There are 9,364 Anglo-Indians in this district, out of whom 2,536 are in towns and 6,828 are in villages. 259,970 have been returned as belonging to Scheduled Castes and 4,741 as belonging to Scheduled Tribes. No person has been enumerated under tribal religion.

Special groups

21. LANGUAGES

In regard to languages, the distribution of persons according to their mother-tongue is as follows :—

Language		District	Urban	Rural
ALL	..	1,000	1,000	1,000
Malayalam	..	931	835	949
Tamil	..	39	97	28
Telugu	..	5	7	5
Hindi	..	1	2	1
Others	..	24	59	17

In the district as a whole, 93 per cent. of the people have Malayalam, while 4 per cent. have Tamil and the remaining 3 percent. other languages, as their mother ton gu. Among Malayalam-speaking persons, there is a greater proportion in the villages than in the towns. In regard to Tamil and other languages, the greater proportions are in the towns.

Languages

22. BIRTH-PLACE

The distribution of persons according to their birth-place is as follows :

Birth-place		Number per 10,000
Travancore-Cochin State	..	9,662
Trivandrum District	..	12
Quilon „	..	56
Kottayam „	..	91
Trichur „	..	9,503
Other States in India	..	330
Madras	..	313
Mysore	..	4
Others	..	13
Countries in Asia	..	5
Countries in Europe	..	1
Other countries	..	..
Birth place not returned	..	2

About 95 per cent of the people are born within the district. Out of the remaining 5 per cent, 1·6 per cent belong to the other three districts in the state, and 3 per cent to Madras.

There are only 289 non-Indian nationals in the district.

23. MEANS OF LIVELIHOOD AND ECONOMIC STATUS

Means of livelihood and economic status of the people have been given special emphasis at this census. Means of livelihood have been classified under two broad groups—agricultural and non-agricultural. Each of these in turn has been sub-divided into four. The eight means of livelihood are :—

(a) Agricultural

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land; agricultural rent receivers and their dependants

(b) Non-agricultural

5. Production other than cultivation
6. Commerce
7. Transport
8. Other services and miscellaneous sources

Means of livelihood classifications

The four non-agricultural classes have been re-classified into ten divisions and each division has a number of sub-divisions so that persons could be classified under specific industry and service groups.

Dependency

Persons under each livelihood class have been classified as self-supporting persons, non-earning dependants or earning dependants. A person has been treated as self-supporting when "he (or she) is in receipt of an *income and that income is sufficient at least for his (or her) own maintenance*". Such income may be in cash or kind. Anyone who is not "self-supporting person" in this sense is a 'dependant.' One who does not secure any income either in cash or in kind is a 'non--earning dependant'. A person, with an income which does not make him self-supporting, is an 'earning dependant'.

Employment

Self-supporting persons have been classified as employer, employee and independant worker. An employer is one who employs other persons in order to carry on the business from which he (or she) secures his (or her) livelihood. It should be remembered that a person who employs a cook or other person for domestic service should not be recorded as an employer merely for that reason. Further, persons employed as managers, superintendents, agents, etc. who control other workers are also not employers. The term 'employees' requires no clarification. An independant worker is one who is not employed (in the sense explained above) by any one else and who does not also employ anybody else in order to earn his livelihood.

Number of persons per 10,000 in agricultural and non-agricultural livelihood classes

Name of Taluk	Agricultural classes			Non-agricultural classes		
	Persons	Males	Females	Persons	Males	Females
District	**47,06**	**2,249**	**2,457**	**5,294**	**2,639**	**2,655**
Cochin-Kanayannur	587	287	300	1,642	837	805
Kunnathunad	880	426	454	507	258	249
Parur	444	216	228	606	302	304
Cranganur	114	55	59	120	58	62
Mukundapuram	925	446	479	737	357	380
Trichur	654	306	348	968	475	493
Talappilly	740	342	398	454	219	295
Chittur	362	171	191	260	133	127

Agricultural and non-agricultural classes

47 per cent of the population —22 per cent males and 25 per cent females—have agricultural and the remaining 53 per cent—males and females in almost equal proportions—non-agricultural means of livelihood. Kunnathunad and Mukundapuram have the largest number of agriculturists.

In regard to dependency status, the following table gives the distribution of 1,000 persons in each livelihood class.

Livelihood Class	Dependency		
	Self-supporting persons	Non-earning dependants	Earning dependants
All classes	**323**	**615**	**62**
I Cultivators of land wholly or mainly owned and their dependants ..	241	715	44
II Cultivators of land wholly or mainly unowned and their dependants ..	247	695	58
III Cultivating labourers and their dependants ..	406	507	87
IV Non-cultivating owners of land; agricultural rent receivers and their dependants ..	287	687	26
V Production other than cultivation ..	332	593	75
VI Commerce ..	256	702	42
VII Transport ..	290	641	69
VIII Other services and miscellaneous sources ..	357	603	40

Distribution according to dependency

It will be seen that 32 per cent are self-supporting, 62 per cent are non-earning dependants and 6 per cent are earning dependants. Self-supporting persons and earning dependants are seen in greater numbers among agricultural labourers. The largest numbers of non-earning dependants are seen among cultivators of their own land and persons engaged in commerce.

The table also shows that every self-supporting person has to maintain 2 dependants when the whole population is taken into account, though the burden on the self-supporting person is higher in some of the livelihood classes.

Self-supporting persons falling within each industrial group have been divided into three groups, employer, employee and independent worker. The distribution of self-supporting persons in the major industries divisions is summarised below:

	Industries division	Number per 100 in each service who are					
		Employers		Employees		Independent workers	
		Males	Females	Males	Females	Males	Females
	All	3	1	57	62	40	37
0	Primary Industries not elsewhere specified..	2	1	45	45	53	54
1	Mining and Quarrying.	1	1	64	91	35	8
2	Processing and manufacture—Foodstuffs, Textiles, Leather and products thereof ..	3	..	58	63	39	37
3	Processing and manufacture—Metals, chemicals and products thereof ..	2	..	60	62	38	38
4	Processing and Manufacture—Not elsewhere specified ..	1	..	55	26	44	74
5	Construction and Utilities ..	3	1	73	87	24	12
6	Commerce	8	2	30	17	62	81
7	Transport, Storage and Communications ..	1	..	74	80	25	20
8	Health, Education and Public Administration ..	1	..	85	94	14	6
9	Services not elsewhere specified ..	4	..	54	74	42	26

Among males in all the divisions taken together, 3 per cent are employers, 57 per cent are employees and 40 per cent are independent workers. Among females 1 per cent are employers 62 per cent employees and 37 per cent independent workers. The largest percentages of employees among males are in Divisions 5 (Construction and Utilities), 7 (Transport) and 8 (Health, Education and Public Administration) while among females, very large proportions of employees are in divisions 1 (Mining and Quarrying), 5 (Construction and Utilities) and 8 (Health, Education and Public Administration). The percentage of independent female workers is greatest in division 6 (Commerce).

C. GAZETTEER

Cochin-Kanayannur taluk with an area of 158·6 square miles and a population of 516,169 is the most thickly-populated taluk in the State. It falls almost entirely in the lowland, and contains more lakes and backwaters than any other taluk. The annual rainfall is 110 inches. The soil is well suited for cocoanut and rice which are the principal crops. Fisheries, both inland and marine, constitute an important source of wealth. The taluk is divided into thirty-seven villages.

Chennamangalam, a village on the Periyar about 6 miles above its mouth is famous as the seat of Paliath Achan, hereditary prime ministers in Cochin from about 1630 till 1809 (except for some intervals). The eastern portion of the village rises to a hill, at the foot of which is a small but old Jewish colony. In the vicinity of the colony was the famous Vaipikotta seminary, built in the 16th century by Jesuit fathers for the instruction of Syrian youths in Syriac, the remains of which are still visible. In 1757 Chennamangalam was taken by the Zamorin of Calicut and in 1790, it was overrun by Tippu's forces who destroyed several temples and houses. It is now an important centre of hand-loom weaving.

Chovvara on the northern bank of the Periyar, about five miles to the east of Alwaye is a fine watering place. It used to be the summer resort of the Cochin royal family. It is the seat of the water works supplying drinking water to Ernakulam, Mattancherry and Cochin Harbour.

Fort Cochin, (now under the jurisdiction of the Madras State) is the oldest European settlement in India. A Portuguese factory was opened herein January, 1501; Cochin remained their foremost settlement in India till 1663 when it fell into the hands of the Dutch. In 1795, Cochin was surrendered to the East India Company by the Dutch. The Protestant Church here is the oldest European Church in India, having been built by the Portuguese before 1525 as the church of the Fransiscans. Vasco-da-Gama was buried in this church, in 1524, (his remains were removed to Lisbon a few years later).

Cochin is often called 'the Queen of the Arabian Sea' on account of its fine harbour. Cochin port was formed in 1341, as the result of an extraordinary flood which created a deep estuary at the place where previously there was only a small river flowing through a narrow opening into the sea. Foreign ships soon began to call at Cochin but it was only with the advent of the Portuguese that she rose to prominence. The port however suffered from one serious disadvantage, *viz.*, the presence of a bar 12 to 18 feet deep extending seaward for a mile and a half, compelling ships to lie about 2½ miles off shore. As the removal of the bar promised to make Cochin a fine harbour, various proposals were made in this behalf from 1880 onwards. It was only about 1920 that work on improvements was started. The modern development of the port is a feat of marine engineering. By 1930, the outer bar was opened, the approach channel deepened and widened, the inner channel dredged, and moorings laid and a small dry-dock constructed. From that year, steamers were allowed to enter the inner harbour. The spoils of the dredgings were used to form a new island, about 800 acres in extent named Willingdon Island, adjoining Venduruthi island.

The final stage of the harbour works, comprising road and rail connections to the island from the mainland on the east, road connection with the mainland on the west, wharves, warehouses, transit sheds, workshops and water supply, was completed between 1936, when Cochin was declared a major port under the Government of India, and 1940.

Cochin port enjoys unique facilities for all forms of transport—sea, land and air. Willingdon Island is connected with the mainland by a road and rail bridge and regular train service from the Cochin Harbour terminus was started in 1940. There is regular ferry service with the neighbouring towns of Mattancheri, Fort Cochin and Ernakulam. Cochin is an air port (the aerodrome is situated on the Willingdon Island) and is a halting station for the daily service between Trivandrum and Madras and the bi-weekly service between Trivandrum and Bombay.

There has been a steady increase in the number of steamers entering and clearing the port and in the volume of trade handled. The volume of imports and exports which stood at 800,000 tons in 1935-36 rose to 1,400,000 tons in 1950-1951. During the same period the total trade of the port increased from Rs. 13 crores to Rs. 87 crores. The construction of the proposed railway between Quilon and Ernakulam will expand the trade of the port still further. Pending the constitution of a Port Trust the administration of the port is carried on by an Administrative Officer assisted by an Advisory committee.

Ernakulam (municipal town) the headquarters of the taluk and the capital of the erstwhile State of Cochin is a picturesque town set on the eastern shore of the backwater facing the bar. Well laid-out parks add to the beauty of the fore-shore. There is an important temple here whose annual festival in January-February attracts a large number of spectators. Ernakulam is an important business and communication centre. Among the chief industries in Ernakulam and the neighbourhood are oils, soaps, (Tata's is the largest soap factory on this coast) packing of petroleum products, timber, and metals. Ernakulam is connected with the Willingdon Island by a road and rail bridge. There are five colleges in the town.

In former times, Ernakulam and the surrounding country was ruled over by five *Kaimals* or chiefs, (Anji Kaimal) of whom the Cheranallur Kartha was the most prominent. In the 17th century the Raja of Cochin brought this territory under his control.

Mattancheri (municipal town) is contiguous to Fort Cochin and lies on the western side of the backwater. It has been for some centuries a centre of considerable export and import trade. Mattancheri, reported to have been a former capital of Cochin, contains one of the oldest palaces in the State—'the Dutch Palace' .This palace was built by the Portuguese and presented to the Raja of Cochin about the year 1555; on account of the improvements made to it during the time of the Dutch, it is familiarly known as 'the Dutch Palace'. It is a three-storeyed quadrangular building divided into long, narrow chambers. In the centre courtyard, is enshrined the patron deity of the Cochin Royal family,—Pazhayannur Bhagavathi. Some of the walls of the building, particularly those on the second and third floors are adorned with beautiful paintings of puranic subjects, executed during the 16th and 17th centuries. The palace is full of historical associations. Important functions connected with the coronation of the Cochin Maharajas used to be held here.

The Jew's Town forms an interesting section of Mattancheri. Jews settled down in this place in the 16th century on their expulsion from Cranganur by the Portuguese. The Jewish Synogogue dates from 1664; in it is preserved the famous copper-plate grant of Bhaskara Ravi Varma granting the Jews some rights and privileges. There is also a richly endowed Konkani temple in the town, known as Thirumala Devaswom.

Mulanthuruthi, 14 miles south east of Ernakulam is one of the chief centres of the Jacobite Syrians in this district. The church here, believed to have been founded 700 years ago contains beautiful fresco paintings by foreign artists. It was here that the Patriarch of Antioch held a synod in 1874 to settle the differences between Jacobites and St. Thomas Syrians.

Njarackal is a sea-shore town 8 miles to the north of Mattancheri. In front of this town lies the smooth water anchorage familiarly known as 'mud bank' or 'mud bay', where ships lying in Cochin used to take refuge during the monsoon months, before the deepening of the Cochin harbour. There is a government fish farm here. Njarackal contains an ancient church. Nearby is the Veliyattaparambil temple where trial by red-hot iron used to be held till the end of the 18th century.

Pallipuram is a village at the northern end of the Vaippin Island. Trial by crocodile ordeal used to be held here in former times.

Thrippunithura, a small town 5 miles north of Ernakulam is famous for its ancient and well-endowed Vishnu temple. The old shrine was destroyed by fire in 1920 and a new one erected in its place. There are three festivals every year, the most important being the one which falls in November-December and draws a large number of people. His Highness the Maharaja of Cochin resides in a handsome palace picturesquely situated on a hill about a mile and a half to the east.

Thrippunithura has been identified with 'Tropina' of Megasthenes, a sea-port in those times. It became an inland town owing to accretions, in historical times.

Vaipeen Island (from 'Vaippu' meaning formation) lies between the sea and backwater. It is about 15 miles long and 1½ miles broad with an area of about 25 sq. miles. The island was formed by the deposit of silt brought down by the rivers; it is believed that the tract was inhabited by 1341 as the people there commenced an era from that date (Puthuvaippu). The island has played an important part in the history of Cochin. It was the scene of bitter fighting between Cochin and Calicut forces and between the Portuguese and the Dutch. It was also the bone of contention between Travancore and Mysore in the 18th century. There are three important temples in the island, two at Cherai and one at Elankunnapuzha.

Venduruthi is an island in the backwater midway between Ernakulam and Mattancheri and has an area of about 2 sq. miles. The Portuguese occupied the island in the 16th century. The Dutch captured it from them and in 1758 they sold it to the Raja of Cochin. The Indian Navy has established some of its important training schools at Venduruthi..

Kunnathunad Taluk (area 362·7 sq. miles, population 321,222.) transferred to the Trichur district from the Kottayam district after the integration of the States in 1949, comprises 17 pakuthies. The taluk consists for the most part of low hills and valleys, and receives an average rainfall of about 115 inches; it is watered by the Periyar. The principal crops are rice, tapioca, sugarcane, rubber, pepper and ginger.

Alwaye (municipal town, a portion of which is included in the Parur taluk) on the banks of the river Periyar affords the finest summer river bathing in south India. The waters of the river at this spot are believed to possess medicinal properties, and attract a large number of visitors.

The Portuguese in their time, had a bathing place here called 'Fiera d' Alva. At Alwaye the river divides itself into two branches, enclosing an extremely fertile delta rich with sugarcane, rice and cocoanut. At the head of the two branches, is a shrine dedicated to Siva; the annual Sivaratri festival in this temple in February-March attracts thousands of worshippers, and is the occasion for a big fair lasting several days.

Alwaye is an important station on the Cochin-Shoranur Railway. Its nearness to the Cochin harbour, the completion of the Cochin-Munnar road, and the supply of electric power from Pallivasal, have helped Alwaye to grow rapidly into an industrial town. It is the seat of several industries—fertilisers and chemicals, aluminium, cotton textiles, glass, tiles, oil, etc. A Rare Earths Factory is under construction. It is also the seat of a college.

Kaladi on the northern bank of the Periyar about 6 miles east of Alwaye, (it lies on the main central road, 5 miles from Perumbavur and can also be reached from the Kaladi road station on the Cochin-Shoranur railway) is famous as the birth place of Sri Sankaracharya, the great Hindu scholar and reformer. The Sanketham premises belonging to the Sringeri Mutt, Mysore, contains two temples, one dedicated to Sankara and the other to Sarada, both built in the Karnataka style. Sankara is believed to have been born in Kaipalli illom; the site of his house and the crematorium of his mother can be seen on the bank of the river. Kaladi affords fine river bathing in summer.

Kallil, six miles from Perumbavoor is well known for the rock-cut Bhagavathi temple situated on a hill; it was originally a Jain shrine and contains images of Jain saints. There is a boulder at this place, 75' x 45' x 25' which seems to rest without proper support.

Malayattur, 18 miles east of Alwaye has a solubrious climate, and the clear waters of the Periyar flowing over a sandy bed afford excellent facilities for bathing. Nearby are the reserve forests. On the top of the Malayattur hill known as Kurusumudi is a church which is a place of pilgrimage for Catholics.

Perumbavoor, the headquarters of the taluk is a clearing house for up-country produce. The Travancore Rayon Factory is situated here.

Thrikkakkara, about 6 miles south of Alwaye is noted for an ancient temple which was renovated recently. According to tradition, the kings of ancient Kerala used to assemble here during the Onam festival. The annual *Athachamayam* ceremony conducted by the Cochin Royal family is remniscent of the starting of the Raja of Cochin, for Thrikkakkara. The Archaeological department has made some excavations here recently.

Parur Taluk, (area 112·7 sq. miles, population 243,112) was transferred to the Trichur district from the Kottayam district, in 1949, after the integration of the States of Travancore and Cochin The taluk lies in the flat deltaic region of the Periyar, and is cut up by several canals and backwaters. The soil is sandy, the rainfall is about 110 inches. The chief crops are rice and cocoanut.

Idappalli ("the Repolim" of Portuguese and Duch writers) was formerly the capital of an independent principality ruled over by a Namboothiri Brahmin dynasty. The tract of land comprising the towns of Cochin and Mattancheri originally belonged to the Idappalli chief. At the beginning of the 15th century, the chief transferred it to the Raja of Cochin who was his son. The chief's successors tried to regain the tract and this dispute always made them enemies of Cochin in her wars with the Zamorin. The principality was subject to a number of Portuguese invasions, those by Pacheco in 1505 and D' Souza in 1536, being the most terrible. In 1740, the chief of Idappalli entered into an alliance with the Dutch East India Company. It is said that Maharaja Marthanda Varma spared the State on account of the chief's sacerdotal character. The chief continued to exercise sovereign powers till the end of the first quarter of the 19th century. In 1820, the East India Company placed Idappalli under the Raja of Cochin. But in 1825, at the request of the Raja, Idappalli was transferred to Travancore. There is an old palace here, built in the Kerala style of architecture.

Munambam is situated on the northern extremity of the Vaipeen island on the southern bank of the Periyar, at its confluence with the sea. It was a place of considerable importance in former times. The Portuguese seem to have built a fort here in 1504; it was known as Azhikotta or seaside fort. The name was corrupted in later times into Ayyakotta. The Dutch captured the fort from the Portuguese. In 1789 Maharaja Rama Varma of Travancore purchased this fort (along with the Cranganur fort) for 3 lakhs of Surat rupees to strengthen the defence of the northern lines against Tippu Sultan. It, however, fell into the hands of Tippu in 1790. Portions of the fort have survived the ravages of Tippu's men and of time. Until recently sailing craft used to call here with salt from Bombay.

Pallippuram (Palliport) is situated on the island of Vaipeen between Azhikotta and Cochin. The Portuguese built a small fort here in 1506, as an outpost. They also built a Syrian College here in 1587. The Dutch captured the fort in 1661. They transferred the College to Changanachery and used the college building as a leper asylum (this was in existence till the thirties of this century). In 1789, the Dutch sold it along with the Cranganur fort to Travancore. The remains of the Portuguese fort are in a fair state of preservation and constitute one of the oldest European monuments in India.

Parur, the headquarters of the taluk was formerly the seat of the Parur Rajas (the principality was known as 'Pindinivattam') a feudatory of the Raja of Cochin who ceded it to Travancore in 1764. It was a scene of fighting during the latter part of the 18th century; Tippu's forces are said to have destroyed temples and churches in the town. Remains of some earthen fortifications constructed in those times are still seen near the town.

Varappuzha is the seat of one of earliest Roman Catholic missions in India. The Carmelite church here dates from 1673. Varappuzha was the scene of some fighting in the latter part of the 18th century in the campaigns with the Zamorin and the sultans of Mysore.

Cranganur Taluk is the smallest taluk in the State has an area of 17·5 sq. miles and a population of 54,111. Lying on the northern bank of the Periyar it is well served by a number of waterways. The soil is mostly sandy and rice and cocoanut are the chief crops.

Cranganur was till 1949, a principality subordinate to Cochin paying tribute to the latter and though administered as part of the State, was financially autonomous. The chief of Cranganur (who has the dynastic name *Padinjaredat Swarupam* was originally a feudatory of the Zamorin, then of the Dutch and later, of Cochin.)

Cranganur, the most historic town in Kerala was a great emporium of trade even about 1000 B. C. Situated at the confluence of the Periyar river system with the sea, it possessed unique facilities for trade with the interior. The Phoenicians, Egyptians, Greeks and Romans, each in turn sailed their ships to Cranganur to exchange their goods for the products of Kerala. The ivory, sandal wood, peacock feathers, and cinnamon in Solomon's court are believed to have been exported from Cranganur. To Greeks and Romans it was known as 'Muzris' from the ancient temple whose goddess was called *Masuri devata*, on account of her power to ward off smallpox.—a belief held even to this day. Pliny in the first century A. D. refers to it as the first emporium of trade in India. Early Tamil poems called it Muchiri; later it was known variously as Muyiri kodu, Makottaipattanam or Mahadevarpattanam. The Jews, Christians and the Mahammedans, all alike, claim it as their first settlement in India. Mathilakom, north of Cranganur was the seat of a famous university in ancient times, presided over, at one time, by Ilango-Adigal (the royal monk), the author of *Silappadikaram* and the younger brother of the Chera emperor Sen-Kuttuvan.

The gradual choking of the mouth of the river and the formation of the Cochin backwater in 1341, deprived Cranganur of its commercial importance. However, on account of its strategic position, it figured prominently in the wars between Kerala powers and also in the struggle among European powers for supremacy on this coast.

The chief of Cranganur was a feudatory of the Zamorin and Cranganur thus got embroiled in the wars between Cochin and Calicut. The Portuguese as allies of Cochin sacked Cranganur in 1505; in 1523 they built a fort here on the bank of the river, to check their enemies and to prevent the smuggling of pepper. In 1616, the East India Company established a factory here; the first treaty entered into by the East India Company with a Kerala power was executed at Cranganur with the Zamorin in the same year. In 1662 the Portuguese settlement was captured by the Dutch. In 1789, the purchase by Travancore of the Cranganur fort from the Dutch precipitated hostilities with Tippu Sultan of Mysore. Tippu occupied the fort in 1790; the retreating Travancore garrison and the Mysore troops destroyed the fortifications. In 1791, Cranganur town came under the East India Company but was later restored to the Raja of Cranganur.

The ancient temple at Cranganur dedicated to Bhagavathi is one of the oldest in Kerala. The annual Bharani festival in March-April attracts thousands of worshippers from all parts of the country.

Thiruvanchikulam, (Srivanchikovilakom or the palace of the prosperous Vanchi Kings, the Vanchi of the early Tamil poets), a suburb of Cranganur was the capital of the ancient Cheras. Some of early Chera emperors who ruled at Vanchi were Sel-Kelu Kuttuvan, Senkuttuvan and Cheral Athan. The power of the Chera emperors waned and Vanchi itself is said to have been captured by Killivalan, the Chola king, (the Tamil poet Nappasalaiyar laments the fall of Vanchi)

Thiruvanchikulam was also the seat of the later kings of Kerala (the Perumals). At the beginning of the 11th century, Rajendra Chola is said to have conquered Vanchi. The palace of the Perumals known as 'Allal perinkovilakam' was situated near the great temple about a furlong to the south west The temple dedicated to Siva is one of the oldest and most important in Kerala. Among the objects of worship in the temple are the images of Bhaskara Ravi Varma Cheramanperumal, the last Perumal and of his spiritual adviser, Sundaramurthy Swamigal. On the walls of the temple are some mural paintings dating from the 16th and 17th centuries. Some excavations were carried out at this site by the Archaeological department a few years ago. Close to the palace were situated the four Thalis or the Assembly Halls of the representatives of the Brahmin aristocracy, the Thalis or Kazhakams representing the four administrative divisions of Kerala. As the ruins near the temple show, Thiruvanchikulam suffered severely at the hands of enemies. In modernti nes it was the victim of atrocities, committed, first by the Portugese and the Dutch and later by the Mysore forces.

Mukundapuram Taluk (area 514. 1 sq. miles, population 384, 935) has about half its surface under reserve forests. It is watered by the Chalakkudi and the Kurumali rivers. The soil is generally fertile; the chief crops are rice, cocoanut, tapioca and arecanut.

The Travancore lines which figure so prominently in the history of both Travancore and Cochin in the second half of the 18th century, run for the most part, through this taluk.

Adur situated on the Chalakkudi river, three miles to the northwest of Adur Railway station is famous for the Annamanada temple. The territory round the temple was under the overlordship of Koratti Kaimal and other chiefs who allied themselves with the Zamorin when he invaded Cochin in 1755. After the expulsion of the Zamorin, Travancore claimed and exercised sovereignity over the area for about a century. Annamanada was the venue of two historic interviews between the rulers of Travancore and Cochin in the latter part of the 18th century.

Chalakkudi situated on the river of the same name, has risen considerably in importance in recent years. Chalakkudi is a railway station and also the headquarters of the forest tramway. Some of the chief industries here are timber, potteries, soap and chemicals, matches and plywood. It is also a centre of communications with the eastern uplands.

Chalakkudi enjoys the reputation of being one of the healthiest spots in this district. The Chalakkudi river here is much frequented in the summer season as a bathing place. Tippu Sultan took up his headquarters at Chalakkudi when his army was besieging the Travancore lines.

Irinjalakkuda, (municipal town) is noted for the ancient and important Hindu temple known as Kutal Manikkam Devaswom so called, it is believed, because a ruby brought near the idol for comparison was absorbed by it. It is a richly endowed temple with extensive landed properties in this State, and in Malabar. Its affairs, spiritual and temporal, are managed by the 'Thachudaya Kaimal' the Lord who owns the building, (from Thachu - building, Udaya owning). Some centuries ago, the Travancore sovereigns secured the right, probably by conquest, of nominating the Thachudaya Kaimal. This was the subject of a long-standing dispute between Travancore and Cochin until its settlement in 1909. The annual festival in the temple is celebrated in April-May.

Irinjalakkuda is the centre of considerable trade, particularly in arecanut; the market here is one of the largest in the district.

Karupadanna six miles to the south of Irinjalakkuda, on the main waterway from Trivandrum to Tirur was in former times, when waterways formed the only traffic route available, a place of great commercial and strategic importance. The introduction of the railway has deprived it of all its past importance.

Mala 8 miles to the south east of the Irinjalakuda railway station was in former times a seat of a colony of black Jews. Close by were the remains of the once famous seminary of Chempallur (St. Paul's Ur or village) founded by Jesuit priest in the 16th century. One of the first printing presses in India is reported to have been set up in this seminary and the first printed Malayalam book produced here in 1577.

The Forest Tramway. The Forest tramway running for a length of 50 miles from Chalakkudi to Parambikulam (in the Chittur taluk) was constructed for the purpose of tapping virgin forests containing valuable timber trees, which had remained inaccessible for want of transport facilities. Its construction was a difficult piece of engineering work owing to the unevenness of the forest country; the work was completed in about 5 years (1902—1907). The tramway is really a metregauge light railway, operated by steam traction. It exploits an area of 125 sq. miles of forests.

The line is divided into three sections. At mile 21, the end of the first section, there are three rope inclines, the longest of them being more than half a mile and the total over a mile in length. The steepest has a gradient of 1 in 3. From the top of these inclines the line descends by means of ten reversing stations to mile 24 and thence on a slight up-grade to mile 26½, the end of the second section Here are two rope incl nes each a mile and a half in length The lines descend from the top of the ridge by means of five reversing stations to mile 30, to mile 32 by three more reversing stations and thence by an almost level line to mile 50. The rope inclines are worked by gravity, a descending load dragging up the empty trucks. The wire rope (one inch in diameter) passes twice round the horizontal wheel on top of each incline, this wheel being tracked by two independent rim bracks. In the forests tapped by the tramway, much of the work of transporting logs to the tramline and loading them on to trucks is done by elephants.

Trichur Taluk (area 248 sq. miles, population 375,741) has some forests in the hills lying to the east. The rainfall is about 100 inches. The taluk is watered by the Manali, Karuvannur and Viyyur rivers. This taluk contains most of the kole lands in this district—freshwater lakes which are bunded up and from which water is baled out to enable rice cultivation on the lowlying beds. The chief crops are rice, cocoanut, rubber and tapioca; arecanut is also grown extensively.

Arattupuzha 9 miles to the south of Trichur is well-known for the annual Puram festival celebrated here.

Mulankunnathukavu takes its name from the temple of the same name dedicated to Sastha A tuberculosis hospital has been opened here recently.

Ollur 3 miles to the south of Trichur is a town of growing importance. It is a centre of the tile and rice milling industries and also carries on a large volume of trade in timber. The church here is one of the largest and richest in the district, and has a belfry over a hundred feet in height.

Perumanam is famous for its Siva temple, one of the largest and best-endowed in this district. It was formerly under the management of a Yogatiripad, elected and consecrated by the Nampoothiri Yogam of Perumanam. In the middle of the 18th century, the temple and properties were surrendered by the Yogam to the Raja of Cochin. The landed properties forming the endowment for the mid-day service in the temple had been for a long time under the Raja of Parur and on the cession of Parur to Travancore in 1764 Travancore claimed some rights of management in the temple and exercised them for several years. The dispute between Travancore and Cochin about these rights was settled only in 1882, when Travancore got the right of managing the midday service endowment. After some years, however, Travancore surrendered it to Cochin. There are mural paintings believed to belong to 17th and 18th centuries on the walls of the *srikoil*.

Trichur (municipal town) is the headquarters of the taluk and also of the district.

The town is built around a hillock crowned by the famous Vadakkunnathan (Siva) temple. This temple, the largest and best-endowed in the district contains several sacred shrines and is enclosed by a thick masonry wall, with four loty gopurams. Outside the walls, there is an open ground, about 65 acres in extent.

The temple is a classic example of the Kerala style of architecture. Most of the temple buildings particularly the gopurams (with elaborately ornamented gables) the Koothampalam and central shrines contain exquisite vignettes of wood carving. There are also a few ancient mural paintings in the temple, dating from the 16th and 17th centuries.

The Vadakkunnathan temple is an ancient institution, one of the oldest in Kerala. Till the middle of the 18th century, the temple was managed by a Yogathiripad elected and consecrated by the Nampoothiri yogam of Trichur. After the expulsion of Zamorin in 1762, the management of the temple was assumed by Government. The annual Puram festival (April—May) attracts a large number of spectators from all parts of Kerala.

Trichur owes its present importance to Raja Rama Varma (Sakthan Thampuran) 1789—1805 who cleared the surrounding forests and encouraged merchants to settle down here. Water, road and rails communications have helped to make Trichur an important industrial and commercial centre. The chief industries are cotton textiles, timber, rice milling, printing, engineering works, bricks and tiles. The town hall, an imposing building contains the Chitralayam, a picture gallery, where mural paintings from all parts of the State are copied and exhibited.

A museum and zoo are housed in the Public Gardens. There are 4 colleges in the town.

Trichur was the scene of many historical events, including its capture and occupation, by the Zamorin during 1750-60, by Hyder Ali's general Sardar Khan. in 1776, and by Tippu, in 1789. In 1774, the town and palace were fortified by mud walls and trenches. A detachment of Madras Infantry was stationed here from 1809 till 1900.

Urakam, a village contiguous to Perumanam is well-known for its Amma Tiruvadi temple. In the wars between Cochin and Calicut, Urakam fell into the Zamorin's hands more than once. Early in the 18th century, a pitched battle was fought here in which the Calicut forces were defeated and the temple pillaged by the Dutch troops.

Talappilly the northernmost taluk in the State, has an area of 258.5 sq. miles and a population of 276, 262. From the low hills lying on the east, the plains undulate towards the west. The Bharathapuzha (the Ponnani) forms the northern boundary of the taluk separating it from Malabar. The Vadakkancheri and Chirakuzhi rivers flow through this taluk. The soil is generally fertile. The chief crops are rice, tapioca, cocoanut, ginger and rubber. Arecanut is also grown extensively.

Arthat, a frontier village two miles to the south of Kunnamkulam contains one of the oldest Jacobite Syrian churches in the district. The possession of this church and the property was the subject of a prolonged dispute between the Jacobites and Reformed Syrians.

Chelakara 5 miles to the east of Mullurkara railway station is situated in the midst of fertile fields. Chelakara was the seat of the powerful Pisharody chiefs, Tottasseri Talassannor who in 1767 was dispossessed of his estates for submission to the Zamorin. In 1762, Chelakara was the scene of a decisive battle between Travancore and Cochin forces on one side and the Zamorin's forces on the other, in which the Zamorin was defeated. It contains an old palace. A mile to the north of Chelakara is the large Venganellur temple.

Cheruthuruthi, on the left bank of the Bharathapuzha and the first railway station in this district, is now famous as the seat of the Kerala Kalamandalam founded by the great Malayalam poet Vallathol Narayana Menon, to encourage the study of the ancient arts of Kerala, such as kathakali, mohiniattam, etc. The river is here spanned by a fine bridge; on the opposite side is the Shoranur railway junction.

Kunnamkulam (municipal town) is the chief centre of the Jacobites in this district and contains some of their important churches. It is also one of the centres of the work of the Church Mission Society. The remains of an old fort are to be found near Kunnamkulam. Kunnamkulam is an important centre of the arecanut trade.

Mullurkara, a railway station between Shoranur and Vadakkancheri was the seat of Manakot Nayar, the chief of Ayirunad, who about 1754 was dispossessed of his estates for accepting the Zamorin's suzerainty. The estate then came in to the possession of Paliyat Achan. Traces of a fort built by the Achan to protect the country from the Zamorin's forces can still be seen.

Pazhanji, a small town is one of the most important centres of the arecanut industry in the State.

Pazhayannur, 11 miles to the east of Mullurkara railway station contains a well-known Bhagavathi temple ; the goddess here is the tutelary deity of the Cochin royal family.

Thiruvilwamala, on the left bank of the Bharathapuzha, one mile to the south of Lakkidi railway station, is built on an extensive granite hill around the temple situated on the top of the hill. The temple is dedicated to Rama and Lakshmana; the annual Ekadasi festival in February-March attracts thousands of worshippers.

Vadakkancheri, the headquarters of the taluk is situated on the west bank of the Vadakkancherri river. It is a trading centre for arecanut and other local produce.

Chittur Taluk (area 295.5 sq. miles, population 144,088) consists of two disconnected parts, the smaller part being situated in the centre of the Palghat gap, surrounded on all sides by the Madras State. The topographical and climatological feartures of this part differ from those of the rest of the district ; level plains are more numerous and the rainfall less, being about 68 inches. A number of small irrigation works have however made this area an important rice-growing tract. Groundnut, sugarcane and cotton are cultivated as money crops.

The larger part lying to the west,consists mainly of hills. Several small streams rising from the lower slopes of the Nelliampathi and Pothundi ranges flow into the Bharathapuzha in the north. The Nelliampathi and Parambikulam rivers flow southwest to join the Chalakkudi river. The chief crops are coffee and rice.

Ayilur, on the Ayilur river has grown up around the Ayilur temple, the most important temple in the taluk. It is a centre of cotton weaving industry.

Chittur, the headquarters of the taluk is situated on the right bank of the Chittur (Anamala) river. Cotton weaving is an important industry. It is said that the Raja of Cochin gained a victory over Kongans who invaded this territory and that the Konganpada celebration which takes place here in March, is in commemoration of this victory. Chittur is now a part of the Chittur-Thattamangalam municipal town.

Kozhinjampara, 6 miles to the east of Chittur is a trade centre lying in the midst of a rice-growing tract.

Nemmara 15 miles to the west of Chittur is a trade and communication centre. Cotton weaving is carried on here. There are also a few match factories and one plywood factory.

Parambikulam, is situated on the Parambikulam range of hills, (a continuation of the Nelliampathies) and forms the terminus of the forest tramway.

Thattamangalam 3 miles to the west of Chittur and a place of some trade, is now part of the Chittur-Thattamangalam municipal town.

DISTRICT CENSUS HANDBOOK

TRICHUR

Part II

CENSUS DATA

SCHEME OF CENSUS TABLES

Census Tables prepared this time fall under the following four broad groups :—

A GENERAL POPULATION TABLES
B ECONOMIC TABLES
C AGE TABLES
D SOCIAL AND CULTURAL TABLES

There are five Tables under General Population Tables. These are :—

A I AREA, HOUSES AND POPULATION
A II VARIATION IN POPULATION DURING FIFTY YEARS
A III TOWNS AND VILLAGES CLASSIFIED BY POPULATION
A IV TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901
A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

Economic Tables comprise three separate Tables. These are :—

B I LIVELIHOOD CLASSES AND SUB-CLASSES
B II SECONDARY MEANS OF LIVELIHOOD
B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS

There are five Tables in the Group of Age Tables. These are :—

C I HOUSEHOLD (SIZE AND COMPOSITION)
C II LIVELIHOOD CLASSES BY AGE GROUPS
C III AGE AND CIVIL CONDITION
C IV AGE AND LITERACY
C V SINGLE YEAR AGE RETURNS

Social and Cultural Tables consist of seven Tables :—

D I LANGUAGES
D II RELIGION
D III SCHEDULED CASTES AND SCHEDULED TRIBES
D IV MIGRANTS
D V DISPLACED PERSONS BY DISTRICT OF ORIGIN AND DATE OF ARRIVAL IN INDIA
D VI NON-INDIAN NATIONALS
D VII LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

The C Tables mentioned above have been prepared only for a ten per cent. sample of the total population, but the figures given in the tables are estimates for the total population calculated from the figures for the sample.

To facilitate the preparation of the Census Tables, the State was divided into forty-three census tracts, each census tract comprising approximately a population of two to three lakhs, urban and rural areas being kept separate. As such, the urban or rural areas in more than one taluk had to be combined into one census tract in a few cases. Separate population of figures for the A Tables have been prepared for all taluks and towns. The B, C and D series Tables give figures only for census tracts.

A summary of the State Tables is given at the beginning for comparison and general information.

GENERAL TABLES

A I AREA, HOUSES AND POPULATION

This Table is the same as Table A I for the State. The figures have been broken up into rural and urban, for each of the Natural Sub-Divisions—Lowland, Midland and Highland. The area figures for the State and the Districts are those furnished by the Surveyor-General, India. The figures for further sub-divisions are those obtained from the Land Revenue Department. Adjustments due to exchange of enclaves between this State and Madras, under the Provinces and States (Absorption of Enclaves) Order, 1950, have been made in the areas of the districts concerned.

The term "village" as applied to this State requires explanation. The concentration of dwelling houses characteristic of villages in most other parts of India is almost absent in this State. This is a country of scattered homesteads. The village in this State, represents the territorial unit, 'kara' (in Travancore) and 'proverthy' (in Cochin). These are the smallest recognised sub-divisions of the taluk and have existed as such from early times.

GENERAL TABLES

A II VARIATION IN POPULATION DURING FIFTY YEARS (1901—1951)

This Table is prepared from previous Census Reports. Adjustments have been made for the changes in the boundaries of districts and in the exchange of enclaves under the Provinces and States (Absorption of Enclaves) Order 1950.

In the Table columns 3, 6 and 9 give the increase in population during each decade. In columns 4, 7 and 10 are given mean decennial growth rates. The mean decennial growth rate expresses the net variation in the decade as a percentage of the mean population which is the arithmetic mean of the populations at the beginning and end of the decade. If P_0 and P_1 are respectively the populations at the beginning and end of the decade,

$$\text{the mean decennial growth rate} = \frac{P_1 - P_0}{P_1 + P_0} \times 200$$

GENERAL TABLES

B ECONOMIC TABLES—LIVELIHOOD CLASSES

This Table is a summary of State Table B I—Livelihood Classes and Sub-Classes. Means of Livelihood are given under eight categories—four relating to agriculture, the remaining four being non-agricultural.

The figures under each category include all self-supporting persons having that as their Principal Means of Livelihood and also those dependants living with them.

CENSUS TRACTS IN TRICHUR DISTRICT

Sl. No.	*Administrative units in the tract*	*Taluk in which it is situated*
	Municipal towns	
34	Ernakulam	Cochin-Kanayannur
	Mattancheri	do.
	Municipal towns	
35	Alwaye	Kunnathunad and Parur
	Parur	Parur
	Irinjalakkuda	Mukundapuram
	Trichur	Trichur
	Chittur-Thathamangalam	Chittur
	Kunnamkulam	Talappilly
36	**Non-municipal (Conservancy) towns**	
	Perumpavur	Kunnathunad
	Kalady	do.
	Eriyad	Cranganur
	Azhikkode	do.
	Chalakkudi	Mukundapuram
	Ollur	Trichur
	Kozhinjampara	Chittur
	Eruthempadi	do.
	Nalleppalli	do.
	Nemmara	do.
37	**Cochin-Kanayannur Rural**	
38	**Kunnathunad Rural**	
39	**Parur Rural**	
40	**Cranganur and Mukundapuram Rural**	
41	**Trichur Rural**	
42	**Talappilly Rural**	
43	**Chittur Rural**	

As final details regarding the boundaries of some of the non-municipal towns in this district were received only after the completion of the sorting operations for that area, it was not possible to include in Census Tract No. 36 all the non-municipal towns in the district. The omissions are :—

	No. of census tract in which it is now included.
1. Njarackal ✓	37
2. Thrippunithura ✓	
3. Cranganur	40
4. Pazhanji	42
5. Vadakkancheri	
6. Aylur	43

Thus the population of these towns is included in the population in rural tracts.

However, population figures for these towns have been prepared from the National Register of Citizens for inclusion in Tables A IV and A V.

A I AREA, HOUSES AND POPULATION

The Trichur district consisting of eight taluks was formed by the addition of two taluks from Travancore-Parur and Kunnathunad—to the erstwhile State of Cochin. Under the Provinces and States (Absorption of Enclaves) Order, 1950, there was an exchange between Travancore-Cochin and Madras of some enclaves in the Chittur taluk in this district. The following statement gives details of the enclaves added to and surrendered by this State.

Enclaves added to Travancore-Cochin

Enclave	*Area (acres)*	*Name of the village to which the enclave was added*
Theneri	82·58	Nalleppalli
Vadavannur	63·41	S. Nos. 455-467 Pattancheri
Peruvemba	51·72	S. Nos. 450-454 Thathamangalam Thathamangalam
Kootallur	4·81	Vallangi
Elappully	31·06	Nalleppalli
Elavancheri	6·06	Vallangi
Panayur	11·84	Chittur
Palathulli	1·62	S. No. 140 Thathamangalam S. No. 141 Chittur

Enclaves surrendered by Travancore-Cochin

Isolated bit of Nalleppalli village	117·30
Isolated bit of Chittur village	31·99
Portion of Thathamangalam village	159·89
Portion of Vallangi village	51·19

The area of this district as given by the Surveyor-General, India is 1968·4 sq. miles.

In regard to municipal towns, the figures for area have been furnished by the respective municipal commissioners. All localities where conservancy arrangements under the Department of Public Health are in force have been treated as non-municipal towns at this Census. The area figures for non-municipal towns have been collected from the Land Revenue department.

In the case of a few villages, parts of which have been included in non-municipal towns, the area figures are only approximate.

The figures for area, houses and population have been distributed among the natural sub-divisions and these in turn into urban and rural classifications.

The following are the towns included in the urban area in this district :—

Serial No	*Name of town*	*Name of taluk in which the town is situated*
1	Ernakulam (M)	Cochin-Kanayannur
2	Mattancheri (M)	do.
3	Alwaye (M)	Kunnathunad
4	Parur (M)	Parur
5	Irinjalakkuda (M)	Mukundapuram
6	Trichur (M)	Trichur
7	Kunnamkulam (M)	Talappilly
8	Chittur-Thathamangalam (M)	Chittur
9	Perumpavur	Kunnathunad
10	Kalady	do.
11	Azhikkode	Cranganur
12	Eriyad	do.
13	Chalakkudi	Mukundapuram
14	Ollur	Trichur
15	Nemmara	Chittur
16	Kozhinjampara	do.
17	Eruthampadi	do.
18	Nalleppalli	do.

(M) denotes Municipal town

A II VARIATION IN POPULATION DURING THIRTY YEARS 1921—1951

In the General Population Table A II, variation in the population of the State and of the districts has been traced for the period 1901—1951.

The present Table gives the population growth of the Trichur district taluk-wise, only for the period 1921—1951. It has not been possible to consolidate taluk figures for 1901 and 1911 as detailed information regarding the adjustments required in the population figures for different taluks due to changes in their boundaries, could not be gathered from the Census Reports.

Column 9 of the Table gives the population at each census year as a percentage of the 1921 population.

A II VARIATION IN POPULATION DURING THIRTY YEARS, 1921—1951

Census Year	Persons	Variation	Mean decennial growth rate	Males	Variation	Females	Variation	Population at each census as a percentage of 1921 population

A IV TOWNS CLASSIFIED BY POPULATION, WITH VARIATIONS SINCE 1901

Towns in the district have been classified under the following six classes:—

Class of Town		*Population*
I	..	100,000 and over
II	..	50,000—100,000
III	.	20,000—50,000
IV	..	10,000—20,000
V	..	5,000—10,000
VI	..	Less than 5,000

The growth in the population of these towns has been traced from 1901 to 1951.

In this Table (M) denotes Municipal town

A IV TOWNS CLASSIFIED BY POPULATION, WITH VARIATIONS SINCE 1901

A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

This Table gives the number of persons (including dependants) in each town who derive their Principal means of Livelihood from following livelihood classifications:—

Non-agricultural

(v) Production other than cultivation

(vi) Commerce

(vii) Transport

(viii) Other services and miscellaneous sources

Agricultural

(iv) Non-cultivating owners of land; agricultural rent receivers

(i, ii & iii) Cultivators and cultivating labourers

NOTE: A V (Supplement) gives details for towns excluded from the urban tracts during tabulation.

A V TOWNS ARRANGED TERRITORIALLY

Tract No.	Name of towns	Population			Non-agricultural V Production other than cultivation

B I LIVELIHOOD CLASSES AND SUB-CLASSES

The Table gives the distribution of the population in the district according to the Principal Means of Livelihood. All persons have been classified as self-supporting or non-earning dependants or earning dependants. The Principal Means of Livelihood of non-earning and earning dependants is the same as that of the self-supporting persons on whom they depend.

The Principal Means of Livelihood has been given under two major heads, agricultural and non-agricultural. Each of these has been divided into four groups. The following are the eight groups :

(a) Agricultural classes

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land ; agricultural rent-receivers and their dependants

(b) Non-agricultural classes

1. Production other than cultivation
2. Commerce
3. Transport
4. Other services and miscellaneous sources

The figures have been given sex-wise. Under each category there is also the sub-division under rural and urban classifications.

It has not been possible to give taluk figures; instead, figures for the census tracts in the district are given.

B II SECONDARY MEANS OF LIVELIHOOD

In this Table, self-supporting persons and earning dependants in each of the eight Principal Means of Livelihood classes, are classified according to their secondary means of livelihood, if they have any. The classification for secondary means of livelihood is the same as that for Principal Means of Livelihood.

B II SECONDARY MEANS OF LIVELIHOOD

Livelihood classes	Number of persons deriving their secondary means of livelihood from Cultivation of owned land					
	Total		Self-supporting persons		Earning dependants	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Total	**17,309**	**5,083**	**15,491**	**2,358**	**1,818**	**2,725**

B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUB-DIVISIONS

Self-supporting persons in non-agricultural classes—category (b) in the note to Table B. II, are classified in this Table under employer, employee and independent worker and are distributed in the various divisions and sub-divisions of industries and services. In the Table, instead of the names of the divisions and sub-divisions, code numbers are used. A list of the divisions and sub-divisions of industries and services with their code numbers is given below.

This Table, however does not include self-supporting persons of livelihood class VIII - other services and miscellaneous sources—whose sources of income fall under the following :—

(i) Persons living principally on income from non-agricultural property
(ii) Persons living principally on pensions, remittances, scholarships and funds
(iii) Inmates of jails, asylums, almshouses and recipients of doles
(iv) Beggars and vagrants
(v) All other persons living principally on income derived from non-productive activity

The fly leaf to this Table gives the details of persons under the five categories mentioned above.

List of the divisions and sub-divisions of industries and services

DIVISION 0 Primary industries not elsewhere specified

0·1 *Stock raising*

0·11 Herdsmen and shepherds
0·12 Breeders and keepers of cattle and buffaloes
0·10 Breeders and keepers of other large animals including transport animals

0·2 *Rearing of small animals and insects*

0·21 Poultry farmers
0·22 Bee-keepers
0·23 Silkworm rearers
0·24 Cultivators of lac
0·20 Rearers of other small animals and insects

0·3 *Plantation industries*

Owners, managers and workers in
0·31 Tea plantations
0·32 Coffee plantations
0·33 Rubber plantations
0·30 All other plantations but not including the cultivation of special crops in conjunction with ordinary cultivation of field crops

0·4 *Forestry and woodcutting*

0·40 Planting, replanting and conservation of forests (including forest officers rangers and guards)
0·41 Charcoal burners
0·42 Collectors of forest produce and lac
0·43 Woodcutters

0·5 *Hunting (including trapping and game propagation)*

0·6 *Fishing*

0·60 Fishing in sea and inland waters including the operation of fish farms and fish hatcheries
0·61 Gatherers of chanks and pearls
0·62 Gatherers of sea weeds, sea shells, sponges and other water products

DIVISION 1 Mining and quarrying

1·0 *Non-metallic mining and quarrying not otherwise classified—including mining and quarrying of such materials as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt, bitumen*

1·1 *Coal mining—mines primarily engaged in the extraction of anthracite and of soft coals such as bituminous, sub-bituminous and lignite*

1·2 *Iron ore mining*

1·3 *Metal mining except iron ore mining*
- 1·31 Gold
- 1·32 Lead, silver and zinc
- 1·33 Manganese
- 1·34 Tin and wolfram
- 1·30 Other metallic minerals

1·4 *Crude petroleum and natural gas*
- Oil well and natural gas, well operations (including drilling) and oil or bituminous sand operations

1·5 *Stone-quarrying, clay and sand pits*
- Extraction from the earth of stone, clay, sand and other materials used in building or manufacture of cement

1·6 *Mica*

1·7 *Salt, saltpetre and saline substances*

IVISION 2 Processing and manufacture—foodstuffs, textiles, leather and products thereof

2·0 *Food industries otherwise unclassified*
- 2·01 Canning and preservation of fruits and vegetables
- 2·02 Canning and preservation of fish
- 2·03 Slaughter, preparation and preservation of meat
- 2·00 Other food industries

2·1 *Grains and pulses*
- 2·11 Hand pounders of rice and other persons engaged in manual dehusking and flour grinding
- 2·12 Millers of cereals and pulses
- 2·13 Grain parchers and makers of blended and prepared flour and other cereal and pulse preparations
- 2·10 Other processes of grains and pulses

2·2 *Vegetable oil and dairy products*
- 2·21 Vegetable oil pressers and refiners
- 2·22 Manufacturers of hydrogenated oils
- 2·23 Makers of butter, cheese, ghee and other dairy products

2·3 *Sugar industries*
- 2·31 Gur manufacture
- 2·30 Other manufactures and refining of raw sugar, syrup and granulated or clarified sugar from sugarcane or from sugar beets

2·4 *Beverages*
- 2·41 Brewers and distillers
- 2·42 Toddy drawers
- 2·43 Ice-manufacturers
- 2·40 Manufacture of aerated and mineral waters and other beverages

2·5 *Tobacco*
- 2·51 Manufacture of bidis
- 2·50 Manufacture of tobacco products (other than bidis) such as cigarettes, cigars, cheroots and snuff (Stemming, redrying and other operations connected with preparing raw leaf tobacco for manufacturing are also included)

2·6 *Cotton textiles*
- 2·61 Cotton ginning, cleaning and pressing
- 2·62 Cotton spinning, sizing and weaving
- 2·63 Cotton dyeing, bleaching, printing, preparation and sponging

2·7 *Wearing apparel (except footwear) and made-up textile goods*
- 2·71 Tailors, milliners, dress makers and darners
- 2·72 Manufacturers of hosiery, embroiderers, makers of crepe, lace and fringes

2·73 Fur-dressers and dyers
2·74 Hat-makers and makers of other articles of wear from textiles
2·75 Manufacture of house furnishing of textiles
2·76 Tent makers
2·70 Makers of other made-up textile goods, including umbrellas

2·8 *Textile industries otherwise unclassified*

2·81 Jute pressing, baling, spinning and weaving
2·82 Wollen spinning and weaving
2·83 Silk reeling, spinning and weaving
2·84 Hemp and flax spinning and weaving
2·85 Manufacture of rayon
2·86 Manufacture of rope, twine, string and other related goods from cocoanut aloes, straw, linseed and hair
2·80 All other (including insufficiently described) textile industries, including artificial leather and cloth

2·9 *Leather, leather products and footwear*

2·91 Tanners and all other workers in leather
2·92 Cobblers and all other makers and repairers of boots, shoes, sandals and clogs
2·90 Makers and repairers of all other leather products

DIVISION 3 Processing and manufacture—metals, chemicals and products thereof

3·0 *Manufacture of metal products, otherwise unclassified*

3·01 Blacksmiths and other workers in iron and makers of implements
3·02 Workers in copper, brass and bell metal
3·03 Workers in other metals
3·04 Cutlers and surgical and veterinary instrument makers
3·05 Workers in mints, die sinkers, etc.
3·06 Makers of arms, guns, etc. including workers in ordnance factories

3·1 *Iron and steel (basic manufacture)*

Manufacture of iron and steel, including all processes such as smelting and refining; rolling and drawing; and alloying and the manufacture of castings, forgings and other basic forms of ferrous metals

3·2 *Non-ferrous metals (basic manufacture)*

Smelting and refining, rolling, drawing and alloying and the manufacture of castings, forgings and other basic forms of non-ferrous metals

3·3 *Transport equipment*

3·31 Building and repairing of ships and boats
3·32 Manufacture, assembly and repair of railway equipment, motor vehicles and bicycles
3·33 Manufacture of aircraft
3·34 Coach builders and makers of carriages, palki, rickshaw, etc., and wheelwrights
3·30 Manufacture of all other transport equipment

3·4 *Electrical machinery, apparatus, appliances and supplies*

3·41 Manufacture of electric lamps
3·42 Manufacture of electric fans and other accessories
3·43 Manufacture of electric wire and cable
3·40 Manufacture of electrical generating transmission and distribution apparatus; electrical household appliances other than lights and fans; electric equipment for motor vehicles, aircraft and railway locomotives and cars; communication equipment and related products, including radios, phonographs, electric batteries, X-Ray and therapeutic apparatus; electronic tubes etc.

3·5 *Machinery (other than electrical machinery) including engineering workshops*

Engineering workshops engaged in producing machine and equipment parts

3·6 *Basic industrial chemicals, fertiliser and power alcohol*

3·61 Manufacture of basic industrial chemicals such as acids, alkali salts
3·62 Dyes, explosives and fireworks
3·63 Synthetic resins and other plastic materials (including synthetic fibres and synthetic rubber)
3·64 Chemical fertilisers
3·65 Power alcohol

3·7 *Medical and pharmaceutical preparations*

3·8 *Manufacture of chemical products otherwise unclassified*

3·81 Manufacture of perfumes, cosmetic and other toilet preparations
3·82 Soaps and other washings and cleaning compounds
3·83 Paints, varnishes and lacquers and polishes
3·84 Ink
3·85 Matches
3·86 Candle
3·87 Starch
3·80 Other chemical products

DIVISION 4 Processing and manufacture—not elsewhere specified

4·0 *Manufacturing industries otherwise unclassified*

4·01 Manufacture of professional scientific and controlling instruments (but not including cutlery, surgical or veterinary instruments)
4·02 Photographic and optical goods
4·03 Repair and manufacture of watches and clocks
4·04 Workers in precious stones, precious metals and makers of jewellery and ornaments
4·05 Manufacture of musical instruments and appliances
4·06 Stationery articles other than paper and paper products
4·07 Makers of plastic and celluloid articles other than rayon
4·08 Sports goods makers
4·09 Toy makers
4·00 Other miscellaneous manufacturing industries, including bone, ivory, horn, shell, etc.

4·1 *Products of petroleum and coal*

4·11 Kerosene and petroleum refineries
4·12 Coke ovens
4·10 Other manufactures of products from petroleum and coal

4·2 *Bricks, tiles and other structural clay products*

Structural clay products such as bricks, tiles, etc.

4·3 *Cement—cement pipes and other cement products*

Manufacture of cement, cement pipes and cement concrete products

4·4 *Non-metallic mineral products*

4·41 Potters and makers of earthenware
4·42 Makers of porcelain and crockery
4·43 Glass bangles, glass beads, glass necklaces, etc.
4·44 Makers of other glass and crystal ware
4·40 Makers of other miscellaneous non-metallic mineral products

4·5 *Rubber products*

4·6 *Wood and wood products other than furniture and fixtures*

4·61 Sawyers
4·62 Carpenters, turners and joiners
4·63 Veneer and plywood makers, match veneer and splint makers
4·64 Basket makers
4·60 Other industries of woody materials, including leaves, but not including furniture or fixtures

4·7 *Furniture and fixtures*
Manufacture of household, office, public building, professional and restaurant furniture ; office and store fixtures, screens, shades, etc., regardless of material used

4·8 *Paper and paper products*
Manufacture of paper and paper board and articles of pulp, paper and paper board

4·9 *Printing and allied industries*
4·91 Printers, lithographers, engravers
4·92 Bookbinders and stitchers

DIVISION 5 Construction and utilities

5·0 *Construction and maintenance of works—otherwise unclassified*

5·1 *Construction and maintenance—buildings*
5·11 Masons and bricklayers
5·12 Stone-cutters and dressers
5·13 Painters and decorators of house
5·10 Other persons engaged in the construction or maintenance of buildings other than buildings made of bamboo or similar materials

5·2 *Construction and maintenance—roads, bridges and other transport works*

5·3 *Construction and maintenance—telegraph and telephone lines*

5·4 *Construction and maintenance operations—irrigation and other agricultural works*

5·5 *Works and services—electric power and gas supply*
5·51 Electric supply
5·52 Gas supply

5·6 *Works and services—domestic and industrial water supply*

5·7 *Sanitary works and services—including scavengers*

DIVISION 6 Commerce

6·0 *Retail trade otherwise unclassified*
6·01 Hawkers and street vendors otherwise unclassified
6·02 Dealers in drugs and other chemical stores
6·03 Publishers, booksellers and stationers
6·00 General storekeepers, shopkeepers and persons employed in shops otherwise unclassified

6·1 *Retail trade in foodstuffs (including beverages and narcotics)*
6·11 Retail dealers in grain and pulses ; sweetmeats, sugar and spices, dairy products, eggs and poultry ; animals for food ; fodder for animals ; other foodstuffs, vegetables and fruits
6·12 Vendors of wine, liquors, aeratad waters and ice in shops
6·13 Retail dealers in tobacco, opium and ganja
6·14 Hawkers and street-vendors of drink and foodstuffs
6·15 Retail dealers in pan, bidis and cigarettes

6·2 *Retail trade in fuel (including petrol)*
6·21 Petroleum distributors
6·20 Retail dealers (including hawkers and street-vendors) in firewood, charcoal, coal, cow dung and all other fuel except petroleum

6·3 *Retail trade in textile and leather goods*
Retail trade (including hawkers and street-vendors) in piece goods, wool, cotton, silk, hair, wearing apparel, made-up textile goods, skin, leather, furs, feathers, etc.

6·4 *Wholesale trade in foodstuffs*
Wholesale dealers in grains and pulses, sweet-meats, sugar and spices ; dairy products, eggs and poultry animal for food, fodder for animals, other foodstuffs. wholesale dealers in tobacco, opium and ganja.

6·5 *Wholesale trade in commodities other than foodstuffs*

6·6 *Real estate*

House and estate agents and rent collectors except agricultural land

6·7 *Insurance*

Insurance carriers and all kinds of insurance agents and other persons connected with insurance business

6·8 *Money lending, banking and other financial business*

Officers, employees of joint-stock banks and co-operative banks, munims, agents or employees of indigenous banking firms, individual money lenders, exchangers and exchange agents, money-changers and brokers and their agents

DIVISION 7 Transport, storage and communications

7·0 *Transport and communications otherwise unclassified and incidental services*

7·1 *Transport by road*

Owners, managers and employees connected with mechanically driven and other vehicles (excluding domestic servant) palki, etc., bearers and owners, pack elephant, camel, mule, ass and bullock owners and drivers, porters and messengers, persons engaged in road transport not otherwise classified, including freight transport by road, the operation of fixed facilities for road transport such as toll roads, highway bridges, terminals and parking facilities

7·2 *Transport by water*

Owners and employees, officers, mariners, etc., of ships plying on the high seas, ships and boats plying on inland and coastal waters, persons employed in harbours, docks, rivers and canals, including pilots, ship brokers

7·3 *Transport by air*

Persons concerned with airfields and aircraft other than construction of airfields and air ports

7·4 *Railway transport*

Railway employees of all kinds except those employed on construction works

7·5 *Storage and warehousing*

The operation of storage facilities such as ware-houses, cold storage, safe deposits when such storage is offered as an independent service

7·6 *Postal services*

7·7 *Telegraph services*

7·8 *Telephone services*

7·9 *Wireless services*

DIVISION 8 Health, education and public administration

8·1 *Medical and other health services*

8·11 Registered medical practitioners

8·12 Vaids, hakims, and other persons practising medicine without being registered

8·13 Dentists

8·14 Midwives

8·15 Vaccinators

8·16 Compounders

8·17 Nurses

8·10 All other persons employed in hospitals or other public or private establishments rendering medical or other health services ; but not including scavengers or other sanitary staff

8·2 *Educational services and research*

8·21 Professors, lecturers, teachers and research workers employed in universities, colleges and research institutions

8·22 All other professors, lecturers and teachers

8·20 Managers, clerks and servants of educational and research institutions, including libraries and museums, etc.

8·3 *Army, Navy and Air Force*

8·31 Army
8·32 Navy
8·33 Air Force

8·4 *Police (other than village watchmen)*

8·5 *Village officers and servants, including village watchmen*

8·6 *Employees of municipalities and local boards (but not including persons classifiable under any other division or sub-division)*

8·7 *Employees of State Governments (but not including persons classifiable under any other division or sub-division)*

8·8 *Employees of the Union Governments (but not including persons classifiable under any other division or sub-division)*

8·9 *Employees of Non Indian Governments*

DIVISION 9 Services not elsewhere specified

9·0 *Services otherwise unclassified*

9·1 *Domestic services (but not including services rendered by members of family households to one another)*

9·11 Private motor drivers and cleaners
9·12 Cooks
9·13 Gardeners
9·10 Other domestic servants

9·2 *Barbers and beauty shops*
Barbers, hair dressers and wig makers, tatooers, shampooers, bath houses

9·3 *Laundries and laundry services*
Laundries and laundry services, washing and cleaning

9·4 *Hotels, restaurants and eating houses*

9·5 *Recreation services*
Production and distribution of motion pictures and the operation of cinemas and allied services, managers and employees of theatres, opera companies, etc., musicians, actors, dancers, etc., conjurers, acrobats, reciters, exhibitors of curiosities and wild animals, radio broadcasting studios

9·6 *Legal and business services*

9·61 Lawyers of all kinds, including qazis, law agents and mukhtiars
9·62 Clerks of lawyers, petition writers, etc.
9·63 Architects, surveyors, engineers and their employees (not being State servants)
9·64 Public scribes, stenographers, accountants, auditors
9·65 Managers, clerks servants and employees of trade associations, chamber of commerce, board of trade, labour organization and similar organisation of employers and employees

9·7 *Arts, letters and journalism*

9·71 Artists, sculptors and image makers
9·72 Authors, editors and journalists

9·8 *Religious, charitable and welfare services*

9·81 Priests, ministers, monks, nuns, sadhus, religious mendicants and other religous workers
9·82 Servants in religious edifices, burial and burning grounds, pilgrim conductors and circumcisors, etc.
9·83 Managers and employees of organisations and institutions rendering charitable and other welfare services

C I SIZE AND COMPOSITION OF HOUSEHOLDS

(ESTIMATES ONLY)

This Table has been prepared from a four per cent. sample of households in the National Register of Citizens. Estimates for the whole district with urban—rural break-up were calculated from the figures obtained from the sample.

The figures are arranged under two broad groups:—

(i) Size of households
(ii) Composition of households

In (i) households have been called:

(a) "Small" if the number of inmates is 3 or less
(b) "Medium" if the number of inmates is between 4 and 6
(c) "Large" if the number of inmates is between 7 and 9
(d) "Very large" if the number of inmates is 10 or more

Under (ii) the inmates in a household are described under relationship to the head of the household.

TABLE C I SIZE AND COMPOSITION OF HOUSEHOLDS

(Estimates)

Sl. No.			District	Urban	Rural
1	2		3	4	5
1	Number of households	..	393,626	58,276	335,350
2	Household population	Persons	2,287,578	356,166	1,931,412
		Males	1,114,352	178,257	936,095
		Females	1,173,226	177,909	995,317
	(i) *Size of households*				
3	Small households	Number	75,781	11,298	64,483
	(3 members or less)	Persons	178,798	26,292	152,506
4	Medium households	Number	178,386	23,844	154,542
	(4-6 members)	Persons	886,126	118,131	767,995
5	Large households	Number	102,146	15,431	86,715
	(7-9 members)	Persons	788,019	119,831	668,188
6	Very large households	Number	37,313	7,703	29,610
	(10 members or more)	Persons	434,635	91,912	342,723
	(ii) *Composition of households*				
7	Heads of households and their wives	Males	331,558	49,720	281,838
		Females	336,253	49,404	286,849
8	Sons of heads of households	..	536,116	77,220	458,896
9	Daughters of heads of households	..	466,825	66,713	400,112
10	Other male relations	..	221,510	41,372	180,138
11	Other female relations	..	350,952	54,422	296,530

AGE GROUPS

Tables C II, C III, C IV and C V.

These Tables have not been prepared for the entire population. At the time of sorting, a ten percent. sample of slips for every village and ward (in municipal towns) was extracted on a purely random basis and the slips in the sample were alone used for these Tables.

Based on the sample figures, estimates for the district have been calculated.

C II LIVELIHOOD CLASSES BY AGE GROUPS

(ESTIMATES ONLY)

The Table gives the estimated figures for the district under the eight Livelihood Classes in broad age groups.

Age group	All classes			Agricultural classes					
				Persons (including their dependants) who derive their					
				1. Cultivators of land wholly or mainly owned and their dependants		2. Cultivators of land wholly or mainly unowned and their dependants		3. Cultivating labourers and their dependants

D III SCHEDULED CASTES AND SCHEDULED TRIBES

This Table gives the figures for Scheduled Castes and Scheduled Tribes. Hindu communities listed below fall under the category "Scheduled Castes" in this State.

1. Ayyanavar
2. Bharatar
3. Chakkiliyan
4. Domban
5. Eravalan
6. Kakkalan
7. Kanakkan
8. Kavar
9. Kootan (Koodan)
10. Kuravan
11. Mannan
12. Nayadi
13. Padannan
14. Pallan
15. Palluvan
16. Panan
17. Paravan
18. Parayan (Sambavar)
19. Pathiyan
20. Perumannan
21. Pulayan
22. Thandan
23. Ulladan
24. Uraly
25. Vallon
26. Valluvan
27. Vannan
28. Velan
29. Vetan
30. Vettuvan

The list of Scheduled Tribes for the State is given below :—

1. Hill Pulaya
2. Kadan
3. Kanikkaran
4. Kochuvelan
5. Mala Arayan
6 Mala Pandaran
7. Mala Vedan
8. Malayan
9. Malayarayan
10. Mannan
11. Muthuvan
12. Palleyan
13. Palliyar
14. Ulladan (Hill dweller)
15. Uraly
16. Vishavan

D VII LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

This Table gives the distribution of population in each livelihood class according to educational standards. Persons who do not come up to any of the standards specified in the Table but are literate are classified under the first category "literate".

Educational standard	Agricultural classes					
	I Cultivators of land wholly or mainly owned and their dependants		II Cultivators of land wholly or mainly unowned and their dependants		III Cultivating labourers and their dependants	
	Males	Females	Males	Females	Males	Females

STRICT CENSUS HANDBOOK

TRICHUR

Part III

VILLAGE STATISTICS

VILLAGE STATISTICS

The details presented in the Tables on Village Statistics have been compiled from census data, and reports from taluk census officers, supervisors and enumerators. The smallest area for which separate figures have been given is the village or ward. Information gathered for each village or ward falls under the following heads :—

(i) Name and code number
(ii) Area
(iii) Dwelling houses
(iv) Institutions
(v) General information
(vi) Population

(i) *Name and code number.* Just as every plot of surveyed land has been given a survey number, every unit of area covered by this census has been assigned a code number. The four districts in the State have been numbered 1, 2, 3 and 4, Trivandrum being 1, Quilon 2, Kottayam 3 and Trichur 4. Within each district, the taluks have been serially numbered, in relation to geographical position, as 1-1, 1-2, etc. Within each taluk, the pakuthies (in Travancore) and proverthies (in Cochin) are numbered serially. Within each pakuthy, the karas are once again given numbers. Thus the code number of a kara will involve 4 numerals, the first relating to the district, the second to the taluk, the third to the pakuthy and the fourth to the kara.

The municipal towns have similar code numbers. Within the district, the municipal towns are given Roman numerals. Within each municipality, the wards are also assigned code numbers.

It is hoped that in course of time, code numbers will come into common use.

(ii) *Area.* The area figures for each kara have been obtained from the Tahsildars while those for wards in municipal towns and portions of karas in non-municipal towns have been furnished by the municipal and public health officers. These figures are only approximate as correct area records for such divisions of the pakuthy do not exist.

For each kara, figures for areas under wet-land, dry-land and waste-land are also given. These figures are also only approximate.

(iii) *Dwelling houses.* The figures under this head give the number of dwelling houses in each kara or ward.

(iv) and (v) *Institutions and general information.* Information relating to these items was collected by each enumerator in schedules supplied for the purpose.

Though not exhaustive, it is claimed that details on most of the important aspects of social life in each locality are made available.

(vi) *Population.* The total population of each area, the number of literates and the number of males and females in each of the eight livelihood classes are given.

The following abbreviations have been used :—

L, M or H, immediately following the name of a pakuthy or proverthy denotes the natural subdivision of the State in which it is situated—lowland, midland or highland respectively.

T	stands for	..	temple
