TABLE IV.

Towns Classified by Population with Variation since 1875.

NOTE :—In 1875 Towns were not separately censused. No figures are therefore given in columns 8 & 12. The net variation shown in column 13 actually refers to the period 1881—1911 and not to 1875—1911 as shown in the heading.

Towns whose boundaries have been changed since 1901 are indicated by asterisks. For purposes of comparison, the present figures on the basis of the 1901 areas are given in the respective columns in brackets.

Alwaye and Tiruvalla are censused as Towns for the first time at the 1911 Census.

been grouped together. The castes so grouped are those shown in the Note to Table IX.

TABLE XV

Occupation or Means of Livelihood.
Part A.—General Table.

The Scheme of classification adopted in 1901 was a little too elaborate. It was also defective in certain respects. A new scheme based on that of Monsieur Bertillon was therefore recommended for this Census by the India Commissioner and has been adopted.

The occupations returned are now divided into four classes against 8 in 1901 and subdivided into 12 Sub-classes, 55 Orders and 169 Groups against 24 Orders, 79 Sub-orders and 520 Groups respectively.

Imperial Table XV is divided into five Parts—A, B, C, D and E.

Part A is complete in itself and deals with the entire population of the State by Administrative Divisions, to which is appended a Table of occupations by orders for the two Natural Divisions.

Part B details the Subsidiary Occupations of the actual workers among the agriculturists.

Part C shows for certain mixed occupations the number of persons who returned each of them as their (a) principal, and (b) subsidiary means of livelihood.

Part D classifies the occupational distribution of the entire population by religion. Separate figures for the total urban area are also given.

Part E gives information regarding industries. The details herein embodied were collected by means of a special schedule filled up by the owners, managers or agents of factories, mills, &c., in which not less than 20 persons were employed on the date of the Final Census —March 10, 1911. It is divided into four sub-parts. The first records information regarding each factory, mill &c., distinguishing those in which mechanical power is used from those in which it is not and classifies them according to the strength of the persons employed, while the second gives figures for the Administrative and Natural Divisions without these details. The caste and nationality of the owners and managers of certain important industries are embodied in the third and the fourth sub-parts.
