FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro-level planning for rural area. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices (listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in

urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India.

NEW DELHI :
The 26th April, 1982.

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various Government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (*i*) Part A containing the Village and Town Directories and (*ii*) Part B containing Village and Townwise Primary Census Abstract and, the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development Officers and the Vice-Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the district during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office S/Shri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N.M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computors and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the PCA Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the D. C. H. Section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

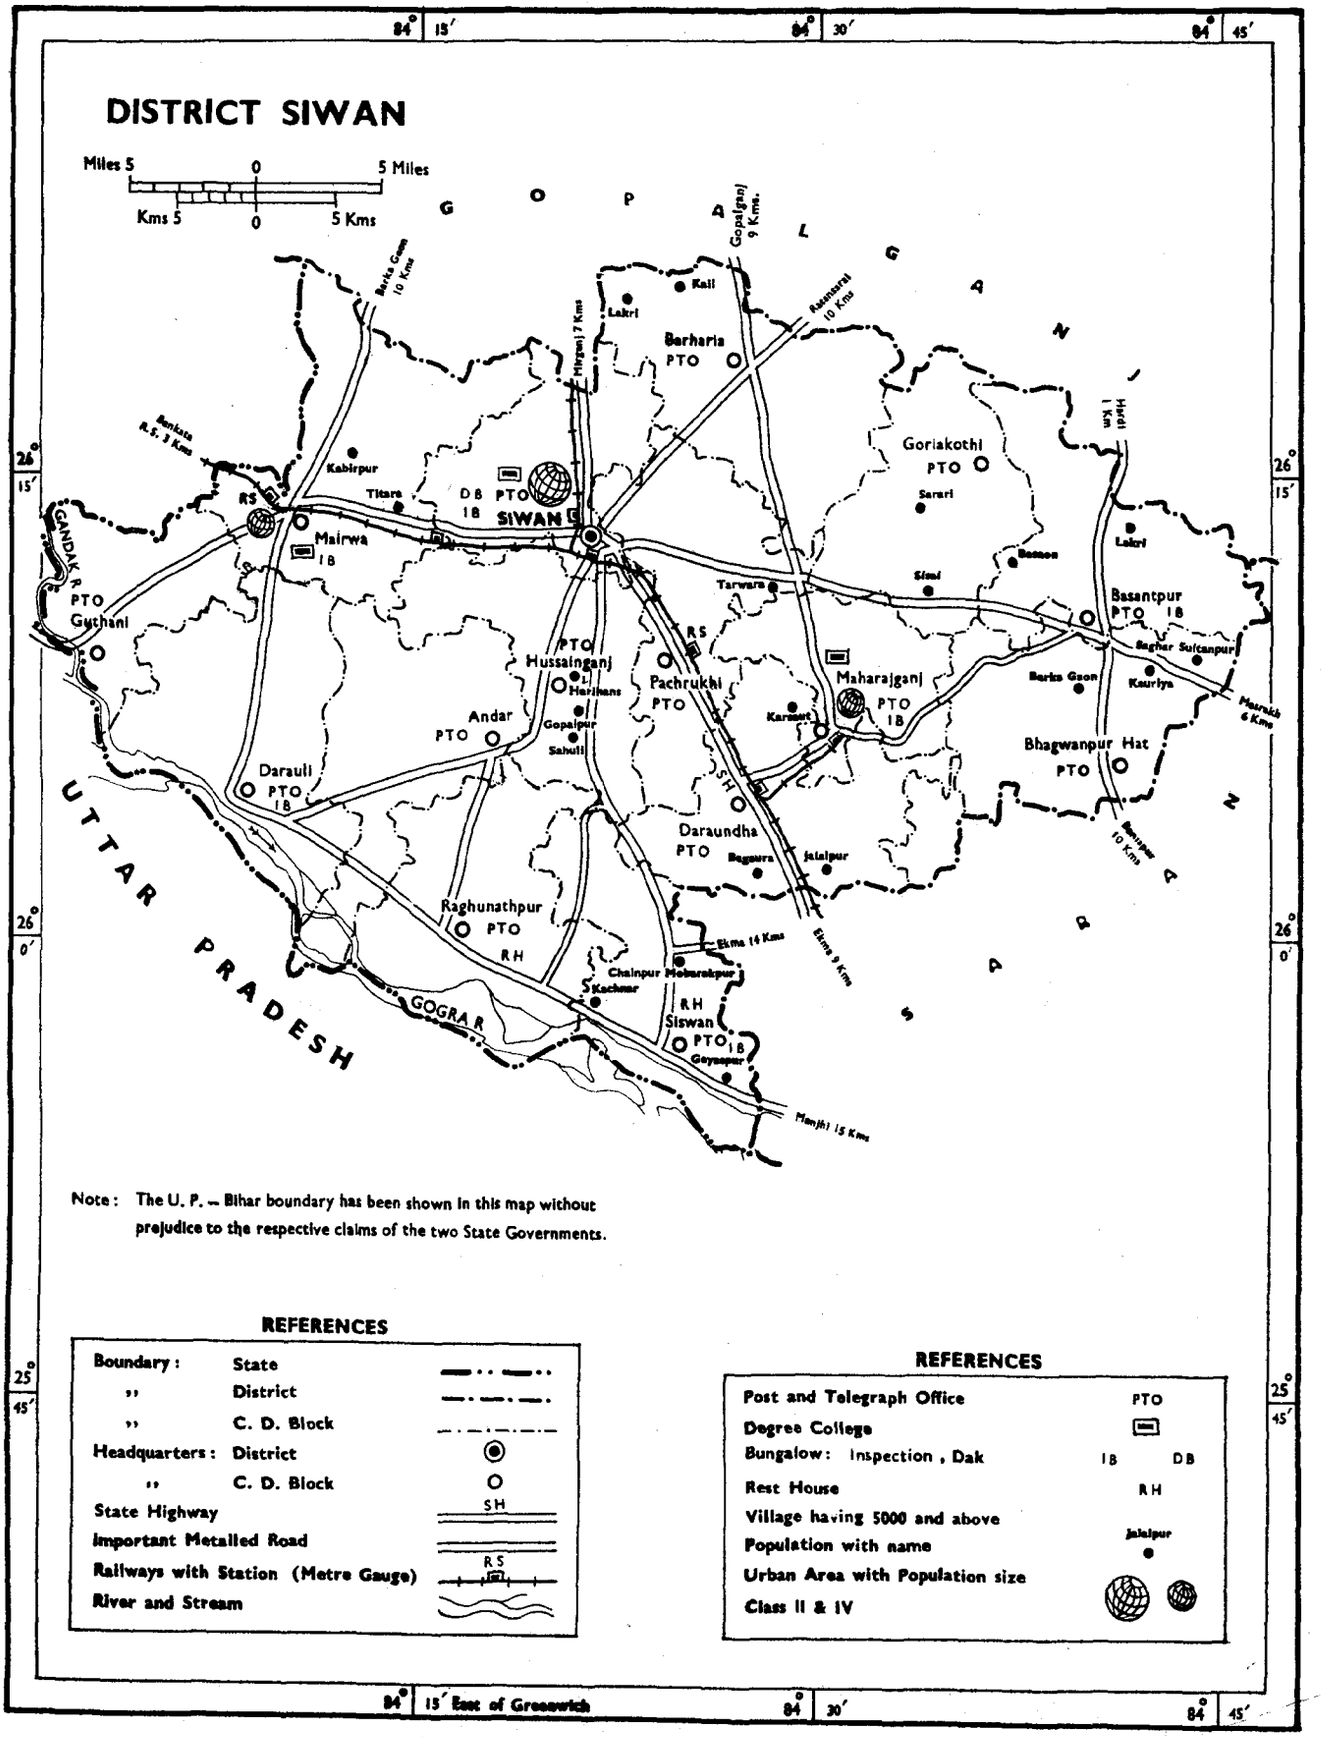

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to Shri A. K. Banerji, Superintendent, Secretariat Press, Patna, who have undertaken the work of printing of this volume and accomplished the same with promptness.

B. B. LAL

DISTRICT CENSUS HANDBOOK PARTS A AND B

ANALYTICAL NOTE

Brief History of the District

The present district of Siwan in the western-most part of the State, was a part of old Saran district which, in ancient days formed a part of Kosala country. The present district limits came into existence only in 1973. The district is bounded on the east by Saran district, on the north by Gopalganj district, and on the west and south by two districts of U. P., viz., Deoria and Balia respectively.

Siwan derives its name from Shiva Man, a Bandh Raja whose heirs ruled this area till Babar's arrival. As the legend goes Dronacharya of Mahabharat belonged to village "Don" in Darauli Block. Some believe Siwan to be the place where Lord Buddha died. Siwan is also known as Aliganj Siwan after the name of Ali Bux, one of the ancestors of the rulers of 'Nai Quilla', a mohalla of Siwan Town.

Siwan was a part of Banaras Kingdom during 8th century. Muslims came here in 13th century. Sikander Lodi brought it in his kingdom in the 15th century. Babar crossed Ghaghra river near Siswan on his return journey. In the end of 17th century the Dutch came here followed by the English. After battle of Buxar in 1765 it became a part of Bengal.

Siwan played an important role in 1857 Movement. It is famous for the stalwart and sturdy 'Bhojpuries', who have always been noted for their martial spirit and physical endurance and from whom the army and police personnel were largely drawn. A good number of them rebelled and rendered their services to Babu Kunwar Singh.

The Anti-*purdah* Movement in Bihar was started by Shri Braj Kishore Prasad who also belonged to Siwan.

In response to the Non-Co-operation Movement in 1929, a big meeting was organised at Darauli in Siwan district on the eve of *Kartik Purnima Mela* under the leadership of Dr. Rajendra Prasad who had thrown away his lucrative practice as an advocate in the Patna High Court at the call of Gandhiji. In the wake of this Movement Maulana Mazharul Haq, who belonged to Siwan, had constructed an *Ashram* on the Patna-Danapur road which subsequently became the famous Sadaqat Ashram.

The next phase of the Non-Co-operation Movement known as the Civil Disobedience Movement of 1930, was fully implemented in Siwan. In connection with the Satyagrah Movement a whirlwind tour of the different parts of Bihar was done by Pt. Jawaharlal Nehru. One of the famous meetings he addressed was at Maharajganj.

A few persons of present Siwan district who played an important role in the attainment of independence were Dr. Rajendra Prasad, Maulana Mazharul Haq, Shri Mahendra Prasad, Dr. Sayyad Mohammad and Shri Phulena Prasad.

Changes in the Jurisdiction of the District during the decade

The major changes in the jurisdiction of the district were creation of Siwan as district and the changes resulting there from, and the implementation of Trivedi Award on 10th June 1970 resulting in substantial alteration of jurisdiction.

Siwan was being declared as a district in 1972 in which it was proposed to include 10 blocks of Gopalganj and 13 blocks of Siwan subdivisions. Two blocks—Bhagwanpur and Basantpur of Siwan—were declared to be added to the jurisdiction of proposed Mahraura subdivision. But just one year later in 1973 Gopalganj was made a separate district with 10 blocks and Siwan constituted its original 15 blocks including Bhagwanpur and Basantpur blocks.

Trivedi Award was implemented on 10th June, 1970. Thereby fourteen villages of Siwan having an area of 13,092 acres were transferred to U. P. and twelve villages of U. P. with an area of 6,679 acres were transferred to Siwan. This was a major change in the jurisdiction of Siwan. The basis of this transfer was the position of Gogra river in 1885. After

1885 the course of the river changed from time to time resulting in intermixing the areas of U. P. with those of Siwan. Hence the position of 1885 was taken to be the base and those transfers were made accordingly. Before the Trivedi Award the boundary of Siwan with U. P. was flexible changing with the course of the river. After the Award this boundary was fixed by installing pillars on conspicuous points, the maintenance of which is done by Government of Uttar Pradesh and the administration of Siwan as per the provisions of the Award. Thus, after this Award the so far flexible boundary of Siwan vis-a-vis U. P. on both banks of Gogra river was given a stability.

Major Characteristics of the district in relation to Economic Resources

Agriculture is the main occupation of the district. Out of the total population, about 25 per cent are self supporting and rest 75 per cent are entirely dependent on the economically well off persons. Existing industries of the district are far too few to absorb the surplus of the population. About 3 per cent of the population is dependent on commerce. The chief commodities of import are rice, salt, cloth, coal and k. oil while chief commodities for export are potatoes, sugar and mustard-seed. In both agriculture and non-agriculture pursuits the number of non-earning dependents is about three times greater than the economically active persons. However, the people of this district are adventurous and enterprising. The district being predominantly agricultural, the pressure on the soil is enormous, but emigration affords a partial relief to the pressure on soil. Much of the emigration is seasonal lasting for three months. But the people of Siwan are found almost in all parts of India and a substantial number reside abroad earning a lot.

Forestry

The resource of forestry in this district is so far nil. Now the Forest Department has launched social forestry, afforestation on roads and canals embankments which shall yield results after a few years.

Minerals and Mining

This resource also is almost nil in this district. There are no minerals except nodular limestone (*Kankar*) of good quality which is found throughout the district. It is used for metalling roads and for ballast on the railway. Brick-making has assumed importance in recent periods.

Electricity and Power

There are no hydro-electric or thermal stations in the district. The industries that are run by power here have either their own electricity plants or derive the power from the power generating stations maintained by the Government.

There is one 132 K.V. electricity Sub-station situated in this district whose present capacity is 12 M. V. A. It gets electricity from Barauni Thermal Power Station. The total requirement of this district at present is 6 M.V.A. against which 1 to 1.5 M. V. A. is made available. Hence the electricity in this district to urban and rural areas, is supplied by shifts. There are 251 villages completely electrified out of a total 1,553 villages in the district.

Land and Land-use Pattern

This district is an area where crop-lands dominate the overall picture of land-use. Crop-land use is dominated by foodgrains and farming has not come out of the stage of subsistence. This is an area of low productivity. In 1971 the district was supporting 6.58 persons per hectare of land. In 1981 the position has deteriorated on account of an increased pressure of population on arable area with 21.67 per cent rise in the population during the last decade.

There is preponderance of food crops. Food requirement dominates the character of land-use, food crop covering 95.31 per cent of the cropped-land. The only important cash crop—sugar-cane—covers 4.69 per cent of the gross cultivated area. But the income derived from the cash crop goes partly for meeting the deficit in food. It is also used as input for cultivation. Thus the meagre availability of land per head puts a serious limitation on the efficiency of agriculture. It becomes labour intensive. There is a close cultivation all through the year.

The common classification of the land under cultivation is under three categories, viz., the lowland, the upland and the *diara* land. In the lowland the main crop is paddy, while the upland grows paddy, barley, wheat, sugar-cane, pulses and oil-seeds. The *diara* lands yield good *rabi* or cold weather crops. But the *bhadai* or autumn crops from this type of lands are liable to damage from the spill of the rivers. The fertility of the *diara* lands varies. Some have great fertility and grow very good crops of wheat, barley, peas and mustard. The fertility depends on the deposits

of the rivers year after year. Other *diara* lands are sandy and it is just possible that the good crop of one year is spoiled by the deposits of sand in the next.

The district has no forest area and very little of culturable waste land is there for reclamation.

Tenancy

There is a progressive decline in the average size of a holding. This is so because of the law of inheritance, there being a further partition of a holding on every death of the family head. The growing population adds more dimension. Presently the size of the average holding is 0.25 acre. However, the Consolidation of Holding and Prevention of Fragmentation Act, 1956 has been taken up in the whole of this district now which will solve this problem in due course.

After the abolition of Zamindari system, the revenue administration has been divided into 15 Anchals in this district, each Anchal having on the average 10 *Halkas*. One Karamchari is posted in each *Halka* whose work of rent collection and agricultural statistics is supervised by a Circle Inspector at Anchal level. In almost all Anchals a Deputy Collector is posted as Anchal Adhikari. Some *diara* villages are still unsurveyed and these have not as yet been assessed to rent. Administration of *diara* villages is a serious problem for the district administration more so in the case of those lying on the border of Balia district.

The demand of rent has been going on gradually since the abolition of Zamindari System. The present demand of the district is Rs. 32,33,109.01. The current demand of the sairats is Rs. 3,07,221.66.

Restoration of lands to under raiyats under Bataidari rule, settlement of *gairmazarua* land to Scheduled Castes, Scheduled tribes and backward classes, acquisition of surplus land under land ceiling Act—all these have considerably affected the prevailing pattern of tenancy in the district.

Agriculture

Siwan has a total geographical area of about 2.22 lakh hectares out of which the net cultivated area is 1.80 lakh hectares. The agricultural land falls under three categories, viz., upland which grows paddy, wheat, pulses and oil-seeds; lowland, where the main crop is paddy; and *diara* land which is mainly a *rabi* growing land. Paddy, wheat and maize are the main cereals grown here. Sugar-cane, the main cash crop of this district, is grown on about 13,000 hectares. Among vegetables and spices prominent crops grown are potatoes and chillies. Pulses, both *rabi* and *kharif*, are grown although, *arhar* covers the largest area. Oil-seeds comprise mainly of mustard and linseeds. The soil climate and general topography of this district are ideal for the cultivation of food as well as non-food crops.

Cultivation is the backbone of the district economy and about 80 per cent of the working population are employed therein. More than 80 per cent of the total cultivable area is under plough.

The farmers are generally traditional in cultivation practice, but they have adopted certain modern methods also. They are now using improved seeds, chemical manures and tractors for better yield.

The percentage of irrigated area to the total cultivable area is 56.85 per cent in the district. There are State tube-wells and canals providing regular and assured water supply for irrigation but they account for only a small fraction of the total irrigated area. The main dependance is on private tube-wells and cavity boring. Fortunately, for this district there is abundance of underwater and ample scope of exploitation thereof.

Due to lack of sufficient irrigational facility, the dependance on rainfall cuts at the root of agricultural economy. Famines and droughts in this district are usually due to scanty rainfall.

One of the most striking features of the district is the presence of large low-lying tracts of land in which only *aghani* rice could be grown. Hence a failure of the *aghani* crop would mean general distress in such areas.

The soils are alluvial and vary from the hard clay found in the low swamps locally known as *bangar*, to the light sandy loam of upland known as *bhath*. The former grows winter rice only, while from the latter an autumn rice crop is generally obtained followed by a spring crop of cereals, pulses and oil-seeds. *Bhath* soils predominate in the northern tracts to the west of the Jharahi river while *bangar* soil is found in patches nearly all over the district. A third class is that of *goenr* which is highly manured and is reserved for the most paying crops, such as vegetables' wheat, maize and china.

Heavy agricultural operations like ploughing are done by the male labourer, while lighter work, such as reaping the crops or putting in seeds are shared by women and children of the family as well. The nucleus of agricultural labour is usually supplied by the cultivators family members unless the cultivator belongs to a certain caste and family where no direct cultivation is done. In that case he obtains labourers on hire. The agricultural labourers get wages either in cash or in kind or in both

There is no immigration of agricultural labour from outside the district. As a matter of fact, it is the labourers of this district who go to other districts of Bihar in large number during harvesting season.

Owing to its large population, the agricultural produce of the district is insufficient to meet the requirements of the population within the district.

There is a string of primary markets and a cheap and easy mode of communication between the cultivation fields and threshing floor and the primary markets. The bullock-cart continues to be the chief mode of transport from the agricultural fields to the threshing-grounds. Bullock-carts again take the agricultural produce from the village to the primary markets. The village *hats* function as the primary markets for the agricultural produce and it is from there that the wholesalers or *Vyaparis* buy the stocks and take the stuff to the secondary markets. The secondary markets are commercially more important, having scientific storage facilities. In Siwan district some of the important secondary markets are Maharajganj, Siwan, Mairwa, Tarwara, Hassanpura and Nautan.

Agricultural indebtedness is chronic here. Natural calamities like flood and draught, greatly affect the agricultural operations and leave no option to the farmers but to contract a debt. Hence there is hardly a cash balance of any considerable amount in the hands of the average middle class agriculturists. However, short term credit through Banks and Blocks and Co-operative loans come to help the farmers. These are the main source of credit to farmers now.

Animal Husbandry

The district depends absolutely on livestock for pursuing agriculture which is the most important occupation. A good cultivator usually keeps a pair of bullocks, a few cows and one or two buffalows. Sheep, goats and poultry do not always fall under the livestock wealth of a good cultivator, but these exist in abundance with other type of persons in this district. The poorer among the cultivators or the landless labourers are mainly engaged in these pursuits. The social status and resources for agriculture of a farmer is judged by the number of cattle he owns.

This district does not have good pasturage. The alkaline soil does not offer a proper pasturage. Moreover, very close cultivation does not leave much space for fodder crops to be grown. The accent has been more for the growing of foold-grains. As a result the animals are mercy ill-fed and neglected.

So far there have been poor breeds of cattle, but now Animal Husbandry Department has been trying to introduce imported varieties of Tharparkar, Sahiwal, Shahabadi, Hariana and Bachaur breeds which are getting popular.

Fishery

In spite of large rivers like Gandak, Gogra, Daha and Jharhi and a fair number of tanks and other water reservoirs, this district is not important for the yield of fish. Netting of fish is the work of fishermen or the *Mallahs* who, for various reasons, have taken to other occupations. There are no regular fishing villages in this district.

One of the reasons for the moribund condition of fishing as a trade appears to be that there is no addition to the number of tanks or other big water reservoirs. On the other hand the existing tanks are not being regularly maintained as a result of which many tanks have ceased to be proper breeding ground. Fishing in big rivers requires better nets and a better financial background which the scattered fishermen do not possess. There is also a certain amount of apathy in the younger generation of the *Mallahs* to take to this manual profession.

However, fishing is done by some portion of the *Mallah's* population, mostly near embankments of river. The chief fish markets in the district are Raghunathpur, Siswan, Guthani, Siwan and Darauli.

Industry

There is no major industry in the district except sugar factories. Among medium and

small-scale industries there are Textile Mill, Printing Presses, Soap factories, Engineering Goods and Foundries, Cold Storage Units, Saw Mills, Distilleries and units for manufacturing transport and electrical equipments.

Sugar industry is the principal industry here. New Siwan Sugar and Gur Refining Company and S. K. G. Sugar Mill are the two working units.

The two important medium scale industries are the Dudhnath Soap Factory, Siwan and Om Prakash Soap Factory, Maharajganj. Among the main. small-scale industries are 69 flour mills, 4 oil mills, Biscuit factories, *Bidi* making.

Among cottage industries, Basket making industry in Maharajganj areas, Brass utensils manufacturing industry in Siwan, pottery industry in Siwan, Handloom weaving industry in Siwan, Ginning factory at Siwan, Cloth printing industry at Siwan and *Tikuli* industry at Harihansh are prominent ones. In view of good material and fine workmanship the brass work of Siwan has more than a local reputation. The best pottery of old Saran is made at Siwan from a peculiar kind of clay called *kohrauti*. Much of the pottery turned out is of indigenous shape and decoration. The manufacture of *Gur* is extensive in Siwan district.

The district has big potentials of cottage industries and for its development the District Industry Centre has been established. A number of training-*cum*-production centres have been started in different Blocks to impart improved technical training to traditional artisans.

Trade and Commerce

The principal imports are rice, paddy and other foodgrains, salt, k. oil, coal and cotton piece goods. The exports are sugar, linseed, mustard seed, gram, pulses and other foodgrains. Siwan being a deficient district for food production, it depends on other districts of Bihar even in normal times.

The grain trade here is of particular importance. Even at the worst time when crops fail and prices rise the *banias* buy large stock of grains at a higher price and by selling at the right time get an assured profit.

The main trade routes are the roadways and the railways. The North Eastern Railway intereperses the district and carries the bulk of the good traffic.

The principal trade centres are Siwan, Maharajganj and Mairwa, connected both by railways and roads. Large scale wholesale business in grains and other commodities is carried on from Maharajganj. The daily turnover is probably bigger in Maharajganj than in the whole of old Saran area. The other goods dealt with at Maharajganj are sun-hemp, jute, molasses, onion, potato and spices. A large number of looms are also in operation in and around Maharajganj. Siwan town has a good wholesale business of grain and some trade of pottery and brass work.

The retail marketing centres are scattered all over the district. They are Mairwa, Guthani, Darauli, Tarwara and Nautan.

The number of village markets and *hats* are very large. Almost every village has one or two shops for the principal commodities. The village *banias* or *Sahukars* have their connection with the nearest markets. Some of the important village markets are Basantpur, Bhagwanpur, Barharia, Pachrukhi, Hassanpura, Hussainganj, Gopalpur, Siswan, Andar and Chainpur.

A number of annual fairs and *melas*, notably at Supauli, Darauli, Mehndar, Raghunathpur are held for the sale of cattle and agricultural goods.

Transport

Transport facilities in the district are not inadequate. Railway and road are the two main media. Previously there was problem due to inadequate metalled roads and interaction of different railway guages. But conversion of metre-gauge into boradguage from Gorakhpur has improved the condition. Addition to the metalled roads by P. W. D., REO and District Board has improved the condition of road routes.

The North Eastern Railway runs through Siwan district for 45 Kms. from a little beyond Mairwa in the north-west to Daraundha in the south-east, crossing through the stations of Mairwa, Jiradei, Siwan, Pachrukhi and Daraundha. There is also a short loop-line running from Daraundha to Maharajganj. Siwan is an important railway station of the North-Eastern Railway where main traffic dealt with are sugar and vegetables.

Although there is no State Highway still there is a wide net of important metalled roads serving as important routes for transport.

These are Siwan-Mairwa-Guthani road covering 31.5 Kms., Siwan-Chapra road covering 65 Kms., Siwan-Sarfara road covering 35 Kms., Siwan-Raghunathpur road covering 27 Kms., Siwan-Siswan road covering 33 Kms., Siwan-Basantpur road covering 37 Kms., Siwan-Maharajganj road covering 19 Kms., Siwan-Badali road covering 17 Kms., Siwan-Mirganj road covering 16 Kms., Guthani-Chapra road *via* Darauli and Raghunathpur road covering 45 Kms., and Bhantapokhar-Jiradei road covering 5 Kms. On all these routes power-propelled vehicles ply regularly carrying the passengers. State transport buses ply on Siwan-Chapra, Siwan-Mirganj and Siwan-Mairwa-Guthani roads but buses of private companies also run on these roads and other metalled roads.

The village roads are mainly *katcha* which form perfect reticulation between the main highways. The Rural Engineering Organisation and District Board are gradually converting the village *kutcha* roads into metalled ones. The bullock-cart remains the main mode of transport on these roads followed by *ekkas* and bicycles and rickshaws. Bicycles are making a rapid headway and they are poor men's car.

Upto 1969 there was no road link with eastern Uttar Pradesh. It was after the construction of a road bridge near Guthani over river Saryu in the last decade that the flow of traffic to the neighbouring State has shown considerable progress.

Major Social and Cultural Events of Note during the Decade

No such event took place except declaration and celebration of Siwan as a district in 1973 after which the progress and development of the area was given a new dimension.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

Amarpur

Amarpur is a village situated three kilometres west of Darauli. In this village ruins of a mosque of red brick on the bank of river Gogra are still available. This mosque was built during the reign of the Mughal Emperor Shahjahan (1628—1658) under the supervision of his *naib* Amar Singh but the work was left incomplete. The village derives its name from the builder of the mosque, Amar Singh.

Faridpur

Faridpur, situated just near Audar, is the birth place of Maulana Mazharul Haq who played an important role during freedom movement. Sadaquat Ashram in Patna owes its origin largely to him. He was a symbol of Hindu-Muslim Unity.

Darauli

A block headquarters now, it is said to have been founded on the name of Dara Sikoh, the eldest son of the Emperor Shahjahan. Its name was Darawali which later on was changed into Darauli. There are reminiscents of Mughal period ruins where a big *mela* is held every year on the *Kartik Purnima*.

Don

A village in the Darauli Block where there are remnants of a fort which is said to be connected with the famous hero of the Mahabharat, Acharya Dronacharya, the *Guru* of both Kauravas and Pandavas.

Hasanpura

A village in the Hussainganj Block. It is said that it was founded by Makdum Saiyed Hasan Chisti, a saint who came from Arabia to India and settled here. He founded a Khankhah (religious institution). For the upkeep of Khankhah and of the *dargah* or tomb of Saint Chisti an endowment of land was granted by the Emperor of Delhi. The village contains the remains of a large mosque and *dargah* of the saint which is visited by both Hindus and Muslims.

Lakri Dargah

A village, it is the place of pilgrimage for the Mohammedans. The village is so called because it contains the tomb (*dargah*) of a Mohammedan saint, Shah Arjan of Patria, in which there is some good wood-work. The story runs that the saint, attracted by the solitude of the place, performed a Chila here, i.e., gave himself up to religious contemplation for 40 days. He also set up a religious establishment which was endowed by the Emperor Aurangzeb. The anniversary of the saint's death is celebrated on the 11th of Rabi-us-sani every year which attracts a large crowd.

Maharajganj

A block headquarters now, it was also called Basnauli Gangar. It is the largest *bazar* in the district. This was the place where great hero of Indian Independence Movement, Shri Phulena Prasad centralised his activity and fought against the Britishers.

Mairwa

A block headquarters now, there is a celebrated Brahma Asthan, locally known as Hari Baba ka Asthan, the shrine having been built over the relics of the saint. There is also a mound called Chananriyam Dih from an *Ahirni* women who is now worshipped in a shed built in front of the dakbungalow which occupies the top of the mound. The shrine is on the bank of the Jharhi river and fairs are held in *Kartik* and *Chaitra* months. There is also a leper home at Mairwa known as Kustha Sevasram which is doing useful work.

Papaur

A village which represents a place of great antiquity. It must be the Pava where the goldsmith Kunda lived, when Lord Buddha came and went with his followers to the goldsmiths grove and there he accepted an invitation to dine with the goldsmith. The name Papaur appears to be a corruption of Paparura or Pavapura, i.e., the sacred city.

Mehndar

A village in Siswan Block, where there is a temple of Lord Shiva which is visited by the people of the locality on the *Shivaratri* day. It is known for its temple and a pond scatted over an area of more than 52 *bighas*. It is said that one Nepal king built these and took his bath in the pond and got his leprosy cured.

Jiradei

It is a village in the Hussainganj Block. Dr. Rajendra Prasad, the first President of the Indian Republic belonged to this village.

Keontalia

A village in Darauli Block situated on the bank of the river Saryu, it is said to have the remnants of a Hindu temple which was built at the instance of Lord Buddha.

Bhikhabandh

A village in Maharajganj Block, there is a big tree under the shade of which Bhaiya-Babini temple is situated. The story runs that these brother and sister fought Mughal sepoys in the 14th century and died here incourse of fighting.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentation of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State government publications but their compilation, processing, analysis and writing are done by the Census Organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (*i*) Part A comprising the Village and Town Directory and (*ii*) Part B comprising the village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post and telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new statement of civic and other amenities for each area/locality indentified as slum in class I and II towns has been added. The information in this regard was collected in the year 1979. Since none of the towns in Siwan district in that year qualified as class I and class II, the details of slum was not collected from the district at all, though as per the 1981 Census Siwan (M) now falls in class II range. Statement IV-A relating to slums has, therefore, not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the General Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land-use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census Concepts of Rural and Urban Areas and other Terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(*a*) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(*b*) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(*i*) A minimum population of 5,000

(*ii*) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity.

(*iii*) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (*ii*) included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size :

Class of town		Population
I	..	1 lakh and above (termed as city)
II	..	50,000—99,999
III	..	20,000—49,999
IV	..	10,000—19,999
V	..	5,000— 9,999
VI	..	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the

residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, two member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes and Scheduled Tribes—Under Articles 341 (1) and 342(1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification no. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below.

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district).
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29 Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Siwan, with a population of 1,778,930 persons is divided into 15 Community Development Blocks consisting of 1,437 inhabited villages (out of a total number of 1,553 villages including 15 villages which are constituent units of towns in the district) and 3 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks.

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban					
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Siwan ..	157,282	80,471	76,811	105,998	53,069	52,929	51,284	27,402	23,882	79	78	1
2	Hussainganj ..	139,558	67,431	72,127	139,558	67,431	72,127	..	..	..	82	79	..

15	Raghunathpur	104,297	50,220	54,077	104,297	50,220	54,077	..	..	..	137	108	..
	Total ...	**1,778,930**	**859,537**	**919,393**	**1,700,504**	**818,020**	**882,484**	**78,426**	**41,517**	**36,909**	**1,553**	**1,437**	**3**

It would be seen from the table above that among the C. D. Blocks, Barharia with 9.01 per cent of the population of the district occupies the first place followed by Siwan with 8.84 per cent. The least populated C. D. Block is Guthani With only 3.90 per cent of the population of the district because a good number of villages in Guthani Block are sparsely populated as compared to villages of other C. D. Blocks.

Siwan district, which has been carved out of the old Saran district, appears to have had less impact of urbanisation since 95.59 per cent the population lives in the villages. The total urban population contained in 3 towns is of the order of only 4.41 per cent of the population of the district. None of the 3 towns, viz., Siwan (Municipality), Mairwa (NAC) and Maharajganj (NAC) falls in the range of class I towns (population 1 lakh and above). Only Siwan town in the district falls in class II range (with population 50,000—99,999) having population of 51,284 persons. The district does not have any urban agglomeration either.

Decadal change in population

Siwan acquired the status of a district only after the 1971 Census. In fact the subdivision of Siwan in the old Saran district as such has

been upgraded as a district. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of Population

Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Siwan ..	119,895	86,733	33,162	157,282	105,998	51,284	+31.18	+22.21	+54.65
Hussainganj ..	115,732	115,732	..	139,558	139,558	..	+20.59	+20.59	..
Andar ..	88,566	88,566	..	106,867	106,867	..	+20.66	+20.66	..
Darauli ..	83,302	83,302	..	96,096	96,096	..	+15.36	+15.36	..
Guthani ..	57,894	57,894	..	69,324	69,324	..	+19.74	+19.74	..
Mairwa ..	116,894	110,128	6,766	140,323	128,377	11,946	+20.04	+16.57	+76.56
Barharia ..	126.725	126.725	..	160.235	160.235	..	+26.44	+26.44	..
Pachrukhi ..	105,107	105,107	..	129,995	129,995	..	+23.68	+23.68	..
Goriakothi ..	101,989	101,989	..	124,222	124,222	..	+21.80	+21.80	..
Basantpur ..	100,129	100,129	..	122,091	122,091	..	+21.93	+21.93	..
Bhagwanpur Hat ..	97,248	97,248	..	118,156	118,156	..	+21.50	+21.50	..
Maharajganj ..	90,243	78,349	11,894	108,505	93,309	15,196	+20.24	+19.09	+27.76
Daraundha ..	95,216	95,216	..	114,755	114,755	..	+20.52	+20.52	..
Siswan ..	73,103	73,103	..	87,224	87,224	..	+19.32	+19.32	..
Raghunathpur ..	90,024	90,024	..	104,297	104,297	..	+15.85	+15.85	..
Total ..	**1,462,067**	**1,410,245**	**51,822**	**1,778,930**	**1,700,504**	**78,426**	**+21.67**	**+20.58**	**+51.34**

It would appear that the rise in the population of this district during the 1971—81 decade has been of the order of 21.67 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 20.58 per cent while urban population growth over the decade has been as much as 51.34 per cent.

As shall be evident from the table, among the Development Blocks, Siwan has shown the highest increase in population over the decade with 31.18 per cent followed by Barharia and Pachrukhi with 26.44 and 23.68 per cent respectively. The increase in rural population during 1971—81 has been the highest in case of Barharia block (26.44 per cent) followed by Pachrukhi C. D. Block (23.68 per cent). As regards the growth in urban population, Mairwa block occupies the first position with 76.56 per cent probably because Mairwa (NAC) has registered an increase in the number of villages as its constituent units during the decade. The most populous town in the district is, however, Siwan (M) though its decadal growth rate (54.65 per cent) has been only next to Mairwa (NAC).

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups :

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200 ..	109	7.58
200 - 499 ..	294	20.46
500 - 1,999 ..	814	56.65
2,000 - 4,999 ..	195	13.57
5,000 - 9,999 ..	24	1.67
10,000+ ..	1	0.07
Total ..	**1,437**	**100.00**

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499 accounting for 56.65 and 20.46 per cent of the total number of inhabited villages respectively in the district. The medium-sized villages are thus much more in number than large-sized villages (with population above 5,000) in the district. The large villages comprise of only 1.74 per cent of inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was only 751 whereas in the old Saran district it was as high as 926.

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per square Km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10 ..	4	0.28
11—20 ..	..	..
21—50 ..	5	0.35
51—100 ..	7	0.48
101—200 ..	27	1.88
201—300 ..	30	2.09
301—500 ..	173	12.04
501+ ..	1,190	82.81
Not known ..	1	0.07
Total ..	**1,437**	**100.00**

The data presented in the above table highlights the fact that maximum proportion of villages in the district lies in the density range of 501+with 82.81 per cent followed by villages in the density range of 301—500 which account for 12.04 per cent.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is mostly contained in the medium-sized villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes / Tribes population in villages and towns

Tables 5, 6 and 7 furnished below indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro-level, particularly, in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes Population to Total Population in the villages

Percentage range of Scheduled Castes Population to total populations	Number of Villages in each range	Percentage of villages in each range
1	2	3
Nil ..	223	15.52
5 or less ..	255	17.75
6—10 ..	369	25.68
11—15 ..	259	18.02
16—20 ..	139	9.67
21—30 ..	106	7.38
31 and above ..	86	5.98
Total ..	**1,437**	**100.00**

It is descernible from the table that there are only 86 villages accounting for 5.98 per cent of the inhabited villages, where the percentages of Scheduled Castes population to total population is more than 31 per cent and there are 15.52 per cent of the villages which do not have any population of the Scheduled Castes at all. The maximum number of villages, i.e., 369 accounting for 25.68 per cent of the total inhabited villages have Scheduled Castes population in the range of 6—10 per cent.

Table 6—Proportion of Scheduled Tribes Population to Total Population in the villages

Percentage range of scheduled tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil ..	1,201	83.58
5 or less ..	195	13.57
6—15 ..	38	2.64
16—25 ..	2	0.14
26—35 ..	..	..
36—50 ..	..	..
51 and above ..	1	0.07
Total ..	**1,437**	**100.00**

As regards the population of the Scheduled Tribes it can be seen from Table 6 that there are as many as 1,201 out of 1,437 inhabited villages (83.58 per cent) in the district which have no Scheduled Tribes at all. It is only in 195 villages comprising 13.57 per cent of the total number of inhabited villages where the concentration of Scheduled Tribes population is less than 5 per cent followed by 38 villages (2.64 per cent) in the next higher range of 6—15. In the higher ranges the number of villages is either negligible or nil.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of the town	Total population	Total scheduled castes population	Total scheduled tribes population	Percentage of scheduled castes population to total population	Percentage of scheduled tribes population to total population
1	2	3	4	5	6
Maharajganj ..	15,196	1,033	295	6.80	1.94
Mairwa ..	11,946	889	594	7.44	4.97
Siwan ..	51,284	2,767	624	5.40	1.22
**All towns .. **	**73,426**	**4,689**	**1,513**	**5.98**	**1.93**

The table above indicates that the concentration of the Scheduled Castes in the towns of Siwan district is of the order of 5.98 per cent of the total population which is less as compared to rural areas. They have been less mobile probably because agriculture and allied activities still remain to be their main source of livelihood. The highest percentage of Scheduled Castes population is contained in Mairwa (NAC) with 7.44 per cent. The Urban content of the population of the Scheduled Tribes is also observed to be maximum in Mairwa town being 4.97 per cent. In rest of the towns the proportion of Scheduled Tribes is much less.

Literacy rates by population ranges of villages and towns

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately.

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200 ..	109	19.95
200—499 ..	294	21.06
500—1,999 ..	814	21.95
2,000—4,999 ..	195	23.75
5,000—9,999 ..	24	23.78
10,000+ ..	1	17.06
**Total .. **	**1,437**	**22.62**

It would be seen above that literates form 22.62 per cent of the population in the rural areas of the district as against 47.38 per cent in the urban areas. In the rural areas it is interesting to note that except in the population range of 10,000+ where there is only one village, the literacy rate varies directly in relation to the population range of the villages. The highest percentage of literacy rate can be seen for the villages in the population ranges of 5,000—9,999 and 2,000—4,999 with 23.78 and 23.75 per cent literates respectively and the lowest in the population range of less than 200 with only 19.95 per cent being literate.

Table 9—Literacy rates for towns

Name of the town	Literacy rate
1	2
Maharajganj ..	36.95
Mairwa ..	33.21
Siwan ..	53.78
**All Towns .. **	**47.38**

Among the towns, Siwan(M), being the district headquarters, has the highest percentage of literate population (53.78 per cent) followed by Maharajganj (NAC) (36.95 per cent).

Workers and non-workers in rural and urban areas of the district

The table on next page gives the percentage break up of Literates, Main Workers, Marginal Workers, Total Workers, Non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table 10—Literates, Workers, Non-workers, Scheduled castes,

Name of Development Block	Total Rural urban	Total Population			Scheduled castes population to total population	Scheduled Tribes population to total population	Literates to total population

23.04	**42.48**	**5.01**	**1.37**	**1.11**	**1.61**	**24.41**	**43.59**	**6.62**	**75.59**	**56.41**	**93.38**	**Total**
23.91	**42.78**	**2.69**	**0.35**	**0.40**	**0.28**	**24.26**	**43.18**	**2.97**	**75.74**	**56.82**	**97.03**	

Total workers in the district of Siwan account for 24.40 per cent of the total population whereas the number of non-workers is as high as 75.60 per cent. As shall be evident from the table above, the main workers (i.e.,) those who had worked for 6 months or 183 days or more during the reference period of 1 year) comprise 23.07 per cent of the total population which is very close to the per centage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis, The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.33 per cent. The same trend can be observed in both the rural and urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 43.57 and 42.49 per cent respectively for males as against 6.48 and 4.92 per cent for females which indicates that the participation of females in economically productive work is quite low.

Another notable featureis higher percentage of female marginal workers (1.56 per cent) vis-a-vis male marginal workers (1.08 per cent). It can be seen that except in one or two rural and urban cases the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (24.41 per cent) than in the urban areas (24.26 per cent). The same pattern is perciptible in the case of marginal workers who constitute 1.37 per cent of the rural population but only 0.35 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities, whereas, in the urban areas, household industries and other works do not offer equal job opportunities in view of the limited urban development.

Villages distributed according to availability of different amenities

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Serial no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/ hat	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Siwan ..	78	58 (74.36)	13 (16.67)	78 (100.00)	9 (11.54)	13 (16.67)	15 (19.23)	22 (28.21)	27 (34.62)
2	Hussainganj ..	79	66 (83.54)	15 (18.99)	79 (100.00)	20 (25.32)	14 (17.72)	30 (37.97)	26 (32.91)	38 (48.10)
3	Andar ..	102	73 (71.57)	1 (0.98)	102 (100.00)	19 (18.63)	14 (13.73)	9 (8.82)	11 (10.78)	10 (9.80)
4	Darauli ..	97	62 (63.92)	39 (40.21)	97 (100.00)	25 (25.77)	10 (10.31)	15 (15.46)	13 (13.40)	6 (6.19)
5	Guthani ..	98	55 (56.12)	15 (15.31)	98 (100.00)	15 (15.31)	6 (6.12)	19 (19.39)	16 (16.33)	..
6	Mairwa ..	123	85 (69.11)	21 (17.07)	123 (100.00)	23 (18.70)	17 (13.82)	19 (15.45)	26 (21.14)	20 (16.26)
7	Barharia ..	139	86 (61.87)	27 (19.42)	139 (100.00)	22 (15.83)	32 (23.02)	33 (23.74)	31 (22.30)	23 (16.55)
8	Pachrukhi ..	98	75 (76.53)	14 (14.29)	98 (100.00)	18 (18.37)	22 (22.45)	20 (20.41)	33 (33.67)	40 (40.82)
9	Goriakothi ..	81	70 (86.42)	17 (20.99)	81 (100.00)	16 (19.75)	26 (32.10)	37 (45.68)	60 (74.07)	8 (9.88)
10	Basantpur ..	79	72 (91.14)	24 (30.38)	79 (100.00)	18 (22.78)	19 (24.05)	19 (24.05)	14 (17.72)	4 (5.06)
11	Bhagwanpur Hat	112	87 (77.68)	15 (13.39)	112 (100.00)	26 (23.21)	37 (33.04)	11 (9.82)	25 (22.32)	5 (4.46)
12	Maharajganj ..	69	54 (78.26)	29 (42.03)	69 (100.00)	20 (28.99)	16 (23.19)	25 (36.23)	28 (40.58)	30 (43.48)
13	Daraundha ..	95	71 (74.74)	14 (14.74)	95 (100.00)	19 (20.00)	8 (8.42)	12 (12.63)	18 (18.95)	28 (29.47)
14	Siswan ..	79	57 (72.15)	24 (30.38)	79 (100.00)	13 (16.46)	6 (7.59)	22 (27.85)	23 (29.11)	7 (8.86)
15	Raghunathpur ..	108	62 (57.41)	17 (15.74)	108 (100.00)	19 (17.59)	8 (7.41)	22 (20.37)	30 (27.78)	4 (3.70)
	Total ..	**1,437**	**1,033 (71.89)**	**285 (19.83)**	**1,437 (100.00)**	**282 (19.62)**	**248 (17.26)**	**308 (21.43)**	**376 (26.17)**	**250 (17.40)**

Educational amenity—There are as many as 1,033 villages accounting for 71.89 per cent of the total number of inhabited villages (1,437) in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Basantpur with 91.14 per cent followed by Goriakothi and Hussainganj with 86.42 and 83.54 per cent respectively. The lowest number of villages with educational facility is in the development block of Guthani and Raghunathpur with 56.12 and 57.12 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low and only 19.83 per cent villages have it. Among the development blocks, Maharajganj has the largest proportion of villages with medical facility, the percentage being 42.03. Andar block, on the other hand, has only one village to its credit (0.98 per cent) enjoying medical facility.

Drinking water—It would be seen from the table that drinking water facility is generally available in all the inhabited villages of the district of Siwan.

Post and Telegraph.—Postal facilities (Post & telegraph) are available only in 282 villages (19.62 per cent) out of a total of 1,437inhabited villages in the district. Maharajganj block again has the maximum number of villages having post and telegraph facility (28.99 per cent) followed by Darauli (25.77 per cent) and Hussainganj (25.32 per cent). In the remaining development blocks of the district the number varies from a minimum of 11.54 per cent (in Siwan block) to a maximum of 23.21 per cent (in Bhagwanpur Hat block).

Market/Hat—The villages where market/*hat* is held constitute only 17.26 per cent of the total number of villages in the district. Bhagwanpur Hat block has the maximum number of villages where market/*hat* is held, the per centage being 33.04 closely followed by Goriakothi with 32.10 per cent. As will be seen from the table, there are 4 development blocks in the district which have the facility of market/*hat* in less than 10 per cent of the villages. In the remaining blocks the proportion of villages where market/*hat* is held varies between 13.73 and 24.05 per cent.

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 21.43 per cent of the total villages in the district are connected by one means of communication or the other. The majority of villages are still devoid of this facility. A development blockwise break up of villages having any means of communication is given in the table above indicating that Goriakothi block comprises the highest proportion of villages (45.68 per cent) which are connected by bus or rail or navigable river/canal services, etc., followed by Hussainganj with 37.97 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 8.82 per cent in Andar block and the maximum of 36.23 per cent in Maharajganj block.

Approach road to village—With only 26.17 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Goriakothi block with 74.07 per cent villages having *pucca* approach road tops the list followed by Maharajganj and Pachrukhi blocks with 40.58 and 33.67 per cent respectively. The development blocks which have the lowest number of villages having this facility are Andar (10.78 per cent), Darauli (13.40 per cent) and Guthani (16.33 per cent).

Power Supply—Electrified villages in the district constitute as much as 17.40 per cent of the total number of villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Hussainganj development block occupies the first position having the maximum proportion of electrified villages (48.10 per cent) followed by Maharajganj and Pachrukhi blocks with 43.48 and 40.82 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Raghunathpur (3.70 per cent) and Bhagwanpur Hat (4.46 per cent). Significantly, Guthani Development Block does not have any electrified village.

Proportion of rural population served by various amenities

While in Table 11 we had discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 on next page gives the proportion of rural population served by these amenities.

Serial no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of –							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Siwan ..	1,05,998	90.28	28.47	100.00	22.18	31.95	27.95	33.22	48.52
2	Hussainganj ..	1,39,558	91.60	32.91	100.00	52.08	35.69	54.50	51.54	63.16
3	Andar ..	1,06,867	89.45	3.67	100.00	31.87	28.24	16.40	20.23	17.05
4	Darauli ..	96,096	85.62	53.25	100.00	53.75	18.88	25.89	23.54	16.43
5	Guthani ..	69,324	79.27	30.13	100.00	39.78	20.63	36.30	26.99	..
6	Mairwa ..	1,28,377	88.41	34.04	100.00	39.87	33.92	28.51	35.79	30.48
7	Barbaria ..	1,60,235	83.14	35.57	100.00	32.99	43.59	35.40	35.10	36.74
8	Pachrukhi ..	1,29,995	90.87	23.22	100.00	32.85	34.66	26.10	41.53	50.65
9	Goriakothi ..	1,24,222	96.30	43.07	100.00	47.43	57.16	53.71	80.54	17.31
10	Basantpur ..	1,22,091	97.11	50.21	100.00	42.54	40.03	28.97	17.88	8.37
11	Bhagwanpur Hat	1,18,156	93.56	23.77	100.00	42.81	49.54	20.55	30.95	11.14
12	Maharajganj ..	93.309	93.60	55.58	100.00	46.80	34.13	49.78	50.97	54.16
13	Daraundha ..	1,14,755	91.44	27.76	100.00	42.97	17.41	49.38	30.54	48.11
14	Siswan ..	87,224	89.96	48.03	100.00	44.10	70.90	41.14	44.04	54.54
15	Raghunathpur ..	1,04,297	88.78	34.09	100.00	45.62	15.60	31.05	34.38	54.36
	Total ..	**17,00,504**	**90.16**	**34.52**	**100.00**	**40.97**	**36.05**	**35.18**	**37.73**	**34.83**

It would be seen that educational facility is available to 90.16 per cent of the rural population in the district. The proportion varies between the maximum of 97.11 per cent in Basantpur block and the minimum of 79.27 per cent in Guthani block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 71.89 per cent (as has been observed in Table 11) than the proportion of population which is as high as 90.16 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 34.52 per cent which is much more than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges

The table below indicates the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms. and 10+ Kms.) from the places where these are available :

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of–	Number of villages where the amenity is not available and avilable at a distance of–			
	–5 Kms.	5–10 Kms.	10+ Kms.	Total (cols.2—4)
1	2	3	4	5
1. Education ..	402	2	..	404
2. Medical ..	930	167	55	1,152
3. Drinking water ..	..	..	..	..
4. Post and Telegraph	1,093	61	1	1,155
5. Market/*Hat* ..	1,024	145	20	1,189
6. Communication ..	867	197	65	1,129

As regards educational facility it would be seen that there are as many as 402 villages in the district (38.92 per cent) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5—10 Kms. is only 2 whereas beyond 10 Kms. it is nil. The number of villages having other facilities within a distance of 5—10 Kms. and 10+Kms. is less than those having the facilities within 5 Kms. though not in the same proportion.

Availability of different amenities in the villages according to the distance from the nearest town

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five size groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in Kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communi-cation	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5 ..	176	119 (67.61)	27 (15.34)	176 (100.00)	29 (16.48)	9 (5.11)	34 (19.32)	50 (28.41)	67 (38.07)
6—15 ..	500	361 (72.20)	113 (22.60)	500 (100.00)	102 (20.40)	91 (18.20)	111 (22.20)	125 (25.00)	115 (23.00)
16—50 ..	759	551 (72.60)	145 (19.10)	759 (100.00)	150 (19.76)	147 (19.37)	163 (21.48)	201 (26.48)	68 (8.96)
51+ ..	2	2 (100.00)	..	2 (100.00)	1 (50.00)	..	..	..	..
Unspecified ..	..	..	..	..	..	..	..	..	..
Total ..	**1,437**	**1,033 (71.89)**	**285 (19.83)**	**1,437 (100.00)**	**282 (19.62)**	**248 (17.26)**	**308 (21.43)**	**376 (26.17)**	**250 (17.40)**

It would appear from the above table that maximum number of inhabited villages lie in the distance range of 16—50 Kms. (52.82 per cent) from the nearest town. With only 3 urban centres in the district such a situation is but natural. This is followed by villages in the distance range of 6—15 Kms. from the nearest town with 34.79 per cent. Only two villages are found to be in the distance range of more than 51 Kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 67.61 per cent for those situated within 5 Kms. from the nearest town and thereafter it increases with the increase in the distance range from the nearest town. The same trend can be observed in the case of Market/*hat*, and also with slight exception (in distance range of 16—50) in respect of medical facilities. In case of *pucca* approach road and power supply, the proportion of villages is observed to be the highest in the distance group of 0—5 Kms. However, a different situation is observed in case of post and Telegraph and communication where no particular trend has been observed to be followed. It can be said that the villages which are nearer to the urban areas have benefited in respect of power supply and *pucca* approach road vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available

The table given on next page furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges.

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
—499 ..	403	113 (28.04)	39 (9.68)	403 (100.00)	10 (2.48)	21 (5.21)	52 (12.90)	70 (17.37)	26 (6.45)
500—1,999 ..	814	703 (86.36)	137 (16.83)	814 (100.00)	117 (14.37)	117 (14.37)	153 (18.80)	199 (24.45)	130 (15.97)
2,000—4,999 ..	195	193 (98.97)	88 (45.13)	195 (100.00)	132 (67.69)	88 (45.13)	84 (43.08)	89 (45.64)	79 (40.51)
5,000+ ..	25	24 (96.00)	21 (84.00)	25 (100.00)	23 (92.00)	22 (88.00)	19 (76.00)	18 (72.00)	15 (60.00)
Total ..	**1,437**	**1,033 (71.89)**	**285 (19.83)**	**1,437 (100.00)**	**282 (19.62)**	**248 (17.26)**	**308 (21.43)**	**376 (26.17)**	**250 (17.40)**

It can be seen from the table that the maximum number of villages, i.e., 814 (56.65 per cent) in the district fall in the population range of 500—1,999 followed by 403 villages (28.04 per cent) in the population range of less than 499. The lowest number of villages as observed in the population range of 5,000+ being 25 (1.74 per cent) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except in case of educational facility where the proportion of villages has declined in the population range of 5000+ though the decrease is very marginal. Generally, the maximum number of villages having different amenities have a population range of 5000+ which also corroborates the fact that more facilities are generally available in large villages than in smaller ones.

Main Staple food in the villages

The table given alongside indicates that rice and wheat constitute the main staple food of the people in all the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block

Serial no.	Name of Development Block	Main staple food
1	2	3
1	Siwan ..	.. Rice, wheat.
2	Hussainganj ..	.. Rice, wheat.
3	Andar ..	.. Rice, wheat.
4	Darauli ..	.. Rice, wheat.
5	Guthani ..	.. Rice, wheat.
6	Mairwa ..	.. Rice, wheat.
7	Barharia ..	.. Rice, wheat.
8	Pachrukhi ..	.. Rice, wheat.
9	Goriakothi ..	.. Rice, wheat.
10	Basantpur ..	.. Rice, wheat.
11	Bhagwanpur Hat	.. Rice, wheat.
12	Maharajganj ..	.. Rice, wheat.
13	Daraundha ..	.. Rice, wheat.
14	Siswan ..	.. Rice, wheat.
15	Raghunathpur	.. Rice, wheat.

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The Table 17 at page 25 gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks.

Table 17—Distribution of villages according to land use

Serial no.	Name of Development Block	Number of inhabited villages	Total area (in Hectares)	Percentages of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Siwan	78	12,176.78	81.93	70.16
2	Hussainganj	79	14,174.08	87.41	69.93
3	Andar	102	17,265.26	86.74	56.42
4	Darauli	97	15,788.50	89.13	71.11
5	Guthani	98	9,065.00	88.11	61.20
6	Mairwa	123	18,237.31	89.05	59.90
7	Barharia	139	17,712.82	88.84	55.41
8	Pachrukhi	98	15,137.51	87.12	55.82
9	Goriakothi	81	13,798.33	84.22	58.72
10	Basantpur	79	15,713.72	88.16	33.92
11	Bhagwanpur Hat	112	14,895.06	81.70	40.05
12	Maharajganj	69	10,762.08	83.63	62.89
13	Daraundha	95	14,915.66	86.33	48.30
14	Siswan	79	10,630.05	51.87	67.20
15	Raghunathpur	108	15,089.14	80.18	54.33
	Total	**1,437**	**215,361.30**	**84.37**	**56.89**

It would be seen from the table that 84.37 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 56.89 per cent area is irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Darauli block with 89.13 per cent closely followed by Mairwa, Barharia and Basantpur with 89.05, 88.84 and 88.16 per cent respectively. The lowest cultivable area is found in Siswan block with only 51.87 per cent of the total area.

The highest proportion of irrigated area to the total cultivable area is again found to be in Darauli block accounting for 71.11 per cent followed by Siwan with 70.16 per cent and Hussainganj with 69.93 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Basantpur block (33.92 per cent). In the remaining blocks the percentage varies between 40.05 per cent and 67.20 per cent.

Growth, densityand sex-ratio of urban populatio

The urban population of the district in each of the censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State:

Table 18—Growth, Density and Sex-ratio of urban population in the district in relation to the State

Census Year	District						State					
	Total population	Urban population	Percentage urban population	Decadal percentage variation in urban population	Density population per sq. km.)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	Percentage urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951 ..	1,077,453	22,625	2.10	+23.06	8,735	895	38,782,271	2,626,261	6.77	+38.14	2,320	849
1961 ..	1,213,268	38,170	3.15	+68.71	3,322	884	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971 ..	1,462,067	51,822	3.54	+35.77	3,429	878	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981 ..	1,778,930	78,426	4,41	+51.34	4,621	889	69,914,734	8,718,990	12.47	+54.76	2,727	832

BIHAR GENERAL 41706

It will be clear from the table that the extent of urbanisation is quite low in Siwan. Whereas the urban population of the district formed a more 2.10 per cent of the total population in 1951 as compared to the State figure of 6.77 per cent; even in 1981 only 4.41 per cent of the population was urban while the State figure went up to 12.47 per cent.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. It would be seen that decadal growth of urban population has shown fluctuations during different decades. While during 1951—61 the urban population growth was of the order of 68.71 per cent it dropped to 35.77 per cent during 1961—71. Again during 1971—81 it has registered an increase of 51.34 per cent. The trend of the growth of urban population in the State has been similar to that of Siwan district though in different proportion.

The density of population in the urban areas of the district was very high in 1951 being 8,735 persons per sq. km. It may be attributed to the fact that in 1951 there was only one town in the district, viz., Siwan having very small jurisdictional area and large population. In subsequent Censuses there has been addition in jurisdiction of urban areas and hence the density has fallen. Between 1961 and 1981 the density of the urban population of the district has varied from 3,322 to 4,621. The density of the urban population of the State on the other hand had not been that high till the 1971 Census. In 1981 Census, however, the density of the urban population of the State has shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is still much lower than that of Siwan which stood at 4,621 persons per sq. km.

The sex-ratio for the urban areas of Siwan district has all along been higher as compared to urban areas of the State. The sex-ratio of the urban areas of the district has shown a successive decline till the 1971 Census. In the 1981 Census, the district has, however, shown a considerable improvement in favour of females, though there is still predominance of males over females.

Towns added and declassified in 1981

There are 3 towns, viz., Siwan(M), Mairwa (NAC) and Maharajganj(NAC) in the district of Siwan. No new town has been added nor any town declassified in the 1981 Census. Table 19 has, therefore, not been presented in this volume.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure.

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of town	Per capita								
	Receipt (in rupees)			Expenditure (in rupees)					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV. Maharajganj (NAC) ..	0.91	0.42	0.49	0.90	0.20	0.59	..	..	0.11
IV. Mairwa (NAC) ..	5.30	1.19	4.11	3.91	3.69	..	0.16	..	0.06
II. Siwan (M) ..	24.52	9.63	14.89	14.87	2.24	6.84	1.79	..	4.00
**Total .. **	**30.78**	**11.24**	**19.49**	**19.68**	**6.13**	**7.43**	**1.95**	..	**4.17**

It would be apparent from the above figures that the per capita receipt both through taxes and through all other sources is the highest in Siwan(M) whereas it is the lowest on both counts in Maharajganj(NAC).

Per capita total expenditure is again the highest in Siwan(M). However, the per capita expenditure incurred on general administration is maximum in case of Mairwa(NAC).

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns. The Table 21 given on next page gives details of different categories of educational institutions per ten thousand population in different towns of the district.

Table 21—Schools per ten thousand population in towns

Class, Name and civic status of town	Number per ten thousand population			
	Higher Secondary/ Inter/ PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV. Maharajganj(NAC) ..	..	2.63	2.63	6.58
IV. Mairwa (NAC) ..	..	2.51	2.51	8.37
II. Siwan (M) ..	..	1.17	1.17	4.29
Total ..	..	**1.66**	**1.66**	**5.36**

It would be seen from the above table that institutions like Higher Secondary School/ Inter/PUC/Junior College do not exist in any of the 3 towns of Siwan district. As regards Secondary/Matriculation level schools, there are, on an average, 2.63 schools per ten thousand population located in Maharajganj (NAC) which is the highest followed by 2.51 such schools per ten thousand population in Mairwa (NAC). The same situation is observed for Junior Secondary/Middle Schools. Mairwa (NAC) has, however, the highest number of Primary Schools in the district with an average of 8.37 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 5.36 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns of the district :

Table 22—Number of beds in medical institutions in towns

Class, name and civic status of the town	Number of beds in medical institutions per one thousand population
1	2
IV. Maharajganj (NAC) ..	..
IV. Mairwa (NAC) ..	0.50
II. Siwan (M) ..	1.60
Total ..	**1.11**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to be 1.11. The availability of beds in the hospitals is the highest in case of Siwan(M) having 1.60 beds per 1,000 population, Maharajganj (NAC) does not have this facility at all.

Proportion of slum population in towns

The details of slums have been collected only in case of Class I and Class II towns. The information was gathered through local officials of the Municipalities, NACs. as also through the Town Planning Department in 1979. Since in that year none of the 3 towns of Siwan district fell in the class I (population 1 lakh and above) or class II (50,000—99,999) range the information regarding slums was not collected in respect of these 3 towns though now in 1981 Census Siwan(M) lies in class II range. Table 23 has therefore, not been presented.

Important commodities imported, exported and manufactured.

The table presents the most important commodity manufactured, exported and imported in the 3 towns of Siwan district.

Table 24—Most important commodity manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV. Maharajganj (NAC).	Pulses	Handloom cloths	Foodgrains
IV. Mairwa (NAC)	Sugar	Sugar	Foodgrains
II. Siwan (M) ..	Sugar	Sugar	Rice

In Siwan and Mairwa towns it has been observed that sugar, the most important commodity which is manufactured in the town is also the same most important item which is exported to other places. In Maharajganj (NAC), however, the most important commodity manufactured and the most important commodity exported is not the same.

VD—denotes Village Directory
PCA—denotes Primary Census Abstract.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village, its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of Mauzawar Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(—5 Kms.)', '(5—10 Kms.)' and '(10+ Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where anyone of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the dispensaries/community health worker has been taken as most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column 10), and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as

adopted by the State Government. These are as follows:

1. Forests.
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown.
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (unirrigated) give the breakup of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (culturable waste) correspond to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of landuse pattern are explained below :—

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and uncultural le lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in Cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 do not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., are generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Block-wise.

Following is the list of abbreviations used in the Village Directory :

(*i*) *Column* 5—*Educational*

P	..	Primary or Elementary School (upto class IV).
M	..	Middle or Junior Secondary School (upto class VIII).
H	..	Matriculation or Secondary School (upto class X).
PUC	..	Higher Secondary, Intermediate, Pre-University, Junior College.
C	..	College.
I	..	Industrial School.
Tr	..	Training School.
Ac	..	Adult Literacy Class/Centre.
O	..	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.).

(*ii*) *Column* 6—*Medical*

H	..	Hospital.
MCW	..	Maternity and Child Welfare Centre.
MH	..	Maternity Home.
CWC	..	Child Welfare Centre.
HC	..	Health Centre.
PHC	..	Primary Health Centre.
PHS	..	Primary Health Sub-centre.
D	..	Dispensary.
FPC	..	Family Planning Centre.
TB	..	T.B. Clinic.
NH	..	Nursing Home.
RP	..	Registered Private Practitioner.
SMP	..	Subsidised Medical Practitioner.
CHW	..	Community Health Worker.
O	..	Others.

(*iii*) *Column* 7—*Drinking Water*

T	..	Tap Water.
W	..	Well Water.
Tk	..	Tank Water.
TW	..	Tube-well Water.
Hp	..	Handpump.
R	..	River Water
F	..	Fountain.
C	..	Canal.
L	..	Lake.
S	..	Spring.
N	..	*Nullah/Nala/Nallah.*
O	..	Others
NA	..	Information Not Available.

(*iv*) *Column* 8—*Post and Telegraph*

PO	..	Post Office
TO	..	Telegraph Office.
PTO	..	Post and Telegraph Office.
Phone	..	Telephone connection.

(*v*) *Column* 10—*Communications*

BS	..	Bus.
RS	..	Railway Station.
NW	..	Navigable Waterway (including river, canal, backwaters, etc.).

(*vi*) *Column* 11—*Approach to Village*

PR	..	*Pucca* Road.
KR	..	*Kutcha* Road.
NR	..	Navigable River.
NC	..	Navigable Canal.
NW	..	Navigable Waterway (other than river or canal).
FP	..	Foot Path.

(*vii*) *Column* 13—*Power Supply*

ED	..	Electricity for Domestic purpose.
EAg	..	Electricity for Agriculture purpose.
EO	..	Electricity for Other purposes like industrial, commercial, etc.
EA	..	Electricity for all purposes listed above.

(*viii*) *Column* 16—*Irrigated by Source*

GC	..	Government Canal.
PC	..	Private Canal.
W	..	Well (without electricity)
WE	..	Well (with electricity).
TW	..	Tube-well (without electricity).
TWE	..	Tube-well (with electricity).
Tk	..	Tank.
R	..	River.
L	..	Lake

(*ix*) *Column* 20—*Remarks*

N	..	Copies of Newspapers coming in the village.
M	..	Motor Cycles/Scooters available in the village.
C	..	Cars/Jeeps available in the village.
T	..	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been

given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes), the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Siwan district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B) : 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (*i*) Status and growth history; (*ii*) Physical aspects and location of towns 1979; (*iii*) Municipal finance, 1978-79; (*iv*) Civic and other amenities in towns (*iv*A) Civic and other amenities in Notified Slums (*v*) Medical, educational, recreational and cultural activities; and (*vi*) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix. to the Town Directory.

In statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory. However as already explained earlier this district does not have every census town as such.

The details of the data covered in statements I to VI and IVA and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2 —

M. Corp.	..	Municipal Corporation
M	..	Municipality
C. B.	..	Cantonment Board/Cantonment.
NAC	..	Notified Area Committee
CT	..	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13 —

R	..	River
C	..	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available

to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night soil, source and capacity of protected water supply, fire fighting services and the number of various types of eletricity connections are also presented in this statement. If fiire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	..	*Pucca* Road
KR	..	*Kutcha* Road

Column 7—

S	..	Sewer
OSD	..	Open Surface Drains
BSD	..	Box Surface Drains
SD	..	Sylk Drains
CD	..	Cesspool Method
Pt	..	Pit System

Column 11—

HL	..	Head Loads
B	..	Baskets
WB	..	Wheel Barrows
ST	..	Septic Tank Latrines
S	..	Sewerage

Column 12—

TW	..	Tube-well Water
T	..	Tap Water
W	..	Well Water
Tk	..	Tank Water

Column 13—

OHT	..	Overhead Tank
SR	..	Service Reservoir
IG	..	River Infiltration Gallery
BWP	..	Borewell Pumping System
PT	..	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in this district, there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town, Statement IV-A relating to the slums does not find place in the present volume. This has already been explained in the 'Analysis of Data' section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult litoracy centres, working womens hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement.

Column 4—

H	..	Hospital (Allopathic)
H(A)	..	Hospital (Ayurvedic)
H(U)	..	Hospital (Unani)
H(Hom)	..	Hospital (Homeopathic)

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other workers".

The Village/Urban Primary Census Abstract is proceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the administrative and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their Location Code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the

district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
