FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to Village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new

statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of sulms. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slips of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/C.D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

NEW DELHI :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, *viz.*, (i) Part-A containing the Village and Town Directories and (ii) Part-B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms (for village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice-Chairmen/ Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and Village/Urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Asstt. Director was ably assisted by his team of Statistical Assistants, Computors, Assistant Compilers and a few lady Checkers and Coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha, Asstt. Director. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Asstt. Director and Shri Sheo Prasad, Senior Technical Assistant assisted by the supporting staff have helped in getting the volume

printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad and Shri Asharful Hoda, who have done the typing work also deserve thanks.

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Printwell Printers, Delhi who have undertaken the work of printing of this volume and accomplished the same with promptness.

PATNA :

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

Vaishali district, which till the 1971 Census was a part of Muzaffarpur district, acquired the status of an independent district on the 2nd October, 1972. Earlier it was a subdivision of Muzaffarpur district, known as Hajipur subdivision. Hajipur is the chief town and the headquarters of the district. The district has derived its name after Vaishali or modern Basarh, a village in the north-west corner of the district, situated 32 Kms. north west of Hajipur. It has been identified as the birth-place of Mahabir, the 24th Jain *Tirthankar* . It was also the capital of the powerful confederacy of the Lichchavis.

The district is bounded on the north by Muzaffarpur district, on the south by Patna district (the ganges forming a natural boundary), on the east by Samastipur district and on the west by the district of Saran.

Early History

Little is known about the original inhabitants of this ancient land of North Bihar. The 1961 District Census Handbook mentions that the history of the district dates back to the rise of the Vrijjian Republic which replaced the Videhan monarchy. The centre of power also shifted from Mithila to Vaishali, the capital of the republic, which is identified with modern Basarh, the headquarters of Vaishali C.D. Block. The Vrijjian Republic was a confederation of eight clans, of which the Lichchavis were the most important. They gradually gained strength and came in conflict with the powerful Kingdom of Magadh. Bimbisar (Circa 519 B.C.), the founder of the Magadh Empire, had secured his position by concluding matrimonial alliances with the neighbouring states of the Kosalas and the Lichchavis. Bimbisar was assassinated by his son Ajatsatru, who afterwards invaded Vaishali and extended his sway over Tirhut.

Vaishali was a centre of religious renaissance. Lord Mahavir, the founder of modern Jainism, was born in about 599 B.C. near Vaishali. Like Lord Buddha, he also came of an aristocratic family. His father was the Chief of the *Nata* or *Naya* clan of Kshatriyas. Mahavir became an ascetic at the age of 30 and revived the religion founded by Parsvantha.

Lord Buddha was a contemporary of Mahavir. It is said that when Vaishali was in the grip of a devastating plague, its people exhorted Buddha to pay a visit. On his arrival at the city, the fury of the pestilence was greatly reduced and this miracle won him a good many disciples. Although, Vaishali was the birth-place of Mahavir, it was influenced more by Buddhism. Even at a much later date, many *stupas* and several Buddhist monasteries were found here by travellers including Hiuen Tsang. Even after the defeat of the Vrijjians by the Magadh emperor, Ajatshatru Vaishali continued to be an important place. The second great synod of the Buddhists was held here.

Vaishali appears to have gradually lost its glory after the Buddhist synod. Not much is known about it for the next several centuries. The Lichchavis, who had acknowledged the suzerainty of Magadh, ruled over the area. Vaishali was visited by Ashoka who got a *stupa* and a lion pillar erected here.

The Kushan King, Kanishka, invaded Vaishali in about 120 A.D. Fa-hien, the Chinese pilgrim visited the place during his tour of India, but he did not leave any detailed account of the place. A description of Vaishali appears in the travel accounts of Hiuen Tsang, who visited it about 635 A.D. According to this, the people were honest and religious and respected the learned. Hiuen Tsang saw many deserted monasteries, some of which were in ruins. There were many Jains indicating that Buddhism was on the decline in that period.

Medieval period

There is a great dearth of material on the history of North Bihar including Vaishali from the visit of Hiuen Tsang till the rise of the Pala dynasty. In the 8th century A.D., Gopala, the first of the Pala kings, became the ruler of Bengal. He extended his authority over Bihar in about 750 A. D. The Palas continued to have their hold over Tirhut until 1019 A. D. when the Chedi kings of Central India established their sway. They were replaced towards the close of the 11th century by the rulers of the Sena dynasty. Lakshman Sena was a powerful king of this dynasty.

Muslim period

Ghias-ud-din Iwaz, the Governor of Bengal between 1211 and 1226, was the first Muslim invader of Tirhut. He subdued the Raja of Tirhut and extorted tributes from him. Iwaz, however, could not succeed in conquering the country. It was only in 1323 that Ghiyas-ud-din Tughlak succeeded in establishing his sway over the district. Hajipur, which had great strategic importance due to its situation at the confluence of the rivers Gandak and Ganga, was the seat of the Governors. Being under their direct control, the district has a number of relics of the Muslim period. The town of Hajipur itself was founded by Haji Illyas, king of Bengal from 1345 to 1358. He invaded Tirhut and, to consolidate his conquest, built a fortress at Hajipur. Feroz Tughlaq of Delhi marched to Tirhut in 1353 to punish Haji Illyas for his attempt at taking over the Emperor's domain. The Haji was ultimately defeated and the Emperor returned to Delhi.

The whole of North Bihar appears to have passed into the hands of the kings of Jaunpur towards the close of the 14th Century. It remained under them for about a hundred years until Emperor Sikander Lodi of Delhi defeated the king of Jaunpur and retrieved the territory. After his victory over the king of Jaunpur, the Emperor advanced against Hussain Shah in 1499, who by that time had extended his power over large tracts in Bihar. Hussain Shah found it difficult to resist the imperial forces and therefore he came to agreement with the Emperor and concluded a treaty with him at Barh. According to the terms, Hussain Shah withdrew from Bihar, Tirhut and Sarkar Saran while the Emperor agreed to desist from interfering with his possession in Bengal. But the kings of Bengal could not for long resist the temptation of extending their power over Tirhut. Nasrat Shah, son of Hussain Shah, raided Tirhut in the early 16th century not withstanding the earlier treaty concluded by his father. The Raja of Tirhut was killed and the king's son-in-law, Alauddin was appointed Governor of Tirhut. Nasrat Shah also took over Hajipur and put another son-in-law, Makhdoom Alam there. The power of the kings of Bengal was, however, waning and, with the fall of Mahmood Shah, North Bihar, including Vaishali, became a part of the Mughal Empire. Though the entire North Bihar had been annexed, the control was very loose and petty chieftains continued to be powerful. When Daud Khan, the king of Bengal, raised the banner of revolt in 1574, he founded a band of ready supporters in the Afghans. Daud Khan had his stronghold at Patna and Hajipur. It was only after a fierce fight that the Mughals defeated Daud Khan. After the fall of the Afghan king, a separate Subah of Bihar was constituted and placed under a Mughal Governor. Tirhut which included Vaishali formed part of this *Subah*. The chieftains who had helped the Emperor were rewarded with grants of *Jagir* in *Sarkar* Hajipur. They settled down with their retinue. With the transfer of the headquarters of the Governor from Hajipur to Patna, the former lost its importance.

British period

With the British victory at Buxar in 1764 Vaishali passed, with the rest of Bihar, under the British rule. After establishing their authority the English took steps to strengthen their hold. In the initial stages their chief interest was trade. In course of time, however, they emerged as rulers and succeeded in subduing the entire district. There was no event of great consequence in the district uptil the movement of 1857. The success of the insurgents at Delhi caused great concern to the English inhabitants in the district. In June, 1857 some of the soldiers (from amongst those who had revolted) came back home and became quite active. This caused considerable alarm to the European Community. The movement was ultimately crushed and the district remained undisturbed for quite some time.

The political awakening in the country in the period after the First World War stimulated nationalist movement in Vaishali district also. During the Non-Cooperation Movement, and later on during the Civil Disobedience Movement of 1930-31, the district responded widely to the call of Mahatma Gandhi. During the 'Quit-India Movement' in 1942, the district was in full fury. The district played a prominent role in the country's struggle for freedom.

Natural divisions

The district of Vaishali comprises an extensive plain formed by the alluvium brought by the Ganga, the Gandak and other rivers which flow through it. It lies on the south of the Burhi Gandak and is bounded by the Ganges on the South and the Gandak on the south-west. It is a plain with very few water-logged or low-lying tracts, highly fertile and well-suited for both food and cash crops.

Besides the large rivers such as the Ganges, the Gandak, the district has a few streams also. The most important river is the Ganga which touches the district at Terahrasia in Raghopur block, where it is joined by the Gandak. The river is about 1.6 kms. wide though in the rainy season it becomes much wider. Large stretches of sand may be seen in the river-bed except in the rainy season. The Ganga is navigable throughout the year. Country boats ply regularly between Hajipur and Patna.

The Gandak, which is also locally known as the Narayani or Saligrami, joins the main stream of the Ganga opposite Patna. The river has vast irrigation and power potentialities and the Gandak Project has been implemented for harnessing its resources.

Climatic conditions

Vaishali district generally enjoys a bracing and healthy climate with three well marked seasons—winter, summer and the rainy season. The first commences early in November and lasts till almost the end of March. Though the days begin to get hot in March, the nights and early mornings continue to be comparatively cool and pleasant. January is the coldest month when the mercury sometimes drops below 5°C. The hot weather commencing in April is ushered in by dust-storms. The heat is intense in the month of May and continues until the rains come. Clouds begin to gather in early June. Humidity increases and the rains set in towards the middle of June. Usually, there is a recess of a week or ten days between the first shower and the regular monsoon. The rainy season lasts till the end of September or the middle of October. With the cessation of rains the temperature falls and the climate becomes rather agreeable.

The district enjoys good rainfall with an annual average of 1168 mm. July and August are the rainiest months of the year and together they receive over 50 per cent of the total annual rainfall. The district also gets some winter rains. However, over 85 per cent of annual rainfall occurs during the monsoon months of June to September.

Flora and Fauna

The district is a large alluvial plain watered by the various rivers. It is rich in vegetation and its green fields are dotted with groves of mango, bamboo and other trees. The land being fertile, no area has been left for wild growth and the entire district is devoid of any forest. With the extension of cultivation, the growth of population, and extension of means of communication, wild animals have almost disappeared from the district. The only animals now seen in the district are foxes and jackals.

Among the birds seen in the district are the crows and *treepie*, the latter being yellowish in colour with patches of white and similar to *myna*. The common babbler, the *bulbul*, the Jhujenga or black drongo, the minivet, the common *myna*, the sparrow, *papiha*, the cuckoo, the barbet, the *nilkanth*, the green bee-eater, the blue-tailed bee-eater, the grass owl, the brown dove and the peewit are the other birds found in the district.

The district also abounds in fish, common among these being suiya, *hilsa*, *rewa*, *rohu*, *singhi*, *bachwa*, *tengra*, kewai, etc. Poisonous snakes found are the *gehuman* (cobra), *karait*, *lohiar*, *amaitar*, *patar*, etc. Among the snakes of non-poisonous variety are the *awaria*, *dhorah* and *dhamin*.

Crocodiles are occasionally seen in the Gandak and the Ganga.

Mines and Minerals

The entire district is formed of alluvial soil but the soil is dark in colour, with greater content of sand and mineral salts.

No mineral of any economic importance is found in the district.

Land-use pattern

The district is basically agricultural in character. The soil of the district is highly calcareous. The different varieties of soil found in the district are sandy, loamy, light clayey and *usar*. Paddy is grown mostly on clayey soil which is known locally as *mathiyari*. Sandy loam, which is known as *balsundari*, is particularly suited for *rabi* cultivation.

Rice, maize and wheat are the main crops of the district. Sugar-cane, tobacco, potato are the cash crops grown in the district. The district headquarters, Hajipur is famous for the very good varieties of banana produced here. It is exported to other places also.

In Hajipur area the cultivation of vegetables and fruits is now being done on scientific lines and their production has gone up considerably. Introduction of good grafts has helped the growers in producing better varieties of fruits and this has augmented the earning of the cultivators considerably.

Irrigational facilities

The soil of the district is capable of retaining moisture. It is considered to be one of the most fertile districts in Bihar. Formerly the cultivators did not find it necessary to obtain water for the fields from large irrigation works. But on account of falling production of food crops, deficit in food grains and the increasing pressure of population the need for assured irrigation has been keenly felt.

After independence, considerable attention has been paid to implementation of various irrigational projects. A number of Medium Irrigation schemes, Minor Irrigation schemes, Open borings, irrigation wells and tube wells have been introduced in the district during the different plan periods.

Industrialisation

In contrast to the decline of indigo and saltpetre there has been a great expansion of the cultivation of sugar-cane and in the working of the Sugar factories. There is a big sugar factory located at Goraul. Tobacco industry is also important in the district, and a few units are located at Mahnar. Mahesh Glass Works at Hajipur is the main glass factory in the district and is engaged in the manufacture of bangles, jars, tumblers and other articles and the bulk of the output is consumed locally. There are also a number of small scale industries in the district and the bulk of these industrial establishments relate to black smiths and potters, who play important roles in the rural-*cum*-agricultural economy of the district.

There is no heavy industry in the district. The completion of the road bridge on the Ganga has improved the prospects of industrialization of the district immensely. An industrial area is being developed by the State Government and it is expected that some industrial units will come up soon.

Live stock

The general condition of livestock is fair. The development of the breed of cattle and buffaloes is essential for agricultural activities and availability of adequate quantity of milk. There has been a concerted effort on behalf of the State government to tackle this problem. The All India Key Village scheme sponsored by Government of India is in operation in the district. The scheme aims at improving the general efficiency of the cattle by adopting scientific methods of breeding, feeding, disease control and marketing. Selected bull-calves are reared in the key village for distribution after maturity for the purpose of upgrading. In order to improve the breed of cattle quickly and also at low cost, artificial insemination centres with sub-centres have been opened in the district. Distribution of frozen semen has also been introduced in the district.

There are a number of veterinary hospitals and dispansaries spread over the entire district. Treatment, prevention and suppression of diseases of the livestock are the main functions of the veterinary institutions.

Cattle shows are sometimes organised and prizes in cash or kind are awarded with a view to encouraging the local breeders.

Communication facilities

The district has well developed means of communication. It has a net work of railways and well maintained roads. Country boats also ply in the larger rivers.

During the British period itself, the English rulers realised the importance of developing assured means of communication as they were interested in securing proper trade routes. With the advance of trade and commerce, road traffic increased and the need for more and better roads were felt. After independence, the Public Works Department of the Government took up road building in the district. Prior to this, the District Board and other local bodies were primarily concerned with the maintenance of roads within the district.

The district is well served by railway. The lines running in this part are—

i) Hajipur—Muzaffarpur—Samastipur Trunk line. This enters the district after crossing the Gandak near Hajipur.

ii) The Chord Line between Hajipur and Bachwara. The Gandak remains navigable throughout the year.

Grains and other commodities are carried by boat on this river.

There is a landing ground at Hajipur which is meant only for small aircraft.

Trade and commerce

Vaishali is mainly an agricultural district with the bulk of its population engaged in agriculture. Trade and industry depend to a great extent on communication facilities. The district is fairly well connected by rail, road and river.

The main exports from the district are tobacco, banana, *lichi* and mango. Bananas from Hajipur are exported to Bengal, Uttar Pradesh and a few other parts of the country. The main imports are machine parts for manufacture of cloth and items of common use.

Mahnar has considerably improved its trade and commerce due to its location on the bank of the Ganges. Besides the markets in the township, a good deal of trade is cleared through the *melas* and fairs of the district.

Electricity and Power

The district receives its entire power supply from the Bihar State Electricity Board. All the 3 towns of the district have electricity. In rural areas, however, the pace of electrification is comparatively slow. However, the Government is trying to extend electric line to the maximum number of villages by implimenting various schemes for rural electrification.

Social and Cultural events and Natural and Administrative Development.

Hajipur subdivision of the old district of Muzaffarpur was upgraded and acquired the status of an independent district on 2nd October, 1972 consisting of 11 development blocks, viz., Hajipur, Lalganj, Vaishali, Goraul, Mahua, Patepur, Jandaha, Mahnar, Sahdai Buzurg (Desari), Bidupur and Raghopur. The 3 towns contained in the district are Hajipur(M), Lalganj(M) and Mahnar Bazar(M).

No major social or cultural event has taken place in the new district of Vaishali since it came into existence. Fairs and festivals are however, held regularly in the district by different communities in complete harmony.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Balu Karam

It is an ancient village in Vaishali block, situated on the Hajipur-Vaishali road, 30 Kms. north of Hajipur. The sixth World Buddhist conference was held here.

2. Ramchaura

The place is situated in Vaishali block where a *mela* is held every year on *Ramnavmi* day. The local tradition has it that Lord Ramchandra had halted here for a bath on his way to Janakpur. There are some marks on stone which are said to be his foot-prints.

3. Konhara

A *ghat* at the confluence of the Gandak and the Ganges in Hajipur block. It is traditionally believed to be the place where the mythical elephant was caught by a crocodile and Lord Vishnu got it released.

4. Jandaha

The village, which is situated about 7 kms. from the railway station at Mahnar, is the headquarters of the block bearing the same name. The village contains a *mazar* of Hazrat Saheb Saib, said to be about 400 years old.

5. Vaishali

The village is the headquarters of the block of the same name and is situated at a distance of 32 kms. north-west of Hajipur. It is said to be the birth place of Mahavir, the 24th *Tirthankar* of Jainism. It was visited by Lord Buddha thrice and was the site of the second great Buddhist council. Lord Rama on his way to Janakpur had spent a night here as the guest of the King of Vaishali. Many seals and coins of the Gupta period have been found here. The remains of a huge mound known locally as the fort (*garh*) of Raja Vishal are also found here.

Vaishali Museum has been built by the Vaishali Sangh at Chak Ramdas. There is a valuable collection of the local finds made through community efforts.

6. Hajipur

It is a municipal town situated on the eastern bank of the Gandak at a short distance above its confluence with the Ganga, opposite Patna. It is the chief town and the headquarters of the Vaishali district. Haji Illyas *alias* Shamsuddin Illyas, the king of Bengal is reported to have founded this town.

It is believed that Lord Ramchandra passed through Hajipur on his way to Mithila. Lord Buddha also passed through this place. During Muslim rule Hajipur was an important place and there are several old mosques in the town.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new statement of civic and other amenities for each area/locality identified as slum in class I and II towns has been added. The information in this regard was collected in the year 1979. Since none of the towns of Vaishali district in that year qualified as class I and class II, the details of slum was not collected from the district at all, though as per the 1981 Census Hajipur (M) now falls in class II range. Statement IV-A relating to slum has, therefore, not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers,

marginal workers and non-workers by sex in respect of each village and each urban ward/circle. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana Jurisdiction List pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies.

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000
(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.
(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion.

Towns are further classified into the following six classes according to their population size :

Class of Town	Population
I	1 lakh and above (termed as city)
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341(1) and 342(1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district).
6. Chamar, Mochi

A. Scheduled Castes—*concld.*

7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district).
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Vaishali, with a population of 1,662,527 persons is divided into 11 Community Development Blocks consisting of 1,399 inhabited villages (out of a total of 1,638 villages including 69 villages which are the constituent units of towns in the district) and 3 towns. With 2.38 per cent of the total population of the State comprised within it, the district ranks 25th in the State in order of population. The following table highlights the population, number of villages and towns for the district as also for its various development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of Villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Hajipur	200,587	103,253	97,334	138,067	69,522	68,545	62,520	33,731	28,789	265	170	1
2	Lalganj	203,846	102,437	101,409	184,311	92,359	91,952	19,535	10,078	9,457	177	159	1
3	Vaishali	138,628	68,025	70,603	138,628	68,025	70,603	...	...	...	165	160	...
4	Goraul	177,306	88,164	89,142	177,306	88,164	89,142	...	...	...	173	160	...
5	Mahua	186,325	92,180	94,145	186,325	92,180	94,145	...	...	...	189	179	...
6	Patepur	170,263	84,267	85,996	170,263	84,267	85,996	...	...	...	143	138	...
7	Jandaha	147,400	73,389	74,011	147,400	73,389	74,011	...	...	...	143	132	...
8	Mahnar	98,458	49,321	49,137	72,790	36,306	36,484	25,668	13,015	12,653	70	52	1
9	Sahdai Buzurg (Desari).	105,937	51,921	54,016	105,937	51,921	54,016	...	...	...	109	90	...
10	Bidupur	131,462	66,531	64,931	131,462	66,531	64,931	...	...	...	133	106	...
11	Raghopur	102,315	54,144	48,171	102,315	54,144	48,171	...	...	...	71	53	...
	Total	**1,662,527**	**833,632**	**828,895**	**1,554,804**	**776,808**	**777,996**	**107,723**	**56,824**	**50,899**	**1,638**	**1,399**	**3**

It would be seen from the above table that among the C.D. Blocks, the range of variation in the distribution of population is quite significant. Lalganj block with 12.26 per cent of the population of the district occupies the first place followed by Hajipur block with 12.07 per cent. Significantly it may be observed that both the above development blocks contain towns, the former includes Lalganj (M) and the latter Hajipur (M), the district headquarters. The least populated C.D. Block is Mahnar with only 5.92 per cent of the population of the district probably because it contains only 52 inhabited villages (3.72%) which is the minimum among all the C.D. Blocks in the district.

The average population of a development block in the district is 151,139 which is higher than the average population of a development block in Bihar (119,105). As many as 5 development blocks out of 11 or 45 per cent of the total, have higher population

than the average indicated above. Together they contain as much as 56 per cent of the total population of the district.

Vaishali, which has been carved out of the old Muzaffarpur district, appears to have had less impact of urbanisation since 93.52 per cent of the population lives in the villages as against the State break-up of rural and urban population of 87.53 and 12.47 per cent respectively. The total urban population contained in 3 towns is of the order of only 6.48 per cent of the population of the district. None of the 3 towns falls in class I range (population 1 lakh and above). Only Hajipur (M) falls in class II range (50,000-99,999). The district does not have any urban agglomeration.

Decadal change in population

Vaishali acquired the status of a district only after the 1971 Census. In fact the subdivision of Hajipur in the old Muzaffarpur district as such formed the new district of Vaishali. The percentage increase in the population of the district and its development blocks is presented in the table given below :

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Hajipur	151,685	109,795	41,890	200,587	138,067	62,520	+32.24	+25.75	+49.25
Lalganj	166,280	150,482	15,798	203,846	184,311	19,535	+22.59	+22.48	+23.65
Vaishali	114,496	114,496	...	138,628	138,628	...	+21.08	+21.08	...
Goraul	148,501	148,501	...	177,306	177,306	...	+19.40	+19.40	...
Mahua	149,065	149,065	...	186,325	186,325	...	+25.00	+25.00	...
Patepur	138,836	138,836	...	170,263	170,263	...	+22.64	+22.64	...
Jandaha	121,142	121,142	...	147,400	147,400	...	+21.68	+21.68	...
Mahnar	79,153	59,200	19,593	98,458	72,790	25,668	+24.39	+22.96	+28.64
Sahdai Buzurg (Desari)	89,197	89,197	...	105,937	105,937	...	+18.77	+18.77	...
Bidupur	102,279	102,279	...	131,462	131,462	...	+28.53	+28.53	...
Raghopur	88,356	88,356	...	102,315	102,315	...	+15.80	+15.80	...
Total	1,348,990	1,271,349	77,641	1,662,527	1,554,804	107,723	+23.24	+22.30	+38.74

It would appear that the rise in the population of this district during the 1971-81 decade has been of the order of 23.24 per cent which is slightly less than the decadal growth rate of 24.06 per cent for the state. The rural population in the district has increased by 22.30 per cent while the urban population growth over the decade has been 38.74 per cent.

Another notable feature discernible from these data is that the growth rates amongst various C.D. Blocks do not show a unifrom pattern. Hajipur block has registered the highest growth rate of 32.24 per cent probably because Hajipur town, the district headquarters is located in this block. This is followed by Bidupur and Mahua blocks with 28.53 and 25.00 per

cent growth rates respectively The lowest growth rate has been observed in the case of Raghopur block with only 15.80 per cent decadal increase in population. Growth rates in the remaining 8 development blocks have varied between 18 and 25 per cent.

The increase in the rural population during the last decade has been the highest in the case of Bidupur block (28.53%) followed by Hajipur block (25.75%).

As regards the growth of urban population, Hajipur block obviously occupies the first position with 49.25 per cent, since Hajipur town, the district headquarters is situated in this block.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups:

Table 3 : Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
— 200	223	15.94
200 — 499	287	20.51
500—1,999	687	49.11
2,000—4,999	169	12.08
5,000—9,999	28	2.00
10,000+	5	0.36
Total	**1,399**	**100.00**

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499. Medium size villages (500—1,999) thus account for as much as 49.11 per cent of the total number of inhabited villages in the district. The large villages (2,000—4,999 and 5,000—9,999) constitute only 14.08 per cent of the inhabited villages whereas very large villages (10,000 and above) from an insignificant proportion with only 0.36 per cent of total number of inhabited villages in the district. As per 1981 Census, the average population size of an inhabited village in the district of Vaishali works out to 1,111 which is higher than the State average of 906.

Villages classified by density

The density of population is defined as the number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq.Km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
— 10	8	0.57
11 — 20	6	0.43
21 — 50	6	0.43
51 —100	23	1.65
101 —200	35	2.50
201 —300	40	2.86
301 —500	134	9.58
501 +	1,144	81.77
Not known	3	0.21
Total	**1,399**	**100.00**

The data presented in the above table highlight the fact that the maximum proportion of villages in the district lie in the density range of 501 and above with 81.77 per cent followed by villages falling in the density range of 301—500 with 9.58 per cent. Interestingly, it may be observed that the proportion of villages in the district varies in direct relation to the density range implying thereby that the density of population in the villages is generally high.

Proportion of Scheduled Castes/Tribes population in Villages and Towns.

Tables 5, 6 and 7 furnished on next page indicate the proportion of the population of the Scheduled Castes and the Scheduled Tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and the Scheduled Tribes at micro level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	239	17.08
5 or less	104	7.43
6—10	120	8.58
11—15	184	13.15
16—20	199	14.23
21—30	290	20.73
31 and above	263	18.80
Total	**1,399**	**100.00**

It is discernible from the table that there are as many as 263 villages accounting for 18.80 per cent of the inhabited villages, where the percentage of Scheduled Caste population to the total population is more than 31 per cent and there are 239 villages (17.08%) which do not have any population of the Scheduled Castes at all. The maximum number of inhabited villages having Scheduled Caste population lies in the percentage range of 21—30 (20.73%) followed by the percentage range of 31 and above (18.80%).

Table 6—Proportion of Scheduled Tribes population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,367	97.71
5 or less	*27*	*1.93*
6—15	5	0.36
16—25	...	...
26—35	...	...
36—50	...	...
51 and above	...	...
Total	**1,399**	**100.00**

It will be seen from the above table that the dispersal of the Scheduled Tribe population is not on the same pattern as that of the Scheduled Caste population. As many as 1,367 inhabited villages out of 1,399 (97.71%) in the district have no Scheduled Tribes at all. There are only 32 villages comprising 2.29 per cent of the total number of inhabited villages which have a population of Scheduled Tribes. Even in these villages the Scheduled Tribes account for only 15 per cent of the total population or even less.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in the towns

Name of the town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6
Hajipur	62,520	11,405	11	18.24	0.02
Lalganj	19,535	2,735	47	14.00	0.24
Mahnar Bazar	25,668	4,917	...	19.16	...
All towns	**107,723**	**19,057**	**58**	**17.69**	**0.05**

The table above indicates that the proportion of the Scheduled Caste population in the towns of Vaishali district is of the order of 17.69 per cent of the total population as against 19.51 per cent in rural areas (Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and the predominantly rural base of the economy of the district. The highest proportion of Scheduled Caste population (19.16%) is contained in Mahnar Bazar town. The urban content of the population of the Scheduled Tribes is nil in the case of Mahnar Bazar town whereas in the other two towns it is almost negligible.

Literacy rates by population ranges of villages and towns.

According to the Census terminology a person who was able to read and write in any language with understanding was treated as literate. While Table 8 below gives the literacy rates of the villages classified by population ranges, Table 9 shows literacy rates of the towns in the district. The tables have been presented and discussed separately :

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	223	22.10
200—499	287	24.88
500—1,999	687	24.68
2,000—4,999	169	24.81
5,000—9,999	28	23.87
10,000+	5	24.32
Total	**1,399**	**24.59**

It would be seen from the table above that literates form 24.59 per cent of the total population in the rural areas of the district as against 39.50 per cent in the urban areas (Table 9). The proportion of literates in villages falling in different population ranges is not very uneven. The highest literacy rate is observed in the case of 288 villages falling in the population range of 200—499, being 24.88 per cent followed be 169 villages (24.81%) falling in the population range 2,000—4,999. There are 223 villages in the population range below 200 where the literacy rate is the minimum in the district, being only 22.10 per cent.

Table 9—Literacy rates for towns

Name of Town	Literacy rate
1	2
Hajipur	42.33
Lalganj	41.69
Mahnar Bazar	30.94
All Towns	**39.50**

Among the towns, Hajipur, the district headquarters, has the highest proportion of literate population (42.33%). Lalganj town is also catching up with 41.69 per cent literacy rate. Mahnar Bazar is, however, lagging behind with only 30.94 per cent as literate population.

It is actually the poor performance of rural areas which is responsible for pulling the district downward in the overall assessment of literacy.

Workers and Non-workers in rural and urban areas of the district.

The table on next page deals with the percentage break up of literates, main workers, marginal workers, total workers, non-workers and the number of the scheduled castes and the scheduled tribes in the rural and urban areas of the district as well as in its various development blocks in relation to the total population.

Table 10—Literates, Workers, Non-workers, Scheduled Castes

Workers in the district of Vaishali account for 26.22 per cent of the total population whereas the proportion of non-workers is as high as 73.78 per cent. Main workers (i.e. those who had worked for 6 months or 183 days or more during the reference period of 1 year) constitute 25.24 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of the marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 0.98 per cent. The same trend can be observed in both the rural and urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of the total workers and main workers is 46.55 and 45.85 per cent respectively for males as against 5.77 and 4.51 per cent for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (1.26%) vis-a-vis male marginal workers (0.70%) in the district. It may be due to the fact that, apart from household activity, the females do some work on part time basis to augment the household income.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (26.24%) than in the urban areas (25.93%), though the difference is very marginal. The same pattern is perceptible in the case of marginal workers who constitute 1.01 per cent of the rural population but only 0.51 per cent of the urban population. This may be due to the fact that in the rural areas people generally find easy employment in various agricultural activities, whereas in the urban areas, household industries and other works do not offer equal short-term job opportunities due to limited urban development.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/ *hat*	Communi-cations	Approach by *pucca* road	Power supply

11	Raghopur	53	39(73.58)	10(18.87)	53(100.00)	8(15.09)	1(1.89)	23(43.40)	1(1.89)	...
	Total	**1,399**	**881(62.97)**	**219(15.65)**	**1,399(100.00)**	**193(13.80)**	**151(10.79)**	**355(25.38)**	**368(26.30)**	**571(40.81)**

Educational amenity—There are as many as 881 villages accounting for 62.97 per cent of the total number of inhabited villages (1,399) in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Raghopur(73.58%) followed by Bidupur and Jandaha blocks with 71.70 and 70.45 per cent villages respectively having educational facilities. The lowest proportion of villages having educational facility is in Hajipur Block with only 50.00 per cent such villages.

Medical amenity—The availability of medical amenity in the villages is considerably low as only 15.65 per cent of inhabited villages have got it. A development blockwise break up shows that Vaishali block has the largest proportion of villages with medical facility, the percentage being 36.25 followed by Bidupur with 29.25 per cent. Mahua block, on the other hand, has the least number of villages (4.47%) where any kind of medical facility is available.

Drinking water—It would be seen from the table that driking water facility is available in all the inhabited villages of the district of Vaishali.

Post and Telegraph—Postal facilities (Post & telegraph) are available only in 193 villages (13.80%) out of a total of 1,399 villages in the district. Jandaha block has the maximum number of villages having post and telegraph facility (19.70%), followed by Bidupur (17.92%) and Sahdai Buzurg (Desri) (17.78%). In the remaining development blocks of the district the proportion varies from a minimum of 8.24 per cent in Hajipur block to a maximum of 17.31 per cent in Mahnar block.

Market/hat—The villages where market/*hat* is held constitute only 10.79 per cent of the total number of inhabited villages in the district. Sahdai Buzurg (Desari) has the maximum number of villages where market/*hat* is held, the percentage being 17.78 followed by Goraul block with 16.88 per cent. Interestingly, it may be seen from the table that there are 6 such blocks in the district viz., Hajipur, Mahua, Jandaha, Mahnar, Bidupur and Raghopur where market/*hat* is held in less than 10 per cent of the villages which suggests that people of quite a good number of villages have to go to different places in order to avail of this facility.

Communication—The details of villages connected by bus, rail, navigable river/canal services etc. have been incorporated in the Village Directory.

Only 25.38 per cent of the total number of inhabited villages in the district are connected by one means of communication or the other. The majority of villages still do not have this facility. Raghopur block has the highest proportion of villages (43.40%) which are connected by bus or rail or navigable river/canal services etc. followed by Jandaha and Bidupur blocks respectively with 42.42 and 34.91 per cent of villages having one mean of communication or the other. In the remaining blocks the proportion of villages having this facility varies between 13.77 per cent in Patepur block and 28.30 per cent in Lalganj block.

Approach road to village—With only 26.30 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Lalganj with 42.14 per cent villages having *pucca* approach roads tops the list. Raghopur block, on the other hand, has the lowest number of villages having this facility, the percentage being only 1.89.

Generally, it is seen from the table that communication facilities have direct relation with the facility of *pucca* approach road as the development blocks where larger number of villages have *pucca* approach roads have sizeable number of villages enjoying communication facility, the exception being Raghopur block where the situation is just the reverse. Here, though the block has the maximum number of villages enjoying communication facility the number of villages having *pucca* approach road facility is the lowest. This is probably due to the fact that Raghopur block enjoys maximum communication facility through navigable waterway since it is situated just on the bank of the Ganga as well as the Gandak rivers.

Power supply—Electrified villages in the district constitute 40.81 per cent of the total number of inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

38
16

A development blockwise break up shows that Bidupur block occupies the first position having the maximum proportion of electrified villages (82.08%) followed by Lalganj and Mahnar blocks with 55.97 and 50.00 per cent villages respectively having this facility. The lowest proportion of villages having power supply is observed in the development block of Jandaha (23.48%). Raghopur block does not have power supply facility in its villages.

Proportion of rural population served by various amenities.

While Table 11 furnishes details regarding the number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rural population served by these amenities.

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Hajipur	138,067	80.52	22.95	100.00	28.63	12.80	30.71	38.54	66.20
2	Lalganj	184,311	85.20	22.83	100.00	35.47	26.70	41.82	58.07	66.01
3	Vaishali	138,628	86.92	56.72	100.00	31.13	36.86	39.83	41.63	63.32
4	Goraul	177,306	82.90	33.48	100.00	33.29	29.10	20.38	25.21	50.60
5	Mahua	186,325	84.19	13.23	100.00	28.59	25.34	31.14	34.14	51.09
6	Patepur	170,263	80.59	17.61	100.00	31.99	15.59	15.71	19.06	39.54
7	Jandaha	147,400	89.02	26.66	100.00	39.26	14.46	48.14	41.20	39.87
8	Mahnar	72,790	90.34	25.34	100.00	40-08	17.31	34.32	45.57	75.16
9	Sahdai Buzurg (Desari)	105,937	91.55	17.32	100.00	40.47	32.07	43.94	55.36	63.10
10	Bidupur	131,462	93.55	50.70	100.00	35.67	12.59	39.39	41.73	92.28
11	Raghopur	102,315	96.69	51.72	100.00	51.20	5.48	59.84	2.49	...
	Total	**1,554,804**	**86.55**	**29.72**	**100.00**	**34.99**	**21.44**	**35.45**	**36.58**	**54.97**

It would be seen that educational facility is available to 86.55 per cent of the rural population in the district. It may be seen that the proportion of rural population served by educational facility is more than 80 per cent in various development blocks in the district, the maximum being in the case of Raghopur block (96.69%). Another noteworthy point is that the proportion of villages in the district enjoying educational facility is much less (being 62.97 per cent vide Table 11) than the proportion of population, which avail of this facility, the percentage being 86.55. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In the case of medical facility also it may be seen that the proportion of rural population served is almost double the proportion of villages having medical facility.

Similar trend can be observed in respect of other amenities also both in the district and in the various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table on next page furnishes the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms. and 10+ Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of			
	—5 Kms.	5-10 Kms.	10+ Kms.	Total
1	2	3	4	5
Education	515	3	...	518
Medical	905	214	61	1,180
Drinking water	...	...	...	...
Post and Telegraph	1,036	146	24	1,206
Market/*hat*	970	216	62	1,248
Communication	718	266	60	1,044

As regards educational facility it would be seen that there are only 518 villages out of 1,399 inhabited villages (37.03%) in the district which do not have educational facility within but the facility is available at places situated within 5 Kms., 5—10 Kms. and also beyond 10 Kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 Kms. is 515 (36.81%) and that of villages having such facilities within a distance of 5—10 Kms. is only 3 (0.21%) whereas the number of villages having these facilities at a distance beyond 10 Kms. is nil. The number of villages having other facilities within a distance of 5—10 Kms. and 10+ Kms. is less than those having the facilities within 5 Kms. though not in the same proportion. One may observe that people in most of the villages do not have to travel for more than 10 Kms. to avail themselves of various facilities.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different types of facilities by distance from the nearest town in five distance groups :

Table 14—Distribution of villages according to the distanee from the nearest town and availability of different amenities.

Distance range from the nearest town (in Kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Talegraph	Market/ *hat*	Comunica-tion	Approach by *pncca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0— 5	86	55(63.95)	10(11.63)	86(100.00)	15(17.44)	13(15.12)	26(30.23)	26(30.23)	41(47.67)
6—15	494	301(60.93)	88(17.81)	494(100.00)	54(10.93)	50(10.12)	137(27.73)	146(29.55)	228(46.15)
16—50	811	521(64.24)	119(14.67)	811(100.00)	122(15.04)	87(10.73)	190(23.43)	192(23.67)	299(36.87)
51+	8	4(50.00)	2(25.00)	8(100.00)	2(25.00)	1(12.50)	2(25.00)	4(50.00)	3(37.50)
Unspecified	...	...	...	...	...	...	...	...	...
Total	**1,399**	**881(62.97)**	**219(15.65)**	**1,399(100.00)**	**193(13.80)**	**151(10.79)**	**355(25.38)**	**368(26.30)**	**571(40.81)**

It would appear from the above table that the maximum number of inhabited villages lie in the distance range of 16-50 Kms. (57.97%) from the nearest town. There are only 86 villages accounting for 6.15 per cent which lie in the distance range of 0—5 Kms. from the nearest town. With only 3 urban centres in the district and the position of the bordering districts being not very different such a situation is but natural.

It may further be observed from the table that the proportion of villages having educational facility is the highest in the distance range of 16—50 Kms. from the nearest town, the percentage being 64.24. In the case of medical, post and telegraph and *pucca* approach road facilities, however, the highest proportion of villages is found in the distance range of 51 Kms. and above from the nearest town, though the total number of inhabited villages itself is significantly low in this distance range with only 8 such villages. In the case of facilities of communications, power supply and *pucca* approach road, it is interesting to note that the proportion of villages decreases with the increase in the distance range from the nearest town except in the distance range of 51+ Kms. where the total inhabited villages itself is very low, being only 8 in number. It may be said that the villages which are nearer to urban areas have benefited in respect of the above three facilities viz., communication, *pucca* approach road and power supply. The majortiy of villages are, however, beyond the pale of direct urban influence. No particular trend emerges in the case of market/*hat* facility.

As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by the size-class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with Percentage) of villages having the amenity of— Education	Medical	Drinking water	Post and Telegraph	Market/ *hat*	Communi-cation	Approch by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
— 499	510	139(27.25)	26(5.10)	510(100,00)	8(1.57)	13(2.55)	96(18.82)	89(17.45)	125(24.51)
500—1,999	687	545(79.33)	112(16.30)	687(100.00)	78(11.35)	76(11.06)	173(25.18)	193(28.09)	319(46.43)
2,000—4,999	169	164(97.04)	60(35.50)	169(100.00)	79(46.75)	48(28.40)	64(37.87)	67(39.64)	105(62.13)
5,000+	33	33(100.00)	21(63.64)	33(100.00)	28(84.85)	14(42.42)	22(66.67)	19(57.58)	22(66.67)
Total	**1,399**	**881(62.97)**	**219(15.65)**	**1,399(100.00)**	**193(13.80)**	**151(10.79)**	**355(25.38)**	**368(26.30)**	**571(40.81)**

It may be seen from the table the maximum number of inhabited villages i.e. 687(49.11%) in the district fall in the population range of 500-1,999 followed by 510 villages (36.45%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5000+, being 33(2.36%) in number. It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range. Generally, the number of villages having different amenities have a population range of 5,000+ which further corroborates the fact that more facilities are generally available in larger villages than in the smaller ones.

Main Staple food in the Villages

The following table indicates that rice and wheat constitute the main staple food of the majority of the people in most of the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block.

Serial no.	Name of Development Block	Main staple food
1	2	3
1	Hajipur	Rice, wheat
2	Lalganj	Rice, wheat
3	Vaishali	Rice, wheat
4	Goraul	Rice, wheat
5	Mahua	Rice, wheat
6	Patepur	Rice, wheat
7	Jandaha	Rice, wheat
8	Mahnar	Rice, wheat
9	Sahdai Buzurg (Desari)	Rice, wheat
10	Bidupur	Rice, wheat
11	Raghopur	Rice, wheat

Villages according to land-use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land use

Sl. no.	Name of the Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Hajipur	170	12,520.42	80.80	30.40
2	Lalganj	159	22,194.13	79.64	41.79
3	Vaishali	160	19,973.62	82.52	22.67
4	Goraul	160	19,671.86	82.71	32.72
5	Mahua	179	19,549.03	85.86	29.59
6	Patepur	138	24,243.45	86.83	24.54
7	Jandaha	132	16,344.28	81.60	24.22
8	Mahnar	52	7,715.50	87.71	25.49
9	Sahdai Buzurg (Desari)	90	11,893.89	75.16	30.65
10	Bidupur	106	10,430.86	86.00	43.72
11	Raghopur	53	20,312.23	69.53	19.05
	Total	**1,399**	**184,849.27**	**81.43**	**29.21**

It would be seen from the table that 81.43 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this only 29.21 per cent is irrigated. Among the C.D. Blocks, the highest proportion of cultivable area is observed to be in Mahnar block with 87.71 per cent cultivable area closely followed by Patepur and Bidupur blocks with 86.83 and 86.00 per cent respectively. The lowest cultivable area is found in Raghopur block with 69.53 per cent of land brought under cultivation.

The highest proportion of irrigated area to the total cultivable area is observed in the case of Bidupur block accounting for 43.72 per cent closely followed by Lalganj block with 41.79 per cent. The proportion of irrigated area is found to be the lowest in Raghopur block (19.05%). It indicates that though government has taken up different projects to provide irrigational facilities still considerable portion of cultivable area is deprived of required irrigational facilities inspite of having adequate potentiality for cultivation.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State :

Table 18 —Growth, density and sex-ratio of urban population in the district in relation to the state

Census year	District						State					
	Total population	Urban Population	Percentage Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	Percentage Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	942,472	47,757	4.96	+48.70	976	1,031	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,133,086	58,141	5.13	+24.35	1,388	957	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,348,590	77,641	5.76	+33.54	2,069	921	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	1,662,527	107,723	6.48	+38.74	2,871	896	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district is 107,723 comprising 6.48 per cent of the district population. The corresponding percentage of urban population for the State is 12.47. The rate of urbanisation of the district has apparently not kept pace with that of the State. The rise in the proportion of the urban population in the district of Vaishali has been rather tardy over the decades, from 4.96 in 1951 to 6.48 in 1981 as against the state figures of 6.77 per cent in 1951 and 12.47 per cent in 1981.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. The decadal growth in the urban population of the district has shown a slow rise over the decades except during the decade 1941-51 when it had registered a substantial increase of 48.70 per cent. This phenomenal rise was on account of the addition of Mahnar Bazar town to the urban area of the district in the year 1951. The trend of the growth of the urban population in the State has been slightly different. During the 1951-61 decade, the urban population growth was of the order of 49.03 per cent whereas during 1961-71 it dipped to 43.95 per cent. Again during 1971-81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade in the state in general.

The density of population in the urban areas of the district has shown a tremendous rise in the successive Censuses and has almost trebled itself in 30 years since 1951. It clearly indicates that towns of Vaishali district are becoming more crowded gradually on account of greater job opportunities, better educational and medical facilities available due to development taking place there. The density of the urban population of the state, on the other hand, had not been high till the 1971 Census. In 1981 Census, however, the density of the urban population of the State had shown a considerable increase having risen from 2,032 in 1971 to 2,727 which, however, is still lower than

that of Vaishali which stood at 2,871 persons per square Km.

Sex-ratio is determined by the number of females per 1,000 males. Though the sex-ratio of the urban areas of the district has all along been higher than that of the urban areas of the state, it has shown a downward trend over the decades. Except in 1951, the sex-ratio had always been adverse for females. The urban areas, in fact, still suffer from a shortage of females as the towns attract mainly the male population by way of employment opportunities. The female population continues to live mainly in the villages because the people having agriculture as the main occupation and their moorings in villages do not migrate as a complete family unit. Higher cost of living in the urban areas is another factor that discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There are 3 towns, viz., Hajipur (M), Lalganj (M) and Mahnar Bazar (M) in the district of Vaishali. In 1971 Census also the position was the same. No new town has been added in 1981 Census nor has any town been declassified. Hence table 19 has not been presented.

Receipt and expenditure in different towns

The table below gives the details of finance in the urban local bodies in terms of per capita receipt and expenditure:

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
II Hajipur (M)	19.55	4.30	15.25	22.95	1.77	15.36	3.94	0.04	1.84
IV Lalganj (M)	23.10	2.42	20.68	12.61	3.19	6.88	...	0.13	2.41
III Mahnar Bazar (M)	10.07	3.88	6.19	8.16	7.62	0.49	...	...	0.05
Total	**17.94**	**3.86**	**14.08**	**17.55**	**3.42**	**10.27**	**2.29**	**0.05**	**1.52**

It would be apparent from the above figures that the per capita receipt is the highest in the case of Lalganj (M) followed by Hajipur (M), the district headquarters. Going into further details, one observes that while receipt through taxes is the highest in the case of Hajipur (M), receipt through all other sources is the maximum in the case of Lalganj (M). Mahnar Bazar has recorded the lowest receipt on both the counts.

As regards per capita expenditure, Hajipur (M), being the district headquarters tops the list, while the per capita expenditure incurred on public health and conveniences and public works is the highest in the case of Hajipur town, the expenditure on general administration and other aspects is the maximum in the case of Mahnar Bazar and Lalganj towns respectively.

It appears that very little amount has been spent on public institutions in all of the towns of the district as the per capita expenditure on this count is almost negligible in the case of Hajipur and Lalganj towns and for Mahnar Bazar it is absolutely nil.

Schools per ten thousand population in towns

Facilities of primary and middle schools are generally available in all the towns. The following table gives details of the different categories of educational institutions per ten thousand population in different towns of the district.

Table 21—Schools per ten thousand population in towns.

Class, name and civic status of the town	Number per ten thousand population			
	Higher Secondary/ Inter/ PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
II Hajipur (M)	0.16	0.80	3.52	5.12
IV Lalganj (M)	...	1.02	4.61	2.05
III Mahnar Bazar (M)	...	0.78	0.78	3.90
Total	**0.09**	**0.84**	**3.06**	**4.27**

It would be seen from the table that institutions such as Higher Secondary/Inter/PUC/Junior College exist only in Hajipur town which has an average of 0.16 such institution per ten thousand population. As regards secondary/matriculation level schools there is 0.84 school per ten thousand population in the urban areas of the district. The average number of such schools per ten thousand population is the highest in the case of Lalganj (M), being 1.02. Junior Secondary/Middle Schools are, however, found to be the maximum in the case of Lalganj town (4.61) followed by Hajipur town (3.52). Hajipur has the highest number of primary schools in the district with an average of 5.12 such schools per ten thousand population. The average number of primary schools in the urban areas of the district works out to 4.27 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institution in the urban areas of the district :

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
II Hajipur (M)	1.76
IV Lalganj (M)	0.31
III Mahanar Bazar (M)	0.23
Total	**0.11**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 0.11. The availability of beds in the hospitals is the highest in the case of Hajipur (M), the district headquarters, having 1.76 beds per 1,000 population. The lowest number of beds is found to be in the case of Mahnar Bazar town with only 0.23 beds per 1,000 population.

Proportion of slum population in towns

The details of slums have been collected only in the case of class I and class II towns. Relevant information was collected through the local officials of the Municipalities, NACs, etc., as also through the Town Planning Department in 1979. None of the towns of Vaishali district in that year fell in either class I range (population 1 lakh and above) or class II range (50,000-99,999) hence table 23 has not been presented in this volume.

Important Commodities imported, exported and manufactured.

The table below lists the most important commodity manufactured, exported and imported in the 3 towns of the district :

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
II Hajipur (M)	Flour Mill stone	Mango	Grains
IV Lalganj (M)	Wooden articles	Wooden articles	Food grains
III Mahnar Bazar (M)	Kandi	Tabacco	Food grains

In Lalganj (M), wooden articles are the most important commodity manufactured in the town as also the most important commodity exported to other places. However, in the other two towns, the most important commodity manufactured and the most important commodity exported are not the same.

ALPHABETICAL LIST OF VILLAGES

ALPHABETICAL LIST OF VILLAGES

DEVELOPMENT BLOCK—HAJIPUR

Sl. no.	Name of village	Serial no. in VD/ PCA

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(—5 Kms.)', '(5—10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shcwn as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column. 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—

(a) Lands put to non-agricultural uses,

(b) Barren and unculturable lands.

3. Other uncultivated lands excluding fallow lands---

(a) Permanent pastures and other grazing lands,

(b) Lands under miscellaneous trees, crops and groves not included in the net area sown,

(c) Culturable wastes.

4. Fallow lands—

(a) Fallow lands other than current fallows,

(b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc. is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) Column 5—Educational

P	... Primary or Elementary School (upto class IV).
M	... Middle or Junior Secondary School (upto class VIII).
H	... Matriculation or Secondary School (upto class X).
PUC	... Higher Secondary, Intermediate, Pre-University, Junior College.
C	... College
I	... Industrial School
Tr	... Training School
Ac	... Adult Literacy Class/Centre
O	... Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.).

(ii) Column 6—Medical

H	... Hospital
MCW	... Maternity and Child Welfare Centre
MH	... Maternity Home
CWC	... Child Welfare Centre
HC	... Health Centre
PHC	... Primary Health Centre
PHS	... Primary Health Sub-centre
D	... Dispensary
FPC	... Family Planning Centre
TB	... T. B. Clinic
NH	... Nursing Home
RP	... Registered Private Practitioner
SMP	... Subsidised Medical Practitioner
CHW	... Community Health Worker
O	... Others

(iii) Column 7—Drinking Water

T	... Tap Water
W	... Well Water
Tk	... Tank Water
TW	... Tube-well Water
Hp	... Hand-pump
R	... River Water
F	... Fountain
C	... Canal
L	... Lake
S	... Spring
N	... *Nullah/Nala/Nallah*
O	... Others
NA	... Information Not Available

(iv) Column 8—Post and Telegraph

PO	... Post Office
TO	... Telegraph Office
PTO	... Post and Telegraph Office
Phone	... Telephone Connection

(v) Column 10—Communications

BS	... Bus
RS	... Railway Station
NW	... Navigable Waterway (including river, canal, backwaters, etc.).

(vi) Column 11—Approach to Village

PR	... *Pucca* Road
KR	... *Kutcha* Road
NR	... Navigable River
NC	... Navigable Canal
NW	... Navigable Waterway (other than river or canal).
FP	... Foot Path

(vii) Column 13—Power Supply

ED	... Electricity for Domestic purpose
EAg	... Electricity for Agriculture purpose
EO	... Electricity for Other purposes like industrial, commercial, etc.
EA	... Electricity for All purposes listed above.

(viii) Column 16—Irrigated by source

GC	... Government Canal
PC	... Private Canal
W	... Well (without electricity)
WE	... Well (with electricity)
TW	... Tube-well (without electricity)
TWE	... Tube-well (with electricity)
Tk	... Tank
R	... River
L	... Lake
Wf	... Waterfall
O	... Others

(ix) Column 20—Remarks

N	... Copies of Newspapers coming in the village.
M	... Motor Cycles/Scooters available in the village.
C	... Cars/Jeeps available in the village
T	... Tractors available in the village

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5,6 and 20. In such cases the number of such institutions/ amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Vaishali district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc. are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B) : 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—HAJIPUR

Serial no.	Name of village with Thana no.		Total area of the village (in hectares)	Total population and number of households	Amenities available [if not available within the village, a dash (-) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+kms., of the nearest place where the facility is available is given]

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) Physical aspects and location of towns, 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns; (IV-A) Civic and other amenities in Notified Slums; (v) Medical, educational, recreational and cultural activities and (vi) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix. Since in the district of Vaishali there is no outgrowth in any of the town. The appendix has not been prepared.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory as explained in the Village Directory section of this volume.

The details of the data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below.

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C.B.	...	Cantonment Board/Cantonment
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial

year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under:

Column 6—

PR	...	*Pucca Road*
KR	...	*Kutcha Road*

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	..	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap water
W	...	Well water
Tk	...	Tank water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in this district there is neither any Class I (Population 1 lakh and above) nor Class II (Population 50,000—99,999) town, statement IV-A relating to the slums does not find place in the present volume. This has already been explained in the "Analysis of Data" section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H(Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homeopathic)

HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all Categories—Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Type writing
Sh Type	...	Shorthand and Typewriting
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban|Village
Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to manual sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the Schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or Circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population the population of the, Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (Circles) in the case of urban areas. The concepts of villages, town' urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (Circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the

ascending order of their thana numbers which also represent their Location Code Numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
