(iv)	Map of Bangana Tahsil	
	List of villages arranged in alphabetical order of Bangana Tahsil	99—107
	Village Directory of Bangana Tahsil	108—133
Appendix I	Tahsilwise Abstract of Education, Medical and other amenities	134—135
Appendix II	Land utilisation data in respect of non-municipal towns (Census Town)	136
Appendix III	List of villages in each tahsil where no educational, medical, post and telegraph, day or days of market/hat, communication and power supply facilities are available	137—139
Appendix IV	List of villages according to proportion of scheduled castes and scheduled tribes population by ranges	140—157
	SECTION II—TOWN DIRECTORY	
	Introduction to different statements of Town Directory and detail of abbreviations used	161—163
Statement I	Status and Growth History	164—165
Statement II	Physical Aspects and location of towns, 1979	166—167
Statement III	Municipal Finance 1978-79	168—169
Statement IV	Civic and other amenities, 1979	170—171
Statement V	Medical Educational, Recreational and Cultural facilities, 1979	172—173
Statement VI	Trade, Commerce and Banking, 1979	174- 175
Appendix V	Towns showing their out growths with population	176
8	**Part B-Primary Census Abstract**	179
(i)	District	180—181
(ii)	Amb Tahsil	182—199
(iii)	Haroli Sub-Tahsil	200—205
(iv)	Una Tahsil	206—221
(v)	Bangana Tahsil	222—247
Appendix VI	Statement showing jurisdiction of enumerators block in the urban areas	248—249
9	**Primary Census Abstract for Scheduled Castes and Scheduled Tribes**	
(i)	Primary Census Abstract for Scheduled Castes	256—257
(ii)	Primary Census Abstract for Scheduled Tribes	260—261
Appendix VII	Blockwise total, scheduled castes and scheduled tribes population	262—263

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census The DCH is constantly referred to by planners, administrators, academicians and researchers It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town It also provides data on infrastructure and amenities in villages and towns, etc

The District Census Handbook series was initiated during the 1951 Census It contained important census tables and PCA for each village and town of the district During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA The 1971 DCH series was planned in three parts Part-A related to village and town directory, Part-B to village and town PCA and part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted At the same time, comparability with the 1971 data has also been kept in view All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development A few new items of information have also been introduced to meet some of the requirements of the revised Minimum Needs Programme Such new items of information as adult literacy centres, primary health sub centres, and community health workers in the village have been introduced in the village directory with this objective in mind The new item on approach to the village is to have an idea about the villages in the district which are inaccessible A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in ststement V are also added *inter alia* with this view A significant addition is class of town in all the seven statements of the town directory The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration The addition of the columns on civic administration status and population in a few statements also serves this purpose

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census

In order to avoid delay in publication of 1981 DCH series it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value The District and tahsil/police station/ C D Block etc , level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication

This publication is a joint venture of the State Government and the Census Organisation The data have been collected and compiled in the State under the direction of Shri K L Negi, the Director of Census Operations, Himachal Pradesh on behalf of the State Government which has borne the cost of printing The task of planning, designing and coordination of this publication was carried out by Shri N G Nag, Deputy Registrar General (Social Studies) of my office, Dr B K Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M M Dua, Senior Research Officer I am thankful to all who have contributed in this project

P PADMANABHA,
Registrar General, India

New Delhi,
the 26th April, 1982

PREFACE

The mass of data collected during 1981 Census has to be given timely concrete shape so that the utility of the data does not get minimised for the data users and this Handbook has been an endeavour towards that end

2 The District Census Handbook contains two parts Part-A deals with the Village and Town Directory and part-B gives broad socio-economic data of the people of the district The District Census Handbook begins with the analytical note This note by no means is an authoritative analysis about the district but it touches a broad gamut of historical, physical and socio-economic characters of the district just to acquaint a lay reader about the district In other words, analytical note basically intends to introduce the readers about district so that it helps in forming a background about the district

3 The information in Village/Town Directory has been collected through the Revenue Agency/Civic authorities at the grassroot level in the State which was cross checked from the other concerned implementing agencies Primary Census Abstract is the compilation of the data collected in the field in 1981 Census While Part-A provides glimpse of previous decade's progress, Part-B gives panorama of basic data on the socio-economic conditions of the people in the district

4 The District Census Handbook is not meant to be taken in for leisure reading It is rather a Biblical reference book for data users i e the administrators, the planners and the scholars for ti e next decade This District Census Handbook, while on the one hand, provides a broad glimpses of past decades socio-economic changes on the other, it serves a sort of benchmark for future action-plan for the Government

5 My colleagues and I shall feel amply rewarded if this book comes up to the expectation of our readers as single best source of objective information of an enduring value on this district

6 During the entire period of 1981 Census and subsequent compilation of data for this book, we had the honour of having constantly enlightened guidance and encouragement from Shri P Padmanabha, the Registrar General and the Census Commissioner, India which has enabled us to bring out this book in time But for his inspiration and personal interest it would not have been possible to timely complete this massive work

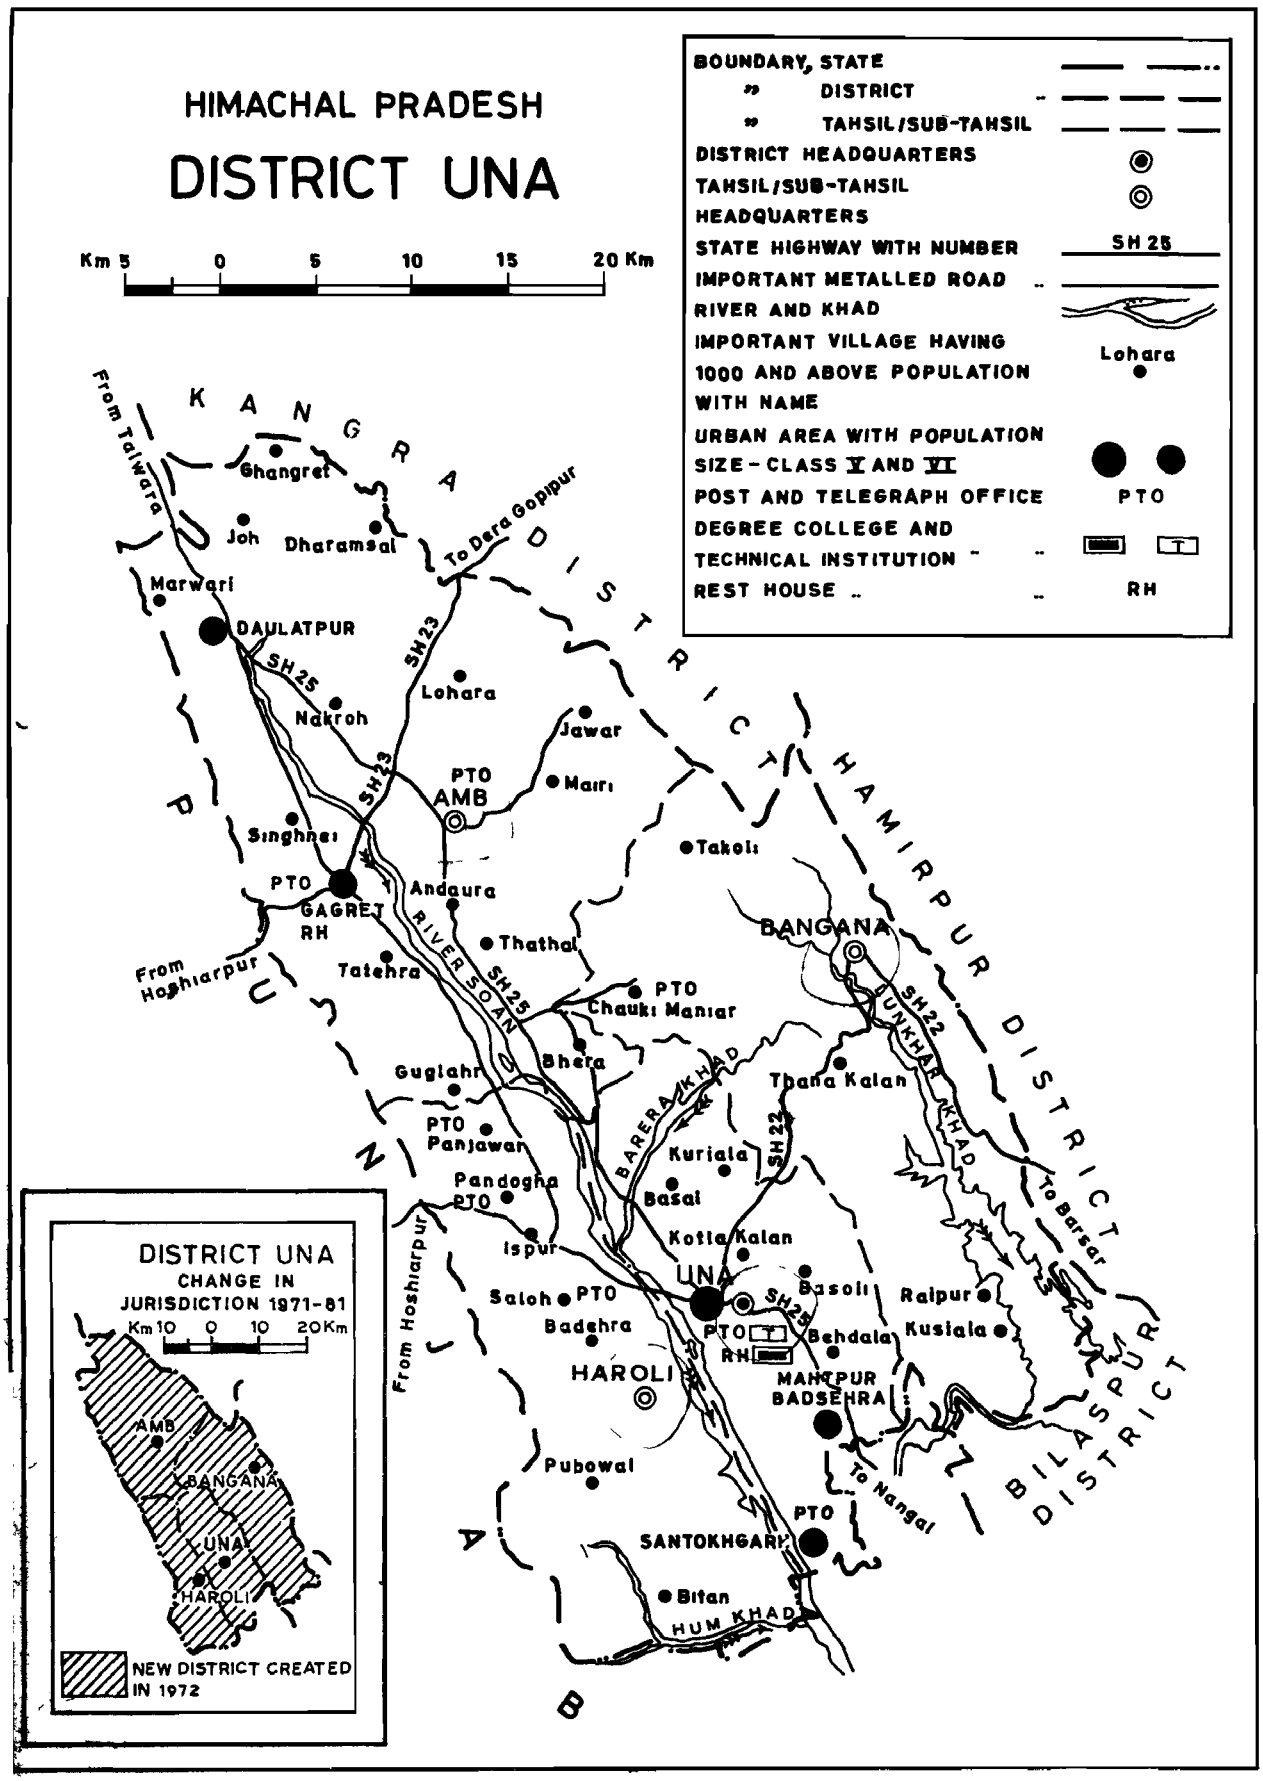

7 In anatomical completion of this book, efforts put up at various levels of the staff of this Directorate, the consolidated staff, vast number of the field enumerators, supervisors and other officials involved in 1981 Census deserve special mention and it is because of their unfailing hard work that we could achieve successful completion of this book I am undoubtedly grateful to them all

8 It indeed, was a rare opportunity for me to be associated as the author of this book I shall feel my endeavours suitably rewarded if the book proves useful to the readers

K L Negi
Director of Census Operations,
Himachal Pradesh

Shimla,
the 17th February, 1982

	Uninhabited		42
NUMBER OF TOWNS		47	5

ANALYTICAL NOTE

History – The present Una district until 1966 was one of the tahsils of the Hoshiarpur district in Punjab Consequent upon reorganisation of Punjab all the hill areas including Una tahsil which is east of outer Shivaliks was transferred to Himachal Pradesh in 1966 Eversince, until September, 1972 it continued to remain as tahsil of the then Kangra district On the Ist September, 1972 the Himachal Pradesh Government reorganised the then Kangra district into three districts namely Una, Hamirpur and Kangra, The present Una district consists of three tahsils of Bangana, Amb, Una and one sub-tahsil of Haroli which was carved out of the Una tahsil

2 It is believed that the present Una district was formally a part of the erstwhile Kangra State Bulk of the present Una district which is called as Jaswan Dun was ruled by the Katoch family of Kangra It is believed that the Jaswan State with a capital at Rajpura near Amb was founded by Purab Chand after Katoch family of Kangra state in 1170 AD Until then the Kangra state extended upto southern end of the Jaswan Dun Jaswan was the first off shoot of the Kangra state From Purab Chand to Umed Singh, 27 princes ruled the Jaswan State Not much is known about the state until the time of Akbar when it became subject to Mughal rule In between one or two unsuccessful rebellion apart it remained loyal to the Mughal empire and assisted the Mughals with contingents as and when required by them

3 On the decline of the Mughal empire and rise of Sikhs, the Jaswan state came under their dominance and was annexed to Ranjit Singh's kingdom in 1815 AD Ranjit Singh wanted Umed Singh of Jaswan state to attend the Assembly at Sialkot which he refused As a consequence, Ranjit Singh imposed fine on him which was beyond his capacity to pay With the result he abdicated his state and accepted a jagir of Rs 12,000 per annum Thus came the end of the Jaswan state which had lasted for about 600 years

4 In 1848 during the second Sikh War Umed Singh had joined revolt against the British which was successfully crushed and the Raja and his son deported to Almora where both died Slightly later on the request of Maharaja Gulab Singh of Jammu, Raja Umed Singh's grand son Ran Singh was permitted to return and was given jagir at Ramkot in Jammu which was held by the family for quite sometime But, in 1879 Ran Singh was restored his ancestral jagir at Jaswan originally held by Raja Umed Singh consisting of 21 villages in Jaswan Dun and also family garden at Amb as well as the building at Rajpura formerly the palace of Raja Umed Singh He died in 1892 and was succeeded by his son Raja Raghunath Singh who also died in 1918 Thereafter, Laxman Singh succeeded him who started residing at Amb

5 Apart from Jaswan state on the northern extreme was the state of Siba which also was the off shoot of the Kangra ruling family Eastern side of the present Una district was under the rule of Kuthlerias who were supposed to have migrated from Uttar Pradesh Thus, the present Una district comprises of Jaswan Dun which was ruled by Jaswal family and the eastern side of it was ruled by the Kuthleria family and the northern extreme by Siba family—an off shoot of Kangra ruling family

People — The greater part of the district is inhabited by Brahmins, Rajputs, Jats, Sainis, Bahtis and Gujjars The Brahmins, and Rajputs mainly dwell on landed property The Brahmins who own land mostly are around Amb Mainly, there are three divisions of Brahmins in the district The superior Brahmins comprise Saraswat and Kangra Raina Brahmins The second level comes Gaur Brahmins The third grade of Brahmins are the Bhatts There are sub divisions of Brahmins divided into various sub-groups like the Dak or Dakaut and Bhatra or Madho Brahmins and the third being Bazigars who are living on begging Similarly, the Rajputs have their own grades at the top of which come the Katoch, Guleria, Kuthleria, Jaswals etc The next grade comes of Salamians and below it Rathis

2 The majority of Khatris in the district are engaged in the money lending and trade and very few have landed property There are Sikh Khatris as well as the Hindu Khatris in the district

3 The population of the district appears to be largely migrants from Western Punjab (now Pakistan), Jammu and Rajasthan It is believed that the Oswals had migrated from Osia in Jaipur and some of the rajputs migrated from Marwar and the Khaudarwals are supposed to have come from Khandla village near Jodhpur The Mohammadan Gujjars are believed to have migrated from Jammu side The Gujjars mostly rear cattle and move from place to place in search of

pastures depending upon the season The sprinkling of other castes in the district are Dogars, Chahngs, Labanas, Kalals and Telis etc

Language — The people of Una district speak mainly Hindi and Punjabi But, the traditional language in the district slightly vary from place to place - like in Amb and Una tahsils the local language spoken is known as Pahari whereas in part of the Bangana and Una which formed former Kutlehar State speak Kuthleri or Pahari

Houses — Like some of the other parts of the state, the houses in the villages are of katcha mud with thatched roofs With the change of time pucca stone and concrete houses with corrugated sheets roofing are fast coming up in the villages and more predominantly in the urban areas Indeed, the quality of the house is indicative of the socio-economic conditions of the population

Food and Clothing — The principal staple food of the district is maize in winter and wheat and gram in summer Sarsoan is the most common vegetable in the entire district Butter milk is also very popular with the people and rather forms a staple drink of all the members of the family Meat is generally consumed by Rajputs and the Mohammadans, though, the other castes also have taken a liking for it more and more

2 The male clothing generally comprises of the pyjama or Dhoti covered over it with a shirt in summer, while in winter, a woollen sleevless or with sleeves coat is worn over and above the shirt and Dhoti The older generation often wear Pagri (turban) However, with the younger generation pants and cotton/terry-wool shirts are more popular

The women wear consist of a pair of pyjama (salwar) or Ghagra (petti coat) and a short coat (kurta) Chadar or the Dopatta covers the body over the shoulders This traditional dress, however, is fast dying down with the younger generation more given to salwar, kameej and Sarees

Physical Features —Una district is in the south western part of Himachal Pradesh It is bounded by Kangra, Hamirpur and Bilaspur district of Himachal Pradesh in the North, East and South by Hoshiarpur district of Punjab in the West Geographically it lies within North latitude 31°21′ and 31°50 and East longitudes 71°55′ and 76°28′ Nangal Dam is the nearest important broadgauge rail head

2 Una district covers an area of 1,550 sq km in Himalayan foothill zone bounded by plains of Punjab in the west and Solasinghi Dhar in the east In the western part also there is hill range whose maximum height is about 600 m The ranges tred in a general NW-SE direction and the area between these is a longitudinal valley of the Soan river The altitudes vary from more 350 m to over 1,200 m on the Solasinghi Dhar Siwalik ranges experience heavy rainfall The Soan river is itself a tributary of Sutlej river and the confluence is just South of Santokhgarh The hill ranges are covered by scanty vegetation comprising mostly of shrubs The breadth of Jaswan Dun valley ranges from 7 kms to 14 kms and the town of Una which is near the middle of the Dun is on the elevation of 1,404 ft above sea level

3 The sub-Himalayan hills commonly known as Solasinghi or Jaswan Dhar range commences near Talwara on the Beas where the river touches the district running south-east Its first 14 kms are in the Kangra district and its culminating ridge forms the borders between this district and Kangra Passing southwards, it increases steadily in width and elevation until its highest point reach at Bharwain which is 3,896 ft above sea level Here, the regular formations, a central range slopping in the series of undulating valley to the Beas on the one side and the Soan on the other changes its character The range still runs towards Sutlej, its north side submerging gradually into Beas valley, but on the south it has an abrupt fall of 200 and 300 ft and between the main range and the plains Jaswan Dun is a wide table land thickly wooded and apparently reveal to divide into natural blocks by numerous deep ravines This area, some 24 kms in length and 21 kms in width is thickly forested At the short distance south to Amb the Solasinghi range/Jaswan Dhar range recedes eastward ceasing to form the boundry of the district and the plains at this point form of kind of bay in the hills which is shut in by Solasinghi to the north east and on the south by another range commencing a few kilometres north of Una The later runs south in a series of undulating hills, of no considerably height, with an even front towards Jaswan Dun Across the Sutlej the range breaks into a series of parallel ranges, of no more height, but rocky and at places precipitous, though their slopes are well covered with grass and brush wood This range is separated from Solasinghi by Sutlej which for more 48 Kms runs northwards until it turns westwards into Jaswan Dun

4 While Una is bounded by the river Beas on the north and the river Sutlej in the east, the Soan river which is basically a seasonal flows right across the Jaswan Valley towards south until it submerges in the Sutlej near Anandpur The Soan river, indeed, is the life belt of the Jaswan Dun Valley which on its course receives innumerable tributaries both from left and right thereby abounds quick sand and is risky to cross when in spade

Geology — Alluvial fans, river terraces and gravel beds of recent age and the sandstone, Claystone and conglomerates belonging to Siwalik group are the main formations, in this area

The Siwalik comprises conglomerates, friable sandstone, siltstones and claystone Conglomerates are loose consisting mainly of cobbles and pebbles of quartzites and stray pebbles of granite limtestones, sandstones and lumps of claystones are also present The matrix, when present, consists of medium to coarse grained sand and at places of calcareous cement which imparts certain degree of hardness to the otherwise loose conglomerate beds They vary in thickness from 15 cm to 2 5m They do not show clear stratification and occur as wedge shaped or lenticular bands They also occur a thin beds The sandstones are poorly lithified and consequently are soft and friable They are pale grey to brownish grew in colour, moderately to well sorted and medium to coarse grained in texture Clay lumps and pellets are not within the sand stones

3 Recent deposits constitute gravel beds, alluvial fans and river terraces Alluvium occupies the vast stretch of the plain They contain sand, silt and clay in varying proportions

4 River terraces are seen flanking the present day streams but some terraces occupy the ridges Perhaps, they are the vestiges of the original regime of the Soan river The gravel beds are the result of action of the present day stream Gravel beds constitute an important source of quartzite fragments

Forests — The Una Forest Division has with it the reserve forests, demarcated protected forests, undemarcated protected forests The scope of raising plantation and carrying out soil conservation work in the district is considerable The emphasis is being laid down on new plantation which would not only add the forest wealth, but, also conserve the soil erosion The Forest Department has taken up afforestation of Deo, Fir and Khair trees This apart, mix plantation and plantation of fast growing species has also been taken up Amongst the important species are the Cheel, Khair, Bamboo, Eculyptus, Mulberry and other broad-leaved species There are 36 Nursery Centres in the district which are cattering to the needs of supplying plants of various species to the public and to the Forest Department itself which is the main agency for afforestation and soil conservation

2 Some of the species of trees found around the district are Kikar, Phulah, Sheesham, Ber, Mulberry, Jaman, Mango etc.

3 Some of the botanical names of the aforesaid trees and other species are given as under –

1 Pentantera tomentosa
2 Cathartocarpus fistula
3 Emblica officinalis
4 Vitex negundo
5 Salix babylonica
6 Grewia elastica
7 Aegle marmelos
8 Ficus Amia
9 Jatropha crucus
10 Mimusops elengi
11 Staphylea emodi
12 Azadirachta indica
13 Ulmas integrifolia
14 Shorea robusta
15 Bombax heptaphyllum

Fauna — The plentiful ravines, ample seasonal water and thick broad-leaved forests have encouraged a good deal of wild life in the district, important amongst them being blue bull, barking Deer, spotted Deer, Leopard, jungle Cat, Mongoose, Hare, Jackal, Pig, Monkey, Langoor, Percupine, Squirrel, Rat and Mouse

2 Amongst birds, the important are peafowl, red jungle fowl, bush quails, hill partridge, black partridge, grey partridge, ducks, himalayan jungle crow, parrots and kites etc

Mines and Minerals — The white and coloured quartzite pebbles in the Siwalik conglomerates and recent deposits form the only economic mineral deposit besides ordinary clay soil which can only be used for brick making

2 The three sources for these pebbles and boulders are the stream beds, alluvial fans and river terraces The stream courses are important source for the gravel These are stratified and form cliffs along stream cuttings These also occupy the low ridges as isolated patches of gravel beds

3 The white quartzite pebbles consist of almost pure silica sand pebbles which can be used for manufacture of optical glass pine or soda lime glass, plate glass, white or window glass if impurity does not exceed 1 5 percent and dark bottle glass if impurities upto 5 percent Quartzite fragments after crushing can find use in the following industries, ceramic, fibreglass, regractories, abrasives, fluxing silica, moulding sand, fillers, sodium silicate, silica gel, ferro silicion, metallic slicon etc

4 The pebbles can be used as building material and also for shronding in tube well

Electricity and Power —There is no power generation centre in the district The power requirements of the district is mostly derived from Bassi Power House in Jogindernagar tahsil, Nangal Power House and from Hoshiarpur occassionally According to the information supplied by Electrical Division, in Una uptil March, 1981, 387 villages had been electrified and the total consumption of electricity in the district was 1,522,400 units per month The number of total connections was 33,196, out of which 28,346 are domestic, 3,728 commercial, 519 industrial, 4 public lighting and 602 agricultural The aforesaid figures relate upto March, 1981 only

Land, Landuse pattern and Tenancy — Earlier the district had large scale landlordism, well known amongst them the Jaswa family of Amb, the Bedis of Una and Sodhis of Anandpur But, with the coming in of the Himachal Tenancy and Land Reforms Act in 1972, most of the occupant tenants have been given the ownership rights Indeed, the tenancy system has become a thing of past now and the entire land comes under the self cultivation after the passing of the aforesaid Act

Agriculture — The predominant rabi crops of the district are wheat, barley, pulses, gram, potato, lentil and sarsoan The predominant kharif crops are maize, soyabean, paddy, sugarcane, urd pulses etc

2 The department of Agriculture has set up a Seed Multiplication Farm at Rekhubella The total area of the farm is 372 acres, of which 98 acres are cultivated land This farm has gone a long way in providing the latest package of practices in agriculture in the district The farm provides not only seeds and nurseries to the agriculturists, but, also acts as a demonstration centre to educate the farmers about package of practices in agriculture The entire farm is fully mechanised The farm grows V-Composite maize, soyabean brags, paddy T-23, IR-579, HIMDHAN and CH-988, Minikets C Moong G-65, sugarcane COJ-64 and CO-1148

3 During Rabi following crops grown in the farm are potato KCM, gram C-235, Lentil L-9-12, wheat VL-421, HS-86, S-308, DL-20-9 and HB-501 and Sarsoan BHS-1

Horticulture — Lately great emphasis is being laid on the development of horticulture in the district In order that the farmers are properly educated in horticulture practices, a progeny-cum-demonstration orchard at Saloh has been set up since October, 1975 Since the district is largely flat and with sub-hill around it, therefore, the department of Horticulture has been emphasising the growing of citrus plants in the district namely Kagzi Lemon, Kinnow, Malta Santra, Baramasia Lime and varieties of mangoes like Safeda, Dussehri, Chausa, Langra and Warmalika The climatic conditions suit very much to these kinds of plants and these can benefit the people by supplementing their income The demonstration farm of Saloh is located 9 kms westwards Una on Hoshiarpur road and has an area little over 84 acres

2 The progenies grown on this farm are pear, kinnow, malta, mango, guava, peaches, almond, pecan nut, mango grafting, grapes etc From time to time training camps are organised to educate the farmers in the latest horticultural practices

Animal Husbandry — There has been no let up in improving the traditional livestocks in the district According to 1977 livestock census there are altogether 227, 459 animals in the district and apart from these, there were 13,304 poultry birds The district has 9 Veterinary Hospitals, 15 Veterinary Dispensaries and 1 mobile dispensary

There are 2 Rniderpest Vaccination Centres in Una district where the vaccination of all the animals which entered into the district or leaving the district is done.

2. Regarding cattle development, Jersey/ Holstein have proved to be the most suitable, exotic breeds for cross breeding with hill cows. There are quite a few artificial insemination centres in the district where both artificial insemination and natural servicing are done on the cows.

Poultry :— To popularise the poultry with farmers genetically superior birds both for egg laying and meat production are being made available in the district. With this end in view, the Government has set up a Poultry Farm at Anjoli which is at 16 Kms. away from Una. This Poultry Farm initially was being run by the Panchayat Smiti from whom the Animal Husbandry Department took over in 1969. The farmers are imparted training in poultry farming on this farm and the poultry feed is being supplied to the farmers on a subsidized rate to popularise the scheme. The Poultry Development Farm Anjoli also takes care of regular vaccination and spraying of the sheds etc.

Dairy :— The Department of Animal Husbanc ry has set up 3 Milk Chilling Plants of 2,000 ltrs. capacity each at Jhalera, Bangana and Pubbowal in the cooperative sector. These centres collect milk from farmers, the basic intention being to eliminate the middle-man and award the milk-growers the remunerative price for their produce and finally to find out the market for the milk.

Fisheries :— Of late, the development of fisheries has assumed important aspect of the development because of the obvious reason of meeting the requirements of the people besides supplementing the income of the marginal and small farmers. The role of the State Government in this field is to provide legislation, organisational and development assistance to develop the fishing resources. The fishing activities in Una district comprise of fish culture in tanks/ponds and a part of Gobind Sagar falling in this district. From the survey conducted by the Fisheries Department it has been estimated that there are about 80 to 90 acres of water available in tanks/ ponds and also in Sowan river which can be brought under the fish culture. About 30 tanks spreading over an area of 50 acres retain perrenial water whereas 35 village tanks covering an area of about 30 acres can be made suitable for fish culture after initial renovation. Besides, there are a few marshy places spread over an area of 2.5 hectares which can be reclaimed for fish sector.

2 In order to develop the aforesaid schemes the office of the District Fisheries Officer was first established in the district in 1979. During this year an area of 45 acres approximately was surveyed. 14 tanks with 20,000 mirror carp fingerlings and 2 lacs major carp fingerlings were stocked. This apart, the department provides fish seed to all the panchayats free of cost besides imparting necessary technical training to them. During 1980-81, 13 tanks were stocked with 28,000 mirror carp fingerlings. In order to systematise the fishing in the district the system of fishing licence has been introduced from 1979-80 onwards.

3. The department has further proposed for construction of fish farm at Deoli in Gagret block for rearing major carp fingerlings, and to establish Fish Farmers Development Agency.

4. The Lunkhar Khad which joins Gobind Sagar from Dunkhar to Bhakra forms the part of the district where considerable exploitation of fish has been done. In 1981-82 193, persons were engaged in fishing in this part of the Gobind Sagar and 500 families were benefitted by exploiting 175.40 metric tonnes of fish placed at the value of Rs. 881,608.

5. Apart from what has been stated above, there are 3 fishermen cooperative societies functioning in the district. They are Lathiani Fishermen Cooperative Society Ltd., Kutlehar Fishermen Cooperative Society Ltd., and Mandli Fishermen Cooperative Society Ltd.

Industries :— Compared to most of the other districts of the State, Una district is better developed in the industrial sector. There exists one industrial area at Mahtpur covering an area of 109 acres of land where 131 industrial plots and 26 built-up sheds have been developed for setting up industrial units. So far 56 sophisticated type of industries have come up in this area with the capital investment of Rs. 17 crores. Some of the main industries include

Terpentine oil Factory, PVC Battery Separator Factory, PVC Footwear Factory, AAC and ACSR Conductors Factory, Spun Pipes Factory, Nuts and Bolts Factory, Leather Board Factory, Pottery and Barbed Wire Factory etc Some of the medium scale industries have also been set up in this town Besides Mahtpur, other places where considerable industrial development has taken place are Gagret, Una and to some extent Amb In the entire district there are in all 481 small scale industrial units which directly provide employment to over 3,300 persons

2 The State Government renders a pioneering service in providing incentives for industrial establishments by way of providing subsidy, share capital, margin money and financial assistance through the banks Whereas on the one hand the State Government encourages the set up of the modern industries, on the other hand, it encourages the traditional artisans to continue their age old industry by providing them necessary infrastructural facilities, like loans, subsidies and plots etc

Trade, Commerce and Banking — Like in other districts in the state, there is not much of trade and commercial activities in the district except the traditional imports of cereals, pulses, cloth, edible oil, utensils, sugar etc The district exports forest wealth like wood, fuel wood, rosin and turpentine and local industrial products

2 The district has as many as 32 banks Tahsilwise Una has 12 banks, Amb 13, Haroli 2 and Bangana 5

3 The State Bank of India has branches at Amb, Gagret, Chintpurni United Commercial Bank has branches at Lathiani, Nehrian Suhari and Takoli The State Bank of Patiala has branches at Una, Mahtpur, Gagret and Daulatpur Punjab National Bank has branches at Una, Mahtpur, Panjawar, Chowki Maniar and Bharwain Central Bank has branches at Una, Santokhgarh, Haroli and Bangana Punjab and Sindh Bank has branches at Amb and Mubarakpur Union Bank of India has branch at Mahtpur Laxmi Commercial Bank has one branch at Una State Co-operative Bank has branches at Una, Gagret, Daulatpur, Haroli, Santokhgarh, Chintpurni, Amb, and Bangana And lastly Land Development Bank has a branch at Una which primarily renders advances only for development of lands

Transport.— Himachal Government opened a Regional Transport Unit at Una in April, 1968 with a fleet strength of 35 vehicles operating on 26 routes

2 At present this unit has got a fleet strength of 92 vehicles plying on 78 routes covering a road length of 19,144 kms per day which indeed, is the highest in the state Coverage of 78 routes being operated by this unit consists 5,260 kms inter-state routes, and 13,884 kms within the state

3 The operation of this unit is divided into three centres namely Hoshiarpur Unit, Una Unit and Nangal Unit Each centre has been provided with fleet of vehicles The Nangal Unit has 18 vehicles which operate on 14 routes Una Unit has 51 vehicles which operate on 45 routes Hoshiarpur Unit has 23 vehicles which operate on 19 routes

4 Most of the operations of these units originates and terminates in the neighbouring State of Punjab particularly Nangal and Hoshiarpur centres

Social and Cultural Events — There are quite a few festivals which are celebrated in the various parts of the district At Chintpurni 3 fairs are held every year, first in the month of February, second in July/August and the third in September The shrine of Devi is very important where people assemble and offer their prayers Large amounts of offerings said to be made to the Pujaris who are divided into rosters of having their turn of the profits

2 Another fair is known as Pir Nigaha This shrine is situated in Basoli about 8 kms from Una This is said to be the handi-work of 'Pandvas' but later appropriated by Mohammadans A fair is also held every Thursday in May/June It is believed that the cattle brought over here get secured of the diseases People assemble in large number make large sums as offerings to the shrine and to the Pujaris hereditary attendants

3 Panjgatra at Babhaur on the Sutlej is held on first Baisakhi day It is purely a religious festival The people collect and bathe in the river Sutlej The name is from five stones said to have been used by the sons of the Pandvas in the game of Panch Satara

Holi where large number of people assemble Principally six of these Doab and 2 Manjha Malwa assemble and offer prayers to Dera Guru Barbhag Singh Another fair is held on the day of Baisakhi which is attended mostly by people from Kangra district Yet another fair in Thakurdwara of Dharamsal is held on the day of Baisakhi and Holi which is mainly attended by the disciples of the Mahant

5 Sidh Badhmana fair is held on every Sunday in June/July

6 Another fair of importance is the fair held on Baisakhi day at Ambota

7 The fair of Jatoli Haroli sees the collection of large number of people to worship Gugga Pir

8 Bhadar Kali fair held in February and September is a fair mainly attended by Khatris

Administrative Changes — The present Una district was a part of Kangra district uptil 1972 On the Ist September, 1972, the then Kangra district was reorganised creating two more districts of Una and Hamirpur Initially, Una district comprised of Una tahsil and sub-tahsils Amb and Bangana But, in 1980 Amb and Bangana were upgraded into tahsils and the fourth Haroli sub-tahsil was created All the four tahsils and sub-tahsils come under Una Sub-Division

Places of Archaeological, Historical and Tourist interest — Una district uniqually placed as it is presents a panoramic view to the beholders It is studded with vast fields, deep ravines and thick forests all around Amongst the notable historical religious tourist sports, following need mention

1 *Una* - The town of Una which happens to be the district headquarters is situated on the banks of the river Swan which is the tributary of the Sutlej river It is believed that Saint Balmiki had named this river as 'Som Bhadra' During the times of 10th Guru Gobind Singh, a follower of Guru Nanak Dev known as Baba Kaladhari had come and settled here The descendents of this Kaladhari family was given a jagir of 177 villages by Maharaja Ranjit Singh It is they who laid the foundation of Una town Even today, in the fort of Una the descendents of Baba Kaladhari a fair is held here to commemorate the Baba Kaladhari. With the stationing of the district headquarters, the town has seen tremendous expansion, trade and commercial activities.

2 *Chintpurni* - Chintpurni is situated on the northern end of the district on Bharwain-Talwara Road The place is known for its salubrious climate apart from being a place of sanctity of Goddess Bhagwati Indeed, it is located on the Dhar Chamukha and well connected by roads to Punjab and various other religious places of Kangra district The Mughal Emperor Akbar had mentioned Chintpurni in his book 'Akbarnama'- Durga Ashtami is one of the famous festivals of this place In fact, thousands of pilgrims visit every month from all over the northern India

3 *Dera Baba Barbhag Singh* - It is believed that some 300 years back, Saint Baba Barbhag Singh had come here from Kartarpur and done penance The place is located near Amb-Nadaun road Baba Barbhag Singh ultimately had died in this place itself His followers have constructed two Gurdwaras, one at the place where he had done penance and the other at a place where he had renounced the world Some 2 kms away from this place flows the 'Bhan Ganga' which the pilgrims invariably visit for bathing, after offering prayers to the aforesaid Gurdwaras

4 *Dera Baba Rudroo* - This holy place is located at the height of 2,200 ft from sea level on the road from Una to Amb near Basal village There is a Smadhi of Baba Rudra Nand at this place where the Baba had done his penance The famous festivals celebrated at this place are Ganesh Chaturthi, Krishan Janamashtami etc Slightly beyond this place, there is an another holy place known as 'Jogi Panga' It is surrounded by deep forests It is believed that Baba Rudra Nand had sat in penance at this place also His followers are still looking after the place

5 *Shiv Bari - Gagret* - On Hoshiarpur-Dharamsala Road near Gagret on the bank of the river 'Som Bhadra' is located the Shiva Temple which was believed to have been constructed by Saint Daronacharya During July/August months, thousands of people visit here to offer bouquets to the Shiv Linga Around the place is the industrial township of Gagret where quite a few industries have been located

6. *Bhadar Kali Temple* :- It is located at 4 kms. from Daulatpur. The temple of Bhadar Kali Mata is considered to be very ancient On the Baisakhi day festival is celebrated with great fan-fairs at this place.

7. *Mahadeva Temple of Talmera* :- This Mahadev Temple located in Talmera village of Bangana block is considered to be very ancient temple. On the occasion of Shivratri, a fair is held here when on the Shiv Ling butter milk and milk is put. The place is known for its beatiful surroundings beset with the famous Gobind Sagar Lake where boating and fishing abound The Sola-Singhi Dhar near it forms a natural boundary between Hamirpur and Una districts.

District Census Handbook and its scope : - The District Census Handbook is the innovation of 1951 Census which brought down the census data to the town/village level. Until then, census presented data mostly upto the district/tahsil/sub-tahsil/town level only. This innovation, perhaps, was prompted by the relisation of the need of data at the grass-root level for data users, both for administrative planning and academic studies.

2. The District Census Handbook innovation of 1951 continued undisturbed in 1961 presentation with a few additions to it. However, in 1971 it was further realised that the combination of the census and non-census data in a single publication as was the precedent from 1951 onwards became unwieldy and delayed the timely publication of census results. Therefore, it was felt that the census data should be delinked from the non-census data and the publication should be brought out in two volumes. First volume dealt with the village and town directory and also the village/townwise Primary Census Abstract of the district. The second volume dealt with the non-census data and social-economic and cultural tables.

3. In 1981 Census there has been a further slight innovation wherein the District Census Handbook consists of only one volume which contains village and town directory in Part A, and in Part B, village/townwise Primary Census Abstract of the concerned district.

4. The District Census Handbook of 1951 contained, apart from census data, the other general information about the district, like physical, socio-cultural and administrative aspects of the district which included both the census and the non-census data. In 1961 the scope of the District Census Handbook was sought to be made more comprehensive by including certain additional items and dividing the entire presentation into four parts. First part dealt about the land and the people. Second part contained census tables. Third part-the information regarding agriculture, medical and health etc. Fourth part consisted village/town directory.

5. As already stated, the District Census Handbook underwent further innovation in 1971 Census wherein it was split up into two volumes. First, dealing with the village and town directory and also town/villagewise Primary Census Abstract of the district. Second part dealt with non-census data and other socio-cultural and economic tables.

6. In 1981 Census, with a view to avoid delay in bringing out the publications and also to streamline the publication programme the second part of 1971 Census Handbook has been omitted. Thus, the present volume of the District Census Handbook will bring about the village/town directory in part A, and in part B town/villagewise Primary Census Abstract of the concerned district. Part A, village directory will contain information about the name of the village, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communication, power supply, village market and the distance from the town etc This part also contains information about socio-cultural aspects like food habits of the people, land use in the village, forests, irrigational resources, cultivable waste and places of religious, historical and archaeological interest. Similarly, the town directory contains seven statements which would deal with area of the town, number of households, population and rate of growth of the town during the last eight decades, density of population of the town, sex ratio, status of civic administration, its finances and other socio-educational, cultural and developmental activities and the amenities that might have been undertaken or provided. As already stated part B would contain the town/villagewise Primary Census Abstract which includes information/data about the total area of the village, occupied residential houses, total number of housedolds, population and its sex-wise break-up, so also the break-up of Scheduled Castes and Scheduled Tribes, literacy and the break-up of the population by sex into

four broad industrial categories like cultivators, agricultural labourers, household industries and other workers Apart from the aforesaid data the Primary Census Abstract will contain data on the marginal workers and non-workers also

7 It would be pertinent to mention here that the sources of information for the town and the village directory have been mainly the revenue agency supplemented by the concerned departments like educational, medical, co-operation and the local bodies The information so collected from the various sources have been thoroughly scrutinised so as to ensure its authenticity

Census Definitions and Concepts — In order to understand the precise import of the meaning of words used in the analysis of data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases used herein

Urban area - The Census definition of an urban area is given as under

(a) All places with a municipality, corporation, cantonment board or Notified Area Committee etc

(b) All other places which satisfy the following criteria

(i) a minimum population of 5,000

(ii) at least 75% of male working population engaged in non-agricultural pursuits, and

(iii) a density of population of at least 400 persons per sq. km (1,000 persons per sq mile)

In the absence of the any of the aforesaid characteristics the place will be treated as rural

Urban Agglomeration and Standard Urban area — The urban agglomeration represents a continuous urban spread containing a town and its adjacent urban out growth or more physically contiguous town together with contiguous urban out growth which may actually fall within revenue limits of a village/villages These 'urbanised' villages or out growths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread The urban agglomeration represents a spatial urban spread at a given time The Standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages which are expected to get merged with it but also intervening rural areas which are potentially urban This covers all extra municipal out-growth such as suburb (industrial and residential), railway colonies, civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991

2 Like the urban agglomeration, the standard urban area is also an area unit which extends beyond the main city or town limit municipal or otherwise. However, unlike in the case of urban agglomeration which represents the actual urban spread at a given time the standard urban area is a larger area unit which includes not merely urban areas lying in close proximity to all surroundings and intervening rural pockets which are likely to be urbanised by 1991 and those serve the role of constant statistical reporting unit for three censuses viz 1971, 1981 and 1991 irrespective of the change in local administrative boundaries of the area unit within the standard urban area In fact, the urban agglomeration involving a core town of population of 50,000 or above are submerged in the standard urban area involving with core town The utility of this concept basically lies in the fact when the limits of existing town change, the standard urban area as such is not expected to undergo any change As a consequence, the data generated by census for standard urban areas becomes more meaningful as it is comparable with different decade

3 The characteristic features of a standard urban area is (i) it should have a core town of a minimum population of 50,000 (ii) contiguous area made of all other urban as well as of rural administrative unit should have close mutual socio-economic linkage with the core town and (iii) probability that the entire area will get urbanised within a period of 2/3 decades

Village - In Himachal Pradesh, as elsewhere, the smallest rural habitation is the village It generally follows the limits of a revenue village i e recognised by the district administration The revenue village need not necessarily be a single agglomeration of habitation It may have one or more hamlets But the revenue village has a definite surveyed boundary and each village is a separate administrative unit with separate village account

1 In Himachal Pradesh following rural units are treated as revenue village or equivalent

1	Revenue village	In the districts of Chamba, Mandi, Bilaspur, Shimla, Kinnaur, Sirmaur and Solan, Una excepting Bangana tahsil and Lahul & Spiti district (in respect of villages transferred from Pangi Tahsil)
2	"Tikka" having a distinct sub-hadbast number	Kangra and Hamirpur districts and Bangana tahsil of Una district
3	"Phatti" having distinct sub-hadbast number	Kullu and Lahul & Spiti districts (except villages transferred from Pangi)

Census House - A Census house is a building or part of a building having separate entrance from the road or court-yard or staircases etc used or recognised as a separate unit, it may be occupied or vacant It may be used for a residential or non-residential purpose or both

Household - A household is a group of persons who commonly live together and would take their meal from the common kitchen unless exigencies of work prevented any of them from doing so There may be a household of persons related by blood or a household of unrelated persons or having a mix of both Examples of unrelated households are Boarding Houses, Messes, Hostels, residential Hostels, rescue Homes, Jails and Ashrams These are called "Institutional" households There may be one member households, two member households or multi-member households For census purposes, each one of these types is regarded as a'Household' The important link in finding out whether there is a household or not is a common kitchen

Scheduled Castes and Scheduled Tribes — The Scheduled Castes and Scheduled Tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Article 341 and 342 of the Constitution The lists of the Scheduled Castes and Scheduled Tribes are notified for the first time under the Constitution (Scheduled Castes) order, 1950 and the Constitution (Scheduled Tribes) order, 1950 These lists have been modified or amended or supplemented from time to time On the reorganisation of the States the Scheduled Castes and Scheduled Tribes (Modification) order came into force from October, 1956. However, the first one affecting the Himachal Pradesh has been the Scheduled Castes and Scheduled Tribes order (Amendement) Act, 1976 The main purpose of this Amendment Act was to remove the area restrictions in respect of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the state, unlike in the 1956 order where these were notified in relation to different regions of the state registering area restrictions

2 In pursuance of the latest Presidential Order referred above, following castes have been treated as Scheduled Castes throughout the state

1 Ad Dharmi
2 Badi, Nagalu
3 Balmiki, Bhangi, Chuhra, Chura, Chuhre
4 Bandhela
5 Bangali
6 Banjara
7 Bansi
8 Barad
9 Barar, Burar, Berar
10 Batwal
11 Bauria, Bawaria
12 Bazigar
13 Bhanjra, Bhanjre
14 Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi
15 Chanal
16 Chhimbe, Dhobi
17 Dagi
18 Darain
19 Darai, Daryai
20 Daule, Daole
21 Dhaki, Toori
22 Dhanak
23 Dhaogri, Dhuai
24 Dhogri, Dhangri, Siggi
25 Doom, Doomna, Dumna, Dumne, Mahasha
26 Gagra
27 Gandhila, Gandil, Gondola
28 Hali
29 Hesi
30 Jogi
31 Julaha, Julahe, Kabirpanthi, Keer
32 Kamoh, Dagoli

33 Kaloack
34 Khatik
35 Kori, Koli
36 Lohar
37 Marija, Marecha
38 Mazhabi
39 Megh
40 Nat
41 Od
42 Pasi
43 Perna
44 Phrera, Pherera
45 Rehar, Rechara
46 Sanhai
47 Sanhal
48 Sansi, Bhedkut, Manesh
49 Sansoi
50 Sapela
51 Sarde, Sarera, Sarare, Saryare, Sarehde
52 Sikligar
53 Sipi
54 Sirkiband
55 Teli
56 Thathiar, Thethera

3 Similarly, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 as promulgated under the Presidential Order declares the following Tribes as the Scheduled Tribes throughout the state

1 Bhot, Bodh
2 Gaddi (excluding the territories specified in sub-section (1) of the Punjab re-organisation Act, 1966 (31 of 1966), other then the Lahul & Spiti district)
3 Gujjar (excluding the territories specified in sub-section (1) of Section 5 of the Punjab re-organisation Act, 1966 (31 of 1966)
4 Jad, Lamba, Khampa
5 Kannaura, Kinnara
6 Lahaula
7 Pangwala
8 Swangla

4 Thus, from preceding para, it is clear that the Tribes at serial No 1, 4, 5, 6, 7 and 8 have been treated as Scheduled Tribes throughout the state of Himachal Pradesh wherever they live, whereas, in case of Gaddi and Gujjar the area restrictions still persist as given in the preceding paragraph

Literate - A person who can both read write with understanding in any language is t treated as literate A person who can merely r but cannot write is not a literate It is not n ssary that a person who is literate should h received any formal education or should h passed any minimum educational standard C ldren upto the age of four years have been tre ted as illiterate irrespective of whether they att the school or not

Work - Work is defined as participation i any economically productive activity Such parti cipation may be physical or mental in nature Work involves not only actual work but also effec tive supervision and direction of work

Main Worker - A person who has primarily worked for a major period of the year is a main worker By major part of the year, it is intended to find out that the person has worked for 183 days or more or in other words worked for 6 months or more

Marginal Worker - A person who has worked for less than six months or 183 days but worked atleast a day during the year before enumeration is considered as marginal worker

Non-Worker - A person who has not worked at all during the preceding one year from the date of enumeration is non-worker

Cultivator - A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind or share Cultivation includes supervision or direction of cultivation

Agricultural Labourer - A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer He or she has no risk in cultivation but he or she merely works in another persons' land for wages An agricultural labourer has no right to lease or control on land on which he /she works

Household Industry - It is an industry which involves atleast manufacturing, or processing, or servicing, or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the

house where the household lives in the urban area The large proportion of the workers in a household industry should consist of members of the household including the head The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act

Other Workers :- All workers i e those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all government servants, municipal employees, etc In fact, all those who work in field of economic activities other than cultivation, agricultural labour or household industry are other workers

Employer - An employer is a person who has to employ other persons in order to get work performed i e such person is not responsible for his or her personal work but also for giving work to others for carrying out the economic activities

Employee - An employee is a person who usually works under some other persons for salary or wages in cash or kind There may be persons who are employed as Managers, Superintendents, Agents etc and in that capacity employ or control other workers on behalf of their own employers, such persons are only employees and not employers

Single Worker - A single worker is a person who works by himself/herself He/she is not employed by anyone else and in his/her turn does not employ anybody else This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of producers cooperative which one of the partners or members of said producers cooperative is a single worker

Family Worker - A family worker is a member who without receiving wages in cash or kind, in an industry, businesss, in a trade or service For example, the working member in a family of Dhobi where they all work and each does not receive wages separately will be family worker There may be family workers in industry, trade Family worker must be related by ties of blood or marriage but such workers can belong to different households Thus, what is important is that such workers must necessarily be related even though they may be living in different households The family workers may or may not be entitled to share and the profit in the work or business carried on either by person or head of the household or the relative

ANALYSIS OF THE DATA

The table gives decadal variation in population of 1901 Census onwards It is observed from the aforesaid table that Una district registered a negative growth rate of 1 95 percent in 1911 Census Eversince, the growth rate has been always upwards though there has been moments of stagnation and slow growth as can be seen from the table referring 1951, 1961 and 1971 Census. The precise reason can not be attributed to this trend

Decadal variation in Population since 1901

Year	Persons	Males	Females	Decade Variation	Percentage decade Variation
1	2	3	4	5	6
1901	165,000	*	*		
1911	161,786	85,140	76,646	—3,214	—1 95
1921	161,856	83,865	77,991	+70	+0 04
1931	170,620	88,985	81,635	+8,764	+5 41

*Sexwise population for 1901 Census is not available

It is further noticeable from the table that uptil 1961 Census the female population has always been trailing the male population But, during the decades 1961-71 and 1971-81, the female growth rate has out-paced the male growth rate which is shown in the table given for the last 1901 Census onwards

	Total	317,422	156,491	160,931	292 916	143,776	149,150	24,506	12,725	11,781	594	552	5

Table 1 deals with the population, number of villages and the towns in 1981 As can be seen from cloumns 12 to 14 of the table, there are altogether 594 villages in the district of which 552 villages are inhabited Altogether there are 5 towns in Una district, two are in the Amb tahsil and three in Una tahsil

2 Tahsilwise, Amb tahsil had 175 inhabited villages, Haroli has 33 inhabited villages and Una and Bangana tahsils have 74 and 270 villages, respectively The rural/urban break-up of the population as given in the aforesaid table shows that the district has over-whelmingly rural population Out of 317,422 persons in the district, 292,916 live in the rural areas and 24,506 persons live in the urban areas One interesting point to notice here is the rural population which has higher females than the males whereas the urban population has higher males than the females

3 Tahsilwise all the four tahsils/sub-tahsils have a higher female population than the males, whereas in the urban areas both the towns put together in Amb tahsil has a female population higher than the males whereas 3 towns of Una tahsil combined has a higher male population than the females It is difficult to precisely attribute the reason of the higher female growth rate than the males nor is it within the scope of this book

TABLE 2

Decadal change in distribution of Population

Sl No	Name of Tahsil/ Sub-Tahsil	Population						Perecertage decadal (1971—81) variation		
		1971			1981

	Total	261,357	251 019	10 338	317 422	292 916	24 506	21 45	16 69	137 05

1 Table 2 deals with the decadal changes in the distribution of population The column 8 of the table indicates that the decadal growth rate of the district as a whole has been 21 45 percent during 1971-81 Tahsilwise, the growth rate has been 19 74 percent in Amb tahsil, 19 75 percent in Haroli sub-tahsil, 24 30 percent in Una tahsil and 22 90 percent in Bangana tahsil The growth rate of Una tahsil undoubtedly has been phenominally high This basically is because of the district headquarters being located in the Una tahsil and with the creation of district on the Ist September, 1972, there has been tremendous influx of the population Regarding urban growth rate one would see that towns in Amb have recorded 100 percent growth rate whereas the towns in Una tahsil have recorded 70 90 percent This phenominally high growth rate in urban areas is not because of the much increased commercial activities, but, because the State Government have notified some of the erstwhile villages as towns Hence, the growth of population has got inflated

2 Table 3 deals with the distribution of villages by population ranges Columns 2 and 3 of the table indicate that 273 villages which constitute 49 46 percent of the total number of villages in the district have a population less then 200 persons 112 villages which comprise 20 29 percent of the total number of villages in the district have a population between the range of 200-499 Another 134 villages with the percentage of 24 27 percent of the total number of villages have a population ranging between 500-1,999 Only 32 villages which comprise 5 80 percent of the total number of villages in the district have a population range between 2,000-4,999 There is only one village in the district which has population above 4,999

The aforesaid analysis shows that almost 70 percent of the villages in the district are small and have population less than 500 persons

TABLE 3

Distribution of Villages by Population ranges

5 Table 5 deals with the proportion of scheduled castes population with total population in the villages There are 105 villages in the district which constitute 19 02 percent of the total number of the villages which have no scheduled castes population what so ever 38 villages in the district have scheduled castes population less than 5 percent each Another 36 villages have scheduled castes population ranging between 6-10 percent and further 55 villages have scheduled castes population between 11-15 percent and 53 villages have scheduled castes population between 16-20 percent 108 villages constituting 19 57 percent of the total number of villages in the district have scheduled castes population ranging between 21-30 percent 99 villages comprising 17 94 percent of the total number of villages in the district have a scheduled castes population ranging between 31-50 and 46 villages have a scheduled castes population ranging between 51-57 and only 12 villages in the district have a scheduled castes population above 75

Table 5A indicates the proportion of scheduled castes population to total population during the last two censuses in Himachal Pradesh and Una district

Column 4 of the table shows that in 1971 Census the preportion of scheduled castes population to the total population was 22-24 percent which has risen to 24-62 percent in 1981 Census In absolute terms the scheduled castes population in the state was 769, 572 persons to the total state population of 3, 460, 434 In 1981 Census the absolute figure of the scheduled castes

TABLE 5 A

Total	552	100 00

population is 1,053,958 against the total population of 4,280,818 of the State Una district had a scheduled castes population of 48,040 persons against the district's total population of 261,357 persons which percentage-wise comes to 18 38 percent of the total scheduled castes population in the district to the total population in 1971 Census This has risen to 71,265 scheduled castes population in the district against the total population of 317,422 persons Thus, percentagewise the scheduled castes population of Una district in 1981 comes to 22 45 percent

6 Table 6 deals with the proportion of scheduled tribes population to the total population in the villages of the Una district Out of 552 villages in the district 546 villages have no scheduled tribes population what so ever There are only 6 villages which have a scheduled tribes population less than 5 percent each Thus, percentagewise 1 09 percent of the total number of villages in the district have scheduled tribes population only

Table 6A deals with the proportion of scheduled tribes population during the last two censuses in Himachal Pradesh and Una district

According to 1971 Census the scheduled tribes population of the state was 4 09 percent to the total population But, in 1981 Census the percentage has slightly risen from the aforesaid figure to 4 61 percent scheduled tribes population to the total population of the State Regarding Una district the percentages can not be worked

TABLE 6 A

Proportion of Scheduled Tribes Population during the two Censuses in Himachal Pradesh & Una District

Year	Himachal Pradesh			Una District		
	Total Population	Scheduled Tribes Population	Proportion of Scheduled Tribes population to total population	Total Population	Scheduled Tribes Population	Proportion of Scheduled Tribes population to total population
1	2	3	4	5	6	7

1981	4,280,818	197,263	4 61	317,422	19	0 01

out for 1971 Census and before as precise projection could not be made But, it is evident from the table that Una district has a nominal population of 0 01 percent scheduled tribes population to the total population of the district in 1981 Census In absolute terms, there are 19 scheduled tribe persons in the district

7 Table 7 deals with the proportion of scheduled castes/scheduled tribes population in the towns As already stated, there are 5 towns in the district Townwise Daulatpur Notified Area Committee has 22 30 percent scheduled castes population Gagret Notified Area Committee has 24 23 percent scheduled castes population Mahtpur Badsehra Notified Area Committee has 25 96 percent scheduled castes population and Una Municipal Committee has 12 86 percent scheduled castes population None of the aforesaid town of the district has scheduled tribes population

8 Table 8 indicates the literacy rates by population ranges in the villages of the district Overwhelming number of 273 villages with the population range of less than 200 have a literacy rate of 51 11 percent 112 villages falling in the range of 200-499 persons have a literacy percentage of 48 01 percent

TABLE 7

5,000—9,999	1	46 96
10,000+		
Total	552	49 14

134 villages in the population range of 500 1,999 have a literacy percentage of 49 37 percent 32 villages falling in the population range of 2,000-4,999 have a literacy rate of 48 81 percent One village in the population range of 5 000-9,999 has literacy rate of 46 96 percent and all 552 inhabited villages put together have aggregate literacy percentage of 49 14 percent Thus, the aforesaid table indicates literacy rate of the Una district is considerably higher compared to the state as a whole which is 42 48 percent

Table 8A gives the proportion of literacy of the total population by sex for the last two Censuses In 1971 Census the district had total literacy percentage of 38 75 percent of which male literacy was 49 74 percent and female literacy was 27 79 percent During the decade 1971-81, the literacy percentage has risen to 50,05 percent literates in the entire population of the district of which 59 75 percent are male literates and 40 62 percent are female literates Thus, compared to state averages the district has considerably higher percentage both in respect of males and females

TABLE 8A

1981	50 05	59 75	40 62

TABLE 9

Literacy Rates for Towns

Name of the Town	Literacy Rate
1	2
Daulatpur (N A C)	62 97
Gagret (N A C)	60 33
Mahtpur Badsehra (N A C)	60 86
Santokhgarh (N A C)	54 05
Una (M C)	64 42
All Towns	61 00

9 Table 9 deals with the literacy rates in the towns Highest percentage of literacy is in Una Municipal Committee which has 64 42 percent This is followed by Daulatpur Notified Area Committee with 62 97 percent literates In the matter of literacy Mahtpur Badsehra Notified Area Committee comes third with 60 86 percent literates Gagret Notified Area Committee stands fourth with 60 33 percent literates At the bottom comes Santokhgarh Notified Area Committee with 54 05 percent literates

All the five towns combined have a literacy percentage of 61 00 percent literates

To Table 10 deals with the literates, workers, non-workers, scheduled castes and scheduled tribes in the district Column 6 would reveal that the total scheduled castes population in the district constitutes 22 45 percent to the total population of the district The rural/urban break-up being 22 61 percent and 20 54 percent respectively The district has a nominal population of 0 01 percent Scheduled Tribes Population which live in the villages and there is no Scheduled Tribes population in the towns of Una district

Tahsilwise Amb has 25 61 percent scheduled castes population Haroli sub-tahsil has 18 35 percent scheduled castes population Una has 18 73 percent scheduled castes population and Bangana tahsil has 27 00 percent scheduled castes population Regarding scheduled tribes population, Amb tahsil has 0 02 percent scheduled tribes population which indeed is the only tribe population in the district Rest of the 3 tahsils have no scheduled tribes population at all

The district has literacy percentage of 50 05 percent, male literacy being 59 75 percent and female literacy 40 62 percent respectively Undoubtedly, urban literacy rate is much higher than the rural literacy rate, the figures being rural literacy 49 14 percent and urban literacy 61 00 percent of the total population The male rural literacy is 58 84 percent and urban male literacy is 70 11 percent Similarly, the rural female literacy percentage is 39 78 percent and the urban female leteracy is 51 17 percent

Tahsilwise break up of the total literacy percentage including male/female literacy percentage with rural/urban has been given in columns 8 to 10 of the aforesaid table

The district has 23 49 percent main workers to the total population The male main workers being 43 96 percent and female main workers 3 59 percent The rural/urban break-up of the main workers are rural total main workers 23 25 percent, urban main workers 26 38 percent The male rural main workers are 43 65 percent and urban male main workers are 47 45 percent The female rural main workers are 3 59 percent and the urban female main workers are 3 62 percent From the aforesaid analysis it is clear that the main workers in the urban areas form higher percentage than in the rural areas and similarly female main workers in the urban areas has higher percentage than the rural female main workers This may primarily be because of the job opportunities being available more in urban areas than the rural areas Secondly, because of the higher education in the urban areas people preferred to do some productive job that idling away the time

Tahsilwise break-up of the main workers in Amb tahsil are 22 13 percent main workers of which 42 27 percent are male main workers and 3 01 percent are female main workers In Haroli sub-tahsil there are 23 42 percent main workers, the male main workers being 44 98 percent and the female main workers 2 74 percent In Una tahsil the total main workers are 25.01 percent out of which 46 52 percent are male main workers and 3 26 percent are female main workers In Bangana tahsil there are 24 13 percent total main workers of which 41 89 percent are male main workers and 6 74 percent are female main workers There are two distinct characteristics in the aforesaid analysis, one the main workers to the total population constitute about one fourth of it and secondly the female main workers are just nominal This primarily must be because of the lack of wholetime work available except the traditional seasonal agricultural operations and secondly traditionally in some of the communities the female work is not approved by the society and thirdly because of the lack of suitable work for the female population

Regarding the marginal workers, the district has the total marginal workers of 4 53 percent of which 2 14 percent are male marginal workers and 6 86 percent are female marginal workers The rural/urban break-up of the marginal workers being 4 76 percent rural marginal workers and 1 73 percent urban marginal workers There are 2 25 percent male rural marginal workers and 0 87 percent male urban marginal workers Similarly, there are 7 19 percent rural female marginal workers and 2 66 percent urban female marginal workers

Tahsilwise break-up of the marginal workers in Amb tahsil are 3 72 percent marginal workers to the total population, male marginal workers being 2 13 percent and female marginal

26 38	47 45	3 62	1 73	0 87	2 66	28 11	48 32	6 27	71 89	51 68	93

workers 5 22 percent In Haroli sub-tahsil the total marginal workers are 2 90 percent, male marginal workers being 0 66 percent and female marginal workers 5 05 percent In Una tahsil total marginal workers are 1 44 percent, the male marginal workers being 0 74 percent and female marginal workers 2 15 percent In Bangana tahsil the total marginal workers are 14 28 percent, male marginal workers being 6 68 percent and female marginal workers 21 71 percent

The total workers to the total population is worked out by combining the main workers and the marginal workers and then substracting from the total population Columns 17 to 19 would indicate the total workers to the total population of the district There are 28 02 percent total workers in the district to the total population, the rural total workers being 28 01 percent and the urban total workers The male/female break-up of the total workers are 46 10 percent males and 10 45 percent females The rural/urban break-up is 45 90 percent rural male workers and 48 12 percent urban male workers In the same way the rural female workers are 10 78 percent and the urban female workers 6 27 percent

Tahsilwise break-up of the total workers to the total population being Amb tahsil 25 84 percent total workers to the total population, male workers being 44 40 percent and females 8 23 percent In Haroli sub-tahsil there are 26 32 percent total workers, the male total workers being 45,64 percent and females 7 78 percent In Una tahsil, the total workers are 25 45 percent, the male total workers being 47 26 percent and females 5 41 percent In Bangana tahsil the total workers are 38 41 percent the male total workers being 48 57 percent and female workers 28 46 percent respectively

Lastly columns 20 to 22 of the aforesaid table give the non working population in the district There are 71 98 percent total non-workers in the district, the rural non workers being 71 99 percent and the urban non-workers 71 89 percent The male non-workers are 53 90 percent The rural male non workers are 54 10 percent and urban 51 68 percent The female non-workers touched the record percentage level of 89 55 percent The rural female non-workers are 89 22 percent and the urban female non-workers are 93 73 percent

Tahsilwise break-up being, Amb tahsil has 74 16 percent total non-working population, male non-working population being 55 60 percent and females 91 77 percent In Haroli sub tahsil the total non-working population is 73 68 percent, the male non working population being 54 36 percent and female non-working population 92 22 percent In Una tahsil, the total non-working population is 73 55 percent, the male non-working population being 52 74 percent and female 94 59 percent In Bangana tahsil the comparative figures are 61 59 percent total non-working population, male non working population being 51 43 percent and female non working population 71 54 percent

The aforesaid figures give a gloomily trenendous dependency ratio in the district which, indeed, does not augur well in the sound economy Obviously, there are large number of idle mouths depending upon single bread earner which, undoubtedly, retards the overall socio-economic progress and prosperity,

TABLE 11

Distribution of Villages according to the availability of different amenities

Sl No	Name of Tahsil/ Sub-Tahsil	No of inhabited Villages	No (With percentage of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-eation	Approach by Pucca Road	Power Supply

	Total	552	265(48 01)	99(17 93)	549(99 46)	140(25 36)		303(54 89)	221(40 04)	387(70 11)

11. Tables 11 and 12 deal with the distribution of villages according to the availability of the different amenities and proportion of rural population served by different amenities respectively.

There are 265 villages with the population of 85.98 percent which have educational facilities of one level or the other in the respective villages itself. So also, 99 villages with a population of 48.57 percent have got medical facilities of one type or the other in the village itself. Regarding drinking water facilities except 3 villages all the villages have been covered under the drinking water scheme of one type or the other. In respect of post and telegraph, 140 villages having a population of 63.23 percent of the total population of the district have got the aforesaid facility within the village itself 303 villages comprising 54.89 percent of the total number of villages in the district having a population of 79.13 percent have got communication upto the village. 221 villages constituting 40.04 percent of the total number of villages in the district having a population of 67.40 percent have approach by pucca road. Regarding power supply 387 villages which constitute 70.11 percent of the total number of villages in the district with a population of 89.15 percent of the total population of the district have been supplied with electric power.

Tahsilwise in Amb tahsil out of 175 inhabited villages, 104 villages having a population of 98,291 have got educational facility in the village itself. 47 villages with a population of 63,142 have medical facility. 173 villages covering a population of 99.96 percent of the tahsil have been provided drinking water amenities. 60 villages with a population of 75,806 or 68.85 percent have post and telegraph facility. Communicationwise 98 villages with a population of 87,314 have got it. 76 villages with a population of 77,728 have got approach by pucca road. 131 villages with a population of 91.66 percent have got electric power.

12 In Haroli sub-tahsil out of total 33 inhabited villages 32 villages covering a population of 99.59 percent of the total population of the sub-tahsil have got educational facility. 22 villages with 79.84 percent population have medical facility. All the villages have drinking water facility available to them 24 villages with a population of 86.02 percent have post and telegraph facility. 32 villages covering a population of 98.84 percent have communication facility. 27 villages with a population of 89.02 percent have approach by pucca road and 32 villages with a population covering 97.49 percent of the total population of the sub-tahsil have electric power.

In Una tahsil out of total 74 inhabited villages 63 villages having a population of 65,608 have educational facility. Only 11 villages with a population of 19,812 have medical facility. All villages have drinking water facility. 29 villages covering a population of 43,041 have post and telegraph facility. 53 villages covering a population of 54,128 have communication facility. 38 villages covering a population of 45,138 have approach by pucca road and 66 villages covering a population of 66,090 have electric power.

In Bangana tahsil, there are altogether 270 villages of which 66 villages with a population of 23,822 have educational facility. 19 villages with a population of 7,920 have medical facility. All 27 villages covering a population of 10,971 have post and telegraph facility. 120 villages covering a population of 26,712 have communication facility. 80 villages with a population of 17,240 have approach by pucca road and 158 villages with a population of 31,335 have been supplied with electric power.

TABLE 12

Proportion of Rural Population served by different amenities

Sl No	Name of Tahsil/ Sub-Tahsil	Total population of inhabited Village in Tahsil/ Sub-Tahsil	Proportion of Rural Population served by the amenity of							
			Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power supply

1	Amb	110 411	98,291(89 27)	63,142(57 34)	110 064(99 96)	75 806(68 85)		87,314(79 30)	77,728(70 59)	100,930(91 6
2	Haroli	64 386	64 121(99 59)	51,406(79 84)	64,386(100)	55,388(86 02)		63 642(98 84)	57,317(89 02)	62,770(97 4
3	Una	70 060	65,608(93 65)	19,812(28 28)	70,060(100)	43,041(61 43)		54,128(77 26)	45 138(64 43)	66,090(94
4	Bangana	48 359	23,822(49 26)	7,920(16 39)	48,353(99 99)	10,971(22 69)		26,712(55 24)	17 240(35 65)	31,335(64 8
	Total	292,916	251 842(85 98)	142 280(48 57)	292 863(99 98)	185 205(63 23)	..	231,796(79 13)	197,423(67 40)	261,125(89 1

13 Table 13 deals with the distribution of villages not having certain amenities arranged by distance ranges from the places where these amenities are available

Out of 552 villages, 284 villages do not have educational facility in the village itself, but, it is available within 5 Kms distance Another 3 villages have the medical facility within 5 Kms distance 339 villages have the medical facility with in 5 kms 60 villages have the aforesaid facility within 5–10 Kms and 54 villages have to travel above 10 Kms to avail this facility Thus, there are altogether 453 villages which do not have medical facilities in the village itself There are only unfortunately 3 villages which do not have drinking water facility available in the village itself, but, it is available within 5 Kms There are 388 villages whice have post and telegraph facility within the distance of 5 Kms Another 24 villages have the aforesaid facility available within 5–10 Kms distance and thus altogether 4 2 villages do not have post and telegraphs facility within the village itself There are 217 villages which have to travel less than 5 Kms to avail communication facility and another 29 villages have communication facility at the distance of 5–10 Kms and 3 villages have to reach beyond 10 Kms to avail the aforesaid facility Thus, 249 villages do not have the communication facility available upto the village itself

TABLE 13

Distribution of Villages not having certain amenities arranged by distance ranges from the places where these are available

16—50	363	124(34 16)	42(11 57)	361(69 45)	64(17 63)		176(48 48)	125(34 44)	223(61
51+Kms	4	2(50 00)	3(75 00)	4(100)	2(50 00)		4(100)		3(75
Unspecified		..							
Total	552	265(48 01)	99(17 93)	549(99 46)	140(25 36)		303(54 89)	221(40 04)	387(70.

14 Table 14 deals with the distribution of villages according to the distance from the nearest town and availability of different amenities There are 69 villages within a distance of 5 Kms from the nearest town of which 58 villages have educational facility, 17 have medical facility, 68 have drinking water facility, 25 villages have post and telegraphs facility, 47 have communication facility, 41 have approach by pucca road in the village itself and 62 have been electrified In the next category come 116 villages with in the range of 6–15 Kms from the nearest town of the aforesaid number of villages, 81 have educatrional facility, 37 have medical facility, all have drinking water facility and 49 have post and telegraphs facility available in the village itself 76 villages have communication facility and 55 have approach by pucca road in the village itself 99 villages have been electrified out of 116 villages in this range In the range of 16-50 Kms distance from the nearest town are the 363 villages of which 124 have educational facility, 42 have medical facility, all except 2 village have drinking water facility, 64 have post and telegraph facility, 176 have communication facility, 125 have approach by pucca road and 223 have been supplied with electric power

There are only 4 villages in the distance range of 51 and above from the nearest town of which 2 have educational facility, 3 have medical facility, all villages have drinking water facility, 2 have post and telegraph facility, all villages have communication facility and 3 villages have been supplied with electric power

Thus, out of 552 inhabited villages 265 villages have educational facility, 99 have medical facility, 549 have drinking water facility, 140 have post and telegraph facility, 303 have communication facility, 221 have approach by pucca road and 387 villages have been supplied with electric power

15 Table 15 deals with the distribution of villages according to population range and amenities available to them

There are 385 villages which fall in the population range upto 499 Of the aforesaid number of villages, 108 have educational facility, 22 have medical facility, all except 3 villages have drinking water facility, 33 have post and telegraph facility, 165 have communication facility, 105 have approach by pucca road and 236 villages have been supplied with electricity There are 134 villages which fall in the population range of 500-1,999 Of the aforesaid number of villages, 124 have educational facility, 50 have medical facillity, all villages have drinking water, 75 villages have post and telegraph facility, 107 villages have communication facility, 84 villages have approach by pucca road and 118 villages have been supplied with power In the population range of 2,000-4,999 falls 32 villages Of the aforesaid villages, all have educational and drinking water facilities available But only 26 villages have medical facility available with them 31 villages have post and telegraph facility, 30 villages have communication facility Again 31 villages have approach by pucca road and all villages have been supplied with power There is only one village which falls in the population range of 5,000 and above This village has all the aforesaid amenities available to it

TABLE 15

Distribution of villages according to Population ranges and amenities available

Population range	No of inhabited villages in each range	No (With Percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communication	Approach by Pucca Road	Power supply

Total	552	265(68 01)	99(17 93)	549(99 46)	140(25 36)		303(54 89)	221(40 04)	387(70 11)

TABLE 16

Main staple food in the majority of villages in each tahsil

Sl No	Name of Tahsil/ Sub-tahsil	Main staple food
1	2	3
1	Amb	Maize, Wheat
2	Haroli	Wheat, Maize
3	Una	Wheat, Maize
4	Bangana	Maize, Wheat

16 Table 16 deals with the main staple food in the majority of the villages In all the 4 tahsils/ sub-tahsils the staple food arround the year is wheat and maize

17 Table 17 deals with the distribution of villages according to land use

All the 552 inhabited villages have a total area of 146,825 14 hectares of which cultivable area being 81,392 75 hectares which constitutes 55 44 percent of the total land area Of the aforesaid cultivable area 1984 45 hectares is irrigated which constitutes 2 44 bercent of the total cultivable area

Tahsilwise Amb tahsil with 175 inhabited villages has a total land area of 56,052 14 hectares of which 32,575 75 hectares are cultivable which constitute 58 12 percent of the total land area and of the aforesaid cultivable area 548 45 hectares or 1 68 percent is under irrigation So also, in Haroli sub-tahsil, 33 inhabited villages have a total land area of 30,355 00 hectares of which the cultivable area constitutes 16,395 00 hectares or 54 01 percent of the total land area Of the aforesaid cultivable area 504 00 hectares or 3 07 percent is under irrigation In Una tahsil all the 74 villages have a land area of 21,776 hectares Of this only 930 hectares are under irrigation

18 Table 18 deals with growth, density, sex radio and urban population in the district vis-a-vis the state during the last four Censues Since 1951 Census the population in 1981 Census has risen from 196,829 to 317,422 in the district The urban population has risen from 5,407 to 24,506 The percentage of urban population to the total population in 1951 Census was 2 75 percent which rose to 3 96 percent in 1971 Census and 7.72 percent in 1981 Census Thus, has registered overall growth rate of 137 05 percent during the decade This abrormal growth rate is primarily because of the constitution of separate district in 1972 and conversion of some other villages into urban areas The density of population in 1981 Census has been 699 persons per sq km compared to 2,350 persons per sq km in 1971 Census This adverse variation is basically because of the addition of new urban areas The sex ratio during the last four Censuses commencing from 19 51 are 830,911,876 and 926 respectively compared to state sex ratio of 664,650,749 and 795 per 1,000 males respectively Thus, the aforesaid table indi- that Una district has higher percentage of urban population compared to the state, higher growth rate compared to the state but, less density of population per sq km than the state where it is 1,537 persons per sq km It, indeed, has higher female ratio per 1,000 males compared to the state average

TABLE 17

V	Una (M C)	Paints and Varnish	Vegetables	Foodgrains

24 Appendix I of the Village Directory gives tahsilwise abstract of educational, medical and other amenities available in the villages Coming first to the educational amenities available in the district, there are 265 villages in the district which have 310 primary schools, 107 villages have 113 middle schools, 49 villages have 50 matriculation level schools, 3 villages have one higher secondary school each, 2 villages have a Degree College each and there are 2 other institutions one in each villages Thus, out of 552 inhabited villages little over 50 percent or 287 villages have no educational facilities of any sort in them

Tahsilwise the educational amenities break-up can be given as follows

In Amb tahsil 104 villages have 117 primary schools, 42 villages have 43 middle schools, 23 villages have 24 matriculation schools One village has a higher secondary school and another village has a college 71 villages have no educational facilities of any sort

In Haroli sub-tahsil 32 villages have 54 primary schools, 24 villages have 26 middle schools and 9 villages have one high school each and one village has a higher secondary school only In this sub-tahsil, there is only one village which does not have any educational facilities of any level what so-ever

In Una tahsil 63 villages have 71 primary schools, 24 villages have 26 middle schools, 6 villages have a high school each and there is a college in one village and one other institution 11 villages have no educational facilities of any type what soever

In Bangana tahsil 66 villages have 68 primary schools, 17 villages have 18 middle schools, 11 villages have a high school each One Village has a higher secondary school and one village has other institutions In this tahsil, there are 204 villages which do not have any educational facility of any type

25 Regarding medical amenities in the district, 32 villages have a dispensary each One village has a Maternity and Child Welfare Centres, 4 villages have Primary Health Centres each, 35 villages have one Primary Health sub-Centre each, 24 villages have a Community Health Worker each and 48 villages have 65 other institutions in them Altogether, there are 453 villages which have no medical facility of any type anywhere

Tahsilwise, in Amb tahsil 15 villages have a dispensary each, 1 village has a Maternity and Child Welfare Centre, 1 village has Primary Health Centre, 13 villages have Primary Health sub-Centre each, 24 villages have a Community Health Worker each, 24 villages have other Institutions in each village There are 128 villages with no medical facility of any type

Haroli sub-tahsil has 4 dispensaries in 4 villages 1 Primary Health Centre in one village, 10 Primary Health sub-Centres one in each village and 27 other institutions spread over in 14 villages There are 11 villages in this sub-tahsil which have no medical facility of any type

In Una tahsil, there are 5 dispensaries one in each village, 5 Primary Health Sub-Centres spread in 5 villages at the rate of one each and 7 other institutions located in 3 villages In this tahsil there are 63 villages which have no medical facility of any type

In Bangana tahsil, there are 8 dispensaries spread one each in 8 villages, 2 Primary Health Centres one in each village, 7 Primary Health Sub-Centres one in each village and 7 other institutions spread in 7 villages In this tahsil also there are 251 villages which have no medical facility of any type what soever

26 Drinking water-wise, 313 villages have been provided with tap water, 455 provided with well water, 113 villages have drinking water through tanks, 104 villages have drinking water by tube-wells, 31 villages depend upon river water for drinking purposes, 33 villages have the facility of canal water for drinking, and 373 villages depend on other sources It may be noticed that 442 villages have drinking water sources more than one There are only 3 villages in the district which do not have any of the aforesaid facility of drinking water

Tahsilwise in Amb tahsil, 96 villages have tap water, 166 have well water, 74 villages have tank water, 38 villages have tube-well water, 20 villages have river water, 30 villages have canal water and 217 villages have drinking water source other than these 172 villages have drinking water source more than one In this tahsil, there are only 2 villages which do not have any drinking water facility of the type referred just above

In Haroli sub-tahsil 31 villages have tap water, 26 villages have well water, 6 villages have tank water, 11 villages have tube-well water, 29 villages have drinking water source more than one There are no villages in this sub-tahsil which have been deprived of the any of the aforesaid drinking water facilities

In Una tahsil 67 villages have tap water, 70 villages have well water, 10 villages have tank water, 48 villages have tube-well water, 2 villages have river water, 12 villages have other sources of water and 72 villages have drinking water source more than one

In Bangana tahsil 119 villages have tap water, 193 villages have well water, 23 villages have tank water, 7 villages have tube-well water, 9 villages have river water, 3 villages have canal water, 144 villages have other source of water and 169 villages have drinking water source more than one There is only one village in this tahsil which does not have drinking water facility of any type mentioned above

27 Regarding post and telegraph, 111 villages have post offices, 18 villages have post office with phone, 9 villages have post and telegraph office with phone and 2 villages have phone only

Tahsilwise, Amb tahsil has 45 post offices 11 post offices with phone, 2 post and telegraph offices with phone and 2 villages with 2 phones only

Haroli sub-tahsil have 17 post offices, 3 villages having post offices with phone and 4 post and telegraph offices with phones

Una tahsil has 25 villages with post offices, 3 villages having post offices with phones and one post and telegraph office with phone

Bangana tahsil has 24 villages with post offices, 1 Village has post office with phone and 2 villages have post and telegraph offices with phone

Communication-wise 303 villages have bus stops in the district Tahsilwise Amb has 98 bus stops in the villages, Haroli sub-tahsil has 32 villages with bus stop, Una tahsil has 53 villages with bus stops and Bangana tahsil has 120 villages with bus stops There are no railway stations and navigable water way in the district

29 There are 387 villages having power supply in the district Thus, only 165 villages out of 552 have no power supply so far Tahsilwise breakup being in Amb tahsil there are 131 villages with power supply, 44 villages have no power supply available in the tahsil In Haroli sub-tahsil, 32 villages have power supply Only 1 village does not have power supply In Una tahsil 66 villages have power supply available Only 8 villages have been left without power supply In Bangana tahsil 158 villages have been supplied with power and another 112 villages are yet to get power supply

There are 6 statements dealing with the various aspects of the urban areas in the Town Directory Statement I deals with status and growth history of the towns in the district Except Una Municipal Committee which is Class V town all the remaining four towns in the district are Class VI towns with very marginal urban characteristics Of the total of 5 towns, 3 are in Una tahsil and 2 in Amb tahsil Both the Notified Area Committees of Amb Tahsil i e Daulatpur and Gagret have been declared as towns in 1981 Census only Therefore, the previous figures are not available about them So also, is the Mahtpur Badsehra Notified Area Committee Townwise Daulatpur Notified Area Committee has 5 09 sq km area with 457 households only which include the houseless households Population in 1981 has been 2,336 persons and the density of population being 459 persons per sq km Sex ratio, indeed, is heavily in favour of females with 1,078 females for per 1,000 males Gagret Notified Area Committee has 18 37 sq kms area with 901 households including the houseless households Population of the town is 4,502 and the density being 245 persons per sq kms and 975 females per 1 000 males Mahtpur Badsehra Notified Area Committee has a total area of 3 80 sq kms with 759 households including the houseless households The population is 3,858 persons with density of population being 1 015 persons per sq km and sex ratio 909 females per 1,000 males Santokhgarh Notified Area Committee has 2 83 sq kms area with 831 households including houseless households Population in 1981 Census has 4,653 persons which shows an increase of 16 03 percent over 1971 Census The density of population per sq km being 1,644 persons per sq km and the sex ratio in 1971 and 1981 Census are 918 and 933 females respectively for per 1,000 males Una Municipal Committee has an area of 4 97 sq kms with total households of 2,029 including the houseless households It was a town in 1901 Census with the population of 4,746 persons In the next two successive censuses it was declassified However, from 1971 Census onwards it continues to be town all through It has the highest density of population with 1,842 persons per sq km and the highest population amongst all the towns of the district which indicates a growth rate of 44 71 percent during 1971-81

Statement II deals with physical aspects and location of the towns as in 1979 Daulatpur Notified Area Committee is located at the distance of 236 kms from state headquarters and 40 kms from Una, the district headquarters and 17 kms from tahsil headquarters i e Amb The nearest city for the town is Jalandhar which is 80 kms away and the nearest railway station is Hoshiarpur which is 40 kms away Gagret is located at the distance of 222 kms from Shimla, 36 kms from district headquarters Una and 11 kms from Amb The nearest city is Jalandhar again which is 66 kms and the nearest railway station is Hoshiarpur which is 26 kms away Mahtpur Badsehra is at the distance of 174 kms from Shimla, 12 kms from Una, 92 kms from the city of Jalandhar and 7 kms from Nangal Dam It has a navigable canal within a distance of 5 kms Santokhgarh is also at the distance of 174 kms from Shimla, 18 kms from Una, 98 kms from Jalandhar city and 7 kms from Nangal Dam It has also a navigable canal within a distance of 5 kms Una Municipal Committee is situated at the distance of 186 kms from Shimla, 80 kms from Jalandhar city and 19 kms from Nangal Dam

Statement III deals with the municipal finances as in 1978-79 Since Daulatpur and Gagret Notified Area Committees have been declared as such in 1980, no figures are available about them Mahtpur Badsehra Notified Area Committee receives Rs 48,000 00 Govt grants and that was all the receipts it had during the aforesaid period of which Rs 3,200 it had spent on general administration and Rs 8,000 00 on public works Santokhgarh Notified Area Committee receives Rs 15,500 00 through taxes, Rs 9,200 00 through taxes on municipal property, rest being predominantly Govt grants Thus the total receipts during the above period had been Rs 76,400 00 of which the committee spent on general administration 4 200 00 and on public safety 7,600 00, public health and convenience 7,000 00 and 38,100 00 on public works Una municipal committee has the total receipts of 6,41,400 00 The maximum revenue accrues through taxes and the second largest income being through Govt grants The municipal committee spends over Rs 5,00,000 00 every year bulk of which is taken by general administration, public health and convenience, public works and public safety

33 Statement IV deals with the civic and other amenities available in 1979 In Daulatpur Notified Area Committee there were 8 17 kms pucca road, 0 42 kms Katcha road Similarly in Gagret Notified Area Committee pucca road length has been 12 03 kms and katcha road 3 kms Mahtpur Badsehra Notified Area Committee has 6 kms pucca road and 2 kms katcha road Santokhgarh N A C has 4 kms pucca road and 2 Kms katcha road In Una Municipal Committee pucca road is 14 kms and katcha road 6 50 kms The sewerage systems in all the five towns in the district are OSD

There are no water borne latrines run by the local bodies However, a few do exist which is maintained by the private houses In Una Municipal Committee there are 25 service latrines run by the local authority and 500 run by private people The method of disposal of night soil in Daulatpur, Gegret, Mahtpur Badsehra and Una are ST whereas in Gagret Mahtpur Badshera and Una apart from ST, B also exists In Santokhgarh it is B and WB The sources of protected water supply in Daulatpur, Gagret, Santokhgarh and Una are T,W In MahtpurBadsehra it is T only Regarding firefighting system Una Santokhgarh and Mahtpur Badsehra depend upon Naya Nangal in Punjab Gagret depends upon Hoshiarpur and Daulatpur depends upon Sansarpur which is 25 kms away from it The electric connections have been given in columns 15 to 17 in the aforesaid statement which can be easily gone through

34 Statement V deals with the medical, educational, recreational and cultural facilities as existed in 1979 Daulatpur has only one hospital with 8 beds There is one Arts college For medical college the nearest facility available for the town is Jalandhar which is 80 kms away and for Engineering College it has the nearest Engineering College at Ludhiana which is 114 kms away Polytechnic is in Hoshiarpur which is 40 kms away and for vocational training like shorthand and typewriting the nearest facility available is at Gagret which is 14 kms away from it There is one high school, 2 middle schools and one primary school in the town Gagret NAC has one Primary Health Centre with 6 beds The nearest degree college is at Amb at the distance of 11 kms The nearest Medical College is at Jalandhar at the distance of 66 kms and the nearest Engineering College is in Ludhiana which is at the distance of 100 kms away from the town and for nearest polytechnic it depends upon Hoshiarpur There is one tailoring school in the town run by the Himachal Pradesh State Welfare Board The nearest higher secondary school is at Gondpur Banera at the distance of 16 kms High school is located at Ambota which is at the distance of 3 kms The town has one middle school and 4 primary schools, public library and a reading room Mahtpur Badsehra has one dispensary and one other type of medical institution For Degree College it has to depend upon Bhatoli which is 4 kms away For Medical College, the nearest town being again Jalandhar 92 kms away The nearest Engineering College is at Chandigarh which is 108 kms away For nearest polytechnic it depends again upon Hoshiarpur There is one tailoring centre in this town run by the State Welfare Board The nearest higher secondary school is Naya Nangal which is 5 kms away But the town has one high school and a middle school and one primary school and also has one Adult literacy Centre and one Drama/Community Hall Santokhgarh has a dispensary For Degree College it depends upon Bhatoli which is 3 kms away The nearest Medical College is at Jalandhar and the nearest Engineering College is at Chandigarh 98 and 108 kms away, respectively The nearest polytechnic is at Hoshiarpur at the distance of 58 kms For vocational training the nearest centre available is at Naya Nangal which is at the distance of 6 kms For higher secondary school it again depends upon Naya Nangal as the nearest place But, the town has two high schools 2 middle schools and 2 primary schools and one Adult literacy Centre Una Municipal Committee has one hospital with 30 beds one Family Planning Centre and one Nursing Home with 36 beds It has one Arts and Science College However, the nearest Medical College is at Jalandhar which is 80 kms away and the nearest Engineering College is at Ludhiana at the distance of 114 kms The nearest polytechnic institute is at Hoshiarpur which is 40 kms away It has 3 vocational institutions i e Rural Industrial Training Institute, Girls Industrial Training Institute and Craft Training Centre run by Nehru Yuvak Kendra and other two run by the Industries Department of the State Government There is one higher secondary school, 3 high schools, 3 middle schools and 4 primary schools and one Adult Literacy

Centre in Una town Besides, there is a library and a reading room in the town

35 Statement VI deals with the trade, commerce, industry and banking activity in aforesaid towns as in 1979 Daulatpur and Gagret NACs import foodgrains and vegetables and fruits and sugar and kerosene for local consumption whereas Daulatpur exports mango Gagret exports stainless steel Ingots, Sheets and utensils The other important items exported from Gagret town are mild steel rounds, angles and sheet metal articles Daulatpur manufactures wooden furniture, steel metal articles and agricultural implements Gagret manufactures stainless steel utensils, sheet metal articles and mild steel rounds, angles and flats Daulatpur has two banks, one agricultural credit society and 2 non-agricultural credit societies The most important import item of Mahtpur Badsehra is spirit for wine, rosin and turpentine oil and aluminium rods The most important export commodity of the town being Indian made foreign liquor and country liquor, terpene chemicals, aluminium conductors The town has 3 banks and 2 agricultural credit societies Santokhgarh NAC imports edible oil, cloth and sugar as most important items for consumption and exports vegetables and fruits, cereals and baggar ban It has 2 banks and one agricultural credit society Una Municipal Committee imports foodgrains, cloth and sugar as most important items and exports vegetables, wooden and steel furniture and sugarcane The most important items manufactured are paints and varnish, wooden and steel furniture, rosin and turpentine There are 5 banks, one agricultural credit society and 3 non-agricultural credit societies

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Village Directory :—Village Directory which is one of the traditional documents of the census has been canvassed during 1981 Census too On the basis of the information the village directory schedule can broadly be divided into three parts The first deals with the basic amenities available to a village like the education, medical, drinking water, post and telegraph, communication, power supply and market etc In this part, it has been sought to ascertain whether the above facilities exists in a village and if it does then to what extent/level If the above amenities are not available then nearest village/town with a distance where the aforesaid facilities/amenities have been made available

2 The second deals with the land use which has been endeavoured to conform to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India which has recommended the maintenance of records of land use pattern under five categories which are

1 Forests

2 Not available for cultivation
   (a) Land put to non-agricultural uses
   (b) Barren and unculturable lands

3 Other uncultivated lands excluding fallow lands
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes

4 Fallow lands
   (a) Fallow land other than current fallows
   (b) Current fallows

5 Net area sown

The source of information for the aforesaid items had been the revenue record shown/ converted into hectares

3 The third part of the Village Directory deals about the information of the places of historical, archaeological and religious importance in a village This apart, it also deals with the socio economic level of the people It also endeavours to gauge social and economic level of the people by para-metres like the number of motor cycles, scooters, jeeps, cars and tractors available in the village and the number of news papers inflow to the village

4 The first part dealing with the amenities needs elaboration which is given as under

(a) Educational Amenities The various levels of the educational amenities provided in a village has been shown for the sake of convenience in the abbreviations given as under

1	Primary and elementary Schools upto 4th classes	P
2	Junior Secondary or Middle Schools upto 8th classes	M
3	High Schools/Secondary Schools upto 10th classes	H
4	Higher Secondary Schools/ Pre-University/Junior College/ Intermediate (including 10+2 system)	PUC
5	Colleges of all types upto Graduate level and above	C
6	Industrial School	I
7	Training School	Tr
8	Adult education class/centre	AC
9	Other educational Institutions like Sanskrit Pathshala, Senior basic School, Maktab etc	O

Where there are more than one Institution of same type in a village, the same has been indicated in figures against the appropriate abbreviation e g P (3), M (2), H (2), etc where no educational facility in the village was available, the distance of next nearest village where such educational facilities exist been given in brackets with a dash viz (—5), (5—10) and (10+)

(b) Medical Amenities Anyone of the following amenities available in the village has been shown in abbreviations against the name of each medical institution

1	Hospital	H
2	Maternity and Child Welfare Centre	MCW
3	Maternity Home	MH
4	Child Welfare Centre	CWC
5	Health Centre	HC
6	Primary Health Centre	PHC
7	Primary Health Sub-Centre	PHS
8	Dispensary of all types	D
9	Family Planning Centre	FPC
10	T B Clinic	TB
11	Nursing Home	NH
12	Registered Private Practioner	RP
13	Subsidised Medical Practioner	SMP
14	Community Health Worker	CHW
15	Others	O

2 In the aforesaid Health Centres of various levels family planning advice and clinical facilities may also be available which have not been shown separately If there are more than one Institution of same type in the village, the same have been indicated in number against the abbreviation e g H (2), D (3) etc In view of a variety of medical amenities for which a number of codes as above have been suggested, it would not be possible to provide too many details under each such amenity Thus all Registered Medical Practioners whether Ayurvedic, Unani or Allopathic have been covered under the code "RP" It would be appropriate to mention that the term' 'Community Health Worker' does not refer to workers in extension programmes like Malaria eradication, Agriculture etc It refers to only those para-medical personnel who have been trained for dispensing medicines for minor ailments Where no facility is available within the village a dash (—) has been shown in the relevant column But next to it in brackets, the distance in broad ranges viz —5 kms , 5—10 kms and 10+ kms of the nearest place where the most modest medical amenity like Dispensary, Community Health Worker, Primary Health Centre or Primary Health Sub-Centre or Hospital is available has been given

(c) Drinking Water Amenities The types of the potable drinking water supply sources available within the village have been given in the abbreviations as under

1	Tap water	T
2	Well water	W
3	Tank water	Tk
4	Tubewell water	Tw
5	Hand pump	Hp
6	Fountain	F
7	Canal/Kuhls	C
8	River water	R
9	Lake	L
10	Nullah	N
11	Other sources (like baories etc)	O

(d) Post & Telegraph Amenities ; Post & Telegraph has been given the abbreviations as under

1	Post Office	PO
2	Telegraph Office	TO
3	Post & Telegraph Office	PTO
4	Telephone Connection	Phone

(e) Day/Days of the Market/Hat ; No such traditional practice exists in the entire district

Communications — This indicates the type of communication amenities either by bus, railways or navigable water way available to the village, the abbreviations adopted are given as under

1	Bus	BS
2	Railway Station	RS
3	Navigable water way (including river, canal)	NW

2 If any one of these amenities were not available to the village then the nearest such facility available with a distance in brackets is given viz (—5), (5—10) and (10+)

(f) Approach to village : The approach to village refers to the state of road etc leading to the village This is to see whether the village is approachable by pucca road or katcha road or by navigable canal or water way or both The approach to village is to be indicated by the following codes

1	Pucca Road	PR
2	Katcha Road	KR
3	Navigable River	NR
4	Navigable Canal	NC
5	Navigable water way (other than river or Canal)	NW
6	Foot Path	FP

If there is more than one such facility the same has been indicated separately by individual codes

(g) Nearest Town and Distance The distance of nearest town is given in Kms in brackets This has been filled in purely on the basis of local enquiry The nearest town so indicated need not be within the state itself The nearest town even in another states has been indicated wherever necessary alongwith the name of the state Further, operational convenience has been taken into consideration while showing the nearest distance of town

(h) Electricity Supply If the electricity is actually available whatever may be the form of its use it has been shown as available The codes used for various category of electricity are as under

1	Electricity for domestic purpose only	ED
2	Electricity for agriculture purpose only	EAg
3	Electricity for other purposes like industrial, commercial etc only	EO
4	Electricity for all purposes listed above	EA

(i) Staple Food Here the terms staple food has been used only in terms of grains and no other food material The name of the grain consumed by the inhabitants for the major part of the year has been treated as staple food of the inhabitants, where it was not possible to pin-point the foodgrain or in other words, where the inhabitants have been using more than one type of foodgrain more than one names have been given

land Use —As already stated the total area of the land in its 5 broad categories has been compiled from the revenue records In the first category, types of land under forests has been indicated and in the second and third information about cultivated area, irrigated or un-irrigated has been shown The irrigated area has been further split up as per the sources of irrigation Fourth being the area under cultivable waste which includes meadows groves and pastures etc Lastly the area not available for cultivation such as residential area, paths and unculturable waste etc has been given

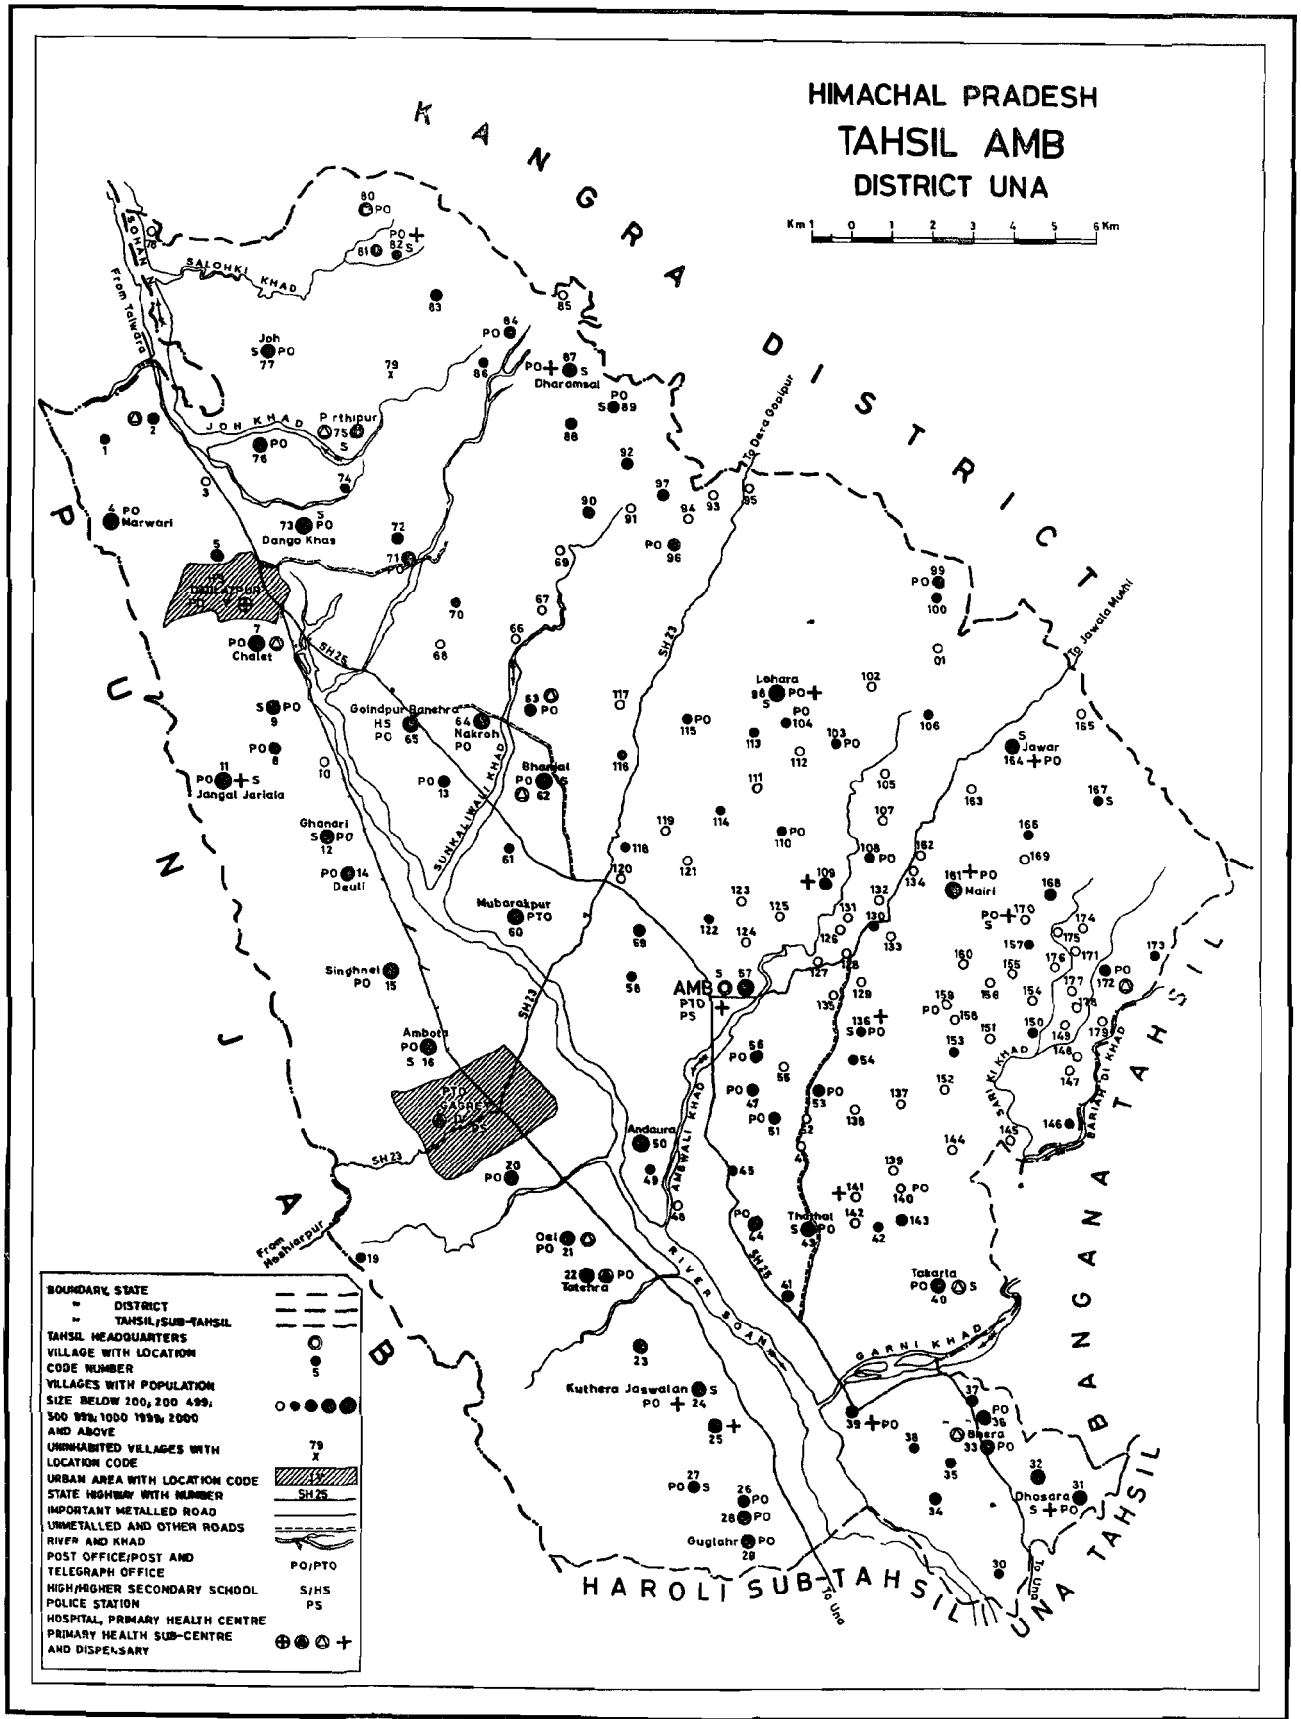

Abbreviations used for various sources of irrigation are detailed below

1	Government Kuhl/canal	GC
2	Private Kuhl/canal	PC
3	Well (Without electricity)	W
4	Well (With electricity)	WE
5	Tubewell (Without electricity)	TW
6	Tubewell (With electricity)	TWE
7	Tank	Tk
8	River	R
9	Lake	L
10	Waterfall	Wf
11	Others	O

Abbreviations used for the information collected in part C of the Village Directory are explained below

1	Copies of news papers coming in the village	N
2	Motorcycles/Scootors available in the village	M
3	Cars/Jeeps available in the village	C
4	Tractors available in the village	T

SECTION II-TOWN DIRECTORY

As already dealt in the preceding pages the information about Town Directory is being presented in six statements each dealing with a particular set of information in respect of all the urban areas of the district In addition to these statements another statement IV A depicting the data for the slum areas of the towns having a population of 50 000 or more has also been included Certain improvisations have been carried out in comparison to 1971 Town Directory in most of the statements keeping in view the requirement of the data for various purposes and convenience for its analysis

2 The statement I relate to status and growth of the towns since 1901 census This statement has been divided into two parts The first from column 1 to 5 deals with the locational and area particulars whereas columns 6 to 19 deal with the demographic particulars The column 6 gives number of households including houseless households whereas columns 7 to 15 give population of the towns since 1901 The column 16 gives density of population per sq km as per 1981 census Columns 17 to 19 depict sex ratio in three Censuses since 1961 Census In this statement class of the town area in sq kms and number of households density and sex ratio since 1961 are the new additions

3 Statement II deals with the physical aspects and location of towns Broadly this statement can be divided into two parts first dealing with rainfall and temperature data (columns 3 5) while in the second part (columns 6 12) name and distance from state headquarter District headquarter sub division/Tahsil head quarter nearest city with a population 1 lakh and more Railway Station Bus route and Navigable river/canal (if within 10 Kms) have been presented in respect of each town In column 2 the class of the town has been added this time to facilitate the analysis

4 The Rainfall data has been obtained from the Rainfall Table published by the Revenue Department and is based on the average of last 10 years from 1971 to 1979 Information for other columns have been obtained from the local bodies

5 Statement III Data relating to civic administration status and municipal finance for the year 1978 79 has been presented in this statement In column 3 the civic administration status in 1980 has been given whereas in columns 4 to 10 income of the local body from various sources has been presented and in columns 11 to 17 expenditure on various items is given These figures have been given in oo with a view to save the printing space The class of the town has been added in column 2 Information for this statement has been collected from the concerned local body

6 Statement IV—The statement contains 19 columns Columns 2 to 6 are the new additions of this statement The staement on the one hand depicts general information about the towns like class of the town population Scheduled tribes population and road length in Kms on the other hand elicit information relating to system of sewerage No of different types of latrines method of disposal of nightsoil protected water supply availability of fire fighting service and number of electric connections of different types System of sewerage and method of disposal of Night soil are being presented upto two methods whereever available in order of importance and information of number of private latrines is based on estimates as no actual information was available with local authorities The categorization of electric connections is based on the record maintained by the Himachal Pradesh Electricity Board The source for this information being the Public Works Department local bodies and Himachal Pradesh Electricity Board

7 Statement IV—A information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50 000 has been presented Shimla is the only town which falls under this category This information is required to be presented in respect of each slum separately The information relates to population of the slum paved roads system of sewerage number of latrines method of disposal of nightsoil number of tap point/public tyrants and number of domestic connections road lighting points and others The main source for this information is the concerned local body

8 Statement V—In this statement information relating medical facilities educational facilities recreational and cultural facilities has been presented Broadly this statement can be divided into 4 parts In part one particulars relating to class and population has been given Part two which contains column 4 and 5 relates to various types of medical facilities and number of beds in each type of medical institution Column 6 to 15 deals with the various types of educational facilities available Where these facilities were not available the distance from the nearest place where it is available has been given It may also be mentioned here that in case o composite schools like Hr Secondary Schools having high Middle and Primary Classes the same have been consider ed against each level In column 15 the other includes institutions like Sanskrit institutions etc The fourth parts deals with the columns 17 to 20 where in particulars relating to recreational and cultural facilities have been presented

9 Columns 2 and 3 deals with class of town and columns 15 and 16 deal with Adult Literacy Centres and working women s hostel with number of seats are the new additions this time Information for this statement has been collected from the Chief Medical Officer District Fducation O ncer Industries department Social welfare department and the respective local bodies

10 Statement VI The statement depicts information relating to three most important commodities imported exported and ma ufactured number of banks and number of agricultural and non agricultural credit socities All the columns of the 1971 Town Directory have been retained and column relating to class of the town has been added this time The commodities have been mentioned in order of valume Information for this statement has been primarily collected from the Industries Department concerned banks cooperative department and the concerned local body

11 For determining the class of towns the population of each town during 1981 Census has been considered The following are the ranges for determining the class of the town

Population range	Class
Less than 5 000	VI
5000 9 999	V
10 000 19 999	IV
20 000-49 929	III
50 000-99 999	II
1 Lakh and above	I

PART B-PRIMARY CENSUS ABSTRACT

Primary Census Abstract In this part basic population figures in respect of each village in case of rural areas and for each block in case of urban areas have been presented in 28 columns for each tahsil/town separately Information relating to persons seeking/available for work is not being presented as contemplated earlier in columns 29 and 30 of this statement In Census terminology this statement is called Primary Census Abstract

2 This Abstract can broadly be divided into five parts In the first part which contains first two columns, locational particulars in respect of each village/block have been given The first column relates to code number which has been assigned to each village within each tahsil in a particular geographical order and for each block within a town In the second column, name of each village in English and Hindi, has been given alongwith its Hadbast number In urban areas, the block number has been given in this column

3 The second part of the statement relates to the information pertaining to total area number of occupied residential houses, number of households sexwise distribution of population, sexwise population of Scheduled Castes/Tribes and literacy figures of each village and for each block in case of urban areas In other words, this part primarily deals with demographic and social aspect The 3rd column deals with the total area of the village in hectares as maintained in the village revenue records For urban areas total area in Sq Kms down to ward has been presented In column 4, total number of occupied residential houses have been presented In this column information relating to vacant and other houses which are being used for non-residential purposes, has not been included This information is based on Abridged Houselist of 1981 enumeration unlike such other particulars which are based on Houselist Column 5 deals with the total number of households in the village/block Columns 6-8 deals with the 1981 Census total and sexwise population figures of that village/block These columns include houseless and institutional population also In column 9-12 sexwise population of Scheduled Castes and Scheduled Tribes have been presented Columns 13-14 deals with sexwise literacy figures

4 The fourth part from columns 15-26 deals with the working population In columns 15-16 sexwise main workers have been given whereas from columns 17-24 information relating to these workers into 4 broad categories of workers by sex have been presented These categories include workers engaged as cultivators, agricultural labourers, household industry and the remaining workers which fall under the industrial classification in category III IV, V (b), VI to IX It may be noted here that particulars about these cotegories of workers are not being presented in the Primary Census Abstract itself separately In columns 25-26 sexwise particulars of marginal workers have been presented These workers are other than the main workers and were engaged in economic pursuits for only some portion of the year The definition of which has been given in the analytical portion of this book This information is being presented in the Primary Census Abstract for the first time

5 The fifth part deals with the persons who are economically inactive and are dependent on others This information has been presented In columns 27 and 28

6, The district abstract of this information has been presented first and thereafter data in respect of each tahsil has been presented by rural and urban components separately
