FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to Village and Town Directory, Part B to Village and Town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new

items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration atus and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains Village and Town Directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/ Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

NEW DELHI :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development Officers and the Vice-Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the district during the decade. District and C.D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office Sarvashri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N. M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computors and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the PCA Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, happened to be in charge of printing and for sometime also looked after the D.C.H. section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Job Printers, Allahabad who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

The district of Sitamarhi, which till the 1971 Census was a part of Muzaffarpur district, was created and formally inaugurated on the 11th of December, 1972. The newly created district is situated in the northern part of Tirhut Division and has an area of 2,643.0 square kilometres. It is surrounded by Nepal in the north, Darbhanga and Madhubani districts and part of Nepal in the east, East Champaran in the West and Muzaffarpur district in the south. It is spread lengthwise from east to west covering about 55 Kms. and in north and south about 48 Kms. in breadth. The district consists of two subdivisions namely, Sitamarhi West and Sitamarhi East. While the former has eight Community Development Blocks, viz., Dumra, Runisaidpur, Belsand, Sheohar, Piprarhi, Bairgania, Majorganj and Riga, the latter consists of seven namely Bathnaha, Sonbarsa, Parihar, Sursand, Pupri, Nanpur and Bajpatti. The total geographical area of the district is 2,643.0 Sq. Kms. consisting of 15 Community Development Blocks, 15 Revenue Anchals, 133 *Halka* Offices and 273 Gram Panchayats covering 1,053 revenue *Mauzas*/ villages.

Before the reorganisation of the districts came into effect, the old district of Muzaffarpur was divided into three subdivisions with their headquarters at Muzaffarpur, Hajipur and Sitamarhi. The subdivisional headquarters of Sitamarhi was located at Sitamarhi town until 1935. The town of Sitamarhi faced one of the worst natural calamities in the month of January in the year 1934 when it was rocked by the earthquake. The earthquake, which lasted for only one minute and a few seconds, had disastrous effects. Buildings were reduced to debris and fissures and depressions occurred all around. The roads of Sitamarhi were damaged extensively and the town was completely cut off for some time. Rail communication was dislocated and at places railway lines were twisted and they lost the original alignment. The topography changed considerably and the town of Sitamarhi was so badly damaged that at one time it was feared that it would have to be abandoned as unsafe for rebuilding purposes. As a sequel to this havoc and apprehension the subdivisional headquarters and courts were shifted to Dumra in 1936, five kilometres away from Sitamarhi town. Since then the subdivisional headquarters has continued at Dumra and even after the upgradation of the subdivision to the status of a district the headquarters of the subdivision as well as the district is located at Dumra.

Sitamarhi is a sacred place in Hindu mythology. Tradition has it that Sita sprang to life out of an earthen pot while Raja Janak was driving his plough somewhere near Sitamarhi town. The tank, called the Janaki-*kund*, is still pointed out as the place out of which she is said to have emerged. But Punaura, a village about five kilometres to south-west of Sitamarhi town, also stakes its claim as the birth place of Sita. The town, however, contains no relics of any archaeological interest. The temple of Janaki, i.e., Sita the daughter of Raja Janak, is apparently modern and not more than 100 years old. It contains three stone figures with eyes of mother of pearl which represent Rama, Sita and Lakshaman. The legend associated with the temple mentions, however, that it occupies an old site. It is said that Raja Janak excavated a tank at the place where Sita sprang to life and after her marriage set up the figures of Rama, Sita and Lakshaman to mark the site. This tank is known as the Janaki-*kund* just to the south of the Janaki Mandir. In course of time, the land lapsed into a jungle until about 500 years ago, when a Hindu ascetic, named Birbal Das, came to know the site by divine inspiration where Sita was born. He came down from Ayodhya and cleared the jungle and found the images set up by Raja Janak. He built a temple over them and commenced the worship of Janaki or Sita. The income of the temple is mainly derived from the offerings by the pilgrims. In the same compound there are three other temples of Hanuman, Mahadeo and Ganesh which are quite modern. To the south of the main temple stands a mausoleum erected over the ashes of the first three Mahanths, Birbal Das and his two successors. The entire campus

of these temples is popularly known as Janaki Asthan and is of great religious importance where hundreds of Hindu devotees go everyday and perform *puja*. Vivah Panchami and Ram Navami, commemorating the marriage of Sita to Rama, and the birth of Rama respectively are celebrated at Sitamarhi with great eclat. Vivah Panchami is observed to celebrate the marriage anniversary of Rama and Sita every year on the fifth day of Shukla Paksha in the month of *Agrahayan*. On this occasion people, mainly ladies from far and wide throng at Janakpur and Sitamarhi. A cattle fair is also organised on this occasion. Ram Navami is observed to celebrate the birth anniversary of Rama considered to be an incarnation of Lord Vishnu. It is observed every year on the 9th day of Shukla Paksha in the month of *Chaitra*. On these two occasions the congregation is regaled with stories about the adventures of Rama who had conquered Lanka and killed the demon king Ravana. Religious dramas and dances depicting episodes from Rama's life, known as Ramlila, are organised.

Natural features

Topographically, the district forms a part of the Bihar plains and it is almost completely levelled and at no point does its elevation exceed 80 metres above the sea level. The only diversities seen on the surface are those caused by the fluvial action of the rivers. The important rivers of the district are Bagmati, Lakhandei and Adhwara group of rivers. It has therefore all the advantages and disadvantages of being surrounded by rivers which are flooded during rains and mostly dry during summer.

The district can be divided into four natural divisions, as under—

(i) *Land lying between Bagmati and Lakhandei*—The area is generally low lying and prone to floods. Paddy and wheat are the main crops in the area covering Sheohar, Piprarhi, Runisaidpur, Belsand, part of Bairgania and Dumra blocks.

(ii) *North-East region*—The area is very low lying and always affected by flood in river Bagmati. Parts of Bathnaha, Riga, Majorganj and Dumra blocks form part of this region.

(iii) *Area lying between Adhwara group and Lakhandei river*—There are many '*chaurs*' in this area. This area covers Bathnaha, Sonbarsa, part of Parihar, part of Sursand, Bajpatti, Nanpur and part of Pupri blocks.

(iv) *Area lying between Adhwara and Nepal*—This area is famous for mango orchards and bamboo groves. The fertility of this area is high. This region covers Sursand, Pupri and Parihar blocks.

Climatic conditions

Rainfall normally ranges between 1,100 mm and 1,370 mm in the district. The maximum temperature ranges between 32.2°C and 40.5°C. Humidity becomes high in the rainy season in north-east region due to its proximity to the Himalayas. The district also gets some winter rain which improves the prospect of *Rabi* cultivation.

Soil

The soil of the district can be classified as loam, sandy-loam, clay and clay-loam in different regions. In the Bagmati zone alluvial soil is found which is very good for *Rabi* cultivation. The soil of the district is rich in mineral elements except zinc needed for good crops.

Cropping pattern

The main crops of the district are paddy, wheat and *Khesari*. Besides gram, oil-seeds and other pulses are also grown. *Marua* and *Bhadai* paddy are two main *Bhadai* crops. Sugar-cane is cultivated in about ten thousand hectares of land to feed the only sugar mill of the district namely Balsand Sugar factory, Riga. During the last ten years due to special *Rabi* drives, introduction of high yielding varities and increase in agricultural facilities the area under *Rabi* cultivation has shown appreciable increase. The area under sugar-cane cultivation has almost doubled compared to what it was about ten years before.

As a result of *Kharif* and *Rabi* drives launched every year by the Agricultural Department of the State Government there has been

perceptible improvement in land use, cropping pattern, scientific cultivation, use of improved seeds, chemical fertilisers and plant protection in the district. This has resulted in substantial overall increase in agriculture production and the district has become self-sufficient in respect of rice. Improved variety of paddy and wheat seeds are available at the Seed Multiplication Farms (of 25 acres each) in all the 15 development blocks of the district. Besides, there is a 50-acre subdivisional farm situated at village Muradpur. All these farms are running in profit. Fertiliser Depots have been set up in all the blocks of the district. A team of subject matter specialists is posted here to look after the agricultural production programme of the Government.

Irrigation facilities

In matters of irrigation this district is still very backward. Out of 219,469 hectares of cultivable land only 22,254 hectares of land is under assured irrigation. Consequently the cultivators have to make own arrangements to irrigate their crops. There are 7,488 private tube-wells, 1,399 bamboo-boring tube-wells and 7,114 private diesel pump sets available with the progressive cultivators of the district. The State Government has provided a few types of irrigational facilities for the cultivators of the district, viz. —

(*a*) *State Tube-wells*—From the very beginning till date the State Government has sanctioned 200 State tube-wells for the district. Out of the sanctioned number, 197 State tube-wells have been drilled. Remaining three State tube-wells are yet to be drilled. Out of the drilled State tube-wells, 137 State tube-wells are energised and *pucca* drains have been constructed in 76 State tube-wells. When all these State tube-wells are completed in all respects these would provide irrigation in 20,000 hectares of land.

(*b*) *Minor Irrigation*—There is great scope for minor irrigation works in this district. Till 31st August, 1981, 19 lift irrigation schemes had been completed and work in 85 schemes was in progress. In addition, work in 12 medium irrigation schemes are also in progress.

(*c*) *Bagmati Project*—River Bagmati, rising in Nepal, near Kathmandu, enters Sitamarhi district 3 kilometres north of Dheng station on the N. E. Railway and 27 Kms. north-west of Sitamarhi. The river being a hill-stream, rises so quickly after heavy rain that its banks are unable to contain water and the entire area is flooded causing great damage to the standing crops. In order to tame this river and provide assured irrigation to about 3 lakh acres of land falling within its command area Bagmati Project has been sanctioned. Though the work in the project started sometimes in the year 1975 it could not make much headway due to change in the course of the river. In January, 1980 the project authorities have submitted an integrated plan and estimate to the Central Water and Power Commission for approval. Once completed this project would provide assured irrigation to about 3 lakh acres of land.

Flood protection scheme has also been taken up as a part of this scheme. The Project authorities have constructed 25 Kms. of embankment on either bank of the river. As a result Sheohar, Piprarhi and part of Riga blocks have been saved from the onslaught of devastating flood.

Education

The district of Sitamarhi, is still not ver much developed in respect of educational facilities. The total number of schools consisting of high, middle and primary educational institutions is 1,491 only.

It is very significant to record that total number of boys and girls estimated in the age-group of 6–11 years is 219,615 out of which only 140,210 boys and girls are enrolled in the district.

Industry and Trade

Sitamarhi is mainly an agricultural district with more than 90 per cent of population engaged in agriculture. The main industries and trade are also agro-based. Among the important industrial units of the district mention can be made of the Belsand Sugar Factory at Riga which has been running since 3rd April, 1933. This factory has a daily crushing capacity of 850 tons of sugar-cane per day and provides employment to about one thousand persons during the crushing season. A number of rice mills are

also located in the district. There are 19 such big modern rice mills, important among these being Sri Sitaram Rice and Oil Mills, Bairgania, Shri Janki Rice and Oil Mills, Janakpur Road (Pupri), Shri Lakshmi Rice and Oil Mills, Janakpur Road (Pupri), Shri Chaurasia Rice and Oil Mills, Sitamarhi. Besides, about 400 single-hullers are distributed all over the district for dehusking paddy. It is a seasonal industry and the labour force mostly comes from the rural population.

After independence the development of industries in the small scale sector has been receiving the attention of the Government and a District Industries Centre has been set up in the district in order to help and assist the entrepreneurs to set up industries by making available to them the technical know-how, project-profiles, arrangements for finance, working capital, raw material, etc. This centre has surveyed and prepared a list of prospective industries to be set up in the district. Action plan has already been prepared for setting up 195 resource-based and demand-based industries in the district.

Apart from small scale units, rural artisans are being encouraged to pursue their traditional vocation, increase production and attain self-sufficiency. With this end in view a survey of rural artisans was conducted in each block of the district and they have been identified. According to this survey there are 11,852 rural artisans engaged in various traditional occupations.

Besides, one Industrial Training Institute running at Sitamarhi the rural youth, particularly young rural artisans, are being given six months' training under the scheme "Training to Rural Youth for Self Employment" and they are being given financial assistance in the shape of loan from Commercial Banks and Government subsidy thereon. The Industries Department is also imparting such training separately. The rural artisans are being given financial assistance in the shape of loan to acquire improved tools and machinery, procure raw materials and improve their production under various rural development plans launched by the Government. All-out efforts are being made to develop this district industrially.

As regards trade, the most important item is rice—both milled and hand-pound. Bairgania Bazar, Sonbarsa Bazar, Pupri and Parihar are the most important centres of rice trade. These areas are surplus in paddy production. The other important items are pulses and *Tisi* (Linseed). Trade in *Sal* wood, which is mostly obtained from Nepal, is also significant.

Livestock

The present livestock position of the district according to Livestock Census of 1977 is as under—

(i)	Cattle	..	276,161
(ii)	Buffaloes	..	109,057
(iii)	Sheep	..	20,023
(iv)	Goats	...	236,100
(v)	Poultry	..	78,159
(vi)	Horses	...	1,235
(vii)	Donkeys	...	411
(viii)	Mules	...	Nil
(ix)	Camels	...	Nil
(x)	Pigs	...	3,987
(xi)	Others	...	37

The above statistics of livestock of the district indicate that the number of cattle is fairly high in the district. The population of goats and buffaloes is also fairly high. But these are of common variety. Some well-to-do persons purchase she-buffaloes of improved variety in the cattle-fairs. The small Farmers Development Agency, Sitamarhi has been also instrumental in purchase of a large number of buffaloes and bullocks. The people of the area have not taken to poultry farming on large scale.

No special fodder or grass is grown on an extensive scale for feeding the cattle. Straw from paddy, wheat husk, leaves of maize and sugar-cane provide fodder.

A veterinary hospital is functioning at Sitamarhi, the district headquarters, alongwith 15 Class I veterinary dispensary located at each of the block headquarters to provide veterinary medical aid and treatment of cattle. Each Class I veterinary dispensary is under the charge of one Touring Veterinary Doctor. In addition, in each block of the district three veterinary sub-centres have been established which are under the charge of Block Animal Husbandry Officers. The general condition of livestock is moderately fair in the district.

For improvement of the breed of the cattle an Artificial Insemination Centre has been set up at the District Veterinary Hospital. Arrangement for artificial insemination have been made at each of the block headquarters. The entire Animal Husbandry Programme of the district has been put under the charge of the District Animal Husbandry Officer.

Public Health

With the upgradation of Sitamarhi subdivision as district in the year 1972-73 the subdivisional hospital of Sitamarhi was also upgraded as the district hospital. There are a number of dispensaries known as Primary Health Centres and Health Sub-centres located in different blocks of the district. Apart from allopathic dispensaries the district has a few Ayurvedic dispensaries also. Some of the State dispensaries are quite old and started before 1950.

Land Revenue and Land Reforms

The district had Permanent Zamindari System of Land Revenue Settlement before the abolition of Zamindari System. The State Government has acquired the Zamindaris and the intermediary system between the *raiyat* and Government has since been abolished. But the early history of Land Revenue System of the combined district of Muzaffarpur prior to 1875, when it was separated from Darbhanga is very interesting. The first assessment of land revenue in Tirhut Division was made in 1582 by Raja Todar Mal, the famous Diwan of Akbar, consequently an area of 81,737 acres in Tirhut was settled at a revenue of Rs. 1,163,020. Subsequently, during the reign of Aurangzeb in 1685 the above assessment was raised to Rs. 1,798,576. Again in the year 1750, during the time of Nawab Alivardi Khan of Bengal, the land revenue assessment was reduced to Rs. 1,648,142. From the *Farman* of Aurangzeb, issued in the thirteenth year of his reign, it appears that Tirhut included 102 Mahals. From the same *Farman* it appears that the Mughal revenue administration conferred the office of Kanungo for the whole of Subah Bihar on three persons only. They used to collect the revenue of the whole Subah and receive 8 annas per hundred rupees as remuneration besides 'dastur' and 'nankar'. A subsequent *Farman* issued in 1783-84 by Shah Alam confirmed the descendents of the above three persons in the office of Kanungo for the whole of Bihar on the same terms and conditions.

By the Diwani Grant of 1765 the right of collecting revenue in Bengal, Bihar and Orissa was transferred to the East India Company. But actually collection continued to be in the hands of the Nawab's Officers. The East India Company appointed Raja Sitab Roy to supervise the revenue collections in Bihar. The dual control resulted in much confusion and apprehension to tenure-holders. Hence, in 1769 European Supervisors were appointed. In 1770 a Revenue Council was established at Patna, and it was decided to transfer the control of revenue collection to the servants of the East India Company. Accordingly, in the year 1771 a European Collector was appointed in Tirhut for the first time. But this experiment failed and in 1772 European agency was replaced by Indian *amils* under the control of a Provincial Council at Patna and quinquennial settlement of land was made. This experiment also failed. Hence, annual settlement was made from 1778 to 1780. But this system also proved to be a failure and Tirhut was again placed under a European Collector in 1782. Francois Grand was appointed Collector of Tirhut in 1782. Annual settlement of land continued till 1789. During this period, the Collector had to face immense difficulties both in the matters of settling revenue and realising it. In the year 1783 the Board of Revenue at Calcutta deputed Mr. John Shore to Patna for effecting a new settlement of the province of Bihar. The Collector of Tirhut was accordingly asked to prepare immediately a Jamma Wasul Baky of the 'mahals' of his district. In May 1789, the Governor-General in Council resolved to carry out the orders of the Court of Directors for a new settlement of Bihar for a period of ten years, which if approved by the Court, would become permanent without any further change or modification. The Zama which each Zamindar was to pay, was to be fixed by the Collector on fair and equitable principles. Although systematic attempts were made to collect information and make settlements on the principles of equity and fairness but the decennial settlement was concluded more hastily than steadily with the result that when permanent settlement was effected in 1793 about sixty per cent of the total area of the district escaped settlement. The total land revenue fixed

was Rs. 9,83,642 out of which Rs. 4,36,000 represented the demand of the old district of Muzaffarpur. Subsequently efforts were made to cover up the unassessed land by resumption of revenue-free grants. Nevertheless, all-out efforts were also made to make the Revenue Records up-to-date and consolidate the Permanent Settlement. The Revenue Sales Act of 1850, the Land Registration Act of 1876, and the Estates Partition Act of 1876 were enacted. The implementation and enforcement of the provisions of these Acts enabled the British Government to prepare Revenue Rolls and other details of proprietors of Revenue-paying and Revenue-free estates on scientific line.

Before the enactment of Land Reforms Act, 1950 there were, thus, three categories of estates in the district of Muzaffarpur, namely, (i) Revenue-paying Estates, (ii) Revenue-free Estates and (iii) Government Khas Mahal. Revenue-paying Estates numbered 25,575 yielding a total revenue of Rs. 9,58,539-12-3, and Government Khas Mahal numbered 52 with a total revenue of 97,792-10-4.

Land Reforms

Abolition of Zamindari—The problems relating to the land revenue system had engaged the attention of the publicmen in Bihar and Bengal where the Permanent Settlement of 1793 prevailed. Towards the end of 1938 the Government of Bengal had appointed a Land Revenue Commission to examine the existing land revenue system with particular reference to the permanent settlement. After examining the question in all its aspects the Commission gave its report in 1940. The serious defects in the Zamindari system were pointed out and the Commission recommended abolition of Zamindari system and replacing the same by Raiyatwari system for improving the economic condition of the cultivators. With the Congress Ministry in Bihar this question was actively taken up. As the vital interest of the State required immediate steps to be taken up for improving the agricultural production and the condition of cultivators the Legislature enacted various laws such as amendments to the Bengal Tenancy Act, the Chhotanagpur Tenancy Act, Bakast Dispute Settlement Act, 1947, etc. The Bihar State Management of Estates Bill, 1947 and the Bihar State Acquisition of Zamindari Bill, 1947 were also passed. Two years later the Bihar State Management of Estates and Tenures Act, 1949 (Bihar Act XXI of 1949) was passed. The Bihar Abolition of Zamindari Act, 1948 received the assent of the Governor-General on the 6th July, 1949. The validity of the Act was challenged and while petitions were pending in the High Court the State Act was repealed by the State Legislature and another measure called the Bihar Land Reforms Bill, 1949 was introduced in the month of December, 1949. This bill was passed and became later the Bihar Land Reforms Act, 1950, on the 25th of September, 1950. The Land Reforms Act, 1950 was also challenged. Parts of the Act were declared *ultra vires* by the Patna High Court. The Constitution was amended by the Constitution Amendment Act, 1952. Even after the amendment of the Constitution, the Act was challenged but the Supreme Court declared the Act to be *intra vires* except for some minor sections. The State Government later decided to take over the entire Zamindaris. Under the provisions of section 3(b) of the Bihar Land Reforms Act, 1950 all the estates and all the tenures had passed to and become vested in the State with effect from the 26th January, 1955.

At the time of vesting of Zamindari into the State there were 12,102 proprietors, tenure-holders and under tenure-holders in the district of Sitamarhi (then a subdivision) with a collectable rental demand of Rs. 8,11,083.16 only. The take over of Zamindaris which commenced in 1952 was finally complete in the year 1956. The implementation of the provisions of the Land Reforms Act involved a lot of difficulties at the initial stage for the local administration. However, these were got over through the perseverance of the local revenue administration, the annual rental demand was firmed up and the new revenue system started functioning properly.

Infrastructure

Railways—The district is served with a single metre-gauge line, viz., Samastipur-Darbhanga-Narkatiaganj line of the North-Eastern Railways. This railway line enters the district after Jogiara Station and, passing through Sitamarhi town, leaves the district after Bairgania Station. It serves the important places of the district, viz., Pupri, Sitamarhi, Riga and Bairgania. The name of the station for Pupri is Janakpur Road. From

this station a District Board road leads to Janakpur, a place of pilgrimage in Nepal territory.

Roads—After the upgradation of Sitamarhi as a district about 740 Kms. of District Board Roads were transferred to the newly created District Board, Sitamarhi. However, the soft soil and floods, the latter being an annual feature in many areas of the district, have always posed a problem for the better maintenance of the roads. Some of the important PWD, REO and District Board roads of the district are as under—

(i) *Muzaffarpur-Sitamarhi Road* (*Road no.* 1) —This road connects Muzaffarpur with Sitamarhi. The length of the road is 61 Kms. This road passes through the important villages of Runisaidpur, Morsand, etc.

(ii) *Sursand Road* (*Road no.* 23)—This is an important road with a length of 51 Kms. It starts from Bishunpur and passes through the important village of Gaura, Koili, Nanpur, Bahera, Pupri, Sursand and joins Bela road no. 34 at Parihar.

(iii) *Pupri Road* (*Road no.* 24)—This road starts from Sitamarhi and joins Pupri and then leads to Madhubani district.

(iv) *Sheohar Road* (*Road no.* 25)—The road starts from Sitamarhi and connects Sheohar, an important Thana and Block headquarters. The road is 25 Kms. in length.

Besides, there are number of other roads connecting different parts of the district. All the above mentioned roads are metalled. All the block headquarters of the district except that of Bairgania block, are connected with roads. However, during rains road communication is severely affected, the frequent visitations of floods damage the roads very badly.

Market-complex and Storage

The district has been divided into five zones by the Agriculture Produce Marketing Board with regulated markets at Sitamarhi, Pupri, Sursand, Sonbarsa and Bairgania.

(i) The Pupri regulated market covers the market areas of Nanpur, Pupri, Bajpatti and Runisaidpur police stations with the principal market yard at Pupri and sub-markets at Bajpatti, Nanpur and Runisaidpur.

(ii) The Sitamarhi regulated market covers the market areas of Sitamarhi, Dumra, Bathnaha and Riga police stations. The market yard has already been constructed and primary business transferred to the market yard.

(iii) The Sonbarsa regulated market yard covers the market areas of Bhutahi and Sonbarsa.

(iv) The Sursand regulated market covers the areas of Sursand and Parihar Bela.

(v) The Bairgania regulated market covers the areas of Bairgania, Dheng and Majorganj.

Institutional Finance Agencies

Adequate provision of rural credit for the socio-economic development of rural population is of paramount importance. The nationalisation of commercial banks was done mainly with a view to providing easy credit to the rural masses and better their lot. Besides, Regional Rural Bank has been set up exclusively for the credit requirements of weaker section of the population. Lead Bank Scheme has also been introduced and the Central Bank of India is the Lead Bank for this district. At present there is provision of one Bank for 20,000 population. But the Government is going to expand it at the rate of one bank for ten thousand population in near future. Presently, there are altogether 81 branches of different commercial banks, Regional Rural Bank, Land Development Bank and Central Co-operative Bank operating in the areas of different blocks of the district.

Social Welfare Plans

A number of Social Welfare Programmes have been launched in the district. Since independence a large number of schemes for the welfare of scheduled castes and backward class have been taken up. The Statewide scheme of old-age pension has been implemented in Sitamarhi district also. Widows and indigent persons have also been brought within the fold of the scheme.

A number of other schemes such as National Rural Employment Programme, Employment Guarantee Scheme, Employment Relief Scheme, District Rural Development Programme, etc., have also been undertaken in this district.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Janki Temple, Sitamarhi

About 1.5 Kms. off the railway station and the bus stand, this is the birth place of Sita. Janaki-*Kund* is adjacent south of the temple.

2. Janaki Temple, Panaura

This is about 5 Kms. west of Sitamarhi. This place claims the honour of being the birth place of Sita.

3. Deokuli (or Dhekuli)

Deokuli or Dhekuli is some 19 Kms. west of Sitamarhi town. An ancient Shiva Temple is situated here. A big fair takes place every year on the eve of the Shivaratri. Legends have it that Draupadi the wife of the five Pandavas was born here.

4. Haleshwar Asthan

This is 3 Kms. north-west of Sitamarhi. As the myth goes, the king Videha had founded a temple of Lord Shiva on the occasion of *Putra Yeshti Yajna*. This temple was named as the Haleshwarnath temple.

5. Panth-Pakar

Panth-Pakar is 8 Kms. north-east of Sitamarhi. It is said that after her marriage, Sita was carried in a 'palanquin' to Ayodhya by this route. An old banyan tree is still standing here under which she is said to have rested for a while.

6. Bodhayan-Sar

This is the sacred place, where Maharshi Bodhaya had written number of epics. The great Grammarian 'Panini' was one of his disciples. The renowned saint Deoraha Baba had laid the foundation of a Bodhayan temple here some 17 years ago.

7. Baghi Math

Some seven kilometres north-west of Sitamarhi, in Baghi village, there is a big Hindu monastry which contain 108 rooms. This is a famous place for worship and performing *yajna*.

8. Puprí

There is a famous Baba Nageshwarnath (Lord Shiva) temple here. It is said that Lord Shiva himself had appeared here as Nageshwar Nath Mahadeo.

9. Goraul Sharif

Goraul Sharif is situated some 26 Kms. from Sitamarhi town. This is a very sacred place for Muslims, after Biharsharif and Phulwarisharif.

10. Shukeshwar Asthan

This place is situated some 26 Kms. northwest of Sitamarhi. This was the worship place of Shukadev Muni, the great saint. A big and ancient temple which has been dedicated to, and named after Shukeshwarnath (Lord Shiva) still exists here.

11. Sabhagachhi Sasula

This is a sacred place where the Maithil Brahmins gather every year and hold matrimonial negotiations on a large scale, which finally leads to the marriages being performed. This is a symbol of the ancient culture of Mithila. This place is some 20 Kms. west of Sitamarhi town.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and Government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census Organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town

Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the levels of towns/wards in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilisation of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat*, communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and Adult Literacy Classes/Centres in the statements of the Town Directory are the innovations of the 1981 Census keeping in view the Minimum Needs Programme of the Planning Commission.

A new statement on civic and other amenities for each area/locality identified as slum in class I and II towns has been added. In this district, however, there is no class I or II town and hence this information has not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as occupied residential houses, number of households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers—cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdictional list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in PCA (rural) and those in the Village Directory match and this is also in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 censuses with some minor variation have been retained. Urban areas in the 1981 Census are :

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

The urban criteria of 1981 vary slightly from those of 1961 and 1971 censuses in that the males employed in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 censuses whereas in the 1981 Census these activities have been treated as agricultural activities and therefore excluded from the purview of consideration for urban characteristics. Towns are further classified into the following six classes according to their population size :

Class of town		*Population*
I	...	1 lakh and above (termed as city)
II	...	50,000–99,999
III	...	20,000–49,999
IV	...	10,000–19,999
V	...	5,000– 9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, two member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main Worker—If a person has worked for 183 days or more during the reference period he has to be treated as Main Worker.

Marginal Worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes and Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpurand South Chotanagpur Santhal Pargana district) Divisions and
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Sitamarhi, with a population of 1,932,147 persons is divided into 15 Community Development Blocks consisting of 987 inhabited villages (out of a total number of 1,053 villages including 12 which are constituent units of towns in the district) and 5 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Dumra	192,629	101,434	91,195	145,597	75,670	69,927	47,032	25,764	21,268	79	73	2
2	Runisaidpur	181,900	94,305	87,595	181,900	94,305	87,595	..	..	..	102	94	..
3	Belsand	185,386	96,451	88,935	174,582	90,736	83,846	10,804	5,715	5,089	140	126	1
4	Sheohar	106,018	55,284	50,734	106,018	55,284	50,734	..	..	..	75	70	..

	Total	**1,932,147**	**999,299**	**932,848**	**1,844,806**	**952,073**	**892,733**	**87,341**	**47,226**	**40,115**	**1,053**	**987**	**5**

Among the C. D. Blocks, Dumra with 9.97 per cent of the population of the district occupies the first place followed by Belsand with 9.59 per cent. The least populated C. D. Block is Bairgania with only 3.99 per cent of the population of the district. Bairgania, with only 24 inhabited villages has the smallest share in the total number of villages in the district.

Sitamarhi district which has been carved out of the old Muzaffarpur district, appears to have had less impact of urbanisation since 95.48 per cent of the population lives in the villages. The total urban population contained in 5 towns is of the order of only 4.52 per cent of the population of the district. None of the 5 towns, viz., Sitamarhi (Municipality), Bairgania (NAC), Belsand (NAC), Dumra (NAC) and Janakpur Road (Pupri) (NAC) falls in the range of either Class I (Population 1 lakh and above) or Class II (50,000–99,999) town. The district, however, has one urban agglomeration, viz., Sitamarhi Urban Agglomeration consisting of Sitamarhi (M), Dumra (NAC) as also the Rajopatti-Dumra Talkhapur Dumra outgrowth. The population of this urban agglomeration, however, also falls short of 50,000.

Decadal change in population

Sitamarhi acquired the status of a district only after the 1971 Census. In fact the sub-division of Sitamarhi in the old Muzaffarpur district as such has been upgraded as a district. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

Sursand	83,445	83,445	..	101,732	101,732	..	+21.92	+21.92	..
Pupri	97,028	85,976	11,052	122,119	115,176	6,943	+25.86	+33.96	—37.18
Nanpur	121,884	121,884	..	146,773	146,773	..	+20.42	+20.42	..
Bajpatti	84,670	84,670	..	103,942	103,942	..	+22.76	+22.76	..
Total	**1,582,632**	**1,532,690**	**49,942**	**1,932,147**	**1,844,806**	**87,341**	**+22.08**	**+20.36**	**+74.88**

It would appear that the rise in the population of this district during the 1971–81 decade has been of the order of 22.08 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 20.36 per cent while urban population growth over the decade has been as much as 74.88 per cent.

As shall be evident from the table, among the development blocks, Dumra has shown the highest increase in population over the decade with 30.59 per cent followed by Pupri and Bairgania with 25.86 and 24.06 per cent respectively. The increase in rural population during 1971–81 has been the highest in case of Pupri block (33.96%) followed by Majorganj C. D. block (23.80%). As regards the growth in urban population, Dumra block obviously occupies the first position with 73.40 per cent, probably since Dumra town, the district headquarters, is situated in this very block. Belsand (NAC) has attained the status of the town only in 1981 Census.

The urban population of Pupri block, significantly enough, shows a negative growth rate to the extent of 37.18 per cent. This may be attributed to the fact that Pupri was a Census town in 1971 Census. In 1981 Census it has been notified as Janakpur Road (Pupri) (NAC) with reduction in the number of villages as its constituent units and hence the decrease in the growth rate of the town.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size groups :

Table 3—Distribution of villages by population ranges.

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
— 200	39	3.95
200— 499	101	10.23
500—1,999	554	56.13
2,000—4,999	229	23.20
5,000—9,999	52	5.27
10,000+	12	1.22
Total	**987**	**100.00**

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500–1,999 followed by villages in the population range of 2,000–4,999 accounting for 56.13 and 23.20 per cent of the total number of inhabited villages respectively in the district. The medium-sized villages are thus much more in number than large villages (5,000—9,999 and 10,000+) in the district. The large villages comprise only 6.49 per cent of inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was only 751 whereas in the old Muzaffarpur district it was as high as 1,116.

Villages by density

The density of population is defined as number of persons per sq. km. It indicates the extent of crowding in a particular area. The distribution of villages by their density in the district is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
— 10	1	0.10
11— 20	1	0.10
21— 50	2	0.20
51—100	6	0.61
101—200	14	1.42
201—300	19	1.93
301—500	169	17.12
501+	775	78.52
Not known	..	..
Total	**987**	**100.00**

The data presented in the above table highlight the fact that maximum proportion of villages in the district lies in the density range of 501+ with 78.52 per cent followed by villages in the density range of 301–500 which account for 17.12 per cent.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is, mostly contained in the medium-sized villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes/Tribes population in villages and towns.

Tables 5, 6 and 7 furnished below indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district. This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro-level, particularly in relation to area development oriented programmes. The tables have been dealt with separately :

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	74	7.50
5 or less	166	16.82
6—10	246	24.92
11—15	204	20.67
16—20	119	12.05
21—30	120	12.16
31 and above	58	5.88
Total	**987**	**100.00**

From table above, it is apparent that there are 246 villages accounting for 24.92 per cent of the total number of inhabited villages in the district where the population of the Scheduled Castes ranges between 6 and 10 per cent of total population. This is the largest group of villages in the district. This is closely followed by villages where the population of the Scheduled Castes ranges between 11 and 15 per cent of total population and these villages which number 204 account for 20.67 per cent of the total number of inhabited villages. There are only 58 villages accounting for 5.88 per cent of the inhabited villages, where the percentage of Scheduled Castes population to total population is more than 31 per cent. 7.50 per cent of the villages are such as do not have any population of the scheduled castes at all.

Table 6—Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	974	98.68
5 or less	13	1.32
6—15	..	..
16—25	..	..
26—35	..	..
36—50	..	..
51 and above	..	..
Total	**987**	**100.00**

As regards the population of the Scheduled Tribes it can be seen from table given alongside, that there are only 13 villages in the district which contain members of the Scheduled Tribes. In all these villages the population of the Scheduled Tribes is as low as 5 per cent or less of the total population. There are as many as 974 villages accounting for 98.68 per cent of the total number of villages in the district which have no Scheduled Tribes at all.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of the town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to Total population
1	2	3	4	5	6
Bairgania	22,562	2,636	4	11.68	0.02
Belsand	10,804	1,323	..	12.25	..
Dumra	8,582	1,038	5	12.10	0.06
Pupri	6,943	644	..	9.28	..
Sitamarhi*	38,450	2,740	6	7.13	0.02
All Towns	**87,341**	**8,381**	**15**	**9.60**	**0.02**

Table 7 indicates that the concentration of the Scheduled Castes in the towns of Sitamarhi district is of the order of 9.60 per cent of the total population which is less as compared to rural areas. The highest percentage of Scheduled Castes population is contained in Belsand (NAC) with 12.25 per cent of the total population closely followed by Dumra and Bairgania towns with 12.10 and 11.68 per cent respectively. The urban content of the population of the Scheduled Tribes is almost negligible in all the 5 towns in the district as has been observed in case of the rural areas also.

* Includes figures of Rajopatti-Dumra Talkhapur Dumra outgrowth.

Literacy rates by population ranges of villages and towns.

According to the census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been presented and discussed separately :

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
— 200	39	12.69
200— 499	101	15.25
500—1,999	554	17.45
2,000—4,999	229	18.36
5,000—9,999	52	19.91
10,000+	12	20.86
Total	**987**	**18.46**

It would be seen that literates form 18.46 per cent of the population in the rural areas of the district as against 42.96 per cent in the urban areas. In the rural areas it is interesting to note that the literacy rate varies directly in relation to the population range of the villages. The highest percentage of literacy rate can be observed for the villages in the population ranges of 10,000 and above and 5,000—9,999 with 20.86 and 19.91 per cent literates respectively and the lowest in the population range of less than 200 with only 12.69 per cent being literate.

Table 9—Literacy rates for towns

Name of the town	Literacy rate
1	2
Bairgania	34.54
Belsand	26.08
Dumra	65.57
Pupri	55.71
Sitamarhi*	45.29
All towns	**42.96**

* Includes figures of Rajopatti-Dumra Talkhapur Dumra outgrowth.

Among the towns, Dumra, being the district headquarters, has the highest percentage of literate population (65.57%) followed by Janakpur Road (Pupri) town (55.71%). Belsand has the least quantum of literate population, the percentage being only 26.08.

Workers and non-workers in rural and urban areas.

The table on the next page gives the break up of literates, workers, non-workers, and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks.

Table 10—Literates, Workers, Non-workers,

Name of Development Block	Total Rural Urban	Total Population			Percentage of: S. C. population to total population	S. T. population to total population	Literates to total population			Main Workers to total population

Workers in the district of Sitamarhi account for 29.65 per cent of the total population where as the number of non-workers is as high as 70.35 per cent. As shall be evident from the Table 10, the main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) comprise 29.02 per cent of the total population which is very close to the percentage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 0.63 per cent. The same trend can be observed in both the rural and urban areas of the district as also in almost all its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 54.14 and 53.81 per cent for males as against 3.41 and 2.46 for females which indicates that the participation of females in economically productive work is quite low.

Another notable feature is higher percentage of female marginal workers (0.95%) vis-a-vis male marginal workers (0.33%). It can be seen that except in one or two urban cases the same pattern prevails in all the rural and urban areas of the district.

It will also be seen the percentage of main workers to the total population is higher in the rural areas (29.12%) than in the urban areas (26.81%). The same pattern is perceptible in the case of marginal workers who number 0.65 per cent of the rural population but only 0.33 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities, whereas, in the urban areas, household industries and other works do not offer equal job opportunities in view of limited urban development.

Villages by availability of different amenities

Table 11 below gives the distribution of villages according to the availability of different amenities in the district.

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking Water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Dumra	73	60(82.19)	15(20.55)	73(100.00)	17(23.29)	12(16.44)	19(26.03)	28(38.36)	38(52.05)
2	Runisaidpur	94	80(85.11)	14(14.89)	94(100.00)	25(26.60)	17(18.09)	24(25.53)	31(32.98)	21(22.34)
3	Belsand	126	94(74.60)	31(24.60)	126(100.00)	23(18.25)	7 (5.56)	10 (7.94)	9 (7.14)	18(14.29)
4	Sheohar	70	64(91.43)	12(17.14)	70(100.00)	12(17.14)	6 (8.57)	2 (2.86)	6 (8.57)	10(14.29)
5	Piprarhi	51	46(90.20)	10(19.61)	51(100.00)	14(27.45)	9(17.65)	3 (5.88)	7(13.73)	10(19.61)
6	Bairgania	24	22(91.67)	7(29.17)	24(100.00)	6(25.00)	3(12.50)	..	..	3(12.50)
7	Majorganj	59	52(88.14)	10(16.95)	59(100.00)	16(27.12)	10(16.95)	5 (8.47)	13(22.03)	26(44.07)
8	Riga	43	37(86.05)	9(20.93)	43(100.00)	16(37.21)	8(18.60)	6(13.95)	18(41.86)	33(76.74)
9	Bathnaha	85	74(87.06)	13(15.29)	85(100.00)	17(20.00)	13(15.29)	9(10.59)	13(15.29)	20(23.53)
10	Sonbarsa	60	50(83.33)	12(20.00)	60(100.00)	14(23.33)	10(16.67)	4 (6.67)	8(13.33)	16(26.67)
11	Parihar	83	73(87.95)	13(15.66)	83(100.00)	18(21.69)	12(14.46)	17(20.48)	16(19.28)	9(10.84)
12	Sursand	51	46(90.20)	16(31.37)	51(100.00)	8(15.69)	5 (9.80)	8(15.69)	13(25.49)	9(17.65)
13	Pupri	59	53(89.83)	18(30.51)	59(100.00)	16(27.12)	5 (8.47)	21(35.59)	20(33.90)	11(18.64)
14	Nanpur	53	47(88.68)	14(26.42)	53(100.00)	23(43.40)	8(15.09)	10(18.87)	16(30.19)	12(22.64)
15	Bajpatti	56	48(85.71)	11(19.64)	56(100.00)	16(28.57)	4 (7.14)	4 (7.14)	14(25.00)	23(41.07)
	Total	**987**	**846(85.71)**	**205(20.77)**	**987(100.00)**	**241(24.42)**	**129(13.07)**	**142(14.39)**	**212(21.48)**	**259(26.24)**

Educational amenity—There are as many as 846 villages accounting for 35.71 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Bairgania with 91.67 per cent followed by Sheohar block with 91.43 per cent. The lowest number of villages with educational facility is in the development blocks of Belsand and Dumra with 74.60 and 82.19 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low in that only 20.77 per cent villages have it. Among the development blocks, Sursand has the largest proportion of villages with medical facility, the percentage being 31.77. Runisaidpur block, on the other hand, has the lowest number of such villages with only 14.89 per cent of the total villages enjoying medical facility.

Drinking water—It would be seen from the table that drinking water facility is generally available in all the villages of the district of Sitamarhi.

Post & telegraph—Postal facilities (post & telegraph) are available only in 241 villages (24.42%) in the district. Nanpur block has the maximum number of villages having post and telegraph facility (43.40%) followed by Riga (37.21%) and Bajpatti (28.57%). In the remaining development blocks of the district the number varies from a minimum of 15.69 per cent in Sursand to a maximum of 27.45 per cent in Piprarhi block.

Market/hat—The villages where market/*hat* is held constitute only 13.07 per cent of the total number of villages in the district. As will be seen from the table, there are 9 development blocks in the district which have facility of market/*hat* in less than 10 villages. In the remaining blocks the number of villages where market/*hat* is held varies between 10 and 17 in number.

Communication—The datails of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 14.39 per cent of the villages are connected by one of means of communication or the other. The majority of the villages are still devoid of this facility. A development blockwise breakup of villages having any means of communication is given in the table above indicating that Pupri block comprises the highest proportion of villages (35.59%) which are connected by bus or rail or navigable river/canal services, etc., followed by Dumra with 26.03 per cent and Runisaidpur with 25.53 per cent of villages having one means of communication or the other. Incidentally, it can be observed that Bairgania block does not have any communication facility in any of its villages. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 7.94 per cent in Belsand block and the maximum of 20.48 per cent in Parihar block.

Approach road to village—With only 21.48 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Riga block with 41.86 per cent villages having *pucca* approach road leads the list closely followed by Dumra and Pupri blocks with 38.36 and 33.90 per cent respectively. The development blocks which have the lowest number of villages having this facility are Belsand (7.14%), Sheohar (8.57%) and Sonbarsa (13.33%).

Power supply—Electrified villages in the district constitute as much as 26.24 pet cent of the total number of villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial, or industrial and in certain villages for all the above purposes.

Riga development block occupies the first position having the maximum proportion of electrified villages (76.74%) followed closely by Dumra, Majorganj and Bajpatti with 52.05, 44.07 and 41.07 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Parihar (10.84%) Bairgania (12.50%) and Belsand and Sheohar blocks (14.29% each).

Proportion of rural population served by various amenities.

While in Table 11 we had discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 on next page gives the proportion of rural population served by these amenities:

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Dumra	145,597	93.87	43.21	100.00	48.64	33.07	41.31	53.36	72.55
2	Runisaidpur	181,900	95.37	34.00	100.00	59.66	41.62	41.48	48.27	39.90
3	Belsand	174,582	90.89	40.49	100.00	41.70	10.19	9.79	12.33	19.40
4	Sheohar	106,018	96.67	38.00	100.00	39.23	29.43	11.12	19.06	21.84
5	Piprarhi	103,039	94.09	28.39	100.00	47.39	21.42	8.40	25.70	32.20
6	Bairgania	54,438	95.68	52.65	100.00	50.12	38.95	..	..	13.01
7	Majorganj	101,943	96.38	37.53	100.00	50.97	35.85	12.67	31.77	59.81
8	Riga	112,374	97.68	39.00	100.00	60.13	29.14	27.66	60.04	83.57
9	Bathnaha	124,412	95.49	28.21	100.00	43.30	30.23	17.84	22.25	37.26
10	Sonbarsa	116,046	94.19	37.19	100.00	43.36	26.31	11.68	21.13	33.94
11	Parihar	156,834	96.56	26.54	100.00	46.60	32.00	27.00	24.01	12.93
12	Sursand	101,732	97.46	54.55	100.00	33.49	26.85	37.20	44.74	32.04
13	Pupri	115,176	96.99	58.70	100.00	61.20	25.62	57.68	54.12	26.45
14	Nanpur	146,773	98.33	42.56	100.00	73.57	19.59	28.22	40.63	33.68
15	Bajpatti	103,942	94.94	42.57	100.00	48.14	16.71	15.98	29.15	43.77
	Total	**1,844,806**	**95.50**	**39.32**	**100.00**	**50.37**	**27.47**	**24.80**	**33.67**	**37.64**

It would be seen that educational facility is available to 95.50 per cent of the rural population in the district. The proportion varies between the maximum of 98.33 per cent in Nanpur block and the minimum of 90.89 per cent in Belsand block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 85.71 (as has been observed in Table 11) than the proportion of population which is as high as 95.50 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 39.32 per cent which is also almost double the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at a distance of less than 5 kms.,5—10 kms. and 10+kms.

The table furnished below indicates the number of those villages which do not contain different amenities has been arranged by broad distance ranges (less than 5 Kms., 5–10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5—10 Kms.	10+ Kms.	Total (cols. 2—4)
1	2	3	4	5
1. Education	141	..	..	141
2. Medical	672	110	..	782
3. Drinking water	..	..	..	..
4 Post and Telegraph	669	75	2	746
5. Market/*Hat*	672	177	9	858
6. Communication	457	315	73	845

As regards education facility it would be seen that there are as many as 141 villages in the district (14.28%) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5–10 Kms. and beyond 10 Kms. is nil. The number of villages having other facilities within a distance of 5–10 Kms. and 10+Kms. is less than those having the facilities within 5 Kms. While none has to travel for more than 10 Kms. to avail oneself of medical facilities, there are only 2 and 9 villages respectively which have a post office and market more than 10 Kms. away. There are 73 villages for whom a means of communication is available at a distance of more than 10 Kms.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five size groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance Range from the nearest town (in Kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Commu-nication	Approach by *Pucca* Road	Power Supply
1	2	3	4	5	6	7	8	9	10
0— 5	103	88(85.44)	32(31.07)	103(100.00)	29(28.16)	7(6.80)	28(27.18)	33(32.04)	46(44.66)
6—15	334	272(81.44)	66(19.76)	334(100.00)	77(23.05)	43(12.87)	49(14.67)	68(20.36)	91(27.15)
16—50	550	486(88.36)	107(19.45)	550(100.00)	135(24.55)	79(14.36)	65(11.82)	111(20.18)	122(22.18)
51+	..	..	..	..	..	..	..	..	..
Unspecified	..	..	..	..	..	..	..	..	..
Total	**987**	**846(85.71)**	**205(20.77)**	**987(100.00)**	**241(24.42)**	**129(13.07)**	**142(14.39)**	**212(21.48)**	**259(26.24)**

It would appear from the above table that maximum number of the inhabited villages (55.72%) lie in the distance range of 16–50 Kms. from the nearest town. With only 5 urban centres in the district such a situation is but natural. This is followed by villages in the distance range of 6–15 Kms. from the nearest town with 33.84 per cent. None of the villages is found to be in the distance range of more than 51 Kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 85.44 per cent for those situated within 5 Kms. from the nearest town and declines to 81.44 per cent in the distance group of 6–15 Kms. Thereafter it again increases to 88.36 per cent with the increase in the distance of the villages from the nearest town. The percentage is observed to be the highest (88.36%) in the distance group of 16–50 Kms. In the case of medical and postal facilities also the same trend can be seen. However, in case of market/*hat* the proportion of villages increases with the increase in the distance range from the nearest town in contrast to facilities such as communication, power supply and approach to villages by *pucca* road where the position is just the other way. It can be said that the villages which are nearer to the urban areas have benefited in respect of communication, power supply and *pucca* approach road vis-a-vis those rural pockets which are beyond the pale of direct urban influence. Significantly, no village is found in the distance group of more than 51 Kms. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population range and amenities available.

The table given on next page furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communi-cation	Approach by *Pucca* Road	Power Supply
1	2	3	4	5	6	7	8	9	10
— 499	140	62(44.29)	4(2.86)	140(100.00)	2(1.43)	2(1.43)	10(7.14)	14(10.00)	15(10.71)
500—1,999	554	495(89.35)	76(13.72)	554(100.00)	65(11.73)	34(6.14)	60(10.83)	98(17.69)	123(22.20)
2,000—4,999	229	225(98.25)	81(35.37)	229(100.00)	112(48.91)	60(26.20)	43(18.78)	66(28.82)	86(37.55)
5,000+	64	64(100.00)	44(68.75)	64(100.00)	62(96.88)	33(51.56)	29(45.31)	34(53.13)	35(54.69)
Total	**987**	**846(85.71)**	**205(20.77)**	**987(100.00)**	**241(24.42)**	**129(13.07)**	**142(14.39)**	**212(21.48)**	**259(26.24)**

It can be seen from the table that the maximum number of villages, i. e., 554 (56.13%) in the district fall in the population range of 500–1,999 followed by 229 villages (23.20%) in the population range of 2,000–4,999. The lowest number of villages is observed in the population range of 5,000+, being 64 (6.49%) in number.

It may be of interest to the readers to note that the proportion of villages having different amenities varies in direct relation to their population range. The maximum number of villages having different amenities have a population range of 5,000+ which also corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

Main staple food in the villages

The table alongside indicates that rice and wheat constitute the main staple food of the people in most of the development blocks of the district. In the development blocks of Sonbarsa and Parihar, however, only rice has been returned as the main staple food of the people in majority of the villages.

Table 16—Main staple food in the majority of villages in each Development Block.

Sl. no.	Name of Development Block	Main staple food
1	2	3
1	Dumra	Rice, wheat
2	Runisaidpur	Rice, wheat
3	Belsand	Rice, wheat
4	Sheohar	Rice, wheat
5	Piprarhi	Rice, wheat
6	Bairgania	Rice, wheat
7	Majorganj	Rice, wheat
8	Riga	Rice, wheat
9	Bathnaha	Rice, wheat
10	Sonbarsa	Rice
11	Parihar	Rice
12	Sursand	Rice, wheat
13	Pupri	Rice, wheat
14	Nanpur	Rice, wheat
15	Bajpatti	Rice, wheat

42476 LIBRARY

Villages according to land use

The land utilization data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place. The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Dumra	73	18,518.74	87.06	15.82
2	Runisaidpur	94	25,910.38	82.84	34.44
3	Belsand	126	25,180.15	83.64	27.85
4	Sheohar	70	14,653.64	89.00	21.84
5	Piprarhi	51	14,677.50	79.69	21.30
6	Bairgania	24	6,438.02	79.66	33.24
7	Majorganj	59	14,656.88	82.93	36.69
8	Riga	43	14,592.98	84.13	29.05
9	Bathnaha	85	19,483.47	87.57	26.22
10	Sonbarsa	60	17,522.78	85.71	10.79
11	Parihar	83	21,220.95	80.00	3.45
12	Sursand	51	14,335.71	86.71	9.53
13	Pupri	59	16,279.16	82.38	8.60
14	Nanpur	53	19,142.13	83.85	18.17
15	Bajpatti	56	13,902.71	84.28	19.23
	Total	**987**	**256,515.20**	**84.06**	**20.90**

It would be seen from the table that 79.13 per cent of the total area of the district is utilised for cultivation (Cultivable area) and of this only 21.87 per cent area is irrigated. Among the C. D. Blocks, the highest percentage of cultivable area is found in Sheohar block with 86.01 per cent followed by Bathnaha, Sursand and Bajpatti with 85.23, 82.61 and 81.87 per cent respectively. The lowest cultivable area is found in Piprarhi block with only 73.99 per cent of the total area.

The highest proportion of irrigated area to the total cultivable area is to be found in Runisaidpur block accounting for 38.38 per cent followed by Majorganj with 38.15 per cent and Bairgania with 32.84 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Parihar block (3.61%). In the remaining blocks the percentage varies between 8.95 per cent and 30.60 per cent.

Growth, density and sex-ratio of urban population.

The urban population of the district in each of the censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 on next page. It also indicates the variation in density and sex-ratio in the urban population of the district in relation to the State :

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,201,086	15,345	1.28	..	987	794	38,782,271	2,626,261	6.77	..	2,320	842
1961	1,386,966	21,636	1.56	+ 41.00	1,193	768	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,582,632	49,942	3.16	+130.83	2,441	841	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	1,932,147	87,341	4.52	+ 74.88	2,325	849	69,914,734	8,718,990	12.47	+54.76	2,727	832

It will be clear from the table that the extent of urbanisation is quite low in Sitamarhi. Where as the urban population of the district formed a mere 1.28 per cent of the total population in 1951 as compared to the State figure of 6.77 per cent ; even in 1981 only 4.52 per cent of the population was urban while the State figure went up to 12.47 per cent.

Column 5 of the above table deals with the decadal percentage growth in the urban population of the district. The urban population had shown tremendous rise during 1961–71 Census (130.83 per cent increase) in the district. The growth of urban population during the current decade has also been quite high (+74.88%) as compared to that of the State. The trend of the growth of urban population in the State has been quite different. During the decade 1951–61 the urban population growth was of the order of 49.03 per cent whereas during 1961–71 it dipped to 43.95 per cent. Again during 1971–81 it has registered an increase of 54.40 per cent which appears to be quite high in comparision to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urbanisation during the last decade.

The density of population in the urban areas of the district has also increased considerably over the decades as shall be evident from column 6 of the table. Between 1951 and 1981 the density of the urban population of the district has more than doubled from 987 persons per sq. Km. to 2,325 persons per sq. Km. This clearly indicates that the towns of Sitamarhi district are gradually becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. **The density of the urban population of the State on the other** hand had not shown a similar rise till the 1971 Census. In 1981 Census, however, the density of the urban population of the State has shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is higher than that of Sitamarhi which stood at 2,325 persons per sq. Km.

The sex-ratio for the urban areas of Sitamarhi district was comparatively low as compared to the urban areas of the State till 1961 Census. However, in the last two Censuses, viz., 1971 and 1981 the situation has changed and the sex-ratio of the urban areas of the district has shown a slight improvement in favour of females though there is still predominance of males over females. The demographers may like to study this phenomenon in detail to ascertain the reasons thereof.

Towns added and declassified in 1981

As a result of urbanisation, towns are expanding over the decades. The following table gives an idea about addition of town as also the towns which have been declassified in the 1981 Census. The criteria for a place treated as a town have been explained in the Analytical Note at the appropriate place :

Table 19—New Towns/Towns declassified in 1981 Census.

Name of Towns	Population 1981 Census
1	2
(a) *Added*—	
(i) Belsand	10,804
(b) *Disclassified*—	
Nil	

There are 5 towns, viz., Bairgania (NAC), Belsand (NAC), Dumra (NAC), Janakpur Road (Pupri) (NAC) and Sitamarhi (M) in the district of Sitamarhi. Only Belsand (NAC) town with population of 10,804 has been added in the 1981 Census. No town has, however, been declassified in the present Census.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in rupees)			Expenditure (in rupees)					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III—Bairgania (N A C)	0.11	0.11	..	0.07	..	..	..	..	0.07
IV—Belsand (N A C)	..	..	..	..	..	..	..	..	..
V—Dumra (N A C)	14.93	3.14	11.79	30.88	1.97	26.84	0.24	..	1.83
V—JanakpurRoad (Pupri) (NAC)	1.44	..	1.44	0.16	0.16	..	..	..	..
III—Sitamarhi (M)	24.79	3.72	21.07	24.13	2.05	6.59	3.21	..	12.28
Total	**12.52**	**1.97**	**10.55**	**13.69**	**1.11**	**5.54**	**1.44**	..	**5.60**

It would be apparent from the above figures that the per capita receipt both through taxes and through all other sources is the highest in Sitamarhi (M) whereas it is the lowest on both counts in Bairgania (NAC).

Per capita total expenditure is the highest in Dumra (NAC). However, the per capita expenditure incurred on general administration, public works and other aspects is again the maximum in case of Sitamarhi (M).

Schools per ten thousand population in towns.

Primary and middle school education facilities are generally available in all towns. The alongside table gives details of different categories of educational institutions per 10,000 population in different towns of the district :

Table 21—Schools per ten thousand population in towns.

Class, name and civic status of the town	Number per ten thousand population			
	Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
III—Bairgania (N A C)	0.44	0.89	2.22	11.08
IV—Belsand (N A C)	..	0.93	0.93	3.70
V—Dumra (N A C)	..	2.33	3.50	3.50
V—Janakpur Road (Pupri) (NAC)	..	2.88	4.32	5.76
III—Sitamarhi (M)	0.26	0.52	1.82	4.68
Total	**0.23**	**1.03**	**2.18**	**6.18**

It would be seen from the above table that institutions like Higher Secondary School/Inter/PUC/Junior College are only situated in Bairgania (NAC) and Sitamarhi (M) accounting for an average of 0.44 and 0.26 institution per ten thousand population respectively. As regards Secondary/Matriculation level schools there are, on an average, 2.88 schools per ten thousand population located in Janakpur Road (Pupri) (NAC) which is the highest followed by 2.33 such schools per ten thousand population in Dumra (NAC). Janakpur Road (Pupri) (NAC) also has the highest number of Junior Secondary/Middle Schools in the district with an average of 4.32 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 6.18 per ten thousand population. In this category Bairgania (NAC) has the highest number of schools with an average of 11.08 per 10,000 population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns :

Table 22—Number of beds in medical institutions in Towns.

Class, name and civic status of the town	Number of beds in medical institutions per one thousand population
1	2
III—Bairgania (NAC)	0.27
IV—Belsand (NAC)	..
V—Dumra (NAC)	0.47
V—Janakpur Road (Pupri) (NAC)	0.86
III—Sitamarhi (M)	3.25
Total	**1.61**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to be 1.61. The availability of beds in the hospitals is the highest in case of Sitamarhi (M) having 3.25 beds per 1,000 population and the lowest in Bairgania (NAC) with only 0.27 beds per 1,000 population.

Proportion of slum population in towns

Table 23 relating to details of slums in towns has not been prepared in case of Sitamarhi district since it is restricted to only Class I (population 1 lakh and above) and Class II (50,000–99,999) towns and Sitamarhi district does not have any of these categories.

Three important commodities imported, exported and manufactured.

The table below presents the most important commodities manufactured, exported and imported in the 5 towns of Sitamarhi district.

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
III—Bairgania (NAC)	Shoes	Linseed	Salt
IV—Belsand (NAC)	..	..	..
V—Dumra (NAC)	..	..	Tea
V—Janakpur Road (Pupri) (NAC)	Hume pipe	Rice	Cloth
III—Sitamarhi (M)	..	..	Tea

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Develonment Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col.10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, un-irrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc., was not found to the available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distances, viz., '(—5 Kms.)', '(5—10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the dispensaries/community health worker has been taken as most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes I the number of primary schools in the village has been shown as three and that of Middle School as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterways, etc. (column. 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,

(b) Barren and unculturable lands.

3. Other uncultivated lands excluding fallow lands—

(a) Permanent pastures and other grazing lands,

(b) Lands under miscellaneous trees, crops and groves not included in the net area sown,

(c) Culturable wastes.

4. Fallow lands—

(a) Fallow lands other than current fallows,

(b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest

The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use

All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands

Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands

All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves

All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under casuarina trees, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste

All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows

Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows

All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years, have been treated as other fallows.

Cultivated area

The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 do not add up in some cases, to the total

geographical area of the village. This can be attributed to the fact that area under water bodies, etc., are generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Block-wise.

Following is the list of abbreviations used in the Village Directory :

(*i*) *Column* 5—*Educational*

- P — Primary or elementary school (upto class IV)
- M — Middle or Junior secondary school (upto class VIII)
- H — Matriculation or Secondary School (upto class X)
- PUC — Higher Secondary, Intermediate, Pre-University, Junior College.
- C — College
- I — Industrial School
- Tr — Training School
- Ac — Adult Literacy Class/Centre
- O — Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(*ii*) *Column* 6—*Medical*

- H — Hospital
- MCW — Maternity and Child Welfare Centre.
- MH — Maternity Home
- CWC — Child Welfare Centre
- HC — Health Centre
- PHC — Primary Health Centre
- PHS — Primary Health Sub-Centre
- D — Dispensary
- FPC — Family Planning Centre
- TB — T. B. Clinic
- NH — Nursing Home
- RP — Registered Private Practitioner
- SMP — Subsidised Medical Practitioner
- CHW — Community Health Worker
- O — Others

(*iii*) *Column* 7—*Drinking Water*

- T — Tap Water
- W — Well Water
- Tk — Tank Water
- TW — Tube-well Water
- Hp — Handpump
- R — River Water
- F — Fountain
- C — Canal
- L — Lake
- S — Spring
- N — *Nullah/Nala/Nallah*
- O — Others
- NA — Information not Available

(*iv*) *Column* 8—*Post and Telegraph*

- PO — Post Office
- TO — Telegraph Office
- PTO — Post and Telegraph Office
- Phone — Telephone connection

(*v*) *Column* 10—*Communications*

- BS — Bus
- RS — Railway Station
- NW — Navigable Waterway (including river, canal, backwaters, etc.)

(*vi*) *Column* 11—*Approach to Village*

- PR — *Pucca* Road
- KR — *Kutcha* Road
- NR — Navigable River
- NC — Navigable Canal
- NW — Navigable Waterway (other than river or canal)
- FP — Foot Path

(*vii*) *Column* 13—*Power Supply*

- ED — Electricity for domestic purpose
- EAg — Electricity for agriculture purpose
- EO — Electricity for other purposes like industrial, commercial, etc.
- EA — Electricity for all purposes listed above.

(*viii*) *Column* 16—*Irrigated by source*

GC — Government Canal
PC — Private Canal
W — Well (without electricity)
WE — Well (with electricity)
TW — Tube-well (without electricity)
TWE — Tube-well (with electricity)
Tk — Tank
R — River
L — Lake
Wf — Waterfall
O — Others

(*ix*) *Column* 20—*Remarks*

N — Copies of Newspapers coming in the village.
M — Motor Cycles/Scooters available in the village.
C — Cars/Jeeps available in the village
T — Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Col. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stops, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forest, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Sitamarhi district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives, development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A)—

0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B)—

0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes and Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—DUMRA

VILLAGE AMENITIES AND

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz., —5 kms., 5—10 kms., and 10+kms. of the nearest place where the facility is available is given].

			0—5 *	47	Sursand Asli			
			DEVELOPMENT BLOCK—PUPRI					
			0—5 *	182	Bedaul *urf* Banauli			

NOTE—1. * Excludes Villages with no Scheduled Tribes population.

2. Development Blocks Belsand, Piprarhi, Bairgania, Riga, Parihar, Nanpur and Bajpatti contain no Scheduled Tribes Population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering—(1) Status and growth history; (2) Physical aspects and location of towns, 1979; (3) Municipal finance, 1978-79; (4) Civic and other amenities in towns (4A) Civic and other amenities in Notified Slums; (5) Medical, educational, recreational and cultural activities; and (6) Trade, commerce, industry and banking, 1979.

For presentation of data, all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration have been indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town have been furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particutar town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix to the Town Directory.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory. However, as already explained earlier this district does not have any Census town as such.

The details of the data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C. B.	...	Cantonment Board/ Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are—

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year, 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in the district of Sitamarhi there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town, Statement IV-A relating to the slums does not find place in the present volume. This has already been explained in the 'Analysis of Data' section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials. The following abbreviations have been used in this statement:

Column 4—

H	...	Hospital (Allopathic)
H (A)	...	Hospital (Ayurvedic)
H (U)	...	Hospital (Unani)
H (Hom)	...	Hospital (Homoeopathic)
D	...	Dispensary (Allopathic)
D (A)	...	Dispensary (Ayurvedic)
D (U)	...	Dispensary (Unani)
D (Hom)	...	Dispensary (Homoeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre

TB	...	T.B.Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories— Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village
Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to manual sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedules, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing Servicing and Repairs in Household Industry
4. Other Workers

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other Workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban area. The concepts of village, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the village/urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development block in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimals fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
