HIMACHAL PRADESH

DISTRICT CENSUS HANDBOOK

SIRMAUR DISTRICT

ATTAR SINGH
of the Indian Administrative Service,
Director of Census Operations,
Himachal Pradesh.

"RAINKA LAKE"

(MOTIF ON THE COVER)

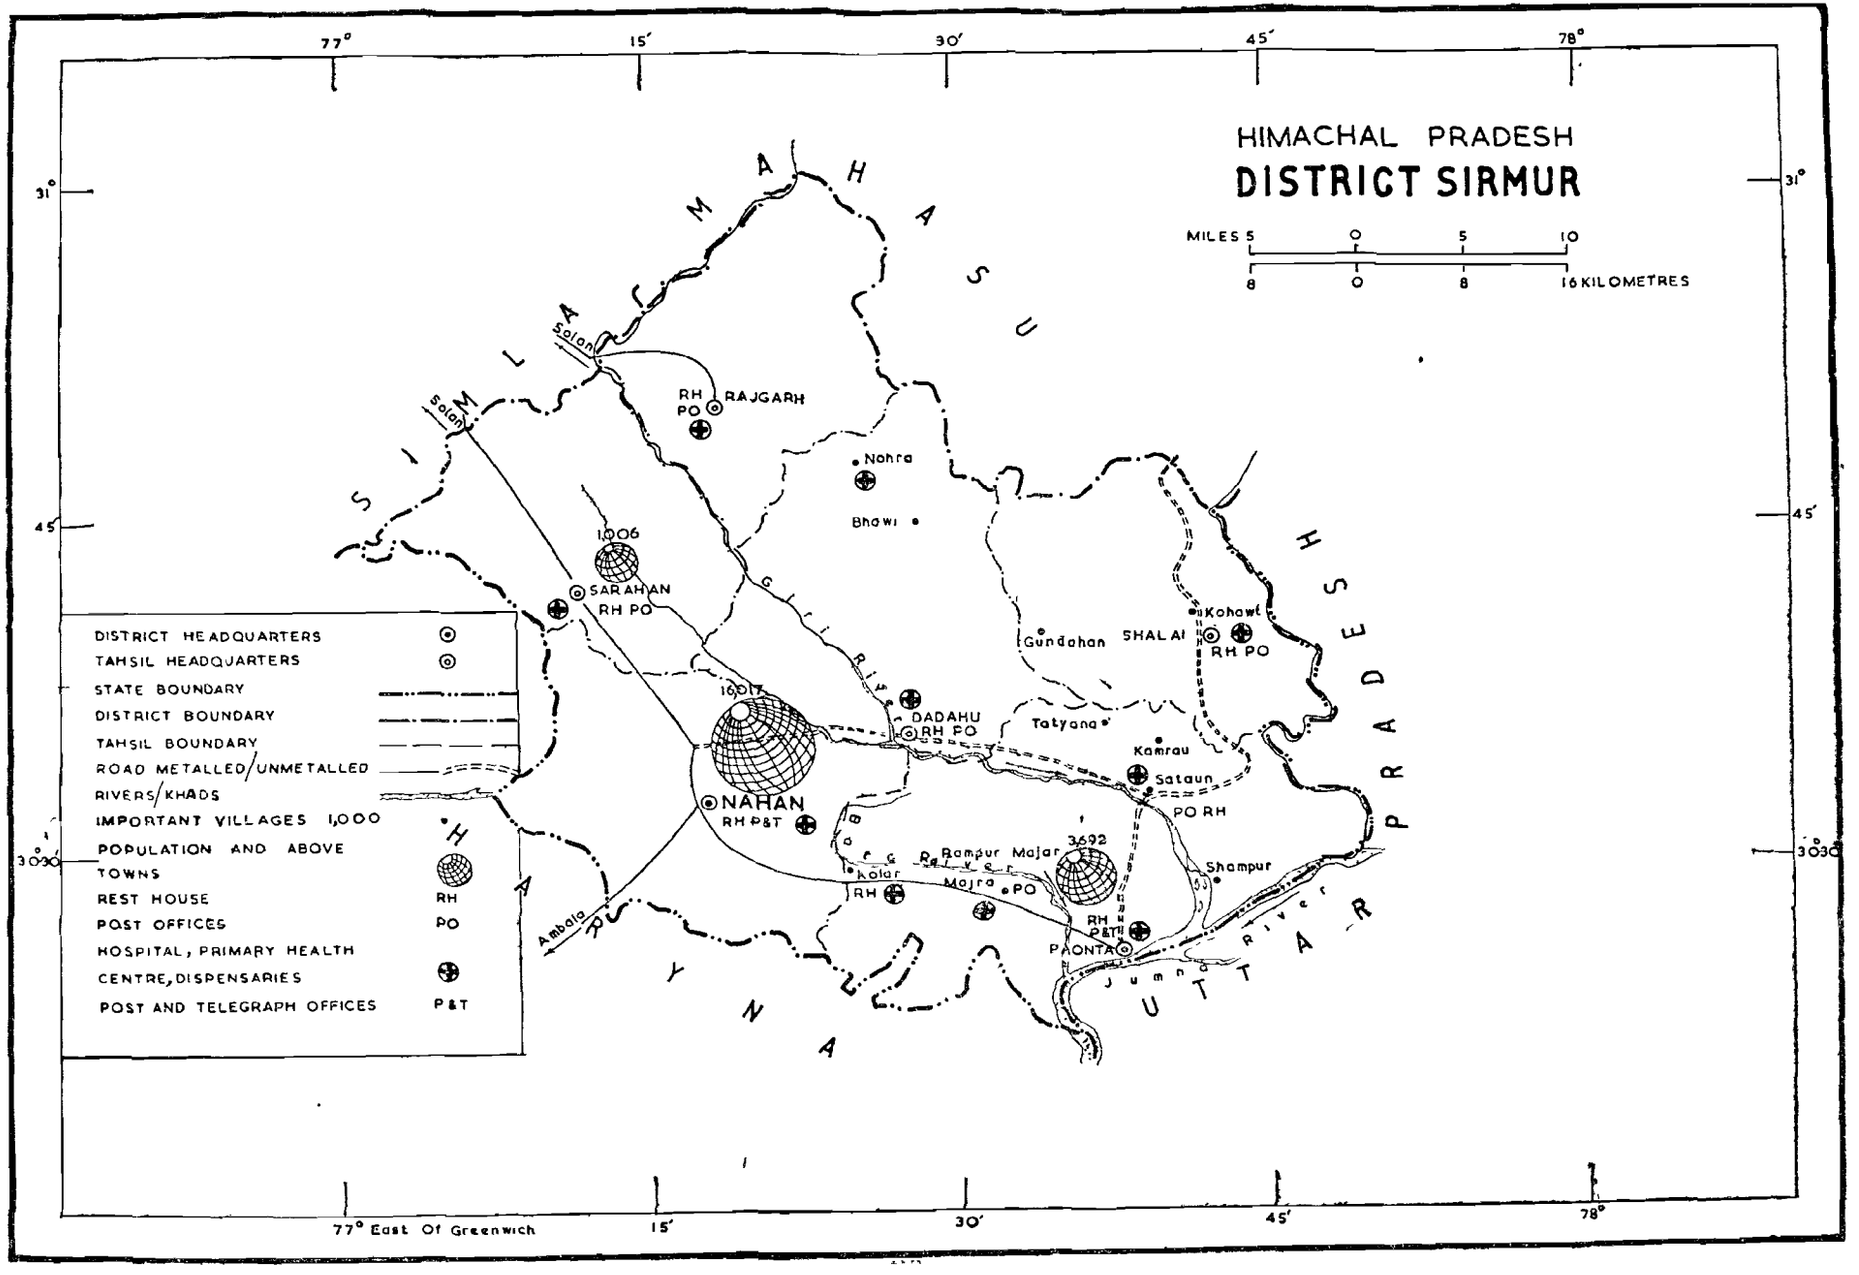

At the right hand bottom on the cover page is shown "The Lake of Rainka" the most important and sacred place of tourist interest in Sirmaur District.

Of all the Lakes in Himachal Pradesh, Rainka is the most beautiful. The lake appears to have a faminine-like figure-profite of the goddess which is held in great esteem by devout Hindus. The legend has it that Rishi Jamdagni got displeased with his wife Rainka and ordered his son Parshuram to chop off her head. The son carried out the orders of his father. The Rishi thus pleased told his son to ask for a boon. Parshuram atonce asked for his mother's life. The sage had no escape, but to fulfil his son's desire. Rainka was alive again and henceforth her joining back her family began to be commemorated by the people.

Every year a large fair is held in honour of the goddess Rainka. People from far and wide gather there to pay their homage to the goddess and receive her blessings for a happy and prosperous family life.

PREFACE

Introduction of the District Census Handbooks in the Census publication programme in 1951 Census was a big landmark in the history of Indian Census. Since then these Handbooks are being regularly brought out by the Census Organisation on behalf of the State Government. District Census Handbooks contain important and basic statistics relating to the districts in the State which make their use by various agencies all the more important. The most important part of the Handbooks relates to the village-wise and urban block-wise Primary Census data—data at the micro level—which is utilized in almost every field of planning-educational, developmental, manpower etc. This data is also used for other important purposes such as adjustment of administrative boundaries, delimitation of electoral constituencies etc. Immediately on the completion of Census, Administrative authorities, private agencies and academic institutions, in fact most data users are anxious to have the latest figures made available to them so that they are able to assess and pursue their activities in a more purposeful manner.

In order to make the necessary data available early to the Census data users, a major change has been made in publication programme of the District Census Handbooks of 1971 Census. Instead of incorporating all the information and statistics of a particular District in a single volume, the same has been divided into three parts - 'A', 'B' and 'C' - so that parts 'A' and 'B' containing (i) Village Directory and Town Directory (ii) Village-wise and Town-wise Primary Census Abstracts could be released early without waiting for the compilation of data to be included in part 'C'. Originally the programme was to bring out all the parts 'A', 'B' and 'C' independently, as soon as compilations for a particular part were completed. Since the data for parts 'A' and 'B' were compiled simultaneously, it was decided to combine these parts in one volume which, I feel, will be more convenient to data users to consult as the volume contains primary statistics relating to the district at one place. The present volume consists of Parts 'A' and 'B' of the District Census Handbook of Sirmaur. It is proposed to bring out part 'C' of this publication as also for other Districts independently later because at present the administrative information has just started pouring in from the various Government Departments and Organisations. It will take some more time to put together these facts and figures into proper shape for the Part 'C' volume.

The jurisdictions of Sirmaur district are same as those of the erstwhile princely State of that name which was merged into Himachal Pradesh in 1948. In 1961 Census the district contained four Tahsils namely Pachhad, Rainka, Nahan and Paonta Sahib. But in between 1961 and 1971 Censuses two Sub-Tahsils **viz.**, Shilai and Rajgarh were carved out of Tahsils Rainka and Pachhad, respectively raising the number of Tahsils/Sub-Tahsils to six for 1971 Census intake. Addition of one town namely Sarahan was also made for 1971 Census raising the number of towns in Sirmaur to three as against two i.e., Nahan and Paonta Sahib

The data collected during 1971 Census was initially sorted out in Tabulation Office and thereafter tabulated for Primary Census Abstracts. Considerable efforts had been made by the staff to consolidate district-wise figures before these could be utilised in the District Census Handbooks. Census data incorporated in this District Handbook, I feel would be very useful to the readers particularly those who are interested to know the growth of population in Sirmaur district.

I owe my thanks to Shri A. Chandra Sekhar, Registrar General and Census Commissioner, India, from whom I have received guidance and considerations most consistantly. Dr. B. K. Roy Burman, Deputy Registrar General was always helpful in solving my numerous problems and I feel highly indebted to him.

SIMLA
26th April, 1973

ATTAR SINGH
Director of Census Operations,
Himachal Pradesh.

ACKNOWLEDGEMENT OF ASSISTANCE

GENERAL SUPERVISION

1.	Shri C. D. Bhatt	Assistant Director of Census Operations

TECHNICAL SUPERVISION

1.	Shri C. D. Bhatt	Assistant Director of Census Operations

PART X—A

TOWN AND VILLAGE DIRECTORY

EXPLANATORY NOTE - PART A

1. History of the District Census Handbook

The Disrict Census Handbook was an innovation of the 1951 Census. Prior to 1951 Census, the Census Reports and Publications threw up the data upto Tahsil/ Sub-Tahsil, Town and District levels. Statistics for smaller territorial units than these were not published in any census publication. With the rapid development and socio-economic changes in the society necessity of data for administrative unit at the lowest level was felt considerably by the Government and other organisations as well as the agencies using census statistics. With a view to removing this shortcoming, selected census statistics upto village level were incorporated in the District Census Handbooks of 1951 Census.

Then it shall be seen that the 1951 Census Handbooks contained all the important census tables, in respect of a particular District as well as general information relating to Physical Aspects, Geology, Archaeology, Climate, Rainfall, History, Administration, Medical and Public Health, Education and Literacy, Agriculture and Co-operation, Industries, Local Bodies, Places of interest etc. relating to the District.

The District Census Handbooks for 1961 Census under-went complete transformation and attempts were made to make them more informative. Information on all the aspects, covered in 1951 Census and on additional items also found place in 1961 District Census Handbooks. Each District Census Handbook in 1961 Census was divided into four parts each part containing specific set of information and statistics, as briefly discussed below:—

Part I Besides containing a narrative pertaining to introduction of the particular district, this part comprised mainly of write-up supported by small tables on topics like Physical Aspects, Population, the People, District Administration, Education, Medical and Public Health, Agriculture, Fisheries, Animal Husbandry, Panchayats, Local Bodies, Co-operative Societies, Banking, Industries, Employment, Service Communications and Road Development, Land Revenue and Land Tenure, Price Trends and Community Development, Flora and Fauna etc. In some Handbooks certain reprints of extracts from works of important authorities were also included.

Part II All the Census Tables pertaining to a District were included in this part.

Part III This part of the District Census Handbooks contained the Administrative Statistics on Agriculture, Administration, Medical and Public Health, Local Bodies Transport and Communications, Livestock, Forests and other Departments.

Part IV This part mainly consisted of the Village Directory, which rendered an account of each village and town in the District. The Census information in this part was given under 36 suitable heads. In addition to the census statistics in respect of each village and town, information about the level of development and amenities was also collected and incorporated in this part. Amenities like Schools, Places of Worship, Medical Institutions, Roads, Railways, Telegraph and Post Offices, Electricity etc., if available in a particular village/town were indicated with the help of specific abbreviations.

2. Scope of the District Census Handbooks

It has been the experience of this organisation that due to various factors, most of which were beyond its control, the publication of some of the 1961 District Census Handbooks was inordinately delayed, which resulted in unnecessary hardship to the data users. The utility of statistics lies in their timely publication. Statistical data published late lose much of their relevance. With this in view, for the 1971 Census, priorities have been fixed for the publication of the different sets of information. It would be our utmost endeavour to publish the information as soon as the

relevant tables and other material are ready. This, it is hoped, would result in the reduction of time-lag that usually occurs in making the information available to the Government and other data users.

The District Census Handbooks pertaining to 1971 Census are being brought out in two independent parts as follows :

(i) (a) Part A : Town Directory and Village Directory: Data relating to important characteristics alongwith other informatiod for each town in a district have been compiled in the form of seven statements. It is for the first time that this type of information has been compiled and published in census publications in the shape of Town Directory. The first six statements contain town-wise statistics and information on a variety of subjects like Status, Growth History and Functional Category of Towns, Physical Aspects and Location of Towns, 1969 ; Municipal Finance, 1968-69 ; Civic and other amenities, 1969 ; Medical, Educational, Recreational and Cultural Facilities, 1969 ; and Trade, Commerce, Industry and Banking, 1969. The seventh statement contains census data on religion in respect of each town.

The Village Directory gives for each village particulars of amenities available in the matter of Educational and Medical Institutions, Power Supply, Drinking Water Supply, Post and Telegraph Facilities, Communications, Particulars of Land Use, Weekly Markets, Places of Religious, Historical or Archaeological interest in the Village.

(b) Part B : Villagewise and Townwise Primary Census Abstract : This part contains the primary census data for each village. The primary data pertains to Area, Occupied Residential Houses, Number of Households, Total Population and its Sex-wise break-up, Sex-wise Scheduled Caste and Scheduled Tribe Population, Sex-wise Literate Population, working population by sex and by nine broad categories i. e., Cultivators ; Agricultural Labourers ; those working in Livestock, Forestry, Fishing, Plantations, etc., Mining and Quarrying ; In Manufacturing ; In Construction ; In Trade and Commerce ; In Transport, Storage and Communications ; and in Other Services ; and the Non-working Population also with sex-wise break-up. Similar information is incorporated in this part, in respect of each Town/Urban Area and the Wards/ Enumerator's Blocks, therein.

(ii) Part C : Administrative Statistics and Report : The administrative statistics in all fields of development pertaining to the District will be the main content of this part. The other Census Tables relating to the District i. e. General Population Tables, Economic Tables, Social and Cultural Tables, Migration Tables, Establishment Tables, Fertility Tables and Housing Tables, will also be included in this part.

3. Collection of Non-Census data

The information in respect of Town Directory has been collected from various departments concerned and the respective Urban Local Bodies. Apart from the Urban Local Bodies, without whose co-operation the compilation of such an exhaustive Town Directory would not have been possible at all, mention must be made of some of the important Departments of the Government of Himachal Pradesh which furnished the statistics and information falling in their respective spheres. These are ; The Secretary (L.S.G.) to the Government of Himachal Pradesh ; The Director of Industries, Himachal Pradesh ; The Director of Health Services, Himachal Pradesh ; The Director of Education, Himachal Pradesh ; The Chief Engineers, H.P.,P.W.D.; and the Registrar, Co-operative Societies, Himachal Pradesh ; and lastly personal observation and local enquiries by the Investigators of this office yielded many a piece of information and relevant data.

The information for the compilation of Village Directory was collected with assistance of the Revenue Department of the Government of Himachal Pradesh. The Patwaris were drafted as enumerators and the Kanungos were deputed to supervise this work, under the overall control of the Tahsildar/Naib-Tahsildar concerned. The data was collected by Patwaris in a Schedule, especially devised for the purpose, strictly in accordance with a set of instructions issued in this behalf. However, later, the officials of the Directorate of Census Operations, Himachal Pradesh, were sent out in the field, again, with a view to rectifying the shortcomings and reconciling the discrepancies. Thus the

information, by and large, pertains to mid, 1970. The area figures were based on the 'Lal Kitab' or the Revenue Village Papers as maintained at the Tahsil/ Sub-Tahsil level and the latest available figures were taken into account.

4. The Town Directory-Brief description and analysis

A comprehensive Town Directory running into 7 statements and highlighting all important Physical, Economic, Civic, and developmental aspects has been compiled in respect of each town in Himachal Pradesh. This Town Directory forms an important part of part 'A' of the District Census Handbooks.

(a) Census definition of Town : The standards laid down for considering a place as an urban area were broadly the same as in 1961 Census. However, criteria adopted for determining the urban areas in the 1971 Census were maintained on the following pattern :

"To qualify for recognition as an urban area a place should first be either a Municipal Corporation area or a Municipal Area or under a Town Committee or a Notified Area Committee or a Cantonment Board. If it did not have any of these urban local bodies to administer the affairs, then the following empirical tests should be applied :

(i) A minimum population of 5,000 (estimated for 1971) ;

(ii) A density of not less than 400 per sq km. (1,000 per sq. mile) ;

(iii) 3/4th of the occupations of the male working population should be outside agriculture ; and

(iv) The place should have, according to the Director of Census Operations of the State, a few pronounced urban characteristics and amenities".

Thus all the places having an urban local body such as a Municipal Corporation or a Municipal Committee or Notified Area Committee or a Cantonment Board were obviously treated as towns in this District. No place which did not have a statutory urban local body was treated as an urban area in Sirmaur district.

(b) The Seven statements of Town Directory : Data in respect of the Town Directory has been compiled and presented in the form of seven statements. In all these statements the information is shown individually for each town, the towns having been arranged in alphabetical order. A broad outline of each statement is given hereunder:—

Statement I—Status, Growth History and Functional Category of Towns :

This statement runs into 14 columns and is primarily intended to throw up a comparative picture of the population of each Town in the different censuses from 1901 to 1971. The Civic Administration Status of each town is shown under col. 5. The last column of statement I (Col. 14 functional category-1961 Census) would require some elucidation. It may be relevant to describe the method followed in arriving at the functional character of a particular town according to 1961 Census, in this context. The working population according to 1961 Census was classified into nine broad Industrial Categories viz. I—As Cultivator ; II—As Agricultural Labourer ; III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting & Plantation, Orchards and Allied Activities ; IV—At Household Industry ; V—In Manufacturing other than Household Industry ; VI—In Construction ; VII—In Trade & Commerce ; VIII—In Transport, Storage & Communications and IX In Other Services. For working out the functional category in respect of a particular town these nine categories were suitably combined and grouped into five broad Functional Classifications as below:—

(i) Primary Activities-Industrial categories I, II & III ;

(ii) Industry-Industrial categories IV, V & VI;

(iii) Trade & Commerce-Industrial category VII ;

(iv) Transport-Industrial category VIII ; and

(v) Services-Industrial category IX.

The percentage of workers under each of these five classes of economic activities to total workers in a particular town was calculated and the functional character

of the town determined according to these percentage values. If workers under one of the five occupations accounted for 40% or more of the total workers, the town was considered as mono-functional e.g. Service, Industrial etc. However, in case the percentage was less than 40% the next predominant occupation was taken into account, so that the total of the two would come to 60% or above. Such a town was designated as bifunctional e.g., Service-cum-Industrial. Further, if the total did not come upto 60% the third predominant occupation was taken into account and such a town was designated multi-functional e.g. Service-cum-Industrial-cum-Primary Activities.

Statement II—Physical Aspects and Location of Towns, 1969 :

Data on annual rainfall, and temperature is shown under col's. 3 to 5 of this statement which runs into 13 columns. The other columns indicate the distances of a town from the nearest city with a population of 1 lakh or more, from the Head-quarters of the State, District, Sub-division, Tahsil and from the nearest Railway Station, Bus Route, Navigable River/Canal (if within 10 km.). The last column viz, col. No. 13 pertains to the Sea-Part (if within 50 km.). Obviously there is no information to be recorded under this column in Himachal Pradesh.

Statement III—Municipal Finance, 1968-69 :

This statement shows the Receipt and Expenditure in respect of the Municipal Finance of individual towns under different heads. There are in all, 16 columns in this statement.

Statement IV—Civic and Other Amenities 1969 :

This statement displays information under 16 heads. The amenities, about which information has been incorporated are; Road Length (with breakup by Kutcha & Pucca road, if available) System of sewerage/drainage and other related matters ; Water supply ; Fire Fighting Service ; and Electrification.

Statement V—Medical, Educational/Recreational and Cultural Facilities in Towns, 1969 :

This statement is intended to depict the degree of availability of Medical Facilities by type of institutions and number of beds available in each; Educational Facilities by levels/types of Courses; and Recreational and Cultural Facilities. The statement has 17 columns.

Statement VI—Trade, Commerce, Industry and Banking, 1969 :

This statement displays information under 15 columns in respect of each town. The information pertains to Imports, Exports, Manufactures, Banks, and Agricultural and Non-Agricultural Credit Socities.

Statement VII—Population of Towns by Religion 1971 :

Town-wise break-up of the 1971 Census population by religion is shown in this statement.

(c) Coverage : There are only three towns in Sirmaur district which are all covered by the Town Directory. Of these Nahan and Paonta Sahib were Urban areas in the 1961 Census also, but Sarahan in Pachhad Tahsil, which was declared as a Notified Areaduring the inter-censal period is a new town in the present census.

(d) Sources of Information : The information has been collected from the respective urban Local Bodies and the concerned departments of the Government of Himachal Pradesh. Temperature and Rain Fall data have been partially collected from the Director General of Observatories, Government of India, Poona.

(e) Brief notes on the statements :

Statement I—Status, Growth History and Functional Category of Towns :

Of the three towns in Sirmaur district Sarahan has a Notified Area Committee whereas Nahan and Paonta Sahib each is administered by a Municipal Committee. The notations utilized in the statement alongwith their explanations are given hereunder :

Notation	*Explanation*
NAC	Notified Area Committee
M	Municipal Committee

Nahan has been an urban area since 1901 Census and barring the census of 1921 when a little decrease

was recorded in the population of this town its population has recorded a steady increase, from 6,256 in 1901 to 16,017 in 1971 Census. Paonta Sahib was considered as a town for the first time in 1951 Census, whereas Sarahan is a new town for the 1971 Census.

Table No. I given hereunder shows the towns classified according to their Functional Categories :

TABLE NO. 1

Distribution of towns by functional categories

Functional Cetegory—1961	Total No. of Towns
Service	2
	1

Functional Category in respect of Sarahan Town could not be worked out as it was notified as a town for the first time in 1971 Census

Because the functional category has been worked out on the basis of the 1961 Census data, Sarahan, which is a new town for 1971 Census, could not be included under any functional category. The two other towns fall in the Service Category.

Statement: II – Physical Aspects and Location of Towns, 1969 :

This Statement covers the physical and locational aspects of the towns.

In matters of rainfall Paonta Sahib with an annual rainfall of 1990.50 mm. tops the list of towns in Sirmaur district. The temperature data is not available for any town in Sirmaur district.

Statement III—Municipal Finance, 1968-69 :

Table No. 2 shows per capita Receipt and Expenditure, further classified according to sources and various activities, respectively, in respect of the different classes of towns according to their population size.

TABLE No. 2
Per capita receipt and expenditure by size class of towns

Per capita

Size Class of town	Number of Towns	Receipt (Rs.)			Expenditure (Rs.)			
		Total Receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	Expenditure on public health and conveniences	Expenditure on public institutions	Expenditure on all other aspects

**Data in respect of Sarahan town is not available.*

The dada pertains to Nahan and Paonta Sahib towns only which fall in class IV and VI, respectively. Statistics in respect of Sarahan are not available. Study of this table reveals that the per capita receipts of the two towns (also classes in this case because the information pertains to one town in each class) stand at almost equal level i. e. about Rs. 33/- in each case. However, there is a difference in the levels of per capita expenditure which stand at Rs. 22.97 p. in Nahan (class IV) and Rs. 18.20P. in Paonta Sahib (Class VI). The difference is more marked in case of per capita expenditure on public health conveniences.

Statement IV—Civic and Other Amenities, 1969

The following notations have been used in the compilation of this Statement :—

Column No.	Notation Used	Description
3	PR	Pucca Road
	KR	Kutcha Road
4	OSD	Open Surface Drains
	S	Sewer
8	HL	Head Load
	WB	Wheel Barrow
9	T	Tap
	SW	Spring Water

Statement V—Medical, Educational, Recreational and Cultural Facilities in Towns 1969 :

The following notations have been used to depict the availability of various types of facilities in the various towns :—

Column	Notation	Description
3	HC	Health Centre
	FC	Family Planning Centre
	H	Hospital
	TBC	T. B. Clinic
	O	Others
5	AS	Art & Science College
9	TC	Training Centre
	ITI	Industrial Training Institute
	CTC	Crafts Training Centre
	RITI	Rural Industrial Training Institute.
13	SC	Sanskrit College
	JBT	Junior Basic Training School
	P. Pr.	Pre-Primary School.

Table No. 3 shows availability of medical facilities in terms of number of beds available for 1,000 town-dwellers in Sirmaur district.

TABLE No. 3

Medical Facilities

Total No. of Beds in Medical Institutions	No. of Beds per 1,000 Population
1	2
252	12.17

There are 252 beds in the Medical Institutions located in the towns of Sirmaur district. The number of beds per 1,000 urban population works out at 12.17. Nahan town enjoys the largest amount of medical facilities with a Hospital, a T. B. Clinic, a Family Planning Centre and 5 other Clinics. Sarahan town has the least amount of medical facilities. There is no hospital in this town.

As for educational facilities it is noticed that there is only one college situated in Nahan town, in this district. This is an Arts and Science Degree College. No other facilities of higher education exist in this district. However, all the towns are provided with some tpye of Vocational Training Centre/Industrial Training Institute etc.

The following Table No. 4 shows the number of Schools providing educational facilities upto various levels per 1,000 population in the different Towns of the district.

TABLE No. 4

Higher Secondary or Secondary, Junior Secondary/ Middle and Primary Schools per 1,000 Population

Number per 1,000 Population

Name of the town	Higher Secondary or Secondary Schools	Middle/Junior Secondary Schools	Primary Schools
1	2	3	4
Sarahan	1	1	1
Nahan	N	N	1
Paonta Sahib	N	N	N

N-Negligible.

A glance on the above Table would reveal that in terms of availability of School Educational facilities Sarahan town is the only one which has at least one school of every type i.e Higher Secondary or Secondary, Middle/Junior Secondary and Primary Schools per 1,000 souls. In Nahan and Paonta Sahib the ratio in respect of all types of schools (excepting Primary Schools in Nahan town) works out at less than even 1, which is negligible.

With regard to Recreational Facilities it may be noted that the two Cinema halls located in Nahan town are the only ones in this district. Sarahan town has no recreational facilities what so-ever, not even a public library or a reading room.

Statement VI—Trade, Commerce, Industry and Banking, 1969 :

The noteworthy features of the informatian compiled in this statement are (i) Export of Potatoes, Tomatoes and Ginger from Nahan and Sarahan and of Foodgrains, Gur and Timber from Paonta Sahib, and (ii) Manufacture of Resin & Turpentine and foundary products like Electric Motors and Crushers in Nahan town which has two factories manufacturing these goods and of Pottery in Paonta Sahib.

Statement VII Population of Towns by Religion 1971 :

Hindus constitute the predominant community in all three towns in Sirmaur district. However Nahan has a sizeable number of Muslims (2,075) who constitute 12.95% of the total population. Similarly Sikhs command second position in terms of numbers in Paonta Sahib, where they form 20.02% of the total population. Their percentage in Nahan town is 6.21. In case of Sarahan town, members of religious communities other than Hinduism do not make any significant proportions. However Sikhs with a percentage of 4.37 form the second largest religious group.

5 Village Directory

(i) Concept of Census Village : In 1961 Census, a Census Village was the same as a Revenue Village. After reorganisation of Punjab, Haryana and Himachal Pradesh on Ist November, 1966 some areas were transferred from the erstwhile State of Punjab to Himachal Pradesh. Whereas in some of these newly merged Districts/Tahsils etc. the revenue village is comparable in population size and area to the revenue villages of the old Districts yet in most of the cases the average revenue village is much bigger in area and population than its counterpart in the old districts. The difference is so marked that it renders comparison of the villagewise statistics an exercise in futility. Therefore smaller rural units were considered as Census Villages in most of the newly merged areas of Himachal Pradesh. It may be relevant to detail here areawise, the names of the Smallest Census Rural Units considered as Census Villages in Himachal Pradesh. This information is given below:—

Name of Smallest Census Rural Unit considered as 'Census Village'	Area where considered
1	2
1. Revenue Village	(i) In the districts of Chamba, Mandi, Bilaspur, Mahasu, Sirmaur, Kinnaur and Simla.
	(ii) Una Tahsil and Amb Sub-Tahsil of Kangra district.
2. 'Tikka having a distinct Sub-Hadbast Number	Kangra district excepting Una Tahsil and Amb Sub-Tahsil.
3. "Phatti" having a distinct Sub-Hadbast Number.	Kulu district.
4. Village Hamlet (with/ without distinct Sub-Hadbast Number.	Lahul & Spiti District.

(ii) Presentation of Data : The village-wise data is displayed in 18 columns. Apart from this, Abstracts of the Educational, Medical and other Institutions and Amenities in respect of Tahsils/Sub-Tahsils and the District have been incorporated in this publication. For according convenience in the identification of Census Villages, lists of villages arranged in alphabetical order showing their Census Location code numbers and the Revenue numbers, have also been added.

(iii) Explanatory Note regarding the Notations used in the Village Directory : The information pertaining to the different amenities available in the Census Villages

has been shown with the help of a set of notations. These notations along with the particular amenities which these represent are given hereunder:—

Column—4

1. Primary School	Pr. S
2. Junior Secondary or Middle School	Mid. S
3. Secondary or Higher Secondary School	Sec. S

Column—5

1. Hospital	H
2. Maternity and Child Welfare Centre	MCW
3. Health Centre	HC
4. Dispensary	D
5. Family Planning Centre	FC

Column—6

1. Electricity	E

Column—12

**1. Others	O

* *The Category of 'Others' includes stream, kuhal and nallah.*

** *The category of 'Others' includes Kuhal and Lake.*
(Lake occurs only in one village)

6. Brief analysis of data

(*a*) *Distribution of Villages by area :* Table No. 5 shows the distribution of Villages in Sirmaur district by their respective areas :—

TABLE No. 5

Distribution of Villages by their areas

Area in Hectares	No. of Villages
1	2
50 Hectares or less	83
51—100 Hectares	160
101—200 Hectares	332
201—500 Hectares	297
501—1000 Hectares	81
1001—2000 Hectares	12
2001—5000 Hectares	2
5001 Hectares or above	...
Total :	967

Sirmaur is a district of small and medium sized villages, considering their areas. Out of the total of 967 villages as many as 872, which is 90% of the total have areas of less than 500 hectares each. Further, there are only two villages in the District which have area between 2001-5000 hectares each. There is no village in the area size-class 5000 hectares or above. The area size class 101-200 hectares alone claims 332 villages. which is 34% of the total.

It would be observed that the area figures in the Village Directory of certain Tahsils are in acres, whereas these are in hectares in others The compilation of the table has been done taking into consideration the difference in the two units of measurement and the final figures presented in terms of hectares. Wherever necessary, similar action has been taken in this report.

(*b*) *Availability of Educational Amenities* : Table No. 6 given hereunder shows the number of villages in the district classified by their respective distances from the nearest town, alongwith the numbers of those which have educational facilities upto various levels, in the different classes :

TABLE No. 6

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest Town	Total No. of Villages	Number of Villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 Km. or less	59	20	3	1	...	...
6—10 Km.	70	13	5	...	...	...
11—15 Km.	96	27	11	2	...	...
16—25 Km.	216	47	12	3	...	...
26—50 Km.	291	85	15	6	...	...
51—100 Km.	225	95	23	6	...	...
101—200 Km.	10	6	2	...	...	...
201 Km. and above	...	...	...	...	...	...
Total :	967	293	71	18	...	...

Out of the 967 villages in Sirmaur district as many as 526 are situated at distances of over 26 km. from the nearest town. This is a pointer towards the low level of urbanization in the district, as in most other parts of Himachal Pradesh. However none of the villages has a distance of over 201 km. from the nearest town.

The number of villages having Primary Schools in this district is 293 and these are evenly sprinkled over the whole rural region of Sirmaur. The 71 villages having Middle Schools are also distributed in a rough sort of proportionate manner in all the classes of villages. But as for the High or Higher Secondary Schools, it may be of interest to note that no such schools exist in the 70 villages situated at distances between 6-10 Km and in the 10 villages lying at distances between 101 and 200 Km. from the nearest town. Another important feature of this data is absolute lack of college education in the rural areas of Sirmaur district. In fact the only college in the District is located at Nahan town, the district headquarter.

(c) Availability of Medical Facilities : Table No. 7 reproduced hereunder shows the number of Medical Institutions of any kind per 100 Sq. Km. in the Tahsils/ Sub-Tahsils of Sirmaur district :

TABLE No. 7

Medical Facility per 100 Sq. Km.

Tahsil/Sub-Tahsil	Total area in Sq. Km.*	Number of Medical Institutions of any kind per 100 Sq. Km.
1	2	3
Rajgarh	412.31	2
Pachhad	405.17	2
Nahan	181.67	3
Rainka	541.55	3
Shilai	322.98	2
Paonta Sahib	368.93	3
Total :	2,232.61	3

**Area figures according to Director of Land Records, Himachal Pradesh.*

Any conclusions drawn on the basis of the area figures used in this Table are bound to be misleading to some extent, due to the fact that these figures do not represent the geographical area. These figures, in fact represent what is called as the Reporting Area. Total area of Sirmaur district according to State Director at Land Records 2232.61 Sq. Km. The area of this district according to the Surveyor General, India, as on 1st July, 1971, is 2825 Sq. Km. (Provisional). There is

thus a difference of 592.39 Sq. Km. in the two sets of figures. However, on the basis of the area figures according to State Director of Land Records, there are 3 Medical Institutions of any kind per 100 Sq. Km. in Nahan, Rainka and Paonta Sahib tahsils as compared to 2 per 100 Sq. Km. in Rajgarh, Pachhad and Shilai. Tahsils/Sub-Tahsils. Tahsilwise/Sub-Tahsilwise breakup of area figures according to the Surveyor General, India is not available.

(d) Electric Power Supply : Table No. 8 shows the number of villages having the facility of electric power supply according to their distances from the nearest town :-

TABLE No. 8

Distribution of villages with electricity and distance from the nearest town

Distance from the nearest Town	Total No. of villages	No. of villages with Electric power supply
1	2	3
5 Km. or less	59	25
6—10 Km.	70	12
11—15 Km.	96	21
16—25 Km.	216	32
26—50 Km.	291	60
51—100 Km.	225	44
101—200 Km.	10	...
201 Km. and above	...	...
Total :	967	194

Out of 967 villages in Sirmaur only 194, which is about 20% are connected with electric power supply. None of the 10 farflung villages, situated at distances of 101-200 km. from the nearest town is electrified. Similarly, of the 225 villages located at distances between 51 & 100 km. from the nearest town only 44 are enjoying this amenity. The category of villages situated at distances of 5 km. or less from the nearest town has 59 villages, in all, out of which 25 are electrified, which is 42%. Their proximity to one town or the other, which are all electrified, is the reason for this comparatively high percentage, in the class.

(e) Communication : Table No. 9, reproduced hereunder, displays the number of villages connected by Pucca Road, Kutcha Road, and some other types of comunication systems, according to their distances from the nearest town.

TABLE No. 9

Distribution of villages with different communication facilities and distance from the nearest town

Distance from the nearest Town	Total No. of Villages	Number of villages connected by					
		Pucca Road	Kutcha Road	Pucca Road and River	Pucca Road and Rail	Kutcha Road and Rail	Others
1	2	3	4	5	6	7	8
5 Km. or less	59	22	17	...	...	...	...
6—10 Km.	70	24	18	...	...	...	...
11—15 Km.	96	14	34	...	...	...	...
16—25 Km.	216	25	88	...	...	...	...
26—50 Km.	291	6	149	...	...	...	...
51—100 Km.	225	2	112	...	...	...	...
101—200 Km.	10	...	4	...	...	...	...
201 Km. and above	...	...	...	...	...	...	...
Total :	967	93	422	...	...	...	...

Study of the above Table reveals that the only communication systems prevalent in Sirmaur are Roads, both Pucca and Kutcha and that the facility of River and Rail communications is totally absent. Out of the 967 villages only 93 are connected by Pucca Roads and another 422 are connected by Kutcha Roads. Thus 452 villages i. e. 47% of the villages are not connected even by Kutcha Roads. This is a pointer towards rather poor communication facilities available in this District, like most other mountainous areas of Himachal Pradesh. Another notworthy feature of this data is that the villages situated at comparatively smaller distances from the nearest town enjoy better communication facilities as is evident from the big proportions of such villages enjoying the facilities of Pucca or Kutcha Roads. Another important feature of this data is that the far-flung places in the interior of the District have yet to be connected by Pucca Roads. Of the 291 villages situated at the distances of 26-50 km. from the nearest town only 6 are connected by Pucca Roads. Similar figures in respect of the distance-class 51-100 are 225 and 2, whereas out of the 10 villages which are located between 101-200 Km. from the nearest town none is connected by Pucca Road.

(*f*) *Postal Facilities* : Table No. 10 given hereunder, depicts number of Post Offices per 100 Sq. Km. in the Tahsils/Sub-Tahsils of Sirmaur district :-

TABLE NO. 10

Number of of Post Offices per 100 Sq. Km.

Name of Tahsil/ Sub-Tahsil	Total area in Sq. Km.*	No. of Post Offices per 100 Sq. Km.
1	2	3
Rajgarh	412.31	5
Pachhad	405.17	3
Nahan	181.67	7
Rainka	541.55	4
Shilai	322.98	3
Paonta Sahib	368.93	6
Total :	2,232.61	4

**Area figures according to Director of Land Records, Himachal Pradesh*

As already discussed in case of Table No. 7, due to a difference of 592.39 Sq Km. in the area figures utilized in the compilation of Table No. 10 and those according to Surveyor General, India this Table may not give an exact idea about the level of availability of postal facilities. However, a comparative picture does emerge. Considering the set of area figures used there are 3 Post Offices per 100 Sq. Km. in Pachhad Tahsil and Shilai Sub-Tahsil and 4 Post Offices per 100 Sq.Km. in Rainka Tahsil. The corresponding figures in respect of Rajgarh Sub-Tahsil, Paonta Sahib Tahsil and Nahan Tahsil are 5, 6 and 7 respectively.

(*g*) *Staple Food* : Staple food of the inhabitants of Sirmaur district comprises of Maize and Wheat.

(*h*) *Land Use Pattern* : The land use data has been collected and compiled under the following heads :-

(i) Forests.

(ii) Culturable-Waste.

(iii) Area not available for cultivation.

The figures of-

(i) Irrigated area and

(ii) Un-irrigated area have also been compiled.

Table No. 11 shows statistics pertaining to cultivated land and cultivable waste land in the villages classified according to their distances from the nearest town :

TABLE No. 11

Percentage of average cultivable waste per village to average cultivated land per village by distance from the nearest town

(Hectares)

Distance from the nearest Town	No. of Villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 Km. or less	59	3823.94	64.81	3516.34	59.60	91.96
6—10 Km.	70	3926.43	56.09	3266.87	46.67	83.21
11—15 Km.	96	5291.27	55.12	6742.44	70 23	127.41
16—25 Km.	216	8068.95	37.36	15681.48	72.60	194 33
26—50 Km.	291	10858.83	37.32	36593.91	125.75	336.95
51—100 Km.	225	12379.40	55.02	42788.13	190.17	345.64
101—200 Km.	10	741.00	74.10	2158.00	215.80	291.23
201 Km. and above	...	...	...	...	...	...
Total :	967	45089.82	46 63	110747.17	114.53	245 61

The average cultivated land per village in Sirmaur district is 46.63 hectares. This average is the highest per village in the class of villages situated between 101-200 Km. from the nearest town i. e. 74.10 hectares. In the other classes it varies between 37.32 hectares in villages lying at 26-50 Km. from the nearest town to 64.81 hectares in those situated at 5 Km. or less from the nearest town. Average cultivable waste land per village shows an increasing trend as the distance of the villages from the nearest town increases. This is because of high peaks and rugged mountains in the interior of the District. Percentage of average cultivable waste per village to averge cultivated land per village is as high as 345.64 hectares in the category of villages situated at 51-100 Km. from the nearest town. The District average is 245.61 hectares.

PART X—B

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE—PRIMARY CENSUS ABSTRACT

1. Introductory :

Basic and important statistics revealed by 1971 census in respect of primary census units i. e, Village in rural areas and Enumerator's Block in urban areas have been presented under 38 columns of Primary Census Abstract.

2. Area Figures :

Primary Census Abstract contains the identification particulars of the Villages/Enumerator's Block and the respective areas figures of each unit. The area figures in case of census villages are based on the Revenue village papers as maintained in the respective Tahsil/Sub-Tahsil Offices, and were collected along with the non-census data pertaining to the Village Directory. The latest available figures were taken into account. The total of these area figures of the tahsils do not tally with the tahsil-wise and district-wise figures, because the former represent land use area, and do not necessarily include what is called as the "non-reporting area". Further the figures given in case of district represent the geographical area figure supplied by the Surveyor General, India. The tahsil-wise total area figures have been supplied by the Director of Land Records, Himachal Pradesh, whereas the area figures for towns have been furnished by the respective Local Bodies In case of Districts and Tahsils/Sub-Tahsils, area figures for rural areas are divided by subtracting the urban area from the total area

3. Occupied Census Houses and Households :

The next item of information pertains to the number of Occupied Residential Houses, and the number of Households in Village/Enumerator's Block. It may be relevant to give here the definition of the terms 'House' and 'Household' as adopted in census.

(i) Census House : A Census House is a building or a part of a building inhabited or vacant and having a separate main entrance from the road or common courtyard or stair-case etc., used or recognised as a separate unit. It may be used for residential or non-residential or both. If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common stair case or a common courtyard leading to a main gate, they are considered as separate Census House. If within a large enclosed area there are separate buildings, then each such building is also considered a separate House. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance is treated as separate Census House.

(ii) Census Household : A Household is a group of persons who commonly live together and would take their meals from common kitchen unless exigencies of work prevented any of them from doing so. A household may be made up of related or unrelated persons.

4. Scheduled Castes and Scheduled Tribes :

Primary Census Abstract is, again, perhaps the only source of information on Scheduled Caste and Scheduled Tribe components of the villagewise/block-wise population. The Castes and Tribes listed as Scheduled Castes/Tribes in Himachal Pradesh under the Government of India, Ministry of Home Affairs, Scheduled Castes and Scheduled Tribes List Modification Order, 1956, constitute the Scheduled population in Census. It may be of interest to note here that, infact, two different lists were utilised in the different areas of Himachal Pradesh. Such a course was necessitated in view of the merger of certain areas from the erstwhile State of Punjab in Himachal Pradesh on 1st November , 1966, when the three States of Punjab, Haryana and Himachal Pradesh were reorganised. The lists pertaining to Punjab were utilised in the newly merged areas whereas the lists pertaining to Himachal Pradesh were utilised in the old areas of the State. These lists are given hereunder :

LIST—I

List of Scheduled Castes and Scheduled Tribes for the District of (1) Chamba (excluding the Towns of Dalhousie (M.C.) Dalhousie (C.B.) and Bakloh (C.B.), (2) Mandi, (3) Bilaspur, (4) Mahasu (5) Sirmau and (6) Kinnaur.

SCHEDULED CASTES

1. Ad-dharmi.
2. Badhi or Nagalu.
3. Bandhela.
4. Balmiki, Chura or Bhangi.
5. Bangali.
6. Banjara.
7. Bansi.
8. Barad.
9. Barar.
10. Batwal.
11. Bawaria.
12. Bazigar.
13. Bhanjra.
14. Chamar, Mochi, Ramdasi, Ravidasi or Ramdasia.
15. Chanal.
16. Chhimbe.
17. Chuhre.
18. Dagi.
19. Daole.
20. Darai or Daryai.
21. Daule.
22. Dhaki or Toori.
23. Dhaogri or Dhuai.
24. Doom or Doomna.
25. Dumne.
26. Hali.
27. Hesi.
28. Jogi.
29. Julahe.
30. Kabirpanthi, Julaha or Keer.
31. Kamoh or Dagoli.
32. Karoack.
33. Khatik.
34. Koli.
35. Lohar.
36. Mazhabi
37. Megh.
38. Nat.
39. Od.
40. Pasi.
41. Phrera.
42. Rehar,
43. Rehara.
44. Sansi.
45. Sapela.
46. Sarde, Sarare or Siryare.
47. Sarehde.
48. Sikligar.
49. Sipi.
50. Sirkiband.
51. Teli.
52. Thathiar or Thathera.

SCHEDULED TRIBES

1. Gaddi.
2. Gujjar
3. Jad, Lamba, Khampa and Bhot or Bodh.
4. Kanaura or Kinnara.
5. Lahaula.
6. Pangwala.

LIST—2

List of Scheduled Castes for the district of (1) Kangra, (2) Kulu, (3) Lahul and Spiti and (4) Simla and (5) Towns of Dalhousie, (M. C., Dalhousie (C. B.) and Bakloh (C. B.) of Chamba District.

1. Ad-dharmi.
2. Balmiki, Chura or Bhangi.
3. Bangali.
4. Barar, Burar or Berar.
5. Batwal
6. Bauria or Bawaria.
7. Bazigar.
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi.
10. Chanal.
11. Dagi.
12. Dhanak.
13. Dumna, Mahasha or Doom.
14 Gagra.
15. Gandhila or Gandil Gondola.
16. Kabirpanthi or Julaha.
17. Khatik.
18. Kori or Koli.
19. Marija or Marecha.
20 Mazhabi.
21. Megh.
22 Nat.
23. Od.

24. Pasi.
25. Perna.
26. Pherera.
27. Sanhai.
28. Sanhal
29. Sansi, Bhedkut or Manesh.
30 Sapela.
31. Sarera.
32 Sikligar.
33. Sirkiband.
34. Darain.
35. Dhogri, Dhangri or Siggi, and
36. Sansoi.

List of Scheduled Tribes for Lahul and Spiti District only :

1. Bhot or Bodh.
2. Gaddi, and
3. Swangla.

Note : There are no Scheduled Tribes in Kangra District, Kulu District, Simla District and Towns of Dalhousie (M. C.), Dalhousie (C. B.) and Bakloh (C.B) of Chamba District.

5. Literate and Educated Persons :

A person who can both read and write with understanding in any language is considered as literate. A person who can merely read but cannot write is not taken literate. It is not, however, necessary that a person who is literate should have had received any formal education or should have had passed any minimum educational standard.

6 Workers :

In 1971 Census a person whose main activity is participation in any economically productive work by his physical or mental activity is treated as a worker. Main activity is the one in which one engages oneself mostly. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person has participated in any such regular work on any one of the day during this reference period and that work is returned as his main activity the person is categorised accordingly. Further, the main activity in case of seasonal work such as Cultivation, Livestock keeping etc., is ascertained with reference to such work in the preceding one year. Total population having been divided into the two groups of "Workers" and "Non-Workers", the Workers have further been classified by 9 broad categories according to their main activities. The nine categories are briefly described hereunder.

(*i*) *Cultivator* : For the purposes of the Census a person is considered as a cultivator if he or she is engaged in cultivation by his or herself or by supervision or direction in his or her capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money ,kind or share. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as Wheat, Paddy, Jowar, Bajra, Ragi etc., and pulses, Raw Jute and Kindred fibre Crop, Cotton etc., and other crops such as Sugarcane, Groundnuts, Tapioca etc. and does not include Fruit Growing, Vegetable Growing or keeping Orchards or Groves or working of Plantation like Tea, Coffee, Rubber, Cinchona and other medicinal plants.

(*ii*) *Agricultural Labourer* : A person who works in another person's land for wages in money, kind or share is regarded as an Agricultural Labourer. Such a person has no risk in the cultivation but he merely works in another persons land for wages. The labourer can have no right of lease or contract on land on which he works.

(*iii*) *Live Stock, Forestry, Fishing, Hunting and Plantation orchards and Allied Activities* : Those engaged in Livestock production, Agricultural services, Hunting, Trapping and Game propagation, Forestry and Logging, Fishings, Plantations, Orchards etc , are included in this category.

(*iv*) *Mining and Quarrying* : This category includes all those who are working in only Mining or Quarrying activities.

(*v*) *Manufacturing, Processing, Servicing and Repairs* : This category has two sub-categories as below :

(*a*) *Household Industry* : A Household Industry is

defined as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory. Further acording to the census concept a Household Industry relates to production, processing, servicing, repairing or making and selling of goods.

(*b*) *Other than Honsehold Industry* : This Sub-category includes Manufacturing, Processing, Servicing and Repairs, other than Household Industry as described above.

(*vi*) *Construction* : Those engaged in any type of construction and allied activities are included in this category.

(vii) Trade and Commerce : This category includes all those persons who are engaged in wholesale or retail trade in any goods. Those working in Restaurants and Hotels, Banking, Financing, Insurance, Real Estate and Business services are also classified under this category.

(*viii*) *Transport, Storage and Communications* : This category includes Land, Water and Air transport. All activities connected with storage and ware housing and communications like Postal, Telegraphy and Telephone etc , are also included in this category.

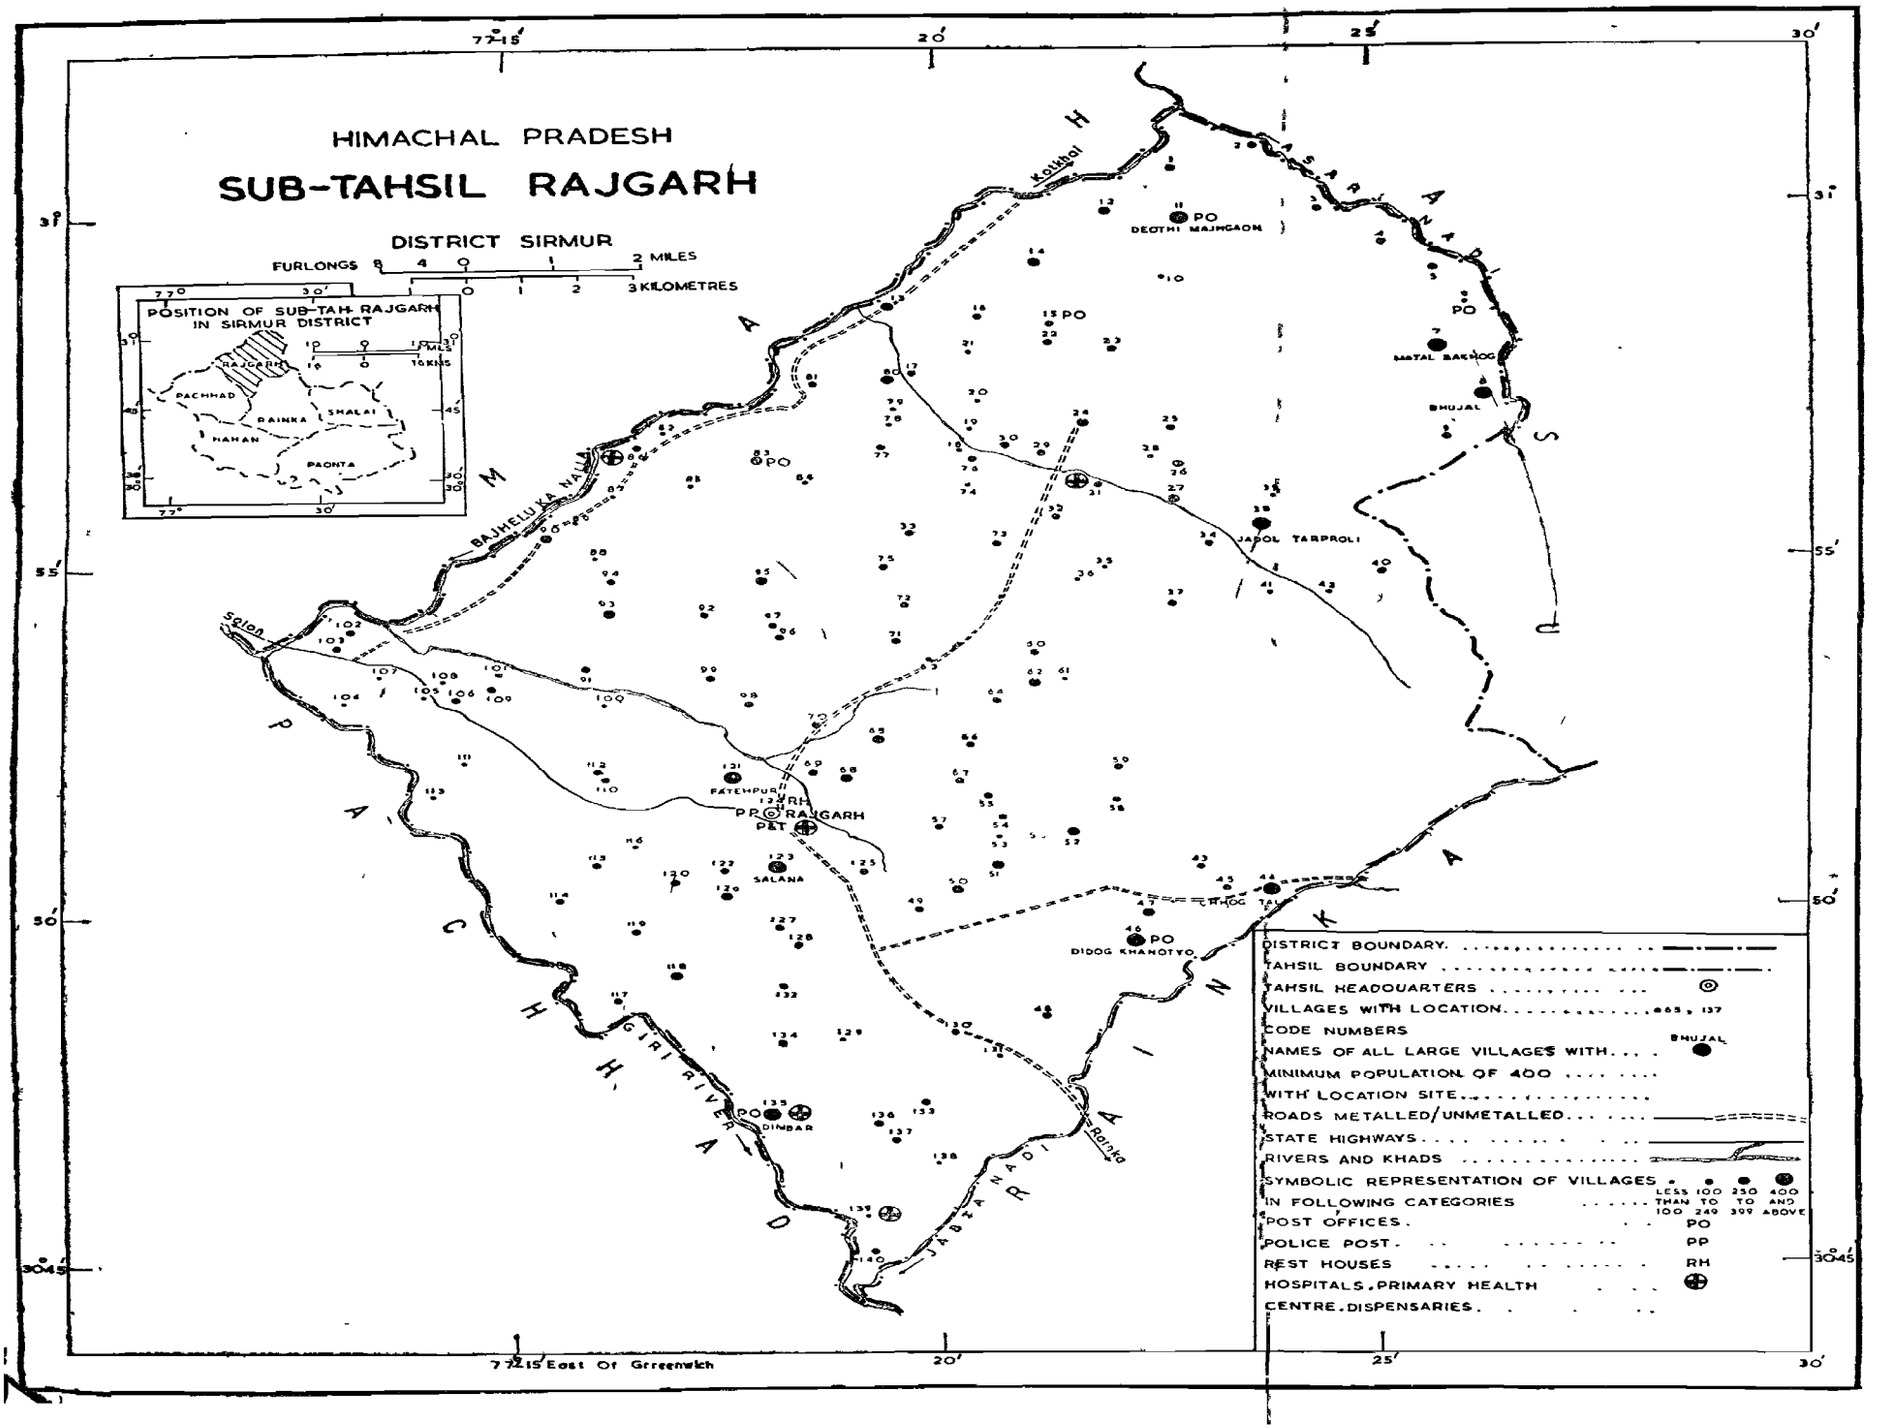

(*ix*) *Other Services* : Those engaged in Community, Social and Personal Services, including Public Administration, Medical and Health Services, Recreational and Cultural Services, Community Services are included in this category. Persons who happen not to be adequately described their activities or those whose services are not classified elsewhere also form part of this category of workers.

(*x*) *Non Workers* : This group consists of those persons whose main activity is returned as one of the following :

(i) Household Duties.
(ii) Students.
(iti) Retired persons or rentiers.
(iv) Dependents.
(v) Beggars etc.
(vi) Institutions inmates of.
(vii) Other Non-Workers (Those seeking work).

*These represent provisional 'geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by subtracting the urban area from the total area of the District. The total of the area figures of the Tahsil/Sub-Tahsil will not tally with the district figures because the former represent 'land use' area and are derived from the figures supplied by the Director of Land Records. Likewise the total of the villagewise area figures may not tally with the Tahsils/Sub-tahsil figures because the village-wise area figures are collected from the Village Official (Patwari).

STATEMENT SHOWING JURISDICTION OF ENUMERATOR'S BLOCKS IN URBAN AREAS

Name of Town with Code No.	Ward No.	Block No.	Jurisdiction of each Block in terms of Census House Nos.
1	2	3	4
SARAHAN N.A.C. (9/III)	1, 2, 3	1	House No. 1 to 25 House No. 1 to 22 House No. 1 to 52
	4, 5, 6	2	House No. 1 to 14 House No. 1 to 32 House No. 1 to 23
NAHAN M. C. (9/1)	1	1	House No. 2452 to 2650
		2	House No. 2651 to 2818
		3	House No. 2819 to 2945
	2	4	House No. 2069 to 2205
		5	House No. 2206 to 1313
		6	House No. 2314 to 2451
	3	7	House No. 1727 to 1922
		8	House No. 1923 to 2068
	4	9	House No. 1381 to 1496
		10	House No. 1497 to 1607
		11	House No. 1608 to 1726
	5	12	House No. 728 to 923
		13	House No. 924 to 1075
	6	14	House No. 1076 to 1184
		15	House No. 1185 to 1272
		16	House No. 1273 to 1380
	7	17	House No 448 to 551
		18	House No. 552 to 684
		19	House No. 685 to 727
	8	20	House No. 313 to 427
		21	House No. 428 to 447 and House No. 2946 to 3029
	9	22	House No. 1 to 97
		23	House No. 98 to 185
		24	House No. 186 to 313
PAONTA SAHIB M. C. (9/II)	1	1	House No. 1 to 56
		2	House No. 57 to 139
	2	3	House No. 1 to 140
	3	4	House No. 1 to 68
	4	5	House No. 1 to 108
	5	6	House No. 1 to 105

Note : (i) Six Wards of Sarahan N. A. C. Comprise two Blocks.

(ii) House Nos. 2069 to 2094 and 2452 to 2471 were not give to any house in inadvertently by the enumerators.

(iii) House Nos. 302 to 313 were marked twice each on different house inadvertently by the enumerators.
