BHIMA KALI TEMPLE SARAHAN

(Motif on the Cover)

About 184 kilometres from Shimla, in the Sutlej valley on way to the tribal district of Kinnaur, Sarahan was the ancient capital of Rampur Bashahr, one of the biggest princely states in the Shimla hills and is well known for its centuries old Bhima Kali temple.

The legend has it that one Banasur was in service of Rajpuran, the chief of Kamru Thakurai. He left Kamru chief's service and went on a pilgrimage to Mansarover. After some time he came back to a place then known as Shonitpur. He settled down there and made it his capital. He built a palace for himself and a temple later came to be known as Bhima Kali. Banasur known for valour ruled for a long time from his capital now called Sarahan. The chiefs of Kamru later on conquered the lower hills and they for administering and controlling the newly conquered areas shifted their capital from Kamru to Sarahan and built palace cum temple there. The successive rulers made extensions and renovations to the palace cum temple several times.

Now the old palace at Sarahan with slopping roofs and overhanging eaves stands with pride in the high Himalayas. Dr. N.N. Francke of the Moravion Mission who visited Sarahan in 1909 A. D. found the palace as one of the finest specimens of hill architecture.

The Bhima Kali temple complex comprises a large rectangular courtyard enclosed by residential apartments and shrines in the timber-bound style apart from a small medieval Shikhara temple. Across the court-yard, are two successive walls of buildings with elaborate silver doors made by Kinnaura silversmiths during the reign of Raja Padam Singh (1914—47).

Bhima Kali temple is also perhaps the last shrine in the Sutlej valley which is served by Brahman priests.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and landuse pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to tahsil/town levels.

At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C. D. Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K. L. Negi, the Director of Census Operations, Himachal Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April, 1982.

P. PADMANABHA,
REGISTRAR GENERAL, INDIA.

PREFACE

The data collected at 1981 Census has to be tabulated and finalised so that the utility of the data is not minimised for data users and the present volume is an endeavour towards that end. In the recent past the need for a handy census publication has grown because it serves as a ready reckoner to various administrators and planners for taking policy decisions. The scholars who are engaged in projects such as sociology, anthropology cannot do without the basic statistics and there are yet others who are keen to know how many are we and how distributed. This handbook contains information down to the village level in the rural areas and ward level in the urban areas which are the smallest units of administration.

2. The District Census Handbooks in respect of each district of the Pradesh were brought out for the first time in 1951 Census. Prior to this the census reports contained data upto district/tahsil/town level only. With the change of time the necessity of data for the lowest administrative unit i.e. "village" was felt by the Government as well as by the various data using agencies. Keeping this object in view, the publication of the District Census Handbooks form a part of publication of the Census programme as a State Government publication.

3. The District Census Handbook is constantly referred as the most reliable single source of information on population data. Apart from bare statistics on population, we have tried to give brief historical background, geographical conditions, land and the people, other important activities and detail of recent changes that have taken place during the last decade in the district. The analytical note given in the beginning of this book will enable the reader to form a background of the district. It contains two parts. Part A comprises of Village and Town Directory whereas in Part B Village and Townwise Primary Census Abstract have been given. The information in the Village and Town Directory has been collected through the revenue agency/civic authorities and has been cross checked from other concerned implementing agencies. Primary Census Abstract is based upon the data collected during the population count.

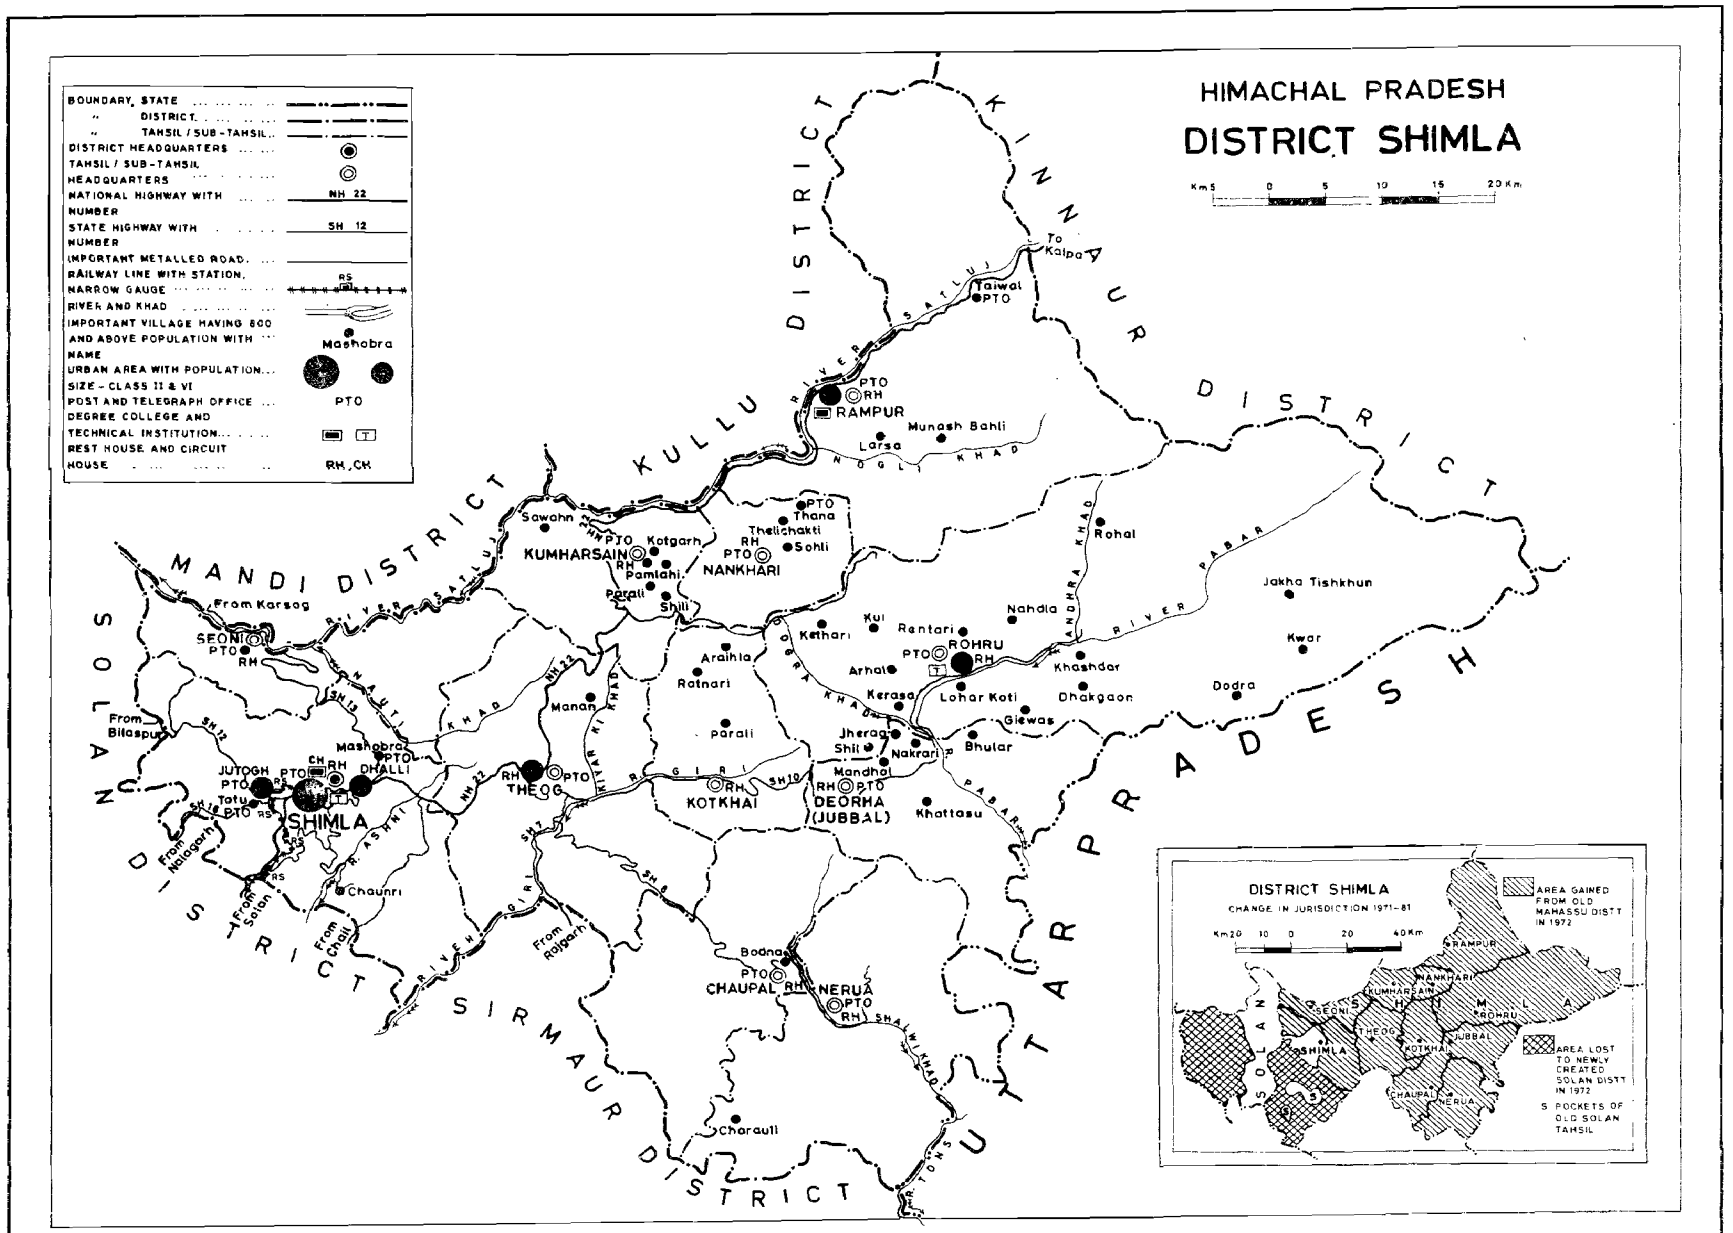

4. Initially, this work was undertaken under the guidance of Sh. K. L. Negi, IAS who deserves all credit for the 1981 Census Operations in Himachal Pradesh. He had to leave the Organisation for taking up other important assignment, before the present volume could be made ready for the press. I owe a great deal of gratitude to all my office colleagues, hundreds of enumerators and supervisors who worked in the field during 1981 Census. It is not possible to mention their names here as also large number of tabulators/checkers/supervisors who prepared initial tables for this publication. I am grateful to them all. During 1981 Census and subsequent compilation of data of this book, we had the privilege of having the constant and enlightened guidance and encouragement from Shri V. S. Verma the Registrar General and Census Commissioner, India, and his worthy predecessor Shri P. Padmanabha. I also owe gratitudes to Shri V. P. Pandey, Joint Registrar General, India who always extended whole hearted guidance and encouragement in solving the various problems. I also owe my indebtedness to the Government of Himachal Pradesh and Shri Som Dutt, Deputy Controller, Printing and Stationery, Himachal Pradesh for making prompt arrangements for the printing of this publication.

5. I shall feel greatly rewarded if the book comes to the expectation of data users.

Dated, the 13th January, 1985.

K. C. Suri,
Deputy Director of Census Operations,
Himachal Pradesh.

ANALYTICAL NOTE

Introduction : Shimla district in its present form came into existence from 1st September, 1972 on the reorganisation of the districts of the State. The district comprises of 11 tahsils and sub-tahsils namely Shimla, Theog, Rampur, Chaupal, Rohru, Jubbal, Seoni, Kotkhai (all tahsils) and Kumharsain, Nankhari and Nerua (sub-tahsils). After the reorganisation, Kasumpti tahsil and Shimla sub-tahsil were merged to constitute the present Shimla tahsil. In 1941 the area of Shimla district was 81.5 Sq. miles and in 1951 Census the area decreased to 8.5 sq. miles on account of transfer of its Kotkhai, Kotgarh and Bharauli areas to Himachal Pradesh and PEPSU but the estates of Bharari, Sanjauli, Kasumpti, Patti, Rehanana, Chakkar and Chhotta Shimla were added to Shimla. Till 1956, it comprised of one tahsil only viz. Shimla but in June, 1959 the areas of Kandaghat tahsil minus Pinjore Kanungo circle and other parts of Kohistan district of erstwhile PEPSU were merged with Shimla district. On the reorganisation of Punjab on the 1st November, 1966, the areas of Nalagarh tahsil of Ambala district were merged in Shimla district. Thus, prior to the reorganisation of districts Shimla comprised of tahsils Kandaghat, Nalagarh and sub-tahsil Shimla. Administratively the district is divided into five sub-divisions, namely, Shimla, Rohru, Theog, Rampur and Chaupal. Shimla sub-division covers Shimla and Seoni tahsils and Rohru sub-division comprises of Rohru and Jubbal tahsils. Theog sub-division covers Kotkhai and Theog tahsils and Rampur sub-division covers Rampur tahsil and Kumharsain and Nankhari sub-tahsils, while Chaupal sub-division covers Chaupal tahsil and Nerua sub-tahsil. The total geographical area according to the Surveyor General of India is 5,131 sq. Kms. which constitutes 9.22 per cent of the total area of the State and ranks sixth amongst the districts. The district's total population of 510,932 constitutes 11.94 per cent of the total population of the State and ranks third amongst the districts. The district has in all 2,409 villages of which 2,225 are inhabited and the remaining 184 are uninhabited. In addition, there are six urban places viz. Shimla, Jutogh, Dhalli, Theog, Rohru and Rampur. The most populous village in the district is Parali in Kumharsain sub-tahsil having a population of 2,160 persons. Shimla Municipal Corporation where the State and district headquarters offices are located is the biggest urban unit with a population of 70,604 persons.

Physical Features : The district lies between the longitudes 77°-0″ and 78°-19″ east and latitudes 30°-45″ and 31°-44″ north and is bounded by Mandi and Kullu districts in the north, Kinnaur in the east, the State of Uttar Pradesh in the south, Sirmaur district in the South and by Solan district in the west. The shape of the district is somewhat rectangular with slight bulges on the western side intruding towards Solan district and on the northern side towards Kullu district. The elevation of the district ranges from 300 to 6,000 metres. The district has a number of peaks such as Jakhoo in Shimla town, Siah near Chail, Churadhar in tahsil Chaupal, Chansal in Rohru tahsil, Hattoo in Kumharsain sub-tahsil and Shali in Seoni tahsil. Mostly the terrain is rough. The prevalence of interlocking spurs, narrow and steep sided valleys with high peaks and thick forests of deodar and kail throughout the district adds to the youthfulness of its topography, On the whole the soils are young and thin, however. these get heavier comparatively acidic with increase in altitude. Except few small valleys the district is entirely mountainous.

History : The present Shimla district comprises of the following erstwhile Shimla Hill States which merged with Himachal Pradesh in 1948 and constituted part of the then Mahasu district. The areas were transferred to Shimla district on the 1st September, 1972 due to the reorganisation of the districts of the State :

1. Balson
2. Bhajji
3. Bushahar
4. Darkoti
5. Delath
6. Dhami
7. Dhadi
8. Ghund
9. Jubbal
10. Keonthal
11. Khaneti
12. Koti
13. Kumharsain
14. Madhan
15. Rawingarh
16 Ratesh
17. Sangri
18. Throach
19. Theog

Apart from these states the hilly areas of erstwhile Patiala state were also included in tahsil Shimla. The areas of Kotkhai, Kotgarh, Shimla town. Jutogh Cantonment which were under the direct administration of the Provincial Government were also included in the district after independence at different stages. As already stated the district sprang up in the present form on the administrative map of the state on the 1st September, 1972.

Almost all the erstwhile princely states of Shimla district were subjected to the Gorkha invasions during the beginning of the 19th century and these were freed in the year 1815 when the Gorkhas were defeated by the Britishers and driven out to Nepal. Consequently the areas belonging to the respective rulers were restored to them under specific terms,

Since all the states were of small size both in terms of area and population, hence, remained under the control of the then Superintendent of Punjab Hill States. However, the rulers were free in the internal affairs of their States. Almost all the states were founded by the adventurists from the plains after the 8th century A.D.

Shimla district derives its name from Shimla town which was once a very small village inhabited by the charcoal manufacturers. The panoramic view commanded by the place attracted the attention of the Britishers who had set their hold on the country and gradually the village was developed considerably. The surroundings were equally developed from military point of view. The climatic conditions which resembled with those prevailing in the native country of the Britishers aroused their ambition to make it the summer capital. It became the formal seat of the summer capital of the Government of India in 1864, when Lord Lawrance came to the town alongwith the members of Supreme Council and all the public offices. The Punjab Government first went to Shimla in 1871 but from 1876 onward it remained their summer capital till 1947 and after the partition of Punjab it served the headquarters of Punjab Government till its offices moved to Chandigarh. Anyhow, the place came into prominance in the early 19th century. Brief account of the erstwhile princely states is as under :

Balson : Balson, it is said, was founded by one Alak Singh before the 12th century A.D. During the Gorkha war Jograj Singh was the ruling chief. For many generations the state remained a feudatory of Sirmaur. Jograj Singh's successors were Bhup Singh, Atar Singh, Bir Singh etc.

Bhajji : The ancestors of the rulers of Bhajji and Koti states are said to have come from Kutlehar in Kangra. They established themselves at Mul Bhajji in the valley of Nauti Khud. The founder of Bhajji was Charu while that of Koti was Chand. The village of Seoni on the bank of Sutlej, it is said, was founded by Sohan Pal the 29th in succession from Charu. Rudar Pal was the chief of Bhajji after the expulsion of the Gorkhas and his successors were Ran Bahadur, Durga Singh, Birpal Singh and Ram Chander Pal Singh. The state merged with the Indian Union on 15th April, 1948 and formed a part of Mahasu district.

The decendants of Chand shifted the capital to Kiar Koti. The later chiefs of the state were Hari Chand, Bishan Chand, Raghubir Chand and Bashist Chand.

Bushehar : After Kashmir, Bushehar was one of the biggest state of the Western Himalayas. Not much is known of the history of Bushehar state prior to the 19th century. According to one legend the Bushehar dynasty was founded by Pardhuman the son of Lord Krishna. In order to marry the daughter of Banasur the local chief of Shonitpur (present Sarahan) Pardhuman is said to have come to that place and after the death of Banasur in an encount r with his, he became the chief of Bushehar & Kinnaur regions since Banasur had no male heir. Another legend describes, Pardhuman the younger of th two brothers who had come from Kanchanaapuri, in the south, on pilgrimage to Bhimakali temple at Sarahan. Since the throne of the state was vacant at that time due to the death of the last Raja without a heir, Pardhuman who happened to enter the palace gate first at a specified time, as had been ordained by the goddess Bhimakali, was declared by the people as their ruler. The elder brother of Pardhuman was appointed as the priest of the royal family with a Jagir at village Rawin near Sarahan. There are also other versions connected with the installation of Pardhuman as the chief of Bushehar by Devpurna an adventurist.

According to Captain C.F. Kennedy, the then Superintendent of Shimla Hill States, Bushehar state was founded by Danbar Singh an immigrant Rajput from Deccan in 1412 A.D. The seat of the government, it is said, was at Kamru and from that place the founder and his descendants conquered the lower hills. The earliest historical mention of Bushehar is found in the Chronicle of Kullu when it was over-run by Meru Verman of Chamba towards the end of the 7th century A.D. Shittal Pal the son of Datesh Pal of Kullu, it is said, had fled to Bushehar and took refuge. Jareshwar Pal the 6th generation from Shittal Pal recovered the state of Kullu from the state of Chamba with the help of Bushehar state around 780--800 A.D. when Chamba was invaded by the Kiras. Capital of Bushehar state was shifted from Kamru to Sarahan sometimes in the beginning of the 10th century A.D. Raja Chatar Singh who was 110th from Pardhuman, is said, to have conquered the entire area south of Sarahan.

Raja Kehri Singh the 113th from Pardhuman is said to have annexed the southern areas of Krangla and Sari during 1639—1696 A.D. He was the most powerful chief of his time in the Western Himalayas and had supermacy over Delath, Kumharsain, Balson, Theog, Kotkhai and Darkoti. The title of "Chhatarpati" was conferred on him by the Mughal Emperor Aurangzeb because of his successful adventures against Mandi, Suket, Sirmaur and Garhwal states. Because of his siding withTibbet in its war against Ladakh, Kehari Singh got the entire area of upper Kinnaur. Besides this he forced the ruler of Tibbet to enter into a commercial treaty with him.

During the reign of Raja Ram Singh, the 116th of the line, Rampur was the capital of the state. The later rulers were Ugar Singh, Shamsher Singh and Padam Singh. In the later period Rampur became an important place. The state merged with Himachal Pradesh in 1948.

Darkoti : The founder ruler of the state was Durga Singh who is said to be a scion of the ruling house of Jaipur. It was a very small state. Rana Ram Saran the 24th in line from the founder was the chief during the Gorkha's invasion.

Throach and Dhadi : Deo Karan a prince of Udaipur is said to have settled at Sirmaur on his coming to the hills. Throach state was formerly part of Sirmaur state and was gifted away to Kishan Singh the descendant of Deo Karan sometimes in the 15th or 16th century. After the defeat of the Gorkhas, the state was restored by the Britishers to Karam Singh. His descendants were Jhoban, Ranjit Singh, Kidar Singh, Surat Singh etc. Dhadi was an offshoot of Throach.

Sangri : The area of the state originally belonged to Bushehar. It was conquered by Mansingh of Kullu sometimes during the first half of 18th century. Since then the area was ruled by Kullu chief. After the onslaught of the Gorkhas in 1803 Kullu Raja paid tribute to them for Sangri area. In 1815 the area of Sangri was restored by the Britishers to Bikrama Singh. Bikrama Singh died in 1816 and was succeeded by his son Ajeet Singh. After the death of Ajeet Singh in 1841 Ranbir Singh minor son of Mian Jagar Singh who was the first cousin of Ajeet Singh was tipped by the then Superintendent of Shimla Hill States to succeed to the Gaddi of Kullu, but, before he could be installed as such the child fell sick and died. Thereafter, Thakur Singh was installed by the Sikhs as the Raja of Kullu and the fief of Sangri remained in the hands of Mian Jagar Singh who was said to be more or less imbecile. The descendants of Jagar Singh were Hira Singh and Raghubir Singh. The state merged with the Indian Union to form a part of Mahasu district of Himachal Pradesh on 15th April, 1948.

Kumharsain, Khaneti, and Delath : It is said that Kumharsain, Khaneti, Delath, Krangla and Kotkhai had a common origin. One Kirat Chand alongwith his brothers arrived from Gaya sometimes in the 11th century and settled at Krangla. He conquered Kumharsain, Kotgarh and Khaneti from Bhambu Rai Mavana of Delath. Ugar Chand, son of Kirat Chand ruled over Khaneti and his son Sansar Chand ruled over Krangla while the other two sons i.e. Sabir Chand and Jai Singh jointly ruled over Khaneti, Kotgarh and Kotkhai. Thereafter, Duni Chand and Simbal Singh who were in the 6th generation from Sabir Chand ruled over Khaneti, Kotkhai and Kotgarh.

Delath state was founded by Prithi Singh who was said to be a brother of Kirat Chand the founder of Kumharsain. Beyond this nothing significant about the later descendants is known.

Madhan, Theog and Ghund : These three principalities are said to have belonged to a common origin. It is said that a Chandel Rajput of Jaipur while on pilgrimage to Badrinath settled at Ram Sarai in Garhwal because of his liking for the hill country. It is also said that after his movement to Kahloor in the time of Raja Bheem Chand around 1667 A.D. his sons moved to the upper Shimla Hills. Jai Chand the eldest son became the ruler of Theog, the second son, became the ruler of Madhan and Janjan Singh the third acquired Ghund.

Ratesh : The founder ruler of Ratesh principality was Rai Singh a brother of Raja Karam Parkash of Sirmaur. Raja Karam Parkash gave 5 parganas (4 on the north and 1 on the south) alongwith Giri river to his brother. The small state was a tributary to Keonthal.

Rawingarh : The state was stretched over a large tract of land on the banks of the rivers Pabbar and Tons. Before the Gorkha invasion in the beginning of the 19th century trans Pabbar portion of the state was over run by Bushehar forces and the fort of Rawingarh was seized by them. At that time the ruler of the state was Himmat Singh and he was helped by the ruler of Jubbal in retaining his hold on the cis Pabbar portion. After the expulsion of the Gorkhas in 1815 the state lost its entity because of the transfer of the areas east of Pabbar to Garhwal by the Britishers. In 1830 these areas were transferred to Keonthal state in exchange for the area comprising the present Shimla town. Whatever was left of the state was given to Rana Runa in 1816 A.D.

Jubbal : It is said that the ancestors of the rulers of Jubbal state were once the rulers of Sirmaur state and they belonged to the Rathor clan of Chandervanshi Rajputs. During the reign of Raja Ugar Chand of Sirmaur it is said that his capital at Sirmauri Tal was swept away by the floods and everything including the Raja was lost. Thereafter, one Sobha a prince of Jaislmair occupied the vacant throne of Sirmaur and the sons of Ugar Chand namely Karan Chand, Mool Chand and Duni Chand who had escaped the fury of floods because of their encampment out side the capital settled themselves in the upper country. The eldest son Karan Chand founded Jubbal state. Mool Chand ruled over Sari area and Duni Chand acquired Rawingarh. Sari state lost its entity in 1864 A.D.

Karan Chand moved the capital from Sonpur in Hatkoti to Purana Jubbal. Subsequently, it was shifted to village Deora (the present Jubbal) during the reign of Rana Gur Chand. Rana Hukmi Chand was a warrior ruler and he fought many battles with Bushehar, Garhwal and Sirmaur states. During the time of Gorkha invasion Jubbal state was ruled by Rana Puran Chand and his Wazir Dangi was also a famous warrior. The state merged with the Indian Union after independence and became a part of Himachal Pradesh on 15th April, 1948. At the time of merger Dig Vijay Singh was the ruler of the state.

Keonthal : At one time Keonthal was the largest state next to Kullu. It is said that the state was founded around 1211 A.D. by Giri Sen who was the younger brother of Bir Sen, the founder of Suket State. It is said that the founders of Suket, Mandi, Keonthal and Kishtwar were from the common Sen dynasty of Bengal. Bir Sen, Giri Sen and Hameer Sen the sons of Roop Sen after their father's fatal encounter with the Mohammedans at Ropar in 1210 A.D. fled to the hills and settled in Suket, Keonthal and Kishtwar, respectively. Around 1800 A.D. and prior to the Gorkha's invasion, some minor states were owing their allegiance to Keonthal state. However, after the expulsion of the Gorkhas the states of Koti, Theog, Ghund, Madhan and Ratesh remained its tributaries. The state merged with the Indian Union after independence to form a part of Himachal Pradesh on 15th April, 1948.

Dhami : This state it is said was founded by Chauhan adventurists of Delhi. The ancestors of the founder were said to have been driven out by Shahabuddin Gauri from Delhi to Raipur in Ambala district. From Raipur they came to Dhami and created a state for themselves. The state was formerly a feudatory of Bilaspur, but, became independent in 1815 on the expulsion of the Gorkhas. At that time Goberdhan Singh was the chief of the state. His successors were Fateh Singh, Hira Singh etc. In July, 1939 the state witnessed the satyagraha of Prajaman-

dalists. The state merged with the Indian Union and became a part of Himachal Pradesh on 15th April, 1948.

Climate : Due to topographical variations the district has varying climates according to the elevation of the area. There are four broad seasons. Winter normally starts from mid November and continues till mid March. December, January and February are severe cold months when the winter season is at its peak. The upper reaches have snow and sleat while the rains are frequent in the lower areas. Snow may fall as early as the beginning of October but usually the areas have snowfall from the later part of December and continue till middle of March. The higher peaks experience heavier snowfall and it starts melting from March. It seldom extends below 800 metres. However, in the year 1945 snow touched the surface as low as Seoni. From mid March to mid May climate in most part of the district is at its bloom because of the delightful spring interrupted by occasional showers and gales. The nights are colder. The climate is comparatively hot from mid May to mid July. The places situated in the lower reaches on the banks of rivers and streams are, however, hot as in the plains. Rainy season generally starts from mid July and extends even upto the mid September. While rainfall is comparatively low in the northern parts comprising of Seoni, Kumharsain and Rampur tahsils the areas on the eastern, western and southern parts comprising rest of the tahsils record higher amount of rainfall. Bulk of the precipitation is generally received during the rainy season. The average rainfall in the district during the year 1980 was 1,028.3 mm. Autumn season is generally very small from mid September to mid November. The extended rainy season and early setting of winter are the reasons for its short duration. Due to the variation in altitudes the temperature also varies considerably while minimum temperature in the higher reaches goes down much below 0°C during the winter months the maximum temperature in the lower areas exceeds even 40°C during the summer months.

River System : Shimla district is covered by the catchment area of the rivers Sutlej, Pabbar and Giri. The district drains itself into these big rivers.

The Sutlej which is the principal river of the district rises from Mansarover lake in the eastern peaks of the Himalayas. Taking its course through district Kinnaur the river enters Shimla district at Badhal in Rampur tahsil and then takes course by touching Kumharsain sub-tahsil and Seoni tahsil. From its entry in Rampur tahsil to its exit in Seoni tahsil the river forms the boundary line of Shimla district with Nermand and Ani tahsils of Kullu district and Karsog tahsil of Mandi district. There are a number of suspension bridges over the river at Rampur, Luri, Seoni and Tatapani. The river is also crossed by Jhulas (rope ways) and by using animal's inflated skins at a number of convenient points where the flow of water is normal and steady. The main khads falling in the river are Nogli, Machhada, Bhaira and Kingal khad. In addition, the nallahs and other khads of Khekhar, Chamola, Savera, Bagh etc. also feed the river. The river, therefore, receives the entire drainage of northern part of the district. All the above mentioned khuds and nullahs are perennial being snowfed and have regular flow of water throughout the year which ensures uninterrupted discharge of the river.

The Pabbar river rises from the base of Chandernahan peak in between Sangla tahsil of Kinnaur district and Rohru tahsil of Shimla district. The river takes south-eastern course and passes through tahsil Rohru, Jubbal and merges with the river Tons at Tiuni in Uttar Pradesh. The river receives the entire drainage of these two tahsils and is fed by Shikri, Andra, Pejore, Hatkoti streams/khuds, etc. All these streams/khuds are also perennial.

The Giri or Giri Ganga originates from the hills north of Churdhar called Kupar. The river collects the drainage of the whole tract north of the Churdhar and the Shimla range. It flows south-west until meeting the lines of outer Himalayas sharply turning to the south-east and passing through Kotkhai, Theog and Shimla tahsils. The principal feeder of the Giri is Ashni which rises near Mahasu in the Shimla range and after receiving a considerable contribution from the eastern face of the hill upon which the Shimla town stands, joins the Giri at a point where the river turns south-east. The Giri and its tributaries also retain perpetual flow of water. The district being fully covered by these three rivers, there is enough scope for undertaking hydro electric and Lift Irrigation Schemes.

People : The population of the district mainly consists of Hindus followed by Sikhs, Mohammandans while other religions like Christians, Jains, and Budhists constitute microscopic minority. The Hindu population is chiefly composed of Brahmins, Rajputs, and Kanets. The other sections of the people consist of Kolis, Lohars, Chamars, Badhis, Chanals, Julaha, Dumne and Rehars which are Scheduled Castes. Apart from these, Gujjars a nomadic Scheduled Tribe community is also found in sufficient large number. The Brahmins are of two classes—Sasani and Dharebar. The Sasanis who are generally Muafidars are a distinctly higher class then the Dharebars. The Sasanis did not give their daughters in marriage to Dharebar Brahmins but married their women folk without any restriction. They were indifferent cultivators. The other groups of Brahmins are Bhats, Pandas, Acharj and Mahacharj or Bedwas. The Rajputs form rather a ruling class than a caste and comprises of the families of the erstwhile hill chiefs. One category of the Rajputs who were the rulers of the yester years do not give their daughters in marriage to the Khash, Mians or other Rajputs. The other categories of Rajputs, i.e., Thakurs and Mians hesitate to give their daughters to the Khash or Kanets. The Khash or Kanets are mainly agriculturists. The Kolis form the majority of the population among the Scheduled Castes and in some parts of the district they identify themselves with Kanets. However, different classes of the Scheduled Castes do not enter into matrimonial alliances with each other. Gujjars are mostly Muslims, While some of them are settled on agricultural land the others still follow a nomadic life. In summer they move to higher hills in search of new pastures for their cattle and in winter they come down to warmer places. The Christians are of both the types i.e., Protestants and Roman catholics. The district

is having number of shrines and temples. Almost every village has a local Devta and a temple. Durga Kali temples at Sarahan, Hatkoti, Taradevi, Shali and Sconi are quite famous. The ancient temple of Mahasu at Gijari in tahsil Theog is also unique in architecture. Worship in the temples is not confined to any particular Devta. There are many temples where the idols of Shiva, Rama, Krishna and Durga are worshipped simultaneously. The temple priests are generally Brahmins and some of them enjoy free grants of land as remuneration for their services in the temples. They also receive grains from the villagers at the time of harvest. The sacrifice of goat/sheep in the temples is a very common feature. With the passage of time, spread of education and changed economic conditions the rigid customs of the past are fading away gradually.

Language : Pahari consisting of various dialects is the spoken dialect of the villagers in the district. With the spread of communication, increase in the literacy rate among the masses, predominant population of the district now can speak Hindi and Pahari all over the district. However, no authoritative research has so far been made in this respect and linguistic report of India by G. R. Grierson in 1917 is an authoritative book worth reading.

Food : The staple food of the villagers generally consists of maize, rice and wheat. Wheat is taken mostly in summer and thereafter occasionally. In addition, pulses like Urd, Lobia, Moong and Kulth are used almost daily. Maize which is the main cereal crop grown is favourite and is taken round the year. The people of the district are very fond of rice and it is generally taken atleast once a day. The people in the villages have four meals a day. Morning meal (Nawari) consists of wheat or maize bread taken either with Lassi or with tea. Those who cannot afford Lassi or tea they take it with salt. The mid day meal (chaili or Dopari) consists of maize or wheat chappaties taken with vegetable or dal or curry 'Khairu'. In the evening the morning menu is repeated. At night in the dinner (Bayali) the rice or Cheena or Kangani is taken with pulses. People are also very fond of meat and those who can afford they take it at times in the dinner. Due to various incentives provided by the Government, the people have started keeping improved varieties of milching cows and buffaloes and poultry birds. In addition to the above cereals, Bathu and Kodra are also taken especially in winter.

Dress : Cotton as well as woollen clothes are worn by the people. Since the winter is severe, woollen clothes made of the indigeneously spun and woven cloth are commonly used. Ordinary clothes for men consist of cotton Khadi or mill made shirt, pyjama, cap and a jacket. In the past in some low lying areas majority of men folk used to move about without pyjama wearing only a small loin cloth in summer and rainy season. However, with the passage of time the loin cloth has now been replaced by underwear (Kachha). The dress of the women is Salwar, Kameej and coloured head gear which is called 'Dhattu'. Jacket is also worn by them. In the upper part of the district the traditional dress of a man consists of black woollen domestically spun and woven pyjama, coat and Bushehari cap with a coloured band. Loia is also put on by most of the people. The women, however, wear Pakhati, Rezta, Kameej, Suthan and Dhattu. Women of the higher altitudes of Rampur tahsil put on woollen cap and Giddi. The typical dress of the women of Theog, Kotkhai, Jubbal, Rohru and Chaupal tahsils is Salwar, Kameej, Sadri with yellow or red coloured Dhattu as the head gear.

Housing and Furniture : As in the other areas of the state rural areas of Shimla district have houses built of mud and stone plastered inside and outside with clay. The houses are generally double storeyed and provided with windows. In the lower areas of the district the cattle sheds and kitchens are generally separate. However, in the higher areas the ground floor is mostly used for tending cattles. The first and subsequent floors are used for living purposes. The housing material in the areas at higher altitude generally consists of undressed stone and wood. For roof, slates are commonly used. The traditional houses have small doors and windows. In the lower areas roofs of the traditional houses are thatched with grass. Since the district has made considerable economic development most of the people have now switched over to the new constructions of concrete and G.I. sheets for roofing. The people have also started constructing separate kitchens, cow sheds and bath rooms.

The household furniture generally consist of cots and domestically woven mats (mandri/bina) of rice stalks. Wooden boxes are being used for keeping valuables and clothes. Chairs, tables and modern items of furniture in the past were rarely seen in the villages. However, with the spread of education and increase in the standard of living of the service class people, well-to-do agriculturists and horticulturists and trading communities have started keeping modicum of furniture like chairs, sofa-sets, dressing tables, steel almirahs, radios and television sets. Utensils generally in use are of brass, bronze and aluminium. The use of stainless steel utensils is also finding favour with the well-to-do families. Sewing machines oil stoves, electric heaters and table lamps are also finding favour with the people. In the district 67.50 per cent of the inhabited villages have the facilities of electricity and power. In the low lying areas electric fans are gradually replacing the traditional Pankhas. The use of electric irons and heaters for heating as well as for cooking purposes is finding favour with the people. Pressure cookers are also being used by most of the families. Earthen wares of the past have almost been completely replaced.

Forests : Forests play an important role in shaping the economy and social life of the people. The climatic conditions prevailing in Himachal Pradesh and varying elevations are most suitable for the growth of forests. The forests provide valuable timber, medicinal herbs, raw material for large and small scale industries and also provide employment and play a vital role in conserving the soil and ensure timely and sufficient rains. The forests also play vital role in shaping the climatic condition of the area.

In Shimla district 262,360 hectares of land area

was under forest at the end of the year 1980-81. Of this, 6,334 hectares constituted reserve forests, 250,228 hectares protected forests and 5,798 hectares unclassed and other forests. The area under forests constitutes about 50 per cent of the total geographical area of the district. The forests in Shimla district come under Shimla Forest Circle which comprises of four divisions namely Chaupal, Kotgarh, Rohru and Shimla. These divisions are headed by the Divisional Forest Officers who are assisted by a number of Forest Range Officers, Block Officers, Forest Guards and other officials. During the early period of the princely states some of the forests were reserved by the then ruling chiefs for games. The remaining forests were utilised by the people and by the graziers on payment of some fee to meet their demand of fuel wood and timber and for grazing their cattles. Hence, towards the end of the 19th century there was practically no established management of the forests and the forest wealth was exploited mercilessly. It was in the year 1872 that the Superintendent of Shimla Hill States directed the then ruling chiefs of the states to afford adequate protection to the forest areas. That was thought necessary because the owners and the right holders exploited the forests without any control for timber or fuel or heavily lopped the standing trees for fodder and green manure. As a result the forests started vanishing and the soil was laid bare. Thus, the directions of the British Government paved the way for demarcating the forests. Consequently, the entire forest area was divided into two categories viz. better wooded area and waste land. The better wooded areas were maintained as prominent/ permanent forests and the waste land was left for meeting the requirements of the right holders. The better wooded areas were demarcated scientifically and the forest wealth protected. All the Hill States got this work of demarcation done in stages. Departments of Forest were created and all possible protective measures were adopted.

Chaupal Forest Division has its headquarters at Chaupal and the forests of Chaupal, Jubbal, part of Kotkhai tahsil and Nerua sub-tahsil are covered by this division. Rohru division is located at Rohru and covers the forests of Rohru tahsil. Kotgarh Division which is located at village Kotgarh in sub-tahsil Kumharsain covers the area of Rampur tahsil, Kumharsain and Nankhari sub-tahsils. Shimla Division which has its headquarters at Shimla controls the rest of the tahsils i.e. Shimla, Theog, Seoni and part of Kotkhai. All the four Forest Divisions fall in the basins of the rivers Sutlej and Yamuna. The forests are mainly in the tract of outer Shivalik to the mid Himalayas. The soil is generally sandy loam and the depth is shallow except in the areas having vegetation cover where it is fairly deep. In the regions above 1,500 metres the soil is generally deep and contains a thin layer of humus or leaf moulded species of Ban, Oak, Chil, Kail and Deodar. In the lower elevation scrub forests are found while in the higher altitudes Chil, Deodar, Kail and spruce are available and still higher are Oak forests. In the whole district the forests lie between 300 metres to 1,800 metres or more in elevation. In the lower ranges with warmer aspects and sharp slopes with deep soil and favourable conditions, species of mixed deciduous forests of scrub and bamboo are found.

Chilpine forests are found between 800 metres to 1,800 metres. Biotic influences play an important part in the regeneration and distribution of the species with favourable soil conditions on the northern and eastern aspects. Regeneration of the species can be established naturally if proper protection is afforded and mother trees are well distributed over the areas. From elevation beyond 1,800 metres the beautiful Deodar, Kail and Spruce with Ban and Mauru are found in abundance.

Because of fast dwindling of the forest wealth the State Government has adopted three dimensional forest farmings for the rejuvenation of the forest areas. The forest department supplies saplings to the people at the nominal rate of ten paise per plant. Initially these saplings were supplied to the interested persons free of cost but later on to avoid wastage as well as to inculcate awareness among the people for the growing of the forests the element of cost was introduced. The policy of the government is to bring sixty percent of the forest land under the commercial species like Chil, Khair, Deodar, Fur, Spruce and the remaining 40 per cent of the forest land to be covered by the species for fodder, fuel wood, poplar and bamboo. Those people who opt for four hectares or more of the land for plantation are given technical guidance and fencing material free of cost. In order to ensure unhampered supply of saplings to the government agencies as well as to the public a vast net work of forest nurseries exist in the district.

For proper exploitation of the forest wealth on scientific and economic lines the same has been nationalised and the work has been entrusted to the Himachal Pradesh Forest Corporation and to save the land from erosion, vigorous steps are being taken under the soil conservation schemes by constructing check dams where necessary and by suitable plantation. The main marketable forest products are resin, chil, deodar, kail, fur and spruce timbers and pulp wood firewood, charcoal and bamboos. 121.86 thousand cubic metres of timber, 2.80 thousand cubic metres of fuel wood were extracted during 1980-81. In addition, medicinal herbs costing Rs. 2,901 thousand, fodder and grazing products costing Rs. 245 thousand and gums and resins worth Rs. 2,123 thousand and other products costing Rs. 5,000 were extracted from the forest areas of the district.

Flora : The following trees, shrubs and grasses are found in the district :

Serial No.	*Botanical Name*	*Local Name*
	I Trees	
1.	Abies pindrow	Tosh
2.	Acacia catechue	Khair
3.	Acer caesium	Rikhaudlu
4.	Acer oblongum	Parong
5.	Aegle marnelos	Bul

Serial No.	Botanical Name	Local Name
6.	Aesculus Indica	Khanor
7.	Albizzia labbek	Siris
8.	Alnus nepalensis	Kunish
9.	Anogeissus Latifolia	Chal Dahu
10.	Azadirachta Indica Syn. Melia Azaderachta	Neem
11.	Bauhinia recemosa	Karyal
12.	Bridelia montana Syn. Bretusa	Badhar
13.	Butea monosperma Syn. B.Frodoas	Dhak
14.	Carica Papaya	Papita
15.	Cassia fistula	Amaltas
16.	Castenia sativa	Mitha Khaner
17.	Cedrala serrata	Darle
18.	Cedrala toona	Toon
19.	Cedrus deodara	Kelo, Diar
20.	Celtis australis	Kharak
21.	Citrus aurantifolia	Galgal
22.	Citrus aurantium	Sangtia
23.	Citrus acumana	Chaukotra
24.	Citrus medica	Nimbu
25.	Cerdia dechotonia Sn. Fmyxa	Lasura
26.	Carnus copitala	Khagsha
27.	Crataeve religiousa	Barnah
28.	Crypotomeria Japanica	Japani Saru
29.	Cupressus sempervirenis	Saru
30.	Cupressus torulosa	Devidear
31.	Dalbergia sissoo	Shisham
32.	Elaleond endron galueum	Chilru
33.	Englohardítia colebroodi-ana	Samma
34.	Eriobotrya japonica	Lukatha
35.	Eucalyptus globulus	Safeda
36.	Euonymus lacerus	Barmeli
37.	Ficus glomerata	Shin
38.	Ficus Palmata	Fegura
39.	Ficus religiosa	Pipel
40.	Ficus roxburghii	Tribmal
41.	Fraxinus floribunda	Angash
42.	Garuga pinnata	Kharpat
43.	Grewia clastica	Beul
44.	Ilex dipyrena	Kanderu
45.	Juglans regis	Akhrot
46.	Lyonia ovalifolia Syn. pieris ovalifolia	Ailan
47.	Mallotus phiaippinensis	Kamal
48.	Mangifera indica	Amb
49.	Musa paradisiaca	Kela
50.	Myrica nagi	Kaphal
51.	Olea glandutiefer	Jharinu
52.	Piecea smithiana	Rai
53.	Pinus rox-burghii Syn. Pinus longifolia	Chil
54.	Pinus wallichiana Syn. Oinus excelsa	Kail
55.	Populus ciliata	Safeda, Chalun
56.	Prunus armenica	Chuli, Khumani
57.	Prunus cerasodes	Paja
58.	Prunus cerasus	Jaman
59.	Prunus communis	Allocha
60.	Prunus cornuta	Jaman
61.	Prunus Persica	Aroo
62.	Psidium guvava	Amrud
63.	Pyrus communis	Nashpati
64.	Pyrus pashia	Kainth
65.	Quercus dilatata	Mohru
66.	Quercus glauca	Bani
67.	Quercus incana	Ban
68.	Quercus semicarpifoli a	Kharsu

69.	Rhododendron arboraum	Burash, Brass
70.	Robinia pseud-acacia	Robinia
71.	Salix baby lonica	Majnu
72.	Salix dephnoides	Benuns
73.	Salix elegans	Beuns, Bhashal
74.	Salix tetrasperma	Beuns
75.	Salmalia malabarica Syn. Bombax malabricum	Semal
76.	Spaindus mukorossi	Ritha
77.	Sapium insigne	Balojha
78.	Sapium sebiferum	Tarcharbi
79.	Spondias pinnata Syn. Smaggifera	Ambara
80.	Syxygium cummi Syn. Eugenia jambolana	Jaman
81.	Taxus baccata	Thuna
82.	Terminalia arjuna	Arjun
83.	Terminalia belerica	Behera
84.	Terminalia chobula	Harar

II—Shrubs

1.	Abave americana	Ramban
2.	Adhatoda varica	Bassuti
3.	Aralia cachemirica	Akhota
4.	Artemisia valgaris	Charmar
5.	Berveris Aristata	Kashmal
6.	Boehmeria plastyphylla	Bomol, Khakha
7.	Buddle ia paniculata	Sandroi
8.	Cassia tora	Ailwan
9.	Calotropis procera	Ak
10.	Cannabis sativa	Bhang
11.	Carissa spinarum	Karunda
12.	Caesalpinia bondue Syn. C. Bonducella	Mechka, Relan, Kringham
13.	Cocculus laurifolius	Pror
14.	Colebrookia oppositifolia	Dasoindh, Gadoos
15.	Coriaria nepalensis	Gangara
16.	Goriaria sericla	Chhunchunu
17.	Cotoneaster bacillaris	Reuns
18.	Cotoneaster microphylla	Mat-jhinjira, Chamror
19.	Cyathula tomentosa	Kothla
20.	Desmodium gangeticum	Murt
21.	Dodonaea Viscosa	Mehndu
22.	Euphorbia royleana	Shru, Chhurin
23.	Hamiltonia Suaveodens	Sidhara
24.	Indigofera geraldiana	Kathi
25.	Indigofera hebepetele	Do
26.	Indigofera pulchella	Do
27.	Indigofera trifoliate	Do
28.	Jasminum Humili	Chameli
29.	Jasminum officinfile	Chameli
30.	Lantana camara Syn. L. Aculeata	phulkari
31.	Mahonia nepalensis	Khoru
32.	Murraya keongir	Ghandela
33.	Plectranthus regosus	Chhichhri
34.	Pogostemon plectranthoides	Barmara
35.	Prinsepia utilis	Bhekhal
36.	Ricinus communis	Aran
37.	Rose macrophylla	Pahari-Gulab
38.	Zenthoxylum alatum	Tirmur

III—Climbers

1.	Abrus precatorius	Raktan, Rati
2.	Bauhinia Vahlii	Tur
3.	Cissamplelos pareira	Bhatindu
4.	Clematis montana	Garol
5.	Clematis mutous	Nak Chhikni
6.	Cryptolepis buchanani	Dadhali
7.	Cuscuta reflexa	Akash bel Kang
8.	Dioscorea Pentaphylla	Dragal

9.	Ficus scandens	Makhota
10.	Hedera nepalensis Syn. H. Helix	Kural
11.	Ichnocarpus frutescens	Bakar Bel
12.	Pueraria tuberosa	Slood
13.	Rosa moschaata	Kuja, Kuin
14.	Smilax parvifolia	Ram datun
15.	Vitis trifolia	Pani-bel, beli
16.	Zehneria umbellata	Ban Kerela

IV—Bamboos and Grasses

1.	Aristida depressa	Kumbru, Lambru
2.	Arundinaria falcata	Gola
3.	Bambusa rundinacea	Maggar
4.	Bothriochloa intermedia	Palman
5.	Chrysopogon fulvus Syn. C. Montanus	Dhaulu
6.	Oymbopogon martinii	Makora, Khawi
7.	Cynodon dactylon	Dub
8.	Dendro alamus hamiltonii	Nal
9.	Dendrocalamus strictus	Benj
10.	Erianthus munja Syn. Saccharum munja	Surar, munj
11.	*Erophorum comosum*	Ghor-baggar
12.	Heteropogon contortus	Sariala, Dangeriosh
13.	Themeda anathera Syn. Anthistiria anathera	Alunji

Fauna: The district used to be a home of wild life in the distant past. However, the advancing civilisation, liberal grant of fire arms and shooting licenses and fast development of means of communication led to the virtual disappearance of the precious animals and birds. To save the wild life from extinction the government has now imposed a ban on the shooting of the animals and birds and has also developed sanctuaries for progeny and breeding of the species. The following animals and birds are found in the forests of the district :

Animals

Serial No.	*Scientific Name*	*English Name*	*Local Name*
1.	Sus cristatus	Indian Wild bear	Suar
2.	Antilope cervicapra	Indian antilope	Hiran
3.	Lapus ruficandatus	Indian hare	Khargosh
4.	Fellis pardus	Panther	Bagh
5.	Ursus torquartus	Black bear	Bhalu
6.	Cames goral	Goral	Ghurral
7.	Cervulus muntgac	Barking deer	Kakar
8.	Cervus axis	Spotted deer	Chittal
9.	Cervus unicolor	Sambhar	Sambar
10.	Cervus unicolor	Red and Yellow deer	Hiran

Birds

1.	Coturnix	Commar quail	Bater
2.	Streptopelia decaocto	Indian spotted dove	Ghuggi
3.	Pavo-cristatus	Pea-fowli	Mor
4.	Francolinus	Black partridge	Kala Tittar
5.	Francolinus pondicarianus	Grey partridge	Tittar
6.	Crocopus phoenicopterus	Green pigeon	Harrial
7.	Columba rupestris	Blue hill pigeon	Kabuttar
8.	Gallus bankiva	Red Jangli fowl	Jangli Murgi
9.	Gennaeus hamiltonii	White crested kalij	Kolsa
10.	Alectoris gracca	The chakour	Chakour

Geology : According to the study of the rocks by the geologists it is revealed that some 1,200—1,500 million years ago the area comprising the present Shimla district was a part of the sea called Tothyas. The sandy stone, shale or limestone were deposited as thin layers after layers and the type of rock formed was dependent upon many factors such as the nature of material being dumped in the sea by rivers, depth of the sea, whether near the shore or in the deeper areas, bacterial and chemical reactions which went on in the sea waters. The sea had its volcanos which erupted the lavas and its flow got layered with the rocks being deposited in the sea. About 275 million years ago with the complete glaciation the now non-existent sea was covered with floating icebergs. Some 25 to 30 million years ago the Himalayan mountain ranges started rising and with the uplift a long narrow depression was formed in front of it where again the sediments were deposited. That period had a very congenial climate for life and the shallow water was abound with a wide variety of fauna and flora. The fossil remains of these extinct animals are now found in the rocks and their studies have linked the evolution of life from the primitive to the advanced stage as the modern man. About 2 to 3 million years ago these rocks were also lifted up and followed by forces similar to that at the time of the Himalayan uplift

irnto a low mountain chain now called as Shivalik range.

Metamorphosed Himalayan system presents Shali series (Krols), Permo-carboniferious, upper carbony-blainiferous, devonian, Pre-cambrian Shimla Series and archaean group of rocks.

The outstanding feature of the structure of Shali area is the Shali thrust. The trace of this thrust is almost circular. Within the area bounded by the thrust the general structure is that of a dome, with the rocks dipping outwards in all directions.

The rocks above the Shali thrust belong to the Chail Series. Those below the thrust are of a mixed assemblage consisting of the Shali Series, the Madhan slates and Sabathu and Dagshai beds of tertiary age. As a result of nearly horizontal movement, the Chail Series have been forced many kilometres to the south-west over the strata that are younger in age, so as to override them as flat sheet.

Subsequent denudation removed this covering of older rocks in the Shali area, exposing the younger rocks through 'window' structure. Thus, before the formation of the Sutlej and the Nauti valleys, the Chail Series must once have extended right over what is now the Shali range, as a flat though slightly warped sheet. The above mentioned 'window' structure is named as 'Shali Window' as it is formed due to Shali thrust.

South from Nag Tikar the tertiary beds are well developed on the dip-slope of the Shali range resting normally upon the Madhan Slates. They are seen immediately below the Chail Series for nearly 6 kilometres to the south of Nag Tikar, and in many other out-crops on the north-western slopes of the Nauti Khad.

Along the contact of the Chail Series, the sabathu beds disappear near Majolti and from there to Chaba the Chail Series rest either over the Madhan Slates or over the Upper Shali limestone.

North-east of Guma, on the north-east slopes of Nauti Khad around Kathnol, there is a large outlier or klippe of the Chail Series. The outlier which is probably quite thin, rests discordantly over Madhan Slates partly on Sabathu beds and partly on Dagshai beds.

At Kathnol a klippe of Chail Series is seen. At Chaba the Chail Series are thrust over the Upper Shali limestone.

The recumbent folds, affect the Shali limestone, Shali quartzite, and Madhan Slates. Though not of very great amplitude they generally have their middle limbs sheared out by a thrust. The clearest example of a fold and a thrust is seen just north-west of the Balheot-Dharampur road. The eastern side of the khad west of Balheot provides an excellent section.

In Kuthar area, south of Arki (31° 9′ : 76° 58′), there are two important places known as Sabathu and Kasauli and the rock formations exposed in those localities have been named as Sabathu and Kasauli formations. Near Arki, the contact between Sabathu formation and Shimla Slate is a thrust plane.

Around Dhami the contacts of Chail Series with Jutogh and with the upper and Lower Shali limestone and quartzite of Shali Series are thrust planes.

Near Dharampur the formations exposed are Madhan Slates, Shali limestone schist, etc. Shali Slate, Lower Shali limestone and Chail Series. Here the thrust contact is seen between the Chail Series and Madhan Slates.

Around Keonthal and Junga the Shali Series and Shivalik formations are not exposed. Only Sabathu beds are found as narrow bands in the south-western corner of the area. The contacts of Chail Series with Jaunser and also with the Jutogh series are thrust planes.

Existence of the following minerals has been reported in the district ; (Extracts of DCH 1961).

Alump : An efforscence of whitish materials on the Sarahan Schists is seen in the Barauni gad near Jakhri (31°29′ : 77° 41′30″). The efforscence material is alum mixed with some organic substance and with some insoluble matter. The deposit is however, very small to be of any economic use. A similar occurrence is also reported near Tatal (31°23′ : 77°37′).

Gold : Alluvial gold in the Himalayan rivers is a common feature. Alluvial gold is reported to occur at Chagaon (31° 32′ : 78° 6′) near Urni but it is not of economic importance.

Iron Ore : Hematite iron ore banded as well as lense like in character is found in Rohru. Striking east-west, about a furlong to the south of Shil and dipping about 10° to the south, the ore occurs in the form of alternating bands within the bitite schists which are often garnetiferious. The maximum thickness of the individual ore bands in this locality is about 2.54 centimetres. More important deposits are found distributed in the Banoti valley around Narain and Shakal. The ore here is more concentrated and is found in the form of lenses and pocketed with very often as big as 283 cubic metres in garnetiferous mica schists on both sides of the river Banoti near Narain. There are about six old workings and some of them are still being worked.

Iron-pyrite : In the Keonthal area and to the south of Shimla, general lenticular bands of iron-pyrites occur in slates of Bio-leaugunge stage of Jutogh Series. Iron pyrite is recorded from the following localities:

1. In the Kyari (Shamri) nala (31°5′: 77°9′)
2. In the Badhaighat (31°5′ : 77°8′) 228.6 metres upstream of its confluence with the Kyari nala.
3. North of Rehana at 31°4′ : 77°16′.
4. South of Chhota Shimla P.T.O.

The largest individual band traces are at Badhai where the band of iron-pyrite varying from 10.16—43.18 cms., in thickness extends over an exposed length of 21 metres. In the Shamri nala, three thin bands of pyrite, totalling 22.86 cms., in thickness occur within a vertical height of 78.74 cms., the ore forming 29 per cent of the mineralised zone. In the Rahana area the mineralised zone varies from 609—1,524 cms., in thickness, pyrite forming 25—50 per cent of the total thickness. The bands at Rahana occur over an L-shaped area of about 22,300 sq. metres. The reserves are estimated at 23,000 metric tonnes on the assumption of an aggregate pyrite band thickness of 23 cms. in the entire area. The inaccessibility of these regions, render working of these deposits uneconomical.

An occurrence of pyrite is recorded from Matiana (31°13′: 77°24′); which is situated on the National Highway No. 22, about 48 kilometres from Shimla, pyrite is found in the road cutting near Nani, about 1.6 kilometres away from Matiana. Pyrite is found in small crystals, upto 2 m.m. in size disseminated sporadically in the country rock. Sometimes the pyrite crystals form nests and concentrations. In some instances pyrite forms quite large massive crystals. Some chalcopyrite is associated with pyrite. However, the copper mineralisation is not extensive. Pyrite is so sparsely and finely distributed in the country rock that it is of no economic use.

Kyanite : It is abundant in the schists and granites near parts of Bushahr in the western Himalayas.

Limestone : Occurrences of limestone deposits are reported from Naldehra and Basantpur in the district. A portion of these deposits may be of cement grade.

Slates : These are quarried at many places in the outer Himalayas of Shimla Hills.

Apart from these, minor minerals namely masonary stones, boulder, sand and roofing slates are found in abundance in the district at various places and are being used in various developmental and construction works. The district is rich in respect of certain minerals but these have not been fully explored for want of enterpreneur and adequate infrastructure.

Land, Landuse Pattern and Tenancy : The district is spread over in deep small valleys and high elevations and cultivation is possible only in small terraces of holdings in the high hills or in the basins of streams/khuds. However, in the deep valleys though very few in number, the cultivation is spread over in a vast area. Most of the land is either under shrub forests or grassy land with chil pine trees up to the height of 1,500 metres from the mean sea level and kail, deodar, rai, ban, mauru and rhododendron and khanor on the high altitudes. It is only in the basins of the rivers, streams and khuds that the land is a little bit flat and fertile and the cultivation of cereals and pulses as well as off season vegetables is extensively done. Sloppy areas of high altitudes are most suitable for horticultural purposes especially in the growing of delicious varieties of apples and other stone fruits such as a almonds, walnuts, apricots etc. Settlement operations in the district were carried out at different times. As the area was under the Princely Hill States, owners of the land were mostly either the hill chiefs and their kith and kin or their courtiers and staff members of the administration. Prior to the Tenancy and Land Reforms Act came into force there were three kinds of land tenures prevalent in the district and these were (i) Zimindari (ii) Pattedari (iii) Bhaichara.

Zimindari system of land tenure or the land lordism has almost been abolished after the introduction of Himachal Pradesh Tenancy and Land Reforms Act and most of the cultivators who were tenants of the land lords for generations have become owners of the land except in the case of holdings of those land lords who are minors, widows disabled and service personnel. The local terminology for the tenancy is "Muzara" or "Gala Batai" and the tenant is required to pay 1/4th of the grain on each crop or equal rent in cash. Miseries of the tenants who had to pay different types of rents to the land lords in addition to the rendering of personal service have been lessened with coming into force of the Tenancy and Land Reforms Act. However, much more is yet to be done in this respect.

Total geographical area of the district according to village papers during the year 1980-81 was 287,844 hectares. Net area sown (71,990 hectares) forms 25.01 per cent of the total geographical area of the district.

Agriculture : The soil texture in the district varies from light sandy to heavy clay and in the deep valleys and basins it is generally sandy and sandy loam. Type of soil and climatic conditions are the main factors responsible for the proper development of agriculture. The district is having different types of soil and agro climatic conditions which are quite suitable for the growing of various types of cereals, off season vegetables, temperate and stone fruits and other cash crops. The climate in the district varies from extreme hot in the lower elevations to extreme cold in the higher ones. While the areas in the low elevations are suitable for the growing of cereal crops, stone and citrus fruits, places in the higher reaches are most suitable for the growing of seed potatoes, off season vegetables and temperate fruits especially apples. From the agricultural point of view the district can be divided into three regions viz. (1) valley and basin areas (2) mid hills, and (3) high hills. The low lying areas of Rampur, Kumharsain, Seoni, Shimla, Jubbal, Kothkhai, Chaupal, Theog and Rohru tahsils/sub-tahsils are suitable for the growing of cereal crops. In the mid area of these tahsils there is a great potentiality for the growing of cereals, vegetables and horticultural products. However, the areas on higher altitudes are suitable for the growing of apples, cherry, walnuts, almonds and seed potatoes. The major crops grown in the district are as under:

1. *Wheat* : Prior to 1976 tall varieties of wheat like N.P. 770, NP 809 and Riddley were popular. Subsequently these varieties were replaced by Sonalika, Kalyan, Sona, HA-86 and HL-429. These high yielding varieties can absorb higher doses of fertiliser and are frost resistant as well. During 1980-81 wheat was grown in an area of 34,804 hectares and bulk of the area was under new high yielding varieties. Total production of wheat was 47,734 tonnes. Principal wheat growing areas are in Rohru, Rampur, Theog, Chaupal and Shimla tahsils.

2. *Rice* : Paddy is mostly sown in the areas where irrigation facilities are available. In some pockets local coarse paddy is a'so sown in the unirrigated areas. Besides China-988 variety which remained very popular up to 1964 the other varieties commonly grown are Norin-8 and Norin-18. Now latest high yielding varieties like HIMDHAN and Himalayan-2 are replacing the old varieties. During the year 1980-81 paddy cultivation was undertaken in an area of 5,289 hectares and the total production was of the order of 5,013 tonnes. Principal paddy growing areas fall in Rampur, Rohru and Chaupal tahsils.

3. *Maize* : Maize is the principal crop grown in the district. Local Ganga-5 and Ganga-3 introduced in 1962 remained very popular up to 1970. These varieties have now been replaced by a high yileding variety known as HIM-123. Vijay composite variey is also sown. During the yeaf 1980-81 these high yielding varieties as well as the other local varieties of maize were sown in an area of 21,569 hectares with total yield of 34,099 tonnes. Major maize growing areas are in Shimla, Theog, Chaupal, Seoni, Rohru and Rampur tahsils.

4. *Barley, millets and other cereals :* These crops were sown in an area of 20,605 hectares with a total production of 27,051 tonnes.

5. *Pulses* : 1,334 tonnes of pulses were grown in an area of 4,859 hectares.

6. *Potatoes* : Seed potato is the main cash crop in the district. Seed potato of improved and disease free varieties are exported from the state to other parts of the country as well as to the foreign countries. Shimla district is the biggest producer of seed potato in the state. The old varieties of uptodate, Kufri and Shilaru are being replaced by the improved varieties of Kufri Chandermukhi and Kufri Jayoti. The services of Central Potato Research Institute which has a potato research station at Kufri, are available to the farmers and potato growers. In addition, the state Government's Potato Farm at Shilaru in tahsil Theog is also undertaking research in the development of seed potato. From this farm seed potato is supplied to the intending growers. During the year 1980-81 these improved varieties of potato were sown in an area of 8,274 hectares with total production of 40,605 tonnes. Theog tahsil is the biggest potato growing area followed by Rohru, Kotkhai, Jubbal, Chaupal, and Shimla. Potatoes play an important role in the economy of the people of the district. To disseminate the modern techniques of cultivation of potato amongst the farmers the potato farms at Shilaru, Kharapathar, Khadrala and Dhurla are functioning. Shilaru farm is spread over an area of 14.59 hectares while that of Kharapathar, Khadrala and Dhurla measure 8.10 hectares, 6.10 hectares and 6.09 hectares respectively.

7. *Vegetables :* Off season vegetables are being grown in the district since long. Off season vegetables like green peas, cauliflower, cabbage, spinach, beans, lady finger, tomatoes, etc. appear in the market when these are not available in the neighbouring states. Recently the Arkal variety of peas has been introduced in the district which has become popular with cultivators with regard to its yield and marketability. Besides this the district is known for chillies and biggest chillies growing tahsil is Theog followed by Chaupal, Shimla and Seoni.

Seed multiplication farms play a vital role in the development of agriculture by making available quality seeds to the cultivators. Apart from the potato development farms mentioned above seed multiplication farms are functioning at Prala, Annu, Datnagar, Gantholi, Basa and Rautan.

On the basis of crop cutting experiment conducted by the Agriculture Department the yield of maize per hectare (2,307 Kilograms) was the highest in the district as compared with the other districts of the state. 1,017 Kilograms yield of paddy, 1,323 Kilomgrams of wheat and 1,047 Kilograms of barley per hectare were also achieved.

The demand of the growers for improved varieties of cereal and vegetable seeds is also being met by the National Seeds Corporation and by the Registered growers. The main distributing agency is, however, vast net work of Block Development offices scattered in the district. Apart from the seeds, adequate supplies of chemical fertilisers and pesticides are being ensured by the Agriculture Department through their distributing agencies and its use by the farmers has stepped up the agricultural production tremendously. Improved implements are also being supplied by the department on subsidised rates and emphasis is being laid on the use of mechanical farming wherever possible. The Agriculture Department is also running a soil testing laboratory at Shimla and the deficiencies noticed, if any, in the tests are made good by the use of required doses of fertilizers and pesticides. The services rendered by the laboratory are free.

Horticulture : Shimla district occupies a place of pride in the field of horticulture not only in the state but also in the country. The agroclimatic conditions prevailing in major parts of the district are most suitable for the growing of temperate fruits. During the last twenty years there has been a silent but tremendous revolution in the sphere of horticulture in the district. It emerged, expended and developed into a prosperous district as a result of sustained, hard and sincere efforts put in by the people and the Department of Horticulture.

Shimla is the biggest apple growing district in Himachal Pradesh and it has earned a name in propagating a rich collection of many delicious varieties of apples. All credits go to the Late Shri Satya Nand Stokes formerly an American Missionary named as Samuel Stokes for pioneering the cultivation of delicious varieties of apples in Kotgarh. The example set up by him and thereafter followed by the others, altogether changed the economic complexion of the people of the area. Apples are grown on 83 per cent of horticultural land in the district. The main commercial varieties grown are Royal Delicious, Rich-a-Red, Red Delicious and Golden Delicious. Apart from these delicious varieties, Red Gold, Pearman, Tideman worsester, Ambri, Granny Smith etc. are also being grown. The district is not lagging behind in growing other fruits such as pears, peaches, apricots, plums, walnuts, almonds, citrus, mangoes, cherry, etc.

The cropping pattern has altogether changed with the enormous efforts put in by the Horticulture Department and horticulture as a vocation has come to play a vital role in the economy of the district. It has established a place for itself in respect of the scientific orchard management and quality fruit production and the district has become an attraction and a source of inspiration to the orchardists and experts not only of the other districts of Himachal Pradesh but also of the other apple growing states.

During the decade 1971-1981 the district made a rapid stride in apple and other fruit cultivation. During 1975-76 the fruits were grown in an area of 18,930 hectares and the total area under fruits during the year 1980-81 increased to 22,792 hectares. The area under apples during 1980-81 alone constituted 82.87 per cent of the total area under fruits. The total production of fruits during the year 1980-81 was of the order of 74,844 metric tonnes despite unfavourable weather conditions.

Plant Protection : Delicious varieties of apples and other temperate fruits are prone to diseases caused by the vagaries of the weather and by the pests. Some diseases which assume epidemic form are fought every year with fortitude and determination by organising special campaigns in addition to regular plant protection programmes in the orchards. One such disease, identified recently as "Apple Scab" which was unknown to the apple growers in the district has taken epidemic form and is causing havoc by damaging many established orchards. The situation is however, being brought under control by unified repeated fungicidal sprays and special measures under special schemes are being adopted by the department of horticulture with the cooperation of the people in controlling the disease. With more researches it may be possible to eradicate it for ever in the times to come.

The work of producing quality fruits is an achievement in itself. But the achievement is not an end itself unless proper marketing and processing is arranged to provide remunerative prices to the growers. To regulate the marketing and processing of fruits commendable work is being done by the HPMC a Government undertaking with a net work of marketing centres in the country and by setting up processing units in the state in addition to the opening of a number of scientific packing and grading centres at convenient places in the apple and fruit growing areas in the state. Apart from this, the corporation is also maintaining cold storages in the metropolitan cities. The biggest processing unit of the corporation is at Parwanoo. There are at present the following four cold storages in the district each having a capacity of 1,000 tonnes (50,000 boxes).

1.	Oddi	Kumharsain Sub-tahsil
2.	Javol Tikkar	Kumharsain Sub-tahsil
3.	Gumma	Kotkhai tahsil
4.	Rohru	Rohru tahsil

There is one canning unit in the district (Naubahar) which is being maintained by the department. To educate the people about the scientific techniques of picking, packing and grading of apples a large number of orchardists and officials are imparted training by the department every year free of charge.

The Department of Horticulture is maintaining a number of seed multiplication farms and progeny orchards in the district. During the year 1980-81 there were as many as 15 progeny orchards and one nursery farm in the district and the demand of the people for disease free plants and saplings was fully met. The Himachal Pradesh Agriculture University is also maintaining the Regional Fruit Research Centre at Mashobra and a hortitorium in Kotkhai.

Irrigation : Irrigation plays an important role in the agricultural economy. Exclusive dependence on rain makes the agriculture in itself a gamble. The scope of irrigation in the district is limited because the entire terrain is mountainous with deep valleys. Whatever irrigation is possible is provided through 'kuhls' from the perennial khuds. Irrigation by wells, ponds and tubewells in the district is almost non-existant. Under the various plan schemes the state government has taken up various small and medium irrigation schemes in the district. Much attention is being given to the lift irrigation schemes which will irrigate the areas falling within basins of the perennial rivers and streams. During the year 1980-81 the net provisional area irrigated was 4,813 hectares. The irrigation schemes are being carried out by the Irrigation and Public Health Division of the Public Works Department.

Animal Husbandry : Livestock is the main wealth next to agriculture of the predominant population of the district. The entire terrain in the district is mountainous with high slopes and deep valleys. The development of agriculture is, therefore, broadly dependent upon the development of animal husbandry. Almost every house invariably keeps a few cows or buffaloes, sheep, goats, pigs and poultry birds. As per livestock census of 1977 the total livestock in the district was 607,535 of which 55 per cent or 333,915 were cattles, 25 per cent or 151,323 were sheep and goats accounted for 16 per cent i.e., 98,183. The remaining 24,114 constituted buffaloes, horses, mules, donkeys, and pigs. Apart from this 54,100 poultry fowls and birds were also reported. The improvement of the breed of livestock is the main concern of the department of animal husbandry in the district which has been taking a considerable stride in this direction. The mute animals are prone to many diseases and they also need proper medical care. For this purpose there were 20 Veterinary Hospitals, 50 Dispensaries and 3 Mobile Dispensaries in the district in 1981. Apart from these, 18 artificial insemination centres were also functioning.

Breeding : The Animal Husbandry Department is maintaining bulls for natural service almost in all the hospitals. At some places the Panchayats have been provided with bulls and the maintenance charges are being borne by them. However as an alternate to the natural service by the bulls, artificial insemination has been introduced in all the hospitals and dispensaries for which semen is supplied from the selected centres on nominal charges. Because of climatic conditions the progeny does not normally stay after it gets dry.

Cows : Other than the local breed, Jersy cross breed and Holstein cross breed are most popular

due to higher milk yield. Artificial insemination facilities which are finding favour with the farmers are available at the Veterinary Institutions for which the department charges nominal fee. Under the special livestock production programme the cross breed of Jersy and Holstein heifers of 4 to 28 months are being supplied to the people at subsidised rates.

Sheep : In the case of sheep the cross breed of Marino and Rambulitlle are preferred which are procured from the shepherds of Kinnaur area who usually visit the district during the winter months. Various incentives are provided to the people for the purchase of sheep meant for rearing under the Rural Development Agency and Scheduled Castes and Scheduled Tribes Component Plan. The Animal Husbandry Department is also maintaining a sheep breeding farm at Jeori in tahsil Rampur. The farm was established in October, 1955 and is streched over an area of 282.42 hectares, of which 276.40 hectares of land is under pastures and the remaining is covered under cultivation and construction of buildings etc/ With a view to upgrade the breed of local sheep with the help of imported fine wool rams, favourable environmental and climatic conditions prevailing in the area were considered suitable for the setting up of the farm. The local sheep were crossed with Rambulitlle rams and Polwarth flock imported from Australia. Russian Marino are also most suitable breeds and therefore, the pure breed sheep are being multiplied and supplied to the private breeders. Practical training in sheep and wool development work is also imparted here to the sheep breeders and the staff. In the farm a wool analysis laboratory is also functioning and every year 1,500—2,000 wool samples are analysed and studied. Another wool centre is also functioning in Tara Devi.

Fodder : Fodder seed production farm is functioning at Jeori. During the rainy season grass roots of Napier and Starea are distributed to the farmers. Cattle feed is also supplied to the breeders by the department through the cooperatives and by the licensed private dealers.

Dairy : The Department of Animal Husbandry is also maintaining dairy development activities in the district. For Shimla town the milk supply scheme was started on 1st January, 1972 with one chilling unit at Ghanahati with capacity of 2,000 litres per day. The chilling plant was fed by collections from Ghanahati, Mashobra, Dhami, Solan and parts of Sirmaur district. Shimla dairy presently handles about 5,000 litres of milk against the increased capacity of 10,000 litres. One more milk chilling centre is at Jeori which feeds Rampur town and Project areas of Nathpa, Jhakri and Sungra. In all there are six milk Cooperative Societies in tahsil Shimla which supply milk to the dairy plant at Tutu.

Poultry Farming : The Department of Animal Husbandry supplies exotic birds to the breeders and also arranges training programmes off and on and provide technical knowhow. The Central Poultry Farm Kamlahi was established during the 2nd Plan and is being maintained. Eggs and dressed chicken are supplied by the farm for sale through the co-operative consumer store. Besides, poultry units are also attached to Veterinary Hospitals at Seoni. Eggs and chicken are also supplied to the market by the private breeders and by the co-operative societies. The department also undertakes the work of distribution of improved breeds like white Leghorn and Rhode Island Red to the breeders through block agencies in order to improve the local breed. As per livestock census of 1977 there were 54,100 birds and fowls in the district.

Fisheries : There is a vast net work of perennial rivers, streams and khads in the district and there is a great scope for the development of fish culture. The main fisheries activities in the district may be divided into three categories i. e., (i) development of sport fisheries (ii) conservation of reverine fisheries (iii) development of pond fisheries in rural areas

The Pabbar river provides good trout fishery which is an attraction to the tourists and foreign anglers. For the development of trout in the Pabbar a trout farm was established in the late fifty's at Chirgaon with annual capacity to produce 0.5 lacs trout Ova. The farm consists of five breeding tanks and six nursery ponds besides a hatchery. Four more breeding tanks are under construction. To check illegal fishing in the river and its tributaries, check posts have been established at six places.

With regard to the conservation of river fisheries in the rivers of Sutlej, Giri, Salui, Junga khud and its tributaries, Field Assistants are posted at strategic points in the district. Fishing in these rivers and streams provides self employment to about 200 licensed fishermen. The department provides 50 per cent subsidy for the purchase of nets and other equipments to the fishermen. Sainj khud near Shimla has been taken up for the development of Mahasur which migrates from the river Sultej for breeding purpose.

Under the scheme for development of pond fisheries in the rural areas, 50 per cent subsidy is provided to the Scheduled Castes community and 25 per cent to the others for the construction/renovation of ponds for fish culture. Up to the year 1982-83 an amount of Rs. 29,500 was spent under the scheme in the district in Kumharsain, Theog and Seoni tahsils. Karyali lake in tahsil Seoni is also being developed for fish culture.

Industry : The economic development of a place is directly related with the industrialisation of that area. The most effective measures of economic emencipation of the agriculturists is the organisation and setting up of industries which divert a substantial proportion of the population from agriculture to industry. Because of peculiar conditions prevailing in the district the chances of setting up large scale industries are rare. However, there is much scope for small and medium sized industries because of the availability of abundant natural hydro electric power resources and infrastructural facilities which are essential for carrying out of the diversified economic activity. Presently the economy of the district is confined to agriculture and horticulture. Inspite of the fact that the district is enjoying the twin advantages of abundant power and industrial peace, it has remained backward. Because of the availability of

limited arable land and evergrowing unemployment which the district as well as the state is facing there is need for intensive development of small/cottage industries and to achieve this object the government has taken a number of steps in initiating and promoting the industrial development. Various Corporations have, therefore, been set up and packages of incentives for setting up new industries and expansion of existing one's are provided. These incentives include a number of monetary and fiscal concessions including subsidised cheap power and development of infrastructural facilities in the industrial areas.

The district is rich in raw material for the establishment of cottage and small scale industries. There is a scope for accelerating the household industries like blacksmithy, basket making, carpentry, earthenware, flour grinding, goldsmithy, oil expeller, shoe making, tailoring and weaving.

The district being rich in forest resources, the forest based industries such as saw mills for packing cases (which can be used in marketing the horticultural produce), timber for furniture and furniture making, resin and turpentine oil can be set up.

The state government in order to boost the industrial development has identified an industrial estate at Shoghi near Shimla. With the development of this industrial estate many small scale industries are likely to come up in the near future. Up to the year 1980 there were 38 registered factories in the district. For setting up of new industries the government provides liberal loans which are recovered in easy instalments and carry marginal rate of interest. During the year 1980-81, a sum of Rs. 2.50 lacs was advanced as marginal money to as many as 19 entrepreneurs and a sum of Rs. 1·73 lacs, was realised as principle with Rs. 0.58 lacs as interest from the loanees. There is much scope for setting up of fruit processing and canning plant in the district. Potentialities for the industries based on stone quarries are also there.

To inculcate the spirit of industrialisation in the minds of the people the government have started a number of training and production centres in the district in which intensive training is provided to the participants and after successful completion of courses they are issued diplomas/certificates. Khadi and Village Industries Commission is also engaged in the work of development and growth of village industries. The main objectives of the commission are creation of employment opportunities for the unemployed and underemployed, rendering technical and financial help to the village artisans and arrangements for the supply and storage of raw material, to start wherever possible, consumer goods industries such as safety matches, fruit canning units, soap making, etc. The commission also provides subsidies on implements and equipments to the artisans and craftsmen. Training is also imparted to the workers of Khadi and Village Industries.

There is one industrial training institute located in Shimla which imparts training in various trades such as draughtsman, surveyor, fitter, carpenter, electrician, welder, stenography, plumber, wireman, turner, mechanic, (instrument, watch and clock and Motor Vehicle), automobile mechanics and drivers. The trainees admitted to the courses are granted stipends on poverty-cum-merit. The training so imparted is free. Training to women in cutting and tailoring is being imparted in the Girls Industrial Training institute at Shimla and sub-centres at Gauna, Kawveel, Kumharsain, Malandi, Matiyana, Shogi, Sanjauli, Boileauganj, Nerua, Panog, Kalbogand Taylavil ((Jeori), apart from the tailoring centres run by the Welfare Department at Madhol, Sarahan and Ladakhi Mohalla (Shimla). In addition, Rural Industrial Training Institutes are functioning at Rohru, Jubbal and Shimla.

Elecricity : The development of agricultural and industrial sector can hardly be accelerated without the availability of power. Since dependence on power resources like petroleum, forests and coal is limited, the necessity of electricity has increased manifold. Apart from industries the use of electricity for domestic purposes has become indispensable in the present era. Before independence electricity facilities were confind to a few places in the district. The only hydel electric power station at Chaba in tahsil Seoni could feed Shimla town only. To maintain uninterrupted supply of power to the town one Diesel Generating Set was also commissioned. Apart from these a tiny power house was functioning at Jubbal during the princely days which could feed the village of that name only. Thus, there were only three power producing projects in the district before independence. After independence the programme of electrification of the town and villages was taken up by the Public Works Department. During the 2nd Plan Hydro Electric Power House at Nogli in tahsil Rampur with a capacity of 750 KW was commissioned. With the completion of Bhakra Project, electricity demand of larger part of the district was met therefrom. Now the district is being fed by Dehar Power Project. Work on the Andra Project in tahsil Rohru, Natpa—Jhakri project in tahsil Rampur is in progress. Since the work was of vital importance Himachal Pradesh State Electricity Board was created. The achievements of the Board have been commendable. Up to 31st March, 1981 of the 2,225 inhabited villages in the district as many as 1,477 constituting 66.38 per cent had been electrified.

Trade, Commerce and Banking : Prior to independence and even after few years of independence Shimla town has remained an important centre of trading because of its location in the mid way of the route connecting the plains and the hilly area. The growth of the banking facilities in the district was rather slow before the nationalisation of banks. Banking in the district started on a gradual growth. There was a time when the trade, commerce and banking activities were entirely held by the indigenous money lenders (Sahukars) and village Banias. Commission agents (Artees) also contributed their share and assisted the agriculturists and those engaged in household industries and handicraftsmen. With the coming up of new industries and head way made in the field of agriculture and horticulture, trade, commerce and banking activities have increased manifold. Now, as a result of it chief centres of wholesale business

have come up at Shimla, Dhalli, Shoghi, Theog, Narkanda, Rampur, Seoni, Jubbal, Kothai, Rohru and Chaupal. The main articles of export are agricultual products especially off season vegetables, chillies and potatoes. On the horticulture side fruits and dry fruits such as apples, peaches, pears, plums, cherry and walnuts are exported from the district. Forest products such as timber, fuel-wood and medicinal herbs are also exported. Rampur is known centre for the export of dry fruits of Kinnaur and woollen shawls and pattis (coating cloth). However, in the matter of kerosene, petroleum products, edible oils, foodgrains, sugar, mil made cloth, hosiery goods, cigarettes, utensils, electric appliances and articles of general merchandise the district has to depend on imports from the plains. To cope with the huge net work of trading activities a number of banks have come up in the district. United Commercial Bank is the lead bank of Shimla district and it had 30 branches scattered throughout the district. State Bank of India and its subsidiary State Bank of Patiala had 21 branches in the district. Punjab National Bank had 8 branches and Grindlays Bank, Indian Overseas Bank, Bank of India, Jammu & Kashmir Bank, Oriental Bank of Commerce, New Bank of India, Bank of Baroda and Syndicate Bank had one office each. Union Bank of India, Indian Bank and Central Bank of India had 2 branches each. There were 3 branches of Punjab and Sindh Bank. Apart from these Himachal Pradesh State Cooperative Bank has a vast net work of branches in the district. During the year 1980, fifty-five scheduled commercial banks received deposits of Rs. 6,616 lacs and credited Rs. 1,754 lacs. Apart from these banks, Himachal Pradesh Financial Corporation, Mineral and Industrial Development Corporations are also having their offices. In addition Himachal Pradesh Land Mortgage Bank, Shimla Urban Co-operative Bank and registered co-operative societies are also serving the people.

Transport : Road transport is the life line of economy of the district because potentialities for the development of railways and other means of transport are meagre. With regard to road transport, the district occupies an important place because of the fact that National Highway No. 22 passes through it. Apart from this narrow gauge Kalka-Shimla rail line which enters the district at Shoghi is serving since 1905 A.D. All the tahsil headquarters are now connected with the district headquarters by motorable roads. Not only this even most of the villages are also connected with the tahsil/sub-tahsil headquarters by a vast net work of motorable roads. The far off villages where it is not possible to construct motorable roads, convenient foot-paths and bridle-paths have been constructed. By the end of the year 1980-81 the total road length in the district was 2,701 Kms. of which 271 Kms. were double lane, 1,495 Kms. single lane, 77 Kms. jeepable roads and 858 Kms. less than jeepable. Dhalli region of the Himachal Pradesh Road Transport Corporation is operating a fleet of 73 buses, 10 Trucks and 2 Cabs on 55 routes. Of these 55 routes, 4 are inter-state. The total operational mileage covered by the fleet is 13,642 Kms. per day of which 1,110 Kms. were operated in other states, i.e., Punjab, Haryana, Uttar Pradesh, Delhi, Chandigarh and Jammu & Kashmir. In order to provide maximum transport facilities to the people the government is doing its best by constructing additional link roads with a view to connect each Panchayat with their respective tahsil headquarters. Most of the routes of Dhalli region of the Himachal Road Transport Corporation are seasonal. To lessen the burden of Dhalli region and to provide better services to the people sub-regions at Rampur, Rohru and Shimla are also operating nicely. Incidence of wear and tear of vehicles on hill roads being heavy, repairs are frequent. The operation of vehicular traffic on most of the routes, however, remain suspended during the winter and rainy seasons because of heavy snowfall and rains. Central Workshop of the Corporation at Taradevi is undertaking the work of body building of buses, trucks and jeeps and also carries out repair of the vehicles. To handle the upliftment of Potato and Apple crops, private transport companies and railways are also pressed into service. Some of the main routes in the district are as under :

(1) Kalka-Shimla Railway line.
(2) National Highway No. 22.
(3) Shimla-Basantpur-Kingal Road.
(4) Shimla-Basantpur-Seoni Road.
(5) Shimla-Kotkhai-Jubbal-Rohru-Chirgaon Road.
(6) Shimla-Chaupal-Nerua Road.
(7) Shimla-Jubbal-Anti Road.
(8) Shimla-Khadrala Road.
(9) Shimla-Kufri-Chail Road.
(10) Shimla-Junga-Sadhupul Road.
(11) Shimla-Gumma-Khaneti-Khadrala Road.
(12) Shimla-Narkanda,-Oddi-Kotgarh-Bhaira Road.
(13) Shimla-Narkanda-Thanedhar Road.
(14) Shimla-Narkanda-Nankhari Road.
(15) Shimla-Narkanda-Rampur-Sarahan Road.
(16) Shimla-Pulhahal Road.
(17) Rampur-Gaura Road.
(18) Rampur-Taklech Road.
(19) Rampur-Nankhari Road.

Apart from these the Himachal Pradesh Road Transport Corporation is also operating local bus service in Shimla town and among the important places covered are Shogi, Darlaghat, Jutogh, Summerhill, Sanjauli, Kasumpti, Kufri, Fagu and Durgapur.

Social and Cultural Events : The fairs and festivals held in this hilly state are most interesting and fascinating. The life of the people who are strong believers of Shiva Shakti has become the synthesis of all traditional observances connected with fairs and festivals. A brief account of some of the important fairs and festivals held in the district is given below:

1. Winter Sports Festivals : It is a recreational festival usually held during winter months for two days at Kufri which is about 13 Kms. from Shimla. Skiing on the snow clad slopes is done by lovers of

skiing. Skiing and other equipments are also supplied by the winter sports club to those who do not have their own. It is altogether a recreational festival and about 200 enthusiasts participate in the games. The number of spectators is approximately 5,000.

2. Summer Festival at Shimla : With the on set of Summer in May and June there is large influx of visitors and tourists in Shimla. The place which is considered as queen of hills, is a dream of the youths and a paradise for the tourists, attracts people from every nook and corner of the country who come here to prevent themselves from the sultry heat of the plains and enjoy the greatest scenic beauty of the mountains and quiet atmosphere of a real holiday place. For their recreation a festival is held on the Ridge in Shimla town for a week or 10 days depending upon the weather conditions. Selected programmes of entertainment are held at night and dramas, variety entertainment programmes, games, etc. are arranged/staged. In the Ladies Park, industrial and commercial exhibitions are held and in the lounges of some convenient and reputed hotels beauty contests are also held. About 50,000 spectators enjoy the variety entertainment programmes during these festivals.

3. Sarahan Fair : This fair is held in village Sarahan of tahsil Chaupal for three days in the month of Baisakha (April). The venue of the fair is the courtyard of Devta's temple. Attendance of visitors is 3 to 4 thousands. People from the adjoining areas and even from far off areas of tahsil Pachhad and Pargana Tiyari and Balson area of tahsil Theog come to witness and participate in the fair. Shopkeepers from Fagu and Shimla also sell sweetmeats and the articles of general merchandise. Archery is the main attraction of the fair. Parties of Archers come from the various places. During the night 'Natti' dances are enjoyed with folk songs and to the beat of drums and tuning of musical instruments. People also enjoy in the marry-go-round.

4. Shawani Fair, Jali : This fair is held in village Jali in honour of Nag Devta whose idol of Ashtdhatu (eight metals) was, as per legend, established by the Pandvas. The fair is held on the day of Saravana Purnima (July-August) when the deity gives appearance (darshan) to the people who offer their "Sukhna". Some years back there was a custom to dance on the occasion with special typical dresses. The fair lasts for two days and on the 3rd day the people perform 'Dev Dance' around the temple building. It is said that in the ancient times the area of Punder was transferred from the Jubbal state to Keonthal state. But, unfortunately on the day of Saravan Purnima the ruler of Jubbal passed away and there was mourning throughout the state. The people of Punder in order to show their resentment against the transfer of their area to Keonthal state celebrated the fair in spite of the state mourning. The new ruler of Jubbal in order to teach a lesson to the people of Punder attacked their area, but, was defeated by the defending people who had risen in revolt. The area was ultimately handed over by the ruler of Jubbal to Keonthal state. Sweetmeats and articles of general merchandise are sold.

5. Charyoli Fair Bodna : The fair is held in village Bodna of tahsil Chaupal on the 2nd and 3rd of Bhadra (August) in honour of Devta Shirgul also known as Vijit Raj. The deity is worshipped by the Brahmins of Majhoti. Along with the temple of Shirgul, another temple of 'Peer' is also there. Wooden columns of these two temples have ancient carvings and coins of silver, brass and copper are nailed on the front by the devotees. On the top of the roofs there are many brass "Kalash".

On the fair day people gather in front of the temple at night with burning "Mashals" in their hands and sing folk songs particular to the occasion. They have a round of the temple thrice. Villagers of the surroundings of Chaupal participate in the fair and stay with theirr elatives. The fair is studied with social and cultural activities. As a matter of fact it is a fair of fire known in the local terminology as "Chiras". The aim of celebrating the fair with burning "Mashals" is to pray for the protection of the standing crops from the pests. 'Natti' dances and folk songs are the main attraction. Sometimes dramas are also staged and cinematographic films are shown by the State Publicity Department.

6. Rampari-Ki-Jatar : This fair is held in village Rampari of tahsil Jubbal on the first day of Ashada (June). The place is about 2 Kms. from Jubbal on Theog-Hatkoti road. The fair is being celebrated since ancient times and last for a day. Men, women and children attired in their best participate in the fair. 'Natti' dances are performed and sweetmeats and articles of general merchandise are generally sold. Young men, women and children enjoy 'hindola' ride. Jugglers afford additional recreation to the visitors.

7. Jagna Shari : This fair is held in village Shari of tahsil Jubbal and it is believed that in ancient times it was a big village inhabited by Kanaits, Kolis and Lohars. It is said that two brothers of the ruling family of Jubbal settled in the village. The Jagra is celebrated on the 5th day of Bhadra (September) every 5th year. It is a common festival of villages of Chamaru, Daker, Kiari Jubbal and Shari. The temples of Devta Banar and Devta Mahasu are in the village. The fair is enjoyed by the gathering by performing 'Natt' dances and folk songs. At night a goat is sacrificed by the villagers in the honour of Devta Banar.

8. Sipi Fair : This fair is held every year in Sihpur below Mashobra on the 1st of Jaistha (May) in honour of Sip Devta. It is a very old fair and the Rana of Koti used to be the chief visitor. Thousands of people of the surrounding areas participate in the fair. The urbanites of Shimla also throng to the fair. A goat is slaughtered in honour of the deity. Archery game is played besides several cultural programmes, variety shows, 'Karyala', cinematographic films shown by the State Public Relations Department. Performance of the jugglers, magicians and acrobats provide additional entertainment to the spectators.

9. Pathar-Ka-Khel-Halog : This fair is held in village Halog of tahsil Shimla. Halog was the capital of erstwhile Dhami state. The fair is held on the second day of Diwali in the month of Kartik

(November).. In ancient times human sacrifice, it is said, used to be offered to goddess 'Kali' every year at the spot where the fair is now held. It is also said that on this day the widow of a ruler of the state performed "Satti" and that before doing so she had ordered to make human sacrifice henceforth. Human sacrifice was stopped after sometimes. Stone throwing fight between two parties is the main attraction of the fair and whatever blood oozes out from the wounds caused by injuries on the bodies of the participants is collected and offered to the Kali. Apart from the stone throwing game the 'hindola' ride is also enjoyed. The fair used to be held on a big scale during the princely days but because of the changed circumstances it is not held now on such a grandeur.

10. Vishu Fair-Purag : This fair is held in village Purag of tahsil Kotkhai on the 9th day of Baisakha (April) for three days. The fair is held in honour of Mahadev Devta. 'Natti' dances with beating of drums and tune of musical instruments and folk songs are performed. The devotees pay their homage to the devta. It is a social and cultural fair.

11. Mahasu Jatar : This fair is celebrated about 6 Kms. from Shimla-Kotkhai road near Mahasu village on the 3rd Tuesday in the month of Baisakha (May) for two days. The fair is a very old one and is held in front of the Durga Devi temple by a large gathering who throng from the neighbouring areas. It is believed that a Rana of Badoli lived in Chakroht near Mahasu. He had built Durga temple there. After the abolition of his jagir the Rana left the village and the villagers of Mahasu constructed a temple of Durga in their own village and to commemorate the occasion they started the fair. 'Natti' dances and folk songs are performed. Archery game is the main attraction of entertainment. At the end of the fair a goat is sacrificed.

12. Barara Fair : This fair is held in village Brara near Kumharsain and people of all castes and creed participate. The fair is held on the 1st of Jaistha (May). It is being celebrated from ancient times. Devta Koteshwar is brought in the fair and goats are sacrified in its honour as a mark of respect. The fair is cultural and recreatioal and 'Natti' dances are performed. People also enjoy 'Hindola' ride. Sweetmeat sellers and other shopkeepers have a brisk business.

13. Shancha Fair : This fair is held in village Baragaon of tahsil Kumharsain for two days every year on the 15th and 16th day of Saravana (July—August). It is said that the fair was started in the year 1874 on the coronation of Rai Hira Singh of the erstwhile Sangri state. Deity of devta Bharmeshwar Mahadev mounted on a wooden planquin (rath) is the main attraction of the fair. The fair is organised by the temple committee and the local Gram Panchayat. Hindola rides are enjoyed and sweetmeats and articles of general merchandise are purchased by the people. During the day and at night 'Natti' dances are performed. Cinematographic films are also shown by the Field Publicity unit of the State Government. Dramas are staged and games of Volleyball and Kabaddi are also played. The gathering in the fair is huge. Performances by the jugglers, magicians and acrobats add to the recreational activities.

14. Dudhbahali Fair : The fair is held near village Jaodin in tahsil Rampur on the 12th and 13th Asadha (June) every year in honour of three deities i.e. Devta Jishar, Devta Dethu of Kharan and Devta Chaturmukh of Melon in Kumharsain tahsil. The fair is organised by the Gram Panchayat of Khuni-Peanoli. 'Natti' dances are performed and dramas are staged. Cinematographic shows are arranged by the Public Relations Department. People also enjoy the ride on marry-go-rounds. The congregation in the fair is fairly large.

15. Lavi Fair : Lavi fair of Rampur is the most important fair of the district and state. It is a commercial fair held on the 25th of Kartika (November). It is said that the fair was related to the signing of a trade treaty between the erstwhile Bushahr state and Tibbet. The shepherds of Kinnaur migrate to warmer places before the on set of winter and on their way they halt at Rampur. The woollen goods, dry fruits and medicinal herbs brought by them are purchased by the people and the traders of the plains and food-grains, clothes and utensils are sold. It is a very old fair and entirely related to the sale and purchase of goods. 'Natti' dances and cultural shows are the main attractions.

16. Rohru Fair : This fair is held in Rohru on the 9th and 10th of Baisakha (April) on the bank of river Pabber in honour of Devta Shikru. People of villages Thanthali, Jakhar, Dashlni, Gangtoli and Rohru are the devotees of the devta. It is a very old fair and is held to commemorate the supemacy of the deity. This fair is also a commercial one and apart from the performance of 'Natti' dances and cultural activities, brisk trading is also done. Men and women costumed in their best attire participate in the fair.

17. Bhoj Fair : This fair is held in village Guman in Rohru tahsil in the month of Agrahayana (November) for three days in honour of Devta Bensor, Parshu Ram and Kilbaru. Devta Bansar is the presiding deity. Besides paying homage to the deities 'Natti' dances are performed by the people. Healing prophesies made by the oracles in trance and their soothing advices and blessings of prosperity to the sufferers are the main attractions. The fair attracts a huge crowed.

18. Rihali Fair : This fair is held in village Mandhor in tahsil Seoni on the 1st Saravana (July) every year since ancient times. The fair is organised to pay homage to Devta Kurgan. At this time the standing agricultural crops of the farmers are green and the people overwhelmed with the joy of greenery celebrate this fair. The fair is altoghether social one as the people find time to meet their relatives and friends before their busy time in the fields in the later days.

19. Chunehar Fair : This fair is held at Chunehar near Jot in tahsil Theog every third year for two days in the month of Ashada (June-July) in honour of Devta Chitra. It is said that the devta once fulfilled the

wishes of one of the ancestors of the people of Jot, Pargoya and Paluwa. 'Natti' dances with the beat of musical instruments and folk songs are enjoyed by huge gatherings belonging to all castes and creed.

20. Deothidhar Fair : This fair is held from 26th Saravana (August) for 5 days Atili Bhadara Sakranti in village Deothidhar in tahsil Theog. The fair is held in the honour of Devta Chikher. Initially the fair was held for recreation after 4 or 5 years but it has now acquired a regular feature and it is held every year. 'Natti' dances with the beating of musical instruments and singing of folk songs are performed. Sometimes dramas are also staged. Cinematographic shows are also arranged by the Publicity Department. Ride on the merry-go-rounds is also enjoyed by the people.

Places of Historical Importance :

1. Chaba : It is situated on the left bank of the river Satluj in tahsil Seoni. It is very small village but its importance is due to the power house which was commissioned sometimes in 1910. This power house supplies electricity and pumps the upliftment of drinking water from Guma to Shimla town. Apart from a primary school, a post office, dispensary and resthouse are in the village.

2. Kufri : It is about 13 Kms. from Shimla on Natioal Highway No. 22. This village has brought Himachal Pradesh on the sports map of the country because of the thrilling winter sports of skiing. Winter Sports Club is functioning since 1953. The club has a spacious house with dormitory accommodation. The club provides skiis, boots and tabbogans to the Skiing lovers. Apart from the club house reservation of accommodation can be made through the Himachal Pradesh Tourist Information Office, Shimla in Indira Holiday Home. During winter the climate is severe cold. However during summer it is pleasant.

3. Naldehra : Naldehra is situated at a distance of 25 Kms. from Shimla on Shimla-Seoni road. The place is famous for Golf course and has acquired prominence as a picnic spot. During the British regime, this Golf course was reportedly developed by Lord Curzon. He admired the beauty of the place so much that he named his daughter 'Naldehra'. Only a few years back the Himachal Pradesh Tourism Development Corporation has taken over the place which is getting a face lift against the charming pine and fur grooves.

4. Narkanda : It is situated at a distance of 64 Kms. from Shimla on National Highway No. 22. It is about 2,900 metres above the mean sea level. This place is a very famous tourist centre. Nearby Hattu peak which is about 3,300 metres from the mean sea level is a panoramic picnic spot and a place for outing. The top of the peak commands joyful view of the eternal snow line of the Himalayas towards the north. The area around the peak is full of dense forests and number of wild life species are inhabited there. It has all the facilities required by the tourist like Circuit House, P.W.D. Rest House, Tourist Bungalow and refreshment shops. The place is also famous for winter sports of skiing.

5. Rampur : Rampur town is situated on the left bank of the Satluj at an elevation of about 800 metres from the sea level and is 132 Kms. from Shimla on National Highway No. 22. It serves the headquarters of the sub-division and tahsil of the same name. It is very old town surrounded by cliffs which confine the area and render the place very hot in summer. Rampur is a well-known trade centre. Lavi, the biggest trade fair in Himachal Pradesh is held here in the 2nd week of November every year which attracts thousands of people and traders from far off places. In the fair shawls, chaddar, raw wool, chilgoza, dry fruits and Ponies are sold by the traders of Kinnaur. There is also an ancient Tibetan temple with gigantic prayer wheel and a temple dedicated to Lord Shiva and Laxmi Narain. The palaces of the ex-ruler add to the beauty of the town. There is a College, High School, Hospital, Rest House, Post and Telegraph Office and Police Station in the town.

6. Sarahan : This place is about 45 Kms. north of Rampur and is about 2,400 metres high above the mean sea level. The village lies on the old Hindustan-Tibet road. Site of the village is fine being a beautiful wooded recess formed by the hills advancing round it in a semi circle behind while in front they slope down to the mighty Satluj. The place is famous for its historical temple of Bhimakali. The temple building is very remarkable. In ancient times human sacrifices used to be offered to Bhimakali. There is a rest house commanding a panoramic view of rolling fields and rising hills which adds to the beauty of this village. There is a Post Office, High School, Library and Dispensary in the village.

7. Rohru : It is about 130 Kms. from north of Shimla accessible by bus and serves the headquarters of the sub-division and tahsil of the same name. It has a Notified Area Committee and this town lies on the right bank of the Pabbar river. The river offers many fishing ponds. Chirgaon at a distance of about 16 Kms. from Rohru is famous for the breeding of Trout fish. Many sportsmen visit this place for angling. In Rohru apart from the government offices there is a Rest Houses, High School, Post and Telegraph Office and Police Station.

8. Kotgarh : This place is about 17 Kms. from Narkanda. Previously old Hindustan-Tibet road used to pass a little above the village. The village and its surroundings are famous for delicious varieties of apple and cherry orchards. The pioneer of apple, late Shri Satyanand Stokes is still remembered by the people. There is a Mission of Church Missionary Society. There is also a High School, a Hospital, Post and Telegraph Office and a Rest House in the village apart from a number of government offices.

9. Hatkoti : This place is about 115 Kms. on Shimla-Rohru road and is about 1,200 metres above the mean sea level. The Pabbar river flows at a distance of about 3 Kms. from this village. This village is famous for Durga temple which is very ancient. People from far off places come and pay their homage to the goddess. During Navratras there is a huge crowd in the village. The place commands a panoramic view of the surrounding high hills and dense forests.

Administrative Changes : In 1971 Census, Shimla district comprised of Shimla sub-tahsil and Kandaghat and Nalagarh tahsils. Shimla Municipal Corporation, Jutogh, Sabathu, Kasauli and Dagshai Cantonment Boards and Nalagarh Municipal Committee were the urban areas of the district.

On account of reorganisation of the districts on the 1st September, 1972, the erstwhile Mahasu district lost its entity and its major portion was merged with Shimla district. In other words, Seoni, Theog, Rampur, Rohru, Jubbal, Kotkhai and Chaupal tahsils and Kumharsain sub-tahsil of Mahasu district were merged with Shimla district whereas Arki and Solan tahsils of the Mahasu district and Kandaghat and Nalagarh tahsils of erstwhile Shimla district, constituted a new district viz. Solan. Also Kasumpti tahsil of the then Mahasu district was merged with old Shimla sub-tahsil of Shimla district thus upgrading it to tahsil level. After the enlargement of the present Shimla district, two new sub-tahsils viz. Nankhari from Rampur tahsil and Nerua from Chaupal tahsil were created. Apart from this a new town viz. Rohru Notified Area Committee was created after 1971 Census. Thus present Shimla district consists of 8 tahsils, 3 sub-tahsils and 6 towns.

District Census Handbook and its Scope : The District Census Handbook is the innovatoin of 1951 Census which brought down the census data to the town/village level. Until then, census presented data mostly upto the district/tahsil/sub-tahsil/town level only. This innovation, perhaps, was prompted by the realisation of the need of data at the grass-root level for data users, both for administrative, planning and academic studies.

The District Census Handbook innovation of 1951 continued undisturbed in 1961 presentation with a few additions to it. However, in 1971 it was further realised that the combination of the census and non-census data in a single publication as was the precedent from 1951 onwards became unwieldy and delayed the timely publication of the census results. Therefore, it was felt that the census data should be delinked from the non-census data and the publication should be brought out in two volumes. First volume, dealt with the village and town directory and also the village/townwise Primary Census Abstract of the district. The second volume dealt with the non-census data and social, economic and cultural tables.

In 1981 Census there has been a further slight innovation wherein the District Census Handbook consists of only one volume which contains village and town directory in Part A, and in Part B, village/townwise Primary Census Abstract of the concerned district.

The District Census Handbook of 1951 contained, apart from census data, the other general information about the district, like physical, socio-cultural and administrative aspects of the district which included both the census and the non-census data. In 1961 the scope of the District Census Handbook was sought to be made more comprehensive by including certain additional items and dividing the entire presentation into four parts. First part dealt about the land and the people. Second part contained census tables. Third part contained the information regarding agriculture, medical and health etc. Fourth part consisted village/town directory.

As already stated, the District Census Handbook underwent further innovation in 1971 Cenrus wherein it was split up into two volumes. First, dealing with the village and town directory and also town/villagewise Primary Census Abstract of the district. Second part dealt with non-census data and other socio-cultural and economic tables.

In 1981 Census, with a view to avoid delay in bringing out the publications and also to streamline the publication programme the second part of 1971 Census Handbook has been omitted. Thus, the present volume of the District Census Handbook will bring about the village/town directory in part A, and in Part B, town/villagewise Primary Census Abstract of the concerned district. Part A, Village Directory, will contain information about the name of the village, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communication, power supply, village market and the distance from the town etc. This part also contains information about socio-cultural aspects like food habits of the people, land use in the village, forests, irrigational resources, cultivable waste and the places of religious, historical and archaeological interest. Similarly the Town Directory contains seven statements, which would deal with area of the town, number of the households, population and rate of growth of the town during the last eight decades, density of population of the town, sex ratio, status of civic administration, its finances and other socio educational, cultural and developmental activities and the amenities that might have been undertaken or provided. As already stated Part B would contain the town/villagewise Primary Census Abstract which includes information/data about the total area of the village, occupied residential houses, total number of households, population and its sexwise break up, so also the break up of Scheduled Castes and Scheduled Tribes, literacy, and the break up of the population by sex into four broad industrial categories like cultivators, agricultural labourers, household industries and other workers. Apart from the aforesaid data, the Primary Census Abstract will contain data on the marginal workers and non-workers also.

It would be pertinent to mention here that the sources of information for the Town and the Village Directory have been mainly the revenue agency supplemented by the concerned departments like Education, Medical Co-operation and the Local Bodies. The information so collected from the various sources have been thoroughly scrutinized so as to ensure its authenticity.

Census Definitions and Concepts : In order to understand the precise import of the meaning of words used in the analysis of data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases used herein.

Urban Area : The census definition of an urban area is given as under:

(a) All places with a municipality, corporation, cantonment board or notified area committee etc.

(b) All other places which satisfy the following criteria ;

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of male working population engaged in non-agricultural pursuits ; and

(iii) a density of population of at least 400 persons per sq. km. (1,000 persons per sq. mile).

In the absence of the any of the aforesaid charateristic the place will be treated as rural.

Urban Agglomeration and Standard Urban area. : The Urban Agglomeration represents a continuous urban spread containing a town and its adjacent urban outgrowth or more physically contiguous town together with contiguous urban outgrowth which may actually fall within revenue limits of a village/villages. These 'urbanised' villages or outgrowths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread. The urban agglomeration represents a spatial urban spread at a given time. The Standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages whichare expected to get merged with it but also intervening rural areas which are potentially urban. This covers all extra municipal outgrowth such as suburb (industrial and residential), railway colonies civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991.

Like the urban agglomeration, the standard urban area is also an area unit which extends beyond the main city or town limit municipal or otherwise. However, unlike in the case of urban agglomeration which represents the actual urban spread at a given time the standard urban area is larger area unit which includes not merely urban areas lying in close proximity to all surroundings and intervening rural pockets which are likely to be urbanised by 1991 and those serve the role of constant statistical reporting unit for three censuses viz. 1971, 1981 and 1991 irrespective of the change in local administrative boundaries of the area unit within the standard urban area. In fact, the urban agglomeration involving a core town of population of 50,000 or above are submerged in the standard urban area involving with core town. The utility of this concept basically lies in the fact when the limits of existing town change, the standard urban area as such is not expected to undergo any change. As a consequence, the data generated by census for standard urban areas becomes more meaningful as it is comparable with different decades.

The characteristic features of a standard urban area is (i) it should have a core town of a minimum population of 50,000, (ii) contiguous area made of all other urban as well as of rural administrative unit should have close mutual socio-economic linkage with the core town and (iii) probability that the enitre area will get urbanised within a period of 2/3 decades.

Village : In Himachal Pradesh, as elsewhere, the smallest rural habitation is the village. It generally follows the limits of a revenue village i.e. recognised by the district administration. The revenue village need not necessarily be a single agglomeration of habitation. It may have one or more hamlets. But the revenue village has a definite surveyed boundary and each village is a separate administrative unit with separate village account.

In Himachal Pradesh following rural units are treated as revenue village or equivalent :

1.	Revenue village	In the districts of Chamba, Mandi Bilaspur, Shimla, Kinnaur, Sirmaur and Solan, Una excepting Bangana tahsil and Lahul & Spiti district (in respect of villages transferred from Pangi tahsil).
2.	"Tikka" having a distinct sub-hadbast number	Kangra and Hamirpur districts and Bangana tahsil of Una district.
3.	"Phatti" having a distinct sub-hadbast number	Kullu and Lahul & Spiti districts (except villages transferred from Pangi).

Census House : A Census House is a building or part of a building having separate entrance from the road or courtyard or staircases etc. used or recognised as a separate unit, it may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Houesehold : A household is a group of persons who commonly live together and would take their meals from the common kitchen unless exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are Boarding Houses, Messes, Hostels, Residential Hostels, Rescue Homes, Jails and Ashrams. These are called "Institutional households". There may be one member households, two member households or multi-member households. For census purposes, each one of these types is regarded as a 'Household'. The important link in finding out whether there is a household or not is a common kitchen.

Scheduled Castes and Scheduled Tribes : The Scheduled Castes and Scheduled Tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Articles 341 and 342 of the Constitution. The lists of the Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order,

1950. These lists have been modified or amended or supplemented from time to time. On the reorganisation of the states the Scheduled Castes and Scheduled Tribes (Modification) Order came into force from October, 1956. However, the first one affecting the Himachal Pradesh has been; the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976. The main purpose of this Amendment Act was to remove the area restrictions in respct of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the state, unlike in the 1956 Order where these were notified in relation to different regions of the state registering area restrictions.

In pursuance of the latest Presidential Order referred above, following castes have been treated as Scheduled Castes throughout the state :

1. Ad Dharmi
2. Badi, Nagalu
3. Balmiki, Bhangi, Chuhra, Chura, Chuhre
4. Bandhela
5. Bangali
6. Banjara
7. Bansi
8. Barad
9. Barar, Burar, Berar
10. Batwal
11. Bauria, Bawaria
12. Bazigar
13. Bhanjra, Bhanjre
14. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi
15. Chanal
16. Chhimbe, Dhobi
17. Dagi
18. Darain
19. Darai, Daryai
20. Daule, Daoli
21. Dhaki, Toori
22. Dhanak
23. Dhaogri, Dhuai
24. Dhogri, Dhangri, Siggi
25. Doom, Doomna, Dumna, Dumne, Mahasha
26. Gagra
27. Gandhila, Gandil, Gondola
28. Hali
29. Hesi
30. Jogi
31. Julaha, Julahe, Kabirpanthi, Keer
32. Kamoh., Dagoli
33. Karoack
34. Khatik
35. Kori, Koli
36. Lohar
37. Marija, Marecha
38. Mazhabi
39. Megh
40. Nat
41. Od
42. Pasi
43. Perna
44. Phrera, Pherera
45. Rehar, Rehara
46. Sanhai
47. Sanhal
48. Sansi, Bhedkut, Manesh
49. Sansoi
50. Sapela
51. Sarde, Sarera, Sarare, Saryare, Sarehde
52. Sikligar
53. Sipi
54. Sirkiband
55. Teli
56. Thathiar, Thethera

Similarly, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 as promulgated under the Presidential Order declares the following tribes as the Scheduled Tribes throughout the state :

1. Bhot, Bodh
2. Gaddi (excluding the territories specified in sub-section (1) of the Punjab Reorganisation Act, 1966 (31 of 1966), other than the Lahul & Spiti district).
3. Gujjar (excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966).
4. Jad, Lamba, Khampa
5. Kanaura, Kinnara
6. Lahaula
7. Pangwala
8. Swangla

Thus, from preceding para, it is clear that the tribes at serial Nos. 1, 4, 5, 6, 7 and 8 have been treated as Scheduled Tribes throughout the state of Himachal Pradesh wherever they live, whereas in case of Gaddi and Gujjar the area restrictions still persist as given in the preceding paragraph.

Literate : A person who can both read and write with understanding in any language is to be treated as literate. A person who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. Children upto the age of four years have been treated as illiterate irrespective of whether they attend the school or not.

Worker : Work is defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Worker : A person who has primarily worked for a major period of the year is a main worker. By major part of the year it is intended to find out that the person has worked for 183 days or more, or in other words worked for 6 months or more.

Marginal Worker : A person who has worked for less than six months or 183 days but worked atleast a day during the year before enumeration is considered as marginal worker.

Non-Worker : A person who has not worked at all during the preceding one year from the date of enumeration is a non-worker.

Cultivator : A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind or share. Cultivation includes supervision or direction of cultivation.

Agricultural Labourer : A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer. He or she has no risk in cultivation but he or she merely works in another person's land for wages. An agricultural labourer has no right to lease or control on land on which he/she works.

Household Industry : It is an industry which involves at least manufacturing, or processing or servicing, or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the house where the hpusehold lives in the urban area. The large proportion of the workers in a household industry should consist of members of the household including the head. The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act.

Other Workers : All workers i.e. those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers. The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all government servants, municipal employees etc. In fact, all those who work in field of economic activities other than cultivation, agricultural labour or household industry are other workers.

Employer : An employer is a person who has to employ other persons in order to get work performed i.e. such person is not responsible for his or her personal work but also for giving work to others for carrying out the economic activities.

Employees : An employee is a person who usually works under some other persons for salary or wages in cash or kind. There may be persons who are employed as Managers, Superintendents, Agents etc. and in that capacity employ or control other workers on behalf of their own employers, such persons are only employees and not employers.

Single Worker : A single worker is a person who works by himself/herself. He/she is not employed by anyone else and in his/her turn does not employ anybody else. This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of producers co-operative which one of the partner or members of said producers co-operative is a single worker.

Family Worker : A family worker is a member who works without receiving wages in cash or kind, in an industry, business, in a trade or service. For example, the working member in a family of Dhobi where they all work and each does not receive wages separately will be family worker. There may be family workers in industry, trade. Family worker must be related by ties of blood or marriage but such workers can belong to different households. Thus, what is important is that such workers must necessarily be related even though they may be living in different households. The family workers may or may not be entitled to share and the profit in he work or business carried on either by person or head of the household or the relative.

ANALYSIS OF THE DATA

Population : The following table gives the decennial variation in population since 1901 and also the growth rates for each decennium according to the present jurisdiction of Shimla district. It is discernible from the table that the population of the district has recorded an overall increase of 122.01 per cent during the last 80 years. Comparing to the state growth, it will be seen that the growth in population is almost equal to the state average of 122.93 per cent during the same period.

A decennial analysis of the growth of population indicates that it showed a positive growth in each decade except during 1901—11 when the population decreased by 6,443 persons or 2.80 per cent. The decline in population during 1901—11 in the district was in conformity with the trend obtained in respect of other areas of the state as well as many parts of the country. The main reason for this declining trend can be attributed to the occurrence of famines and various diseases. The growth rate observed during 1911 to 1941 was modest one. The growth of population noticed in the 30 years was as low as 16.07 per cent as against 78.58 per cent in the latter 30 years i.e. 1951—81. Since 1931 there has been a persistent increase in the decennial growth rates when it touched the maximum of 22.96 per cent during 1961—71. However, the growth rate recorded during 1951—61 was more ro less double than the corresponding rate during 1941—51. In other words it increased from 10.19 per cent in 1951 to 19.35 per cent in 1961. The growth rate took a mild dip during the decade 1971—81 and comes to 21.70 per cnet against 23·71 for the state as a whole. In rerms of growth rate the district ranks 8th in the state. The phenomenal growth in population especially during the last three decades is probably due to the improvement in public health services and hygenic conciousness amongst the people which has resulted in decline of mortality rate.

Decadal variation in population since 1901

Year	Persons	Males	Females	Decade variation	Percentage decadal variation
1	2	3	4	5	6
1901	230,144	124,215	105,929	..	..
1911	223,701	118,953	104,748	—6,443	—2·80
1921	228,138	123,854	104,284	+4,437	+1·98
1931	238,280	126,374	111,906	+10,142	+4·45
1941	259,656	139,095	120,561	+21,376	+8·97
1951	286,111	152,608	133,503	+26,455	+10·19
1961	341,461	184,413	157,048	+55,350	+19·35
1971	419,844	224,631	195,213	+78,383	+22·96
1981	510,932	272,126	238,806	+91,088	+21·70

The table given below depicts the changes in the proportion of number of females per 1,000 males for each census since 1901.

Sex ratio since 1901

Year	Females per 1,000 males
1	2
1901	853
1911	881
1921	842
1931	886
1941	867
1951	875
1961	852
1971	869
1981	878

The number of females per 1,000 males in the district was the highest in 1931 (886). However, in the preceding decade i.e. 1921 the sex ratio was the lowest (842). The sex ratio obtained in the district at various decades appears to be pretty erratic. If the data is shown horizontally on the graph it will give the shape of Kinky curve. According to 1981 Census the number of females per 1,000 males in the district is 878 as compared to the state avearge of 973. Among the districts, it ranks third from bottom. The other two districts showing a pancity of females are Sirmaur and Lahul & Spiti where the sex ratio is as low as 873 and 767 respectively. The number of females outnumber males in ouly four districts namely ; Hamirpur (1,149), Una (1,028), Kangra (1,016) and Bilaspur (1,002).

Table 1 gives the sexwise population classified into total, rural and urban areas separately for each tahsil/sub-tahsil and the district. In addition, the tahsil/sub-tahsilwise the number of total and inhabited villages and the number of towns has also been incorporated. As per 1981 Census, the population of the district comes to 510,932 persons—272,126 males and 238,806 females. The district shares 11.94 per cent of the total population of the state and is the third biggest in the state while in area it has been relegated to the sixth position. It comprises of 2,409 villages of which 2,225 are inhabited or in other words 92.36 per cent of the total villages have been reported as populated. Parali village in Kumharsain sub-tahsil is the biggest village in the district with a population of 2,160 persons. The urban population of the district is 80,177 which works out to 15.69 per cent of the total population of the district. While Himachal Pradesh is one of the least urbanised state in India with only 7.61 per cent of urban population. The district is the most urbanised in the state.

TABLE 1

Population, number of Villages and towns; 1981

Sl. No.	Name of Tahsil/ Sub-tahsil	Population									No. of villages		
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	Inhabi-ted	No. of towns

5	Rampur	45,960	24,272	21,688	42,650	22,177	20,473	3,310	2,095	1,215	119	119	1
6	Nankhari	19,443	9,746	9,697	19,443	9,746	9,697	..	..	..	60	60	..
7	Rohru	75,558	39,295	36,263	73,223	37,854	35,369	2,335	1,441	894	169	169	1
8	Jubbal	27,383	14,323	13,060	27,383	14,323	13,060	..	..	..	98	89	..
9	Kotkhai	28,583	14,785	13,798	28,583	14,785	13,798	..	..	..	191	172	..
10	Chaupal	21,476	11,447	10,029	21,476	11,447	10,029	..	..	..	129	123	..
11	Nerua	33,934	18,457	15,477	33,934	18,457	15,477	..	..	..	198	177	..
	Total	**510,932**	**272,126**	**238,806**	**430,755**	**224,034**	**206,721**	**80,177**	**48,092**	**32,085**	**2,409**	**2,225**	**6**

The district is comprised of 8 tahsils and 3 sub-tahsils. Among the tahsils/sub-tahsils Shimla tahsil accommodates 27.18 per cent of the total population of the district. Next to Shimla, Rohru and Theog tahsils are the most populous tahsils sharing 14.79 and 11.18 per cent of the total population of the district. The remaining 8 tahsils/sub-tahsils taken together account for 46.85 per cent of the total population. In terms of population Nankhari, Chaupal and Seoni occupy the first, second and third place from the bottom. Together, they constitute 13.29 per cent of the district's population.

Barring Shimla; Theog, Rampur and Rohru tahsils the remaining tahsils/sub-tahsils in the district are entirely rural. Of the 6 towns in the district, three fall in Shimla and one each in Rampur, Rohru and Theog tahsils. In the matter of urban population to total population Shimla tahsil is the highly urbanised both in terms of absolute number and percentage. 73,004 town dwellers form 52.56 per cent of the total population of the tahsil. This percentage is also the highest amongst the 73 tahsils/sub-tahsils in the state. The share of urban population to total population in Rampur, Rohru and Thoeg tahsils is 7.20 per cent, 3.09 per cent and 2.67 per cent, respectively.

Rohru tahsil is the biggest in terms of rural population and occupies sixth position with regard to the number of inhabited villages. Taking the inhabited villages into consideration, Shimla tahsil is at the top with 566 villages, but ranks second in terms of rural population. Theog tahsil with 392 inhabited villages occupies second position followed by Seoni (202), Nerua (177) and Kotkhai (172).

Table 2 given hereunder shows district, tahsil and sub-tahsil wise comparative picture of 1971 and 1981 population with rural and urban break up separately.

TABLE 2

Decadal change in distribution of population

Sl. No.	Name of Tahsil/Sub-tahsil	Population						Percentage decadal (1971—81) variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Note : Recast population of 1971 in respect of urban area of Rohru tahsil is not available in view of the reason that Rohru and Gangtoli villages have been partially merged in Rohru urban area.

It will be seen that the population of the district increased from 419,844 in 1971 to 510,932 in 1981, thus registering a growth of 21.70 per cent. This means an average increase of 2.17 per cent per annum, which when compared to the state's growth is lower by 0.20 per cent per annum. It is interesting to note that while rural segment of population increased by 20.13 per cent during the decade, the population of urban areas has gone up by 30.85 per cent. This higher growth rate in urban areas as compared to the rural areas is obviously for the reason that there is a continuous migration of population from villages to towns, the later having more opportunities of gainful employment, better educational and medical facilities, civic amenities etc. Besides, this higher increase is the inclusion of Rohru as town for the first time in 1981 Census. This factor contributed 3.81 per cent towards total growth rate of population of the urban areas of the district.

The trend of growth in population is marked with wide variation among the tahsils and sub-tahsils. The highest increase has been recorded in Shimla tahsil where the growth rate is 29.88 per cent followed by Jubbal with 25.28 per cent and lowest growth rate of 13.12 per cent has been observed in Rampur tahsil. In other tahsils/sub-tahsils it varies between 15.42 per cent in Kumharsain sub-tahsil and 21.23 in Seoni tahsil. Of the 11 tahsils/sub-tahsils in the district only 2 tahsils viz., Shimla and Jubbal have the growth rate higher than the district average. The reason for highest growth rate in Shimla tahsil is obvious. It has only trinity of towns, also have the maximum number of inhabited villages. Moreover, Shimla which is the most populous town in the state is also the capital of Himachal Pradesh in addition to having various Central Government Offices. It has also influenced to a great extent the adjoining areas. Rural as well as urban areas contiguous to bigger towns which have also mutual socio-economic linkages have more developmental propensities to grow. The growing importance of Shimla town due to its developmental, commercial and tourist importance is also symptomatic of the growth of this tahsil.

Shimla rural has registered the maximum growth of 32.80 per cent which is even higher than the decadal growth of population of 27.36 per cent together noticed in Shimla, Jutogh and Dhalli urban areas of this tahsil. In rural areas of other tahsils/sub-tahsils the growth rate varies from 12.21 per cent in Rampur tahsil to 25.28 per cent in Jubbal tahsil. Four of these tahsils/sub-tahsils viz. Seoni, Theog, Nankhari and Jubbal has registered growth rates more than 20 per cent. The remaing 6 tahsils/sub-tahsils fall in the growth rate of less than 20 per cent. The growth of urban population (26.19 per cent) in Rampur tahsil is higher than the rural growth rate of 12.21 per cent. Contrary to this, Theog tahsil has registered a growth rate of 21.13 per cent which is higher than the growth in urban population (15.06 per cent).

The distribution of villages in different population ranges in the district is given in the following table:

TABLE 3

Distribution of villages by population ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	1,515	68·09
200—499	539	24·22
500—1,999	168	7·55
2,000—4,999	3	0·14
5,000—9,999	..	..
10,000+	..	..
Total	**2,225**	**100·00**

There are 2,409 villages at the 1981 Census in Shimla district. Of these, 184 are uninhabited and 2,225 inhabited. A study of the above table reveals that the villages having population less than 200 account for 1,515 claiming a little over 68 per cent of the total number of inhabited villages. Again, population range of 200---499 person comprising 539 villages accounts for 24.22 per cent of the total number of inhabited villages. Thus, the villages in these two lowest ranges put together (less than 500) claim as much as 92.31 per cent of the total number of inhabited villages in the district. It is curious that only 7.55 per cent is accounted for by villages in the population range of 500—1,999 and the remaining 3 villages or 0.14 per cent of the total number of inhabited villages fall in the population range of 2,000—4,999 persons. The three biggest villages in the district in terms of population are Parali (2,160 persons) in Kumharsain sub-tahsil, Khattasu (2,047 persons) in Jubbal and Kwar (2,003 persons) in Rohru tahsils. The average size of an inhabited village in the district is 194 persons. It is observed that the entire district is largely studded with diminutive villages.

TABLE 4

Distribution of villages by density

Range of density (per sq. Km.)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
Less then—10	47	2·11
11—20	25	1·12
21—50	105	4·72
51—100	338	15·19
101—200	856	38·47
201—300	390	17·53
301—500	353	15·87
500+	106	4·76
Not known	5	0·23
Total	**2,225**	**100·00**

Table 4 shows the distribution of villages by density of population by various ranges. There is certainly much difference in the number of villages between various density ranges in the district. Maximum number i.e., 856 or 38.47 per cent villages in the district fall in the density range of 101—200 persons, distantly followed by the density range of 201—300 persons per sq. km. which claims 390 villages or 17.53 per cent of the total number of villages. Next to it are 353 villages constituting 15.87 per cent of the total villages in the density range of 301—500. Slightly lower than this range is accounted for by density range of 51—100 persons per sq. km. The number of villages in this density range is 338 which constitutes 15.19 per cent of the total number of villages. Thus, it can be concluded that there is a predominance of villages, which fall under the average or higher density ranges. As many as 87. 06 per cent of villages are within the density range of 51—500 persons per sq. km. of area. Only 7.95 per cent of the villages in the district are claimed by the lower density ranges of 50 or less persons per sq. km. The number of villages in the highest density range of more than 500 persons is 106 which account for 4.76 per cent of the total villages. There are 5 inhabited villages in the district for which area figures are not

available and therefore, the density of population per sq. km. in respect of these villages is not available.

In Table 5 the distribution of villages and their percentage according to the proportion of Scheduled Castes population to total population are given under eight ranges. The villages having no Scheduled Castes population are also shown separately.

TABLE 5

Proportion of Scheduled Castes population to total population in the villages

Percentage range of Scheduled Caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil*	397	17·84
Less than 5	141	6·34
6—10	168	7·55
11—15	181	8·13
16—20	192	8·63
21—30	345	15·51
31—50	444	19·95
51—75	238	10·70
76+	119	5·35
Total	**2,225**	**100·00**

*Indicate number of Villages having no Scheduled Castes population.

Scheduled Castes population constitutes a proportion of 28.72 per cent to total population in the rural areas of the district against 26.76 per cent in the district as a whole. Of the 2,225 inhabited villages in the district, 397 or 17.84 per cent villages have no scheduled castes population and in another 141 (6.34 per cent) villages this porportion is not more than 5 per cent. Maximum number of villages (444) fall in the percentage range of 31—50 of the scheduled castes population followed by 345 villages in percentage range of 21—30 and 238 villages in percentage range of 51—75. The villages having more than 75 per cent of scheduled castes population are numbered 119 in the district which form 5.35 per cent of the total villages. In 541 or 24.31 per cent of the villages the proportion of scheduled castes population varies between 6 to 20 per cent.

Table 5-A gives the proportion of Scheduled Castes population during the last three Censuses in the district in relation to the state.

TABLE 5-A

Proportion of Scheduled Castes population to total population during the last 3 Censuses in Himachal Pradesh and Shimla district

Year	Himachal Pradesh			Shimla District		
	Total population	Scheduled Castes population	Proportion of Scheduled Castes population to total population	Total population	Scheduled Castes population	Proportion of Scheduled Castes population to total population
1	2	3	4	5	6	7
1961	2,812,463	643,851	22·89	341,461	N.A.	N.A.
1971	3,460,434	769,572	22·24	419,844	112,767	26·86
1981	4,280,818	1,053,958	24·62	510,932	136,738	26·76

Note : Recast Scheduled Castes population of 1961 for Shimla district is not available.

Total Scheduled Castes population in the district according to 1981 Census is 136,738 consisting of 71,089 males and 65,649 females. The proportion of Scheduled Castes population to total population has declined by 0.10 per cent during the decade 1971—81 from 26.86 to 26.76 per cent. Comparing this data with the state as a whole it will be seen that the Scheduled Castes population in the state has registered an increase of 2.38 per cent during the decade 1971—81 from 22.24 to 24.62 per cent. Decade 1961—71 also witnessed decrease of 0.65 per cent in the proportion of Scheduled Castes population. It has been observed that the percentage of Scheduled Castes population to total population obtaining in the district is higher as compared to the state at 1971 and 1981 Censuses.

The proportion of Scheduled Tribes population to total population in the villages of Shimla district is depicted in the table given below:

TABLE 6

Proportion of Scheduled Tribes population to total population in the villages

Percentage range of Scheduled Tribes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil*	2,042	91·78
—5	120	5·39
6—15	36	1·62
16—25	10	0·45
26—35	9	0·41
36—50	3	0·13
51—75	2	0·09
76 +	3	0·13
Total	**2,225**	**100·00**

*Indicate number of villages having no Scheduled Tribes population.

The proportion of Scheduled Tribes population in the district is as low as 0.72 per cent of the total population. The Scheduled Tribes population of the state is mainly concentrated in the Lahul & Spiti and Kinnaur districts and Pangi and Brahmaur tahsils of Chamba and parts of Kullu district. The Scheduled Tribes population returned from the district mainly constitute the persons belonging to these tribes who are in state & Central Govt. services and migratory population.

Overwhelming number of 2,042 villages or 91.78 per cent of the inhabited villages in the district have no Scheduled Tribes population. Scheduled Tribes population constitute a proportion of 5 per cent or less in another 120 villages. The number of villages is 36 in the range of 6—15 per cent, 10 in 16—25 per cent and 9 in 26—35 per cent. Thus, in only 8 villages of the district the percentage of Scheduled Tribes population to total population is 36 per cent and above. Kiari village with a population of 9 persons and village Jangal Dhati having houseless population of 12 persons in Seoni tahsil have 100 per cent Scheduled Tribes population.

TABLE 6-A

Proportion of Scheduled Tribes population to total population during the last 3 Censuses in Himachal Pradesh and Shimla District

Year	Himachal Pradesh			Shimla District		
	Total population	Scheduled Tribes population	Proportion of Scheduled Tribes population to total population	Total population	Scheduled Tribes population	Proportion of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1961	2,812,463	122,326	4·35	341,461	N.A.	N.A.
1971	3,460,434	141,610	4·09	419,844	2,546	0·61
1981	4,280,818	197,263	4·61	510,932	3,672	0·72

Note : Recast Scheduled Tribes population of 1961 for Shimla district is not available.

Table 6A deals with the proportion of Scheduled Tribes population to total population during the last three censuses in the district in relation to the state. The proportion of Scheduled Tribes population in the state in 1971 was 4.09 per cent whereas in Shimla district it was 0.61 per cent. During the decade 1971---81, there was net accretion of 0.52 per cent of Scheduled Tribes population in the state and 0.11 per cent in the district. The absolute figures of Scheduled Tribes population in the state and district according to 1981 Census being 197,263 and 3,672 respectively.

The population of Scheduled Castes and Scheduled Tribes in the urban areas of the district as well as in the individual towns is given in table 7. Data have been presented both in terms of absolute figures and in terms of percentages to total population.

TABLE 7

Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled tribes population to total population
1	2	3	4	5	6
1 Dhalli (N.A.C.)	1,004	205	1	20·42	0·10
2 Jutogh (C.B.)	1,396	369	6	26·43	0·43
3 Rampur (M.C.)	3,310	683	152	20·63	4·59
4 Rohru (N.A.C.)	2,335	462	48	19·79	2·06
5 Shimla (M. Corp.)	70,604	11,032	416	15·63	0·59
6 Theog (M.C.)	1,528	268	2	17·54	0·13
All Towns	**80,177**	**13,019**	**625**	**16·24**	**0·78**

The percentage of Scheduled Castes population in all the towns of the district is lower than the corresponding figure (26.76 per cent) of district as a whole. The Scheduled Castes in the urban areas of Shimla district form 16.24 per cent of the total urban population. However, among the individual towns the first three places are held by Jutogh (26.43 per cent), Rampur (20.63 per cent) and Dhalli (20.42 per cent), Rohru and Theog are the other two towns where percentage of Scheduled Castes population to the total population is higher than the district figure of 16.24. Shimla town is at the bottom with a percentage of 15.63.

The proportions of Scheduled Tribes population to total population in the towns of Rampur and Rohru are more than the district proportion of 0.72 per cent. All the rest have less than that of the district figure. Rampur and Rohru towns which lie on the tribal belt have attracted comparatively large number of Scheduled Tribes for employment. Out of a total urban population of 80,177, there are 625 Scheduled Tribes which are just 0.78 per cent of the urban population. Rampur town has the highest percentage (4.59) of Scheduled Tribes population followed by Rohru (2.06 per cent). In the remaining four towns the percentage is less than the district figure of 0.78 and varies between 0.10 per cent in Dhalli to 0.59 in Shimla town.

The following table indicates the literacy rate in the villages, which have been arranged in the ascending order of their population in six broad ranges.

TABLE 8

Literacy rate by population ranges of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
Less than 200	1,515	38·55
200—499	539	34·68
500—1,999	168	39·02
2,000—4,999	3	34·85
5,000—9,999	..	..
10,000+	..	..
Total	2,225	37.16

As per 1981 Census, the literacy rate in the rural areas of the district comes to 37.16 per cent against 40.42 per cent in the rural areas and 42.48 per cent in the state as a whole. The literacy rate in the villages put together in the district for males comes to 49.54 per cent and only 23.74 per cent for females.

The analysis of the data presented in the table seeks to explain that no district relationship emerge between size-class of villages and literacy rates. As mentioned in the preceding paragraphs, there is no village in the district having a population of 5,000 or more and 168 villages of the population range of 500—1,999 put together have literacy rate of 39.02 per cent. The maximum number of villages (1,515) in the population range of less than 200 persons, together have a literacy rate of 38.55 per cent. Another 539 villages in the population range 200—499 have a literacy percentage of 34.68. The remaining 3 villages having a population range of 2,000 —4,999 have registered a literacy percentage of 34.85. The population ranges of 200—499 and 2,000—4,999 have literacy rates lower than the average literacy in rural areas of the district.

The district during the decade 1971-81 has made a considerable stride in the field of literacy. It is revealed by table 8-A given hereunder that on the whole, literacy rate in Shimla district has increased from 33.49 per cent in 1971 to 42.74 per cent in 1981. The literacy among males increased from 44.70 per cent in 1971 to 54.37 per cent in 1981. The corresponding figures for females are 20.59 and 29.48 per cent respectively.

TABLE 8-A

Proportion of literates to total population by sex since 1971

	Proportion of literates		
	Total	Males	Females
1	2	3	4
1971	33·49	44·70	20·59
1981	42·74	54·37	29·48

Table 9 given hereunder indicates the literacy rates for the towns in Shimla district.

TABLE 9

Literacy rates for Towns

Name of town	Literacy rate
1	2
1 Dhalli (N.A.C.)	68·92
2 Jutogh (C.B.)	65·54
3 Rampur (M.C.)	72·66
4 Rohru (N.A.C.)	60·26
5 Shimla (M. Corp.)	73·34
6 Theog (M.C.)	71·01
All Towns	**72·70**

Out of the total urban population of 80,177 in Shimla district, 58,288 town dwellers are literates. The literacy rate comes to 72.70 per cent as against 68.60 per cent in 1971 Census. Town-wise Shimla with a literacy rate of 73.34 per cent ranks first closely followed by Rampur, Theog and Dhalli with 72.66 per cent 71.01 and 68.92 per cent. respectively. Rohru town with a literacy of 60.26 per cent is at the lowest rung of the ladder in the district and Jutogh with 65.54 per cent is the second lowest. The literacy percentages of these two towns is less than the state average.

Table 10, which is one of the most important table generated on the basis of the data incorporated in the Primary Census Abstract, gives sex-wise population, percentage of Scheduled Castes, Scheduled Tribes Population, literates, main workers. marginal workers, total workers and non-workers for each tahsil/sub-tahsil and the district.

TABLE

As already stated in the preceding paragraphs th total population of Shimla district on the sunrise of 1st March, 1981 comes to 510,932 comprising 272,126 males and 238,806 females. Scheduled Castes constitute 26.76 per cent of the total population. Their percentage is 28.72 in the rural areas and 16.24 in the urban areas. In terms of percentages they have the maximum concentration in Rampur tahsil (34.42 per cent) followed by Kumharsain (29.42 per cent), Rohru (28.57 per cent) and Nerua (28.53 per cent). Apart from these tahsils/sub-tahsils the proportion of Scheduled Castes population is higher as compared to district figure in Theog (27.38 per cent) and Nankhari (27.66 per cent). The remaining 5 tahsils/sub-tahisls viz. Seoni, Shimla, Jubbal, Kotkhai and Chaupal have proportions less than that of the district. The lowest percentage is in Kotkhai where Scheduled Castes population forms 22.25 per cent of the total population.

Scheduled Tribes account for 0.72 per cent of the total population in Shimla district. Their proportion in urban areas is 0.78 per cent and 0.71 per cent in the rural areas. Rampur tahsil has the maximum proportion of 3.22 per cent—3.12 per cent in rural areas and 4.59 per cent in urban areas. Of the remaining 10 tahsils/sub-tahsils, their proportion is less than one per cent of the total population except Nerua where this proportion is more than one per cent.

In Shimla district 218,354 persons have been counted as literates during 1981 Census which forms 42.74 per cent of the total population. The male and female break up being 54.37 per cent and 29.48 per cent respectively. In urban areas the literacy rate is 72.70 per cent while in rural areas it is 37.16 per cent. Considering the tahsils and sub-tahsils, Shimla tahsil with literacy percentage of 61.61 is at the top followed by Kumharsain sub-tahsil where the literacy rate is 50.72 per cent. The other tahsils having higher proportion than the district are Kotkhai (46.37 per cent) and Seoni (43.06 per cent). In the remaining 7 tahsils/sub-tahsils the literacy rate varies from 19.59 per cent in Nerua to 40.14 per cent in Theog. It is significant to note that literacy percentage is more than 70 per cent in all the urban areas of the tahsils except Rohru where this percentage is 60.26.

Looking at the economic characteristics of the population in the district it will be seen that more than 50 per cent of the population is engaged in various economically productive activities. A worker who remained active in any economically productive work for the major part of the last year prior to the date of enumeration was treated as 'main worker'. But a person whose participation in any economically productive work was less than 6 months or 183 days was considered as 'marginal worker'. Of the 51.60 per cent of the total workers, 46.41 per cent are main-workers and barely 5.19 per cent fall in the category of marginal workers. When the percentage of total workers in the district is compared with tahsils and sub-tahsils we find that work participation rates are higher than the district average in Rampur, Nankhari, Rohru, Jubbal, Kotkhai, Chaupal and Nerua and in the remaining 4 tahsils/sub-tahsils viz. Seoni, Shimla, Theog and Kumharsain, it is less than the district average. As many as 61.85 per cent of the population in Nerua and 59.17 per cent in Chaupal followed by 58.21 per cent in Rohru have been treated as workers. When we consider the ratio among males alone, we find that the highest rate is again claimed by Nerua (64.21 per cent) followed by Chaupal (63.77 per cent) and Rohru (60.44 per cent). Shimla tahsil occupies the fourth place in the district where 60.17 per cent of the males fall under the category of main workers but this tahsil is at the lowest rung of the ladder if the males and females figures are put together.

Main workers constitute more than 50 per cent of the total population in Nerua, Rohru, Chaupal and Rampur. The tahsil at the lowest end of the scale is Seoni (32.81 per cent). The proportion is more than 40 per cent but less than 50 per cent in the remaining 6 tahsils and sub-tahsils. Among females the proportion is generally low. The district percentage of female main workers is 34.70. Three tahsils/sub-tahsils viz. Rampur Nakhari and Chaupal have ratios more than 40 per cent while in two tahsils/sub-tahsils viz. Rohru and Nerua the percentage of female main workers is more than 50 per cent. There are two other tahsils viz. Jubbal and Kotkhai where the percentage of female main workers is above the district figure of 34.70 per cent. In Shimla tahsil the proportion of main workers among females comes to only 17.99 per cent. The highest proportion of marginal workers has been observed in Seoni tahsil where they constitute 14.44 per cent of the total population. Their proportion is as low as 2.45 per cent in Nankhari sub-tahsil. The proportion of marginal workers among females is 8.41 per cent for the district as a whole. Tahsil-wise, female marginal workers are the highest in Seoni (24.52 per cent) distantly followed by Kotkhai (12.34 per cent) and Chaupal (11.89 per cent). It is significant to note that while proportion of marginal workers in the rural areas of the district as a whole is of the order of 5.99 per cent but they constitute less than one per cent in the urban areas. Women, children and other non-workers in rural areas work in the fields in the sowing, harvesting or in other seasons in their own land or as labourers on other's land. Such persons who are primarily non-workers but help in augmenting family income but not as a full time worker are categorised as marginal workers.

In Shimla district as a whole, 247,303 persons forming 48.40 per cent of the total population of 510,932 have been classified as non-workers. Their proportion is 40.96 per cent among males whereas females constitute 56.89 per cent of the total female population. Comparing the distribution of non-workers in the rural and urban areas of the district as a whole, it is interesting to note that the extent of non-workers is more in urban areas as compared to the rural areas. In urban areas non-working population constitute 57.69 per cent of the total urban population while in rural areas their percentage is 11.02 per cent lower than the urban areas. Being predominantly agricultural track the females in rural areas are generally engaged in agriculture and allied work and help the menfolk in their economic activities over and above their household duties. The females participation in such activities has been considered as their marginal work. Therefore, the decline in the number of female non-workers in the rural areas has been quite sharp. This factor has also affected the overall percentage of non-workers in the rural areas. It is evident that female non-workers in the rural areas of the district

account for only 52.27 per cent as against 86.64 per ent in the urban areas.

Tables 11 and 12 deal with the distribution of villages according to the availability of different amenities and proportion of rural population served by these amenities.

Shimla district has 2,225 inhabited villages, and of these, 843 villages (37.89 per cent) with 61.97 per cent of the total rural population are served by the educational facility of one type or the other. Similarly, 197 villages covering a population of 21.24 per cent enjoy the medical facilities of one type or the other. All the villages have drinking water facility of one type or the other. Post and Telegraph facility is available in 18.47 per cent villages or in other words 35.63 per cent of the total rural population are having this facility.

478 villages or 21.48 per cent of the total inhabited villages in the district covering a population of 32.29 per cent (139,100 persons) are served by the communication facilities. 347 villages with 20.76 per cent of the total rural population are linked by pucca roads. As many as 1,846 villages in the district covering the total rural population of 86.88 per cent are electrified.

Tahsilwise, only 61 villages of the 202 inhabited villages in Seoni tahsil have educational facility in the village itself. The proportion of rural population served by this amenity is 46.65 per cent. 18 villages or 8.91 per cent of the total inhabited villages covering 16.61 per cent of the total population have medical facility of one type or the other. While drinking water facility is available in all the villages, the post and telegraph facility is available to 20.36 per cent of the total population spread over in 23 villages. 10.89 per cent villages with 16.32 per cent of the total population of this tahsil enjoy the communication facilities. Only 40 villages have approach by pucca roads. As regards power supply, 81.68 per cent of the inhabitted villages covering 87.31 per cent of the total population are having this amenity.

In Shimla tahsil, of the 566 inhabited villages, only 125 villages constituting 22.08 per cent of the total inhabited villages covering a population of 41.31 per cent are covered by the educational facilities of one type or the other. Similarly medical facilities are available to only 14.25 per cent of the total rural population in 27 villages. The post and telegraph and communication facilities are available

in 11.48 per cent and 15.02 per cent of the total villages respectively. The percentage share of population covered by these amenities is 26.50 and 27.40 per cent, respectively. While 103 villages (18.20 per cent) are linked by pucca roads, the power supply is available in 439 or 77.56 per cent of the villages covering a rural population of 86:41 per cent.

Theog tahsil has in all 392 inhabited villages. Of these, 128 or 32.65 per cent villages with a population of 49.16 per cent have the educational facilities. Only 17 villages covering a population of 8.90 percent have medical facilities. Post and telegraph facility is available to 16.98 per cent of the total rural population in 42 villages. Further, in the matter of communication, 17.60 per cent of the villages having a population of 12,035 (21.64 per cent) are linked by bus service. 43 villages in the tahsil are approachable by pucca roads. 94.36 per cent of the population living in 357 villages have the facility of power supply.

Kumharsain sub-tahsil comprises of 156 inhabited villages. Of these, 71 villages are covered by the educational institutions one type or the other and 21 villages have medical facilities. The percentage of population enjoying these facilities form 66.95 per cent and 29.75 per cent of the total population respectively. While 43 villages have the facility of post and telegraph, the number of villages having bus service stood at 60. Only 56 villages covering a population of 53.48 per cent have been linked by pucca roads. As many as 152 villages or 97.44 per cent of the total villages covering a population of 99.71 per cent have the electricity facilities which is the second highest among the tahsils of the district.

In Rampur tahsil which has 119 inhabited villages as many as 79 or 66.39 per cent covering 75.36 per cent of the population have been provided with the educational facilities. But the villages enjoying medical facilities are 15.97 per cent. Likewise the proportion of population served by this amenity is just 25.16 per cent. As for post and telegraph, 35 villages or 29.41 per cent covering a population of 42.57 per cent have this facility. 46.25 per cent of population in 47 villages have the facility of bus service. The number of villages connected by pucca roads in the tahsil stood at 29. There are 103 villages covering a population of 90.71 per cent having the facility of electricity.

Nankhari sub-tahsil has 60 inhabited villages of which 40 are enjoying the facilities of education and only 16 have the medical facilities. The percentage of population served by these amenities is 79.37 and 37.07, respectively. 15 villages with the population of 7,897 have got post and telegraph facilities. Communication facility is available to 25 villages having population of 48.64 per cent. Only 3 villages in the sub-tahsil have approach by pucca roads and lastly 47 villages covering a population of 81.76 per cent have got electricity supply.

There are 169 inhabited villages in Rohru tahsil, of which 120 are having educational facilities covering 81.92 per cent of the rural population. Medical facilities are available to only 25.97 per cent of the rural population living in 25 villages. The facility of post and telegraph is available to 39.02 per cent of the population living in 43 villages. Another 38 villages covering a population of 24.51 per cent have the communication links through bus services. 15 villages or 8.88 per cent of the total villages have access by pucca roads. The number of electrified villages in the tahsil stood at 119 or 70.41 per cent of the total number of villages covering population of 74.69 per cent.

In Jubbal tahsil 48 villages out of the total number of 89 inhabited villages have the educational facilities whereas 13 villages are having medical facilities. The proportion of population drawing advantage of these facilities in villages itself is 75.86 and 31.48 per cent, respectively. Post and telegraph facility is available to 59.93 per cent of the population living in 40 villages. Bus service facilities are available in 31 villages, covering a tahsil population of 50.26 per cent. Only 20 villages have approach by pucca roads. The villages electrified in the tahsil are 83 constituting 93.26 per cent of the total villages with 99.16 per cent of population.

Kotkhai tahsil comprises of 172 inhabited villages. Of these, 70 have the educational facilities and 15 medical facilities. The percentage of population served by these amenities is 65.01 and 27.00 per cent, respectively. Post and telegraph facility is available in 56 villages benefiting 52.45 per cent of the total population of the tahsil. Transport service communication facilities are available in 58 villages. Only 36 villages in the tahsil have approach by pucca roads. All the 172 villages are electrified.

In Chaupal 36 of the 123 inhabited villages have the educational institutions of one type or the other covering 51.09 per cent of the total population and only 11 villages covering a population of 17.67 percent have medical facilities. Post and telegraph services are available to 34.31 per cent population living in 22 villages. 26 villages or 21.14 per cent of the total villages have been linked with road communication but only two villages has so far been linked with pucca roads. 95 villages or 77.24 per cent covering a population of 81.95 per cent have been electrified.

In Nerua sub-tahsil, 65 villages or 36.72 per cent of the total villages covering 53.33 per cent of the total population have educational facilities of one type or the other. As against this medical facilities are available in 15 villages having 14.71 per cent of the total population. Regarding post and telegraph service 15.25 per cent of the villages covering a population of 26.16 per cent have got the aforesaid facilities, Only 17 villages are enjoying bus service but none. of the villages have been linked by pucca roads. The proportion of electirfied villages is the lowest (64.41 per cent) in the sub-tahsil as compared to other tahsils/sub-gtahsils in the district and only 68.39 per cent of the total population is benefitted by this facility.

Table 13 deals with the distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

TABLE 13

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of Villages where the amenity is not available and available at the distance of			
	—5Kms.	5—10Kms.	10+Kms.	Total (Cols. 2—4)
1	2	3	4	5
Education	1,333	47	2	1,382
Medical	1,405	472	151	2,028
Drinking Water	..	..	..	..
Post and Telegraph	1,532	243	39	1,814
Market/Hat	..	..	..	..
Communication	1,170	424	153	1,747

In all there are 1,382 inhabited villages in the district which have no educational facilities. An overwhelming number of 1,333 villages or more than 62 per cent do not have any type of educational institutions but avail this amenity in the schools located in the nearby places within a distance range of less than 5 Kms. The school going children of 47 villages in the district have to cover a distance of 5 to 10 Kms. even for primary education. There are still 2 villages in the district from where the people have to cover more than 10 Kms. to avail this facility.

The various medical, public health, family welfare facilities etc. are not available in 91.15 per cent of the total number of inhabited villages in the district. Of the 2,028 villages, as many as 1,405 villages avail this facility within a reasonable distance of less than 5 Kms., another 472 villages have medical facilities at a distance of 5 to 10 Kms. and the inhabitants of 151 villages have to cover a distance of more than10 Kms. to have this facility.

While drinking water is available in all the villages from one source or the other, the post and telegraph facilities are not available in as many as 1,814 villages, whereas 1,532 of them have these facilities within a distance of less than 5 Kms., 243 have within the range of 5 to 10 kms., and in other 39 villages people have to cover a distance of more than 10 kms.

1,747 villages or 78.52 per cent of the total villages are still deprived of communication facilities. Therefore, people of 1,170 villages have to travel a modest distance of less than 5 Kms. to avail this facility. Another 424 villages have this facility within a distance range of 5 to 10 kms. For the remaining 153 villages the communication facility is available at a distance of more than 10 kms.

Table 14 given hereunder depicts the distribution of villages according to the distance from the nearest town and availability of different amenities.

TABLE 14

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (Kms.)	No. of inhabited Villages in each range	No. (With Percentage) of Villages having the amenity of							
		Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power supply
1	2	3	4	5	6	7	8	9	10
Less than 5	130	44 (33·85)	6 (4·62)	130 (100·00)	23 (17·69)	..	30 (23·08)	43 (33·08)	127 (97·69)
6—15	522	166 (31·80)	34 (6·51)	522 (100·00)	84 (16·09)	..	111 (21·26)	91 (17·43)	465 (89·08)
16—50	1,156	476 (41·18)	120 (10·38)	1,156 (100·00)	234 (20·24)	..	279 (24·13)	191 (16·52)	959 (82·96)
51+	417	157 (37·65)	37 (8·87)	417 (100·00)	70 (16·79)	..	58 (13·91)	22 (5·28)	295 (70·74)
Unspecified	..	..	..	..	..	..	..	..	..
Total	**2,225**	**843 (37·89)**	**197 (8·85)**	**2,225 (100·00)**	**411 (18·47)**	..	**478 (21·48)**	**347 (15·60)**	**1,846 (82·97)**

While drinking water facility is available in all the villages of the district, it will be seen that, in all, 843 villages with educational facilities and 197 with medical facilities are proportionately distributed amongst various distance ranges from the nearest towns. Two smaller distance ranges comparatively claim lesser proportion of villages having these facilities. This can be attributed to the reason that the inhabitants of the villages situated in close proximity of the towns can avail these facilities from the nearby urban areas.

The number of villages and their proportion to total villages is the maximum in the distance range of 16—50 Kms., which have the postal facilities. In other ranges the proportion of villages varies from 16.09 to 17.69 per cent. As for communication facilities the villages situated within the distance range of 5 Kms., claim 23.08 per cent of the total villages in this range. Their proportion declined to 21.26 in the next distance range of 6—15 Kms., which again rose to 24.13 in respect of the villages which are situated in the distance range of 16—50 Kms. from the nearest town. Only 13.91 per cent of the villages have the communication facilities located beyond 50 Kms. from the nearest towns.

Looking at the distribution of villages linked by pucca roads and those electrified in the various distance ranges, it has been observed that their proportion decreases with the increase in the distance ranges from the nearest towns. The proportion of villages having the approach by pucca roads is 33.08 per cent in the distance range of 5 Kms. which reaches the minimum figure of 5.28 per cent in the villages which are situated at a distance of more than 50 Kms., from the nearest towns. Similarly, 127 villages of the total of 130 villages in the distance range of 5 Kms., from the nearest town form 97.69 per cent of the total villages which are electrified. The proportion of such villages came down to 89.08 per cent in the case of villages which lie in the distance range of 6—15 Kms. from the nearest town and to 70.74 per cent in the distance range of villages located beyond 50 Kms. from the urban centres.

Table 15 given hereunder shows the distribution of villages according to population range and amenities available.

TABLE 15

Distribution of villages according to population range and amenities available

Population range	No. of inhabited Villages in each range	No. (With percentage) of Villages having the amenity of							
		Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communication	Approach by Pucca Road	Power supply
1	2	3	4	5	6	7	8	9	10
Upto 499	2,054	691 (33·64)	126 (6·13)	2,054 (100·00)	302 (14·70)	..	390 (18·99)	296 (14·41)	1,689 (82·23)
500—1,999	168	149 (88·69)	68 (40·48)	168 (100·00)	106 (63·10)	..	86 (51·19)	50 (29·76)	155 (92·26)

5,000+	..	..	..	..	..	..	..	..	..
Total	**2,225**	**843 (37·89)**	**197 (8·85)**	**2,225 (100·00)**	**411 (18·47)**	..	**478 (21·48)**	**347 (15·60)**	**1,846 (82·97)**

A mere glimpse of the table reveals that there is a co-relation between population range of the villages and the proportion of villages having various amenities. The proportion of villages having different amenities increases with the increase in the population size of the villages. Of the 2,054 villages in the population range of less than 500 persons, only 691 villages or 33.64 per cent have the educational facilities. This proportion increases to 88.69 per cent in the next population range i.e. 500—1,999 persons while all the three villages falling in the population range of 2,000—4,999 have the educational institutions of one type or the other located in the village itself.

With regard to medical institutions only 126 villages or 6.13 per cent of the total villages falling in the range of less than 500 persons have medical institutions located in the village itself. Another 68 villages constituting 40.48 per cent of the total villages falling in the population range of 500—1,999 have the medical institutions. The remaining 3 villages each having a population of 2,000 or more have the medical institutions. All the 2,225 inhabited villages in the district have drinking water facilities. Only 411 or 18.47 per cent of the total inhabited villages in the district have the facilities of post and telegraph. Of these, 302 villages falling in the category of less than 500 persons, 106 villages in the size group of 500—1,999 and all the 3 villages each having a population of 2,000 and more have the post and telegraph facilities. 390

villages or 18.99 per cent of the total villages enjoy the communication facilities in the size class of less than 500 persons. This proportion increases to 51.19 per cent in respect of the villages falling in the population range of 500—1,999. Of the 3 villages belonging to the category of 2,000—4,999 persons, 2 villages enjoy the facilities of communications. In terms of percentages 14.41 per cent (296 villages) belonging to the size group of less than 500 have been linked by pucca road. Another 50 villages or 29.76 per cent falling in the population range group of 500—,1999 and one village having a population of 2,000 and more are linked by pucca road. 1,846 villages or 82.97 per cent of the total inhabited villages in the district have been electrified. Of these, 1,689 (82.23 per cent) fall in the population range of less than 500, 155 villages) (92.26 per cent) in the population range of 500—1,999 and 2 villages in the population range of 2,000 and more persons.

Table 16 deals with the staple food of the inhabitants of each tahsil and sub-tahsil of Shimla district.

It will be seen that staple diet of the inhabitants in majority of the villages in all the tahsils and sub-tahsils of Shimla district is Maize and Wheat. Rice is also consumed in small quantity in all areas. In Rampur and Jubbal tahsils barley forms the third item of staple food which is grown fairly in large quantities.

TABLE 16

Main staple food in the majority of villages in each tahsil/sub-tahsil

Sl. No.	Name of Tahsil/ Sub-tahsil	Main staple food
1	2	3
1	Seoni Tahsil	Maize, Wheat, Rice
2	Shimla	Maize, Wheat, Rice
3	Theog	Maize, Wheat, Rice
4	Kumharsain	Wheat, Maize, Rice
5	Rampur	Wheat, Maize, Barley
6	Nankhari	Wheat, Maize, Rice
7	Rohru	Maize, Wheat, Rice
8	Jubbal	Wheat, Maize, Barley
9	Kotkhai	Maize, Wheat, Rice
10	Chaupal	Maize, Wheat, Rice
11	Nerua	Maize, Wheat, Rice

TABLE 17

Distribution of villages according to Land use

Sl. No.	Name of Tahsil/Sub-tahsil	No. of inhabited Villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Seoni	202	20,892	18,565 (88·86)	320 (1·72)
2	Shimla	566	44,727	37,774 (84·45)	1,033 (2·73)
3	Theog	392	43,693	36.496 (83·53)	259 (0·71)
4	Kumharsain	156	18,797	15,531 (82·62)	204 (1·31)
5	Rampur	119	13,084	11,555 (88·31)	454 (3.93)
6	Nankhari	60	5,634	5,323 (94·48)	123 (2·31)
7	Rohru	169	22,108	21,130 (95·58)	809 (3·83)
8	Jubbal	89	16,993	15,503 (91.23)	183 (1·18)
9	Kotkhai	172	17,099	15,145 (88·57)	21 (0·14)
10	Chaupal	123	17,520	11,448 (65·34)	580) (5·07
11	Nerua	177	36,512	30,945 (84·75)	667 (2·16)
	Total	2,225	257,059	219,415 (85·36)	4,653 (2·12)

Table 17 which deals with the distribution of villages according to land use depicts that total area of the inhabited villages put together is 257,059 hectares. Of this, 219,415 hectares or 85.36 per cent of the total area is cultivable. In other words the average cultivable area per inhabited village in Shimla district comes to 98.61 hectares. Though irrigation plays an important role in agriculture for increasing food production but in Shimla district sizeable part of the total cultivable area is un-irrigated. Owing to topographic impediments, the execution of large irrigation projects is rather difficult. Thus, it is evident from the table that only 4,653 hectares of land is available for irrigation. This accounts for 2.12 per cent of the total cultivable area. The average irrigated area per inhabited village in the district as a whole comes to just 2.09 hectares.

As for individual tahsils or sub-tahsils it will be seen that the percentage of cultivable area to total area is as low as 65.34 in Chaupal tahsil. This proportion is the maximum (95.58 per cent) in Rohru tahsil closely followed by Nankhari sub-tahsil where this percentage comes to 94.48. In other tahsils and sub-tahsils this proportion varies from 82.62 per cent in Kumharsain sub-tahsil to 91.23 per cent in Jubbal tahsil. With regard to percentage of irrigated area to total cultivable area, only 5.07 per cent of the total cultivable area is irrigated in Chaupal tahsil, 3.93 in Rampur and 3.83 in Rohru tahsil. This percentage is as low as 0.14 in Kotkhai and 0.71 in Theog. In other tahsils/sub-tahsils too, the variation is not much and insignificant proportion of total cultivable area is under cultivation. Thus, with a view to make optimum use of barren land and unculturable waste in the district there has been a rapid proliferation of orchards. Shimla district is widely known for delicious and variety apples.

Appendix I: This appendix gives abstract of educational, medical and other amenities for each tahsil and sub-tahsil in the district in terms of number of villages having such facilities and the total number of various types of institutions.

In Shimla district there are 894 primary schools in 837 villages, 210 middle schools in 209 villages and 81 secondary schools in 80 villages. 3 villages have a higher secondary school each whereas 2 adult literacy classes/centres have been reported from equal number of villages. 11 villages have 14 other types of educational institutions. In all there are 1,382 villages which do not have any educational institution.

Tahsilwise, Seoni tahsil has 61 primary schools, 15 middle schools, 6 secondary schools and a higher secondary school reported from equal number of villages in each category. No institution has been reported from 141 villages.

In Shimla tahsil 123 villages have 126 primary schools. There are 31 middle schools, 12 secondary schools and an adult literacy centre one in each village. 6 other types of educational institutions have been reported from 4 villages. As many as 441 villages have not reported any educational institution.

126 primary schools have been reported from 125 villages in Theog tahsil. There are 28 middle schools one in each village and 12 secondary schools have been reported from equal number of villages. One village has a higher secondary school. 3 other types of educational institutions have been reported from equal number of villages. 264 villages of this tahsil do not have any educational facility.

Kumharsain sub-tahsil has 75 primary schools located in 71 villages. 17 middle schools and 9 secondary schools have been reported from equal number of villages.

In Rampur tahsil 79 villages have 87 primary schools, 18 villages have equal number of middle schools and 4 villages have a secondary school one in each. 40 villages of Nankhari sub-tahsil have 44 primary schools, 9 villages have 9 middle schools and 3 villages have a secondary school each.

In Rohru tahsil 132 primary schools are in 120 villages, 24 middle schools are in each village and 9 secondary schools have been reported from equal number of villages. There is also one adult literacy centre in a village and 3 other types of educational institutions in 2 villages.

In Jubbal tahsil there are 60 primary schools in 48 villages, 18 middle schools in 17 villages and 7 secondary schools in 6 villages. One village has a higher secondary school and 2 villages have 2 adult literacy centres. 69 villages of Kotkhai tahsil have 75 primary schools, 25 middle schools one in each village and 10 secondary schools have been reported from equal number of villages.

Chaupal tahsil has 40 primary schools situated in 36 villages, 10 middle schools one in each village and 6 secondary schools in 6 villages. In Nerua sub-tahsil 68 primary schools are in 65 villages. 15 middle schools have been reported from equal number of villages and 3 secondary schools one in each village.

There are 98 dispensaries located in 96 villages of Shimla district. 5 villages each has a hospital and a maternity and child welfare centre. 11 primary health centres and 87 primary health sub-centres have been reported from equal number of villages in each category. There are 8 community health workers in 7 villages and 13 other types of medical institutions in 9 villages.

In Seoni tahsil 10 villages have a dispensary each. One village has a primary health centre and 7 primary health sub-centres are reported from equal number of villages. In Shimla tahsil there are 15 dispensaries in 14 villages. There is a hospital and a primary health centre in each village. 15 villages have a primary health sub-centre one in each village and 2 villages have 4 'other' medical institutions.

8 villages of Theog tahsil have a dispensary each while one village has a maternity and child welfare centre. 2 primary health centres and 7 primary health sub-centres have been reported from equal number of villages. 3 other types of medical institutions are located in 2 villages.

In Kumharsain sub-tahsil 7 villages have 7 dispensaries, one village has a hospital and another village a primary health centre. There are 10 primary health sub-centres one in each village and 4 community health workers have been returned from 3 villages.

The number of villages having dispensaries and primary health sub-centres in Rampur tahsil comes to 9 and 11 respectively while 2 other institutions have been reported from equal number of villages.

Five villages of Nankhari sub-tahsil have a dispensary each and a hospital from another village. Two primary health centres, 7 primary health sub-cenrres and one community health workers have been reported from equal number of villages of each category.

Rohru tahsil has 12 dispensaries one in each village. Two primary health centres and primary health sub-centres have been located in 2 and 13 villages respectively. In Jubbal tahsil there are 8 dispensaries one in each village and a hospital is located in another village. 5 villages have equal number of primary health sub-centres while two medical institutions are stationed in another village.

In Kotkhai tahsil, 11 villages have 12 dispensaries. There is a maternity and child welfare centre and a primary health centre one in each village. While 3 villages each have a primary health sub-centres. 4 villages of Chaupal tahsil have a dispensary each. There are 3 primary health sub-centres and 3 community health workers reported from equal number of villages in each category. There are 8 dispensaries in 8 villages of Nerua sub-tahsil, one village has a primary health centre and 6 villages have equal number of primary health sub-centres.

In the district as a whole, 1,259 villages have tap water for drinking purposes. 80 villages depend on well water, 41 villages on tank water and another 41 villages on river water. 269 villages have canal water and majority of villages i.e., 2,436 have other sources of drinking water.

101 villages of Seoni tahsil have tap as a source of drinking water. 3 villages depend on tank and river water and 10 villages on canal water. 241 villages have other sources of drinking water.

In Shimla tahsil tap water is available to 313 villages, well water to 14, tank water to 24, river water to 11 and canal water to 100 villages for drinking purposes. 354 villages depend on more than one source of drinking water.

Theog tahsil has 131 villages having tap water for drinking purposes while one village meet its requirement from tank water. Besides, 68 villages use canal water and 259 villages have more than one source of water for drinking purposes.

In Kumharsain sub-tahsil tap water serves the source for drinking purposes in 124 villages, while 6 villages depend on well water, 16 on river water, 46 on canal water. 182 villages have other source of drinking water whereas 148 villages have more than one source.

In Rampur tahsil 75 villages have tap as a drinking water source, 39 villages depend on well water, 7 on river water, 28 have canal water and 117 have other source of drinking water. 33 villages of Nankhari sub-tahsil depend on tap water, 12 on tank water, 5 on canal water and 90 as other source of drinking water.

97 villages of Rohru tahsil use tap water for drinking purposes, 4 use river water, one village depends on canal water and 183 villages have other sources of drinking water. 80 villages of Jubbal tahsil depend on tap water, 9 on well water, 4 on canal water and 81 on other sources of drinking water.

In Kotkhai tahsil tap water is available in 139 villages, canal water in 2 villages and 94 villages have other source of drinking water. 83 villages of Chaupal tahsil have tap water, 3 have canal water and 178 have other sources. In Nerua sub-tahsil 83 villages depend on tap water, 12 on tank water and 2 on canal water.

In the rural areas of the district, 229 post offices have been reported from equal number of villages. Of this 19 villages are in Seoni tahsil, 32 in Shimla, 29 in Theog, 16 in Kumharsain, 22 in Rampur, 14 in Nankhari, 33 in Rohru, 10 in Jubbal, 15 in Kotkhai, 14 in Chaupal and 25 in Nerua. Besides the 5 post and telegraph offices in the district 3 have been returned from Rampur tahsil and one each in Theog and Jubbal tahsils.

Post office and telephone facilities are available in 55 villages of the district. Of these, 11 each are in Shimla and Kotkhai, 2 each in Seoni and Rohru, 6 each in Theog and Jubbal tahsils, 9 in Kumharsain sub-tahsil and 7 Rampur tahsil.

Post and telegraph offices with phone are available in 18 villages of the district. Amongst these, 4 are in Shimla tahsil, 3 each in Kumharsain sub-tahsil and Rampur tahsil and one each in the remaining tahsils/ sub-tahsils of the district.

One village of Seoni tahsil, 18 in Shimla, 5 in Theog 15 in Kumharsain, 7 in Rohru, 22 in Jubbal, 29 in Kotkhai, 6 in Chaupal and one village of Nerua sub tahsil have got the telephone facilities in the villag itself.

Communicationwise, 478 villages in the distric have bus stops. Of these, 22 are in Seoni tahsil, 85 i Shimla, 69 in Theog, 60 in Kumharsain, 47 in Rampur, 25 in Nankhari, 38 in Rohru, 31 in Jubbal, 58 in Kotkhai, 26 in Chaupal and 17 in Nerua sub-tahsil. Only 3 villages in the district have railway station which fall in Shimla tahsil.

1846 villages in the district have been electrified and in the remaining 379 villages this facility is not available.

Tahsilwise 165 villages of Seoni tahsil, 439 of Shimla, 357 of Theog, 152 of Kumharsain, 103 of Rampur, 47 of Nankhari, 119 of Rohru, 83 of Jubbal, 172 of Kotkhai, 95 of Chaupal and 114 of Nerua sub-tahsil have been electrified.

Appendix II : The appendix gives information for each non-municipal town/places treated as an urban area for census purposes. Incidentally there is no such town in the district, hence, nothing has been shown in the appendix.

Appendix III : This appendix gives the tahsil and sub-tahsilwise list of villages where no educational, medical, post and telegraph, day or days of market/hat, communication and power supply facilities are available.

Appendix IV : Appendix IV gives the list of villages according to the proportion of Scheduled Castes and Scheduled Tribes to total population by ranges.

Table 18 is intended to depict the growth, density and sex ratio of urban population in the district in relation to the state during the last four censuses.

TABLE 18

Growth, Density and Sex ratio of urban population in the district in relation to the state

Census Year	DISTRICT						STATE					
	Total Population	Urban population	Percentage Urban population	Decadal percentage variation in urban population	Density (population per Sq. Kms.)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	Percentage Urban population	Decadal percentage variation in urban population	Density (population per Sq. Kms.)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	286,111	48,497	16·95	+131·95	N.A.	544	2,385,981	153,827	6·45	+78·66	N.A.	664
1961	341,461	48,059	14·07	—0·90	2,104	582	2,812,463	178,275	6·34	+15·89	1,254	650
1971	419,844	61,274	14·59	+27·50	1,855	664	3,460,434	241,890	6·99	+35·68	1,556	749
1981	510,932	80,177	15·69	+30·85	2,309	667	4,280,818	325,971	7·61	+34·76	1,537	795

It is discernible from the above table that since 1951 Census the urban population of Shimla district has increased from 48,497 to 80,177. Barring the decade 1951–61, when the urban population of the district declined by 0.90 per cent there has been a positive growth in the urban population. There had been a significant growth of 131.95 per cent during the decade 1941—51. This was obviously due to the shifting of capital of the then Punjab Government to Shimla and large influx of persons, displaced from West Pakistan after partition of the country in 1947. It will be seen that after 1951 Census the growth in urban population of Shimla district has been rather slow as compared to the state as a whole. Against the fall in urban population of the district in 1961 Census, the state as a whole registered an increase of 15.89 per cent in the urban population. Similarly, the growth in urban population of the state has been 8.18 per cent and 3.91 per cent higher than the district during the decades 1961—71 and 1971—81, respectively.

Among the districts, Shimla with 15.69 per cent urban population in 1981 Census retains the place of pride of being the most urbanised district in the state. The proportion of urban population to total population in the district since 1951 Census has almost doubled as compared to the state average. The density of urban population of the district, however, came down to 1,855 per sq. km. in 1971 from 2,104 in 1961 Census. The fall in density of population in 1971 is due to the enlargement of the areas of Rampur and Theog towns from 1.30 and 0.70 sq. kms. to 8.00 and 4.00 sq. kms. respectively. Against this the increase in population was insignificant. The density of population again touched to 2,309 persons per sq. km. in 1981 Census. As for the state, the density of population per sq. km. in urban areas increased from 1,254 in 1961 to 1,556 in 1971, but in 1981 Census recorded a decline of 19 persons per sq kms. over the 1971 Census. This fall in the density is mainly attributed to the inclusion of 11 new towns having a sparse population of 33,114 persons spread over an area of 48.37 sq. kms. The places which have emerged as towns for the first time in 1981 Census, together have a density of 685 persons per sq. km. It is significant to note that the density of population in urban areas of Shimla district is higher than the urban areas of the state as a whole during all the three censuses under review.

The sex ratio in urban areas is always overwhelming in favour of males. The high sex ratio in urban areas is due to the migration of males from the rural areas in search of employment. During the decade 1951—61, urban areas of the state recorded a decline of 14 females against an increase of 38 females per 1,000 males in Shimla district. After 1961 Census the sex ratio in the urban areas of the state as well as the district continued to increase significantly. However, this increase was more sharp in the state as compared to the district. During the decades 1961—71 and 1971—81, the state recorded in its sex ratio, an increase of 99 and 46 females. The number of females per 1,000 males in Shimla district increased by 82 during the decade 1961—71 and by 3 during the next decade 1971—81.

Table 19 gives the name of places, which have come up as towns during 1981 Census and also the places which have lost their urban status in the present census.

TABLE 19

New towns/towns added and declassified in 1981 Census

Name of town	Population 1981 Census
1	2
(a) Added	
1. Rohru	2,335
(b) Declassified	..

It will be seen that of the 11 places in the state which acquired the urban status in 1981 Census only one town, Rohru (N.A.C.), has been added to the list of urban areas of Shimla district in this census. According to 1981 Census this place is inhabited by 2,335 persons which forms 2.54 per cent of the total urban population of the district. It is significant to note that none of the places which were treated as towns in 1971 Census is declassified in the 1981 Census in the state *vis-a-vis* Shimla district.

Table 20 depicts the per capita receipt and expenditure according to various sources in each town in the district.

TABLE 20

Per capita receipt and expenditure in Towns

Class, name and civic status of the town	PER CAPITA								
	RECEIPT			EXPENDITURE					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General Administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects

VI. Rampur (M.C.)	186·74	81·18	105·56	128·31	54·68	31·18	10·66	2·15	29·64
VI. Rohru (N.A.C.)	11·13	2·57	8·56	10·75	1·37	2·14	..	..	7·24
II. Shimla (M. Corp.)	422·81	62·32	360·49	295·38	23·47	43·49	172·25	0·72	55·45
VI. Theog (M.C.)	190·18	86·65	103·53	192·80	58·18	27·09	89·79	1·64	16·10
Total	**396·66**	**63·15**	**333·51**	**279·87**	**25·96**	**42·60**	**157·03**	**2·28**	**52·00**

Shimla falls in the population size-class II (50,000 to 99,999) whereas all the other five towns fall in the population class VI (Below 5,000). In all the urban areas put together the total per capita receipts stood at Rs. 396.66 while the per capita expenditure was Rs. 279.87. Bulk of the receipts are derived from other sources such as the revenues derived from municipal properties and power apart from taxation, Government grants and other sources. Taxes account for just 15.92 per cent of the total receipts. Per capita expenditure was much less than the per capita receipts.

Over 56 per cent of the total expenditure in urban areas of the district was incurred on public works. The per capita expenditure on public health and convenience is Rs. 42.60 which constitutes 15.22 per cent of the total per capita expenditure. The expenditure per head on other aspects stood at Rs. 52.00 and on general administration Rs. 25.96. Only Rs. 2.28 or 0.81 per cent of the total per capita expenditure was incurred on public institutions.

The analysis of the per capita receipts and expenditure in various towns in the district shows that per capita receipt is the highest in case of Dhalli (N.A.C.). The highest per capita receipts of this town can perhaps be attributed to comparatively greater resources at its disposal and extremely small population of this town. The level of per capita receipt is Rs. 422.81 in case of Shimla and Rs. 411.82 in Jutogh. The per capita receipts in other towns viz. Theog, Rampur and Rohru are less than Rs. 200.00 each. These are as low as Rs. 11.13 in Rohru (N.A.C.). As for sources, there is much disparity in the pattern of receipts in different towns. The per capita receipts through taxes are as high as Rs. 237.25 or 53.96 per cent of the total per capita receipts in Dhalli (N.A.C.) as compared to Rs. 12.82 or 3.11 per cent in Jutogh (C.B.). The per capita receipts through taxes are 45.56 per cent in Theog, 43.47 per cent in Rampur and 23.09 per cent in Rohru and 14.74 in Shimla. The per capita receipts other than through taxes are the highest in Jutogh (96.89 per cent) followed by Shimla (85.26 per cent) and Rohru (76.91 per cent). There is not much disparity in other towns as far as their proportion of receipts through other sources are concerned. Theog is the only urban area in Shimla district where total per capita expenditure is gher than the per capital receipts.

The per capita expenditure is the highest in the case of Jutogh (Rs. 374. 93) followed by Dhalli (Rs. 315.14) and Shimla (Rs. 295.38).

Per capita expenditure on various heads taken separately, it is seen that variation is varied and wide in different towns. While in Shimla town overwhelming part of 58.55 per cent expenditure is spent on public works, the Jutogh Cantonment Board incurred more on public health and conveniences (31.45 per cent), public works (24.61 per cent) and on public institutions (23.35 per cent). Theog Municipal Committee and Rohru Notified Area Committee spent more on public works and other aspects respectively. The per capita expenditure on public works is more than 35 per cent in case of Dhalli (N.A.C.). The meagre per capita expenditure in Rohru (N.A.C.) is spent either on public health and conveniences and general administration.

Table 21 gives the number of schools providing educational facilities upto various levels per ten thousand population in different towns of the district.

TABLE 21

Schools per ten thousand population in towns

Class, name and civic status of the town	No. per ten thousand population			
	Higher Secondary/ Intermediate/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
VI. Dhalli (N.A.C.)	..	..	9·96	9·96
VI. Jutogh (C.B.)	..	..	7·16	7·16
VI. Rampur (M.C.)	..	3.02	6·04	3·02
VI. Rohru (N.A.C.)	..	4·28	4·28	8·57
II. Shimla (M. Corp.)	0·57	2·83	4·11	6·23
VI. Theog (M.C.)	..	13·09	13·09	13·09
Total	**0·50**	**2·99**	**4·49**	**6·36**

The number of higher secondary schools per 10,000 population in the urban areas of the district is 0.50. This proportion works out at 2.99 in case of secondary/ matriculation schools. The number of junior secondary/ middle schools per 10,000 population is 4.49 and those of primary schools is 6.36. Shimla town has 0.57 higher secondary schools per 10,000 population. All the other five towns in the district are devoid of the facility of education of this level.

There are 13.09 educational institutions of secondary/matriculation level per 10,000 population in Theog. Similarly, their proportion is 4.28 in Rohru, 3.02 in Rampur and 2.83 in Shimla town. Dhalli and Jutogh towns have none. As for middle or junior secondary schools their number per 10,000 population is again highest (13.09) in Theog, while Dhalli has 9.96, Jutogh 7.16 and Rampur 6.04. However, Shimla and Rohru towns have atleast 4 educational institutions of this level per 10,000 population.

Perusal of the above table reveals that primary schools per 10,000 persons are once again highest in Theog being 13.09. Second and third positions are claimed by Dhalli and Rohru towns which have 9.96 and 8.57 primary schools per 10,000 of population. Their proportion is 7.16 and 6.23 in Jutogh and Shimla towns respectively. The number of primary schools in Rampur town is rather less i.e. 3.02 per 10,000 of population in the municipal area.

Table 22 shows the avalability of medical facilities in terms of number of beds per 1,000 town dwellers in each urban area of the district.

TABLE 22

No. of beds in medical institutions in towns

Class, name and civic status of the town	No. of beds in medical institutions per one thousand population
1	2
VI. Dhalli (N.A.C.)	..
VI. Jutogh (C.B.)	1·43
VI. Rampur (M.C.)	30·21
VI. Rohru (N.A.C.)	12·85
II. Shimla (M. Corp.)	10·57
VI. Theog (M.C.)	24·87
Total	**11·42**

Total number of beds available for indoor treatment of the patients in the medical institutions functioning in the urban areas of Shimla district is 916 and their availability per one thousand population works out as 11.42. All the towns in the district except Dhalli can boast of the availability of the indoor medical facilities in one medical institution or the other, may be to a very limited extent in certain areas like Jutogh (C.B.). Dhalli has only one ayurvedic dispensary while all other towns have atleast a hospital or an allopathic dispensary with facilities of indoor treatment.

The number of beds available for every one thousand persons is the maximum (30.21) in Rampur followed by Theog (24.87). Their number is 12.85 in Rohru. Shimla town which leads in terms of medical institutions has 10.57 beds available for 1,000 persons. Two emergency beds available in the only dispensary run by the Cantonment Board, Jutogh are insignificant for a population of 1,396.

For the first time in 1981 Census it was decided to collect the data on civic and other amenities in notified slums in respect of only those urban areas which are having a population of 50,000 or more. Incidentally Shimla with a population of 70,609 is the only town in Himachal Pradesh which falls in the population size-class II. But it was revealed that there are no notified slums or officially recognised slum areas in the town. Hence, table 23 which deals with the proportion of slum dwellers population to total population of the town has been left blank.

TABLE 23

Proportion of slums population in towns

Class, name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (per Sq. Km.)
1	2	3
II. Shimla (M. Corp.)	..	..

Note: There are no notified or officially recognised slums in the only class II town, Shimla.

Table 24 which has been compiled on the basis of the information given in Statement VI shows the most important commodities imported, exported and manufactured in the towns of Shimla district.

TABLE 24

Most important commodity manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
VI. Dhalli (N.A.C.)	Electrical appliances like Switches, Plugs, Holders, etc.	Electrical appliances like Swtiches, Plugs, Holders, etc.	Tyres
VI. Jutogh (C.B.)	Bakery Products	..	Foodgrains
VI. Rampur (M.C.)	Woollen Shawls	Medicinal Herbs	Foodgrains
VI. Rohru (N.A.C.)	Fruit Packing Cases	Fruit Packing Cases	Foodgrains
II. Shimla (M. Corp.)	Wooden Toys, Sticks, Wall Paintings and Decoration Pieces	Wooden Toys, Sticks, Wall Paintings and Decoration Pieces	Foodgrains
VI. Theog (M.C.)	Fruit Packing Cases	Potatoes	Foodgrains

It will be seen that electrical appliances like switches, plugs and holders are manufactured in Dhalli town. Shimla is famous for its wooden toys, sticks, wall paintings and decoration pieces. Rohru and Theog towns maufacture fruit packing cases. While woollen shawls are the most important commodity manufactured in Rampur, Bakery products are manufactured in Jutogh. As for exports, medicinal herbs are exported from Rampur and potatoes from Theog. The most important items of export in respect of Dhalli, Rohru and Shimla are identified which are related to the respective manufactured items. Jutogh is the only town in the district which has nothing to export. Rubber tyres are the most important item of import in Dhalli whereas foodgrains is the chief item brought from other places for local consumption in all other towns of the district.

The Statements of Town Directory: Data relating to important characteristics for each town in the district have been compiled in the form of six statements. Besides this the statement on civic and other amenities in notified slums is a new feature of 1981 Census. The data on this aspect given in statement IV-A are confined to only those towns which are having a population of 50,000 or more. The information in each statement have been incorporated in alphabetical order of the towns in the district.

Statement-I deals with the status and growth history of the towns in the district. A casual look on the statement reveals that there is a pre-ponderance of small towns in the district. Of the six towns in the district as many as 5 fall in the population size-class VI having a population of less than 5,000. Shimla is the only class-II town in the district as well as in the state. According to 1981 Census it has a population of 70,604. While Shimla has a Municipal Corporation, Rampur and Theog towns have municipal committees. Dhalli and Rohru are administered by the Notified Area Committees. Civic affairs of Jutogh town are looked after by the cantonment board. The civic administration status of each town relates to the year 1980.

Dhalli town has come up on the urban map of the state in 1971 Census when it had a population of 664 which has risen to 1,004 thus registering a growth of 51.20 per cent during the decade 1971—81. The town has an area of 0.70 sq. km. The density of population works out to 1,434 persons per sq. km. It has 263 households including houseless households. The sex-ratio i.e. number of females per 1,000 males has gone up from 489 in 1971 to 508 in 1981 Census.

Jutogh had a population of 375 in 1901. In 1911, 1921 and 1951 Censuses this place was considered as a part of Shimla town. 470 persons were enumerated in the town during 1931 Census which rose to 634 in 1941 with a decennial population growth of 34.89 per cent. 1,487 persons were found living in the town during 1961 Census which declined to 1,291 in 1971 Census. During the decade 1971—81 the town registered a growth rate of 8.13 per cent and the population reached to 1,396 in 1981 in an area of 1.41 sq. kms. The density of population works out to 990. The sex ratio in the town steeply rose to 901 in 1971 and to 972 in 1981 from mere 569 in 1961 Census.

Rampur was treated as an urban area in 1901 when its population was 1,157. But in 1911 this place was declassified and continued to be treated as rural till 1931. In 1941, once again this place with a population of 1,787 came up as a town. During the decade 1941—51 this place registered a negative growth rate of 18.41 per cent. The population growth however, was highest (42.59) during 1951—61. The rate of population increase was almost uniform in the next two consecutive decades. The growth rates being 26.17 in 1961—71 and 26.19 during 1971—81. The population of this town stood at 3,310 during 1981 in an area of 8.00 sq. km. Accordingly the denisity of population per sq. km. works out to 414. The number of females per 1,000 males was 438 in 1961, 596 in 1971 and 580 in 1981 Census.

Rohru with an area of 1.07 Kms. was declared as notified area committee for the first time during 1981 Census and has a population of 2,335 persons. In terms of density it ranks second amongst the towns in the district with 2,182 persons living in a sq. km. of area. The number of females in the town stood at 620 against 1,000 males.

Shimla is one of the 9 towns in the state and the only town in the district which continued to retain urban status in all the censuses since 1901. Whereas in the last 80 years, the population of Himachal Pradesh has grown nearly 123 per cent, the growth rate of population during the same period was as high as 406 per cent in respect of Shimla town. The population of the town rose from 13,960 in 1901 to 27,213 in 1921. Thereafter the town recorded a decline of 33.33 per cent in population during the decade 1921—31. Significant increase in population was noticed during the decade 1941—51, when the town registered a growth of 151.53 per cent. This was mainly due to the influx of displaced persons from the areas now constituting Pakistan. The capital of the then Punjab was also located in Shimla at that time. During 1951—61, the population of Shimla once again registered a fall of 7.70 per cent. This may be due to the shifting of the capital of Punjab to Chandigarh. The rate of increase of population was 29.98 per cent during 1961—71 which again declined to 27.52 per cent during 1971—81. Shimla town has the maximum density of 3,611 persons per sq. kms. Sex ratio during the last 3 decades has shown continuous increase in favour of females. The number of females per 1,000 males is 671 in 1981 Census.

Theog was treated as a town for the first time during 1951 Census when it had a population of 889 persons. The population of the town swelled to 1,536 during 1951—61, thus registering a growth of 72.78 per cent. The population of the town came down to 1,328 in 1971 but again registered a growth rate of 15.06 per cent during 1971—81 with 1,528 persons. It is interesting to note that even after 20 years the population of the town has not reached the level of 1961 Census. This gap occured due to difference in enumeration periods. In 1961 Census Theog town was included in non-synchronous areas and the Census count was taken in the month of October, 1960 when population of the town had swollen due to the peak potatoe marketing season. The town is most sparsely populated in the district with only 382 persons living in a sq. km. of an area. The sex ratio moved in favour of the females and touched the level of 647 in 1981 as against 444 in 1961 and 629 in 1971.

The physical and locational aspects of the towns are covered in statement-II. Temperature data is available only for Shimla town. Similarly rainfall data is available for all but Dhalli and Jutogh. However, figures of average annual rainfall and temperature in respect of Shimla town have been repeated against Dhalli and Jutogh with a view to enabling the reader to have a rough idea in this regard. Dhalli is a small town at a distance of 10 Kms. from Shimla. Its state, district, sub-divisional and tahsil headquarters and nearest railway station happen to be at Shimla. The nearest city with a population of one lakh and more is Chandigarh which is 128 Kms. from Dhalli.

Jutogh, a cantonment board area, is located at a distance of 9 Kms. from Shimla. Its sub-divisional and tahsil headquarters are also situated at Shimla. Chandigarh is the nearest city which is 127 Kms. away via Shimla. Jutogh railway station at Totu outside the cantonment board area is at a distance of 1 Km. from this town.

Rampur, which is picturesquely situated on the left bank of Sutlej is surrounded by high mountains which confine the air and render the place very hot in summer. This town experiences average annual rainfall of 837.9 mm. It is situated at a distance of 132 Kms. from Shimla the state and the district headquarter. Nearest railway station for this town is also at Shimla. Chandigarh happens to be the nearest city from Rampur which is at a distance of 250 Kms. via-Shimla on the National Highway-22. The town is itself a sub-divisional and a tahsil headquarter.

Rohru town, also the sub-divisional and tahsil headquarter of the same name received annual average rainfall of 771.5 m.m. which represents the periodic average of the preceding ten years. This place is accessible by bus at a distance of 129 Kms. from the district and the state headquarter, Shimla. As in the case of other towns of the district, Chandigarh at a distance of 247 Kms. is the nearest city from Rohru. The nearest rail head is however, 129 Kms. at Shimla.

The highest mean annual rainfall of 1.508.4 m.m. has been recorded at Shimla. Maximum temperature in Shimla is 28.6° C whereas minimum temperature is 4.3° C. Since its becoming the seat of Summer capital of the country in 1864, Shimla has acquired an important position in the map of the country. Though now its status has been reduced to the level of state capital-Shimla has become a place of attraction for the tourists during the summer months. This loveliest place is the dreams of the youths and paradise for the tourists. Apart from being the capital of Himachal Pradesh, Shimla is also the district, sub-divisional and tahsil headquarter. As there is no city with a population of one lakh and more in the whole of Himachal Pradesh, Chandigarh, therefore, happens to be the nearest city for Shimla town which is at a distance of 118 Kms. A 96 Kms. long Shimla-Kalka narrow gauge railway line connects this place with the neighbouring state of Haryana at Kalka.

Theog is at a distance of 32 Kms. from Shimla. the state and the district headquarter and is 150 Kms. from Chandigarh city. It serves the headquarter of sub-division and tahsil. As in case of other towns of Shimla district, there is no navigable river or canal within a distance of 10 kms. from Theog. The nearest railway station happens to be at Shimla.

Statement-III depicts the receipt and expenditure in hundreds of rupees in respect of each town under different heads. Dhalli notified area committee which has the highest per capita receipts ranks fourth in terms of total receipts when viewed in terms of absolute figures. It has local receipts amounting to Rs. 441,384.62. Receipts through taxes account for 54 per cent of the total receipts and 38 per cent are received through government grants. Only

8 per cent of the total income is derived from municipal properties and other sources. On the expenditure side, it has the total expenditure of Rs. 316,380.98 in 1978-79. Bulk of the expenditure is incurred either on public works or on general administration. Similarly, Jutogh cantonment has receipt of 574,888.00. Of this more than half is received by means of government grants. Only 3 per cent of the total receipts is derived through taxes and 5 per cent from the properties of the board. The receipts from miscellaneous sources form 39 per cent of the total receipts. Rs.1,646 hundreds or 31 per cent of the total expenditure of Rs. 523,408.00 is incurred on public health and conveniences. Rs. 1,302 hundress are incurred on public works, Rs. 1,222 hundreds on public institutions, Rs. 445 hundreds on general administration, Rs. 152 hundreds on public safety and 467 hundreds on other aspects.

As for Rampur municipal committee, the receipts from all sources stood at Rs. 618,094.67. Rs. 2,687 hundreds or 44 per cent and Rs. 2,310 hundreds (37 per cent) are derived through taxes and government grants, respectively. Remaining 19 per cent are received by way of tehbazari fee, stock and store, advance and deposits, municipal properties and through other miscellaneous sources. Total expenditure of Rampur municipal committee for the year 1978-79 is Rs. 424,676.52. The break up of expenditure being Rs. 1,810 hundreds on general administration,Rs. 1,032 hundreds on public health and conveniences, Rs. 353 hundreds on public works, Rs. 175 hundreds on public safety, Rs.71 hundreds on public institutions and the remaining Rs. 806 hundreds on other aspects.

Rohru which was declared as notified area committee during the decade 1971—81 has the annual receipts as low as Rs. 260 hundred during the year 1978-79. Of this, Rs. 200 hundreds have been received as grants from the government and only Rs. 60 hundreds are derived through taxes. On the expenditure side, Rs. 169 hundreds are spent on public safety, Rs. 50 hundreds on public health and conveniences and only 32 hundreds on general administration. Total expenditure of this notified area committee stood at Rs. 25,128.76. With regard to municipal finance, Shimla municipal corporation is the richest among all the towns of the state vis-a-vis Shimla district. This is mainly because functions of the corporation are wide and varied than other local bodies and also greater resources at its disposal. It has total receipts of the order of Rs. 29,851,832. Rs. 101,152 hundreds or 34 per cent are received as government grants. Loans amounting to Rs. 90,000 hundreds form 30 per cent of the total receipts. Remaining Rs. 43,997 hundreds (15 per cent) are derived through taxes, Rs. 7,297 hundreds (2 per cent) from municipal properties and power and Rs. 56,072 hundreds (19 per cent) from other sources such as water rates, tax on buildings, etc. On the expenditure side, it has the total expenditure of Rs. 20,855,167 in the year 1978-79. The break up of expenditure under different heads are Rs. 121,614 hundreds (58 per cent) on public works, Rs. 30,705 hundreds (15 per cent) on public health and conveniences and Rs. 16,571 hundreds (8 per cent) on general administration. Expenditure on public institutions form 0.2 per cent (Rs. 507 hundreds) of the total expenditure. Rs. 39,155 hundreds (19 per cent) are incurred under miscellaneous heads.

Theog is the only local body in the district where total expenditure exceeds total receipts. It has mobilised Rs. 290,628.66 from various sources and spent Rs. 294,582.23 on the civic affairs of the town. Bulk of the receipts are derived from taxes and government grants. The share of receipts from municipal properties and other sources together form only 14 per cent of the total receipts. As for expenditure, Rs. 1,372 hundreds have gone in favour of public works. Rs. 889 hundreds are spent on general administration and the rest on public safety, public health and conveniences, public institutions and on other aspects.

Statement-IV deals with the civic and other amenities available in the urban areas of Shimla district. The length of pucca as well as kutcha roads is the highest in Shimla town. But mere total road length in various towns may not give an exact idea of adequacy of roads unless it is looked in relation to total population of that area. Therefore, if the parameter of road length per 1,000 population is applied on various towns it will be seen that pucca roads per 1,000 population is the highest in Theog followed by Rampur and Shimla. Similalry kutcha road length per 1,000 population is the highest in Rampur. As against this Shimla has recorded the lowest road length per 1,000 population whereas there are no kutcha roads in Jutogh town. Open surface drain is still prevalent as the first important system of sewerage in all the towns of the district. But Shimla has also another system of sewerage i.e. sewer. The data on different type of latrines have been collected with a view to assess the magnitude of the problem relating to the use of human labour in the process of disposal of night soil. It will be seen that service type latrines out number water borne latrines in all the urban areas except Shimla. In Shimla too, the proportion of water borne latrines to total latrines is not more than 51 per cent, but this proportion is 70 per cent in Rampur town.

It would be seen that of the 6 towns in the district in as many as 5 towns, buckets in combination with septic tanks are the most common system of disposal of night soil. Only Shimla town claims to have underground sewerage system though the removal of human excreta in buckets is also prevalent in the town . Meagre resources with the local bodies and the high construction cost of sewerage projects seems to be the main obstruction in the way of the replacement of the traditional system involving human labour with underground sewerage system. Scarcity of water and its storage capacity are, however, the other constraints for the expeditious abolition of manual scavenging system.

It is gratifying that all the towns in the district have the provision of chlorinated piped drinking water. Service reservoir happen to be the main system of storage in all the towns of Shimla district. The storage capacity in litres has been shown in brackets against the storage system in column 13 of the statement. Fire fighting services are available in Shimla, Rampur and Jutogh towns. For the re-

maining three towns which are devoid of this facility, Shimla happens to be the nearest place having this amenity. As for electrification, the details of domestic, industrial, commercial, road lighting (points) and other type of electric connections in each town are given under columns 15 to 19 of the statement.

For the first time in 1981 Census it was decided to collect the information on civic and other amenities in notified slums. The data on this aspect are restricted to only those towns which are having a population of more than 50,000. Incidentally, Shimla happens to be the only class-II town in Himachal Pradesh having a total population of 70,604. But there are no notified slums or officially recognised slum areas in this town, therefore statement-IV A has been left blank.

Statement-V is intended to depict the extent of the availability of medical, educational and recreational facilities in the urban areas of the district. Perusal of the statement reveals that all the towns in Shimla district have either a hospital or a dispensary. However, Shimla has the maximum number of medical institutions. There are 5 hospitals, 22 dispensaries, 1 family planning centre and 1 other type of medical institution. All the towns in the district except Dhalli can boast of the availability of indoor medical facilities. Shimla town has University Campus for post-graduate studies for arts, science and commerce, 3 arts and science colleges, 1 arts and commerce college, two law colleges, 1 medical college, 2 recognised shorthand and typewriting institutions, 4 higher secondary schools, 20 high schools, 29 middle schools, 44 primary schools and 11 other type of institutions including Indian Institute of Advanced Study which occupies a prominent position in the sphere of education. Apart from Shimla the facility of college education is also available in Rampur town. The town has also 1 high school, 2 middle schools, 1 primary school and a nursery school. Dhalli and Jutogh towns each has 1 middle school and 1 primary school. Similarly Rohru has 1 high school, 1 middle school, 2 primary schools and 1 nursery school in addition to one rural industrial training institute and a tailoring centre. In Theog town 2 high, 2 middle, 2 primary and 1 nursery schools are catering to the educational needs of the town dwellers. It has also a unit of the rural industrial training institute.

Shimla town has a medical college and it serves as the nearest medical college for the remaining towns of the district. The nearest engineering college for all the towns is at Chandigarh. The nearest Polytechnic in case of Jutogh is at Sundarnagar and for the remaining towns it is at Chandigarh.

There is one working women hostel (YWCA) and 6 stadia in the capital town. None of the towns except Shimla have such a facility. Only two towns viz. Jutogh and Shimla claim to have cinema halls. As many as three towns in the district do not have any auditoria/drama/community halls. All the towns in the district have atleast a library or a reading room facility.

Statement-VI displays the information pertaining to three most important commodities imported, exported and manufactured under 14 columns in respect of each town in the district. In addition, it also gives the number of banks, agricultural societies and non-agricultural credit societies functioning in these urban areas during the year 1979. Foodgrains, vegetables and fruits, sugar and cloth are some of the important items of import in all the towns of Shimla district except Dhalli. However, in case of Shimla, milk is also imported in fairly large quantity. Dhalli is importing tyres, automobile spare parts, petrol and diesel. While electrical appliances are exported from Dhalli, Jutogh is the only town in the district which has nothing to export. Most of the export items in other towns happen to be medicinal herbs, fruits, potatoes, timber, fruit packing cases, bakery products and wooden articles. As for manufactures, the items are no other than small industrial products like woollen shawls, electrical appliances, leather footwears, wooden furniture, sheet metal articles, fruit packing cases etc. There is nothing spectacular requiring special mention in this field.

The statement reveals that all but Jutogh town have the banking facilities available within their urban precincts. Jutogh cantonment not having this facility is just located on the periphery of village Totu which is having two banks. Shimla town has the maximum banks, numbering 23. Rohru and Theog each have one agricultural credit society. As many as 31 non-agricultural credit societies have been reported to be functioning in Shimla town.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Village Directory : Village Directory which is one of the traditional documents of the census has been canvassed during 1981 Census too. On the basis of the information the Village Directory Schedule can broadly be divided into three parts. The first deals with the basic amenities available to a village like the education, medical, drinking water, post and telegraphs, communication, power supply and market etc. In this part, it has been sought to ascertain whether the above facilities exist in a village and if it does then to what extent/level. If the above amenities are not available then nearest village /town with a distance where the aforesaid facilities/amenities have been made available.

The second deals with the land use which has been endeavoured to conform to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India which has recommended the maintenance of records of land use pattern under five categories which are :

1. Forests.
2. Not available for cultivation.
   (a) Land put to non-agricultural uses.
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands.
   (a) Permanent pastures and other grazing lands.
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown.
   (c) Culturable wastes.
4. Fallow lands :
   (a) Fallow land other than current fallows.
   (b) Current fallows.
5. Net area sown.

The source of information for the aforesaid items had been the revenue record shown/converted into hectares.

The third part of the Village Directory deals about the information of the places of historical, archaeological and religious importance in a village. This apart, it also deals with the socio-economic level of the people. It also endeavours to gauge social and economic level of the people by para-metres like the number of motor cycles; scooters, jeeps, cars and tractors available in the village and the number of news. papers inflow to the village.

The first part dealing with the amenities needs elaboration which is given as under :

(a) *Educational Amenities* : The various level of the educational amenities provided in a village has been shown for the sake of convenience in the abbreviations given as under :

1. Primary and elementary schools up to 4th Classes	P
2. Junior Seconda ry or Middle Schools up to 8th Classes	M
3. High Schools/Secondary Schools up to 10th Classes	H
4. Higher Secondary Schools/Pre-University/Junior College/ Intermediate (including 10+2 system)	PUC
5. Colleges of all types up to graduate level and above	C
6. Industrial School	I
7. Training School	Tr.
8. Adult education class/centre	AC
9. Other educational Institutions like Sanskrit Pathshala, Senior Basic School, Maktab etc.	O

Where there are more than one institutions of same type in a village, the same have been indicated in figures against the appropriate abbreviation e.g. P(3). M(2), H(2), etc. Where no educational facility in the village was available, the distance of next nearest village where such educational facilities exist been given in brackets with a dash viz. (—5), (5—10 and (10+).

(b) *Medical Amenities* : Any one of the following amenities available in the village has been shown in abbreviations against the name of each medical institution :

1. Hospital	H
2. Maternity and Child Welfare Centre	MCW
3. Maternity Home	MH
4. Child Welfare Centre	CWC
5. Health Centre	HC
6. Primary Health Centre	PHC
7. Primary Health Sub-Centre	PHS
8. Dispensary of all types	D
9. Family Planning Centre	FPC
10. T.B. Clinic	TB
11. Nursing Home	NH
12. Registered Private Practitioner	RP
13. Subsidised Medical Practitioner	SMP
14. Community Health Worker	CHW
15. Others	O

In the aforesaid health centre of various levels family planning advice and clinical facilities may also be available which have not been shown separately. If there are more than one institutions of same type in the village, the same have been indicated in numbers against the abbreviation e.g. H(2), D(3) etc. In view of a variety of medical amenities for which a number of codes as above have been suggested, it would not be possible to provide too many details under each such amenity. Thus all registered medical practitioners whether Ayurvedic, Unani or Allopathic have been covered under the code 'RP'. It would be appropriate to mention that the term 'Community Health Worker' does not refer to workers in extension programmes like Malaria eradication, agriculture etc. It refers to only those para-medical personnel who have been trained for dispensing medicines for minor ailments. Where no facility is available within the village a dash (—) has been shown in the relevant column. But next to it in brackets, the distance in broad ranges viz.—5 Kms, 5—10 Kms. and 10+Kms of the nearest place where the most modest medical amenity like Dispensary, Community Health Worker, Primary Health Centre or Primary Health Sub-Centre or Hospital is available has been given.

(c) *Drinking Water Amenities* : The types of the portable drinking water supply sources available within the village have been given in the abbreviations as under :

1. Tap water	T
2. Well water	W
3. Tank water	Tk.
4. Tubewell water	TW
5. Hand Pump	HP
6. Fountain	F
7. Canal/Kuhls	C
8. River water	R
9. Lake	L
10. Nullah	N
11. Other sources (like baories etc.)	O

(d) *Post and Telegraph Amenities* : Post and Telegraph has been given in the abbreviations as under :

1. Post Office	PO
2. Telegraph Office	TO
3. Post and Telegraph Office	PTO
4. Telephone connection	Phone

(e) *Day/Days of the Market/Hat* : No such traditional practice exists in the entire district.

Communications :-This indicates the type of communication amenities either by bus, railways or navigable waterway available to the village, the abbreviations adopted are given as under :

1. Bus	BS
2. Railway Station	RS
3. Navigable water way (including river/ canal)	NW

If anyone of these amenities were not available to the village then the nearest such facility available with a distance in bracket is given viz. (—5), (5—10) and (10+).

(f) *Approach to Village* : The approach to village refers to the state of road etc. leading to the village. This is to see whether the village is approachable by pucca road or katcha road or by navigable canal or water-way or both. The approach to village is to be indicated by the following codes :

1. Pucca Road	PR
2. Katcha Road	KR
3. Navigable River	NR
4. Navigable Canal	NC
5. Navigable water way (other than river or canal)	NW
6. Foot path	FP

If there is more than one such facility the same has been indicated separately by individual codes.

(g) *Nearest Town and Distance* : The distance of nearest town is given in Kms. in brackets. This has been filled in purely on the basis of local enquiry The nearest town so indicated need not be within the state itself. The nearest town even in another state has been indicated wherever necessary alongwith the name of the state. Further, operational convenience has been taken into consideration while showing the nearest distance of town.

(h) *Eectricity Supply* : If the electricity is actually available whatever may be the form of its use it has been shown as available. The codes used for various category of electricity are as under :

1. Electricity for domestic purpose only	ED
2. Electricity for agriculture purpose only	EAg.
3. Electricity for other purposes like industrial, commercial, etc. only	EO
4. Electricity for all purposes listed above	EA

(i) *Staple Food* : Here the terms staple food has been used only in terms of grain and on other food material. The name of the grain consumed by the inhabitants for the major part of the year has been treated a staple food of the inhabitants, where it was not

possible to pin-point the foodgrain or in other words, where the inhabitants have been using more than one type of foodgrain more than one names have been given.

Land use : As already stated the total area of the land in its 5 broad categories has been compiled from the revenue records. In the first category, types of land under forests has been indicated and in the second and third information about cultivated area, irrigated or un-irrigated has been shown. The irrigated area has been further split up as per the sources of irrigation. Fourth being the area under cultivable waste which includes meadows, groves and pastures etc. Lastly, the area not available for cultivation such as residential area, paths and un-culturable waste etc. has been given.

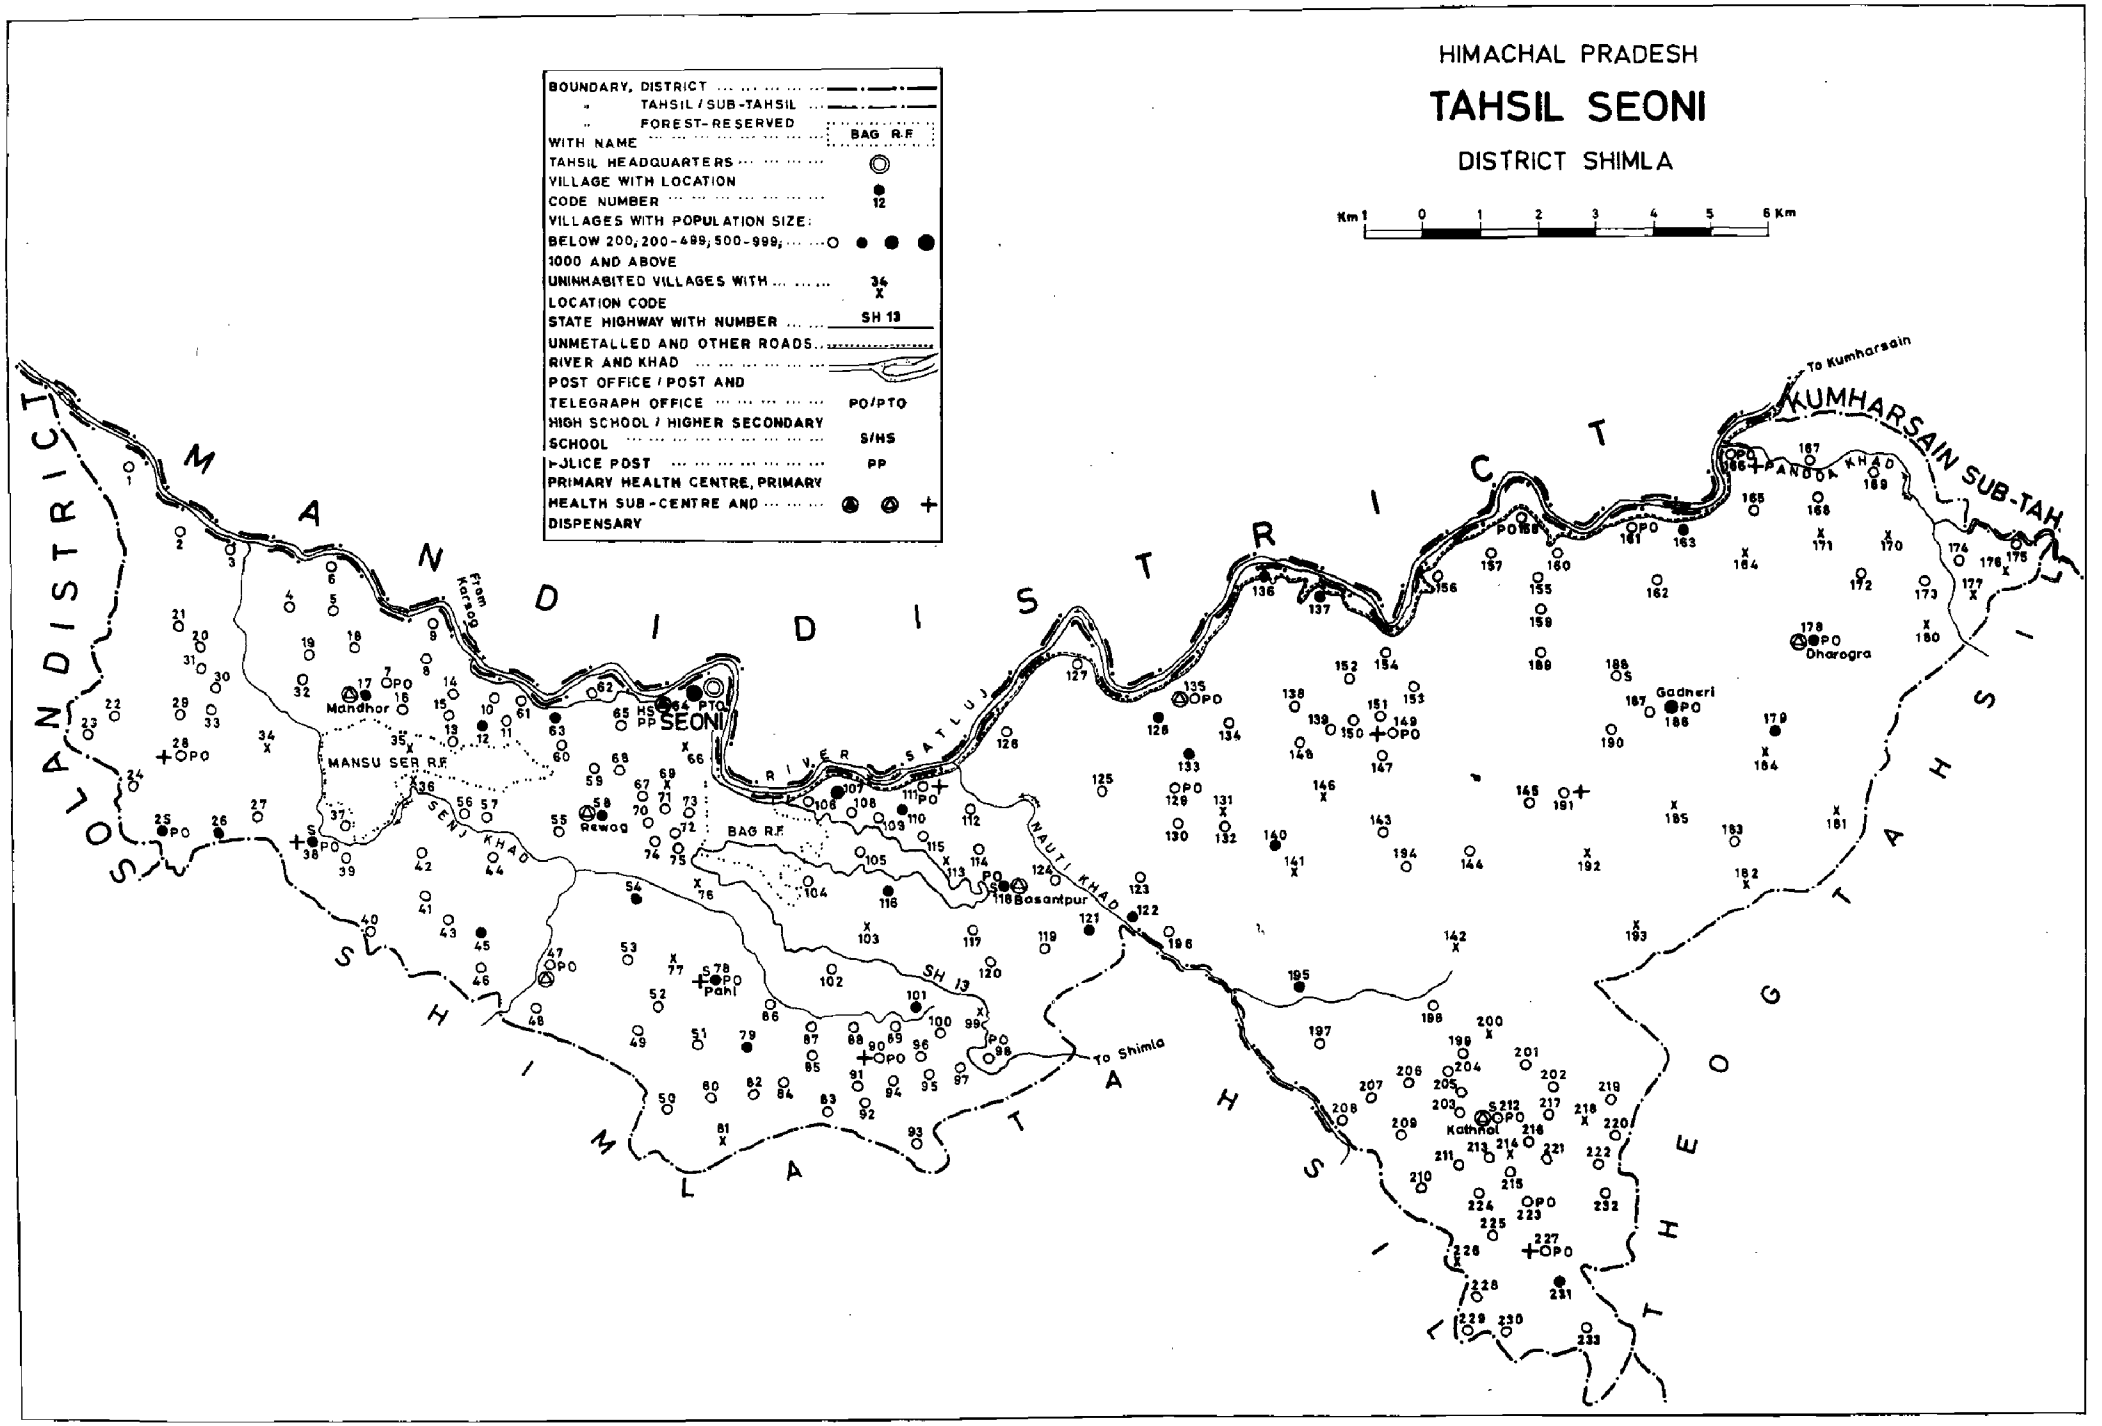

Abbreviations used for various sources of irrigation are detailed below :

1. Government Kuhl/Canal	GC
2. Private Kuhl/Canal	PC
3. Well (without electricity)	W
4. Well (with electricity)	WE
5. Tubewell (without electricity)	TW
6. Tubewell (with electricity)	TWE
7. Tank	Tk
8. River	R
9. Lake	L
10. Waterfall	Wf
11. Others	O

Abbreviations used for the information collected in Part C of the Village Directory are explained below :

1. Copies of news papers coming in the Village	N
2. Motorcycles/Scooters available in the village	M
3. Cars/Jeeps available in the village	C
4. Tractors available in the village	T

SECTION II—TOWN DIRECTORY

As already dealt in the preceding pages, the information about Town Directory is being presented in six statements each dealing with a particular set of information in respect of all the urban areas of the district. In addition to these statements another statement IV-A depicting the data for the slum areas of the towns having a population of 50,000 or more has also been included. Certain improvisations have been carried out in comparison to 1971 Town Directory in most of the statements keeping in view the requirement of the data for various purposes and convenience for its analysis.

The Statement I relate to status and growth of the towns since 1901 census. This statement has been divided into two parts. The first from column 1 to 5 deals with the locational and area particulars, whereas columns 6 to 19 deal with the demographic particulars. The column 6 gives number of households including houseless households; whereas columns 7 to 15 give population of the towns since 1901. The column 16 gives density of population per sq. km. as per 1981 Census. Columns 17 to 19 depict sex ratio in three Censuses since 1961 Census. In this statement class of the town, area in sq. kms. and number of households, density and sex ratio since 1961 are the new additions.

Statement II deals with the physical aspects and location of towns. Broadly, this statement can be divided into two parts, first dealing with rainfall and temperature data (columns 3—5) while, in the second part (columns 6—12) name and distance from State headquarter, District headquarter, Sub-division/ Tahsil headquarter, nearest city with a population 1 lakh and more, Railway Station, Bus route and Navigable river/canal (if within 10 kms.) have been presented in respect of each town. In column 2, the class of the town has been added this time to facilitates the analysis.

The Rainfall data has been obtained from the Rainfall Table published by the Revenue Department and is based on the average of last 10 years from 1971 to 1979. Information for other columns have been obtained from the local bodies.

Statement III—Data relating to civic administration status and municipal finance for the year 1978-79 has been presented in this statement. In column 3 the civic administration status in 1980 has been given whereas in columns 4 to 10 income of the local body from various sources has been presented and in columns 11 to 17 expendiure on various items is given.

These figures have been given in '00' with a view to save the printing space. The class of the town has been added in column 2. Information for this statement has been collected from the concerned local body.

Statement IV—The statement contains 19 columns. Columns 2 to 6 are the new additions of this statement. The statement on the one hand depicts general information about the towns like, class of the town, population, scheduled castes and scheduled tribes population and road length in kms., on the other hand elicit information relating to system of sewerage, No. of different types of latrines, method of disposal of night soil, protected water supply, availability of fire fighting service and number of electric connections of different types. System of sewerage and method of disposal of nightsoil are being presented up to two methods wherever available in order of importance and information on number of private latrines is based on estimates as no actual information was available with the local authorities. The categorization of electric connections is based on the record maintained by the Himachal Pradesh Electricity Board. The source of this information, being the Public Works Department, local bodies and Himachal Pradesh Electricity Board.

Statement IV-A Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented. Shimla is the only town which falls under this category. This information is required to be presented in respect of each slum separately. The information relates to population of the slum, paved roads, system of sewerage, number of latrines, method of disposal of night soil, number of the tap points/ public tyrants and number of domestic connections, road lighting points and others. The main source for this information is the concerned local body. Since there is no such town in the district as such this statement has not been included here.

Statement V—In this statement information relating to medical facilities, educational facilities, recreational and cultural facilities has been presented. Broadly this statement can be divided into 4 parts. In part one, particulars relating to class and population has been given. Part two which contains column 4 and 5 relates to various types of medical facilities and number of beds in each type of medical institution. Columns 6 to 15 deals with the various types of educational facilities available. Where these facilities were not available the distance from the nearest place where it is available has been given. It may also be mentioned here that in case of composite schools like Hr. Secondary Schools having high, middle and Primary Classes the same have been considered against each level. In column 15 the "other" includes institutions like Sanskrit institutions etc. The fourth part deals with the columns 17 to 20 wherein particulars relating to recreational and culture facilities have been presented.

Columns 2 and 3 deal with class of town and columns 15 and 16 deal with Adult Literacy Centres and working women's hostel with number of seats are the new additions this time. Information for this statement has been collected from the Chief Medical Officer, District Education Officer, Industries department, Social Welfare department and the respective local bodies.

Statement VI—The statement depicts information relating to three most important commodities imported, exported and manufactured, number of banks and number of agricultural and non-agricultural Credit Societies. All the columns of the 1971 Town Directory have been retained and column relating to class of the town has been added this time. The commodities have been mentioned in order of volume. Information for this statement has been

primarily collected from the Industries Department, concerned banks, cooperative department and the concerned local body.

For determining the class of towns the population of each town during 1981 Census has been considered. The following are the ranges for determining the class of the town.

Population range	*Class*
Less than 5,000	VI
5,000—9,999	V
10,000—19,999	IV
20,000—49,999	III
50,000—99,999	II
1 Lakh and above	I

The details of abbreviations used in each statement is given below :—

Statement I

(i) Municipal Corporation	M. Corp.
(ii) Municipal Committee	M.C.
(iii) Notified Area Committee	N.A.C.
(iv) Cantonment Board	C.B.
(v) Census Towns	C.T.

Statement II

PART B—PRIMARY CENSUS ABSTRACT

Primary Census Abstract : In this part basic population figures in respect of each village in case of rural areas and for each block in case of urban areas have been presented in 28 columns for each tashsil/ town separately. Information relating to persons seeking /available for work is not being presented as contemplated earlier in columns 29 and 30 of this statement. In census terminology this statement is called Primary Census Abstract.

This Abstract can broadly be divided into five parts. In the first part which contains first two columns, locational particulars in respect of each village/ block have been given. The first column relates to code number which has been assigned to each village within each tahsil in a particular geographical order and for each block within a town. In the second column, name of each village in English and Hindi, has been given along with its hadbast number. In urban areas, the block number has been given in this column.

The second part of the statement relates to the information pertaining to total area, number of occupied residential houses, number of households, sexwise distribution of population, sexwise population of Scheduled Castes/Tribes and literacy figures of each village and for each block in case of urban areas. In other words, this part primarily deals with demographic and social aspect. The 3rd column deals with the total area of the village in hectares as maintained in the village revenue records. For urban areas total area in sq. kms. down to ward has been presented. In column 4, total number of occupied residential houses have been presented. In this column information relating to vacant and other houses which are being used for non-residential purposes, has not been included. This information is based on Abridged Houselist of 1981 enumeration unlike such other particulars which are based on Houselist. Colum 5 deals with the total number of households in the village/block. Columns 6—8 deals with the 1981 Census total and sexwise population figures of that village/block. These columns include houselss and institutional population also. In columns 9—12 sexwise population of Scheduled Castes and Scheduled Tribes have been presented. Columns 13—14 deals with sexwise literacy figures.

The fourth part from columns 15—26 deals with the working population. In columns 15—16 sexwise main workers have been given whereas from columns 17—24 information relating to these workers into 4 broad categories of workers by sex have been presented. These categories include workers engaged as Cultivators, Agricultural labourers, Household Industry and the remaining workers which fall under the industrial classification in category III, IV, V(b),VI to IX. It may be noted here that particulars about these categories of workers are not being presented in the Primary Census Abstract itself separately. In columns 25—26 sexwise particulars of marginal workers have been presented. These workers are other than the main workers and were engaged in economic pursuits for only some portion of the year. The definition of which has been given in the analytical portion of this book. This information is being presented in the Primary Census Abstract for the first time.

The fifth part deals with the persons who are economically inactive and are dependent on others. This information has been presented in columns 27 and 28.

The district abstract of this information has been presented first and thereafter data in respect of each tahsil has been presented by rural and urban components separately.
