FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A Significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slips of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villages and towns including the scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C. D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, viz., (i) Part-A containing the Village and Town Directories and (ii) Part-B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar* Notes and Town Directory forms (for Village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as charge superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and village/urban Primary Census Abstract takes note of various infrastructual facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the District durnig the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and whole-hearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Asstt. Director was ably assisted by his team of Statistical Asstts., Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Dy. Direcotrs and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha, Asstt. Director. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Asstt. Director and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the

volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH Section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad and Shri Ashraful Hoda, who have done the typing work also deserve thanks.

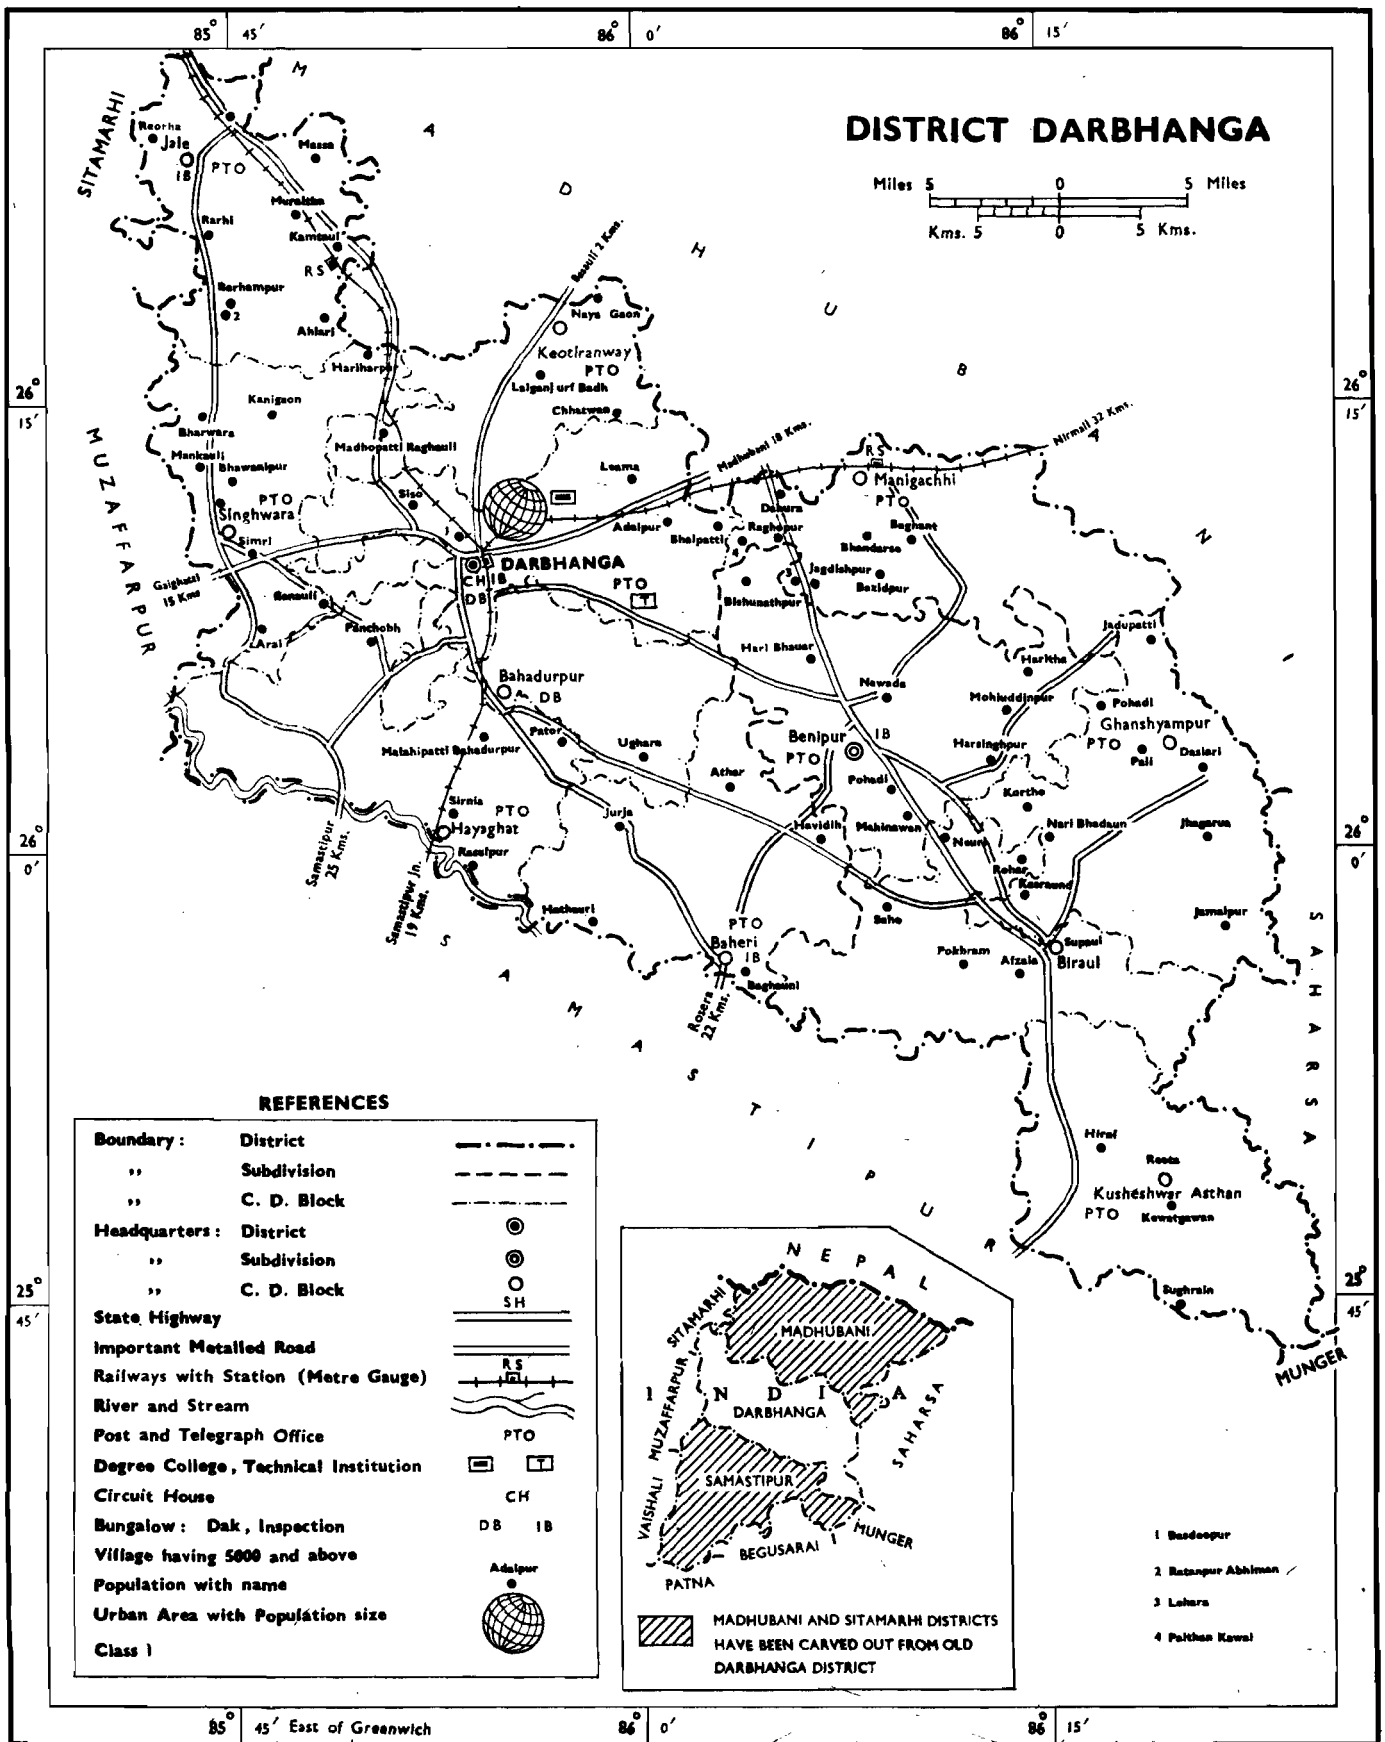

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India onder whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Leader Press, Allahabad who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

Under the British, Darbhanga was a part of *Sarkar* Tirhut up to 1875 when it was constituted into a separate district. The subdivisions had been created earlier—Darbhanga Sadar in 1845, Madhubani in 1866 and Samastipur (then known as Tajpur) in 1867. Darbhanga district was a part of Patna division till 1908 when the Tirhut division was created with its headquarters at Muzaffarpur. As a result of reorganisation of districts in the State which took effect in the year 1972, Madhubani and Samastipur districts were upgraded as independent districts and now the trimmed Darbhanga district has two subdivisions, viz., Darbhanga Sadar and Benipur consisting of 12 development blocks in all.

The district is bounded on the north by Madhubani district on the south by the districts of Samastipur and Munger, on the east by Saharsa district and on the west by the districts of Muzaffarpur and Sitamarhi.

The district takes its name from its only town, Darbhanga the district headquarters, which is said to have been founded by one Darbhangi Khan, about whom practically nothing is known. It is also held that the name Darbhanga has been derived from *Dwar Banga* or *Dar-i-Banga* meaning 'the door to Bengal'. This derivation does not appear to be very correct as the division between Bengal and Bihar has always been much further to the east. However, the linguistic and cultural affinity with Bengal may be said to commence from here.

Early history

According to the District Gazetteer of Darbhanga there are practically no prehistoric sites in the district though remains of the earliest aboriginal population can be seen in some parts of the district. Darbhanga lay on the great lines of Aryan immigration at a time when other parts of Bihar were outside the pale of Aryan influence. According to a legend, Darbhanga formed a part of the territory in which the Videhas settled on their migration from Punjab. They were guided to the east of the Gandak river by *Agni*, the God of fire, and told to settle there. Settlements were accordingly established and the kingdom of Videha founded. The kingdom included a greater portion of the modern district of Darbhanga. The kingdom, in course of time, came to be ruled by a successive line of kings commonly known as Janaks. Of them, Janak Siradhvaja was the father of Sita. Prominent among them were Yajnavalkya who codified the Hindu Law and Gautam (the husband of Ahilya) who has valuable philosophical treaties to his credit. King Janak himself was a great philosopher and his ideas have been eternally enshrined in the *Upnishads*.

In the course of time, the Videhan monarchy is believed to have been replaced by a *Sangha* or federation in the form of a republic. The establishment of the Vrijjian republic (of which Videha was a part) marks the beginning of the historic period. The centre of power had, however, shifted to Vaishali and the Lichchhavis were the most prominent among the different clans that constituted the federation. The ascendancy of the Vrijjian republic was checked by Ajatshatru, Emperor of Magadh, who subdued and extended his control over north Bihar. This control, however, extended only to an acknowledgement of suzerainty; the small republics that had constituted the federation continued to flourish. In fact the continuous history of the Lichchhavis up to the

Gupta period can be traced, with some certainty. Presumably Darbhanga, like other parts of Bihar, passed through religious upheavals in the 6 th century B. C. when Gautam Buddha and Mahavir Vardhamana expounded their doctrines. That the second Buddhist council took place at Vaishali (in the 4th century B. C.) indicates that Buddhism had entrenched itself in the area at that time.

The Sisunaga and Nanda empires included th Darbhanga district. Under the Mauryas, the administrative hold was further tightened and their rule was marked with stability and prosperity. Ashoka had visited Vaishali. The Sungas (who came to power in 185 B. C.) and the Kanvas also held sway over the district. From the time of the Kushanas till the rise of the Guptas, the history of the district remains more or less uneventful.

Matrimonial allianess with the Lichchhavis enabled the Guptas of Magadh to regain control over north Bihar which came to be known as Tirabhukti. Vaishali was the administrative headquarters of the Tirabhukti region. The Chinese pilgrim, Fa-Hien visited north Bihar during the reign of Chandragupta II. He observed that Buddhism was no longer as flourishing as in the past. The earlier renown of Darbhanga as the place of philosophers continued in Gupta period as well. Kumarila Bhatt was a prominent philosopher. With the decline of the Gupta Empire, local autonomy reasserted itself. Later, Harashavardhana (606-648 A. D.) annexed Darbhanga. Hiuen Tsang visited the area in 635 A. D. After the death of Harshavardhana, due to friction with a Chinese mission, Tirhut was invaded and occupied by the combined forces of Tibet and Nepal. They were, however, driven off by Adityasena (672 A.D.). After the fall of the later Guptas, Yasovarman of Kannauj (700-740 A.D.) ruled over the area. Tirhut came under the Pala Kings of Bengal in the 9 th century. The Karnata or Simraon dynasty was founded in 1097 by Nanyadeva who had to face conflict with the Senas of Bengal.

Medieval period

Nanyadeva became very powerful and eventually succeeded in extending his domain over the whole of Mithila and Nepal. One of his sons ruled over Nepal while, Ganga Deva, reigned in Mithila. The latter is known to be the first ruler to have constituted fiscal divisions for revenue administration. His kingdom was divided into *Parganas* which in turn were split up into a number of *panchayats*. Ganga Deva is attributed to have built fortresses in the village Lahera Raja in Bahera police station. He is also said to have excavated two large tanks, known as *Ganga Sagar*, near Darbhanga railway station. Narsingh Deva ascended the throne on the death of his father Ganga Deva. He quarrelled with his kingsman in Nepal sa a result of which Mithila and Nepal were separated for ever. He was succeeded by his son Ram Singh Deva, who was a great scholar of Vedic literature and an able administrator. During his time several commentaries on the Vedas were compiled and a code of conduct was drawn up for the guidance of Hindus in their religious and social activities. Ram Singh Deva is credited with the introduction of the system of *patwaris* or village accountants for the mainstenance of village records. Hara Singh Deva was the last rular of the dynasty. He is known to have excavated several tanks in the district, and to have prepared records of the caste subdivisions of the Maithil Brahmins and the Karna Kayasthas. It was during his rule, that Tughlak Shah led a successful military expedition to Tirhut in 1329. The fort of Ram Singh Deva was besieged but he himself managed to escape to Nepal.

With the fall of the Simraon dynasty, Tirhut was annexed by the empire of Delhi. Different ruler. prominent among them being Kameshwar Thakur, Bhogiswar Thakur, Kirti Singh and the most important of them, Shiva Singh were made incharge of the territory. The tenure of the rulers depended on the pleasure of the Emperor. The territory was brought under the direct ad ministration of the Muslim Governors in 1532

Though Darbhanga, alongwith other parts of north Bihar, was annexed to the Mughal Empire, the control was very loose and the local chiefs exercised great power. North Bihar had many Afghan settlers. Their number had increased owing to the large scale immigration of those who had refused to serve the Mughals. They were turbulent, and when Daud Khan, the Afghan king of Bengal, rose in revolt in 1574, he got a band of ready supporters in them. When the Mughal generals failed to control the rebellion, Emperor Akbar himself led a large army to crush the aspirations of Daud Khan. The Afghans were defeated and Bihar

was lost to them. Akbar created a separate Subah of Bihar and placed it under Mughal Governor. Darbhanga thereafter remained a part of the Mughal *Subah*. There was no event of great significance during the next century and a half until the arrival of the Britishers in the country.

The decisive victory of the British in the battle of Buxar in 1764 gave them undisputed sway over the lower provinces of Bengal. As a consequence, Darbhanga alongwith other parts of Bihar, passed under the control of the British. The history of the district thereafter is merged with the history of the British rule in India.

After assuming control over the territory, the British took steps to consolidate their authority. Mithila, the enlightened home of Hindu culture and learning, had been ravaged by the Muslim and the Mughal armies from time to time. During the period of transition from the old order to the rule of the East India Company, lawlessness increased. The British administrators took steps to establish law and order immediately as the responsibility devolved upon them. Besides the trouble-monger in Mithila, they had also to deal with the incursions of the Nepalese. The troubles with Nepal culminated in the Indo-Nepalese war. After having concluded peace with Nepal, the British administrators had a comparatively quiet time till the 1857 movement.

In 1857 patriotic fervour raged high in Darbhanga as in many other districts of Bihar. The success of the rebel forces over Captain Dunbar at Dinapore gave great impetus to leaders of the freedom movement. The disillusioned *Zamindars* were secretly supporting the cause. The Nepalese came to the aid to the British and with their support they succeeded in controlling the movement. Nothing very significant happened in the district during the next fifty years. Though the East India Company had succeeded in arresting the National Movement of 1857, the country's resolve to free itself from foreign domination continued. In the beginning, the patriotic fervour found expression through the establishment of schools and other social institutions. The Saraswati Academy was founded in 1901 at Darbhanga.

The call for non-co-operation found adequate response in the district of Darbhanga and many people volunteered to serve the cause championed by Mahatma Gandhi. Use of *swadeshi* goods was encouraged and *Khadi* became very popular. In August, 1926 a *Khadi* exhibition was opened at Laheriasarai by Dr. Rajendra Prasad. Mahatma Gandhi also paid a visit to the district in connection with his mission to popularise *Khadi*.

Soon Darbhanga became the nerve-centre of political awakening. It played a very prominent role in the freedom movement and some of the most important leaders of Bihar during that time, such as Sri Braj Kishore Prasad, Dharnidhar Prasad, etc., lived here. Though the popular agitation was suppressed at times, the movement continued and finally culminated in the independence of the country in 1947.

Natural divisions

The district consists of a vast low-lying plain intersected by numerous streams and marshes and contains some uplands. The land in the northern part generally has a higher elevation. The district is a vast alluvial plain devoid of any hills. It is watered by numerous rivers originating in the Himalayas. The low lying areas contain marshes and lakes. The district contains four main river systems, viz, the Bagmati, little Bagmati, Kamla and Tiljuga. The Bagmati, which enters this district from Muzaffarpur, forms a natural boundary between it and Samastipur district and pursues a south-easterly course till it empties itself into the Burhi Gandak river near Rusera. The little Bagmati enters the district from Madhubani near Pali and runs past the town of Darbhanga down to Hayaghat, where it is joined by the Bagmati proper. The Kamla enters the district at Singar Pandaul, and flowing east of Darbhanga, joins the Tiljuga at the south-eastern corner of Rusera block. The Tiljuga skirts the eastern boundary of the district.

Climatic conditions

There are three well marked seasons; the cold, the hot and the rainy. The cold weather begins in November and continues up to February, though March is also somewhat cool. Westerly winds and dust storms begin to blow in the second half of March and the temperature rises considerably. May is the hottest month when the temperature goes up to 42° C. Rains set in towards the middle of June. The rains continue till the end of September or middle of October. With

the cessation of rains the temperature falls and the climate become rather pleasant.

The average normal rainfall of the district is 1,261 mm. As has been said earlier the rains usually start in the middle of June. The maximum rainfall occurs between the second half of July and the first half of August. The district also gets some winter rain.

Flora and Fauna

The land in Darbhanga is generally very fertile and there are hardly any uncultivated areas. The district is, therefore, devoid of any forests. Among the trees found in the district are *Sisu, Khair, Palmyra* and *Khajur.* Mango, jack-fruit, *Pipal* and tamarind are found near village settlements. The district also has some tracts of grass lands.

Wild animals existed in the district up to the end of the 18th century. But with the progressive use of land and rapid growth of population, the forest areas were cleared and the wild animals became almost extinct. Wolves and hyenas are rare, while jackals are common. Fox and wild cat are also met with occasionally.

Among the birds found in the district are various kinds of quails, partridges and ducks, Snipes. cranes, storks and sparrows are commonly seen. Fish are plentiful. The common varities are *Rohu, Bachwa, Tangra, Katla, Singhi* and *Boari. Hilsa* is found only occasionally.

Mines and Minerals

The district is formed of thick alluvial soil. Beds of *Kankar* or nodular limestone of inferior quality are occasionally seen. The river banks are generally made up of new alluvial formed by continuous deposit of silt by the rivers. Saltpetre is the only mineral found in the district.

Land use pattern

The district is basically agricultural in character. The soil of the district is highly calcareous. It is mixture of clay and sand in varying proportions. In the low lying central area, *bangar* soil is found. It is a mixture of clay and sand in almost equal proportions. This soil too is suitable for the cultivation of rice and *rabi* crops.

Rice is the main crop of the district. Maize, wheat and sugar-cane are the other important crops grown in the district. *Makhana* grows in tanks and shallow pools of waters in the district. It is a unique product of Darbhanga district and is exported to different places in the country.

Of the total area of the district, about 80 per cent area is cultivable and the rest are utilised for non-agricultural purpose. Improved methods of cultivation have been introduced by adopting better agricultural implements, certified seeds and chemicals. Government has taken a number of measures to train the farmers and supply to them the requisite seeds and fertilizers at the village level itself. Financial assistance as well as loans to needy farmers have also been made available through the State Government agencies and the nationalised banks including the Gramin Banks.

Irrigational facilities

Artificial irrigation, although important, has played a comparatively minor part in the agricultural economy of the district. The district of Darbhanga like the rest of other districts of North Bihar, is dependent for its crops on the local rainfall. Irrigation in Darbhanga is linked up with flood control measures and drainage schemes. After independence, considerable attention was paid to the provision of flood control measures and irrigational facilities in the district, principal among them being the Kosi Embankment and the Kosi Canal. Thereafter, a number of other schemes were also taken up during the different plan periods. Besides these, several Minor Irrigation Schemes were executed for expansion of irrigational facilities in the district.

Fisheries

Fish is a favourite item of food for the people of Darbhanga. Fish and rice are very popular in the district as the staple diet. Most of the rivers, tanks, *Jhils* and low water-logged areas abound in fish and this district is one of the principal fish producing centres in Bihar. Fisheries Department of the State Government looks after the development of pisciculture.

Industrialisation

The old time industry which is still continuing in the district is the manufacture of sugar. Sugar indu-

stry has not only survived but has become one of the important industries in the district and consumes the large outturn of sugar-cane within the district and also draws supplies from beyond the district.

The manufacture of cotton fabrics of various types is still continuing and quite a good quantity of Darbhanga handloom fabrics goes out of the district. Similarly some other cottage industries such as the manufacture of pottery, mats, baskets, brass utensils, blanket weaving, making of shoes and lac bangles have received encouragement from the Government and the public in recent years.

There are, however, no mining or heavy industries in this district except the Ashoka Paper Mill and the Ryam Sugar Co. Ltd.

Livestock

Livestock is very important in a district like Darbhanga with a predominently agricultural economy. Buffaloes are reared in large number, and the district has long been noted for its breed. They are chiefly valuable for the milk they yield in large quantity. Besides, bullocks of Bachaur breed are also reared extensively. These are also sent to the cattle fairs at Sonepur and Sitamarhi. However, all parts of the district are not so well-stocked with cattle as the low lying areas are always liable to inundation, from which the cattle always suffer very severely. It is difficult to rear good quality of sheep for want of adequate pasturage. Goats of common variety are found in every village. Goat-milk is, however, not popular in the district.

In order to protect the livestock from various diseases and epidemics and also to improve the breed, the Animal Husbandry Deptt. of the State Government has adopted some very useful and concrete measures. It has established veterinary hospitals, sub-centres, artificial insemination centres, poultry farms etc, all over the district covering majority of villages. Poultry development has received considerable attention to various Community Development Blocks.

Communications

The district of Darbhanga has a well-knit communication system. It is served by the North Eastern Railway, has a sound system of roadways and considerable boat traffic in the bigger rivers. The railways and the roadways have now became more important trade routes than the waterways. There has been considerable expansion and development of roadways since independence and the public and private carriers and long distance passenger buses have become a rival of the railways.

From Samastipur, a line runs to Darbhanga from where it branches off in two directions. One branch goes to the north west through Kamtaul and Jogiara in the district to Sitamarhi and one to Raxaul. The second branch goes to Sakri in the east from where it bifurcates, one going from Sakri to Jainagar via Madhubani and the other to Nirmali in Saharsa, through Jhanjharpur and Phulparas.

The district has a good number of roads half of which are black-topped including the State Highways. These are managed by the Public Works Department. In addition, village roads providing communications, with sugar factories etc., have also been constructed. The District Board and the Municipality manage various other less important roads. There are frequent bus services on the roads.

Country boats ply on the Bagmati river throughout the year and on the Kamla during the rainy season. Cargoes of various commodities are transported by river.

The district has a landing ground. However, there is no regular air service in the district.

Trade and Commerce

The development of the means of communication has had a great impact on the trade and commerce of the district. The district may now be said to be fairly well-connected by rail, road and waterways.

In the district the trade consists mainly of exporting rice, fruits, vegetables, pulses, mustard seed, *ghee*, linseed etc., and importing foodgrains, timber, coal, salt, kerosene oil, textile goods and other consumer goods. From the earliest time Darbhanga has had a brisk trade with Nepal.

Darbhanga is a very important trade centre mainly in agricultural cash crops. Wholesale trading in grains is carried on at Darbhanga bazar, the chief

centre of the wholesale business in the district. This trading centre has also developed a grain *mandi*. The retail shops of almost all the commodities consumed locally are found at Darbhanga and Laheriasarai.

Electricity and Power

The district receives its entire power supply from the Barauni Thermal Power Plant of the Bihar State Electricity Board.

After independence, the Government has been paying full attention to rural electrification and a large number of villages has been electrified. Domestic and commercial use account for the major quantity of the power consumption in urban areas while in the rural areas the main consumption of electrical power is for agricultural purposes.

Social and cultural events and natural and administrative developments

No major social or cultural event has taken place in the district of Darbhanga after the creation of Madhubani and Samastipur as independent districts.

Kusheshwar Asthan C. D. Block was earlier a part of the old Samastipur subdivision and became a part of Samastipur district after reorganisation. However, after some time the State Government decided to transfer this C. D. Block from Samastipur District to Darbhanga District on administrative considerations.

Fairs and festivals are held regularly in the district by different communities in complete harmony.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Ahalya Asthan

It is a famous historical temple, situated about 4 Kms. away from Kamtaul Railway Station. The temple is dedicated to Ahalya, wife of Gautam Rishi. Large fairs are held every year on the occasion of Ramnavami in the Hindi month of *Chaitra* and *Vivah Panchami* in *Agrahayan*. There are various other temples and mosques in the village.

2. Brahmpur

The village is situated about 8 Kms. away from Kamtoul and 19 Kms. south-east of Jogiara. The village is noted for the Gautam Kund and a temple of Gautam *Rishi* which are located very close to it. According to the *Puranic* tradition Lord Brahma appeared before Gautam *Rishi* at this place after the chastity of his wife, Ahalya, had been violated by Indra and Chandrama. The village derives its name from this occurance. In regard to the Gautam *Kund*, it is believed that God Brahma himself created the tank by piercing the earth with seven arrows, so that Gautam might not have to travel a long distance for bathing in the Ganga.

3. Chhaprar

The village is situated in Bahadurpur block, at a distance of about 10 Kms. from Laheriasarai. It has a temple of Lord Mahadeva on the bank of the Kamla river around which fairs are held on the occasion of *Kartik* and *Maghi* Purnima.

4. Dekulidham

The village falls in Biraul block and is noted for its large temple of Lord Shiva. Devotees congregate here every Sunday. A large annual fair is held on the occasion of *Shivaratri*.

5. Kamtaul

The village is a rail head in Jale block. The village has a *Khadi gramodyog* centre and a *Khadi* store. It is the rail head for visitors to Ahalya-sthan and Gautam-sthan.

6. Kusheshwar-asthan

It is an important religious place, situated about 16 Kms. east of Singhia and 22 Kms. north-east of of Hasanpur Road railway station on the Samastipur-Khagaria Branch line of North Eastern Railway. It is noted for the temple of Lord Shiva known as Kusheshwarasthan. Pilgrims visit this place all the year round for worship. The origin of this temple is traced to the epic period.

7. Mahiram-Mahadeo-sthan

It is a temple of Lord Shiva situated at a distance of about 5 Kms. from the Darbhanga-Biraul *pucca* road. Large annual fairs are held here on the occasion of *Kartik* and *Maghi Purnima*.

8. Makranda

Situated about 5 Kms. south of Manigachhi railway station, the village is known for its old temple called Banwaristhan.

9. Newri

The village lies about 13 Kms. west of the block headquarters at Biraul and contains the remains of an ancient fortress associated with Raja Lorick.

10. Nawadah Durga-sthan

It is a famous temple of Goddess Durga Located on the Majhora-Nawadah Road. The place is visited by hundreds of devotees everyday. The *Dussehra* festival is celebrated here with great enthusiasm.

11. Raghopur

The village is situated about 5 Kms. south of Sakri railway station. It is noted for its earthen mound, known as Sheosingh-garh which is believed to cover the ruins of a building built by Raja Shiva Singh.

12. Darbhanga town

Darbhanga town attained the status of a city (population 1 lakh and above) in 1961. Darbhanga is the seat of the Maharaja of Darbhanga. Laheriasarai which is the seat of district and divisional administration is a part of the Darbhanga town. The Raj area is a well-developed and beautifully laid-out complex of palaces, temples,offices, parks, gardens and ponds. There are a number of palaces built by the successive Maharajas, important among them being Nargauna Palace, Rambagh Palace, Anandbagh Bhawan and Bela Palace. A number of buildings are in the use of the Sanskrit University and L.N. Mithila University. The old Raj Library has been taken over by the Mithila University. The Maharajas of Darbhanga have traditionally been very great patrons of art and literature and through their manificence have always provided encouragement to the scholars of Maithili and Sanskrit. Mahesh Tahkur who founded the Raj was a renowned scholar of Sanskrit. The estate was conferred upon him by Emperor Akbar who was very much impressed by Raghunandan Jha, a scholar and disciple of Mahesh Thakur.

The town is noted for its trade in fish, mango and *makhana*. Among its educational institutions are Chandradhari Mithila College, the Medial College, the Women's College, the Engineering School and various other institutions.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly Comprehensive and uniform is among the traditional documentation of the Census organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part—C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and imputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirement of the Minimum Needs Programme of the Planning Commission.

A new statememt (IV-A) of civic and other amenities for each area/locality identified as slum in class I and II towns has been added.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses

and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the thana jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census, the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size.

Class of town		Population
I	...	1 lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000—9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common coartyard or staircase, etc. used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop *-cum*—residence, workshop—cum—residence, school—*cum*—residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons ralated by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes&Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477 A, dated the 29 th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given on the next page :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

The district of Darbhanga, with a population of 2,008,193 persons is divided into 12 Community Development Blocks consisting of 1,058 inhabited villages (out of a total number of 1,322 villages including 53 villages which are the constituent units of the only town of the district) and 1 town. Darbhanga district, which has always been at the top in order of population (except in 1872 when it was next only to Muzaffarpur) now comprises only 2.87 per cent of the total population of the State and ranks as low as 19th in the state in order of population after the separation and creation of Madhubani and Samastipur as independent districts.

The following table highlights the population, number of villages and towns for the district as also for its various development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Darbhanga	315,571	164,397	151,174	139,270	70,210	69,060	176,301	94,187	82,114	190	104	1

10	Ghanshyampur	163,930	83,152	80,778	163,930	83,152	80,778	...	..	...	82	71	...
11	Biraul	150,066	75,425	74,641	150,066	75,425	74,641	...	...	...	86	77	...
12	Kusheshwar Asthan	127,970	64,945	63,025	127,970	64,945	63,025	...	...	...	109	105	...
	Total	**2,008,193**	**1,014,939**	**993,254**	**1,831,892**	**920,752**	**911,140**	**176,301**	**94,187**	**82,114**	**1,322**	**1,058**	**1**

It would be seen from the table on previous page that among the C.D. Blocks, there is a wide range of variation in the distribution of population. Darbhanga block with 15.71 per cent of the population of the district occupies the first place, probably because Darbhanga town, district headquarters is located in this block. It is followed by Benipur and Manigachhi blocks with 9.73 and 9.29 per cent of the district population respectively. The least populated C.D. Block is Bahadurpur with 6.22 per cent of the population of the district.

The average population of block in the district is 167,349. Only 3 blocks out of 12 or 25.00 per cent of the total number have higher population than the average indicated above. Together they contain as much as 34.74 per cent of the total district population.

Darbhanga district, which has been trimmed after carving out of Madhubani and Samastipur districts, appears to have had less impact of urbanisation since 91.22 per cent of the population lives in the villages against the state break up of rural and urban population of 87.53 and 12.47 per cent respectively. The total urban population contained in the only town of Darbhanga is only 8.78 per cent of the population of the district. The low urban population content may be attributed to the fact that the district has only one urban centre to its credit. Darbhanga town falls in class I range (population 1 lakh and above) and has been a city for the last two decades. The district does not have any urban agglomeration.

Decadal change in population.

Darbhanga subdivision of the old Darbhanga district, now constitutes the jurisdiction of the present district of Darbhanga after reorganisation. The percentage increase in the population of the district and its development blocks is presented in the table below.

Table 2—Decadal change in distribution of population

Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Darbhanga	242,849	110,790	132,059	315,571	139,270	176,301	+29.95	+25.71	+33.50
Bahadurpur	101,194	101,194	...	124,921	124,921	...	+23.45	+23.45	...
Hayaghat	135,836	135,836	...	161,429	161,429	...	+18.84	+18.84	...
Singhwara	120,494	120,494	...	148,819	148,819	...	+23.51	+23.51	...
Jale	119,041	119,041	...	144,923	144,923	...	+21.74	+21.74	...
Keotiranway	112,320	112,320	...	142,569	142,569	...	+26.93	+26.93	...
Manigachhi	152,446	152,446	...	186,642	186,642	...	+22.43	+22.43	...
Baheri	120,637	120,637	...	145,981	145,981	...	+21.01	+21.01	...
Benipur	159,502	159,502	...	195,372	195,372	...	+22.49	+22.49	...
Ghanshyampur	130,003	130,003	...	163,930	163,930	...	+26.10	+26.10	...
Biraul	122,829	122,829	...	150,066	150,066	...	+22.17	+22.17	...
Kusheshwar Asthan	105,661	105,661	...	127,970	127,970	...	+21.11	+21.11	...
Total	**1,6 22 ,812**	**1,490,753**	**132,059**	**2,008,193**	**1,831,892**	**176,301**	**+23.75**	**+22.88**	**+33.50**

It would appear that rise in the population of this district during the 1971—81 decade has been of the order of 23.75 per cent which is less than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 22.88 per-cent while urban population growth over the decade has been of the order of 33.50 per cent. The higher growth in the urban population is partly attributable to the expansion of Darbhanga town on account of its being the headquarters of the newly created Darbhanga division and also due to rural-urban migration.

As shall be evident from the table, variation in growth of population among the development blocks is wider still. Darbhanga block has shown the highest increase in population over the decade with 29.95 per cent probably because Darbhanga town, the district headquarters is located in this block. The next highest increase in population is observed in Keotiranway and Ghanshyampur blocks with 26.93 and 26.10 per cent respectively. Percentage decadal variation has been observed to be the least in the case of Hayaghat block with only 18.84 per cent decadal increase.

The increase in rural population during 1971—81 has been the highest in case of keotiranway block (26.93%) followed by Ghanshyampur block (26.10%) which may, perhaps be due to the lower rate of outward movement of the people.

As regards growth in urban population, it can be seen from the table that Darbhanga is the only block which contains a town, viz., Darbhanga (M), and it has registered an increase of 33.50 per cent over the decade.

Village classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups.

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	101	9.55
200—499	156	14.74
500—1,999	519	49.06
2,000—4,999	207	19.57
5,000—9,999	63	5.95
10,000+	12	1.13
Total	**1,058**	**100.00**

It would be seen from the table that mostly the villages in the district are medium and small-sized as the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 2,000—4,999 accounting for 49.06 and 19.57 per cent of the total number of inhabited villages respectively in the district. Medium and small-sized villages are thus much more in number than large villages (Population above 5,000) in the district. The large villages with a population of 5,000 and more constitute only 7.08 per cent of the inhabited villages in the district. There are 12 villages in the district (1.13%) having more than 10,000 persons each. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 whereas in the old Darbhanga district it was as high as 1,571. As per 1981 Census the average population size of an inhabited village in the district of Darbhanga works out to 1,731 which is much higher than State average of 906.

Villages classified by density

The density of population is defined as the number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below.

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
0—10	2	0.19
11—20	2	0.19
21—50	8	0.75
51—100	12	1.13
101—200	28	2.65
201—300	51	4.82
301—500	150	14.18
501+	805	76.09
Not Known	...	...
Total	1,058	100.00

The data presented in the table on previous page highlight the fact that the proportion of villages in the district varies in direct relation to the density range,the maximum being in the density range of 501 Kms. or more with 76.09 per cent followed by villages in the density range of 301—500 which account for 16.95 per cent of the villages.

It would further be seen that comparatively small number of villages fall in the density range below 300 implying thereby that the number of thinly populated villages in the district is quite low.

Proportion of Scheduled Castes/Tribes in the villages and towns

Tables 5, 6 and 7 furnished below indicate the proportion of the population of the Scheduled Castes and Scheduled Tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and the Scheduled Tribes at micro level, particularly in relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	130	12.29
5 or less	123	11.63
6—10	204	19.28
11—15	176	16.63
16—20	126	11.91
21—30	138	13.04
31 and above	161	15.22
Total	1,058	100.00

It is discernible from the table that there are only 161 villages (15.22%) where the percentage of Scheduled Caste population to the total population is more than 31 per cent and there are 130 villages out of a total of 1,058 inhabited villages (12.29%) which do not have any population of the Scheduled Castes at all. The maximum number of inhabited villages having Scheduled Caste population lie in the range of 6—10 per cent (19.28%) followed by the percentage range of 11—15 (16.63%).

Table 6—Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,052	99.43
5 or less	6	0.57
6—15	...	...
16—25	...	...
26—35	...	...
36—50	...	...
51 and above	...	...
Total	1,058	100.00

It will be seen from the table that the dispersal of Scheduled Tribe population is not on the same pattern as that of the Scheduled Caste population. As many as 1,052 inhabited villages (99.43%) in the district have no scheduled tribes at all. There are only 6 villages comprising 0.57 per cent of the total number of inhabited villages which have a population of scheduled tribes. Even in these villages the scheduled tribes account for only 5 per cent of the total population or even less.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in the towns

Name of town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Darbhanga	176,301	18,805	68	10.67	0.04
All towns	176,301	18,805	68	10.67	0.04

The table on previous page indicates that the percentage of Scheduled Caste population in the town of Darbhanga district (there is only one town viz; Municipality) is of the order of 10.67 per cent of the Darbhanga total population as against 14.98 per cent in the rural areas(Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and predominantly rural base of the economy of the district. The extent of scheduled caste population in Darbhanga (M) is obviously the same, viz.; 10.67 per cent.

The urban content of the population of the Scheduled Tribes in the district is very low being only 0.04 per cent. The corresponding proportion in the rural areas is almost negligible (0.0008%). As already stated, since there is only one town viz; Darbhanga (M) in the district, the figure relating to urban areas of the district is identical to that of Darbhanga town.

Literacy rates by population range of villages and towns

According to the census terminology, a person who was able to read and write any language with understanding was treated as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately.

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
— 200	101	13.31
200— 499	156	16.41
500—1,999	519	19.42
2,000—4,999	207	21.97
5,000—9,999	63	23.15
10,000+	12	22.93
Total	**1,058**	**21.32**

It would be seen from the table alongside that literates form 21.32 per cent of the total population in the rural areas of the district as against 51.20 per cent in the urban areas (Table 9). In the rural areas it can be observed that literacy rate varies between the maximum of 23.15 per cent in the population range of 5,000—9,999 and the minimum of 13.31 per cent in the population range of less than 200 persons.

Table 9—Literacy rates for towns.

Name of the Town	Literacy rate
1	2
Darbhanga	51.20
All Towns	**51.20**

The proportion of literate population in Darbhanga (M), which is the only town in the district, is as high as 51.20 per cent. The literacy rate in the urban areas of the district is almost two and a half times the rate in rural areas. It is actually the poor performance of rural areas which is responsible for pulling the district downward in the overall assessment of literacy.

Workers and Non-workers in rural and urban areas of the district.

The table on next page gives the percentage breakup of literates, main workers, marginal workers, total workers, non-workers and the number of the scheduled castes and the scheduled tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table 10—Literates, Workers, Non-workers, Scheduled Castes/Tribes population in the district

Total	T	1.51	0.75	2.27	28.91	49.68	7.68	71.09	50.32	92.32
	R	1.63	0.81	2.46	29.49	50.67	8.08	70.51	49.33	91.92
	U	0.17	0.18	0.16	22.87	40.02	3.20	77.13	59.98	96.80

Total workers in the district of Darbhanga account for 28.91 per cent of the total population whereas the proportion of non-workers is as high as 71.09 per cent. Main workers (i.e. those who had worked for 6 months, or 183 days or more during the reference period of one year) constitute 27.40 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very low in the district being 1.51 per cent. The same trend can be observed in both the rural and urban areas of the district as also in almost all the development blocks except Kusheshwar Asthan block where the proportion of marginal workers is as high as 5.54 per cent (Males 1.87%, females 9.32%).

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 49.68 and 48.93 per cent respectively for males as against 7.68 and 5.41 per cent respectively for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (2.27%) vis-a-vis male marginal workers (0.75%) in the district. It may be due to the fact that apart from household duties women do some work for the day or the season to supplement the household income. It can be seen that the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (29.49%) than in the urban areas (22.87%). The same pattern is perceptible in the case of main workers as well as the marginal workers who constitute 27.86 and 1.63 per cent respectively of the rural population but only 22.70 and 0.17 per cent respectively of the urban population. This may be due to the fact that in the rural areas, people generally find an easy employment in various agricultural activities, whereas, in the urban areas, household industries and other works do not offer equal short-term job opportunities due to limited urban development.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/*Hat*	Communications	Approach by *Pucca* road	Power supply

11	Biraul	77	63(81.81)	14(18.18)	77(100.00)	20(25.97)	3(3.90)	25(32.47)	21(27.27)	5(6.49)
12	Kusheshwar Asthan	105	70(66.67)	15(14.29)	105(100.00)	16(15.24)	6(5.71)	20(19.05)	20(19.05)	1(0.95)
	Total	1,058	798(75.43)	266(25.14)	1,058(100.00)	239(22.59)	78(7.37)	229(21.64)	290(27.41)	214(20.23)

Educational amenity—There are as many as 798 villages accounting for 75.43 per cent of the total nunber of inhabited villages (1,058)in thedistrict where educational facility is available. The highest proportion of villages with educational facility is in the development block of Ghanshyampur where 87.32 per cent villages have this facility. It is followed by Manigachhi and Biraul blocks with 85.19 and 81.81 per cent villages respectively having educational facility. The lowest number of villages with educational facility is in the development block of Bahadurpur with only 64.41 per cent villages having the facility of education.

Medical amenity—The availability of medical amenity in the villages is considerably low as only 25.14per cent of inhabited villages have got it. Among the development blocks. Manigachhi, Benipur and Ghanshyampur blocks are on the top in respect of availability of medical amenity. Manigachhi block has 60.49 per cent of villages with medical facility while Benipur and Ghanshyampur blocks have 41.76 and 40.85 per cent such villages respectively. Bahadurpur block, on the other hand, has the least number of villages (8.47%) where any kind of medical facility is available.

Drinking Water—It would be seen from the table that drinking water facility is available in all the inhabited villages of the district of Darbhanga.

Post and Telegraph—Postal facilities (Post & telegraph) are available in 239 villages out of total of 1,058 inhabited villages (22.59%) in the ditstrict. Here also Manigachhi block has the maximum number of villages having post and telegraph facilities (39.51%) followed by Benipur (28.57%) and Ghanshyampur (28.17%) blocks. In the remaining development blocks of the district the proportion varies from a minimum of 11.02 per cent(Bahadurpur block) to a maximum of 28.05 per cent (Singhwara block).

Market/hat--The villages where market/hat is held constitute only 7.37 per cent of the inhabited villages in the district. Jale block has the maximum number of inhabited villages where market/hat is held, the percentage being 21.43 followed by Baheri, Keotiranway and Singhwara blocks with 12.50, 11.58 and 10.98 per cent respectively. As shall be evident from thc table, all the development blocks in the district except 4 blocks mentioned above have market/hat facility in less than 10 per cent of the villages.

Communications—The details of villages connected by bus, rail, navigable river/canal services etc. have been incorporated in the Village Directory.

Only 21.64 per cent of the total number of inhabited villages in the district are connected by one means of communication or the other. The majority of villages still do not have this facility. Manigachhi block has the highest proportion of villages (44.44%) which are connected by bus or rail or navigable river/canal services etc. followed by Baheri and Biraul blocks respectively with 34.72 and 32.47 per cent of villages having one means of communication or the other. Bahadurpur block has the least number of inhabited villages to its credit (9.32%) having communication facility. It appears that villages falling under this block are still very much underdeveloped on this account.

Approach road to villages—With only 27.41 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Manigachhi with 49.38 per cent villages having *pucca* approach roads again tops the list followed by Benipur and Singhwara blocks with 37.36 and 34.15 per cent respectively. The development block which has the lowest number of villages having this facility is Bahadurpur which has only 15.25 per cent villages having the facility of *pucca* approach road. It is generally seen that development blocks which have better communication facilities also contain larger proportion of villages having the facility of *pucca* approach road.

Power Supply—Electrified villages in the district constitute 20.23 per eent of the total inhabited villages. Power supply in these villages is utilised for either domestic or agricultural purposes or for other purposes such as commercial or industrial and in certain villages for all the above purposes.

Benipur block occupies the first position having the maximum proportion of electrified villages (41.76%) closely followed by Singhwara and Darbhanga blocks with 39.02 and 38.46 per cent respectively.

The lowest proportion of villages having power supply is observed in Kusheshwar Asthan block with only 0.95 per cent villages enjoying this facility. There are as may as 5 blocks in the district where the proportion of electrified villages is less than even 10 per cent which indicates that electricity is yet to reach the majority of villages in these blocks.

Proportion of rural population by various amenities

While in Table 11 we have discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rural population served by these amenitie

Table 12—Proportion of rural population served by different amenities.

Sl. no.	Name of Development Block	Total population of inhabited villages in the development block	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Darbhanga	139,270	86.92	35.12	100.00	45.50	13.34	33.97	42.61	56.12
2	Bahadurpur	124,921	84.52	14.78	100.00	26.81	8.66	19.66	27.68	38.83
3	Hayaghat	161,429	91.92	36.71	100.00	50.78	9.49	29.14	32.54	17.79
4	Singhwara	148,819	93.51	50.22	100.00	56.46	29.04	25.90	40.35	46.23
5	Jale	144,923	96.08	74.67	100.00	71.86	55.14	47.16	62.40	16.21
6	Keotiranway	142,569	91.08	38.27	100.00	38.61	15.69	18.95	33.48	36.92
7	Manigachhi	186,642	96,63	80.92	100.00	64.91	8.24	57.09	63.62	40.25
8	Baheri	145,981	87.22	40.42	100.00	56.51	12.99	57.26	44.25	3.18
9	Benipur	195,372	95.67	59.56	100.00	51.13	6.43	25.71	44.97	56.36
10	Ghanshyampur	163,930	98.44	55.95	100.00	61.44	21.88	23.59	22.29	16.67
11	Biraul	150,066	95.60	32.41	100.00	60.58	10.10	40.87	45.28	16.01
12	Kusheshwar Asthan	127,970	89.02	31.69	100.00	42.17	10.38	20.28	20.74	6.00
	Total	1,831,892	92.62	47.57	100.00	53.02	16.45	33.80	40.77	29.98

It would be seen that educational facility is available to 92.62 per cent of the rural population in the district. In Ghanshyampur block the maximum proportion of rural population has educational facility, the percentage being 98.44 closely followed by Manigachhi, Jale and Benipur blocks with 96.63, 96.08 and 95.67 per cent of population respectively enjoying this facility. In the remaining blocks, the proportion of rural population enjoying the facility of education varies between the minimum of 84.52 per cent (Bahadurpur block) and the maximum of 95.60 per cent (Biraul block).

Another noteworthy point is that the proportion of villages in the district enjoying educational facility is less (being 75.43 per cent vide Table 11) than the proportion of population which avail of this facility, the corresponding percentage being as high as 92.62. This may be attributed to the fact that villages which possess educatonal facility contain larger population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served is of the order of 47.57 per cent which is much higher than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district and in the various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table indicates the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5-10 Kms.	10+ Kms.	Total (cols. 2—4)
1	2	3	4	5
1. Education	258	2	...	260
2. Medical	639	145	8	792
3. Drinking water	...	...	...	...
4. Post and Telegraph	708	105	6	819
5. Market/*Hat*	574	367	39	980
6. Communication	528	235	66	829

As regards educational facility it would be seen that there are 260 villages out of 1,058 inhabited villages (24.57%)in the district which do not have educational facility but the facility is available at places situated within 5 Kms., 5—10 Kms. and also beyond 10 Kms. The number of villages having no educational facility within the villages itself but enjoying this facility within 5 Kms. is 258 (24.39%) and that of villages having such facilities within a distance of 5—10 Kms. is only 2 (0.19%) whereas beyond 10 Kms. the number of such villages is nil. The number of villages having other facilities within a distance of 5—10 Kms. and beyond 10 Kms. is less than those having the facilities within 5 Kms. though not in the same proportion. It follows, therefore, that for various facilities people of the majority of villages do not have to travel for more than 10 Kms.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different types of facilities by distance from the nearest town in five distance ranges.

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	76	46(60.53)	8(10.53)	76(100.00)	8(10.53)	1(1.32)	14(18.42)	24(31.58)	23(30.26)
6—15	266	195(73.31)	52(19.55)	266(100.00)	53(19.92)	22(8.27)	47(17.67)	65(24.44)	68(25.56)
16—50	577	443(76.78)	156(27.04)	577(100.00)	143(24.78)	45(7.80)	132(22.88)	170(29.46)	110(19.06)
51 +	139	114(82.01)	50(35.97)	139(100.00)	35(25.18)	10(7.19)	36(25·90)	31(22.30)	13(9.35)
Unspecified	...	...	...	...	...	...	...	...	...
Total	1,058	798(75.43)	266(25.14)	1,058(100.00)	239(22.59)	78(7.37)	229(21.64)	290(27.41)	214(20.23)

It would appear from the above table that the maximum number of inhabited villages lie in the distance range of 16—50 Kms. (54.54%) from the nearest town. With only one urban centre in the district and the position of bordering districts being not very different such a situation is but natural. This is followed by villages in the distance range of 6—15 Kms. from the nearest town (25.14%).

In case of educational, medical and post and telegraph facilities, the proportion of villages increases with the increase in the distance range from the

nearest town, the maximum being in the range of beyond 51 Kms. For the facility of communication also, one can see that the maximum proportion of villages lies in the distance range of 51+Kms. from the nearest town.

In case of market/*hat* and *pucca* approach road facilities, no particular trend emerges. However, as regards the facility of *pucca* approach road, the maximum proportion of villages lie in the distance range of 0—5 Kms. from the nearest town.

Interestingly, it can be seen from the table that the proportion of villages having power supply facility decreases with the increase in the distance range from the nearest town. It can be said that the villages which are nearer to the urban areas have benefitted in respect of *power* supply and *pucca* approach road facilities vis-a-vis those rural pockets which are beyond the pale of direct urban influence.

As has been observed in other tables also, drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by the size-class of population in four different ranges.

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/*Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
— 499	257	79(30.74)	13(5.06)	257(100.00)	2(0.78)	7(2.72)	37(14.40)	54(21.01)	31(12.06)
500—1,999	519	448(86.32)	103(19.85)	519(100.00)	60(11.56)	23(4.43)	92(17.73)	104(20.04)	89(17.15)
2,000—4,999	207	197(95.17)	97(46.86)	207(100.00)	108(52.17)	25(12.08)	64(30.92)	91(43.96)	60(28.99)
5,000+	75	74(98.67)	53(70.67)	75(100.00)	69(92.00)	23(30.67)	36(48.00)	41(54.67)	34(45.33)
Total	1,058	798(75.43)	266(25.14)	1,058(100.00)	239(22.59)	78(7.37)	229(21.64)	290(27.41)	214(20.23)

It may be seen from the table that the maximum number of villages i. e. 519 out of the total inhabited villages (49.05%) in the district fall in the population range of 500—1,999 followed by 257 villages (24.29%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000+being only 75(7.09%) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except for facility of *pucca* approach road where there is a very marginal decline in the case of villages in the population range of 500—1,999. Generally, the maximum proportion of villages having different amenities have a population range of 5,000+with further corroborates the fact that more facilities are generally available in larger villages than in the smaller ones.

Main staple food in the villages.

The table on next page indicates that rice and wheat constitute the main staple food of the people in majority of villages in all the development blocks of the district.

Table 16—Main staple food in the majority of villages in each Development Block.

Sl. no.	Name of Development Block	Main staple food
1	2	3
1	Darbhanga	Rice, wheat
2	Bahadurpur	Rice, wheat
3	Hayaghat	Rice, wheat
4	Singhwara	Rice, wheat
5	Jale	Rice, wheat
6	Keotiranway	Rice, wheat
7	Manigachhi	Rice, wheat
8	Baheri	Rice, wheat
9	Benipur	Rice, wheat
10	Ghanshyampur	Rice, wheat
11	Biraul	Rice, wheat
12	Kusheshwar Asthan	Rice, wheat

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks.

Table 17—Distribution of villages according to Land Use

Sl. no.	Name of the Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Darbhanga	104	17,584.75	77.28	5.86
2	Bahadurpur	118	15,338.89	79.62	15.97
3	Hayaghat	106	21,585.08	81.68	7.97
4	Singhwara	82	16,348.68	76.42	21.73
5	Jale	56	18,611.65	86.45	13.61
6	Keotiranway	95	14,504.87	82.46	14.67
7	Manigachhi	81	21,651.77	79.79	13.99
8	Baheri	72	21,233.33	89.08	11.96
9	Benipur	91	25,132.16	83.49	16.49
10	Ghanshyampur	71	25,158.56	83.17	15.16
11	Biraul	77	20,580.05	78.04	17.24
12	Kusheshwar Asthan	105	23,713.41	86.99	13.16
	Total	1,058	241,443.20	82.32	13.89

It would be seen from the table that 82.32 per cent of the total area is utilised for cultivation (cultivable area) and of this only 13.80 per cent area is irrigated. The low proportion of irrigated area is presumably on account of failure or premature cessation of rainfall which also results in failure of main sources of irrigation and partly because vast areas of the district are exposed to recurrent floods. However, now adequate attention is being paid to the provision and expansion of irrigational facilities and also to adop-

OFFICE OF THE REGISTRAR GENERAL INDIA
27843
LIBRARY

tion of various measures to control the recurring floods.

Among the C. D. Blocks, the highest proportion of cultivable area is found in Baheri block with 89.08 per cent land under cultivation closely followed by Kusheshwar Asthan and Jale blocks with 86.99 and 86.45 per cent respectively. The lowest cultivable area is found in Singhwara block with only 76.42 per cent of the land brought under cultivation.

The highest proportion of irrigated area to the total cultivable area is observed in Singhwara block with 21.73 per cent followed by Biraul and Benipur blocks with 17.24 and 16.49 per cent respectively. The lowest proportion of irrigated area to total cultivable area is observed in Darbhanga block, being only 5.86 per cent. It indicates that though government has taken up different projects to provide irrigational facilities still there are large number of villages which are deprived of the required irrigational facilities inspite of the potentiality for cultivation.

Growth, density and sex-ratio of urban population.

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State

Table 18 - Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

Census year	District						State					
	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (Population per sq. km.)	Sex-ratio (No. of females per 1,000 males.)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (Population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,150,582	84,816	7.37	+22.56	4,678	912	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,337,802	103,016	7.70	+21.46	5,302	869	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,622,812	132,059	8.14	+28.19	6,885	846	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	2,008,193	176,301	8.78	+33.50	9,192	871	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district, according to the 1981 Census is 176,301 comprising 8.78 per cent of the district population. The corresponding percentage for the State is 12.47. The rate of increase in the urban population of the district has remained rather tardy over the decades, the proportion of urban population having risen from 7.37 per cent in 1951 to 8.78 per cent in 1981. The corresponding rise in the urban population of the State, on the other hand, has been faster. While in 1951, the proportion of urban population was to the extent of only 6.77 per cent of the total population, in 1981 it has almost doubled itself, the percentage having shot up to 12.47. It, therefore, follows that this district, even now, is comparatively less urbanised in the state probably because there is only one urban unit and the lack of intensive industrial activities there offers very limited scope for employment.

From column 5 of the table, it is evident that the growth of urban population of district has been increasing steadily over the decades except during the decade 1951—61 when it had shown a marginal decline. The trend of growth of the urban population in the State has been slightly different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade in the state in general.

The density of population in the urban areas of the district has always remained much higher as compared to the density of population in the urban areas of the State. This clearly indicates that Darbhanga town is becoming more crowded. Being the only urban unit of the district, this is but natural, as the movement of population from the rural to urban areas is mostly taking place in the town of Darbhanga.

Though the sex-ratio for the urban areas of Darbhanga district also has all along been higher than the urban areas of the State it has been adverse for females throughout. The sex-ratio, both for the urban areas of the district and the State has been showing a declining trend till the 1971 Census. In 1981 Census, however, there has been an increase in the sex-ratio in favour of females in both the cases. The urban areas, infact, still suffer from a shortage of females as the town attract mainly the male population by way of employment opportunities. The female population continues to stay in the villages because the people having agriculture as the main occupation and their moorings in villages do not migrate as a complete family unit. Higher cost of living in the urban areas is another factor that discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There is only one town, viz., Darbhanga (M) in the district of Darbhanga. In 1971 Census also the position was the same as Darbhanga sadar subdivision in the old Darbhanga district (which has been upgraded as Darbhanga district now) also consisted of one town, viz., Darbhanga (M). No town has either been added or declassified in the present census. Hence Table 19 has not been presented.

Receipt and Expenditure in different towns

The table Below gives the details of finances in the urban local bodies in terms of per capita receipt and expenditure.

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and convenience	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
I Darbhanga (M)	25.84	4.45	21.39	23.91	1.78	10.79	2.07	0.27	9.00
Total	25.84	4.45	21.39	23.91	1.78	10.79	2.07	0.27	9.00

It would be apparent from the above figures that the per capita total receipt in Darbhanga (M), the only town in the district, is Rs. 25.84 which is more than per capita total expenditure (Rs. 23.91). The lion's share of the receipt comes through other sources (Rs. 21.39) which is almost five times more than the per capita receipt through taxes (Rs. 4.45).

The per capita expenditure on public health and conveniences (Rs. 10.79) is more than one third of the per capita total expenditure (Rs. 23.91). The per capita expenditure on other aspects (Rs. 9.00) is very close to per capita expenditure on public health and conveniences. The per capita expenditure incurred on general administration, public institutions and public works is apparently quite low as compared to expenditure incurred on the two counts mentioned above.

Schools per ten thousand population in town

Primary and middle school education facilities are generally avalable in the town. The following table gives details of the different categories of educational institutions per ten thousand population in towns of the district.

Table 21—Schools per ten thousand population in towns.

Class, name and Civic status of town	Number per ten thousand population			
	Higher Secondary/Inter/PUC/Junior college	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
I Darbhanga (M)	...	0.68	2.55	3.40
Total	...	0.68	2.55	3.40

There is no higher secondary/Inter/PUC/Junior college in Darbhanga (M), the only town in Darbhanga district. The number of secondary/Matriculation level schools per ten thousand population works out to be 0.68. While the number of Junior Secondary/Middle School per ten thousand population is 2.55 that of Primary school is 3.40 per ten thousand population. The table clearly indicates that the average number secondary/matriculation level schools is less than other categories of educational institutions which are close to each other.

The figures for the urban areas of the district are identical to the figures of Darbhanga (M), the only twon in the district.

Beds in medical institutions.

The table below furnishes information regarding availability of beds in the medical institutions in the urban area of the district.

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 Population
1	2
I Darbhanga (M)	5.48
Total	5.48

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 5.48. The availability of beds in the hospitals in Drabhanga (M) the only town, is also the same. The main reason for a slightly higher number of beds for the population is the existence of the Government Medical College Hospital at Darbhanga.

Proportion of Slum population in Towns

The details of slums have been collected only in the case of class I and class II towns. Relevant information was collected through the local officials of the Municipalities, NACs etc. as also through the Town Planning Department in 1979. Darbhanga (M), is a class I town (population 1 lakh and above). The following table gives details regarding slums in Darbhanga town.

Table 23—Proportion of slum population in towns.

Class, name and civic status of the town	Proportion of the slum population to total population of the town	Density in slums (per sq. km.)
1	2	3
I Darbhanga (M)	23.40	34,664
Total	23.40	34,664

The table above indicates that slum population in Darbhanga (M) constitutes 23.40 per cent of the total population of the town.

The density of slums (number of persons per sq. Kms.) is as high as 34,664 which shows that the slums are over-crowded and there is ample scope for improvement in the living standard of the people residing in slums.

Important commodities imported, exported and manufactured

The table below lists the most important commodity manufactured, exported from and imported into Darbhanga (M).

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
I Darbhanga (M)	WoodenFurniture	Makhana	Petrol

It may be observed from table above that the most important item, which is manufactured in Darbhanga town, is wooden furniture.

The most important commodity, which is exported to other places from Darbhanga town is *Makhana*, which is a very profitable crop for the district. Interestingly, it can be seen from the table that the most important commodity which is exported to other places is not necessarily the same important item which is manufactured in the town.

Petrol is the most important commodity which is imported in the town.

DISTRICT CENSUS HANDBOOK

PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5) medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9) rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village etc. have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land ues only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their Thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawara* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc. was not found to be available in the village, the distance from the concerned village, to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz. '(–5 Kms.)', '(5–10 Kms.)' and '(10+ Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the

village is served by any mode of public transport such as bus, rail, waterway etc. (column 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests

2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts etc. Land which can not be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel etc.,which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current years have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs the information in Village Directory is presented for each village Development Block-wise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column* 5—*Educational*

P	..	Primary or Elementary School (upto class IV)
M	..	Middle or Junior Secondary School (upto class VIII)
H	..	Matriculation or Secondary School (upto class X)
PUC	..	Higher Secondary, Intermediate, Pre-University, Junior College.
C	..	College
I	..	Industrial School
Tr	..	Training School
Ac	..	Adult Literacy Class/ Centre
O	..	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column* 6—*Medical*

H	..	Hospital
MCW	..	Maternity and Child Welfare Centre
MH	..	Maternity Home
CWC	..	Child Welfare Centre
HC	..	Health Centre
PHC	..	Primary Health Centre
PHS	..	Primary Health Sub-Centre
D	..	Dispensary
FPC	..	Family Planning Centre
TB	..	T. B. Clinic
NH	..	Nursing Home
RP	..	Registered Private Practioner
SMP	..	Subsidised Medical Practioner
CHW	..	Community Health Worker
O	..	Others

(iii) *Column* 7—*Drinking Water*

T	..	Tap Water
W	..	Well Water
Tk	..	Tank Wate
TW	..	Tubewell Water
Hp	..	Handpump
R	..	River Water
F	..	Fountain
C	..	Canal
L	..	Lake
S	..	Spring
N	..	*Nullah/Nala/Nallah*
O	..	Others
NA	..	Information Not Available

(iv) *Column* 8—*Post and Telegraph*

PO	..	Post Office
TO	..	Telegraph Office
PTO	..	Post and Telegraph Office
Phone	..	Telephone Connection

(v) *Column* 10—*Communications*

BS	..	Bus
RS	..	Railway Station
NW	..	Navigable Waterway (including river, canal, back waters, etc.)

(vi) *Column* 11—*Approach to Village*

PR	..	*Pucca* Road
KR	..	*Kutcha* Road
NR	..	Navigable River
NC	..	Navigable Canal

NW	..	Navigable Waterway (other than river or canal)
FP	..	Foot Path

(vii) *Column* 13—*Power Supply*

ED	..	Electricity for Domestic purpose
EAg	..	Electricity for Agriculture purpose
EO	..	Electricity for Other purposes like industrial, commercial, etc.
EA	..	Electricity for All purposes listed above

(viii) *Column* 16—*Irrigated by source*

GC	..	Government Canal
PC	..	Private Canal
W	..	Well (without electricity)
WE	..	Well (with electricity)
TW	..	Tube-well (without electricity)
TWE	..	Tube-well (with electricity)
Tk	..	Tank
R	..	River
L	..	Lake
Wf	..	Waterfall
O	..	Others

(ix) *Column* 20—*Remarks*

N	..	Copies of Newspapers coming in the village.
M	..	Motor Cycles/Scooters available in the village.
C	..	Cars/Jeeps available in the village.
T	..	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutoins, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Darbhanga district, however, there is not Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development block-wise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0—5, 6—10, 11—15, 16—20, 21—30 and 31 and above.

For the Scheduled Tribes (Part B) : 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—DARBHANGA

VILLAGE

AMENITIES AND

Amenities available (If not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz., —5 kms., 5—10 kms. and 10 + kms., of the nearest place where the facility is available is given).

2. Development Blocks Bahadurpur, Singhwara, Jale, Manigachhi, Baheri & Biraul Contain no Scheduled Tribes Population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section 11 of Part A furnishes the data for each town in the district in six statements covering (i) Status and growth history; (ii) physical aspects and location of towns, 1979; (iii) Municipal finance, 1979-79; (iv) Civic and other amenities in towns; (ivA) Civic and other amenities in Notified Slums; (v) Medical, educational recreational and cultural activities and (vi) Trade, commerce industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix. Since in the district of Darbhanga there is no outgrowth in its town, this appendix has not been presented.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory. However, since there is no Census towns in the district. This appendix has not been prepared.

The details of the data covered in Statements 1 to VI and IVA and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	Municipal Corporation
M	Municipality
C. B.	Cantonment Board/Cantonment
NAC	Notified Area Committee
CT	Census Town

Statement II

This statements gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and subdivisional Headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. There has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	River
C	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, proporties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposals of night soil, source and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest Place if in the same district or the name of the nearest district if in the same State or other state where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

Statement IV-A

This statement gives, for each such area locality as is known or identified as a slum in a Class I or Class II town the available civic amenities in 1979.

Statement V

This statement gives the medical educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels adult literacy centres, working women's hostels, stadia, place of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other state and its distance from the concerned town in question

has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement.

Column—4

H	..	Hospital (Allopathic)
H(A)	..	Hospital (Ayurvedic)

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/ Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under—

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in urban areas of the District, Subdivisions and remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix an annexure has also been presented showing the boundry of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue

villages in the case of rural areas and urban wards (Circles) in the case of urban areas. The concepts of villages, town, urban agglomeration etc. are explained in the introductory part of this volume.. The revenue village and an urban ward (Circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their Location Code Numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
