FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/C. D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and, the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the sub-divisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the District'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office S/Shri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N. M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computers and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the P. C. A. Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happended to be incharge of printing and for sometime also looked after the D. C. H. Section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Leader Press, Allahabad, who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The district of Saran is situated between 25° 36′ and 26° 13′ North Latitude and 84° 24′ and 85° 15′ East Longitude in the southern part of the newly created Saran Division of North Bihar. The Ganges constitute the southern boundary of the district beyond which lie the districts of Bhojpur and Patna. To the north of Saran lie the districts of Siwan and Gopalganj. The Gandak forms the dividing line with Vaishali and Muzaffarpur districts in the east. To the west of Saran lies part of Siwan and the district of Ballia in Uttar Pradesh, the Gogra constituting a natural boundary between Saran and Ballia.

Saran contains only one subdivision, viz., Chapra Sadar with headquarters at Chapra which is also the headquarters of this district. Chapra happens to be the principal town of this district. There are 15 Anchal-cum-development blocks and 26 Police Stations in the district.

The historical background of the district as available in the 'Ain-i-Akbari' records Saran as one of the six Sarkars (Revenue Divisions) constituting the province of Bihar. At the time of grant of Diwani to the East India Company in 1765, there were eight Sarkars including Saran and Champaran. These two were later combined to form a single unit named Saran. Saran (alcrgwith Champaran) was included in the Patna Division when the Commissioner's Divisions were set up in 1829. It was separated from Champaran in 1866 when it (Champaran) was constituted into a separate district. Saran was made a part of Tirhut Division when latter was created in 1908. By this time there were three subdivisions in this district namely Saran, Siwan and Gopalganj. In 1972 each subdivision of the old Saran district became an independent district. The dresent Saran district after separation of Siwan and Gopalganj still has its headquarters at Chapra.

Various hypotheses have been put forward about the origin of the name Saran. General Cunningham suggested that Saran was earlier known as *Sarana* or asylum which was a name given to a stupa (Pillar) built by Emperor Ashoka to commemorate the conversion to Buddhism of some legendary demons who ate human flesh. He considered that the site of stupa must be some where near Arrah. Another view holds that the name Saran has been derived from Saranga-Aranya or the deer forest, the district being famous for its wide expanses of forests and deer in prehistoric times. According to another account worthy of recapitulation, Saran is a derivative of Sakra-Aranya, the forest of Sakra which is another name for Indra. This forest is said to have covered the country around Visala at which place king Sumati received Lord Ram Chandra when he was proceeding with Vishwamitra on way from Ayodhya to Mithila. An old temple existing on the bank of Gogra at Revelganj even in present time is supposed to lend support to this legend. Yet another legend explains the three names Arrah, Saran and Champaran as corrupt forms of old Sanskrit names Aranya, Saranya and Champaranya derived from the thick forests, covering these areas.

Early history

The Cheros are believed to have been the chief among the pre-Aryan inhabitants of the district. According to the vedic literature, the Aryan Videhas came from the west and settled largely in the area east of the Gandak river as ordained by Agni, the God of fire. However many of them remained to the west of the river and settled in the area now comprising the Saran district. Saran formed the part of the Kingdom of Kosala (Uttara Kosala) which figured prominently in the history of eastern India during the time of Gautama Buddha.

In the travel memoirs of Hiuen Tsang, the Chinese pilgrim who travelled in the country between 620 and 645 A. D., there is mention of three places he visited towards the north of the Ganges. The places were— (1) Narayan Deo Temple which had balconies as well as sculptured and ornamented towers, (2) a stupa (pillar) built by Ashoka towards the east of the Narayan Deo Temple and (3) another stupa built by a Brahmin over the Kumbha (pitcher) with which he had measured the ashes of Buddha and divided them into the eight equal parts for distribution to the eight kings of the area. The Narayan Deo Temple was probably situated at Revelganj and the Kumbha stupa at Dighwara. Hiuen Tsang mentioned the above description in his diary relating to Chenchu district, which corresponds with modern Gajipur in Uttar Pradesh. This indicates that Saran was probably a part of the Kingdom of Gajipur in that period.

The earliest authentic historical fact or record concerning this district may perhaps be related to 898 A. D. which suggests that the village of Dighwa-Dubauli in Saran had supplied a copper plate issued in the reign of King Mahendra Paldeva. It records the grant of land in Sravasti Bhukti, thereby suggesting that the Guryara Pratihara empire extended up to Gandak, if not further east, on the northern bank of the Ganges. It follows, therefore, that Saran in the ninth century of the christian era was a part of Sravasti Bhukti, just as it is now a part of Saran Division.

Mention may also be made here of the probable ravaging of the district by the Chinese General Wang-Hiuen-Tse in 647 A. D. Apart from these disjointed inklings, the history of the district in mediaeval period is largely strouded in darkness.

Muslim period

Ghyasuddin, the Muslim Governor of Bengal, waged a war against the Raja of Tirhut between 1211 and 1226 A. D. Tirhut was for the first time subjugated by the Muslims during this period and obliged to pay tribute to them. Towards the close of the 13th Century Nasiruddin Bughra Khan fought against his son, Muizuddin Kaikobad when the latter was installed at Delhi after the death of his grand father The two armies of the son and the father met on the bank of the river Gogra in Saran, but truce were arrived at without any actual fighting. According to its terms Nasiruddin gave up his claim to Delhi but retained the right to hold Bengal as an independent kingdom.

The next event of importance was the invasion of Tirhut by Shamsuddin Ilyas shah, the first independent Sultan of Bengal (1339 to 1358). He ravaged Saran, extended his hold over the entire district and built a fortress at Hajipur.

Saran continued to be a part of Bengal being separated from the Delhi empire by the river Gogra. In 1397 Saran alongwith Champaran was taken over by the king of Jaunpur and continued to be a part of this kingdom over a century until Alauddin Hussain Shah, King of Bengal (1493-1518) managed to bring it back in the Kingdom of Bengal. When Sikandar Lodi marched into Bihar subjugating Jaunpur, he did not dare to clash with the powerful Bengal army and preferred to conclude a treaty with Alauddin Hussain Shah in 1499. According to this treaty Sarkar Saran was added to Sikandra Lodi who in his turn agreed not to extend his influence to Bengal proper. It may be noted here that though Saran was at his time included in the Muslim Empire, the Muslims did not actually exercise any effective control. Thus Feristha mentions that when Sikandar Lodi subdued the district it was in the hands of Hindu Zamindars. This state of affairs did not remain unnoticed and Emperor Sikandar Lodi made Hussain Khan Formuli, the Jagirdar of Saran and Champaran, which were called Jalkhet or fields of water because of their lowlying lands. Formuli was a religious fanatic and with an unparalleled frenzy, managed to confiscate twenty thousand villages of Hindu Zamindars and extended his own Jagir.

Mughal period

Nasrat Shah son of Hussain Shah, disregarded the treaty concluded by his father with Sikandar Lodi and invaded Tirhut. He established his authority over Saran and extended it across the Gogra to the district of Ballia as well. This was much to the dislike of Babar, the Mughal Emperor at Delhi. Babar moved to Bihar with large force in 1529. While camping at Arrah he learnt that the army of Nasrat Shah was camping near the junction of the Ganges and the

Gogra. This was considered to be a hostile act by Babar and he demanded that Nasrat Shah should withdraw his army which the latter refused to do. In the battle that followed Nasrat Shah was thoroughly vanquished. Babar made a grant of Saran to Shah Muhammad Maruf who had secured the emperor's confidence. About fifty years later Akbar defeated Daud Khan, the Afghan King of Bengal at Patna in 1574. Saran then became one of the six Sarkars constituting the Subah of Bihar. Todarmal, the Finance Minister of Akbar, assessed the revenue of Saran in 1582.

Thereafter the district had an uneventful history till the advent of Europeans. By 1666 the Dutch had established their trade in Saltpetre and built a depot and the factory at Chapra. Saltpetre had a wide market all over Europe as it was used in the manufacture of gunpowder and the Dutch naturally did very good business. Not to be outdone, the English also started trade in saltpetre though their main establishment was located at Patna.

An important event took place in the year 1726 when Fakhra-ud-daula, the Governor of Bihar, sent a force into the district against Sheikh Abdullah. The Sheikh had been held in esteem by the earlier Governors, but because of persecutions by Fakhra-ud-daula, he had shifted his headquarters from Azimabad(Patna) to a place near Siwan where he build a mud fort for his protection. Further pursuit by Fakhra-ud-daula's forces made him flee from Siwan and seek asylum in Oudh.

The British forces made their first appearance in Bihar in 1757. A small section under Eyre Coote reached Chapra on the 4th August in pursuit of Monsieur Law, the French adventurer who had espoused the cause of Siraj-Ud-daula and thereby offended the British. However, Law had fled to Banaras before the British forces could arrive at Chapra and consequently there was no engagement.

When the attempt of the English to seize Patna was foiled by Mir Qasim Ali and they were obliged to remain within their fort for a long time, they had no option but to leave stealthily. On the 29th June, 1763 they left by boat for Chapra. They were short of supplies and ammunitions, and the weather was very heavy. The Nawab's force pursued them after apprehending them near Manjhi and brought them back to Patna as prisoners. A small British army followed the Nawab and while crossing the Saran ravaged the countryside on their way. The forces had to camp at Manjhi. Since rains had set in by that time, it was not possible to proceed further. In September that year, Indians in the British force stationed at Manjhi rebelled and managed to take all their British officers as prisoners who were, however, released after being stripped of their equipment.

The battle of Buxer in 1765 was a turning point in the history of British rule in India. Saran also became a part of the lower provinces of Bengal. Lord Clive paid a visit to Chapra in 1766 when the Nawab of Oudh, a Minister of Emperor Shah Alam, and the Raja of Banaras met him in a confererce designed to work out a common approach against the invading Maratha armies.

Although technically masters of Bengal including Saran, the English could succeed in establishing themselves with great difficulty in the face of the strong opposition by independent minded Zamindars, chiefs and princes in the district. Maharaja Fateh Sahi of Husepur, a relative of the Raja of Banaras refused to pay the revenue to the British. The undaunted rebel was however, defeated by a British army and expelled from his territory which coincided roughly with Siwan and Gopalganj districts. Govind Ram was appointed a revenue farmer. Fateh Sahi fled to a forest named Baghjogni and continued his struggle from there in spite of heavy odds. Since Fateh Sahi was held in high esteem by his people, his exhortion to them not to pay revenue to foreign rulers was largely followed and the collection of revenue by the British almost ceased completely. Gobind Ram was killed in 1772. This forced the British to come to terms with Fateh Sahi who was allowed to return to Husepur. However his Zamindari was not restored to him and it continued to be farmed out to others though he was paid a maintenance allowance. Basant Sahi a cousin of Fateh Sahi and the progenitor of the line of Hathua Rajas was appointed a revenue farmer by the British and Mir Jamal as the Superintendent of the Government revenue. Fateh Sahi managed to kill both Basant Sahi and Mir Jamal in

1775. It is believed that Basant Sahi's head was cut off and sent to his widow who performed *Sati* with the head of her dead husband in her lap. Fateh Sahi had naturally to flee and all pursuits by the British were of no avail. Fateh Sahi had a band of trained men at his command and his popularity was ever increasing. Even though the British managed to secure the assistance of the Nawab of Oudh in their attempt to capture Fateh Sahi, and a huge reward was offered for his capture, he remained free. In 1808 he became a *Sanyasi* and thus ended an eventful period in the history of this district.

Movement of 1857

The freedom loving people of Saran played their due role in the national liberation movement. Among the various factors fanning their indignation against the foreign rulers were, (a) ill—treatment of sepoys in the police and the army, (b) high handedness and extortions of the European indigo planters, (c) conversion of people to Christianity by the missionaries, and (d) introduction of common messing in the Jails. The seething discontent among the people seems to have been fired by the events in Meerut and Banaras. The yoke of foreign rule was once again sought to be over thrown for good. The British administration on their part after realising that trouble was in the offing took steps to fight the impending menace. The strength of the police force in the district was augmented. Very strict watch was kept on the *ghats* and the frontiers. The Treasury was moved from Chapra to Patna. The British found an ally in the Zamindars of Hathwa who promised loyalty to support and assist them in quelling the expected disturbances.

The banner of revolt was first raised in the district on the 25th July at Sugauli. The Indian soldiers of the 12th Irregular Cavalry mutinised and killed the dispotic Commandant, Major Holmes and other European officers. The rebels then proceeded to join other forces. They attacked the Magistrate and the Opium agent at Siwan. The European residents of Chapra panicked and fled to Dinapore on the 28th July but returned later after violence was no longer apprehended. Some revolutionaries in the district attacked the indigo factories at Ganga and Darauli in October. The British sent a Gorkha regiment and a Nepali Brigade to Saran. In December 1857, the outpost at Guthni was stormed and occupied by the rebels. Such events continued till the insurgents were finally defeated by the British forces aided by the Nepalese army under Rana Jangbahadur at Sohanpur on the 26th December, 1857 which, for the time being, put an end to the struggle for emancipation from foreign rule. As stated earlier, Saran and Champaran continued to comprise a single district till 1866.

Present era

The district of Saran played a glorious role in the freedom movement in the present century. Prominent persons who took part in the freedom movement were Dr. Rajendra Prasad, Maulana Mazharul Haque, Braj Kishore Prasad, Jai Prakash Narain and others.

Pride of Bihar Babu Braj kishore Prasad who rendered his valuable support to Mahatma Gandhi in epic struggle in Champaran in 1917 was born at Shrinagar which falls now in Siwan district.

Dr. Rajendra Prasad, the first President of Indian Republic was born at Ziradei (now in Siwan district) which before reognisation of districts was a part of old Saran district. His association with the Congress started as far back as 1906 when he was a volunteer in the annual session of the Indian National Congress at Calcutta. He was actively associated with Mahatma Gandhi's epic struggle in Champaran. Thereafter, his political stature grew day by day and he played a decisive role in the affairs of this country before and after independence. He was undoubtedly the greatest son of Bihar in the present era. Another important and illustrious leader produced by this district was Sri Jai Prakash Narayan.

The history of the district during the following years is of too recent origin and perhaps, needs no recapitulation here. Suffice to say that Saran is among the enlightened and progressive districts of the State with a healthy and sturdy people, full of initiative and enterprise. Its biggest problem, the heavy pressure of population on land, is reflected in the large number of emigrants mostly males and working as general labourers, mill hands, plantation workers, constables, etc., who are often met with in the streets

of Calcutta or in the tea gardens of Assam and other distant places.

Natural divisions

The district is shaped like a triangle with its apex at the confluence of the boundary of Gopalganj district and the Gandak river. The Gandak river forms the eastern side, the Ganges and the Gogra forms the southern side whereas the boundaries of Siwan and Gopalganj districts form the western side of the triangle shaped Saran district. The land slopes towards the south-east which is also the direction followed by the rivers.

The district is entirely constituted of plains but there are quite a few depressions and marshes, which cause the formation of three broad natural divisions, viz.—

(i) the alluvial plains along the big rivers which are subject to periodic inundation,

(ii) the region of uplands away from the rivers and not subject to floods, and

(iii) the *diara* areas in the beds of the great rivers.

These divisions are based more on the characteristics of land than diverse physiographic regions with clear cut geography.

Rivers

The Ganges touches the district at Kotwapatti Rampur at its junction with the Gogra. The river flows from west to east forming the southern boundary of the district till it reaches Sonepur, where it is joined by the Gandak. The Ganges is always navigable and boat traffic is of some consequence. Steamer services ply regularly between Mahendru Ghat in Patna and Pahleza Ghat in Saran. In cold weather the river is about a mile in width but during the rains it assumes a huge form 13 to 16 kilometres in width at some places. A large number of country boats carry merchandise along the river.

Originating from the lower Himalayan ranges near Tribenighat to the north-west of Motihari/Bettiah, the Gandak, which is also called Narayani in its earlier reaches touches the district near Chintamanpur in the north-eastern corner of the district. It runs 85 kilometres along the north-eastern boundary of the district upto Sonepur where it joins the Ganges. The Saran embankment running along almost the entire length of the river protects the district from Gandak floods. The river actually flows at a higher level than the adjoining plains and before the erection of the embankment, the district received flood water from this river which alongwith the washings brought by it greatly enhanced the fertility of the soil. It is navigable by country boats. An ambitious scheme has been launched by the State Government to exploit the water resources of this river. The work on this scheme has been started and it is hoped that this will be completed very soon.

The river Gogra (also known as the Saryu) rises in the lower Himalayas and winding its course through the eastern districts of Uttar Pradesh, forms the western boundary of Saran for about 56 Kilometres from near Matiharin Manjhi to its confluences with the river Ganga near Chapra. It is navigable throughout the year and usually boats carry goods to the eastern districts of Uttar Pradesh. Revelganj being on its bank used to be a great centre of river-borne trade before coming of the railways.

Climatic conditions

In summer the climate of the district is hot and dry but winter months are quite cool and pleasant. Winter comes towards the middle of October after the rains are over. The temperature begins falling and January is the coldest month of the year with mercury falling to about 7°C. The blowing of westerly wind accompanied by dust storms about the middle of March marks the beginning of hot weather. The mercury starts shooting upward and May is the hotest month of the year when the maximum temperature goes upto 45°C. The summer continues till the end of June when the onset of rains brings the much awaited relief and the temperature falls though the humidity is still high. The rise in humidity often makes the heat only more oppressive during the rainy season which lasts till the end of September. From November to February the district has a pleasant climate.

Rainfall

The monsoon breaks sometime in the latter half of June. The first showers are most welcome to the heat oppressed people. The rainy season lasts till the end of September. Maximum rainfall occurs in the months of July and August. It will be seen that normal rainfall in the district is 1,138.7 m.m. and August is usually the wettest month of the year.

Forest

The district of Saran which in the remote past was densely wooded and presumably derived its name from its forests is completely devoid of any forest now. The land is fertile and there is a large population to be supported and, therefore, no space has been left for wild growth. The cultivated land is dotted over with bamboo groves, palm trees and mango orchards.

Land use pattern

Agriculture has continued to be the main occupation in the district and also the main source of livelihood of the people. Rainfall still controls the agricultural economy of Saran district. Conditions have, however, improved to some extent to meet the situation caused by the failure of monsoon.

Rice is the main crop of the district. It accounts for about 47.10 per cent of the net area sown. Wheat covers nearly 10.53 per cent of the net area sown while sugar-cane is grown in only 0.95 per cent of the area.

Irrigational facility

The question of irrigation in the district of Saran involves watering of field on one hand and draining of waterlogged fields on the other. In the pre-independence days, requirement of irrigation received some attention at the hands of the erstwhile Zamindars. The British Government as such paid little or no attention to the irrigation needs of the district. It was only in the post-independence period that Government have turned their whole-hearted attention to the irrigation requirements of the district. Among the several schemes executed by Government are the following :

Name of Project		*Nature of Project*
(1) Saran Canal	...	Irrigation
(2) Daha Canal	...	Ditto
(3) Naini Bundh	...	Flood control
(4) Saran Embankment	...	Ditto
(5) Gogra Embankment	...	Ditto
(6) Mahi River Embank-ment	...	Ditto
(7) Gandak Embankment		Ditto
(8) Sondh Embankment	...	Ditto
(9) Kurimal Bundh	...	Ditto

To drain of water from the waterlogged areas, there are 118 sluice gates in the above mentioned embankments. These embankments are being looked after by the Irrigation Division, Chapra.

Mines and Minerals

The Geological formation of the district is Indo-Gangetic alluvium. The silt brought down by the river Ganges and its tributaries since time immemorial has created the plains of the district. In the older alluvium, nodular segregations of carbonate of lime, known as Kankar, are found. In many places the soil is saliferous from which saltpetre is extracted. No mineral of any economic importance is found in the district.

Industrialisation

According to records maintained by the District Industries Office, there were 452 registered factories in Saran in the year, 1980. They provided employment to, on an everage, 3,496 workers daily. Among the large industrial establishments of the district, mention may be made of the Marhaura Confectionary of M/S C. E. Morton (India) Ltd., the Saran Engineering Co. Ltd., The Cawnpur Sugar Works Ltd., and the Cawnpur Sugar Mills Distillery at Marhaura.

Livestock

The term livestock includes cattle (cows, bulls and bullocks), buffaloes, sheep, goats and pigs, while poultry refers to fowls and ducks.

The total livestock population in Saran district according to 1977 Livestock Census was 6,54,914. The cows were the highest in number. Then came the number of goats. Buffaloes occupy the third place. Every block has a veterinary hospital.

Fishery

Several varieties of fish such as *rehu* (*Labee rohita*), *Katla* (*catla buchanai*) and *hilsa* (*Clupea ilisha*) are caught in the big rivers such as the Ganges, Gogra and Gandak. Among other common varieties found in the district are *piyas*, *bachwa*, *boari* and *arwari*. In spite of having large rivers, the district has a poor fish market and very little export of fish.

Flora and Fauna

(a) Jackals and *nilgais* are the only wild animals found in the district. There are very few wild pigs. Formerly both leopards and tigers were common but they have now completely disappeared.

(b) The district has a large number of snakes. Among the poisonous varieties, *karait* and *gehuman* or Indian Cobra are often met with. *Dhamin* and *dhonra* (water snake) are the common varieties of non-poisonous snakes.

Communications

Roads—Situated on the western boundary of the erstwhile Subah of Bihar and later the province of Bengal, Saran enjoyed considerable strategic importance from commercial point of view. Much of the trade in those days was of course routed through river traffic but development of roads also received attention particularly on account of the famous Sonepur fair and trading activities of the British and the Dutch. However in 1830 there were only seven notable roads in existance in the district. These connected Chapra with (i) Darauli. (ii) Gobindganj, (iii) Sattarghat, (iv) Rewaghat, (v) Sonepur, (vi) Sherpur and (vii) Gorakhpur (*via* Siwan and Paragaon). The quality of these roads was rather poor. Much improvement in road communication has thereafter taken place.

The main PWD roads in existance within the district now are enumerated below :

Road	*Distance* (*in kilometres*)
(1) Chapra—Sonepur	54.4
(2) Chapra—Siwan	33.6
(3) Chapra—Salempur	35.2
(4) Siwan—Basantpur—Mashrakh--Taraiya—Marhaura	36.8
(5) Khaira—Sattar Ghat	44.8
(6) Chapra—Rewa Ghat	41.6
(7) Chapra—Marhaura	27.2
(8) Chapra—Manjhi—Darauli—Guthani	31.4
(9) Chainwa—Chainpur	10.0
(10) Banwarichak—Pahleza Ghat	2.8
(11) Marhaura—Amnour	8.0
(12) Chapra—Chapra Ghat	2.4
(13) Khaira—Akhtiyarpur	10.0
(14) Chapra—Khaira *via* Bintolia	7.24
(15) Mehia—Bhandaria	8.0
(16) Puchhari—Harkhpur Bazar	2.0
(17) Ashoknagar--Shakdih	1.0
	356.08 Kilometres

The main District Board roads in existance are as follows :

	Distance (*in kilometres*)
(1) Water Bound Macadum (W. B. M.)	56.0
(2) Cemented Road	0.13
(3) Black topped Road	24.0
(4) *Kutcha* Road	1,456.0
	1,536.13 kilometres

As per the figures available from the local officials, the total mileage of surfaced roads in this district is 436.21 Kms. in which 356.08 Kms. roads are under P.W.D. whereas 80.13 Kms. roads are being managed by District Board. Total mileage of *Kutcha* roads

in this district is 1,456 Kms. which are being managed by District Board.

The district is at present well served by a net work of the State Transport Bus routes.

Railways—The main line of the North-Eastern Railway runs through the district for a distance of 91.04 Kms. from and little beyond Chainwa in the west to Sonepur in the south-east. There are four other branch lines in the district, viz., (i) Sonepur to Pahleza 9.6 Kms. (a regular ferry service is run by the N. E. Railway between Pahleza Ghat and Mahendru Ghat), (ii) Chapra to Varanasi—it runs for only 16 Kms. in the district upto the bank of Gogra, (iii) Chapra to Mashrakh (44 Kms.) and (iv) Chapra to Gorakhpur *via* Siwan—it runs for 35.2 Kms. in the district upto Chainwa.

Rivers—The Saran district has a net work of navigable river. Both Chapra and Revelganj are important trading centres on account of their situation on river banks. With the development of roads and railways in the district, the importance of river-borne traffic has diminished largely.

Air—There is only one landing ground in the district which is at Chapra. This is however suitable only for small aircrafts. Expansion and construction of an all weather runway is being taken up shortly.

Trade and Commerce

Trade in Saran district consists mainly of exporting sugar, molasses, linseed, mustard seeds, gram, pulses, spirit, etc. and importing of rice, paddy, other food grains, cotton piece goods, salt, kerosene oil and coal.

Electricity and Power

The district receives most of its power supply from the State Electricity Board, which has only one power house located at Chapra which was established in 1932 when it was run by private company. The State Electricity Board took over the control of this power house in 1955.

Out of 1,799 revenue villages of this district 589 villages have been electrified uptil now. Total consumption of electricity in this district is 14 M. V. A. According to the local officials, the break up of electric connection under different categories in the district are as under :

(1) Domestic connection	...	9,883
(2) Commercial connection	...	4,483
(3) Industrial connection	...	1,162
(4) Electrified State Tube-wells	...	167
(5) Electrified Private Tube-wells	...	2,097

Social and Cultural events and Natural and Administrative development

No major social or cultural event has taken place in the newly created district of Saran since it was bifurcated into three separate districts. Fairs and festivals are, however, held regularly in the district.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Baniapur

It is a large village and is the headquarters of Baniapur Anchal. The village is situated on Chapra-Salempur Ghat Road at a distance of 27 Kms. from Chapra. A large cattle fair is held here on the occasion of *Vivah Panchami*.

2. Bankerwa

A village in Parsa Anchal, it lies on the western bank of the Gandak about 48 Kms. east of Chapra. An important centre for collection and despatch of sugar-cane to the sugar factories.

3. Chapra

The town is the headquarters of Saran district and Saran division. It is situated on the northern bank of the river Gogra at a distance of 107 Kms. west of Muzaffarpur and 51 Kms. west of Sonepur. It is also an important railway junction. The town owed its earlier importance chiefly as a commercial centre on account of its strategic location for river-borne trade.

4. Dhoa-Sthan

Situated 16 Kms. of Baniapur, it is known for the ancient temple of Lord Shiva. The village is connected with Chapra by regular Bus service.

5. Dighwara

A Notified Area Committee and railhead situated 28 Kms. south-east of Chapra. Dighwara town is also headquarters of Dighwara Anchal. The name is derived from a celebrated sage, Dighwara. Situated on the bank of the Ganges, it is an important commercial centre for river-borne traffic.

6. Doriganj

This village is situated 11 Kms. east of Chapra. It was a flourishing trade centre in the past when it stood at a confluence of the Ganges and the Gogra. Three kilometres upstream from Doriganj is Sherpur Ghat where passangers from Arrah disembark after crossing the river Ganges. This place is famous for the business of sand and grains.

7. Ekma

A village situated 28 Kms. north-west of Chapra ; it is also a railhead and headquarters of Ekma Anchal. Ekma is an important commercial centre connected with Chapra, Siwan, Manjhi, Darauli and Mashrakh by all weather roads.

8. Eksar

Situated close to Ekma, the village is noted for the three stone images, one of dancing Ganesh and two of Lord Vishnu, recovered from here. These have been kept in the State Museum at Patna.

9. Garkha

A village situated on the Chapra-Rewa Ghat road; it is also the headquarters of Garkha Anchal. It is noted for the prominent part the people of this place played in the freedom movement.

10. Hasanpura

It is a village in Parsa Anchal situated on the bank of the Dhani river. It is noted for the large fair held under a big banyan tree on the occasion of *Vijaya Dashmi*.

11. Jalalpur

A village situated on the Chapra-Salempur Ghat Road. it lies 18 Kms. north of Chapra. It is also the headquarters of Jalalpur Anchal.

12. Jankinagar Hat

A village situated about 2 kms. south of Garkha, it is noted for the weekly cattle fair held during the half of the year from the 13th of *Baisakh* to the 15th of *Kartik*. A large fair is also held here on the occasion of *Basant Panchami*.

13. Karinga

Situated 5 Kms. north-west of Chapra town the village is of historical importance as being the first centre of trade established by the Dutch.

14. Manjhi

A village and the headquarters of Manjhi Anchal, it is situated 19 Kms. west of Chapra on the bank of the Gogra. A large fair is held here on the occasion of *Kartik Purnima* when people congregate to take bath in the river

15. Marhaura

A village and the headquarters of Marhaura Anchal it is situated 27 Kms. north-east of Chapra. It is also a railhead and is noted for the sugar factory, engineering works, distillery and morton factory.

16. Parsa

A large village situated 5 Kms. north-east of Ekma Railway Station on the Ekma-Sohagpur Road, it is locally known as Babu Parsa in order to distinguish it from another village Parsa which is the headquarters of an Anchal of the same name. It is noted for the brassware available here.

17. Parsa

The village is the headquarters of Parsa Anchal and situated at a distance of 38 Kms. from Chapra. It was an important centre for indigo cultivation during the British regime.

18. Qasbamaker

A large village in Parsa Anchal, situated on the bank of Gandak 54 Kms. north of Chapra. The village is noted for the fair held on the occasion of *Gyarahwin Sharif* which draws large number of visitors of all communities.

19. Revelganj

A small town having a Municipality and lying adjacent to Chapra it is also the headquarters of Revelganj Anchal. The town is named after Henry Revel., Collector of Customs in 1778 under the East India Railway Company.

20. Sonepur

Internationally famous for the large fair held on the occasion of *Kartik Purnima* ; it is also the headquarters of Sonepur Anchal. Sonepur is a Notified Area Committee and is noted for its Railway Platform which is one of the largest in India.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Town-wise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the levels of towns/wards in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census keeping in view the Minimum Needs Programme of the Planning Commission

A new statement (IV-A) of civic and other amenities for each area/locality identified as slum in class I and II towns has been added.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers,

workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been persented in the District Census Handbook. The information contained in it is almost similar to that in the General Primary Census Abstract and the level of persentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA(rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria:

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size:

Class of town		*Population*
I	...	1 lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000— 9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is

considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowth if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both".

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household, of unrelated persons or having a mix of both. There may be one-member households, two-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economicallv productive work have been treated as workers.

Main Worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal Worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341(1) and 342(1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given in the next page.

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi

ANALYSIS OF DATA

Population number of villages and towns

The district of Saran, with a population of 2,084,322 persons is divided into 15 Community Development Blocks consisting of 1,570 inhabited villages (out of total 1,813 villages including 37 which are constituent units of towns in the district) and 4 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Chapra	221,513	116,009	105,504	109,949	55,927	54,022	111,564	60,082	51,482	118	92	1
2	Revelganj	68,252	33,924	34,328	47,798	23,572	24,226	20,454	10,352	10,102	56	39	1

12	Dariapur	143,878	71,608	72,270	143,878	71,608	72,270	...	...	...	196	151	...
13	Sonepur	134,152	70,188	63,964	113,789	59,181	54,608	20,363	11,007	9,356	116	72	1
14	Dighwara	70,968	35,827	35,141	53,896	26,915	26,981	17,072	8,912	8,160	53	35	1
15	Garkha	137,226	68,021	69,205	137,226	68,021	69,205	...	...	...	113	99	...
	Total	2,084,322	1,032,230	1,052,092	1,914,869	941,877	972,992	169,453	90,353	79,100	1,813	1,570	4

It would be seen from the table above that among the C. D. Blocks, Chapra with 10.63 per cent of the population of the district occupies the first place followed by Baniapur with 9.39 per cent. The least populated C. D. Block is Revelganj with only 3.27 per cent of the population of the district probably because it is a small block comprising only 39 inhabited villages.

Saran district has been trimmed after upgradation of its two subdivisions, viz., Siwan and Gopalganj as independent districts. The district appears to have less impact of urbanisation since 91.87 per cent of the population lives in the villages. The total urban population contained in 4 towns is of the order of 8.13 per cent of the total population of the district. Chapra (M) is the only Class I town (population 1 lakh and above) in the district. There is no Class II town (population 50,000—99,999) in the district nor any urban agglomeration either.

Decadal change in population

Chapra subdivision of the old Saran district, after reorganisation of the districts, now constitutes the jurisdiction of present district of Saran. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Name of Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Chapra	169,942	86,841	83,101	221,513	109,949	111,564	+30.35	+26.61	+34.25
Revelganj	55,652	40,352	15,300	68,252	47,798	20,454	+22.64	+18.45	+33.69
Jalalpur	125,370	125,370	...	154,187	154,187	...	+22.99	+22.99	...
Manjhi	123,524	123,524	...	150,194	150,104	...	+21.59	+21.59	...
Ekma	108,839	108,839	...	126,294	126,294	...	+16.04	+16.04	...
Baniapur	160,302	160,302	...	195,743	195,743	...	+22.11	+22.11	...
Mashrakh	137,591	137,591	...	161,333	161,333	...	+17.26	+17.26	...
Taraiya	126,424	126,424	...	148,733	148,733	...	+17.65	+17.65	...
Marhaura	116,090	116,090	...	139,863	139,863	...	+20.48	+20.48	...
Amnour	93,024	93,024	...	112,244	112,244	...	+20.66	+20.66	...
Parsa	98,414	98,414	...	119,742	119,742	...	+21.67	+21.67	...
Dariapur	116,538	116,538	...	143,878	143,878	...	+23.46	+23.46	...
Sonepur	107,691	107,691	...	134,152	113,789	20,363	+24.57	+5.66	...
Dighwara	59,297	59,297	...	70,968	53,896	17,072	+19.68	−9.11	...
Garkha	111,024	111,024	...	137,226	137,226	...	+23.60	+23.60	...
Total	1,709,722	1,611,321	98,401	2,084,322	1,914,869	169,453	+21.91	+18.84	+72.21

It would appear that the rise in the population of this district during 1971—81 decade has been of the order of 21.91 per cent which is lower than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 18.84 per cent while urban population growth over the decade has been as much as 72.21 per cent. Sonepur and Dighwara acquired the status of towns only in the 1981 Census.

As it is evident from the table, among the development blocks, Chapra has shown the highest increase in population over the decade with 30.35 per cent followed by Sonepur and Garkha with 24.57 and 23.60 per cent respectively. The increase in rural population during 1971—81 has been the highest in case of Chapra block (26.61%) followed by Garkha and Dariapur blocks (23.60% and 23.46% respectively). As regards growth in urban population,

Chapra block obviously occupies the first position with 34.25 per cent growth rate because of the location of district headquarters in this block.

Significantly, it can be observed that Dighwara block has shown a negative rural growth rate (—9.11%) during 1971—81 probably because Dighwara town has been formed in the 1981 Census only with quite a good number of villages as its constituent units. Same is true for Sonepur (NAC) also which has shown only 5.66 per cent rural growth rate during 1971—81.

Villages classified by population range

The distribution of villages by their population ranges is given in the following table in six size groups :

Table 3—Distribution of villages by population ranges.

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	134	8.53
200—499	266	16.94
500—1,999	919	58.54
2,000—4,999	218	13.89
5,000—9,999	29	1.85
10,000+	4	0.25
Total	1,570	100.00

It would be seen from the table that the maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range 200—499 accounting for 58.54 and 16.94 per cent of the total number of inhabited villages respectively in the district. The medium-sized villages are thus much more in number than large villages (population 5,000 and above) which comprise only 2.10 per cent of the inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was 751 and in the old Saran district it was as high as 926.

Villages classified by density

The density of population is defined as number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	1	0.06
11—20	4	0.25
21—50	5	0.32
51—100	9	0.57
101—200	42	2.68
201—300	43	2.74
301—500	178	11.34
501+	1,288	82.04
Not Known	...	...
Total	1,570	100.00

The data presented in the above table highlight the fact that maximum proportion of villages in the district lies in the density range of 501+ with 82.04 per cent of villages followed by villages in the density range of 301—500 which account for 11.34 per cent villages. The district has a high density presumably on account of its being a plain region containing areas which are mostly inhabited.

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is mostly contained in the medium-sized villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes/Tribes population in villages and towns

Tables 5, 6 and 7 furnished in the next page indicate the proportion of the Scheduled Castes and the Scheduled Tribes population in the villages and towns of the district. This will be helpful for planning of welfare programmes for the Scheduled Castes and Scheduled Tribes at micro-level, particularly, in

relation to area development oriented programmes. The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes population to Total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	269	17.14
5 or less	282	17.96
6—10	350	22.29
11—15	272	17.33
16—20	163	10.38
21—30	136	8.66
31 and above	98	6.24
Total	1,570	100.00

It is discernible from the table that there are 98 villages accounting for 6.24 per cent of the inhabited villages where the percentage of Scheduled Castes population to total population is more than 31 per cent and there are 17.14 per cent of the villages which do not have any population of the Scheduled Castes at all. The maximum number of villages, i.e., 350 accounting for 22.29 per cent of the total inhabited villages have Scheduled Castes population in the range of 6—10 per cent.

Table 6—Proportion of Schedule Tribes population to Total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,411	89.87
5 or less	124	7.91
6—15	30	1.91
16—25	3	0.19
26—35	1	0.06
36—50	1	0.06
51 and above	...	...
Total	1,570	100.00

As regards the population of the Scheduled Tribes it can be seen from Table 6 that there are as many as 1,411 out of 1,570 inhabited villages accounting for 89.87 per cent in the district which have no Scheduled Tribes at all. It is only in 124 villages comprising 7.91 per cent of the total number of inhabited villages where the concentration of Scheduled Tribes is less than 5 per cent followed by 30 villages (1.91%) in the next higher range of 6—15. In the higher ranges the number of villages is either negligible or nil.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6
Chapra	111,564	9,907	177	8.88	0.16
Dighwara	17,072	2,155	1	12.62	0.01
Revelganj	20,454	2,112	...	10.33	...
Sonepur	20,363	2,860	16	14.05	0.08
All towns	169,453	17,034	194	10.05	0.11

The above table indicates that the concentration of the Scheduled Castes in the towns of Saran district is of the order of 10.05 per cent of the total population which is less as compared to rural areas. The Scheduled Castes population has been less mobile probably because agriculture and allied activities still remain to be their main source of livelihood. The highest percentage of Scheduled Castes population is contained in Sonepur (NAC) with 14.05 per cent. The urban content of the population of the Scheduled Tribes is almost negligible in different towns of the district. Revelganj (M) does not have any Scheduled ribes population at all.

Literacy rates by population ranges of villages and towns

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 in the next page gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of

towns in the district. The tables have been presented and discussed separately :

Table 8—Literacy rates by population ranges of villages.

Range of Population	Number of villages in each range	Literacy rate
1	2	3
—200	134	24.64
200—499	266	23.77
500—1,999	919	25.03
2,000—4,999	218	26.32
5,000—9,999	29	27.87
10,000+	4	26.88
Total	1,570	25.69

It would be evident from above table that literates constitute 25.69 per cent of the population in the rural areas of the district as against 45.28 per cent in the urban areas. The highest percentage of literacy rate is observed for the villages in the population range of 5,000—9,999 accounting for 27.87 per cent. It may be of interest to note that literacy rate is not in large variation in villages of other population ranges as it only varies between minimum of 23.77 per cent to a maximum of 27.87 per cent.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Chapra	49.44
Dighwara	33.36
Revelganj	32.59
Sonepur	45.23
All towns	**45.28**

Among the towns, Chapra, being the district headquarters has the highest percentage of literate population (49.44%) followed by Sonepur town (45.23%). Revelganj has the least quantum of literates population, the percentage being only 32.59.

Workers and Non-workers in rural and urban areas of the district.

The table presented on the next page gives the break up of literates, workers, non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks in relation to total population.

Table 10—Literates, Workers, Non-workers, Scheduled Castes/Tribes Population in the district

Name of Development Block	Total Rural Urban	Total Population			Percentage of: Scheduled Castes population to total population	Scheduled Tribes population to total population	Literates to total population			Main Workers to total population

1. N—denotes negligible.

Total workers in the district of Saran account for 24.41 per cent of the total population whereas the proportion of non-workers is as high as 75.59 per cent. As shall be evident from the table on back page the main workers (i.e., those who had worked for 6 months, i.e., 183 days or more during the reference period of 1 year) comprise 23.33 per cent of the total population which is very close to the percentage of the total workers in the district, implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.08 per cent. The same trend can be observed in both the rural and urban areas of the district as also in almost all its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 42.97 and 42.03 per cent for males as against 6.20 and 4.98 per cent for females which indicates that the participation of females in economically productive work is quite low.

Another notable feature is higher percentage of female marginal workers (1.22%) vis-a-vis male marginal workers (0.94%) in the district. When we go to rural and urban break up we, however, find that participation of females in marginal work is less than males in urban areas probably because female workers in urban areas generally take up job on a full-time basis.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (24.48%) than in the urban areas (23.62%). The same is perceptable in the case of marginal workers who constitute 1.16 per cent of the rural population but only 0.20 per cent of the urban population. This may be natural in view of the fact that in the rural areas, people generally find an easy employment in various agricultural activities which are generally of shorter duration whereas, in the urban areas, household industries and other works do not offer equal job opportunities in view of the limited urban development.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/*Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Chapra	92	60(65.22)	20(21.74)	92(100.00)	18(19.57)	9(9.78)	38(41.30)	34(36.96)	52(56.52)
2	Revelganj	39	32(82.05)	6(15.38)	39(100.00)	11(28.21)	4(10.26)	9(23.08)	8(20.51)	12(30.77)
3	Jalalpur	124	90(72.58)	42(33.87)	124(100.00)	24(19.35)	11(8.87)	19(15.32)	26(20.97)	37(29.84)

11	Parsa	120	73(60.83)	18(15.00)	120(100.00)	14(11.67)	18(15.00)	31(25.83)	15(12.50)	22(18.33)
12	Dariapur	151	104(68.87)	31(20.53)	151(100.00)	18(11.92)	22(14.57)	21(13.91)	31(20.53)	24(15.89)
13	Sonepur	72	57(79.17)	21(29.17)	72(100.00)	9(12.50)	8(11.11)	21(29.17)	26(36.11)	39(54.17)
14	Dighwara	35	30(85.71)	9(25.71)	35(100.00)	7(20.00)	7(20.00)	12(34.29)	11(31.43)	17(48.57)
15	Garkha	99	78(78.79)	50(50.51)	99(100.00)	21(21.21)	8(8.08)	26(26.26)	41(41.41)	40(40.40)
	Total	**1,570**	**1,186(75.54)**	**380(24.20)**	**1,570(100.00)**	**298(18.98)**	**209(13.31)**	**334(21.27)**	**314(20.00)**	**444(28.28)**

Educational amenity—There appears to be a good deal of prevalence of educational facilities in the district as this facility is available between 60.83 per cent to 87.22 per cent in the rural areas.

There are as many as 1,186 villages accounting for 75.54 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Taraiya with 87.22 per cent followed by Dighwara block with 85.71 per cent. The lowest number of villages with educational facility is in the development blocks of Parsa and Chapra with 60.83 and 65.22 per cent respectively.

Medical amenity—The availability of medical amenity in the rural areas of the district is quite low as only 24.20 per cent of villages have it. Among the development blocks, Garkha has the largest proportion of villages with medical facility, the percentage being 50.51. Amnour block on the other hand, has the lowest number of such villages with only 10.08 per cent of the total villages enjoying medical facility.

Drinking water—It would be seen from the table that drinking water facility is available in all the villages of the district of Saran.

Post & Telegraph—Postal facilities (Post & telegraph) are available only in 298 villages (18.98%) in the district. Revelganj block has the maximum number of villages having post and telegraph facility (28.21%) followed by Manjhi (26.36%) and Ekma (25.00%). In the remaining development blocks of the district the number varies from a minimum of 11.67 per cent in Parsa block to a maximum of 21.37 per cent in Mashrakh block.

Market/Hat—The villages where market/*hat* is held constitute only 13.31 per cent of the total number of villages in the district. As will be seen from the table Baniapur block has the maximum number of villages (20.42%) closely followed by Dighwara block (20.00%) where market/*hat* facility is available. In the remaining blocks the number of villages where market/*hat* is held varies between 8.08 per cent (Garkha block) and 18.32 per cent (Mashrakh block).

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 21.27 per cent of the villages are connected by one means of communication or the other. The majority of villages are still devoid of this facility. This may be probably due to the fact that till within a comparatively recent period there were less number of canals, railways and the existing roads were not sufficient enough for the wants of the people. The utility of the roads were impaired as many of them were unbridged. However, there has been improvement in the communications of the district in the last decade. A development blockwise break up of villages having any means of communication is given in the table in back page indicating that Chapra block comprises the highest proportion of villages (41.30%) which are connected by bus or rail or navigable river/canal services, etc., followed by Taraiya with 36.84 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 6.52 per cent in Ekma block and the maximum of 34.29 per cent in Dighwara block.

Approach road to villages—With only 20.00 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Garkha block with 41.41 per cent villages having *pucca* approach road leads the list closely followed by Chapra and Sonepur blocks with 36.96 and 36.11 per cent respectively. The development blocks which have the lowest number of villages having this facility are Ekma (7.61%), Mashrakh (8.40%) and Amnour (10.08%).

Power Supply—Electrified villages in the district constitute as much as 28.28 per cent of the total number of inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Chapra development block occupies the first position having the maximum proportion of electrified

villages (56.52%) followed by Sonepur and Marhaura blocks with 54.17 and 52.25 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Mashrakh (12.21%) and Baniapur (12.68%).

Proportion of rural population served by various amenities.

While in Table 11 we had discussed details regarding number of villages possessing educational, medical, and other amenities, Table 12 below gives the proportion of rural population served by these amenities:

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of— Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Chapra	109,949	84.14	31.81	100.00	40.24	15.37	52.34	47.07	60.41
2	Revelganj	47,798	92.79	29.73	100.00	53.57	21.17	27.55	19.93	36.97
3	Jalalpur	154,187	91.21	52.78	100.00	42.20	20.34	27.72	30.09	43.01
4	Manjhi	150,194	92.60	47.36	100.00	56·00	31.56	33.52	32.52	37.82
5	Ekma	126,294	95.62	49.02	100.00	55.63	32.47	10.96	12.10	35.00
6	Baniapur	195,743	93.49	31.00	100.00	38.53	36.94	19.91	19.09	20.34
7	Mashrakh	161,333	91.87	37.09	100.00	44.08	30.88	31.01	17.09	21.24
8	Taraiya	148,733	95.04	29.69	100.00	36.01	30.82	48.50	32.73	29.07
9	Marhaura	139,863	91.63	44.25	100.00	38.27	15.19	21.07	29.60	59.67
10	Amnour	112,244	88.81	19.84	100.00	31.64	13.49	13.89	14.48	42.71
11	Parsa	119,742	87.64	32.70	100.00	34.43	38.97	38.48	21.04	37.71
12	Dariapur	143,878	83.24	32.65	100.00	27.97	28.18	20.90	24.46	26.44
13	Sonepur	113,789	93.38	46.96	100.00	33.17	20.29	31.91	38.23	68.41
14	Dighwara	53,896	87.23	28.37	100.00	38.87	34.67	45.77	47.28	64.80
15	Garkha	137,226	89.05	55.11	100.00	35.56	11.49	32.36	49.06	51.69
	Total	1,914,869	90.76	38.80	100.00	40.08	25.92	29.53	28.19	40.06

The above table indicates the proportion of rural population served by various amenities. It would be seen that educational facility is available to 90.76 per cent of the rural population in the district. A very favourable trend is discernible for the district as a whole also. It has been noticed that village population to the extent of 83.24 per cent (Dariapur) to 95.82 per cent (Ekma) is in a position to avail of this facility. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 75.54 per cent (as has been observed in Table 11) than the proportion of population which is as high as 90.76 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 38.80 per cent which is much more than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table below indicates the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms., and 10+Kms.) from the places where these are available :

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Villages not having the amenity of—	Number of villages where the amenity is not available and available at a distance of— —5 kms.	5—10 kms.	10+kms.	Total (cols.2—4)
1	2	3	4	5
1. Education	370	12	2	384
2. Medical	953	168	69	1,190
3. Drinking water	...	...	...	...
4. Post & Telegraph	1,139	119	14	1,272
5. Market/*Hat*	1,199	152	10	1,361
6. Communication	884	276	76	1,236

As regards educational facility it would be seen that there are as many as 370 villages (23.56%) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5—10 Kms. is only 12 whereas beyond 10 Kms. it is almost negligible being 2 only. The number of villages having other facilities within a distance of 5—10 Kms. and 10+Kms. is less than those having the facilities within 5 Kms. though not in the same proportion.

Availability of different amenities in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having types of facilities by distance from the nearest town in five size groups:

Table 14– Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	61	46(75.41)	13(21.31)	61(100.00)	10(16.39)	2(3.28)	16(26.23)	18(29.51)	32(52.46)
6—15	368	273(74.18)	123(33.42)	368(100.00)	70(19.02)	40(10.87)	96(26.09)	111(30.16)	148(40.22)
16—50	1,111	845(76.06)	234(21.06)	1,111(100.00)	213(19.17)	165(14.85)	217(19.53)	182(16.38)	259(23.31)
51 +	30	22(73.33)	10(33.33)	30(100.00)	5(16.67)	2(6.67)	5(16·67)	3(10.00)	5(16.67)
Unspecified	...	...	...	...	...	...	...	...	...
Total	1,570	1,186(75.54)	380(24.20)	1,570(100.00)	298(18.98)	209(13.31)	334(21.27)	314(20.00)	444(28.28)

It would appear from the above table that maximum number of inhabited villages lie in the distance range of 16—50 Kms. (70.76%) from the nearest town. With only 4 urban centres in the district such a situation is but natural. This is followed by villages in the distance range of 6—15 Kms. from the nearest town with 23.44 per cent. Only 30 villages (1.91%) are found to be in the distance range of more than 51 Kms.

It can be observed from the table that the proportion of villages having educational facility is more or less the same in different distance groups ranging from 73.33 per cent for those situated in the distance group of 51+Kms. to 76.06 per cent in the distance group of 16—50 Kms. from the nearest town. In case of medical facility no particular trend has been observed since in the distance group of 0—5 Kms. and 16—50 Kms. the proportion of villages having medical facility is less as compared to those which are situated at distance ranges of 6—15 Kms. and 51+ Kms. However, a different situation is observed in case of Post & Telegraph and market/*hat* facilities where the proportion of villages have increased with the increase in the distance range from town up to distance group of 16—50 Kms. after which it has declined in the distance range of 51+ Kms. Interestingly, it can be observed from the table that proportion of villages having communication, *pucca* approach road (except very marginal increase in the distance group of 6—15 Kms.) and power supply the proportion of villages have decreased with the increase in the distance range from town. It can be said that the villages which are nearer to urban areas have benefited in respect of these facilities vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population range and amenities available.

The table given on next page furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/*Hat*	Commu-nication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
— 499	400	150(37.50)	36(9.00)	400(100.00)	9(2.25)	10(2.50)	50(12.50)	45(11.25)	63(15.75)
500—1,999	919	791(86.07)	211(22.96)	919(100.00)	130(14.15)	101(10.99)	191(20.78)	184(20.02)	247(26.88)
2,000—4,999	218	213(97.71)	108(49.54)	218(100.00)	129(59.17)	80(36.70)	76(34.86)	68(31.19)	115(52.75)
5,000+	33	32(96.97)	25(75.76)	33(100.00)	30(90.91)	18(54.55)	17(51.52)	17(51.52)	19(57.58)
Total	1,570	1,186(75.54)	380(24.20)	1,570(100.00)	298(18.98)	209(13.31)	334(21.27)	314(20.00)	444(28.28)

It can be seen from the table that the maximum number of villages, i. e., 919 (58.53%) in the district fall in the population range of 500—1,999 followed by 400 villages (25.48%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000+ being 33 (2.10%) in number.

It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except in case of educational facility where the population of villages has declined in the population range of 5,000+ though the decrease is very marginal. Generally, the maximum number of villages having different amenities have a population range of 5,000+ which also corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

Main staple food in the villages

The table alongside indicates that rice and wheat constitute the main staple food of the people in all the development blocks of the district ;

Table 16—Main staple food in the majority of villages in each Development Block.

Sl. no.	Name of the Development Block	Main staple food
1	2	3
1	Chapra	Rice, wheat
2	Revelganj	Rice, wheat
3	Jalalpur	Rice, wheat
4	Manjhi	Rice, wheat
5	Ekma	Rice, wheat
6	Baniapur	Rice, wheat
7	Mashrakh	Rice, wheat
8	Taraiya	Rice, wheat
9	Marhaura	Rice, wheat
10	Amnour	Rice, wheat
11	Parsa	Rice, wheat
12	Dariapur	Rice, wheat
13	Sonepur	Rice, wheat
14	Dighwara	Rice, wheat
15	Garkha	Rice, wheat

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The table presented on the next page gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks.

Table 17—Distribution of villages according to Land Use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Perentage of cultu. rable area to total area	Percentage of irrigat. ed area to total cultivable area
1	2	3	4	5	6
1	Chapra	92	15,080.94	78.10	36.63
2	Revelganj	39	7,717.17	62.73	39.09
3	Jalalpur	124	17,202.11	91.19	50.66
4	Manjhi	110	17,517.32	89.60	54.86
5	Ekma	92	15,011.81	93.30	41.40
6	Baniapur	142	22,114.77	88.12	53.75
7	Mashrakh	131	24,143.77	87.19	32.57
8	Taraiya	133	19,696.94	86.07	30.16
9	Marhaura	111	15,295.66	79.79	32.59
10	Amnour	119	13,460.70	87.00	45.23
11	Parsa	120	16,322.43	83.66	25.54
12	Dariapur	151	19,274.17	79.56	37.38
13	Sonepur	72	13,677.86	84.00	40.10
14	Dighwara	35	6,465.59	70.77	40.07
15	Garkha	99	16,270.20	87.01	42.49
	Total	1,570	239,251.44	84.69	40.45

It would be seen from the table that 84.69 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 40.45 per cent area is irrigated. Among the C. D. blocks, the highest percentage of cultivable area is found in Ekma block with 93.30 per cent closely followed by Jalalpur and Manjhi blocks with 91.19 and 89.60 per cent respectively. The lowest cultivable area is found in Revelganj block which also is as high as 62.73 per cent of the total area.

The highest proportion of irrigated area to the total cultivable area is found to be in Manjhi block accounting for 54.86 per cent followed by Baniapur with 53.75 per cent and Jalalpur block with 50.66 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Parsa block (25.54 %). In the remaining blocks the percentage varies between 30.16 per cent and 45.23 per cent.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 in the next page. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State :

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

Census year	District							State				
	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (Population per sq. km.)	Sex-ratio (No. of females per 1,000 males.)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (Population per sq·km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,256,306	75,630	6.02	+13.02	3,396	922	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,447,297	88,264	6.10	+16.70	3,895	875	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,709,722	98,401	5.76	+11.48	3,342	846	56,353,369	5,633,966	10.00	+43.95	2,032	867
1981	2,084,322	169,453	8.13	+72.21	3,324	875	60,914,734	8,718,990	12.47	+54.76	2,727	832

It will be clear from the table that rise in urban population content of the district has been rather slow as compared to that of the State. Column 4 indicates that urban population of the district formed 6.02 per cent of the total population in 1951 as compared to State figure of 6.77 per cent ; in 1981 only 8.13 per cent of the population of the district is urban while the State figure went up to 12.47 per cent.

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. During the decades 1951—61 and 1961—71 the urban population growth has been rather tardy. The urban population has shown tremendous rise during the current decade (72.21% increase) probably due to the fact that two more towns, viz., Dighwara (NAC) and Sonepur (NAC) have been added in 1981 with quite a good number of villages as their constituent units. The trend of the growth of urban population in the State has been rather different. During the decade 1951—61 the urban population growth of the State was of the order of 49.03 per cent whereas during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decade and is, therefore, indicative of the faster rate of urbanisation during the last decade.

The density of population in the urban areas of the district has been rather static over the decades being more than 3,300 persons per sq. Km. except in the year 1961 when there was comparatively higher increase (3,895) as shall be evident from column 6 of the table. The density of the urban population of the district has been much higher right from 1951 to 1981 as compared to that of the State. This clearly indicates that the towns of Saran district have always remained crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of the urban population of the State on the other hand has not shown a similar rise till the 1971 Census. In 1981 Census, however, the density of the urban population of the State has shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is much less than that of Saran which stood at 3,324 persons per sq. Km.

The sex-ratio for the urban areas of Saran district has all along been higher as compared to the urban areas of the State probably due to out migration of large male population for better job opportunities. The sex-ratio of the urban areas of the district has shown a successive decline till the 1971 Census. In the 1981 Census, the district has, however, shown a considerable improvement in favour of females, though there is still predominance of males over females.

Towns added and declassified in 1981

The following table gives information regarding new towns added or towns declassified during the 1981 Census :

Table 19—New Towns/Towns declassified in 1981 Census.

Name of Towns	Population 1981 Census
1	2
(*a*) *Added*	
Dighwara	17,072
Sonepur	20,363
(*b*) *Deolassified*	
Nil	

There are 4 towns, viz., Chapra (M), Revelganj (M), Dighwara (NAC) and Sonepur (NAC) in the district of Saran. Only Dighwara and Sonepur towns have been added in the 1981 Census. No town has, however, been declassified in the 1981 Census.

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and convenience	Public works	Expenditure on public institution	Other aspects
1	2	3	4	5	6	7	8	9	10
I—Chapra (M)	21.55	8.43	13.12	16.97	1.91	10.41	1.71	...	2.94
IV—Dighwara (NAC)	2.36	0.02	2.34	5.17	4.82	0.03	...	...	0.32
III—Revelganj (M)	32.88	1.57	31.31	35.60	1.70	31.23	0.12	...	2.55
III—Sonepur (NAC)	Not available								
Total	18.39	5.74	12.65	15.99	1.95	10.63	1.14	...	2.27

It would be apparent from the above figures that the per capita receipt through taxes is the highest in Chapra (M) whereas through all other sources it is maximum in case of Revelganj (M). On both these counts Dighwara (NAC) has registered lowest receipt.

Per capita total expenditure is the highest in Revelganj (M). However, the per capita expenditure incurred on general administration is maximum in case of Dighwara (NAC).

No information could be available regarding per capita receipt and expenditure from Sonepur town, perhaps because it has been notified as statutory town only in the recent past.

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns. The table alongside gives details of different categories of educational institutions per ten thousand population in different towns of the district ;

Table 21—Schools per ten thousand population in towns.

Class, name and civic status of town	Number per ten thousand population			
	Higher Secondary/Inter/PUC/Junior college	Secondary/Matriculation	Junior Secondary/Middle	Primary
1	2	3	4	5
I—Chapra (M)	...	0.72	2.87	3.14
IV—Dighwara (NAC)	...	0.59	1.17	8.20
III—Revelganj (M)	...	0.98	3.91	11.24
III—Sonepur (NAC)	0.49	1.47	1.96	4.91
Total	0.06	0.83	2.71	4.84

It would be seen from the above table that institutions like Higher Secondary School/Inter/PUC/Junior College exist in only one town, viz., Sonepur (NAC) in the district. As regards Secondary/Matriculation level schools, there are, on an average, 1.47 schools per ten thousand population located in Sonepur (NAC) which is the highest followed by 0.98 such schools per ten thousand population in Revelganj (M). The situation is, however, different in case of Junior

Secondary/Middle Schools where it is observed that Revelganj (M) has the largest share with 3.91 such schools per ten thousand population followed by Chapra (M) with 2.87. Revelganj (M) again leads the towns in the district having highest proportion of Primary Schools with an average of 11.24 such schools per ten thousand population. The average number of primary schools in the urban areas of the district is 4.84 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns of the district :

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 Population
1	2
I—Chapra (M)	3.61
IV—Dighwara (NAC)	...
III—Revelganj (M)	0.10
III—Sonepur (NAC)	2.46
Total	2.69

The number of beds in Medical Institutions per 1,000 population for urban areas of the district works out to be 2.69. The availability of beds in the hospitals is the highest in case of Chapra (M) having 3.61 beds per 1,000 population probably because of its being the district headquarters. Dighwara (NAC) does not have this facility at all.

Proportion of slum population in towns

The details of slums have been collected only in case of class I and class II towns through the local officials of the Municipalities, NACs as also through the Town Planning Department in 1979. Chapra (M) was the only town which qualified for this purpose. The following table gives the details of slum in Chapra town.

Table 23—Proportion of slums population in towns

Class, name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (per sq. km.)
1	2	3
I—Chapra (M)	50.46	16,958
Total	50.46	16,958

Interestingly, it can be observed that proportion of slum population is half the total population of the town. The density in slums of Chapra (M) is also on a very higher side being 16,958 persons per sq. Km.

Important commodities imported, exported and manufactured.

The table presents the most important commodity manufactured, exported and imported in the 4 towns of Saran district.

Table 24—Most important commodity manufactured, imported and exported in towns.

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
I—Chapra (M)	Soap	Soap	Food-stuff
IV—Dighwara (NAC)	...	Tent	Rice
III—Revelganj (M)	...	Cauliflowers	Rice
III—Sonepur (NAC)	Biscuit	...	Rice

In Dighwara, Revelganj and Sonepur towns rice is the most important commodity which is imported from other places. In Chapra (M) it has been observed that soap is the most important commodity which is manufactured in the town and is also the most important item which is exported to other places.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc., have been incorporated in the "Remarks' column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of Mauzawar Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc. was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz. '(–5 Kms.)', '(5–10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column 10) and whether the village

is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests.

2. Not available for cultivation—
   (a) Lands put to non-agricultural uses.
   (b) Barren and unculturable lands.

3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown.
   (c) Culturable wastes.

4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.

5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of

the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column* 5—*Educational*

P	—	Primary or Elementary School (upto class IV)
M	—	Middle or Junior Secondary School (upto class VIII)
H	—	Matriculation or Secondary School (upto class X)
PUC	—	Higher Secondary, Intermediate, Pre-University, Junior College.
C	—	College
I	—	Industrial School
Tr	—	Training School
Ac	—	Adult Literacy Class/Centre
O	—	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column* 6—*Medical*

H	—	Hospital
MCW	—	Maternity and Child Welfare Centre.
MH	—	Maternity Home
CWC	—	Child Welfare Centre
HC	—	Health Centre
PHC	—	Primary Health Centre
PHS	—	Primary Health Sub-centre
D	—	Dispensary
FPC	—	Family Planning Centre
TB	—	T.B. Clinic
NH	—	Nursing Home
RP	—	Registered Private Practitioner
SMP	—	Subsidised Medical Practitioner
CHW	—	Community Health Worker
O	—	Others

(iii) *Column* 7—*Drinking Water*

T	—	Tap Water
W	—	Well Water
Tk	—	Tank Water
TW	—	Tube-well Water
Hp	—	Handpump
R	—	River Water
F	—	Fountain
C	—	Canal
L	—	Lake
S	—	Spring
N	—	*Nullah/Nala/Nallah*
O	—	Others
NA	—	Information not available

(iv) *Column* 8—*Post and Telegraph*

PO	—	Post Office
TO	—	Telegraph Office
PTO	—	Post and Telegraph Office
Phone	—	Telephone connection

(v) *Column* 10—*Communications*

BS	—	Bus
RS	—	Railway Station
NW	—	Navigable Waterway (including river, canal, backwaters, etc.)

(vi) *Column* 11—*Approach to Village*

PR	—	*Pucca* Road
KR	—	*Kutcha* Road
NR	—	Navigable River
NC	—	Navigable Canal
NW	—	Navigable Waterway (other than river or canal)
FP	—	Foot Path

(vii) *Column* 13—*Power Supply*

ED	—	Electricity for domestic purpose
EAg	—	Electricity for agriculture purpose
EO	—	Electricity for other purposes like industrial, commercial, etc.
EA	—	Electricity for all purposes listed above.

(viii) *Column* 16—*Irrigated by source*

GC	—	Government Canal
PC	—	Private Canal
W	—	Well (without electricity)
WE	—	Well (with electricity)
TW	—	Tube-well (without electricity)
TWE	—	Tube-well (with electricity)
Tk	—	Tank
R	—	River
L	—	Lake
Wf	—	Waterfall
O	—	Others

(ix) *Column* 20—*Remarks*

N	—	Copies of Newspapers coming in the village.
M	—	Motor Cycles/Scooters available in the village.
C	—	Cars/Jeeps available in the village.
T	—	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in cols. 5 or 6 and just after the symbol in col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres etc, various types of medical institutions such as dispensaries, primary health centres, etc. and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop etc. and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Saran district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities etc. are available. This statement is expected to be of considerable use in micro level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0–5, 6–10, 11–15, 16–20, 21–30, and 31 and above.

For the Scheduled Tribes (Part B) : 0–5, 6–15, 16–25, 26–35, 36–50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK— CHAPRA

VILLAGE AMENITIES AND

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+ kms. of the nearest place where the facility is available is given].

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (1) Status and growth history; (2) Physical aspects and location of towns, 1979; (3) Municipal finance, 1978–79; (4) Civic and other amenities in towns; (4A) Civic and other amenities in Notified Slums; (5) Medical, educational, recreational and cultural activities and (6) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration have been indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town have been furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix to the Town Directory. Since none of the towns of this district is having any outgrowth, this appendix has not been prepared.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix to the Village Directory. However as already explained earlier this district does not have any Census town as such.

The details of the data covered in Statements I to VI and IV–A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex-ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
CB	...	Cantonment Board/Cantonment
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from State, District and Subdivisional headquarters and from nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 are generally based on the reports of the local officials. However, for towns for which this information was available from the Office of the Director General of observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978–79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town, in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institut ions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance fr om the concerned town in question has been shown,

The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement :

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H(Hom)	...	Hospital (Homoeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homoeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories—Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

TOWN STATEMENT STATUS AND

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and up to ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the administrative and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight change.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of village, town, urban agglomeration, etc.. are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have compri-

sed of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their Location Code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
