FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amentity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amentity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the villages directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement lV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educationl facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual slips of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed Analytical Note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrur General, India

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, *viz.* (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Town-wise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Caste and Scheduled Tribe population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms (for Village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen/ Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as charge superintendents under the supervision of the District Census Officers and the Subdivisional Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the district'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and village/urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and whole-hearted co-operation which was throughout extended by the District Officers, the Sub-divisional Officers, the District Census Officers and the Charge Superintendents.

In my office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Asstt. Director was ably assisted by his team of Statistical Assistants, Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commend-able work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the

respective Dy. Directors and it was again scrutinised and given final shape at the head-quarters by a team headed by Shri P. N. Sinha, Asstt. Director. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. S/Shri A. L. Das, G. C. Mishra Asstt. Directors and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH Section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad Stenographer and Shri Asharful Hoda, L. D. C. who have done the typing work also deserve thanks.

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Mohan Press, Patna who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

Before acquiring the status of a district on 14th November, 1972, Samastipur happend to be a subdivision of Darbhanga district since the formation of Tirhut Division in 1908. The district is bounded on the north by the Bagmati river, which separates it from Darbhanga district, on the west by Vaishali district, on the south by the Ganges, and on the east by Begusarai district.

The history of Samastipur district has close association with that of old Darbhanga, its parent district.

The district comprises the greater part of the ancient territory of Mithila. Its legendary history goes back to the Ramayana and Mahabharat periods. According to accounts in the vedic literature, the Videhas of the Aryan stock first migrated to the area from the banks of Saraswati in the Punjab. Legendary association of the old Darbhanga district with the Pandavas is evidenced by the belief that they stayed in Pandaul village (now part of Madhubani district) during a part of their period of exile.

In course of time, the Videhan monarchy is believed to have been replaced by a *Sangha* or federation in the form of a republic. The establishment of the Vrijian republic (of which Videha was a part) marks the beginning of the historic period. The centre of power had, however, shifted to Vaishali and the Lichchhavis were the most prominent among the different clans that constituted the confederation. The ascendancy of the Vrijian republic was checked by Ajatshatru, emperor of Magadh, who subdued and extended his control over north Bihar.

Matrimonial alliances with the Lichchhavis enabled the Guptas of Magadh to regain control over north Bihar which came to be known as Tirabhukti. Vaishali was the administrative headquarters of the Tirabhukti region. The Chinese pilgrim, Fa-hien visited north Bihar during the reign of Chandragupta II. He observed that Buddhism was no longer as flourishing as in the past. The earlier renown of Darbhanga (old Darbhanga which included Samastipur also) as the place of philosophers continued in the Gupta period as well. Kumarila Bhatt was a prominent philosopher. With the decline of the Gupta Empire, local autonomy reasserted itself. Later, Harshavardhana (606-648 A.D.) annexed Darbhanga. Hiuen Tsang visited the area in 635 A. D. After the death of Harshavardhana, due to friction with a Chinese mission, Tirhut was invaded and occupied by the combined forces of Tibet and Nepal. They were, however, driven off by Adityasena (672 A. D.). After the fall of the later Guptas, Yasovarman of Kannauj (700-740 A.D.) ruled over the area. Tirhut came under the Pala kings of Bengal in the 9th century. The Karnata or Simraon dynasty was founded in 1097 by Nanyadeva who had to face conflict with the Senas of Bengal.

Medieval Period

Nanyadeva became very powerful and eventually succeeded in extending his domain over the whole of Mithila and Nepal. One of his sons ruled over Nepal, while another, Ganga Deva, reigned in Mithila. The latter is known to be the first ruler to have constituted fiscal divisions for revenue administration. Narsingh Deva ascended the throne on the death of his father Ganga Deva. He quarrelled with his kinsman in Nepal as a result of which Mithila and Nepal were separated for ever. He was succeeded by his son Ram Singh Deva, who was a great scholar of vedic literature and an able administrator. During his time several commentaries on the Vedas were compiled and a code of conduct was drawn up for the guidance of the Hindus in their religious and social activities. Ram

Singh Deva is credited with having introduced the system of *patwaris* or village accountants for the maintenance of village records. Sakti Singh succeeded his father Ram Singh Deva on his death. Unlike his forefathers he turned out a despot and one of his ministers formed a council of seven elderly nobles as a measure against his autocratic power. Hara Singh Deva was the last ruler of the dynasty. With the fall of the Simraon dynasty, Tirhut was annexed by the empire of Delhi.

The whole of north Bihar appears to have passed on to the kings of Jaunpur in 1397. It remained with them for over a century until Sikandar Lodi of Delhi defeated the king of Jaunpur. Meanwhile Hussain Shah, the powerful king of Bengal, had extended his domain over large tracts in Bihar. After defeating the king of Jaunpur, Sikandra Lodi marched against Hussain Shah in 1499. The latter realised that he could be no match against the imperial forces, and so he offered to withdraw from Bihar, Tirhut and *Sarkar* Saran, provided the Emperor gave him an assurance not to interfere with his possessions in Bengal. The terms were quite favourable to the Emperor and he agreed. A treaty was accordingly concluded at Barh. The Emperor, having got domain over Tirhut, proceeded to establish his authority. The Raja of Tirhut was subdued but was let off after the realisation of several lakhs of rupees. But the kings of Bengal could not keep their hands off Tirhut for long. Nasrat Shah (1518-1532), son of Hussain Shah and the king of Bengal swept down upon Tirhut and killed the Raja. He appointed his son-in-law, Alauddin as the Governor. In 1538 Makhdum Alam joined Sher Khan in his revolt against the king of Bengal. The power of the kings of Bengal was diminishing. Mahmud Shah was the last independent king of Bengal.

Though Darbhanga (old Darbhanga which included Samastipur also) alongwith other parts of north Bihar, was annexed to the Mughal Empire, the control was very loose and the local chiefs exercised great power. North Bihar had many Afghan settlers. Their number had increased owing to the large scale immigration of those who had refused to serve the Mughals. They were turbulent, and when Daud Khan, the Afghan king of Bengal, rose in revolt in 1574, he got a band of ready supporters in them. When the Mughal Generals failed to control the rebellion, Emperor Akbar himself led a large army to crush the aspirations of Daud Khan. The Afghans were defeated and Bihar was lost to them. Akbar created a separate *Subah* of Bihar and placed it under a Mughal Governor. Tirhut formed part of this *Subah*. The chiefs who had helped the emperor were rewarded with grants of *Jagir* in *sarkar* Hajipur, which also covered the southern parts of district of Darbhanga (portions of new district of Samastipur). The *Jagirdars* settled down with their retinues. Darbhanga (including the newly created Samastipur district) thereafter remained a part of the Mughal Subah.

British period

The decisive victory of the British in the battle of Buxar in 1764 gave them undisputed sway over the Lower Provinces of Bengal. As a consequence, the district alongwith other parts of Bihar, passed under the control of British. The history of the district thereafter is merged with the history of British rule in India.

After assuming control over the territory, the British took steps to consolidate their authority. Mithila, the enlightened home of Hindu culture and learning, had been ravaged by the Muslim and the Mughal armies from time to time. The British administrators took steps to establish law and order. Besides the trouble-mongers in Mithila, they had also to deal with the incursions of the Nepalese. The troubles with Nepal culminated in the Indo-Nepalese war. After having concluded peace with Nepal, the British administrators had a comparatively quiet time until the 1857 movement. In 1857 patriotic fervour raged high in the district as in many other districts of Bihar.

Natural divisions

Samastipur district consists of two subdivisions, viz., Samastipur Sadar Subdivision and Rosera subdivision comprising 10 and 4 Community Deve-

lopment Blocks respectively stretching over an area of 2904.0 Km.² The entire tract forms a rich alluvial country noted for the fertility of its soil and for the excellence of its *rabi* crops. With the exception of the part of the *doab* between Baghmati and Burhi Gandak rivers, the district consits of large block of upland interspersed with a few *chaurs* or marshes. The land is very fertile and yields most of the valuable *rabi* and *bhadai* crops and it has been the centre of the indigo industry. The soil of the district is highly calcarious. It is a mixture of clay and sand and as one proceeds to south the sand content of the soil increases. The river banks are made of new alluvium formed by continuous deposit of soil and clay.

The most important rivers traversing the district are Burhi Gandak, the Baya, Kosi, Kamla, Kareh and Jhamwari and Balan, which are both the offshoots of Burhi Gandak. The Ganges skirts the district on the south. Burhi Gandak enters the district from the west near Pusa and then pursues a south-easterly course till it leaves the district near Rosera. River Baga flows through a portion of the Dalsinghsarai and joins the Ganges below Dhanespur at the extreme south-east corner of the district. Jhamwari and Balan rivers are branches of Burhi Gandak, which they leave at Pusa, and after flowing through the south-west of Samastipur rejoin the parent stream in Munger.

Climatic conditions

The climate of this district is somewhat dry and generally healthy. The cold season is from about the middle of November to the end of February. The summer season starts from March when westerly wind begins to blow and the temperature rises considerably. It continues till May and thereafter it is followed by the south-west monsoon season from June to September. May is the hottest month when the temperature goes up to 42°C. Rains set in towards the middle of June. With the advent of rain the temperature falls and humidity rises. October and the first half of November constitute the post-monsoon season.

Rainfall

The rains generally start in the district by middle of June. The average annual rainfall in the district is 1255mm. August is the rainiest month. The district also gets some winter rain.

Forests

As the land in the district is generally very fertile, there are hardly any uncultivable areas. The district is, therefore, devoid of any forests. Planting of fruits, timber, and fire-wood trees has, however, been taken up lately by the Forest Department. The expanse of cultivation, the growth of population and the extension of means of communications have practically denuded the district of forests and wild animals. Hare and mongoose are met with occasionally.

Land use pattern

Samastipur district is marked by the intensive cultivation of its rich uplands. The land of the district is very fertile and multiple cropping is practised. Cash crop such as chillies, sugarcane, tobacco and turmeric are grown here. The district falls in the belt of Saraisa Pargana where tobacco is famous for its quality. The staple food of the district is rice, wheat, *dal* and vegetables.

Agriculture is the principal economic activity of the district and nearly 83 per cent of the total working population depends on it. Wheat, pulses and edible oil seeds are also grown here. Tobacco is processed and exported to distant places of the country. The district has also a rich endowment of fruits like mango, lichi and banana. These fruits in sizeable number are exported in sizeable quantity out side the State also.

The importance of agriculture in this district is highlighted by the existence of the Rajendra Agricultural University, the Central Tobacco Research Institute and the Sugarcane Research Institute at Pusa. Kisan Vidyapith and other extension agencies are functioning there to disseminate healthy and up-to-date knowledge of agricultural operations among the farmers. High yielding varieties of seeds,

improved agricultural implements and chemical fertilizers are utilised by the cultivators of this district. The functioning of the different research institutes is detailed below :

Sugarcane Research Institute

At this institute research on different varieties of sugarcane is carried out. It also develops better varieties of sugarcane suitable for the soil of this area. Thirty persons are trained at this institute every year and are awarded scholarship and free lodging. The minimum qualification of the trainees is matriculation with science. They are imparted specialised training in the cultivation of sugarcane in addition to the general knowledge of agriculture.

Tobacco Research Institute

It is a centrally sponsored institute. This institute at Pusa has been carrying on research relating to various types of tobacco. It grows tobacco, undertakes its processing on experimental basis and explores ways of improving the yield and quality. Tobacco growing farmers of this district have amply benefitted through this institute and are now growing virginia tobacco and selling it to eminent cigarette companies. The new improved varieties introduced are Sona and Gandak Bahar. Sona is very popular as chewing tobacco in this district. Gandak Bahar is used mainly in preparation of *Kimam* and black and yellow tobacco for betel chewing.

Masina farm (in Warisnagar block), an individual enterprise, has been gaining prominence among the cultivators for a high quality seeds and produce of hybrid maize. The main agencies in operation are (i) Masina Joint Farming Co-operative Societies (ii) Masina Beej Nigam, (iii) Masina Beej Private Limited and (iv) Masina Food Products Private Limited. Masina Farm has, in fact, done a really commendable job in initiating a programme of production of hybrid seeds and in making every body conscious of quality and high yield in agriculture.

Keeping in view the progress of maize cultivation in this area, a Pioneer Maize Seed Research Station has been established in Samastipur in the year 1980-81 for producing yellow hybrid maize seeds. Its main research station is in Hyderabad. Now they have opened a branch research station here in Samastipur where one chief scientist is working for the production and promotion of yellow and white pioneer maize seeds.

Irrigational facilities

Artificial irrigation, although important, has played a comparatively minor part in the agricultural economy of the district. The district, like most other districts, is dependent on rainfall for its crops. Rainfall is not always normal and well distributed. This brings in the need for artificial irrigation. The main sources of irrigation are tanks, *chaurs* and streams but in the event of failure of rains these sources naturally fail when they are most needed. The irrigated area in the district is very small.

Mines and Minerals

No mineral is found in this district. There are no mining and heavy industries in the newly created district of Samastipur.

Industrialisation

The small district of Samastipur has two sugar mills, one at Samastipur and the other at Hasanpur. A jute mill, a paper factory, re-rolling mill and many other small factories are working around Samastipur town. The Khadi Gramodyog Board has its main centre at Pusa with 29 subcentres in different parts of the district. Thousands of male and female weavers and rural artisans derive their livelihood from these centres. The District Industries Centre has also been functioning to promote the growth of industries in the district. It is running two training-*cum*-production centres at Jitwarpur (Samastipur) and Waini (Pusa).

Tenancy

Survey and Settlement Operations are nearing completion in the district. Consolidation of holdings is in progress in seven anchals only. Following

the land reforms measures, the incidence of share and *thika* cropping has been considerably reduced and by and large the land-holders are cultivating land themselves. 198 land-holders have been identified to be in possession of 5837.31 hectares of surplus agricultural land under the Land Ceiling Act 12 of 1961. The surplus land has been distributed among the landless Harijans and others. The process is still continuing and about 2665 persons have already benefitted by this scheme. 10 and 30 per cent of the land-holders are in the categories of small and marginal farmers respectively and 56 per cent are landless agricultural labourers.

Livestock

This district alongwith other districts in the State depends absolutely on livestock for pursuing agriculture which is the most important occupation. The district is also suitable for the rearning of milch cattle. Baraui Dairy Plant is situated at a distance of 60 Kms. where various kinds of milk products such as Ghee, Milk Powder, etc., are produced, *Diara* area of Patori and Mohiuddinagar (which is close to Barauni) being affected by flood, is suitable for rearing milch cattle. Crop cannot be grown more than once in a year in these area. Hence the income of farmers and agricultural labourers can be supplemented by adopting this subsidiary occuption.

Fishery

Many rivers flow through this district which provide fish in abundance. There are also many tanks like *Moen*, *Dom*, etc., in which fish is reared. There are a good number of fisherman co-operative societies to cater to the needs of thousands of fisherman. The tanks or *Chaurs* need renovation for implementation of fish production programme. A fish farmers, development agency has been established in the district which will address itself to this task.

Communications

Samastipur is also the Divisional Headquarters of the North Eastern Railway. The distirict has direct train link with Patna, Calcutta, Delhi, Dhanbad, Jamshedpur and other places of importance. National Highway 28 passes through the district. The district headquarters is connected to all block headquarters by all weather roads.

In addition to rail and road, rivers like the Ganges, Burhi Gandak, Kareh, etc. provide transport facilities.

The district has shown marked improvement in the field of communication. Besides, ample number of post offices, there are five telephone exchanges working in the district. A microwave station is also functioning at Samstipur to provide quick tele-com munications. The district headquarters is linked by S.T.D. with many prominent cities of the country.

Trade and Commerce

The district occupies a place of pride in the trade of Saraisa Tobacco. Virginia tobacco is also grown and traded in this district. Spices such as Garlic, Chilli, Ginger, etc., are exported from this district. Fruits such as mango, lichi, and banana are also important items of trade and commerce of the district. Masina and Mangalgarh are two private farms besides the Agriculture University at Pusa which produce high yielding maize seeds and export the same to other parts of the State and the country in abundance.

Social and Cultural events and Natural and Administrative Development

No major social or cultural event has taken place in the newly created district of Samastipur since it came into existence.

Samastipur, which was a subdivision of old Darbhanga district, acquired the status of a district in the year 1972. In 1975 Kusheshwar Asthan block was taken away from Samastipur and amalgamated with Darbhanga district by the State Government decision. The total number of development blocks in this district thus decreased by one, i. e., from 15 to 14 diminishing also its geographical area.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Kalyanpur

A village, situated about 10 Kms south of Pipra railway station, is the headquarters of the Community Development Block of the same name. It has a temple of Kalyani Devi from which the village derived its name.

2. Malinagar

The village is situated at a distance of about 35 Kms. south-west of Laheriasarai in Kalyanpur block. The village contains a temple of Mahadeo, which was built in 1844 by a local business man. An annual *mela* on *Ramnavmi* day is held which lasts for about five days.

3. Mangalgarh

It is situated at a distance of 14 Kms. from Hasanpur block of Samastipur near Dudhpura. Dudhpura is the nick name of ancient Budhpura. Budhpura was named after Lord Buddha who happened to stay there and preach Buddhism for some time while going round the country. He stayed there at the request of king Mangaldeo. Remains of his fort have been discovered here.

4. Mohiuddinnagar

The village, situated 6 Kms. south of Mohiuddinnagar railway station, is the headquarters of the Community Development Block of the same name. The village is a flourishing commercial centre named after Mohiuddin Saheb, a famous Muslim saint. It has a mosque believed to be dating back to the Mughal period.

5. Muktapur

A village in Kalyanpur block, it is situated on the Kalyanpur-Samastipur road and rail-head. Two fairs are held on the occasion of *Ramnavmi* and *Vivah Panchami*

6. Narghoghi

A village, situated on the Samastipur-Mohiuddinnagar road, has a temple of Ramjanaki where a big fair is held on the occasion of *Durga Puja*.

7. Narwanchak Baidauliya

It is a small village in Bibhutipur block at a distance of about 15 Kms. from Narhan Railway Station of N. E. Rly. There is a magnificent old building of Narhan Estate which has been very prominent in this area since the Mughal period. The temple of Lord Shiva in Narwan Chak is said to have been constructed by Smt. Jageshwari Devi, daughter of Shri Bhaw Mishra, a Vaidya of Narhan Estate. It is now known as Jageshwar Asthan. A very large *pipal* tree outside the temple indicates its oldness.

8. Pusa

The village, situated 14 Kms. south of Pusa Road Railway Station is noted for the Central Sugarcane Research Station, the research activities of which have proved beneficial to sugarcane grower. It also has the Bachhaur Cattle Breeding Farm, the Central Tobacco Sub-Station and certain other institutions.

9. Vidyapatinagar

The place is named after the most revered Maithili poet Vidyapati. It is situated in Dalsinghsarai block near the bank of the Ganga where the renowned Maithili poet Vidyapati breathed his last in search of Lord Shiva. As the myth goes, Lord Shiva associated with him since long in the guise of his servant. There is a big old temple of Lord Shiva known as "Vidyapati Dham". People of nearby villages go there to worship Lord Shiva

particularly during the month of '*Shrawan*'. A big fair is also held on the occasion of *Basant Panchami*.

10. Samastipur

A municipal town, situated on the bank of river Burhi Gandak, is the headquarters of the newly created Samastipur district. The bridge on the river connects Samastipur to Muzaffarpur, Darbhanga, Jainagar, Nirmali and Raxaul. The town is a place of commercial and trade importance. Large fairs are held on the occasions of *Basant Panchami*, *Shivratri* and *Durga Puja*

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentations of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing, analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part-C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards/circles in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post and telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educationl and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new statement (IVA) on civic and other amenities for each area/locality identified as slum in Class I and II towns has been added. In this district, however, there is no Class I or II town and hence this information has not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward.

In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana Jurisdiction List pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations. There has not been any change in the concept of urban area since 1961. During the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. During the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from the non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size.

Class of town	Population
I	1 lakh and above (termed as city)
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, two-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as Workers.

Main workers—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal Worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes—& Scheduled Tribes Under Articles 341(1) and 342(1) of the Constitution of India, the

castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976), dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excludingNorth Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district).
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar.

ANALYSIS OF DATA

Population, number of villages and towns

The district of Samastipur, with a population of 2,116,876 persons is divided into 14 Community Development Blocks consisting of 1,111 inhabited villages (out of a total number of 1,257 villages including 11 villages which are constituent units of towns) and 4 towns. With 3·03 per cent of the total population of the State, the district ranks 16th in the State in order of population. The following table highlights the population, number of villages and towns for the district as also for its development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population						No. of villages			No. of towns
		Total			Rural			Urban			Total Inhabited
		P	M	F	P	M	F	P	M	F	
1	2	3	4	5	6	7	8	9	10	11	12 13 14

13	Hasanpur	182,602	92,903	89,699	182,602	92,903	89,699	...	...	...	145 125 ...
14	Bibhutpur	165,153	82,133	83,020	165,153	82,133	83,020	...	...	...	44 43 ...
	Total	**2,116,876**	**1,073,449**	**1,043,427**	**2,028,827**	**1,025,971**	**1,002,856**	**88,049**	**47,478**	**40,571**	**1,257 1,111 4**

It would be seen from the table above that among the C. D. Blocks, there is a wide range of variation in population distribution. Warisnagar with 9.57 per cent of the population of the district occupies the first place followed by Rosera with 9.19 per cent. The least populated C. D. Block is Mohiuddinagar with only 4·35 per cent of the population of the district having only 41 inhabited villages.

The average population of a development block in the district is 151,205 which is higher than the average population of a development block in Bihar (119,105). As many as 7 development blocks out of 14 have higher population than the average block population in the district.

Samastipur district, which has been carved out of the old Darbhanga district, appears to have had less impact of urbanisation since 95·84 per cent of the population lives in the villages as against the State break-up of rural-urban population of 87·53 and 12·47 per cent respectively. The total urban population contained in 4 towns is of the order of only 4·16 per cent of the population of the district. None of the 4 towns falls either in class I (population 1 lakh and above)or class II (50,000—99,999) range. The district does not have any urban agglomeration either.

Decadal change in population

Samastipur acquired the status of a district only after the 1971 Census. In fact the subdivision of Samastipur in the old Darbhanga district as such (excluding Kusheshwar Asthan block) forms the new district of Samastipur. The percentage increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of popultion

Name of Development Block	Population 1971			Population 1981			Percentage decadal (1971-81) variation		
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Samastipur	143,612	112,046	31,566	190,837	143,605	47,232	+32.88	+28.17	+49.63
Sarairanjan	103,551	108,551	...	131,414	131,414	...	+21.06	+21.60	...
Tajpur Morwa	101,606	101,606	...	129,598	129,598	...	+27.55	+27.55	...
Pusa	101,747	101,747	...	122,086	122,086	...	+19.99	+19.99	...
Kalyanpur	141,606	141,606	...	171,433	171,433	...	+21.06	+21.06	...
Warisnagar	158,457	158,457	...	202,524	202,524	...	+27.81	+27.81	...
Ujiarpur	117,766	117,766	...	145,646	145,646	...	+23.67	+23.67	...
Dalsinghsarai	145,405	134,658	10,747	176,512	163,099	13,413	+21.39	+21.12	+24.81
Mohiuddinagar	74,334	74,334	...	92,105	83,300	8,805	+23.91	+12.06	...
Patori	96,624	96,624	...	119,883	119,883	...	+24.07	+24.07	...
Rosera	159,802	145,014	14,788	194,535	175,936	18,599	+21.74	+21.32	+25.77
Singhia	79,610	79,610	...	92,548	92,548	...	+16.25	+16.25	...
Hasanpur	153,238	153,238	...	182,602	182,602	...	+19.16	+19.16	...
Bibhutpur	136,695	136,695	...	165,153	165,153	...	+20.82	+20.82	...
Total	**1,719,053**	**1,661,052**	**57,101**	**2,116,876**	**2,028,827**	**88,049**	**+23.14**	**+22.07**	**+54.20**

It would appear that the rise in the population of this district during the 1971-81 decade has been of the order of 23·14 per cent which is lower than the decadal growth rate of 24·06 per cent for the State. The rural population in the district has increased by 22·07 per cent while the growth of the urban population over the decade has been as much as 54·20 per cent.

Another notable feature discernible from these data is that the growth rates amongst various C. D. blocks do not show a uniform pattern. Samastipur block has registered the highest growth rate of 32·88 per cent probably because Samastipur town, the district headquarters, is located in this development block. This is followed by Warisnagar and Tajpur Morwa blocks with 27·81 and 27·55 per cent growth rates respectively. Growth rates in the remaining 11 development blocks have varied between 16 and 25 per cent, the lowest being in Singhia block (16·25%). The increase in rural population during the last decade has been the highest again in case of Samastipur block (28·17%) closely followed by Warisnagar (27.81%). The high increase in population in these blocks can be attributed to low migration of population from the villages. As regards the growth in urban population, Samastipur block occupies the first position with 49.63 per cent increase. This is mainly because it contains Samastipur town, the district headquarters, where the people come from all parts of the district in search of employment, educational and medical facilities, etc., which may not be available to that extent in other towns. Mohiuddinagar (NAC) is a new addition to the list of towns in the district during the 1981 Census.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups :

Table 3 —Distribution of villages by population ranges

Range of population	No. of villages in each range	Percentage of villages in each range.
1	2	3
—200	101	9.09
200—499	154	13.86
500—1,999	521	46.90
2,000—4,999	251	22.59
5,000—9,999	75	6.75
10,000	9	0.81
Total.	**1,111**	**100·00**

It would be seen from the table that the maximum number of villages in the district lies in the population range of 500--1,999 indicating that generally there are medium sized villages in the district. Villages in the population range of 500—1,999 and 2,000-4,999 account for 46.90 and 22.59 per cent of the total number of inhabited villages respectively in the district. The medium-sized villages are thus much more in number than large sized villages (with a population of above 5,000) in the district. The large villages comprise 7·56 per cent of the inhabited villages in the district. It may be of interest to note that in 1971 Census the average population size of a village in the State was 751 whereas the average population size of a village in the old Darbhanga district it was as high as 1,571 whereas the present average size of an inhabited village in this district has been found to be 1,905.

Villages classified by density

The density of populatian is defined as the number of persons per square kilometre. It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given in Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	**2**	**3**
0—10	4	0.36
11—20	2	0.18
21—50	8	0.72
51—100	10	0.90
101—200	20	1.80
201—300	31	2.79
301—500	119	10.71
501+	916	82.45
Not known	1	0.09
Total	**1,111**	**100·00**

The data presented in the above table highlight the fact that 82.45 per cent of villages in the district lie in the density range of 501+. Even in the old Darbhanga district, Samastipur subdivision used to have the highest average density.

It would further be seen that a very small number of villages fall in the density range below 200 implying thereby that population in the district is mostly contained in the medium sized villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes/Tribes population in villages and towns

Tables 5,6 and 7 furnished below indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and the Scheduled Tribes at micro-level, particularly, in relation to area-oriented programmes. The tables have been dealt with separately :

Table 5—Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	104	9.36
5 or less	89	8.01
6—10	127	11.43
11—15	198	17.82
16—20	201	18.09
21—30	219	19.72
31 and above	173	15.57
Total.	**1,111**	**100·00**

It is discernible from the table that there are as many as 173 villages accounting for 15·57 per cent of the inhabited villages, where the percentage of Scheduled Castes population to total population is more than 31 per cent and there are 9.36 per cent of the villages which do not have any population of the Scheduled Castes at all. It may be observed that percentage of villages increases with the increase in the percentage range of the Scheduled Castes except in the percentage range of 31 and above where there is a marginal decline.

Table 6—Proportion of Scheduled Tribes population to total population in the villages

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,097	98.74
5 or less	14	1.26
6—15	...	...
16—25	...	...
26—35	...	..
36—50	...	...
51 and above	...	..
Total	**1,111**	**100·00**

It will be seen from the above table that dispersal of Scheduled Tribes population is not on the same pattern as in the case of Scheduled Castes population. As many as 1,097 out of 1,111 inhabited villages (98.74%) in the district have no Scheduled Tribe population at all. There are only 14 villages (1.26%) which have a population of Scheduled Tribes. Even in these villages the Scheduled Tribes account for 5 per cent of the total population or even less.

Table 7—Proportion of Scheduled Caste s/Scheduled Tribes population in towns.

Name of the town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6
Dalsinghsarai	13,413	2,915	1	21.73	0.01
Mohiuddinagar	8,805	1,074	3	12.20	0.03
Rosera	18,599	2,291	...	12.32	...
Samastipur	47,232	5,758	147	12.19	0.31
All towns	**88,049**	**12,038**	**151**	**13.67**	**0.17**

The table above indicates that the concentration of the Scheduled Castes in the towns of Samastipur district is of the order of 13.67 per cent of the total population as against 17.83 per cent in the rural areas (Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and the predominantly rural base of the economy of the district. The highest percentage of Scheduled Caste population is contained in Dalsinghsarai (NAC) with 21.73 per cent. The population of the Scheduled Tribes in the district is negligible in both the rural and urban areas (Table 10).

Literacy rates by population ranges of villages and towns.

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 below gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of town in the district. The Tables have been presented and discussed separately :

Table 8—Literacy rates by population ranges of villages.

Range of population	No. of villages in each range	Literacy rate
1	2	3
—200	101	21.99
200—499	154	20.89
500—1,999	521	23.15
2,000—4,999	251	23.59
5,000—9,999	75	24.31
10,000 +	9	23.58
Total	**1 111**	**23.56**

It would be seen form the table above that literates form 23.56 per cent of the total population in the rural areas of the district as against 54.91 per cent (Table 9) in the urban areas. Of the 1,111 inhabited villages in the district the literacy rate in 75 villages in population range of 5,000 – 9,999 has been observed to be 24.31 per cent which is the highest, closely followed by 251 and 521 villages falling in the population ranges of 2,000—4,999 and 500—1,999 having literacy rates of 23·59 and 23·15 per cent respectively. It, therefore, follows that bigger the village higher is the literacy percentage. Perhaps, because of higher population, educational facilities were provided in these villages earlier than in smaller villages.

Table 9—Literacy rates for towns

Name of the town	Literacy rate
1	2
Dalsinghsarai	42.97
Mohiuddinagar	36.52
Rosera	45.33
Samastipur	65.49
All towns	**54·91**

Among the towns, Samastipur (M), being the district headquarters has the highest percentage of literate population (65.49%). Mohiuddinagar town, on the other hand, has the lowest literacy rate (36.52%) presumably because it has acquired the status of a statutory town very recently.

Workers and non-workers in rural and urban areas of the district

The table on next page deals with the percentage breakup of literates, main workers, marginal workers, total workers, non-workers and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its various develepment blocks in relation to total population :

Table 10—Literates, Workers, Non-workers,

Name of Development Block		Total Population			S.C. population to total population	S.T. population to total population	Percentage of Literates to total population			Main Workers to total population

Total workers in the district of Samastipur account for 28. 95 per cent of the total population whereas the proportion of non-workers is as high as 71.05 per cent. Main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) constitute 27.63 per cent of the total population which is very close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district, being only 1.32 per cent. The same trend can be observed in both the rural and the urban areas of the district as also in most of its development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 50.15 and 49.43 per cent respectively for males as against 7. 14 and 5.20 per cent for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (1.94%) vis-a-vis male marginal workers (0.72%). It may be due to the fact that apart from household activity they do some work on part time basis to supplement the household income.

It will also be seen that the percentage of workers to the total population is higher in the rural areas (29.09%) than in the urban areas (25.82%). The same pattern is perceptible in the case of main as well as marginal workers in most of the development blocks. This may be due to the fact that in the rural areas people generally find an easy employment in various agricultural activities, whereas in the urban areas, household industries and other works do not offer equal job opportunities due to limited urban development.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/*Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Samastipur	89	69(77.53)	23(25.84)	89(100.00)	21(23.60)	9(10.11)	22(24.72)	22(24.72)	69(77.53)
2	Sarairanjan	59	42(71.19)	16(27.12)	59(100.00)	23(38.98)	16(27.12)	22(37.29)	21(35.59)	22(37.29)
3	Tajpur Morwa	79	67(84.81)	55(69.62)	79(100.00)	24(30.38)	7(8.86)	16(20.25)	21(26.58)	24(30.38)
4	Pusa	79	54(68.35)	15(18.99)	79(100.00)	23(29.11)	7(8.86)	21(26.58)	27(34.18)	55(69.62)
5	Kalyanpur	129	92(71.32)	40(31.01)	129(100.00)	30(23.26)	15(11.63)	42(32.56)	46(35.66)	54(41.86)
6	Warisnagar	124	88(70.40)	38(30.40)	124(100.00)	24(19.20)	12 (9.60)	24(19.20)	32(25.60)	64(51.20)
7	Ujiarpur	60	49(81.67)	15(25.00)	60(100.00)	23(38.33)	8(13.33)	7(11.67)	20(33.33)	31(51.67)
8	Dalsinghsarai	79	60(75.95)	13(16.46)	79(100.00)	20(25.32)	11(13.92)	18(22.78)	20(25.32)	38(48.10)
9	Mohiuddinagar	41	30(73.17)	25(60.98)	41(100.00)	5(12.20)	1 (2.44)	12(29.27)	5(12.20)	12(29.27)
10	Patori	57	47(82.46)	8(14.04)	57(100.00)	17(29.82)	3 (5.26)	14(24.56)	13(22.81)	29(50.88)
11	Rosera	103	79(76.70)	16(15.53)	103(100.00)	23(22.33)	6 (5.83)	21(20.39)	15(14.56)	26(25.24)
12	Singhia	44	36(81.82)	9(20.45)	44(100.00)	15(34.09)	3 (6.82)	12(27.27)	11(25.00)	14(31.82)
13	Hasanpur	125	96(76.80)	21(16.80)	125(100.00)	28(22.40)	3 (2.40)	12 (9.60)	19(15.20)	35(28.00)
14	Bibhutpur	43	41(95.35)	18(41.86)	43(100.00)	23(53.49)	10(23.26)	14(32.56)	6(13.95)	19(44.19)
	Total	**1,111850(76.51)**	**312(28.08)**	**1,111(100.00)**	**299(26.91)**	**111(9.99)**	**257(23.13)**	**278(25.02)**	**492(44.23)**	

Educational amenity—There are as many as 850 villages accounting for 76.51 per cent of the total number of inhabited villages (1,111) in the district where educational facility is available. The highest proportion of villages with eduational facility is in the Development Block of Bibhutpur with 95.35 per cent followed by Tajpur Morwa and Patori blocks with 84.81 and 82.46 per cent respectively. The lowest number of villages with educational facility is in the Development Block of Pusa with only 68.35 per cent villages having the facility of education.

Medical amenity—The availability of medical amenity in the villages is considerably low and only 28.08 per cent villages have it. Development blockwise break up shows that Tajpur Morwa has the largest proportion of villages with medical facility, the percentage being 69.62, followed by Mohiuddinagar with 60.98 per cent. Patori block, on the other hand, has only 14.04 per cent of the villages with the medical facility.

Drinking water—It would be seen from the table that drinking water facility is available in all the inhabited villages of the district of Samastipur.

Post and Telegraph—Postal facilities (Post & Telegraph) are available only in 299 villages (26.91%) out of a total of 1,111 villages in the district. Bibhutpur block again has the maximum number of villages having post and telegraph facility (53.49%) followed by Sarairanjan (38.98%) and Ujiarpur (38.33%) In the remaing development blocks of the district the proportion varies from a minimum of 12.20 per cent in Mohiuddinagar block to a maximum of 34.09 per cent in Singhia block.

Market/Hat—The villages where market/*hat* is held constitute only 9.99 per cent of the total number of villages in the district. Sarairanjan block has the maximum number of villages where market/*hat* is held, the percentage being 27.12 followed by Bibhutpur block with 23.26 per cent. Interestingly there are only 5 Development Blocks in the district viz., Sarai ranjan, Kalyanpur, Warisnagar, Dalsingsarai and Bibhutpur where market/*hat* is held in 10 or more villages. In rest of the blocks the number of such villages is significantly low.

Communication—The details of villages connected by bus,rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that 23.13 per cent of the total villages in the district are connected by one means of communication or the other. The majority of villages still do not have this facility. A development blockwise break up of villages having any means of communication is given in the table at page 20 indicating that Sarairanjan block comprises the highest proportion of villages (37.29%) which are connected by bus or rail or navigable river/canal services, etc., followed by Kalyanpur and Bibhutpur blocks each with 32.56 per cent villages having one means of communication or the other. For the remaining blocks the percentage of villages having this facility varies between 9.60 per cent in Hasanpur and 29.27 per cent in Mohiuddinagar block.

Approach road to village—With only 25.02 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the Development Blocks, Kalyanpur with 35·66 per cent villages having *pucca* approach roads tops the list closely followed by Sarairanjan and Pusa with 35·59 and 34.18 per cent respectively. The development blocks which have the lowest number of villages having this facility are Mohiundinagar (12.20%), Bibhutpur (13.95%) and Rosera (14.56%).

It follows, therefore, that communication facilities have direct relation with the *pucca* approach road facility as the development blocks which have larger number of villages with *pucca* approach roads also have sizeable number of villages enjoying communication facility.

Power Supply- Electrified villages in the district constitute 44.28 per cent of the total number of inhabited villages. Power supply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Development Block wise break up shows that Samastipur block occupies the first position having

the maximum proportion of electrified villages (77.53%) followed by Pusa and Ujiarpur blocks with 69.62 and 51.67 per cent respectively. The lowest proportion of villages having power supply is observed in the Development Blocks of Rosera (25.24%), Hasanpur (28.00%) and Singhia (31.82%).

Proportion of rural population served by various amenities

While in Table 11 details regarding number of villages possessing educational, medical and other amenities have been discussed, Table 12 below gives the proportion of rural population served by these amenities :

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Samastipur	143,605	137,864 (96.00)	61,479 (42.81)	143,605 (100.00)	67,372 (46.91)	29,663 (20.66)	53,723 (37.41)	53,061 (36.95)	129,153 (89.94)
2	Sarairanjan	131,414	122,579 (93.28)	54,187 (41.23)	131,414 (100.00)	84,260 (64.12)	66,636 (50.71)	67,826 (51.61)	71,110 (54.11)	78,522 (59.75)
3	Tajpur Morwa	129,598	124,279 (95.90)	116,023 (89.53)	129,598 (100.00)	77,545 (59.84)	29,328 (22.63)	38,792 (29.93)	50,767 (39.17)	60,797 (46.91)
4	Pusa	122,086	113,786 (93.20)	42,482 (34.80)	122,086 (100.00)	75,279 (61.66)	12,455 (10.20)	44,968 (36.83)	656,461 (53.77)	97,590 (79.94)
5	Kalyanpur	171,433	157,075 (91.62)	73,266 (42.74)	171,433 (100.00)	82,087 (47.88)	33,152 (19.34)	75,209 (43.87)	83,950 (48.97)	110,198 (64.28)
6	Warisnagar	202,524	184,896 (91·30)	98,105 (48.44)	202,524 (100.00)	87,208 (43.06)	38,341 (18.93)	52,768 (26.06)	52,202 (25.78)	130,947 (64.66)
7	Ujiarpur	145,646	141,054 (96.85)	59,002 (40.51)	145,646 (100.00)	90,760 (62.32)	25,978 (17.84)	37,645 (25.85)	64,333 (44.17)	96,538 (66.28)
8	Dalsinghsarai	163,099	155,358 (95.25)	57,130 (35.03)	163,099 (100.00)	86,317 (52.92)	31,554 (19.35)	64,431 (39.50)	69,731 (42·75)	108,699 (66.65)
9	Mohiuddinagar	83,300	75,847 (91.05)	61,858 (74.26)	83,300 (100.00)	33,346 (40.03)	9,471 (11.37)	21,568 (25.89)	15,386 (18.47)	38,563 (46.29)
10	Patori	119,883	115,111 (96.02)	40,969 (34.17)	119,883 (100.00)	83,186 (69.39)	17,697 (14.76)	55,220 (46.06)	53,055 (44.26)	63,758 (53.18)
11	Rosera	175,936	170,718 (97.03)	82,840 (47.09)	175,936 (100.00)	99,077 (56.31)	25,057 (14.24)	49,270 (28.00)	59,546 (33.85)	80,683 (45.86)
12	Singhia	92,548	89,592 (96.81)	45,350 (49.00)	92,548 (100.00)	63,629 (68.75)	22,928 (24.77)	51,564 (55.72)	49,270 (53.24)	59,111 (63.87)
13	Hasanpur	182,602	166,631 (91.25)	59,231 (32.44)	182,602 (100.00)	92,142 (50.46)	15,342 (8.40)	28,324 (15.51)	32,858 (17.99)	88,496 (48.46)
14	Bibhutpur	165,153	164,859 (99.82)	101,137 (61.24)	165,153 (100.00)	131,468 (79.60)	79,920 (48.39)	94,156 (57.01)	47,329 (28.66)	108,019 (65.41)
	Total	**2,028,827**	**1,919649 (94.62)**	**953,059 (46,98)**	**2,028,827 (100,00)**	**1,199,576 (59.13)**	**483,422 (23.83)**	**735,464 (36.05)**	**768.244 (37.87)**	**1,296,974 (63·93)**

It would be seen that educational facility is available to 94.62 per cent of the rural population in the district. The proportion of rural population served by educational facility is more than 90 per cent in various development blocks in the district, maximum being in case of Bibhutpur (99.82%). Another noteworthy point is that the proportion of villages in the district enjoying educational facility is much less being 76.51 per cent (as has been observed in Table 11) than the proportion of population which is as high as 94.62 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen the proportion of rural population served by this amenity is much higher than the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table below indicates the number of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5-10 Kms and 10+ Kms.) from the places where these are available :

Table 13 – Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of—	Number of villages where the amenity is not available and available at a distance of—			
	– 5 kms.	5 – 10 kms.	10+ kms.	Total (cols 2 – 4)
1	2	3	4	5
1. Education	258	3	...	261
2. Medical	644	146	9	799
3. Drinking water	...	...	...	...
4. Post and Telegraph	745	66	1	812
5. Market/*Hat*	722	266	12	1,000
6. Communication	539	286	29	854

As regards educational facility it would be seen that there are only 261 villages out of 1,111 inhabited villages (23.49%) in the district which do not have educationl facility within the village but the facility is available at places situated within 5 Kms., 5—10 Kms. and also beyond 10 Kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 Kms. is 258 (23.22%) and that of villages having such facilities within a distance of 510 Kms., is only 3(0.27%). There are no villages having such facilfties at a distance of more than 10 Kms. The number of villages having other facilities within a distance of 5-10 Kms. and 10+ Kms. is less than those having the facilities within 5 Kms. though not in the same proportion. One can observe that people in most of the villages do not have to travel for more than 10 Kms. to avail themselves of various facilities.

Availability of different amenities in the villages according to the distance from the nearest town.

The table furnished on next page gives the distribution of villages having different types of facilities by distance from the nearest town in five size-groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0— 5	103	69(66.99)	27(26.21)	103(100.00)	18(17.48)	7 (6.80)	28(27.18)	39(37.86)	66(64.08)
6—15	415	309(74.46)	112(26.99)	415(100.00)	115(27.71)	51(12.29)	100(24.10)	108(26.02)	224(53.98)
16—50	593	472(79.60)	173(29.17)	593(100.00)	166(27.99)	53 (8.94)	129(21.75)	131(22.09)	202(34·06)
51+	...	...	...	...	...	...	...	...	...
Unspecified	...	...	...	...	...	...	...	...	...
Total	**1,111**	**850(76.51)**	**312(28.08)**	**1,111(100.00)**	**299(26.91)**	**111(9.99)**	**257(23.13)**	**278(25.02)**	**492(44.28)**

It would appear from the above table that maximum number of inhabited villages lie in the distance range of 16—50 Kms. (53.38%) from the nearest town. There are only 103 villages accounting for 9.27 per cent which lie in the distance range of 0—5 Kms. with only 4 urban centres in the district and location of urban centres in the bordering districts being similar such a situation is but natural. It is interesting to note that the proportion of villages varies in direct relation to the distance from the nearest town in case of educationl, medical and post & telegraph facilites. The situation is, however, just the reverse for communication, *pucca* approach road and power supply facilities where the proportion of villages decreases with the increase in the distance range from the nearest town. No particular trend is followed for the market/*hat* facility. It can be said that the villages which are nearer to the urban areas have benefitted in respect of communication, power supply and *pucca* approach road vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As already explained in the earlier paragraphs drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given on next page furnishes information regarding distribution of villages having different amenities by *size class* of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—			
		Education	Medical	Drinking water	Post and Telegraph
1	2	3	4	5	6
— 499	255	69(27.06)	21(8.24)	255(100.00)	7(2.75)
500—1,999	521	449(86.18)	124(23.80)	521(100.00)	64(12 28)
2,000—4,999	251	249(99.20)	110(43.82)	251(100.00)	150(59.76)
5,000+	84	83(98.81)	57(67.86)	84(100.00)	78(92.86)
Total	**1,111**	**850(76.51)**	**312(28.08)**	**1,111(100.00)**	**299(26.91)**

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenty of—			
		Market/*Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	7	8	9	10
— 499	255	5 (1.96)	35(13.73)	39(15 29)	51 (20.00)
500—1,999	521	26 (4.99)	102(19.58)	109(20.92)	220(42.23)
2,000 4,999	251	47 (18.73)	75(29.88)	82(32.67)	156(62.15)
5,000	84	33 (39.29)	45(53.57)	48(57.14)	65(77.38)
Total	**1,111**	**111 (9.99)**	**257(23.13)**	**278(25.02)**	**492(44 28)**

It can be seen from the table that the maximum number of villages i.e. 521 (46.90%) in the district fall in the population range of 500—1,999 followed by 255 villages (22.95%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000 + being 84 (7.56%) in number. It may be of interest to note that the proportion of villages having different amenities varies in direct relation to their population range except in case of educational facility where there is a marginal decline in the population range of 5,000+. In case of all other facilities the maximum number of villages have a population range of 5,000+ which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

Main staple food in the villages

The table below indicates that rice and wheat constitute the main staple food of the people in all the development blocks of the district :

Table 16 – Main staple food in the majority of villages in each Development Block.

Sl. no.	Name of Development Block	Main staple food
1	2	3
1	Samastipur	Rice, wheat
2	Sarairanjan	Rice, wheat
3	Tajpur Morwa	Rice, wheat
4	Pusa	Rice, wheat
5	Kalyanpur	Rice, wheat
6	Warisnagar	Rice, wheat
7	Ujiarpur	Rice, wheat
8	Dalsinghsarai	Rice, wheat
9	Mohiuddinagar	Rice, wheat
10	Patori	Rice, wheat
11	Rosera	Rice, wheat
12	Singhia	Rice, wheat
13	Hasanpur	Rice, wheat
14	Bibhutpur	Rice, wheat

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place. The following table gives the percentage of culturable area as also the proportion of irrigated area to the total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Samastipur	89	14,199.76	72.68	40.43
2	Sarairanjan	59	15,126.78	78.86	46.07
3	Tajpur Morwa	79	17,592.31	83.31	20.00
4	Pusa	79	11,953.08	87.16	27.63
5	Kalyanpur	129	22,337.29	79.37	39.65
6	Warisnagar	124	26,614.58	77.09	35.92
7	Ujiarpur	60	17,093.25	82.66	18.25
8	Dalsinghsarai	79	17,864.90	70.09	41.67
9	Mohiuddinagar	41	13,001.30	82.36	23.60
10	Patori	57	12,399.80	80.72	11.98
11	Rosera	103	23,970.03	79.90	25.71
12	Singhia	44	14,435.08	71.99	37.49
13	Hasanpur	125	25,381.93	84.83	22.59
14	Bibhutpur	43	21,047.62	82.02	28.47
	Total	**1,111**	**253,017.71**	**79.55**	**29.81**

It would be seen from the table that 79.55 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 29.81 per cent is irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Pusa block with 87.16 per cent closely followed by Hasanpur, Tajpur Morwa and Ujiarpur with 84.83, 83.31 and 82.66 per cent respectively. The lowest cultivable area is found in Dalsinghsarai block with 70.01 per cent.

The highest proportion of irrigated area to the total cultivable area is observed in the case of Sarairanjan block accounting for 46.07 per cent followed by Samastipur and Kalyanpur blocks with 40.43 and 39.65 per cent respectively. The proportion of irrigated area is considerably low in the case of Patori (11·98%), Ujiarpur (18.25%) and Tajpur Morwa (20.00%) blocks. Irrigational facilities in the district are limited presumably because vast areas are exposed to recurrent floods. However, considerable attention is now being paid by the Government to the provision of flood control measures and irrigational facilities in the district.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 on next page. It also shows the variation in density and sex-ratio in the urban population of the district in relation to State.

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (no. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (no. of females per 1,000 males)
1	2	3	4	5	6	7	8	6	10	11	12	13
1951	1,257,253	44,981	3.58	+ 58.12	1,969	860	38,782,271	2,626,261	6.77	+ 38.14	2,320	842
1961	1,474,177	51,406	3.48	+ 14.28	3,526	803	46,447,457	3,913,920	8.43	+ 49.03	1,915	811
1971	1,719,053	57,101	3.32	+ 11.08	7,696	817	56,353,369	5,633,966	10.00	+ 43.95	2,032	807
1981	2,116,876	88,049	4.16	+ 54.20	5,681	855	69,914,734	8,718,990	12.47	+ 54.76	2,727	832

The total urban population of the district is 88,049 comprising 4.16 per cent of the district population. The corresponding percentage of urban population for the State is 12.47. The increase in urban population of the district has been slow over the decades as compared to that of the State. From column 5 of the table it is evident that the urban population of the district had shown a sharp decline during 1961 and 1971 Censuses, the percentage having come down from 58.12 in 1951 to 11·08 in 1971. However, in the 1981 Census the urban population has registered a tremendous rise, the percentage shooting up to 54.20 percent. The trend of the growth of the urban population in the State has been quite different. During the decade 1951-61 the growth of urban population was of the order of 49.03 per cent whereas during 1961-71 it dipped to 43.95 per cent. Again during 1971-81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade.

The density of population in the urban areas of the district had shown a tremendous rise till 1971 when it rose from 1,969 in 1951 to 7,696 in 1971. However, in 1981 Census it came down to 5,681 persons per square kilometres. The density of the urban population of the State on the other hand had not been high till the 1971 Census. In 1981 Census, however, the density of the urban population of the State had shown a considerable increase having risen from 2,032 in 1971 to 2,727 which is still much lower than that of Samastipur which stood at 5,681 persons per sq. km. in 1981.

Sex ratio is determined by the number of females per 1,000 males. The sex-ratio for the urban areas of Samastipur district has been higher in the 1951 Census as compared to urban areas of the State. It has been declining thereafter till the 1971 Census. In 1981 Census it has recorded a higher sex-ratio but still it remains adverse for females. The adverse sex-ratio may be attributed to the fact that quite a large number of males come to towns for employment, education, trade, business, profession, etc., leaving behind their women folk in the rural areas.

Towns added and declassified in 1981

There are 4 towns viz., Dalsinghsarai (NAC), Mohiuddinagar (NAC), Rosera (M) and Samastipur (M) in the district of Samastipur. Only Mohiuddinagar (NAC) with a population of 8,805 has been added during the 1981 Census as indicated in the table below :

Table 19—New town/towns declassified in 1981 census.

Name of towns	Population 1981 Census
1	2
(a) *Added*	
Mohiuddingar	8,805
(b) *Declassified*	
Nil	

No town has, however, been declassified in the present Census.

Receipt and expenditure in different towns

The table below gives the details of finance in the urban local bodies in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public wotks	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV. Dalsinghsarai (NAC)	16.03	6.34	9.69	16.03	8.94	2.24	3.73	...	1.12
V. Mohiuddinagar (NAC)	...	...	...	...	...	...	...	...	...
IV. Rosera (M)	35.21	7.87	27.34	30.89	4.09	15.21	6.58	0.17	4.84
III. Samastipur (M)	22.12	3.06	19.06	22.33	2.73	2.13	13.00	...	4.47
Total	**21.74**	**4.27**	**17.47**	**20.95**	**3.69**	**4.70**	**8.93**	**0.04**	**3.59**

It would be apparent from the above figures that the per capita receipt both through taxes and through all other sources is the highest in Rosera (M). While Samastipur (M) has the lowest per capita receipt through taxes, Dalsinghsarai (NAC) has recorded the least per capita receipt through all other sources.

Per capita total expenditure is again the highest in Rosera(M). However, per capita expenditure incurred on general administration is the maximum in the case of Dalsinghsarai (NAC) whereas for public works it is the highest in Samastipur (M).

Mohiuddinagar (NAC) did not maintain the data on town finance, perhaps because it was notified as a statutory town very recently.

Schools per ten thousand population in towns

Primary and middle school facilities are generally available in all towns. The following table gives details of different categories of educational institutions per ten thousand population in different towns of the district :

Table 21—Schools per ten thousand population in towns

Class, name and civic status of the town	Number per ten thousand population			
	Higher Secondary/ Inter/PUC/Junior College	Secondary/Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV. Dalsinghsarai (NAC)	...	2.98	2.24	3.73
V. Mohiuddinagar (NAC)	...	1.14	2.27	5.68
IV. Rosera (M)	...	2.69	3.23	8.06
III. Samastipur (M)	...	1.69	2.33	4.02
Total	...	**2.04**	**2.50**	**5.00**

It would be seen from the table on the previous page that institutions like Higher Secondary School/Inter/PUC/Junior College do not exist in any of the towns in the district. As regards Secondary Matriculation level schools, there are on an average, 2.04 schools per ten thousand population in the urban areas of the district. The average number of such schools per ten thousand populatian is highest in case of Dalsinghsarai (NAC), being 2.98 followed by Rosera (M) with 2.69 Secondary Matriculation Schools per ten thousand population. Junior Secondary/Middle Schools are, however, found to be maximum in the case of Rosera(3.23) followed by Samastipur(2.33). Rosera (M) has again the highest numberof Primary Schools in the district with an average of 8.06 such schools per ten thousand population. The average number of Primary Schools in the urban areas of the district is 5.00 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding the availability of beds in the medical institutions in different towns of the district :

Table 22—Number of beds in medical institutions in towns

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
IV. Dalsinghsarai (NAC)	0.75
V. Mohiuddinagar (NAC)	0.68
IV. Rosera (M)	1.61
III. Samastipur (M)	9.36
Total	**5.54**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 5.54. The availability of beds in the hospitals is the highest in case of Samastipur (M), the district headquarters, having 9.36 beds per 1,000 population. The lowest number of beds is found to be in case of Mohiuddinagar(NAC) with only 0.68 beds/1000 population probably since Mohiuddinagar is a recently notified statutory town.

Proportion of slum population in towns

The details of slums have been collected only in case of class I and class II towns. Relevant information was collected through the local officials of the Municipalities, NACs as also through the Town Planning Department in 1979. Since none of the towns of Samastipur district fell in class I (population 1 lakh and above) or class II (50,000—99,999) range the information regarding slums was not collected in respect of these towns. Table 23 has, therefore, not been presented in this volume.

Important commodities imported, exported and manufactured

The table below presents the most important commodity manufactured, exported and imported in the 4 towns of the district :

Table 24—Most important commodities manufactured, imported and exported in towns

Class, name and Civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV. Dalsingh sarai (NAC)	Bidi	Chillies	Rice
V. Mohiuddinagai (NAC)	Bidi	Chillies	Rice
IV. Rosera (M)	Cartwheel	Cart-wheel	Iron
III. Samastipur (M)	Sugar	Chillies	Food-grains

In Rosera(M) it has been observed that cart-wheel, the most important commodity which is manufactured in the town is also the most important item which is exported to other places. In other towns, however, the most important commodity manufactured and the most important commodity exported are not the same.

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col.5), medical (col.6), drinking water (col.7), post and telegraph (col.8), market/*hat* (col.9), rail/road or other communication facilities (col.10) and power supply (col.13). Other items of information such as copies of newspapers coming in the village, motor cycle/scooter, car, jeep and tractor available in the village, etc. ,have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their Thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance viz., '(−5 Kms.)', '(5−10 Kms.)' and '(10+Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/ community health worker has been taken as the most modest facility. Similarly primary school has been considered as the modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary school in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also is the case of secondary schools, etc. if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc., (column 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government.

These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered be mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All land available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All land which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares up to two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column 5—Educational*

P	...	Primary or Elementary School (up to class IV).
M	...	Middle or Junior Secondary School (up to class VIII).
H	...	Matriculation or Secondary School (up to class X).
PUC	...	Higher Secondary, Intermediate, Pre-University, Junior College.
C	...	College
I	...	Industrial School
Tr	...	Training School
Ac	...	Adult Literacy Class/ Centre.
O	...	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.) .

(ii) *Column 6—Medical*

H	...	Hospital
MCW	...	Maternity and Child Welfare Centre.
MH	...	Maternity Home
CWC	...	Child Welfare Centre
HC	...	Health Centre
PHC	...	Primary Health Centre
PHS	...	Primary Health Sub-centre
D	...	Dispensary
FPC	...	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
RP	...	Registered Private Practitioner
SMP	...	Subsidised Medical Practitioner
CHW	...	Community Health Worker
O	...	Others

(iii) *Column 7—Drinking Water.*

T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water

N	...	Copies of Newspapers coming in the village.
M	...	Motor Cycles/Scooters available in the village.
C	...	Cars/Jeeps available in the village.
T	...	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the numbr of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided, the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forests, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Samastipur district, however, there is no Census town hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A): 0—5, 6—10, 11—15, 16—20, 21—30, and 31 and above.

For the Scheduled Tribes (Part B) : 0—5, 6—15, 16—25, 26—35, 36—50 and 51 and above.

This Statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

Note : 1. *Excludes villages with no Scheduled Tribes population.

2. C. D. Blocks Pusa, Kalyanpur, Dalsinghsarai, Mohiuddinagar, Patori & Rosera contain no Scheduled Tribes Population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six Statements covering; (i) Status and growth history; (ii) Physical aspects and location of towns, 1979; (iii) Municipal finance, 1978-79; (iv) Civic and other amenities in towns; (iv-A) Civic and other amenities in Notified Slums; (v) Medical, educational recreational and cultural activities and (vi) trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated In alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix to the Town Directory. Samastipur Railway Colony has been treated as an outgrowth of the core town Samastipur.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an appendix II to the Village Directory as explained in the Village Directory section of this volume

The details of the data covered in statements I to VI and IV-A and the varius codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, nun ber of households, population as per each Census since 1901, population, density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic a dministration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	...	Municipality
C.B.	...	Cantonment Board/Cantonment.
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This Statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from the nearest city, railway station and bus stand have also been presented. it also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This Statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district/if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this Statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	...	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	...	Tank water

Column 13—

OHT	...	Overhead Tank
SR	...	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in this district there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town, statement IV-A relating to the slums does not find place in the present volume. This has already been explained in the "Analysis of Data" section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or

nearest district if in the same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement.

Column 4—

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H(U)	...	Hospital (Unani)
H (Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	...	Dispensary (Unani)
D(Hom)	...	Dispensary (Homeopathic)
HC	...	Health Centre
FC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
O	...	Others

Column 6—

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all categories-Arts, Science and Commerce
L	...	Law

Column 10—

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

TOWN STATEMENT

DISTRICT CENSUS HANDBOOK

Part B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various teritorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages the case of rural area and urban wards (circles) in the case of urban areas. The concepts of villages, town, urban agglomeration etc. are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the village/urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual town supplied by the local authorities The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.

(1) Towns treated as such for the first time in 1981 Census are printed in *italics*.
(2) Roman numerals within brackets after the names of towns indicate their Location Code numbers.
(3) The abbreviations have been used for the status of towns—
M—Municipality, N—Notified Area

Note : *Separate area figures for Samastipur Municipality and Samastipur Railway colony are not available. Their combined area has been shown against main town.

Note : (i) Towns treated as such for the first time in 1981 census are printed in *italics*.
(ii) Roman numerals within brackets after the names of towns indicate their location code numbers.
(iii) The abbreviations have been used for the status of towns—
M—Municipality. N—Notified Area.
