FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/Union Territory Administration. It *inter alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of

age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census alongwith the corresponding codes of 1981.

This publication is a joint venture of the State Government/UT Administration and the Census Organisation. The data have been collected and compiled under the direction of Shri V.S. Chaudhri and Shri Ramesh Negi, Directors of Census Operations, Haryana on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr. K. P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M. M. Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M. K. Jain, the present Deputy Registrar General (S. S.). This task was carried out by Shri A. K. Singh, Deputy Director who was assisted by Shri N. S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B. K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

NEW DELHI
June 11, 1992

A. R. Nanda
Registrar General, India

PREFACE

The District Census Handbook (DCH) compiled by the Census Organisation on behalf of the State Government is one of the most valuable publications of the Census. The DCH is widely made use of by planners, administrators, academicians and researchers. It is inter alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. It is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city/town. It also provides data on infrastructure and amenities in villages and towns etc.

The Census Operations of 1991 were carried out under the stewardship of Shri V.S. Chaudhri, the then Director of Census Operations, Haryana and the credit for the successful conduct of the operation goes to him. Before, however, the report could be finalised he had to resume his duties under the State Government in public interest.

The actual enumeration was conducted from 9th February to 28th February, 1991 with a revisional round from 1st March to 5th March, 1991 in order to bring the Census count correct upto the reference date i.e. the sunrise of 1st March, 1991. We had come out earlier with a publication titled "Provisional Population Totals" within a fortnight of the completion of 1991 Census and thereafter a Supplement was issued in May, 1992 giving provisional data on rural-urban composition of population, classification of workers into main workers and marginal workers and further categorisation of main workers into cultivators, agricultural labourers, workers in household industry and other workers. Also provisional figures of population upto tahsil and town level were published therein. Villagewise and wardwise Primary Census Abstract was computerised on National Informatics Centre (NIC) Haryana and the final population totals were released in January, 1993.

Since the district is still the basic functional unit of administration, the District Census Handbook is of special importance to all concerned with administration, policy making and planning. It is of equal value to the scholars, social scientists, geographers, businessmen etc. Its scope has been discussed in detail in the foreword. The data contained in it has been sorted out and presented along lines determined after careful consideration and thoughtful discussions. One of the most important innovations of the 1991 Census is the presentation of data at Community Development Block level which will help the planners in formulation of micro-level developmental plans. Attempt has been made to narrate briefly a few important events of the district in freedom struggle and post Independence era covering socio-economic developments. Efforts have been made to highlight the activities of voluntary organisations who are in the service of the humanity. I hope it will serve as a popular reference book for all data users.

During the entire period of 1991 Census and subsequent compilation of data for this book we had the honour of having enlightened guidance and encouragement from Shri A.R. Nanda, Registrar General and Census Commissioner of India which enabled us to bring out this publication in time and I express my grateful thanks to him. I have to record with gratitude the valuable guidance provided by Shri M.K. Jain, Deputy Registrar General (Social Studies), Mrs. Minati Ghosh, Deputy Registrar General (Map) and Shri N. Rama Rao, former Deputy Registrar General (Census and Tabulation).

I record my appreciation for the painstaking and dedicated services rendered by Shri R.K. Aggarwal, Joint Director who supervised bringing out of this publication. Shri S.R. Puri, Research Officer (Map) was instrumental in processing and compilation of data in the form of various statements and preparation of the draft of this handbook. Shri J.R. Vashistha, Deputy Director completed processing and compilation of PCA in record time in Regional Tabulation Office, Faridabad. Lastly, I record my appreciation for the best efforts of all my staff members and enumerators deployed in Census Operation.

Dated : Chandigarh,
the 20th January, 1993

RAMESH NEGI

**Excludes one village treated as Census town.

ANALYTICAL NOTE

CONCEPTS AND DEFINITIONS

As you know, it has been the tradition of the Indian Census to present the data for rural and urban areas separately. The 'village' and the 'town' are universally recognised as the basic units of habitation. The administration also recognises the division of population into 'rural' and 'urban' areas. Actually, the rural-urban dichotomy is accepted all over the world and the Census data invariably presented separately for the two.

The Village

The definition of the village adopted in our State for the census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is, as such, exclusively administrative in character. From this point of view, a village is better called a 'Revenue Estate' meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The 'Revenue Estate' or 'Mauza', the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate. This definition of village has been adopted for the purposes of the census ever since the year 1901.

The village, therefore, is not merely the inhabited area *(abadi deh)* of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

Urban Area

Urban area is specially defined for the census purposes. In the 1991 Census, the same criteria as in 1981 Census have been adopted. The definition of an urban unit is as follows :--

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc;

(b) All other places which satisfied the following criteria;

  (i) A minimum population of 5,000;

  (ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

  (iii) A density of population of at least 400 per square kilometre (1000 per square mile)

The urban criteria of 1981 varied slightly from that of the 1961 and 1971 Censuses. The males working in activities such as fishing or logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion of the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities were treated as on par with cultivation and agricultural labour for the purpose of this

criterion. In 1991 Census also, the activities of livestock, forestry, fishing, hunting, plantations and orchards and allied activities have been treated as agricultural activities while applying the test of male working population.

At the time of 1971 Census, places having municipalities, cantonment boards and notified area committees were treated as towns only. Other demographic characteristic declaring a place as urban centre were not tested as the State Government did not favour creation of 'Census Towns' based on the definition and the Director of Census Operations, Haryana did not use this criteria for declaring any rural area as urban. But at the time of 1981 Census, the above demographic criteria were tested and as a result four villages were declared as Census Towns (non-municipal) namely Babiyal in Ambala district, Samalkha in Karnal district and Jharsa and Gurgaon (Rural) in Gurgaon district. Panchkula Urban Estate in Ambala district was also treated as a town in 1981. The Faridabad Complex consisting of Faridabad township, Faridabad and Ballabgarh towns of 1971 and some surrounding villages in Faridabad district; was treated as an independent town in 1981. In addition, all areas having a municipality or cantonment board were treated as towns.

At the time of 1991 Census, the cases of all rural units having a population of 4,000 or more in the 1981 Census, were examined. Jharsa Census Town of 1981 could not fulfil the criteria required for an urban area and was dropped from the town list alongwith Rania M.C. which was denotified as rural. Ten Census Towns of 1991 Census are Pinjore (Rural) and Babiyal of Ambala district; Mustafabad, Farakhpur and Bilaspur of Yamunanagar district; Uncha Siwana of Karnal district; Kheri Sampla of Rohtak district; Dundahera and Gurgaon (Rural) of Gurgaon district and Dharuhera of Rewari district. The total number of towns in 1991 Census has thus risen to 94 as compared to 81 of 1981 and 65 in 1971 Census.

Urban Agglomeration

The concept of 'Urban Agglomeration' adopted for the first time during the 1971 Census was an improvement over the concept of 'Town Group' adopted in 1961 Census. In Haryana, this concept was adopted in 1981. The Registrar General of India directed us that the concept of urban agglomeration adopted for the 1981 Census will remain valid for the 1991 Census as well. Accordingly, an urban agglomeration must form a continuous urban spread constituting a town and its adjoining urban out-growths (OGs) or two or more physically contiguous towns together with continuous well recognised urban growths, if any, of such towns. In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, military camps, etc. and even though they are outside the statutory limits of the corporation, municipality or cantonment board, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be realistic to treat such areas lying outside the statutory limits of a town as rural units, at the same time each individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such area deserves to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining one another such as a municipality and the adjoining cantonment and also other adjoining urban out-growths which did not qualify to be treated as individual towns in their own right should be treated as urban appendages of the units to which they are contiguous.

In 1971 Census, no urban agglomeration was recognised in Haryana in the absence of any such proposal from the district authorities. But at the time of 1981 Census, the then Registrar General, India stressed that proposal for formation of urban agglomerations should be duly considered and we delineated four urban agglomerations. In 1991 Census the following seven urban agglomerations (including four of 1981) were recommended to the Registrar General, India and got approved :--

Urban agglomeration	Constituent town (s) and/or urban outgrowth
(1) Yamunanagar U.A.	(a) Yamunanagar (M.C.)
	(b) Jagadhri (M.C.)
	(c) Jagadhri Workshop Railway Colony (M.C.)
(2) Hisar U.A.	(i) Hisar (M.C.)
	(ii) Haryana Agricultural University Campus and Mini Secretariate (O.G.)
(3) Karnal U.A.	(i) Karnal (M.C.)
	(ii) Part of Sector 6, Urban Estate (O.G.)
(4) Ambala U.A.	(a) Ambala Sadar (M.C.)
	(b) Ambala Cantt. (C.B.)
(5) Gurgaon U.A.	(a) Gurgaon (M.C.)
	(b) Gurgaon (Rural) (C.T.)
(6) Bahadurgarh U.A.	(i) Bahadurgarh (M.C.)
	(ii) Sector 6, HUDA (O.G.)
(7) Pundri U.A.	(i) Pundri (M.C.)
	(ii) Part of village Fatehpur (O.G.)

Urban agglomerations at serial numbers 1, 2, 4 and 5 above were also in 1981 Census and were accepted without any change.

Standard Urban Area

A new concept of 'Standard Urban Area' introduced in 1971 Census was also followed for the 1981 and 1991 Censuses. The 'Standard Urban Area' is defined as the projected growth area of a city or a town having 50,000 or more population in 1971, as it would be in 1991, taking into account not only the urban and rural units which will get merged into it but also the intervening areas which are potentially urban and have mutual socio-economic links with the core town. It is a long term planning area and is to remain as a continuous statistical reporting unit during the three successive Censuses 1971, 1981 and 1991, irrespective of the changes in the boundaries of local administrative units within the tract.

In the case of Haryana, the following eleven 'Standard Urban Areas' were delineated :--

1. Ambala
2. Yamunanagar-Jagadhri
3. Karnal
4. Panipat
5. Sonipat
6. Bahadurgarh
7. Rohtak
8. Faridabad Complex
9. Gurgaon
10. Bhiwani
11. Hisar

Census House

A 'Census House' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be household of persons related by blood or a household of unrelated persons or having a mix or both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called institutional households. There may be one member households 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'.

Definition of Scheduled Castes/Scheduled Tribes

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :--

"Scheduled Castes" mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

"Scheduled Tribes" mean such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of 'Scheduled Castes' and 'Scheduled Tribes' for each State and Union Territory. Accordingly, the 'Scheduled Castes' and 'Scheduled Tribes' are listed under the Presidential order for each State and Union Territory.

There are 37 'Scheduled Castes' in Haryana as listed in Part I under 'Haryana' of Schedule I of the Scheduled Castes and Scheduled Tribes (Modification) Order 1956, corrected up-to-date and notified by Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976. There is, however, no 'Scheduled Tribe', listed as such, in Haryana State.

Literate

A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children below the age of 7 years have been taken as illiterate in 1991 Census. In 1971 and 1981 Censuses, children below the age of 5 years were recorded as illiterate. At the time of 1991 Census, the Department of Education in the Ministry of Human Resource Development and the Planning Commission desired that in the 1991 Census, children in the age group 0-6 should be considered as illiterate since the ability to read and write with understanding is not generally achieved, specially in the rural areas, until a child attains the age of 7 or more. This has been done perhaps to make the Indian Census data comparable with the international statistics on the subject.

The concepts and definitions relating to economic questions in general and 'work' in particular adopted in 1981 Census retained in 1991 for the sake of comparability. However, greater care was taken to frame the questions in such a way as to help netting unpaid workers on farm or in family enterprises. In order to ensure that the economic activity of women and children working on farm and in the family enterprises was properly enumerated, special emphasis was laid on the training of enumerators and it was stressed that they should ask probing questions especially in case of women to find out if they worked any time at all last year or any of the seasons in the reference period. Further, the question on seeking/available for work was asked in the 1991 Census from non-workers only and not from marginal workers as was done in the 1981 Census. In the case of those seeking/available for work, a question whether they had ever worked before was asked, which will help in knowing the number of fresh entrants to the labour force.

Main Worker

A main worker is a person whose main activity is participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. For determining a worker, he/she should have worked for six months or 183 days or more in one or more than one activity. Workers are classified into nine industrial categories :--

I-Cultivator

For purposes of the census a person is considered working as cultivator, if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Cultivation invloves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc, and other crops such as sugarcane, ground-nuts, tapioca, etc, and pulses, raw jute and kindred fibre crop, cotton, etc, and does not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

II-Agricultural Labourer

A person who works on another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III-Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities

It covers persons engaged in rearing of livestock such as goats, horses, pigs, ducks, bees, silk worms, etc and production of wool, raw silk etc; plantation and conservation of forests, felling and cutting of trees, production of fuel, gathering of fodder, gums, resins, etc; sea, coastal and inland water fishing, pisciculture, collection of pearls, conches, shells, sponges, etc; hunting, trapping and game propagation for commercial purposes only; plantation such as tea, coffee, rubber, tobacco, edible nuts, fruits, ganja, betel nuts, etc including orchard farming; and other allied activities such as pest destroying, operation of irrigation system, animal shearing and livestock services (other than veterinary services), grading agricultural and livestock products, soil conservation, soil testing, etc.

IV-Mining and Quarrying

It includes persons engaged in mining and quarrying activities such as mining of coal, lignite, crude petroleum, natural gas, iron ore, manganese, gold, silver, copper ore, and quarrying of stones, clay and sand pits, precious and semi-precious stones, mica, gypsum, etc.

V (a) Manufacturing, Processing, Servicing and Repairs in Household Industry

It covers the persons engaged in manufacturing, processing, servicing and repairs in Household Industry. 'Household Industry' (HHI) is defined as an industry carried on by the head of household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house in which the household lives in the case of urban areas. The workers in a household industry generally consist of members of the household including the head. The industry should not be run on the scale of a factory which would qualify for being registered under the Indian Factories Act. Lastly, a household industry should relate to production, processing, servicing, repair or making and selling (but not merely selling) of goods. It does not include professions such as a pleader, doctor, barber, musician, dancer, waterman, dhobi, astrologer, etc, or merely trade or business even if such professions, trade or services are run at home by members of the household.

V (b) Manufacturing, Processing, Servicing and Repairs in other than Household Industry.

It includes persons engaged in manufacturing, processing, servicing and repairs (other than Household Industry).

VI-Constructions

It includes persons engaged in construction activities such as maintenance of buildings, roads, railways, telegraph, telephone, water ways and water reservoirs, hydro electric projects, industrial plants, activities allied to construction such as plumbing, heating and air conditioning installation, setting of tiles, marbles, bricks, etc. construction of electrical installation etc.

VII-Trade and Commerce

It covers persons engaged in wholesale and retail trade of any type like cereals, pulses, foodstuff, textiles and textile product; wholesale trade in animals, straw and fodder; in medicines, chemicals, fuel lighting products, porcelain, glass utensil, crockery, etc. in all types of machinery, equipment including transport and electrical equipment, trade in furniture, rubber and rubber products, building material, clocks, eye-glasses, medical and surgical instruments, precious metals, stone, jewellery. etc; in grocery, vegetables, fruit selling, meat, poultry, bakery products, dairy products, pan, bidi, aerated water etc., in readymade garments, retail trade in books and stationery. It also includes restaurants, cafes and other eating places, hotels, rooming houses, camps and other lodging places.

VIII-Transport, Storage and Communications

It includes persons engaged in transportational, storage and communicational activities such as railways, tramways, motor buses, bullock carts, ekka, tonga, etc, ocean and coastal water, inland water transport, air transport, services rendered to transport such as packing, crating, travel agencies, etc. It also includes activities like storage, warehousing, communication such as postal, telegraph, wireless, telephone, etc.

IX-Other Services

It includes all other persons engaged in various types of economic activities who are not covered under industrial categories I to VIII.

Marginal Worker

A person who had worked for less than 183 days in a year is considered as a marginal worker.

Non-Worker

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

BRIEF HISTORY*

The district derives its name from its headquarters town Rohtak which is said to be a corruption of Rohtasgarh, a name still applied to the ruined sites (also called Khokra Kot) of two older cities, one lying immediately north of the present town and the other about 3 miles to the east. Traditionally, it is named after Raja Rohtas in whose day the city is said to have been built. It is also claimed that the town derives its name from the roherra (Tecoma undulate) tree called rohitak in Sanskrit. It is said that before the town came into existence, it was the site of a forest of rohitak trees and hence its name Rohtak. The

* District Gazetteer Rohtak, 1970

name Rohitaka is, however, well known to early literature. It is mentioned in Buddhist literature among the towns visited by the Buddha and in the Mahabharata in connection with the compaign of Nakula, the Pandava prince, who had to face the stiff resistance of the Mattamayuraka Yaudheya warriors. The district has been described as Bahudhanyaka or rich in grains and was a part of the kingdom of the Yaudheyas.

Archaeological excavations in the district were undertaken for the first time in 1879 at Khokrakot by Mr. Wood, the then district administrative officer[1]. It, however, brought to light three phases of early material culture, the first represented remains of walls, pottery, bones and broken iron objects, the second yielded particles of *jowar*, remains of a small room and an image while the third disclosed an earthen pot containing a few small coins which according to Hoernle belonged to the closing period of the Saka rule. After Mr. Wood, some excavation was also done by the Archaeological Survey. The most remarkable finding of this venture was the discovery of the remains of thousands of coin-moulds and related material. A more systematic and extensive exploration was, however, undertaken by Silak Ram[2]. The scholar has brought to light about forty three new sites in the district showing thereby that it was inhabited by a variety of cultures namely, Pre-Harappan, Late-Harappan, Painted Grey Ware, Black Slipped Ware, Northern Black-Polished Ware, Early-historical, Early-medieval and medieval. Devendra Handa[3] and O.P. Bharadwaj in their learned articles have covered literacy sources on the history of the district.

On the history of the district from the times of the Rigveda to the age of Buddha the evidence is very thin. The Indo-Greeks held some sway over the district becomes clear from the discovery at Khokrakot of the coins of their fourteen rulers. The Saka influence over the region can be ascertained from the discovery of the coins of Gondophernes and a lion capital fragment measuring 3 feet in width and 18 inches in height belonging to that period from Khokrakot. Later on district formed a part of the Kushana empire.

It appears from the account of village settlements based on local studies made by Fanshawe in his Settlement Report of 1880 that about the 9th and 10th centuries, a number of Rajput clans as well as communities of Jats came to settle in this area. They founded their villages in waste jungle or occupied settled sites. The local distribution of these communities led him to conclude that the Jats followed the Rajputs who had immigrated into India at an earlier period and had become more completely Hinduised by the time the Jats appeared on the scene.

The Tomara Rajputs ruled over 'Haryana' from Delhi when the Ghaznavids invaded India from the north-west. The Chahamanas of Ajmer, after subduing the Tomaras by the middle of the 12th century soon came

face to face with the Ghauris. After taking Lahore in 1186, Muhammad Ghauri encountered the Chahamanas under Prithviraja. Beaten in his first encounter in 1190-91 at Tarain (Taraori), fourteen miles from Thanesar in the Karnal district, he came back the following year to defeat Prithviraja in 1192. In conquering that portion of Haryana which now lies in the present district of Rohtak, he destroyed the most important town of Maham which was re-built many years later under settled conditions.

The Sultanate of Delhi established in 1206 depended on the support of Muslim nobles. On account of its nearness to Delhi, the Rohtak area influenced the struggles among the aspirants for the throne of Delhi. The restless Hindu chiefs of the area, ready to assert their independence, were kept in check by the newly-settled Muslim chiefs, whose own loyalty and support were determined by motives of self-interest. The Haryana area in general and the Rohtak area with its population of Jats and Rajputs in particular, could therefore be a source of strength or weakness to the Sultans depending on the political circumstances and the intrigues and proclivities of the chiefs at a given time.

The Sultans, and the Mughal emperors after them, took several measures to improve the Haryana tract by constructing canals. During the Mughal period territories in the Rohtak area often changed hands as a consequence of constant fighting between the Sikhs, Jats, Marathas and the Rajputs. Some changes were also made to serve the administrative purposes of the rulers in Delhi. Under Akbar, the present Rohtak district, a part of the subah of Delhi, fell within the *sarkars* of Delhi and Hissar Firuza and enjoyed political stability.

With the decline of the Mughal empire, territorial ambitions were let loose and the royal decree in this area was only heeded if backed by force. Frequent changes in the ownership of estates were effected either by imperial orders in favour of loyal nobles or were brought about by powerful local parties backing their claims with force. Maham bestowed by Akbar in jagir on Shahbaz Khan Afghan, was plundered by the Rajputs under Durga Das in the time of Aurangzeb. In subsequent years, the Marathas disregarded the imperial decree with impunity. Emperor Farrukh-siyar granted the Rohtak area alongwith the rest of Haryana in 1718 to his Minister Rukn-ud-din who transferred it a few years later to the Nawab of Farrukhnagar. This family was in possession of a large part of Haryana including the present district of Rohtak when a Maratha army under Raghunath Rao and Malhar Rao Holkar obliged the reigning Nawab to pay tribute. The custom of demanding tribute and levying contributions was not confined to the Marathas. Prince Ali Gauhar, who later became Emperor Shah Alam II, also followed this course when he visited various parts of the district of Rohtak. The Nawab of Farrukhnagar, who had previously paid tribute to the Marathas and taken a lease of his territory from them, was now forced to pay revenue to the prince also. In his campaign of collections the prince attacked Auliya Khan Baluch of Dadri in the Rohtak district, secured a promise of a large tribute and then came to restore his outpost at Jhajjar. The Jats under Suraj Mal dislodged or expelled the Nawab of Farrukhnagar from his estate. Later while Jhajjar passed into the hands of Walter Reinhardt, husband of Begum Samru of Sardhana, Gohana, Maham, Rohtak and Kharkhoda were held by nominees of Najib Khan, Amir-ul-umara to Emperor Shah Alam. Between 1785 and 1803, the area of Rohtak was possessed by several parties. George Thomas, an Irish adventurer, whose name is intimately connected with historical events in the Rohtak district was a remarkable character. Coming to India

in 1780-81, he remained for a short time in the service of Begum Samru before being adopted by Appa Kandi Rao 'as his son'. This Maratha chieftain operating under the overlordship of Mahadaji Sindhia, gave the parganas of Jhajjar, Beri, Mandothi and Pataudah to George Thomas in return for the forces which he was required to maintain. It was a gift only in name. In the beginning, George Thomas only succeeded in obtaining possession of Beri; eventually, he asserted his authority over the adjacent territory and made Jhajjar his headquarters and erected the fort of Georgegarh (the modern Jahazgarh or Husaingunj). A little later, when he was required to raise troops for Sindhia, he was put in possession of the parganas of Panipat, Sonepat and Karnal. His growing power filled his mind with ambition. After consolidating his position at Jhajjar he thought of establishing an independent principality for himself in the tract known as Haryana which owing to the troubled state of the time had for many years past acknowledged no master.

Within two years of the abandonment of his dominion by George Thomas, the rising power of Sindhia in North India was completely broken by the British forces under General Lake in the Second Maratha War. The Rohtak district, with other possessions of Sindhia west of the Yamuna, passed on to the British East India Company by the treaty of Surji Arjungaon in 1803. General Lake was of the view that the British should not hold large territories beyond the Yamuna. Accordingly, he established a number of estates to serve as buffer outposts between the British border and the Sikhs. Territories were thus granted to the chiefs of Dujana, Jhajjar, Bahadurgarh, Pataudi, Jind and Kaithal.

The greater part of the population in the country between the Yamuna and the Satluj showed sympathy with the Uprising of 1857. In the Rohtak district, the Ranghars and Jats who had been serving in the regular regiments of the East India Company in large numbers were discontented with their British masters. The sepoys of these regiments coming home on leave spread disaffection among the villagers. Noticing these symptoms, John Adam Loch, Collector of Rohtak, took steps to preserve order by calling into headquarters all the sepoys who were on leave in the district. The horsemen sent to Rohtak for help by the Nawab of Jhajjar in response to the demand of the Collector proved very unruly and in fact inflamed the villagers as they came along. As the days passed, the dissatisfied sections of the population began to stir the entire population against the British. The arrival of Tafazzal Hussain, an emissary of Emperor Bahadur Shah with a small force in Rohtak added fuel to the fire. The Collector, John Adam Loch, found himself in a difficult situation. Failing to give fight to Tafazzal Hussain, he fled to Gohana with Thanedar Bhure Khan. The other officials and Europeans followed his example to run away. Unopposed, the troops burnt the offices, courts and bungalows of the British officials. They destroyed official records, plundered the wealthy people in the town and forced their way into the District Jail to set free the prisoners inside it. On his way back to Delhi with a part of the Rohtak Treasury in his possession, Tafazzal Hussain attacked the town of Sampla where he burnt all the buildings in which the Europeans lived. The customs bungalows at Maham, Madina and Mandothi were also burnt down. True that the troops of Tafazzal Hussain did not soil their hands with British blood but they had done enough damage in the Rohtak area before returning to Delhi. All outward signs of law and order now disappeared for a time. The Ranghars hoisted their own flag. Hearing how things had gone well, the Emperor of Delhi issued a proclamation to the people of Rohtak forbidding acts of violence and enjoining obedience to the landlords who were loyal to his cause.

With no one in command of the administration, chaos reigned supreme. The local chiefs engaged themselves in fierce feuds to settle old scores. The Ranghars used the opportunity to collect in large numbers under the leadership of one Babar Khan. The British feared that these rebel forces in the Rohtak area would impede the advance of the siege train on its way to Delhi from Ferozepur. Capt. Hodson of the British army was sent from Delhi with a small force to prevent the rebels from doing so. After dealing with the men of the irregular corps whom he encountered at Kharkhoda, Hodson proceeded towards Rohtak where he successfully engaged the Ranghars in an action. He then returned to Delhi trusting that the loyal Raja of Jind would be able to maintain a semblance of order in the area.

The authority of the British Government in Rohtak was not restored until 13 days after the fall of Delhi. In September, General Van Cortlandt marched into the district to punish all concerned in the Uprising. The villages which were prominent in their opposition to the British were fined a total of Rs. 63,000 while the lands of those who were considered guilty were confiscated. The worst sufferers were the Ranghars.

Abd-ur-Rahman Khan, Nawab of Jhajjar, was suspected of having abetted the rebels and others who were waging war against the British Government. While he had ignored the appeals of the British authorities for assistance, he had most readily put into effect the orders of Emperor Bahadur Shah, furnished him troops, presented him with a *nazar* and had remained in regular correspondence with the imperial court. The suspicion against him was strengthened by the fact that his father-in-law, Abd-us Samad Khan, had fought against the British at Delhi. Col. Lawrence summoned the Nawab to come to Chhuchhakwas and surrender himself, which he did on the 18th October, after which the fort of Jhajjar was occupied. The Jhajjar territory was placed under the management of Col. Lawrence pending the result of the Nawab's trial, which took place at Delhi in the Audience Hall before a Military Commission on the 14th December. Having been found guilty, the Nawab was sentenced to be hanged. He was executed on the 23rd December in front of the Red Fort and his body was consigned to the ignominy of a nameless pit.

Apart from the jagirdars who were punished for their anti-British activities during the Uprising of 1857, the Rohtak district itself suffered a set-back. The district alongwith the south-east Punjab, roughly comprising Haryana, which had hitherto been a part of the North-Western Provinces was tagged to the Punjab. It was not included in any of the development programmes though the Government was not averse to using the material spirit of the people by turning it into a recruiting ground for the British army. Rohtak thus became a backward district in which the pace of change and development was slow. In such circumstances, various factors combined to engender discontentment. The resources of the peasants were crippled by many years of drought and famine after 1895. Many of them, immersed in debt, would have been dispossessed of their lands but for the Land Alienation Act of 1900. Moreover, the Jats returning home after service in the First World War became deeply conscious of the backwardness of their land. They realised that their lot could be improved only through political awakening and by and by this feeling was shared by a large number of people.

The Arya Samaj movement in its own way accelerated the desire for reform. Starting in about 1890 with a *mandir* in Rohtak, the Arya

Samaj movement soon spread to Sanghi, Maham, Jhajjar and Mahra. It laid great stress on starting educational institutions and removing untouchability. This programme, creating a new social consciousness, spread gradually from urban to rural areas.

Political consciousness was engendered by the Indian National Congress whose programme began to attract attention. On October 12, 1888 a Congress meeting attended by many lawyers and Honorary Magistrates was held at Chopal Dehri, Rohtak, under the presidentship of Torabaz Khan where Lala Lajpat Rai spoke. About the same time the Arya Samaj added to excitement by focussing public attention on its programme of anti-cow slaughter. The Government met the situation in 1910 by proclaiming the district under the Prevention of Seditious Meetings Act, 1907.

At this stage, a local leader appeared on the scene whose dynamic personality was to exercise a deep influence on public life of the Punjab for many years to come. This personality was Chhotu Ram. Born in a Jat family of Garhi Sampla, he shifted to Rohtak to practise as a lawyer towards the end of 1912. As a member of the Arya Samaj, he soon became a popular figure in social and legal circles. The emphasis he laid on social, economic and educational advancement created a consciousness among the peasantry of their political rights also. The Jat Sabha which Chhotu Ram founded, aroused their feelings against indebtedness, litigation and bribery. The *Jat Gazette,* founded at Rohtak in 1916, began to publicise the interests of the zamindars in general.

During the First World War the effort of the Rohtak district in supplying manpower to the army and making substantial contributions to various funds placed it among the first five districts of the province. Lord Chelmsford, the Viceroy made a special visit to Rohtak as a mark of appreciation.

Chhotu Ram's mind was already leaning towards the interests of the rural masses. The war became a turning point in his political career. Realising that before long, India would benefit by political reforms, he aligned his programme to the amelioration of the zamindars and rural masses in the whole of the province. This extended field of activity turned him into a prominent figure in the national affairs of the country. He began to take a leading share in the welfare of zamindars. Judging in terms of the provisions of the Government of India Act, 1919, which gave a distinct political advantage to the rural areas by creating special constituencies of great landholders and giving a commanding majority of rural seats in the Provincial Council, this effect was entirely worth-while.

During these years, while the Government was going ahead with its programme of political reform, the programmes of the Indian National Congress were also being actively carried out in the district. In response to the call given by Mahatma Gandhi in 1919, hartals were observed and demonstrations were held in March-April at Rohtak, Bahadurgarh, Jhajjar and other places as a protest against the Rowlatt Acts which were passed to give more executive powers to the government to intern people without trial.

The news of the massacre of Jallianwala Bagh on April 13, 1919, struck the people of Rohtak with horror. On April 14, demonstrations were held throughout the district and public property was damaged by angry mobs at Rohtak, Samar Gopalpur and Gohana. Excitement ran high. The Government strengthened the executive authorities with greater powers to suppress the disturbances with a strong hand.

The Indian National Congress was not taking the acts of repression lying down. In 1920, Gandhiji in alliance with Ali Brothers, the Khilafat leaders, launched an All-India campaign of non-violent non-co-operation to bring the British administration to a standstill. A district conference, organised at Rohtak in November, 1920, and attended by ten to fifteen thousand persons, passed a resolution to launch non-co-operation. Being strongly opposed to this move, Chhotu Ram and his followers severed their connection with the Congress. But under the influence of Gandhiji in the country the non-co-operation movement progressed in Rohtak. A Swaraj Ashram to serve as office, reading-room and hostel for workers was established on Railway Road, Rohtak. In response to Gandhiji's call to do away with Government sponsored institutions, Jat High School and Vaish High School, Rohtak disaffiliated themselves from the University of the Panjab. Gandhiji and Maulana Abul Kalam Azad addressed a large public meeting at Kalanaur.

The Congress had not participated in the general elections of 1920, neld under the Government of India Act, 1919. The dissidents, Chhotu Ram and Lal Chand, however, contested the election and won. Two years later, the question was hotly debated in the Congress circles as to whether any change was desirable in the Congress attitude towards the legislatures. This resulted in the emergence of the Swarajya Party whose aim was to win as many seats in the legislative bodies as possible and to hinder the working of the legislatures from within. A branch of the Swarajya Party was formed at Rohtak under the Leadership of Shri Ram Sharma, whose local paper, the *Haryana Tilak* came to be regarded as the organ of the Congress in this region. The candidates of the Swarajya Party were returned from the urban constituencies whereas rural seats were captured by the Zamindara League of Lal Chand and Chhotu Ram. The Swarajya Party came to an end in the district after the death in 1925 of Deshbandhu C.R. Das, one of its founders.

A few years later, another factor which kept the agitation against the British at a high pitch in the whole country was the appointment of the Simon Commission in 1928. Rohtak and Jhajjar Municipal Committees expressed their dissatisfaction by adopting a resolution protesting against the Commission. In March 1929, a provincial political conference held at Rohtak was addressed by Jawaharlal Nehru.

While the District Congress Committee of Rohtak suspended its programme of civil disobedience as required, it did very useful organisational work during the Gandhi-Irwin Pact period. Conferences were held and more than 200 Congress Committees were formed. Khan Abdul Ghaffar Khan, invited to address a provincial conference stressed the need of Hindu-Muslim unity. This conference was attended by a large number of ladies and for the first time a Sewa Dal camp was started at Rohtak in November 1931, to impart training to Congress volunteers.

The outbreak of World War II overshadowed all other events. The Congress refused to co-operate with the Government because the Governor General and Viceroy had declared without consulting representative governments in the provinces that India would join the Allies. The Congress ministries resigned office in protest and the Civil Disobedience Movement was revived in the district. *Satyagrahis* who shouted slogans were arrested. Among the imprisoned *Satyagrahis* was Shri Ram Sharma who made a whirlwind tour of the district before courting arrest.

The District Congress Committee unanimously supported the 'Quit India' resolution adopted by the Congress in 1942. The arrest of Gandhiji in August 1942, was followed by hartals and processions over nearly the whole of the district. The repressive measures of the Government provoked arson and violence at many places. An effort was made to set at fire the library of the Government College, Rohtak, on October 31, 1942. Telephone wires were cut, fish-plates were removed from railway lines and letter-boxes were burnt by reactionary elements in the movement. A sizeable number of people courted arrest.

The national upsurge expressed itself in another way during the war. Subhash Chandra Bose organised the Indian National Army from among those serving on the south-east Asia front in the British Indian Army. Bose's death was mourned in Rohtak as a great national loss and the I.N.A. week was observed with great enthusiasm.

After India achieved independence on August 15, 1947, the princely States were merged in the Indian Union. The Rohtak district assumed its present form in 1948 by the merger of the erstwhile Dujana State into it. The migration of large numbers of people from West Punjab created numerous problems of settlement and social re-adjustment.

The areas now comprising the present district of Rohtak underwent many territorial changes before this administrative unit in its present from is emerged. The estates such as Gohana, Kharkhoda-Mandothi, Rohtak-Beri and Maham-Bhiwani were included in the Rohtak district in 1824. The district was abolished in A.D. 1841; Gohana going to Panipat, and the rest of the tahsils to Delhi but it was created again in 1842.

The two districts of Rohtak and Jhajjar together with the rest of the Delhi and Hisar divisions were detached from North-Western Provinces after 1857 and passed to the Punjab by the Government of India Notification No. 606 of the 13th April 1858. The Rohtak district remained a part of the Hisar division until 1884.

After its transfer to the then Punjab, the Rohtak district experienced several changes before assuming its final form. The Bahadurgarh estates were added to the Sampla tahsil, five detached villages to the east, going to Delhi. Jhajjar, including some areas of Narnaul, Kanaundh and Dadri was at first created as a new district but was abolished shortly afterwards in 1860 when large parts of it were assigned to the Phulkian chiefs as a reward for their loyal services. While the Jhajjar tahsil itself was added to Rohtak, several Badli villages were transferred either to Delhi or Gurgaon, and two detached Jhajjar estates were given to the Raja of Jind. In the following year, the Maham tahsil was abolished and after making necessary territorial adjustments in favour of Hisar and Delhi the rest of the area was added to the Rohtak tahsil. All these changes were completed by the 1st July, 1861.

On the abolition of the Hisar division in 1884 the Rohtak district was transferred to the Delhi division. It consisted of four tahsils, Rohtak, Gohana, Jhajjar and Sampla but in April 1910, the last-named tahsil was abolished for reasons of administrative economy, and its area was divided between the Rohtak and Jhajjar tahsils. The Sonipat tahsil, which had remained attached to the Delhi district since the year 1861, was added to the Rohtak district in September 1912, on the separation of Delhi territory from the Punjab. The district was then attached to the Ambala division.

In 1948, Dujana State was merged in Jhajjar tahsil and a new sub-tahsil of Nahar was created. From 1912 to December, 1972 the present Sonipat district was a part of Rohtak district.

At the time of 1981 Census, Rohtak district consisted of tahsils of Maham, Rohtak, Jhajjar and Bahadurgarh. This had been the result of many intra-district and inter-district changes in the boundaries of the district during the decade 1971-1981. Two tahsils Gohana and Sonipat which were a part of the district at the time of 1971 Census were transferred to Sonipat district on its formation in 1972. The new tahsil Bahadurgarh was created in 1973 by transferring 55 villages from Jhajjar tahsil. Further in 1974, 13 more villages from Jhajjar tahsil and 11 villages from Rohtak tahsil were added to Bahadurgarh tahsil. In the year 1972, 34 villages including Maham town were added to Rohtak tahsil from Gohana tahsil. In 1979, a new tahsil named Maham tahsil was created by transferring 30 villages and Maham town from Rohtak tahsil. A second intra-district transfer took place when 16 villages in 1972 and 2 in 1974 were transferred to Sonipat tahsil of then Sonipat district from Rohtak tahsil. The present district of Rohtak comprises five tahsils and 8 towns. The five tahsils and eight towns have been administratively constituted as follows :--

Names of tahsils	No. of villages	Names of towns
1. Gohana	90	Gohana (M.C.)
2. Maham	32	Maham (M.C.)
3. Rohtak	109	Kalanaur (M.C.) Rohtak (M.C.) Kheri Sampla (C.T.)
4. Jhajjar	199	Beri (M.C.) Jhajjar (M.C.)
5. Bahadurgarh	62	Bahadurgarh (M.C.)

During the decade 1981-1991 also, the district was subjected to jurisdictional changes due to administrative reasons. Gohana tahsil, which was a part of Sonipat district in 1981, having 94 villages was transferred to Rohtak district. It later on lost 4 villages to Sonipat tahsil, thus reducing the number of villages in Gohana tahsil to 90 in 1991.

In the case of newly formed Maham tahsil in 1979, having 30 rural units and one town of Maham, it gained 2 villages from Hansi tahsil of Hisar district in 1989. As a result of this intra-district transfer the number of villages of Maham tahsil has increased to 32 in 1991 from 30 in 1981.

Rohtak tahsil also marginally increased its total number of villages to 110 in 1991 from 108 in 1981. This has been the effect of bifurcation of the revenue estate Kalanaur Kalan into two revenue estates, namely, Kalanaur Kalan and Jindran Kalan in 1987, trifurcation again of the two revenue estates Kalanaur Kalan and Kalanaur Khurd into (1) Kalanaur Kalan (2) Kalanaur Khurd (3) Gudhan in 1988, transfer of 1 village from Bahadurgarh tahsil in 1989 and transfer of one village to Sonipat tahsil of Sonipat district from Rohtak tahsil of Rohtak district in 1985. A revenue estate named Kheri Sampla with Hadbast No. 34 and population of 7,838 persons

has become qualified to be treated as a census town in 1991 Census and included in Rohtak tahsil alongwith other two towns of Kalanaur and Rohtak which were also a part of Rohtak tahsil in 1981 Census.

Jhajjar tahsil, the biggest tahsil of Rohtak district lost 42 villages during 1981-91, bringing its number of villages from 241 in 1981 to 199 in 1991. A close look at the intra-district and inter-district transfers resulted in the decline in the number of villages of Jhajjar tahsil in 1991 census reveals that the intra-district transfer, as a result of which Jhajjar tahsil lost 52 villages, was confined to newly formed Kosli tahsil, now a part of Rewari district. As a result of inter-district transfer, 10 villages were gained by this tahsil from Bahadurgarh tahsil. Bahadurgarh tahsil which was created in 1973 and retained as a tahsil in 1981 census with 79 villages was a looser of 17 villages during 1981-91. It lost in all 17 villages-10 villages to the tahsil of Jhajjar and one village to Rohtak tahsil of Rohtak district and 6 villages to Sonipat tahsil of Sonipat district without gaining even a single village from outside the district or from among other tahsils of Rohtak district. This is the only tahsil in the district having an out-growth, named Sector 6, HUDA contiguous to Bahadurgarh (M.C.), a solitary town of the tahsil.

DISTRICT CENSUS HANDBOOK

The compilation of the census data at village and town level is a laborious and time-consuming job. The District Census Handbook compiled by the Census Directorate on behalf of the State Government, is one of the most wanted publications of the Census.

It was decided at the time of 1951 Census, for the first time, that census data should be published for individual villages and towns also. The district was considered to be the most manageable and rational unit for the publication of such data. This is how the publication of the 'District Census Handbook' was started. It contained important census tables and primary census abstract for each village and town of the district. During 1961 census, the scope of the 'District Census Handbook' was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including primary census abstract. The descriptive account of the district included the various non-census items of information such as physical features, climate, flora and fauna, places of interest, social and cultural life, a brief history of district and its administrative machinery. Information on the land use pattern, main crops, irrigation, trade and commerce, industries, means of communications, rainfall, livestock, education, medical and health, etc, was collected from various Government departments and included in the scope of 'District Census Handbook'. This job was an enormous one and could cause substantial delay in the printing of 'District Census Handbooks'. To avoid this delay, the '1971 District Census Handbook' series was planned in three parts. Part A related to village and town directory, Part B to village and townwise primary census abstract and Part C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on census and amenity data in respect of villages. The 1971 District Census Handbooks were published in two volumes, first containing the two Parts A and B and the second comprising Part C alone. The publication of Part C was considerably delayed because of delay in getting the administrative statistics from the various departments. So in Haryana, we could publish Part C

in respect of one district (Ambala) only. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

The 1981 District Census Handbook series contained some new features along with the restructuring of the formats of village and town directory. At the same time comparability with the 1971 data had also been kept in view. The restructuring of the format of the village directory and town directory and incorporating more exhaustive data on infrastructure aspect were introduced to meet some of the requirements of the Revised Minimum Needs Programme. In order to avoid delay in the publication of 1981 District Census Handbooks, it was designed that Part A of the volume contained village and town directory and Part B the primary census abstract of villages and towns including the scheduled castes/scheduled tribes primary census abstract upto tahsil/town levels. At the beginning of the 'District Census Handbook' a detailed analytical note supported by a number of inset tables based on census and non-census data in relation to the infrastructure had been introduced to enhance its value. Both the parts were combined together and published in one volume so far as Haryana was concerned.

The coverage of information to be included in 'District Census Handbooks' of 1991 series is more or less the same as was in 1981 Census but with more detailed industrial categories on the pattern of 1971-DCH series. The main frame on presentation of data in 'District Census Handbooks' of 1991 series has undergone a change. Now, it has been decided to adopt C.D. Block as the main unit of presentation of data in village PCA and also in Village Directory as it has to depict one to one parity with the PCA. Thus, C.D. Block is the main unit of presentation of data, rather than the traditional tahsil in the village PCA. The district figures in the village/town PCA have been followed by the first C.D. Block, its villages and census towns and outgrowth, if any, and thereafter the second C.D. Block and its constituents and so on. The data pertaining to towns/cities/U.As have been presented in the end after the last C.D. Block. As such, the census towns and outgrowths of the statutory towns falling within the jurisdiction of C.D. Block have been included as the urban portion of C.D. Block.

At the end of village/town PCA, an appendix has been added containing the names and code of C.D. Blocks or parts of C.D. Blocks included in each tahsil and also the separate PCA totals for each tahsil in a district, giving total, rural and urban population of each tahsil. This appendix provides continuation of earlier census presentation of data.

As usual, the alphabetical list of villages has been given preceding the 'Village Directory' of each C.D. Block. Accordingly, villages have been arranged alphabetically tahsilwise within each C.D. Block because in many cases the villages of one C.D. Block belong to more than one tahsil.

Part A of the 1991 District Census Handbook contains Village and Town Directory' and Part B consists of 'Village and Townwise Primary Census Abstract. Both the parts have been combined together into one volume. The district and tahsil maps showing boundaries and other important features have been inserted at appropriate places

to further enhance the value of the publication. C.D. Block boundaries are shown on tahsil maps.

SCOPE

Village Directory

Amenities and land use

The 'Village Directory' furnishes certain basic statistics for each village. The villages in the district have neen arranged C.D. Blockwise and within C.D. Block, location codewise. At the time of Census each village was allotted a code number for purposes of identification.

The format of 'Village Directory' is similar to '1981 Census-Village Directory' format except for deletion of two columns namely 'staple food' and 'remarks' column giving information about places of religious, historical or archaeological interest, etc. The Village Directory, therefore, contains information about total area of the village, total population and number of households, availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, communications; approach to village; nearest town and distance; power supply; area under different types of land use such as under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and area not available for cultivation. The data presented in the 'Village Directory' have been collected from the district/tahsil revenue agency and other related offices of the district.

Appendix 1

This Appendix gives for each C.D. Block the number of villages having various levels and types of educational institutions, such as primary schools, middle schools, etc; along with their number, various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as taps, tubewells etc, post and telegraph offices, communications such as railway station, bus stop etc, power supply available/not available. In Haryana, we have Village Health Guides in place of Community Health Workers, and so the data have been presented accordingly. Information regarding Adult Literacy Classes/Centres may be considered as nil as the Adult Literacy Scheme has been abolished in Haryana.

Appendix 2

This Appendix represents for each non-municipal town (i.e. place treated as town only for Census purposes) the area under forest, irrigated by source, unirrigated land, culturable waste land and area not available for cultivation.

Appendix 3

This Appendix gives the list of villages where no educational, medical, drinking water, post and telegraph, communications and power supply amenities are available.

Appendix 4

This Appendix depicts the list of villages with Scheduled Caste population in various ranges of proportion to total population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent,

16-20 per cent, 21-30 per cent and 31 per cent and above. It may be stated here that there is no Scheduled Tribe in Haryana.

Town Directory

The Town Directory contains seven statements almost similar to those adopted for 1981 Census. These statements have been compiled from the information supplied by the local bodies. Details contained in each statement are given below.

Statement I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, population and growth rate, density and sex ratio of the town at different censuses. In case a town did not enjoy urban status at any Census, the relevant columns under the headings 'Population and growth rate of the town at the Censuses of' and 'Sex Ratio' have been left blank. Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1991 Census population of the core town as follows :-

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Statement II provides the physical aspects such as rainfall and temperature of the various towns in the district and locational aspects of each town with respect to its distance from state headquarters, district headquarters, sub-division/tahsil headquarters, nearest city with population of one lakh and more, railway station, bus route, etc.

Statement III indicates the position of municipal finances for the year 1988-89. Income and expenditure figures have been given in Rs. '00' in respect of each town in the district under various heads.

Statement IV shows civic and other amenities viz. road length, system of sewerage, number of latrines, method of disposal of night soil, water supply, fire fighting service and the number of electric connections as available during the year 1989. This statement also contains information regarding total population and scheduled caste population to give clear cut picture of the amenities available with respect to population size of each town.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns.

Statement V explains the position of medical, educational, working women's hostel, recreational and cultural facilities for each town in the district during the year 1989. Under the heading medical facilities, the number of hospitals/dispensaries/TB clinics etc. has been shown separately along with the total number of beds available. Under the heading educational

facilities, number has been given separately of Arts/Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training Institutions,Higher Secondary/ Secondary/Junior Secondary/Middle/Primary Schools, etc,. In regard to recreational and cultural facilities the number of stadia, cinemas, auditoria and public libraries is indicated. There are no Adult Literacy Classes/ Centres in Haryana.

In Statement VI information regarding three most important commodities imported/exported and manufactured has been given along with the number of banks, agricultural credit societies, and non-agricultural credit societies for each town of the district.

Primary Census Abstract of general population :--

(i) District Primary Census Abstract--

In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each C.D. Block separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

(ii) C.D. Blockwise Primary Census Abstract--

Here figures for each village in a C.D. Block have been presented. Census towns and outgrowths of the statutory towns falling within the jurisdiction of C.D. Block have been included as the urban portion of C.D. Block. Data pertaining to towns/cities/U.As have been presented in the end after the last C.D. Block.

At the time of Census enumeration, enumeration blocks were formed in the villages containing about 750 persons and in the towns, about 650 persons in each block. But the data have not been given for each block separately in case of rural areas. In the case of urban areas total population and Scheduled Caste population have been shown blockwise in the Appendix-II.

Appendix-I

This Appendix gives total, rural and urban population of each tahsil in a district. This provides continuation of earlier census presentation of population data.

Appendix-II

This Appendix gives at urban block level the total population and Scheduled Caste population.

Primary Census Abstract of Scheduled Caste population

In the District Primary Census Abstract of Scheduled Caste population, figures have been presented for the district as a whole as well as for each C.D. Block/town separately.

PHYSIOGRAPHY

Rohtak district is bounded by districts of Jind and Panipat on northern side, by Hisar district on north-western side, by Bhiwani district

on westertn side, by the districts of Rewari and Gurgaon on southern side, by Sonipat district and National Capital of Delhi on eastern side. The chief climatic characteristics of the district are hot summer, cool winter and meagre rainfall restricted mainly to the three monsoon months of July, August and September. The cold season starts towards the later half of November when both day and night temperatures fall rapidly with the advance of season. From about mid of March temperatures begin to rise rapidly. May and June are the hottest months. From April the hot westernly winds locally known as *Looh* blow and the heat becomes intense. The general slope of Haryana is from north-east to south-west with an exception in the south where the slope is towards north. The variation in slope and topography are responsible for the formation of a saucer like depression in the eastern margin of the district. During rainy season salts are washed down towards ground water, in summer evaporation takes place resulting in capillary action, on reaching the surface these salt solutions evaporate and the salts crystallise as a white incrustation on the surface appearing like a skin disease. Such incrustations are visible in the low saucer of the Rohtak district.

Broadly three types of soils are available in the district namely loam (Bhangar and Nardak), coarse loam (Dahar and Chacknote) and relatively sandy loam. The soils as classified by the National Bureau of Soil Survey and Land Use Planning (ICAR) Nagpur, the district has mainly Ochrepts, Orthids-fluvents and Aquepts-Ochrepts types of soils. Low lying areas in the district have been seriously affected by the water logging, saline efflorescence alkalinity and similar activities. The district has no reserved forests.

ECONOMY

The economy of the district of Rohtak is predominantly agriculture oriented. The cultivators and agricultural labourers together constituting agricultural workers form 58.49 per cent of the total main workers, which is more than the state average of 57.77 per cent.

29.31 per cent of its population constitutes main workers. This is in agreement with the fact that roughly one-third of the total population of the state (28.66 per cent) constitutes the work participation ratio. The variation in the percentage of main workers between rural and urban areas is marginal, as against 29.91 per cent main workers in urban area, there are 27.09 per cent in rural area.

The work participation rate comes to 46.80 per cent for males and 13.35 per cent for females in the district. From this, it can be observed that the percentage of male participation rate is below the state average (48.51 per cent) But in the case of female participation rate, it has gone above the state average of 10.76 per cent.

It will also be seen that while the proportion of male main workers to total main workers (85.66 per cent) is below the state average (90.28 per cent), it is more than the state average of 9.72 per cent in respect of proportion of female main workers to total main workers (14.34 per cent) in the district.

The proportion of cultivators to total main workers i.e. 42.54 per cent in the district, is more than the state average (38.77 per cent), but

the trend is reverse in the case of agricultural labourers, whose proportion to total main workers in the district (15.95 per cent) is less than the state average of 19.00 per cent.

The proportion of main workers engaged in household industry is 0.98 per cent in the district which is below the state average of 1.53 per cent. Other workers are those engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities; in mining and quarrying and activities other than household industry i.e. in manufacturing, processing, servicing and repairs; in construction; trade and commerce; transport; storage and communications and also in other services. They claim 40.53 per cent of the total main workers in the district against the state figure of 40.70 per cent.

According to 1991 Census, the district claims a density of 410 persons per square kilometre against a density of 372 for the state as a whole. The density is 328 persons per sq.km. in rural area while it is 5329 in urban area of the district. The position among the tahsils is that the density of population is the highest in Bahadurgarh tahsil (568) while it is the lowest in Maham tahsil (313).

Haryana is a state having lesser number of female population as compared to male population. As per 1991 Census, the sex ratio for the district has been worked out to 851 females per 1,000 males, but this ratio for the state as a whole is 865 which results in a conclusion that the out-migration of males in search of job opportunities outside the district is not much. The sex-ratio in rural areas is 843 which is relatively low in comparison to urban areas (881). Among the tahsils Jhajjar tahsil records the highest sex-ratio of 874 and the lowest sex-ratio has been found in Maham tahsil.

As per 1991 Census, the total population of scheduled castes in the district is 332,872 which accounts for 10.24 per cent of the scheduled caste population of the state. Since the percentage of total population of the district to the total population of the state also comes to 10.99 per cent, it can be concluded that scheduled caste population and total population are distributed almost evenly in the district.

The literacy rate for the district i.e. the percentage of literates to total population (excluding population in the age-group 0-6) of the district is 62.24. In the case of literate persons, the highest percentage share is claimed by Rohtak district (12.37 per cent). In other words 12.37 per cent of the total literates in the state are found in Rohtak district. In rural areas, the literacy rate is 58.59 per cent while it is 75.36 per cent in urban areas.

Various development oriented agriculture policies have been catapulted by the state government in the district. The tremendous achievement in productivity has been possible due to following the improved farm practices such as adoption of high-yielding varieties of seeds, judicious use of chemical fertilizers, plant protection measures, soil and water conservation practices and land improvement programmes. During 1989-90, 231 thousand hectares of area was covered under high-yielding varieties of wheat, bajra and rice crops. The consumption of chemical fertilizers (nutrients) during the period, 1990-91 has been 27,533 tonnes. The progress in the field of farm mechanisation in the district in tune with the tremendous progress witnessed in the state has been discernible from the number of 15,459 tractors in use during 1990-91, showing district's next position after Hisar where the number of tractors in use during the same period is 20,768.

The breakthrough achieved in agricultural production is due largely to a vastly improved and sophisticated irrigation system and its optimum utilization. In Rohtak district, 286 thousand hectares of net area are irrigated during 1989-90, which is 75.6 per cent of the net area sown. Irrigation through government canals has been the predominant source of irrigation, covering 197 thousand hectares, followed by tubewells (88 thousand hectares). In the case of percentage to gross irrigated area, the district stands 3rd with 8.56 per cent. There are 21.676 diesel and electric sets during 1990-91 in the district.

The crops grown in the district are divided into two main categories, viz *kharif* and *rabi*, locally called *samni* and *sadu*. The former is the summer season harvest and the latter winter season harvest. Any crop which does not strictly fall within these two harvests is known as a *zaid* crop and its harvest is called the *zaid kharif* and *zaid rabi*. Toria (an oil seed) is cultivated as *zaid kharif*; vegetables, melon, tobacco and green fodder as *zaid rabi*.

The major *kharif* crops of the district are jawar, bajra and sugarcane which occupy 46.8 thousand hectares, 45.2 thousand hectares and 23.1 thousand hectares, respectively during 1989-90. The other *kharif* crops in the district are cotton, rice and moong. It is noteworthy to mention that the fodder crop jawar is the predominant *kharif* crop in the district and the area covered by it and its production are the highest in the state. In the case of cultivation and production of other pulses also, Rohtak stands ahead of all other districts in the state.

The major *rabi* crops are wheat with 196 thousand hectares, oil seeds with 61.9 thousand hectares and gram with 32.9 thousand hectares during the corresponding period. Other important *rabi* crops is barley under which comes 6.4 thousand hectares of area. In the district, total cereals and pulses constitute 346.6 thousand hectares, giving a production to the tune of 668.1 thousand tonnes. The district is attributed with 2nd rank in oil cultivation in the state during 1989-90.

Industrialisation is a "sine qua non" of economic progress. Haryana is poised on the threshold of dynamic change.

As on 30th June, 1992 there are 22 large and medium scale units, providing employment to 7,303 persons, 5,256 small scale units employing 36,000 persons and 4,507 rural industries engaging 13,520 persons in the district. Important industrial units of the district are Shree Krishna Paper Mills, Hindustan Sanitaryware and Industries, Parle Biscuits, B.E. Pumps, Surya Roshni, Satyam Sinfab, Hindustan National Glass & Industries, Ceramic Services, Thakur Steel Tubes, Tools India Pvt. Ltd., Glass Equipment Ltd. at Bahadurgarh, Hafed Cattle Feed Plant, Haryana Dairy Development Cooperative Federation Milk Plant, Jyoti Laxman Flour Mills, Mohan Spinning Mills, Lakshmi Precision Screws, Haryana Cooperative Sugar Mills at Rohtak, Somany Pilkingtons, Special Refractories, Bharat Udyog at Kasar, Lord Krishna Flour Mills at Jassia, The Meham Cooperative Sugar Mills at Maham, Bharat Rasayan Ltd at Mokhra and Swastik Pipes at Asoda, etc.

Presently Hindustan Petroleum Limited is setting up a LPG and and lube oil filling plant at Bahadurgarh in Rohtak district. There are also two industrial estates at Rohtak and Bahadurgarh. Besides, a new industrial estate at Gohana is coming up in the district. Tahsils of Jhajjar,

Maham, Rohtak and Gohana are state declared backward areas in the district for the purpose of granting incentives.

To provide guidance and assistance under one roof to entrepreneurs in the fields of project identification, credit facilities, land allotment, grant of subsidies, incentives etc., District Industries Centre is functioning in the district headquarters. The facility of 'Single Window Service' has also been introduced in the district to look into the problems of entrepreneurs, initiate action and take decisions to solve them.

The State Council for Science and Technology in its capacity as a nodal agency has been popularising and implementing various schemes relating to solar water heating systems, solar agriculture dryers and solar seasoning plants for different kinds of applications in rural industrial and domestic sectors; biomass gasifiers for generation of mechanical and electrical power for use in agriculture and rural industries; solar photo-voltaic systems for water pumping, lighting applications in remote villages and solar cookers, etc. There are 24 solar water heating systems of different capacities in the district at present.

Animal husbandry also plays a key role in agricultural economy. There are 200 veterinary institutions in the district during 1990-91. The district is not covered by intensive cattle development project in the corresponding period. However, a frozen seman bank is located in the district at Lakaria with the aim to make the best use of superior germ plasm.

There are a number of voluntary organisations serving the humanity. Important among them are Mahila Ashram (Rohtak), Chobbissi Vikas Munch (Maham), Sir Chhoturam Mission (Rohtak), Sanokar Bharti (Rohtak), Kirpal Ashram (Rohtak) etc. Red cross which is an international organisation embodying the idea of help to the needy and is free from religious, sectarian and political affiliations, is also running drug deaddiction centre and institute for mentally retarded and handicapped children at Rohak in addition to full-fledged maternity centres, family planning clinics at various places in the district. The society is maintaining ambulance service for the carriage of patients from their homes, both in the towns and villages to the hospital.

Mahila Ashram which is situated on Delhi-Rohtak road near Raj Talkies is run by the State Social Welfare Department. It caters to the needs of displaced old persons both males and females and their dependents. Originally it was established as Mahila Ashram in 1950 to provide shelter to the unattached displaced women and their children from West Pakistan. The Ashram offered a number of facilities such as free accommodation, electricity and water supply and financial assistance of Rs. 175 per head (inclusive of Rs. 25 for clothing). The Ashram also trains the inmates in the field of tailoring, weaving, machine and hand embroidery, etc. where inmates can also earn independently from such works. At present 74 families reside in the Mahila Ashram. Chobbissi Vikas Munch is a platform for the welfare of the old persons and also providing them news-papers, magazines etc. A Bal Bhawan has been set up at Rohtak with an aim to provide facilities to the children. The Sanskar Bharti is a unique voluntary organisation bearing all expenditure and performing all ritual formalities at the time of cremation of the grieved family. There are a number of other voluntary welfare organisations in Rohtak town.

Samaj Kalyan Sabha, Gohana is a social welfare organisation, founded in May, 1957 with the sole objective of promoting the welfare of women and children in Gohana area. It is running a craft centre for women, *balwadi*, primary school, library, recreational centre, child welfare society, ladies club, and a cottage industry centre. The craft centre imparts training in tailoring, embroidery, nitting, niwar making, durrie weaving etc. The objective is to foster a sense of self respect among women by making them earning members of the family.

PLACES OF INTEREST

Rohtak (Rohtak Tahsil)

Rohtak is the headquarters of the Rohtak tahsil and Rohtak district. It is situated on the Delhi-Ferozepur railway line, 70 kilometres north-west of Delhi and 240 kilometres south of Chandigarh. The population of the town according to the 1991 Census is 216,096.

It is identified with Rohitaka, mentioned in the *Mahabharata*. It was quite possibly the capital of Bahudhanyaka, the kingdom of the Yaudheyas. In the *Vinaya* of Mulasarvastivadins Jivaka is represented as taking journey from Taxila in the north-west to Bhadramkara, Udumbara, Rohitaka and Mathura in the Ganga Doab. The ancient highway carried the trade of the Ganga valley to Taxila passing through Rohitaka to Sakala.

From the mound of Khokrakot, near the present town of Rohtak, was discovered ruins of the ancient town which lead to various historical facts. Soon after the death of Pushyamitra Sunga, the people of the district, particularly the Yaudheyas seem to have asserted themselves to gain their independence. Tradition is that they were the descendants of Yudhishthira, the eldest of the Pandavas. On the evidence of the Mahabharata and the discovery of their coin mint from Khokrakot, they seem to have set their capital at Rohtak, while their country was known as Bahudhanyaka. Besides, various types of their coins belonging to the second century B.C. had been discovered from Khokrakot bearing various inscriptions such as-Maharajasa, Yaudheya, Yaudheyanam, Bahudhana Yaudheya and Yaudheyanam Bahudhanyake. Coins of fourteen rulers of the Indo-Greek were discovered from here. These coins are made of silver or copper and are either round or square in shape. The obverse represents the bust of the king and an inscription in Greek, while on the reverse are depicted Greek deities with inscription in Kharoshthi and Prakrit languages. On some of the coins are represented elephant and bull.

Another discovery is of the coins of Gondophernes and a carved lion capital fragment measuring 3 feet in width and 18 inches in height. It is now preserved in the National Museum, Delhi. Carved out of the white spotted red sandstone of the Kushana period, it represents four lions, two in front and two in the back side.

Sculptural pieces such as Siva-Linga, red-stone image of Surya-Narayana and Vishnu riding his vehicle Garuda were discovered from Khokrakot. From here was also discovered an image of Kartikeya sitting in lalitasana on a peacock and belongs to the same period.

Yet another is a terracota medallion from Khokrakot which would indeed be a piece of considerable interest to the art historian.

Copper coins and coin-moulds found at Khokrakot undoubtedly suggest the rule of Pratihara Mihira Bhoja (C. AD-836-890) over the region.

The town is said to have been rebuilt in the time of Prithviraja. In 1828, General Mundy speaks of "the ancient and consequently ruinous town of Rohtak". At one time, the town had a surrounding wall with gates. Only three gates can now be seen and these too are in a dilapidated condition. The town has a number of old mosques, some of which remind us of the elegance of Muslim structures. Dini mosque or Adina Masjid is the oldest among these. At the north end of this mosque is a tah-khanna (cell). Over its mihrab (arch) is an inscription of the time of Ala-ud-din Khalji, A.D. 1308.

The places of public utility in the town include a post and telegraph office, telephone exchange, P. W. D. rest house, canal rest house, Kisan rest house, Sainik rest house, railway rest house, veterinary hospital, medical college and hospital, civil hospital, civil hospital for women, police and jail hospital, school health clinic, Employees' State Insurance dispensary, family planning clinic, tuberculosis clinic and mud-hut-colony dispensary. The educational institutions comprise a University, nine degree colleges, three B.Ed. colleges, Chhotu Ram polytechnic, Vaish technical institute, industrial training institute, Government industrial school, Government industrial school for girls, Janta Sudhar industrial school for girls and a good number of schools/institutions for boys and girls.

Myna tourist resort is situated in Rohtak town. Guest house, T.V., V.C.R., restaurant, bar, gift shop, swing for children, conference hall and lawns for garden parties are the host of amenities available at this tourist complex.

Tilyar (Rohtak Tahsil)

Tilyar tourist resort is just 5 kilometres from Rohtak on Rohtak-Delhi highway. Presently, it caters to the wide variety of tourists with the facilities such as tourist rest house, green maze, ice-cream corner, restaurant, bar and L-2, gift shop, boating, angling, children's park, a filling station, and a mini zoo. Under new development projects, a motel wing for this complex is also planned.

Bohar (Rohtak Tahsil)

At Bohar in Rohtak tahsil, situated about six kilometres to the east of Rohtak, was discovered a Siva-Parvati image, one of the most superb carvings in sandstone reminiscent of the early Khajuraho chisel of the 10th - 11th century. Another image from the site is that of Vishnu seated in the Padmasana. A highly skilled carving, it beautifully radiates the grace of the supreme god. The site has also yielded images of Balarama and Ganesh both are massive, recipient and stately. Sculptures of Surya and Surya-Naryana belonging to the post-Gupta times had also been discovered from here.

Many Jain sculptural pieces and architectural remains of this period had been uncovered from Bohar. Jaina Tirthankara images from here stand out prominently for their simplicity. This village is known for its math (a monastery of Kanphatta Jogis).

Sanghi (Rohtak Tahsil)

From the village Sanghi in Rohtak tahsil was acquired the head of Buddha belonging to the 8th century, representing the Master in

Antardhyana mudra. It is chiseled in greyish sandstone and reflects influence of Mathura school of art.

Bahadurgarh (Bahadurgarh Tahsil)

The town is situated 28 kilometres west of Delhi on the Delhi–Rohtak road. According to the Census of 1991. it has a population of 57,235.

The town settled by Rathi Jats was formerly known as Sharafabad. In A.D. 1755, it was given in jagir with 25 other villages by Alamgir II, the Mughal Emperor, to two Baluches of Farrukhnagar, namely, Bahadur Khan and Taj Muhammad who built a fort and called it Bahadurgarh. After they had ruled over it for 40 years, their nephew succeeded them. The jagir was taken over by Sindhia in 1793, but not for long because in 1803 the British forces under Lord Lake defeated Sindhia and bestowed the town and its dependent villages upon Mohammad Ismael Khan, brother of the Jhajjar Nawab. Ismael Khan's family retained this estate till 1857 when it was confiscated after the Uprising of 1857 because the Nawab had sent an offering to the Emperor of Delhi and had also addressed him a letter of praise. The estate became part of the Rohtak district in 1860. The places of historical note in this town are the tank of Bhagwan Dass, the temple of Murli Manohar, the Naqar Khana, the Mahalsarai (now in ruins) and the Qila Mohalla.

The places of public utility in Bahadurgarh include a P.W.D. rest house, post and telegraph office, telephone exchange, Kamla Nehru Municipal hospital, Employees' State Insurance dispensary, maternity and child welfare centre, veterinary hospital, Government girls' J.B.T. centre, Government industrial school for girls and a number of high/higher secondary schools. It has become an upcoming industrial centre of the district.

Gauriyya tourist resort is located in Bahadurgarh. It includes motel, restaurant, conference hall, bar, gift shop and lawns.

Jhajjar (Jhajjar Tahsil)

It is the headquarters of the tahsil of the same name. It is 32 kilometres south of Rohtak and 56 kilometres west of Delhi. The population of the town according to the 1991 Census is 27,693.

The history of Jhajjar is involved in obscurity. Tradition says that the town was first destroyed by the Ghuris. The old site is 4 kilometres south of the town and was called Bhagulan. It existed in the times of Firuz Shah Tughluq who had a canal dug from the Satluj to Jhajjar. The place came into some historical eminence when its Nawab, Abdul Rehman Khan defied the authority of the British and took part in the Uprising of 1857.

The places of antiquity in the town include the tomb and tank of Shah Ghazi Kamal and a group of seven large tombs of local celebrities. The tomb of Shah Ghazi Kamal is in the north of the town. Shah Ghazi Kamal is supposed to have fought against Prithvi Raj and his head was cut off in the encounter. Besides the tomb, there is a tank with a large ghat of 17 steps flanked by 2 octagonal towers on its western side. In the southern tower, there is an inscription which records that Durgah Mull made the tank in A.D. 1626. North and west of the tank are a mosque, a baradari (a summer house with several indoors), and a wall. All of these are now in ruins.

The group of seven tombs is in the eastern part of the town on the Delhi road. This elegant group of tombs presents an imposing appearance. Some of these have a mosque and an idgah around them; others have cupolas supported on pillars and still others have heavy domes supported on walls. The men buried here were local celebrities. Besides, there are tombs of minor importance which include the tombs of Ghaibi Pir, Zahar Pir and Naugaza. A mosque, a resting place, a well and a tank surround the tomb of Naugaza.

The places of public utility in this town include a post and telegraph office, telephone exchange, civil rest house, civil dispensary, maternity and child welfare centre, a gurukul which has an archaeological museum attached to it, Nehru college, industrial training centre and a number of schools.

Beri (Jhajjar Tahsil)

Beri in Jhajjar tahsil is known for its old temple dedicated to Bhimeshwari Devi. It is said that long ago the image of a goddess Bhimeshwari Devi was brought down from the hills and installed here.

Mohanbari (Jhajjar Tahsil)

Mohanbari is another site in Jhajjar tahsil from where yielded the coins of Sri-Samanta linking this place with 10th century A.D.

Among other images and art objects from the district mention may also be made of Siva in Andhakasura-Vadha from (Rohtak), a combined image of Ganapati-Gajalakshmi-Kuber (Khokrakot), an incomplete and fragmentary Vishnu (Asthal Bohar), Surya (Sitalamata Mandir), Lakshmi (Sadananda Ashram), Indrani and Kubera.

Gohana (Gohana Tahsil)

It is the headquarters of the Tahsil and Sub-Division of the same name. It is located on the broad-gauge Rohtak-Panipat Section of railway line. It has four gates, namely, Rohtak gate, Panipat gate, Delhi gate and Hisar gate.

Gohana in olden times was known as Govambhavana and it was a place of pilgrimage. There are two popular versions about the origin of the name of the town. First, Gohana is composed of two words, *gao* and *hani*, the former meaning 'cow' and the latter 'loss'. The second version is that Gohana is composed of two words, *gao* and *dahana*, the latter meaning a small water course in local dialect. The cows of Taga Brahmans occupying Daryapur used to sit at the *pal* (mound) where present Gohana is situated and hence the name.

It is said that it was the site of a fort of Prithviraja Chauhan, ruler of Delhi and was called Daryapur, after one of the chiefs.

A *Jal Jholni Mela* is held here in the month of Bhadon, when the idol of Lord Krishna is taken out in procession and is immersed in the evening. An yearly fair is held here in the shrine of Shah Zia-ud-din Muhammad, a saint who accompanied Muhammad Ghauri to India. There are two temples in honour of the Jain Arhat Parasnath at which an annual festival takes place.

The other places of public utility include a post and telegraph office, a telephone exchange, a canal rest house, a civil hospital, a

veterinary hospital, a government college, an I.T.I., a number of high schools and a municipal library, etc.

Maham (Maham Tahsil)

The town is situated 32 kilometres west of Rohtak on Rohtak-Hisar road. According to the Census of 1991 it has a population of 15,083.

Tradition assigns the settlement of the town to the Mahabharata period when it was the site of a big fort. Later, it is said to have been re-founded by Rai Ballu, a Powar Rajput, before the reign of Prithviraja Chauhan. It is said to have been destroyed by Muhammad Ghauri. But this place of antiquity is not historically recorded before the reign of Akbar when he gave it in jagir to Shahbaz Khan, an Afghan. The place flourished under the Afghans until it was snatched away by the Rajputs under Durga Dass in the reign of Aurangzeb.

Ancient monuments in the town include a *bain* or *baoli* (well with steps leading to it) and two mosques, the Jama Masjid and the Pirzada Masjid. The *baoli* is towards the south of the town with broad flights of 101 steps leading down to the water. It has suites of rooms near the well. An inscription on a marble slab records the fact that it was made by Sidu, a Chobdar in A.D. 1656-57. It is built of *kankar* (gravel) sand stone. It is, however, not the oldest *baoli* of the town, having been built to replace another one which had fallen into disuse due to a change in the alignment of the Delhi-Hisar road. The old *baoli* is in the east of the town and is in ruins.

The Jama Masjid is situated in the middle of the town. The mosque was erected in A.D. 1531, in Humayun's time as seen from the inscription under the pulpit stairs. Outside, over the south arch is another inscription of the time of Aurangzeb A.D. 1667-68, stating that the mosque was built by Khwaja Rahmat Ullah by order of the Emperor in the tenth year of his reign. But there are two Arabic inscriptions, which tend to show that a mosque existed here even before the reign of Humayun.

The Pirzada Masjid is towards the south of the Jama Masjid. It is a small mosque and one of the inscriptions tells us that it was built in the reign of Babar by Shaikh Yusaf of Hisar.

The places of public utility in this town include a post and telegraph office, P.W.D. rest house, civil dispensary, maternity and child welfare centre, veterinary hospital and a number of schools.

Naolang tourist resort is located in Maham town. It has the facilities of a restaurant, maham haveli, lawn and water features.

ANALYSIS OF DATA

Introduction of inset tables in the District Census Handbook is a gainful feature of 1991 Census which is aimed at catering to the needs of planners, data users and public at large in a brief and convincing way which will facilitate the analysis of Census data. Each such table conveys a resonable picture of different characteristics of the district. The following inset tables included in this volume are based on the data compiled from Village and Town Directory and Primary Census Abstract.

It will be observed from Table 1 that there are 13 Community Development Blocks in the district. However, one un-inhabited village of Rohtak district is a constituent of Dadri-I C.D. Block, whose major portion is in Bhiwani district. There are 492 villages in Rohtak district of which 473 are inhabited. Table 1 reveals that Jhajjar C.D. Block claims the highest number of inhabited villages (73) but it is having only second position in respect of population residing in that C.D. Block, as the first position has gone to Bahadurgarh C.D. Block where 196,782 persons are residing in only 55 inhabited villages, showing that the villages in this C.D. Block are more populous.

TABLE 1

Population and number of villages, 1991

Sr. No.	Name of C.D. Block	Population of villages			No. of villages	
		Persons	Males	Females	Total	Inhabited

	District	1,423,133	772,110	651,023	492**	473

* Major portion falls in Bhiwani district

**Excludes one village treated as census town

Table 2 depicts the population, separately for males and females, for the eight urban units of the district. These units are arranged in alphabetical order. Rohtak, which is also the district headquarters, tops all the remaining 7 towns in population with 216,096 persons claiming 114,728 males and 101,368 females. The only Census town, named, Kheri Sampla, constituted as an urban unit for the first time in 1991 Census, is the least populated one.

TABLE 2

Population and number of towns, 1991

Sr. No.	Name and civic administration status of town	Population		
		Persons	Males	Females
1	2	3	4	5
1.	Bahadurgarh (M.C)	57,235	30,757	26,478
2.	Beri (M.C)	14,508	7,643	6,865

District		385,473	204,965	180,508

Table 3 gives information relating to new towns, declassified/ wholly merged towns in 1991 Census. While the district is not specific to be noted for any declassified/wholly merged towns, a rural unit, named, Kheri Sampla, with a population of 7,838 persons, has been assigned the status of a Census town in the 1991 Census.

TABLE 3

The figures in Table 4, showing tahsilwise total, rural and urban break-up of population, percentage decadal variation (1981--91) and percentage of urban population for 1981 and 1991 Censuses, signify to the fact that the rate of increase in total population during the decade 1981--91 differs from tahsil to tahsil ranging from 13.73 per cent to 28.31 per cent. Among the tahsils, Rohtak tahsil accommodates the highest number of 620,366 persons and also contains the highest percentage of urban population in 1991 which is 38.44. It is closely followed by Bahadurgarh tahsil with 22.13 per cent urban population in 1991. The appreciable decadal growth-rate in population particularly in urban areas of Rohtak and Bahadurgarh tahsils, indicates that the towns of Rohtak and Bahadurgarh are developing industrially at a faster rate. Maham tahsil is the least populated tahsil and it contains the lowest percentage of urban population i.e. 8.79 per cent in 1991.

TABLE 4

Decadal change in distribution of population

Tahsil	Population						Percentage decadal (1981—91) variation			Percentage of urban population	
	1981			1991							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1981	1991
1	2	3	4	5	6	7	8	9	10	11	12
1. Gohana	262,196	236,008	26,188	309,655	277,159	32,496	18.10	17.44	24.09	9.99	10.49
2. Maham	150,819	139,097	11,722	171,521	156,438	15,083	13.73	12.47	28.67	7.77	8.79
3. Rohtak	520,583	341,436	179,147	620,366	381,908	238,458	19.17	11.85	33.11	34.41	38.44
4. Jhajjar	381,037	343,300	37,737	448,429	406,228	42,201	17.69	18.33	11.83	9.90	9.41
5. Bahadurgarh	201,569	164,081	37,488	258,635	201,400	57,235	28.31	22.74	52.68	18.60	22.13
District	1,516,204	1,223,922	292,282	1,808,606	1,423,133	385,473	19.29	16.28	31.88	19.28	21.31

The figures given in Table 5 reflect that 45.67 per cent of the inhabited villages are large-sized falling in the population range of 2000--4999. Only 32.35% villages are medium sized (500--1999) in the district. In the lowest population range of "less than 200" and the highest range of "10,000 and above", there are only 11 villages and 8 villages respectively in the district.

In Table 6 are presented total number of inhabited villages and percentage of villages in each density range, There are 239 inhabited villages, constituting 50.53 per cent of the total villages, falling in the population density range of 301--500 whereas only 0.42 per cent of the villages fall in the density range of 11--20. There are only 52 villages falling in the density range of '501 and above' claiming 10.99 per cent of the total inhabited villages in the district.

TABLE 6

Distribution of villages by density

Range of density (Per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	5	1.06

501+	52	10.99
Total	473	100.00

Sex-ratio denotes the number of females per 1,000 males. In Table 7, the C.D. Blockwise details of sex-ratio for their rural population as per 1991 Census are presented. The sex-ratio in the district is 851 against the state figure of 865. In rural areas, the sex-ratio for the district is 843. Out of 14 C.D. Blocks including the Dadri-I (part), sex-ratio in 6 C.D. Blocks exceeds the district figure and the highest sex-ratio of 903 females per 1,000 males is recorded in Sahlawas C.D. Block. It is interesting to note that the rural population of Rohtak C.D. Block has witnessed the lowest sex-ratio of 816 females per 1,000 males.

TABLE 7

14.	Dadri-I (Part)	--
	District	843

Sex-ratio figures for the eight towns have been given in Table 8. The urban sex ratio in the district is 881. Four out of the eight towns of the district including Rohtak town, have sex-ratio above the district average for urban areas. Beri town is reported to have the highest sex-ratio of 898. High sex-ratio in urban areas suggests the male selective out migration from the towns for better job opportunities which are available outside.

	District	881

Table 9 depicts number of villages and percentage of villages in each percentage range of scheduled caste population to total population. There are 140 villages, constituting 29.60 per cent of the total inhabited villages of the district in which the percentage of scheduled caste population to total population falls in the range of '16--20'. Only 46 villages, forming 9.73 per cent of the total inhabited villages claim percentage of scheduled castes to total population in the range of '31 and above'.

TABLE 9

Proportion of Scheduled Caste population to total population in the villages

Table 11 below gives the townwise scheduled caste population and percentage of scheduled caste population to total population in each urban unit of the district. The highest percentage of scheduled caste population to total population has been recorded in Kalanaur town (33.06 per cent) while it is the lowest in Bahadurgarh town (10.71 per cent). The percentage of scheduled caste population to total population in urban areas of the district as a whole comes to 14.97 per cent.

TABLE 11

Percentage of Scheduled Caste population in towns, 1991

District		385,473	57,699	14.97

Table 12 below presents the literacy rates for rural population in each C.D. Block for males and females separately excluding children in the age-group 0—6. In Haryana, highest percentage share of literates is claimed by Rohtak district and the maximum number of literates has also been recorded in rural areas of this district. In the rural areas, the percentage literates to total population is 58.59 per cent. It is 73.97 per cent for males and 40.21 per cent for females. Among the C.D. Blocks, in Sampla, Beri, Jhajjar, Sahlawas and Bahadurgarh literacy rates are higher than the district literacy rate of 58.59 per cent. Only Bahadurgarh C.D. Block is noted for its highest literacy rate of 63.70 per cent. As is the general trend, male literacy rate is higher than the female literacy rate in all the C.D. Blocks.

TABLE 12

Literacy rates for rural population of C.D. Blocks by sex, 1991
(excluding children in the age-group 0--6)

Sr. No.	Name of C.D. Block	Percentage of literates		
		Persons	Males	Females

	District	58.59	73.97	40.21

In Table 13, literacy rates (excluding children in the age-group 0--6) for the eight towns of the district have been presented for total population, males and females, separately. Percentage of literates to total population is the highest (78.58%) in Bahadurgarh (M.C.). Rohtak (M.C) is closely following Bahadurgarh (M.C). Lowest literacy rate is recorded in Beri (M.C) with 67.53 per cent. As expected, literacy rates are relatively higher in urban areas and among the males.

TABLE 13

Literacy rates for towns, 1991 (excluding children in the age group 0--6)

Table 14 below depicts the percentage of main workers, marginal workers and non-workers for rural population in each C.D. Block of the district. Mundlana C.D. Block has recorded the highest percentage of rural main workers to rural population (33.75) and rural marginal workers to rural population (5.68). Sahlawas C.D. Block is having the lowest percentage of rural main workers to rural population (24.71) and female main workers to female rural population (4.70).

Table 15 below gives the percentage of main workers, marginal workers and non-workers in each town of the district. The town-wise data reveals that in the urban areas of the district, the percentages of main workers, marginal workers and non-workers are 27.09, 0.15 and 72.76, respectively. Among the towns, the solitary Census town of Kheri Sampla records the highest percentage of main workers (30.39) and marginal workers (0.63). The lowest proportion of main workers emerges in Beri (M.C) where it is 22.29 per cent.

Table 16 below presents the distribution of inhabited villages according to the availability of different amenities. In the field of drinking water and power supply, all the villages in the district have been covered by these two amenities. In C.D. Blocks viz. Matenhail, Bahadurgarh, Maham, Kathura and Gohana, there is 100 per cent educational facility while in 9 C.D. Blocks, such as Mundlana, Gohana, Kathura, Lakhan Majra, Maham, Sampla, Matenhail, Sahlawas, and Bahadurgarh, all the villages are covered by pucca road as approach to villages. In one C.D. Block Mundlana, there is cent per cent medical amenity.

TABLE 16

Distribution of villages according to the availability of different amenities

District	473	451 (95.35)	327(69.13)	473(100.00)	304(64.27)	--	408 (86.26)	469(99.15)	473(100.00)

Table 17 below gives the proportion of rural population served by different amenities. In respect of drinking water and power supply, the entire rural population in the district has been served by these amenities. In the case of post and telegraph facility, only 83.32 per cent rural population in the district has been benefitted. Medical facilities are available to 86.16 per cent of the rural population whereas 98.63 per cent of the population enjoys educational facilities.

TABLE 17

Table 20 presents the distribution of inhabited villages according to population range and amenities available. There are 216 large-sized villages i.e. in the size class of 2000--4999. The number of villages in the smallest population range (below 500) and the largest population range (5000 +) are 26 and 78, respectively. From this table, it is reflected that the proportion of amenities increases with the increase in population of the villages.

TABLE 20

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and telegraph	Market/ hat	Communi-cations	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
—499	26	12(46.15)	1(3.85)	26(100.00)	3(11.54)	--	12(46.15)	22(84.62)	26(100.00)

2,000--4,999	216	214(99.07)	182(84.26)	216(100.00)	182(84.26)	--	199(92.13)	216(100.00)	216(100.00)
5000+	78	77(98.72)	78(100.00)	78(100.00)	76(97.44)	--	78(100.00)	78(100.00)	78(100.00)
Total	473	451(95.35)	327(69.13)	473(100.00)	304(64.27)	--	408(86.26)	469(99.15)	473(100.00)

Table 21 below gives the distribution of inhabited villages according to land use. Maham C.D. Block claims the highest percentage of cultivable area to total area (89.37 per cent). In Gohana C.D. Block the lowest percentage of cultivable area to total area (83.44 per cent) has been recorded. In respect of percentage of irrigated area to total cultivable area, Lakhan Majra C.D. Block with 89.03 per cent and Matenhail C.D. Block with 54.75 per cent have attained the highest and the lowest position, respectively.

TABLE 21

Distribution of villages according to land use

C.D. Block	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

Cultivable area = Irrigated + unirrigated area

Table 22 below depicts the per capita receipt and expenditure in the case of each town of the district. The highest per capita receipt (174.57) and expenditure (170.68) has been recorded in Maham (M.C.). Per capita expenditure on public health and conveniences is also the highest in Maham (M.C.). Kheri Sampla (C.T.) records the lowest per capita receipt and expenditure. This table in general gives a picture about the financial soundness of the civic bodies.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt			expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects

Total	113.91	35.40	78.51	110.02	38.38	33.28	28.17	0.37	10.82

Note : "--" denotes nil.

The town-wise detail of different levels of schools per 10,000 population has been set out in Table 23. The average number of schools per ten thousand population in the urban areas of the district is 1 for Higher Secondary/Inter/Puc/Junior College, 2 for Secondary/Matriculation, 3 for Junior Secondary/Middle and 4 for Primary. In Maham (M.C.) and Jhajjar (M.C.), the number of schools of different educational levels per 10,000 population is relatively high whereas in Kheri Sampla (C.T.) and Beri (M.C.), the proportion is low. It is, however, interesting to note that in Rohtak (M.C.), which is the only Class I town in the district, the position with regard to proportion of different levels of educational institutions per 10,000 population is relatively good.

TABLE 23

Schools per 10,000 population in towns

V. Kheri Sampla (C.T.)	--	--	1	1
IV. Maham (M.C.)	1	4	4	5
I. Rohtak (M.C.)	1	1	2	2
Total	1	2	3	4

Notes : '--' denotes nil.
'N' denotes negligible.

Number of beds in medical institutions per 1,000 population for each of the towns of the district has been worked out in Table 24. In four towns, the average number of beds for 1,000 population is less than the district average for urban areas (4). In Rohtak (M.C.), there are 7 beds per 1,000 population, which is followed by Beri (M.C.) with 4 beds per 1,000 population.

TABLE 24

No. of beds in medical institutions in towns

Notes : 1. '--' denotes nil.

2. 'N' denotes negligible.

Table 25 below gives data on proportion of slums population to total population and density of population per square kilometre in slums in all the class I and class II towns of the district. The highest proportion of slums population to total population and the highest density per square kilometre have been recorded in the slums of Bahadurgarh (M.C.).

TABLE 25

Proportion of slums population in towns

Class, name and civic status of the town*	Proportion of the slums population to total population of the towns	Density in slums (per sq. km.)
1	2	3
II. Bahadurgarh (M.C.)	(35.99)	137,333
I. Rohtak (M.C.)	(23.51)	14,310
Total	(26.12)	19,297

Note : *For class I and class II towns only

Table 26 below gives the most important commodity manufactured, imported and exported in each of the towns of the district. It also explains the industrial/occupational character of the towns. In Kheri Sampla (C.T.) and Maham (M.C.), the most important commodity manufactured is agricultural implements. The most important commodity manufactured is precision parts and screws in Rohtak, glass equipment in Bahadurgarh, niwar in Gohana, earthen jars and toys in Jhajjar, cement goods in Beri, and ban-making in Kalanaur.

TABLE 26

Most important commodity manufactured, imported and exported in towns

Sr. No.	Class, name and civic status of the town	Most important commodity			
		Manufactured	Exported	Imported	Remarks
1	2	3	4	5	6
1	II Bahadurgarh (M.C.)	Glass equipment	Sanitarywares	Soda ash	
2	IV Beri (M.C.)	Cement goods	Wheat	Cotton seeds	
3	III Gohana (M.C.)	Niwar	Wheat	Ghee	
4	III Jhajjar (M.C.)	Earthen jars and toys	Earthen jars	Sugar

VILLAGE

DADRI-I C.D. BLOCK (PART)*

Amenities and

Location Code No.	Name of village (with hadbast number)	Total area of the village (in hectares)	Total population and number of households	Amenities available (if not available within the village, a dash (—) is shown in the column and next to it in brackets the distance in broad ranges viz. —5 kms, 5—10 kms and 10+ kms of the nearest place where the facility is available is given)					
				Educational	Medical	Drinking water (potable)	Post & telegraph	Day or days of the market/ hat, if any	Communication (bus stop, railway station waterway)
1	2	3	4	5	6	7	8	9	10
Jhajjar Tahsil (Part)									
85	Mankawas (148)	138.00							Un-
Dadri-I C.D. Block (Part)	**Total**	**138.00**							

Notes:—(1) Location Code to each revenue estate (Village) has been allocated in ascending order within the tahsil. The following village(s) wholly merged in town(s) or treated as census towns do not appear in the Village Directory and the Rural Primary Census Abstract :—

Location Code	Name of village (Hadbast number)	Tahsil in which it falls	Town in which merged or treated as census town
1	2	3	4
106	Kheri Sampla (34)	Rohtak	Kheri Sampla (C.T.)

(2) In case, a portion of a revenue estate (Village) has merged in the town or treated as outgrowth of a town, only the rural area has been given against that village and a word 'Part' has been added after the village name.

DIRECTORY

land use

App-roach to village	Nearest town and distance (in kms)	Power supply	Land use (i.e. area under different types of land use in hectares rounded upto two decimal places)				
			Forest	Irrigated by source	Un-irri-gated	Cultur-able waste (includ-ing gauchar and groves)	Area not available for culti-vation
11	12	13	14	15	16	17	18
inhabited							

(3) The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

(4) Where a town and a village bear an identical name, the word 'rural' has been added after the name of the village.

(5) †Although entered as 'Be-Chirag' (un-inhabited) in the revenue record, the population shown against the village was enumerated at the time of 1991 Census.

(6) *Major portion of Dadri-I C.D. Block falls in Bhiwani district.

Total area figures for the district represent "geographical area" figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local bodies. Area figures for the rural areas are derived by subtracting the urban area from the total area of the district. The total of area figures of C.D. block in a district will not tally with the district figures because the former are derived from the village-wise area figures supplied by the tahsildars.

† Falls in Bhiwani District.

Notes : 1. Town treated as such for the first time in 1991 Census is underlined.

Following abbreviations have been used for the status of a town

2. M.C. = Municipal Committee
3. C.T. = Census Town
4. U.A. = Urban Agglomeration.

) as outgrowth of a town only the rural area has been given against that village and a word 'Part' has been added after the village name.

(3) The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari.

(4) Where a town and a village bear an identical name the word 'rural' has been added after the name of the village.

(5) † Although entered as 'Be-Chirag' (Un-inhabited) in the revenue record,the population shown against this village was enumerated at the time of 1991 Census.

(6) * Major portion of Dadri-I C.D. Block falls in Bhiwani district.

APPENDIX I

DETAILS OF C.D. BLOCKS INCLUDED UNDER VARIOUS TAHSILS AND TAHSILWISE PRIMARY CENSUS ABSTRACT

APPENDIX I

Details of C.D. Blocks included under various tahsils of Rohtak district

Name of tahsil		Name of C.D. Block	Code
	1	2	3
1.	Gohana	Mundlana	1
		Gohana	2
		Kathura	3
2.	Maham	Lakhan Majra (Part)	4
		Maham	5
3.	Rohtak	Lakhan Majra (Part)	4
		Kalanaur	6
		Rohtak	7
		Sampla (Part)	8
4.	Jhajjar	Beri	9
		Jhajjar	10
		Matenhail	11
		Sahlawas	12
		*Dadri-I (Part)	93
5.	*Bahadurgarh	Sampla (Part)	8
		Bahadurgarh	13

*Falls in Bhiwani District.

+Total area figures for the district represent geographical area figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local bodies. Area figures for the rural areas are derived by subtracting the urban area from the total area of the district. The total of area figures of tahsil in a district will not tally with the district figures because the former are derived from the villagewise area figures supplied by the tahsildars.
