Motif

Like many other tribes of ancient India, the 'Yaudheyas' were very famous for their valour. In reality, the word 'Yaudheya' is a derivative from the word 'Yodha' which means war and from that the word 'Yaudheyas' denotes a class of warriors. They were principally fighters and were renowned for their great skill in this art. As per reference in the Mahabharata, the 'Yaudheyas' can safely be said to be related to 'Yudhishthira', the eldest of the 'Pandavas'. The 'Yaudheyas' were thus a tribe from the aristocratic Kshatriyas and Pauranic history bears this out. It is they who confined the Kusana supermacy at its western end to the Sindh borders and on the eastern end to Mathura. The importance of the 'Yaudheyas' in the Indian history lies principally in their heroic deeds. They were great and desperate fighters. They loved freedom and for it were always prepared to sacrifice their lives. The descendants of this warrior tribe have survived in the present populations of Punjab, Haryana and a part of north Rajasthan. Here they have contributed greatly to the fighting regiments of the Indian army.

The warrior tribe held a sway in the hoary past over wide territory. The cities of Lahore, Bahawalpur, Bikaner, Ludhiana and Delhi were supposed to be the limits of their tribal territory. The central place of 'Yaudheyas' from where the administration of the Government was carried out was Rohitaka (modern Rohtak).

Rohtak had a mint at that time. From the discovery of about 1,000 moulds at Khokrakot near Rohtak, very interesting details about the methods of manufacture of the coins can be gleaned. Coins bearing the legend 'Bahudhanyake' etc., have also been found at Rohtak.

The above are some of the facsimiles of 'Yaudheyas' coins issued at the various periods of their rule.

(Based on Tribal Coins—
A study by Mahesh Kumar Sharan)

A—CENTRAL GOVERNMENT PUBLICATIONS

The publications relating to Haryana bear Series No. 6, and are bound separately as follows :—

Part I-A	General Report	Part IV	Housing Report and Tables
Part I-B	General Report	Part VI-A	Town Directory
Part I-C	Subsidiary Tables	Part VI-B	Special Survey Reports on selected towns
Part II-A	General Population Tables	Part VI-C	Survey Reports on selected villages
Part II-B	Economic Tables	Part VII	Special Report on Graduates and Technical Personnel
Part II-C (i)	Mother Tongue, Religion and Scheduled Castes and Scheduled Tribes Tables	Part VIII-A	Administration Report : Enumeration (for official use only)
Part II-C (ii)	Social and Cultural Tables and Fertility Tables	Part VIII-B	Administration Report: Tabulation (for official use only)
Part III	Establishments Report and Tables	Part IX	Census Atlas

B—HARYANA GOVERNMENT PUBLICATIONS

Part X . District Census Handbook for each district in three Parts :—

Part A—Village and Town Directory

Part B—Village and Town-wise Primary Census Abstracts

Part C—Analytical Report, Administrative Statistics and District Census Tables

(Parts A and B of the District Census Handbook for each District of Haryana State have been printed in one volume)

PREFACE

The Census of 1971 has come and gone leaving a vast residue of data collected carefully and meticulously on a country-wide basis by an army of trained enumerators. Apart from certain particulars of every individual in our land the Census has also taken care to gather information about a host of other activities—institutions, establishments, services and so on. In other words, an attempt has been made to enumerate citizens in the background of the environment in which they live. Every inch of the country has been mapped and available basic amenities noted. It was a colossal task calling for a gigantic co-operative effort by the administration and the people. Performance in the Indian Census throughout the past century has been creditable and has earned us the appreciation of the world.

For the State of Haryana this is really the first Census and so it is important that the data collected be presented in a quick and comprehensive manner. Difficult enough, as the task of collecting data is, its compilation, tabulation and publication within a reasonably quick time calls for further arduous labour by a united team of dedicated workers. We were fortunate enough to have just such a team. The result is that we have been able to bring out some publications within a few months of the actual Census count.

Since the District is still the basic functional unit of administration, the District Census Handbook is of special importance o all concerned with administration policy and planning. It should be of equal value to the scholar, scientist, sociologist and businessman. The data contained in it has been sorted out and presented along lines determined after careful consideration and discussion. All that is of importance in a district is contained in this Handbook. The Town and Village Directories in Part -A contain a wealth of useful information about these units. In Part B-Village and Townwise Primary Census Abstracts have been given all the basic Census data separately for each village and town in the district. Part-C of the District Census Handbook which would be brought out sometime later would contain an analysis of the various Census data in addition to the administrative statistics and a write-up on the social, cultural, historical and other important aspects of the life of the district.

We owe our success in bringing out this publication to the inspiring leadership of our enthusiastic and zealous Registrar General of India—Shri A. Chandra Sekhar. For him the Census is not merely an administrative exercise but a vital part of existence. In his own words the—"modern Census has become an indispensable instrument of policy and development planning. It need hardly be stressed that a Census is not the mere counting of heads. It is a kind of stock-taking as it were, of the nation's human wealth. The Census aims to present a complete picture of man, in his social, cultural and economic setting."

The District Census Handbook attempts to depict in a concise form this variegated phenomenon of human life. We hope it will serve as a popular reference book for all data users.

Dated, Chandigarh :
the 9th December, 1971.

I. E. N. CHAUHAN,
Director of Census Operations,
Haryana.

ACKNOWLEDGEMENTS

It is a long arduous process between the actual Census taking and the publication of the various Census Reports. In the State of Haryana, besides the District Census Officers, Sub-Divisional Census Officers, Charge Officers, the Assistant Charge Officers, etc., as many as 19,350 odd Enumerators and Supervisors were appointed on the work of actual count in the field. A bulk of the Enumerators and Supervisors were drawn from the Education Department of the State and the remaining from various State/Central Government Departments and from the Urban Local Bodies. They measured up to their responsibilities and performed the work entrusted to them willingly and well. The credit for the completion of this colossal task, involving the canvassing of the Census Schedule called the 'Individual Slip' separately for each single individual found in the State during the enumeration period, on schedule and without any untoward incident goes very largely to them.

The huge mass of data collected in the field by the army of enumerators moving from house to house was processed for the formulation of a large variety of tables at the two Regional Tabulation Offices at Chandigarh and Rohtak with the help of about 500 Sorters/Compiler Checkers/Supervisors. The Regional Tabulation Office at Rohtak was ably looked after by Shri N.K. Tandon, Deputy Director who was assisted by Shri Janak Raj Vashishtha, Investigator and a few Statistical Assistants including Shri Jaswant Lal. The Regional Tabulation Office, Chandigarh, was controlled by my Deputy Director at Headquarters Shri J.S. Dhamija who was assisted by Shri G.D. Singla, Tabulation Officer and a few Statistical Assistants including Shri Pran Nath Modgil.

The tables prepared at the two Regional Tabulation Offices in a raw form were checked and finalised into Village and Town-wise Primary Census Abstracts which form Part 'B' of this Handbook, by Shri J.N. Suri, Tabulation Officer who was assisted by Shri Ajab Lal Kakkar, Statistical Assistant and others.

The data contained in the Village and Townwise Directory which forms Part 'A' of this Handbook was collected by us from the District Revenue Agency and the Urban Local Bodies. We are indebted to them for their co-operation in supplying the required data promptly. In the Head Office the data so supplied was processed and finalised by Shri Kulbhushan Lakhanpal, Tabulation Officer who was assisted by Shri Om Parkash Malik, Statistical Assistant and others.

The maps included in this Handbook were prepared by a team of Cartographers headed by Shri Shiv Rai Puri, Tabulation Officer.

I am also indebted to my Deputy Director Headquarters, Shri J.S. Dhamija, for effectively co-ordinating all this work at various stages and the special efforts made by him in bringing out this Handbook so soon after the Census is over.

I am grateful to Shri Tara Chand, Controller of Printing and Stationery Haryana, for the ready co-operation extended by him in the printing of this Handbook.

Dated, Chandigarh :
the 9th December, 1971.

I. E. N. CHAUHAN,
Director of Census Operations,
Haryana.

INTRODUCTION

In the process of Census taking itself a great deal of interest is generated in the Census data and the uses to which it can be put. The layman, the scholar, the administrator and the planner all naturally seek to have the results of the Census at the earliest possible after the Census Operation. The compilation of the Census data, on the other hand, is a laborious and time-consuming work. Understandably, therefore, it was quite sometime and often five to six years or even more after the Census enumeration, that the data got into print or reached the hands of the users. In fact, by the time it became available to the public at large, it had already become stale and the people had lost interest in it.

2. It was decided at the time of 1951-Census, for the first time, that Census data should be published for individual villages and towns also. The district was considered to be the most manageable and rational unit for the presentation of such data. This is how the publication of the District Census Handbooks was started. However, the 1951-District Census Handbooks by and large gave a skeleton profile of the population of the district as a whole and separately for each of its component villages and towns. There was not much, if at all any, attempt to present a flesh and blood picture of population or of the social and cultural life of the district. As such, while the publication did go quite some way to serve the needs of the scholars, it did not, for obvious reasons, interest the common reader to the same extent.

3. In 1961 a positive effort was made to make the District Census Handbooks more comprehensive by the inclusion therein of the various non-Census items of information such as physical features, climate, fauna and flora, places of interest, social and cultural life, a brief history of the district and its administrative machinery. The land use pattern, main crops and irrigation, trade and commerce, industries and communications, in a brief way though, were also encompassed within the scope of the District Census Handbooks, in addition to certain other information relating to rainfall, livestock, education, medical and health as collected from the various Government Departments.

4. This job, however, was a colossal one and there was again a time lag of five to six years before the handbooks could be printed and the data made available to the public. To obviate this delay, therefore, it has been decided this time to publish the District Census Handbooks in three parts. In this way, it was felt, we would be able to reduce the time lag between the compilation of the data and its final publication; making it possible to release by instalments the data as soon as a specific part thereof had been processed. The three parts into which the District Census Handbooks have been divided are :—

Part-A	Village and Town Directory
Part-B	Village and Town-wise Primary Census Abstract
Part-C	Analytical Report, Administrative Statistics and District Census Tables

5. Part-A-Village and Town Directory purports to be a directory of the villages and the towns in the district concerned. In it has been given certain basic and vital information separately for each village and town. While the Village Directory presents information *inter-alia* about the total area of the village in acres, availability or otherwise of the various amenities, the staple food of the people of the village and the land use pattern; the Town Directory, on the other hand, presents data on each town through as many as seven statements, giving the status of the town, the decadal growth of its population, its functional category, certain physical and locational aspects, the state of municipal finances and of civic and other amenities, like medical, educational, recreational, cultural and banking, etc. A tahsil map showing the distribution of educational, medical, postal and water-supply amenities in its villages has been given to precede the Village Directory of the respective tahsil. The map shows at a glance the spatial distribution of the amenities available in the tahsil.

6. The basic Census data are incorporated in Part-B of the District Census Handbook. The Village and Town-wise Primary Census Abstracts, which constitute Part-B of the District Census Handbooks, contain information about the total population and its sex-wise break-up, the sex-wise population of Scheduled Castes and the number of literates separately for the two sexes, and the break-up of the total population into nine Industrial Categories of workers etc. A tahsil map showing the village boundaries, the location code numbers of the villages and the size class of their population has been given preceding the Village and Town-wise Primary Census Abstracts of each tahsil.

7. In the Village and Town Directory and the Village and Town-wise Primary Census Abstracts, the data have been presented for the villages arranged according to their location code number, given to each village for the purposes of the Census. For the facility of the readers, however, a tahsil-wise list of villages as per their alphabetical order has been furnished as an Appendix towards the end of the Handbook.

8. Originally it was intended to publish Parts A & B of the District Census Handbooks separately, as the Village and Town Directory was supposed to be ready soon after the Census Operation. The compilation of the Village and Town-wise Primary Census Abstracts constituting Part-B of the District Census Handbook, on the other hand, had necessarily to await sorting of the Individual Slips. It is gratifying, however, that it has been possible to compile and finalise the Village and Town-wise Primary Census Abstracts simultaneously with the finalisation of the Village and Town Directory (Part-A), making it possible to publish both Parts A & B of the District Census Handbook together in one Volume. This Book, therefore, contains both Parts 'A'—Village and Town Directory and 'B' —Village and Town-wise Primary Census Abstracts.

9. There would, however, be quite sometime before Part-C of the District Census Handbook could be ready. Part-C of the District Census Handbook is to be devoted to an analysis of the various Census data to be presented through a series of Tables as follows :—

A Series (General Population Tables—5 in number)

B Series (Economic Tables—9 in number)

C Series (Social and Cultural Tables—8 in number)

D Series (Migration Tables—6 in number)

E Series (Establishment Tables —4 in number)

F Series (Fertility Tables—5 in number)

G Series (Special Tables for Degree Holders and Technical Personnel—12 in number)

H Series (Housing Tables—4 in number)

It would also contain administrative statistics and a write-up on the social, cultural, historical and other important aspects of the life of the concerned district.

10. *Rural-Urban Dichotomy*.—As usual, for the Census purposes, the line of division between the 'Rural' and the 'Urban' parts of population has been maintained for the presentation of the data. The 'Village' and the 'Town' are universally recognised as the basic units of habitation. The administration also recognises the division of population into 'Rural' and 'Urban'. In fact, the rural-urban dichotomy is accepted the world over and the Census data are invariably presented separately for the two.

11. Notwithstanding the universality of the rural-urban division of the population, a uniform and precise definition of 'Rural' and 'Urban' remains yet to be evolved, the difficulty in the matter arising from the vastly different conditions prevailing in the various countries of the world. In the context of the general urbanization, there has been such an extension of urban forms in the settlement pattern in some of the advanced countries of the world that the line of division between the two has tended to get more and more blurred. To add to the complexity of the situation, the line between 'Urban' and 'Rural' drawn for the Census purposes, arbitrary as it is, is drawn differently in different countries of the world, invalidating the comparability of the Census data.

12. *Evolution of the 'Village'.*—The cities as also the villages are, generally, a product of time. To the 'Village' and from the 'Village' to the 'Town' has been an extended process, a process of evolution which though pre-eminently social, was stimulated in a big way by a multiplicity of economic phenomena and factors. The advent of settled agriculture, as against pastoralism or shifting cultivation and the primitive economies of hunting and gathering brought the 'Village' into existence. The corporate existence of individuals underlined the need for a social organisation for controlling and regulating their social life and the village lands. The use of the plough and the improvement of the irrigation techniques, in the course of time, enabled man to produce more than his requirement of food, and thus spare a part of the population from the primary work of food production. The people rendered free from the work of food production could then engage themselves in the production of other goods needed by the food producers. The surplus of food and the lack of self-sufficiency of the food producers in terms of their other needs, provided the stimulus for the establishment of trade. Some villages thus, developed as centres of exchange, storage and distribution of goods and also of administration.

13. *The Genesis of the 'Town'.*—The evolution of the village contained in it the germs for the urban growth at a later stage. The development of transport and the surplus of food generated by a further development of agriculture and agricultural techniques and the extension of the cultivated area, created the conditions for urban growth. Freed fron the task of producing the food required for bare existence, the first urban dwellers could engage themselves in professions, trade and in providing other necessities of the food producers, required for making their life more comfortable. The first urban settlements, therefore, were made possible by agricultural increment and its amassment in favoured localities made possible by the development of transport. The growth of the town could also, to some extent, be attributed to religious activity. By and by the responsibility for administering the surrounding tribal areas also came to devolve on the towns which came to serve as the seats of power. The cities, thus became the centres of market and of religious, administrative and political life. The growth of urban centres to population sizes unheard of before, and the increase in their number is a much later development caused by greater technological advancement and necessitated by the massive increase in population.

14. For Census, however, we have been content to separate the population of unit areas which for purposes of administration are regarded as 'Urban' and 'Rural' respectively. Accordingly, in our State all areas except those notified as Municipalities, Cantonment Boards or Notified Area Committees have, broadly speaking, been considered as rural areas. The rural areas, in turn, stand formed into villages, as against the urban areas which are constituted into towns and cities.

15. *The Village Defined.*—The definition of the village adopted in our State for the Census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection by the Government of the Land Revenue and is, as such, exclusively administrative in character. From this point of view, a village is better called a Revenue Estate, meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realization of the land revenue. As the land revenue is to be realised from the land holders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The Revenue Estate or 'Mauza', the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined "as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realized or compounded or redeemed or which the State Government has otherwise declared as an 'Estate'." This definition of village has been adopted for the purposes of the Census ever-since the year 1901. The village, therefore, is not merely the inhabited area (*abadi deh*) of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

16. There are as many as 7,064 villages in the State of Haryana. These villages are located in 32 tahsils spread over seven districts. The Village Directory, for each district is, therefore, presented tahsil-wise.

17. *Urban Area Defined.*—The definition adopted at the 1971-Census for an urban area generally follows the one adopted at the 1961-Census and stands to denote :—

(a) All places with a Corporation, Municipality or a Cantonment Board or a Notified Area Committee.

(b) All other places which satisfy the following criteria :—

(i) A minimum population of 5,000.

(ii) 75 per cent of the male working population being engaged in economic pursuits other than agricultural.

(iii) A density of population of at least 386 per sq. km.

18. In Haryana, however, only places with a Municipality or a Cantonment Board or a Notified Area Committee have been treated as towns to the exclusion of all other considerations.

19. *Number of Towns in Haryana.*—There are 65 towns in all in the State of Haryana, four more than their number at the time of 1961-Census. The following four places have been added to the list of towns for the first time during the 1971-Census :—

(1) Naraingarh Notified Area Committee (District Ambala)

(2) Jagadhri Workshop Railway Colony Notified Area Committee (District Ambala)

(3) Ganaur Notified Area Committee (District Rohtak)

(4) Tosham Notified Area Committee (District Hisar)

None of the towns recognised as such at the 1961-Census was declassified during the decade 1961-71.

20. *Classification of Towns* : *(i) By Population.*—It is usual to classify the towns according to their population size. For the 1971-Census, the towns have been divided into the following six classes according to their population size :—

I. Population of 100,000 and over

II. Population of 50,000 to 99,999

III. Population of 20,000 to 49,999

IV. Population of 10,000 to 19,999

V. Population of 5,000 to 9,999

VI. Population of less than 5,000

A town with a population of 100,000 and over is termed a 'City'.

21. *(ii) By functional category.*—Apart from the classification of towns according to their population size, the towns are also categorised according to their functional class. For the purposes of functional classification, the towns have been divided according to the following five main functions as performed by their population.

(i) Primary Activities (cultivation, agricultural labour, mining and quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities) ;

(ii) Industrial (household industry, manufacturing other than household industry, and construction);

(iii) Trade and Commerce ;

(iv) Transport (transport, storage and communications) ; and

(v) Services (other services).

22. It is seldom that a town performs only one function to the absolute exclusion of all other functions. The functional classification has, therefore, been done on the basis of the percentage of workers of a particular category to the total workers in the above said five classes of

economic activity, the predominant percentage value determining the functional character of the town. In case, workers under any one of the industrial categories are at least 40 per cent of the total working force in the town, the town has been considered as mono-functional, e.g. an Industrial town or a Commercial town. If, however, the percentage figure is less than 40, the next predominant function has been taken into account and in case the total of both the functions works out to 60 per cent or above of the total working force, the town is designated as bi-functional, e.g. Industrial-cum-Service town or Commercial-cum-Transport town. On the other hand, if the total of the two predominant functions does not work upto 60 per cent, then the third predominant function is taken into account and such a town is designated as multi-functional, e.g. Industrial-cum-Services-cum-Transport town and so on. In the case of bi-functional or multi-functional towns, the functions have been arranged in order of their predominance.

23. *Concept of Standard Urban Area.*—A new concept that has been adopted at the 1971-Census for the tabulation of certain urban data is that of Standard Urban Area. The essentials of a Standard Urban Area are:—

(i) that there should be a core town with a minimum population size of 50,000 ;

(ii) that the contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic links with the core town ; and

(iii) that the probabilities are that the contiguous area in question will get fully urbanised in a period of 2 to 3 decades.

24. *Standard Urban Areas vis-a-vis the Town Group Concept.*—Thus, the Standard Urban Area concept would make it possible to present comparable data for a fixed area for three/four consecutive censuses and enable presentation of a meaningful picture about the growth of the towns. The concept of Standard Urban Areas has replaced that of the 'Town Group' which was adopted at the 1961-Census. A 'Town Group' was made up of independent urban units not necessarily contiguous to one another but which were to some extent inter-dependent. The 'Town Group' concept very soon became the target of criticism. It was rightly felt that the data for such 'Town Groups' would become incomparable from Census to Census as the boundaries of the towns themselves underwent change and as the intermediate areas lying between the towns forming the 'Town Group' had been left out of account.

25. *Standard Urban Areas in Haryana.*—Standard Urban Areas have been delimited in respect of towns with a population of 50,000 and above only as it was thought that smaller towns would not have any or much significant impact beyond their boundaries. A Standard Urban Area consists of the whole town and non-municipal area of the villages falling on the periphery of the town and which holds out prospects of being urbanised during the next two to three decades. In the case of Haryana, Standard Urban Areas have been delimited for the following 11 towns:—

1. Ambala
2. Bahadurgarh
3. Bhiwani
4. Faridabad-Ballabgarh Complex
5. Gurgaon
6. Hisar
7. Karnal
8. Panipat
9. Rohtak
10. Sonepat
11. Yamunanagar-Jagadhri

Although Bahadurgarh does not have a population of 50,000, it has been delimited as a Standard Urban Area considering its importance as a developing Industrial town lying close to the National Capital of New Delhi.

26. *Urban Agglomerations.*—It is a matter of common observation that around most of the core or statutory towns come up fairly large and well recognised Railway Colonies, University Campuses, Military Camps etc. Although such out-growths are outside the statutory limits of a Corporation or a Municipality or a Cantonment Board, they usually fall within the revenue boundary of the place by which the town itself is known. It may not, therefore, be realistic to treat such areas as rural units. At the same time, each such individual area by itself may not satisfy the minimum population limit to qualify for being treated as an urban area. Such areas, therefore, would deserve to be reckoned along with the main town and be treated as an integrated urban area. Such out-growths along with the core towns for the 1971- Census have been called Urban Agglomerations. In Haryana, however, none of the places satisfied the qualifications for being treated as an Urban Agglomeration. Even otherwise with a view to maintain comparability of the 1971 data with the past census returns, it was not considered desirable to recognise any such Urban Agglomeration.

27. *The District of Rohtak.*—So much, then, for some of the important general, conceptual and definitional aspects. In the present Volume are contained Part 'A'—Village and Town Directory ; and Part 'B'—Village and Town-wise Primary Census Abstracts of the District Census Handbook, Rohtak.

28. Rohtak is one of the seven districts in the State of Haryana, which emerged as a new State on the 1st of November, 1966, as a result of the reorganisation of the erstwhile State of Punjab . Rohtak was a district even in the former Punjab and continues to remain intact without any extension or contraction of its area in the new State of Haryana.

29. The district lies between 28° 22′ 30″ and 29° 17′ 54″ north latitude and 76° 9′ 12″ and 77° 10′ 12″ east longitude. On its north lie districts of Jind and Karnal. To its west are the districts of Hisar and Mahendragarh. The Gurgaon district lies on its south and the Union Territory of Delhi on its south-east. Jamuna river makes the eastern boundary of the district and across the river lies Meerut district of Uttar Pradesh.

In the matter of area, the district ranks fourth in the State with an area of 6040.29 sq. km., the first three positions in that regard being claimed by , districts Hisar, Karnal and Gurgaon, respectively. The recurring floods have been the biggest menace of the district. There is rarely a year when it has been safe from this affliction.

30. The district has been of great importance politically almost all-throughout its history. It not only spear-headed political awakening but has also been in the forefront in the social and cultural life of the entire Haryana region. Rohtak, in fact, has generally been regarded as the epitome of the cultural heritage of Haryana.

Though predominantly agricultural, it has now developed into one of the two industrially most important districts of the State. The proximity of the district to the Union Territory of Delhi which lies to its south-east and shares a common boundary with it of nearly 90 km. has provided the impetus for the industrial growth. Its nearness to Delhi, in fact, has turned out to be its best asset. The two industrially important towns of Sonepat and Bahadurgarh owe their development very largely to this factor.

31. The district comprises the following four tahsils :—

1. Gohana
2. Sonepat
3. Rohtak
4. Jhajjar

All these four tahsils are sub-divisions as well. There are 806 villages in the district and their distribution into the four tahsils is as under :—

Name of Tahsil	*No. of Villages*
Gohana	123
Sonepat	241
Rohtak	133
Jhajjar	309

The following are the 8 towns in the district :—

1. Maham Municipal Committee 2. Gohana Municipal Committee	Gohana Tahsil
3. Ganaur Notified Area Committee 4. Sonepat Municipal Committee	Sonepat Tahsil
5. Rohtak Municipal Committee	Rohtak Tahsil
6. Beri Municipal Committee 7. Bahadurgarh Municipal Committee 8. Jhajjar Municipal Committee	Jhajjar Tahsil

Ganaur acquired the status of a town in the year 1969 and has, therefore, been treated, as such, for the first time at the Census of 1971.

32. *Part 'A' District Census Handbook : Village Directory.*—Historically, as pointed out above. the 'Village' is prior to the 'Town.' In this book, therefore, the Village Directory precedes the Town Directory. The Village Directory provides certain basic and vital information separately about each village, the villages being arranged tahsil-wise, and within the tahsil location code-wise (each village had been given a Code Number for purposes of identification at the time of the Census enumeration).

33. The Directory furnishes information about the total area of the village in acres (column 3); it provides information as to the availability or otherwise of the amenities like, educational,medical, power supply, drinking water, communications and post and telegraph (columns 4 to 9). In column 10 of the Directory is indicated the staple food of the people of the village. The area under different types of land use, such as, the area under forest; the area under cultivation (irrigated and unirrigated area being shown separately and the source of irrigation with respect to the irrigated area being shown along-side); cultivable waste, i.e., the land lying waste at present but which could be brought under cultivation; and the area which could not be available for cultivation has been given in acres rounded to the nearest unit in columns 11 to 15 of the Directory. It also gives information about the nearest town to the village and the distance thereof in km. (column 16). It is common knowledge that mandis are held on fixed days in some of the villages for the sale and purchase of the goods produced in the local area. Column 17 of the Directory provides information on such mandis, if any, and the day/days on which the same are held in a particular village. In the last (Remarks) column of the Directory have been indicated the places of religious, historical and archaeological interest, the age of such places being shown within brackets alongside their names.

34. The abbreviations used under different columns in the preparation of the Village Directory together with what these stand for are indicated below :—

Column No. 4

Pr. S.	.. Primary School
Mid. S.	.. Middle School
Sec. S.	.. High or Higher Secondary School
Trn. S.	.. Training School

Ind. S.	..	Industrial School
C.	..	College

Column No. 5

D	..	Dispensary
Mp	..	Private Medical Practitioner
H	..	Hospital
HC	..	Health Centre
FC	..	Family Planning Centre
MCW	..	Maternity and Child Welfare Centre
VH	..	Veterinary Hospital
VD	..	Veterinary Dispensary

Column No. 6

E	..	Power Supply

Column No. 7

W	..	Well
C	..	Canal
TW	..	Tube-well
T	..	Tap Water
TK	..	Tank
Hp	..	Hand Pump

Column No. 8

PR	..	Pucca Road
KR	..	Kucha Road
T	..	Railway
C	..	Canal
R	..	River

Column No. 9

PO	..	Post Office
TO	..	Telegraph Office
P & TO	..	Post and Telegraph Office
Phone	..	Phone

Column No. 12

T	..	Total Irrigated area
W	..	Well with or without electricity
TK	..	Tank
C	..	Canal
TW	..	Tube-well
W & TW	..	Well and Tube-well
O	..	Others

35. The data presented in the Village Directory has been collected from the District/Tahsil Revenue Agency, mostly through correspondence, and has not been processed in any great detail except for the removal of internal inconsistencies wherever there were any. Although Village Directory of each district was included in the Census Handbook of the concerned District in 1961, and even in 1951, contents thereof were confined by and large to the Census data and a few amenities. It is for the first time that information in great detail as mentioned above has been provided in the Village Directory. The scope of the amenities has also been extended to some extent by the inclusion of information on the communications facility in the village. It is hoped that the Village Directory in the form it is being presented this time would go a long way in providing information about the placing of the village in its setting and stimulate a study of the individual village communities and help in discerning the inter-play of the various forces that influence the life of the villagers.

36. The following Table shows the number of villages separately for each class of villages grouped according to their area. The number of villages in each size class of area has been shown for the district as a whole and for each tahsil separately.

TABLE NO. 1

Area Upto	District/Tahsil	No. of Villages
50 Acres or less ..	**District**	..
	Tahsil Gohana	..
	Tahsil Sonepat	..
	Tahsil Rohtak	..
	Tahsil Jhajjar	..
51—100 Acres ..	**District**	**1**
	Tahsil Gohana	..
	Tahsil Sonepat	1
	Tahsil Rohtak	..
	Tahsil Jhajjar	..
101—200 Acres ..	**District**	**2**
	Tahsil Gohana	..
	Tahsil Sonepat	2
	Tahsil Rohtak	..
	Tahsil Jhajjar	..
201—500 Acres ..	**District**	**64**
	Tahsil Gohana	1
	Tahsil Sonepat	42
	Tahsil Rohtak	4
	Tahsil Jhajjar	17
501—1000 Acres ..	**District**	**188**
	Tahsil Gohana	12
	Tahsil Sonepat	79
	Tahsil Rohtak	12
	Tahsil Jhajjar	85
1001—2000 Acres ..	**District**	**291**
	Tahsil Gohana	33
	Tahsil Sonepat	82
	Tahsil Rohtak	49
	Tahsil Jhajjar	127
2001—5000 Acres ..	**District**	**227**
	Tahsil Gohana	65
	Tahsil Sonepat	34
	Tahsil Rohtak	56
	Tahsil Jhajjar	72
5001 Acres and above ..	**District**	**33**
	Tahsil Gohana	12
	Tahsil Sonepat	1
	Tahsil Rohtak	12
	Tahsil Jhajjar	8

The highest number of villages, *viz.*, 291 out of a total of 806 in the district fall in the size class '1001—2000 acres'. As many as 227 villages fall in the size class '2001—5000 acres'. Together, the villages falling in these two size classes number 518 and account for nearly 64 per cent of the total number. 33 villages are in the area size class of '5001 acres and above'. The number of villages in the size classes of '50 acres and less', '51—100 acres' and 101—200 acres' are very few indeed. The average size of a village works out to 1850 acres (Total area—1,491,557 acres divided by 806—the total number of villages in the district). It may be noted that Sonepat tahsil has only one village in the area size class of 5001 acres and above. As against this, Gohana and Rohtak tahsils have 12 each in that area size class, while Jhajjar has 8. Tahsil Sonepat in fact, has a comparatively larger number of villages in the smaller area size classes.

37. In the Table below is indicated the distribution of villages with reference to their distance from the nearest town for the district as a whole and separately for each of its four tahsils. Here again, the villages have been distributed as per their area size classes.

TABLE NO. 2

Distance from the nearest Town	District/Tahsil	Number of villages according to the area sizes						Total No. of villages
		Upto 50 Acres	51—100 Acres	101—500 Acres	501—2000 Acres	2001—5000 Acres	5001 Acres and above

26—50 Km.	.. **District**	..	..	**2**	**37**	**17**	**4**	**60**
	Tahsil Gohana	..	..	..	3	3	2	8
	Tahsil Sonepat	..	..	2	8	3	..	13
	Tahsil Rohtak	..	..	..	4	5	1	10
	Tahsil Jhajjar	..	..	..	22	6	1	29
Total	.. **District**	..	**1**	**66**	**479**	**227**	**33**	**806**
	Tahsil Gohana	..	..	1	45	65	12	123
	Tahsil Sonepat	..	1	44	161	34	1	241
	Tahsil Rohtak	..	..	4	61	56	12	133
	Tahsil Jhajjar	..	..	17	212	72	8	309

38. A glance through the above Table would show that out of a total of 806 villages, only 283, *i.e.*, 35 per cent lie in the distance group '16—25 km.' from the nearest town. 165 villages, *i.e.* 20 per cent of the total fall in the distance group 11—15 km.' Villages at a distance of '26—50 km.' number 60. Only 197 villages, *i.e.*, 24 per cent fall in the distance group '6—10 km.' while 101 *i.e.*, 13 per cent lie at a distance of 5 km. or less from the nearest town. Tahsil Jhajjar has the largest number of villages, *viz.*, 29 out of 60 in the distance group '26-50 km.' The remaining 31 are shared almost equally by the other three tahsils in the district.

39. The position of educational facilities in the district as a whole and their tahsilwise distribution has been shown in the table below.

TABLE NO. 3

Distance from the nearest Town	District/Tahsil	Total No. of villages	Number of villages having				
			Primary School	Middle School	High or Higher Secondary School	College	Others*
5 Km. or less ..	**District**	**101**	**54**	**19**	**9**	**2**	**3**

	Tahsil Rohtak	10	7	2	3	..	..
	Tahsil Jhajjar	29	24	4	3	..	..
Total ..	**District**	**806**	**564**	**146**	**138**	**4**	**16**
	Tahsil Gohana	123	95	32	27	1	5
	Tahsil Sonepat	241	168	33	27	..	6
	Tahsil Rohtak	133	88	34	39	1	2
	Tahsil Jhajjar	309	213	47	45	2	3

In the above Table, a village having a Primary School as well as a Middle and/or High School or any other combination of such schools, have been accounted for more than once. For this reason, total of villages having various types of schools is in some cases more than even the total number of villages in a District/Tahsil. However, a village, having more than one school of the same standard, has been accounted for once under the respective column of the Table.

40. It is clear from the above table, that 564 out of 806 villages *i.e.*, nearly 70 per cent of the total have a primary school each. The total number of Primary School in the rural areas of the district is 599. The distance from the nearest town does not appear to have any bearing on the availability or otherwise of the educational facilities in the villages. In fact, the educational facilities are almost evenly distributed all over the district. Four villages have even a college each. Two of these villages are in Tahsil Jhajjar and one each in Tahsils Gohana and Rohtak.

*Others include I.T. Is., Craft Schools, Training Schools, etc.

Only 9 per cent of the villages situated within the distance of 5 km. from the nearest town have a High/Higher Secondary School. As against this the percentage of villages having a High/Higher Secondary School, in the distance groups of '6 to 10 km.', '11 to 15 km'. and '16 to 25 km.' is 18, 16 and 22 respectively. The percentage of High/Higher Secondary Schools in the distance group '26 to 50 km.' works out to 15.

41. The number of High/Higher Secondary Schools is about one fourth of the total number of Primary Schools in the district. For 599 Primary Schools, there are 146 Middle Schools and 149 High/Higher Secondary Schools in the district. The district has only 16 Training/Industrial Institutions. The highest number *viz.*, six of these institutions is in Tahsil Sonepat. Tahsil Gohana has five and Jhajjar and Rohtak tahsils have three and two such institutions respectively.

42. The position of availability of the Medical facilities in the district as a whole and in each of its four tahsils is depicted in the following Table :—

TABLE NO. 4

MEDICAL FACILITIES

District/Tahsil	Total Area* (in Sq. Km.)	Total No. of Medical Institutions of all kinds	No. of Medical Institutions of all kinds per 100 Sq. Km.
District	6,040·29	258	4
Tahsil Gohana	1,432·71	63	4
Tahsil Sonepat	1,161·36	33	3
Tahsil Rohtak	1,339·18	78	6
Tahsil Jhajjar	2,107·04	84	4

*Area as per the Director of Land Records, Haryana.

There are only four Medical Institutions of all kinds per 100 sq. km. in the district. The number per 100 sq. km. is the maximum *i.e.*, six in Tahsil Rohtak, Tahsils Jhajjar and Gohana equal the district average while Tahsil Sonepat falls short of it by one.

43. All the villages in Haryana State have since been electrified. The position of rural drinking water supply, however, is far from satisfactory. The Table No. 5 gives the distribution of the villages according to their source of drinking water supply for district cross-classified by their distance from the nearest town. The information has been given for each tahsil also.

In Table No. 5, 327 villages *i.e.*, nearly 41 per cent of the total draw their drinking water supply from wells. Of these 327 villages, as many as 206 are in Jhajjar Tahsil alone. Another 281 villages, *i.e.*, 35 per cent of the total draw their water-supply from wells and hand pumps. Yet another 31 villages draw their drinking water-supply from wells, hand pumps and tubewells. Including the seven villages, which draw their water-supply from hand pumps only, 646 villages, *i.e.*, nearly 80 per cent of the total draw their supply from sub-soil water. *Prima-facie* this position will look satisfactory. This, however, is not the correct position. The drinking water supply position in the district, in fact, is sufficiently bad, both with respect to the quantity and quality of water.

44. The Tables Nos. 6 and 7 depict the state of communications and the availability of postal facilities in the district and in each of its tahsils separately.

TABLE NO. 5

Distance from the nearest Town	District/Tahsil	Total No. of Villages	No. of villages getting drinking water supply from										
			Wells only	Hand pumps only	Wells and Hand pumps	Wells, Hand pumps and Tube-wells	Wells, Hand pumps and Tanks	Wells, Hand pumps and River/ Canal	Rivers only	Tanks only	Wells, Hand pumps, Tanks and Tube-wells	Wells, Hand pumps, Tanks and River/ Canal	Others*

TABLE NO. 7

POSTAL FACILITIES IN THE RURAL AREAS

District/Tahsil	Total Area* (in sq. km.)	Total No. of Post Offices	No. of Post Offices per 100 sq. km.
District	**6,040·29**	**344**	**6**
Tahsil Gohana	1,432·71	77	5
Tahsil Sonepat	1,161·36	76	7
Tahsil Rohtak	1,339·18	68	5
Tahsil Jhajjar	2,107·04	123	6

*Area as per the Director of Land Records, Haryana.

The postal facilities are almost evenly distributed all over the four tahsils. Tahsil Sonepat, however, has the highest number of Post Offices per 100 sq. km., *viz.*, seven, as against Tahsils Gohana and Rohtak which have five each. The average number of Post Offices per 100 sq. km. for the district as a whole works out to six. The postal facilities in Tahsil Jhajjar correspond to the district average.

45. The Table No. 8 below gives the percentage of cultivable waste, the villages being classified with reference to their distance from the nearest town. Here also, the position for the district as a whole and separately for each tahsil has been shown.

TABLE NO. 8

Distance from the nearest Town	District/Tahsil	No. of Villages	Average percentage of cultivable waste
5 Km. or less ..	**District**	**101**	**5·60**
	Tahsil Gohana	17	7·25
	Tahsil Sonepat	38	5·23
	Tahsil Rohtak	11	6·76
	Tahsil Jhajjar	35	3·94
6—10 Km. ..	**District**	**197**	**3·26**
	Tahsil Gohana	28	3·73
	Tahsil Sonepat	71	6·77
	Tahsil Rohtak	29	2·11
	Tahsil Jhajjar	69	1·22
11—15 Km. ..	**District**	**165**	**3·86**
	Tahsil Gohana	25	1·71
	Tahsil Sonepat	58	6·28
	Tahsil Rohtak	27	3·87
	Tahsil Jhajjar	55	3·48
16—25 Km. ..	**District**	**283**	**3·49**
	Tahsil Gohana	45	3·89
	Tahsil Sonepat	61	6·81
	Tahsil Rohtak	56	2·12
	Tahsil Jhajjar	121	2·74
26—50 Km. ..	**District**	**60**	**4·53**
	Tahsil Gohana	8	7·19
	Tahsil Sonepat	13	4·62
	Tahsil Rohtak	10	3·93
	Tahsil Jhajjar	29	3·14
Total ..	**District**	**806**	**3·84**
	Tahsil Gohana	123	4·24
	Tahsil Sonepat	241	6·36
	Tahsil Rohtak	133	3·03
	Tahsil Jhajjar	309	2·70

The percentage of cultivable waste for the district is 3.84. This percentage, however, is the highest *viz.*, 6.36 in Tahsil Sonepat and the lowest *i.e.*, 2.70 in Tahsil Jhajjar. The percentage of cultivable waste is the highest *i.e*, 5.60 among the villages lying within 5 km. from the nearest town.

46. The land under forest is 0.06 per cent only of the total area of the district as is seen from the following Table.

TABLE NO. 9

Distance from the nearest Town	District/Tahsil	Total No. of Villages	Average percentage of land under forest
5 Km. or less ..	District	101	0·20
	Tahsil Gohana	17	0·00
	Tahsil Sonepat	38	0·60
	Tahsil Rohtak	11	0·43
	Tahsil Jhajjar	35	0·00
6—10 Km. ..	District	197	0·01
	Tahsil Gohana	28	0·00
	Tahsil Sonepat	71	0·03
	Tahsil Rohtak	29	0·00
	Tahsil Jhajjar	69	0·00
11—15 Km. ..	District	165	0·13
	Tahsil Gohana	25	0·00
	Tahsil Sonepat	58	0·00
	Tahsil Rohtak	27	0·00
	Tahsil Jhajjar	55	0·57
16—25 Km. ..	District	283	0·01
	Tahsil Gohana	45	0·00
	Tahsil Sonepat	61	0·00
	Tahsil Rohtak	56	0·03
	Tahsil Jhajjar	121	0·00
26—50 Km. ..	District	60	0·00
	Tahsil Gohana	8	0·00
	Tahsil Sonepat	13	0·00
	Tahsil Rohtak	10	0·00
	Tahsil Jhajjar	29	0·00
Total ..	District	806	0·06
	Tahsil Gohana	123	0·00
	Tahsil Sonepat	241	0·09
	Tahsil Rohtak	133	0·05
	Tahsil Jhajjar	309	0·09

While it is desirable that 22 per cent of the total area should be under forest, the area under forest in the district is practically nil. Tahsil Gohana is the worst in this regard.

47. The percentage of irrigated area to the total cultivated area for the district works out to 53.34. The position in this regard is depicted in the following Table.

TABLE NO. 10

Distance from the nearest Town	District/Tahsil	No. of Villages	Average percentage of irrigated land to total cultiva ted land
5 Km. or less ..	District	101	53.06
	Tahsil Gohana	17	50·08
	Tahsil Sonepat	38	71·78
	Tahsil Rohtak	11	50·61
	Tahsil Jhajjar	35	46·21
6—10 Km. ..	District	197	60·32
	Tahsil Gohana	28	60·81
	Tahsil Sonepat	71	74·78
	Tahsil Rohtak	29	71·93
	Tahsil Jhajjar	69	44·17
11—15 Km. ..	District	165	56·36
	Tahsil Gohana	25	51·89
	Tahsil Sonepat	58	68·53
	Tahsil Rohtak	27	70·71
	Tahsil Jhajjar	55	39·93
16—25 Km. ..	District	283	49·83
	Tahsil Gohana	45	62·67
	Tahsil Sonepat	61	64·55
	Tahsil Rohtak	56	65·24
	Tahsil Jhajjar	121	25·45
6—50 Km. ..	District	60	43·82
	Tahsil Gohana	8	63·79
	Tahsil Sonepat	13	62·19
	Tahsil Rohtak	10	52·97
	Tahsil Jhajjar	29	21·19
Total ..	District	806	53·34
	Tahsil Gohana	123	58·59
	Tahsil Sonepat	241	69·22
	Tahsil Rohtak	133	65·25
	Tahsil Jhajjar	309	34·10

As against the total cultivated area of 1,264,294 acres, only 674,391 acres have the facility of irrigation. Comparing the position in this regard among the various tahsils the percentage of irrigated area to the cultivated area is the highest *viz.*, 69.22 in Tahsil Sonepat. The close second is Tahsil Rohtak with 65.25 per cent of its cultivated area being irrigated. Tahsil Jhajjar has the lowest percentage of irrigated area of 34.10 which is far below the district average. The most important sources of irrigation are canals, wells and tubewells.

48. *Town Directory.*—There are 8 towns in the district. The data on each town has been presented through as many as seven Statements. Statements 1 to VI have been compiled from the information supplied by the concerned local bodies. Statement VII relating to the distribution of sex-wise population of the towns by Religion has been prepared on the basis of the data collected during the 1971-Census.

49. Statement-I gives the status of each town *i.e.* whether it is a Corporation, a Municipal Committee, a Cantonment Board or a Notified Area Committee and indicates the decadal population since the year 1901. In case a town did not enjoy urban status at the time of any of the decennial censuses, a dash (—) has been put in the relevant column under the heading "Population of the town at the Census of". In the case of towns which lost their urban status at the time of one or more censuses, the entry "Declassified" would be found to have been made in this column. In column 14 of this statement has been indicated the functional category of each town based on the 1961-Census returns. The following Table gives the number and names of towns distributed according to their functional category :—

Functional Category	Number (names) of Towns
Industry-cum-Commerce-cum-Primary Activities	1 (Bahadurgarh)
Primary Activities	1 (Beri)
Commerce-cum-Industry-cum-Services	1 (Gohana)
Primary Activities-cum-Industry-cum-Services	1 (Jhajjar)
Primary Activities-cum-Services-cum-Commerce	1 (Maham)
Services-cum-Trade & Commerce-cum-Industry	1 (Rohtak)
Industry-cum-Services	1 (Sonepat)

50. Statement-II gives the physical and locational aspects of the various towns in the district.

The rainfall data are not available for the three towns of Bahadurgarh, Ganaur and Maham. Rohtak has the highest annual rainfall of 781.4 millimetres. Beri, on the other hand, has the lowest rainfall of 120 millimetres.

The information with regard to the minimum and maximum temperature for the towns is not available.

51. Statement-III gives the position of Municipal finances as during the financial year 1968-69 (1st April, 1968 to 31st March, 1969). The total income from the various sources and the expenditure on different items have been indicated in Rs. '00'. The following Table provides the *per capita* income and expenditure of the Municipalities arranged by the size class of the towns:—

Class of Town	No. and name of towns	*PER CAPITA*						
		Receipt			*Expenditure*			
		Total receipt	Receipt through taxes, etc.	Receipt from all other sources	Total expenditure	Public institutions	Public health and conveniences	All other aspects
Class I— 100,000 & over	1 (Rohtak)	20	18	2	19	N	9	10
Class II— 50,000—99,999	1 (Sonepat)	15	13	2	15	O	7	8
Class III— 20,000—49,999	1 (Bahadurgarh)	11	7	4	11	O	N	11
Class IV— 10,000—19,999	4 (Maham, Beri, Gohana, Jhajjar)	21	11	10	20	N	8	12
Class V— 5,000—9,999	1 (Ganaur)	..	..	..	..	..	..	..
Class VI— Below 5,000	..	..	..	..	..	..	..	..

N=Negligible
O=Nil

52. In Statement-IV has been presented the state of civic and other amenities as in the year 1969. The amenities covered are the roads, the system of sewerage and drainage, the source and quantity of drinking water-supply, the existence or otherwise of fire fighting services and the number of electric connections separately under domestic, industrial and commercial uses also the number of street light points. The method of removal of night-soil and the number of public latrines of different types *viz.*, 'water-borne', 'service' and 'others' have also been given. The abbreviations used in this Statement are explained as under :—

PR	Pucca Road
S	Sewer
OSD	Open Surface Drains
WB	Wheel-Barrows
HL	Head Load
Hp	Hand Pump
T	Tap Water

Only Rohtak, of the 8 towns in the district, has sewerage facility and that too in some of its parts. All other towns as also a major part of Rohtak town are served by Open Surface Drains. Except for the two towns of Bahadurgarh and Ganaur where the evil practice of carriage of night-soil as head load still continues, in all other towns the mode of carriage of night-soil is by wheel-barrows.

53. None of the towns in the district has satisfactory drinking water-supply. The following Table would provide a comparison of the actual with the desired water-supply per capita as per the Indian Standard Institute's Code of Water-Supply Requirements :—

Name of Town	Total Population	Total water-supply per day (in gallons)	Water-supply per capita per day (in gallons)	Water-supply per capita as per the I.S.I. Code of Water-Supply Requirements	
				In the case of towns with sewerage	In the case of towns without sewerage
Bahadurgarh	25,812	266,000	10		
Beri	12,336	180,000	15		
Ganaur	8,399	..	..		
Gohana	16,754	218,000	13	40	25
Jhajjar	18,947	206,000	11		
Maham	10,541	90,000	9		
Rohtak	124,755	1,800,000	14		
Sonepat	62,393	247,000	4		

54. Statement-V depicts the position of medical, educational, recreational and cultural facilities for all the towns in the district separately, reference year being 1969. Under the heading 'Medical Facilities' have been shown the number separately of Hospitals/Dispensaries, T. B. Clinics/Health Centres/Nursing Homes. The total number of patient beds available in all the medical institutions in each town has also been indicated. As for the educational facilities, information has been given separately for the number of Arts/Science/Commerce Colleges, Medical/Engineering Colleges, Polytechnics, Higher Secondary or Secondary/Junior Secondary or Middle/Primary Schools and even recognised Shorthand, Typewriting, and other Vocational Training Institutions. Under the heading 'Recreational Facilities' are indicated the number of Stadia, Cinemas, Auditoria

and Public Libraries including Reading Rooms. Abbreviations used in the preparation of this Statement are explained as under :—

H—Hospital
M—Maternity Hospital
D—Dispensary
NH—Nursing Home
HC—Health Centre
FC—Family Planning Centre
TBC—T. B. Clinic
VH—Veterinary Hospital
A—Arts College
AS—Arts-cum-Science College
ASC—Arts-cum-Science-cum-Commerce College
CE—College of Education

Except for the two towns of Ganaur and Maham, all other towns have one college or more. Rohtak alone has as many as seven colleges apart from one College of Education. Rohtak has also a Post Graduate Regional Centre run by the Panjab University. Even Bahadurgarh has three colleges—one Arts College, and two Arts-cum-Science Colleges. Sonepat has two Arts-cum-Science-cum-Commerce Colleges and also a College of Education. Rohtak has the pride of having the only Medical College in the State. Rohtak has two Polytechnics as well. Jhajjar and Sonepat towns have one Polytechnic each. There are three Industrial Training Institutions one each at Jhajjar, Rohtak and Sonepat.

55. The following Table gives the number of beds per 1,000 population for the various towns :—

Sl. No.	Name of Town	Total No. of beds	Population	No. of beds per 1,000 Population
1	Bahadurgarh	24	25,812	1
2	Beri	44	12,336	4
3	Ganaur	16	8,399	2
4	Gohana	14	16,754	1
5	Jhajjar	18	18,947	1
6	Maham	10	10,541	1
7	Rohtak	805	124,755	6
8	Sonepat	73	62,393	1

56. The following Table gives the number of Higher Secondary, Middle and Primary Schools separately for each of the town *vis-a-vis* their population :—

Sl. No.	Name of Town	Population	Number of Schools		
			Higher Secondary or Secondary	Middle	Primary
1	Bahadurgarh	25,812	4	..	3
2	Beri	12,336	2	..	6
3	Ganaur	8,399	2	..	3
4	Gohana	16,754	3	..	7
5	Jhajjar	18,947	2	..	6
6	Maham	10,541	2	..	2
7	Rohtak	124,755	16	4	19
8	Sonepat	62,393	5	..	8

57. Statement-VI shows the number of Banks, the Agricultural Credit Societies and the Non-Agricultural Credit Societies, in each of the towns. In so far as the aspects relating to trade, commerce and industry are concerned, information has been given on the three most important commodities imported/exported and the three most important commodities manufactured. Sonepat has the famous Atlas Cycle Factory. The cycles manufactured at this factory are exported not only to other parts of the country but to the countries abroad as well. Bahadurgarh has also established itself as a centre of industry. The two most important commodities manufactured and exported from this town are glass bottles and sanitary-wares. The prestigious Hindustan Twyfoids (now Hindustan Sanitarywares & Industries Ltd.) and M/s Hindustan National Glass Mfg. Co. have their factories at Bahadurgarh. Of late Ganaur has also appeared on the industrial map of the State. Although the Bharat Steel Tubes Factory is not within the municipal limits of Ganaur town, the steel tubes manufactured at Ganaur are exported not only to the other parts of the country but also to the countries abroad.

58. Statement-VII gives the distribution of sexwise population by Religion for all the towns in the district.

59. *Part 'B' Village and Town-wise Primary Census Abstracts* .—As the title itself suggests, the Village and Townwise Census Abstracts have been presented within the district tahsilwise, and within the tahsil for each village and for each town separately. Preceding the Village and Townwise Primary Census Abstracts, however, Primary Census Abstract for the district as a whole and for each tahsil comprised therein has been presented. In the district and tahsil Primary Census Abstracts, 'T' stands for Total Population and 'R'and 'U' for the Rural and Urban parts thereof respectively.

60. Although for the purpose of Census enumeration, the villages had been divided on the basis of their population into 'Enumeration Blocks' consisting of approximately 750 persons each, data of population in the case of villages have not been given enumeration blockwise, but for the village as a whole. In the case of towns, on the other hand, data have been provided for individual enumeration blocks within a ward. The enumeration blocks in towns were formed on the basis of a population roughly of 600 persons. Naturally, the total of the population of the enumeration blocks in a ward would give the latter's population. The information relating to the population and its characteristics presented in columns from 6 to 38 of the Primary Census Abstracts has been given sexwise, *i.e.*, separately for Males (M) and Females (F).

61. The contents of the Primary Census Abstracts and the concepts, if any, connected therewith are discussed columnwise as under :—

Column 1 (Location Code Number).—In this column is indicated the Location Code Number of the village/town. For the purposes of the Census, every district, tahsil, village and town had been given a Location Code Number for facility of its identification. The said Location Code Number, therefore, has been indicated in this column.

Column 2 (Name of Village/Town/Ward/Urban Enumerator's Block).—As pointed out above, the Primary Census Abstracts have been presented village-wise and in the case of Towns, Ward/Urban Enumerator's Blockwise. As is well-known, every town stands divided into a number of wards, mostly on the basis of their electoral strength.

Column 3 (Area of village in acres and of towns in sq. km.).—Does not call for any explanation.

Column 4 (Occupied Residential Houses).—In this column has been given the total number of Census Houses used for residential purposes. The question naturally arises, as to what is a Census House ? A Census House is a building or a part of a building having a separate entrance from a common courtyard or a stair-case, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or a non-residential purpose or for both. In this column, however, has been given the number only of those Census Houses which at the time of enumeration were being actually used for residential purposes.

Column 5 (Number of Households).—A Household is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevent them from doing so. It may be made up of related or unrelated persons. A cook or a servant living in the house of his employer and taking his food there, is to be considered as a member of the household. Similarly, a hotel where a number of unrelated persons live together has been treated as an 'Institutional Household'.

Columns 6, 7 *and* 8 (Total Population including Institutional and Houseless population).—Under this heading information has been provided about the total population (column 6 'P' for Persons) and separately for Males (M—column 7) and Females (F—column 8). It may be necessary to explain here as to what is meant by 'Institutional Population' and 'Houseless Population'. By 'Institutional Population' is meant the number of inmates of institutions like the Blind and Deaf and Dumb Schools, Orphanages, Lunatic Asylums, Jails, etc. By the 'Houseless Population' is meant the number of persons who have no house to live in, and spend the night on foot-paths etc.

Columns 9 *and* 10 (Scheduled Castes).—In these columns has been given separately for Males (M) and Females (F) the population of Scheduled Castes. Only those Castes which are included in the list of Scheduled Castes recognised by the Presidential Order for the State of Haryana, have been reckoned as such for the purposes of Census. It may be understood that there is a separate list of Scheduled Castes for each State and that a Caste recognised as Scheduled Caste in one State may not necessarily be recognised as a Scheduled Caste in the other State.

Columns 11 *and* 12 (Scheduled Tribes).—As none of the Scheduled Tribes had been recognised as such by the Presidential Order for the State of Haryana, the information with respect thereto has been considered as nil.

Columns 13 *and* 14 (Number of Literates and Educated Persons).—In these columns has been indicated the number of Literates and Educated Persons separately for the Males and the Females. It would be necessary here to explain that for the purposes of Census, only a person who can both read and write with understanding in any language has been considered 'Literate'. Evidently, a person who can merely read but cannot write has not been treated as Literate. It is not necessary' however, that a person who is literate should have received any formal education or should have passed any minimum educational standard. Children below the age of 5 years even if they could both read and write have not been considered literate as such. Children could not be considered to have developed the required 'understanding.'

62. In columns 15 to 36 of the Primary Census Abstracts has been provided information with regard to the number of workers and their distribution into 9 Industrial Categories as per the Code of National Industrial Classification.

Columns 15 *and* 16 (Total Workers).—These two columns give the number separately of Male and Female workers, falling in any of the 9 Industrial Categories. A question may perhaps be asked as to who for the purposes of Census has been treated as a 'Worker'? Before defining the term 'Worker', it is necessary to explain the concept of main activity adopted for the 1971-Census for the first time. By main activity is meant, as to how a person engages himself mostly. From the point of view of the main activity, therefore, the population got divided into two broad categories, *viz* 'Workers' and 'Non-Workers'. Only those persons, therefore, who participated in any economically productive work as their main activity, have been treated as 'Workers'. On the other hand, a person who for most of his time was engaged in any economically non-productive work, has from the point of view of main activity been considered as a 'Non-Worker'. If, however, such a person was also engaged in some economically productive activity on a part-time basis or for only a small fraction of his time, he has been reckoned only as a 'Secondary Worker' for his contribution to economic activity. As he has not been treated as worker for his main activity, the number of total workers provided in cols. 15 and 16 of the Primary Census Abstracts does not account for him. Such a person, on the other hand, has been counted among the non-workers.

63. A worker, therefore, is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work as well.

Columns 17 *and* 18 (Cultivators).—In these two columns has been given the number of Male and Female Workers whose main activity is Cultivation. For the purposes of the Census, a person engaged in cultivation by himself or by supervision or direction in his capacity as the owner or lessee of land held from Government or as a tenant of land held from a private person or an institution for payment in money, kind or share, has been recorded as a Cultivator. Cultivation, however, does not include fruit-growing, vegetable-growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations. It may also be made clear that a person who merely owns land but has given out land to another person for cultivation, for money, kind or share of crop and who does not even supervise or direct cultivation of land, has not been treated as a cultivator or even as a worker unless he is engaged in some economically productive work.

Similarly, a person working in another person's land for wages in cash, kind or share, has not been treated as a Cultivator but as an 'Agricultural Labourer'.

Columns 19 *and* 20 (Agricultural Labourers).—In these columns has been given the number of Agricultural Labourers separately for Males and Females. An Agricultural Labourer is a person who works in another person's land for wages in money, kind or share. Such a person, evidently, has no risk in cultivation and merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

Columns 21 *and* 22 (Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities).—Does not call for any explanation.

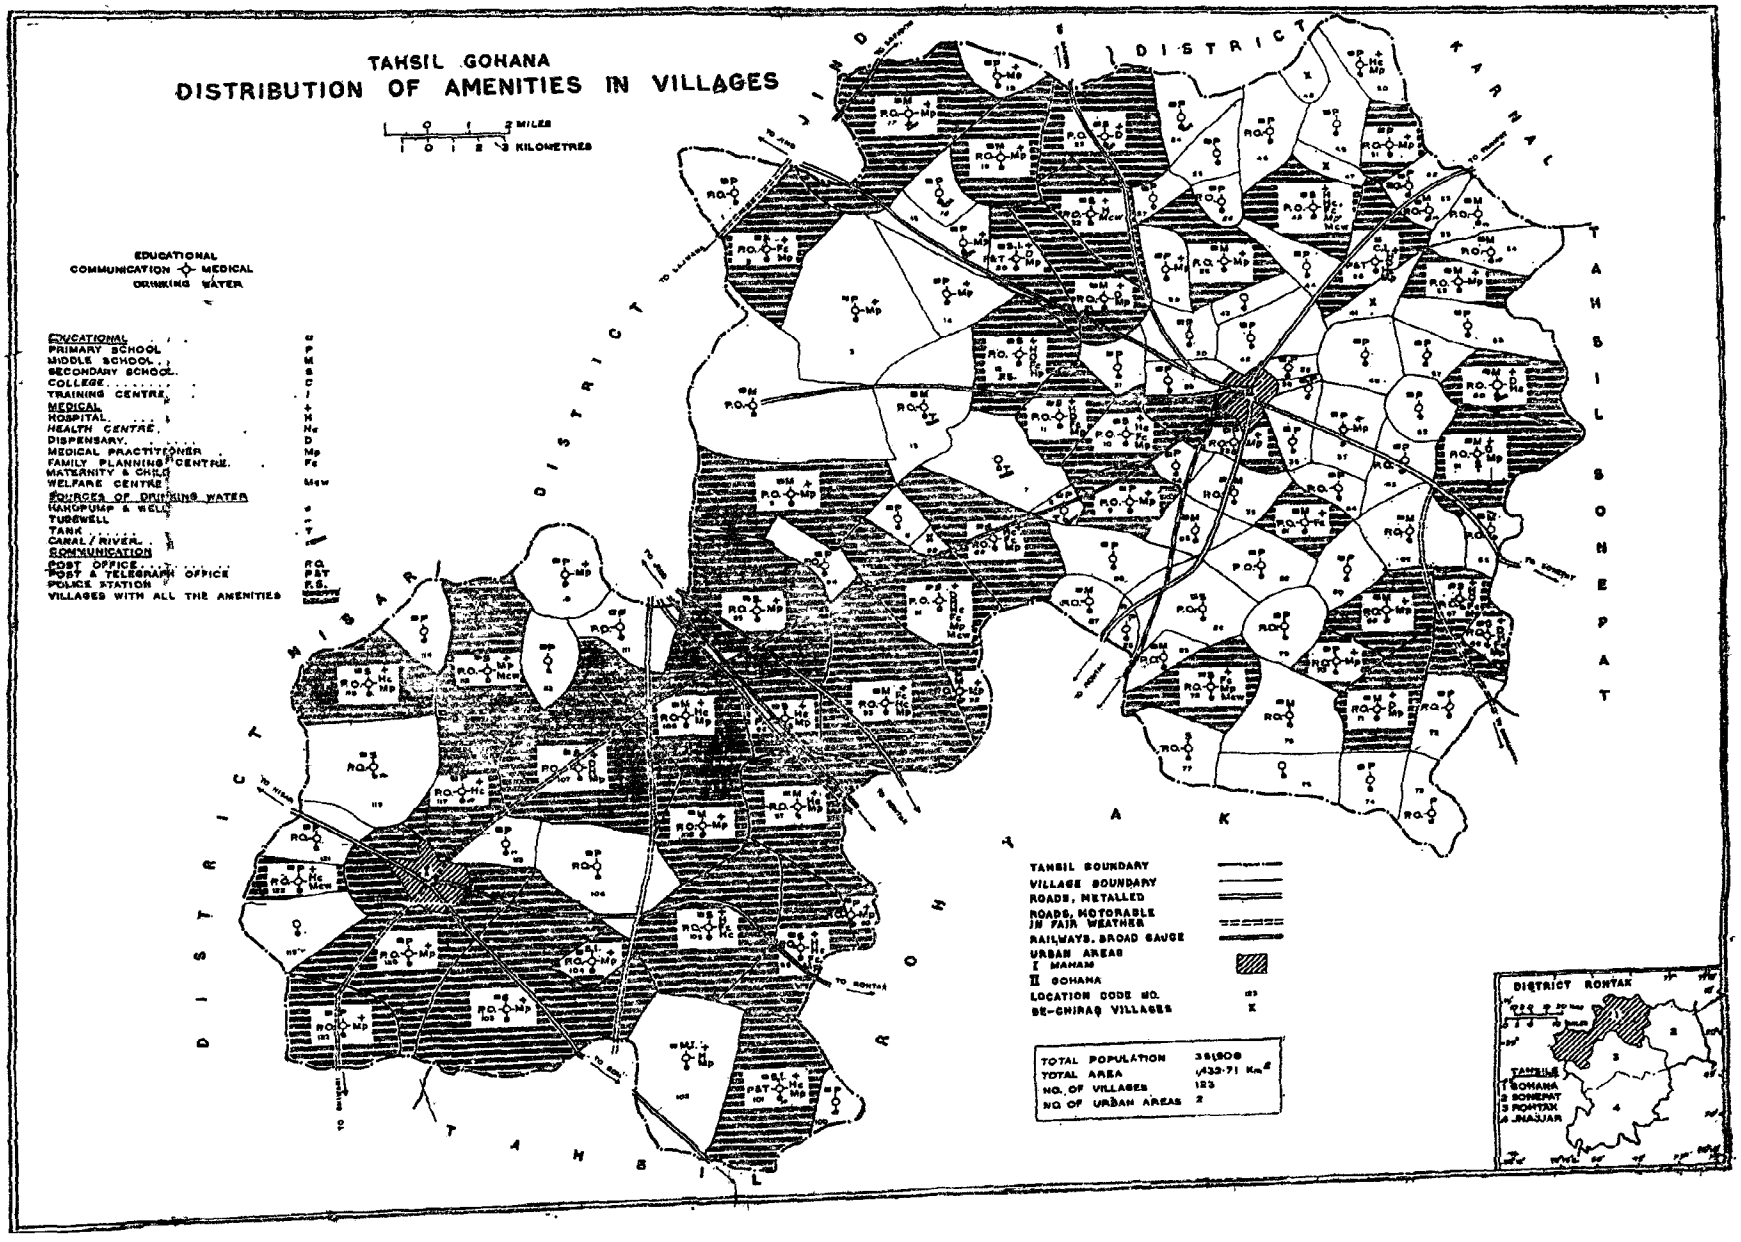

Columns 23 *and* 24 (Mining and Quarrying).—Does not call for any explanation.

Columns 25, 26 , 27 *and* 28 (Manufacturing, Processing, Servicing, and Repairs).—The workers under this category have been further sub-divided into (a) Household Industry (columns 25 and 26) and (b) Manufacturing other than Household Industry (columns 27 and 28). What is a 'Household Industry ? For the purposes of the Census, a Household Industry has been defined as 'an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The Household Industry should necessarily be run on a small scale. A factory run on the scale of a registered factory has not been considered as a Household Industry'. All other workers engaged in manufacturing, processing, servicing, and repairs where such activities are not carried on the scale of Household Industry have been included in the sub-category (b) Other than 'Household Industry.'

Columns 29 *and* 30 (Construction), 31 *and* 32 (Trade and Commerce), 33 *and* 34 (Transport, Storage and Communications).—The Industrial Categories mentioned in these columns are self-explanatory and do not call for any comments.

Columns 35 *and* 36 (Other Services).—In these columns have been given separately for males and females the figures of workers engaged in 'Other Services.' In the category 'Other Services' are included the Government servants, the municipal employees, the doctors, the teachers, the political, social and religious workers, etc. In fact, all types of economic activity carried on as a profession, not covered by the remaining 8 categories, have been covered under this category.

Columns 37 *and* 38 (Non-Workers).—In these columns have been given separately the number of Non-Workers for males and females. A Non-Worker is a person who as his main activity is not engaged in any economically productive work but is basically non-working. The non-workers constitute those engaged in Household Duties, Students, Retired Persons or Rentiers, Dependents, Beggars, Inmates of Institutions and Other Non-Workers. One may start wondering as to what are other non-workers ? In this category are included all those persons who are not covered by any of the other non-working categories but who are seeking employment. The other non-workers, therefore, stand for those persons who though wanting work, have not been able to get any employment.

†Although 'Be-chiragh' (un-inhabited) as per the Revenue record, population was recorded at the time of Census Enumeration, 1971 from the village.

Notes.—(1) In case there is a town of the same name as a village, the word (Rural) has been added along with the name of the village.

(2) The area figures are as supplied by the Revenue Patwari and include urban area, if any.

*Population of the village and the area (partly or fully) thereof has come within the municipal limits.
†Although, 'Be-chiragh' (un-inhabited) as per the Revenue record, population was recorded at the time of Census Enumeration, 1971 from the village.

Notes.—(1) In case there is a town of the same name as a village, the word (Rural) has been added along with the name of the village.

(2) The area figures are as supplied by the Revenue Patwari and include urban area, if any.

DIRECTORY
