FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important Census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in ralation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C. D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published soon after the Census Operations. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and the District Primary Census Abstract for general population. Besides, the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms (for Village and Town Directories) as also in the Individual Slips and Household Schedule forms (for population figures) through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities, Municipal Corporations and the Notified Area Committees who functioned as Charge superintendents under the supervision of the District Census Officers and the Subdivisonal Officers. The District Officers had sent to us material which was used for writing the 'Brief history of the District.' I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village/Town Directories and Village/Urban Primary Census Abstract takes note of various infrastructural facilities available in villages and towns of the district and the social, economic and demographic changes which have taken place in the district during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a special mention of the warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Charge Superintendents.

In my Office S/Shri A. P. S. Sinha and D. N. Mahesh, Dy. Directors looked after the project at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Asstt. Director, who was mainly responsible for organisation, supervision and scrutiny of the entire job from the beginning to end. His assistance to me in drafting the write-up portion deserves special mention. Shri Sinha, Asstt. Director was ably assisted by his team of Statistical Asstts., Computors, Assistant Compilers and a few lady checkers and coders. Shri T. N. Rukhaiyar, Statistical Asstt. did commendable work in this regard. The information contained in Primary Census Abstract was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Dy. Directors and it was again scrutinised and given final shape at the headquarters by a team headed by Shri P. N. Sinha, Asstt. Director. Shri Md. Abbas, Zonal

Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A. L. Das, Asstt. Director and Shri Sheo Prasad, Senior Technical Asstt. assisted by the supporting staff have helped in getting the volume printed. Shri R. B. Singh, Dy. Director happened to be incharge of printing and for sometime also looked after the DCH Section. I am thankful to them all. Shri S. C. Saxena, Dy. Director, who later started looking after printing and publication evinced very keen interest in the matter and I am specially thankful to him. Shri Md. Hasan Azad and Shri Asharful Hoda, who have done the typing work also deserve thanks.

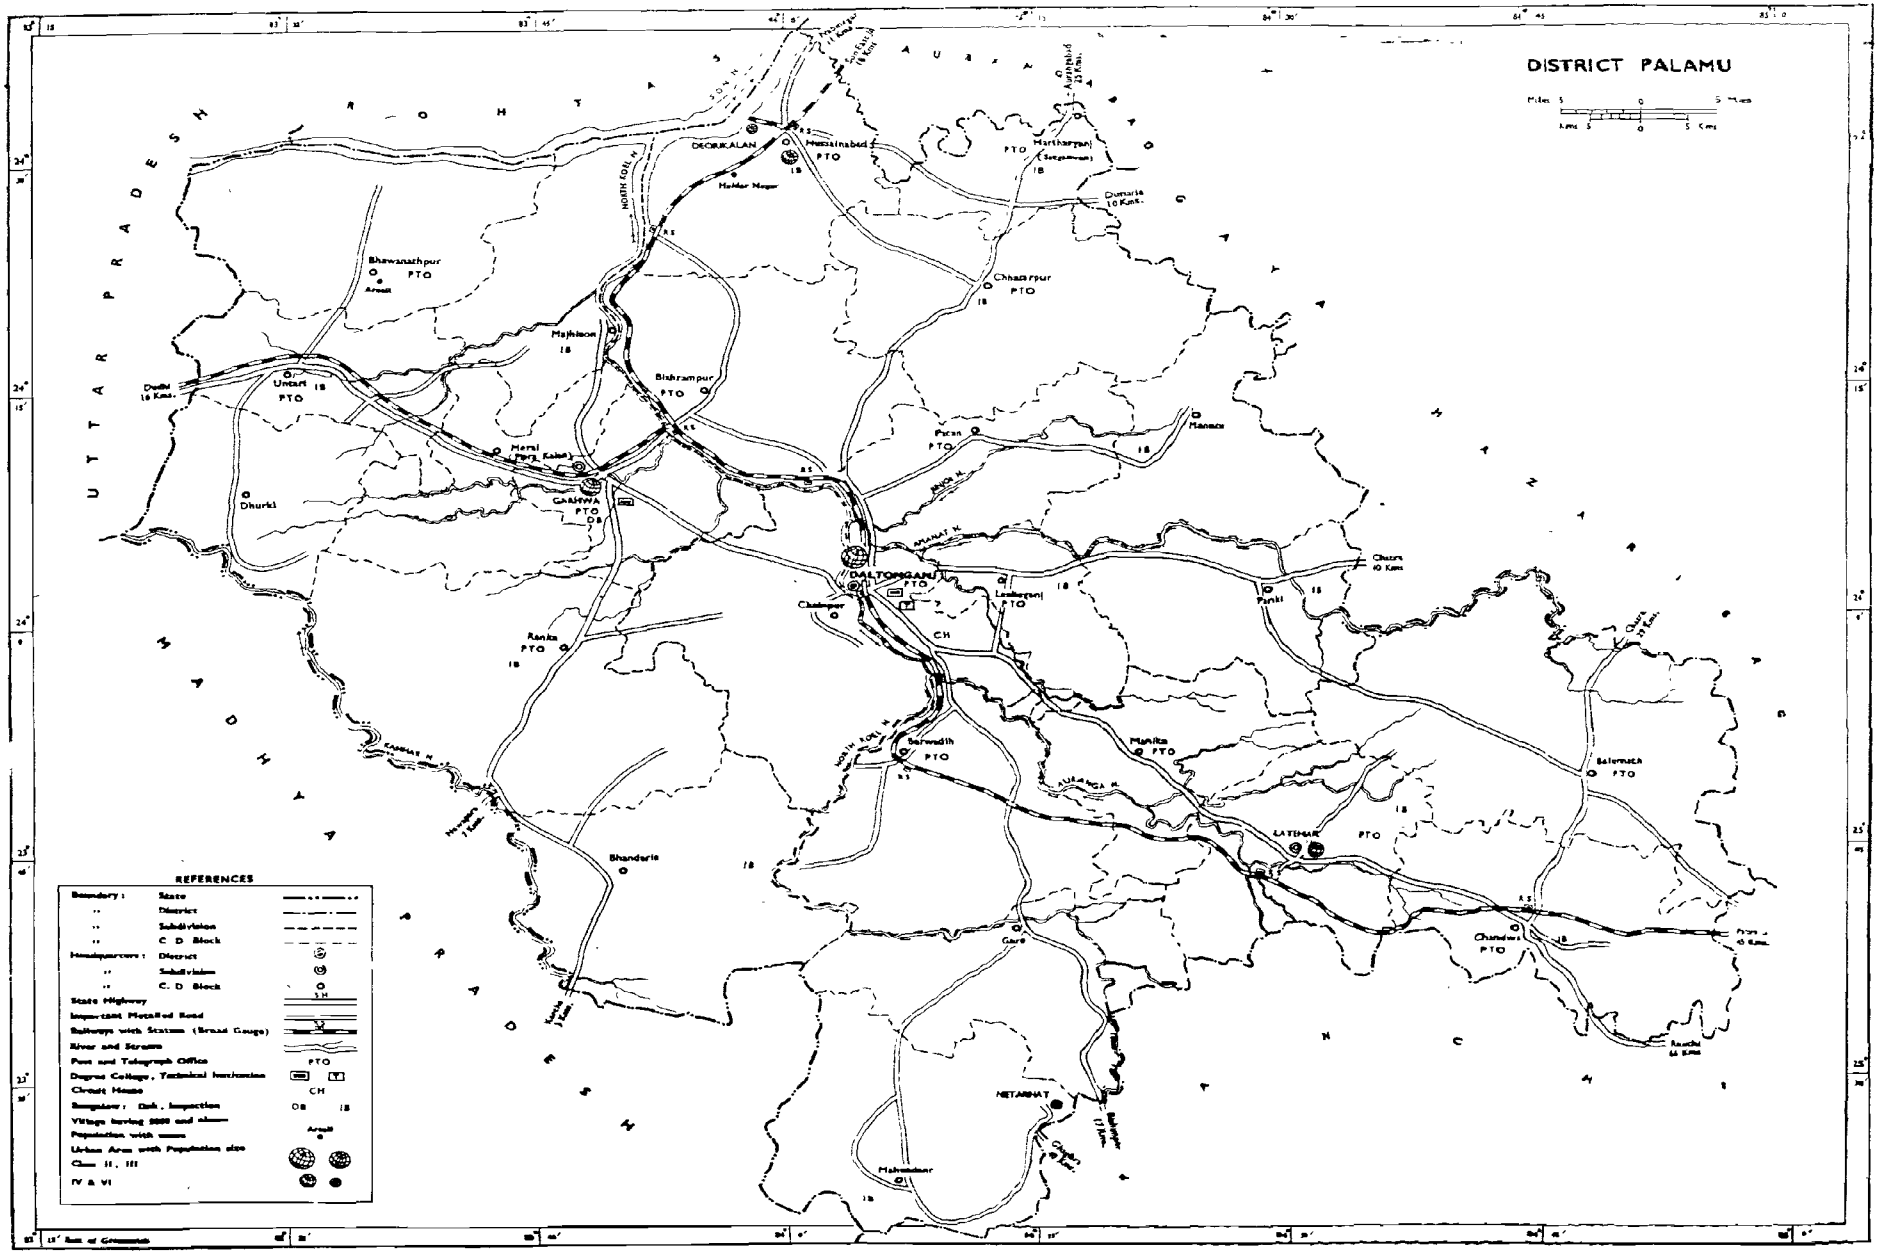

I am personally indebted to Shri P. Padmanabha, ex-Registrar General, India under whose guidance it has been a rare privilege to strive for results. I am equally indebted to Shri V. S. Verma, who took over as Registrar General subsequently, for spontaneous help and encouragement at the final stages of this project.

I am thankful to Dr. N. G. Nag, Dy. Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s U. P. Printing Press, Allahabad, who have undertaken the work of printing of this volume and accomplished the same with promptness.

DISTRICT CENSUS HANDBOOK PARTS A & B

ANALYTICAL NOTE

Brief history of the district

The district of Palamu lies in the south-western part of the State. It is one of the three districts comprised within the newly created South Chotanagpur Division. The jurisdiction of the district has remained intact in the last few decades and it has remained unaffected as a result of the reorganisation of districts which took place after the 1971 Census. It contains three subdivisions, viz., Daltonganj, Garhwa and Latehar, the headquarters of which are located in towns bearing the names of respective subdivisions.

The district is bounded on the north by Rohtas and Aurangabad districts, on the east by Hazaribag district, on the south by Ranchi district and on the west by Surguja district of Madhya Pradesh and Mirzapur district of Uttar Pradesh.

The district of Palamu was constituted on the 1st January, 1928. Just after the movement of 1857, Palamu had been formed into a separate subdivision with the headquarters at Daltonganj. In 1871 *parganas* Japla and Belaunja were transferred from Gaya to Palamu. Tori *Pargana* was also added to it in 1891.

Daltonganj town is the headquarters and the principal town of the district situated on the Koel river. The town has taken its name after Colonel Dalton, Commissioner of Chotanagpur in 1861.

Early history

The early history of Palamu is shrouded in legends and traditions. Since the district consisted mostly of forest tracts, the territory seldom engaged the attention of invading armies, and the area remained outside the pale of influence of empires which were established in other parts of modern Bihar. The area was probably inhabited by autochthonous tribes in the past. The Kharwars, Oraons and Cheros, three oboriginal races practically ruled over this tract. Inscriptions and other relics which have been found indicate a fairly developed civilization inspite of the jungles and comparative inaccessibility of the area. The Oraons had their headquarters at Rohtas Garh in the then Shahabad district (which included the present district of Bhojpur and Rohtas) and there is every indication that for sometime a portion of Palamu was ruled from the headquarters of Rohtas Garh. The Cheros reigned in Palamu for nearly 200 years and the most famous of the Chero rulers was Medni Rai who according to tradition made himself lord Paramount of the southern portion of Gaya and of large portions of Hazaribag and Surguja (in Madhya Pradesh). His son, Pratap Rai built a fort at Palamu separate from the fort that had been built by his father.

Prior to the domination of Palamu by the Cheros, Rakshel Rajputs held sway over the district. They in turn, had supplanted early Marhatta settlers of whom, however, no trace is to be found now. They have probably been assimilated in the indigenous population.

A factual history of Palamu, therefore, commences with the 16th century. In 1538 Sher Shah had sent one of his officers to control the turbulent chiefs and free the Grand Trunk Road from their exploits against travellers. The influence of the Mughals extended to Palamu during the reign of Emperor Akbar when it was invaded by Raja Man Singh in 1574. The troops left by him were, however, driven out in 1605 when Akbar died.

In 1629, Emperor Shahjehan appointed Ahmad Khan as the Subedar of Patna, and Palamu was given to him as his Jagir. Ahmad Khan imposed an arrival tribute of Rs. 1,36,000. The non-payment of this tribute by the Chero rulers of Palamu led to three successive invasions by the Muhammadans. The first invasion took place in the reign

of Pratap Rai. The Muhammadan army was headed by Shaista Khan, the Governor of Bihar. The army reached the fort of Palamu, defeated Pratap Rai and extracted a tribute of Rs.30,000 after which Shaista Khan left in 1642.

The second invasion was caused by internal bickerings. As a result of this Pratap Rai, after negotiations, agreed to pay an annual tribute of one lakh of rupees. On the recommendation of Itaikad Khan, successor of Shaista Khan, Emperor Shahjehan gave Palamu to him as a military *fief* on a jama of 2.5 lakhs of rupees.

Inspite of the success of these invasions, the payment of tribute by the Chero chiefs was never regular. As a last resort, Daud Khan, Governor of Bihar, left Patna with a strong force in 1660 and in spite of heavy drawbacks and difficult terrain, reached within three Kilometres of Palamu. There was an engagement and fighting which lasted three days, after which the fort was captured. Palamu was then placed in charge of Muhammadan Faujdar. But this system was done away with soon and Palamu was placed under the direct control of the Viceroy of Bihar in 1660. In 1720 Palamu was again invaded by Subedar Sarballand Khan. But actual fighting was warded off by the payment of one lakh of rupees in cash and in the shape of diamonds.

British rule

As in some other districts here also the British intervened at others' invitation. The circumstances leading to the establishment of Bihar rule in Palamu sowed the seed of disaffection and enmity between the dispossessed Cheros and their new masters. The first intervention of the British in the affairs of the Chero Raj of Palamu occurred in 1772 owing to the protracted internecine quarrels between two rival Chero factions (1722—70). Two candidates claiming to be the rightful Raja, one Gopal Rai, grandson of Jaikishun Rai, the other Chitrajit Rai, grandson of the murdered ruling chief, Ranjit Rai, brought their suits to the British. The British, more interested in revenue collection than in family quarrels, decided to occupy the fort of Palamu. As Chitrajit's Dewan, Jainath Singh, refused to agree to this even in return for recognition of Chitrajit's claim, the controlling council at Patna decided to support the cause of Gopal Rai. The fort was occupied by the British in February, 1771 and Gopal Rai was installed as the ruler on his agreeing to pay an annual tribute of Rs. 12,000. Gopal Rai was, however, removed after trial in 1776. There followed a scramble for power. Bishwanath Rai, his minor brother, succeeded him while Gajraj Rai became the manager. But their position was assailed by Sugandh Rai and Sheo Prasad Singh. However, Gajraj Rai could contitnue due to the support of the Collector of Ramgarh. Meanwhile in 1780 Daljit Rai, brother of Chatrapti Rai, attempted to revive the fortune of the house of Medni Rai. The Governor ordered that Bishwanath Rai, the third brother of Gopal Rai and not Gajraj or Sugandh, was the successor to the *gaddi*. Since this order was resisted Major Crawford was sent to Palamu with military force to restore peace. Major Crawford managed to capture Gajraj and Sugandha. Raja Bishwanath Rai died in 1783. He was followed by Churaman Rai who came of age in 1793.

Churaman Rai succeeded in resuming the estate of his weaker tenants. His action provoked the tenantry, and led to the Chero insurrection in 1800. The leader was Bhukhan Singh, a Chero. The British came with a force and suppressed the insurrection but by that time the Raja and the administ ation had been reduced to bankruptcy. An Assistant Collector of Bihar was appointed to look after the revenue collection in the western part of the province. Parry, the Assistant collector who took over in 1811 made the first settlement of revenue in 1812. He annulled the *Sanad* granted by Churaman Rai and took over direct collection. The Palamu estate was attacked. In 1812, the sale of Palamu estate was authorised and it was accordingly sold for Rs 51,000 against arrears amounting to Rs. 65,000. The assessment of the estate was reduced to Rs. 9,000 in 1814 when it was granted to Ghanshyam Singh of Deo as a reward for his help to the British in suppressing the Cheros and the Kharwars.

In 1813 there was a rising organised by great *Jagirdars*. This led to the attachment of the estates of Chainpur, Ranka, Lokaya, Bisrampur and Obra. The Kok rebellion of 1832 had its impact in Palamu also. The Cheros and the Kharwars rose against the administration, and non-tribal Hindus and Muslims. The insurgents were, however, defeated in an engagement with the British forces near Latehar.

1857 Movement

During the 1857 Movement, Palamu was the most severely affected district of the Chotanagpur plateau.

The brothers Nilambar and Pitambar were chiefs of the Bhogta clan of the Kharwar tribe, who held ancestral jagirs. Immediately after they heard movement against the British rule they made up their minds to declare independence. They were joined by many Chero *Jagirdars*. On 21st October, 1857 a force of 500 persons was organised which was led by Nilambar and Pitambar. They attacked Raghubar Dayal at Chainpur since he had sided with the British. From there they proceeded to Leslieganj and caused heavy destruction. Lt. Graham, with only 50 persons at his disposal, could not do much to thwart the insurgents. The entire countryside appeared to be up in arms. Lt. Graham was besieged in the house of Raghubar Dayal. In December, two companies arrived under Major Cotter. He was able to capture Devi Baksh Rai, one of the principal leaders of the movement. In January Col. Dalton, the Commissioner of Ranchi himself came to Palamu and captured the Palamu Fort. Ultimately the insurgents were captured and peace was restored soon afterwards. It is noteworthy that the movement in Palamu was no mere sepoy mutiny but an uprising of the indigenous population of the district.

Palamu played an important part in the freedom movement of the country. The Bihar Students' Conference was held at Daltonganj in 1920 under the presidentship of Rev. C. F. Andrews. The participants included Mazharul Haque, Mahatma Gandhi and Dr. Rajendra Prasad visited Daltonganj in 1927. The August disturbances in 1942 had their echoes in Palamu. The people of Palamu took active part in all the subsequent movements which led to the country's independence.

Natural divisions

In shape, Palamu district is like a parallelogram of which the eastern and western sides are of greater length than the northern and Southern sides. The average elevation of Palamu is about 1,200 feet above the mean sea level, the highest point being Netarhat. The district comprises three natural divisions. The first constitute the erstwhile *Parganas* of Palamu and Tori which have the characteristics of Chotanagpur Plateau proper. The erstwhile Belaunja *Pargana* forms a long strip of broken hill occasionally forming 16—18 Kms. in breadth on the southern bank of the Sone, and extending from Mirzapur district of U. P. on the west and Koil to the east. This *Pargana* was added to Palamu district in 1871. The third natural division comprises the erstwhile *Pargana* of Japla which was transferred from Gaya district to Palamu in 1871. This division is almost devoid of hills lying along the bank of the Sone and north-east corner of the district and similar in characteristics to the adjoining parts of Gaya.

The hills in the district are widely scattered. Many of the ranges consist of crystalline and metamorphic rocks and rise up to 3,000 feet. Another class consists of hills formed of sandstones or conglomerates and constitutes the long ranges east of the Koil some 200 to 300 feet high but some rising higher such as the Latehar peak which is 910 feet high from the surrounding area and 2,051 feet above mean sea level. The third category of hills comprise the *pats* or plateaus on the south which are formed of crystalline rock with their summits capped with sandstone trap or laterite. Some of the important hills are Kotam south of Garu police station and Kumandih between Garu and Latehar.

River system

The general line of drainage is from south to north towards the Sone, which forms part of the northern boundary of the district. The principal rivers are Koil and its tributaries, the Auranga and the Amanat. There are also a host of smaller streams, most of which are mere mountain torrents with rock-strewn beds. The Koil, Auranga and Amanat have their upper ridges characterised by high banks. The bed of the Koil is rocky for a small length from the north of its confluence with Auranga after which it is sandy. The Koil flows for a total distance of about 255 kilometres from its source to its confluence with the Sone. It is generally dry in the summer when boat traffic is not possible up to Daltonganj. The Auranga rises near Sohida and flows in the north westerly direction for about 80 Kms. till it joins the Koil. The Amanat rises in Hazaribag and flows in the westerly direction to join the Koil

The Sone enters Palamu at its north-west corner and then flows to east below the Kaimur hills until it is joined by the Koil. Among other rivers of note in the district are Kanhar which forms a part of the south-western boundary of the district for about 80 Kms., separating it from Surguja in Madhya Pradesh. The Sadabah, which literally means ever flowing, flows some 27 kilometres north of Daltonganj and is noted chiefly because of an irrigation scheme completed there.

Climatic conditions

The climate of this district is on the whole dry and bracing. The year can be divided into three main seasons, the cold season from November to February, the summer season from March to May or early June and the monsoon season from June to September. October is a transitional month between the monsoon and the winter seasons.

The average annual rainfall for the district as a whole is about 1,335 mms. The northern parts of the district get less rain than the southern parts.

Flora and Fauna

Forests play a dominant part in the economy of the district. Out of the total area of the district as much as 40 per cent is under forests. Many of the villages lie in the thick forest areas. In such a large area vegetation is very varied. Among the important trees are *sal*, Buchnania, Semecarpus, Terminalia, Cedrela, Cassia, Batea, Bauhinia, Acacia, Adina, Cochlospermum, Soymida, Boswellia, Hardarickia and Bassia. The extensive forests still harbour a few tigers, leopards, bears, hyenas, wild dogs, jackal and wild cat. Among the other wild animals are bison, sambar and various other kinds of deer, neelgai, wild pigs and monkeys. Elephants are sometimes found in the forests and hills of Garu.

Mines and Minerals

There are extensive mineral deposits in the district. Coal is worked near Rajhara and Pandua. Bauxite is found in the plateaus of Netarhat, Joradumar and Garitanr *pahars* and Jamira *Pat*. Iron ore occurs at Gore in the form of magnetite and also at Datum and Sua. Dolomite and dolomite limestone occur in many places as such Kothia near Latehar Railway station, Balumath, Pandwa and Majhaulia. The soil is more or less uniform throughout the district being clayey. Stretches of red and black clay soil are also found.

Land use pattern

Palamu falls in the rain shadow belt of Bihar and therefore is drought-prone. During summer months a large number of villages face scarcity of drinking water. The problem becomes acute when rains fail. Floods are not a problem as the river are mostly hilly except Sone which is a perennial river and sometimes creates problem in certain pockets.

As already explained the soil is generally clayey throughout the district. The soil formation in the district is the result of the action of rivers like the Koil, Amanat and the Sone. The first fertile tract consists of the valleys of these three rivers where rice is chiefly grown. The second type comprises hilly tract where the soil is loose and full of gravel. This area is mostly covered with jungle and cultivation is restricted to valleys and narrow basines on either side of the hills, rivulets and rivers. The entire hilly tract in the south contains this kind of soil in which maize and similar crops are chiefly grown.

Rice is the main crop of the district accounting for a little less than one-third of the gross area sown. Maize and wheat form other important crops. Among the non-food crops grown, the major portion is covered by oil-seeds. Sugar-cane is the cash crop of the district. It is, mostly grown in the valley in the north and in the central part of Palamu.

Irrigational facilities

The uncertainty of a well distributed monsoon underscores the importance of artificial methods of irrigation for successful crop raising. There are a large number of rivers and streams in the district, but in most of them the supply of water diminishes rapidly or fails entirely soon after the end of the rains.

The system of artificial irrigation prevalent in the district consists of three main typs, viz., Major Irrigation Schemes, Medium Irrigation Schemes and Minor Irrigation Schemes. The Major Irrigation Schemes provide a perennial supply of water

both during the *Kharif* and *rabi* seasons while the Medium Irrigation Schemes are intended to supply assured irrigation to paddy crop during the intervening drought periods in the *Kharif* season. The Minor Irrigation Schemes include minor *bandh*, *ahar*, *pyne*, wells, etc. These are low cost schemes and their maintenance cost is also low. They are more suited to the local requirement as they can provide water in areas where major schemes cannot work.

Fisheries

The district is not noted for fish. The rivers are mostly hilly and their currents are very sharp and so there is very little possibility for breeding. In the summer season almost all the rivers except Sone become dry. During rainy season certain varieties of fish are found in the river Koil. During other seasons fish becomes rare in Palamu. In order to develop fisheries nurseries have been started at a few important centres in the district. Carp breeding scheme is also in operation in Daltonganj. The feasibility of using reservoirs for fish-breeding is being examined. There is a fish sanctuary in the Sone near Japla. The fishes are mostly found in tanks. However, the district has a few very big tanks where fish could be bred.

Industrialisation

A century ago, Palamu was noted for cotton weaving. There was a big cultivation of cotton, which led to a flourishing cloth weaving industry.

The district contains deposits of various minerals. The important minerals which are available for commercial exploitation are coal, limestone, fireclay, bauxite and laterite. Coal has the most important place among mining and heavy industries. Another important large scale industry is the Sone Valley Portland Cement Co. Ltd. Works at Japla. It is one of the units of the Sahu Jain group of industries.

There are a number of small units spread over the district for crushing stone and preparation of stone chips. The cultivation of lac is widely spread in the district and lac industry is a valued subsidiary occupation of the cultivators. *Biri* making industry is also widespread throughout the district. The district is going to have a huge Caustic Soda factory which, when completed, will be one of the most important industries in the country. A cassette manufacturing factory is likely to be commissioned soon near Kuru. There is also a proposal to start two cement factories in the district.

The major forest produce consists of timber, bamboo, firewood and charcoal. The district has vast natural resources but they are still to be fully exploited. There is a great potentialily for the bamboo pulp industry in the neighbourhood of Chipadohar. There is also great potentiality for the development of ply wood factory in Palamu. It has also tremendous resources for fire bricks factory and the catechu industry.

Livestock

The term livestock includes cattle (cows, bulls and bullocks) buffaloes, sheep, goats and pigs. The total livestock population, according to 1977 cattle Census, is indicated below :

Cows	...	479,846
Buffaloes	...	148,087
Bulls and Bullocks	...	369,179
Sheep	...	83,168
Goats	...	340,687
Pigs	...	44,753

The district has a veterinary hospital and a number of dispensaries. They are manned by veterinary surgeons. Various schemes for cattle improvement are functioning in the district. Bullocks play a great part in agriculture. Bullocks of *Shahabadi* breed are gradually replacing the local breeds of poor and small-sized bullocks.

There is a good scope for the development of poultry in this district. It is an important subsidiary occupation of the local tribal population. However, there is no system of proper housing and feeding. Both in the urban as well as rural areas, poultry is kept in free range. With the rapid industrialisation of the neighbouring districts the scope of export of poultry from this district has increased considerably.

Communication

Roads—Although no National Highway runs through the district it has a good number of State roads. Among the main roads are the following :

(i) Daltonganj-Ranchi road which runs from Daltonganj through Latehar and Chandwa for 155 Kms.

(ii) Daltonganj-Aurangabad road runs through Chhatarpur and Hariharganj for 70 Kms. within the district from where Aurangabad on the Grand Trunk Road is only 26 Kms. away.

(iii) Chandwa-Balumath-Chatra road runs through Balumath for 38 kilometres in the district and joins Dobhi on the G. T. Road.

(iv) Rehla-Godarmana road passes through Garhwa and Ranka and runs for 57 kilometres in the district up to the Madhya Pradesh border.

Besides, there are a number of District Board roads, the most important of which is Daltonganj-Garhwa Road. Various roads maintained by the Forest Department help in easy transport of forest produce.

Railways—A branch of the Eastern Railway runs from Dehri-on-Sone to Gomoh. It runs through the district from Japla to Mahua Milan via Garhwa Road, Daltonganj, Latehar. A branch-line has been taken from Garhwa Road to Mirzapur in Uttar Pradesh.

Rivers—There is hardly any traffic by boat.

Airways—There is a small landing ground at Chianki 5 kilometres from Daltonganj.

Trade and Commerce

The topographical position of Palamu in the State of Bihar has a special significance. Besides, being a border district of the State it adjoins some districts in the State of Bihar, namely Aurangabad, Hazaribag and Ranchi and some districts in Uttar Pradesh and Madhya Pradesh. Before the extension of the modern means of communication such as roadways, railways, waterways, etc., the trade and commerce of the district was carried on with the help of bullock-carts, elephants, horses, packponies or bullocks, etc. When locomotives were unknown the chief centres of trade and commerce were the *hats* and *melas*. The cammodities produced in the district were mostly consumed locally. With the improvement in the communication system the trade and commerce of Palamu district has expanded considerably.

Trade in the district consists mainly of export of coal, cement, lac, catechu, timber, bamboo, *ghee*, bones and hides, *kendu* leaves for *biri*, honey, vegetables, goats, etc. and import of rice, gram, wheat, *arhar*, yarn, salt, cotton piece goods, tobacco, medicines, spices, sugar, kerosene oil, etc. The bulk of the export trade passes through Daltonganj, Chipadohar, Garhwa and Hariharganj. The railway stations that have a commercial importance within the district are Barwadih, Latehar, Daltonganj, Garhwa Road and Japla.

There is no regulated market in the district as such. The primary markets are the village *hats* and *bazars* and the secondary markets are places like Garhwa, Daltonganj, Hariharganj, Japla, etc. The *melas* in the district have very good turn over of the produce of the district and also provide good market for the goods imported from outside the district.

Electricity and Power

The district receives most of its power supply from the Patratu Thermal Power Station. All the towns of the district have electricity. In the rural areas, however, the pace of electrification is comparatively slow as only about 16 per cent of the inhabited villages have been electrified so far. There are five electrical sub-stations functioning in Palamu district.

Social and Cultural events and Natural and administrative development.

No major social or cultural event has taken place in the district during the decade. However, fairs and festivals are held regularly by different communities in the district in complete communal harmony.

The Drought Prone Areas Programme is the most important project taken up in the district. The programme was actually chalked out during the 4th plan itself but it came in operation in the 5th five year plan period (1974—1979). It aims at undertaking systematic planning and implementation of the schemes on water-shed basis. The programme is intended to cover the entire district The idea is to develop and improve the lot of marginal and small farmers, landless labourers and weaker sections of the society.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1 Amjharia

The village is situated about 11 Kms. of Chandwa, on the road from Barsidar to Ranchi. It is a place of great scenic beauty which attracts tourists. It has a Forest Rest House situated on the summit of a hill, commanding a picturesque view of the area.

2. Betla

It is a village lying about 25 Kms. from Daltonganj, the district headquarters. The Forest Department of the State Government has set up a National Park here. The park is full of wild animals including a good number of elephants and tigers. Surrounded by dense forests, it has a natural beauty of its own. It attracts a large number of tourists every year from all parts of the country specially during October-March. It falls within the Tiger project of the Central Government. Betla has considerable historical importance also since the 'Palamu Fort' of the old Chero Kings is located here.

3. Demu

The village lies in Latehar Community Development Block. It contains a waterfall known as *Saptavahini* where the river Pandhi falls from a height of 12 to 15 feet. There are several temples of Goddess Durga and Lord Mahavir and the place is considered to be sacred.

4. Dundu

The village lies about 25 Kms. from the block headquarters at Manatu. It is noted for its *mahua* tree under which the villagers dance on the occasion of *Karma* festival and *Jitia* (Jiwitputrikavrat). The tree is believed to have special powers.

5. Garu

The village is the headquarters of the development block bearing the same name and is situated on the southern bank of the river Koil. The area is renowned for wild game hunting. Elephants are found in large number in the forests.

6. Gulgulpat

The place is situated at an altitude of 3,900 feet above mean sea-level and lately it was named as Jawaharpat in the memory of Shri Jawahar Lal Nehru. It contains dense forests. There are many peacocks in the area. The scenery in this area is very picturesque particularly between July and September.

7. Gursendhu

It is a small waterfall situated on the south-west corner of village Champakali about 5 Kms. from Ranka block headquarters. It is scenically situated amid forests.

8. Haidarnagar

It is a large village situated about 8 Kms. south-west of Japla railway station. It has got a historical importance as the village was founded in the 18th century by Saiyad Nabi Ali Khan the son of Nawab Hedayat Ali Khan (founder of Hussainabad). It is an important trading centre.

9. Kanjia

The village lies about 8 Kms. from Bhandaria and is noted for its catholic *Ashram* which was started in 1937.

10. Kantifalls

The village is situated on the Chandwa-Kuri road about 6 Kms. from village Senha. It is a lovely spot for picnic as it lies amidst forests.

11. Kechki

It is a village close to Auranga bridge and is an important centre for export of forest produce, particularly bamboos. It is an attractive place for picnic and well worth a visit by the tourists.

12. Ketar

It is an important village on the bank of river Panda situated about 11 Kms. north-west of Bhawanathpur. There is a temple of Bhagwati around which a month-long fair is held on the eve of *Ramnavami*.

13. Khaira Pahar

It is the highest hill (4,000ft.) in the locality situated about 22 Kms. away from the block headquarters at Bishrampur. It is named after a hermit known as Khaira Baba who is believed to have resided on the hill in ancient times. It is a sacred place for the Hindus.

14. Kotang

The village is situated in scenic grandeur some 16 Kms. from the subdivisional headquarters at Garhwa. It contains a hillock about 1,000 ft. in height. There is an image of a Goddess on horse-back on the hill-top. People worship the image during the winter months.

15. Kulku

It is situated at the confluence of the rivers Koil and Haraya and is noted as a place of scenic beauty. It has a forest bungalow which commands a fine view up and down the river.

16. Loda falls

It is situated in the interior of the district about 14 Kms. from Mahuadanr and is also known as 'Burha Ghagh'. The water falls from a height of 450 feet. It is said to be the highest fall in the State. It lies on the Burha river which forms the border between Bihar and Madhya pradesh for some distance.

17. Muhammadganj

The village which is on a rail-head is situated about 19 Kms. south of Japla. An annual fair is held on the occasion of *Makar Sankranti* in the grounds near the railway tunnel is called *Bhimchulha* (the oven from which Bhima had cooked food).

18. Nawagarh

The village which lies in Bishrampur block has some historical importance. It contains the dilapidated ruins of a *garh* (fort) of the proprietors of the erstwhile Diogan estate and descendants of the Chero Kings. Located amidst dense forest in the foot-hills. It commands a grand scenic veiw.

19. Palamu fort

The fort is situated on a hill in a dense forest by the side of river Auranga about 5 Kms. from the National Park, Betla and 19 Kms. from Barwadih. The fort is ascribed to the Chero Raja, Medni Rai. An annual *Adivasi* fair is held here in the month of November.

20. Ranka

The village is the headquarters of the development block bearing the same name. The village is said to have derived its name from the Ranka Raj whose founder had given support to a large number of beggars (*rank*). There is still a *garh* (fort) of Ranka estate in dilapidated condition.

21. Sukhadari

The village is situated on the river Kanhar about 35 Kms. south of Nagar Untari. It is noted for a beautiful waterfall. A fair is held annually on the eve of *Makar Sankranti*.

22. Tatha

It is located at a distance of about 51 Kms. from Daltonganj. It is noted for a hot spring, which draws a large number of visitors in the winter.

23. Daltonganj

It is a municipal town and the headquarters of the district. The town was founded in 1862 by Colonel Dalton the commissioner of Chotanagpur, after whom it has been named.

24. Netarhat

It is a hill station Mahuadanr Community Development Block and at an altitude of about 3,800 feet above the mean sea level. Apart from its natural beauty, it is noted for its beautiful sun-rise and sun-set. Natarhat town has an agriculture farm and the Netarhat Residential Public school established in 1954 which has enhanced its importance. It attracts a large number of tourists every year for whom the Tourist Department of State Government has provided a beautiful Tourist Bungalow.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook which is fairly comprehensive and uniform is among the traditional documentation of the Census Organisation. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State government publications but their compilation, processing, analysis and writting are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz., (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics. Since it took a long time in collecting the desired Administrative Statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and to the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelies efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/*hat* and communication, etc., available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centres in the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs Programme of the Planning Commission.

A new statement on civic and other amenities for each area/locality identified as slum in class I and II towns has been added. The information in this regard was collected in the year 1979. Since none of the towns in Palamu district in that year qualified as class I and class II, the details of slum was not collected from the district at all, though as per the 1981 Census Daltonganj (M) now falls in class II range. Statement IV-A relating to slums has, therefore, not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes,

literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that in the general Primary Census Abstract and the level of presentation is also identical in both the cases.

For conveniene of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those village in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdiction list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference. This has been done in order to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the State Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies.

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or tolas) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census, the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census operations since they satisfied the required following criteria :

(i) A minimum population of 5,000

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases, places of tourist interest or administrative significance have also been treated as Census towns by the Director of Census Operations.

There has not been any change in the concept of urban area since 1961. At the 1961 and 1971 Censuses, non-agricultural population mentioned in criterion (ii) above included persons engaged in livestock, forestry, fishing, etc. At the 1981 Census, however, such persons were also treated at par with agricultural population and excluded from non-agricultural population for the purpose of this criterion. Towns are further classified into the following six classes according to their population size :

Class of town		Population
I	...	1 Lakh and above (termed as city)
II	...	50,000—99,999
III	...	20,000—49,999
IV	...	10,000—19,999
V	...	5,000—9,999
VI	...	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths

or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above.

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one-member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India, according to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi

ANALYSIS OF DATA

Population, number of villages and towns

The district of Palamu, with a population of 1,917,528 persons is divided into 25 Community Development Blocks consisting of 3,266 inhabited villages (out of a total number of 3,611 villages including 29 villages which are constituent units of towns in the district) and 6 towns. With only 2.74 per cent of the total population of the State comprised within the district it ranks 22nd in the State in order of population. The following table highlights the population and the number of villages and towns of the district as also for its various development blocks :

Table 1—Population, number of villages and towns, 1981

Sl. no.	Name of Development Block	Population									Number of villages		Number of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F

25	Meral (Pipra Kalan)	84,560	43,013	41,547	84,560	43,013	41,547	...	...	...	105	101	...
	Total	**1,917,528**	**979,955**	**937,573**	**1,809,420**	**921,110**	**888,310**	**108,108**	**58,845**	**49,263**	**3,611**	**3,266**	**6**

It would be seen from the above table that among the C. D. Blocks, there is a wide range of variation in the distribution of population. Significantly, there are only 4 development blocks in the district, viz., Daltonganj, Chainpur, Bishrampur and Hussainabad which have a population exceeding one lakh. Hussainabad block has the largest population accounting for 7.76 per cent of the population of the district probably because it contains the maximum proportion of inhabited villages (7.01%)

in the district. The least populated C. D. Block is Garu with only 0.85 per cent of the population of the district presumably because it contains only 69 out of 3,266 inhabited villages (2.11%) and those also appear to be sparsely populated as compared to the villages of other C. D. Blocks. Palamu district, it may be noted, has been one of the least populous districts of the State in the earlier censuses also. This is so because considerable portion of the land area of the district is comprised of forests and hills and other types of uncultivable or unculturable land.

The average population of a block in the district is 76,701 which is much less than the average size of a block in the State as a whole (119,105). Nearly 56 per cent of the blocks (14 out of 25) have higher population than the district average indicated above and they contain as much as 72.07 per cent of the district population.

Palamu district appears to have had less impact of urbanisation since 94.36 per cent of the population lives in the villages as against the State break up of rural and urban population of 87.53 and 12.47 per cent respectively. The total urban population contained in 6 towns is only 5.64 per cent of the population of district indicating, thereby, that Palamu is comparatively backward in the race for urbanisation. Daltonganj (M) is the only class II town (population 50,000—99,999) in the district. There is neither any class I town (population 1 lakh and above) nor any urban agglomeration in the district.

Decadal change in population

Palamu district remained unaffected by the reorganisation of districts which took place during the decade 1971—81 and hence there has been no change in the administrative set-up of the district in the 1981 Census. The percentage decadal increase in the population of the district and its development blocks is presented in the table below :

Table 2—Decadal change in distribution of population

Development Block	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

Balumath	68,599	68,599	...	81,691	81,691	...	+19.08	+19.08	...
Chandwa	45,266	45,266	...	53,204	53,204	...	+17.54	+17.54	...
Garhwa	75,591	60,363	15,228	98,762	77,248	21,514	+30.65	+27.97	+41.28
Ranka	58,817	58,817	...	78,634	78,634	...	+33.69	+33.69	...
Bhandaria	26,547	26,547	...	33,929	33,929	...	+27.81	+27.81	...
Dhurki	30,736	30,736	...	40,114	40,114	...	+30.51	+30.51	...
Untari	70,772	70,772	...	91,137	91,137	...	+28.78	+28.78	...
Bhawanathpur	67,580	67,580	...	90,586	90,586	...	+34.04	+34.04	...
Majhiaon	70,125	70,125	...	89,037	89,037	...	+26.97	+26.97	...
Meral (Pipra Kalan)	66,236	66,236	...	84,560	84,560	...	+27.66	+27.66	...
Total	**1,504,350**	**1,433,793**	**70,557**	**1,917,528**	**1,809,420**	**108,108**	**+27.47**	**+26.20**	**+53.22**

It would appear that the rise in the population of this district during the 1971–81 decade has been of the order of 27.47 per cent which is more than the decadal growth rate of 24.06 per cent for the State. The rural population in the district has increased by 26.20 per cent while urban population growth over the decade has been as high as 53.22 per cent. The higher growth in urban population is in part attributable to the addition of a new town, viz., Deorikalan (CT) in the district and also due to impact of rural-urban migration.

As shall be evident from the table, the variation in growth rates is more pronounced in the development blocks. Daltonganj block has shown the highest increase in population over the decade with 43.32 per cent probably because Daltonganj town, the district headquarters, is located in this block. The next highest increase in population is observed in Bhawanathpur and Barwadih blocks with 34.04 and 33.90 per cent respectively. Percentage decadal variation has been observed to be the lowest in the case of Garu (10.14%) followed by Mahuadanr (15.67%) and Chandwa (17.54%) blocks. All the 3 blocks belong to Latehar subdivision and contains forests and hilly tracts.

The increase in rural population during 1971–81 has been the highest in the case of Bhawanathpur block (34.04%) followed by Barwadih block (33.90%). Neither of the above blocks contain any town.

As regards the growth in urban population, Hussainabad block occupies the first position (81.76%) since it contains two towns, viz., Hussainabad (NAC) and the newly added census town of Deorikalan.

Villages classified by population ranges

The distribution of villages by their population ranges is given in the following table in six size-groups :

Table 3—Distribution of villages by population ranges

Range of population	Number of villages in each range	Percentage of villages in each ranges
1	2	3
—200	899	27.53
200—499	1,094	33.50
500—1,999	1,172	35.88
2,000—4,999	95	2.91
5,000—9,999	6	0.18
10,000+	...	...
Total	**3,266**	**100.00**

It would be seen from the table that the villages in the district are mostly small-sized as the maximun number of villages in the district lie in the population range below 500 accounting for 61.03 per cent of the total number of inhabited villages in the district. Medium-sized villages (population 500–1,999 and 2,000–4,999) account for 38.79 per cent of the inhabited villages in the district. Scantily populated villages are thus much more in number than the medium-sized and large villages (population above 5,000) in the district. The large villages with population of 5,000 and more comprise only 0.18 per cent of the inhabited villages in the district. Significantly, there is no village in the district having population of 10,000 persons or more. It may be of interest to note that in the 1971 Census the average population size of a village in the State was 751 whereas in the Palamu District it was as low as 446. The average population size of an inhabited village in the district of palamu, as per the 1981 Census, works out to 554 which is still much lower than the State average of 906.

Villages classified by density

The density of population is defined as number of persons per square kilometre It indicates the extent of crowding in a particular area. The distribution of villages in the district by their density is given below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	95	2.91
11—20	91	2.79
21—50	348	10.66
51—100	541	16.56
101—200	696	21.31
201—300	457	13.99
301—500	507	15.52
501+	519	15.89
Not known	12	0.37
Total	**3,266**	**100.00**

The data presented in the above table highlight the fact that there are only 519 villages in the district which have a density exceeding 500 persons per sq. km. Such villages constitute 15.89 per cent of the total inhabited villages. A further analysis

of the pattern of density at the village level reveals that the largest group of 696 villages constituting 21.31 per cent of the total inhabited villages fall in the category of density between 101–200 persons per sq. km. In the next lower density range of 51–100 persons per sq. km. there are 541 inhabited villages or say 16.56 per cent of the total inhabited villages which is the next largest group. There are 186 villages (5.70%) in the district which are very thinly populated having a density of population below 20 persons per sq. km.

It can, therefore, be said that thinly populated villages in the district are considerable in number. It has already been observed in Table 3 that the villages of the district are generally of a small size.

Proportion of Scheduled caste/Tribe population in villages and Towns.

Tables 5, 6 and 7 furnished below indicate the proportion of the population of the Scheduled Castes and Scheduled Tribes in the villages and towns of the district. This will be helpful for formulating plans for the welfare of the Scheduled Castes and Scheduled Tribes at micro-level, particularly, in relation to area development oriented programmes. The tables have been dealt with separately :

Table 5 –Proportion of Scheduled Castes population to total population in the villages.

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	544	16.66
5 or less	278	8.51
6–10	234	7.17
11–15	250	7.65
16–20	289	8.85
21–30	522	15.98
31 and above	1,149	35.18
Total	**3,266**	**100.00**

It is discernible from the table that there are 1,149 villages (35.18%) where the proportion of Scheduled Caste population to total population is more than 31 per cent which coincidentally also happens to be largest group of villages is any of the percentage ranges of Scheduled Caste population to total population. There are 544 villages accounting for 16.66 per cent of the total inhabited villages which do not have any population of the scheduled castes at all. It may further be seen that scheduled caste population is almost evenly distributed in rest of the villages (exception being the percentage range of 21–30 where there are 15.98% of villages) :

Table 6 –Proportion of Scheduled Tribes population to total population in the villages.

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	1,482	45.38
5 or less	300	9.19
6–15	212	6.49
16–25	133	4.07
26–35	162	4.96
36–50	199	6.09
51 and above	778	23.82
Total	**3,266**	**100.00**

Palamu lies in the tribal belt of Bihar and the Scheduled Tribes comprise 18.33 per cent of the district population (vide table 10). Interestingly, 778 villages accounting for 23.82 per cent of the inhabited villages, are such where the Scheduled Tribe population exceeds 50 per cent of the total population which also happens to be the largest group of villages in any of the percentage ranges of Scheduled Tribe population to total population. It is, however, significant that 1,482 villages constituting 45.38 per cent of the total inhabited villages do not have any Scheduled Tribe population at all :

Table 7—Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name of town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6
Daltonganj	51,952	3,796	1,241	7.31	2.39
Deorikalan	4,758	1,009	21	21.21	0.44
Garhwa	21,514	2,385	703	11.09	3.27
Hussainabad	14,441	3,094	16	21.43	0.11
Latehar	12,535	2,711	1,164	21.63	9.29
Netarhat	2,908	33	1,749	1.13	60.14
All Towns	**108,108**	**13,028**	**4,894**	**12.05**	**4.53**

The table on previous page indicates that the proportion of Scheduled Caste population in the towns of Palamu district is of the order of 12.05 per cent of the total population as against 25.71 per cent in the rural areas (Table 10). Low urban concentration of the Scheduled Castes denotes lower mobility and the predominantly rural base of the economy of the district. Deorikalan, Hussainabad and Latehar towns contain almost equal proportion of Scheduled Caste population to their total population, the percentage being a little over 21 in all the cases. In Netarhat town, on the other hand, the Scheduled Caste constitute only 1.13 per cent of the total population.

The urban content of the population of the Scheduled Tribes is very low, being 4.53 per cent as against 19.15 per cent of the total population in rural areas (Table 10). In different towns of the district also, it is observed that the Scheduled Tribe population comprises less than 10 per cent of the total population except in the case of Netarhat town where the Scheduled Tribe members constitute as much as 60.14 per cent of its total population.

Literacy rates by population ranges of villages and towns

According to the Census terminology, a person who was able to read and write in any language with understanding was treated as literate. While Table 8 below gives the literacy rates of villages classified by population ranges. Table 9 shows literacy rates of towns in the district. The table have been presented and discussed separately.

Table 8—Literacy rates by population ranges of villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	899	15.06
200—499	1,094	16.90
500—1,999	1,172	17.75
2,000—4,999	95	22.33
5,000—9,999	6	39.37
10,000+	...	...
Total	**3,266**	**18.51**

It would be seen from the table above that literates form 18.51 per cent of the total population in the rural areas of the district as against 52.22 per cent in the urban areas (Table 9). In the rural areas, it is interesting to note that the literacy rate varies directly in relation to the population range of the villages. The highest literacy rate can be seen for the villages in the population range of 5,000—9,999 with 39.37 per cent being literates (there is no village with a population of 10,000 or more). The lowest literacy rate is observed in the lowest population range of less than 200 with only 15.06 per cent being literates. It, therefore, follows that generally the bigger the village the higher is the literacy percentage. Perhaps, because of their higher population enducational facilities were provided in these villages earlier than in the smaller ones.

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Daltonganj	63.68
Deorikalan	46.51
Garhwa	40.71
Hussainabad	38.09
Latehar	45.19
Netarhat	42.30
All Towns	**52.22**

Among the towns, Daltonganj, being the district headquarters, has obviously the highest proportion of leterate population, the percentage being 63.68. In rest of the towns the literacy rate varies from the minimum of 38.09 per cent (Hussainabad town) to a maximum of 46.51 per cent (Deorikalan town).

It is also noteworthy that the literacy rate in urban areas of Palamu is nearly three times that of rural areas. The lower literacy rate in rural areas has been mainly responsible for pulling down the overall literacy rate of the district.

Workers and Non-workers in rural and urban areas of the district

The table gives the percentage break up literates, main workers, marginal workers, total workers, non-workers and the proportion of the Scheduled Castes and Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks in relation to tolal population.

Table 10—Literates, Workers, Non-workers, Scheduled Castes/

Total workers in the district of Palamu account for 35.48 per cent of the total population where as the proportion of non-workers is as high as 64.52 per cent. Main workers (i. e., those who had worked for 6 months or 183 days or more during the reference period of one year) constitute 32.35 per cent of the total population which is quite close to the percentage of the total workers in the district. It is implied that participation of the people in economically productive work in the district is mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very low in the district, being only 3.13 per cent. The same trend can be observed in both the rural and urban areas of the district as also in majority of its development blocks.

There is apparently a wide range of differance between the two sexes in the proportion of workers including main workers. The proportion of total workers and main workers is 51.46 and 50.47 per cent respectively for males as against 18.78 and 13.42 per cent respectively for females which indicates that the participation of females in economically productive work is very low.

Another notable feature is the higher percentage of female marginal workers (5.36%) vis-a-vis male marginal workers (0.99%) in the district. It may be due to the fact that a part from household duties the females do some work for the day or the season to supplement the household income. It can be seen that except in one or two urban cases the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the precentage of workers to the total population is higher in the rural areas (36.03%) than in the urban areas (26.34%). The same pattern is perceptible in the case of main workers as well as the marginal workers who constitute 32.77 and 3.26 per cent respectively of the rural population but only 25.33 and 1.01 per cent respectively of the urban population. The same observation holds good separately for both the sexes also. This may be due to the fact that a considerable proportion of the males in urban areas consists of students, job-seekers and retired persons who are generally non-workers. The females in urban areas also have very little scope of work in household industry and other works. The lower rate of female participation in work in the urban areas is attributable of limited urban development which offers extremly limited short term job opportunities. All these factors combined depress the participation rates in the urban areas considerably.

Villages distributed according to availability of different amenities.

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited village	Number (with percsntage) of villages having one or more of the following amenities

22	Untari	128	67(52.34)	3(2.34)	128(100.00)	10(7.81)	8(6.25)	38(29.69)	51(39.84)	46(35.94)
23	Bhawanathpur	78	69(88.46)	8(10.26)	78(100.00)	18(23.08)	6(7.69)	19(24.36)	9(11.54)	9(11.54)
24	Majhiaon	155	84(54.19)	5(3.23)	155(100.00)	10(6.45)	12(7.74)	9(5.81)	5(3.23)	5(3.23)
25	Meral (Pipra Kalan)	101	62(61.39)	21(20.79)	101(100.00)	15(14.85)	6(5.94)	31(30.69)	17(16.83)	2(1.98)
	Total	3,266	1,871(57.29)	283(8.67)	3,266(100.00)	274(8 39)	208(6.37)	466(14.27)	447(13.69)	541(16.56)

Educational amenity—There are as many as 1,871 villages accounting for 57.29 per cent of the total number of inhabited villages (3,266) in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Bhawanthpur with 88.46 per cent of its villages having this facility. It is followed by Balumath and Chandwa blocks with 77.65 and 75.00 per cent respectively. The lowest number of such villages is in the development block of Manatu where 35.76 per cent of its villages have the facility of education.

Medical amenity—The availability of medical amenity in the villages is very low as only 8.67 per cent of inhabited villages have got it. Among the development blocks, Hariharganj has the highest proportion of villages with medical facility, the percentage being 30.23. This is followed by Balumath and Meral (Pipra Kalan) blocks with 24.12 and 20.79 per cent of their villages enjoying this facility. Garhwa block, on the other hand, has only 2 out of 70 inhabited villages (1.64%) where any kind of medical facility is available.

Drinking water—It would be seen from the table that one source of drinking water facility (potable) or other is available in all the inhabited villages of the district of Palamu.

Post and telegraph—Postal facilities (post and telegraph) are available in 274 villages (8.39%) out of a total of 3,266 inhabited villages in the district. Bhawanathpur block again has the maximum proportion of its villages having post and telegraph facilities (23.08%) followed by Meral (Pipra Kalan) (14.85%) and Bishrampur (13.04%) blocks. Latehar block has the least proportion of villages having postal facilities (4.46%). In the remaining development blocks of the district the proportion varies from a minimum of 5.14 per cent (Panki block) to a maximum of 12.24 per cent (Mahuadanr block).

Market/hat—The villages where market/*hat* is held constitute only 6.37 per cent of the total number of inhabited villages in the district. Barwadih block has the maximum proportion of inhabited villages where market/*hat* is held, the percentage being 13.58, followed by Chandwa and Balumath blocks, with 10.71 and 10.59 per cent respectively. As shall be evident from the table there are as many as 7 development blocks in the district where market/*hat* facility is available in even less than 5 per cent of the villages, the least being in the case of Hussainabad block with only 0.87 per cent of its villages having market/*hat* facility.

Communications—The details of villages connected by bus, rail, navigable river/canal services etc. have been incorporated in the Village Directory.

Only 14.27 per cent of the total inhabited villages in the district are connected by one means of communication or the other. The majority of villages still do not have this facility. Daltonganj block has the highest proportion of villages (35.71%) which are connected by bus or rail or navigable river/canal services etc. followed by Meral (Pipra Kalan) block with 30.69 per cent of villages having one means of communication or the other. Chainpur and Manatu blocks have only 2 (1.21%) and 5 (3.03%) villages respectively having communication facility. It is clear that these two blocks are very much undeveloped so far as facilities of communication are concerned.

Approach road to villages—With only 13.69 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Daltonganj with 51.43 per cent of its villages having *pucca* approach roads tops the list followed by Untari and Hariharganj blocks with 39.84 and 25.58 per cent villages respectively having this facility. The development blocks which have the lowest proportion of villages having this facility are Chainpur (0.61%) Manatu (1.21%) and Majhiaon (3.23%). The development blocks which have a larger proportion of their villages having *pucca* approach roads have better communication facility also as observed from colmun 9 of the table.

Powet supply—Electrified villages in the district constitute only 16.56 per cent of the total inhabited villages. Power suply in these villages is utilised for either domestic or agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Hussainabad development block occupies the first position having the maximum proportion of electrified villages (53.71%) followed by Hariharganj and Bishrampur blocks with 47.29 and 40.10 per cent electrified villages respectively. The lowest proportion of villages having power supply is observed in the development blocks of Meral (Pipra Kalan) (1,98%). Ranka (2.11%) and Majhiaon (3.23%). It is a significant to note that the development blocks of Garu, Mahuadanr and Bhandaria do not have any village with power supply. One probable explanation could be that considerable areas in these C. D. blocks are covered by forests and hills.

Proportion of rural population served by various amenities.

While in Table 11 we have discussed details regarding the number of villages possessing educational, medical and other amenities, Table 12 below gives the proportion of rural population served by these amenities :

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post and Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Daltonganj	61,533	93.07	15.19	100.00	36.79	23.92	54.92	55.16	55.91
2	Chainpur (Bashandi)	102,249	82.82	11.85	100.00	20.38	15.33	5.53	3.27	18.66
3	Bishrampur	129,216	85.41	14.17	100.00	34.86	18.03	28.80	22.53	53.08
4	Hussainabad	129,560	83.63	18.09	100.00	20.09	8.60	16.07	14.97	67.01
5	Hariharganj	50,753	73.56	44.68	100.00	20.39	18.85	28.01	45.66	68.10
6	Chhatarpur	99,507	76.47	12.21	100.00	19.54	11.53	17.51	17.32	13.83
7	Patan	94,631	79.56	13.21	100.00	19.54	17.44	30.39	23.89	28.16
8	Manatu	61,349	60.72	11.40	100.00	13.56	21.82	8.19	1.65	11.25
9	Panki	79,714	70.40	15.28	100.00	23.77	24.17	33.41	28 51	17.90
10	Leslieganj	63,057	84.21	5.83	100.00	12.78	14.11	9.94	14.62	28.60
11	Latehar	57,251	65.18	14·80	100.00	12.38	10.41	5.03	6,72	18.07
12	Garu	16,379	72.07	25.63	100.00	12.58	12.00	10.93	12.05	...
13	Mahuadanr	44,015	75·55	22.05	100.00	21.53	3.91	10.84	16.11	...
14	Barwadih	52,992	90.52	33.37	100.00	30.43	38.46	34.52	38.73	20.00
15	Manika	47,074	79.14	21.25	100.00	23.93	19.69	28.44	23.18	10.62
16	Balumath	81,691	93.24	33.17	100.00	27.02	26.95	30.99	21.06	11.08
17	Chandwa	53,204	92.88	21.28	100.00	19.25	32.99	32.90	38.79	30.79
18	Garhwa	77,248	77.70	2.61	100.00	13.86	5.71	26.40	16.01	29.81
19	Ranka	78,634	89.30	17.08	100.00	23.88	23.17	26.30	15.24	6.58
20	Bhandaria	33,929	84.44	17.16	100.00	10.97	11.32	19.82	18.40	...
21	Dhurki	40,114	92.88	16.65	100.00	15.85	13.71	26.86	16.17	16.19
22	Untari	91,137	76.14	8.85	100.90	20.30	17.54	37.78	44.14	47.09
23	Bhawanathpur	90,586	97.02	23.88	100.00	43.81	14.98	35.89	19.96	20.51
24	Majhiaon	89,037	78.27	7.03	100.00	12.58	12.85	7.42	4.13	4.78
25	Meral (Pipra Kalan)	84,560	90.06	33.99	100.00	33.44	20.17	40.21	25.75	1.54
	Total	**1,809,420**	**82.25**	**17.38**	**100.00**	**22.86**	**17.29**	**24.64**	**21.27**	**26.32**

It would be seen that educational facility is available to 82.25 per cent of the rural population in the district. In Bhawanathpur block, the maximum proportion of rural population is served by the facility of education, the percentage being 97.02 closely followed by Balumath and Daltonganj blocks with 93.24 and 93.07 per cent rural population respectively enjoying this facility. There are only two development blocks in the district viz., Manatu (60.72%) and Latehar (65.18%) where the proportion of rural population served by the facility of education is less than 70 per cent. It may be of interest to note that the proportion of villages in the district enjoying educational facility is less being 57.29 per cent (vide Table 11) than the proportion of population which is as high as 82.25 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 17.38 per cent which is just double the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at different distance ranges.

The table indicates the number of villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms. 5—10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5—10 Kms.	10+Kms.	Total (colums 2—4)
1	2	3	4	5
1. Education	1,315	71	9	1,395
2. Medical	1,633	924	426	2,983
3. Drinking water	...	...	...	...
4. Post & Tele-graph	2,062	720	210	2,992
5. Market/*Hat*	1,710	981	367	3,058
6. Communication	1,278	816	706	2,800

As regards educational facility it would be seen that there are 1,395 inhabited villages (42.71%) in the district which do not have educational facility but the facility is available at places situated within 5 Kms., 5—10 Kms. and also beyond 10 Kms. The number of villages having no educational facility within the village itself but enjoying this facility within 5 Kms. is 1,315 (40.26%) and that of villages having such facilities within a distance 5—10 Kms. is 71 (2.17%) whereas beyond 10 Kms. the number of such villages is only 9 (0.28%). The number of villages having other facilities within a distance of 5—10 Kms. and 10+Kms. is less than those having the facilities within 5 Kms. though not in the same proportion. It follows, therefore, that people belonging to the majority of villages do not have to travel for more than 10 Kms. to avail themselves of various facilities.

Availability of different amenites in the villages according to the distance from the nearest town.

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five distance ranges :

Tabe 14—Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in Kms.)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	125	69(55.20)	6(4.80)	125(100.00)	10(8.00)	4(3.20)	23(18.40)	18(14.40)	47(37.60)
6—15	581	314(54.04)	32(5.51)	581(100.00)	42(7.23)	18(3.10)	70(12.05)	69(11.88)	162(27.88)
16—50	1,968	1,162(59.04)	201(10.21)	1,968(100.00)	175(8.89)	151(7.67)	310(15.75)	310(15.75)	275(13.97)
51+	592	326(55.07)	44(7.43)	592(100.00)	47(7.94)	35(5.91)	63(10.64)	50(8.45)	57(9.63)
Unspecified	...	...	...	...	...	...	...	...	...
Total	3,266	1,871(57.29)	283(8.67)	3,266(100.00)	274(8.39)	208(6.37)	466(14.27)	447(13.69)	541(16.56)

It would appear from the Table on previous page that the maximum number of inhabited villages lie in the distance range of 16—50 Kms. (60.26%) from the nearest town followed by those situated at a distance of more than 50 Kms. (18.12%). There are only 125 villages which are located at a distance within 0 -5 Kms. from the nearest town (3.83%).

Amenities such as education, medical, post & telegraph, market/*hat* and *pucca* approach road are available in majority of the villages, which are situated within a distance of 16—50 Kms from the nearest town. On the other hand, communication and power supply facilities are available in the major proportion of villages in the distance range of less than 5 Kms. from the nearest town.

It may also be seen from the table that the proportion of villages having the facility of power supply decreases with the increase in the distance range from the nearest town. It can be said that the villages which are nearer to the urban areas have benefited in respect of communication and power supply facilities vis-a-vis those rural pockets which are beyond the pale of direct urban influence.

As has been observed earlier, drinking water facility is available in all the villages in the district.

Villages according to population ranges and amenities available.

The table given below furnishes information regarding distribution of villages having different amenities by the size-class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post & Telegraph	Market/ *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
—499	1,993	730(36.63)	92(4.62)	1,993(100.00)	38(1.91)	37(1.86)	190(9.53)	205(10.29)	229(11.49)
500—1,999	1,172	1,043(88.99)	148(12.63)	1,172(100.00)	172(14.68)	120(10.24)	223(19.03)	196(16.72)	264(22.53)
2,000—4,999	95	92(96 84)	37(38.95)	95(100.00)	58(61.05)	46(48.42)	48(50.53)	41(43.16)	44(46.32)
5,000+	6	6(100.00)	6(100.00)	6(100.00)	6(100.00)	5(83.33)	5(83.33)	5(83.33)	4(66.67)
Total	**3,266**	**1,871(57.29)**	**283(8.67)**	**3,266(100.00)**	**274(8.39)**	**208(6.37)**	**466(14.27)**	**447(13.69)**	**541(16.56)**

The maximum number of inhabited villages are in the population range upto 499 (61.02%) in the district. Thereafter the proportion of villages decreases with the increase in the population range and only 6 inhabited villages (0.18%) have a population of 5,000 or above.

It may be of interest to note that the proportion of inhabited villages having various amenities varies in direct relation to their population range. Thus the higher the population range the larger is the percentage of villages having various amenities which further corroborates the fact that more facilities are generally available in the larger villages than in the smaller ones.

Main staple food in the villages

The table alongside indicates the staple food which is consumed by the majority of population of the villages during the major portion of the year.

Table 16—Main staple food in the majority of villages in each Development Block

Sl. no.	Name of Development Block	Main staple food
1	2	3
1	Daltonganj	Rice, wheat
2	Chainpur (Bashandi)	Rice, maize
3	Bishrampur	Rice, wheat
4	Hussainabad	Rice, wheat
5	Hariharganj	Rice, maize
6	Chhatarpur	Rice, maize
7	Patan	Rice, wheat
8	Manatu	Rice, maize
9	Panki	Rice, maize
10	Leslieganj	Rice, wheat
11	Latehar	Rice, maize
12	Garu	Rice, maize
13	Mahuadanr	Rice, maize
14	Barwadih	Rice, maize
15	Manika	Rice, maize
16	Balumath	Rice, maize
17	Chandwa	Rice, maize
18	Garhwa	Rice, maize
19	Ranka	Rice, maize
20	Bhandaria	Rice, maize
21	Dhurki	Rice, maize
22	Untari	Rice, maize
23	Bhawanathpur	Rice, wheat
24	Majhiaon	Rice, wheat
25	Meral (Pipra Kalan)	Rice, maize

It can be seen that rice and maize constitute the main staple food of the people in majority of villages in 18 out of 25 development blocks whereas in the remaining 7 development blocks rice and wheat happens to be the main staple food of the population in the majority of villages.

Villages according to land use

The land utilisation data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place.

The following table gives the percentage of culturable area as also the proportion of irrigated area to the total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to land use

Sl. no.	Name of Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Daltonganj	70	18,558.44	56.66	16.01
2	Chainpur (Bashandi)	165	62,352.67	44.77	10.16
3	Bishrampur	207	57,014.38	55 30	16 05
4	Hussainabad	229	40,683.40	69.35	22.78
5	Hariharganj	129	15,454.08	63.92	30.13
6	Chhatarpur	216	61,220.06	43.48	14.38
7	Patan	170	37,805.84	60.27	20.05
8	Manatu	165	44,196.68	33.83	18.07
9	Panki	175	39,727.98	50.00	21.27
10	Lesliganj	135	22,990.80	68.07	21.35
11	Latehar	157	44,170.79	46.37	10.05
12	Garu	69	21,971.44	29.18	6.17
13	Mahuadanr	98	60,822.25	18.26	6.09
14	Barwadih	81	43,257.13	27.73	8.17
15	Manika	94	37,264.79	36.44	7.11
16	Balumath	170	93,641.02	36.55	8.21
17	Chandwa	84	58,680.07	34.58	6.09
18	Garhwa	122	28,728.33	74.85	11.80
19	Ranka	142	93,038.80	37.53	2.35
20	Bhandaria	73	65,127.50	17.71	4.76
21	Dhurki	53	37,263.32	42.39	5.38
22	Untari	128	36,131.88	42.02	20.37
23	Bhawanathpur	78	58,060.12	39.62	13.65
24	Majhiaon	155	40,238.59	55.13	16.57
25	Meral (Pipra Kalan)	101	39,499.19	67.96	19.22
	Total	3,266	1,157,899.55	42.92	13.42

It would be seen from the table that 42.92 per cent of the total area of the district is cultivable and of this 13.42 per cent land is irrigated. It may be mentioned that the term cultivable as used in Table 17 includes culturable waste, land under miscellaneous tree crops and groves, permanent pastures and grazing lands, other fallows and cultivated lands. Among the C. D. Blocks, the highest proportion of cultivable area is observed to be in Garhwa block with 74.85 per cent closely followed by Hussainabad and Lesliganj blocks with 69.35 and 68.07 per cent respectively. The lowest cultivable

area is found in Bhandaria and Mahuadanr blocks with 17.71 and 18.26 per cent of land brought under cultivation which may be attributable to the fact that large chunks of areas in these blocks are covered by forests and hills.

The highest proportion of irrigated area to the total cultivable area is observed in the case of Hariharganj block which also is as low as 30.13 per cent followed by Hussainabad and Leslieganj blocks accounting for 22.78 and 21.35 per cent respectively. The proportion of irrigated area is found to be the lowest in the case of Ranka, Bhandaria and Dhurki blocks with 2.35, 4.76 and 5.38 per cent of total cultivable area under irrigation. The low proportion of irrigated area is presumbly an account of failure or premature cessation of rainfall which also results in failure of the main source of irrigation. Palamu district, infact, is supposed to be a drought-prone district. However, now steps have been taken to improve the irrigation facilities in the district and also popularize dry-farming since the irrigation potential in the district is li.nited.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the censuses from 1951 together with the percentage variation over the decades is indicated in Table 18 below. It also shows the variation in density and sex-ratio in the urban population of the district in relation to state.

Table 18—Growth, Density and Sex-ratio of urban population in the district in relation to the State

Census year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. Km.)	Sex-ratio (no. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. Km.)	Sex-ratio (no. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	985,767	37,007	3.75	+63.35	1,082	853	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	1,187,789	56,164	4.73	+51.77	858	830	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	1,504,350	70,557	4.69	+25.63	1,173	842	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	1,917,528	108,108	5.64	+53.22	1,556	837	69,914,734	8,718,990	12.47	+54.76	2,727	832

The total urban population of the district, as per the 1981 Census, is 108,108 comprising 5.64 per cent of the district population. The corresponding percentage for the State is 12.47. The rate of urbanisation of the district has apparently not kept pace with that of the State. The increase in urban population of the district has been rather tardy over the decades, the proportion of urban population content having risen from 3.75 per cent in 1951 to 5.64 per cent in 1981. It is siginificant to note that this district, even now, is less urbanised as compared to other districts of State.

However from colmun 5 of the table, it can be seen that the decadal growth rate in urban population of the district has been quite high and has not shown a very uneven trend in the successive Censuses in the district except during 1961—71 when the urban growth rate came down to 25.63 per cent. The addition of one town (Hussainabad) in 1951, two towns (Latehar and Netarhat) in 1961 and one town (Deorikalan) in 1981 in the district might be one of the reasons for high growth rates in 1941—51, 1951—61 and 1971—81. In the 1971 Census, however, the position of towns in the district remained unchanged, hence the growth rate over 1961 71 was comparatively low. The trend of growth of the urban population in the State has been different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 43.95 per cent. Again during 1971—81 it has registered an increase of 54.76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades.

The density of population in the urban areas of the district has always remained low as compared to the density of population in the urban areas of the State. This also corroborates the fact that the

towns of this district are still less urbanised and the movement of population from rural to urban areas is also very little.

Sex-ratio is determined by the number of females per 1,000 males. The sex-ratio for the urban area of Palamu district has all along been high as compared to the urban area of the state but still has been adverse for females over the decadees. The urban areas, infact, still suffer from a shortage of females as the towns attract mainly the male population by way of employment opportunities and the female population continues to live in the village because the people having agriculture as the main occupation and their moorings in villages do not migrate as a complete family unit. Higher cost of living in urban areas is another factor that discourages the people from shifting the entire family to the urban areas.

Towns added and declassified in 1981

There are 6 towns viz., Daltonganj (M), Hussainabad (NAC), Latehar (NAC), Netarhat (CT), Garhwa (NAC) and Deorikalan (CT) in the district of Palamu. Deorikalan is the only town (Census town) which has been added in the 1981 Census as per the details given in the following table.

Table 19—New Town/Towns declassified in 1981 Census

Name of Town	Population 1981 Census
1	2
(*a*) *Added*—	
(i) Deorikalan	4,758
(*b*) *Declassified*—	
Nil	Nil

No town has, however, been declasified in the present Census.

Receipt and expenditure in different towns

The table below gives the details of finances in the urban local bodies in terms of per capita receipt and expenditure :

Table 20—Per capita receipt and expenditure in towns

Class, name & civic status of the town	Per capita								
	Receipt (in rupees)				Expenditure (in rupees)				
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
II—Daltonganj (M)	11.35	1.34	10.01	9.13	0.46	...	1.15	...	7.52
VI—Deorikalan (CT)	...	...	...	...	...	...	...	...	...
III—Garhwa (NAC)	8.02	2.28	5.74	6.09	0.88	3.68	...	...	1.53
IV—Hussainabad (NAC)	1.29	0.07	1.22	2.60	2.56	0.01	0.03	..	...
IV—Latehar (NAC)	...	...	...	...	...	...	...	...	...
VI—Netarhat (CT)	...	...	...	...	...	...	...	...	...
Total	**7.22**	**1.10**	**6.12**	**5.95**	**0.74**	**0.74**	**0.55**	...	**3.92**

It would be apparent from the above figures that the per capita total receipt is Rs. 7.22 in the urban areas of Palamu district whereas the per capita total expenditure works out to Rs. 5.95. Among different towns, the per capita total receipt is the highest in the case of Daltonganj (M), the district headquarters. Going into further details one can see that while receipt through taxes is the highest in the case of Garhwa (NAC), receipt through all other sources is the maximum in the case of Daltonganj town.

Per capita total expenditure is again the highest in the case of Daltonganj (M). Except in the case of expenditure on general administration in which Hussainabad town tops the list, on all other counts Daltonganj town is on the forefront. It may be noted that expenditure on public institutions is absolutely nil in all the towns.

Schools per ten thousand population in towns

Primary and middle school facilities are generally available in all towns. The following table

gives the details of different categories of educational institutions per ten thousand population in different towns of the district.

Table 21—Schools per ten thousand population in towns

Class, name and civic status of the town	Number per ten thousand population			
	Higher Secondary /Inter/ PUC/ Junior College	Secondary/ Matri-culation	Junior Second-ary/ Middle	Primary
1	2	3	4	5
II—Daltonganj (M)	0.19	1.35	2.69	5.58
VI—Deorikalan (CT)	...	2.10	2.10	2.10
III—Garhwa (NAC)	0.46	1.39	2.79	1.86
IV—Hussainabad (NAC)	...	0.69	2.08	1.38
IV—Latehar (NAC)	...	1.60	8.78	2.39
VI—Netarhat (CT)	...	6.88	...	3.44
Total	**0.19**	**1.48**	**3.24**	**3.70**

It would be seen from the above table that institutions such as Higher Secondary/Inter/PUC/Junior College exist in only two towns viz., Daltonganj (M), the district headquarters and Garhwa (NAC), the headquarters of Garhwa subdivision. As regards Secondary/Matriculation level schools, there are, on an average, 6.88 schools per ten thousand population located in Netarhat town which is the highest. Netarhat town has a famous residential school run by the State Government. Junior Secondary/Middle Schools are the maximum in the case of Latehar (NAC). The district headquarters of Daltonganj has, however, the highest number of primary schools per ten thousand population. The average number of primary schools in the urban areas of the district is 3.70 per ten thousand population.

Beds in medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns of the district.

Table 22—Number of beds in medical institutions in towns

Class, name and civic status of the town	Number of beds in medical institutions per 1,000 population
1	2
II—Daltonganj (M)	2.31
VI—Deorikalan (CT)	1.26
III—Garhwa (NAC)	2,73
IV—Hussainabad (NAC)	0.48
IV—Latehar (NAC)	1.99
VI—Netarhat (CT)	2.06
Total	**2.05**

The number of beds in medical institutions per 1,000 population for urban areas of the district works out to 2.05. The availability of beds in the hospitals is the highest in the case of Garhwa town, the subdivisional headquarters (2.73).

Slum population in Towns

The details of slums have been collected only in the case of class I (population 1 lakh and above) and Class II (population 50,000—99,999) towns as existing in the year 1979 (based on 1971 Census figures). Relevant information was gathered through the local officials of the Municipal Corporations, Municipalities, NACs as also through the Planning Department of State Government. Since none of the 6 towns of Palamu district qualified as class I or class II in the year 1979, the information regarding slums was not collected from this disrtict at all. However, as per the 1981 Census Daltonganj (M) now qualifies as class II town. Table 23 relating to slums has therefore, not been prepared for this district.

Important commodities imported, exported and manufactured.

The table below indicates the most important commodities manufactured, exported and imported in 6 towns of the district.

Table 24—Most important commodities manufactured, imported and exported in town

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
II—Daltonganj (M)	Bambooware	Timber	Rice
VI—Deorikalan (CT)	Cement	Cement	Rice
III—Garhwa (NAC)	Biscuits	Lac	Food Stuff
IV—Hussainabad (NAC)	Blanket	Groundnut	Rice
IV—Latehar (NAC)	...	Wood	Rice
VI—Netarhat (CT)	...	...	Rice

The most important commodity manufactured in Daltonganj town is bambooware while timber is the most important commodity exported from this town to other places. In Deorikalan Census town, the chief item manufactured and exported to other places is cement.

It may further be seen that the most important item manufactured and the most important commodity exported are not always the same in the remaining 5 towns of the district

DISTRICT CENSUS HANDBOOK
PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Bl ck (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col. 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col. 9), rail/road or other communication facilities (col. 10) and power supply (col. 13). Other items of information such as copies of newspapers coming in the villages, motor cycle/scooter, car, jeep and tractor available in the vallage, etc., have been incorporated in the "Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of *Mauzawar* Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as education or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz., '(- 5 Kms.)', '(5–10 Kms.)' and '(10 + Kms.)'. The nearest place may lie in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the availability of dispensaries/community health worker has been taken as the most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc., have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exits.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterways, etc. (column 10) and whether the village is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the

Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows :

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area shown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows.
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b).

The concepts of land use pattern are explaind below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, *e. g.*, rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc. Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category. Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category. Lands under miscellaneous tree crops, thatching grass, bamboo bushes and other groves used for fuel, etc., which are not included under 'orchards' are classed under this category.

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows.

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in columns 15 to 19 have been presented in hectares upto two places of the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares.

It will be seen that the total area under different land uses as indicated in columns 15 to 19 does not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., is generally not included in the land use statistics of the village.

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise.

Following is the list of abbreviations used in the Village Directory :

(i) *Column 5 —Educational*

P	...	Primary or Elementary school (upto class IV)
M	...	Middle or Junior secondary school (upto class VIII)
H	...	Matriculation or Secondary school (upto class X)
PUC	..	Higher Secondary, Intermediate, Pre-University, Junior College.
C	...	College
I	...	Industrial School
Tr	...	Training School
Ac	...	Adult Literacy Class/Centre
O	...	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column 6 —Medical*

H	...	Hospital
MCW	...	Maternity and Child Welfare Centre
MH	...	Maternity Home
CWC	...	Child Welfare Centre
HC	...	Health Centre
PHC	...	Primary Health Centre
PHS	..	Primary Health Sub-Centre
D	...	Dispensary
FPC	...	Family Planning Centre
TB	...	T. B. Clinic
NH	...	Nursing Home
RP	...	Registered Private Practitioner
SMP	...	Subsidised Medical Practitioner
CHW	...	Community Health Worker
O	...	Others

(iii) *Column 7 —Drinking Water*

T	...	Tap Water
W	...	Well Water
Tk	...	Tank Water
TW	...	Tube-well Water
Hp	...	Handpump
R	...	River Water
F	...	Fountain
C	...	Canal
L	...	Lake
S	...	Spring
N	...	*Nullah/Nalla/Nallah*
O	...	Others
NA	...	Information Not Available

(iv) *Column 8 —Post and Telegraph*

PO	...	Post Office
TO	...	Telegraph Office
PTO	...	Post and Telegraph Office
Phone	...	Telephone Connection

(v) *Column 10—Communications*

BS	...	Bus
RS	...	Railway Station
NW	...	Navigable Waterway (including river, Canal, backwaters, etc.)

(vi) *Column 11—Approach to Village*

PR	...	*Pucca* Road
KR	...	*Kutcha* Road
NR	...	Navigable River
NC	...	Navigable Canal
NW	...	Navigable Waterway (other than river or Canal)
FP	...	Foot Path

(vii) *Column 13—Power Supply*

ED	...	Electricity for Domestic purpose
EAg	...	Electricity for Agriculture purpose
EO	...	Electricity for Other purposes like industrial, commercial, etc.
EA	...	Electricity for All purposes listed above.

(viii) *Column 16—Irrigated by source*

GC	...	Government Canal
PC	...	Private Canal
W	...	Well (without electricity)
WE	...	Well (with electricity)
TW	...	Tube-well (without electricity)
TWE	...	Tube-well (with electricity)
Tk	...	Tank
R	...	River
L	...	Lake
Wf	...	Waterfall
O	...	Others

(ix) *Column 20—Remarks*

N	...	Copies of Newspapers coming in the village.
M	...	Motor Cycles/Scooters available in the village.
C	...	Cars/Jeeps available in the village
T	...	Tractors available in the village

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5,6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20.

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and the number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc. post and telegraph offices, power supply, railway station, bus stops, etc., and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i. e., place treated as town only for Census purposes) the area under forest, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation.

Appendix III

This appendix gives, development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) : 0–5, 6–10, 11–15, 16–20, 21–30, and 31 and above.

For the Scheduled Tribes (Part B) : 0–5, 6–15, 16–25, 26–35, 36–50, and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes and Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—DALTONGANJ

AMENITIES AND

Serial no.	Name of village with Thana no.	Total area of the village (in hectares)	Total population and number of house-holds	Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms., 5—10 kms. and 10+kms., of the nearest place where the facility is available is given].

Town Directory

SECTION II–TOWN DIRECTORY

The town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (I) Status and growth history; (II) Physical aspects and location of towns, 1979; (III) Municipal finance, 1978–79; (IV) Civic and other amenities in towns (IV-A) Civic and other amenities in Notified Slums; (V) Medical, educational, recreational and cultural activities; and (VI) trade, commerce, industry and banking, 1979.

For presentation of data, all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration are indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town are furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally.

For such places as are treated as outgrowths of a particular town, details have not been shown separately but are included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the appendix to the Town Directory.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an appendix II to the Village Directory.

The details of the data covered in Statements I to VI and IV-A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	... Municipal Corporation
M	... Municipality
C. B.	... Cantonment Board/ Cantonment.
NAC	... Notified Area Committee
CT	.. Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. Th annual rainfall and temperature for each town and their distance by road from the State, District and Subdivisional headquarters and from the nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 is generally based on the reports of the local officials. However, for towns for which this information was available from the office of the Director General of Observatories, the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	... River
C	... Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year, 1978-79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire-fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. This information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6 -

PR	...	*Pucca* Road
KR	..	*Kutcha* Road

Column 7—

S	...	Sewer
OSD	...	Open Surface Drains
BSD	...	Box Surface Drains
SD	...	Sylk Drains
CD	...	Cesspool Method
Pt	...	Pit System

Column 11—

HL	...	Head Loads
B	...	Baskets
WB	...	Wheel Barrows
ST	...	Septic Tank Latrines
S	...	Sewerage

Column 12—

TW	..	Tube-well Water
T	...	Tap Water
W	...	Well Water
Tk	..	Tank Water

Column 13—

OHT	..	Overhead Tank
SR	.	Service Reservoir
IG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	..	Pressure Tank

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a Slum in a Class I or Class II town, the available civic amenities in 1979. Since in this district there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000–99,999) town, Statement IV-A relating to the Slums does not find place in the present volume. This has already been explained in the "Analysis of Data" section of this volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries available there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district it in the

same State or other State and its distance from the concerned town in question has been shown. The information furnished in this statement is based on the reports of the local officials.

The following abbreviations have been used in this statement:

Column 4–

H	...	Hospital (Allopathic)
H(A)	...	Hospital (Ayurvedic)
H/U)	...	Hospital (Unani)
H.(Hom)	...	Hospital (Homeopathic)
D	...	Dispensary (Allopathic)
D(A)	...	Dispensary (Ayurvedic)
D(U)	.	Dispensary (Unani)
D(Hom)		Dispensary (Homeopathic)
HC	..	Health Centre
FC	..	Family Planning Centre
TB	...	T.B. Clinic
NH	...	Nursing Home
O	..	Others

Column 6–

A	...	Arts only
S	...	Science only
AS	...	Arts and Science only
C	...	Commerce only
AC	...	Arts and Commerce only
ASC	...	Combined for all Categories– Arts, Science and Commerce
L	...	Law

Column 10–

SH	...	Shorthand
Type	...	Typewriting
Sh Type	...	Shorthand and Typewriting
O	...	Others.

Statement VI

This statement deals with the trade, commerce, industry and banking services for each town for the year 1979. The three most important commodities imported, exported and manufactured, number of banks, and agricultural and non-agricultural credit societies are also given in this statement.

DISTRICT CENSUS HANDBOOK
PART B

Urban|Village
Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips. As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz., the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units.

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates, main workers by broad categories of main activity, marginal workers and non-workers by sex. The broad categories of main workers have been classified as under :

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing Servicing and Repairs in Household Industry.
4. Other Workers.

It, therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz., cultivators, agricultural labourers and persons engaged in household industries have been retained, the remaining categories have been grouped together under the category "Other Workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area. This may be particularly useful for the civil administration and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc.

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented. The format of this PCA is almost the same with slight changes.

Rural/Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban areas. The concepts of village, town, urban agglomeration, etc., are explained in the introductory part of this volume. The revenue village and an urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the village/urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers.

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as mentioned in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.

Note : 1. Towns treated as such for the first time in 1981 Census are printed in *italics*.
2. Roman numberals within brackets after the names of the towns indicate their location code numbers.
3. The abbreviations have been used for the status of towns :
M—Municipality, N—Notified Area Committee.

CENSUS ABSTRACT

Note : 1. Towns treated as such for the first time in 1981 Census are printed in *italics*.
2. Roman numerals within brackets after the names of the towns indicate their location code numbers.
3. The abbreviations have been used for the status of towns :
M—Municipality, N—Notified Area Committee.

Note : 1. Towns treated as such for the first time in 1981 Census are printed in *italics*.
2. Roman numerals within brackets after the names of the towns indicate their location code numbers.
3. The abbreviations have been used for the status of towns :
M—Municipality, N—Notified Area Committee.
