FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/C D Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. B. Lal, the Director of Census Operations, Bihar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi :
the 26th April, 1982

PREFACE

District Census Handbooks were brought out for the first time in 1951. Because of their wide ranging utility they are being printed in every Census since then. They are prepared and published by the Census Organisation on behalf of the State Government. The need for making micro-level data available to various government agencies, planners and data users as early as possible was uppermost in our mind while finalising the manuscript and it is a matter of deep satisfaction that the present volume is being published within a very short time of the taking of the Census. The District Census Handbook is divided into two parts, viz., (i) Part A containing the Village and Town Directories and (ii) Part B containing Village and Townwise Primary Census Abstract and, the District Primary Census Abstract for general population. Besides the District Primary Census Abstract for the Scheduled Castes and the Scheduled Tribes population is also being published for the first time.

The basic data were collected in the *Mauzawar Notes* and Town Directory forms through the Block Development officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the supervision of the District Census Officers and the sub-divisional Officers. The District Officers had sent to us material which has been used for writing the 'Brief history of the District'. I am indebted to them all.

The Analytical Report which is based on the inset tables generated with the help of Village Directory and Village/Urban Primary Census Abstract takes note of the social, economic and demographic changes which have taken place in the District during the decade. District and C. D. Block Maps containing useful information on many items have also been included in the District Census Handbook.

I am grateful to the State Government for their co-operation in collection of such a large mass of data. I would like to make a mention of warm and wholehearted co-operation which was throughout extended by the District Officers, the Subdivisional Officers, the District Census Officers and the Block Development Officers. In my office S/Shri R. D. Aggarwal, D. N. Mahesh, Deputy Directors and Shri N. M. Alvi, Assistant Director organised and supervised the work at different stages. In this voluminous job valuable assistance was rendered to me by Shri S. K. Sinha, Investigator, who was mainly responsible for supervision and scrutiny of the entire job from the beginning to end. He was ably assisted by his team of Statistical Assistants, Computers and a few lady Checkers and Coders. The information contained in Part B was basically compiled in respective Regional Tabulation Offices under the supervision of the respective Deputy Directors and it was again scrutinised and given final shape in the P. C. A. Cell at the headquarters headed by Shri P. N. Sinha, Investigator. Shri Md. Abbas, Zonal Research Officer (Map) and his team have produced excellent District and C. D. Block maps. Shri A L. Das, Investigator and Shri Sheo Prasad, Senior Technical Assistant have helped in getting the volume printed. Shri R. B. Singh, happened to be in charge of printing and for sometime also looked after the D.C.H. Section. I am thankful to them all.

I am personally indebted to Shri P. Padmanabha, Registrar General, India under whose guidance it has been a rare privilege to strive for results.

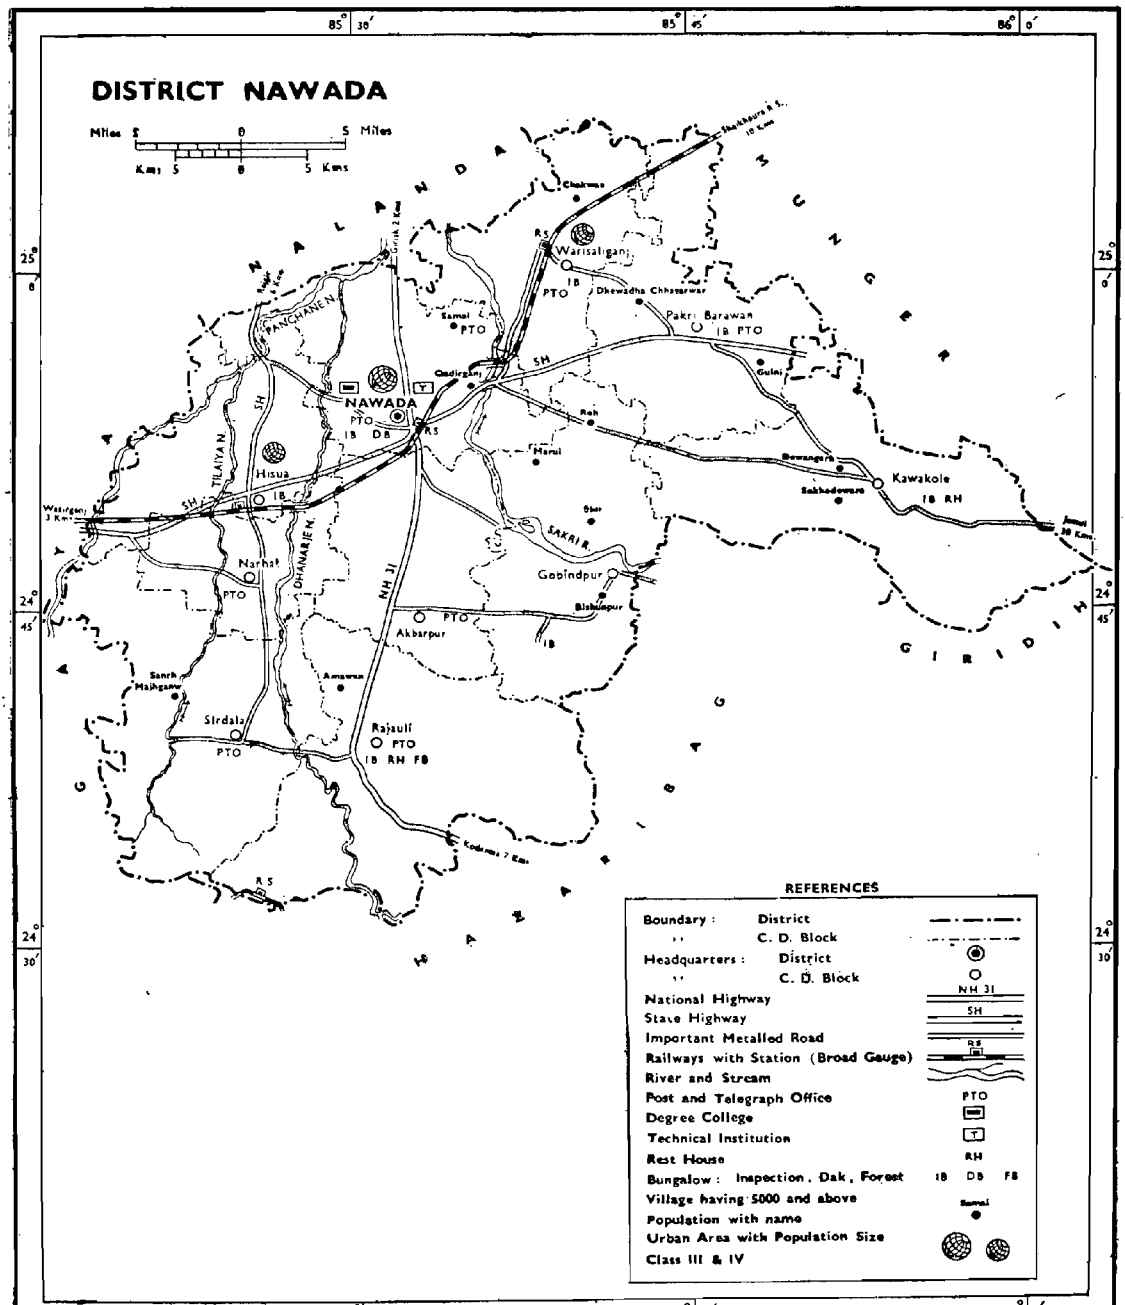

I am also thankful to Dr. N. G. Nag, Deputy Registrar General (Social Studies) for the valuable guidance received from him from time to time.

I owe my thanks to M/s Leader Press, Allahabad, who have undertaken the work of printing of this volume and accomplished the same with promptness.

ANALYTICAL NOTE

Brief history of the district

The district of Nawada, which acquired the status of an independent district on the 26th January, 1973 has a rich heritage and close linkage with the parent district of Gaya. It consists of 10 community development blocks, viz., Nawada, Hisua, Narhat, Sirdala, Rajauli, Akbarpur, Gobindpur, Pakri Barawan, Kawakole and Warisaliganj. The district is bounded on the east by Jamui subdivision of Munger district, on the north by Nalanda district and Lakhisarai subdivision of Munger district and on the west and south by the district of Gaya and Koderma subdivision of Hazaribag district.

The history of Nawada is a part of the history of the ancient empire of Magadh which included the undivided districts of Patna and Gaya. This empire gained prominence during the reign of king Bimbisar of Haranyakakul dynasty. During this period both Buddha and Mahabir preached their doctrines. This entire region in those days was full of forests, wild animals and aboriginal tribes. Even today a considerable part of the district say nearly 20 per cent is spread over the hills and forests situated towards south and west and mainly contained in the belt of Rajauli, Gobindpur, Kawakole, Hisua and Sirdala blocks. The influence of Buddhism and Jainism at that time could extend only to the northern parts of the district of Nawada. Lord Buddha stayed in the undivided district of Gaya for a long time and he preached in many parts of the district of Nawada including Kurkihar, Parwati and Tapowan. Lord Mahabir also visited the northern parts of Nawada district.

With the fall of the Haranyakakul dynasty, the Sisunagas came to power and conquered Awanti (Malava). The Sisunagas were overpowered by Mahapadmananda, who founded the Nanda dynasty, and extended his domain over the entire northern India. They were succeeded by the Mauryas who founded their capital at Patliputra (present Patna). During the Ashok's reign Gaya gained prominence once again. The history of this region after the disintegration of the Mauryan Empire till the rise of the imperial Guptas is shrouded in obscurity.

Samudragupta of the Gupta dynasty became the king of Magadh around 330 A.D. Local dynasties came into prominence after the fall of the Gupta Empire. Later Gaya came under the sway of Harshbardhan and formed a part of his empire. After the death of Harsha in 648 A.D. a Tibetan-Chinese-Nepalese army invaded Magadh to avenge the earlier attack on a Chinese mission on way to meet Harsha who was no more. However, Harsha's descendant Adityasen maintained independence of the region and his inscription has been found in Apsarh, a village in Warisaliganj block of Nawada district, where remains of the ancient temples exist.

The control of Magadh thereafter by the Pala dynasty is evidenced by the inscription of king Rajayapala, son of king Narayan Pala, found in Kurkihar in Wazirganj block of Gaya district. Kurkihar was the site of a famous Buddhist monastery in the Pala period, and large number of bronze images of Buddhist and even Hindu deities have been found here during excavations and are presently stored in the Patna Museum.

Mahipala I ruled the kingdom during 978–1030 A.D. and an image found at Kurkihar bears an inscription dated 1009 A.D. Later this kingdom had to bear the brunt of repeated attacks of Gahedvala kings with their centre at Kashi. The kingdom was ultimately lost to the Gahedvala king Govindchanda but in Gaya district Varnamana and his son Rudraman continued to ruue. An inscription of Rudraman dated 1137-38 A.D. has been found at Gobindpur in Nawada district. Govindpala, a Pala king,

was ruling Gaya in 1162 A.D. Later, he was over thrown by the Senas of Bengal and Gahedvalas of Kanauj, and a clash over possession of Magadh ensued. Soon the Afghans overran Bihar.

Sometime after 1193 A.D. but before 1200 A.D. Mohammadbin-Bakhtiyar Khilji invaded Bihar. He stormed the monasteries at Biharsharif (Uddantapuri), Nalanda and Kurkihar and also the historical temples at Apsarh and other places of grandeur.

Biharsharif became the headquarters of Muslim rulers in Bihar. Around 1285 A.D. Gaya was made a part of Muslim Subah of Bihar. The control of Bihar passed into the hands of the Sherqui dynasty of Jampur from 1394 to 1486. After the fall of this dynasty the Mughals gained control of the district. Finally, the British succeeded in establishing their hold over this area.

In 1760, Shah Alam invaded Bihar with a view to establishing his claim over the throne of Delhi. He was helped by Kamdar Khan of Nawada but Shah Alam was repulsed at Barh by the combined army of the Nawab of Bengal and the British. Shah Alam invaded the district again on the advice of Kamdar Khan and others, and the Mughal army defeated the British force. Kamdar Khan besieged Patna which was relieved by the timely arrival of Knox and his army. Then Kamdar Khan withdrew to Bihar. Shah Alam, while withdrawing, was caught unawares and attacked by the British force supported by the army of Nawab Mirzafar and Governor Ram Narain. He was defeated and captured, brought to Patna and confined there. Kamdar Khan retreated to the hills of Ramgarh. A tomb of Kamdar Khan still exists at Hisua block headquarters of Nawada district.

Natural Divisions

The northern and southern parts of the district constitute two distinct natural regions. The northern part which is plain, formed of alluvial soil, is very fertile. Consequently, it is densely populated and has a rich historical background. The Southern part is hilly and undulating with a gentle ascent towards the south merging into hills and hilly ranges. In fact these hills form the southern fringes of the Chotanagpur plateau. Fertility of the soil (laterite) is comparatively low. This area remained outside the pale of prosperous Magadh and till 1965 it formed part of the district of Ramgarh. The entire southern boundary of the district is a conglomeration of ridges and spurs. Some of these hills attain a height of about 2,250 ft. The area is also interspersed by bare granite rocks of gigantic proportions jutting out of the earth. The important hills in the area named after famous Rishis are Durbasa, Shringi, Lomas, Jaghali and Valmiki.

The district of Nawada does not have any important river. Some of these which are worthy of mention are Tilaiya, Ghaghra, Khiri, Sakri and Dhanarjya, the last mentioned having mythological significance. The beds of these rivers are shallow, wide and sandy. They remain dry all through the year except during rainy season when they are virtually in spate. The confluence of all these five rivers takes place at a point near Giriak in Nalanda district from where the river Panchane rises. The district of Nawada also has some important water falls such as Kakolat and Hadhadwa. In the southern part of Rajauli block of this district the famous Safi Mica Mines are situated.

Forest

The northern part of the district is devoid of forests as the land is largely under cultivation. However, it is dotted with bamboo groves and mango orchards. Palm, tamarind, *pipal* and banyan trees are found near the village settlements. *Neem, Bel, Sirs, Sisam, Simal* and jack-fruit trees are also found. In the southern part, the forests of Rajauli, Dilwa and Bhalua have greatly suffered due to unsystematic and large scale felling during the Zamindari period. However, some of them are still quite dense and shelter wild animals. Occasionally tigers, panthers, bears, deer, sambhars and wild boars can be seen in these jungles. The Government has banned shooting of wild life but poaching by the unscrupulous still poses a great hazard to the dwindling population of wild life.

Climatic conditions

The area suffers from extremes of climate. May and June are extremely hot. Although Gaya is said to have the distinction of being the hottest place in India, Nawada may not be far behind. This is mainly due to the barren rocky hills and vast sandy beds of the rivers.

Rainfall

The major portion of the district falls in the rain shadow zone. The average annual rainfall is 1,047.50 mm and it experiences, on an average, 64 rainy days in a year. The rains generally set in during the middle of June and last till the month of September. The district is always short of adequate rains and hence declared as a drought prone district.

Irrigational facilities

The absence of any major perennial river has deprived the district of any important canal system that could provide water for agricultural operations round the year. The district gets but scanty rainfall. The general slope of the land is also rapid in most of the areas with the result that water runs off quickly.

However, these difficulties have been overcome by the ingenuity and diligence of the people who have devised the systems of *Ahars* and *Pynes* by which the natural drainage is blocked and the water impounded for use The river water is also harnessed by diverting it into the *Pynes*. The *Pynes* or diversionary channels are lid off from the rivers so as to convey water to the fields. Smaller channels or *Bhoklas* are taken off from the *Pynes* and if necessary, still smaller channels, *Kathas* or field channels are made for conveying water to the fields.

The *Ahars* are reservoirs of water formed by constructing retaining embankments to act as an artificial catchment basin. The embankments are raised on three sides while the fourth side is left open for the drainage water to enter. The *Ahars* and *Pynes* were constructed by the Zamindars or landlords and used to be maintained by them but after the abolition of the intermediary system or Zamindari, the responsibility for their maintenance has devolved upon the State Government.

Proper utilization of the sub-Ferranian water can be a good source of irrigation in such areas of the district where this is feasible The land being hard and generally rocky, the southern part of the district is unsuitable for sinking deep tube-wells. This part comprises Sirdala, Kawakole and parts of Gobindpur, Akbarpur and Rajauli and the southern part of Hisua These areas can have only hand pumps or open wells due to the proximity of the bedrock to the surface and lack of granular material. The areas between the Gaya-Nawada Railway line on the south and the Rajgir hills on the north are suitable for the sinking of small irrigation tube-wells with moderate yield. Nawada block is suitable for high yielding tube-wells This narrows towards Rajauli resulting into a marginal zone with moderate yield possibilities. Warisaliganj and Pakri Barawan blocks are considered suitable for sinking large-sized State tube-wells.

A few medium and minor irrigation canals, Sakri canal scheme being the most important of them, have been constructed for augmenting the irrigational facilities But these also are all rain fed and have limited utility.

Land use pattern

Paddy is the main crop of the district. During recent years wheat sowing has also been encouraged. Other crops grown are maize, potato, gram, *marua*, sugarcane and *khesari*. In the district 5 types of soil are generally found These are—(i) Loam, (ii) Sandy, (iii) Clay, (iv) Sandy Loam and (v) Clay Loam. The areas where these kinds of soil are generally found and the crops for which they are useful are indicated below :

(i) *Loam*—Found in Nawada, Sirdala and Akbarpur blocks

(ii) *Sandy*—Available in some parts of Nawada, Sirdala and Hisua blocks. It is suited for crops like maize, oil-seeds and groundnut.

(iii) *Clay*—Available in parts of Pakri Barawan and Kawakole. It is suited for paddy, gram and wheat.

(iv) *Sandy Loam*—Found in the development blocks of Nawada, Warisaliganj, Akbarpur, Narhat and Hisua It is useful mainly for wheat, maize and paddy.

(v) *Clay Loam*—Available in Rajauli and Sirdala blocks It is useful for paddy, wheat and potato

Mines and Minerals

The district is quite rich in minerals and forests. The district has a number of mica and iron-ore mines. Siger and Dibaur villages near Rajauli have the concentration of mica mines. Iron-ore is found

in Pachamba. Bamboos and canes are found extensively in the forests of the district.

Industrialisation

Nawada is considered to be a backward district mainly on account of lack of industrial development. The development blocks of Rajauli, Gobindpur and Kawakole are quite rich so far forest resources in the district are concerned. Catechu sticks are found in abundance in Rajauli block and there is scope for establishing catechu industry in this belt. Nawada being drought-prone, deters the industrialists from setting up industries in the district since availability of abundant water is an important consideration. Still concerted efforts are being made and many programmes have been launched to provide improved irrigational facilities as also to develop agriculture production and promote industrialisation in the district.

In Kadirganj and Gopalganj villages of Nawada block a scheme for production of Tassar Silk on loom is underway. Similarly handloom industry is already in operation in the villages of Kadirganj, Gopalganj, Sheikhpura, Masaarha, Nawada, Mirbigha, Pakri Barawan, Jhagribigha in the district. There is a scheme to develop the handloom industry in the district under the Tricem Programme The government has executed various schemes and programmes in order to popularise household industries such as blacksmithy, carpentry, pottery, leather industries, etc., as well as to develop other small scale industries in the rural areas of the district. A number of *Gobar* gas plants have also recently been established in the district

Communication facilities

The communication facilities are coming up fast in the district. Over and above *kutcha* roads spread over the entire district, there are *pucca* roads including National Highway covering a considerable chunk of the district. There are *pucca* roads also leading to the main towns of Gaya and Rajgir *via* Hisua. The Grand Chord line of the Eastern Railway passes through the district headquarters. Nawada is the main station between Kiul and Gaya junctions on this route. Further development of road communication is bound to open up even the remote areas of the district and catalyse the process of development.

Electrification

Electric supply was introduced at Nawada in the year 1953. There are two divisions of the Bihar State Electricity Board one for supply of power and the other for construction of electric line. Electric connections have been provided for domestic, commercial, irrigation, State tube-wells and industrial and transmission of high tension electrical power.

Jurisdictional changes

As has been mentioned above Nawada was a subdivision of the old Gaya district until recently. After the reorganisation of the districts which took place in the year 1973, Nawada was separated from the old Gaya district to form an independent district consisting of 10 development blocks of the old subdivision and 3 development blocks, viz, Atri, Fatehpur and Wazirganj of the sadar subdivision of Gaya district. Later, however, these three development blocks were transferred back to Gaya district thus making Nawada district co-terminus with the old Nawada subdivision.

Social and cultural events of note during the decade

No major social or cultural event has taken place in the new district of Nawada since it came into existence.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT

1. Nawada

Nawada, the district headquarters, is situated on both sides of the Khuri river on the Patna-Ranchi National Highway. The part of the town on the left bank is older and is called Dih while the other part is of recent origin. Nawada which has so far developed at a slow pace is expected to witness faster growth with the location of district headquarters. There are quite a few places of interest in Nawada

About a mile north of Nawada on Patna-Ranchi road lies Gonava village. It is a place of pilgrimage for the Jains of both sects. The Digambar Jain temple is just by the side of main road while the Swetambar Jain temple is at the back of it. The Digambar Jain temple built in 1925 is quite beautiful and, alongwith the Swetambar temple could be developed into a good tourist spot. The Digambar Jain Mandir has a large marble idol of Lord Mahavira about 48 years old The Swetambar Jain temple which was built more than 800 years ago has an impressive approach road Ashoka trees, planted on the flanks, shade the road and lend serenity to the atmosphere. The temple has got a marble idol of Lord Mahavira flanked by a granite idol of Sudharmaji and idol of Panch Parmesthi made of Asthadhatu (an alloy of eight metals) and also a marble idol of Gautama

About a mile away from Nawada towards Hisua by the side of Sobh Nala there is a Shiv temple which has got great religious significance Virtually on every *Purnima* as well as on each Hindu religious festival, a *mela* is held here.

2. Narhat

Narhat, which is the block headquarters of the block bearing the same name, is at a distance of about 22 Kms. from Nawada on a *pucca* road *via* Hisua, which is 14 Kms. away on the Nawada-Gaya main road. The soil is comparatively fertile but there do not exist commensurate facilities of irrigation. The places of interest in this block are the following :

(*i*) *Sitamarhi*—Sitamarhi is a small village about 32 Kms. from Nawada and is a place of great religious and mythological importance There is an elliptical cave carved inside a huge hemispherical block of granite rock The legend has it that it was in this cave that Sita had to take refuge after having been exiled by Rama. Built by Vishwakarma, the divine builder at the behest of saint poet Valmiki, as the legend goes, it was the haven for Sita and provided her protection in the dense forest which was infested with wild beasts. One and a half kilometres north-east of Sitamarhi there is a village called Barat, where the saint poet Valmiki is said to have lived when Sita was exiled. It was on the wide high level ground near this cave that Sita's sons Lava and Kusha are said to have fought against Rama's army

(ii) *Barauta* (*also Beraounta*)—This village is situated 5 Kms south-east of Tilaiya Railway Station. It has an old brick temple of Patal Devi, the Goddess of the Nether world There is a hole in the temple leading to the nearly tank According to the legend the temple had its origin during Mahabharat. It is said that Beraounta is the distorted form of Biratnagar thus connecting the place with the famous king Virat of Mahabharat.

3. Hisua

Hisua, the block headquarters, is at a distance of 14 kilometres from Nawada on Nawada-Gaya main road In Hisua itself there is a tomb of Kamdarkhan. There is also a mosque of the same period. Other places of interest are given below :

(*i*) *Kahuare*—This village has a 200 years old fortress which is known as Mahabirgarh and also as Jhachhiamaigarh Images of Lord Hanuman and Jhachhiamai are enshrined in it On excavation, statues of Lord Mahavira have also been found.

(*ii*) *Sakra*—This village has a temple with idols of Laxminarayan, Suryanarayan, Satyanarayan, and

Gauri Shanker which are said to be very old although the temple itself was built at a later date. There are inscriptions in Pali script at the base of the image of Lord Laxminarayan.

(*iii*) *Orro*—This village is identified with Ondup, which was on the southern boundary of Jarasandh's capital Rajgir. It finds mention in Buddhist literature. Ruins of brick walls and some stone images have been found here.

4. Kawakole

Kawakole, block headquarters, is at a distance of 45 Kms. from Nawada on *pucca* road. A few furlongs away from this village is a hilly feature called Echo peak where Rishi Kag Bhusundi is said to have delivered. his sermons. The mythological aspect apart, this peak presents one of the finest examples of echo of sound. The peak is about 1,000 ft. high. There is a big piece of rock at a distance of about 400 yards from the base of the peak. Whatever is spoken on the second rock is marvellously echoed by the first rock.

(*i*) *Hadhadva*—At a distance of about 6 Kms from Kawakole there is a seasonal waterfall called Hadhadva in Macchaudra village. The name onomatopoeic in character suggests the rhythmic sound made by the caseading waterfall during the rainy season. It is a favourite picnic spot.

(*ii*) *Sokho Dewara*—It is a village consisting of two *tolas*, Sokho and Dewara located about 5 Kms. south-west of Kawakole. It is known on account of its Sarvodaya *Ashram* set up by Shri Jai Prakash Narain in 1952. The *Ashram* has been built at a beautiful site against the backdrop of hills. The *Ashram* launches rural development projects based on Sarvodaya principles and monitors and studies their extent of success and socio-economic impact on the people covered by them The *Ashram* has assumed international importance and attracts scholars from far and wide.

4. Warisaliganj

Warisaliganj is situated at a distance of 23 Kms. from Nawada on the Nawada-Barbigha (Munger district) *pucca* road. It is the most prosperous town in Nawada district and the land area is also very fertile. In fact, Warisaliganj is the main centre of trade of Nawada district and feeds the rest of it. A few places of historical significance within the block are mentioned below :

(*i*) *Apsarh and Parwati*—Apsarh village lies at a distance of about 14 Kms. from Warisaliganj and is connected to it by a *pucca* PWD road. There are a few sites and temples in the village which are of great historical and archaeological interest. Inside one of the temples there is a gigantic stone idol of Varah (Lord Vishnu). According to an inscription found here this statue was installed by king Adityasen of the Gupta dynasty in 600 A D. This is located by the side of a hillock, more precisely a mound of earth and baked bricks. Excavations by the archaeological department on one side of this hillock have brought to light a three-walled corridor with engravings connected with the various episodes in the life of Rama, viz., Rama, Laxman and Sita crossing river Ganges on Kewat's boat, the scene of Valmiki *Ashram*, the scene of Chitrakut, Rama and Sita seated under a tree while Laxman plucks fruits perched on top of the tree, the meeting of Rama and Bharateh. There is a Shiva temple in the village also and it enshrines a Shivalinga alongwith the image of Parwati engraved in the same granite block. Opposite to this temple also there is a Shivalinga of huge size.

Parwati to the north of Apsarh is another place of great importance. On the Parwati hill there is a large cave inside which there are two tunnels which extend to a long distance and most probably meet together According to the legend Lord Buddha, after attaining enlightenment at Bodh Gaya, delivered a sermon on this hill during the course of his excursions for the spread of his religion

(*ii*) *Thera*—8 Kms. away from Warisaliganj there is a Shiva temple by the side of the village Thera. A Shivaling, though almost broken, seems to possess much religious significance and a fair is held here every year

5. Akbarpur.

Akbarpur is at a distance of about 17 Kms. from Nawada on the Nawada-Gobindpur road. Though Akbarpur has got very few places of interest it is associated with the names of some famous historical personalities. It is said that during the period of Aurangzeb General Kamdar Khan and his brother Namdar Khan established their control over this

area. Two places, viz., Barew and Nemdargunj are worthy of mention.

(i) Barew—It has the remains of a mud fortress probably built during Aurangzeb's time by the well known Mughal General Kamdar Khan. Within the compound of this fortress there is the image of Lord Shiva which is worshipped by the local people. There are also a mosque and a Karbala said to have been constructed by Kamdar Khan within this same fortress. This is suggestive of the communal harmony which must have prevailed under Kamdar Khan.

(ii) Nemdargunj—Five Kms. from Barew on *kutcha* road is a village named Nemdargunj after Namdar Khan, the brother of Kamdar Khan.

6 Gobindpur

Gobindpur is at a distance of about 37 Kms. on the *pucca* road from Nawada. From the Nawada-Ranchi main road one has to turn to the east at Fatehpur road junction about 16 Kms. from Nawada. Gobindpur block is largely drought-prone. It has got many places of historical interest and scenic beauty.

(i) Kakolat falls—Kakolat falls, which is at a distance of about 9 Kms. from Akbarpur (block headquarters) situated between Fatehpur road junction and Gobindpur, presents a very fascinating view as one moves towards it. It is virtually hidden in the thickest of the jungles and the sylvan surroundings do provide an escape from the humdrum of routine life. Although Kakolat is not a very big waterfall it has got its own charm considering the surroundings. After falling from the height of 150 ft. it gently flows down a few yards where from it again takes a leap down to the ground level forming into a perennial stream. The falls derives its name from Kol, a tribal people who inhabited this area once upon a time. Since according to a local legend persons taking bath in the falls would not become snakes in any of their rebirths, a large number of people take bath in the falls and every year a fair is held during *Chaitra Sankranti*. This place can be developed into a beautiful tourist spot.

(ii) Kol Mahadev—Kol Mahadev is at a distance of about two Kms. from Kakolat. There is a Dam by this name at this location which, alongwith its reservoir, presents a picturesque sight. By the side of the Dam there is a Shiva temple named Kol Mahadev. It enshrines a granite Shivalinga which is about 18" in height. There is an imprint of Trishul, Lord Shiva's trident, on this Shivalinga. Besides, there is an idol of Gauri alongwith idols of Ganesha, Mahavira (the Hindu deity) and Bhairava, all engraved in one single granite stone block. According to a local legend, these idols are very ancient and have been there since time immemorial.

(iii) Siur—About 8 Kms. north-west of Govindpur the village of Siur is remarkable for some very large mounds of ruins which deserve excavation and archaeological study.

7. Rajauli

Rajauli is at a distance of about 30 Kms. from Nawada on the Patna-Ranchi Highway and is situated on the bank of river Dhanarje. The southern part of Rajauli abounds in low hill ranges and spurs. In fact it forms the southern boundary of the vast hill ranges running across the districts of Hazaribag and Palamu. These hill ranges are of great religious and mythological interest as many famous saints had set up their *Ashrams* here and presents a beauteous sight composed of hills and forests.

About 3 Kms. south of Rajauli there is a thickly forested named after the famous saint Shringi. He had set up his *Ashram* on the peak of this hill which is about 2,300 ft. high. On the top of the hill there is a flat ground about 100 sq. ft. whereat a brick enclosure of very recent origin enshrines two granite stone idols of the saint, Shringi and Goddess Durga on a lion (Singhvahini).

On the eastern side of the road there is a hill called Durvasa. It was on the top of this hill that irascible saint Durvasa had his *Ashram*. This hill is about 2,250 feet high. There is nothing of great interest about the hill except that it is thickly forested and has an arduous climb.

About 3 Kms. further to the west of Shringi hill there is the Gautama hill on the top of which Gautama had his *Ashram*. It carries great religious significance for the nearby villages who offer prayers during the periods of drought to appease the Rain God.

On the north-east of Rajauli about 6 Kms. away there is a turn-hill feature. The height is not much

and it is all rocky with hardly any vegetation The small hill has an open cave said to be the *Ashram* of saint Jagbali or Yagyavalkya This hill connects the second and higher hill which has a nice cave said to have been the *Ashram* of saint Lomas Shringi is said to have been his son. Two big *melas* on *Sravan Purnima* and *Gopasthmi* are held at this place.

In Rajauli there is also a mausoleum of Hazrat Data Kalal Shah called Khan-Ka-Takh. This *Fakir* an ascetic had come to this place about 200 years ago from Punjab.

History of the District Census Handbook

Among the traditional documentations of the Census is the fairly comprehensive and umform District Census Handbook. This was brought out for the first time in 1951 Census and since then it has improved itself in the matter of content and coverage, keeping in view the requirements and growing needs of data users and various organisations besides the ministries and government departments including the Planning Commission. The District Census Handbooks are, in fact, State Government publications but their compilation, processing analysis and writing are done by the Census organisation on behalf of the State Government. The District Census Handbook contains two parts, viz, (i) Part A comprising the Village and Town Directory and (ii) Part B comprising the Village and Townwise Primary Census Abstract as also the Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes at the Development Block level. Both Parts A and B have been included in the present volume. During the 1971 Census, District Census Handbooks were published in three parts, the third part containing the Administrative and Census statistics Since it took a long time in collecting the desired Administrative statistics from the various State Government departments resulting in inordinate delay in the publication of the District Census Handbook Part C, it has been decided not to go in for this endeavour at all this time. This has been done with a view to making certain important and useful basic information available to the data users well in time. For information relating to Administrative statistics the data users could, however, refer to the publications brought out by the State Statistical Bureau.

Scope of the District Census Handbook

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the levels of towns / wards in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enables them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/ *hat* and communication, etc, available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facility is available is recorded. For towns various aspects of information relating to their area, population during 1981 as well as previous Censuses from 1901, growth rates, density, sex-ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/ centres in the statements of the Town Directory are the innovations of the 1981 Census keeping in view the Minimum Needs Programme of the Planning Commission

A new statement on civic and other amenities for each area/locality identified as slum in class I and II towns has been added. In Nawada district, however, there is no class I or II town and hence this information has not been furnished in this volume.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as occupied residential houses, number of households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural

labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level. For the first time District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook. The information contained in it is almost similar to that of General Primary Census Abstract and the level of presentation is exactly identical to that of the District Primary Census Abstract relating to general population.

For convenience of reference an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the jurisdictional list pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract (rural) for cross reference This has been done in order to ensure that the villages figuring in PCA (rural) and those in the Village Directory match and this is also in conformity with the revenue and settlement records of the State Government No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

Census concepts of rural and urban areas and other terminologies

As in the previous Censuses, the 1981 Census data have been presented by rural and urban areas. The basic unit for the rural area is the village which has the same meaning in the Census as a revenue *mauza* and is defined as a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or, on the other hand, several hamlets (or *tolas*) each bearing a different name.

Urban areas are specially defined for Census purposes. In the 1981 Census the same criteria as adopted in 1961 and 1971 Censuses with some minor variation have been retained. Urban areas in the 1981 Census are—

(a) All places with a Municipal Corporation, Municipality, Notified Area Committee, Civil Lines and Cantonment Board. These are known as statutory towns.

(b) Other places which enjoy urban characteristics and have been declared as Census towns by the Director of Census Operations since they satisfied the required following criteria :

(i) A minimum population of 5,000.

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 persons per square kilometre.

In a few exceptional cases places of tourist interest or administrative significance have also been *treated as Census towns by the Director of Census* Operations.

The urban criteria of 1981 vary slightly from those of 1961 and 1971 Censuses in that the males employed in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 Censuses whereas in the 1981 Census these activities have been treated as agricultural activities and therefore excluded from the purview of consideration for urban characteristics. Towns are further classified into the following six classes according to their population size :

Class of town	Population
I ..	1 lakh and above (termed as city)
II ..	50,000—99,999
III ..	2,000—49,999
IV ..	10,000—19,999
V ..	5,000— 9,999
VI ..	Less than 5,000

Apart from the town/city, the concept of Urban Agglomeration has also been adopted for presentation in the Town Directory. An Urban Agglomeration is considered to be a continuous urban spread constituted of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such town.

Other concepts and definitions which have been used in this volume are explained below :

City—A city is a town with a population of one lakh and above

Census House—A 'house' has been defined as "a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both."

Occupied residential house—'Occupied residential house' refers to such houses as are occupied and are used for dwelling purposes or where the residence is combined with other uses such as shop-*cum*-residence, workshop-*cum*-residence, school-*cum*-residence, etc.

Household—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. There may be one member households, 2-member households or multi-member households. For Census purposes, each one of these types is regarded as a household.

Literate—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Definition of work—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. The reference period for enquiries relating to work was one year immediately preceding the enumeration period.

Worker—Persons who had worked even for a day in the above mentioned economically productive work have been treated as workers.

Main Worker—If a person has worked for 183 days or more during the reference period he has to be treated as a Main Worker.

Marginal Worker—If a person has worked for less than 183 days or six months during the reference period he has been treated as a Marginal worker.

Non-worker—If a person did not work at all (not even one day) during the reference period he has been treated as a Non-worker.

Scheduled Castes & Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India, the castes or tribes to be treated as Scheduled Castes or Scheduled Tribes for a particular State are specified by public notification by the President of India. According to the Government of India, Ministry of Home Affair's Notification No. SRO 2477A, dated the 29th October, 1956 and the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108

of 1976) dated 18th September, 1976 the lists of the Scheduled Castes and the Scheduled Tribes, thus notified for the State of Bihar are given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur Divisions and Santhal Pargana district).
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

ANALYSIS OF DATA

Population, number of villages and towns

The district of Nawada, with a population of 1,099,177 persons is divided into 10 Community Development Blocks consisting of 967 inhabited villages (out of a total number of 1,099 villages including 8 which are constituent units of towns in the district) and 3 towns. The following table highlights the population, number of villages and towns for the district as also for its development blocks.

Table I—Population, number of villages and towns, 1981

Sl no	Name of Development Block	Population									No of villages		No of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Nawada	169,474	86,849	82,625	130,715	66,370	64,345	38,759	20,479	18,280	107	100	1
2	Akbarpur	110,266	54,519	55,747	110,266	54,519	55,747	.	..	.	157	144	..
3	Narhat	79,945	38,815	41,130	79,945	38,815	41,130	..	.	..	86	80	..
4	Hisua	109,739	55,001	54,738	94,319	47,344	46,975	15,420	7,657	7,763	86	80	1
5	Warisaliganj	124,520	63,841	60,679	105,638	53,853	51,785	18,882	9,988	8,894	99	84	1
6	Pakri Barawan	103,857	52,272	51,585	103,857	52,272	51,585	.	..		82	76	..
7	Kawakole	93,895	47,075	46,820	93,895	47,075	46,820	..	..	..	59	57	..
8	Gobindpur	109,892	53,562	56,330	109,892	53,562	56,330	..			128	116	
9	Rajauli	84,830	42,083	42,747	84,830	42,083	42,747	..	..	.	169	115	..
10	Sirdala	112,759	55,103	57,656	112,759	55,103	57,656	..	..		126	115	..
	Total	**1,099,177**	**549,120**	**550,057**	**1,026,116**	**510,996**	**515,120**	**73,061**	**38,124**	**34,937**	**1,099**	**967**	**3**

Among the C.D. Blocks, Nawada with 15.42 per cent of the population of the district occupies the first place followed by Warisaliganj with 11.33 per cent. The least populated C.D. Block is Narhat with only 7.27 per cent of district's population presumably because it is a small block comprising only 80 inhabited villages.

Nawada district which has been carved out of the old Gaya district appears to have had less impact of urbanisation since 93.35 per cent of the population lives in the villages. The total urban population contained in 3 towns is of the order of only 6.65 per cent of the population of the district. None of the 3 towns, viz., Nawada (Municipality) Hisua (NAC) and Warisaliganj (NAC) fall either in class I (population 1 lakh and above) or class II (50,000–99,999) range. The district does not have any urban agglomeration either.

Decadal change in Population

Nawada acquired the status of a district only after the 1971 Census. The figures for 1971 have, therefore, been recast. The percentage increase in the population of the district and its development blocks is presented in the table below

Table 2— Decadal change in distribution of population

Development Block	Population 1971			Population 1981			Percentage decadal (1971—81) variation		
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Nawada	130,313	106,567	23,746	169,474	130,715	38,759	+30.05	+22.66	+63.22
Akbarpur	89,727	89,727	..	110,266	110,266	..	+22.89	+22.89	..
Narhat	66,514	66,514	..	79,945	79,945	..	+20.19	+20.19	..
Hisua	90,824	79,568	11,256	109,739	94,319	15,420	+20.83	+18.54	+36.99
Warisaliganj	105,002	89,998	15,004	124,520	105,638	18,882	+18.59	+17.38	+25.85
Pakri Barawan	85,817	85,817	..	103,857	103,857	..	+21.02	+21.02	..
Kawakole	76,189	76,189	..	93,895	93,895	..	+23.24	+23.24	..
Gobindpur	91,603	91,603	..	109,892	109,892	..	+19.97	+19.97	..
Rajauli	67,365	67,365	..	84,830	84,830	..	+25.93	+25.93	..
Sirdala	90,583	90,583	..	112,759	112,759	..	+24.48	+24.48	..
Total	**893,937**	**843,931**	**50,006**	**1,099,177**	**1,026,116**	**73,061**	**+22.96**	**+21.59**	**+46.10**

It would appear that the rise in the population of this district during the 1971—81 decade has been of the order of 22.96 per cent. The rural population in the district has increased by 21.59 per cent while urban population growth over the decade has been as much as 46.10 per cent.

As shall be evident from the table among the Development Blocks, Nawada has shown the highest increase in population over the decade with 30.05 per cent followed by Rajauli and Sirdala with 25.93 and 24.48 per cent respectively. The increase in rural population during 1971—81 has been the highest in the case of Rajauli (25.93%) followed by the development block of Sirdala (24.48%). As regards the growth in urban population Nawada block obviously occupies the first position with 63.22 per cent, since Nawada town, the district headquarters, is situated in this very block.

Villages classified by population range

The distribution of villages by their population ranges is given in the alongside table in six size groups.

It would be seen from the table that maximum number of villages in the district lie in the population range of 500—1,999 followed by villages in the population range of 200—499. The medium size villages (500—1,999) thus account for as much as 49.64 per cent of the total number of inhabited villages in the district. The large villages (2,000—4,999 and 5,000—9,999) comprise only 12.83 per cent whereas very large villages (10,000 and above) form a very small proportion with only 0.31 per cent of the total number of inhabited villages in the district. It may be of interest to note that in the 1971 Census also the average population size of a village in the State was 751 and in the old Gaya district it was only 660.

Table 3—Distribution of villages by population ranges.

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
— 200	95	9.82
200— 499	265	27.40
500—1,999	480	49.64
2,000—4,999	110	11.38
5,000—9,999	14	1.45
10,000 +	3	0.31
Total	**967**	**100.00**

Villages by density

The density of population is defined as number of persons per sq. Km. It indicates the extent of crowding in a particular area. The distribution of villages by their density in the district is given in the Table 4 below :

Table 4—Distribution of villages by density

Range of density (per sq. km.)	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
— 10	6	0 62
11— 20	4	0 42
21— 50	13	1 35
51—100	20	2 07
101—200	45	4 65
201—300	83	8 58
301—500	294	30 40
501+	502	51 91
Not known	.	.
Total	**967**	**100 00**

The data presented in the table above highlight the fact that maximum proportion of villages in the district lies in the density range of 501 and above with 51 91 per cent followed by villages falling in the density range of 301—500 with 30.40 per cent

It would further be seen that a very small number of villages fall in the density range below 300 implying thereby that population in the district is mostly contained in the medium size villages as already explained in the earlier paragraph.

Proportion of Scheduled Castes Tribes population in villages and towns

Tables 5, 6, and 7 furnished hereafter indicate the proportion of Scheduled Castes and Scheduled Tribes population in the villages and towns of the district This will be helpful for planning of welfare programmes for Scheduled Castes and Scheduled Tribes at micro level, particularly in relation to area development oriented programmes The tables have been dealt with separately.

Table 5—Proportion of Scheduled Castes Population to Total Population in the villages.

Percentage range of Scheduled Castes Population to Total Population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	28	2.90
5 or less	15	1.55
6—10	36	3.72
11—15	90	9 31
16—20	138	14.27
21—30	303	31.33
31 and above	357	36.92
Total	**967**	**100.00**

From table above it is apparent that there are as many as 357 villages, accounting for 36.92 per cent of the total number of inhabited villages in the district, where more than 30 per cent persons belong to the Scheduled Castes. This is closely followed by villages where the population of the Scheduled Castes ranges between 21 and 30 per cent of total population and these villages which number 303 account for 31.33 per cent of total number of inhabited villages. It is interesting to note that the proportion of villages varies in direct relation with the percentage content of the Scheduled Caste population in the total population. There are only 2.90 per cent of the villages in the district which do not have any Scheduled Caste population.

Table 6—Proportion of Scheduled Tribes Population to Total Population in the villages.

Percentage range of Scheduled Tribes Population to Total Population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	933	96.48
5 or less	28	2.90
6—15	3	0.31
16—25	..	..
26—35	2	0 21
36—50		.
51 and above	1	0.10
Total	**967**	**100 00**

As regards Scheduled Tribes population it can be seen from table at page 14 that there are only 34 such villages in the district. Even among these, in 28 villages the population of the Scheduled Tribes is as low as 5 per cent or less of the total population. There are as many as 933 villages accounting for 96.48 per cent of the total number of villages in the district which have no Scheduled Tribe population at all.

Table 7—Proportion of Scheduled Castes/Scheduled Tribes Population in Towns

Name of town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Caste Population to Total Population	Percentage of Scheduled Tribe Population to Total Population
1	2	3	4	5	6
Hisua	15,420	2,491	1	16.15	0.01
Nawada	38,759	3,389	15	8.74	0.04
Warisaliganj	18,882	2,767	..	14.65	..
All Towns	**73,061**	**8,647**	**16**	**11.84**	**0.02**

Table 7 indicates that the concentration of the Scheduled Caste population in the towns of Nawada district is much less compared to the rural areas being only 11.84 per cent of the total population. The highest percentage of Scheduled Caste population is contained in Hisua town with 16.15 per cent followed by Warisaliganj with 14.65 per cent of the total population. The urban population content of the Scheduled Tribe population is almost negligible in all the 3 towns of the district as has been observed in case of the rural areas also.

Literacy rates by population ranges of villages and towns

According to the Census concept, a person who was able to read and write with understanding in any language was taken as literate. While Table 8 furnished alongside gives the literacy rates of villages classified by population ranges, Table 9 shows literacy rates of towns in the district. The tables have been discussed separately.

It would be seen that literates form 25.02 per cent of the population in the rural areas of the district as against 47.80 per cent in the urban areas. In the rural areas it is interesting to note that the literacy rate varies directly in relation to the population range of the villages. The highest percentage of literacy rate can be observed for the villages in the population ranges of 5,000—9,999 and 10,000 and above with 31.39 and 26.83 per cent literates respectively and the lowest in the population range of less than 200 with only 12.08 per cent as literates.

Table 8—Literacy rates by population ranges of villages.

Range of population	Number of villages in each range	Literacy rate
1	2	3
— 200	95	12.08
200— 499	265	19.44
500—1,999	480	24.67
2,000—4,999	110	26.34
5,000—9,999	14	26.83
10,000+	3	31.39
Total	**967**	**25.02**

Table 9—Literacy rates for towns

Name of town	Literacy rate
1	2
Hisua	39.34
Nawada	55.00
Warisaliganj	39.93
All Towns	**47.80**

Among the towns, Nawada, being the district headquarters, has the highest percentage of literate population (55.00%). The remaining two towns, viz., Hisua and Warisaliganj have more or less an equal proportion of literate population though much less as compared to Nawada town.

Workers and non-workers in rural and urban areas

The table overleaf gives the break up of literates,

workers, non-workers, and the number of the Scheduled Castes and the Scheduled Tribes in the rural and urban areas of the district as well as in its development blocks :

Table 10—Literates, Workers, Non-workers, Scheduled Castes/Tribes population in the district

Name of Development Block	Total Rural Urban	Total Population			Percentage of: S C population to total population	S T population to total population	Literates to total population			Main Workers to total population

(N)—denotes negligible

Workers in the district of Nawada account for 32.80 per cent of the total population whereas the number of non-workers is as high as 67.20 per cent. As shall be evident from the table at page 16, the main workers (i.e., those who had worked for 6 months, i.e., 183 days or more during the reference period of 1 year) comprise 31.00 per cent of tht total population which is very close to the percentage of the total workers in the district implying thereby that participation of the people in economically productive work in the district was mainly on a full-time basis. The contribution of marginal workers (those who had worked for less than 183 days) to the total working population is very insignificant in the district being only 1.80 per cent. The same trend can be observed in the rural and urban areas of the district as also in most of the development blocks.

There is apparently a wide range of difference in the proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 49.03 and 48.35 percentages for males as against 16.59 and 13.67 for females which indicates that the participation of females in the economically productive work is quite low.

Another notable feature is higher percentage of female marginal workers (2.92%) vis-a-vis male marginal workers (0.68%). It can be seen that the same pattern prevails in all the rural and urban areas of the district.

It will also be seen that the percentage of main workers to the total population is higher in the rural areas (31.48%) than in the urban areas (24.21%). The same pattern is perceptible in the case of marginal workers who constitute 1.89 per cent of the rural population but only 0.47 per cent of the urban population. This may be natural in view of the fact that in the rural areas people generally find an easy employment in various agricultural activities whereas in the urban areas household industries and other works do not offer equal job opportunities in view of limited urban development.

Villages by availability of different amenities

Table 11 below gives the distribution of villages according to the availability of different amenities in the district :

Table 11—Distribution of villages according to the availability of different amenities

Sl. no.	Name of Development Block	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking Water	Post and Telegraph	Market/*Hat*	Communications	Approach by *Pucca* road	Power supply

8	Gobindpur.	116	84(72.41)	22(18.97)	116(100.00)	16(13.79)	1(0.86)	15(12.93)	17(14.66)	65(56.03)
9	Rajauli	115	63(54.78)	11 (9.57)	115(100.00)	7 (6.09)	4(3.48)	13(11.30)	11 (9.57)	60(52.17)
10	Sirdala	115	89(77.39)	19(16.52)	115(100.00)	14(12.17)	8(6.96)	22(19.13)	14(12.17)	56(48.70)
	Total	967	719(74.35)	166(17.17)	967(100.00)	129(13.34)	28(2.90)	174(17.99)	186(19.23)	599(61.94)

Educational amenity—There are as many as 719 villages accounting for 74.35 per cent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility can be observed in the development block of Hisua with 92.50 per cent followed by Warisaliganj block with 88.10 per cent. The lowest number of villages with educational facility is in the development blocks of Akbarpur and Rajauli with 54.17 and 54.78 per cent respectively.

Medical amenity—The availability of medical amenity in the villages is quite low in that only 17.17 per cent villages have it. Among the development blocks Warisaliganj block has the largest proportion of villages where medical facility is available, the percentage being 30.95. Rajauli block, on the other hand has the lowest number of such villages with only 9.57 per cent of the total villages enjoying medical facility.

Drinking water—Interestingly, it would be seen from the table that drinking water facility is generally available in all the villages of the district of Nawada.

Post & Telegraph—Postal facilities (Post & telegraph) are available only in 129 villages (13.34%) in the district. Pakri Barawan block has the maximum number of villages having post and telegraph facility (25.00%) followed by Warisaliganj (21.43%) and Kawakole (21.05%). In the remaining development blocks of the district the number varies from a minimum of 6.09 per cent in Rajauli to a maximum of 13.79 per cent in Gobindpur block.

Market/Hat—The villages where market/*hat* is held constitute only 2.90 per cent of the total number of villages in the district. As can be seen from the table there are 5 development blocks in the district which have the facility of market/*hat* only in case of 1 village each. In the remaining 5 blocks the number of villages where market/*hat* is held varies between 3 and 8 in number.

Communication—The details of villages connected by bus, rail, navigable river/canal services, etc., have been incorporated in the Village Directory.

It would be seen that only 17.99 per cent of the villages are connected by one of means of communication or the other. The majority of the villages is still devoid of this facility. A development blockwise break up of villages having any means of communication is given in the table at page 17 indicating that Kawakole block comprises highest proportion of villages (42.11%) which are connected by bus or rail or navigable river/canal, etc., followed by Warisaliganj with 35.71 per cent and Pakri Barawan with 26.32 per cent of villages having one means of communication or the other. In the rest of the development blocks the percentage of villages having this facility varies between the minimum of 7.50 per cent in Hisua block and the maximum of 19.13 per cent in Sirdala block.

Approach road to village—With only 19.23 per cent villages having *pucca* approach roads it is clear that most of the villages in the district are still not easily accessible during the rainy season. Among the development blocks, Kawakole block with 38.60 per cent villages having *pucca* approach road tops the list, closely followed by Warisaliganj and Nawada blocks with 36.90 and 33.00 per cent respectively. The development blocks which have the lowest number of villages having this facility are Hisua (8.75%), Rajauli (9.57%) and Sirdala (12.17%).

Power supply—The electrified villages in the district constitute as much as 61.94 per cent of the total number of villages. The power supply in these villages is utilised for either agricultural or other purposes such as commercial or industrial and in certain villages for all the above purposes.

Nawada Development block occupies the first position having the maximum proportion of electrified villages (83.00%) followed closely by Akbarpur, Warisaliganj and Hisua with 73.61, 72.62 and 70.00 per cent respectively. The lowest proportion of villages having power supply is observed in the development blocks of Kawakole (43.86%), Sirdala (48.70%) and Narhat (48.75%).

Proportion of rural population served by various amenities

While in Table 11 we had discussed details regarding number of villages possessing educational, medical and other amenities, Table 12 on next page gives the proportion of rural population served by these amenities.

Table 12—Proportion of rural population served by different amenities

Sl. no.	Name of Development Block	Total population of inhabited villages in the Development Block	Proportion of rural population served by the amenity of—							
			Education	Medical	Drinking water	Post and Telegraph	Market / *Hat*	Communication	Approach by *Pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Nawada	130,715	93.45	46.76	100.00	32.38	15.06	22.77	35.88	91.45
2	Akbarpur	110,266	78.62	29.98	100.00	17.37	4.04	19.57	24.81	84.87
3	Narhat	79,945	93.06	37.07	100.00	30.20	9.18	27.21	30.33	59.37
4	Hisua	94,319	98.39	38.65	100.00	26.97	9.42	13.15	15.94	75.32
5	Warisaliganj	105,638	97.47	62.23	100.00	44.42	5.75	46.06	46.81	85.88
6	Pakri	103,857	95.19	46.04	100.00	60.13	11.94	43.09	35.40	79.05
7	Barawan. Kawakole	93,895	96.44	49.33	100.00	44.39	6.45	48.44	49.29	63.04
8	Gobindpur	109,892	92.30	45.36	100.00	46.51	1.64	27.00	28.13	66.46
9	Rajauli	84,830	83.95	37.08	100.00	32.75	26.32	35.24	22.87	76.99
10	Sirdala	112,759	90.44	30.82	100.00	32.54	20.39	25.17	15.00	60.72
	Total	1,026,116	91.90	42.51	100.00	36.81	10.92	30.44	30.53	75.13

It would be seen that educational facility is available to 91.90 per cent of the rural population in the district. The proportion varies between the maximum of 98.39 per cent in Hisua block and the minimum of 78.62 per cent in Akbarpur block. It may be of interest to note that the proportion of villages in the district enjoying educational facility is much less being 74.35 per cent (as has been observed in Table 11) than the proportion of population which is as high as 91.90 per cent. This may be attributed to the fact that villages which possess educational facility contain larger proportion of population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 42.51 per cent which is also more than double the proportion of villages served by medical facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

Distribution of villages having different amenities at a distance of less than 5 Kms., 5—10 Kms. & 10+Kms.

The table furnished alongside indicates the details of those villages which do not contain different amenities arranged by broad distance ranges (less than 5 Kms., 5—10 Kms. and 10+Kms.) from the places where these are available.

Table 13—Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of—			
	—5 Kms.	5–10 Kms.	10+ Kms.	Total (cols. 2–4)
1	2	3	4	5
1. Education	246	1	1	248
2. Medical	631	151	19	801
3. Drinking water	..	..	..	..
4. Post and Telegraph.	730	103	5	838
5. Market /*Hat*	383	325	231	939
6. Communication	540	207	46	793

As regards education facility it would be seen that there are as many as 218 villages in the district (25.65%) which do not have any educational facility but the facility is available at places situated within 5 Kms. from them. The number of villages having no educational facility within but enjoying this facility at a distance of 5—10 Kms. and above 10 Kms are almost negligible being one in each distance group. One can observe similar trend in respect of other amenities as well, though not in the same proportion. But for marketing facilities people do not have to travel for more than 10 Kms. to avail themselves of facilities such as medical, postal or transport.

Availability of different amenities in the villages according to the distance from the nearest town

The following table gives the distribution of villages having different type of facilities by distance from the nearest town in five size groups :

Table 14—Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in kms)	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—							
		Education	Medical	Drinking water	Post and Telegraph	Market / *Hat*	Communication	Approach by *pucca* road	Power supply
1	2	3	4	5	6	7	8	9	10
0— 5	94	75(79 79)	18(19.15)	94(100 00)	11(11 70)	2(2 13)	23(24 47)	27(28 72)	67(71 28)
6—15	368	295(80.16)	71(19 29)	368(100 00)	56(15 22)	10(2 72)	56(15.22)	75(20 38)	254(69.02)
16—50	504	348(69.05)	77(15 28)	504(100 00)	62(12 30)	16(3 17)	95(18 85)	84(16 67)	278(55 16)
51 +	1	1(100 00)	..	1(100 00)	..	.	.	..	..
Unspecified	..	..	..	..	..	..	..	..	..
Total	**967**	**719(74 35)**	**166(17 17)**	**967(100 00)**	**129(13.34)**	**28(2 90)**	**174(17 99)**	**186(19 23)**	**599(61 94)**

It would appear from the above table that maximum number of inhabited villages (52.02%) lie in the distance range of 16—50 Kms. from the nearest town. With only three urban centres in the district such a situation is but natural. This is followed by the villages in the distance range of 6—15 Kms. from the nearest town with 38.06 per cent. Only one village is found to be in the distance range of more than 51 Kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 79.79 per cent for those situated within 5 Kms. from the nearest town and increases to 80.16 per cent in the distance group of 6—15 Kms. Thereafter it again declines with the increase in the distance of the villages from the nearest town. The percentage is observed to be the highest (80.16%) in the distance group of 6—15 Kms. (ignoring the figure of one in the distance group of 51 +) and lowest (69.05%) in the distance group of 16—50 Kms In the case of medical and postal facility also the same trend can be seen. However, in case of market/*hat* the proportion of villages increases with the increase in the distance range from the nearest town in contrast to facilities such as power supply and approach to villages by *pucca* road where the position is just the other way It can be said that the villages which are nearer the urban areas have benefited in respect of power supply and *pucca* approach road vis-a-vis those rural pockets which are beyond the pale of direct urban influence. As regards communication the situation is found to be rather different as compared to other amenities and no particular trend emerges. Significantly, no village is found in the distance group of more than 51 Kms As already explained in the earlier paragraphs drinking water facility is available in almost cent per cent villages of the district.

Villages according to population range and amenities available

The table given below furnishes information regarding distribution of villages having different amenities by size class of population in four different ranges :

Table 15—Distribution of villages according to population range and amenities available

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—			
		Education	Medical	Drinking water	post and Telegraph
1	2	3	4	5	6
— 499	360	157(43 61)	12 (3 33)	360(100 00)	2 (0 56)
500—1,999	480	436(90 83)	64 (13 33)	480(100 00)	52 (10 83)
2,000—4,999	110	109(99.09)	73 (66 36)	110(100 00)	58 (52 73)
5,000 +	17	17(100 00)	17(100 00)	17(100 00)	17(100 00)
Total	**967**	**719(74 35)**	**166 (17 17)**	**967(100 00)**	**129 (13 34)**

Population range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of—			
		Market/*Hat*	Communication	Approach by *pucca* road	Power supply
1	2	7	8	9	10
— 499	360	1 (0 28)	33 (9 17)	49(13 61)	171(47 50)
500—1,999	480	9 (1.88)	90(18 75)	85(17 71)	324(67 50)
2,000—4,999	110	10 (9.09)	40(36 36)	40(36 36)	88(80.00)
5,000 +	17	8 (47 06)	11(64 71)	12(70 59)	16(94 12)
Total	**967**	**28 (2.90)**	**174(17 99)**	**186(19 23)**	**599(61 94)**

It can be seen that the maximum number of villages, i.e., 480 (49.64%) in the district fall in the population range of 500—1,999 followed by 360 villages (37.23%) in the population range of less than 499. The lowest number of villages is observed in the population range of 5,000+ being only 17 in number.

It may be of interest to the readers to note that the proportion of villages having different amenities varies in direct relation with their population range The maximum number of villages having different amenities have a population range of 5,000 + which also corroborates the fact that more facilities are generally available in larger villages than in the smaller ones.

Main staple food in the villages

The table alongside indicates that rice and wheat constitute the main staple food of the people in all the development blocks of the district

Table 16—Main staple food in the majority of villages in each Development Block.

Serial number	Name of the Development Block	Main staple food
1	2	3
1	Nawada	Rice, wheat
2	Akbarpur	Rice, wheat
3	Narhat	Rice, wheat
4	Hisua	Rice, wheat
5	Warisaliganj	Rice, wheat
6	Pakri Barawan	Rice, wheat
7	Kawakole	Rice, wheat
8	Gobindpur	Rice, wheat
9	Rajauli	Rice, wheat
10	Sirdala	Rice, wheat

Villages according to land use

The land utilization data of the villages in the district have been incorporated in the Village Directory. The terms and concepts have also been explained in the Analytical Note at the appropriate place. The following table gives the percentage of culturable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks :

Table 17—Distribution of villages according to Land Use

Sl. no.	Name of the Development Block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nawada	100	22,832.32	85.95	63.60
2	Akbarpur	144	19,126.78	87.18	58.52
3	Narhat	80	12,508.24	86.05	60.28
4	Hisua	80	17,485.96	80.48	51.57
5	Warisaliganj	84	18,096.88	84.13	65.91
6	Pakri Barawan	76	24,301.41	81.80	44.02
7	Kawakole	57	32,156.67	43.11	15.95
8	Gobindpur	116	25,442.99	64.80	58.44
9	Rajauli	115	26,947.69	45.06	50.01
10	Sirdala	115	30,132.05	65.91	58.40
	Total	967	229,030.99	69.24	53.15

It would be seen from the table that 69.24 per cent of the total area of the district is utilised for cultivation (cultivable area) and of this 53.15 per cent area is irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Akbarpur block with 87.18 per cent followed by Narhat, Nawada and Warisaliganj with 86.05, 85.95 and 84.13 per cent respectively. The lowest cultivable area is found in the Kawakole block with only 43.11 per cent.

The highest proportion of irrigated area to the total cultivable area is to be found in Warisaliganj block accounting for 65.91 per cent followed by Nawada with 63.60 per cent and Narhat block with 60.28 per cent. The proportion of irrigated area to the total cultivable area is found to be the lowest in the case of Kawakole block (15.95%). In the remaining blocks the percentage varies between 44.02 per cent and 58.52 per cent.

Growth, density and sex-ratio of urban population

The urban population of the district in each of the Censuses from 1951 togther with the percentage variation over the decades is indicated in Table 18 below. It also indicates the variation in density and sex-ratio in the urban population of the district in relation to State :

Table 18—Growth, Density and Sex-ratio of Urban Population in the district in relation to the State

	District						State					
Census year	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	613,724	36,513	5.95	+121.38	1,248	984	38,782,271	2,626,261	6.77	+38.14	2,320	842
1961	741,633	40,694	5.49	+ 11.45	1,405	917	46,447,457	3,913,920	8.43	+49.03	1,915	811
1971	893,937	50,006	5.59	+ 22.88	1,991	945	56,353,369	5,633,966	10.00	+43.95	2,032	807
1981	1,099,177	73,031	6.65	+ 46.10	2,908	916	69,914,734	8,718,990	12.47	+54.76	2,727	832

As shall be evident from the table, the rise in the proportion of the urban population to the total population in the district of Nawada has been very tardy over the decades from 5.95 per cent in 1951 to 6.65 per cent in 1981 as compared to that of the State which has shown an increase from 6 77 per cent in 1951 to 12 17 per cent in 1981

Column 5 of the table deals with the decadal percentage growth in the urban population of the district. The urban population has almost doubled itself in the successive Censuses in the district The trend of the growth of urban population in the State has been quite different. During the decade 1951—61 the urban population growth was of the order of 49.03 per cent whereas during 1961—71 it dipped to 13.95 per cent. Again during 1971—81 it has registered an increase of 54 76 per cent which appears to be quite high in comparison to the growth rates of the earlier decades and is, therefore, indicative of the faster rate of urban growth during the last decade.

The density of population in the urban areas of the district has also increased considerably over the decades as shall be evident from column 6 of the table. Between 1951 and 1981 the density of the urban population of the district has doubled from 1,248 persons per Sq Km. to 2,908 persons per Sq. Km. This clearly indicates that the towns of Nawada district are gradually becoming more crowded which may be attributed to increasing employment opportunities and better facilities of education, medical care, etc. The density of the urban population of the State on the other hand had not shown a similar rise till the 1971 Census In 1981 Census, the density of the urban population of the State had shown a considerable increase having risen from 2,032 in 1971 to 2,727 but it was still lower than that of Nawada which stood at 2,908 persons per Sq. Km.

Interestingly, the sex-ratio for the urban areas of Nawada district is more favourable for females in all the successive Censuses than that for the urban areas of the State. The demographers may like to study this phenomenon in detail to ascertain the reasons thereof.

Table 19—New Town Towns declassified in 1981 Census

There are 3 towns, viz., Nawada (M), Hisua (NAC) and Warisaliganj (NAC) in the district of Nawada. In 1971 Census also the position was the same. No new town has been added in 1981 Census nor has any town been declassified in the present Census Hence this table has not been presented

Receipt and expenditure in different towns

The table below gives the details of town finance in terms of per capita receipt and expenditure .

Table 20—Per capita receipt and expenditure in towns

Per capita

Class, name and civic status of the town	Receipt (in Rs)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV. Hisua (NAC)	0 51	0 06	0 45	0 18	0 07	0 08	..	.	0 03
III. Nawada (M)	17 25	1 10	16 15	12 79	1 44	3 76	6 74	.	0.85
IV Warisaliganj (NAC)	1 57	0 56	1 01	3 64	3 43	0 06	0.15	..	..
Total	**9 66**	**0.74**	**8.92**	**7 76**	**1 66**	**2 03**	**3 61**	..	**0 46**

It would be apparent from the above figures that the per capita receipt both through taxes and through all other sources is the highest in Nawada (M) whereas it is the lowest on both counts in Hisua (NAC) .

Per capita expenditure also is the highest in Nawada (M). However, the per capita expenditure incurred on general administration is observed to be higher in Warisaliganj (NAC) as compared to the other two towns The per capita expenditure on public works and other aspects is again the maximum in case of Nawada (M).

Schools per ten thousand population in towns

Primary and middle school education facilities are generally available in all towns The following table gives details of different categories of educational institutions per 10,000 population in different towns of the district :

Table 21—Schools per ten thousand population in towns.

Class, name and civic status of the town		Number per ten thousand population			
		Higher Secondary/ Inter/ PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1		2	3	4	5
IV	Hisua (NAC)	..	0 65	1 30	5 19
III	Nawada (M)	0 77	1 03	1 03	4 64
IV	Warisaliganj (NAC)	..	1 06	1 59	4 77
	Total	**0 41**	**0 96**	**1 23**	**4 79**

It would be seen from the above table that institutions like Higher Secondary School Inter/ PUC/Junior College are only situated in Nawada (M) accounting for an average of 0 77 institution per ten thousand population. As regards Secondary/Matriculation level schools there are, on an average, 1.06 schools per ten thousand population located in Warisaliganj (NAC) which is the highest followed by 1.03 such schools per ten thousand population in Nawada (M). Warisaliganj (NAC) also has the highest number of Junior Secondary/Middle Schools in the district with an average of 1 59 such schools per 10 000 population The average number of primary schools in the urban areas of the district is 4 79 per ten thousand population In this category Hisua (NAC) has the highest number of schools with an average of 5.19 per 10,000 population.

Beds in the medical institutions in towns

The table below furnishes information regarding availability of beds in the medical institutions in different towns :

Table 22—Number of beds in medical institutions in towns.

Class, name and civic status of the town		Number of beds in medical institutions per 1,000 population
1		2
IV	Hisua (NAC)	0.39
III	Nawada (M)	2.84
IV	Warisaliganj (NAC)	0 32
	Total	**1.67**

The number of beds in Medical Institutions per 1,000 population for urban areas of the district works out to be 1 67. This is the highest in case of Nawada (M) having 2.84 beds per 1,000 population and the lowest in Warisaliganj (NAC) with only 0.32 beds per 1,000 population.

Table 23—Proportion of slum population in towns

This table has not been prepared in case of Nawada district since it is restricted to only Class I (population 1 lakh and above) and Class II (50,000—99,999) towns and Nawada district does not have any of these categories.

Three important commodities imported, exported and manufactured

The table presents the most important commodities manufactured, exported and imported in the 3 towns of Nawada district.

Table 24—Most important commodities manufactured, imported and exported in towns.

Class, name and civic status of the town		Most important commodity		
		Manufactured	Exported	Imported
1		2	3	4
IV	Hisua (NAC)	Leather goods	Sugarcane	Coal
III	Nawada (M)	Soap	Rice	Sugar
IV	Warisaliganj (NAC)	Sugar	Sugar	Sugarcane

In only Warisaliganj town it has been observed that sugar, the most important commodity which is manufactured in the town is also the same most important item which is exported to other places. In other towns, however, the most important commodity manufactured and the most important commodity exported are not the same.

VD denotes Village Directory

P C A—denotes Primary Census Abstract.

DISTRICT CENSUS HANDBOOK

PART A

Village Directory

SECTION I—VILLAGE DIRECTORY

As already mentioned in the introductory part, the Village Directory presents particulars of amenities available in each village besides giving the list of villages in each Development Block (arranged in alphabetical order) and in respect of each village its area, number of households, population and land use data. The items of information on amenities available to the village include educational (col 5), medical (col. 6), drinking water (col. 7), post and telegraph (col. 8), market/*hat* (col 9), rail/road or other communication facilities (col. 10) and power supply (col 13). Other items of information such as copies of newspapers coming in the village, motor cycle scooter, car, jeep and tractor available in the village, etc., have been incorporated in the 'Remarks" column. Land use is shown as area under forests, irrigated land and sources of irrigation, unirrigated land, culturable waste and area not available for cultivation. For uninhabited villages information about land use only has been presented.

In the format the villages have been arranged in ascending order of their thana numbers which also represent their location code numbers within a development block. The villages which have been wholly merged in towns under the appropriate orders of the Government but continue to be borne on the Thana Jurisdictional Lists of the State Government, those treated as outgrowths of towns or urban agglomerations, and those declared as Census towns have also been shown in the Village Directory at the appropriate places according to their thana numbers with necessary explanation against each. No data have, however, been presented in respect of such villages.

The data presented in the Village Directory have been compiled on the basis of Mauzawar Notes prepared for each village by the local officials at the Community Development Block level.

For columns 5 to 10 of the Village Directory if a particular amenity such as educational or medical facility, etc., was not found to be available in the village, the distance from the concerned village to the nearest place where such an amenity was available has been indicated in broad ranges of distance, viz '(—5 Kms.)', '(5—10 Kms.)' and '(10+Kms.)'. The nearest place may be in the same development block, or in some other development block of the same district, or other district of the State or even outside the State. In view of the constraint of space the particulars of distance by range of the nearest place where any one of the medical or educational amenities, etc., is available has been shown provided none of the medical or educational amenities was available in the concerned village. For medical amenities, the dispensaries, community health worker has been taken as most modest facility. Similarly primary school has been considered as most modest educational amenity.

In column 6 of the Village Directory format, composite schools such as middle schools with primary classes or secondary schools with middle classes, etc. have also been included in the number of primary and middle schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes the number of primary schools in the village has been shown as three and that of middle school as one even though there are only three educational institutions in all. So also in the case of secondary schools, etc., if a similar situation exists.

Communication facilities and approach to village have been distinguished and shown separately to enable one to find out whether the village is served by any mode of public transport such as bus, rail, waterway, etc. (column 10) and whether the village

is approachable throughout the year or only during fair weather.

The pattern of presentation of land use data in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India and as adopted by the State Government. These are as follows

1. Forests
2. Not available for cultivation—
   (a) Lands put to non-agricultural uses,
   (b) Barren and unculturable lands.
3. Other uncultivated lands excluding fallow lands—
   (a) Permanent pastures and other grazing lands,
   (b) Lands under miscellaneous trees, crops and groves not included in the net area sown,
   (c) Culturable wastes.
4. Fallow lands—
   (a) Fallow lands other than current fallows,
   (b) Current fallows
5. Net area sown.

In the format of the Village Directory column 15 (Forest) is identical to category 1 above. Columns 16 (Irrigated) and 17 (Unirrigated) give the break up of cultivable land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (Culturable waste) corresponds to category 3 (a+b+c) above while column 19 contains information relating to category 2 (a+b)

The concepts of land use pattern are explained below :

Forest—The term includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State owned or private and whether wooded or maintained as potential forest land.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, e g, rivers and canals and other lands put to uses other than agricultural have been put under this category.

Barren and unculturable lands—Barren and unculturable lands relate to areas covered by mountains, deserts, etc Land which cannot be brought under cultivation except at a high cost is classed as unculturable, whether such land is in isolated blocks, or within the cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether or not they are permanent pastures and meadows have been put under this category Common village lands and grazing lands within forested areas are also included under this head.

Land under miscellaneous tree crops and groves—All cultivable lands, which are not included under the net area sown, but are put to some agricultural use have been put under this category Lands under casuarina trees, thatching grass, bamboo bushes and other groves used for fuel, etc, which are not included under 'orchards' are classed under this category

Culturable waste—All lands available for cultivation, whether or not taken up for cultivation, or abondoned after five years of cultivation for one reason or the other shall come under this category Such lands may be either fallow or covered with shrubs and jungles which are not put to any use They may lie in isolated blocks or within cultivated holdings.

Current fallows—Lands which are left fallow during the current year have been treated as current fallows (the term current year refers to the year in which data were collected).

Other fallows—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years have been treated as other fallows

Cultivated area—The sum of net areas sown and area under current fallows and other fallows gives the cultivated area.

The land use data furnished in cols. 15 to 19 have been presented in hectares upto two places of

the decimal after necessary conversion of land areas from acres and decimal fractions (as maintained and obtained from Revenue authorities from the field). The area of the village in column 3 has been shown in hectares

It will be seen that the total area under different land uses as indicated in columns 15 to 19 do not add up in some cases, to the total geographical area of the village. This can be attributed to the fact that area under water bodies, etc., are generally not included in the land use statistics of the village

As already mentioned in the earlier paragraphs, the information in Village Directory is presented for each village Development Blockwise

Following is the list of abbreviations used in the Village Directory.

(i) *Column 5—Educational*

P	—	Primary or Elementary School (upto class IV)
M	—	Middle or Junior Secondary School (upto class VIII)
H	—	Matriculation or Secondary School (upto class X)
PUC	—	Higher Secondary, Intermediate, Pre-University, Junior College.
Ac	—	Adult Literacy Class/Centre
C	—	College
I	—	Industrial School
Tr	—	Training School
O	—	Other Educational Institutions (Sanskrit Pathashala, Senior Basic School, Makhtab, etc.)

(ii) *Column 6—Medical*

H	—	Hospital
MCW	—	Maternity and Child Welfare Centre.
MH	—	Maternity Home
CWC	—	Child Welfare Centre
HC	—	Health Centre
PHC	—	Primary Health Centre
PHS	—	Primary Health Sub-centre
D	—	Dispensary
FPC	—	Family Planning Centre
TB	—	T.B. Clinic
NH	—	Nursing Home
RP	—	Registered Private Practitioner
SMP	—	Subsidised Medical Practitioner
CHW	—	Community Health Worker
O	—	Others

(iii) *Column 7—Drinking Water*

T	—	Tap Water
W	—	Well Water
Tk	—	Tank Water
TW	—	Tube-well Water
Hp	—	Handpump
R	—	River Water
F	—	Fountain
C	—	Canal
L	—	Lake
S	—	Spring
N	—	*Nullah/Nala/Nallah*
O	—	Others
NA	—	Information not available

(iv) *Column 8—Post and Telegraph*

PO	—	Post Office
TO	—	Telegraph Office
PTO	—	Post and Telegraph Office
Phone	—	Telephone connection

(v) *Column 10—Communications*

BS	—	Bus
RS	—	Railway Station
NW	—	Navigable Waterway (including river, canal, backwaters, etc.)

(vi) *Column 11—Approach to Village*

PR	—	*Pucca* Road
KR	—	*Kutcha* Road
NR	—	Navigable River
NC	—	Navigable Canal
NW	—	Navigable Waterway (other than river or canal)
FP	—	Foot Path

(vii) *Column 13—Power Supply*

ED	—	Electricity for domestic purpose
EAg	—	Electricity for agriculture purpose
EO	—	Electricity for other purposes like industrial, commercial etc.
EA	—	Electricity for all purposes listed above.

(viii) *Column 16—Irrigated by source*

GC	—	Government Canal
PC	—	Private Canal
W	—	Well (without electricity)
WE	—	Well (with electricity)
TW	—	Tube-well (without electricity)
TWE	—	Tube-well (with electricity)
Tk	—	Tank
R	—	River
L	—	Lake
Wf	—	Waterfall
O	—	Others

(ix) *Column 20—Remarks*

N	—	Copies of Newspapers coming in the village
M	—	Motor Cycles/Scooters available in the village.
C	—	Cars/Jeeps available in the village
T	—	Tractors available in the village.

It is likely that a village may have more than one institution/amenity of the same kind. Such a situation would arise only in the case of columns 5, 6 and 20. In such cases the number of such institutions/amenities has been given in parentheses after the appropriate symbol in Cols. 5 or 6 and just after the symbol in Col. 20

At the end of the Village Directory four appendices have been provided the details of which are given below :

Appendix I

This statement gives, for each development block, the number of villages having various levels and types of educational institutions, such as Primary School, Middle School, Adult Literacy Centre, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and number of each kind of such institutions, various types of sources of drinking water such as taps, tube-wells, etc., post and telegraph offices, power supply, railway station, bus stop, etc and also the number of villages not having any of these amenities.

Appendix II

This table gives for each non-municipal town (i.e., place treated as town only for Census purposes) the area under forest, area under irrigation, unirrigated land, culturable waste and area of land not available for cultivation. In Nawada district, however, there is no Census town. Hence this appendix does not find place in this volume.

Appendix III

This appendix gives development blockwise, the list of villages where no educational, medical and public health facilities, etc., are available. This statement is expected to be of considerable use in micro-level planning.

Appendix IV

This appendix gives the list of villages with the population of the Scheduled Castes and the Scheduled Tribes in various percentage ranges. Part A of the appendix deals with the population of the Scheduled Castes in the villages while Part B deals with the population of the Scheduled Tribes. Information is presented by the percentage ranges as indicated below :

For the Scheduled Castes (Part A) 0–5, 6–10, 11–15, 16–20, 21–30 and 31 and above.

For the Scheduled Tribes (Part B) 0–5, 6–15, 16–25, 26–35, 36–50 and 51 and above.

This statement will facilitate in identifying the villages having concentration of Scheduled Castes or Scheduled Tribes population for local area planning for the weaker sections of the population.

DEVELOPMENT BLOCK—NAWADA

Amenities available [if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges, viz.,—5 kms. 5—10 kms and 10+ kms., of the nearest place where the facility is available is given].

Note:1. *Excludes villages with no Scheduled Tribes population.

2. Development Block Nawhat contains no Scheduled Tribes population.

Town Directory

SECTION II—TOWN DIRECTORY

The Town Directory which forms Section II of Part A furnishes the data for each town in the district in six statements covering (1) Status and growth history; (2) Physical aspects and location of towns, 1979; (3) Municipal finance, 1978–79; (4) Civic and other amenities in towns: (4A) Civic and other amenities in Notified Slums, (5) Medical, educational, recreational and cultural activities and (6) Trade, commerce, industry and banking, 1979.

For presentation of data all the towns of a district have been arranged in alphabetical order. Where an urban agglomeration includes two or more independent towns, the names of the towns constituting the agglomeration have been indicated in the alphabetical arrangement of towns within the district and also repeated in alphabetical order under the name of the agglomeration. The particulars for each such constituent town have been furnished separately where they occur together under the name of agglomeration in order to present the particulars of the city agglomeration as a whole and also severally

For such places as are treated as outgrowths of a particular town, details have not been shown separately but have been included in the figures of the core town. However, the names of such outgrowths and their population have been incorporated in the Appendix to the Town Directory. Since none of the towns of Nawada is having any outgrowth, this appendix has not been prepared.

In Statements II, III and VI the relevant columns in respect of the urban agglomeration have been left blank because the information can be given only for the constituent units.

The land use data in respect of Census towns (non-municipal towns) have been included as an Appendix II to the Village Directory.

The details of the data covered in Statements I to VI and IV–A and the various codes used in the Town Directory statements are given below :

Statement I

The statement gives the list of towns and, for each town, the area, number of households, population as per each Census since 1901, population, density and sex-ratio as per 1961, 1971 and 1981 Censuses, besides showing the class and the status of civic administration of each town. The abbreviations used in this statement are explained below :

Column 2—

M. Corp.	...	Municipal Corporation
M	..	Municipality
CB	...	Cantonment Board/Cantonment
NAC	...	Notified Area Committee
CT	...	Census Town

Statement II

This statement gives, for each town, details relating to the physical aspects and location particulars as in 1979. The annual rainfall and temperature for each town and their distance by road from State, District and Subdivisional headquarters and from nearest city, railway station and bus stand have also been presented. It also gives information about navigable river/canal, if there is any, within 10 kilometres of the town. The information in columns 3 to 5 are generally based on the reports of the local officials However, for towns where this information was available from the Office of the Director General of observatories the same has been used. This has been indicated in the footnote to the statement.

The abbreviations used in this statement are :

Column 13—

R	...	River
C	...	Canal

Statement III

This statement gives the financial status of the civic administration of each town for the financial year 1978–79. This includes receipts through tax, properties and power, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services. The figures have been indicated in hundreds.

Statement IV

This statement furnishes information relating to civic and other amenities available to each town in 1979 besides giving the population of the Scheduled Castes and the Scheduled Tribes. The road length, the system of sewerage, number of different types of latrines, method of disposal of night-soil, source and capacity of protected water supply, fire fighting services and the number of various types of electricity connections are also presented in this statement. If fire-fighting service was not found to be available in the concerned town, the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where this facility was available along with the distance from the town in question has been mentioned. The information in this statement is based on the report of the local officials.

Different abbreviations used in this statement are as under :

Column 6—

PR	...	*Pucca* Road
KR	...	*Kutcha* Road

Column 7—

Statement IV-A

This statement gives, for each such area/locality as is known or identified as a slum in a Class I or Class II town, the available civic amenities in 1979. Since in the district of Nawada there is neither any Class I (population 1 lakh and above) nor Class II (population 50,000—99,999) town, Statement IV—A relating to the slums does not find place in the present volume.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available to each town, in 1979. It contains, besides the population of the town, the number of hospitals and dispensaries, hospital beds, medical, engineering, and other colleges, polytechnics, vocational training institutions, colleges and schools for various levels, adult literacy centres, working women's hostels, stadia, places of entertainment and libraries there. If a medical or an educational facility was not found to be available in the town the name of the nearest place with such a facility if in the same district or nearest district if in the same State or other State and its distance from the concerned town in question has been shown.

The information furnished in this statement is based on the reports of the local officials

The following abbreviations have been used in this statement :

DISTRICT CENSUS HANDBOOK
PART B

Urban/Village Primary Census Abstract

TOWN AND VILLAGE PRIMARY CENSUS ABSTRACT

Till 1971 Census, the Primary Census Abstracts used to be generated by breaking the Individual Slip pads and resorting to sorting of Individual Slips .As a distinct departure from this procedure, the tabulation system of 1981 Census has avoided the breaking of the pads and manual sorting of the Individual Slips. The data for the Primary Census Abstract have been obtained by compilation of the data available in Part II of the Household Schedule, viz , the Population Record.

The generation of Primary Census Abstract has been done by processing the schedules first for the 5 per cent sample blocks, followed by 15 per cent sample blocks, followed thereafter by another 20 per cent additional sample blocks and finally for the remaining 60 per cent of the Enumeration blocks. The figures were then aggregated for the required units

The Primary Census Abstract included in the District Census Handbook is the Village/Urban Primary Census Abstract which gives figures up to the village level in case of the rural areas and upto ward (or circle) level for urban areas. The information contained in the Village/Urban Primary Census Abstract relates to occupied residential houses, households, the total population, the population of the Scheduled Castes and the Scheduled Tribes, literates main workers by broad categories of main activity, marginal workers and non-workers by sex The broad categories of main workers have been classified as under--

1. Cultivators
2. Agricultural Labourers
3. Workers engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry.
4. Other Workers.

It therefore, indicates the basic socio-economic characteristics of the population for the various territorial units. The division of main workers in four categories only is a departure from the practice adopted for 1961 and 1971 Censuses when the figures of main workers were presented in nine categories. While the three categories, viz , cultivators, agricultural labourers and persons engaged in household industries have been retained the remaining categories have been grouped together under the category "Other workers".

The Village/Urban Primary Census Abstract is preceded by the District Primary Census Abstract furnishing data for total, rural and urban areas of the District, Subdivisions and Development Blocks and also for each town of the district.

An appendix has also been presented in the case of the Urban Primary Census Abstract which incorporates the basic population data enumerator's blockwise in each urban area This may be particularly useful for the administrative and election authorities in the urban areas.

Apart from this appendix, an annexure has also been presented showing the boundary of each enumeration block of a city/town and the important landmarks, roads, etc

Besides the general Primary Census Abstract, a chargewise PCA in respect of SC/ST has also been presented The format of this PCA is almost the same with slight changes

Rural Urban classification

As already mentioned in the beginning the data for the Village/Urban Primary Census Abstract have been presented for the revenue villages in the case of rural areas and urban wards (circles) in the case of urban area The concepts of village, town, urban agglomeration, etc , are explained in the introductory part of this volume The revenue village and in urban ward (circle), which may have comprised of several enumeration blocks, have been treated as units for presentation of data.

Mode of presentation

In the Village/Urban wardwise Primary Census Abstract the villages have been arranged in the ascending order of their thana numbers which also represent their location code numbers. After making entries for all the villages in a development block the figures for each town and ward/circle are given. The towns have also been arranged in the ascending order of their location code numbers

Similarly in the District Primary Census Abstract the development blocks have been arranged in the ascending order of the location code numbers assigned to them within the district. The data have been presented for the total, rural and urban areas of the district, subdivision and the development blocks and the data for the towns have been presented just after the development blocks in which they are situated.

Area figure

The geographical area of the district shown in column 3 is based on the figures supplied by the Surveyor General, India. The urban area figures for the district have been derived by adding up the area figures of the individual towns supplied by the local authorities. The rural area of the district has been arrived at by subtracting the urban area figure from the geographical area of the district supplied by the Surveyor General. The area figures of the villages have been adopted as maintained in the Thana Jurisdiction Lists. The rural area figures may not add up to the area figure of the district because, as mentioned above, the rural area of the district is computed by subtracting the urban area figure from the total area of the district as supplied by the Surveyor General, India.

In the Thana Jurisdiction Lists of the State Survey Office the area figures are available in acres and decimal fractions. They have, however, been converted into hectares for presentation in the Village Directory and the Primary Census Abstract.
