1. Introduction

1.0 On completion of the 1991 Census which was conducted during 9 February to 5 March 1991, the provisional population totals were released in the shape of 3 papers, viz. Paper 1, Paper 2 and Paper 3 of 1991. The publications gave the basic features of population and its growth, the distribution of population in rural and urban areas and distribution of workers in 4 broad categories of Cultivators, agricultural labourers, workers engaged in household industries and other workers. These data were presented down to the district level.

1.1 The final basic census results down to the lowest level of administration, viz. "village" level in the rural areas and "ward" level in the urban areas are contained in the Primary Census Abstract (PCA). The PCA gives the final population figures in respect of the area of the unit, the population, the number of residential houses, the number of households, the population in the age group 0 to 6, number of literates, population of Scheduled Castes and Scheduled Tribes, the distribution of main workers in 9 industrial categories and the number of marginal workers and non-workers. The 1991 PCA was finalised towards the later part of 1992 and the data have been made available from January, 1993 through the NIC Computer network all over the country as well as through floppy diskettes. Paper 2 of 1992 contains the summary of the PCA.

1.2 A separate PCA has been compiled for the Scheduled Caste population as well as the Scheduled Tribe population. The PCA for the Scheduled Castes and Scheduled Tribes is presented down to the CD Block level in the rural areas and town level in the urban areas. This PCA includes data for the Scheduled Castes as well as Scheduled Tribes on (i) the Scheduled Caste/Scheduled Tribe population, (ii) the number of households with the Scheduled caste/Scheduled Tribe members, (iii) Scheduled Caste/Scheduled Tribe population in the age group 0 - 6, (iv) the literate population, (v) the distribution of main

workers, in each of the 9 industrial categories, (vi) the number of marginal workers, and (vii) the number of non-workers by sex. The present publication gives these data for both Scheduled Castes as well as Scheduled Tribes at State/UT level only. Separate publications are being brought out by each Directorate of Census Operations which give the corresponding data down to the District/Taluk/Town/CD Block level.

II. SCHEDULED CASTES

2.0 The Scheduled Castes in each State/Union Territory are enumerated as per the list of such castes mentioned in the Presidential Order "The Scheduled Caste and Scheduled Tribe Lists (Modification Order 1956)" as amended from time to time. As per this Order, no Scheduled Caste has been listed in Nagaland, Andaman & Nicobar Islands and Lakshadweep. The persons beloging to a Scheduled Caste in a particular State/Union Territory will be enumerated as belonging to Scheduled Castes only if such a caste is listed in the Scheduled Caste List of that particular State/Union Territory.

2.1 The total population of Scheduled Castes as per the 1991 Census was 138.2 million, excluding Jammu & Kashmir where 1991 Census has not been taken. The Scheduled Castes constitute 16.48 per cent of the total population of India. Excluding Assam (where Census was not taken in 1981) and Jammu & Kashmir, the Scheduled Castes constitute 16.73 per cent of the total population in 1991 as against 15.81 per cent in 1981. Thus, the proportion of Scheduled Caste population has gone up in the country over the last decade.

2.2 The 15 major States of India, each having a poplulation of more than 10 million each, together contain about 97 per cent of India's population. Among these 15 States, the highest percentage of Scheduled Caste population was in Punjab (28.31%) and the lowest in Assam (7.40%). Apart from Punjab, West Bengal and Uttar Pradesh are the two other major States in which

the Scheduled Castes constitute more than 20 per cent of the total population. The proportion of Scheduled Caste population among states varies widely in each State. The 15 major States in terms of this proportion in descending order, are : Punjab (28.31), West Bengal (23.62), Uttar Pradesh (21.05), Haryana (19.75), Tamil Nadu (19.18), Rajasthan (17.29), Karnataka (16.38), Orissa (16.20), Andhra Pradesh (15.93), Bihar (7.41) and Assam (7.40).

2.3 In terms of absolute numbers, Uttar Pradesh had 29.3 million Scheduled Caste population, followed by West Bengal (16.1 million), Bihar (12.6 million), Tamil Nadu (10.7 million), Andhra Pradesh (10.6 million), Madhya Pradesh (9.6 million), Maharashtra (8.8 million), Rajasthan (7.6 million), Karnataka (7.4 million), Punjab (5.7 million), Orissa (5.1 million), Haryana (3.3 million), Gujarat (3.1 million), Kerala (2.9 million) and Assam (1.7 million). Uttar Pradesh and West Bengal together had one-third of the Scheduled Caste population of India.

2.4 The Decadal growth rate of the Scheduled Caste population has been more than that of the general population during the last decade : the Scheduled Caste decadal growth rate being 30.99 per cent and that of the general population 23.79 per cent.

2.5 Rural-Urban distribution of Scheduled Caste population : 18.72 per cent of the Scheduled Caste population lived in the urban areas as against 25.73 per cent of the general population living in the urban areas. That is, more than 81 per cent of the Scheduled Caste population live in rural areas. Among the major States, only 6 States had more than 20 per cent of the Scheduled Caste population living in the urban areas : the respective figures being Gujarat (37.9%), Maharashtra (36.6%), Karnataka (23.4%), Madhya Pradesh (21.9%), Tamil Nadu (21.3%) and Punjab (20.6%).

2.6 Children in the age group 0 - 6 and sex ratio : The

children in the age group 0 - 6 constituted 19.63 per cent of the Scheduled Caste population as against 17.94 per cent for the general population. The Scheduled Caste population had more children than the general population, which appears to show a higher birth rate among the Scheduled Caste population. The sex ratio (defined as females per 1000 males) for the Scheduled Caste population was not much different from that of the total population : the respective figures being 922 and 927. The pattern of sex ratio of the Scheduled Caste population among various States is almost akin to that of the general population of the various States.

2.7 Literacy : The literacy rate of the Scheduled Caste population aged 7 years and above is 37.41 per cent for males and 23.76 per cent for females. These figures are much lower than the corresponding figures for the; general population. However, the literacy rate of the Scheduled Caste population has increased from 25.82 per cent in 1981 to 37.21 per cent in 1991 (excluding Assam and Jammu & Kashmir). In case of males, the increase is from 37.67 per cent to 49.74 per cent while in case of females the increase was from 13.00 per cent to 23.52 per cent. The rate of increase of female literacy among the Scheduled Castes has thus been much higher over the last decade than the male literacy rates. This is in tune with the trends noticed for the general population. It is, however, seen that the literacy rates for the States of Uttar Pradesh, Bihar and Rajasthan are much lower for the Scheduled Caste population than that for the general population. The literacy rates for the Scheduled Caste population and the total population for three States were : 26.85 per cent and 41.06 per cent in Uttar Pradesh. 19.49 per cent and 38.48 per cent in Bihar & 26.29 per cent and 38.55 per cent in Rajasthan. The position in respect of literacy among the Scheduled Caste women was much worse in these States. The female literacy rates among the Scheduled Caste population and total population respectively were 10.69 and 25.31 in Uttar Pradesh, 8.31 and 20.44 in Rajasthan and 7.07 and 22.89 in Bihar.

2.8 Workers : The work participation rate (WPR) (total workers as percentage of total population) of the Scheduled Caste population is 39.25 which is higher than the work participation rate of the general population (37.46). This is mainly due to a higher participation rate among the Scheduled Caste women - the WPR for Scheduled Caste women being 25.98 as against 22.25 for the general population. In case of males, the WPR for the Scheduled Castes is 51.48 as against 51.55 for the general population. The female work participation rate among the Scheduled Caste population is much higher than the all-India average in Andhra Pradesh (46.7), Tamil Nadu (40.9), Karnataka (36.6), Maharashtra (36.2), Himachal Pradesh (35.6), and Madhya Pradesh (35.3). As in the case of general population, the lowest female work participation rate among the Scheduled Castes has been observed in Punjab (5.4). It is commonly believed that the female work plarticipation rate is much lower in case of Punjab and Haryana due to the cultural factors and the reluctance among the higher caste women to report themselves as workers even through they may be participating in some economic activity, particularly in the agricultural sector. The low female participation rate among the Scheduled Castes however appears to be surprising in the light of this widely held belief.

2.9 77.11% of the Scheduled Caste main workers are engaged in the primary sector, 9.83% in the secondary sector and 13.06% in the tertiary sector. The percentage of main workers in the primary sector among the Scheduled Castes is much higher than that for the general population (67.37%). However, over the last decade, there has been a marginal decline in the percentage of main workers in the primary sector by roughly 2 percentage points. There has also been a marginal decline in the proportion of main workers in the secondary sector. On the other hand, the percentage of main workers engaged in the tertiary sector has increased from 10.78 per cent to 13.06 per cent. This is in consonance with the trend observed among the general population. However, it may be mentioned here that

roughly half the number (49.06%) of main workers among the Scheduled Castes work as agricultural labourers, whereas in the total population, the agricultural labourers constituted 26.09 per cent only.

III. SCHEDULED TRIBES

3.0 As in the case of Scheduled Castes, the Scheduled Tribes are also listed in each State/Union Territory separately under the Presidential Order "The Scheduled Castes and Scheduled Tribes Lists (Modification Order 1956)" as amended from time to time. No Scheduled Tribe has been listed in Haryana, Punjab, Chandigarh, Delhi and Pondicherry as per this Presidential Order.

3.1 67.76 million persons were counted in 1991 Census as belonging to Scheduled Tribes in different States/UTs in India, excluding Jammu & Kashmir, constituting 8.08 pur cent of the total population. The percentage of Scheduled Tribes has marginally increased from 7.83 per cent in 1981 to 7.95 per cent in 1991 (while making the comparison between 1981 and 1991, both Assam and Jammu & Kashmir are excluded as Census was not taken in Assam in 1981 and in Jammu & Kashmir in 1991). The Scheduled Tribe population has increased by 25.67 per cent during the decade 1981-1991. This growth rate is more than the growth of the total population of the country (23.79 per cent).

3.2 In some of the States and Union Territories, the population was predominantly Scheduled Tribe. For example, in Mizoram 94.75 per cent of the total population belongs to Scheduled Tribes. The other States/Union Territories with predominantly Scheduled Tribe population were : Laksha-dweep (93.15 per cent), Nagaland (87.70), Meghalaya (85.53), Dadra and Nagar Haveli (79.99) and Arunachal Pradesh (63,66). Manipur and Tripura also had substantial proportion of population as Scheduled Tribes, the respective proportions being 34.41 and 30.95 per cent. Among the 15 major States, Madhya Pradesh had

the largest proportion of Scheduled Tribe population (23.27 per cent) followed by Orissa (22.21). Gujarat, Assam and Rajasthan were the other three major States in which more than 10 per cent of the population belonged to Scheduled Tribes, the respective percentages being 14.92, 12.82 and 12.44.

3.3 Of the total Scheduled Tribe population of 67.76 million counted in different States/UTs in India, 22.73 per cent are in Madhya Pradesh, 10.80 per cent in Maharashtra and 10.38 per cent in Orissa. Thus, roughly 44 per cent of the Scheduled Tribe population of India live in these three States only. Going a little further, 71 per cent of the Scheduled Tribe population of India live in six States, viz. Madhya Pradesh, Maharashtra, Rajasthan, Gujarat, Bihar and Orissa. In terms of absolute numbers, the Scheduled Tribe population was 15.4 million in Madhya Pradesh, 7.3 million in Maharashtra, 7.0 million in Orissa, 6.6 million in Bihar, 6.2 million in Gujarat, 5.5 million in Rajasthan, 4.2 million in Andhra Pradesh, 3.8 million in West Bengal, 2.9 million in Assam 1.9 million in Karnataka, 1.5 million in Meghalaya and 1.1 million in Nagaland. All other States and Union Territories together had a little over 4 million Scheduled Tribe population; there being absolutely no Scheduled Tribe population recognised in Haryana, Punjab, Chandigarh, Delhi and Pondicherry.

3.4 Rural-Urban distribution of Scheduled Tribe population : Only 7.39 per cent of the Scheduled Tribe population of India live in urban areas as compared to 25.73 per cent of the general population and 18.72 per cent of the Scheduled Caste population living in the urban areas. Thus, roughly 93 per cent of the Scheduled Tribe population are rural based. Of the 15 major States, only 3 States, namely, Karnataka, Maharashtra and Tamil Nadu had more than 10 per cent of their Scheduled Tribe population living in the urban areas : the respective percentages being 14.94, 12.47 and 12.01. The percentage of Scheduled Tribe population living in urban areas in other major States are : Andhra Pradesh (7.6), Assam (3.4), Bihar (7.0),Gujarat (8.1),

Kerala (3.5), Madhya Pradesh (4.8), Orissa (5.1), Rajasthan (4.6), Uttar Pradesh (5.9) and West Bengal (5.2).

3.5 Children in the age group 0 - 6 and sex ratio : The children in the age group 0 - 6 constitute 20.18 per cent of the Scheduled Tribe population in India as against 17.94 per cent for the total population and 19.63 per cent for the Scheduled Caste population. Thus, the Scheduled Tribe population had a relatively higher population of children than the general population as well as Scheduled Caste population. The sex ratio (defined as females per 1000 males) for the Scheduled Tribe population was 972. This is much more favourable to women than the sex ratio among the total population(927) or the Scheduled Caste population (922).

3.6 Literacy : 29.6 per cent of the Scheduled Tribe population in the age group 7 years and above is found to be literate as per the 1991 Census; the literacy rate being 40.65 for males and 18.19 for females. These figures are much lower than the corresponding figures for the total population of India. In fact, these figures are even lower than the corresponding figures for the Scheduled Caste population. If we were to take out the population of North-Eastern States like Nagaland, Mizoram, Meghalaya and Manipur which have a predominantly Scheduled Tribe population and very high literacy rates, the literacy rate of the Scheduled Tribe population would be come much lower. That is, the literacy levels among Scheduled Tribe population in other States are extremely low. In Andhra Pradesh, the literacy rate of the Scheduled Tribe population was just 17.16 per cent. In Rajasthan, it was 19.44 per cent. In case of females, the literacy rates for the Scheduled Tribe population are extremely low; in Rajasthan (4.4), Andhra Pradesh (8.7), Orissa (10.2), Madhya Pradesh (10.7), Bihar (14.8) and Uttar Pradesh (15.0).

3.7 Workers : The work participation rate (total workers as percentage of total population) of the Scheduled Tribe population is 49.30 per cent which is much higher than that for the general

population (37.46) and also for the Scheduled Caste population (39.25). This is primarily due to very high participation rates among the Scheduled Tribe women. In case of males, the work participation rate of the Scheduled Tribe population is 54.74 per cent which is somewhat higher than that of the total population (51.55) as well as Scheduled Caste population (51.48 per cent). But the female work participation rate among the Scheduled Tribes is 43.71 per cent as against 25.98 per cent for the Scheduled Caste and 22.25 per cent for the total population of the country. The female work participation rate is generally quite high in most of the States and Union Territories. Among the major States, the highest female work participation rate among the Scheduled Tribes is found in Andhra Psradesh (50.63 per cent) and the lowest in West Bengal (27.43 per cent). The Scheduled Tribe population is largely rural based which has a higher female work participation rate than the urban population. Secondly, the Scheduled Tribe population may be engaged predominantly in such activities as forestry, which are female oriented. Thirdly, because of the extremely poor literacy level of Scheduled Tribe women, the school going female population would be much less thereby increasing the participation of younger girls in economic activity.

3.8 90.03 per cent of the main workers among the Scheduled Tribes are in the primary sector, 3.85 per cent in the secondary sector and 6.12 per cent in the tertiary sector. The corresponding figures of 1981 were 90.71, 4.57 and 4.72. Thus, there has been a very marginal decline in the primary sector, but there has been a considerable decline in the secondary sector leading to a substantial increase in the proportion in tertiary sector. There appears to be a clear shift away from the secondary sector to the tertiary sector. Within the agricultural sector, 54.51 per cent of the Scheduled Tribe main workers have reported as cultivators while 32.69 per cent have reported as agricultural labourers. This is in sharp contrast to both the Scheduled Caste population as well as the total population of the country. In case of Scheduled Caste population, 49.21 per cent

of the main workers were agricultural labourers while among the total population, the percentage of agricultural labourers was 26.09.
