PREFACE

The Economic Tables of 1991 Census are mainly based on the questions on whether the respondent has worked any time at all in the previous year, if he has then whether he worked for a major part of the previous year, details of his activity and in the case of those persons who have not worked in the previous year whether they are seeking work i.e. Questions 14-16 in the individual slip. These tables generated on computer provide the distribution of population by economic activity and distribution of workers by industrial and occupational classification of their activity. Information on age, educational level and employment status of the workers are also available through these tables.

2. In the 1991 Census 35 tables have been prepared on economic activity. Of these, 14 tables are based on a 10 percent sample in states with a population of 10 million and above and on full count basis in the remaining states and union territories. The remaining 21 tables dealing with detailed classifications of main workers other than cultivators and agricultural labourers, marginal workers and non workers seeking work have been prepared on the basis of full count in all states and Union territories.

3. The economic tables based on sample have already been released on floppy disks usable on personal computers. These are now being brought out in printed form. These are being published in several volumes.

4. A general note on the economic tables of 1991 Census which gives detailed information regarding presentation of tables, concepts used and the relevant questions along with the relevant extracts from the manual of instructions to the enumerator is given in each volume for ready and comprehensive reference of the user.

5. A separate fly-leaf is also given for each table regarding the contents of the table.

6. The 1991 Census Operations were conducted under the overall guidance of my predecessor Shri A.R.Nanda. This work of coding and editing of Individual Slip records were completed in the Directorates of Census Operations and the job of data entry was done in the fifteen Direct Data Entry Centres of this organization. Thereafter editing and tabulation on computer was done in the Data Processing Division at the headquarters. The dissemination of data on computer media and preparation of camera ready copy of the publications were also done in the Data Processing Division.

7. The job of scrutiny of the computerised tables, preparation of notes of this publication and arranging the printing of this publication was ably carried out under the overall supervision and guidance of Shri S.P.Sharma, DRG (C&T). The scrutiny of the quality of tables was done by a Task Force of officers of this office specially constituted for this purpose.

8. I hope this publication will prove useful to administrators, planners, demographers, research scholars and other data users.

TABLE B-6(F) : MARGINAL WORKERS CLASSIFIED BY INDUSTRIAL CATEGORY OF WORK AND MAIN ACTIVITY

FLY-LEAF

This table gives the break-up of marginal workers by nine broad industrial categories separately for all areas, rural areas and urban areas at State and District level.. The marginal workers in each category have been further classified by their main activity; household duties, students, dependents, retired persons or rentiers, beggars, vagrants etc., inmates of Institutions and others. This table indicates the industrial composition of marginal workers by their activity.

This table has been compiled on the basis of information collected through question numbers 3, 14A, 14B, 15A, and 15B of the Individual Slip. These questions along with the instructions are reproduced in the general note.

This table partly corresponds to B-6 of the 1981 Census.

TABLE B-7 (F) : MAIN WORKERS (EXCLUDING CULTIVATORS AND AGRICULTURAL LABOURERS) WITH OTHER WORK CLASSIFIED BY INDUSTRIAL CATEGORY OF OTHER WORK AND MAIN ACTIVITY

FLY-LEAF

This table gives the break up of main workers other than cultivators and agricultural labourers in household industries and non-household industries, trade, business or service by nine broad industrial categories of secondary work. The main workers have been further classified by section of National Industrial Classification, 1987. This table indicates the industrial composition of secondary work of main workers engaged in household industries and non-household industries, trade, business, or service. This table is presented for all areas, rural areas and urban areas at State and District level. The National Industrial Classification (N.I.C.1987) is reproduced as Appendix - II to general note.

This table has been compiled on the basis of information collected through question numbers 3, 14A, 14B and 15A of the Individual Slip. These questions alongwith the instructions are reproduced in the general note.

The table partly corresponds to table B-6 of the 1981 Census.

TABLE B-8(F) : MARGINAL WORKERS BY INDUSTRIAL CATEGORY, AGE AND SEX.

Fly - LEAF

This table presents the distribution of marginal workers by age, sex and nine broad industrial categories of marginal work. The age-groups adopted are 5-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-49, 50-59, 60-69, 70-79, 80+ and age not stated , sub totals for age-groups 15-59 & 60+ are also given.

This table has been presented for all areas, rural areas and urban areas at State and District level. The table has been compiled on the basis of information collected through question numbers 3, 4, 14A, 14B and 15B of Individual Slip. These questions along with the instructions are reproduced in the general note.

This table corresponds to the table B-7 of 1981 Census.
