

CENSUS OF INDIA 1991

SERIES - 25

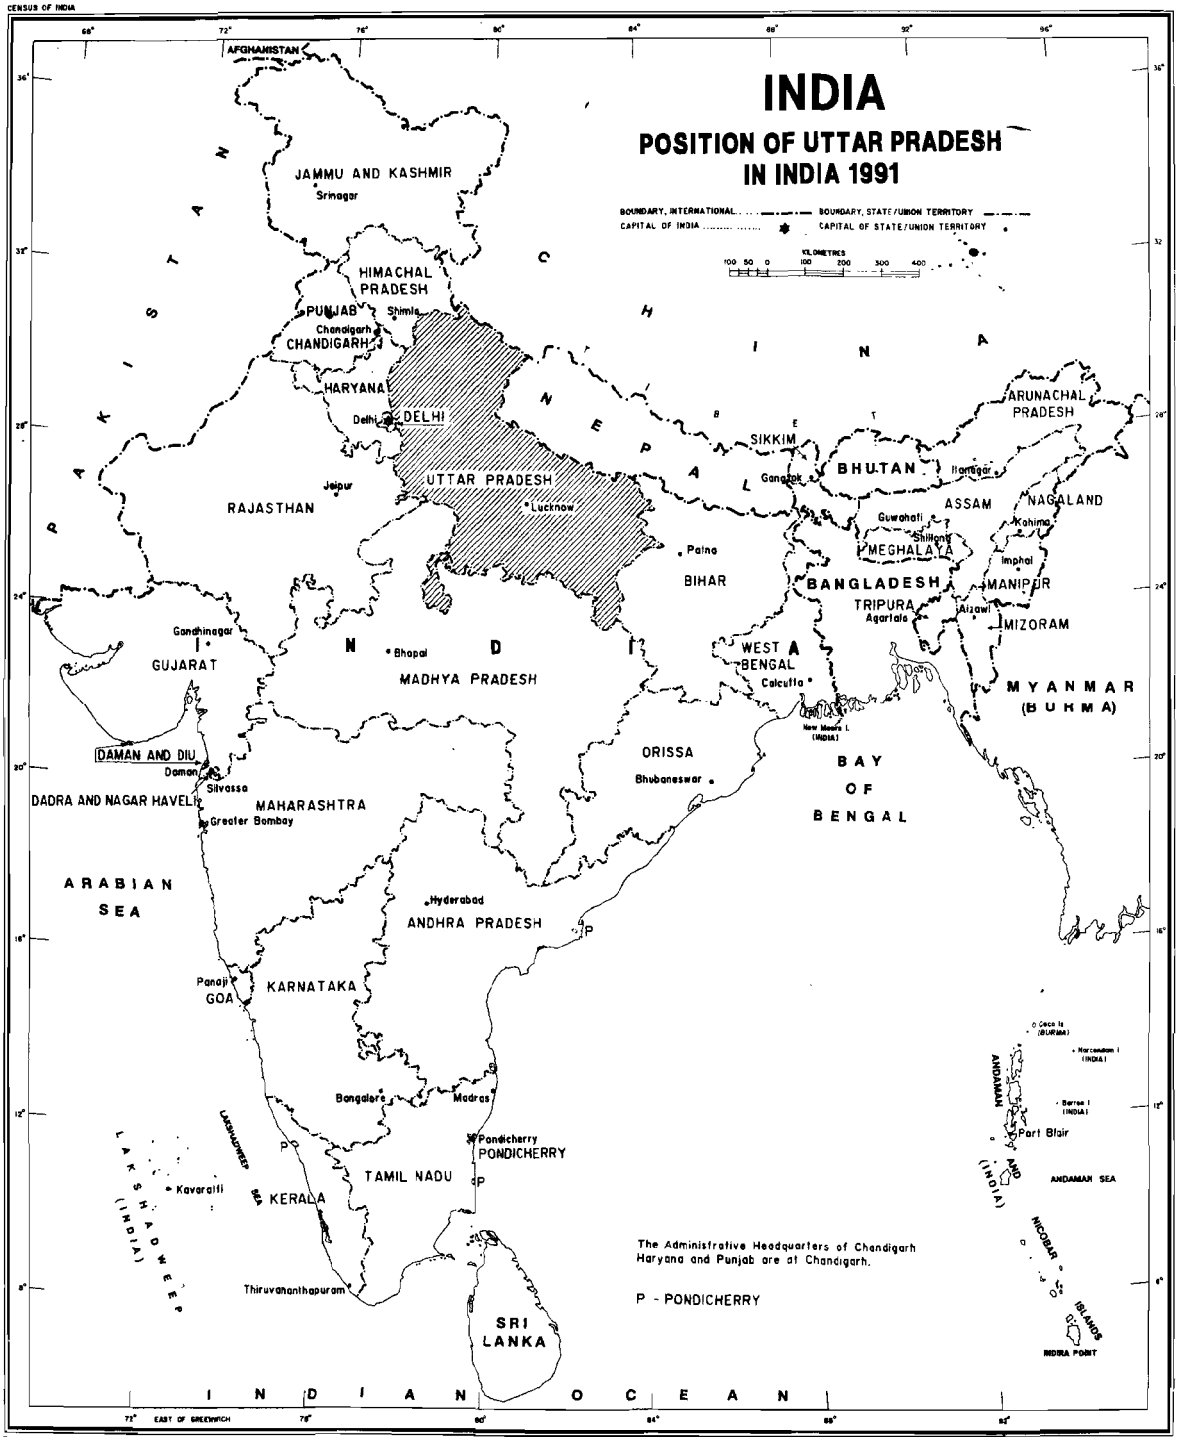

UTTAR PRADESH

PART II-B (i)

PRIMARY CENSUS ABSTRACT
General Population

Directorate of Census Operations,
Uttar Pradesh

CENSUS OF INDIA

Based upon Survey of India map with the permission of the Surveyor General of India.

The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern Areas (Reorganisation) Act, 1971, but has yet to be verified.

PREFACE

The 1991 Census marked the thirteenth and the last census of this century as reckoned from the year 1872 and the fifth since Independence. The Primary Census Abstract(PCA) comprises basi information about the area, number of occupied census houses, number of household, total population (including institutional and houseless population) number of persons belonging to scheduled castes and scheduled tribes separately, literates, main workers by nine industrial categories, marginal workers and non-workers. Part II-B is being brought out in two volumes, volume(i) contains the PCA in respect of General Population and volume (ii) PCA for Scheduled Castes and Scheduled Tribes Populations.

The basic work after the field operations, like scrutiny, editing and matching of schedules and the compilation of the PCA at village level was done by the Deputy Directors/Assistant Directors of Census Operations in the Regional Tabulation Offices. I would like to place on record my appreciation for the dedicated efforts made by Regional Deputy Directors/Assistant Directors in this regard. The supervisory officials, in Regional Tabulation Offices, of the rank of Investigators; Statistical Assistants, etc.; deputed by the Census Directorate, had also performed their job ably. I thank them all for their excellent performance.

The welcome change in the presentation of this volume during 1991 census is the compilation and presentation of the PCA data at the level of Dev. Block, which had not been done in previous census. After finalising the village level data at Regional Tabulation Offices, for the first time the entry of the PCA data had been done at the National Informatics Centres at Lucknow, in the shortest possible time. I am also grateful to Dr. Rakesh Goel, State Informatics Officer, Dr. L.R. Yadav, Shri Man Mohan Singh, Senior System Analysts for lending full cooperation.

I must record my deepest sense of gratitude to Shri A.R. Nanda, Ex-Registrar General and Census Commissioner of India and also the present Registrar General and Census Commissioner of India, Dr. M. Vijayanunni for their valuable guidance and encouragement. I got full co-operation and useful suggestions from Shri N. Rama Rao, Ex-Deputy Registrar General (C&T) and Shri K.S. Natarajan, Ex-Deputy Registrar General (Demography) and the present Deputy Registrar General (C&T) Shri S.P. Sharma and quite a number of other officers of the Registrar General Office. I owe a deep sense of gratitude to all of them.

I express my deep gratitude for the Ex-Director of Census Operations, Uttar Pradesh, Shri Vijender Paul, under whose guidance the entire operation was carried out successfully.

The drafting of General Note and Analytical Note was done by Shri Mohd. Ahmad, Investigator under the supervision of Shri K.C. Upadhyaya, Assistant Director. The maps included in this volume have been prepared under the supervision of Shri J.C. Srivastava, Research Officer (Map). I am also enclosing a separate list of other staff members of the Directorate, who were involved in different stages of finalisation of PCA and I thank them all for their dedicated efforts.

Lucknow

GENERAL NOTE

General Note

The 1991 Census enumeration was conducted during February - March-1991 with sunrise of March 1, 1991 as the reference date. Due to Holi festival the houseless person were enumerated on the night of the February 27 instead of February 28 and revisional round was conducted from 1 to 5 March, 1991. In snow-bound areas of districts Uttarkashi, Chamoli and Pithoragarh the enumeration was conducted nonsynchronously during September, 1990 with sunrise of October 1, 1990 as the reference date. After the enumeration work was completed the provisional population total were compiled quickly and declared in March, 1991. Later on through Paper-1 of 1991 "Provisional Population Totals" the basic data were released to the Press for public use.

The enumeration was preceded by a preliminary operation called 'Houselisting' which was conducted in U.P. in the months of September—October, 1990. An enterprise list which formed part of the Economic Censes was also canvassed during the houselisting operations. The data collected through the houselist are being published in a seperate volume called "Part-VII-Tables on Houses and Household Amenities".

During enumeration household schedule was filled for each household and for every member of the household and Individual Slip containing 23 question was filled. In the Household Schedule details of every member of the family, such as name, relation with head of household, sex, age, marital status, mother tongue, religion, wheather scheduled caste or scheduled tribe, literacy status and work participation status were canvassed. Individual Slip contained above cited details alongwith information on two other languages known, migration status and reason of migration. Number of children born and surviving sexwise, in respect of ever married women and fertility of currently married women were also collected through Individual Slip. Information relating to ex-servicemen was collected for the first time at the 1991 Census. PGDHTP Schedule devised by C.S.I.R., Government of India was also filled by the person whose educational standard was post-graduate or who held any technical degree or diploma. The schedules and forms used in houselisting, enumeration and compilation of PCA are given in annexures.

Compilation of Primary Census Abstract (PCA)

At the 1991 census as well manual processing of the individual slips and household schedules was done in RTO,S without breaking their pads. In the Regional Tabulation Office a block compilation sheet was prepared in respect of every enumeration block after matching and editing the entries in both the schedules viz. Individual Slip and Household Schedule. The purpose behind editing and matching the entries in the household schedules with those of the individual slips to ensure that the particulars in both the documents are fully matched. Than the figures for each block compilation sheet were copied in the Master Primary Census Abstract, wherein totals of every village, in case of rural areas and for each ward for urban areas were struck. Thereafter, rural primary census abstract was prepared separately giving figures of C.D. Blocks and villages arranged in order of location code. Similarly for Urban areas Primary Census Abstract was prepared separately for each form giving wardwise figures. The district/state Primary Census Abstract was thus prepared.

The PCA in 1991 more or less corresponds to the PCA of 1981. However at the 1981 census the main workers were classified in four industrial categories, while in 1991, PCA, the main workers have been classified under nine industrial categories. Figures relating to population aged 0—6 years are also presented seperately for the first time.

Concepts and Definition's of various characteristics

Rural and Urban Classification

Census data have always been presented separately for rural and urban areas. The basic unit for rural area is the revenue village which has a definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village has been treated as one unit for presentation of census data. Each forest officers range has been treated as one unit. The following criteria were adopted for treating a place as urban for the 1991 census.

(a) All statutory towns i.e. all places with a Municipal Corporation, Municipal Board, Cantonment Board or Notified Town Area.

(b) All other places which satisfy the following criteria.

  (I) A minimum population of 5,000;

  (II) Seventyfive per cent of the male working population engaged in non-agricultural (and allied) activity and;

(iii) A density of population of at least 400 per sq. km.

A town with a population of 100,000 and above was treated as a City.

Building, Census House and Household

Building:— A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Census House:— A "Census House" is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc; used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

It may be difficult to apply the definition of census house strictly in certain cases. For example in an urban area a flat has five rooms, each room having direct entrance to the common stair-case or courtyard. By definition this has to be treated as five census houses. If all these five rooms are occupied by a single household, it is not realistic to treat them as five census houses. In such a case, singleness of use of these rooms alongwith the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room is occupied by an independent household, then each such room should be treated as a separate census house.

Household:— A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called Institutional Households. There may be one member households. For census purposes, each one of these types is regarded as a Household.

Literates:— A person who can both read and write with understanding in any language is treated as a literate. It is not necessary that a person should have received any formal education or should have passed any educational standard. Mere ability to sign one name is not adequate to consider him as literate person. A person should at least be able to both read and write a simple letter with understanding in any language. All children of the age 6 years or less are treated as illiterate, even though they may be going to school and can read and write, for 1991 census. It has been decided to use only effective literacy rates i.e. the ratio of literates and population excluding the age group of 0—6 for the 1991 census.

Scheduled Castes and Scheduled Tribes

During the 1991 census enumeration, information was asked about each person whether he/she belonged to SC or ST. Earlier, according to the Constitution of India, Scheduled Castes could belong to only Hindus and Sikhs. But as a result of the Constitution (Scheduled Castes) orders (Amendment) Act, 1990, those scheduled castes who returned their religion as Buddhist, Nav/Neo Buddhist have also become eligible to be enumerated as scheduled castes alongwith Hindus and Sikhs provided their caste name finds place in the list of scheduled castes of the State in which they are being enumerated.

A member of a scheduled tribe may belong to any religion. However, a person will be reckoned as belonging to Scheduled Tribe only if his/her tribe name appears in the list of Scheduled Tribe applicable to the State where he or she is being enumerated.

Economic Activity

In the Primary Census Abstract of 1981 Census data for main workers were presented for the four categories: cultivators, agricultural labourers, household industry and other workers. In the 1991 census, workers are classified into nine industrial categories in the Primary Census Abstract i.e. I-cultivators II-Agricultural labourers, III-Livestock, forestry, fishing, hunting and plantations, orchards and allied activities, IV-Mining and quarrying, V(a)- Manufacturing, processing, servicing and repairs in Household Industry, V(b) Manufacturing processing, servicing and repairs in other than Household Industry, VI-Construction, VII-Trade and Commerce, VIII-Transport, storage and communications, IX-other services.

Definition of work

Work was defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. According to this definition, the entire population has

been classified into three main categories i.e., main workers, Marginal workers and non-workers.

Main Workers

Main workers were those who had worked for the major part of the year preceeding the date of enumeration i.e., those who were engaged in any economically productive activity of 183 days or six months or more during the year. Main workers were classified into nine board industrial categories, described below:—

Category I—Cultivators

A person was considered as cultivator if he or she was engaged either as employer, single worker or family worker in cultivation of land owed or held from government or held from private persons or institutions for payment in money, kind or share of crop. Cultivation included supervision or direction of cultivation. Cultivation involved ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and fibre crop, cotton, etc. Fruit growing or vegetable growing, keeping orchards, or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantation's did not include cultivation. Those engaged in these activity would have to be classified other than cultivators.

Category II—Agricultural Labourers

A person who worked in another persons land for wages in cash, kind or share of crop was regarded as an agricultural labourer. Such a person had no risk in cultivation but merely worked in another persons land for wages. An agricultural labourer has no right of lease or contract on land on which he worked.

Category III—Livestock, forestry, fishing, hunting, plantations, and orchards and allied activities

This includes livestock production, hunting, trapping and game propagation, forestry and logging, fishing in sea, coastal and inland waters, collection of pearls, conches and other sea products etc.

Category IV —Mining and quarrying

This includes coal mining, crude petroleum, natural gas, metal ore mining, stone quarrying and other type of mining, salt, chemicals, precious stones, mica and gypsm etc.

Category-V(a) — Manufacturing, processing, servicing and Repairs in household industry

Household industry is defined as an industry conducted by the head of the household himself/herself and/or by the member of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The large proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

Category V(b)—Manufacturing, processing, servicing and repairs in other than household industry

It includes those engaged in all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified a Household industry.

Category VI Construction

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph telephones, water ways, reservoirs, etc.

Cagegory VII—Trade and Commerce

This cagegory includes workers engaged in any capacity in wholesale or retail trading activity and commercial transaction relating to imports and exports, real estate and property, stocks and shares, insurance, money-lending, banking, etc.

Category VIII—Transport, storage and communications

This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraph, telephones, wireless signalling, information and broadcasting are also included.

Category-IX-Other-Workers

This category includes public utility services like electricity, gas, water supply, sanitary services, Central, State or Municipal employees, professional services, trade and labour associations, recreational services, political workers, teachers, artists, etc.

Marginal Workers

Marginal workers were those who worked any time at all in the year preceding the enumeration but did not work for a major part of the year i.e., those who worked for less than 183 days or six months.

Secondary work— Any other work or secondary work as reckoned only if the person was engaged in some economically productive work, even if marginal, in addition to the main work. If a person whose economic activity was shown as a clerk in a government office or a teacher also attended to cultivation even by way of

direction or supervision, such additional activity was recorded as secondary work.

Non-workers— Non-workers were those who had not worked at all any time in the year preceeding the date of enumeration. Non-workers are those who are not mainly engaged in any economically productive work. They comprise (i) those basically engaged in unpaid household duties and doing no other work; (ii) all full time student and children attending school, (iii) all dependents such as infants and children not attending school, persons permanently disabled from work owing to illness, oldage etc. (iv) retired persons and rentiers, (v) beggars, vagnants, independent woman without indication of source of income, those of unsepecified sources of subsistence, (vi) inmates of penal, mental or charitable inst itutions, convicts in jails.

ANALYTICAL NOTE

ANALYTICAL NOTE

Households per 1000 occupied census houses and per sq.km. of area

Statement-I shows state and each of its district, the number of households per 1000 occupied census residential houses and number of households per sq.km. of area. No of households per 1,000 census houses (column No. 2, 3 and 4) have been worked out by dividing number of household by the number of occupied residential census houses shown in column 5 and 6 of the PCA respectively. Columns No.5, 6 and 7 of the statement have been worked out by dividing the number of household by the area shown in column 4 of the PCA.

It is observed that the number of households per sq.km. of area has increased in every districts in 1991 over 1981 because the total area has not changed, while the number of households has increased.

STATEMENT-I

Number of households per 1,000 census houses and the number of households per sq. kms. 1991

Ranking of districts by population size

In Statement-2, districts have been arranged according to their population in 1991. It also gives population of each district and its comparative ranking for the 1981 Census. District Allahabad has retained its 1st rank and Varanasi, Deoria, Moradabad, Gonda, Meerut, Aligarh, Jaunpur, Azamgarh, Gorakhpur and Faizabad have also retained their positions at the 1991 census in comparison to 1981. Districts Ghaziabad, Lucknow, Bijnor and Nainital have improved their rankings in 1991, as compared to 1981.

STATEMENT-2

Ranking of districts by population size

Rank in 1991	Districts in order of Population size	Population in 1991	Percentage to total Population of State 1991	Rank in 1981	Population in 1981 adjusted to jurisdiction of 1991
1	2	3	4	5	6
	Uttar Pradesh	139,112, 287	100.00	—	110,862,512

Density

In the following Statement-3 the districts have been arranged in descending order of density of population in 1991 and their density in 1981. The State density of population was 473 per sq.km. as against 377 persons per sq.km. in 1981. During the decade 1981-1991 the density was increased by 104 persons per sq.km. of area. District Kanpur Nagar has recorded highest density (2271) followed by Lucknow (1093) and Ghaziabad (1044). In the state these three districts have been recorded as having density more than one thousand per sq. km. of area. District Uttarkashi has recorded lowest density (30 followed by Chamoli (50 and Pithoragarh (64) districts. These three hill districts of the State has recorded as having density less than one hundred per sq. km. of area. The Statement shows an increase in density everywhere in 1991 over 1981, because the total area has not changed, while the population has increased.

Sex ratio

Sex ratio is defined as females per 1000 males in the population, Statement-4 gives the sex ration from 1901 to 1991. Declining trend in sex ratio is observed in the State. During the last 40 years, the sex ratio declined by 40 points as it has been recorded 879 in 1991 census though it was 919 in 1961 census. District Almora has recorded highest sex ratio (1087) followed by Garhwal (1060), Tehri-Garhwal (1058), Azamgarh (1007) and Chamoli (1003). In the State these five districts reported more than 1000 sex ratio. In districts Pithoragarh, Pratapgarh and Jaunpur the sex ratio was recorded more than one thousand in 1981 census but in 1991 census the sex ratio declined as it have been recoded below one thousand. District Budaun has recoded lowest sex ratio (810).

Literacy rate

The population of less than 7 years of age had been treated as illiterates in 1991 census as against 5 years and below in the earlier censuses. The literacy rates were hence worked out as the percentage of literate population to total population aged 7 years anda bove. State literacy rate was 41.60 per cent. There were 34 districts where the literacy rates were more than State average. District Dehradun had recorded maximum literacy rate (69.50 per cent) while district Bahraich recorded 24.39 per cent as minimum rate. There were 15 districts where more than 50 per cent population were recorded as literate. Statement-5 gives the proportion of literates in total, rural and urban areas of the districts and State.

Statement-6 shows the position of districts arranged in the order of literacy ranking in 1991 census. For the sake of comparision the ranks of the districts in 1981 are also given. The literacy rates of 1981 census of newly formed districts are shown as not available because it could not worked to for 1981 census as the single year age data for 5—9 ages were not compiled before district level. District Dehradun had retained the first rank having highest literacy rate (69.50 per cent). District Bahraich had recorded lowest literacy rate (24.39 per cent) and retained its lowest rank for both the censuses (e.g. 1991 and 1981). A comparison of literacy rates between 1991 and 1981 censuses shows that progress has been made in the field of education during the last decade. State literacy rate had increased 8.30 per cent whereas all the districts have shown progress in literacy.

STATEMENT-6

Districts arranged in the order of literacy ranking in 1991 census and comparision with 1981 census (literacy rates have been calculated on the population aged 7 years and above

N.A.* Did not exist as a separate district in 1981 Census. Literacy rate could not be worked out.

Scheduled castes and scheduled tribes

Statement-7 gives the population of scheduled castes and scheduled tribes in each districts, its proportion to total population in rural and urban areas and its percentage share in the State. Out of the total population 139,112,287 of the State, 29,276,455 belong to scheduled castes and 287,901 to scheduled tribes, scheduled castes constitute 21.05 per cent of the States total population and the scheduled tribes, 0.21 per cent. During 1981 census the corresponding proportions for State were 21.16 per cent for scheduled castes and 0.21 per cent for scheduled tribes. The proportion for scheduled castes has decreased by 0.11 per cent during 1981-91, whereas that of scheduled tribes there was no change in the porportion. The newly formed district Sonbhadra has highest proportion of scheduled castes (42.50) followed by Sitapur (32.22 per cent), Hardoi (31.55 percent) and Unnao (30.54 per cent). The minimum proportion 12.66 per cent was recorded in district Bareilly. District Dehradun had highest proportion of scheduled tribes (8.20 per cent) followed by Nainital (5.84 per cent) and Pithoragarh 3.23 per cent) districts. Districts Jalaun and Faizabad were only two districts in the State where no person was netted during 1991 census as scheduled tribe.

STATEMENT-7

Population of scheduled castes and scheduled tribes in each district, their proportion to total population in rural and urban areas and their percentage distribution in districts

Working population

In 1991 census, out of total 139,112,287 persons, 44,799,280 were workers, consisting of 41,360,734 main workers and 3,438, 546 marginal workers in the State. The rest i.e. 94,313,007 were non-workers. The work participation rate (WPR), i.e. the percentage of total workers to the total population of the State, was 32.20 percent, while 67.80 per cent of the population were non-workers. In 1981, the total workers contituted 30.71 per cent - the main workers formed 29.22 per cent and marginal workers formed 1.49 per cent. There has thus been an increase of 1.49 percentage points in the ratio of total workers; 0.51 for main workers and 0.98 for marginal workers in 1991 over 1981 census. The following statement gives the distribution of main workers into broad industrial categories, marginal workers and non-workers of each sex in different districts.

STATEMENT-8

Total main workers by nine broad industrial categories, marginal workers and non-workers as percentage of total population state/district

Female work participation rate

Statement-9 gives information regarding districts arranged in descending order of their 1991 female work participation rate. Female work participation rate of all districts for 1981 census and their rank are also given to facilitate the comparison of 1981-1991. The female work participants rate has considerable increased from 8.06 per cent in 1981 to 12.32 per cent in 1991. District Almora (49.59), Pithoragarh (49.46), Uttarkashi (49.21), Chamoli (47.67) and Tehri-Garhwal (46.19), all the hilly district of the State were recorded having about fifty per cent female work force. District Almora had jumped from 6th rank in 1981 to Ist rank in 1991 census.

STATEMENT-9

District arranged in descending order of their 1991 female work participation rate

Rank in 1991	State/District	Female work participation rate		Rank in 1981

It is observed from the Statement-10 that agricultural activities e.g. cultivators and agricultural labourers, continue to account for the highest proportion of main workers (72.21 per cent) in the State in 1991 and it has registered only a small decline (1.48 percent) from the corresponding ratio of 73.69 per cent in 1981.

This very drop points to the continuing trend of decline of dependence on agriculture. In the State around one-tenth of main workers belong to "other services" (category-IX) followed by category V(a) and V(b) Manufacturing, processing, servicing and repairs (7.75 per cent), category-VII - Trade and Commerce (6.17 percent), category VIII-Transport, storage and Communication (1.86 per cent), category VI-construction (1.23 per cent), category-III-Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities (0.71 per cent). category-IV-Mining and quarrying constitute lowest ratio of 0.08 percent of main workers in the State. The following statement gives the distribution of main workers of each sex into broad industrial categories in different districts.

STATEMENT-10

Percentage distribution of main workers of each sex into broad industrial categories in different districts 1991

Statement-11 gives sex ratio (female per 1000 males) among total population, total workers (main and marginal), main workers, each category of total main workers, marginal workers and non-workers in total, rural and urban areas of each district. It may be observed that the sex ratio was highest (11,751) in the case of marginal workers in the State. In other words the number of females engaged as marginal-workers were far more when compared to males. But, in the case of main workers this ratio was adverse to the females which means that there were lesser female workers when compared with the male workers. The sex ratio was 133 among all the main workers. The highest sex ratio (285) was recorded for category-II (agricultural labourers) followed by category-V (a) (209) household industry, category-I (119) Cultivators, category-IX (97) other services, category IV (95) maining and quarrying, category III (91) livestock forestry, fishing hunting, plantations, orchards and allied activities category V(b) (57) manufacturing, processing, servicing and repairs in other than household industry, category VI (30) Construction, category VII (28) trade and commerce. The lowest extent of female participation among the various categories of main workers was recorded in category VIII (10) transport, storage and communications.

STATEMENT-11

Sex rato (Females per 1000 males) among total population, total workers (Main + marginal workers), main workers, each category of main total workers, marginal workers and non-workers in total, rural and urb an areas of each district

State/ District	Total/ Rural/ Urban	Total Popu- lation	Total Workers (Main + Marginal Workers)	Total Main Workers	Industrial Categories										Marginal Workers	Non- workers
