FOREWORD

The socio-cultural tables of the 1991 Census are based on questions on age, marital status, literacy, educational level, school attendance, mother tongue, knowledge of other languages, religion and relationship of the members of the household to the head of the household. Some of these tables have been generated from the data collected through the Individual Slip while others have been generated from the Household Schedule.

2. There are 10 tables proposed to be generated on socio-cultural aspects. Of these, 7 tables are based on 10 per cent sample in the states with the population of 10 million & above and on full count basis in the remaining States and Union Territories. These have been generated from the individual slip through processing on computer. 3 tables, relating to mother tongue, religion and household composition are based on full count and have been produced by manual compilation.

3. Tables on age, marital status, educational level and school attendance (Tables C-1 to C-6) have already been released on floppy disks usable on personal computers. These are now being brought out in printed form as Part IV A - Socio-Cultural Tables. The other tables of this series are published as Part IV B - Socio-Cultural Tables.

4. A general note on the socio-cultural tables of the 1991 Census which gives detailed information regarding presentation of tables, concepts used and the relevant questions along with the relevant extracts from the manual of instructions to enumerator is given in the volume for ready and comprehensive reference of the user.

5. A separate fly-leaf is also given for each table regarding the contents of the table.

6. The 1991 Census Operations were conducted under the overall guidance of my predecessor Shri A.R.Nanda. The work of coding and editing of Individual Slip records were completed in the Directorate of Census Operations and the job of data entry was done in the Direct Data Entry Centre of this organization. Thereafter editing and tabulation on computer was done in the Data Processing Division at the headquarters. The dissemination of data on computer media and preparation of camera ready copy of the publications were also done in the Data Processing Division.

7. The job of scrutiny of the computerised tables, preparation of notes of this publication and arranging the printing of this publication was carried out in the headquarters. The scrutiny of the quality of tables was done by a Task Force of officers of this office specially constituted for this purpose.

8. I hope this publication will prove useful to administrators, demographers, research scholars and other data users.

TABLE C-3 : ATTENDING SCHOOL/COLLEGE BY COMPLETED LEVEL OF EDUCATION, AGE AND SEX

FLY-LEAF

This table gives the completed educational level of persons attending school/college by age and sex. While table C-2 gives the educational level for the whole population, table C-3 gives the educational level for only those who were attending school/college at the time of 1991 Census. The table is presented for the single year ages 5, 6, 7, 8, 9, 10, 11, 12, 13 and 14 and for the age groups 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35+ and 'age not stated'. This table is presented in two parts Part A for urban areas and Part B for rural areas at State and District level. The data are presented for illiterate and the following educational levels:

C-3 Part A-Urban areas

TABLE C-4 : POPULATION (AGES 5-19) BY SINGLE YEAR OF AGE, SCHOOL ATTENDANCE AND ECONOMIC ACTIVITY

FLY-LEAF

This table gives the population at each of the ages 5 to 19 with those attending school and those not attending school and among them 'main workers', 'marginal workers' and 'non-workers'. This table is also useful in studying the prevalence of child labour/children in work in relation to school attendance. The table is presented for total, rural and urban areas at State, District and City level. The table presents the data for single year ages from 5 to 19. The totals for the age groups 5-19 and sub totals for 6-10, 11-13, 14-16 and 17-19 are also given.

The table has been compiled on the basis of information collected through question numbers 3, 4, 13, 14A and 14B of the Individual Slip. These questions along with the instructions have been reproduced in the General Note.

This table corresponds to the table C-4 of 1981 Census.

TABLE C-5 : SINGLE YEAR AGE RETURNS

FLY-LEAF

This table presents the single year age distribution of the population by sex. This table is presented for total, rural and urban areas at State level. The data in this table are presented by single year of age upto the age of 99 and age group '100+' and for 'age not stated'.

This table has been compiled on the basis of information collected through question numbers 3 and 4 of the Individual Slip. These questions along with the instructions have been reproduced in the General Note.

This table corresponds to table C-5 of the 1981 Census.
