ENSURE REGISTRATION OF EVERY BIRTH AND DEATH

PREFACE

Birth and Deaths are the two most important vital events that define life of an individual. Not only do they describe the legal existence of an individual, registration of these events is a primary source of vital data of the population to which they belong. Civil Registration is a continuous, permanent, compulsory recording of the occurrence and characteristics of vital events, like births, deaths and still births. These vital statistics are invaluable for planning, monitoring and evaluating various programmes related to primary health care, family planning, maternal and child health, education etc. Nevertheless, information collected through registration process about vital events provides useful and important statistics.

2. This issue of the Report on 'Vital Statistics of India based on the Civil Registration System' for the year 2018 provides an overview of the working of the Civil Registration System (CRS) in the country and presents a compilation of data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. Ideally, an Annual Report on vital statistics containing more detailed information should have been brought out. However, due to limited availability of information contained in the Annual Reports of some of the States, the report for the year 2018 containing key information of events pertaining to the time period 1st January 2018 to 31st December 2018 has been brought out for the convenience of users. An attempt has been made to present more detailed analysis as compared to previous Reports.

3. The publication is divided into two parts. Part I provides a brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth at State level. Part II consist of the main tables which provide State and District-wise data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up.

4. The data source for the report is the statutory Annual Statistical Report prepared by the Chief Registrars of Births & Deaths of States/UTs. I take this opportunity to express my sincere gratitude to all the Chief Registrars of Births & Deaths of various States/UTs for their kind co-operation in providing the requisite information. I am thankful to each one of them for their invaluable cooperation. I am hopeful for the similar response from the states/UTs in future also. I am very positive that, more dynamic implementation of the provisions the RBD Act-1969 shall help reduce the time gap and establish this as a reliable source of information on the Birth and Death registration in country.

5. The report has been prepared by the CRS Section of this office. I would like to place on record my appreciation for the efforts put in by all the officers and staff working in the CRS Section of the Office of the Registrar General and the Officers/Staff connected with the Civil Registration system in the States/UTs.

EXECUTIVE SUMMARY

Civil Registration System (CRS) in India is the unified process of continuous, permanent, compulsory and universal recording of the vital events (births, deaths, still births) and characteristics thereof. The Registration of Births and Deaths Act, 1969 (Act No. 18 of 1969) provides for the compulsory registration of births and deaths. Civil Registration records are the best source of Vital Statistics. For the individual, records emanating from CRS provides her/his legal identity and access to the rights of a citizen including entitlements (social benefits provided by the Government). For the country, the requirement of a complete CRS system is a must as it has important administrative and statistical uses. CHAPTER – I

CIVIL REGISTRATION SYSTEM - AN INTRODUCTION

1.1 The requirement for a complete and up to date Vital Statistical System to yield reliable data on vital events hardly needs any emphasis. These data are essential for socio-economic planning and development and also to evaluate the effective implementation of various public schemes and programs. The main sources of data on vital events in India are Civil Registration System (CRS), Sample Registration System (SRS) and Population Census. Though the Population Census is the main source of information on population and its characteristics; however, being a decennial exercise, it does not provide the measure of changes in population from year to year. The measures of fertility and mortality derived from Census are centered on the midpoint of the decade and as such do not provide yearly change in the population. Of the other two sources of vital statistics for getting the vital rates on a regular basis, the SRS has been designed to provide reliable estimates at National and State level. Robust estimates of vital rates at District level on an annual basis through sample survey are difficult to obtain on account of prohibitively large sample size and variety of resultant factors such as controlling of non-sampling errors etc. CRS is thus the only source for providing vital rates at district level. Rather, a complete CRS can provide these rates at all administrative levels.

1.2 The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent, compulsory and universal recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System covers registration of births and deaths. Civil registration system provides the best source of information on the vital rates at all levels. Ensuring cent percent coverage of vital events by registration machinery can help in getting the critical vital statistics, equally important for planning and research. Therefore, emphasis should also be given to the proper monitoring of the activities under the system. Civil registration system is considered to be complete if it covers 90 per cent or more of all births and deaths taking place within a country or area.

1.3 The registration records are primarily useful for their value as legal documents and secondarily as the source of vital statistics. Civil registration as a source of vital statistics is relatively less expensive, as the statistics generated from the registration records are the by-products of an essential administrative process. The registration records can also generate current and continuous statistics, which can be more accurate than any other method of data collection apart from being a continuous source of such data. However, the accuracy of the vital statistics obtained through the registration system depends much on the completeness and promptness with which events are registered and the correctness of the information in the registration records. The improvement in the system of registration of births and deaths is critically dependent on the importance given by the respective States and District administrations to this work and regular monitoring by them. Besides, the level of awareness among the general public about the utility of birth or death certificate is also equally and crucially important.

1.4 Vital statistics obtained through registration records at different administrative levels enable estimation of the size, structure and geographical distribution of the population except for migration. Vital statistics also enables the projections for coming years on the basis of probable trends of fertility and mortality as derived from these vital statistics and their interactions with social, economic and other demographic factors. The vital statistics data generated through an effective Civil Registration System is of immense use for formulation of various development and welfare programmes/ schemes and increases their effectiveness at State and District level. The Civil Registration data acquires paramount importance in the wake of 73rd and 74th amendments to the constitution of India, as it can provide data at local level for micro level planning, monitoring and evaluation of schemes. At national level, the vital

statistics data generated through Civil Registration is also quite useful for medical research and in the study of sex ratio, mortality and morbidity rates and also in the study of causes of deaths.

Registration of births and deaths in India

1.5 In India, the registration of births and deaths is carried out under provisions of the Registration of Births and Deaths (RBD) Act, 1969. The registration is done by the Registrar of the local area, appointed by concerned State/UT Government.

1.6 Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century. Earlier, the work of registration of birth and death was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long and, therefore, after detailed deliberations at various levels, the Registration of Births & Deaths Act, 1969 was enacted providing compulsory registration of births and deaths in India. Since then, this Act has been enforced uniformly across all the States and Union territories (UT). This Act provides for registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of this Act *has* provided a common framework for putting in place an effective system of registration of births and deaths in the country.

1.7 The registration work at various levels in States/UTs is performed by different Departments. The existing organizational set-up involved in the work of civil registration at various levels in different States/ UTs is given at **Annexure-A**. A uni-linear hierarchy exists in 11 States/ UTs where single department is involved at all levels of registration. In 9 States namely Assam, Chandigarh, Haryana, Lakshadweep, Meghalaya, Odisha, Punjab, Sikkim and A&N Islands; Health Department is involved at all levels of registration. Panchayat department in Kerala, and Local Administration Department in Puducherry are responsible for execution of this work at all levels. At present, Health Department supervises the civil registration work at State level in 21 States/ UTs, Department of Planning, Economics & Statistics in 13 States/ UTs, Department of Panchayats in Kerala and Local Administration Department in Puducherry.

1.8 In order to simplify and speed up the process of registration and to bring in uniformity in birth and death registration formats, the registration system was revamped in the year 2000. Under the revamped system, the procedure for registration of births and deaths was also modified to some extent and the forms were redesigned. Most of the tables that are to be part of the Annual Report of the Chief Registrars on registration of births and deaths under revamped system would be based on the information of place of usual residence of mother in case of births and place of usual residence of the deceased in case of deaths. The revamped system became operational in 2000 in all States/Union Territories except Assam, Arunachal Pradesh, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Odisha, Punjab, Uttarakhand and Uttar Pradesh. It was implemented in Assam, Arunachal Pradesh and Odisha in 2001, Haryana in 2002, Himachal Pradesh, Uttarakhand and Uttar Pradesh in 2003, Gujarat and Punjab in 2004 and Jharkhand in 2009.

Statistical Reports

1.9 System of registration of births and deaths is constantly generating statistical information at the local level. The information contained in the reporting forms is consolidated by the Registrar for onward transmission to the Chief Registrar of concerned State/UT. She/he, in turn, is required to submit an Annual Report on the working of the Act and a Statistical Report to the State Government by July and

December respectively of the following year to which the report relates. The Chief Registrars are also required to send a copy of these Reports to the Registrar General, India, Govt. of India.

1.10 Based on the Annual Reports prepared by the States/UTs, the Office of the Registrar General, India, brings out an annual comprehensive report entitled "Vital Statistics of India based on Civil Registration System". These reports have been brought out since 1958 (Before the enactment of Act, only statistical reports were brought out). However, some of the States are not bringing out their Annual Statistical Reports in time, and this in turn, delays the publication of the corresponding national report. It has also been observed that some States also do not include all the prescribed tables in their reports thereby creating a limitation while bringing out the national report. However, notwithstanding all these constraints, this report provides vital indicators including the District-wise registered births and deaths along with infant deaths with sex-wise and rural-urban break-up of registered events for the year 2018.

CHAPTER-II

ANNUAL REPORT FOR 2018 ON THE WORKING OF THE REGISTRATION OF BIRTHS AND DEATHS (RBD) ACT, 1969

2.1. **Annual report on the working of the Registration of Births and Deaths (RBD) Act, 1969**: Under the provision of Section 4 (4) of the Act, the Chief Registrars are required to submit an Annual Report on the working of the RBD Act to the respective State Governments. The Office of Registrar General of India consolidate/compile the working of said Act reports received from States/UT's and release working of RBD Act report at National level. The aforesaid statutory Annual Report for the year 2018 has been received from 35 States and UTs except State of Manipur.

2.2. **Registration Machinery:** Section 3 to 7 of the Registration of Births and Deaths (RBD)Act, 1969 provides for the appointment of Civil Registration System functionaries at all levels like:-

(i) National level:- Registrar General, India; section 3 of the RBD Act
(ii) State level:- Chief Registrar; section 4 of the Act
(iii) District level: - District Registrar/ Additional District Registrar under Section 6 of the Act
(iv) Local area level:- Registrar for a village, Panchayat, municipality, municipal Corporation or other local bodies; under Section 7(1) of the Act and
(v) Sub-Registrar for specified area within the area under the jurisdiction of a Registrar under section 7 (5) of the Act.

The Central Government under section 3(1) of the RBD Act, 1969 appoints the Registrar General, India (RGI) at Central level who has been empowered under the said Act to take steps to coordinate and unify the activities of Chief Registrars of all States/Union territories and issues general directions regarding registration of births and deaths under section 3(3) of the Act. The work relating to Civil Registration in the office of the Registrar General, India is handled in the Vital Statistics Division.

The State Governments under section 4 (1) of the Act appoints Chief Registrar for the State/UT. The Chief Registrars under section 4 (3) of the said Act has been declared as the chief executive authority in the respective States/ UTs for implementing the provisions of RBD Act and the Rules and orders made thereunder. The State Government also appoints District Registrar of births and deaths for each revenue district under section 6 of the RBD Act. The actual work of registration of births and deaths in the field is carried out by the local registrars, who are appointed under section 7 of the said Act.

There is a wide variation in the registration machinery across the country, details of which are given below:-

- The Chief Registrars of births and deaths in 18 States and 3 Union Territories are from the Health Department, in 10 States and 3 Union Territories are from Planning, Economics & Statistics Department, in 1 State (Kerala) from Panchayat Department and in remaining 1 UT (Puducherry) it is with Local Administration Department.

- The district level authorities are mainly divided among District Collectors/ District Magistrate (in 8 States and 1 UT), Chief Medical Officers/ District Medical and Health (12 States and 3 UT), District Statistical/ Planning Officers (in 4 States and 2 UT), Deputy Commissioner are appointed as District Registrar in 4 States and Deputy Director, Panchayat in 1 State and Dy. Director, local administration in 1 UT.

- At Rural level, the registration work is entrusted to the officials of Panchayat Department in 14 States and 3 UTs, Health Department in 10 States and 4 UTs, Revenue Department in 2 States, Education Department in 2 States and Police Department in 1 State.In urban areas, the Health Officer of Municipal Corporation / Municipalities etc. or in absence of such a post the Executive Officer of the town administration functions as the Registrar of Births and Deaths

2.3. **Registration of Births and Deaths occurring to Indian Citizens abroad:** Under the provisions of Citizenship Act, 1955, the event of births and deaths of Indian Citizens occurring abroad are registered by the respective Indian Consulates. Under Rule 5 of Citizen's (Registration at Indian Consulates) Rules 1956, Consulates are statutorily required to send the annual returns of births and deaths of Indian Citizens to the O/o the RGI. It has been observed that requisite returns are not furnished by the Indian Consulates; such returns for the year 2018 have been received from 140 missions of 116 countries only, covering 33588 births and 7107 deaths. Out of total registered births at the various missions during 2018, Embassy of Kuwait City in Kuwait accounted for 14.46 % births, Embassy of Abu Dhabi in United Arab Emirates 12.46% births and Embassy of Riyadh in Saudi Arabia 11.65% births. In case of total registered deaths at various missions, Embassy of Dubai in United Arab Emirates accounted for 20.06% deaths, Embassy of Riyadh in Saudi Arabia 19.80 % deaths and Consulate General Jeddah in Saudi Arabia 16.10 % deaths in 2018. Details of information furnished by the Indian Consulates/Missions are given in the Statement No. 26.

2.4. **Inter Departmental Coordination Committees (IDCC**): In order to resolve the operational problems and for proper implementation of the provisions of the RBD Act and the State Rules, coordination among the implementing departments is essentially required. On the other hand the work of registration of births and deaths in most of the States/UTs is being done through the officials drawn from more than one department of the State Government/Union Territory Administration. The need for coordination between the stake holder departments is a precondition for effective functioning of the system in each of the State. In view of the above, the State level Inter-Departmental Coordination Committees (IDCCs) have been constituted in all States and Union Territories. In most of the States / UTs, IDCC committee is chaired by the Principal Secretary/Secretary of the Department from which the Chief Registrar belongs.

In order to formulate the strategies for further improvements in Civil Registration System and effective implementation, the provisions of the RBD Act in the respective State, it is desire to convene the meeting of such committee at least once in a year. However, it has been observed that despite persuasion of this office with the State Governments from time to time, such meetings have not being convened regularly by the most of the States/ UTs.

During 2018, such meetings were held in 9 States/UTs namely Arunachal Pradesh, Gujarat, Himachal Pradesh, Karnataka, Maharashtra, Mizoram, Rajasthan, Sikkim and Tripura. Such Coordination Committees have also been set up at District and below district level (i.e. at Mandal and Taluk level)

in many States. However, the information on convening the regular meeting of district level and below district level meetings has not been received from all the States/UTs. 3.10.2 On the other hand, in case of death registration, the share of male registration is about 19.2 per cent more than female. (Statement 14). Sex wise distribution of registered deaths is presented in Chart 6.

3.11. Sex-wise Distribution of Registered Births and Deaths of Major States

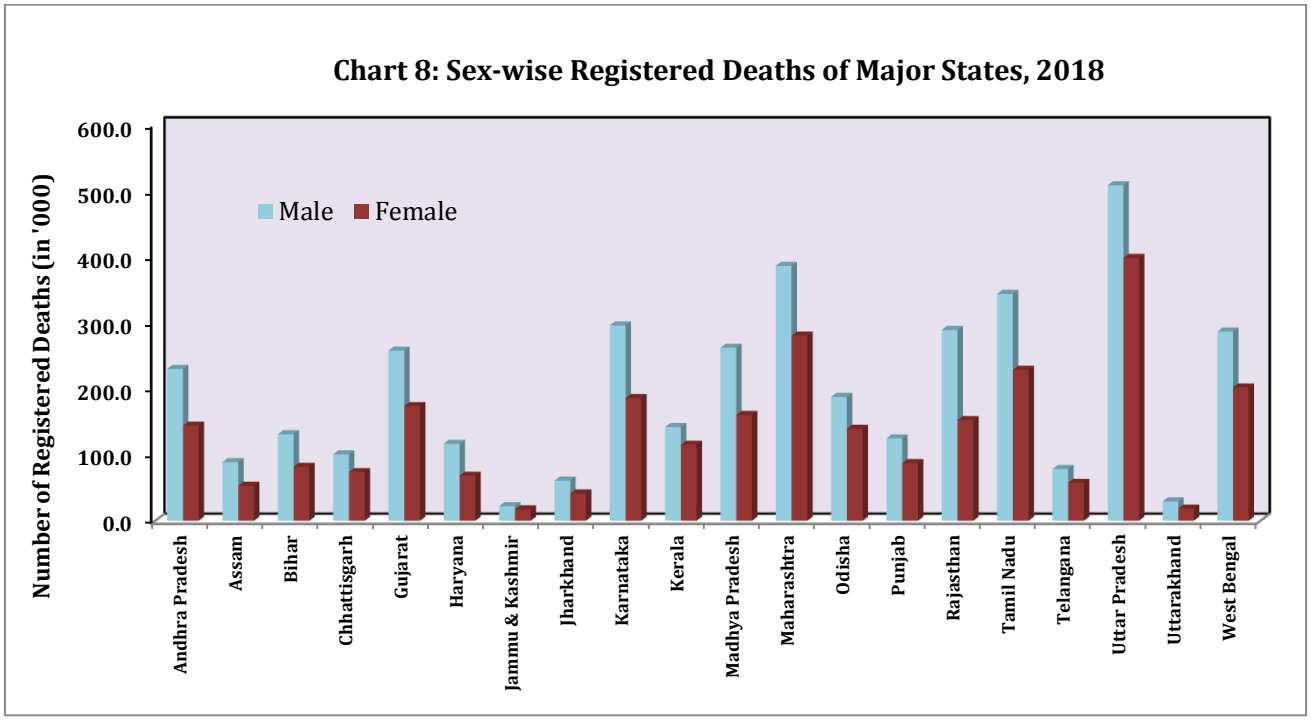

3.11.1 Chart 7 and 8 respectively shows the sex-wise distribution of registered births and deaths for the major States (population of more than 10 million as per Census 2011). The data on birth registration reveals that the share of male registration is more than the female in almost all these major States. This gap is much wider for Jharkhand, Punjab, Gujarat, Rajasthan, Madhya Pradesh, Haryana and Assam. In case of Death Registration, the gap is wider almost in all major States viz. Rajasthan, Haryana, Assam,

Madhya Pradesh, Bihar, Andhra Pradesh and Uttarakhand. The State-wise figures have been provided in Statement 15.

Share of birth registration has crossed the level of 80 percent and has reached to 89.3% during 2018. In case of death registration, it has reached 86.0% in 2018 from 79.6% in 2017.Chart 9 and 10 shows estimated & registered births and deaths respectively.

3.13.1 While comparing estimated and registered births, a significant gap is found in estimated and registered births in Bihar, Madhya Pradesh, Jammu & Kashmir, Jharkhand, Uttar Pradesh, Tamil Nadu and Odisha. The States of West Bengal, Telangana,, Assam and Uttarakhand have more number of registered births than estimated. Chart 11 shows the distribution of estimated and registered births respectively in major States.

3.13.2 Similarly for estimated and registered deaths, there is significant gap in estimated and registered deaths in, Bihar, Jharkhand, Telangana, Jammu & Kashmir, Uttar Pradesh, Assam, Uttarakhand, Madhya Pradesh, and Chhatisgarh. Chart 12 shows the distribution of estimated and registered deaths in major States.

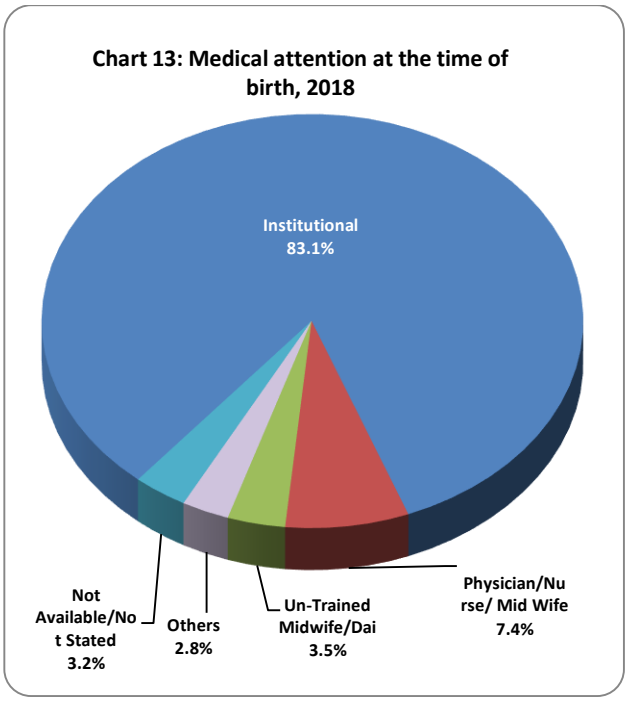

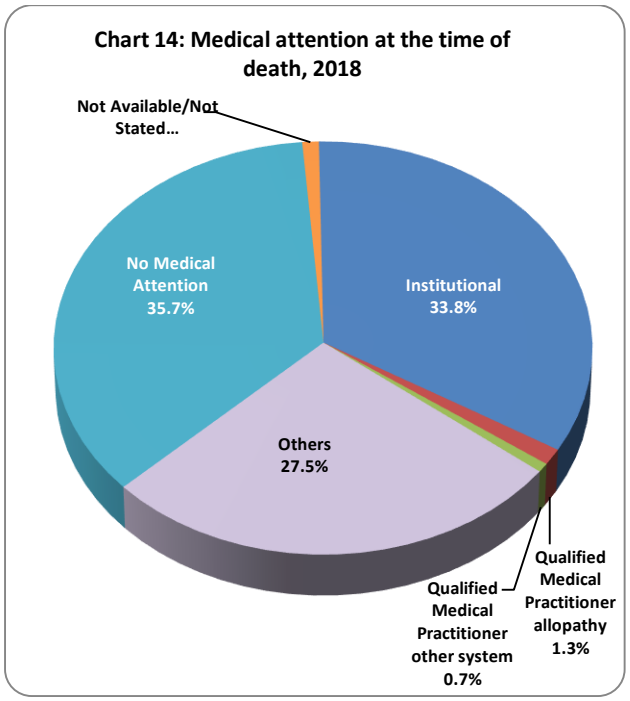

3.14 Medical attention received at the time of birth and death

3.14.1 The data on birth by type of medical attention received at the time of delivery has been reported from 33 States/UTs and out of them three States namely Maharashtra, Uttar Pradesh and Sikkim have submitted only partial data and therefore their data has not been taken into account while consolidating the data. While another three States namely Bihar, Jharkhand and Uttarakhand have not submitted

medical attention at the time of Birth. The distribution of medical attention received at the time of birth for these States/UTs has been illustrated in Chart 13. While the data shows that majority of births have been occurred in an institution, either in Government or private hospitals. Institutional births occurred in about 83.1% of cases, 7.4% of the cases were attended by the Physicians/Nurse/Midwife. However, about 3.5% of the events are still attended by untrained Mid-wife/Dai and another 2.8% by others.

3.14.2 Medical Attention received by deceased at the time of death has been received from 32 States/UTs out of them, three States namely Maharashtra, Sikkim and Uttar Pradesh have submitted only partial data and therefore their data has not been used to while consolidating the data. Four States namely Bihar, Haryana, Jharkhand and Uttarakhand have not submitted the data. Chart 14 represents the distribution of medical attention received by the deceased at the time of death. It is evident from Chart that 33.8% of the total registered deaths have occurred in institutions and is on a higher side than that of other places from where the deceased had received medical attention. About 1.3% of the total registered deaths during 2018 have received medical attention from qualified allopathic professional and practitioner of other system and 35.7% of deceased did not receive any medical attention at the time of death.

3.15 Infant Deaths

3.15.1 The infant deaths registered by place of occurrence (Rural /Urban) of the event for the year 2018 has been given in Statement 17. It may be observed that the share of rural area is only 28.0% while that of urban area is 72% in total registered infant deaths during the year. Non registration of infant deaths in rural area is a cause of concern which may be due to non-reporting of infant deaths to the Registrars especially in case of domiciliary events. This figure is exclusive of returns of Jharkhand and Uttarakhand due to non-receipt of information from the State.

Statement 17: Percentage distribution of registered infant deaths by place of occurrence, 2018

Place of Occurrence	No. of Registered Deaths	No. of Registered Infant Deaths	% Share of Registered Infant Deaths by Place of Occurrence	% of Registered Infant Deaths to Total Registered Deaths
Rural	4001211	48748	28.0	1.2
Urban	2949396	125398	72.0	4.3
Total	6950607	174146	100.0	2.5

Statement 18 gives the percentage distribution of sex wise infant deaths which reveals that the share of female deaths in total female deaths is higher than the corresponding male figures.

Statement 18: Percentage distribution of infant deaths by sex, 2018

Sex	No. of Registered Deaths	No. of Registered Infant Deaths	% Share of Registered Infant Deaths to Total registered Deaths
Male	4140492	99268	2.4

3.16 Still Births

3.16.1 The World Health Organisation (WHO) defines a still birth as a baby born with no signs of life at or after 28 weeks' gestation. Still birth, also known as foetal death, has been defined as *'death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.'*

3.16.2 Statement 19 presents still births registered by place of occurrence (Rural /Urban) of the event for the year 2018 and it may be observed that in total registered still births, share of rural registered still births is only 37.5% which may be due to poor netting of still births in rural areas. In urban areas, this share is about 59.7% which may be due to better netting of still births from medical institutions. About 2.7 percent of still births could not be classified due to non-availability of rural-urban breakup. This is based on registered events from 35 States/UTs. The data from one State namely Manipur is not available. State/UT-wise registered still births has been depicted in Table 4.

Statement 19: Still Births registered during 2018

Place of Occurrence	No. of Registered Still Births	% Share of Registered Still Births by Place of Occurrence
Rural	61544	37.5
Urban	97939	59.7
Total*	163937	100.0

**Sum of Rural and Urban may not match with Total as some of States have not supplied Rural-Urban breakup.*

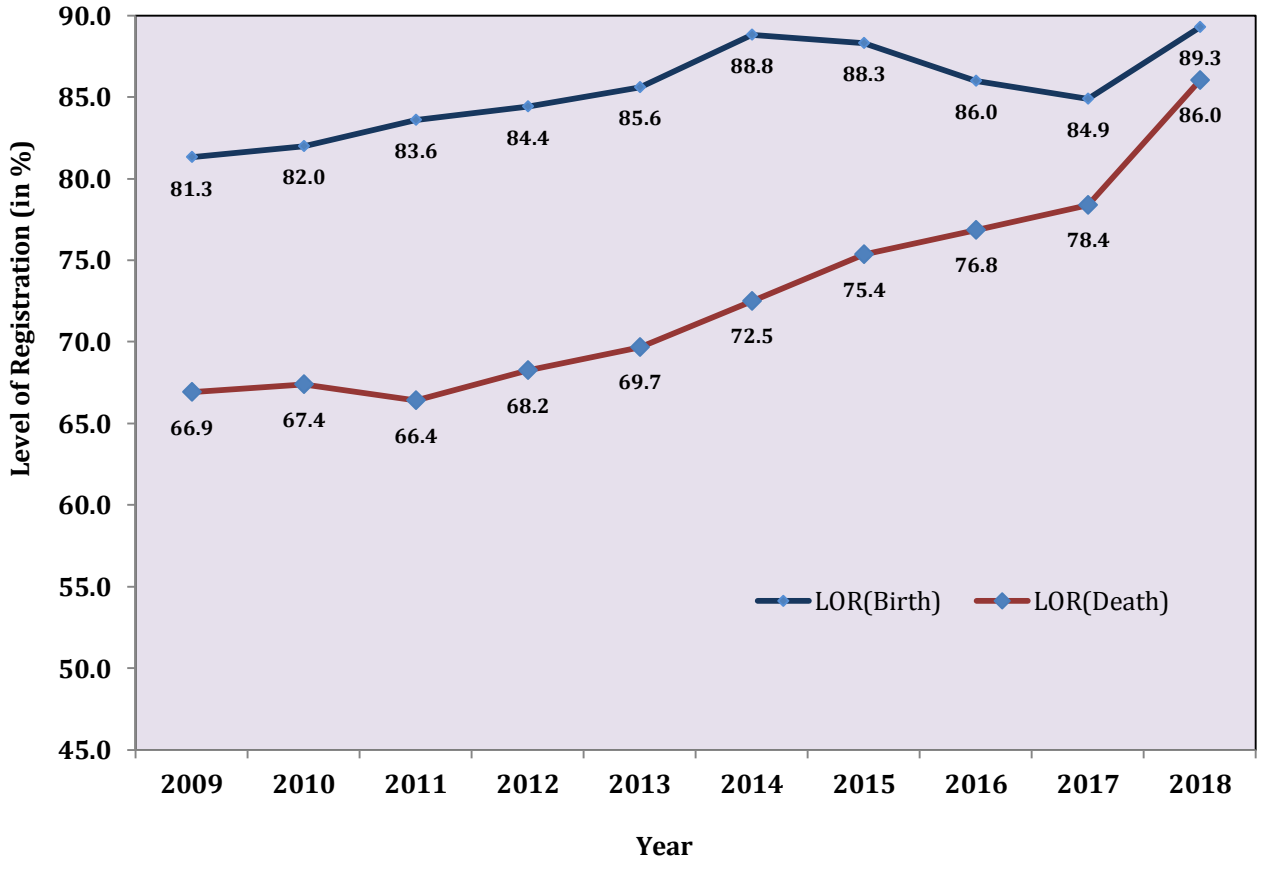

3.17 Analysis and Findings

Level of Registration (LOR)

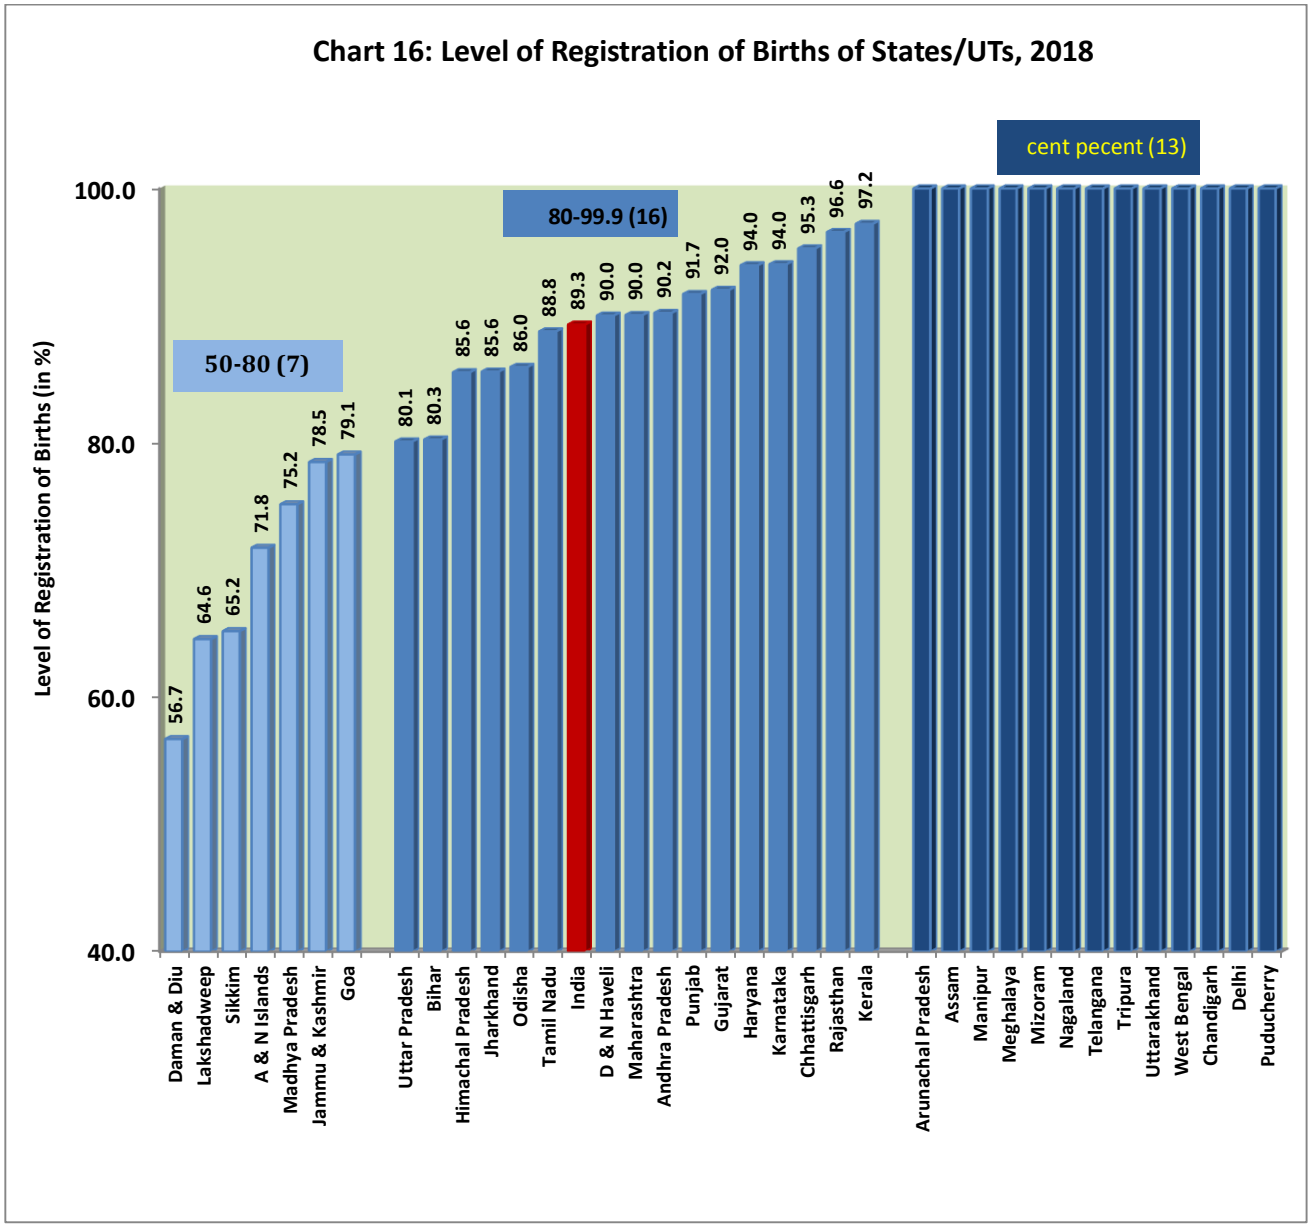

3.17.1 The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance of a State / Union Territory in registration of births and deaths. In the absence of reliable estimates of number of births and deaths on a year to year basis from any other source, the number of events as revealed from SRS is used to calculate the level of registration. The level of registration so calculated is very high for some of the smaller States/Union Territories either due to the lower estimates of vital events than the actual and due to the fact that SRS estimates of vital events are based on the place of usual residence while events are registered at the place of occurrence irrespective of the place of residence.

3.17.2 The levels of registration of births and deaths for India and States/UTs for the period 2009 to 2018 are shown in Statements 20 and 21 respectively. The level of registration of births has increased to 89.3 in 2018 from 81.3% in 2009 i.e. in last 10 years an increase of about 8.0%. Similarly, the level of registration of deaths has also increased to 86.0% in 2018 from 66.9% in 2009, showing an increase of 19.1% over the last 10 years. Chart 15 depicts the trend in level of registration of births and deaths from 2009 to 2018. Though the level of registration for births has recorded consistent improvement over the years, gap of about 10.7% in case of registration of births and about 14.0% for registration of deaths at all India level remains a cause of concern. It is also pertinent to mention here that the gap between Levels of Birth and Death Registration is narrowing down.

Chart 15: Level of Registration of Births and Deaths, 2009-2018

3.17.3 Chart 16 gives the level of registration of births for India and States/UTs for the year 2018. There are 13 States/UTs namely Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Telangana, Tripura, Uttarakhand, West Bengal, Chandigarh, Delhi and Puducherry which have recorded cent percent registration of births in 2018.

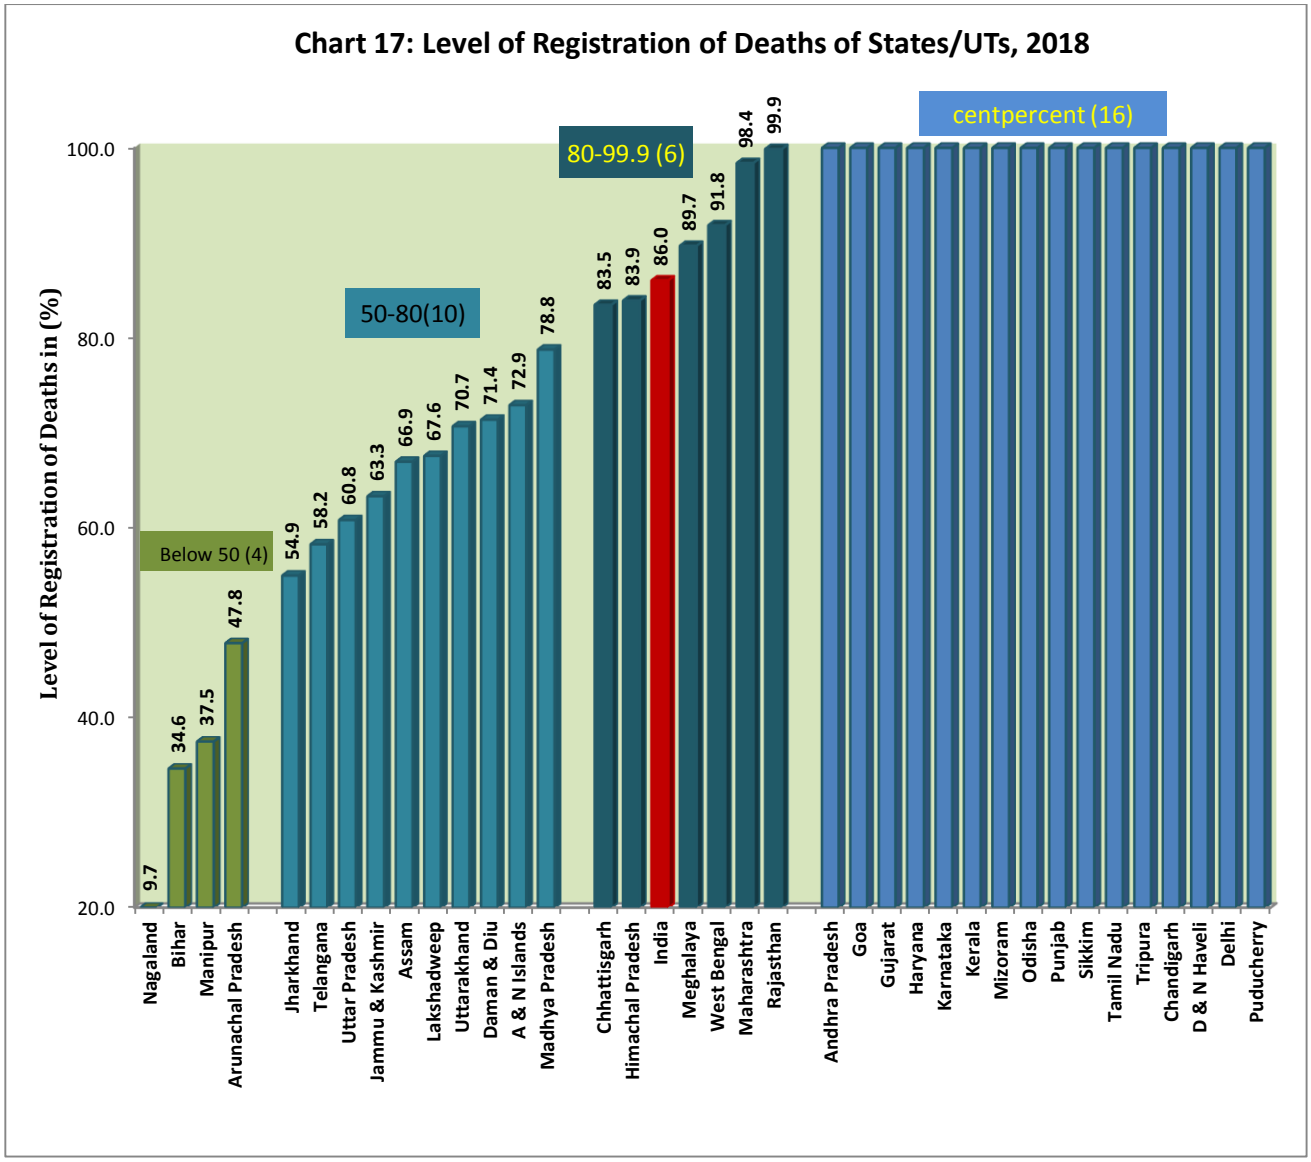

There are 13 States/UTs where level of Registration of Birth is below the India level of 89.3% , of which 7 are major States namely Bihar, Madhya Pradesh, Jammu & Kashmir, Jharkhand, Uttar Pradesh, Tamil Nadu and Odisha.

3.17.4 Statement 20 reveals that the States/UTs continue to function at different levels of registration during 2009-2018.

3.19.1 On the basis of data made available by States/UTs, the national data table on time gap of birth and death registrations i.e. within time limit (<21 days), 21-30 days, 30 days to less than 1 year and After one year has been prepared and may be seen in Statement 24 and 25. The 2 States namely Bihar and Jharkhand have not provided data on time gap of birth and death while Haryana has not submitted time gap of death table. The reasons given by these States for not supplying the data are lack of computerization and Governance issues. Further, Maharashtra, Uttar Pradesh and Sikkim, due to availability of only partial data, has not been taken into account while consolidating the data and has not been published. In case if Haryana and Uttarakhand data lowest available category is less than 30 days and hence due to non-availability with-in Time limit (21 days) separately, two categories have been merged for these States
