# Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grossroots level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (VII) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

# Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchhu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Dr.I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr.D. Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the "Acknowledgements".

## (i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five-year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census, the District Census Handbook is being brought out in a single volume which contain the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in Class I town has been presented especially in respect of slum dewellers. Scholars and planners alike should benefit from the data on amenities.

## (ii) Brief History of the District

The Chennai City has undergone an historical metamorphosis during the past and recrystalised as one of the cosmopolitan cities, laying many more mile stones for its achievements. It has played an important, responsible and successful role in the field of culture and intelectual development of South India.The history has seen the supreme role of Chennai during the time of crisis and challenging periods. Along with the growth National spirit, the population of Chennai, according to the First Census conducted in 1871, was only 39,785 and the Madras Presidency then was third in population growth along the cities of British Empire during 1871. Though there was a low population growth during fifty years prefixing 1921, there was rapid population growth from 1921 to 2001, conspicuously due to immigration from time to time.

During the 17$^{th}$ Century, the establishment of East India Company with its headquarters at Fort St.George as a trading center was the root cause for the imperial change in Chennai, by which time the City came into

being, due to strategic necessity and historical events, with the inclusion of a few scattered villages like Mylapore, Triplicane and Chennai-patnam and developed into a modern metropolitan city as Madras Presidency retaining its rich tradition, custom and religion. This presidency has been the seat of learning art, architecture and great sears and siddhars of the spiritual Gurus.

Chennai City has been an important centre historically for various purposes, specifically on strategic point of view, trade and commerce. Chennai was originally known as Chennai patnam, which was a part of Thondaimandalam. The information of the institution of a Mayor and Corporation of Chennai City was begun during 1687-1692. This status was given to this city after the Chennai Patnam was brought under different rulers like Golkonduas, Mughal and Europeans. The status of Government of Chennai in 1698 continued for 11 years in whose period was granted with the towns of Tondiarpet, Purasaiwakkam and Egmore from the local Nawab. This period also gained remarkable development in trade and commerce as Chennai was an important and historical centre.

The war between French and English resulted with a significant change in which England lost its authority in 1744 over Chennai to French rulers.

Between 1755 and 1763, Chennai City was developed with trading corporation, incorporated isolated towns, established ports and factories. In 1781, Chennai City was added with a naval base which made South India secure in all respects. The supremacy of English over South India was further strengthened without break. From 1799 onwards, the villages and other places scattered around Chennai get agglomerated gradually with Chennai City.

Consolidation and development of institutions in Chennai were held between 1803 and 1827. A judicial Commissions with Lord Munro as chief in 1814 took place for administrative reform in Chennai. To improve the literacy, various steps were taken between 1820 and 1827, specifically by creation of board of public instructions for imparting English education in Chennai, various institutions of professional and technical education have been established in the beginning of 19th century in Chennai. The educational institution of higher learning like School of Industrial Arts was begun in 1850, Civil Engineering college in 1834, Chennai Medical College in 1835 and Chennai Medical University in 1857.

While considering the growth of population and development, the Chennai High Court was established in 1862 to cater the needs of the Public. Though the Railway Company was formed in 1845, the actual construction work in Chennai began from 1853. With the moderate development of railway facilities and requirements in South India, Chennai City was facilitated with headquarter for South Indian Railway in 1858.

After 1850, some praise-worthy events happened in Chennai. The Chennai harbor work was initiated between 1872 and 1875. While the Session of Indian National Congress held in 1887 at Chennai. From 1900 onwards several establishments of different nature started functioning in Chennai which helped socio-economic development of the city. From time to time, the area under Chennai City kept enlarging due to population growth and expansion of industrial development. In 1991, "beautification of Chennai-2000" (i.e. Ezhilmigu Chennai 2000) was taken up.

Mr.Love, in his book " Vestiges of old Madras" referred to the selection of the site for the fort by day .

"Two streams flowing from the west and North respectively had a common outlet to the sea about a mile south of the village of Madraspattnam. The first, which was then known as the Triplicane River, and now as the Cooum, followed a winding course through the village of Chetput, Nungambakkam and Triplicane. The other a smaller stream called the North or Elambore River flowed parallel to and about a mile distant from the east along the west side of Madraspatnam, till it reached site of the present General Hospital. It then turns sharply towards the east to enter into the sea. The first bend, by the existing General Hospital, was within yards of the Triplicane River and at that point a cut was made, at some unknown period before the end of the seventeenth century, between the two streams, with the object probably of equalizing flood levels. The low lying, marshy tract of land lying between the rivers was consequently surrounded by water, and it was known as early as

the Island. The two streams formed a wide backwater,and communication with the sea was open only during the rains.

Mylapore has been from time immemorial famous for Hindu Religious lore. It is the place where Goddess Parvathi, Consort of Lord Siva, is said to have performed penace having taken the form of a peacock, called "Mayil" in Tamil. Mylapore is said to have derived its name from this. The place is noted for the famous temple of Sri Kapaleeswarar, one of the ancient temples of South India.

Mylapore is equally important for Vaishnavites as Periyalwar, one of the earlier Vaishnavite saints, was born in Mylapore.

It is also said that the great saint Thiruvalluvar who gave the world "Thirukkural", the universal code of human conduct, was either born or lived in Mylapore.

Mylapore was also considered as a centre of commerce and was the seaport of the Pallavas (575-582 A.D). This was as important as Mamallapuram port (Mahabalipuram). The Pallava ruler, Nandi Varman III, Bore the title of "Mylai Kavalan" or the protector of Mylapore.

**Madras during 1803-1827**

This period represents a period of consolidation by the British in South India. Lord William Bentick who later became the Governor General of India was the Governor of Madras, for four years. His rule saw the 'Sepoys' Mutiny at Vellore and a quarrel between the government and a judge of the Supreme Court. Towards the end of his rule at Madras, Army Officers gave him trouble. Lord Bentick was recalled by the Court of Directors of the Company because of his inability to deal with the situation effectively.

Sir George Hilario Barlow was Madras Governor for six years from 1807 to 1813. In the beginning of the 19th century there was faction among several groups, the administration was not good, the authority was not powerful enough, army was in chaos and merchants were eager to make money.

Sir Edward Elliot was the next important Governor of Madras. He gave his name to Elliot's Beach at Adyar, and to Edward Elliot's Road at Mylapore. He appointed a judicial commission with Munro, as its president in 1814. Several reforms in the administrative system were made by the commission.

Sir Thomas Munro who became the Madras Governor in 1820 and continued till 1827 was both a great soldier and an administrator. He was the father of the Ryotwari system. He contributed substantially to the system of administration. His stature was raised by the people of Madras City which can still be seen in the city. Munro tried his best to improve literacy. He initiated English education in Madras.

St. Andrew's Kirk on the Poonamalle High Road was built during 1813-1821. With the government support it was built by Scotchmen. It was followed by the Wesleyan Chapel in Broadway and St. Mathias Church at Vepery. Thus, rapid construction of buildings, Churches etc and educational reforms were significant during the early part of the 19th century.

A private school of Industrial Art was started in 1850 by Dr. Hunter, which was taken over by government in 1855 and it is the present College of Art and Crafts. In 1834, the Civil Engineering College was started which became a college in 1862. Madras Medical College was started in 1835 in the name of Madras Medical School. A Hindu institution was also started during the period by the Hindu Trustees who administered the charitable endowments left by Pachaiyappa a Madras merchant of the 18th Century.

The medium of education was English in higher classes and local language in the lower classes. The Department of Public Instruction was created. The University was reorganized as the Presidency College with an attached Law Department. A training school for teachers was established in 1855-56. The Madras University was started in September, 1857 on the model of London University.

Charles Trevelyan became the Governor of Madras in 1859. His administration was successful in all respects. The Madras High Court was created in June 1862. There was a number of journalists during this period Mr. M.V. Sadagopacharlu formed Madras Legislative Council. Another prominent personality of the period was Mr. C.V. Ranganathan Sastri, a great scholar in Sanskrit and law. Press was revitalized by Mr.G.. Subramanya Ayyar and 'The

Hindu'the prominent newspaper was started by Mr. Vijayaraghavacharya and this was guided and controlled by late Mr. S. Kasturi Srinivasa Ayyangar. Sir. T. Muthuswami lyer became the first Indian Judge of the Madras High Court.

The Railway company in Madras was formed in July 1845. Madras was the Railway headquarters. Lord Hobart who was the Governer from 1872 to 1875 initiated the Madras Harbour Project. He was also responsible for the drainage system in the city. The first regular Census also was conducted in 1871. Sir Mount Stuart Elphinstone Grant Duff constructed the Marina from Cooum River to Santhome.

In the early years, Madras was the center of English activity, and the approach to Madras always impressed European arrivals. It was not just the view of palm fringed beaches, rolling surf, tropical blue skies and fresh land breezes. The travelers had already broken their journey in Cape Town and some were bound even further east, for Batavia, Singapore or Canton, but none of these were destined to leave the strongest impression on them. The buildings in Cape Town were nearly all in the Dutch style and would be scarcely a surprise to travellers coming direct from Europe. There is no reason to suppose that Batavia at that time would have anymore imposing effect than Singapore, where the European influence was considerably less. The impression of Canton approached via., Bocca Tigris, and of the lines of factories along the harbour, has been preserved in a number of painting which record the presence of European architecture in a distant land, but give no hint of army passionate involvement. But, the European arrivals on the Coromandal coast saw Madras in a totally different light. To be precise, they were dazzled by what they saw and what they thought.

With the increase in the availability of power and the possibility of cheap labour, more and more industries were started in and around Madras City. The most important one was the group of Buchingham and Carnatic Mills. Tanneries have played an important role in the development of Madras. Integral Coach Factory was also located in Madras City. Establishment of several manufacturing units engaged in car making, automobile workshops, industrial estate both in Guindy and Ambattur, the Surgical Tool Factory have given a new look to Madras City and its suburbs. A number of Arts Colleges, Medical Institutions, Engineering Technological Institutions, Veterinary Law and Teaching have been established.

Indian Institute of Technology and Central Leather Research Institute have also come up. These have added to the development of the Madras City. Its growth has played an important role in the development of neighbouring states of Kerala, Karnataka and Andhra Pradesh.

**(iii) Administrative Set up**

With the inclusion of 12 Panchayats around Chennai in 1978, the area was extended from 128.83 sq.kms., to 174 sq.Kms., as per revenue authorities.

From time to time, the Chennai districts have been divided into number of divisions for administrative purpose and for rendering effective civic service. The total numbers of divisions/ wards have been increased from 150 in 1981 to 155 in 1991 by including five areas such as Cherian Nagar, Dr.Radhakrishnan Nagar (South), villivakkam (South), Virugambakkam (South) and Aminjikarai (Central). In 2001 census, there were 155 Divisions. The Chennai district is represented with 14 Members of Legislative Assembly and 3 Members of Parliament.

The population, according to 2001 Census, of Chennai District was 43,43,645(Male 22,19,539 and Female 21,24,106) and the population growth rate during the decade 1991-2001 returned the highest in the State.

Madras city with its area of 174 Sq km. has a population of 43,43,645 expressing the highest degree of urbanization and density mainly due to immigration and sporadic development of industries on the outstirts.

### (iv) Physical Features

Chennai City, one of the Metropolis in India is the capital of Tamil Nadu, serves a Gateway to the South Indian culture. Chennai is situated on the Northwest corner of Tamil Nadu on the coast of Bay of Bengal, geographically it lies between 12 .$9^0$ and 13 .$9^0$ Northern latitude and 80.$12^0$ and 80 .$19^0$ of the Southern Longitude. Chennai district or otherwise Chennai city has a stretch of sea coast of about 25 Kms along the Bay of Bengal from Thiruvanmiyur in the south to Thiruvottiur in the North. The district is surrounded on the East by Bay of Bengal and other sides by Thiruvallur and Kancheepuram Districts.

### Physiography

The average elevation of the city is not more than 22 feet above the mean sea level while most of the localities are just at the sea level.

### Drainage

The city is intersected by two streams, the Cooum and Adyar. The Cooum runs through the heart of the city and enters into the sea. While the Adyar River passes through the Southern part of the city. Buckingham canal runs through the city, almost parallel to Coromandel Coast, within the limit of 5 Kms from the coast.

### Climate

Chennai experience hot climate which could be classified as tropical maritime monsoon type. As the district is in the tropic, the temperature is naturally high but it is counter balanced to a considerable extent due to the proximity of sea. Monsoon period is between June and December while cold weather prevails between December and February. From March to May Chennai City experience the warmest weather.

The mean minimum temperature rarely falls down to 20.$9^0$C while the mean maximum temperature above 38.$7^0$C. The actual mean minimum temperature recorded in Nungambakkam and Meenambakkam for the period between July and December in 2000 indicate that the temperature ranges from 20.$9^0$C to 21.$5^0$C and 37.$7^0$C to 38.$7^0$C respectively. Similarly, the actual mean maximum temperature for the same period recorded as between 21.$5^0$ C to 38.$7^0$C respectively in the two stations. However, the average actual mean minimum temperature per month for the period was 21.$5^0$C in Nungambakkam while it was 20.$9^0$C at Meenambakkam. The humidity in the city is reported to be high when compared to other areas in the state due to the geographical location. The average humidity recorded per month at Nungambakkam and Meenambakkam for the period

between June and May 2000 were 71.83 and 70.21 respectively. It is reported that the humidity rate during morning was higher than the evening.

Number of Fishermen Co-operative societies in Chennai was 61 with 37,810 members. The Chennai fisherman Co-operative Federation, functioning with one Assistant Director of Fisheries/ Special officer

and one Co-operative Sub-Registrar, was setup with a share capital of Rs. 7,80,250 which includes Governments investments to the tune of Rs. 7,50,000. The main objectives of this Federation are to arrange for disposal of fish and fish products of its members, to receive and sell fish produces in Chennai city.

A Fishermen Training Centre is functioning at Adyar for importing training to the fishermen in modern methods of fishing and also about the maintenance of the boat engine. Practical training has been given to the trainees to operate trawl nets and winches, maintenance of marine diesel engines, elementary navigation, etc. This centre is managed by an Asst. Director of Fisheries, by two Inspectors of Fisheries, two Drivers and two seamen. This centre has given training to 693 members until 2000. Under self employment scheme, 115 graduates were given training in prawn culture and fish culture. Under the centrally-sponsored scheme, a major fishing harbour at Chennai with estimated cost of Rs.11 crores was started to provide landing and berthing facilities to 500 mechanised boats and 50 trawlers.

**Industrial Growth**

Chennai is one of the leading city in India today from the industrial point of view. European business firms established in the latter half of the 18th century and Indian business firms established in the latter half of the 19th century have contributed industrial growth of the city.

The importance of Chennai city from the point of view of trade and commerce had a great influence in attracting industry. Availability of skilled labour and proximity to port and railway stations are the other factors which have helped concentration of industries in Chennai city. Ever since the role of public and private sectors have been conceived as supplementary and complementary to each other. It was accepted that the establishment of large scale industries is paramount responsibility of the Government. With its sound political administration, comparative freedom for labour trouble and enthusiastic entrepreneurship, Chennai has forged ahead during the Second Five Year Plan period towards the establishment of major industrial undertakings to tap even the meagre resource available, to assess the industrial potentialities, to increase the power supply and to provide assistance in money.

The history of Industrial Development in Chennai city is quite interesting. British Government followed a policy of non-interference for more than a century and did not consider it beneficial to organize and regulate industrial growth in an under developed economy. There were so many bottlenecks in the growth of industries such as lack of raw material, inadequate supply of water, power, non-availability of machinery and paucity of capital etc.

The first tanning factory on record in Santhome was established during 1855, by Mr. Thomas Parry. With the increase in number of factories the number of workers also went up steeply.

The Second World War proved to be a great fillip with the result of number of industrial units had to work to full capacity and in more than one shifts to meet the growing demand. A number of foreign firms, mostly European came to be established in Chennai during the latter half of the 19th Century. Chief of which are Simpson, Spencers, Addison, Best &co., Burmah Shell oil etc.

During 1935, Reserve Bank of India came into existence followed by a chain of foreign and Indian Banks. Thus, the Industrial growth of the city was boosted to a great extent.

The Government of India demarcated definite sphere for Government undertaking and private industries. After Independence Five Year Plans came into being for boosting growth of small scale and large scale industries. Great emphasis were laid on the expansion and development of heavy industries, factories and machine tool enterprises.

In all, there were more than 21,860 factories in Chennai. The Chennai district stands at the top with 1,137,418 employees distributed in all manufacturing industries concerned and which contributes an overall percentage in the states as a whole, until 2000.

The industrial importance of Madras city grew considerably as distributing center for the goods manufactured.

**Binny & Company Mill**

They were the pioneers of textile trade and they were the agents of Buckingham and Carnatic Mills. It is only from the heart of the city. The Buckingham Mill sprang up in 1878 and Carnatic Mill in 1883 and both were amalgamated in 1920.

The mill is one of the biggest and most modern wearing Mills in India. Due to labour unrest this mill had to face many a lockout during the past decade.

**Intergral Coach Factory**

After independence the contribution of science, technology and education to the economic growth of various stages of development of the country has been abundantly recognized.

It was set up in 1955 with Swiss technical collaboration. The production of unfurnished broadgauge coach shells has been supplied to Railways. The ICF today is the biggest coach building factory in Asia with the highest number employees on its role.

**Film Industry**

The film industry had an early start in Chennai City. But the Motion Picture industry recorded rapid growth with the establishement of Gemini and Neptune studios followed by AVM, Vijaya, Vahini, Bharani and Satya. Kodambakkam is known as Hollywood of Chennai as it is engaged in producing films in Hindi, Tamil, Telugu and Kannada languages.

**Hindustan Teleprinters**

Set up in the city during 1960 in collaboration with Messers. Ing.C.Olivetti of Italy for the manufacture of Teleprinters and other Electronic equipments.

Small scale industries form the seed beds of large scale industries. As ancillary industries, they form the pillars of industries growth and contribute significantly to the national economy. Small scale industries are a little bigger concerns working usually on a small factory basis and catering to comparatively wider market. The small industries are of varied types; but then common features are their urban or semi-urban location, and use of machines, power and modern techniques.

There are about 20 small scale industrial groups in Chennai city. The leading one is Readymade garments having workers under its unit. Coming close on this is the leather unit producing leather products with employees on its role. Cotton textiles and other testing laboratories also come under the category of small scale industries.

The details of small scale industries in the district are:

Small Scale Industries

| District | Year | NIC Code | Industry Group | Number and units | Number of workers |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| Chennai | 1999-2000 | 20 | Food Products | 69 | 267 |

Another important factor which determined the growth of industry is finance. Various organizations such as International Bank for Reconstruction and Industrial Credit Investment Corporation have been extending the services to meet the ever increasing demand for finance.

## Trade and Commerce

Trade and commerce have existed in Chennai ever since the first weaver or potter bartered their products. Chennai has maintained its importance throughout the last three centuries as a commercial and trading center. This role has no doubt helped Chennai in its industrial growth.

Being a metropolitan city, Chennai plays a crucial role in several activities related to trade and commerce. Chennai city is inhabited with various trading communities who have been engaged in commercial transactions. There are different trading companies established by public and private sectors. Trading activities not only within the city and State, but also extended and maintained with other States, particularly with the neighboring States. Trading activities mainly involved in imports and exports of agricultural products and industrial machineries.

Trading is also maintained with other countries for economic development of the State. As Chennai situated on the coast which has well connected harbour, import and export of various trade items are being easily maintained within the country as well as with other countries.

Besides, there are several non-scheduled commercial firms which meet the requirement of the people. Financial companies in the city are also involved in investments and credits to a large extent.

## Commercial Banks

In Chennai city, there were 739 scheduled commercial banks which serves the needs of people and other establishments. Of the total number of banks, Indian Bank has 102 branches followed by State Bank of India (80), Indian Overseas Bank (78) and Canara Bank (92).

The deposits of the Commercial Banks as on 31.3.1999 was Rs. 23,096.87 crores.

## Transport

Chennai city is well connected to all major cities in India by rail and road. Chennai Central Railway and Egmore Railway Stations are very important.

It is also a major sea port as well as an international Airport connecting all airlines.

Chennai Port Trust has its own railway lines connected to the Southern Railways and are being operated by the Port Trust.

Increased volume of traffic is also handled by Mass rapid transit system run by the Railways.

The details of Commercial and non-commercial transport vehicles in the district until 2000 were on following:

Availability of Certain basic amenities such as pucca roads, tarraced roads etc., play a crucial role in the development of towns and cities.

The route length of broad guage rail road was 2.043.72 kms. and metregauge was 2,137.16 kms, in the district.

The higher economic growth depends largely both on exports and imports of food stock for which infrastructures imperatives such as railways are indispensable.

Since the present transport facilities are quite insufficient for the swelling crowd, the Southern Railway on its part has contributed to ease the city traffic by inaugurating the elevated Train System (M.R.T.S) from Beach Station to Thirumalai (Mylapore) in 1995 and 1997, and to extend this service upto Velacherry to reduce the crowd during peak hours.

Chennai has an airport at Meenumbakkam. It is international airport served by leading international airlines, the internal passenger and cargo traffic are handled by the Indian Airlines while Air India looks after the traffic outside India. The important tourist and business centres in the country are also connected with Chennai by air.

The total quantity of Exports handled by the Sea Port remains larger when compared to imports (11,13,591 tonnes) and (1,30,95,258 tonnes) respectively.

Chennai city has a harbour. It is a major port consisting of a basin of 200 acres for lighter craft, tugs, a basin of 9 acres for lighter craft, tugs, launches, etc. There are eleven quay berths and 10 mooring berths. The port maintains its own railway system. It is a mixed gauge railway and is connected with the southern Railway broadguage at Royapuram station on the northern side and metre gauge at Chennai Beach station on the southern side. Direct loading of cargo from ship to railway wagons and vice versa is arranged at all quay berths.

The proposal of the Chennai Port Trust to set up a dry dock at Chennai port is under consideration of the government of India, the present ship way is 70 years old and is not able to meet the needs of even the port's dredging vessels which are now sent to Bombay or Calcutta for repairs. More than 600 ships call at Chennai port every year and a dry dock.

## Electricity and Power

Chennai district is fully electrified. There are electricity generation plants in Chennai. Sun-urban railway lines are electrified and consumption of electricity is very high in the city.

## Education

The foundation for educational development of any society is basically depends on the facilities available for school education. School education in the District have been brought under Directorate of School Education and Directorate of College Education. There are Government, Aided and Unaided schools functioning in various parts of the district which teaches in both English and Vernacular languages. It may be stated that a number of private recognised schools are performing better in the district.

The higher education in Arts and Science, Medical, Engineering and Law have been given much importance as these courses have direct implication on socio-economic development of the people. In this district, various disciplines have been listed in Arts and Science courses for which a number of colleges and the university fulfils the need of the pupil. Both bachelor

and master degrees are awarded in colleges and universities. The colleges offering various courses include Arts and Science courses and Medical and Law. Previously, the Engineering colleges were affiliated to Madras University.

There were 6 Government (3), self-financed, and 14 private and autonomous colleges in Chennai city. The number of students enrolled in all these categories of colleges numbered 189,453 boys and 202,254 girls. Number of teachers in these colleges were 20,220 which works out to about 19 students per teacher. In addition, the Madras University which offers different Art and Science courses within the campus has enrolled 2,715 students; 1,585 boys and 1,130 girls. Number of teachers within the University was 281 which works out to about 10 students per teacher.

The Teacher Training Colleges are run by both Government and private in Chennai. There were 87,524 students; 40389 boys and 47,135 girls in Government Colleges and 210,521 students; 106,901 boys and 103,620 girls, in private and aided colleges. There were 4,412 teachers in Government and private colleges Teachers Training Colleges.

Chennai city plays a crucial role for imparting various medical institutions. Professional medical colleges such as Madras Medical College, Stanley Medical College and Kilpauk Medical College are offering Medical Education. These colleges are controlled by Tamil Nadu Dr.M.G.R.Medical University, situated in Chennai. In addition, there is a Dental College and a Nursing College located within the city. A number of Post-Graduate Diploma Courses in Medical and Para Medical courses are also being taught in these colleges.

The number of students enrolled in these colleges and other medical institutions varies. The total students in the Bachelor Medical Courses in all colleges numbers to 7,747. The Post-Graduate level students in different courses in all colleges numbered to 399. There were 7,348 Post Graduate diploma students of different courses enrolled in these colleges. In the field of Nursing, majority of the students enrolled were women. It is reported that 114 students have enrolled for Nursing course both degree and diploma courses. Besides, the colleges are also teaching Technical Medical courses in various subjects like Blood Transfusion, Cardio Vascular Throracic Surgical, CRA, DRA, ECG, etc. According to the Directorate of Medical Education, there were 37,072 teachers in these colleges who tought different courses in these colleges.

The Education Department of the State Government is running both aided and unaided Technical Institutions in the district. Various technical institutions are imparting different courses. It may be stated that the development of expansion of technological institutions would create more employment opportunities which, in turn, improve the socio-economic condition of the people. According to Department of Technical Education, there were eight Government Engineering and Technical Institutions in Chennai District. In addition, there were five Polytechnic Diploma Institutions functioning in the district. The major technical courses offered are Civil, Electrical and Mechanical Engineering and Printing, Chemical Leather and Textile Technology, Commerce Education and Arts and Crafts courses etc.

The number of students enrolled in various Polytechnic Diploma in the district were to 31,477. There were 698 teachers in these Institutions which works out to 45 students per teacher. Besides, 32 students have enrolled in other technological courses in various institutions. To teach the students of various technological courses, 21 teachers were utilised in the institutions. A survey revealed that there were 920 technical centres in the district.

To improve literacy in the district, various steps are being taken up. Adult literacy centers (23), and non-formal education centers, Balwadis and Anganwadis are functioning at different places in the district. As part of educational development, about 206 public libraries are created in the district. To enable the working women in the district to live comfortably, working women hostels 48 ( with 1,233 Women) have been created.

## LIBRARIES

Following are the important libraries in the city.

1. Devaneya Pavanar Library.
2. Government Oriental Munuscript Library.
3. Connemara Public Library.
4. Madras University Library.
5. United States Information.
6. British Council Library.

**(v) Census Concepts**

**Building**

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent houses**

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

***S*emi-permanent houses**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary houses**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

**Dwelling Room**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census House**

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. but if such

built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village**

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City**

Towns with population of 100,000 and above are called cities.

**Urban Agglomeration**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common

kitchen. There may be one member households, two member households or multi-member households.

**Institutional Household**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Castes and Scheduled Tribes**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

**Language and Mother tongue**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate**

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate**

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

**Educational level**

The highest level of education a person has completed.

**Work**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal worker**

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

**Non-worker**

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

**Cultivator**

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

**Agricultural labourer**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other worker**

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work participation rate**

Percentage of workers (main + marginal) to total population.

**Population density**

Population density is the number of persons inhabited per square kilometer of the area.

**Age**

Age is measured in terms of the completed number of years.

**Sex ratio**

Number of females per 1000 males in a population.

**(vi) Non-Census Concepts**

**Improved drinking water**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

**System of sewerage**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those

carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

**Type of latrine and method of disposal of night soil**

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate (CBR)**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

**Crude death rate (CDR)**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

**Natural growth rate**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR)**

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

**Age specific marital fertility rate (ASMFR)**

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

**General fertility rate (GFR)**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

**General marital fertility rate (GMFR)**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

**Total fertility rate (TFR)**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASFR}_{15\text{-}19}}{1{,}000}$$

**Total marital fertility rate (TMFR)**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASMFR}_{15\text{-}19}}{1{,}000}$$

**Age-specific mortality rate (ASMR)**

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

**q1**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2**

Probability of dying between birth and age 2.

**q5 :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

**Infant mortality rate (IMR)**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR)**

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**i) Early neo- natal mortality rate**

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**ii) Late neo-natal mortality rate**

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Post neo-natal mortality rate (PNMR)**

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Peri-natal mortality rate (PMR)**

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

**Still birth rate (SBR)**

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

**Maternal mortality rate (MMR)**

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

**Eligible couple (Couples per 1,000 population)**

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

**Child woman ratio (0-4)**

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

**Child woman ratio (5-9)**

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

**Migration, Internal and International migration, Impact of migration.**

**Migration**

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly

a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

**Internal And International Migration**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

**Impact of Migration**

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

**Size class of UA / town**

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

## (vii) CENSUS 2001 FINDINGS

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February 2001 i.e., the census provides a snapshot of the population of the country, as it existed at the midnight of 28th February2001. Actual enumeration was spread over a period of 20 days from 9th to 28th February 2001 followed by revisional round up to 5th March 2001 for up dating of the population figures with reference to the midnight of 28th February 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas. These lists formed the basic frame for the organization of the census operations. Thereafter, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EB's).

The second major step was the house listing operation, which was carried out in this district during April, 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the houselisting operation. Houselisting operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

### DISTRIBUTION OF POPULATION IN RURAL AND URBAN AREAS

The total population of Chennai District as per the 2001 Census count was 43,43,645. In 1991 Census, this was 38,41,396.

**TABLE A: DISTRIBUTION OF POPULATION**

| Serial Number | Name of Taluk | Total Population 2001 | | | Rural Population 2001 | | | Urban Population 2001 | | | Number of Villages | | Number of Towns |

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

No villages in this District

**Note:** Chennai have neither taluks nor villages. The entire District is classified as Metropolitan Corporation.

## SIZE, CLASS AND STATUS OF TOWN

The entire district has only one statutory town constituted as Metropolitan Corporation.

**TABLE C: SIZE,CLASS WISE DISTRIBUTION OF TOWNS**

| Class | Size & Class of Towns | Statutory Towns | Non-Statutory Towns | Municipal Corporations | M | TP | CT |

## DECADAL GROWTH OF POPULATION

The decadal growth variation of the total population during 1991-2001 in the district was 13.1 %.

**TABLE D: DECADAL GROWTH OF POPULATION**

| Serial Number | Name of District | 1991 | | | 2001 | | | % of Decadad Variation | | | Percentage Urban | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

## DENSITY OF POPULATION AND SEX RATIO

The density of population in the district was 24,963 per sq.km, the highest in the state. The sex ratio in the district was 957, less than the state average.

**TABLE- E: DENSITY AND SEX RATIO**

| State/District | Density | Sex Ratio |
|---|---|---|
| Tamil Nadu | 480 | 987 |
| Chennai | 24,963 | 957 |

## LITERACY

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. Like 1991 Census all children of age 6 years or less are treated as illiterates although they may be going to school and can read and write a few odd words. During 1981 Census this limit was upto the age of 4 years. It had also been decided in the 2001 Census to use only effective literacy rates i.e. the ratio of literates and population excluding the age group of 0-6.

**TABLE F: LITERACY**

| State/District | P | M | F |
|---|---|---|---|
| Tamil Nadu | 73.5 | 82.4 | 64.4 |
| Chennai | 85.3 | 90.0 | 80.4 |

The literacy rate of the district was at 85.3%, higher than literacy rate of the State (73.5%). The literacy rate for males was higher than females. The female literacy stood at 80.4% as compared to 90.0% for males.

## ECONOMIC ACTIVITY

The Table G shows that the proportion of the Main workers, Marginal workers and Non workers to the workers in the district.

**TABLE G: ECONOMIC ACTIVITY**

| Name of the District | Persons/ Males/ Females | Percentage of Workers | | |
|---|---|---|---|---|
| | | Main Workers | Marginal Workers | Non Workers |
| Tamil Nadu | Persons | 38.1 | 6.6 | 55.3 |
| | Males | 51.9 | 5.7 | 42.4 |
| | Females | 24.0 | 7.5 | 68.5 |
| Chennai | Persons | 31.8 | 2.5 | 65.7 |
| | Males | 50.8 | 3.4 | 45.9 |
| | Females | 12.0 | 1.5 | 86.5 |

## WORK PARTICIPATION RATE

The Work Participation Rate for total workers is defined as the percentage of total workers to total population.

**TABLE H: WORK PARTICIPATION RATE**

| Name of the State/District | Total | Rural | Urban |
|---|---|---|---|
| Tamil Nadu | 44.7 | 50.3 | 37.5 |
| Chennai | 34.3 | - | 34.3 |

The total work participate rate of the district was 34.3%, lower than the state work participation rate of 44.7%.

## SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION

The following table reveals that Scheduled Caste Population in Chennai District was 13.8% and Scheduled Tribes Population was 0.2% in 2001.

**TABLE I: SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION**

| Name of the District | Total/ Rural/ Urban | Total Population | Total Scheduled Castes Population (%) | Total Scheduled Tribes Population (%) |
|---|---|---|---|---|
| Chennai | Total | 4,343,645 | 598,110 (13.8) | 6,728 (0.2) |
| | Rural | - - | - - | - - |
| | Urban | 4,343,645 | 598,110 (13.8) | 6,728 (0.2) |

## RELIGION

In India, many religions have thrived and every Census have attempted to provide an interesting picture of the religious persuasions and belief of the people of the country.

The following table shows the main religions communities in Chennai district during 2001.

**TABLE J: DISTRIBUTION OF POPULATION BY RELIGION**

| Religion | Total | Rural | Urban |
|---|---|---|---|
| Hindus | 3,573,356 | - | 3,573,356 |
| Muslims | 379,206 | - | 379,206 |
| Christians | 331,261 | - | 331,261 |
| Sikhs | 2,470 | - | 2,470 |
| Buddhists | 1,891 | - | 1,891 |
| Jains | 45,611 | - | 45,611 |
| Others | 1,819 | - | 1,819 |
| Religion not stated | 8,031 | - | 8,031 |
| **District Total** | **4,343,645** | **-** | **4,343,645** |

The above table depicts the percentage and actuals of each religious group. Majority of population (82.2%) belonged to Hindus followed by Muslims (8.7%), Christians (7.6%), Sikhs (0.06%), Buddhists (0.04%) and Jains (1.05%).

**(ix) Major Social and Cultural events, natural and administrative developments and significant activities during the decade.**

Chennai city has acted as an important centre of cultural and education in South India and has been the growth of many movements which have played an important role in the history of the sub-continent. A large number of institutions which are known in India and abroad are found located in the city, of which mention may be made of the Theosophical Society, the Kalashetra and colleges of Arts and Crafts. The establishment of professional colleges for Medical, Veterinary, Law and Teaching, the location of the Indian Institute of Technology and the establishment of Central Leather Research Institute have added to the development of the city.

Chennai is one of the leading cities in India today from trade and commercial point of view, with the fourth largest port in the country and the first to have developed a full-fledged container terminal to international standards. The port is providing trade links with Japan, Singapore, Malaysia, Burma, Bangla Desh, Sri Lanka and other far eastern countries. Chennai is also one of the most important industrial city of the sub-continent. As a district of the State it ranks third after Coimbatore and Salem as far as number of factories is concerned but stands at the top in case of employment and productive capital. It, however, ranks second in terms of industrial out-put next to Chengalpattu.

Chennai city enjoys a prominent position in the country in film industry and Kodambakkam, known as the Hollywood of Chennai, has a number of studios engaged in the production of Tamil, Telugu, Kannada, Malayalam and Hindi movies which are quite popular.

**(x) Brief description of places of religious, historical, or archelogical importance and places of tourist interests.**

Fairs and festivals are held in the different parts of the city throughout the year. The festivals associated with Hindu temple are more than 500 in a year. Apart from the traditional fairs and festivals, modern fairs such as exhibitions and national festivals like Independence day and Republic day are also celebrated in the city. Following are some of the important festivals celebrated in the city, attended by thousands of devotees from far and near.

The Brahmotsavam (including the Arupathumoovar festival) of Kapaleeswarar temple located in Mylapore is celebrated in the Tamil month of Panguni (March-April) and it lasts for ten days. A big fair is held near the temple. The floating festival held in January - February in Mylapore is also very popular. Of all the festivals celebrated in the Parthasarathy temple in Triplicane, the most important is the Vaikunta Ekadasi observed (December-January). The Brahmothsavam in the month of Chithirai is celebrated for ten days in this temple. The car festivals falls on the seventh days and is attended by more than 50000 devotees. The Kirthigai (Karthigai asterism) day every month is a day of festival in the Vada Palani Andavar temple in Kodambakkam. The annual festivals are Skanda Sashti in Ayppasi month and Uthiram in Panguni month. The floating festivals during the Panguni Uthiram is also well attended. The Kandaswami temple in Muthalpet celebrate twenty festivals in a year. The Jathirai festival in Adhi Mottaiamman temple attracts a large number of devotees. Among the several festival celebrated by the Siva-Vishnu temples, important ones are Navarathri, Sivarathri, Vaikunta Ekadasi and Sri Rama Navami.

The Muslim festivals also attract crowds and give rise to fairs in the city. The Muharram is the important festival, observed by thousands of devote Muslims in various parts of the city. The Easter, Christmas and the New year are marked by impressive festivities in the churches. The feast at the Cathedral Church at Santhome, the festivals at St. Thomas Mount (December) and Little Mount (May), the feast of our Lady of Lourdes at Perambur (February 11), the feast of Our Lady of Help of Christians at Broadway etc., are important occassion.

**Some of the tourist attraction places in and around Chennai city are:**

1. Fort St. George
2. Marina Beach
3. University of Madras
4. Vivekananda Illam
5. Theosophical Society

6. Kalashetra
7. Sri Balaji Temple, T.Nagar
8. Kapaleeswarar temple, Mylapore
9. Parthasarathy temple, Triplicane
10. Vada Palani Andavar temple, Kodambakkam

**St.Mary's Church**

Castles, palaces, churches, museums are fascinating because they are the symbols of gracious living by British. Fort St.George, St.Mary's Church and musemum are, no doubt, an attraction for tourists and traveler.

Dignified pillars, containing wondrous images flecks of colour – they all add much to the eloquence of sculptors and other artisans. Defence establishments such as Embaration and Garrison are located here. After the departure of Britishes, the Fort St. George and its outskirts are utilized by the State Government for its offices and Assembly Houses.

**ANNA SQUARE (MARINA)**

It is immortal on the marina where the great Tamil leader Dr.C.N. Annadurai was laid to rest. So domineering was his personality and contributions to Tamil literature. It is very difficult to separate 20th century Tamil literature from him. Lakhs of people visit this mausoleum regularly.

**HIGH COURT AND PARRYS CORNER**

The building of High Court at Netaji Subash Chandra Bose road looks enchanting, built under the Indo-Saracenic style. Mostly the judicial departments are located here such as small causes court and a law college. The High Court buildings is a landmark in Chennai. Though built during the regime of the British it resembles sythesis of Indo-Muslim culture with stone domes atop.

**LIGHT HOUSE**

This is a beacon of hope for the groping sailor on the ocean. It also provides a panoramic view of the entire city. Besides, an attraction for tourists it also serves as an amusement center for travellers. There are many storeys inside the light house connected by flight of steps. Children will be dilated with happiness when they visit the tallest skyscaraper i.e. Light House.

**SANTHOME**

Santhome Basilica, the Cathedral Church, with its healing powers was built during the British regime where the mortal remains of Saint Thomas was believed to have been buried. Beautifully carved stone screens throw filigree of shadows in the encircling dome. That's why it is known as Santhome.

The serenity of the Basilica is lashed by tidal waves of Bay of Bengal. It is also an attraction for tourists irrespective of religion. People from all walks of life come and pay homage to the departed soul of St. Thomas.

**GANDHI MANDAPAM**

Gandhi Mantap at Guindy was the first to be built in memory of the Father of Nation. The line of trees and vegetation on both sides add much to its glamour. Its main aim was to build respect, tolerance and friendship through prarthanas and bhajans among the people.

**KAMARAJ MANDAPAM**

This also was built in memory of great personality, Shri. Kamaraj, who was instrumental for introducing midday meal scheme for children and free education for all in schools.

Among the Chief Ministers who ruled Tamil Nadu, Shri. Kamaraj was very famous for his schemes and policies which aimed for the emancipation of women and downtrodden. He was a great optimist and a man of quiet wisdom and integrity.

**RAJAJI MANDAPAM**

The first and last Governor General of India was Chakravarti Rajagopalachari. He was endearingly as Rajaji. This is a mantap raised in memory of this great leader and intellectual giant. Even Britishers were flummoxed at his intellectual sharpness. He was a marvel of physical and mental health, quite brisk even at the age of 96.

**SNAKE PARK**

The Snake Park is a part of children's park in Guindy. It has numerous poisonous snakes, such as cobra and python. Most of them are from African deserts. The venomous, snakes are kept in a separate enviroment inaccessible for children.

**CHILDREN'S PARK**

This is situated very near to Gandhi Mantap. It has small lawns and clumps of trees. It has also a play field for tiny tots who find great pleasure at the sight of deers and rare birds. There is also a deer sanctuary inside the children's park. As many tourists visit this park, substantial revenue has been generated by the Government.

This sanctuary is mainly intended for conversion of natural habitats, flora and fauna.

**VALLUVARKOTTAM**

With a magnificent history to its credit this was built in memory of the greatest Tamil philosopher, Saint Thiruvalluvar, who gave immortal Thirukkural to the entire world. Of course, this memorial serves as an auditorium. The stone car here is the greatest attraction for tourists from abroad and far flung places.

**(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.**

The city of Chennai came into being due to a strategic necessity and historical accident. It symbolises the rise of British power in South India by setting up and consolidation of the East India Company in the seventeenth century with its headquarters at Fort St. George in Chennai as a trading centre. Within 350 years, a few scattered villages (important being Mylapore, Triplicane and Chennai Patnam) have developed into a modern metropolitan city without shedding its traditional customs, religious outlook and other traditions. It can be proudly remarked that the greatness of ancient Chennai is mostly religious due to the preservation of the old famous Saivaite and Vaishnavite shrines signifying the antiquity of the place. The growth of the city is significant and closely linked with the development of British Institutions and administration. In short, Chennai city was the chief centre from which the British rule expanded in sub-continent and it remains a standing monument of British contribution to India.

# Part - B
# PRIMARY CENSUS ABSTRACT

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5470 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation (**Annexure-II).** The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and

their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been

restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward* level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of taluks, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Taluks/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

## ANNEXURE II

## FERTILITY AND MORTALITY MEASURES

### FERTILITY LEVELS

In demography, the word fertility is used in relation to the actual production of children or "occurrence of births specially live birth". Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women in child bearing age.

In other words, it is a major component of population growth. In the 1991 Census, questions of fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. In 2001 census, these question were also posted to the households. Data gathered in this regard are not readily available.

The above table presenting the female age at marriage relates to all women who were living with their husbands. Some of them might be recently married and some of them decades ago. In view of this, the figures mentioned in the table should be regarded as indicating the situation for the population as a whole.

It is observed from the above table that the mean age at marriage of currently married females in Chennai District is 19.5 years in 1991, which is slightly higher than the corresponding state figure of 19.1 years. The mean age at marriage of the currently married females has increased by about 0.6 years from 20.0 years who married during 1981 - 86 to 20.6 years who married during 1986 - 91 in the district as is evident from the above table.

Presently the statutory minimum age at marriage for females is 18 years. It is worth examining the proportion of the currently married females whose age at marriage was below this limit during the periods 1981 - 86 and 1986 - 91. It is observed from the table that this proportion has decreased from 23.05% during 1981 - 86 to 15.60% in 1986 - 91 in the district which are lower than the corresponding state figures.

### CHILD MORTALITY LEVELS

The estimates presented here have been obtained using the data on the number of children ever born and number of children surviving to ever-married women. Information on questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dying before age (i) = 1, 2, 3 and 5.

It is observed from the above table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981. In 1991, child mortality estimates at the district level was observed higher than the estimates at the State level but in 1981 this estimate was higher in State level than district level.

## ANNEXURE III

## MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out are based on the F - series tables of 1991 Census pertaining to Tamil Nadu state and the district are defined as below.

**ESTIMATES OF FERTILITY INDICATORS**

| State / District | Year | CBR | TFR | TMFR | GFR | GMFR |
|---|---|---|---|---|---|---|
| Tamil Nadu | 1981 | 32.0 | 3.9 | 5.5 | 123 | 169 |
| | 1991 | 26.4 | 3.1 | 4.8 | 99 | 136 |
| Chennai | 1981 | 30.4 | 3.3 | 5.1 | 114 | 162 |
| | 1991 | 24.6 | 2.7 | 4.8 | 89 | 127 |

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Chennai District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in the Chennai District, all the above mentioned rates except TMFR have declined. On comparing the district level data with the State level data in the above table, it is observed that all the above mentioned rates at the district level were lower than those at the State level.

Different fertility measures indicate that mostly all the fertility levels in the district were lower compared to the State average during 1991. This was duly supported by the higher age at marriage of females in the district, compared to the State as is evident from the above table.

| Child - women ratio (0-4 years) | 305 | - | 305 | 348 | 369 | 311 |
| Child - women ratio (5-9 years) | 400 | - | 400 | 447 | 462 | 418 |

One of the most useful indices that can be derived from the question on numbers of children born alive in the average number of children ever born alive per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born per ever-married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women.

In the above table, average number of children born per ever-married women in the age group 45 - 49 in 1991 has been presented for total, rural and urban areas for the Chennai District and Tamil Nadu state. It is observed from the above table that the number of children ever born per ever-married women in Chennai District was less than the State average.

Child - women ratio, a relative measure, is calculated to know the fertility performance of women. It is seen from the above table that child - women ratio among 0-4 years and 5-9 years were lower than the State average.

# ANNEXURE IV

## DISTRIBUTION OF POPULATION BY PLACE OF BIRTH/LAST RESIDENCE

### MIGRATION

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

### INTERNAL AND INTERNATIONAL MIGRATION

The migrational movements are of three types; (i) Migration within the state itself with its components: (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (interdistrict migration), (ii) Migration from one state to another state of the country (interstate migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

### REASONS OF MIGRATION

As in 1991, the reasons for migration were also elicited in 2001 Census. The reasons for migration were broadly categorized as (i) Employment / work, (ii) Business, (iii) Education, (iv) Marriage, (v) Moved after birth, (vi) Moved with household and (vii) Any other reason. Reasons for migration has been elicited only with reference to movement from place of last residence.

### IMPACT OF MIGRATION

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.
