AGRICULTURAL UNIVERSITY

The third largest city of Tamil Nadu, Coimbatore, is one of the most industrialized cities in Tamil Nadu. It is known as the textile capital of South India or the Manchester of the South. The State Agricultural University is situated about 5 Kms from Coimbatore Railway Station. Originally an Agricultural College, it had its beginnings in the Agricultural Demonstration Farm that was started in 1868 in Saidapet Chennai. This was shifted to Coimbatore in 1907 and became a Agricultural College of repute in the course of time. Today, it is the Tamil Nadu Agricultural University, one of the sixteen major Agricultural Universities in the country and one of the best of South Asia, from where Students come to it in large numbers.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grossroots level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (VII) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by of Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchhu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Dr. I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the Village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr. D. Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the “Acknowledgements”.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five-year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census, the District Census Handbook is being brought out in two volumes which contain the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in Class I town has been presented especially in respect of slum dwellers. Scholars and planners alike should benefit from the data on amenities.

(ii) Brief History of the District

Most parts of the Coimbatore District were once inhabited by the tribes, the predominant among them were the Kosars. They had their capital at "*Kosampathur*" which probably later become the present Coimbatore. The Kosas were overrun by the Rashtrakutas. Rashtrakutas later on fell into the hands of the Cholas who were in prominence at the time of Rajaraja Chola. The decline of the later Cholas opened the door to the Eastern Chalukyas. After the decline of the Chalukyas, the rise of the Pandyas began. The entire Chola kingdom was absorbed in Pandya empire while the Kongu region was shared by Pandyas and Hoysalas from the first quarter of the 13th Century A.D. to till the middle of the 14th Century A.D. The Holysalas supremacy over the region remained with them from 1291 to 1342. Due to internal strike in the Pandya Kingdom, Alauddin Khilji, emperor of Delhi sent an army under

the command of Malik and Kabur. Then the area fell into the hands of Musilim rulers. During 1377-78, Vijayanagar rulers recovered the area from Madurai Sultanate. For a few years, the area remained under Vijayanagar rule and later came under the independent control of Madurai Nayakars.

From 1530-1700, Kongunad remained under the Madurai Nayakars. The area then comprised of Districts of Madurai, Ramanathapuram, Dindigul, Thirunelveli, Trichirappalli, Coimbatore, Erode, Salem and part of Kerala State. During the period of Thirumalai Nayak, the Mysore ruler Chamarajaudaiyar captured the Kongu region from whom Hyder Ali took over the area. With the fall of Tippu Sultan of Mysore in 1799, the Kongu region came to be ceded to the East India Company after the defeat of Tippu Sultan. From then till 1947 when India attained Independence, the region remained under the British who initiated systematic revenue administration in the Area.

(iii) Administrative set-up

In 1804, for the sake of better administration the district which were in two parts were merged into one and was brought under the control of District Collector. In the early 20th Century, there were 10 taluks in the District, viz., Bhavani, Coimbatore, Dharapuram, Erode, Karur, Kollegal, Palladam, Pollachi, Sathyamangalam and Udumalpet. The name of Sathyamangalam taluk was subsequently changed as Gobichettipalayam. Avanashi Taluk was formed in the year 1910 by transfer of some areas of Palladam and Coimbatore taluks. In the same year, Karur taluk was transferred to Tiruchirapalli District. In 1956, the whole of Kollegal taluk was transferred to Mysore State as part of State Re-organisation scheme.

In 1975, Sathyamangalam sub-taluk, and in 1979 Perundurai sub-taluk and Mettupalayam sub-taluk were upgraded into independent taluks. Thus, the total number of taluks become twelve.

The above changes did not last long. In 1979, six taluks namely Bhavani, Gobichettipalayam, Sathyamangalam, Erode, Perundurai and Dharapuram were transferred from this District to constitute a new district, viz, Periyar (Erode) under G.O. Ms.No.1917 Revenue dated 31.8.79. The above bifurcation reduced the size of the present district. At present, Coimbatore district consists of 9 taluks, viz., Coimbatore(N), Coimbatore(S), Mettupalayam, Pollachi, Valparai, Udumalpet, Tiruppur, Palladam and Avanashi.

There are 415 Revenue Villages (400 habited and 15 uninhabited) in the District.

The District consists of 59 Town Panchayats, 4 Municipalities, 1 Municipal Corporation, 389 Village Panchayats and 19 Panchayat Unions. There are 14 Legislative Assembly Constituencies (2 for Scheduled Castes) and 2 Parliamentary Constituencies in the District.

The following table gives the Revenue Divisions, Taluks and Panchayat Unions in Coimbatore District.

(iv) Physical Features

Location and Size

Coimbatore District lies between 10° 10" and 11° 30'' Northern latitude and 76° 40" and 77° 30" Eastern longitude in the extreme west of Tamil Nadu. It is bounded in the North and East by Erode District. Anamalai Hills and Western Ghats are the boundries in the west and south. This district benefits from the south-west monsoon due to the presence of the mountain pass namely "Palghat Gap". It also helps to promote trade and transport in and around Coimbatore city.

Physiography

Vellingiri on the Western Ghats, 35 Kms from Coimbatore, stands revered as the Kailash of the South. The Temple at the foot of the Mountains is dedicated to Vellingiri Andavar and Manonmani Amman. On the peak of the 7th hill-a-shrine for Lord Siva sizeable stone–decorated Linga for worship. The yatra to Vellingiri is almost as strenuous as that of Mount Kailash in the Himalayas from Februrary to May. One reaches the seventh hill during the early hours of the day. It is tedious to climb first three hills. A bath is the cool "Andi" spring on the sixth hill reduce fatigue. It is also ideal to rest hill down. The rare herbs found in the seventh hill.

Marudhamalai hill is 12 kms from Coimbatore and Thirumoorthi hills is 20 kms from Udumalaipettai.

As most parts of the district is hard rocky terrain, ground water potential of the district is limited. Deep open wells reaching more than 30 metre depth are very common in Avinashi and Palladam Taluks.

Drainage

Rivers

The most important rivers are Bhavani and Amaravathy. Besides these east flowing rivers, there are a number of smaller rivers such as Aliyar, Sholaiyar, Parambikulam Palar etc., originating in the Anamalai Hills and flowing west wards. Amaravathy which runs through Coimbatore joins Cauvery in Karur District. Bhavani is more or less a perennial river which rises in Palghat District of Kerala. A number of important scheme under river water have been established as detailed in the table given below. Noyyal is yet another river, which originates from Boluvampatti valley of the Vellingiri Hills, 40 KM. west of Coimbatore Town. It flows to about 170

K.M. from west to east through Coimbatore South and Palladam Taluks. Palar rises in Anamalai ranges in Udumalpet Taluk and is strengthened by another small river Nallar which also originates from Anamalai Hills. Finally it joins the river Aliyar, a few kilometers west of Ambarampalayam in Pollachi Taluk. Aliyar known as Thunkkadavu during its early stages rises in Anamalai Hills and is joined by various small streams. Running in a northwesterly direction it receives the river Palar and takes a northwest course and finally enters Kerala to be known as Bharathapuzha there.

Sholaiyar is another river which has its origin in Coimbatore District and flows from westwards into Kerala. Rising in the Anamalai Hills in Pollachi Taluk, it takes South Westerly route and enters Kerala.

The Parambikulam Chalakkudi river has its origin in the western ghats near Ramalakhman malai. It flows through Coimbatore District for about 20 KM. and enters Kerala and is known by Periyar. Idamalai River is formed by the river Kallar and few other minor streams. It flows westwards along the southern borders of the District.

The Corporation also maintains a fleet of 18 water lorries for supplying water to area not served by aforesaid water supply systems and also to the areas where the supply is inadequate.

The town has been divided into 4 Zones depending on the topography. The underground drainage scheme executed by TWAD Board in Zone III has been completed and commissioned. In the case of other Zones, the execution is in progress. The open drainage system is found in almost all the areas.

Climate

The climate condition of this region is one of the most variable in the district as a whole. It is seldom predictable. This mostly consists of upland regions. First two months of the year, January and February experience a very pleasant climate. During March, the sky is clear, but the mercury shows an upward trend which continues till the end of May. The highest temperature is recorded early in April/May. As soon as the South-west monsoon sets in it affects the temperature considerably. The South-west monsoon sets in and provides most of the rains in this District. But after mid December rain ceases. The temperature which was once set on the downward trend continues its course till the end of January. The climatic condition of this District is most conductive for cotton ginning and weaving industry.

The District is rather dry and the rainfall is scanty. The annual rainfall in the district ranges from 55 to 75 cm. The quantum of rainfall in this district can never be predicted. It is generally scanty which sometimes results in complete failure. Rainy months can be grouped into the seasons.

Summer rains which may amount to 15 to 23 cms. During the months of March, April and May, South-west monsoon rain occur in June to middle of September, fall mostly in south-western parts of district.

In this district normally rain is occurring during October to December from North-east monsoon.

The climate in this district is very pleasant due to the presence of the Palghat gap. Pollachi taluk which lies opposite to the Palghat gap gets considerable rain during these period and the rush of the South-west monsoon winds through the gap lessen the oppressive heat and makes the climate tolerable, though not pleasant.

The intermonsoon period starts during September and the sky is clearly overcast. During October and November the North-East monsoon sets in and provides most of the rains in this district. By December, the rain gradually disappears and the climate slowly becomes pleasant by the month end. The following table gives the climatic conditions of the District in 1999 and 2000.

Forest

In Coimbatore District, 21.2% of the total land comes under forest area. Flora and Fauna of this District is very rich and well distributed. In this District one can notice all types of trees in the South Eastern regions. Neem and Tamarind are most popular trees. The other varieties that are found more frequently include Coconut, Plantain, Mango etc. The valuable timber species like Teak wood, Blackwood, Sandalwood, Bamboo, Rosewood, Vagai, Pillamaruthu etc., are seen in plenty in Nilgiri slope i.e. Mettupalayam range.

The fauna too is varied and rich in this District. Most of the common species found in the plains and ranges in the south are available here. In the Wild Life Sanctuary in Anamalai Hills, the wild elephants and tigers are treated as protected animals. Wild animals like tigers, Foxes, Jackals, Deer, Monkeys etc, are common varieties. Most of the South Indian species like Crow, Bats, Indian kuckoo, Vultures, Squirrel, Patridges etc., are present in this region.

There is a Forest College in this District started during the British days as it was found that the college at Dehra Dun was not adequate to meet the needs of the South. In 1912, the Madras Forest college was started. The Institution was closed in the year 1939. Again it was reopened, but the management was handed over to the Government of India in 1948. Ever since its inception it is known as the Southern Forest Rangers college. At present it is under Government of Tamil Nadu. The Institute of Forest Genetics and Tree breeding, a research Institute of Government of India, is also function in the premises.

Minerals and Mining

The mineral wealth of the District is considerable. The available important minerals are limestone and Gypsum.

Lime Stone

The workable deposits of Crystalline limestone occur in Coimbatore taluk, which are being used for the manufacture of cement by Associated Cement Company at Madukkarai. The total proved inferred reserves in the area including Ettimadai and Walayar deposits are about 28 tones. Occurrences of limestone are reported from near Gopalapuram in Pollachi Taluk.

Gypsum

Gypsum is extensively mined from sub-soil around Venkatapuram, Karadibavi, Kattampatti, Caltonpet, Jakkarpalayam in Palladam Taluk, Pusari patti in Pollachi Taluk and Lakshamapuram and other places in Udumalpet taluk.

Other Minerals

Indication of copper and other sulphide minerals are noticed in Avinashi Taluk. The District abounds in hard rocks which are being quarried at many places for road and building construction. Kankar is being quarried locally at many places in Palladam and Udumalpet Taluks.

Soil

The major portion of Coimbatore district is constituted by the red variety of sand and gravel. In most parts of the District the sub soil is rocky. Only in very limited areas one can see black and red soils. The fine soil being of loamy variety requires only little irrigation and this type of soil is found only in very few areas of the District. Viz., Coimbatore, Pollachi and Udumalpet taluks and it is fit for cotton cutivation.

Agriculture

Coimbatore District is considered as an Industrial District, but it is no way behind in agriculture. In Coimbatore District, there are two seed farms situated in Pongalur and Pappankulam. There are 4 Agricultural Extension Centers at Annur, Thudialur, Valparai and Chokkanur. Dry crops like cereals and pulses formed a good percentage of the cultivated area. Rice which needs good soil and irrigation do not form the main produce of Coimbatore, even through it is cultivated in areas like Pollachi and Udumalpet taluks and to a lesser extent in Coimbatore Taluk.

Coimbatore District is famous for cotton output. Cotton occupies an important role in the economy of the District. It is cultivated in an area of 17,425 hectares. The important varieties that are popular in Coimbatore are Combodia and Karunganni which have been replaced to a large extent by high yielding varieties, introduced by Agricultural Research Centre, Coimbatore. Cotton is generally cultivated in the black soils tracks of Coimbatore taluk, in large parts of Palladam and in the garden areas of Avinashi.

The Chinchona Department, a commercial wing of Government of TamilNadu, is mainly engaged in cultivation of Chinchona and production of Quinine. The Chinchona planting was suspended on account of poor demand and low prices. Now the department is focused to develop Aaromatic and Medicinal plants, production of valuable drugs and aromatic oils of commercial value. The cultivation of plantation crops like tea, coffee, cardamom and pepper have provided more employment opportunities of the rural population of hilly region of Coimbatore District.

The Tamil Nadu Agriculture University came into existence on 1st June, 1971. The genesis of Agricultural Education in the state dates back to 1868 when it was initiated at Saidapet, Chennai. This Agricultural University offers educational programmes at the under graduate and post graduate levels in Agriculture, Horticulture, Agricultural Engineering, Forestry and Home science besides undertaking extension education activities through various technology transfer programmes.

There are 18 regulated markets in Coimbatore District.

Horticultural Crops

In 1998-99, the area under various horticultural crops in the district are as follows.

Crops	Area in Hectares	Production in MT
1.Banana	7,561	261,041
2.Onion	2,537	33,542
3.Turmaric	2,910	16,254
4.Mango	2,795	17,215
5.Chilies	2,700	3,357

Sericulture

The total area under mulberry cultivation as on 1.4.2000 was 569.19 hectares. The area under irrigation was 569.19 hectares. The total production of reeling cocoons was 3194 Mts, which was valued at Rs.319.40 lakhs. The production of raw silk in the same year was 0.336 Mts valued at Rs.403.45 lakhs.

Irrigation

Most of this district is hard rocky terrain and groundwater potential of the district is very limited. Deep open wells reaching 30metre depth are common in Avinashi and Palladam taluks. The water from

the black soil and Kankari tracts in parts of Palladam, Avinashi and Coimbatore Taluks are some what blackish.

Major sources of water supply for irrigation in this District are as follows.

Irrigation Source	Number / Length
Canals	42/527
Irrigation Wells	94,625
Tube Wells	9,165
Reservoirs	9
Tanks	77

The chief source of irrigation in this district are canals, a few rain fed tanks and a number of wells. The later playing a significant role in the irrigation of area. The fine soil being of the loamy variety requires only little irrigation. This type of irrigation normally exists in Coimbatore, Pollachi and Udumalpet. The rain fall in this region is much less than the adjoining districts. TamilNadu has almost exhausted the surface water for irrigation. Agriculture Engineering department is very much engaged in popularisation of improved water saving systems like sprinkler and drip irrigation. The centrally sponsored scheme for popularisation of drip irrigation system in TamilNadu is in operation in this district also.

Animal Husbandry

Coimbatore is famous for cattle wealth. The Animal Husbandry Department undertakes the supply of pedigree bulls for breeding. The key village scheme, the establishment of Artificial Insemination Centre is being run in the district. Jersy bulls, Sindhi cows and Graded buffaloes are famous in this district. In TamilNadu as a whole, there are 107 Veterinary Hospitals of which 14 are in Coimbatore District. There are 38 Veterinary Dispensaries, 124 sub-centres, 1 mobile unit, 1 A.D.I.V.S, 2 clinical centers and 100 Rinderpest squads in Coimbatore District. Among the drought animals Kangeyam breed of Bulls is a matter of pride for this District but also outside the state. The white revolution has been a success in this District.

Fishery

There is not much scope for Fishery Development in this district. Due to the formation of Fishermens Cooperative, new techniques are adopted in this inland district. There are number of Primary Fishermens Cooperative Societies functioning in Mettupalayam, Pollachi and Udumalpet Taluks.

Industries

Coimbatore is a major urban center in the State with a strong industrial base. The factors contributing to this phenomenon are: availability of power supply, suitability of its lands for growing cotton and in consequence are establishment of cotton ginning, spinning and weaving mills and its salubrious climate. Coimbatore is famous for its handloom fabrics. Kovai cotton sarees have good demand in the markets in all over India. Among important weaving centers at Coimbatore are Ondipudur, Singanallur, Vadavalli, Negamam, Tiruppur etc., Coimbatore's economy is further sustained by cottage industries which are practiced on a large scale in this district.

There are sizeable number of big and small cotton spinning mills in and around the district. The major industries are Associated Cement company in Madukkarai, South India Viscose Ltd, Sirumugai,

Lakshmi Machine works and Textool Company in Coimbatore and Amaravathy sugar mill in Udumalpet. Apart from these big industries, there are 300 large and medium scale industries in Coimbatore District.

The first Cotton Spinning and Weaving Mills was set up in Coimbatore District in 1888. The rapid growth of Textile Industries has helped the growth of industries engaged in the manufacture of Machinery and Tools for the use of Textile Industry. The demand for machines and tools has led to the establishment of factories for the manufacture of these items in demand.

The establishment of "SITRA" (The South India Textile Research Association) and "SIMA(The South Mill Association) about 5000 hosiery units are involved in export of apparels in Tiruppur. The ancillary units viz, Bleaching, Deying, Stream Calendering, Finishing etc., are also functioning in and around Trippur City. Rapid modernization, introduction of Computer Controlled production units, latest infrastructures etc, are being provided to cope with the global competition in the export front.

Trade and Commerce

There were 413 commercial bank branches in this district as on 31.3.1999; 40 were located in rural areas and 373 in semi-urban and urban areas. The deposits as on the same date was Rs.5528.14 Crores. In addition, there were 78 cooperative banks, 197 agricultural credit societies, 100 non-agricultural credit societies and 25 other credit societies in the rural area of the district.

Transport and Communication

This District has a good network of roads. Town buses connect all important places in and around the town. Taxies and Maxi cabs are also available. Apart from the normal buses run by Tamil Nadu Government Transport Corporation and Private Companies, number of mini buses operated by private operators connect interior places of the district with nearby towns. Coimbatore is connected by rail route from all important Indian cities. Recently, Coimbatore found a place in International Air map. Because of its industrial importance, volume of air traffic has steadily gone up. There are 4 Highways passing through Coimbatore District. These are Coimbatore to Madurai via Pollachi and Udumalpet, Coimbatore to Tiruchirapalli which passes through Palladam, Kangeyam and Karur. Another National Highway is Udhagamandalam to Mettupalayam. The fourth National highway connects Coimbatore and Mysore passing through Sathyamangalam. Total length of Highway in this district is 312 Kms and length of State highway is 3,528 Kms. There were 37,403 commercial vehicles and 5,80,426 non-commercial vehicles registered in Coimbatore District in 1999-2000, as detailed in the above table.

All the towns and 365 villages (out of 400) in this district have bus facilities. There are also 11 Railway stations in the rural area of the district. Total length of rail track in Coimbatore District is 365 Kms. The broad guage line between Chennai and Coimbatore junction is fully electrified.

Electricity and Power

In Coimbatore District, 47.41% of population live in rural areas. Therefore, rural electrification is a key factor in the Socio-Economic transformation of the State. Special importance is always assigned for rural electrification with the twin objectives of increasing the standard of living of rural population by bringing within the reach the amenities of the electricity and also to bring about a green revolution in agriculture though lift irrigation by electricity pump sets and thus

increase the food production, besides providing more employment opportunities to the rural population, especially agricultural labourers.

There are Hydel Power Generating units under Parambikulam-Aliyar Projecct. The unique pumped storage power house located inside the mountains (Tunnel Power house) is at Kadamparai in Anamalai Hills generating hydel power. The power needs are mostly met by Hydel power generated in the near by Nilgiris District (Kundha Power Houses).

The total of 861 million units of electricity is generated in the district during the year, of which 643.22 million units is through hydro-electric power generation and 218.11 million units is through wind mill generation. The hydro-electric power generation is through the Solar Power House, Sarkarpathy Power House, Kamdambarai Power House and Navamalai Power House. The maximum Electricity is consumed by the Industrial sector followed by domestic and agricultural sectors.

In the district as a whole there are 40 Government Hospitals with bed facilities. The Coimbatore Medical College Hospital is provided with all latest sophisticated diagnostic tools. There are 48 Primary Health Centres and 334 Primary Health Sub-Centers in Coimbatore District.

There are Multi Speciality Hospitals equipped with latest diagnostic Gadgets. The Kovai Medical Centre Hospital, G.K.N.M. Hospital, Ramakrishna Hospital, K.G.Hospital, United Hospital, Arvind Hospital, Coimbatore Kidney Centre Hospital, Vedanayagam Hospital, Moses Gnanabharanam Eye Hospital etc., are some of them. The people from nearby states like Kerala and Karnataka are benefited by these hospitals due to the geographical nearness of Coimbatore to them.

Education facilities

There are 1,974 primary schools (1,112 in rural areas and 862 in urban areas), 618 middle schools (278 in rural areas and 340 in urban areas), 335 secondary schools (120 in rural areas and 215 in urban areas), 192 senior secondary schools (49 in rural areas and 143 in urban areas), 34 colleges (in urban areas), 9 industrial and training schools (both in rural areas) and 3 other literacy centers in the district. Only 22 villages in the district had no educational facility.

Apart from the above educational institutions there are 14 technical colleges. One agriculture University cum Research center, Bharathiar University, two Medical colleges, one Law college, one Air force Administrative College, one Home Science University and One Forest College are established in the district. Besides these Institutions, the following research institutes are also located in Coimbatore, viz., Sugarcane Breeding institute, Botanical Survey of India, Central Institute for Cotton Research, UPASI Tea research institute, Institute of Forest and Genetics Tree Breeding, South India Textile Research Association and Salim Ali Centre for Ornithology and Natural History.

Engineering Colleges and Polytechnics

There were 20 Polytechnics in this district out of this 2 Government, 7 Government aided and 11 self-financing respectively. There are 13 Engineering Colleges in the district.

Fair Price Shops

There were 1,501 fair price shops in this district. 1,258 of this were full-time and 243 part-time. Of this, the Tamil Nadu Civil Supply Corporation runs 62 shops and 1434 are run by the co-operative department. This district also has 5 women fair price shops.

Post and Telegraph

It was reported that 348 villages had post offices and 18 had both post and Telegraph Offices in the distrct. The table below gives the comparative picture of 1991 and 2001.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. but if such

built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban

area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex Ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those

carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASFR}_{15\text{-}19}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASMFR}_{15\text{-}19}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration, Internal and International migration, Impact of migration.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly a person

is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal And International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) CENSUS 2001 FINDINGS

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February, 2001 i.e. the census provides a snapshot of the population of the country, as it existed at the midnight of 28th February, 2001. Actual enumeration was spread over a period of 20 days from 9th to 28th February, 2001 followed by revisional round up to 5th March, 2001 for up dating of the population figures with reference to the midnight of 28th February, 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the census operations. Thereafter, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EB).

The second major step was the house listing operation, which was carried out in this District during April, 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the houselisting operation. Houselisting operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

DISTRIBUTION OF POPULATION IN RURAL AND URBAN AREAS

In 2001, the total population of Coimbatore District was 4,271,856; and the rural population was 1,451,653 and the urban population was 2,820,203. In 1991, these were 3,508,374, 1663381 and 1,844,993 respectively.

The following tables shows the taluk level distribution of population in Total, Rural and Urban areas of Coimbatore District. The Coimbatore South taluk has come out with the highest population of 1,332,789 and lowest population recorded in the Valparai taluk (95,107). Among the taluks in Rural population, Pollachi taluk tops with (314055) followed by Udumalaipettai (263,305), Palladam (238,601) and Avanashi taluk (193,808). Coimbatore North has recorded the lowest rural population of 84,185. Comparing the population of Urban area of Coimbatore South taluk ranks with first position with 1,236,333 followed by Tiruppur taluk (540,745), Coimbatore North (265,040) and Pollachi (230,139). In Urban population, Avanashi taluk has recorded the lowest with 58,945.

The table B gives the number and percentage of inhabited villages in specified population size ranges with related population in rural areas of Coimbatore District. Out of 401 villages, 47.9% of the villages has been recorded in the population range of 2000-4999 followed by 20.5% in 1000-1999, 20.2% in 5000-9999, 5.2% in 500-999, 2.2% in 200-499 and 2.0% in less than 200.

SIZE, CLASS AND STATUS OF TOWNS

Out of 79 Urban areas in Coimbatore District there are 54 Statutory Towns (1 Municipal Corporation and 4 Municipalities and 59 Town Panchayat) and 15 Non-Statutory towns. Among the statutory towns one Municipal Corporation, 3 Municipalities and 3 Town Panchayats, fall under Class II, 21 Town Panchayats fall under Class IV and 19 Town Panchayats fall under Class V and one Census Town fall under Class VI. The table below given to explain the size, class and status of the towns in the district.

The percentage of decadel variation of the total population during 1991-2001 in the district has been recorded as 21.8%. In urban population, 52.9% growth is recorded whereas in rural population a negative growth is noticed (-12.7%) which may be due to the increase in urban fold owing to change in urban definition.

Table D: DECADAL GROWTH OF POPULATION

Name of District	1991			2001			% Decade Variation			Percentage Urban	
	T	R	U	T	R	U	T	R	U	1991	2001

DENSITY OF POPULATION AND SEX RATIO

The density of population in this district was 572, higher than the State level (480).

TABLE E: DENSITY AND SEX RATIO

	Density	Sex Ratio
Tamil Nadu State	480	987
Coimbatore	572	963

The sex ratio (i.e., females per 1000 males) of the district was recorded as 963, less than the state level (987) during Census 2001 census.

LITERACY

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. Like 1991 Census, all children of age 6 years or less are treated as illiterates although they may be going to school and can read and write a few odd words. During 1981 Census this limit was upto the age of 4 years. It had also been decided in the 1991 Census to use only effective literacy rates i.e. the ratio of literates and population excluding the age group of 0-6 years.

The literacy rate of the district was 76.97%, higher than literacy rate of the State (73.45%). The literacy rate for males was lower than females. The female literacy stood at 85.00% as compared to 65.23% for males.

TABLE F: LITERACY

State/District	P	M	F
Tamil Nadu	73.45	66.21	85.23
Coimbatore District	76.97	65.23	83.00

ECONOMIC ACTIVITY

TABLE G: ECONOMIC ACTIVITY

Name of the District	Persons/ Males/ Females	Main Workers	Marginal Workers	Non Workers
1	2	3	4	5
Tamil Nadu	Persons	38.1	6.6	55.3
	Males	51.9	5.7	42.4
	Females	24.0	7.5	68.5
Coimbatore	Persons	42.8	3.5	53.7
	Males	60.1	3.1	36.8
	Females	24.8	3.9	71.3

The Table G shows that the proportion of the Total workers, Main Workers and Marginal Workers is higher among Males and proportion of Non-Workers. Females is higher than males. The proportion of Main workers is higher in respect of Males than Females where as the proportion of Marginal Workers and Non-Workers are more in females than in males.

It can be seen from the below table the Main Workers forms 42.8% and Non Workers which stands 53.7%. The Marginal Worker figure is almost below 5%. The 2001 Census recorded 46.3% as the total Workers, 42.8% as the Main Workers, 3.5% as Marginal Workers and 53.7% as Non Workers.

WORK PARTICIPATION RATE

The Work Participation rate for total workers is defined as the percentage of total workers to total population.

TABLE H: WORK PARTICIPATION RATE

Name of the District	Total/ Rural/ Urban	Work Participation Rate
Coimbatore	Total	46.3
	Rural	54.1
	Urban	42.3

The total work participation rate of the district was 46.29%. In rural areas, it was 54.07% and 42.29% in Urban areas.

SCHEDULED CASTES AND SCHEDULED TRIBES

TABLE I : SCHEDULED CASTE AND SECHEDULED TRIBE POPULATION

Name of the District	Total/ Rural/ Urban	Total Population	Total Scheduled Castes Population (percentage)	Total Schedulaed Tribes Population (percentage)
Coimbatore	Total	4,271,856	630,675 (14.8)	29,103 (0.7)
	Rural	1,451,653	310,714 (21.4)	19,559 (1.3)
	Urban	2,820,203	319,961 (11.3)	9,544 (0.3)

The above table reveals that Scheduled Caste population in Coimbatore District was 14.8% and Scheduled Tribes population was 0.7% in 2001. It also gives the Scheduled Castes and Scheduled Tribes population in rural and urban areas of the District by actual and percentage.

RELIGION

In our country, many religions have thrived and every Census have attempted to provide an interesting picture of the religious persuasions and belief of the people of the country.

The following table shows the main religious communities between rural and urban areas of major religions in Coimbatore district.

TABLE J : DISTRIBUTION OF POPULATION BY RELIGION

Religion	Total	Rural	Urban
Hindus	3,847,969	1,403,411	2,444,558
Muslims	227,734	20,806	206,928

2001	986	992	980	963	976	957

Note : Sex ratio has been defined here as the number of females per 1000 males.

This table provides the sex ratio for the State as well as for the district from the Census year of 1901 to 2001. The sex ratio was high for both the state and district during the earlier decades since 1901 to 1951 but gradually decreased during the decades 1961 to 2001. In 2001, the sex ratio for the state and the district were 987 and 963 respectively. The rural sex ratio returned slightly higher than the urban sex ratio since 1901 to 2001 in respect of both the state and the district except the Census year of 1901.

This table shows the number of households availing banking services and number of households in the district. Nearly 50% of the households own Radio/Transistor. Telephone is largely used in Coimbatore South and North, compared to other Taluks. Motorcycle and scooter were owned by large numbers.

(ix) Major Social and Cultural events, natural and administrative developments and significant activities during the decade.

A few social welfare scheme are being implemented in this district. The old-age pension scheme is common in this district. The other schemes such as aid to pregnant women, aid for poor women marriage and to handicapped persons are being implemented in this district. The Samathuvapuram scheme was initiated for all community/caste at one place. Each Samathuvapuram has been formed with all facilities such as school, ration shop etc.

(x) Brief description places of religious, historical, or archelogical importance in villages and places of tourist interest in Coimbatore District.

Forest College, one of the oldest institutions, is situated 3.5 kms north of the railway station. The college museum is worth visiting.

G.D. Naidu Industrial Exhibition is also situated in the name of the late Thiru G.D. Naidu who was a technocrat. This industrial exhibition provides the invaluable contribution to technical, electronic, mechanical and agricultural sectors.

Anamalai Wild Life Sanctuary is at an altitude of 1400 metres in the Western Ghats near Pollachi (about 90 kms. away from Coimbatore.) The area of the sanctuary is 899 kms. It has various kinds of fauna like elephant, gaur, tiger, panther, sloth, bear, deer wild bear, wild dog, porcupine, flying squirrel, jackal, pangoline civet cat and birds namely rocket tailed drainage, red-whiskered bulbul, black head oracle tree pie, spotted dove, green pigeon, etc. The Amaravathy reservoir in the Animals has a large number of crocodiles. There are also many places of scenic beauty such as Kaainshola. Anaikunthi Shola, grass hills, water-falls, groves, teak forests, estates, dams and reservoirs. Arrangements are available at Topslip to take tourists round the sanctuary on elephant back or by van.

Siruvani Water-falls and Dam are located at distance of 37 kms west of the city. The water of Siruvani is known for its taste. The panoramic view of the dam and the falls are of enchanting beauty.

Pollachi town is about 40 kms from Coimbatore on the way to Parambikulam, Aliyar Project, Next to Coimbatore, it is the leading town of the district and an important commercial centre. A temple dedicated to Mariamman and another to Subramanya are located here. There are beautiful stone carvings like five-hooded serpent, chain from Yali mouth and zodiac signs in the Subramanya temple.

Vellingiri-Kailash of the South

Vellingiri, on the western ghats, 35 Kms. from Coimbatore stands revered as the Kailash of the South. The Temple at the foot of the mountains is dedicated to Vellingiri Andavar and Manonmani Amman. On the peak of the seventh (last) hill, a shrine for Lord Shiva with a stone-decorated Linga, is worshipped. The Yatra to Vellingiri is almost as strenuous as that to Mount Kailash in the Himalayas. From February to May it is a popular picnic and trekking spot for the youngsters of Coimbatore and the surrounding areas. The climb begins after close of the day, in cool moonshine so that one reaches the Seventh Hill during the early hours of the day. It is tedious to climb first three hills. A bath in the cool "Aandi" spring on Sixth hill reduces fatigue. It is also ideal to rest down hill. There are special Poojas, the poor will be fed. Women and disabled devotees usually confine their trip to the temple at the base of the mountains. The rear herbs found in the Seventh hills are said to keep one young throughout the year. Vellingiri too has a puranictale. When the Devas and Rhishis attended Dakshayagna, Lord Shiva cursed them and vanished in the Vicinity of Vellingiri. The accursed going in search of him, did penance at Palani, bathed at Bhavani sangam of Kongunadu and by the grace of Lord Sarveeswaran found him at Vellingiri and begged to be excused. It is also believed that it was here that Lord Shiva danced at the request of Umadevi and Arjuna was blessed with the "Pasupathastaram". Recently "Dhiyanalingam", the all religion prayer centre was consecrated and dedicated to the humanity, in the foot hills.

Sri Patteeswaraswamy Temple

This Temple is situated 7 Kms. from Coimbatore west near Noyyal river. It is dedicated to Lord Shiva, and popularly known as "Patteeswarar" and his

consort "Pachainayaki". The sculptures in the Kolumandapam (Hall) "Kanagasabai" attract tourists. This temple is also known as Melaichidambaram. The Patteeswarar temple was built by the famous king "Karikal Cholan".

Maruthamalai Temple

This temple is dedicated to lord Muruga, the presiding deity is known as "Dandayuthapani". This Temple is located on a hillock 12 Kms. from Coimbatore Railway Station.

Thirumoorthy Temple and Panchalingam Falls

It is built at the foot of Thirumoorthy hills adjoinning the Thirumoorthy dam. This is about 20 Kms. from Udumalpet on the highway from Palani to Coimbatore. A Perennial stream flows by the side of the Sri Amalingeswarar temple and alongside there is a water fall.

Sri Avanashi Lingeswarar Temple

Avanashi is known as South Banaras (Tenkasi) since the popular belief is that the Swayambulingam in the above temple sprang from the roots of Kasi Viswanathar. The old name of this place was Pukkoliyur, where Saint Sundarar brought back to life the 15 years old boy who was devoured by a crocodile five years earlier. The Swayambulingam which is installed in the temple was originally hidden by a bush and was discovered when the cows gave their milk of their own accord to the bush where Lord was dwelling.

The deity is known as Avanashi Lingeswarar and His consort is Sri Karunambigai. The Temple was built by the Cholas in the middle of the 12th century. Later renovations and additions have been made by the Pandyas, Hoysalas and rulers of Mysore.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Coimbatore, the third largest city of the state, is one of the most industrialized cities in Tamil Nadu, known as the textile capital of South India or the Manchester of the South. The city is situated on the banks of the river Noyyal. Coimbatore existed even prior to the 2nd or 3rd century AD by Karikalan, the first of the early Cholas. Among its other great rulers were Rashtrakutas, Chalukyas, Pandyas, Hoysalas and the Vijayanagara kings. When Kongunadu fell to the British along with the rest of the state, its name was changed to Coimbatore and it is by this name that it is known today, except in Tamil, in which it is called Kovai.

(xii) Scope of Village and Town Directory

Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of Revenue villages, their location numbers, their area, population, number of households, amenities such as educational,

medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village. Village is a statutory recognized unit having a definite boundary and separate land records. The villages which are considered as Census Towns, the amenities data are shown in the Town Directory.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code and area of the village. The land use data for such villages are shown in col. 19 to 23.

Town Directory

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements to be included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities. Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation**.** The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed

presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward***** level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Taluks/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

ANNEXURE II

FERTILITY AND MORTALITY MEASURES

FERTILITY LEVELS

In demography, the word fertility is used in relation to the actual production of children or "occurrence of births specially live birth". Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age.

In other words, it is a major component of population growth. In 1991 Census, questions of fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. Similar informations were also gathered in 2001 census but they are not readily available.

SELECTED INDICATORS ON FEMALE NUPTIALITY, 1991

State / District	Total / Rural / Urban	Mean age at marriage of currently married women			Percentage of currently married women with age at marriage below 18		
			Who married during			Who married during	
		Total	1981-86	1986-91	Total	1981-86	1986-91
Tamil Nadu	T	19.1	19.3	19.7	31.6	28.2	24.5
	R	19.0	19.1	19.3	32.2	30.2	27.8
	U	19.3	19.7	20.3	30.4	24.4	18.6
Coimbatore	T	19.6	19.8	20.3	25.5	22.0	17.2
	R	19.6	19.7	20.0	24.2	23.2	19.5
	U	19.6	19.9	20.6	26.8	20.8	15.3

In the above table, presenting the female age at marriage relates to all women who are living with their husbands. Some of them might be recently married and some of them decades ago. In view of this, the figures mentioned in the table should be regarded as indicating the situation for the population as a whole.

It is observed from the above table that the mean age at marriage of currently married females in Coimbatore District was 19.60 years in 1991, slightly higher than the corresponding State level (19.12 years). In the rural areas also, same trend was found in the district when compared with those of the corresponding State level. The mean age at marriage of the currently married females has increased by about 0.48 years from 19.82 years who married during 1981 - 86 to 20.30years who married during 1986 - 91 in the district as is evident from the above table.

Presently, the statutory minimum age at marriage for females is 18 years. It is worth examining the proportion of the currently married females whose age at marriage was below this limit during the periods 1981 - 86 and 1986 - 91 and afterwards. It is observed from the table that this proportion has decreased from 21.95% during 1981 - 86 to 17.20% in 1986 - 91 in the district, lower than the corresponding state level. Same trend was found in case of rural and urban areas also.

CHILD MORTALITY LEVELS

It is observed from the following table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981.

ESTIMATES OF CHILD MORTALITY INDICATORS BY SEX

State / District		Tamil Nadu		Coimbatore	
Year		1991	1981	1991	1981
Persons	q(1)	54	104	46	100
	q(2)	58	103	48	90
	q(3)	61	114	55	95
	q(5)	67	132	58	113
Males	q(1)	55	114	51	123
	q(2)	57	110	54	99
	q(3)	61	116	56	103
	q(5)	64	134	59	118
Females	q(1)	51	93	40	78
	q(2)	60	96	46	81
	q(3)	62	111	48	87
	q(5)	70	131	52	107

The estimates presented here below have been obtained using the data on the number of children ever born and number of children surviving to ever married women for the periods 1981 and 1991, this latest available information on questions on children ever born and children surviving canvassed to all ever married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dyeing before age (i) = 1, 2, 3 and 5.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out are based on the F-series tables of 1991 and 1981 Census pertaining to Tamil Nadu and Coimbatore district are given below.

ESTIMATES OF FERTILITY INDICATORS

State / District	Year	CBR	TFR	TMFR	GFR	GMFR
Tamil Nadu	1981	32.0	3.9	5.5	123	169
	1991	26.4	3.1	4.8	99	136
Coimbatore	1981	27.8	3.2	4.9	104	146
	1991	22.5	2.5	4.2	80	111

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Coimbatore District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in Coimbatore District, all the above mentioned rates from 1981 to 1991 have declined. Similar trend is observed in Tamil Nadu State also. On comparing the district level data with the State level data in the above table, it is observed that all the above mentioned rates at the district level are lower than those at the State level except TMFR in 1991.

Different fertility measures indicate that mostly all the fertility levels in the district are lower compare to the state average during 1991. This is duly supported by the higher age at marriage of females in the district compared to the state as is evident from the above table.

One of the most useful indices that can be derived from the question on numbers of children born alive is the average number of children ever born alive per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born per ever-married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women.

IMPORTANT INDICES OF FERTILITY - 1991

Fertility Indices	Coimbatore			Tamil Nadu		
	Total	Rural	Urban	Total	Rural	Urban
Number of children ever born per ever married women in age group 45 - 49	3.1	3.0	3.3	3.4	3.4	3.6
Child - women ratio (0-4 years)	267	255	277	348	369	311
Child - women ratio (5-9 years)	352	338	365	447	462	418

In the above table, average number of children born per ever-married women in the age group 45 - 49 in 1991 has been presented for total, rural and urban areas for Coimbatore District and Tamil Nadu. It is observed from the above table that the number of children ever born per ever-married women in rural and urban areas of Coimbatore District were found almost same.

Child - women ratio, a relative measure, is calculated to know the fertility performance of women. It is seen from the above table that child - women ratio in rural areas is lower than the urban areas in Coimbatore District.

ANNEXURE IV

DISTRIBUTION OF POPULATION BY PLACE OF BIRTH / PLACE OF RESIDENCE

MIGRATION

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

INTERNAL AND INTERNATIONAL MIGRATION

The migrational movements are of three types; (i) Migration within the state itself with its components: (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (interdistrict migration), (ii) Migration from one state to another state of the country (interstate migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

REASONS OF MIGRATION

As in 1991 Census, the reasons for migration were elicited in 2001 Census also. The reasons for migration were broadly categorized as (i) Employment / work, (ii) Business, (iii) Education, (iv) Marriage, (v) Moved after birth, (vi) Moved with household and (vii) Any other reason. Reasons for migration has been elicited only with reference to movement from place of last residence.

IMPACT OF MIGRATION

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUES RETURNED

MOTHER TONGUE

The definition of mother tongue is same as in 1991 Census. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf means the language usually spoken by the mother should be recorded."

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. There are 18 languages included in the Eighth Schedule to the Constitution of India (Scheduled Languages).
